1/ Includes anticipated transfers to the Department of Veterans Affairs of \$187.0 million in FY 2024 and \$178.0 million in FY 2025.

2/ Environmental Restoration and Drug Interdiction and Counter-Drug Activities: Defense accounts are executed in Service Operation and Maintenance accounts.

The Fiscal Year (FY) 2025 Operation and Maintenance (O&M) programs are aligned, to and continue to advance, the 2022 National Defense Strategy (NDS). The NDS identifies four top-level defense priorities. First, the Department will defend the Homeland, with the People’s Republic of China (PRC) as the Department’s pacing challenge. Second, the Department will deter strategic attacks against the United States, Allies, and partners. Third, the Department will deter aggression and be prepared to prevail in conflict when necessary. Fourth, the Department will ensure its future military advantage by continuing to build a resilient Joint Force and defense ecosystem.

OPERATION AND MAINTENANCE TITLE SUMMARY

The funding reflected in the subsequent exhibits support these priorities.

The FY 2025 O&M budget authority request of \$338.1 billion represents an increase of \$8.2 billion (3.6 percent) compared to the FY 2024 requested amount of \$329.9 billion. Price growth and inflationary adjustments to civilian pay, contracts, supplies, travel, and other categories account for much of the Service and Defense Agency budget increases. The budget funds day-to-day activities and actions, overseas operations, readiness training and exercises, and continuous engagement and collaboration with our Allies and partners to advance our shared interests. The budget continues to prioritize people by funding programs such as suicide prevention, civilian harm mitigation and response, child and youth programs, and community programs. The budget progresses the Department toward achieving full-spectrum readiness across the joint force and advances the Department's multi-pronged, multi-year approach to building a more lethal and ready force with targeted investments in training and operations, equipment, maintenance, munitions, modernization, and infrastructure. The FY 2025 programs support combatant command exercises and engagements to increase joint training capabilities, reassure allies, and provide U.S. presence.

The FY 2025 Army O&M programs decrease overall by \$0.6 billion to \$71.7 billion. The FY 2025 O&M, Army Active (OMA) budget decreases by \$0.4 billion from the FY 2024 request, mainly due to a \$913.8 million reduction in Operating Forces driven by a \$877 million decrease in Overseas Operations Costs. There is a decline in Operation Enduring Sentinel requirements, and resources are reallocated from European Deterrence Initiative exercises to strengthen efforts in the Indo-Pacific theater. The budget aligns with the Army's priorities of people, readiness, and modernization, supporting Soldier well-being, readiness, and lethality. This budget enables the Army to "Defend the Nation," "Succeed Through Teamwork," and "Take Care of People" in support of the National Defense Strategy and the transformation to the Army of 2030.

The FY 2025 Navy O&M programs increase overall by \$2.7 billion to \$76.4 billion. The FY 2025 O&M, Navy (O&M, N) budget request of \$75.0 billion reflects a net increase of \$2.8 billion from the FY 2024 requested funding level. The primary drivers include inflation rates, civilian pay raises, fuel pricing, and reimbursable rates for the Defense and Navy Working Capital Funds. The FY 2025 budget delivers the resources necessary to operate, build, train, and equip a combat-credible, dominant naval force to keep the sea lanes open and free, deter conflict, and, when called upon, decisively win our nation's war.

The FY 2025 Marine Corps O&M programs increase overall by \$0.3 billion to \$10.9 billion. The FY 2025 O&M, Marine Corps (O&M, MC) budget request of \$10.6 billion reflects a net increase of \$0.3 billion from the FY 2024 requested funding level. The increase is primarily driven by inflation rates, strategic replacement of protection ensembles, sustainment costs for Enterprise IT End Users' Devices and Services and multiple Endurance systems, investments supporting Force Design initiatives, equipment, support for the Pacific Deterrence Initiative, and modernization and expansion of cyberspace activities. The budget request targets acceleration and fortification of Force Design and addresses necessary modernization targets by providing an integrated Navy and Marine Corps plan that builds an enduring advantage to deter aggression through a persistent presence with allies and partners in the maritime domain to prevail in conflict and buys the Joint Force decision space with the implementation of the Stand-in Force concept.

The FY 2025 Air Force O&M programs increase overall by \$2.1 billion to \$76.2 billion. The FY 2025 O&M, Air Force (O&M, AF) budget request of \$64.6 billion reflects a net increase of \$1.9 billion from the FY 2024 requested funding level. The budget funds

OPERATION AND MAINTENANCE TITLE SUMMARY

readiness and sustainment of fielded forces and continued support to allies and partners. The budget resources flying hours supporting air forces that provide airlifts, air refueling, special air missions, and aeromedical evacuations. The budget provides resources for the modernization of network infrastructure to strengthen cybersecurity posture and enable worldwide training and exercises to build a more lethal and combat-ready Air Force. The budget also invests in Airmen's' resilience, well-being, quality-of-life, and family programs.

The FY 2025 Space Force O&M programs increase overall by \$0.3 billion to \$5.3 billion. The FY 2025 O&M Space Force (O&M, SF) budget request totals \$5.3 billion. The resources requested for FY 2025 allow the U.S. Space Force to build an exceptional force with next-generation space warfighting capabilities. The growth in FY 2025 updates vital infrastructure to support the mission, enhances warfighting skills for our Guardians, and increases the ability to protect and defend mission systems by aligning people and providing space support to the Component Commands. The FY 2025 budget postures the U.S. Space Force to further establish, maintain, and preserve the United States' freedom in the space domain.

The O&M Defense-Wide (O&M, DW) funding request supports critical Department-wide functions that support the National Defense Strategy for the Secretary, Military Departments, and warfighters. The funding pays for common information services and system sustainment, contract administration and audits, family support programs, and administrative functions for the Military Departments. This funding also supports the activities of the United States Cyber Command (USCYBERCOM), the United States Special Operations Command (USSOCOM), numerous Combat Support Agencies, policy and oversight Agencies, and three Intelligence Agencies.

The FY 2025 Defense Agency programs increase overall by \$3.4 billion to \$97.6 billion. The program increases include a program increase of \$70.4 million to Defense Human Resource Activity (DHRA), \$124.9 million to the Department of Defense Education Activity (DoDEA), \$41.7 million to the Missile Defense Agency (MDA), \$168.6 million to the Office of the Secretary of Defense (OSD), \$55.6 million to White House Services (WHS), and \$55.4 million to USCYBERCOM.

The FY 2025 Defense Health Program (DHP) request of \$40.3 billion reflects an overall increase of \$1.9 billion from the FY 2024 requested funding level of \$38.4 billion. The primary increases to the FY 2025 budget request are a net \$1.8 billion increase in O&M (of which \$1.3 billion in FY 2025 results from price growth, and \$0.5 billion is attributed to net program increases), a \$41 million increase in RDT&E, and a \$17 million increase in procurement.

OPERATION AND MAINTENANCE TITLE SUMMARY

RATE CHANGES

Working Capital Fund rates change by business activity group and vary from year to year. The following list of FY 2025 rate changes are composite rates that will vary based on the specific purchase categories. This list represents those business areas that account for the vast majority of orders from O&M customers. The FY 2025 budget submission assumes a composite standard fuel price of \$152.46 per 42-gallon barrel (bbl) and an increase over the FY 2024 price of \$147.84/bbl.

	Total	63,611.7	-4,057.1	59,554.6	-402.1	59,152.5

Numbers may not add due to rounding

1/ FY 2023 includes \$9,537.0 million in Overseas Operations Costs (OOC) and \$3,675.4 million in Ukraine Supplemental funding.

2/ FY 2024 includes \$7,914.1 million in OOC budget request.

3/ FY 2025 includes \$7,385.4 million in OOC budget estimate.

The Fiscal Year (FY) 2025 Operation and Maintenance, Army (OMA) budget decreases by \$402.1 million from the FY 2024 request, mainly due to a \$913.8 million reduction in Operating Forces driven by a \$877 million decrease in Overseas Operations Costs. There is a decline in Operation Enduring Sentinel requirements, and resources are reallocated from European Deterrence Initiative exercises, to strengthen efforts in the Indo-Pacific theater. The budget aligns with the Army’s priorities of people, readiness, and modernization, supporting Soldier well-being, readiness, and lethality. This budget enables the Army to “Defend the Nation,” “Succeed Through Teamwork,” and “Take Care of People” in support of the National Defense Strategy and the transformation to the Army of 2030. Using the Regionally Aligned Readiness and Modernization Model (ReARMM), the Army synchronizes unit collective training readiness levels to meet global demands, enabling force modernization. The commitment remains to answer the Nation’s call, address domestic and international demands, and prioritize people, readiness, and modernization. This budget ensures the Army can compete, win, and meet current and future challenges.

Additional information and details can be found within the Operation and Maintenance, Army FY 2025 President’s Budget at:

<u>Budget Activity</u>	<u>Budget Activity Title</u>	<u>FY 2023¹ Actual</u>	<u>Change</u>	<u>FY 2024² Estimate</u>	<u>Change</u>	<u>FY 2025³ Estimate</u>
01	Operating Forces	59,696.8	2,053.5	61,750.3	1,669.0	63,419.3
02	Mobilization	1,605.1	47.5	1,652.7	816.6	2,469.3
03	Training and Recruiting	2,649.8	201.2	2,851.0	62.8	2,913.8
04	Administration and Servicewide Activities	6,329.7	-339.1	5,990.5	229.6	6,220.2
	Total	70,281.4	1,963.2	72,244.5	2,778.0	75,022.6

Numbers may not add due to rounding

1/ FY 2023 includes \$3.3 billion in Overseas Operations Cost (OOC) and \$1.4 billion in Ukraine Supplemental funding.

2/ FY 2024 includes \$1.7 billion in OOC budget request.

3/ FY 2025 includes \$0.7 billion in OOC budget estimate.

The Fiscal Year (FY) 2025 Operation and Maintenance, Navy (O&M, N), budget request of \$75,022.6 million reflects a net increase of \$2,778.0 million from the FY 2024 requested funding level. The primary drivers include inflation rates, civilian pay raises, fuel pricing, and reimbursable rates for the Defense and Navy Working Capital Funds. In addition, the budget invests in quality-of-life initiatives for Sailors, Marines, and civilians. This budget reflects the consistent priorities of Columbia Nuclear strategic deterrence, readiness, modernization, and capable capacity to implement the National Defense Strategy and build upon force design initiatives. Overall, the FY 2025 budget delivers the resources necessary to operate, build, train, and equip a combat-credible, dominant naval force to keep the sea lanes open and free, deter conflict, and, when called upon, decisively win our nation's war.

Numbers may not add due to rounding

1/ FY 2023 includes \$171.3 million in Overseas Operations Cost (OOC) and \$75.1 million in Ukraine Supplemental funding.

2/ FY 2024 includes \$96.1 million in OOC budget request.

3/ FY 2025 includes \$81.7 million in OOC budget estimate.

The FY 2025 Operation and Maintenance, Marine Corps (O&M, MC) budget request of \$10,562.8 million reflects a net increase of \$280.9 million from the FY 2024 requested funding level. The increase is primarily driven by inflation rates, strategic replacement of protection ensembles, sustainment costs for Enterprise IT End Users' Devices and Services and multiple Endurance systems, investments supporting Force Design initiatives, equipment, support for the Pacific Deterrence Initiative, and modernization and expansion of cyberspace activities. Overall, the budget request targets acceleration and fortification of Force Design and addresses necessary modernization targets by providing an integrated Navy and Marine Corps plan that builds an enduring advantage deter aggression through a persistent presence with allies and partners in the maritime domain, prevails in conflict, and buys the Joint Force decision space with the implementation of the Stand-in Force concept. The Marine Corps will sustain training to address advanced and persistent threats, remain the nation's forward postured force, conduct crisis response, and perform various peace making/keeping activities.

1/ FY 2023 actuals include \$7.0 billion for Overseas Operations Costs (OOC) and \$1.0 billion for Ukraine.

2/ FY 2024 estimate includes \$5.8 billion in OOC budget request.

3/ FY 2025 estimate includes \$4.7 billion in OOC budget estimate.

The Fiscal Year (FY) 2025 Operation and Maintenance (O&M) budget request of \$64,617.7 million reflects a net increase of \$1,867.6 million from the FY 2024 requested funding level. The budget funds readiness and sustainment of fielded forces and continued support to allies and partners. The budget resources flying hours supporting air forces that provide airlifts, air refueling, special air missions, and aeromedical evacuations. The budget provides resources for the modernization of network infrastructure to strengthen cybersecurity posture and enable worldwide training and exercises to build a more lethal and combat-ready Air Force. The budget also invests in Airmen's' resilience, well-being, quality-of-life, and family programs. The budget provides additional resources to support energy upgrades and promote suicide and violence prevention programs.

<u>Budget Activity</u>		<u>FY 2023¹ Actual</u>	<u>Change</u>	<u>FY 2024² Estimate</u>	<u>Change</u>	<u>FY 2025³ Estimate</u>
01	Operating Forces	11,292.5	1,434.5	12,727.0	64.5	12,791.5
03	Training and Recruiting	327.0	8.4	335.4	13.5	348.9
04	Administrative and Servicewide Activities	51,768.2	-12,063.0	39,705.2	1,330.3	41,035.5
	Total	63,387.7	-10,620.1	52,767.6	1,408.3	54,175.9

Numbers may not add due to rounding

1/ FY 2023 includes \$4.8 million in Overseas Operations Costs (OOC) and \$12.5 million in Ukraine Supplemental funding.

2/ FY 2024 includes \$3.8 million in OOC requested.

3/ FY 2025 includes \$2.8 million in OOC budget estimate.

The Operation and Maintenance (O&M), Defense-Wide (DW) funding request supports critical Department-wide functions that support the National Defense Strategy for the Secretary, Military Departments, and warfighters. The funding pays for common information services and system sustainment, contract administration and audits, family support programs, and administrative functions for the Military Departments. This funding also supports the activities of the United States Cyber Command (USCYBERCOM), the United States Special Operations Command (USSOCOM), numerous Combat Support Agencies, policy and oversight Agencies, and three Intelligence Agencies.

Highlights of Defense-wide Fiscal Year (FY) 2025 program changes include:

The Defense Human Resource Activity (DHRA) contains a program increase of \$70.4 million. This request supports the Defense Civilian Human Resource Management System (DCHRMS) modernization and Defense Civilian Personnel Data System (DCPDS) sustainment initiative. It enables the Defense Manpower Data Center (DMDC) to procure cloud infrastructure, software licenses, and labor for system sustainment. It also supports legislated changes and cybersecurity upgrades that must be maintained to keep the system operational. In addition, it accelerates the configuration of remaining requirements to support DCHRMS full operational capability deployment to enable DCPDS to be decommissioned in FY 2025.

The Department of Defense Education Activity (DoDEA) contains a program increase of \$124.9 million. This request supports the Suicide Prevention and Response Independent Review Committee (SPRIRC) recommendations to address stigma and other barriers to care by implementing targeted strategies to use non-medical counseling programs.

The Missile Defense Agency (MDA) contains a program increase of \$41.7 million. This budget request funds the Army Navy/Transportable Radar Surveillance (AN/TPY-2) repair and return, spares, obsolescence mitigation, Gallium Nitride

DEFENSE-WIDE

Transmit/Receive (GaN) Integrated Microwave Module (T/RIMM) upgrades, and infrastructure for maintenance, operations, and sustainment to support the radar fleet. This funding addresses significant maintenance requirements for an aging fleet with increasing operational workload under harsh environmental conditions.

The Office of the Secretary of Defense (OSD) contains a program increase of \$168.6 million. This request supports the growth of the Advana data analytics platform. Advana increases support for data engineering and services development supporting analytics and artificial intelligence (AI), including application programming interfaces (API) for data sharing, ontologies, data labeling, feature storing, and federated data and model cataloging. The funding also supports data integration and layer/mission command application for the Advancing Data and AI Initiative and the Assistant Secretary of Defense's existing sustainment activities and expanded innovative capabilities, supporting six elements: 1) Logistics Systems Modernization; 2) Chief Financial Officers (CFO) Act Compliance; 3) Joint Logistics Enterprise; 4) Product Life-Cycle Sustainment; 5) Cost Effective Material Readiness; and 6) Travel. The request also includes funding to augment the Acquisition Integration and Interoperability office's stand-up and mature integrated acquisition management processes, including Integrated Acquisition Portfolio Reviews (IAPRs) and the Deputy Secretary of Defense's (DSD) Competitive Acquisition Pathfinders. Funding is also provided to initiate the DSD supply chain mapping effort to assess the health of the industrial base.

The White House Services (WHS) contains a program increase of \$55.6 million. This request reflects a one-time increase in modernization efforts for the Reservation Raven Rock Mountain Complex (RRMC). The RRMC provides support to enable the execution of DoD mission essential functions in accordance with continuity of operations plans. Facility and installation services include space management, facility operations, maintenance, repair and alteration, construction, custodial, physical security, property management, safety, health, environmental management, fire protection, and other support services.

The U.S. Cyber Command (USCYBERCOM) budget contains a program increase of \$55.4 million. This request builds on the FY 2024 transfer of resources from the Military Departments and DISA to consolidate cyber mission force capabilities resources under USCYBERCOM so that USCYBERCOM has control and authority over the Department's joint cyber mission force by enhancing USCYBERCOM mission capabilities.

Additional information and details can be found within the Operation and Maintenance, Defense-wide FY 2025 President's Budget at: <https://comptroller.defense.gov/Budget-Materials/FY2025BudgetJustification/#opandmaint>

SPACE FORCE

Funding Summary

<u>Budget Activity</u>		FY 2023¹ <u>Actual</u>	Change	FY 2024² <u>Request</u>	Change	FY 2025³ <u>Estimate</u>
01	Operating Forces	3,883.3	2,458.7	4,834.3	238.7	5,073.0
04	Administration and Servicewide Activities	207.6	24.4	183.2	36.1	219.3
	Total	4,090.9	2,434.3	5,017.5	274.8	5,292.3

Numbers may not add due to rounding

1/ FY 2023 includes \$54.8 million in Overseas Operations Costs (OOC) funding. FY 2023 excludes \$328.6 million of Air Force appropriation funding for U.S. Space Command.

2/ FY 2024 includes \$42.1 million for OOC. FY 2024 excludes \$327.9 million of Air Force appropriation funding for U.S. Space Command.

3/ FY 2025 includes \$20.9 million in the OOC budget estimate. FY 2025 excludes \$418.1 million of Air Force appropriation funding for U.S. Space Command.

The Fiscal Year (FY) 2025 Operation and Maintenance Space Force (SF) budget request totals \$5,292.3 million. The budget funds Global Command, Control, Communication, Intelligence, and Early Warning (C3I & Early Warning), Space Launch Operations, Space Operations, Education & Training, Special Programs, Depot Maintenance, Contractor Logistics Support (CLS) & Systems Support, Base Operating Support (BOS), Facilities Sustainment Restoration and Modernization, Logistics, Cyberspace Activities, and Administration. The resources requested for FY 2025 allow the U.S. Space Force to build an exceptional force with next-generation space warfighting capabilities. The growth in FY 2025 updates vital infrastructure to support the mission, enhances warfighting skills for our Guardians and increases the ability to protect and defend mission systems by aligning people and providing space support to the Component Commands. The FY 2025 budget postures the U.S. Space Force to further establish, maintain, and preserve the United States' freedom in the space domain.

Additional information and details can be found within the Operation and Maintenance, Space Force FY 2025 President's Budget at: <https://www.saffm.hq.af.mil/FM-Resources/Budget/>

RESERVE FORCES

Reserve Forces Operation & Maintenance Appropriations

\$ in Millions

	FY 2023¹ <u>Actual</u>	<u>Change</u>	FY 2024² <u>Estimate</u>	<u>Change</u>	FY 2025³ <u>Estimate</u>
Army Reserve	3,220.5	410.4	3,630.9	-270.1	3,360.8
Navy Reserve	1,275.2	105.6	1,380.8	-39.1	1,341.7
Marine Corps Reserve	342.8	-13.4	329.4	8.7	338.1
Air Force Reserve	3,673.5	442.8	4,116.3	57.5	4,173.8

Air National Guard	<u>7,282.8</u>	-29.1	<u>7,253.7</u>	150.0	<u>7,403.7</u>
Total	24,089.4	1,304.9	25,393.8	-130.1	25,264.2

Numbers may not add due to rounding

1/ FY 2023 includes \$80.9 million in Overseas Contingency Costs (OOC) and \$6.3 million in Supplemental funding for Disaster Relief.

2/ FY 2024 includes \$121.7 million for OOC budget request.

3/ FY 2025 includes \$85.7 million for OOC budget estimate.

The requested budget resources the six Reserve Components (RC) of the Army, Navy, Marine Corps, and Air Force to provide trained, ready, and cost-effective forces that can be employed on a regular operational basis while ensuring depth for large scale contingencies or other unanticipated national crises, both at home and overseas. The Department continues to rely upon the Guard and Reserve as a vital part of the operational force. Therefore, a robust and properly resourced RC is essential to the Department of Defense (DoD) mission. The RC adds substantial cost-effective value to the all-volunteer force and must continue to serve in an operational capacity – available, trained, and equipped for predictable routine deployments in addition to augmentation of strategic capacity. The Fiscal Year (FY) 2025 budget supports the preparation of both units and individuals to participate in missions across the full spectrum of military operation in a cyclic or periodic manner that provides predictability for the Combatant Commands, the Services, Service Members, their Families, and civilian employers; while increasing DoD’s capacity and ability to expand and contract forces.

RESERVE FORCES

Reserve Forces Program Data

Numbers may not add due to rounding

1/ FY 2024 reflects projected end strength levels.

2/ U.S. Direct funded FTEs.

The strong and adequately resourced Reserve Component (RC) forces continue to be essential to the accomplishment of the DoD mission. To effectively support the Active Component and connect with the Joint Force, the RCs must modernize simultaneously as the parent services upgrade legacy platforms, adding capabilities required for the future fight. The projected Total Selected Reserve force for FY 2025 of approximately 766 thousand members comprises about 38 percent of the total military end strength (2.042 million).

RESERVE FORCES

Army Reserve

The FY 2025 Operation and Maintenance, Army Reserve (OMAR) appropriation supports operations, logistics, engineering, administration, and management support capabilities for the Army Reserve. Additionally, the OMAR appropriation supports installation management, maintenance of real property, and personnel support to retirees, veterans, and their Families. Costs incurred in providing support include civilian pay, information systems, networks, telecommunications, supplies, fuel, equipment, and base operations support.

The Army Reserve’s FY 2025 budget request is \$3,360.8 million, a \$270.1 million decrease from the FY 2024 budget request. This is primarily attributable to Home Station Training Ground program decreases reflecting shifts in Army resourcing strategies and priorities to the Regionally Aligned Readiness and Modernization Model (ReARMM) in support of Directed Readiness Table (DRT) mission requirements. The Army Reserve’s current resourcing strategy focuses on supporting a competent, responsive, flexible, and enduring Army Reserve capable of providing essential combat enablers for the Joint Force. The changing global environment illustrates the relevance of today's Army Reserve—supporting missions in 23 countries worldwide. The FY 2025 request includes \$22.4 million of Overseas Operation Costs (OOC) supporting Enduring Other Theater Requirements and Related Missions.

RESERVE FORCES

Navy Reserve

The Operation and Maintenance, Navy Reserve (O&M,NR) appropriation provides for the cost of operating Navy Reserve forces and maintaining their assigned equipment at a state of readiness that will permit rapid employment in the event of full or partial mobilization and meet fleet operational support requirements. The Navy Reserve's mission is to deliver strategic depth and operational capability to the Navy, Marine Corps, and Joint Forces. In FY 2025, the Navy Reserve will continue to contribute significantly to the effectiveness of the Navy's Total Force.

The Navy Reserve's FY 2025 budget request is \$1,341.7 million, a \$39.1 million decrease from the FY 2024 request. This reduction is primarily attributed to lower costs for various aircraft (e.g., MH-60R, MH-53E, MH-60S, KC-130T) and contract maintenance. The cost of operating and maintaining Marine Reserve aircraft in the Fourth Marine Aircraft Wing is also funded by this appropriation. There are decreased costs for Marine Corps Reserve MV-22B, CH-53E, AH-1Z, UC-35D, F/A-18C, and F-5F, along with a reduction in 5,011 flight hours. These savings are partially offset by increased Aviation Logistics expenses due to higher Contractor Logistics for the KC-130J and MV-22 propulsion programs. The Navy Reserve operating force consists of aircraft, combat support units, expeditionary warfare assets, and their associated weapons. The Navy and Marine Corps Reserve average number of aircraft is 239 in FY 2025. The FY 2025 request includes \$2.7 million in OOC funding to support Enduring Other Theater Requirements and Related Missions.

Navy Reserve Program Data

	FY 2023 <u>Actual</u>	<u>Change</u>	FY 2024¹ <u>Estimate</u>	<u>Change</u>	FY 2025 <u>Estimate</u>

1/ FY 2024 reflects projected end strength levels.

2/ U.S. Direct funded FTEs.

3/ Includes TAI/PAA and flying hours flown by the Marine Corps Reserve.

RESERVE FORCES

Marine Corps Reserve

The FY 2025 Operation and Maintenance, Marine Corps Reserve (OMMCR) budget provides the day-to-day costs of operating the Marine Corps Forces Reserve (MARFORRES) and its functional activities and facilities. The Marine Corps Reserve is a full partner in the Marine Corps Total Force concept. The Reserve Component is trained, organized, and equipped in the same manner as the active force. It provides complementary assets enabling the Marine Corps total force to mitigate risk and maximize opportunities.

The MARFORRES FY 2025 budget request is \$338.1 million, a \$8.7 million increase from FY 2024 budget request. This is primarily due to price growth of \$5.7 million and \$3.3 million programmatic growth (slightly offset by minor decreases), mainly for the Marine Forces Reserve Consolidated Storage Program (inclusion project, and the Marine Forces Reserve Defense Property Accountability System-Warehouse Management implementation project. Like the active component, the Marine Forces Reserve consists of the Marine Forces Reserve headquarters and its subordinate Marine Division, Marine Aircraft Wing, and Marine Logistics Group, all headquartered in New Orleans, Louisiana. The Reserves are unique because the subordinate regiments/groups, battalions/squadrons, and companies/detachments are located at 158 reserve training centers and sites across the United States.

Marine Corps Reserve Program Data

Divisions	1	0	1	0	1
Training Centers	158	0	158	0	158

1/ FY 2024 reflects projected end strength levels.

2/ U.S. Direct funded FTEs.

RESERVE FORCES

Air Force Reserve

The funds requested for the Operation and Maintenance (O&M), Air Force Reserve appropriation are required to maintain and train units for immediate mobilization and provide administrative support for the Office of Air Force Reserve (Air Staff), Headquarters Air Force Reserve (Operational Headquarters), the Air Forces, and the Air Reserve Personnel Center.

The Air Force Reserve’s FY 2025 budget request is \$4,173.8 million, a \$57.5 million increase from the FY 2024 budget request. The increase is mainly driven by a \$211 million inflation adjustment, factoring in flying hour adjustments based on Headquarters Air Force FY 2025 Projections and manpower reductions. The FY 2025 budget request supports the National Defense Strategy and the President’s commitment to achieve increased readiness. It provides resources for Weapons Systems Sustainment, Base Support, Mission Support, and Facilities Sustainment, as well as new missions such as the F-35, MH-139, KC-46, F-16 aggressor, and combat rescue helicopter while continuing the operation of multiple legacy platforms. The FY 2025 request includes \$4.6 million in OOC funding to support Enduring Other Theater Requirements and Related Missions.

Air Force Reserve Program Data

RESERVE FORCES

Army National Guard

The Operation and Maintenance, Army National Guard (OMNG) appropriation supports operating and maintaining Army National Guard (ARNG) units in 50 States, three territories, and the District of Columbia. This budget supports Army Combatant Command requirements and fulfills a dual mission of supporting the warfighter while simultaneously defending the homeland against national, regional, and local threats and emergencies.

The ARNG FY 2025 budget request is \$8,646.1 million, a \$37.0 million decrease from the FY 2024 budget request. This decrease is primarily attributable to Home Station Training Ground program decreases reflecting shifts in Army resourcing strategies and priorities to the ReARMM supporting DRT mission requirements. The FY 2025 budget supports readiness and lethality by providing trained, ready, and cost-effective forces for operational missions and capacity to support strategic surge requirements for Large-Scale Combat Operations in a multi-domain environment or other unanticipated national crises. The ARNG will conduct two Combat Training Center rotations at two major training sites to build readiness that supports deterring adversaries around the globe and operating in a multi-domain environment as part of the Joint Force. Additionally, the FY 2025 request includes \$43.4 million in OOC funding supporting Operation Enduring Sentinel, Operation Inherent Resolve, and Enduring Other Theater Requirements.

RESERVE FORCES

Air National Guard

The Operation and Maintenance (O&M) appropriation funds the Air National Guard's federal mission, which is to maintain well-trained, well-equipped units available for prompt mobilization during war and provide assistance during national emergencies. O&M provides funds for operational support of the Air National Guard (ANG) and Total Force Integration (TFI) of Active, Guard, and Reserve units.

The ANG FY 2025 budget request is \$7,403.7 million, a \$150 increase from the FY 2024 budget request. This increase is primarily attributable to a \$372.3 million inflation adjustment, factoring programmatic decreases for mission support, Weapon System Sustainment, and Depot Maintenance. This budget request represents the funding required to support the National Defense Strategy and provide trained units to participate in the Expeditionary Air Force. The FY 2025 President's Budget submission funds 142,718 flying hours and supports an end-strength of 107,700 Air National Guard members focused on achieving increased readiness. The FY 2025 request includes \$12.6 million in OOC funding supporting Operation Enduring Sentinel.

COOPERATIVE THREAT REDUCTION PROGRAM

Appropriation Summary

\$ in Millions

	FY 2023	Change	FY 2024	Change	FY 2025
	<u>Actual</u>		<u>Estimate</u>		<u>Estimate</u>
Cooperative Threat Reduction	\$351.6	-\$0.6	\$351.0	-\$0.9	\$350.1

The Cooperative Threat Reduction Program (CTR) enables the Department of Defense (DoD) to work cooperatively with international and interagency partners to reduce or eliminate the threat of the proliferation of Weapons of Mass Destruction (WMD) or WMD-related materials. The CTR Program also facilitates detecting and reporting diseases that could be used as an early warning mechanism for disease outbreaks that could affect the Armed Forces of the United States (U.S.) or its allies, regardless of the source of such diseases. DoD derives authority to carry out the CTR Program through the Cooperative Threat Reduction Act (Public Law 113-291) and has used this authority to reduce chemical, biological, and nuclear threats to the United States and its interests worldwide. To accomplish this, the CTR Program includes several lines of effort: the Biological Threat Reduction Program (BTRP), the Proliferation Prevention Program (PPP), Global Nuclear Security (GNS), Chemical Security and Elimination (CSE), and Delivery System Threat Reduction (DSTR) (formerly Strategic Offensive Arms Elimination (SOAE)). These efforts facilitate the elimination and safe and secure transportation of WMD, weapon components, weapon-related material, and associated delivery vehicles. They also prevent the proliferation of WMD and WMD-related materials, technology, and expertise.

The Fiscal Year (FY) 2025 CTR budget estimate reflects an overall decrease of \$0.9 million compared to the FY 2024 President's Budget Request. This net decrease reflects the completion of one-time activities such as laboratory construction and reductions in individual stakeholder engagements to maximize the use of workshops.

The following table reflects the program structure and price and program changes from FY 2023 to FY 2025 for the CTR programs.

**Note: Numbers may not add due to rounding*

Biological Threat Reduction Program:

Eurasia

- Initiate biosafety, biosecurity, and biosurveillance engagement activities with Estonia, Latvia, and Lithuania based on threat reduction opportunities as identified in assessments;
- Conduct technical exchanges to improve the security of vulnerable laboratories and strengthen the ability to detect unusual biological events, including potential intentional spread;
- Provide biosafety and biosecurity engagement activities for Romania, including establishing a biorisk management training program and national committee;
- Complete construction of a Public Health Emergency Operations Center in Armenia;
- Reduce program activities to prepare for host-country sustainment in Armenia;
- Strengthen regional biosurveillance coordination, including implementation of multilateral biosurveillance studies;
- Monitor and support sustainment of biosafety, biosecurity, and biosurveillance capabilities that the Biological Threat Reduction Program has previously provided to partner nations across the Eurasia region and

COOPERATIVE THREAT REDUCTION PROGRAM

- Execute program efforts with Ukraine, including training, equipment, consumable procurement and delivery, regulatory reform, and biosurveillance studies.

Middle East and Central Asia

- Conduct bioscience fellowships to improve biosurveillance, biosafety, and biosecurity lab capacity and build regional scientific networks;
- Complete multilateral Biological Threat Reduction Forum meetings among Gulf Cooperation Council member states;
- Position partners to coordinate and sustain future Gulf Cooperation Council Forum activities;
- Conduct biorisk management workshops for Iraq;
- Strengthen Kazakhstan's role as a regional leader by supporting biosurveillance and laboratory management exchanges with regional partners;
- Monitor and support sustainment of biosafety, biosecurity, and biosurveillance capabilities that the Biological Threat Reduction Program has previously provided to partner nations across the Middle East and Southwest Asia region;
- Complete biosafety, biosecurity, and biosurveillance equipment and training at Jordanian laboratories; and
- Prepare Jordanian partners to sustain provided capabilities and lead regional biosurveillance activities.

Indo-Pacific

- Expand the network of regional biological experts within Asia that can enhance collaboration for the detection of endemic and emergent pathogens;
- Implement biological threat reduction and laboratory capacity sustainment in Southeast Asia;
- Conduct multi-sectoral exercises to prepare for countering emergent biological threats in the Republic of Korea;
- Foster multilateral dialogues throughout Southeast Asia;
- Conduct bilateral Track 1.5 biosecurity dialogues with India;
- Initiate bilateral dialogues in Vietnam;
- Conduct multilateral studies to build the capability to detect emerging highly pathogenic diseases;
- Train regional partner nations to plan, organize, and execute a series of workshops and technical exchanges, integrating country-level capabilities into operational multilateral partnerships;

COOPERATIVE THREAT REDUCTION PROGRAM

- Engage regional partners, such as Australia and Japan, and national and international organizations to improve multi-sectoral partnerships between health and security entities during an infectious disease outbreak;
- Initiate transition of Cambodia from bilateral capacity building into host-nation sustainment;
- Provide biosurveillance, biosafety, and biosecurity facility and equipment upgrades in the Philippines;
- Support Vietnam-led biorisk management train-the-trainer program and strengthen Vietnam's position as a regional leader in biorisk management;
- Improve and enhance biosafety, biosecurity, and biorisk management, epidemiological, and diagnostic capabilities through facility renovations, equipment procurement, and capacity-building at key partner hospitals and laboratories in Indonesia; and
- Transition self-auditing training capabilities to the Science & Technology Research Institute for Defence, positioning them to become a national auditing authority.

Africa

- Initiate biosafety, biosecurity, and biosurveillance engagement activities with Burundi, Mozambique, Rwanda, and Zambia based on threat reduction opportunities as identified in assessments;
- Execute laboratory and training facility construction for the African Union's Pan Africa Veterinary Center (AU PANVAC) and in South Africa;
- Improve the Laboratoire National de l'Elevage et de Recherches Vétérinaires in Senegal to include construction/renovation, equipment, training, and operations support;
- Improve the National Reference Laboratory in Liberia to include construction/renovation, equipment, training, and operations support;
- Initiate laboratory facility construction in Gabon;
- Provide biosafety and biosecurity improvements and laboratory renovations in Nigeria;
- Conduct biorisk management training and standard operating procedures implementation in Gabon, Kenya, and South Africa;
- Enhance pathogen diagnostics and reporting in South Africa and Kenya;

COOPERATIVE THREAT REDUCTION PROGRAM

- Engage multilaterally with partner country researchers to improve coordination as well as understanding of endemic and early warning of emergent biological threats;
- Engage regional partners and organizations to improve multi-sectoral partnerships between health and security elements during an infectious disease outbreak and
- Initiate regional workshops with international health organizations to strengthen human and veterinary disease surveillance policy and preparedness.

Chemical Security and Elimination:

Global

- Increase U.S. preparedness for chemical weapons contingency elimination operations, including improvements to existing elimination systems, operational logistics, and demonstration of processes and material solutions.

Indo-Pacific

- Enhance the chemical unexploded ordnance response capability solutions in coordination with United States Forces Korea initiatives for the overall Republic of Korea explosive ordnance disposal interoperability; and secure, account for, transport, and/or destroy chemical weapons on the Korean peninsula;
- Sustain a train-the-trainer capability for the Philippines Strategic Trade Management Office strategic goods tracking system and related equipment; continue to assist with the implementation of a national-level chemical security framework; and
- Implement training programs in Indonesia and the Philippines to strengthen law enforcement agencies' ability to independently create and implement effective chemical countermeasures strategies.

Middle East and North Africa

- Assist Iraq with building and institutionalizing chemical security standards and best practices, and
- Provide training and expert exchanges to the Royal Moroccan Gendarmerie to increase mobile laboratory capabilities.

Delivery System Threat Reduction:

Global

- Advance preparedness for cooperative elimination of WMD delivery systems, infrastructure, and related materials, including disposition of interdicted delivery systems and related commodities and partner capability to secure technology and expertise.

COOPERATIVE THREAT REDUCTION PROGRAM

Global Nuclear Security:

Global

- Conduct logistics support for fissile material removal missions and increase preparedness and capabilities to rapidly respond globally to support nuclear weapons and fissile material removal missions in coordination with the Combatant Commands and U.S. interagency partners.

Eastern Europe and Eurasia

- Increase physical and material security at sensitive nuclear sites and provide training to forces responsible for weapons-useable nuclear materials in Kazakhstan and
- Provide nuclear security support to the Ukraine National Guard during the Russian invasion of Ukraine and potentially begin reconstitution of Ukraine's nuclear security and counter nuclear smuggling capabilities.

Indo-Pacific

- Cooperate with India on nuclear security workshops, best practice exchanges, training courses, table-top exercises, and related activities; and
- Enhance the capability of the Republic of Korea Nuclear Characterization Teams (NCT) by implementing the Combined Requirements Implementation Plan and following cycles of advanced NCT training.

Other Assessments/Administrative Costs:

- Provide U.S. Embassy and overseas office support, Advisory and Assistance Services, program management for worldwide DoD CTR Program contract logistics support (e.g., shipping, travel, and language translations services);
- Facilitate travel for DTRA senior leadership and other stakeholders in support of the DoD CTR Program;
- Conduct assessments, site surveys, and seminars with critical foreign partners in collaboration with the Combatant Commands and inter-organizational partners;
- Establish information resiliency for the DoD CTR program and combat foreign malign influence;
- Facilitate collaboration and synchronization to integrate CTR Program activities to enable the DoD, U.S. Government, and international partners to counter and deter WMD and
- Conduct DoD CTR Program Operational Evaluations, which ensures that DoD CTR Program assistance is used for the intended purpose and that such assistance is being used efficiently and effectively.

COOPERATIVE THREAT REDUCTION PROGRAM

Proliferation Prevention:

Eurasia

- Build allies and partners' ability to detect, attribute, and counter Russian WMD programs, thereby denying potential benefits of employing WMDs;
- Support equipment technology refresh of previously provided land border surveillance and communications capabilities and expand the border surveillance and communications capabilities to newly controlled border sectors in Armenia;
- Support sustainment of DoD CTR-provided WMD proliferation prevention command and control, communications, surveillance, interdiction, and response capabilities in Georgia; and
- Strengthen WMD detection and interdiction capabilities, enhance dual-use material investigation and prosecution capabilities, and strengthen the security and efficacy of port operations in Bulgaria and Romania along maritime and green borders.

Middle East and North Africa

- Complete sustainment activities for efforts along the Syrian and Iraqi borders in Jordan focused on preventing the illicit flow of WMD and WMD-related components and ensuring resilience in the event of a WMD incident;
- Support sustainment of DoD CTR-provided WMD proliferation prevention capacities in Lebanon;
- Sustain WMD detection and interdiction capabilities in Tunisia along their border with Libya;
- Build institutionalized training capacity for Iraqi Border Guard Forces in Iraq and assess requirements on the Arabian Peninsula to counter the spread of WMD from state-based actors and extremist organizations' threat networks; and
- Conduct activities with partners willing to build capacity to prevent the proliferation of dual-use technology, commodities, and knowledge.

Indo-Pacific

- Sustain existing efforts and provide training and mentoring that will better facilitate interagency coordination in the maritime domain in the Philippines;
- Enhance national maritime security and WMD detection capabilities and bolster regional proliferation prevention awareness and capabilities in Southeast Asia countries such as Malaysia and Indonesia and
- Initiate activities with partners willing to build capacity to prevent the proliferation of dual-use technology, commodities, and knowledge.

DEFENSE ACQUISITION WORKFORCE DEVELOPMENT ACCOUNT

Appropriation Summary

\$ in Millions

		FY 2023 <u>Actual</u>	FY 2024 <u>Estimate</u>	FY 2025 <u>Estimate</u>
President's Budget Request		53.8	55.0	56.2

	Congressional Mandates	5.0		
	Diversity STEM Talent Development	3.0		
Total Authority		111.8	55.0	56.2
Actual Obligations		111.7		

The Fiscal Year (FY) 2025 President’s Budget Request for the Defense Acquisition Workforce Development Account (DAWDA) supports Section 1705 of U.S. Code Title 10 and readiness of the Defense Acquisition Workforce (DAW) to ensure the DAW has the capacity, in both personnel and skills, needed to perform its mission properly, provide appropriate oversight of contractor performance, and ensure the Department receives the best value for the expenditure of public resources. The budget request supports the DAW at Defense Agencies and Field Activities (DAFAs) and the Defense Acquisition Workforce Improvement Act (DAWIA) implementation of a new DAWIA certification framework under DoDI 5000.66. It additionally supports hiring ten expert Visiting Faculty full-time equivalents under the FY 2020 National Defense Authorization Act (10USC1746b(3B)). The FY 2025 request maintains the DAWDA’s focus on acquisition workforce readiness through the Office of the Secretary of Defense and acquisition workforce initiatives at the DAFAs.

DEFENSE HEALTH PROGRAM

Treasury Receipts for Current Medicare-Eligible Retirees ⁴	11,853.1	+991.8	12,844.9	+821.1	13,666.0
Total Health Care Costs	50,703.1	+555.8	51,258.9	+2,681.0	53,939.9

Numbers may not add due to rounding

1/ FY 2023 Defense Health Program (DHP) actuals include 110.4 million for Overseas Operations Costs (OOC) and exclude funds transferred to VA for the Lovell Federal Health Care Center and the DoD-VA Joint Incentive Fund (\$183.0 million).

2/ FY 2024 DHP estimate includes \$230.9 million for OOC, \$172.0 million for transfer to VA for the Lovell FHCC, and \$15.0 million Joint Incentive Fund.

3/ FY 2025 DHP request includes \$220.5 million for the OOC budget estimate, \$163.0 million for transfer to VA for the Lovell FHCC, and \$15.0 million for the Joint Incentive Fund.

4/ Reflects DoD Medicare-Eligible Retiree Health Care Fund (MERHCF) O&M transfer receipts for FY 2023, FY 2024, and FY 2025 that support 2.6 million Medicare-eligible retirees and their family members.

5/ FY 2023 RDT&E includes Congressional medical research adds.

Description of Operations Financed:

The Fiscal Year (FY) 2025 Defense Health Program (DHP) request of \$40,273.9 million reflects an overall increase of \$1,859.9 million from the FY 2024 requested funding level of \$38,414.0 million. The primary increases to the FY 2025 budget request are a net \$1,802.2 million increase in O&M (of which \$1,291.6 million in FY 2025 results from price growth, and \$510.6 million is attributed to net program increases), a \$41 million increase in RDT&E, and a \$17 million increase in procurement.

The Military Health System (MHS) provides the DoD with a clinically ready medical force that can deliver medical capabilities in support of the National Security Strategy and the defense of our nation. The Army, Navy, and Air Force medical professionals work to enhance the lethality of our military forces and help ensure those in uniform are medically ready to deploy anywhere around the globe on a moment's notice. The MHS supports a broad portfolio of operational readiness requirements, which includes ensuring DoD medics are trained and prepared to support combat casualty care, disaster relief, global health engagement, and humanitarian assistance.

DEFENSE HEALTH PROGRAM

Complementing the MHS's operational role is the organization's global benefit mission that provides care to and improves the health of active duty and retired U.S. military personnel and their family members entrusted to its care. The MHS leverages a \$40.3 billion budget to support more than 132 thousand military and civilian staff delivering services in 46 hospitals, 573 medical clinics, and 115 dental clinics to 9.5 million beneficiaries around the globe. Key enablers for both aspects of the mission include the DoD medical school, the Uniformed Services University of Health Sciences (USUHS), plus a full spectrum of training platforms, graduate medical education programs, and research commands.

In FY 2025, the Department will continue its Military Health System (MHS) reform efforts by focusing on improving patient access to services by better integrating the direct and purchased care systems, continuing modernization efforts of the MHS to address the aging MHS Enterprise infrastructure, degraded MTF operational IT support, and mounting technical debt, and streamlining internal operations.

Additional information and details can be found within the Defense Health Program's FY 2025 President's Budget at <http://comptroller.defense.gov/Budget-Materials/>

1/ FY 2023 reflects the enacted amount in the Department of Defense Appropriations Act, 2023, transferred to the Military Departments and Defense Agencies. FY 2023 includes the transfer of \$2.7 million from the Drug Interdiction and Counterdrug Activities, Defense, 23/23, appropriation to the Operation and Maintenance, Army, 23/23, appropriation to support the Department of Homeland Security under 10 U.S.C. § 284.

2/ FY 2024 request includes \$2.5 million to be transferred from the Drug Interdiction and Counterdrug Activities, Defense, 24/24, appropriation to the Operation and Maintenance, Army, 24/24, appropriation to support the Department of Homeland Security under 10 U.S.C. § 284.

3/ FY 2025 request includes \$4.0 million to be transferred from the Drug Interdiction and Counterdrug Activities, Defense, 25/25, appropriation to the Operation and Maintenance, Army, 25/25, appropriation to support the Department of Homeland Security under 10 U.S.C. § 284.

DESCRIPTION OF OPERATIONS FINANCED:

The Drug Interdiction and Counterdrug (CD) Activities appropriation funds Department of Defense (DoD) programs and activities to support the continuing national priority to identify, interdict, disrupt, and dismantle those transnational criminal networks that pose the greatest threats to U.S. national security by targeting infrastructure, depriving them of enabling means, and preventing the criminal facilitation of terrorist activities and the malign activities of adversary states. The appropriation also supports DoD programs to promote and maintain a drug-free military and civilian workforce and work environment.

GLOBAL THREATS AND TRENDS:

Drug trafficking and other illicit threat networks continue to pose a serious and persistent threat to the security, health, and safety of the American people. These threats undermine the ability of the Department to fulfill key responsibilities: guarantee the security of the nation's citizens and the nation's territory, promote economic prosperity, and prioritize assistance to partners that are aligned with United States interest. Illicit threat networks that include terrorist, criminals, proliferators, and adversary states are presenting unprecedented asymmetrical threats to United States interests at home and abroad. It is only through a unified effort with interagency and foreign partners that we can address this complex national security, law enforcement, and public health problem.

DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

Transnational criminal organizations remain the greatest criminal threat to the United States: they control lucrative smuggling corridors to bring tons of illicit drugs across our borders every year. Transnational criminal organizations threaten United States interests by taking advantage of failed states or contested spaces; forging alliances with corrupt foreign government officials and some foreign intelligence services; destabilizing political, financial, and security institutions in fragile states; undermining legitimate commerce in world markets; and using cyber technologies and other methods to perpetrate sophisticated frauds. Today's criminal networks are fluid, striking new alliances with other networks around the world and engaging in a wide range of illicit activities, including support for terrorism and malign activities of state adversaries and non-state actors. Whether carried out by nation-states, state proxies, terrorist groups, or non-aligned organizations, the criminal activities perpetrated by these networks transcend law enforcement, intelligence community, and the national security spheres of action.

The worldwide production of synthetic opioids such as fentanyl, along with heroin, cocaine, and methamphetamine remains high. According to United States Centers for Disease Control and Prevention there were 106,699 drug overdose deaths in 2021. Mexican Transnational Criminal Organizations remain the greatest criminal threat to the United States and supply much of the fentanyl, heroin, cocaine, and methamphetamine that crosses the United States-Mexico border. The Sinaloa and the Jalisco New Generation Cartels, both with global reach, are the most powerful Mexican Transnational Criminal Organizations and dominate wholesale distribution of illicit drugs in the United States. China-based suppliers ship fentanyl and precursor chemicals to Mexico, Canada, and United States-based distributors, as well as sell fentanyl directly to consumers via the Dark Web. China and India are the primary suppliers of precursor chemicals necessary to produce methamphetamine, fentanyl, cocaine, and heroin. In Central America, gangs and other regional illicit networks conduct illicit drug smuggling and weapons trafficking. Gang violence and other criminal activity corrupts police, military, the judiciary, and other law enforcement agents despite police and judicial reforms. The Dominican Republic continues to grow as a key transshipment country for illicit drugs destined for the United States, where Dominican Transnational Criminal Organizations continue to expand operations.

Russia, China, Iran, and North Korea utilize blended forms of global competition, including criminal and cyber means, to achieve their national objectives. Russian and other Eurasian Transnational Criminal Organization groups continue to thrive within and outside their borders, including in the United States. The Russian government has shown a capacity and willingness to utilize criminal means to achieve Russia's global objectives, including the war in Ukraine. China's semi-permissive legal environment continues to provide a global Transnational Criminal Organization hub, which allows Chinese criminal organizations and other international illicit networks to conduct criminal activities and extend Chinese influence worldwide. A growing body of open-source and law enforcement reflections indicates China's role in permitting or enabling illicit activities, including economic crimes, money laundering, illicit drug trafficking, wildlife trafficking, trafficking in natural resources, and the illicit procurement of sensitive technologies. To support its global objectives, North Korea employs a complex overseas illicit financing and criminal procurement system designed to raise the funds and materials North Korea needs for its regime's security and weapons programs.

DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

The convergence of Transnational Criminal Organizations, terrorist organizations, and insurgent groups remain a national and global security concern. Terrorist and insurgent groups such as Islamic State of Iraq and Syria, the Taliban, al-Shabaab, and the Revolutionary Armed Forces of Colombia – People’s Army are among the non-state actors that leverage the use of violence and other illicit activities to undermine the security of the United States and other nations. Hezbollah is perhaps the most business-savvy terrorist organization; it relies on global facilitators engaged in illicit drugs, arms, counterfeit trafficking, and money laundering for financing and support.

Given the significant responsibilities of our military service members and civilian personnel, deterring and detecting drug abuse, and ensuring a drug-free workplace are essential to maintaining Department of Defense readiness. As illegal and prescription drugs have become increasingly available within our communities and more states legalize marijuana, a top Department priority is to resource responsive and effective deterrence programs to prevent illegal drug use and prescription drug misuse by the workforce.

STRATEGIC OBJECTIVES:

The Department's statutory mission to detect and monitor aerial and maritime transit of illicit drugs toward the United States remains a priority. By performing this mission, the Department of Defense helps deter, disrupt, and defeat potential threats before they reach the United States. This includes supporting interagency and international efforts to target Transnational Criminal Organizations at their source and building international partnerships to prevent transnational threat networks from undermining sovereign governments, undermining regional stability, and threatening United States interests. The priorities identified below address a range of functional and regional threats, including longstanding challenges posed by illicit drug trafficking, other forms of transnational organized crime, and transnational terrorism financed by illicit means.

The Department of Defense seeks to:

- Disrupt and degrade the flow of heroin, fentanyl, and amphetamine-type like stimulants, chiefly from Mexico, by fusing intelligence and disrupting links among Transnational Criminal Organizations, with a focus on the Sinaloa Cartel and Jalisco New Generation Cartel networks.
- Support interagency partners in stopping the flow of synthetic opioids such as fentanyl from China and elsewhere into the United States and disrupt and degrade the unlawful diversion and smuggling of chemical precursors from Asia to the Western Hemisphere.
- Build Colombia, Ecuador, and Peru's capacities to detect and interdict illicit trafficking, including drugs, precursor chemicals, and profits.
- Support efforts to sever Violent Extremist Organizations and Transnational Criminal Organizations sources of strength, including funding and supply chains, with a focus on Islamic State of Iraq and Syria, al-Qaeda, and Iran-affiliated organizations.
- Promote stability in Central America and the Dominican Republic through enhanced security across the air, land, and maritime domains to improve foreign partners' abilities to degrade drug trafficking and other illicit threat networks.

DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

- Disrupt and degrade the flow of Afghan heroin supporting terrorist and criminal groups, focused on the Taliban/Haqqani network, and the downstream illicit drug trade through East Africa by supporting partner-nation law enforcement agencies' ability to conduct land and maritime counter-drug and counter transnational organized crime operations.
- Disrupt illicit trafficking and related criminal networks that threaten European and Asian security by working with United States and foreign law enforcement and security services, focusing on Russian and Chinese affiliated Transnational Criminal Organizations.
- Support interagency and law enforcement partners to disrupt North Korean efforts to circumvent sanctions compliance and utilize illicit financial activities.

These priorities support the National Security Strategic Guidance, the National Defense Strategy, and the Department of Defense key responsibilities: guarantee the security of the nation's citizens and the nation's territory, enable United States interagency counterparts, and prioritize assistance to partners who are aligned with United States interests.

Overall Assessment:

The 2025 budget request of \$901.5 million represents an increase of \$15.1 million from the FY 2024 requested level of \$886.4 million. The FY 2025 request enables programs and activities that mutually support and mirror the Department's overall strategy to protect the homeland, deter adversaries, enable U.S. interagency counterparts, and prevent terrorism by focusing on its priorities.

Budget Activity 1: Counter-Narcotics Support

The *Counter-Narcotics Support* budget activity funds programs to detect and monitor the aerial and maritime transit of illegal drugs into the United States and supports intelligence and technology programs to collect, process, analyze, and disseminate information required for counterdrug operations. It also resources programs within the six geographic Combatant Commands' Areas of Responsibility to support United States and international law enforcement agencies' efforts to illuminate, disrupt, interdict, or curtail activities related to substances, material, weapons, or resources used to finance, support, secure, cultivate, process, or transport illegal drugs. Financed activities include, but are not limited to, the establishment and operation of bases of operations, transportation of personnel, supplies; small-scale construction, and intelligence analysis support provided to United States and international law enforcement agencies.

Budget Activity 1: Counterdrug Support – Major Program Changes: The FY 2025 Counterdrug Support budget request of \$653.7 million reflects a net increase of \$9.9 million of which \$13.7 million increase is for price changes, \$4.0 million increase is for the U.S. Army Corps of Engineers contract close-out costs for Southwest border Section 284 border barrier projects, and \$7.9 million decrease reflects reduced investment in lower end capabilities to appropriately align with the Department's priorities as outlined in the National Defense Strategy.

DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

Primary Authorities: 10 U.S.C. §124, §284, and §342; §1021 of the National Defense Authorization Act for 2005, as amended, and §1022 of the National Defense Authorization Act for 2004, as amended.

Budget Activity 2: Drug Demand Reduction Program

The *Drug Demand Reduction Program* budget activity funds programs to ensure the dangers of drug abuse and misuse within the Department of Defense are understood, prevented, identified, and treated to keep the fighting force at the highest levels of readiness. Prevention, education, and outreach programs focus on Department of Defense's military and civilian communities designed to raise awareness of the adverse consequences of illicit drug use and prescription drug misuse on job performance, safety, health, family stability, fiscal security, and employment opportunities. Programs include illicit drug awareness and life-skills training for Service members and their families with a focus on maintaining readiness by ensuring a drug free workforce and workplace. Outreach services include programs to assist military and civilian employees in locating Department of Defense and local civilian agency resources to address substance abuse, dependency, or addiction. In addition to prevention and outreach efforts, this budget activity funds personnel, supplies, and materials that support installation level random drug testing specimen collection for all military service members, civilian personnel in testing designated positions, and pre-employment testing for applicants for military and civilian service. The Department of Defense operates five forensic drug testing laboratories (U.S. Army, Fort Meade, MD; U.S. Army, Tripler AMC, HI; U.S. Navy, Great Lakes IL; U.S. Navy, Jacksonville, FL; and U.S. Air Force, Lackland, TX). These laboratories conduct urinalysis testing for the presence of illegal drugs, novel synthetic drugs, and unauthorized prescription medications listed in the Department of Defense drug test panel. Funding supports laboratory personnel costs and overhead expenses related to test reagents, disposable supplies, and support services. The Fort Meade forensic testing laboratory is certified by the Substance Abuse and Mental Health Services Administration to analyze specimens from Department of Defense Agency civilians and civilian applicants in testing designated positions under the Drug-Free Workplace Program. The Great Lakes, IL forensic testing laboratory processes urinalysis samples for all military applicants from 65 Military Entrance Processing Stations worldwide. The Lackland, TX forensic testing laboratory processes the majority of National Guard Bureau servicemembers.

Budget Activity 2: Drug Demand Reduction Program – Major Program Changes: The FY 2025 Drug Demand Reduction Program budget request of \$135.6 million reflects a net increase of \$1.3 million of which \$2.7 million increase is for price changes and \$1.4 million decrease reflects reduced investment in lower end capabilities to appropriately align with the Department's priorities as outlined in the National Defense Strategy.

Primary Authorities: 10 U.S.C. §978, 5 U.S.C. §7301.

Budget Activity 3: National Guard Counter-Drug Program

The *National Guard Counter-Drug Program* budget activity exclusively funds the Governors State Plans Program in the form of drug interdiction and counterdrug activities plans submitted by U.S. State Governors in accordance with 32 U.S.C. §112(c) and approved by the Secretary of Defense per 32 U.S.C. §112(d). Funds support State National Guard assistance to Federal, State, tribal, and local law

DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

enforcement agencies and community-based organizations in efforts to disrupt and degrade illicit drug production and trafficking within the United States. Funds may be used for the following expenses: pay, allowances, clothing, subsistence, gratuities, travel, and related expenses, as authorized by State law, of personnel of the National Guard of that State used, while not in Federal service, for the purpose of drug interdiction and counter-drug activities; Operation and maintenance of the equipment and facilities of the National Guard of that State used for the purpose of drug interdiction and counter-drug activities; and procurement of services and equipment, and the leasing of equipment, for the National Guard of that State used for the purpose of drug interdiction and counter-drug activities.

Budget Activity 3: National Guard Counter-Drug Program – Major Program Changes: The FY 2025 National Guard Counterdrug Program budget request of \$106.0 million reflects a net increase of \$3.7 million of which \$2.6 million increase is for price change and \$1.2 million increase is due to changes in the manpower mix of reserve component military personnel.

Primary Authorities: 32 U.S.C. §112.

Budget Activity 4: National Guard Counter-Drug Schools

The *National Guard Counter-Drug Schools* budget activity funds the operation of five National Guard Counterdrug Schools as authorized by §901 of the Office of National Drug Control Policy Reauthorization Act of 2006, as amended, and as identified in plans submitted by host State Governors to the Secretary of Defense in accordance with 32 USC §112(c). The five schools supported by the program are: 1) Midwest Counterdrug Training Center at Camp Dodge, IA; 2) Multijurisdictional Counterdrug Task Force Training program at Camp Blanding, FL; 3) Northeast Counterdrug Training Center at Fort Indiantown Gap, PA; 4) Regional Counterdrug Training Academy at Naval Air Station Meridian, MS and 5) Western Regional Counterdrug Training Center at Camp Murray, WA. The schools leverage existing Department of Defense infrastructure and capacity to provide no-cost counternarcotics training to Federal, State, Local, and Tribal Law Enforcement agencies, as well as community-based organizations and military personnel to enable them to disrupt, degrade, and defeat drug trafficking organizations and transnational criminal organizations that threaten United States national security interest and the public safety of United States citizens. Funds support reserve military pay for Army and Air National Guard personnel, supplies, maintenance, and other administrative costs.

Budget Activity 4: National Guard Counter-Drug Schools – Major Program Changes: The FY 2025 National Guard Counterdrug Program budget request of \$6.2 million reflects a net increase of \$0.2 million of which \$0.1 million is for price change and \$0.1 million increase is due to changes in the manpower mix of reserve component military personnel.

Primary Authorities: §901 ONDCP Reauthorization Act of 2006, as amended; 32 U.S.C. §112.

Numbers may not add due to rounding

1/ Represents requested funding only.

2/ Does not include \$30.0 million in reprogrammed funds available for use in FY 2024.

3/ Does not include funding for classified programs.

4/ Does not include \$124.5 million and \$0.7 million of prior year funds and land sale revenue available for use in FYs 2024 and 2025, respectively.

5/ Includes environmental funding for all DoD appropriations/funds, not only those funded in the Operation and Maintenance (O&M) accounts.

The Department of Defense (DoD) Environmental Programs address four overriding and interconnected goals: (1) to support the readiness of U.S. Forces by ensuring access to air, land, and water for training and operations; (2) to improve the quality of life of military personnel and families by protecting them from environmental, safety, and health hazards; (3) to ensure that weapons systems, logistics, installations, et al., have better performance, lower total ownership costs, and permissible health and environmental effects; and (4) to serve customers, clients, and stakeholders through public participation and advocacy. To help achieve these goals, the Department established its environmental program around five pillars - cleanup, compliance, conservation, pollution prevention, and environmental technology. The Fiscal Year (FY) 2025 budget request of \$4.3 billion is an increase of \$86.4 million from the FY 2024 requested funding level, which includes a price growth of \$88.3 million netted against a program decrease of \$1.9 million (less than 0.1 percent). The decrease reflects reductions in Environmental Compliance, Environmental Conservation, and Pollution Prevention, offset by increases in Environmental Restoration, Environmental Technology, and BRAC.

Environmental Restoration

The Defense Environmental Restoration Program (DERP) focuses on reducing the risks to human health and the environment while ensuring that DoD environmental cleanup policy conforms to existing laws and regulations. The DoD Environmental Restoration (ER) appropriations provide for the following at active installations and Formerly Used Defense Sites (FUDS) properties in the United States: the identification, investigation, and cleanup of releases of hazardous substances, pollutants, and contaminants from DoD activities; responding to unexploded ordnance (UXO), discarded military munitions, and munitions constituents at defense sites; correction of

ENVIRONMENTAL PROGRAMS

other environmental damage; and the demolition and removal of unsafe buildings, structures, and debris. In FY 1996, DoD employed a relative risk approach to environmental cleanup. This process enables the Department to prioritize cleanup activities at sites that pose the most significant risk to human health, safety, and the environment. The relative risk process is the key tool the Department uses to plan, program, and budget for, as well as execute, the cleanup program.

The Department funds its restoration program to ensure the Military Departments and Defense Agencies meet applicable statutes, regulations, Executive Orders, and other legal requirements and achieve DoD’s cleanup goals. As of the end of FY 2023, DoD has completed cleanup at 82 percent of its sites on active installations and FUDS properties.

Between FY 2024 and FY 2025, the Department’s DERP funding increases by \$49.7 million, reflecting a price growth of \$23.6 million and a programmatic increase of \$26.0 million (2.3 percent). The program growth of \$26.0 million is related to increases in Army (\$65.1 million) and Navy (\$1.3 million) funding, offset by decreases in Air Force (\$36.8 million), FUDS (\$3.2 million) and Defense-wide (\$0.4 million) funding.

The following table displays the ER Transfer appropriations:

ENVIRONMENTAL PROGRAMS

Environmental Compliance

The Department provides resources through its Compliance Program to comply with applicable requirements, such as federal and state environmental laws and regulations and local ordinances, for installations in the United States. In addition, the Compliance Program includes applicable environmental compliance, remediation, and planning requirements for installations outside of the United States. Under the program, DoD activities include sampling and analyzing pollutant discharges to air and water, maintaining environmental permits for regulated activities, providing safe drinking water, testing and remediation of underground storage tanks, and disposing of regulated waste. The program also includes projects to upgrade wastewater treatment facilities and install air pollution controls to meet new regulatory standards.

In FY 2025, the Environmental Compliance Program reflects a net decrease of \$37.4 million. This decrease reflects a price growth of \$37.2 million and a program decrease of \$74.6 million (4.2 percent). The program decrease of \$74.6 million is related to reductions in Army (\$27.2 million) funding for storage and disposal, Air Force (\$27.6 million) funding for compliance-related cleanup and storage and disposal, and Defense-wide (\$83.6 million) funding for miscellaneous compliance activities, planning, cross-cutting programs, and storage and disposal. The decrease is offset by increases in compliance funding for the Navy (\$25.8 million) and the U.S. Marine Corps (\$38.0 million).

1/ Does not include funding for classified programs.

Pollution Prevention

The Pollution Prevention Program targets the reduction of hazardous material, solid waste, toxic releases, air emissions, and water pollution at the source. In FY 2025, the Pollution Prevention Program reflects a net decrease of \$2.3 million. This decrease reflects a price growth of \$1.8 million and a program decrease of \$4.1 million (4.7 percent). The program decrease of \$4.1 million is related

ENVIRONMENTAL PROGRAMS

to decreases in Navy (\$4.0 million), Air Force (\$1.2 million), and Defense-wide (\$0.8 million) funding to address pollution prevention requirements. Army and U.S. Marine Corps Pollution Prevention Programs increased by \$1.8 million and \$0.1 million, respectively.

Environmental Conservation

The DoD is the steward of nearly 27 million acres of public lands. The protection, sustainment, management, and enhancement of the natural and cultural resources found on these lands and consultation with Indigenous populations are integral to mission support and readiness. The Department manages its natural and cultural resources and complies with existing laws (e.g., Endangered Species Act, Sikes Act, National Historic Preservation Act) to enable continued access to testing and training lands and ensure the long-term sustainability of the Nation’s natural and cultural heritage.

In FY 2025, the Environmental Conservation funding reflects a net increase of \$12.2 million. This increase reflects a price growth of \$14.5 million and a program decrease of \$2.3 million (0.3 percent). The program decrease of \$2.3 million is related to decreases in Navy (\$6.5 million) funding for archaeology and miscellaneous natural resources activities, Air Force (\$1.8 million) due to inflation, and Defense-wide (\$7.0 million) due to decreases in funding for miscellaneous natural resources activities. The decrease is offset by an increase in the Army (\$4.8 million) and U.S. Marine Corps (\$8.2 million).

Environmental Technology

The Department's Environmental Technology Programs harness the latest science and technology to improve DoD's environmental performance, reduce costs, and enhance and sustain mission capabilities. The Programs respond to environmental requirements that are common to all of the Military Services, complementing the Services' research programs. The FY 2025 request allows the DoD to continue environmental research, development, test, demonstration, and validation activities to provide technologies that result in direct operational savings, mitigate future liabilities, and permit the Department to meet its mission and environmental obligations more cost-effectively. In FY 2025, the Environmental Technology program reflects a net increase of \$6.0 million. This increase reflects a price growth of \$3.4 million and a program increase of \$2.6 million (1.7 percent). The program increase of \$2.6 million is related to increases in Army (\$1.7 million) and Defense-wide (\$2.9 million) funding, offset by a decrease in Navy (\$2.0 million) funding.

BRAC

The DoD strives to make the property available to local communities for redevelopment. In FY 2025, the BRAC environmental funding request reflects a net increase of \$58.2 million, excluding prior year funds and land sale revenue. This increase reflects a price growth of \$7.7 million and a program increase of \$50.5 million (13.8 percent). FY 2023 included the obligation of \$126.2 million of prior year funds and land sale revenue. In FY 2024, \$124.5 million of prior year funds and land sale revenue are available for execution.

Funding Summary *\$ in Millions*

FY 2023 ¹		FY 2024		FY 2025
<u>Actuals</u>	<u>Change</u>	<u>Estimate</u>	<u>Change</u>	<u>Estimate</u>
\$614.9	-\$500.0	\$114.9	\$0.4	\$115.3

1/The FY 2023 actuals include execution of funds provided for in Public Law (P.L.) 117-43 Operation ALLIES REFUGE (OAR) and P.L.117-70 Operation ALLIES WELCOME (OAW)

The Overseas Humanitarian, Disaster, and Civic Aid (OHDACA) appropriation funds Department of Defense (DoD) Humanitarian Assistance (HA) activities that build the capacity of a partner nation (PN) government to provide essential humanitarian services to the civilian population and support PN efforts to reduce the risk of, prepare for, and respond to humanitarian disasters thereby reducing reliance on international disaster relief assistance. OHDACA-funded programs offer a unique security cooperation tool for Combatant Commands (CCMDs) to gain access, visibility, and influence within their regions and achieve theater and U.S. national security objectives.

The **Humanitarian Assistance** program assures friendly nations and allies of our support and provides basic humanitarian aid and services to deprived populations. The DoD, and particularly the CCMDs, seek access to shape the military/civilian environment, help avert political and humanitarian crises, promote democratic development and regional stability, build local capacity, generate long-term positive perceptions of DoD by host nation civilian and military institutions, and enable countries to begin conflict recovery.

The **Humanitarian Mine Action** program, executed by the CCMDs, provides significant access, training, and readiness-enhancing benefits to U.S. military forces while contributing to alleviating the obvious, worldwide problem of Explosive Remnants of War (ERW), which includes landmines, unexploded ordnance (UXO), and small arms ammunition. The program allows U.S. military forces to hone critical wartime, civil-military, language, cultural, and foreign internal defense skills.

The **Foreign Disaster Relief** program, executed by the CCMDs, provides unique interagency support assistance during natural and man-made disasters for relief outside the U.S. and its territories. DoD’s ability to respond rapidly with extensive manpower, transportation, and communication capabilities assists in capability gaps that result in the containment of crises and limits threats to regional stability by assisting the U.S. Agency for International Development (USAID) with providing relief aid within hours or a few days of a disaster.

Narrative Explanation of Changes FY 2024 to FY 2025:

The FY 2025 budget reflects minimal change from the FY 2024 request. In FY 2025, there is a lower demand for medical supplies across the program due to decreases in PN COVID-19 cases.

Description of Operations Financed:

The Department of Defense (DoD) Office of Inspector General (OIG) promotes the economy, efficiency, and effectiveness of DoD programs and operations and the integrity of its workforce and operations through impactful audits, evaluations, investigations, and reviews. The DoD OIG recommends policies and process improvements that promote economy, efficiency, and effectiveness in DoD programs and operations. The Inspector General is the only DoD official authorized to issue opinions on the financial statements of the DoD.

The Fiscal Year (FY) 2025 OIG budget request of \$547.3 million consists of \$544.1 million in Operation and Maintenance, including \$2.0 million in Cyber, \$1.9 million in Research, Development, Test, and Evaluation, and \$1.3 million in Procurement. The FY 2025 request maintains staffing for the core DoD OIG program. The budget request enables the DoD OIG to continue its oversight efforts by completing audits, investigations, and evaluations of DoD programs and operations and produces quarterly reports on overseas contingency operations for which the DoD OIG has been designated the Lead IG. The request also includes funds for information technology modernization efforts, security support system, and overhead costs for the Council of Inspector General on Integrity and Efficiency.

SUPPORT FOR INTERNATIONAL SPORTING COMPETITIONS

Funding Summary *(\$ in Millions)*

Available Prior Year Carryover	FY 2023 <u>Enacted</u>	FY 2023 <u>Obligations</u>	Revised <u>Carryover</u>	FY 2024 <u>Request</u>	FY 2025 <u>Estimate</u>
3.720	10.377	0.892	13.205	0	0

The Support for International Sporting Competitions (SISC) Defense account is funded with a no-year appropriation that provides continuing Department of Defense (DoD) support to national and international sporting events that are either certified by the Attorney General or support specific organizations, such as the Special Olympics, Paralympics, and the United States Olympic and Paralympic Committee's (USOPC) Paralympic Military Program.

The Department is not requesting additional appropriated funds for FY 2025 as funds are still available from the FY 2015 and FY 2023 Department of Defense (DoD) Appropriations Acts. In FY 2024, the Department plans to support approximately 24 sporting events with an estimated cost of \$2.4 million from the unexpended balances from the FY 2023 DoD Appropriation Act. In FY 2025, the Department intends to support approximately 26 sporting events with an estimated cost of \$2.5 million from the unexpended balances from the FY 2023 DoD Appropriation Act. International Sporting Competitions planning cycles do not fully align with the Department of Defense budget cycle, which can result in requests for support in the year of execution.

These funds support safety, security, and logistical requirements for certain sporting competitions. Under the provisions of 10 U.S.C., Section 2564, the Department has the authority to assist Federal, State, or local agencies in support of civilian sporting events if the Attorney General certifies that such assistance is necessary to meet essential security and safety needs.

The Department can also provide support to the Special Olympics, the Paralympics, a sporting event sanctioned by the U.S. Olympic and Paralympic Committee through the Paralympic Military Program, and any national or international Paralympic sporting event that meets requirements outlined in 10 U.S.C. Section 2564, as amended by Public Law (P.L.) 110-181 Section 372. Support for these events does not require Attorney General certification.

The Department provides this support through the SISC appropriation while ensuring that no degradation to mission readiness occurs as a result of this effort. Such support is key to the national responsibility of ensuring the safety of competitors participating and visitors attending these events.

Total	15,913.5	-1,462.3	14,451.3	-248.7	14,202.6

Numbers may not add due to rounding

1/ FY 2023 includes \$3,118.4 million in Operations Overseas Costs (OOC) and \$1,434.9 million in supplemental Ukraine funding.

2/ FY 2024 includes \$2,612.2 million in OOC.

3/ FY 2025 includes \$2,420.6 million for the OOC Estimate.

The Land Forces program encompasses resources dedicated to training and sustaining the Department's land forces. Program funding is allocated within the Land Forces activity group (excluding Subactivity group (SAG) 116 Aviation Assets) for the Army's Active, Reserve, and National Guard Components and within the SAG 1A1A Operational Forces for the United States Marine Corps. The Fiscal Year (FY) 2025 President's Budget total request reflects a decrease of \$248.7 million, primarily attributed to a reduction in the Army's Home Station Training (HST) requirements. This funding decrease aligns with the Regional Aligned Readiness Modernization Model and the moderate projected changes in the Army force structure, addressing recruitment challenges and adapting to the evolving global security environment. Despite the decrease, HST continues to fully support the anticipated demand for Global Force Management and the Directed Readiness Tables.

ARMY

The Army Land Forces program is vital for providing Operating Tempo (OPTEMPO) resources to Active Component (AC) ground combat forces. These resources facilitate the execution of training and operations essential for maintaining readiness through Army Force Generation training strategies. The program utilizes live, virtual, and constructive capabilities to conduct training focused on multi-domain operations. The budget specifically supports unit-level tactical training, encompassing events executed and equipment operated for HST and Combat Training Center (CTC) rotations. Additionally, it covers unit costs for virtual training involving simulators like the Close Combat Tactical Trainer and the Unit Conduct of Fire Trainer.

LAND FORCES

LAND FORCES

The Army is fully committed to allocating necessary resources to train and prepare Soldiers, leaders, and units for current and future operations. In addition to funding unit training and associated costs (such as fuel, supplies, repair parts, travel, and transportation), Land Forces also allocate resources to fund the operation and training of ground units at the CTCs. This support aligns with a training strategy that offers Soldiers, from infantrymen to corps commanders, a comprehensive range of challenging, and realistic training events. In FY 2025, there is a decrease of \$615.8 million after accounting for inflationary price increases of \$155.9 million from the FY 2024 requested funding levels. The decrease is mainly driven by a reduction in HST informed by the Regional Aligned Readiness Modernization Model (ReARMM) and projected force structure change. Although HST decreases, the training is funded to achieve the Directed Readiness Table (DRT) and Global Force Management Allocation Plan requirements. There is also a reduction for the one-time FY 2024 increase of \$96 million for the Pacific Deterrence Initiative modernization and strengthening of presence.

The Army OPTEMPO ground metric, known as the Composite Mile, relies on a composite average of key units and vehicles conducting unit-level tactical training. This includes vehicles like the M1 Tank and M2 Infantry Fighting Vehicle in Armored Brigade Combat Teams (ABCT), Stryker Vehicles in Stryker infantry battalions, and the Up-Armored High Mobility Multipurpose Wheeled Vehicles in Infantry Brigade Combat Teams (IBCT) reconnaissance squadrons.

The Composite Mile metric calculation incorporates three key inputs: training strategies, force structure, and deployment offsets for ABCTs, IBCTs, and Stryker BCTs. This metric quantifies resourcing levels required for training, providing a comprehensive measurement of key units and equipment consuming OPTEMPO resources. The FY 2025 goal is to resource 1,060 Composite Miles to conduct unit-level tactical training, ensuring the Army can field a trained and combat-ready force capable of executing all assigned missions across the spectrum of conflict. The FY 2025 President's Budget decreases Ground OPTEMPO for non-deployed units from 1,137 composite miles in FY 2024 to 1,060 in FY 2025.

ARMY RESERVE

The Army Reserve Ground OPTEMPO allocates resources for Ground Tactical Vehicle Operations in various SAGs: 112 Modular Support Brigades, 113 Echelon Above Brigades, 114 Theater Level Assets, and 115 Land Forces Operations Support. The FY 2025 request reflects a decrease of \$84.3 million below the FY 2024 request, driven primarily by the Army's resourcing strategy and priorities for HST informed by the ReARMM and supports the DRT requirements. Further reductions result from the Army civilian manpower cuts to align capabilities with the Army of 2030. The Army Reserve's goal is to fund 864 composite miles in FY 2025, reflecting a decrease from 912 composite miles in FY 2024 request.

ARMY NATIONAL GUARD

The Ground OPTEMPO resources are to train and sustain the Army National Guard combat forces to build and maintain readiness while modernizing and recapitalizing key capabilities in support of the priorities directed by the Army and the Chief of the National

LAND FORCES

Guard Bureau. The budget supports readiness and lethality by providing trained, ready, and cost-effective forces for operational missions and capacity to support strategic surge requirements for large-scale operations or other unanticipated national crises. The FY 2025 request reflects an increase of \$242.9 million above the FY 2024 request. The growth reflects a transfer of 2,381 Military Technicians (MILTECHs) to Land Forces Operations for the centralization of OPTEMPO support for logistical support, ground maintenance support, and administration costs to support readiness capabilities and operational requirements. Accounting for the MILTECH transfer, the program decreases by \$41.1 million, driven primarily by the Army's resourcing strategy and priorities for HST informed by the ReARMM and supports the DRT requirements. The Army National Guard's goal is to fund 573 composite miles in FY 2025, reflecting a decrease from 662 composite miles in FY 2024 request.

MARINE CORPS

The Operational Forces compose the Marine Corps' core element, the Marine Air Ground Task Force (MAGTF). The MAGTF is a scalable, task-organized force generation construct that permits a composite assembly of forces from the four MAGTF elements—Command Element (CE), Ground Combat Element (GCE), Logistics Combat Element (LCE), and Aviation Combat Element (ACE)—to deploy ready forces in support of combatant commanders quickly. The scalable nature of the MAGTF offers tiered force and capability levels and provides a continuous forward presence via a Marine Expeditionary Unit (MEU), an amphibious capable and self-sustainable Marine Expeditionary Brigade (MEB), an enduring middleweight Marine Expeditionary Force (MEF), or a Special-Purpose MAGTF (SPMAGTF). The MAGTF is a balanced force structure that allows it to respond to the full spectrum of global conflicts, from conventional to irregular warfare, anti-access/area denial to regional deterrence, and security cooperation exercises to humanitarian relief.

The Operational Forces Subactivity group funds training and routine operations; maintenance and repair of organic ground equipment; official travel, including travel for reservists mobilized under section 12304b of 10 U.S. Code authority for active component requirements; information technology repair and replacement; and replenishment/replacement of unit and individual equipment and supplies to meet the Commandant of the Marine Corps Title X responsibilities to train, equip, and deploy ready forces in support of national security interests. Additionally, the Operational Forces sustain unique capabilities that provide special operations-capable forces to the Commander, U.S. Special Operations Command.

The FY 2025 request reflects an increase of \$48.3 million from the FY 2024 request. The increase is primarily driven by a family of Other Combat Support requirements for Chemical, Biological, Radiological, and nuclear systems for the replacement of end-of-life Joint Service Lightweight Integrated Suit Technology protection ensembles (suits, boots, masks, and gloves) for the Distributed Maritime Operations. There are increases to enhance posture and operations for Marine Forces Pacific to execute the MAGTF. This includes increases in the Pacific Deterrence Initiative that supports MAGTF and MEU combat service support capabilities in increasing equipment readiness within the Indo-Pacific Combatant Command area of responsibility.

LAND FORCES

LAND FORCES

MARINE CORPS RESERVE

The Marine Corps Reserve O&M Operational Forces resources support the day-to-day costs of training and support the Marine Forces Reserve (MFR). Programs within this SAG 1A1A item include funding for materiel readiness, purchase and replacement of expense type items authorized by unit training allowances, local equipment repair, training centers, and embarkation materials for training and preparation for mobilization.

The FY 2025 request reflects a program increase of \$4.4 million from the FY 2024 request. The increase supports the inclusion of MFR in the consolidated storage program and requirements for implementing the Defense Property Accountability System-Warehouse Management (DPAS-WM) for contracted labor, training for Marines, and converting warehouses for 168 sites.

Numbers may not add due to rounding.

1/ FY 2023 includes \$547 million in Overseas Operations Costs (OOC), and \$1,643 million of Other Procurement for Ship Maintenance pilot.

2/ FY 2024 includes \$490 million for OOC requested and \$2,746 million of Other Procurement for Ship Maintenance pilot.

3/ FY 2025 includes \$118 million for OOC estimated and \$2,392 million of Other Procurement for Ship Maintenance pilot.

4/ Includes OMN and OPN funding in FY 2023, FY 2024, and FY 2025

DESCRIPTION OF OPERATIONS FINANCED:

Resources for ship operations fund the active operating tempo (OPTEMPO), fleet and unit training, engineering and logistical support, maintenance, planning, and technical support to continuously maintain and deploy combat ready warships and supporting forces supporting national objectives. The Navy purchases ship fuel to support the OPTEMPO of 58 underway days per quarter for deployed Fleet forces and 24 underway days per quarter for non-deployed Fleet forces, temporarily assigned duty (TAD) for shipboard and afloat staff personnel, organizational level repair, supplies and equipage (S&E), Operating Target (OPTAR) for consumables, repair parts, administration, utilities, and charter of units through the Military Sealift Command (MSC). Funding for charter logistics support and other ships from the Military Sealift Command (MSC) and payments to the Department of Energy (DOE) for consumed nuclear fuel is also financed with these resources. The Fiscal Year (FY) 2025 program is funded to 96 percent of requirement and steaming days for 287 ships, a decrease from 296 ships in FY 2024.

Ship Operational Support and Training provides detailed pre-planning, engineering, training, and range operations necessary to ensure that all operating force ships and nuclear attack submarines and their crews operate at high readiness levels. Specific programs funded include submarine support, surface ship support, and ordnance Receipt, Segregation, Storage, and Issue (RSSI).

The Department's depot and intermediate-level ship maintenance program is mission funded in Operations and Maintenance (O&M), Navy (O&M,N) with a continuing pilot program in Other Procurement, Navy (OPN). It provides funding for repairs, overhauls, and refueling of submarines, aircraft carriers, and surface ships at the Navy's four public shipyards, regional maintenance centers, intermediate maintenance facilities, and private shipyards via contracts. This account increased by \$603 million from the FY 2024 requested position. In addition to continued support for ongoing maintenance availabilities, the FY 2025 budget continues to invest in growing the productivity of the naval shipyard (NSY) workforce of 37,551 civilian full-time equivalent workers (FTE). Ship maintenance improvements include better contracting strategies, Virginia Class (VACL) material strategy, increasing dry dock capacity,

SHIP OPERATIONS

SHIP OPERATIONS

optimizing facility and pier layout, level load port workloads, and more accurate availability duration planning. These efforts will provide the industry with a stable and predictable demand signal to encourage maintenance capacity growth to match our growing fleet. The Navy funded \$2,392 million in OPN in FY 2025 private contracted ship maintenance for both fleet commands, consistent with the FY 2024 President's Budget request of \$2,746 million for both Fleets.

Ship Depot Operations Support funds the planning and technical support function and provides management for availabilities, life cycle maintenance, and class maintenance impacts due to alterations, repair material management, and special projects for ship logistics managers. This program provides for the continued safe and reliable operation of naval nuclear propulsion plants by funding essential routine maintenance and engineering support, inspection and refurbishment of reactor components, and routine support of reactor refueling/defueling and reactor servicing equipment.

The FY 2025 active and reserve ship operations and maintenance budget increases by \$1,418 million.

PROGRAM DATA:

The FY 2025 O&M,N ship operations and maintenance request provides \$26,374 million of the following key components within separate sub-activity groups.

- The Mission and Other Ship Operations (1B1B) program – The base and enduring budget funds the program to 96 percent of requirement. The program increases are due to the growth in combat logistic force maintenance requirements, offset by reduced by reduced overseas operating costs and OPTAR funding. Additional increases are a result of additional days chartered for civilian mariners in the Military Sealift program and the integration of unmanned systems into fleet operations.
- The Ship Operational Support and Training (1B2B) program – The increase in the program is primarily due to Submarine In-Service efforts associated with In-Service Engineering Activity (ISEA) support, including Hull, Mechanical and Electrical (HM&E) maintenance, Technical Manual Deficiency Reports (TMDRs), Technical Feedback Reports (TFBRs) and Virginia Class (VACL) material obsolescence and outsourcing.
- The Ship Maintenance (BA01 1B4B / BA01 1000) program – The increase in FY 2025 budget request is primarily due to investments in public shipyards efforts, including Submarine Industrial Base (SIB), Virginia Class materials and wage grade initiatives to build productive capacity and workforce retention while maintaining 37 thousand FTE in the Shipyards. The Department of Defense Appropriations Act, 2020 (division A of Public Law 116-93) appropriated funding in Other Procurement, Navy line 23x, Ship Maintenance, Repair and Modernization, for a pilot program to fund private contract ship maintenance planned for the Pacific Fleet in FY 2020. In FY 2025, the Navy requests \$2,392 million for 24 private contracted Surface CNO maintenance availabilities inductions expanding to both Fleets. The decrease in FY 2025 budget request is primarily due to a reduction of five Surface CNO availabilities inductions and realignment of Carrier maintenance to 1B4B OMN.

SHIP OPERATIONS

SHIP OPERATIONS

- The Ship Depot Operations Support (1B5B) program – The decrease in the FY 2025 budget request is largely attributed to the shift of USS IWO JIMA (LHD 7) JSF modernization to FY 2026 resulting from Fact of Life (FOL) rescheduling changes.

The FY 2025 Operation and Maintenance, Navy Reserve ship operations and maintenance funding was transferred to O&M,N, BA01, Ship Operational Support and Training (1B2B) for proper alignment of the Naval Tactical Consolidated Support System (NTCSS).

3/ Includes Major Maintenance Period (MMP)

SHIP OPERATIONS

SHIP OPERATIONS

SHIP OPERATIONS:

Ship year data provides a more accurate indicator of the overall force level for that year. A ship year measures the portion of a fiscal year that a ship serves in the fleet. For example, a ship decommissioning on March 31st would have 0.5 ship years for that fiscal year (October through March) – whereas the end-of-year ship inventory would be zero.

Operating TEMPO, or OPTEMPO, are the days the ship is underway on its own power for three or more hours. If a ship is pier-side or anchored, it is not considered an OPTEMPO day.

Operating targets, or OPTAR, are costs tied to consumables, repair parts, and administration supporting the steaming of ships.

SHIP MAINTENANCE:

Ship depot level maintenance requires skills or facilities beyond the capacity or capability of organizational or intermediate level activities. Public and private shipyards, naval ship repair facilities, and equipment depot maintenance facilities perform ship depot maintenance.

Ships are assigned maintenance availabilities in accordance with the class maintenance plan established for the ship class. Class maintenance plans vary but always include shorter non-docking and longer docking availabilities.

The primary categories of availabilities are as follows:

- Overhauls are docking availabilities, normally exceeding six months in duration, to restore the ship, including all operating systems affecting safety or combat capability, to established performance standards.
- Planned Maintenance Availabilities (PMA) and Selected Restricted Availabilities (SRA) are relatively short and highly intensive availabilities averaging two to three months in duration, during which alterations and repairs are typically performed. They may be docking or non-docking.
- Planned Incremental Availabilities (PIA) / Carrier Incremental Availabilities (CIA) are availabilities specific to USS NIMITZ class Aircraft Carriers during which alterations and repairs are typically performed. They may be docking or non-docking.

Three categories of depot level maintenance are performed outside of scheduled availabilities:

- Emergent Restricted Technical Availabilities (RA/TA) repair unplanned discrepancies that must be corrected before the next scheduled availability.
- Other RA/TA is maintenance executed between scheduled availabilities to maintain ship systems to fully operational.
- Continuous Maintenance allows flexible execution of required surface ship depot level work during in port periods.

Numbers may not add due to rounding.

1/ FY 2023 actual execution includes Overseas Operations Costs (OOC).

2/ FY 2024 request includes OOC.

3/ FY 2025 includes \$2.5 billion in OOC budget estimate.

Air operations include all programs to operate, maintain, and deploy aviation forces that support the National Military Strategy. Air operations funding supports the following activities: training; day-to-day operational activities or air operations; organizational and intermediate and depot level maintenance; and engineering and technical support.

The Fiscal Year (FY) 2025 budget request of \$63.9 billion reflects a net decrease of \$0.7 billion from the FY 2024 requested level, mainly attributed to reductions in Navy Mission and Flight Operations and Army Land Forces Combat Flight Operations.

1/ FY 2023 actual execution includes Overseas Operations Costs (OOC).

2/ FY 2024 request includes OOC.

3/ FY 2025 includes \$0.3 billion in OOC budget estimate.

Operational Indicators (Active Army)

Program Data	FY 2023¹ <u>Actual</u>	<u>Change</u>	FY 2024² <u>Estimate</u>	<u>Change</u>	FY 2025³ <u>Estimate</u>
Primary Authorized Aircraft	2,049	2	2,051	-46	2,005
Flying Hours (000)	488,200	74,600	562,800	-43,600	519,200
OPTEMPO (Hours/Crew/Month)	10.6	-1.4	9.2	.0	9.2

The FY 2024 budget request of \$1.4 billion reflects a decrease of \$141.6 million from FY 2024 requested level. The FY2025 goal is to conduct multidomain focused training associated with Large Scale Combat Operations and resource aviation unit training in the Combat Aviation Brigades with 188.9K hours at 8.7 hours per crew per month (H/C/M) for home station training (HST) and an additional 24.4K hours at 13.8 H/C/M for Operation Spartan Shield support. This targeted level of training will enable the Army to field a trained and combat ready force capable of executing all assigned missions across the entire spectrum of conflict, fulfilling the Army's critical role in meeting the National Military Strategy, threat scenarios, and other national military requirements.

The air operations program includes flying hours associated with all aviation units in the combat aviation brigades, theater aviation units, aviation support of the Department of Defense counter-drug program, combat training center support (National Training Center, Joint Readiness Training Center, and the Joint Maneuver Readiness Center), Military District of Washington aviation support within the National Capital Region, fixed-wing aircraft in military intelligence aviation units, aviation support of the Reserve Officer Training Corps Program, multinational force and observers operations, Sinai U.S. Army Central, three air ambulance detachments in U.S. Army Forces Command (FORSCOM), one air ambulance detachment in U.S. Army South (ARSOUTH) and an aviation detachment in Japan supporting U.S. Army Pacific (USARPAC).

AIR OPERATIONS

Army Reserve \$ in Millions

<u>Funding Summary</u>	<u>FY 2023 Actual</u>	<u>Change</u>	<u>FY 2024 Estimate</u>	<u>Change</u>	<u>FY 2025 Estimate</u>

Operational Indicators (Army Reserve)

<u>Program Data</u>	<u>FY 2023 Actual</u>	<u>Change</u>	<u>FY 2024 Estimate</u>	<u>Change</u>	<u>FY 2025 Estimate</u>
Primary Authorized Aircraft	228	-	228	-	228
Flying Hours (000)	42,000	1,000	43,000	-3,000	40,000
OPTEMPO (Hours/Crew/Month)	7.3	-1	6.6	0.3	6.9

The FY 2025 budget request of \$129.6 million reflects a net decrease of \$4.7 million from the FY 2024 requested level to fund aviation training and operational requirements throughout the Army Reserve. Funds for fuel, consumable repair parts, and depot level repair parts to maintain the fleet are included. The program supports both unit training and operations. Army Reserve fixed wing and rotary wing units support the Combatant Commander’s requirements. Army Reserve fixed-wing aircraft are integral to the military’s operational mission to support the airlift system daily. The OPTEMPO changed from 6.6 to 6.9 crew/hours/month in FY 2025 and retains a proficiency level of Company (-) unit proficiency level across all rotary wing airframes in the inventory.

Army National Guard \$ in Millions

<u>Funding Summary</u>	<u>FY 2023¹ Actual</u>	<u>Change</u>	<u>FY 2024² Estimate</u>	<u>Change</u>	<u>FY 2025³ Estimate</u>

1/ FY 2023 actual execution includes Overseas Operations Costs (OOC).

2/ FY 2024 request includes OOC.

3/ FY 2025 includes \$1.8 million in OOC budget estimate.

AIR OPERATIONS

AIR OPERATIONS

Operational Indicators (Army National Guard)

<u>Program Data</u>	FY 2023 Actual	<u>Change</u>	FY 2024 Estimate	<u>Change</u>	FY 2025 Estimate
Primary Authorized Aircraft	1,508	-29	1,479	-41	1,438
Flying Hours (000)	184,000	-2,000	182,000	18,000	200,000
OPTEMPO (Hours/Crew/Month)	7.6	-0.9	6.7	0.8	7.5

The FY 2025 budget request of \$559.9 million reflects a net increase of \$26.6 million from the FY 2024 enacted level mainly due to the flying hour program increase in proficiency hours from 6.7 to 7.5 hours per crew per month (H/C/M) to increase readiness and mitigate Aviation Safety risks, and the sustainment and maintenance of four UH-60 aircraft and one CH-47 aircraft due to On-Condition Sustainment Maintenance requirements.

The Army National Guard, flying hour program, provides training for fixed and rotary-wing aircrew members and aviation units and supports combined arms teams to achieve and sustain designated combat readiness. Resources support the fuel, utilization, maintenance, and overhaul of aviation assets and related support equipment to sustain unit capabilities. These funds are required to maintain and train units for immediate mobilization for federal and state missions.

The FY 2025 budget request of 890.2 million reflects a net decrease of \$38.0 million from the FY 2024 requested level. The decrease is mainly due to reductions in mission and other flight operations and aircraft depot maintenance. Navy Reserve air operations include flying hours (fuel, consumables, depot-level repairable, contract maintenance), range operations, squadron, and wing travel; specialized

AIR OPERATIONS

skill training and associated administrative support, intermediate and depot level maintenance, and operational support such as command and control. Flying hour funding is provided to maintain an adequate level of readiness, enabling Reserve Component aviation forces to operate, maintain, and deploy aviation forces in support of the National Military Strategy. Navy Reserve air operations funding changes are primarily driven by the following.

The FY 2025 budget request of \$36.9 billion reflects a net increase of \$131.9 million from the FY 2024 requested level, mainly due to increases in the Flying Hour Program and Airlift Operations. Airlift operations include increased resources for the Airlift Readiness Account. Flying hour operations support aircrew combat training, maintenance and repair, parts, and aviation fuel to support joint warfighter and humanitarian operations. The FY 2025 program maintains current readiness levels, maintains the force's lethality, and meets our highest priorities to project prompt and decisive global vigilance, reach, and power to win any fight. In Fiscal Year 2025, the Flying Hour Program funds 886,247 thousand flying hours, an increase of 9,020 hours from FY 2024.

Program increases are offset primarily by decreases in weapon systems, including depot purchased equipment maintenance and contractor logistics support. The FY 2025 budget request of \$13.9 billion for WSS represents a net decrease of -\$542.3 million from the FY 2024 requested level.

The Air Force air operations funding provides the resources that support the Air Force combat forces. These activities provide for the operational flying requirements of bomber, fighter, mobility, and training forces stationed in the United States as well as overseas. Resources support land based intercontinental ballistic missiles; air launched strategic and tactical missiles; electronic warfare and defense suppression missions; combat command, control, and communications; combat aircrew training; and associated combat related base support. Funds provide for the operating tempo, organizational and depot level maintenance, training, engineering support, and logistical support to operate, maintain, and deploy aviation forces supporting the National Military Strategy. Significant programmatic adjustments include the following.

The FY 2025 budget request of \$3.3 billion reflects a net increase of \$25.3 million from the FY 2024 requested level, mainly due to contractor logistics support and sustaining engineering supporting primarily F-35, C-139, C-17, C-14 aircrafts, Air Mobility training, and travel for operational exercises, mission conversions, and other readiness training. The Air Force Reserve air operations budget provides the resources to maintain and train units for immediate mobilization and administrative support for the Air Reserve Personnel Center. Activities supported include aircraft depot level operations, base and aircraft maintenance, medical treatment, civilian pay, travel/transportation, and other equipment maintenance. Significant programmatic adjustments include the following.

The FY 2025 budget request of \$5.6 billion reflects a net increase of \$32.3 million from the FY 2024 requested level, mainly due to price growth, program increase in aircraft operations, and decreases in weapon system sustainment.

The Air National Guard Air (ANG) operations program provides for flying and maintaining ANG mission-related aircraft. These funds also provide for the facilities, equipment, and manpower required to train, equip, and support the ANG force structure at a combat readiness level that enables the ANG to assimilate immediately into the active Air Force and to be capable of conducting independent operations in accordance with unit wartime taskings.

UNITED STATES SPECIAL OPERATIONS COMMAND (USSOCOM) and SUPPORT TO SPECIAL OPERATIONS FORCES (SOF)

PART 1: O&M USSOCOM

USSOCOM O&M, Defense-Wide Summary *\$ in Millions*

FY 2023¹		FY 2024²		FY 2025³
<u>Actuals</u>	<u>Change</u>	<u>Request</u>	<u>Change</u>	<u>Request</u>
9,938.7	-252.3	9,686.4	+10.7	9,697.1

1/ FY 2023 includes Overseas Operations Costs (OOC) and Ukraine Supplemental enacted funding.

2/ FY 2024 includes Overseas Operations Costs (OOC) requested.

3/ FY 2025 includes \$2,138.2 million for the OOC budget estimate.

Description of Operations Financed:

The United States Special Operations Command (USSOCOM) develops and employs fully capable special operations forces (SOF) to conduct global special operations and activities as part of the Joint Force to support persistent, networked, and distributed Combatant Command operations and campaigns against state and non-state actors to protect and advance United States policies and objectives. In support of this mission, the USSOCOM serves as the Coordinating Authority for Countering Violent Extremist Organizations (C-VEO), Countering Weapons of Mass Destruction (CWMD), and internet-based Military Information Support Operations. In addition to the Coordinating Authority roles, USSOCOM continues to invest in its recently established role as Global Coordinator for Counter-Small Unmanned Aerial Systems (C-sUAS) prior to launch efforts. To achieve these missions, SOF commanders and staff must plan and lead a full range of lethal and non-lethal special operations missions in complex and ambiguous environments. Likewise, SOF personnel serve as key members of Joint, Interagency, and international teams and must be prepared to employ all assigned authorities and apply all available elements of power to accomplish assigned missions. In this capacity, SOF personnel must maintain the highest degree of professionalism, cultural awareness, responsiveness, and initiative.

Overall Assessment:

The USSOCOM Fiscal Year (FY) 2025 budget request focuses on aligning resources and capabilities to maintain a ready, lethal, and capable force in support of Geographic Combatant Commands (GCC). The request supports improving SOF warfighting readiness and achieving program balance across the enterprise. In the CWMD role, USSOCOM maintains DoD's CWMD Campaign, establishes intelligence priorities, monitors global operations, and conducts assessments. In its C-VEO role, USSOCOM continues to provide a

UNITED STATES SPECIAL OPERATIONS COMMAND (USSOCOM) and **SUPPORT TO SPECIAL OPERATIONS FORCES (SOF)**

global framework for action and synthesizes stakeholder perspectives into a single, comprehensive military assessment of the Department's global counterterrorism effort to promote situational awareness, inform prioritization efforts to counter global violent extremist networks, and facilitate a coherent and effective campaign to support the Secretary of Defense and the Chairman of the Joint Chiefs of Staff. Additionally, the FY 2025 budget request resources SOF activities such as forward-stationed forces, CONUS-stationed contingency forces, select rotational presence directly tied to warfighting, and partnership development. These efforts were supported by aligning and transitioning resources to modernize capabilities to maintain a ready, capable, and deployable force that can identify, disrupt, counter, and defeat a wide spectrum of transnational threats. The USSOCOM remains focused on trans-regional problem sets, ensuring SOF personnel are true experts in the terrain, languages, and cultures in their respective areas of responsibility.

The FY 2025 budget request of \$9,697.1 million reflects an increase of \$10.7 million from the FY 2024 budget request. The request reflects the National Defense Strategy focus on integrated deterrence, campaigning, and building an enduring advantage by investing in capabilities for high-end warfighting while simultaneously balancing readiness to support SOF requirements of the GCCs. The request includes an increase of \$71.4 million for classified OOC, \$62.5 million for Special Access Programs (SAP) and \$32.1 million supporting SOF Digital Ecosystems (additional details are available at a higher classification level). The request also includes an additional investment of \$27.5 million for 15 Expeditionary Fixed Site and 60 Dismounted C-sUAS supporting Operation INHERENT RESOLVE and Counter Terrorism operations. The FY 2025 budget request also includes an increase of \$26.3 million for SOF Organic Intelligence, Surveillance, and Reconnaissance (ISR) capabilities providing commanders with operational flexibility to collect video, audio, and radio frequency signals of interest through crewed and uncrewed platforms including long endurance aircraft, USSOCOM Tactical Airborne Multi-Sensor Platform aircraft, and sustainment of 30 U-28A aircraft conducting ISR operations. The request includes a \$22.7 million increase for the Theater Special Operations Commands to support SOCCENT's Special Operations Joint Task Force-Central and SOCAFRICA's Camp Titan. The request also includes an additional investment of \$18.2 million for USSOCOM HQs C4 Information Technology (IT) to fund technical data solutions, private cloud technologies, and the special operations IT enterprise contract supporting mission critical applications across the USSOCOM enterprise. The request also includes an increase of \$15.1 million to support SOF intelligence systems ecosystems (additional details are available at a higher classification level). These increases are offset by decreases of \$161.0 million to rebalance legacy SOF Organic ISR, \$57.3 million for classified OCC, and \$47.2 million for SAP (additional details are available at a higher classification level). The FY 2025 budget request focuses on creating a strategic, asymmetric advantage for the nation by continuing to strengthen our force and their families, bolstering integrated deterrence capabilities, and ensuring our enduring advantage through innovation and modernization. Additionally, this request increases SOF lethality through modernizing approaches, tactics, and technologies to build systemic advantages, while continuing to invest in new technologies that support SOF-unique requirements.

UNITED STATES SPECIAL OPERATIONS COMMAND (USSOCOM) and **SUPPORT TO SPECIAL OPERATIONS FORCES (SOF)**

PART 2: Total Military Service and Defense Agency Support to SOF

Section 1002 of the Conference Report accompanying the National Defense Authorization Act for FY 2021, and the Joint Explanatory Statement accompanying Division C of the Consolidated Appropriations Act, 2021, require each Military Service and Defense Agency to submit a specific budget exhibit that identifies Service common support and enabling capabilities contributed to special operations forces. The below table is a consolidated display by appropriation for the Military Services and all Defense Agencies of support to SOF for the service-common support and enabling capabilities. The details by Service or Agency can be found in their budget justification materials. Classified details by Service or Agency can be provided upon request.

Military Personnel funding reflects a representative cost derived from applying average pay rates to the military end strength assigned to USSOCOM; costs include pay, benefits, special pays and bonuses, and retired pay accrual. Operation and Maintenance funding reflects specifically identifiable operating support costs to support SOF as well as estimated costs for base operating support (BOS) and BOS for contingency locations based on the percentage of SOF personnel on the installation. Procurement funding reflects the procurement of Service-common equipment, aircraft, weapons, missiles, and ammunition that will be procured for and fielded to USSOCOM. Research, Development, Test and Evaluation funding reflects costs for Service-common programs and platforms. Military Construction funding reflects specific construction efforts for SOF facilities.

MILITARY INFORMATION SUPPORT OPERATIONS (MISO)

Funding Summary (*\$ in Millions*)

FY 2023 <u>Actual</u>	<u>Change</u>	FY 2024 Estimate	<u>Change</u>	FY 2025 Estimate
284.7	-32.2	252.5	1.2	253.7

1/ FY 2023 includes \$54.7 million in Overseas Operations Costs (OOC) Actuals.

2/ FY 2024 includes \$55.2 million in OOC requested.

3/ FY 2025 includes \$62.2 million for the OOC budget estimate.

Military Information Support Operations (MISO) are planned operations to convey selected information and indicators to foreign audiences to influence their emotions, motives, objective reasoning, and ultimately the behavior of foreign governments, organizations, groups, and individuals.

The FY 2025 budget request of \$253.7 million represents all MISO resources available in the centralized MISO budget account within the Office of the Secretary of Defense (OSD). FY 2025 is the third fiscal year MISO activities have been funded under a centralized account. In FY 2023, the Department transferred funds previously programmed by the Military Departments and U.S. Special Operations Command (USSOCOM) to capitalize the central MISO account. A single MISO account increases transparency and oversight of the MISO program. However, MISO execution will remain de-centralized and the execution will be conducted at the combatant command level where forces and expertise reside, so MISO funds will be distributed to ten combatant commands. The planned FY 2025 MISO activities include:

- The FY 2025 United States Africa Command (USAFRICOM) MISO request of \$34.2 million focuses efforts in decreasing Russian influence in North and West Africa, Chinese influence in Eastern Africa, and terrorist threats across the continent.
- The FY 2025 United States Central Command (USCENTCOM) MISO request of \$74.9 million focuses efforts against increased Iranian influence and aggression in the region, terrorist threats emanating from Iraq, Syria, and Afghanistan, and support to partners and allies in the Middle East.
- The FY 2025 United States Cyber Command (USCYBERCOM) MISO request of \$3.9 million focuses efforts to minimize the impact of malicious cyber actors' attempts to degrade U.S., allies, and partners' critical infrastructure.
- The FY 2025 United States European Command (USEUCOM) MISO request of \$36.0 million focuses efforts in Ukraine, Baltic countries, Balkan region and our NATO allies as well as several eastern European partners.
- The FY 2025 United States Indo-Pacific Command (USINDOPACOM) MISO request of \$32.0 million focuses efforts against terrorism in south and Southeast Asia, China's influence across the region, and North Korean provocation on the Korean peninsula

MILITARY INFORMATION SUPPORT OPERATIONS (MISO)

MILITARY INFORMATION SUPPORT OPERATIONS (MISO)

by working closely with their Australian and Japanese allies.

- The FY 2025 United States Northern Command (USNORTHCOM) MISO request of \$9.8 million deters malign activities, reinforces the rules-based international order, counters adversary disinformation, and enhances collective defense capabilities in support of Homeland Defense objectives in the Arctic and Caribbean regions.
- The FY 2025 United States Southern Command (USSOUTHCOM) MISO request of \$20.0 million focuses efforts on strengthening partnerships, decreasing Russian, Chinese, and Iranian influence and countering transnational criminal organizations.
- The FY 2025 United States Space Command (USSPACECOM) MISO request of \$4.2 million competes in the information environment (IE) with adversaries who are capable of challenging U.S. interests in space.
- The FY 2025 United States Special Operations Command (USSOCOM) MISO request of \$32.3 million supports the synchronized planning of global operations against adversaries, enables the trans-regional coordination and execution of MISO Web Operations, and funds its component MISO activities.
- The FY 2025 United States Strategic Command (USSTRATCOM) MISO request of \$6.5 million deters adversaries, assures allies and partners, and competes in the information environment (IE) with adversaries who are capable of conducting strategic attacks on U.S. national security interests.

MILITARY INFORMATION SUPPORT OPERATIONS (MISO)

DEPOT MAINTENANCE

Funding Summary *\$ in Millions*

	FY 2023¹ <u>Actual</u>	<u>Change</u>	FY 2024² <u>Estimate</u>	<u>Change</u>	FY 2025³ <u>Estimate</u>

Numbers may not add due to rounding.

1/ FY 2023 includes \$2.7 billion in Overseas Operations Costs (OOC) actuals and \$0.4 billion for Ukraine Supplemental funding.

2/ FY 2024 includes \$1.3 billion in OOC budget requests.

3/ FY 2025 includes \$0.4 billion in OOC budget estimate.

DEPOT MAINTENANCE

The Fiscal Year (FY) 2025 Operation and Maintenance (O&M) budget submission funds 87.1 percent of the Components' Depot Maintenance requirements (\$46.6 billion) compared to 88.3 percent in FY 2024. The FY 2025 O&M budget request of \$40.6 billion for depot maintenance represents an increase of \$1.7 billion (4.5 percent) over the FY 2024 budgeted level of \$38.9 billion.

The Depot Maintenance program plays a key role in force readiness by ensuring maintenance priorities align with military operational needs, sustaining core maintenance capabilities in organic depots, and sustaining the defense industrial base. The Depot Maintenance program funds the overhaul, repair, and maintenance of aircraft, missiles, aircraft carriers, ships, submarines, combat vehicles, automotive equipment, construction equipment, electronics and communications systems, missiles, general purpose equipment, and ordnance/weapons/munitions performed at both public (DoD) and private (contractor) facilities.

The Department is approaching readiness through a strategic lens, expanding beyond operational readiness to incorporate multidimensional and long-term readiness concerns such as modernization and sustainment. As part of this transition to a strategic readiness framework, we are assessing sustainment accounts, including the depot maintenance program, required to support and maintain day-to-day operational readiness while simultaneously looking to the future.

The Department's FY 2025 investments in depot maintenance are measured and calculated investments balancing immediate, near-term warfighting posture and readiness with longer-term force modernization. Sustainment, modernization, maintenance, and supply are all critical dimensions of the strategic readiness framework that is critical to the Secretary's "Defend the Nation" imperatives and will align with the forthcoming National Defense Strategy.

Army

The FY 2025 O&M budget request of \$1.5 billion is a net decrease of approximately \$209.3 million from the FY 2024 budgeted level, which funds 52.7 percent of total requirements (\$2.8 billion). The following details significant Army changes:

- Army Watercraft depot maintenance program increases funding for ten Heavy Equipment Transporter (HET) vehicles and three FTEs to improve vessel readiness.
- European Deterrence Initiative increases funding for Aviation Depot Maintenance support for the AN/TPN-31 Air Traffic Navigation, Integration and Coordination System (ATNAVICS), Tactical Airspace Integration System (TAIS) and Mobile Tower System (MOTS).
- Aviation Depot Maintenance decreases funding for UH-60L to UH-60V Black Hawk helicopter recapitalizations as the Army ends this program and reduces funding associated with the UH-60L to UH-60V recapitalization program. The Army will continue to fund Aviation items in depot maintenance with one UH-60L inspection and repair and two AH-64E inspections and repairs.
- Combat Vehicles increases funding for seven M2A3 Bradley Fighting Vehicles, three M109A6 Self Propelled Howitzer's, three M992 Field Artillery Ammunition Supply Vehicles, two Strykers, and two M88 Recovery Vehicles for overhaul.

DEPOT MAINTENANCE

- Communications – Electronics increases funding for Field Service Representatives and Contract Field Service Representatives for the Forward Repair Program and Enhanced Medium Altitude Reconnaissance and Surveillance System (EMARSS) mission payload repairs.
- Post Production Software Support decreases funding for contractor support and software sustainment of planned system divestitures that have reached the program's end of life.
- Missiles decreases funding for eight Antenna Mast Groups, four Battery Command Posts, eight Generator Sets, eight Launcher Stations, and three Communications Relay Groups being replaced by the fielding of the Integrated Air and Missile Defense Battle Command System (IBCS).
- Army National Guard increases funding for the overhaul and repair of one Full Tracked Armored Personnel Carrier, one Nuclear Biological Chemical Reconnaissance Vehicle, three AN/TRC-190D(V)1 Line-of-sight radio terminals, three Electronic Shop Semitrailers AN/ASM-189E, one AN/GSM-421 Calibration Set, and one AN/GSM-705 Calibration Set to support mission requirements.
- Army National Guard decreases funding for the sustainment and maintenance of four UH-60 Black Hawk helicopters and one CH-47 aircraft due to On-Condition Sustainment Maintenance requirements.
- Army Reserve increases funding for one M88A2 Hercules Recovery Vehicle, one FTE, and funding to maintain end items supporting two additional Rough Terrain Container Handlers and two Atlas 10K Forklifts.
- Army Reserve decreases funding for one AN/TSC-185B Satellite Terminal, six M871A3 Flatbed Trailers, and one UH-60L Black Hawk helicopter.

Navy

The FY 2025 O&M budget request of \$17.5 billion is a net increase of approximately \$1.0 billion from the FY 2024 budgeted levels, which funds 92.5 percent of the total requirements (\$18.9 billion). The following details significant Navy changes:

- Ship Maintenance increases support for two overhauls and 36 maintenance availabilities in FY 2025 from four overhauls and 42 maintenance availabilities in FY 2024.
- Aircraft Depot Maintenance and Aviation Logistics funding increases to maximize readiness by prioritizing funding based on criticality and impact. This program increases funds for maintenance costs associated with airframe and engine rework, components, and calibration maintenance across a variety of Type/Model/Series (TMS), including F 35 Lightning II, MV-22 Osprey, and KC-130J Super Hercules aircraft added to the fleet.

DEPOT MAINTENANCE

- Miscellaneous Restricted Technical Availability (RA/TA) increases to fund requirements that support various Surface Warfare Enterprise (SWE): Guided Missile Destroyers (DDG), Littoral Combat ships (LCS), Landing Helicopter Assault ships (LHA), Landing Helicopter Dock ships (LHD), Landing Platform Dock ships (LPD), Landing Ship Dock ships (LSD); Naval Aviation Enterprise (NAE): Nimitz class aircraft carriers (CVN); and Undersea Enterprise (USE) for all submarine classes.
- Continuous Maintenance (CM) increases support scheduled continuous maintenance conducted outside of Chief of Naval Operations (CNO) availabilities across various platforms executed by the SWE on Guided Missile Cruisers (CG), DDG, LCS, LHA, LHD, LPD, LSD, Patrol Coastal Ships (PC) and Mine Countermeasures ships (MCM) in both fleets.
- The FY 2025 budget continues the use of Other Procurement, Navy (OPN) funds for private sector contracted ship maintenance, which expands its use to include both U.S. Pacific Fleet and U.S. Fleet Forces Command. This investment in OPN allows the Navy to build upon the successes of prior years by providing stability and financial efficiency to industry partners and continues the more stringent fiscal discipline demonstrated in the program's execution.

Marine Corps

The FY 2025 O&M budget requests of \$263.4 million is a net increase of approximately \$31.0 million from the FY 2024 budgeted level, which funds 76.5 percent of requirements (\$344.3 million). The following details significant Marine Corps changes:

- Automotive Equipment net program increase provides for maintenance and overhaul, including multiple armored variants of the Logistic Vehicle System Replacement (LVSR) and the item exit date extension for the Medium Tactical Vehicle Replacement (MTVR).
- Electronics & Communications Systems net program increase provides for maintenance and overhaul, including the Support Wide Area Network (SWAN), the addition of the Ground/Air Task Oriented Radar (GATOR), and the Ground Weapons Locating Radar (GWLR) into USMC depot maintenance program.
- Ordnance Weapons & Munitions net program increase provides for maintenance and overhaul of Ordnance Weapons and Munitions equipment sets, including the M777 Lightweight Towed Howitzer and various rifle optics.
- Missiles net program increase provides for maintenance and overhaul of the Missiles commodity equipment sets and weapon systems including the High Mobility Artillery Rocket System (HIMARS).
- Combat Vehicles net program decrease is due to a reduction in maintenance requirements, including the 25MM light assault and mortar variants of the Light Armored Vehicle (LAV) and the recovery variant of the Amphibious Assault Vehicle (AAV).

DEPOT MAINTENANCE

- Marine Corps Reserve increases provide for maintenance and overhaul of Automotive Equipment, including the 7-ton Medium Tactical Vehicle Replacement (MTVR) and the High Mobility Artillery Rocket System (HIMARS) Resupply Vehicle, and for maintenance and overhaul of Ordnance Weapons and Munitions equipment sets, namely the M4 Rifle Optics.
- Marine Corps Reserve – Electronics & Communications Systems net decrease is due to a reduction in maintenance requirements for Electronics and Communications Systems, including the VEO-2 Collimator, RF Test Systems, and mobile maintenance complexes.

Air Force

The FY 2025 O&M budget request of \$18.8 billion is a net increase of approximately \$872.1 million from the FY 2024 budgeted level, which funds 86.8 percent of total requirements (\$21.6 billion). The following details significant Air Force changes:

- Global Precision Attack – F-35 Lightning II increases due to higher demand and requirements for depot-level repairables support. Higher operational tempo also impacted the Air Force cost share of the global operations support contract, along with software and lab sustainment requirements. The F-35A (conventional takeoff and landing variant) is the U.S. Air Force’s latest fifth-generation fighter, and it will replace the U.S. Air Force’s aging fleet of F-16s and A-10s, which have been the primary fighter aircraft for more than 20 years and bring an enhanced capability to survive in the advanced threat environment in which it was designed to operate.
- Air Superiority increases to support requirements for system training and simulator operations and maintenance, as well as Contractor Logistics Support (CLS) to address obsolescence issues associated with aging weapons systems. Specific programs supported by this increase include HC-130, Miniature Air-Launched Decoy, E-9 Widget, GPS user Equipment, Electronic Warfare Equipment Sustainment, and Multi-platform Avionics Systems Sustainment.
- Air Superiority – F-22 increases, driven by operational requirements for engine and Contractor Logistics Support (CLS) spares, as well as increases to Unscheduled Depot Level Maintenance and Contractor Management Support on the F119 engine. The F-22 Raptor combines stealth, supercruise, maneuverability, and integrated avionics, coupled with improved supportability, representing an exponential leap in warfighting capabilities. The Raptor performs air-to-air and air-to-ground missions, allowing the full realization of operational concepts that are vital to the 21st century Air Force.
- Global Integrated Intelligence, Surveillance, and Reconnaissance increases to support fuel bladder replacement beginning in FY 2025 and an increase in operational demand driven engine overhauls. The RC-135 reconnaissance aircraft supports theater and national level consumers with near real time on-scene intelligence collection, analysis, and dissemination capabilities.
- Nuclear Deterrence increases to support full workload transition from the Ground Subsystem Support Contract (GSSC) to the Ground Minuteman Automated Test System (GMATS) for Minuteman Operations. GMATS is used to verify the functional requirements of 296 geographically separated Ground Facility components.
- Command and Control increase support contract engineering analysis to resolve supportability challenges due to obsolescence, material shortages, additional workload/costs for depot-level hardware sustainment activities, and software sustainment activities to

DEPOT MAINTENANCE

correct faults, maintain performance, and adapt to evolving technical requirements within the Command and Control mission set. Specific programs supported by this increase include Battlefield Airborne Communications Node (BACN) Ground Stations, Theater Air Control Operations, Talon Archer, Deployable Radar Approach Control, Battle Control System, Air Traffic Control and Landing System, Joint Surveillance System, and Tactical Data Link.

- Education and Training Aircraft Programs decrease due to a reduction in requirements and lower contract costs for operational Contractor Logistics Support (CLS) material for the T-1 Jayhawk and T-38 Talon, as well as a decrease in overhaul requirements for the T-6 Texan II.

Space Force

The FY 2025 O&M budget request of \$1.4 billion is a net decrease of approximately \$20.9 million from the FY 2024 budgeted level, which funds 81.0 percent of requirements (\$1.8 billion). The following details significant Air Force changes:

- Space Superiority increases due to Air Force Satellite Control Network (AFSCN) transferring funding to Space Operations for Satellite Control Network (SCN) Level 1 operations, maintenance, and site support at Space Delta 6. Satellite Control Network (SCN) involves the execution of telemetry, tracking, and commanding (TT&C) operations, prelaunch checkout and simulation, launch support, and early orbit support while satellites are in initial or transfer orbits and require maneuvering.
- Space Superiority increases funding for Ballistic Missile Defense Programs due to a technical refresh requirement to the most complex subsystem within the radar weapon system and increased sustainment requirements in Software and Sustaining Engineering due to obsolescence concerns.
- Space Superiority increases funding for NORAD Cheyenne Mountain Complex (NCCMC) Integrated Tactical Warning/Attack Assessment (ITW/AA) due to the following:
 - Software: Additional Software requirements are needed to address obsolescence and maintenance tech refresh actions.
 - Sustaining Engineering: Cyber Initiatives include Cybersecurity Monitoring (CMT) and Network Perimeter Protection (NPP) - Engineering Investigation.
- Space Superiority decreases funding for Satellite Communications (SATCOM) due to a reduction in software requirements for the program.
- Space Superiority decreases funding for the Sea-Launched Ballistic Missile (SLBM) Radar Warning System, driven by the completion of Product Support mitigation efforts and the Hardware Project shifting from O&M to Procurement.

DEPOT MAINTENANCE

United States Special Operations Command (USSOCOM)

The FY 2025 O&M budget request of \$1.2 billion is a net increase of approximately \$53.6 million from the FY 2024 budgeted level. Of note, in FY 2024, USSOCOM under-reported its depot maintenance budget by \$190.1 million, resulting in a misrepresentation of the budget increase in FY 2025. Taking into account the accurate FY 2024 USSOCOM budget of \$1.3 billion (compared to the \$1.1 billion initially requested in the FY 2024 budget), the net change for FY 2025 should reflect a reduction of \$136.5 million. The following details provide major USSOCOM decreases in the FY 2025 budget request:

- The CV-22 is a Special Operations Forces (SOF) variant of the V-22 vertical medium lift, multi-mission aircraft providing long-range, high-speed infiltration/exfiltration and resupply to SOF in hostile, denied, and politically sensitive areas. The decrease reflects savings from converting contracted field service representatives (FSRs) performing logistic and engineering support to U.S. Air Force and U.S. Navy funded reimbursable civilians beginning in FY 2025.
- The MC-130J flies clandestine, or low visibility, single or multi-ship, low level infiltration, exfiltration, and resupply of SOF, by airdrop or airland and air refueling missions for special operations helicopters and tiltrotor aircraft, intruding politically sensitive or hostile territories. The program decrease defers software sustainment of MC-130J mission systems.
- MQ-9 decrease reflects the savings associated with the MQ-9 transitioning to a satellite communication launch and recovery capability beginning in FY 2025, as the C-band (frequency band) line of site launch and recovery capability becomes obsolete. The MQ-9 launch and recovery element services contract is no longer required, eliminating the need for ten contractor FTEs supporting MQ-9 operations.
- The CCM is a semi-enclosed, multi-mission craft that provides the range and payload necessary to meet global NSW missions. The increase funds additional contractor maintenance support required due to the complexity of the CCM and restores funding for crew training and travel requirements.
- SOF Organic ISR requirements reflect the termination of the services contract required to support two mid-endurance unmanned aircraft systems (MEUAS) sites as they are divested by the end of FY 2025 and the planned retrograde of two MQ-27B ScanEagle multi-mission tactical unmanned aircraft systems (MTUAS) from the U.S. Central Command area of responsibility. Funding associated with platform materiel and the elimination of flight operations in preparation for fielding and deployment of the MQ-35A V-BAT vertical take-off and landing reconnaissance unmanned aerial vehicle.

BODY ARMOR, INDIVIDUAL EQUIPMENT, ORGANIZATIONAL CLOTHING, AND ARMORED VEHICLES

Description of Equipment Financed:

Body Armor, Individual Equipment, Organizational Clothing, and Other Personal Protective Gear provide increased protection for soldiers on the ground and in the air by stopping or slowing bullets and fragments and reducing the number and severity of wounds.

Body Armor (Total) *\$ in Millions*

<u>Appropriation</u>	FY 2023¹ <u>Actual</u>	<u>Change</u>	FY 2024² <u>Estimate</u>	<u>Change</u>	FY 2025³ <u>Estimate</u>

1/ FY 2023 includes \$4.5 million in Overseas Operation Costs (OOC) funding.

2/ FY 2024 includes \$69.3 million in OOC requested

3/ FY 2025 includes \$75.3 million in OOC budget estimate.

Body Armor is government owned, issued, and controlled ballistic projectile protection equipment temporarily issued to military Service members for their use. Examples of body armor include helmets, armored vests, body armor plates, small arms protective inserts, side ballistic inserts, and tactical vests. Body Armor Systems continue to enhance individual troop mobility, reduce weight, improve comfort, facilitate fighting load carrying requirements, and improve weight distribution of ballistic and fighting load components. Continuous tests and evaluations of body armor are conducted to take advantage of the latest technology. The total FY 2025 cost for body armor requirements (including requirements in Overseas Operations Costs) is \$343.2 million, an increase of \$4.4 million from the FY 2024 request. Significant changes include the Army's increase of production capacity and new production contracts and increases for Vital Torso Protection (VTP) contracts being ramped up to full production in FY 2025. For Overseas Operations Costs, the Army begins two new production contracts for Ballistic Combat Shirt (BCS) and Blast Pelvic Protection (BPP) to support the Army's OCONUS missions in FY 2025.

Direct Total	472.1	-133.5	338.7	116.4	455.1

Numbers may not add due to rounding

1/ FY 2023 includes \$150.9 million in Overseas Operation Costs (OOC) funding.

2/ FY 2024 includes \$46.8 million in OOC requested.

3/ FY 2025 includes \$106 million in OOC budget estimate.

Organizational Clothing consists of government owned, issued, and controlled uniform garments temporarily issued to military Service members for their use. Examples of uniform garments include the extended cold weather clothing system, aviation combat uniform, flight suit, fire resistant combat uniform, and the improved combat vehicle crewmember coverall. The total FY 2025 cost for organizational clothing requirements (including requirements in Overseas Operations Costs) is \$455.1 million, an increase of \$116.4 million from the FY 2024 Requested level. The increase supports the Navy and Army’s initial issues and the repair/refurbishment of used and unserviceable clothing. FY 2024 represented a low-purchase year for the Army and Navy; both services reversed those cuts, bringing FY 2025 funding closer to FY 2023 levels.

Marine Corps	518.5	39.1	557.6	252.7	810.3
Total of all Systems	1,936.1	-216.5	1,719.6	232.4	1,952.0

Numbers may not add due to rounding.

Armored Vehicles are government owned, issued, and controlled armored combat vehicles. The Joint Light Tactical Vehicle (JLTV), which is procured by all Military Services with the Army as the lead service, is the primary light tactical wheeled vehicle performing multiple mission roles and designed to provide protected, sustained, networked mobility for personnel and payloads across the full range of military operations. The Marine Corps Amphibious Combat Vehicle (ACV) is a next-generation vehicle designed to move Marines from ship to shore, designed to replace the Corps' aging Amphibious Assault Vehicle. The total FY 2025 cost for armored vehicle requirements is \$1,952.0 million, an increase of \$232.4 million from FY 2024 requested levels.

The JLTV joint program replaces the High Mobile Multipurpose Wheeled Vehicle (HMMWV). These vehicles come in two variants and four mission package configurations: general purpose, heavy-guns carrier, close-combat-weapons carrier, and utility vehicle. The JLTV provides defensive measures to protect troops in transport, increases payload capacity, and achieves commonality of parts and components to reduce the vehicle's overall life cycle costs. The Army reduces quantities of the JLTV by 793, with a corresponding cost decrease of \$166.7 million. The Marine Corps and Air Force increase quantities by 278 and 13, respectively, for budget increases of \$108.0 million and \$11.7 million. The Navy funding increases to account for the procurement of the JLTV Heavy Gun Carrier and funding for other light tactical vehicle systems.

The ACV will be the primary means of tactical mobility for the Marine infantry battalion at sea and ashore. The ACV possesses ground mobility and speed similar to the M1A1 tank during sustained operations ashore and has the capability to provide organic, direct fire support to dismounted infantry in the attack. The ACV will support expeditionary mobility capability and capacity with balanced levels of performance, protection, and payload, and it will be employed with the Ground Combat Element across the range

BODY ARMOR, INDIVIDUAL EQUIPMENT, AND ORGANIZATIONAL CLOTHING

BODY ARMOR, INDIVIDUAL EQUIPMENT, ORGANIZATIONAL CLOTHING, AND ARMORED VEHICLES

of military options. As the AAV's replacement, the ACV provides improved lethality against dismounted enemy troops, more effective land and water tactical mobility, and increased force protection and survivability from blasts, fragmentation, and kinetic energy threats.

The ACV program is executed in multiple phases. The increase of \$252.7 million between FY 2024 and FY 2025 is attributed to the procurement of the more complex ACV-30 variants in FY 2025. FY 2024 funded a final lot of ACV-P procurement via prenegotiated option exercises at prices before inflation increased; Full Rate Production (FRP) Lots 5 through 6 produce the latest ACV-30 Mission Role Variant and are being negotiated now.

Military (End-Strength)	28,549	17,255	45,804	-515	45,289

Numbers may not add due to rounding.

Base Operations Support (BOS) provides the resources to operate the bases, installations, camps, posts, and two Defense Health Program (DHP) stations. These resources provide personnel and infrastructure support to sustain mission capability, ensure quality of life, and enhance workforce productivity.

Personnel support includes food and housing services for unaccompanied and deployed forces; religious services and programs; payroll support; personnel management; and morale, welfare, and recreation services to military members and their families.

Infrastructure support includes utility system operations; installation equipment maintenance; engineering services including fire protection, crash rescue, custodial, refuse collection, snow removal, and lease of real property; security protection and law enforcement; and motor pool transportation operations.

The Fiscal Year (FY) 2025 budget request of \$36,423.3 million reflects a net increase of \$631.5 million above the FY 2024 requested level.

Installations: There is no change in the number of major installations from FY 2024 to FY 2025

Personnel: The decrease in active military end-strength from FY 2024 to FY 2025 is due primarily to force structure changes within the Marine Corps.

The following sections address BOS for each active Military Component and the Defense Health Program.

BASE OPERATIONS SUPPORT

ARMY *\$ in Millions*

	<u>FY 2023 Actual</u>	<u>Change</u>	<u>FY 2024 Estimate</u>	<u>Change</u>	<u>FY 2025 Estimate</u>
Army Active Funding	9,699.2	243.8	9,943.0	539.5	10,482.5
Installations (Active only)					
CONUS	53	0	53	0	53
Overseas	29	1	30	0	30
Personnel (Thousands)					
Active Military (End-Strength)	1,985	-138	1,847	6	1,853

Numbers may not add due to rounding.

The Army's FY 2025 BOS budget request of \$10,482.5 million reflects an increase of \$539.5 million from the FY 2024 requested level.

The FY 2025 net increase of \$539.5 million includes functional transfers for Information Technology Services Management and program growth to Military Construction and Restoration and Modernization Tails, Facilities Operations - Utilities and Leases, Logistics Operations, Community Services, Security Services, Housing Services, and Overseas Operations Costs. It also includes program decreases in Energy, Environmental Programs, Command and Garrison Support, Facilities Operations, and Community Services.

- Information Technology Services Management increases due to a transfer from the Army National Guard and Army Reserve to support the centralized delivery of Information Technology (IT) services under a single Army service provider.
- Military Construction and Restoration and Modernization Tails increases for furnishings, fixtures, and equipment to support the outfitting of Military Construction (MILCON) and restoration and modernization projects.
- Facilities Operations - Utilities increases for U.S. Army Garrison Hawaii and utilities privatization to repair and replace failed/failing wastewater components and system deficiency corrections. In addition, increases fund recruiting leases to relocate recruiting stations to favorable markets and upgrades above the lessors' maintenance responsibility.
- Logistics Operations increase food and transportation services for shuttle bus services across installations to improve the quality of life for Soldiers.

BASE OPERATIONS SUPPORT

BASE OPERATIONS SUPPORT

- Community Services for Child and Youth Services to improve staff recruitment, retention, and compensation. Increase also supports the Army Substance Abuse Program, Suicide Prevention Program, and Chaplains.
- Security Services increases for law enforcement equipment operations to improve operations and physical security services and equipment.
- Housing Services increases for barracks management. Funding establishes civilian oversight through the installation housing office, and funding will provide barracks management and oversee the maintenance of military unaccompanied housing.
- Increases funding to support the European posture at three Poland Forward Operating Sites: Poznan, Powidz, and Zagan. Funding establishes a U.S. Army Garrison and Logistics Readiness Center to mitigate capability gaps.
- Funding also includes an increase in Overseas Operations Costs for the European Deterrence Initiative and Other Theater Requirements and Related Missions.
- Energy decreases for strategic initiatives, planning, and environmental for decommissioning contracts for the Army's two deactivated nuclear reactors, SM-1 at Fort Belvoir, Virginia, and SM-1A at Fort Greely, Alaska.

BASE OPERATIONS SUPPORT

NAVY
\$ in Millions

	<u>FY 2023 Actual</u>	<u>Change</u>	<u>FY 2024 Estimate</u>	<u>Change</u>	<u>FY 2025 Estimate</u>

CONUS	48	0	48	0	48
Overseas	20	0	20	0	20
Personnel (Thousands)					
Active Military (End-Strength)	14,941	-54	14,887	195	15,082

Numbers may not add due to rounding.

The Navy's FY 2025 BOS budget request of \$6,324.4 million reflects a net increase of \$100.6 million above the FY 2024 requested level.

The FY 2025 net increase of \$100.6 million includes inflation, transfers, and program growth in port and airfield operations, utility management and energy security, supply logistics, fleet ground transportation, environmental planning and compliance, personnel support, facilities planning and contract award/management, childcare, galley functions, information technology, training, safety programs, and morale, welfare, and recreation.

- Environmental Services provides resources to defuel and permanently close the Red Hill Bulk Fuel Storage Facility (RHBSF) and support Guam and Hawaii's National Environmental Policy Act (NEPA).
- Other Base Services funding supports a transportation program shortfall, portal crane overhauls, resources to support next-gen 911 (DoD CIO Compliance), and funding for Joint Region Marianas (JRM) Fire and Emergency Services as well as shipboard firefighting responders, specialty equipment, and suppression apparatus.
- The increase in Administration funding is for dedicated civilian personnel and contractors to support the initial migration of Navy ERP for stabilization and long-term sustainment.
- Increase morale, welfare, and recreation by supporting child and youth development programs to fund a childcare workforce initiative.

CONUS	17	0	17	0	17
Overseas	7	0	7	0	7
Personnel (Thousands)					
Active Military (End-Strength)	9,697	17,293	26,990	-234	26,756

Numbers may not add due to rounding.

The Marine Corps' FY 2025 BOS budget request of \$3,035.9 million reflects a net decrease of \$88.7 million above the FY 2024 requested level.

The FY 2025 net decrease of \$88.7 million includes the one-time FY 2024 add of \$15 Federal Minimum Wage increase, \$49.1 million in civilian personnel to address sexual assault and sexual harassment, and establishing strategic direction to implement all of the recommendations from the Independent Review Commission on Sexual Assault in the Military to a more executable approach, and \$24.8 million for the one-time FY 2024 add of Buydown of IT technical debt with emphasis on investments that improve end-user experience in which funds were applied to digital modernization and cloud transition efforts.

- The Installations Training and Ops Support decrease reflects the one-time add in FY 2024 supporting the Pacific Multi-Domain Training and Experimentation Capability (PMTEC) within the Indo-Pacific Region.
- The decrease in the funding for Real Property Facilities Services (RPFS) reflects the one-time FY 2024 add (E.O. 14003), which implemented a federal minimum wage of \$15 per hour for the federal workforce.
- Within Other Morale, Welfare, and Recreation, funding for the Semper Fit and Recreation was decreased.
- Within Enterprise IT Security & Compliance (IT S&C), the decrease reflects the one-time FY 2024 add of the Buydown of IT technical debt with emphasis on investments that improve end-user experience. Funds were applied to digital modernization and cloud transition efforts.

BASE OPERATIONS SUPPORT

BASE OPERATIONS SUPPORT

- Civilian Personnel funding decreased for sexual assault and sexual harassment, lowering additions from the previous year to establish a strategic direction to implement all the recommendations from the Independent Review Commission on Sexual Assault in the Military as the program arrives at a more executable approach.

Overseas	17	0	17	0	17
Personnel (Thousands)					
Active Military (End-Strength)	1,926	154	2,080	-482	1,598

Numbers may not add due to rounding.

The Air Force's FY 2025 BOS budget request of \$11,449.4 million reflects a net decrease of \$184.1 million above the FY 2024 requested level.

The FY 2025 net decrease of \$184.1 million includes inflation, transfers, and program growth in operational communications, funding for military working dogs, and facilities operations support U.S. Indo-Pacific Command Yap International Airport, Wake Island, childcare manpower, average workyear cost adjustment, and overseas operations cost. There are also program decreases in civilian workforce reduction, operational communication, child and youth programs, IT management and base modernization infrastructure, cybersecurity for network component purchases, and information technology assets.

- There is an increase in full-year funding and manpower to bring the Military Working Dogs (MWD) program into compliance with Department of Defense standards of care for clean and safe kennel facilities that address the health and safety of military working dogs (MWD).
- The Air Force increases funds for non-manpower requirements that address the health and safety of Military Working Dogs (MWD) in compliance with DoD standards of care for clean and safe kennel facilities. The funds will mitigate climate impacts, noise conditions, and environmental risks at the MWD training campus facilities at Lackland Air Force Base, Texas.
- Funds increase to support land lease for an agreed-upon defense site under an appropriate international agreement. A land lease is required to complete the runway extension, parking apron, and taxiway construction at Yap International Airport, Wake Island.
- Increased funding supports essential investment for operational warfighting requirements, business efficiency, and decision advantage. The budget establishes vital shared foundational data services environments to enable warfighter capabilities globally to

BASE OPERATIONS SUPPORT

BASE OPERATIONS SUPPORT

the tactical edge. The budget funds Data Fabric, an architecture that facilitates the end-to-end integration of various data pipelines and cloud environments using intelligent and automated systems.

- Increased funding supports the transformation of cyberspace infrastructure from a legacy, perimeter-based defense to a fine-grained micro-segmentation, data-focused defense. Zero Trust is a framework for securing today's digital transformation infrastructure and data.
- Funds increase for base operations and facility sustainment supporting Operation Enduring Sentinel and Operation Inherent Resolve. This supports facility sustainment, supplies, and equipment maintenance for the five main operation locations and six supporting locations in the USCENTCOM AOR and aligns with the current theater requirements.
- Reversal of a one-time programmatic increase to facilitate the establishment of the 492nd Power Projection wing at Davis-Mothan Air Force Base, Arizona. The funds were used to support the Environmental Impact Statement and Area Development Plan in compliance with the Strategic Basing process.
- A programmatic decrease supports the recapitalization of information technology facilities with upgraded furniture, fixtures, and equipment.
- Decrease funding for Department of the Air Force investments in data-driven decision, Artificial Intelligence, readiness, and decision advantage on an enterprise scale.
- Decreases in full-year funding and manpower to support the phase attrition of the Local National Indirect Hire positions while ensuring the U.S. Air Force maintains international commitment to the United Kingdom to avoid fringing on acquired rights regulations such as the Transfer of Undertakings Regulation 2006.
- Reversal of a one-time programmatic increase to recapitalize dining facility furniture, fixtures, and equipment that was beyond the expected life cycle for replacement.
- Funding decreases due to a programmatic increase in funding migration tools to protect the Air Force network against vulnerabilities, allowing adversaries to gain control of devices, divert traffic, intercept sensitive information, and cause denial of service attacks. This was in line with the Secretary of the Air Force approved Management Initiative capability to address audit and material weaknesses.

BASE OPERATIONS SUPPORT

SPACE FORCE

\$ in Millions

	FY 2023 <u>Actual</u>	<u>Change</u>	FY 2024 <u>Estimate</u>	<u>Change</u>	FY 2025 <u>Estimate</u>
Space Force Active Funding	230.8	-42.0	188.8	49.9	238.7
Installations					
CONUS	6	0	6	0	6
Overseas	0	0	0	0	0

Numbers may not add due to rounding.

The Space Force FY 2025 BOS request of \$238.7 million reflects a net increase of \$49.9 million from the FY 2024 requested level.

The FY 2025 net increase of \$49.9 million includes utility and energy costs funding at Clear Space Force Station, Alaska, supporting Long-Range Discrimination Radar (LRDR) requirements. LRDR provides advanced ground sensor capabilities supporting missile warning through tracking and discrimination, accurately identifying threats in dense operating space. LRDR provides persistent Intelligence Data Collection on long-term midcourse discrimination, precision tracking, and hit assessment against long-range missile threats in the Pacific Theater. The budget includes program increases to support the continuation of efforts for facilities operations support to mitigate cyber risks to the homeland defense mission at two priority Space Force sites.

BASE OPERATIONS SUPPORT

DEFENSE HEALTH PROGRAM

\$ in Millions

	<u>FY 2023 Actual</u>	<u>Change</u>	<u>FY 2024 Estimate</u>	<u>Change</u>	<u>FY 2025 Estimate</u>
Defense Health Program Funding	1,113.3	-73.1	1,040.2	77.6	1,117.8

CONUS	616	-30	586	0	586
Overseas	100	42	142	0	142

Numbers may not add due to rounding.

The Defense Health Program’s (DHP) FY 2025 BOS request of \$1,117.8 million reflects a net decrease of \$77.6 million from the FY 2024 requested level.

The FY 2025 net decrease of \$77.6 million is attributable to system updates to ensure MHS GENESIS patient care locations and Defense Medical Information System Identifiers (DMIS IDs) tables are aligned to resolve issues with clerk/patient appointing and to capture overhead cost by function to reflect the cost of care better.

FACILITIES SUSTAINMENT, RESTORATION, AND MODERNIZATION (FSRM) AND DEMOLITION PROGRAMS

Total	19,361.3	118.2	19,479.5	310.8	19,790.3

Numbers may not add due to rounding

¹FY 2023 includes Base funding, \$478.8 million in Overseas Operations Costs (OOC), and \$184.0 million to aid in disaster recovery efforts.

²FY 2024 includes Base funding, \$597.3 million in OOC budget request, and \$20.0 million to aid in disaster recovery efforts.

³FY 2025 includes Base funding and \$402.1 million in OOC budget estimate.

The Facilities Sustainment, Restoration, and Modernization (FSRM) program provides funds to keep the Department's inventory of facilities in good working order (i.e., day-to-day maintenance requirements). In addition, the program provides resources to restore facilities whose age is excessive or have been damaged. FSRM includes alterations of facilities to implement new or higher standards or to accommodate new functions or missions. The demolition program provides funds to demolish and dispose of obsolete and excess

FACILITIES, SUSTAINMENT, RESTORATION, AND MODERNIZATION (SRM) AND DEMOLITION PROGRAMS

FACILITIES SUSTAINMENT, RESTORATION, AND MODERNIZATION (FSRM) AND DEMOLITION PROGRAMS

structures, some of which date back to World War II.

The Fiscal Year (FY) 2025 budget request of \$19,790.3 million represents a total increase in funding of \$310.8 million (1.6 percent) more than the FY 2024 budget request amount. This supports facilities sustainment requirements necessary to keep DoD facilities in good working order and avoid premature deterioration, as well as critical restoration and modernization activities to ensure that DoD facilities are ready and resilient relative to both mission requirements and the needs of our people.

- Facilities Sustainment – In aggregate, the FY 2025 request increases by \$575.7 million (4.5 percent), funding an average of 79 percent of the modeled facilities sustainment requirement. The increase in the sustainment model requirement in FY 2025 has impacted the sustainment percentage reduction from FY 2024. The Marine Corps is excused from the requirement to fund at a percentage of the model while undertaking a pilot initiative to holistically optimize facility investment across their enterprise, prioritizing restoration and modernization activity in the near term.
- Restoration and Modernization (R&M) – The FY 2025 request funds for critical projects supporting operational requirements and warfighter readiness. Overall, FY 2025 R&M funding levels are \$136.2 million (2.3 percent) less than FY 2024 budget request.
- Demolition Costs – The Department requests \$493.0 million to demolish excess facilities in FY 2025. The request is \$128.7 million (20.7 percent), lower than the FY 2024 budget request.

The following data provides details on facilities sustainment, restoration & modernization, and the demolition program.

FACILITIES SUSTAINMENT, RESTORATION, AND MODERNIZATION (FSRM) AND DEMOLITION PROGRAMS

Active Army

- The O&M, Army request includes \$5,231.9 million in FY 2025 for FSRM requirements. These funds reflect a net decrease of \$149.8 million from the FY 2024 budget request.
- The FY 2025 program funds facilities sustainment at 88 percent of the modeled requirement.
- The Army's FY 2025 request for R&M funding decreased by \$240.3 million from the FY 2024 budget request. The FY 2025 request addresses quality of life, power projection, and facility installation readiness. Further, the budget supports energy and utility projects to address water resilience, invests in improving infrastructure, provides efficient buildings and addresses grid vulnerability, and conducts carbon footprint assessments to identify energy savings opportunities, energy alternatives, equipment electrification, smart grids, and metering.

Active Navy

- The O&M, Navy request includes \$4,656.2 million in FY 2025 for FSRM requirements. These funds reflect a net increase of \$248.6 million from the FY 2024 budget request.
- The FY 2025 program funds facilities sustainment at 81 percent of the modeled requirement.
- The Navy continues to focus on fleet operations and Shipyard infrastructure in FY 2025. The Navy R&M request in FY 2025 increased by \$126.9 million from the FY 2024 budget request. The FY 2025 request prioritizes facility investments toward mission critical assets to improve operational readiness, including permanent party unaccompanied housing facilities, education facilities, upgrade of facilities related control systems, and various projects in Hawaii, including waterline replacement.

Active Marine Corps

- The O&M, Marine Corps request includes \$1,305.0 million in FY 2025 for FSRM requirements. These funds reflect an increase of \$93.8 million from the FY 2024 budget request.
- The Marine Corps is continuing a pilot initiative to holistically optimize facility investment across their enterprise, which currently prioritizes restoration, modernization, and demolition activity in the near term. While the pilot initiative is being evaluated by OSD (A&S), the Marine Corps is exempted from DoD minimum sustainment funding requirements.
- The overall Marine Corps FY 2024 R&M request increased by \$98.9 million from the FY 2024 budget request. The FY 2025 request continues to implement the Infrastructure Reset Strategy and continues its pilot initiative for a holistic FSRM model, which maximizes facilities readiness subject to budget constraints by optimizing the mix of Military Construction (MILCON), Restoration and Modernization, Demolition and Sustainment funding.

FACILITIES SUSTAINMENT, RESTORATION, AND MODERNIZATION (FSRM) AND DEMOLITION PROGRAMS

Active Air Force

- The O&M, Air Force request includes \$4,369.8 million in FY 2025 for FSRM requirements. This funding level reflects a net increase of \$115.7 million from the FY 2024 budget request.
- The FY 2025 program funds facilities sustainment at 77 percent of the modeled requirement.
- The overall Air Force FY 2025 R&M request decreases by \$135.5 million from the FY 2024 budget request. The program includes planned modernization of operational facilities, the Air Force Academy, and further implementation of renewable energy to meet mission requirements.
- Air Force FSRM aligns with the Infrastructure Investment Strategy (I2S) by increasing the demolition program by \$51.3 million in FY 2025. The request supports the I2S goal of reducing total maintenance and repair costs by eliminating excess installation footprints.

Active Space Force

- The O&M, Space Force request includes \$488.7 million in FY 2025 for FSRM requirements. These funds reflect a net decrease of \$189.9 million from the FY 2024 budget request.
- The FY 2025 program funds facilities sustainment at 76 percent of the modeled requirement.
- The Space Force FY 2025 R&M request is for \$219.9 million, a \$2.2 million increase from the FY 2024 budget request. The FY 2025 request supports prioritized infrastructure projects for the modernization and transformation of Vandenberg Space Force Base, California, supporting U.S. Space Force's ongoing Range of the Future initiative.

Defense-Wide

- The Defense-Wide activities request \$247.7 million in FY 2025 for FSRM in the O&M, Defense-Wide appropriation. This budget reflects a net decrease of \$14.4 million from the FY 2024 budget request.
- The FY 2025 program funds facilities sustainment at 112 percent of the modeled requirement, with the DoD Education Activity funding school sustainment to 90 percent of the modeled requirement.

Defense Health Program (DHP)

- The DHP request includes \$1,188.9 million in FY 2025 for FSRM in its O&M budget activity. This reflects a net increase of \$84.6 million from the FY 2024 budget request. The sustainment of medical facilities is funded to 92 percent of the modeled

FACILITIES SUSTAINMENT, RESTORATION, AND MODERNIZATION (FSRM) AND DEMOLITION PROGRAMS

requirement. The program funds the maintenance of military medical facilities, such as heating and air conditioning units and plumbing and electrical systems, required to support active duty, military dependents, eligible retirees, and family members.

Guard and Reserve Forces

- The Guard and Reserve Forces are requesting \$2,302.1 million in FY 2025, which reflects an increase of \$122.3 million from the FY 2024 budget request. The program supports the maintenance and restoration of real property facilities, including buildings, roads, grounds, and airfields of the Guard and Reserve. These facilities support the Guard and Reserve combat readiness, enabling them to augment the active forces.
- Each Guard and Reserve appropriation, except the Navy Reserve and Marine Corps Reserve, funds FY 2025 facilities sustainment at or above 85 percent, consistent with the Department's focus on adequately funding sustainment to reduce costly and avoidable R&M activity in the future.

MOBILIZATION

Funding Summary by Service

1/ FY 2023 includes \$1,568 million in Overseas Operations Cost Actuals.

2/ FY 2024 includes \$1,287 million in OOC requested funding.

3/ FY 2025 includes \$1,422 million in OOC budget estimate.

Mobilization provides strategic and tactical airlift and sealift capabilities to deploy combat forces and materials in contingencies. The mobilization program also funds an inventory of readily available supplies and equipment, stationed afloat and on land to sustain the operating forces for lengths of time and levels of conflict outlined in the National Military Strategy.

The Fiscal Year (FY) 2025 budget request for the Mobilization program of \$7,385.5 million reflects a \$1,432.2 million increase from the FY 2024 requested level. The following details the changes in the Mobilization program by Service.

MOBILIZATION

Total	5,458.6	-1,537.2	3,921.4	450.7	4,372.2

Numbers may not add due to rounding.

1/ FY 2023 includes \$1,568 million in Overseas Operations Cost Actuals.

2/ FY 2024 includes \$1,287 million in OOC requested funding.

3/ FY 2025 includes \$1,422 million in OOC budget estimate.

Army: The Afloat Prepositioned Fleet (APF) program funds prepositioned ships, which carry equipment, supplies, and ammunition and are available for immediate and rapid response to unforeseen contingencies worldwide. The Army Prepositioned Stocks (APS) program supports the Army’s capability to project combat-ready forces from the Continental United States (CONUS), Europe, Southwest Asia, the Republic of Korea, and Japan to conduct operations anywhere in the world.

The FY 2025 changes include a decrease in APS-1 contract maintenance due to a reduction of Operational Projects, APS-2 contract maintenance as the Army continues to balance funding across the APS program, and a decrease in War Reserve Secondary Items funding for medical supplies. The FY 2025 budget increases funding for APS-4 care of supplies in storage and contract maintenance for the expansion of unit sets in the Philippines and Australia in the Indo-Pacific. The budget also increases APS-5 support for the care of supplies in storage and contract maintenance of the unit sets and operational projects in Southwest Asia.

Navy: Military Sealift Command (MSC) maintains 14 vessels in the Prepositioning program. Afloat Prepositioning strategically places military equipment and supplies aboard ships in key ocean areas to ensure rapid availability during a major theater war, a humanitarian operation, or other contingency. Prepositioning ships provide quick and efficient movement of military gear between operating areas without reliance on other nations’ transportation networks. Many prepositioning ships can discharge liquid, containerized, or motorized cargo both pier-side or while anchored offshore by using floating hoses and shallow-draft watercraft, called lighterage, that are carried aboard. This allows cargo to be ferried to shore where ports are non-existent or in poor condition and enables the nation’s military forces to operate in developed and undeveloped regions. These ships operate within the Navy Working Capital Fund (NWCF).

MOBILIZATION

The FY 2025 changes include increases in prepositioning support for Afloat Prepositioning ships supporting the Pacific Fleet Area of responsibility. The budget decreases funding for reduced maintenance requirements of large medium speed roll-on/roll-off (LMSR) vessels. The transfer of eight LMSRs from MSC to MARAD completes in FY 2025, reducing the inventory of LMSR vessels to zero.

Marine Corps: The Marine Corps prepositioning programs are strategic capabilities enabled by their inherent mobility and global laydown. Prepositioning supports the Marine Corps doctrine for rapid employment of expeditionary forces and consists of the Maritime Prepositioning Force (MPF) and the Marine Corps Prepositioning Program-Norway (MCPN). These afloat and ashore programs are forward-sited to reduce reaction time in providing combatant commanders with scalable, tailorable Marine Air-Ground Task Forces (MAGTFs) to address missions across the range of military operations.

The FY 2025 changes include increases supporting the sustainment of Global Positioning Network (GPN) PHIL South (site 1) and the stand-up of GPN AUS South (site 2) and GPN Palau (site 3). The funding supports the Marine Corps capabilities in a contested logistics environment while reducing the service's overall requirements for a strategic lift within the U.S. Indo-Pacific Command area of responsibility. Increases also support facility upgrades, initial maintenance, supply, and temporary assignment of duty (TAD) associated with new sites.

Air Force: Mobility operations of the Air Force Air Mobility Command (AMC) provide “America’s Global Reach.” AMC’s mission is rapid global mobility and sustainment for America’s armed forces. These objectives lie at the heart of U.S. strategy in the modern worldwide war fighting environment. AMC also plays a crucial role in providing humanitarian support at home and abroad. Major mobility operations include airlift and refueling for all of America’s armed forces; AMC aircrew training and proficiency activities; airlift operations supporting the President, Vice President, Cabinet Secretaries, and other high ranking officials; specialized airlift activities supporting the prepositioning of war materials, the storage of nuclear weapons and materials, the sustainment of contingency hospitals and medical clinics; and the expansion of American military world-wide communications and data networks.

The FY 2025 changes include increases for channel missions, civilian pay average workyear cost adjustments, airlift mission training for the C-5 aircraft, medical readiness panel, studies, and analysis program, and ammo grade containers. Program decreases include operational support airlift, civilian workforce reduction, airlift mission training for multi-capable airmen, and airlift mission training supporting the European Deterrence Initiative. The FY 2025 budget request also includes a realignment of medical readiness from non-pay to pay.

Numbers may not add due to rounding

1/ FY 2023 includes \$1,568 million in Overseas Operations Cost Actuals.

2/ FY 2024 includes \$1,287 million in OOC requested funding.

3/ FY 2025 includes \$1,422 million in OOC budget estimate.

Army: The Army is enhancing its strategic mobility program to provide a more globally responsive and regionally engaged program to link current capabilities with future force projection requirements. The three major efforts for Strategic Mobility are prepositioning combat materiel (afloat and ashore), power projection out-loading, and deployment readiness training. Strategic Mobility supports the National Military Strategy (NMS) and the Army Strategic Planning Guidance (ASPG) through the Army Prepositioned Stocks (APS) unit equipment and activity sets by providing an immediate response capability to deploying forces.

The major FY 2025 changes in the Army's strategic mobilization program include increasing support for the projected vessel use and rate costs paid to the Transportation Working Capital Fund; prioritizing the care of supplies in storage, parts, and contract maintenance

MOBILIZATION

MOBILIZATION

of the unit sets associated with the APS Afloat program; and increasing funding for the Brigade Inspection Readiness Exercise Program. The Brigade Inspection Readiness Exercise Program is conducted in odd years to assess the readiness and operability of APS watercraft and for Soldier training to conduct APS draw operations.

The Army Industrial Preparedness in FY 2025 includes a modest decrease to maintain the current level of evaluations for industrial base capabilities.

Navy: The Navy's other mobilization programs include aircraft and ship activation/inactivation programs, which place aircraft and ships (nuclear and conventional) out of active service and prepare and maintain them for mobilization purposes or disposal through scrapping and sales. Other mobilization programs include the ready reserve forces to support the rapid worldwide deployment of military forces; the expeditionary health services systems program, which provides comprehensive medical support to U.S. and allied forces in the event of contingency operations; and maintenance, overhaul, and support of Navy equipment aboard Coast Guard vessels.

Changes to Activations/Inactivations in FY 2025 include increases to the mix of nuclear-powered ships and submarines decommissioning in the disposal process for FY 2024 and FY 2025, as well as planned award of a \$675M nuclear aircraft carrier dismantlement and disposal contract for USS Enterprise (CVN 65). Nuclear-powered ships and submarines take several years to fully defuel, decontaminate, and recycle or dispose of. FY 2025 inactivations include 19 battle-force ships: four cruisers (CG), three submarines (SSN), one dock landing ship (LSD), two littoral combat ships (LCS), four mine countermeasure ships (MCM), four expeditionary fast transport ships (EPF), and one expeditionary transfer dock ship (T-EPF).

Ready Reserve Forces FY 2025 changes include increases for dry-docking requirements, modernization of two used vessels purchased in FY 2024, and Global Positioning System and Communication equipment upgrades. There are also decreases due to maintenance for Surge Large Medium Speed Roll-on/Roll-Off (LMSR) and the completion of the transfer of eight LMSRs from MSC to MARAD.

Expeditionary Health Services Systems FY 2025 changes include increases to support sustainment of the increasing EXMEDS platform modernization requirements for the Enroute Care System (ERCS), Expeditionary Resuscitative Surgical System (ERSS), Expeditionary Medical Units (EMU), Expeditionary Medical Facilities (EMF), Forward Deployable Preventive Medicine Units (FDPMU) and hospital ships. Additional changes result from increasing Reduced Operating Status (ROS) days, decreasing Fully Operational Status (FOS) days for USNS Mercy, and decreasing ROS days and increasing FOS days for USNS COMFORT to meet anticipated operational needs.

Coast Guard Support did not change significantly from FY 2024 to FY 2025.

Air Force: The Air Force's other Mobilization program includes resources for specialized airlift activities supporting prepositioning operations for war readiness materials, theater nuclear weapon storage, and security systems, industrial preparedness, inactive aircraft storage, deployable contingency hospitals and clinics, and the Medical Counter-Chemical, Biological, Radiological, Nuclear (C-CBRN) Installation Response Program.

MOBILIZATION

MOBILIZATION

The FY 2025 net increase is attributable to the adjustments in civilian pay average workyear cost and replacement of eroding ammo grade shipment containers that undergo frequent and rigorous inspections, ensuring worldwide shipment of munitions remains in accordance with international shipping standards.

TRAINING AND EDUCATION

Training and Education resources finance the operation of a wide range of Service training centers and schools, Service academies, DoD and Joint-Service schools and colleges, Reserve Officer Training Corps (ROTC) units, the Junior ROTC scholarship program, the Uniformed Services University of the Health Sciences (USUHS), and the Health Professions Scholarship Program (HPSP). The Fiscal Year (FY) 2025 budget request reflects a net increase of \$64.9 million.

TRAINING AND EDUCATION

TRAINING AND EDUCATION

Recruit Training:

- The Army budget request of \$165.6 million reflects a decrease of \$27.4 million primarily attributable to decreases in funding for school support in conducting Basic Combat Training and One Station Unit Training courses for approximately 9,600 students, reflecting a reduction in student load.
- The Navy budget request of \$18.8 million reflects an increase of \$2.2 million primarily attributable to growth in training costs for a Recruit Training Command (RTC) Future Sailor Preparatory Course (FSPC).
- The Marine Corps budget request of \$26.6 million reflects a net increase of \$0.3 million primarily attributable to price growth.
- The Air Force budget request of \$28.1 million reflects a decrease of \$0.8 million primarily attributable to adjustments to average civilian personnel work-year costs and recruit training mission support requirements.
- The Space Force budget request of \$76.4 million reflects a decrease of \$25.7 million primarily attributable to funding for Space Delta 10 and initial skills training for Cyber Guardians, Guardian Basic Military Education, and Guardian Resilience Teams.

Specialized Skill Training:

- The Army budget request of \$1,064.1 million reflects a decrease of \$83.3 million primarily attributable to a reduced student load, schoolhouse support, and Military Occupational Specialty supporting USCENTCOM.
- The Navy budget request of \$1,204.8 million reflects a decrease of \$4.4 million primarily associated with the Ready Relevant Learning program, supporting instructor development, media upgrades, and training equipment.
- The Marine Corps budget request of \$128.5 million reflects a decrease of \$4.7 million primarily attributable to a reduction in Amphibious Combat Vehicle, Corpsmen, Infantry, and Instructor Development Military Occupational Specialty skills training requirements.
- The Air Force budget request of \$624.5 million reflects an increase of \$36.4 million primarily attributable to General and Specialized Skills Training classrooms and addressing critical gaps in the Military Working Dog (MWD) program.
- The Space Force budget request of \$54.4 million reflects an increase of \$13.3 million for the development of the National Space Test and Training Complex (NSTTC) cyber range and aggressor capabilities, cyber testing for space systems, a Hardware in the Loop (HWIL) lab to conduct cyber test and evaluation, and range capabilities to perform Multi-Domain Operations (MDO) training and exercises.
- The Defense Threat Reduction Agency budget request of \$5.6 million reflects an increase of \$0.9 million primarily attributable to the procurement of contractor services and equipment to enhance media support and course development for the Defense Nuclear Weapons School.
- The USSOCOM budget request of \$316.6 million reflects an increase of \$12.4 million primarily attributable to the U.S. Army Special Operations Command support services contract that provides flight and combat skills instructors, resources 38 Army training requirements and resource systems, and approved Special Operations Aviation institutional training programs of instruction with a

TRAINING AND EDUCATION

TRAINING AND EDUCATION

student throughput of over 950 annually.

Officer Acquisition:

- The Army budget request of \$200.8 million reflects an increase of \$22.4 million primarily attributable to enhancements in mission-unique equipment in academic facilities at the U.S. Military Academy, West Point, New York. Additional funding includes U.S. Military Academy's Professional Faculty Development, fostering innovative educational solutions.
- The Navy budget request of \$206.3 million reflects an increase of \$4.7 million primarily attributable to funding additional Midshipmen food service wage grade (WG) positions at the U.S. Naval Academy (USNA).
- The Marine Corps budget request of \$1.4 million reflects an increase of \$0.1 million due to a funding realignment for Officer Candidates Schools (OCS) education and training courses.
- The Air Force budget request of \$219.8 million reflects an increase of \$17.0 million primarily due to the United States Air Force Academy (USAFA) modernization requirements, including direct mission support for cadets, preparatory school students, and faculty.

Professional Development:

- The Army budget request of \$214.5 million reflects an increase of \$13.7 million primarily attributable to funding for modernization efforts involving academic and administrative contract support, IT support, and audio-visual equipment. Additional funding is provided for Sergeant Major Academy due to projected student costs, including travel and increased student load.
- The Navy budget request of \$230.0 million reflects an increase of \$26.2 million primarily attributable to increased faculty, including administrative contract support and IT support, and requirements supporting the NWC (Naval War College).
- The Marine Corps budget request of \$63.5 million reflects a decrease of \$2.7 million primarily attributable to a reduction in information technology systems and required subscription services, resulting in Marine Corps University's inability to update to a cloud-based infrastructure.
- The Air Force budget request of \$322.3 million reflects an increase of \$21.0 million primarily attributable to support of professional military education (PME) related lodging rate increases. This funding impacts both in-resident Noncommissioned Officer Academy enlisted PME and Squadron Officer School courses.
- The Space Force budget request of \$60.1 million reflects an increase of \$24.1 million primarily to support the addition of Space Force Senior Level Education (SLE) seminar and provides funding for Intermediate Level Education (ILE) seminar support. This funding will support software licenses and Student Management Systems across Delta 1 and Delta 13 for the Space Force Captain's Course, Guardian Specialist Course, and education administration support.
- The Defense Acquisition University budget request of \$185.0 million reflects an increase of \$1.7 million primarily attributable to the investments in learning assets, infrastructure, and information technology for the Defense acquisition workforce.
- The Defense Threat Reduction Agency budget request of \$4.2 million reflects an increase of \$0.5 million primarily attributable to

TRAINING AND EDUCATION

TRAINING AND EDUCATION

training and leadership development programs, including the Professional Partnership Program and Competitive and Leadership Development Training program.

- The National Defense University budget request of \$132.1 million reflects an increase of \$13.9 million primarily attributable to increased support for facilities maintenance and continued implementation of the Enterprise Data Management Program.
- The USSOCOM budget request of \$31.8 million reflects a decrease of \$2.1 million primarily attributable to eliminating the three courses offered to Special Operations Forces (SOF) Non-Commissioned Officers and the associated ten contractor positions utilized to facilitate the courses.
- The Defense Health Program budget request of \$371.8 million reflects an increase of \$35.7 million primarily attributable to operations sustainment and education and training programs for healthcare personnel at the Uniformed Services University of the Health Sciences Medical Education and Training Complex (USUHS-METC).

ROTC:

- The Army budget request of \$557.5 million reflects a net increase of \$6.0 million primarily attributable to price growth. There was a decrease in program growth due to scholarship costs, specifically tuition and fees, and a program reduction for Senior Reserve Officer Training Corps (SROTC) Operations, including travel and supplies.
- The Navy budget request of \$169.0 million reflects a decrease of \$6.1 million primarily due to eliminating 115-230 scholarship reimbursements for Naval Service Training Command (NSTC) production mandates.
- The Marine Corps budget request of \$30.3 million reflects an increase of \$0.7 million primarily attributable to inflation.
- The Air Force budget request of \$129.9 million reflects a decrease of \$7.7 million attributable to a reduction in full-year funding and manpower (7 civilian positions) due to current recruiting and retention challenges. Additionally, a decrease in officer accessions drove a reduction in the Reserve Officers' Training Corps Scholarship Program.

Flight Training:

- The Army budget request of \$1,419.0 million reflects an increase of \$20.6 million primarily attributable to increases in funding for aircraft repair parts for the AH-64E Apache and CH-47F Chinook aircraft. The budget also increases funding for maintenance contract support for the LUH-72 Helicopter aging fleet.
- The Navy budget request of \$ 1,099.2 million reflects a decrease of \$19.8 million primarily attributable to updated cost projections for various programs that fall within Flight Training Other, including labor costs for civilian personnel, supplies, and materials, transportation of personnel and equipment, purchased communications services, other contracted services.
- The Air Force budget request of \$883.0 million reflects a net increase of \$7.8 million, primarily attributable to an increase in price growth. This net increase was offset by decreases in operations support for the Advanced Pilot Trainer (APT) T-7A at Randolph

TRAINING AND EDUCATION

TRAINING AND EDUCATION

and Columbus Air Force Bases, flight line maintenance requirements, and a reduction in full-year funding and manpower (84 civilian positions) due to current recruiting and retention challenges.

Training Support:

- The Army budget request of \$633.3 million reflects a decrease of \$49.6 million primarily attributable to projected funding reductions in training seats for Additional Skill Identifier (ASI), Special Skills Qualifier (SQI), Enlisted accessions, and training requirements. Additional reduction is based on historical under-execution.
- The Navy budget request of \$160.9 million reflects a decrease of \$8.5 million primarily attributable to a funding increase for 24 civilian personnel for support at the Naval Education and Training Professional Development Center, Naval Education and Training Command Headquarters, Naval Service Training Command, and other manpower, personnel, training, and education organizations.
- The Marine Corps budget request of \$553.2 million reflects a decrease of \$17.0 million primarily attributable to a reduction in the Marine Air Ground Task Force Training Command and Ranges and Training Area Management.
- The Air Force budget request of \$192.0 million reflects a decrease of \$2.6 million primarily attributable to a Technical Training Transformation and Training Support Programs reprioritization and a reduction in full-year funding and manpower (30 civilian positions) due to current recruiting and retention challenges.
- The Space Force budget request of \$25.4 million reflects an increase of \$6.2 million primarily attributable to the realignment of funding for Space Training and Readiness Command (STARCOM). This transfer corrects a prior programming error to account for proper execution.

The total Fiscal Year (FY) 2025 Recruiting, Advertising, and Examining budget request of \$2,162.9 million reflects a net increase of \$122.4 million over the FY 2024 request and a net decrease of \$410.0 million over the FY 2023 Actual level. Overall, funding for recruiting, advertising, and examining supports recruiting commands and stations throughout the United States; local, regional, and national advertising to access and retain quality enlisted and officer personnel; and processing all enlisted personnel entering active duty.

RECRUITING, ADVERTISING, AND EXAMINING

Recruiting

The recruiting mission is to attract, access, and maintain the highest quality force possible. Recruiting funds support recruiting commands and stations throughout the United States, including civilian pay and training; recruiter training; recruiter travel and per diem; applicant meals, lodging, and travel; vehicle operation and maintenance; and office leases.

The FY 2025 recruiting program reflects a net increase of \$68.7 million, which is primarily driven by an Army increase in funding for recruiting and retention tools such as modernizing recruitment stations, enhancing Brigade screening support, software licenses to support the enlisted online recruiting database, and the Army Career Explorer (ACE), and the Army Recruiting Information System (ARISS) rollout. This is also driven by an Air Force increase for Air Force Recruiting Information System (AFRISS) migration to assist Air Force recruiters compete for high-quality talent necessary to grow the force.

RECRUITING, ADVERTISING, AND EXAMINING

Advertising

Advertising funds provide local, regional, national, and corporate advertising to access quality enlisted and officer personnel. Advertising is designed to increase public awareness and describe employment opportunities. The Services fund a media mix that includes television and radio; magazines and newspapers; internet websites and banner advertising; informational videos; direct mail campaigns; and recruiting booklets/pamphlets.

The FY 2025 Advertising program reflects a net increase of \$43.5 million, primarily due to an Army National Guard realignment of funding to support their new marketing campaign initiatives, including commercials, advertising, and media costs, to meet recruiting and retention goals. This is also driven by an Army funding increase for advertising costs within diverse media platforms to reach a broader audience, foster stronger connections with potential service members and their local communities, and reinforce positive images of the military.

RECRUITING, ADVERTISING, AND EXAMINING

Examining

Examining funds provide support for the U.S. Military Entrance Processing Command (MEPCOM), which operates Military Entrance Processing Stations (MEPS) and Military Entrance Test (MET) sites. This joint-service organization screens individuals for medical and moral qualifications and aptitude and administratively processes them into the Armed Services. During mobilization, the command processes persons called to active duty from the Individual Ready Reserve and conscripts inducted via the Selective Service System (SSS). As the DoD Executive Agent for the MEPCOM, the Army provides funding and civilian personnel resources for the operation of the MEPS and the MET sites, administration of the Armed Services Vocational Aptitude Battery Career Exploration Program (ASVAB CEP) for both the production and student (high school) testing programs and the MEPCOM's Information Technology (IT) requirements. The Air Force provides funding for an Air Force specific strength aptitude test program. This Air Force program provides a gender-neutral test to ensure personnel can perform their duties, reducing accidents and injuries due to overexertion and alleviating attrition in strenuous jobs.

The FY 2025 Examining program reflects a net increase of \$10.2 million, which is primarily driven by an Army net increase related to ASVAB CEP, a key student testing program that introduces over 700,000 students annually to military service opportunities, ensuring its successful expansion and continued commitment to student engagement.

Command, control, and communications (C3) resources provide seamless worldwide communication networks for voice, data, and imagery traffic of sufficient quality, reliability, and flexibility to ensure responsive support to United States forces. This information infrastructure contains communications networks, computers, software, databases, applications, data, security services, and other capabilities that meet the information processing and transport needs of DoD users. The C3 program specifically funds telecommunications systems, leased circuits, and other necessary services for information transfer, messaging operations, and equipment for sending and receiving communications transmissions. Additionally, this program funds efforts to integrate command and control systems with communications to support the information needs of field commanders. The Fiscal Year (FY) 2025 budget request of \$14.5 billion reflects a net decrease of \$0.2 billion compared to the FY 2024 requested level, primarily due to reductions in C3-related information assurance and cyber activities.

Numbers may not add due to rounding.

Data Communications: Communications are an integral element of C3 and include sustaining base, long haul, and all deployable and mobile communications assets. Resources for sustaining base communications are almost exclusively fixed plant and installation

COMMAND, CONTROL, AND COMMUNICATIONS (C3)

COMMAND, CONTROL, AND COMMUNICATIONS (C3)

support and provide the “backbone” and other communications infrastructure for CONUS and overseas locations. Funding for long haul communications, comprised mainly of the Defense Information Systems Network (DISN) costs, to include voice and data services for all off-post connectivity, worldwide web, and other connectivity. The DISN is a combination of DoD-owned and leased telecommunications networks and subsystems comprised of equipment, services, personnel, and facilities under the management control and operational direction of the Defense Information Systems Agency (DISA). Resources for deployable and mobile communications include funding for systems and capabilities to extend communications into areas of operations, primarily provided through satellite systems and other wireless transmission means and constitute moveable or transportable communications. The FY 2025 budget request of \$7.0 billion reflects a net increase of \$1.9 million above the FY 2024 requested funding level mainly due to price growth.

Command and Control (C2): This category represents the facilities, systems, and workforce essential to a commander for planning, directing, coordinating, and controlling operations of assigned forces. These command-and-control capabilities cover the National Command Authority through the joint operational, theater level echelon, and front-line tactical elements. The FY 2025 budget request of \$5.0 billion reflects a net decrease of \$31.7 million below the FY 2024 requested funding level primarily due to Air Force one-time cost reductions that supported increases for information technology, digital modernization, cloud transition efforts, and reduced software requirements and contractor logistics support.

C3-Related: This category includes various programs and functions related to, and in support of, communications, command, and control requirements and comprises communications security and computer security. Included are communication resources to support navigation, meteorological reporting, combat identification that provides positive identification of friendly forces to prevent fratricide, and information assurance to protect information systems against denial of service and unauthorized (accidental or intentional) disclosure, modification, or destruction of the information system or data. The FY 2025 budget request of \$2.4 billion reflects a net decrease of \$177.6 million compared to the FY 2024 requested funding level, mainly from a reduction in Army cyber activities due to the implementation of standardized network security and management capabilities to improve network readiness and interoperability.

Numbers may not add due to rounding.

1/ FY 2023 includes \$271.7 million in Overseas Operations Costs (OOC) and \$133.4 million in Ukraine funding.

2/ FY 2024 includes \$122.5 million for the OOC budget request.

3/ FY 2025 includes \$339.5 million for the OOC budget estimate.

4/ The Space Force requirements were executed in the Air Force's budget in FY 2023.

The Transportation budget funds the movement of materiel between contractors' plants, military logistics centers, and field activities worldwide. The Components purchase transportation requirements within the Department from Defense Working Capital Fund (DWCF) activities and commercial sources. There are two transportation types: first destination and second destination (explained subsequently). In addition to Department of Defense (DoD) military supplies and equipment, other significant commodities shipped include mail overseas, subsistence items, and base exchange inventory. Supplies and equipment are shipped over land, sea, or by air. In Fiscal Year (FY) 2025, DoD transportation costs total \$1,808.8 million, an increase of \$82.9 million above the FY 2024 budget request.

TRANSPORTATION

TRANSPORTATION

The Army Active Component budget request of \$785.2 million reflects an increase of \$66.8 million, 80 percent of the total transportation increase in second destination transportation costs. The increase is primarily driven by transportation requirements in Overseas Operations Costs (OOC) for equipment redistribution in theater. This resource the sustainment equipment requirements supporting units and balances projected requirements for the OOC operational categories. There are additional increases in operations to fund the Traffic Management and Port Readiness Service Level Bills and ensure the operations of the Continental United States (OCONUS) seaports and global ports. Below are highlights of other changes within transportation.

- The Navy Active Component budget request of \$275.4 million reflects an increase of \$26.6 million in the second destination transportation program, primarily driven by the requirement to sustain the operational volume and demand of transportation services to meet national security objectives in peace and war. Additionally, it provides high-priority quality-of-life support for overseas mail and the Navy Exchange (NEXCOM). Various factors drive the program's volume, the most significant being operating tempo and warfighting readiness.
- The Marine Corps budget request of \$96.6 million reflects an increase of \$6.2 million in the second destination transportation program for requirements provided by the United States Transportation Command.
- The Air Force Active Component budget request of \$275.3 million reflects a decrease of \$3.0 million in the second destination, an adjustment for the European Deterrence Initiative in line with the current United States European Command theater posture.
- The Space Force budget request of \$35.3 million reflects an increase of \$1.3 million in the second destination transportation program, mainly driven by inflation.
- The DoD Education Activity budget request of \$24.6 million reflects a decrease of \$7.9 million in the second destination transportation program due to shipping reduction requirements for the number of units using surface transportation.
- The Joint Chiefs of Staff budget request of \$258.4 million reflects a decrease of \$2.6 million in the second destination transportation program, mainly due to a reduction in the number/scale of forecasted exercises compared to FY 2024. This resulted in reduced requirements for transportation of joint forces personnel and equipment, offset by significant continued global shipping cost growth.

TRANSPORTATION

First Destination Transportation

First Destination Transportation (FDT) finances the transportation costs for delivery of items purchased directly from manufacturers. Of note, FDT costs for delivery of procurement-funded weapon systems and equipment or supplies and equipment purchased through the Defense Working Capital Fund are not included. The following table summarizes FDT funding.

First Destination Transportation Funding

TRANSPORTATION

Second Destination Transportation

Funding for Second Destination Transportation (SDT) finances the movement of government-owned equipment and materiel among and between depots, logistics centers, and field activities, including retrograde cargo, post office mail, ammunition, support of classified and special programs, spare parts, and other cargo. Equipment and materiel are shipped by military airlift and sealift worldwide, commercial surface transportation, or commercial air carriers operating daily flights over regular routes within CONUS and Alaska. Costs include accessory transportation services such as vessel per diem and retention charges. The following table summarizes other SDT funding, including storage costs, container leasing, shipping equipment (e.g., cranes), and cargo tracking systems.

Description of Operations Financed

The Defense POW/MIA Accounting Agency (DPAA) provides families and the Nation with the fullest possible accounting for missing personnel from past conflicts (World War II, the Korean War, the Cold War, the Indochina (Vietnam) War, the Persian Gulf War, the Iraq Theater of Operations) and other conflicts or incidents as the Secretary of Defense (SECDEF) directs. As a Defense Agency, the DPAA leads the national effort to develop and implement DoD policy on all matters relating to past conflict personnel accounting, conducts global search, recovery, and laboratory operations to identify and account for personnel from past conflicts, and provides information and answers to the families and shares their stories. The DPAA also provides analytical support to official United States delegations and conducts technical discussions with host nation officials. Additionally, the DPAA continues to transform the Department's past conflict personnel accounting mission, which includes the development, implementation, and incorporation of public-private partnerships into global field operations and scientific and other operations to more effectively and efficiently account for mission personnel and ensure their families receive the answers they seek.

PRISONER OF WAR/MISSING IN ACTION (POW/MIA) ACTIVITIES

PRISONER OF WAR/MISSING IN ACTION (POW/MIA) ACTIVITIES

The Armed Forces Medical Examiner System (AFMES) provides worldwide scientific consultation, research, and education services in the field of forensic DNA analysis as the only DoD Human Remains DNA testing laboratory and is an integral partner in helping to identify the remains of service members from both current and past conflicts. AFMES's analysis of DNA samples remains a critical aspect of the Department's POW/MIA accounting mission. AFMES transitioned from the Army to the Defense Health Program in FY 2018.

Narrative Program Description by APPN, LI, SAG/BLI

DPAA's FY 2025 budget supports investigation and recovery field operation activities.

AFMES analysis of DNA samples remains a critical aspect of the Department's POW/MIA past conflict personnel accounting mission.

CIVILIAN PERSONNEL

The size of the fiscal year (FY) 2025 civilian workforce decreased by 6,973 full-time-equivalents (FTEs) or 0.84 percent from the FY 2024 requested level of 827,259 FTEs to the FY 2025 request of 820,286 FTEs. This request reflects the workforce size changes required to maintain the competitive edge while ensuring the civilian workforce remains appropriately sized to support the military personnel in defending the nation.

Maintaining the edge over global competitors such as China requires the size and composition of the civilian workforce to continuously evolve to meet critical demands, such as those emerging in cyber technologies and digital threats, while guarding against the erosion of organic skills and an overreliance on contracted services, all the while achieving efficiencies and expanding areas for modernization. The Department recognizes congressional concerns over the size, composition, and costs of the civilian workforce and is committed to rightsizing and optimizing its Total Force – to include military, civilians, and contracted support – to achieve mission effectiveness and deliver warfighting capability and readiness. Artificially reducing one portion of the total force – such as the civilian workforce – is counter to the Department’s goals and mission.

The Department continues to increase its focus on managing civilian talent by implementing new and expanded practices to leverage ongoing enterprise-level talent management efforts and measuring program performance against talent demand signals. The Department is investing in its most critical asset – people – as it overcomes the recent challenges of recruiting and retaining highly qualified talent for today’s critical workforce while recognizing the need to cultivate the future workforce to strengthen our deterrence against China.

The Department continues to focus on integrating technology by conducting a comprehensive review of the civilian workforce as part of the Total Force. Conducting this review through the lens of mission and tasks ensures the Department is applying resources to meet the most critical needs. To that end, the Department is examining how artificial intelligence, additive manufacturing, autonomous and remotely operated platforms, predictive analytics, big data, and other emerging technologies can help achieve the mission while optimizing our workforces; however, successful implementation and operationalization of these technologies requires a highly skilled and motivated workforce. The Department’s ability to recruit, develop, and retain such a workforce is predicated on well-reasoned and analytically based decision-making, not arbitrary reductions or artificial suppression of the workforce.

The FY 2025 workforce decrease best reflects a more executable workforce size while ensuring critical occupations that support lethality, improve mitigation/response to civilian harm, and continue implementing the Independent Review Commission (IRC) recommendations on Sexual Assault in the Military for a prevention workforce.

Numbers may not add due to rounding.

1/ Table excludes MILCON and RDT&E.

2/ Table excludes R&D Contracts (25.5) and Medical Contracts (25.6).

3/ FY 2023 includes Overseas Operations Costs (OOC) Actuals.

4/ FY 2024 includes OOC Requested.

5/ FY 2025 includes OOC Budget Estimate.

Description of Services Financed: In accordance with Federal Acquisition Regulation 37.101, contract services are contracts that directly engage the time and effort of a contractor whose primary purpose is to perform an identifiable task rather than to furnish an end item of supply. Contract services are a viable source of labor for commercial work that is not inherently governmental or otherwise exempted from the private sector. Per section 4506 of 10 U.S. Code), this exhibit summarizes services contracted within all DoD appropriations except Military Construction and Research, Development, Test, and Evaluation. This exhibit includes contract services for medical care, other federal purchases, and Overseas Operations Costs.

Reporting Requirement: This chapter is being submitted meeting section 4506 of 10 U.S. Code reporting requirements for the FY 2025 President's Budget. The report provides information on contract services for the DoD Components by object class (OC) and sub-object class for the budget year and the subsequent four fiscal years in the future-years defense program.

Reporting Limitation: The FY 2026 to FY 2029 budget estimates were calculated by inflating FY 2025 data. The DoD Component's systems are only designed to collect contract services data for the prior year (FY 2023), current year (FY 2024), and budget year (FY 2025) and do not provide for data collection across the future years defense program. The forecasting of contract services requirements will be an evolving process, and through the contract services working group, the Department will continue to assess any necessary measures to overcome challenges to implement section 4506 of the 10 U.S. Code.

Summary of Changes: The Department's FY 2025 budget request includes \$105.4 billion for contract services, a net increase of

CONTRACT SERVICES

CONTRACT SERVICES

\$3.66 billion from the FY 2024 budget request. The FY 2025 changes include increases in advisory and assistance services for engineering and technical services, training, studies, and analysis. There are also increases in the operation and maintenance of equipment for ship maintenance contracts, other depot maintenance, air defense contracts, space support, and information technology support.

The FY 2026 to FY 2029 budget estimate includes inflation and forecasting methodology, which will be further reviewed during each Component's future evaluation of requirements for contract services. The FY 2026 to FY 2029 changes can be attributed to increases in the operation and maintenance of facilities (OC 25.4), operation and maintenance of equipment (OC 25.7), and subsistence and support of persons (OC 25.8) for the Army, Navy, and Air Force. There are also decreases in advisory and assistance services (OC 25.1), and other services (OC 25.2) for the Army and Defense-wide agencies. The future budget estimate for contract services could go up or down depending on the Department's critical readiness requirements.

The following tables detail the changes in the contract services program by DoD Components.

CONTRACT SERVICES

CONTRACT SERVICES

The Army's FY 2025 budget request includes \$21.8 billion for contract services, a net decrease of \$0.4 billion from FY 2024 requested levels. The decrease is in advisory and assistance, operation and maintenance of facilities, and equipment operation and maintenance.

- Advisory and Assistance decreases by \$127 million, which is attributable to a reduction in funding for Training Support Systems and a decrease in Army service-retained Cyber Operations funding to reduce duplication of function with Enterprise Cyber Operations capabilities provided by U.S. Cyber Command.
- Other Services decrease by \$66 million, primarily attributable to policy changes to stabilize resources for tuition assistance and Army credentialing and continuing education (ACCESS) across all Army Component usage.
- Operation and Maintenance of Facilities decreases by \$96 million due to reductions in equipment maintenance and operation and maintenance of facilities.
- Operation and Maintenance of Equipment decreases by \$179 million for Contract Logistics Support for the Shadow; decreases for Depot Maintenance (Reset) of Aircraft and other equipment for Operation ENDURING SENTINEL; decreases in post-production software support for planned divestitures; and consolidation of Army networks under a single IT service provider.
- Subsistence and support of persons increase by \$30 million, which is attributable to increases in funding for food services, including modernizing dining facilities.

The Army's FY 2026 to FY 2029 budget estimates include inflation and decreases in management and professional support, engineering and technical services, other services, operation and maintenance of facilities, equipment maintenance, and subsistence and support of persons.

CONTRACT SERVICES

CONTRACT SERVICES

The Navy's FY 2025 budget request includes \$27.3 billion for contract services, a net increase of \$2.3 billion from FY 2024 requested levels. The increase includes inflation and program growth, primarily in equipment operation and maintenance.

- Advisory and Assistance increases by \$424 million, with funding added to engineering, technical, management, and professional services.
- Other Services decrease by \$136 million is attributable to decrease funding for MyNavy HR Transformation contractor support.
- Operation and Maintenance of Facilities increases by \$430 million with funding added to operation and maintenance of facilities.
- Operation and Maintenance of Equipment increases by \$1,606 million, with funding added to ship depot maintenance, aircraft rework, and IT contract support services.

The Navy's FY 2026 to FY 2029 budget estimates include inflation and increases in equipment maintenance, aircraft rework, other depot maintenance, and IT contract support. There are also decreases in management, professional support, engineering, and technical services.

3/ FY 2023 includes Overseas Operations Costs (OOC) Actuals.

4/ FY 2024 includes OOC Requested.

5/ FY 2025 includes OOC Budget Estimate.

The Air Force's FY 2025 budget request includes \$28.5 billion for contract services, a net increase of \$0.3 billion from FY 2024 request levels. The increase is primarily in other depot maintenance.

- Advisory and Assistance increase by \$299 million with additional funds in engineering and technical service support and management/professional support services.

CONTRACT SERVICES

CONTRACT SERVICES

- Other Services decrease by \$213 million for contract services related to training, leadership development, and contingency operations.
- Operation and Maintenance of Facilities decreases by \$283 million in restoration and modernization maintenance and operations.
- Operation and Maintenance of Equipment increases by \$576 million with additional funding for other depot maintenance, equipment maintenance, and Air Defense contract and Space support.

The Air Force's FY 2026 to FY 2029 budget estimates include changes in training, professional support, and facility and equipment maintenance contract support as the DAF services continue to analyze and adjust these requirements during programming and budgeting.

CONTRACT SERVICES

CONTRACT SERVICES

The Defense-Wide FY 2025 budget request includes \$27.7 billion for contract services, a net increase of \$1.5 billion from FY 2024 requested levels. There are increases in advisory assistance, operations, and equipment maintenance. There are also increases in advisory and assistance services, other services, and other government purchases, as well as the operation and maintenance of facilities.

- Advisory and Assistance increases by \$1,022 million with additional funding in management and professional support services, studies, analysis and evaluations, and engineering and technical services.
- Other Services increase by \$88 million with additional funding in training and leadership development, IT contract support services, and a reduction in other services.
- Other Government Purchases increase by \$264 million, and there was an increase in other services.
- Operation and Maintenance of Facilities increases by \$138 million with additional funding in operation and maintenance of facilities.
- Operation and Maintenance of Equipment decreases by \$36 million with decreases in equipment maintenance by contract, ship maintenance by contract, aircraft rework, and an increase in IT contract support services.

The Defense-wide FY 2026 to FY 2028 budget estimates include inflation, increases in engineering and technical services, training and leadership development, equipment maintenance, and decreases in management and professional support services, other services, operation and maintenance of facilities, and IT contract support services.

SELECTED RESERVE, NATIONAL GUARD, AND RESERVE SUPPORT PERSONNEL

Performance Improvement Initiatives (PII)

In October 2022, the Deputy Secretary of Defense approved a new Defense Performance Improvement Framework in response to the mandate in section 125a, Title 10, U.S.C., to establish guidance for measuring improvements to processes, systems, policies, and procurement that increase effectiveness, efficiency, or reliability to best align the Department's resources to strategic efforts such as the Strategic Management Plan (SMP) and the National Defense Strategy (NDS). The Department is relentlessly pursuing opportunities to address performance gaps, increase efficiency, and optimize costs by identifying PIIs. This is the Department's first full year of implementation of the PII framework.

Performance Improvement Initiatives (PII) Categories

PIIs are categorized as follows:

Continuous Process Improvement (CPI) initiatives – improvement initiatives that aim to enhance everyday management practices, streamline processes, and adjust systems within the localized authority, direction, and control of the organization's leadership.

Optimization initiatives are initiatives that the organization's leadership undertakes to divest equipment, partial or entire weapon systems strategically or discontinue legacy acquisition programs and systems to modernize and/or fund purchases supporting the Department's higher priorities.

- In January 2023, the Deputy Secretary of Defense initiated the Enabling Future Capability Transitions (EFCT) process whereby the Under Secretary of Defense for Acquisition and Sustainment (USD(A&S)) and the Under Secretary of Defense for Policy (USD(P)) led Department-wide reviews of divestment planning in each Future Years Defense Plan (FYDP) cycle.
- The EFCT team informed the PII optimization decisions in this section. These reviews assessed the divestments, their global posture implications, and their industrial base considerations. The EFCT team considered all potential divestments across services, their quantities, schedules, and locations impacted. Impacts on Combatant Command requirements and Defense Planning Scenarios were considered, as well as personnel, mission, and facilities repercussions.

Reform initiatives – larger-scale and time-bounded efforts, often involving more than one DoD Component, designed to remediate structural and/or process gaps within the DoD's existing business model.

Transformation initiatives – initiatives that fundamentally alter the DoD's business model, often through reorganization, the creation of new entities, capabilities, enterprise systems, portfolios, the incorporation of innovative management practices, and other endeavors to fundamentally change how the mission or enterprise functions and services are delivered.

Performance Improvement Initiatives (PII)

Breakdown of Initiatives by DoD Component

The DoD components submitted a total of 50 initiatives for the FY 2025 President's Budget. The breakdown by DoD Component is captured in Figure 1 and by PII Category in Figure 2:

Figure 1. Performance Improvement Initiatives by Component

Performance Improvement Initiatives (PII)

Figure 2. Performance Improvement Initiatives by PII Category

Performance Improvement Initiatives by Category

The Department conducts PI initiatives that focus on various areas of business processes, operations, policies, reforms, acquisitions, and divestments in order to achieve component level and enterprise-wide cost avoidance savings. These areas, their definitions, the cost avoidance savings associated with each category, and descriptions are detailed in the section below:

Continuous Process Improvement Initiatives (CPI) – Improvement initiatives that aim to enhance everyday management practices, streamline processes and adjust systems within the localized authority, direction, and control of the organization’s leadership.

The Department of Navy (DON) implements three CPIs:

- *Military Civilian Conversions*, which includes converting six military positions within Deputy Chief of Naval Operations (Manpower, Personnel, Training, and Education) (N1) to civilian positions due to high rotation rates and gapped billets to establish continuity and maximize subject matter expertise for proper management of N1 programs.
- The *DON25 Infantry Weapons Procurement/Ammunition Rephase* reduces the Fiscal Year (FY) 2025 Infantry Weapons Ammunition funding and quantity for excess growth in FY 2025.
- The *DON25 Under-Execution Review*, which facilitates FY 2025 aircraft procurement; operation and maintenance (active and

Performance Improvement Initiatives (PII)

reserve); other procurement; Marine Corps procurement; research, development, test, and evaluation; and weapons procurement appropriations, requested funding for identified programs. The focus of DON's CPI is improving performance.

The Department of the Air Force (DAF) is planning eight CPIs:

- *Accelerate the EC-37B baseline* by transferring resources from the retiring EC-130H Compass Call electronic warfare aircraft to the new EC-37B Compass Call aircraft and other capabilities.
- *Advanced Targeting and Fire Control* provides funding to automate data collection for cooperative Intelligence Community (IC) and DoD ISR sensor programs.
- *Fund Integrated Operation Network (iON) Pathfinder* will transition from service-owned information technology (IT) mission infrastructure to hybrid, agnostic transport and data interoperability.
- *Contract for Other Country National (OCN)-Escort* at U.S. Air Forces Central area of responsibility locations. This enables Airmen-focused training efforts to align with NDS priorities and better prepare for the high-end fight.
- *Contractor Combat Training Squadrons* replace military manpower across Space Operations Command Delta units with 45 contractor full-time equivalents to perform academic instruction, courseware development, crew force management, and other functions not inherently government and ensure Space members receive weapon-specific training on time.
- *Fund Cyber Range and Aggressor* is a threat-informed, operationally representative training environment, a hardware-in-the-loop lab to conduct cyber tests and evaluations and establish range capabilities to perform multi-domain operations training and exercises.
- *Fund Disposition of Forces* capabilities for developing threat object data relationships and algorithms for Air Force target sets, an object management system, pay-to-play IC DoD-compliant architecture, and focused training.
- *Telemetry, Tracking, and Command (TT&C) Contractor Space Domain Operations* replaces military members with contractors in the TT&C mission set, efficiently maximizing military members' employment.

The Chief Data and Artificial Intelligence Office (CDAO) has one CPI for *Enterprise Data Improvements for all Logistics Supply Classes*, providing visibility of all supply classes to answer the fundamental questions of what we have, where it is located, and what condition it is in to enable decision advantage in a contested joint environment.

The Under Secretary of Defense for Research and Engineering (USD(R&E)) has led a CPI to *Accelerate Technology Transition* and seeks to yield higher rates of relevant technology adoption from science and technology (S&T) to the warfighter.

The Under Secretary of Defense for Personnel and Readiness (USD(P&R)) has led one CPI for *Integrated Prevention Effort* to implement the Suicide Prevention and Response Independent Review Committee recommendations. The Department is pursuing a campaign with five lines of effort, which will guide suicide prevention moving forward.

Performance Improvement Initiatives (PII)

The Under Secretary of Defense for Acquisition and Sustainment (USD(A&S)) is leading six CPIs at the Defense Contract Audit Agency (DCAA):

- *The DCAA Management Information System (DMIS) Replacement* is an agile audit surveillance and performance monitoring and integrated risk management platform to monitor strategic initiatives and operational planning, scheduling, resourcing, and managing audit workload, including reporting status and results.
- *Commercial Auditor Peer Review* fulfills the NDAA of FY 2018 requirement (and the requirements of 10 USC §3842 Performance of Incurred Costs Audits) for DCAA to obtain and pass a peer review performed by a commercial auditor by October 1, 2022. The first peer review contract was awarded in October 2021 (FY 2022). Peer review contracts will be awarded every three years after that.
- *Qualified Private Auditors to Perform Incurred Cost Audits* fulfills the NDAA of FY 2018 requirement (10 USC §3842 Performance of Incurred Costs Audits) to use qualified private auditors to perform incurred cost audits to provide DoD with timely and effective incurred cost audits and ensure that DCAA can allocate resources to higher-risk and more complex audits.
- The *Strategic Initiative Group (SIG) Establishment* consists of the SIG strategy execution champions facilitating the development, integration, and execution of DCAA strategy by Identifying and launching initiatives required to realize strategic objectives. *Chief Data and*
- *Artificial Intelligence Officer (CDAO) Establishment* is the central driving force for the strategic integration of digital and AI technologies in DCAA, developing automation solutions, providing governance and management and future technologies for proper (functional) use, and implementing strategies for the adoption of future technologies to strengthen agency data, analytics, and AI.
- The *Contractor Support Portal*, a digital transformation initiative, securely centralizes contractor submissions to DCAA, improving internal processes and data sharing with the Defense Contract Management Agency (DCMA).

Cost Assessment and Program Evaluation (CAPE) has two CPIs:

- *Studies and Analysis*, focusing on analytical research across the entire spectrum of defense issues and concerns. These scientific and technical engineering services encompass research studies in developing models and simulations and evaluating analytical tools and scientific methods to evaluate and assess weapon systems and warfighting capabilities for warfighting environments, scenarios, and related force structures.
- *IT Procurement* includes analyzing cloud computing costs, including migration and other support activities for databases, models, and business operations systems; conference room video conferencing equipment replacement; and specialized hardware and software.

The Office of the Director of Operational Test and Evaluation (DOT&E) has one CPI, *Digital Modernization*, which supports digital

Performance Improvement Initiatives (PII)

transformation, automation, and modernization and improves our processes' efficiencies.

Legacy Ship and Aircraft Retirements/Optimization Initiatives – Optimization Initiatives involve strategic divestment of equipment, partial or entire weapon systems or discontinuation of legacy acquisition programs and systems, in order to modernize and/or to fund purchases in support of the Department's higher priorities. These strategic divestments are characterized by retirement ahead of the expected service life (ESL). The below summarizes these along with ship and aircraft retirements that occur at or after ESL.

In FY 2025, the Department plans to retire/divest 484 aircraft and decommission 19 ships with a total estimated decrease in operational costs of \$3.3 billion. This will allow the Department to procure and operate more capable replacement aircraft that better align with the National Defense Strategy.

The FY 2025 planned legacy aircraft retirements and corresponding decreases in operational costs are Army (83, \$62.6 million), Navy and Marine Corps (123, \$362.9 million), Air Force (251, \$2.6 billion), and U.S. Special Operations Command (USSOCOM) (27, \$18.8 million).

- The Army plans to divest 17 fixed-wing and 66 rotary-wing aircraft in FY 2025.
 - The fixed-wing aircraft include three EO-5C, three MC-12S, three MC-12S-3, and eight RC-12X for operational savings of \$30.8 million. The FY 2025 divestment of legacy manned ISR programs will allow the Army to invest in advanced aerial intelligence sensing capabilities for Multi-Domain Operations (MDO) against peer and near-peer adversaries, addressing the Army deep sensing needs in all phases of operations. High Accuracy Detection and Exploitation System (HADES) will be the first capability delivered within the Multi-Domain Sensing System (MDSS).
 - The rotary-wing aircraft are comprised of 66 UH-60L helicopters for operational savings of \$31.8 million. The Army terminated the Future Attack Reconnaissance Aircraft (FARA) program on February 08, 2024 (nothing to divest). The Army is divesting UH-60Ls as part of its Utility Helicopter Fleet modernization strategy. The divestment quantities align with new production aircraft fielding (e.g., new UH-60M and final production quantities of UH-60V).
- The Navy and Marine Corps plan to retire 105 aircraft at the end of their expected service lives (ESL) and divest 18 aircraft prior to their ESLs in FY 2025. The specifics of the retirements at the end of their ESLs and their associated operational savings are listed below.
 - 34 fighter/attack: four AV-8B, 15 FA-18C, ten FA-18D, and five FA-18F (\$153.7 million).
 - 19 rotary-wing: ten AH-1Z, seven CH 53E, and two VH-3D (\$41.4 million).
 - Ten patrol/warning: eight E-2C, one N P-3C, and one P 3C (\$34.4 million).
 - 33 training aircraft: ten T 44C, 13 TH-57B, and ten TH-57C (\$26.3 million).

Performance Improvement Initiatives (PII)

- Nine other aircraft: eight C-2A and one RQ-21A (\$29.5 million).
- The 18 Department of Navy aircraft planned for divestment ahead of their ESLs include six EP-3E for operational cost savings of \$26.6 million and 12 MH-53E for operational cost savings of \$51.0 million. The EP-3Es are being replaced by MQ-4 Triton UAVs, and MH-53Es are no longer required due to operational employment ending in FY 2024.
- The Air Force plans to divest 205 Combat Air Force (CAF), 24 Mobility Air Force (MAF), and 22 training aircraft. The CAF aircraft include 56 A-10, one B-2, one E-11, one EC-130H, 58 F-15C, seven F-15D, 26 F-15E, 11 F-16C/D, 32 F-22, and 12 HH-60G aircraft for a total operational savings of \$2,447.6 million.
 - The 56 A-10s being divested are part of the total divestment of A-10s through FY 2028. Divesting the A-10 fleet in its entirety allows the Air Force to repurpose manpower and funding to align with the National Defense Strategy and ensure future fighter capabilities are focused on pacing challenges and adversaries.
 - The B-2 being retired was involved in a Class A mishap and is uneconomical to repair due to the extent of the damage.
 - The E-11 is no longer required for mission execution. The aircraft is excess to USCENTCOM requirements and has no alternative mission.
 - The EC-130H has reached the end of its useful service life and is being replaced with the EA-37B, with five being delivered in FY 2025.
 - The 65 F-15C/Ds have reached and/or exceeded the end of their useful service lives and are becoming prohibitively expensive to maintain in a combat-ready posture. All divested F-15C/D operating locations have follow-on fighter missions identified and programmed, converting to either F-35s or F-15EXs.
 - The Air Force is divesting 26 of its -220-engine equipped F-15Es. Averaging 33 years old, the -220 F-15Es are older and less capable than their -229 engine counterparts. The Air Force will continue to divest its -220 engine F-15Es, except for four unique -220 developmental test F-15Es, and retain its -229-engine equipped F-15Es.
 - The Air Force divests 11 F-16 Block 30 aircraft as part of its focus on divesting the oldest and least capable F-16s while improving survivability and offensive viability for post-Block 30 F-16s (Block 40/42/50/52).
 - The Air Force is divesting 32 F-22 Block 20 aircraft. F-22 Block 20s are now over 30 years old and have the highest operating costs of any Air Force fighter. They lack the combat capabilities resident in the F-22 Block 30/35 and will not have the advanced weapons, upgraded Electronic Warfare, modernized communication equipment, enhanced Situational Awareness tools, or weapon range and speed advantage over Chinese threats that exist with the Block 30/35s.
 - The Air Force takes delivery of 14 previously purchased HH-60Ws and divests of 12 HH-60Gs as part of fleet recapitalization.

Performance Improvement Initiatives (PII)

- The MAF aircraft being retired include six C-130H, two CV-22B, and 16 KC-135R/T aircraft for operational savings of \$137.2 million.
 - The Air Force is taking delivery of six previously purchased C-130Js and divesting of six C-130Hs as part of fleet recapitalization.
 - The two CV-22Bs are being divested due to the age and configuration of these aircraft. They are not eligible for upgrades/modifications to align with current fleet. Two new CV-22Bs are being delivered to replace the non-mission capable aircraft.
 - 16 KC-135s are being replaced by 16 KC-46s that are being delivered in FY 2025.
- The Air Force plans to retire 22 T-1A trainer aircraft. The 22 T-1As are being divested as undergraduate Combat Systems Officer (CSO) training will no longer use T-1A aircraft as part of its training program. CSO training will use T-6A aircraft for all future students.
- USSOCOM plans to divest eight rotary-wing aircraft, 18 intelligence, surveillance, and reconnaissance (ISR) aircraft, and one tilt-rotor aircraft in FY 2025.
 - In FY 2025, seven rotary-wing A/MH-6M will be divested and replaced with seven A/MH-6R. The A/MH-6R provides performance improvement (vertical lift and speed) over the A/MH-6M and increases the munitions loadout and/or armed operators. The major system upgrades include improved cockpit displays, new airframe shells, and a collective trim system.
 - USSOCOM lost an MH-60M Blackhawk helicopter in November of 2023, which is reported as a divestment in FY 2025 in the Force Structure Changes Exhibit. However, a replacement aircraft is requested in USSOCOM's FY 2025 Congressional Unfunded Priorities List.
 - The USSOCOM manned ISR platforms being retired include two PC-12, four MC-12W, and 12 JAVAMAN aircraft, for an operational savings of \$18.8 million. USSOCOM manned ISR platforms will be fully divested by 2029. USSOCOM is recapitalizing resources from the specialized capabilities of manned ISR platforms with a variety of tradecraft, cyber, space, commercial telemetry data, publicly available information, and new airborne-ISR platforms that can operate in denied, sensitive, and contested environments in support of the 2022 National Defense Strategy. There are no manpower savings associated with the manned ISR platform divestitures; aircrew from MC-12 will transition to the OA-1K (Armed Overwatch) platform.
 - USSOCOM lost a CV-22B tilt-rotor aircraft in November of 2023, which is reported as a divestment in the FY 2025 Force Structure Changes Exhibit. USSOCOM is not requesting a replacement for this loss as sufficient inventory exists based on planned mission requirements.

Performance Improvement Initiatives (PII)

In FY 2025, the Department plans to decommission 19 ships, yielding \$224.7¹ million in operational savings. However, the operational savings are almost entirely offset in FY 2025 by retirement costs. Vessels selected for decommissioning have become too expensive to maintain and are of diminished military use. Savings from these retirements will be used to operate newer ships that can adapt to expanding and changing threats and support updated maritime training strategies.

The following ten ships will be decommissioned in FY 2025 ahead of completion of their ESLs.

- The Navy decommissions two Guided Missile Cruisers, CG 67 (USS Shiloh) and CG 70 (USS Lake Erie), for operational savings of \$75.2 million.
- The Navy decommissions two Independence class Littoral Combat Ships, LCS 6 (USS Jackson) and LCS 8 (USS Montgomery), for operational savings of \$0.9 million¹.
- The Navy decommissions one Whidbey Island class dock landing ship, LSD 42 (USS Germantown), for operational savings of \$10.2 million.
- The Navy decommissions four Spearhead class Expeditionary Fast Transports and one Montford Point class Expeditionary Transfer Dock for operational savings of \$32.9 million. The ship names are T-EPF 1 (USNS Spearhead), T-EPF 2 (USNS Choctaw County), T EPF 3 (USNS Millinocket), T EPF 4 (USNS Fall River), and T-ESD 2 (USNS John Glenn).

The following nine ships will be decommissioned in FY 2025 on schedule (past their ESL).

- The Navy decommissions two Guided Missile Cruisers for operational savings of \$75.2 million, CG 58 (USS Philippine Sea) and CG 60 (USS Normandy).
- The Navy decommissions three Los Angeles class nuclear submarines for operational savings of \$8.5 million, SSN 725 (USS Helena), SSN 752 (USS Pasadena), and SSN 754 (USS Topeka).
- The Navy decommissions four Avenger class Mine Countermeasure Ships for operational savings of \$21.8¹ million, MCM 3 (USS Sentry), MCM 6 (USS Devastator), MCM 11 (USS Gladiator), and MCM 13 (USS Dextrous).

In addition to legacy ship decommissionings and aircraft retirements, the DON has three optimization initiatives supporting the FY 2025 President's Budget submission.

- *Assessment Identification Mine Susceptibility (AIMS) FY 2027-2029 Divestments* eliminates funding for the AIMS program for Avenger-class Mine Counter Measure (MCM) ships program beginning in FY 2027 to coincide with the decommissioning of all Avenger-class ships by the end of FY 2027. AIMS is only applicable to the Avenger-class ships.

¹ The operational savings represented here is a correction of a previously reported amount.

Performance Improvement Initiatives (PII)

- *Divest Maritime Prepositioning Force Utility Boats (MPFUBs)* divests eight MPFUB boats of ten, associated operation and maintenance, Navy Reserve funding, and 17 training and administration of the Reserve enlisted billets due to the removal of Chief, Naval Reserve Force Command MPFUB training.
- *Navy Reserve Manpower Divestment* resulted from the January 2023 decision by the Naval Expeditionary Combat Command to decommission the 4th Naval Expeditionary Logistics Regiment in Jacksonville, FL.

The DAF has six optimization initiatives, in addition to its legacy aircraft divestments, supporting the President's Budget submission.

- *1 x E-11A Procurement Jet in FY 2025* removes the procurement of an E-11A jet from the FY 2025 budget.
- *Divest ALQ-131 & ALQ-184* divests of these electronic countermeasures and electronic attack pods, removing funding for these programs.
- *End MQ-9 Reaper Multi-Domain Operations in FY 2025*, offsets MQ-9 Reaper research, development, test and evaluation funding throughout the FYDP.
- *Reduce SILENTBARKER* removes funding for program replenishment (cancelling third system delivery), curtailing delivery.
- *Terminate Advanced Precision Kill Weapon Systems (APKWS) (War Reserve Material / Rockets)* removes procurement funding for APKWS rocket munitions, ending the program.
- *Transfer Compass Call Resources in FY 2025* transfers residual resources from retiring EC-130H Compass Call aircraft to the new EC-37B.

The Department of Defense Chief Information Officer (USD(CIO)) working with the Defense Information Systems Administration (DISA) has one Optimization initiative: *Joint Service Provider (JSP) Help Desk Modernization* transitions the JSP Help Desk to DISA's Global Service Desk (GSD) and implements the standard IT service management toolset the GSD uses.

The USD(P&R) has two Optimization initiatives.

- *Defense Civilian Human Resource Management System (DCHRMS) Migration* is a cloud-based human resources system providing a single civilian personnel service capability.
- *Civilian Hiring Systems and Enterprise Data Quality and Visibility, Beacon*, is an enterprise-wide collaboration environment for Department analysts, Federally Funded Research and Development Centers (FFRDCs), University-Affiliated Research Centers (UARCs), and other key stakeholders.

The Assistant to the Secretary of Defense for Public Affairs' Defense Media Activity (DMA) has one Optimization initiative for *Risk Management Framework (RMF)*. This DMA reform effort targets an optimized and converged IT infrastructure to drive efficiencies

Performance Improvement Initiatives (PII)

across the DMA, providing opportunities for reductions in acquisition overhead, increasing combined purchasing power, and improving the effective utilization of shared expertise across the environment. The DMA is migrating to the DISA network via the Fourth Estate Network Optimization initiative.

Reform Initiatives – Larger-scale and time-bounded efforts, often involving more than one DoD Component, designed to remediate structural and/or process gaps within the DoD's existing business model.

The Army has three Reform initiatives in the FY 2025 President's Budget submission.

- The DoD's *European Deterrence Initiative (EDI)* helps boost the military readiness of European Allies and deter Russian aggression.
- The Army's *Climate Strategy* is a crucial initiative to build enduring advantages.
- *Army Audit Readiness and Acceleration* is committed to integrating audit remediation efforts into our daily business operations, culture, and policies.

Transformation Initiatives – Initiatives that fundamentally alter the DoD's business model often through reorganization, the creation of new entities, capabilities, enterprise systems, portfolios, the incorporation of innovative management practices and other endeavors aimed to fundamentally change the way the mission or enterprise functions and services are delivered.

The DAF plans four Transformation PIIs in the FY 2025 President's Budget submission.

- *Data Fabric* scales essential DAF Data investments across the USAF and USSF for operational warfighting requirements, business efficiency, and decision advantage.
- *Fund Distributed Common Ground System (DCGS) Hybrid Cloud* enables mission transformation through cloud-enabled mission applications, Adaptive Antoulas—Anderson (AAA) algorithm integration, required hardware edge nodes, and the web hosting/data services needed to create resilient Dependency Injections for increased cloud operations supporting Security token Service capabilities and Project Nexus.
- *Fund Zero Trust Architecture* to transform DAF's cyberspace infrastructure from legacy, perimeter-based defense to fine-grained micro-segmentation and data-focused defense to improve overall user experience and flexibility.
- *Mansfield Cyber Standup* represents the funds for the initial standup of Mansfield, Ohio, Air National Guard-179 Cyber Wing and critical enabling activities for the assigned offensive cyber mission.

The Army has three Transformation initiatives in the FY 2025 President's Budget submission.

- *Army Cross-Functional Teams* is based on the Army's Modernization Strategy and focuses on six modernization priorities united under one command – Army Futures Command (AFC). The AFC leads eight Cross-Functional Teams: Long Range Precision Fires,

Performance Improvement Initiatives (PII)

Next Generation Combat Vehicle, Future Vertical Lift; Network; Assured Positioning, Navigation, and Timing; Air and Missile Defense; Soldier Lethality, and Synthetic Training Environment.

- *Army Rapid Capabilities and Critical Technologies Office* aims to provide combatant commanders with a long-range, ground-mobile, offensive missile capability.
- *Analytics and Reporting Enterprise System* is an initiative led by the Assistant Secretary of the Army (Financial Management and Comptroller) ASA(FM&C) to operationalize the DoD's authoritative data platform, Advana, beyond strictly audit uses. The ASA(FM&C) intends to use Advana as a general-purpose data platform for the financial management community, including financial reporting and data quality monitoring. The ASA(FM&C) established a community enclave called Analytics and Reporting Enterprise System (ARES) within Advana, with its dedicated landing page, standard database connections, and better user access provisioning. The core feature will be near real-time data ingestion from the Army Enterprise Resource Platforms.

The Under Secretary of Defense for Personnel and Readiness (USD(P&R)) has three Transformation initiatives in FY 2025.

- *The Strategic Readiness Assessment* is an annual assessment that will identify the strategic readiness challenges across the Department and provide senior leaders with mitigation options to better realize NDS objectives over time.
- *Enterprise Learning Record Repository* develops an enterprise-wide learning record repository for all active duty and civilian personnel to enhance talent management and user experience. This federated Enterprise Learner Record Repository allows one to look across many distributed learner records as if they were from a single source. It enables the sharing of local and global learner data across the DoD. This learner data will be pulled from authoritative sources for publishing, customizing, and harmonizing individual profiles, performance records, and training records. Once launched, personnel can access their training records throughout their learning journey at DoD and use this information to ensure they have the skills and credentials required for their career path.
- *General Fund Enterprise Business System to the Air Force Medical Service* is an enterprise transformation initiative to support bringing the MHS enterprise for all Direct Care DHP funds into a singular financial system, thus bringing the Department in line with previous direction from Congressional and Secretary of Defense instruction. This will significantly enhance financial management within the MHS from an operational and compliance/accountability perspective. This will also greatly simplify the audit landscape, allowing the DHP to focus on a singular financial system instead of numerous disparate financial systems.

The CDAO, in partnership with the DoD PIO and the Under Secretary of Defense for Policy (USD(P)), has one Transformation PII in FY 2025. The development of *Pulse* realizes the Deputy Secretary of Defense's vision of creating data advantage by using executive analytics to drive enterprise performance and track the implementation of the Department's strategic priorities. The objectives of *Pulse* are to develop and integrate data-informed, outcome-based metrics to show how DoD is performing, to enable the Secretary of Defense/Deputy Secretary of Defense to monitor that performance proactively and to ensure performance improvement efforts across DoD are in alignment.

Performance Improvement Initiatives (PII)

Force Structure Changes Exhibit

The Force Structure Changes Exhibit, which was previously provided in this chapter, was submitted as a stand-alone exhibit under separate cover. The exhibit reports the ship and aircraft divestments and retirements, including the platform name, quantities, cost avoidance savings, and buy back costs all by appropriation, budget line item, Service/Component. This data is in response to and in fulfillment of the exhibit requirements outlined in the Department of Defense Appropriations Act, 2023, originally required in the National Defense Authorization Act, 2022.

DoD CUSTOMER FUEL PRICES

The Department of Defense (DoD) procures an array of refined fuel products. The fuel standard selling prices identified in the table below include the cost of refined products, inventory control, transportation, storage, and facilities sustainment.

The DoD makes refined fuel purchases in a two-step process involving the Defense Logistics Agency (DLA) and the individual Service or Agency customers. The DLA-Energy activity, operating within the Defense-Wide Working Capital Fund (DWWCF), purchases the fuel and subsequently sells it primarily to DoD customers. This allows the DoD to take advantage of large-quantity purchase pricing and, in most years, provides the DoD customer with a stabilized standard fuel price per gallon during that fiscal year.

In FY 2023, the Department changed the SFP twice from the budgeted price of \$119.70 per barrel (bbl). The first fuel price change to \$173.46/bbl was effective October 1, 2022. The second fuel price change to \$163.80/bbl was effective February 1, 2023. The average of the two fuel price changes is \$167.02/bbl. Both fuel price changes led to a cumulative impact of \$3.7 billion to the Military Services. In the Department of Defense Appropriations Act of 2023, Congress provided \$3.7 billion to the Military Services to offset the fuel price change, which reduced the risk to the Military Services' operational and training requirements.

In FY 2024, the Department implemented the budgeted SFP of \$147.84/bbl. Through December 2023, DLA Energy experienced an average cost of \$138.20/bbl for refined fuel and an additional \$22.98/bbl in non-product costs. While a price change may be necessary if fuel market costs do not fall as quickly as anticipated, the DLA Energy cash balance is solvent. The Department will continue to monitor fuel costs and make further adjustments to the SFP if necessary.

In the FY 2025 President's Budget, the composite SFP is \$152.46/bbl, which was based on applying the overall gasoline and oil price index change from the November 2023 OMB Economic Assumptions to the six-month average product cost (May-Oct 2023). Non-product costs were assumed at the FY 2023 budgeted level, plus 2.1 percent per year for inflation. Overall, this price is a decrease of \$4.62/bbl from the FY 2024 price of \$147.84/bbl.

The following table displays the fuel products and the fuel prices that the DoD customers are budgeted to pay for fuel for FY 2023 (prices in effect from February through September 2023), FY 2024 (prices included in the FY 2024 PB), and FY 2025 (prices assumed in the FY 2025 PB).

DoD CUSTOMER FUEL PRICES

Rates in U.S. Dollars		FY2023 Feb-Sep		FY 2024		FY 2025

OVERSEAS COST SUMMARY

The Fiscal Year (FY) 2025 overseas cost summary identifies the amounts necessary for payment of all personnel, operations, maintenance, facilities, and support costs for all Department of Defense (DoD) overseas military units and the costs of supporting all dependents who accompany DoD personnel outside of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States including Guam, the U.S. Virgin Islands, Puerto Rico, American Samoa, and the Northern Mariana Islands.

Overseas costs are funded by the following appropriations: Military Personnel; Operation and Maintenance; Family Housing Operation and Maintenance; Family Housing Construction; and Military Construction to support all DoD activities located outside the United States that are being performed on a permanent basis at U.S. military bases and other locations (U.S. Embassy, U.S. Consulates, U.S. Mission, etc.). Overseas costs also include the cost of transporting personnel, materials, and equipment to and from overseas locations. The overseas amounts do not include incremental costs associated with contingency operations.

Funding for DoD activities which take place in the United States or a U.S. territory in support of overseas operations is excluded. For example, overseas amounts exclude the funding for depot maintenance performed in the United States on components/aircraft used by an overseas unit. Similarly, training conducted in the United States or U.S. territories is excluded.

The tables below list countries where overseas cost is at least \$10 million. Locations with overseas costs less than \$10 million in FY 2025 include: *Afghanistan, Albania, Algeria, Angola, Argentina, Armenia, Austria, Azerbaijan, Bahamas, Bangladesh, Barbados, Belize, Benin, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Brunei Darussalam, Bulgaria, Burkina Faso, Burundi, Cambodia, Cameroon, Cape Verde, Central African Republic, Chad, Chile, People's Republic of China, Colombia, Democratic Republic of the Congo, Costa Rica, Côte d'Ivoire, Croatia, Cyprus, Czech Republic, Dominican Republic, Ecuador, El Salvador, Estonia, Ethiopia, Fiji, Finland, France, Gabon, Gambia, Georgia, Ghana, Gibraltar, Guatemala, Guinea, Guyana, Haiti, Hungary, Iceland, India, Indonesia, Iraq, Ireland, Jamaica, Kazakhstan, Kenya, Kyrgyzstan, Lao People's Democratic Republic, Latvia, Lebanon, Liberia, Lithuania, Luxembourg, Republic of Macedonia, Madagascar, Malawi, Malaysia, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Moldova, Mongolia, Montenegro, Morocco, Mozambique, Myanmar, Namibia, Nepal, New Zealand, Nicaragua, Niger, Nigeria, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Russian Federation, Rwanda, Saint Helena, Senegal, Serbia, Sierra Leone, Slovakia, Slovenia, South Africa, South Sudan, Sri Lanka, Sudan, Suriname, Swaziland, Sweden, Switzerland, Republic of China (Taiwan), Tajikistan, United Republic of Tanzania, Timor-Leste, Togo, Trinidad and Tobago, Tunisia, Turkmenistan, Uganda, Ukraine, Uruguay, Uzbekistan, Bolivarian Republic of Venezuela, Vietnam, Yemen, Zambia, and Zimbabwe.*

OVERSEAS COST SUMMARY

FOREIGN CURRENCY FLUCTUATION RATES

FOREIGN CURRENCY FLUCTUATIONS, DEFENSE

The Foreign Currency Fluctuations, Defense (FCF,D) appropriation enables the execution of budgeted programs while accommodating variations in foreign currency exchange rates. This centralized account is managed by the Under Secretary of Defense (Comptroller). Funds are transferred from this appropriation to Department of Defense (DoD) Components' Operation and Maintenance and Military Personnel appropriations to offset net losses in purchasing power because of unfavorable fluctuations in the foreign currency exchange rates of specified currencies. If a net gain results, the asset is transferred from the gaining appropriation to the FCF,D appropriation to replenish the fund. Unobligated balances from the prior two years for Operation and Maintenance and Military Personnel appropriations may be transferred to the FCF,D account to further replenish the fund. The rates for the currencies specified in the table below were used to formulate the FY 2025 budget. The Department will use these rates to measure foreign currency fluctuation during execution. These rates are expressed in units of foreign currency that can be purchased with one (1) U.S. dollar.

Explosive Ordnance Disposal

Explosive Ordnance Disposal (EOD) is a high demand, critical capability that is essential for the success of military operations. As defined in section 343 of the FY 2017 National Defense Authorization Act (NDAA) (Public Law 114-328), explosive ordnance is any munition containing explosive, nuclear fission or fusion material, or biological or chemical agent. Explosive ordnance includes bombs and warheads; guided and ballistic missiles; artillery, mortar, rocket, and small arms munitions; mines, torpedoes, and depth charges; grenades demolition charges; pyrotechnics; clusters and dispensers; cartridge and propellant actuated devices; electro-explosive devices; clandestine and improvised explosive devices; and all similar or related items or components explosive in nature. Section 2284(c) of Title 10 U.S. Code, as amended by the FY 2020 NDAA (Public Law 116-92), requires annual justification materials and provides the definition of disposal with respect to explosive ordnance, as the detection, identification, field evaluation, defeat, disablement, or rendering safe, recovery and exploitation, and final disposition of the ordnance.

Research, Development, Test and Evaluation (RDT&E)	108.9	-81.8	27.1	9.5	36.6
Total DoD	775.4	-360.2	415.1	527.2	942.2

Numbers may not add due to rounding.

1/ Includes only O&M Guard funding for Restoration (drinking water (DW) is included in Other).

2/ Other includes actions to address PFAS under environmental laws other than the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) or the Safe Drinking Water Act (SDWA).

The Fiscal Year (FY) 2025 budget request includes \$942.2 million to invest in PFAS cleanup and other costs. The increase in FY 2025 is due to increased aqueous film forming foam (AFFF) replacement activities and PFAS investigation and cleanup activities. This request fully supports all executable PFAS cleanup activities in FY 2025.

PFAS are a large class of chemicals found in many consumer products, as well as in a certain firefighting foam called AFFF; while DoD is only one of many users of AFFF, there is significant attention on DoD's use and the subsequent impact on human health and the environment. The Department remains committed to ensuring the health and safety of Service Members, families, and local communities. Through the Department's PFAS Task Force, DoD provides a holistic approach to addressing PFAS.

The Department follows existing federal cleanup law, CERCLA, and long-standing Environmental Protection Agency (EPA) regulations for all chemicals in our cleanup program, including PFAS. DoD is conducting assessments for PFAS use or potential release at 715 installations and National Guard locations. As of December 31, 2023, DoD has completed these assessments at 707 of these locations and determined that 133 of the locations require no further action. Additionally, DoD has begun the next phase of the cleanup process at 349 locations, which are being assessed for PFAS use or potential release.

The Fiscal Year (FY) 2020 National Defense Authorization Act prohibits DoD's use of AFFF on military installations after October 1, 2024. The Military Departments began the transition from AFFF for more than 6,000 mobile assets and approximately 1,500 facilities in early FY 2024 and are following transition plans that include proposed schedules, estimated costs, and strategies to use PFAS-free products and other available technologies, such as water-only systems. The Department will need to exercise the two one-

Per- and Polyfluoroalkyl Substances (PFAS)

year waivers to extend the congressional deadline of October 1, 2024, to stop using AFFF to ensure a methodical transition that does not affect mission activities.

PFAS efforts across DoD are funded within several accounts, including the Environmental Restoration, O&M, BRAC, and RDT&E appropriations.

SMALL BUSINESS ADVERTISING CONTRACTS

The Department of Defense provides procurement opportunities for various services to socially and economically small, disadvantaged businesses (SDBs) and those businesses owned by service-disabled veterans, minorities, and women. This report is provided in compliance with the House Report 118-121, page 59, accompanying H.R. 4365, the Department of Defense Appropriations Bill, 2024, which directs each agency to include the following information in its FY 2025 budget justification:

- All contracts for advertising services;
- Contracts for the advertising services of socially and economically SDB concerns (as defined in section 8(a)(4) of the Small Business Act (15 U.S.C. 637 (a)(4)); and
- Contracts for the advertising services of service-disabled veteran, women, and minority-owned business. These three categories (service-disabled veterans, women, and minority-owned businesses) of specified businesses may overlap. For example, an SDB may be women-owned, and counted in the procurement database as both an SDB and a women-owned business.

Category Descriptions:

Small, disadvantaged businesses (SDBs) are defined as those that are primarily owned and controlled by one or more socially and economically disadvantaged individuals.

Service-Disabled Veteran-Owned Small Business is owned and controlled by a Service-Disabled Veteran or Service-Disabled Veterans, as defined in section 3(q) of the Small Business Act (15 U.S.C. 632(q)) and SBA's implementing SDVOSBC Program Regulations (13 C.F.R. 125).

Women-owned include businesses of all sizes that are at least 51 percent owned by one or more women and whose management and daily business operations are controlled by one or more women who self-identify as a women-owned business in the System for Award Management.

Minority-owned include businesses of all sizes that are at least 51 percent owned by one or more members of a minority group and self-identify as minority-owned businesses in the Federal Government's System for Award Management. Minority-owned businesses are further broken down into businesses owned by Asian-Pacific, Subcontinent-Asian, Black, Hispanic, Native Americans, and others.

Department of Defense Financial Statement Audits

THE DEPARTMENT OF DEFENSE FINANCIAL STATEMENT AUDITS

The financial statement audit and remediation effort is all-encompassing. It acts as a catalyst to drive reform and innovation to best support the Department's mission readiness and lethality, reinforces accountability to taxpayers, and generates detailed findings and recommendations to guide corrective actions further. This continuing effort will result in greater transparency, enabling timely insights that support focused and sustainable solutions for the Department's complex environment.

The audits also resulted in consolidating two Department-wide material weaknesses into one and separating one Department-wide material weakness into two. No new Department-wide material weaknesses were reported, resulting in no net change in the number of material weaknesses. The Department of the Army Working Capital Fund and the Department of the Navy General Fund downgraded their Fund Balance with Treasury (FBWT) material weaknesses, and the Department of the Air Force General Fund closed their FBWT material weakness. The Department of the Navy Working Capital Fund and General Fund also downgraded their Oversight and Monitoring material weaknesses. The Defense Information Systems Agency (DISA) General Fund downgraded its Property, Plant, and Equipment material weakness. The U.S. Transportation Command downgraded its Reporting Entity Definition and Imputed Costs material weakness.

In Fiscal Year (FY) 2023, ten reporting entities received unmodified opinions, and one received a qualified (modified) opinion. Seven of these reporting entities had received unmodified opinions as of November 15, 2023, as reported in the FY 2023 Agency Financial Report. The total increased to ten as three outstanding audits resulted in unmodified opinions. The combined total assets of the Components that achieved favorable audit opinions (unmodified or qualified) is \$1.9 trillion, more than 51 percent of the Department's FY 2023 total assets. Multiple components have consistently obtained an unmodified opinion; for instance, this was the 14th for the Defense Health Agency–Contract Resource Management, the 16th for the U.S. Army Corps of Engineers–Civil Works, the 24th for the Defense Finance and Accounting Service Working Capital Fund, and the 29th for the Military Retirement Fund.

BUDGET

The Department expects to spend \$1.3 billion during FY 2025 in support of the DoD Audit, with approximately 11 percent of these resources required to pay the independent auditors, 16 percent supporting the cost of the audit, including addressing auditors' requests for information, and 73 percent of total costs directed at remediating audit findings.

Department of Defense Financial Statement Audits

TABLE 1: AUDIT SERVICES COSTS

Description: Audit Services Costs are the costs of contracting with IPA firms to perform, issue findings, and render an opinion on the annual financial statement audits, and examinations of service provider controls that are conducted in accordance with the Statement of Standards for Attestation Engagements (SSAE) No. 18, “Attestation Standards: Clarification and Recodification.”

Explanation of Changes: The DoD FY 2024 budget includes \$1 billion for audit remediation. Many components are leveraging FY 2023 plus-up to make property and financial systems (non-ERP) improvements to assist with continued progress toward minimizing the number of General Ledgers, implementing Treasury-direct disbursing, and making business process changes related to implementing G-Invoicing, which standardizes the processing of intergovernmental transactions. Additionally, the DoD continues to make a concentrated effort in a more data-driven focus on remediating audit findings and leveraging tools such as Advana.

MILITARY PERSONNEL PROGRAMS (M-1)

***Department of Defense Budget
Fiscal Year 2025
March 2024
Office of the Under Secretary of Defense (Comptroller)***

Preface

The Military Personnel (M-1) Programs are derived from and consistent with the Comptroller Information System database.

The M-1 is provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President's Budget. This document is also provided to Office of Assistant Secretary of Defense (Public Affairs) for use by non-DoD activities, and is available to the public on the Internet at <https://comptroller.defense.gov/>

Section 8056 of the Department of Defense Appropriations Act, 2023 (division C of Public Law 117-328) requires the Department to provide a statement describing each instance if any, during each of the fiscal years (FYs) 2016 through 2023 in which the Department exercised authority conferred by the section to charge current appropriations with obligations otherwise chargeable to expired or closed accounts with a negative unliquidated or unexpended balance. The authority was not exercised in FY 2016 through FY 2023.

Preparation of the M-1 cost the Department of Defense a total of approximately \$38,000 in FY 2024.

Office of the Under Secretary of Defense (Comptroller)

**OPERATION AND MAINTENANCE
PROGRAMS (O-1)
REVOLVING AND MANAGEMENT FUNDS (RF-1)**

***Department of Defense Budget
Fiscal Year 2025
March 2024
Office of the Under Secretary of Defense (Comptroller)***

Preface

The Operation & Maintenance (O-1) and Revolving & Management Funds (RF-1) Programs are derived from and consistent with the Comptroller Information System database.

The O-1 and RF-1 are provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President’s Budget. This document is also provided to Office of Assistant Secretary of Defense (Public Affairs) for use by non-DoD activities, and is available to the public on the Internet at <https://comptroller.defense.gov/>.

Office of the Under Secretary of Defense (Comptroller)

Section 8056 of the Department of Defense Appropriations Act, 2023 (division C of Public Law 117-328) requires the Department to provide a statement describing each instance if any, during each of the fiscal years (FYs) 2016 through 2023 in which the Department exercised authority conferred by the section to charge current appropriations with obligations otherwise chargeable to expired or closed accounts with a negative unliquidated or unexpended balance. The authority was not exercised in FY 2016 through FY 2023.

Preparation of the O-1 and RF-1 cost the Department of Defense a total of approximately \$38,000 in FY 2024.

O-1

OPERATION AND MAINTENANCE PROGRAMS (O-1)

***Department of Defense Budget
Overseas Operations Costs Appendix
Fiscal Year 2025
March 2024
Office of the Under Secretary of Defense (Comptroller)***

Preface

The Operation & Maintenance (O-1) and Revolving & Management Funds (RF-1) Programs are derived from and consistent with the Comptroller Information System database.

The O-1 and RF-1 are provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President's Budget. This document is also provided to Office of Assistant Secretary of Defense (Public Affairs) for use by non-DoD activities, and is available to the public on the Internet at <https://comptroller.defense.gov/>.

Office of the Under Secretary of Defense (Comptroller)

Preparation of the O-1 and RF-1 cost the Department of Defense a total of approximately \$38,000 in FY 2024.
