This internal reprogramming action realigns \$17.839 million between program elements within Research, Development, Test, and Evaluation, Defense-Wide, 01/02, for proper execution. This action does not change the purpose for which the funds were originally appropriated. It meets all administrative and legal requirements of the Congress and has not previously been denied by the Congress.

Explanation: The Software Engineering Institute (SEI) is a Federally Funded Research and Development Center (FFRDC) sponsored by the Office of the Under Secretary of Defense (Acquisition, Technology, and Logistics) [OUSD(AT&L)]. The Institute works across government, industry, and academia to: (1) improve current software engineering activities from both management and engineering perspectives; (2) facilitate rapid, value-added transition of technology into practice; and (3) evaluate and calibrate emerging technologies to determine their potential for improving the evolution of software-intensive DoD systems. Although funds for the SEI were budgeted by the Defense Advanced Research Projects Agency (DARPA) in the FY 2001 President's Budget, management responsibility for the program resides in OUSD(AT&L). This action therefore realigns the SEI funding to the organization responsible for day-to-day oversight responsibilities of this program.

Approved (Signature and Date)

Signed by Mr. William J. Lynn on November 2, 2000.
