Note 1. Significant Accounting Policies**1.A. Basis of Presentation**

These financial statements have been prepared to report the financial position and results of operations of the Air Force Working Capital Fund (AFWCF), as required by the Chief Financial Officers Act of 1990, expanded by the Government Management Reform Act of 1994, and other appropriate legislation. The financial statements have been prepared from the books and records of the AFWCF in accordance with the Department of Defense (DoD), Financial Management Regulation (FMR), the Office of Management and Budget (OMB) Circular A-136, Financial Reporting Requirements, and to the extent possible generally accepted accounting principles (GAAP). The accompanying financial statements account for all resources for which the AFWCF is responsible unless otherwise noted.

The AFWCF is unable to fully implement all elements of GAAP and the OMB Circular A-136, due to limitations of its financial and nonfinancial management processes and systems that feed into the financial statements. The AFWCF derives its reported values and information for major asset and liability categories largely from nonfinancial systems, such as inventory and logistic systems. These systems were designed to support reporting requirements for maintaining accountability over assets and reporting the status of federal appropriations rather than preparing financial statements in accordance with GAAP. The AFWCF continues to implement process and system improvements addressing these limitations.

The AFWCF currently has eight auditor identified financial statement material weaknesses: (1) financial and nonfinancial feeder systems do not contain an adequate audit trail for the proprietary and budgetary accounts, (2) AFWCF may have material amounts of account adjustments that are not adequately supported, (3) AFWCF cannot accurately identify all intragovernmental transactions by customer, which is required for eliminations when preparing consolidated financial statements, (4) the value of the AFWCF government furnished and contractor acquired materiel and equipment may not be accurately reported, (5) AFWCF General Property, Plant, and Equipment (PP&E) may not be accurately valued, (6) operating materials and supplies (OM&S) are not reflected at historical cost, (7) cost of goods sold and work in progress are not recorded in accordance with the Statement of Federal Financial Accounting Standards (SFFAS) No. 3, Accounting for Inventory and Related Property, and (8) supply management systems do not provide sufficient audit trails to confirm and value the in transit inventory reported as part of inventory held for sale on the Consolidated Balance Sheet.

1.B. Mission of the Reporting Entity

The United States Air Force was created on September 18, 1947, by the “National Security Act of 1947.” The “National Security Act Amendments of 1949” established the DoD and made the Air Force a department within DoD. The overall mission of the Air Force is to deliver sovereign options for the defense of the United States of America and its global interest—to fly and fight in air, space, and cyberspace. Our priorities are:

(1) win the Global War on Terror, (2) develop airmen, and (3) modernize and recapitalize the Total Force.

The stock and industrial revolving fund accounts were created by the “National Security Act of 1947,” as amended in 1949 and codified in United States Code 10 Section 2208. The revolving funds were established as a means to more effectively control the cost of work performed by DoD. The DoD began operating under the revolving fund concept July 1, 1951.

Since FY 2006, AFWCF operations consist of two major activity groups: Supply Management Activity Group (SMAG) and Depot Maintenance Activity Group (DMAG). All AFWCF SMAG and DMAG activities establish rates based on full cost recovery. If an operating loss or gain is incurred, the activity will make the appropriate adjustment in following year’s prices to recoup the loss or return the gain to their customers.

The SMAG manages and finances the majority of Air Force supply requirements. Exceptions include an item financed with a procurement appropriation or when financing by other means has been deemed to be more economical and efficient. A stock fund operates as a revolving fund replenishing inventories with funds received from sales to customers.

There are four active business activities in SMAG: (1) Material Support Division (MSD), (2) General Support Division (GSD), (3) Medical-Dental Division, and (4) Air Force Academy Division.

A brief description is provided below for the four active SMAG business activities.

- MSD manages over 106 thousand depot level repair and unique consumable items to support Air Force weapon systems.
- GSD manages over 1.5 million consumable supply items, which support field and depot maintenance of aircraft, ground and airborne communication, and electronic systems.
- Medical-Dental manages over 7 thousand different items, which are used to support medical and dental supply and equipment requirements.
- Air Force Academy manages the procurement of uniforms and uniform accessories for sale to cadets.

The DMAG repairs weapon systems and spare parts that ensure readiness in peacetime and provide sustainment to combat forces in wartime. In peacetime, the Air Force enhances readiness by efficiently and economically repairing, overhauling, and modifying aircraft, engines, missiles, depot level repairables, and software to meet customer demands. Depots have unique skills and equipment required to support and overhaul both new, complex components as well as aging weapon systems. An extremely important facet of the depots is that during wartime or contingencies, the Air Force can surge repair operations and realign capacity to support the war fighters’ immediate needs. This is achieved by employing the unique strengths of organic (in-house) and contracted (contract) repair resources.

1.C. Appropriations and Funds

The AFWCF receives its appropriations and funds as general and working capital (revolving) funds. The AFWCF uses these appropriations and funds to execute its missions and subsequently report on resource usage.

Working Capital Funds (WCF) received funding to establish an initial corpus through an appropriation or a transfer of resources from existing appropriations or funds. The corpus finances operations and transactions that flow through the fund. The WCF resources the goods and services sold to customers on a reimbursable basis and maintains the corpus. Reimbursable receipts fund future operations and generally are available in their entirety for use without further congressional action. At various times, Congress provides additional appropriations to supplement WCF as an infusion of cash when revenues are inadequate to cover costs within the corpus.

1.D. Basis of Accounting

For FY 2008, AFWCF's financial management systems are unable to meet all of the requirements for full accrual accounting. Many of the AFWCF's financial and nonfinancial feeder systems and processes were designed and implemented prior to the issuance of GAAP for federal agencies. These systems were not designed to collect and record financial information on the full accrual accounting basis as required by GAAP. Most of the AFWCF's (financial and nonfinancial) legacy systems were designed to record information on a budgetary basis.

The DoD has undertaken efforts to determine the actions required to bring its financial and nonfinancial feeder systems and processes into compliance with GAAP. One such action is the current revision of its accounting systems to record transactions based on the U.S. Standard General Ledger (USSGL). Until all of AFWCF's financial and nonfinancial feeder systems and processes are updated to collect and report financial information as required by GAAP, the AFWCF's financial data will be derived from budgetary transactions (obligations), disbursements and collections, transactions from nonfinancial feeder systems, and accruals made of major items such as payroll expenses, accounts payable, and environmental liabilities.

In addition, DoD identifies program costs based upon the major appropriation groups provided by the Congress. Current processes and systems do not capture and report accumulated costs for major programs based upon the performance measures as required by the Government Performance and Results Act. The DoD is working towards a cost reporting methodology that meets the need for cost information required by the Statement of Federal Financial Accounting Standards (SFFAS) No. 4, "Managerial Cost Accounting Concepts and Standards for the Federal Government."

1.E. Revenues and Other Financing Sources

Organic Depot Maintenance recognizes revenue according to the percentage of completion method. Contract Depot Maintenance recognizes revenue based on the number of units produced multiplied by the unit sales price which is recognized upon completion of the repair. Due to the closure of Contract Depot Maintenance in FY 2008, it is not cost-effective to implement system modifications to support the percentage of

completion method. Supply Management recognizes revenue based on flying hours executed and the sale of inventory items.

1.F. Recognition of Expenses

For financial reporting purposes, the DoD policy requires the recognition of operating expenses in the period incurred. However, because the AFWCF's financial and nonfinancial feeder systems were not designed to collect and record financial information on the full accrual accounting basis, accruals are made for major items such as payroll expenses, accounts payable, and unbilled revenue. In the case of OM&S, the consumption method is used.

1.G. Accounting for Intragovernmental Activities

Preparation of reliable financial statements requires the elimination of transactions occurring among entities within DoD or between two or more federal agencies. However, the AFWCF cannot accurately eliminate intragovernmental transactions by customer because the AFWCF's systems do not track at the transaction level. Generally, seller entities within the DoD provide summary seller-side balances for revenue, accounts receivable, and unearned revenue to the buyer-side internal DoD accounting offices. In most cases, the buyer-side records are adjusted to agree with DoD seller-side balances. IntraDoD intragovernmental balances are then eliminated. The volume of intragovernmental transactions is so large that after-the-fact reconciliation cannot be accomplished effectively with existing or foreseeable resources. The DoD is developing long-term system improvements to ensure accurate intragovernmental information, to include sufficient upfront edits and controls eliminating the need for after-the-fact reconciliations.

The U.S. Treasury Financial Management Service is responsible for eliminating transactions between DoD and other federal agencies. The Treasury Financial Manual Part 2 – Chapter 4700, “Agency Reporting Requirements for the Financial Report of the United States Government,” and the U.S. Treasury’s “Federal Intragovernmental Transactions Accounting Policy Guide” provide guidance for reporting and reconciling intragovernmental balances. While the AFWCF is unable to fully reconcile intragovernmental transactions with all federal partners, the AFWCF is able to reconcile balances pertaining to Federal Employees’ Compensation Act transactions with the Department of Labor and benefit program transactions with the Office of Personnel Management.

The DoD’s proportionate share of public debt and related expenses of the Federal Government is not included. The Federal Government does not apportion debt and its related costs to federal agencies. The DoD’s financial statements, therefore, do not report any portion of the public debt or interest thereon, nor do the statements report the source of public financing whether from issuance of debt or tax revenues.

Financing for the construction of DoD facilities is obtained through appropriations. To the extent this financing ultimately may have been obtained through the issuance of public debt, interest costs have not been capitalized since the U.S. Treasury does not allocate such interest costs to the benefiting agencies.

1.H. Transactions with Foreign Governments and International Organizations

Each year, the AFWCF sells defense articles and services to foreign governments and international organizations under the provisions of the “Arms Export Control Act of 1976.” Under the provisions of the Act, DoD has authority to sell defense articles and services to foreign countries and international organizations, generally at no profit or loss to the U.S. Government. Payment in U.S. dollars is required in advance.

1.I. Funds with the U.S. Treasury

The AFWCF’s monetary financial resources are maintained in U.S. Treasury accounts. The disbursing offices of the Defense Finance and Accounting Service (DFAS), the Military Services, the U.S. Army Corps of Engineers (USACE), and the Department of State’s financial service centers process the majority of AFWCF’s cash collections, disbursements, and adjustments worldwide. Each disbursing station prepares monthly reports that provide information to the U.S. Treasury on check issues, electronic fund transfers, interagency transfers, and deposits.

In addition, DFAS sites and the USACE Finance Center submit reports to the U.S. Treasury by appropriation on interagency transfers, collections received, and disbursements issued. The U.S. Treasury records this information to the applicable Fund Balance with Treasury (FBWT) account. Differences between AFWCF’s recorded balance in the FBWT accounts and U.S. Treasury’s FBWT accounts sometimes result and are subsequently reconciled.

1.J. Foreign Currency

Not applicable.

1.K. Accounts Receivable

As presented in the Balance Sheet, accounts receivable includes three categories: accounts, claims, and refunds receivable from other federal entities or from the public. Allowances for uncollectible accounts due from the public are based upon analysis of collection experience by fund type. The DoD does not recognize an allowance for estimated uncollectible amounts from other federal agencies. Claims against other federal agencies are to be resolved between the agencies in accordance with dispute resolution procedures defined in the Intragovernmental Business Rules published in the Treasury Financial Manual at <http://www.fms.treas.gov/tfm/vol1/07-03.pdf>.

1.L. Direct Loans and Loan Guarantees

Not applicable.

1.M. Inventories and Related Property

The AFWCF values approximately 99% of its resale inventory using the moving average cost method. The AFWCF reports the remaining 1% of resale inventories at an approximation of historical cost using latest acquisition cost adjusted for holding gains and losses. The latest acquisition cost method is used because legacy inventory systems were designed for materiel management rather than accounting. Although these systems provide visibility and accountability over inventory items, they do not maintain historical cost data necessary to comply with SFFAS No. 3, “Accounting for Inventory and Related

Property.” Additionally, these systems cannot produce financial transactions using the USSGL, as required by the Federal Financial Management Improvement Act of 1996 (P.L. 104-208). By utilizing new systems development processes, the AFWCF is continuing to transition the remaining balance of the inventories to the moving average cost method. However, since the on-hand balances which were transitioned were not, for the most part, baselined to auditable historical cost, the reported values remain noncompliant with SFFAS No. 3 and GAAP.

The AFWCF manages only military or government specific materiel under normal conditions. Materiel is a unique term that relates to military force management, and includes all items (including ships, tanks, self-propelled weapons, aircraft, etc., and related spares, repair parts, and support equipment, but excluding real property, installations, and utilities) necessary to equip, operate, maintain, and support military activities without distinction as to its application for administrative or combat purposes. Items commonly used in and available from the commercial sector are not managed in AFWCF materiel management activities. Operational cycles are irregular and military risks associated with stock-out positions have no commercial parallel. The AFWCF holds materiel based on military need and support for contingencies. The DoD does not attempt to account separately for “inventory held for sale” and “inventory held in reserve for future sale” based on SFFAS No. 3 definitions, unless otherwise noted.

Related property includes OM&S which is valued at standard purchase price. The AFWCF uses the consumption method of accounting for OM&S.

The AFWCF recognizes condemned materiel as “Excess, Obsolete, and Unserviceable.” The cost of disposal is greater than the potential scrap value; therefore, the net value of condemned materiel is zero. Potentially redistributed materiel, presented in previous years as “Excess, Obsolete, and Unserviceable,” is included in the “Held for Use” or “Held for Repair” categories according to its condition.

Inventory available and purchased for resale includes consumable items and reparable parts owned and managed by the AFWCF. This inventory is retained to support military or national contingencies. Inventory held for repair is damaged inventory that requires repair to make suitable for sale. Often, it is more economical to repair these inventory items rather than to procure these items. The AFWCF often relies on weapon systems and machinery that are no longer in production. As a result, the AFWCF supports a process that encourages the repair and rebuilding of certain items. This repair cycle is essential in maintaining a ready, mobile, and armed military force. Work in process balances include costs related to the production or servicing of items, including direct material, direct labor, applied overhead, and other direct costs. Work in process also includes the value of finished products or completed services that are yet to be placed in service and transferred to an asset account. The work in process designation may also be used to accumulate the amount paid to a contractor under cost reimbursable contracts, to include amounts withheld from payment to ensure performance and amounts paid to other government plants for accrued costs of end items of materiel ordered, but not delivered. Work in process includes munitions in production and depot maintenance

work with its associated labor, applied overhead, and supplies used in the delivery of maintenance services.

1.N. Investments in U.S. Treasury Securities

Not applicable.

1.O. General Property, Plant and Equipment

The DoD real property capitalization threshold is currently \$20 thousand. The AFWCF has not implemented this threshold due to system and process limitations and is currently using the capitalization threshold of \$100 thousand.

General PP&E assets are capitalized at historical acquisition cost plus capitalized improvements when an asset has a useful life of two or more years and the acquisition cost equals or exceeds the DoD capitalization threshold of \$100 thousand. The DoD also requires capitalization of improvement costs over the DoD capitalization threshold of \$100 thousand for General PP&E. The DoD depreciates all General PP&E, other than land, on a straight-line basis.

The WCF capitalizes all General PP&E used in the performance of their mission. These capitalized assets are categorized as General PP&E, whether or not it meets the definition of any other General PP&E categories.

When it is in the best interest of the government, AFWCF provides government property to contractors to complete contract work. The AFWCF either owns or leases such property, or it is purchased directly by the contractor for the government based on contract terms. When the value of contractor-procured General PP&E exceeds the DoD capitalization threshold, Federal accounting standards require that it be reported on the AFWCF's Balance Sheet.

The DoD is developing new policies and a contractor reporting process for Government Furnished Equipment that will provide appropriate General PP&E information for future financial statement reporting purposes. Accordingly, AFWCF reports only government property in the possession of contractors that is maintained in AFWCF's property systems. The DoD has issued new property accountability and reporting requirements that require AFWCF to maintain, in their property systems, information on all property furnished to contractors. This action and other DoD proposed actions are structured to capture and report the information necessary for compliance with federal accounting standards.

1.P. Advances and Prepayments

The DoD's policy is to record advances and prepayments in accordance with GAAP. As such, payments made in advance of the receipt of goods and services are reported as an asset on the Balance Sheet. The DoD's policy is to expense and/or properly classify assets when the related goods and services are received. The AFWCF complies with this policy.

1.Q. Leases

Not applicable.

1.R. Other Assets

Other assets includes those assets, such as military and civil service employee pay advances, travel advances, and certain contract financing payments that are not reported elsewhere on AFWCF's Balance Sheet.

The AFWCF conducts business with commercial contractors under two primary types of contracts: fixed price and cost reimbursable. To alleviate the potential financial burden on the contractor that long-term contracts can cause, AFWCF may provide financing payments. Contract financing payments are defined in the Federal Acquisition Regulations, Part 32, as authorized disbursements of monies to a contractor prior to acceptance of supplies or services by the Government. Contract financing payments clauses are incorporated in the contract terms and conditions and may include advance payments, performance-based payments, commercial advance and interim payments, progress payments based on cost, and interim payments under certain cost-reimbursement contracts.

Contract financing payments do not include invoice payments, payments for partial deliveries, lease and rental payments, or progress payments based on a percentage or stage of completion, which the Defense Federal Acquisition Regulation Supplement authorizes only for construction of real property, shipbuilding, and ship conversion, alteration, or repair. Progress payments for real property and ships are reported as Construction in Progress. It is DoD policy to record certain contract financing payments as Other Assets.

1.S. Contingencies and Other Liabilities

The SFFAS No. 5, "Accounting for Liabilities of the Federal Government," as amended by SFFAS No. 12, "Recognition of Contingent Liabilities Arising from Litigation," defines a contingency as an existing condition, situation or set of circumstances that involves an uncertainty as to possible gain or loss. The uncertainty will be resolved when one or more future events occur or fail to occur. The AFWCF recognizes contingent liabilities when past events or exchange transactions occur, a future loss is probable, and the loss amount can be reasonably estimated.

Financial statement reporting is limited to disclosure when conditions for liability recognition do not exist but there is at least a reasonable possibility of incurring a loss or additional losses. Examples of loss contingencies include the collectibility of receivables, pending or threatened litigation, and possible claims and assessments. The AFWCF's risk of loss and resultant contingent liabilities arise from pending or threatened litigation or claims and assessments due to events such as aircraft, ship and vehicle accidents; medical malpractice; property or environmental damages; and contract disputes.

1.T. Accrued Leave

The AFWCF reports as a liability civilian earned leave, except sick leave, that has been accrued and not used as of the Balance Sheet date. Sick leave is expensed as taken. The liability reported at the end of the accounting period reflects the current pay rates.

1.U. Net Position

Net Position consists of unexpended appropriations and cumulative results of operations.

Unexpended Appropriations represent the amounts of authority that are unobligated and have not been rescinded or withdrawn. Unexpended appropriations also represent amounts obligated for which legal liabilities for payments have not been incurred.

Cumulative Results of Operations represent the net difference, since inception of an activity, between expenses and losses and financing sources (including appropriations, revenue and gains). Beginning with FY 1998, the cumulative results also include donations and transfers in and out of assets that were not reimbursed.

1.V. Treaties for Use of Foreign Bases

Not applicable.

1.W. Comparative Data

The AFWCF's financial statements and notes are presented on a comparative basis.

1.X. Unexpended Obligations

The AFWCF obligates funds to provide goods and services for outstanding orders not yet delivered. The financial statements do not reflect this liability for payment for goods and services not yet delivered, unless title passes.

1.Y. Undistributed Disbursements and Collection

Undistributed disbursements and collections represent the difference between disbursements and collections matched at the transaction level to a specific obligation, payable, or receivable in the activity field records as opposed to those reported by the U.S. Treasury. These amounts should agree with the undistributed amounts reported on the monthly accounting reports. In-transit payments are those payments that have been made, but have not been recorded in the fund holder's accounting records. These payments are applied to the entities' outstanding accounts payable balance. In-transit collections are those collections from other agencies or entities that have not been recorded in the accounting records. These collections are also applied to the entities' accounts receivable balance.

The DoD policy is to allocate supported undistributed disbursements and collections between federal and nonfederal categories based on the percentage of distributed federal and nonfederal accounts payable and accounts receivable. Unsupported undistributed disbursements are recorded in accounts payable. Unsupported undistributed collections are recorded in other liabilities.

1.Z. Significant Events

Beginning 4th Quarter, FY 2007, DoD began presenting the Statement of Financing (SOF) as a note in accordance with the Office of Management and Budget

(OMB) Circular A-136. The SOF will no longer be considered a basic statement and is now referred to as "Reconciliation of Net Cost of Operations to Budget."

Note 2.	Nonentity Assets

5. Total Assets	\$ 37,806,375,720.17	\$ 38,853,711,447.06

Asset accounts are categorized as either entity or nonentity. Entity accounts consist of resources that are available for use in the operations of the entity. The AFWCF is authorized to decide how to use resources in entity accounts. The AFWCF may be legally obligated to use these resources to meet entity obligations.

Nonentity assets are assets for which the AFWCF maintains stewardship accountability and responsibility to report, but are not available for the AFWCF's operations.

The AFWCF has no Nonentity Assets.

Note 3.	Fund Balance with Treasury
----------------	-----------------------------------

As of June 30	2008	2007

B. Fund Balance per AFWCF	1,041,128,091.19	1,241,713,658.99
3. Reconciling Amount	\$ (29,697,210.23)	\$ 57,537,982.42

The reconciling amount represents (\$29.7) million for the United States Transportation Command (USTC), which is reported by the U.S. Treasury as part of the AFWCF. However, for the purposes of Audited Financial Statements (AFS), USTC is included with the Other Defense Working Capital Fund entities reporting which is separate from the AFWCF. Therefore, USTC funds are not included in the AFWCF AFS.

Status of Fund Balance with Treasury

As of June 30	2008	2007
1. Unobligated Balance		
A. Available	\$ 7,061,068,733.57	\$ 5,744,812,688.94
B. Unavailable	0.00	0.00
2. Obligated Balance not yet Disbursed	\$ 7,166,053,464.38	\$ 7,949,946,688.90
3. Nonbudgetary FBWT	\$ 0.00	\$ 0.00
4. NonFBWT Budgetary Accounts	\$ (13,185,994,106.76)	\$ (12,453,045,718.85)
5. Total	\$ 1,041,128,091.19	\$ 1,241,713,658.99

The Status of Fund Balance with Treasury (FBWT) reflects the budgetary resources to support the FBWT.

Unobligated Balance represents the cumulative amount of budgetary authority that has not been set aside to cover outstanding obligations. Unobligated Balance is classified as available or unavailable and is associated with appropriations expiring at fiscal year end that remain available only for obligation adjustments until the account is closed.

Obligated Balance not yet Disbursed represents funds that have been obligated for goods that have not been received, services that have not been performed, and goods and services that have been delivered/received but not yet paid.

Nonbudgetary FBWT includes entity and nonentity FBWT accounts which represent adjustments that do not have budgetary authority, such as unavailable receipt accounts or clearing accounts. AFWCF has no Nonbudgetary FBWT.

NonFBWT Budgetary Accounts represent adjustments to budgetary accounts that do not affect FBWT such as contract authority, accounts receivable, as well as the unfilled orders without advance from customers. This category reduces the Status of FBWT.

Unobligated balances are segregated to show available and unavailable amounts in the note schedule. Certain unobligated balances may be restricted to future use and are not apportioned for current use. There are no restrictions on the Unobligated Balance.

Contract terms and conditions for certain types of contract financing payments convey certain rights to the AFWCF that protect the contract work from state or local taxation, liens or attachment by the contractor's creditors, transfer of property, or disposition in bankruptcy; however, these rights should not be misconstrued to mean that ownership of the contractor's work has transferred to the Government. The Government does not have the right to take the work, except as provided in contract clauses related to termination or acceptance, and the AFWCF is not obligated to make payment to the contractor until delivery and acceptance.

The Outstanding Contract Financing Payments balance of \$135.3 million is comprised of \$114.4 million in contract financing payments and an additional \$20.9 million in estimated future payments that will be paid to the contractor upon future delivery and Government acceptance of a satisfactory product. (See additional discussion in Note 15, Other Liabilities).

The majority of the Nonfederal Other Assets – Other Assets (With the Public) balance is comprised of \$174.5 million for Supply Management Activity Group's assets returned to vendor for which credit is pending.

General Composition of Inventory

Inventory includes weapon system consumable and repairable parts, base supply items, and Medical-Dental supplies. Inventory is tangible personal property that is held for sale or held for repair for eventual sale, in the process of production for sale, or to be consumed in the production of goods for sale or in the provision of services for a fee.

Restrictions

There are no restrictions on the use, sale, or disposition of inventory except for War Reserve Materiel and nuclear related spare parts.

Definitions

Inventory Available and Purchased for Resale includes consumable and repairable parts owned and managed by AFWCF.

Inventory Held for Repair is damaged inventory that requires repair to make it suitable for sale. Many of the inventory items are more economical to repair than to procure. In addition, because AFWCF often relies on weapon systems and machinery no longer in production, AFWCF supports a process that encourages the repair and rebuilding of certain items. This repair cycle is essential to maintaining a ready, mobile, and armed military force.

Excess, Obsolete, and Unserviceable inventory consists of obsolete, excess to requirements, or items that cannot be economically repaired and are awaiting disposal.

Work in Process balances include costs related to the production or servicing of items, including direct material, direct labor, applied overhead, and other direct costs. Work in Process also includes the value of finished products or completed services pending the submission of bills to the customer.

General Composition of Operating Materiels and Supplies

Operating Materiel and Supplies (OM&S) includes consumable parts and supplies used to remanufacture spare parts and repair weapons systems.

Restrictions

There are no restrictions on the use, sale, or disposition of OM&S.

Definition

Held for Use includes consumable parts and supplies.

5. Total Liabilities	\$ 1,950,181,985.57	\$ 1,977,488,236.45

Liabilities not covered by budgetary resources are liabilities for which Congressional action is needed before budgetary resources can be provided.

Military Retirement and Other Federal Employment Benefits not covered by budgetary resources are comprised of various employee actuarial liabilities not due and payable during the current fiscal year. These liabilities are primarily comprised of \$228.9 million for Federal Employee's Compensation Act. Refer to Note 17, Military Retirement and Other Federal Employment Benefits, for additional details and disclosures.

Nonfederal Other Liabilities includes \$28.4 million in foreign government deposits. These deposits represent foreign governments buy in to a Cooperative Logistics Supply Support Agreement (CLSSA). Foreign governments provide funds to buy their respective share of inventory that is owned and managed by the Air Force. This liability is established to offset an asset that belongs to another entity (foreign government). If the CLSSA is closed, they receive either a cash reimbursement or spare parts if approved by State Department. Historically foreign governments always request cash reimbursement versus spare parts. As a result deposits are classified as liabilities not covered by budgetary resources.

The AFWCF's systems do not track intragovernmental transactions by customer at the transaction level. Therefore, internal DoD buyer-side balances are adjusted to agree with internal seller-side balances for revenue, accounts receivable, and unearned revenue. Accounts payable are adjusted by reclassifying amounts between federal and nonfederal accounts payable.

The majority of the Nonfederal Other Liabilities balance is comprised of \$392.0 million for Contract Depot Maintenance Activity Group's accrued material and labor liabilities.

Contingent liabilities balance includes \$20.9 million in estimated future contract financing payments that will be paid to the contractor upon delivery and Government acceptance. In accordance with contract terms, specific rights to the contractor's work vests with the Government when a specific type of contract financing payment is made. This action protects taxpayer funds in the event of contract nonperformance. These rights should not be misconstrued as the rights of ownership. The AFWCF is under no obligation to pay the contractor for amounts greater than the amounts authorized in the contract until delivery and Government acceptance. Because it is probable that the contractor will complete its efforts and deliver a satisfactory product to the AFWCF and the amount of potential future payments is estimable; the AFWCF has recognized a contingent liability for estimated future payments, which are conditional pending delivery and Government acceptance.

Note 16.	Commitments and Contingencies
-----------------	--------------------------------------

The AFWCF is a party in various administrative proceedings and legal actions, with claims including environmental damage, equal opportunity matters, and contractual bid protests. We are not aware of any contingent liabilities for legal actions.

The AFWCF is a party in numerous individual contracts that contain clauses, such as price escalation, award fee payments, or dispute resolution, that may or may not result in a future outflow of expenditures. Currently, AFWCF does not have a systemic process by which it captures or assesses these potential contingent liabilities; therefore, the amounts reported may not fairly present AFWCF's contingent liabilities.

Actuarial Cost Method Used:

Assumptions:

Market Value of Investments in Market-based and Marketable Securities:

FluctuationsFederal Employees Compensation Act (FECA)

The AFWCF actuarial liability for workers' compensation benefits is developed by the Department of Labor and is updated at the end of each fiscal year. The liability includes the estimated liability for death, disability, medical, and miscellaneous costs for approved compensation cases, plus a component for incurred but not reported claims. The liability is determined using a method that utilizes historical benefit payment patterns related to a specific incurred period to predict the ultimate payments. The projected annual benefit payments are discounted to present value using the Office of Management and Budget's (OMB's) economic assumptions for 10-year Treasury notes and bonds. Cost of living adjustments (COLAs) and consumer price index medical (CPIM) factors are applied to the calculation of projected future benefits.

Air Force Working Capital Fund

The liability for future workers' compensation (FWC) benefits includes the expected liability for death, disability, medical, and miscellaneous costs for approved compensation cases, plus a component for incurred but not reported claims. The liability is determined using a method that utilizes historical benefit payment patterns related to a specific incurred period to predict the ultimate payments related to that period. Consistent with past practice, these projected annual benefits payments have been discounted to present value using the OMB's economic assumptions for 10-year Treasury notes and bonds. Interest rate assumptions utilized for discounting were as follows:

2007

4.93% in Year 1

5.08% in Year 2

And thereafter

To provide more specifically for the effects of inflation on the liability for future workers' compensation benefits, wage inflation factors (COLAs) and medical inflation factors (CPIMs) were applied to the calculation of projected future benefits. The actual rates for these factors for the charge back year (CBY) 2007 are used to adjust the methodology's historical payments to current year constant dollars.

The compensation COLAs and CPIMs used in the projections for various CBY were as follows:

<u>CBY</u>	<u>COLA</u>	<u>CPIM</u>
2007	2.63%	3.74%
2008	2.90%	4.04%
2009	2.47%	4.00%
2010	2.37%	3.94%
2011+	2.30%	3.94%

The model's resulting projections were analyzed to insure that the estimates were reliable. The analysis was based on four tests: (1) a sensitivity analysis of the model to economic assumptions, (2) a comparison of the percentage change in the liability amount by agency to the percentage change in the actual incremental payments, (3) a comparison of the incremental paid losses per case (a measure of case-severity) in CBY 2007 to the average pattern observed during the most current three charge back years, and (4) a comparison of the estimated liability per case in the 2008 projection to the average pattern for the projections of the most recent three years.

Note 18.**General Disclosures Related to the Statement of Net Cost****Intragovernmental Costs and Exchange Revenue**

As of June 30	2008	2007
1. Intragovernmental Costs	\$ 3,101,918,346.89	\$ 2,729,117,490.51
2. Public Costs	4,941,267,478.73	4,065,262,017.08

7. Net Cost of Operations	\$ (198,710,219.68)	\$ (967,329,120.72)

Intragovernmental costs and revenue are related to transactions made between two reporting entities within the Federal Government.

Public costs and revenues are exchange transactions made between the reporting entity and a nonfederal entity.

The AFWCF's systems do not track intergovernmental transactions by customer at the transaction level. Therefore, internal DoD buyer-side balances are adjusted to agree with seller-side balances for revenue. Expenses are adjusted by reclassifying amounts between federal and nonfederal expenses.

The Statement of Net Cost (SNC) is unique because its principles are driven on understanding the net cost of programs and/or organizations that the Federal Government supports through appropriations or other means. This statement provides gross and net cost information that can be related to the amount of output or outcome for a given program and/or organization administered by a responsible reporting entity.

The AFWCF records transactions on an accrual basis. The AFWCF may not have all the actual costs and revenues input into the system in time for reporting. Accrual estimates based upon budget information, historical data, and current data not yet input are made as required by generally accepted accounting principles. These estimates reverse as actual costs or revenues are recorded.

The Statement of Budgetary Resources (SBR) includes intraentity transactions because the statements are presented as combined.

The SF 133, Report on Budgetary Execution, and SBR are not in balance due to a \$63.0 million correction posted to the SBR after the SF 133 was closed.

This note has been modified to accurately report the remaining available balance of borrowing and contract authority. Previously, the AFWCF reported the amount of the contract/borrowing authority that had initially been used and not subsequently replaced by reimbursement or appropriation.

The contract authority available at the end of the period is \$6.2 billion.

All of AF WCF obligations are reimbursable obligations in apportionment category B.

Due to the AFWCF's financial system limitations, budgetary data is not in agreement with proprietary expenses and assets capitalized. The difference between budgetary and proprietary data is a previously identified deficiency.

Resources That Finance the Acquisition of Assets is adjusted in order to align the note schedule with the amount reported on the Statement of Net Cost. This adjustment is \$254.1 million (absolute value).

The following schedule lines are presented as combined instead of consolidated due to intra-agency budgetary transactions not being eliminated:

- Obligations Incurred
- Less: Spending Authority from Offsetting Collections and Recoveries
- Obligations Net of Offsetting Collections and Recoveries
- Less: Offsetting Receipts
- Net Obligations
- Undelivered Orders
- Unfilled Customer Orders

The majority of Other resources or adjustments to net obligated resources that do not affect Net Cost of Operations is comprised of \$64.2 million for equipment transferred from Air Force General Funds to AFWCF Depot Maintenance Activity Group.

The majority of Other Components not Requiring or Generating Resources is comprised of \$1.5 billion for Depot Maintenance Activity Group work-in-process offsets.

Beginning 4th Quarter, FY 2007, DoD began presenting the Statement of Financing (SOF) as a note in accordance with the Office of Management and Budget (OMB) Circular A-136. The SOF will no longer be considered a basic statement and is now referred to as “Reconciliation of Net Cost of Operations to Budget.”
