15	Security Cooperation Policy
16	Department of Defense Debt Management
00	Glossary

APPLICABILITY

The DoD FMR applies to the Office of the Secretary of Defense, the Military Departments, the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the DoD Office of the Inspector General, the Defense Agencies, the DoD Field Activities, and all other organizational entities within the DoD (hereinafter referred to collectively as “DoD Components”).

PARAGRAPH STRUCTURE

The paragraph numbering system is consistent across the Regulation. The section and paragraph levels are 2-digits, and there are five additional subparagraph level designators formulated as follows:

SECTION	PARAGRAPH	SUBPARAGRAPHS
1.0	1.1	1.1.1.1.1

INFORMATION REQUIREMENTS

DoD Components should forward recommended changes to this Regulation through appropriate channels to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), Office of the Deputy Chief Financial Officer (ODCFO). Requests for deviations from or exceptions to this Regulation must be submitted via formal memorandum through your organization's appropriate coordination and approval process to the OUSD(C), ODCFO. The memorandum must provide justification and supporting documentation as applicable. Mailing address:

CHAPTER 1

CHIEF FINANCIAL OFFICER OF THE DEPARTMENT OF DEFENSE

1.0 GENERAL

1.1 Purpose

This chapter describes the establishment, roles, responsibilities, and authority of the Department of Defense (DoD) Chief Financial Officer (CFO) as established by the [CFO Act of 1990](#). The DoD CFO is also the Under Secretary of Defense (Comptroller) (USD(C)). The USD(C)/CFO is responsible for developing and implementing DoD-wide financial management systems and overseeing financial management activities relating to CFO programs and operations.

1.2 Authoritative Guidance

The CFO establishment, roles, responsibilities, and authority prescribed are in accordance with the applicable provisions of the following sources:

1.2.1. Title 10, United States Code, section 192 ([10 U.S.C. § 192](#)), “Defense Agencies and Department of Defense Field Activities: oversight by the Secretary of Defense”;

1.2.2. [10 U.S.C. § 2222](#), “Defense business systems: business process reengineering; enterprise architecture; management”;

1.2.3. [31 U.S.C. § 3515](#), “Financial statements of agencies”;

1.2.4. [31 U.S.C. § 901](#), “Establishment of agency Chief Financial Officers”;

1.2.5. [31 U.S.C. § 902](#), “Authority and functions of agency Chief Financial Officers”;

1.2.6. [31 U.S.C. § 903](#), “Establishment of agency Deputy Chief Financial Officers”;

1.2.7. DoD Directive ([DoDD](#)) [5105.36](#), “Defense Contract Audit Agency”;

1.2.8. [DoDD 5118.03](#), “Under Secretary of Defense (Comptroller)/Chief Financial Officer, Department of Defense (USD(C)/CFO)”;

1.2.9. [DoDD 5118.05](#), “Defense Finance and Accounting Service (DFAS)”; and

* 1.2.10. [DoD Instruction 7000.14](#), “DoD Financial Management Policy”.

2.0 CHIEF FINANCIAL OFFICER APPOINTMENT

The CFO Act designates DoD as an agency whose CFO is either appointed by the President, by and with the advice and consent of the U.S. Senate; or designated by the President, in consultation

with the head of the agency, from among officials of the agency who are required by law to be so appointed. The USD(C), who is appointed by the President and confirmed by the U.S. Senate, is also the DoD CFO. The USD(C)/CFO must be appointed or designated, as applicable, from among individuals who possess demonstrated ability in general management of, knowledge of, and extensive practical experience in financial management practices in large governmental or business entities.

3.0 ROLES AND RESPONSIBILITIES

The USD(C)/CFO is the Principal Staff Assistant and advisor to the Secretary of Defense for budgetary and fiscal matters including financial management, accounting policy and systems, managers' internal control systems, budget formulation and execution, contract audit administration and organization, and general management improvement programs. See Figure 1-1 for the DoD Chief Financial Officer Structure. Consistent with the CFO Act, the following roles and responsibilities are assigned to the USD(C)/CFO:

3.1 Financial Management

Direct, manage, and provide policy guidance and oversight of DoD financial management activities, personnel, and operations, including:

3.1.1. Establish DoD policies including its component parts. Ensure compliance with applicable accounting policy and standards.

3.1.2. Establish, review, and enforce internal controls, standards, and compliance guidelines.

3.1.3. Provide oversight of activities and operations including: (a) preparation and annual revision of the Financial Improvement and Audit Remediation (FIAR) plan and (b) development of financial management budgets.

3.1.4. Prepare and annually revise the DoD plan to implement the 5-year financial management plan prepared by the Director of the Office of Management and Budget (OMB) and to comply with the audited financial statements provisions of the CFO Act.

3.1.5. Recruit, select, and train personnel to execute financial management functions.

3.2 Financial Management Systems

Develop and maintain an integrated agency accounting and financial management system, including but not limited to financial reporting, internal controls, cash management, credit management, debt collection, and property and inventory management. In coordination with the Director of Administration and Management (DA&M), provide for the design, development, and installation of financial systems (as defined in the Glossary) and for management improvement programs, especially those related to financial management. Ensure system:

3.2.1. Compliance with applicable accounting principles, standards and requirements, and internal control standards.

3.2.2. Compliance with Director of OMB policies and requirements.

3.2.3. Provides for:

3.2.3.1. Complete, reliable, consistent, and timely budgetary and proprietary transaction-level information in accordance with the [Standard Financial Information Structure](#); and recorded in general ledgers of the accounting systems of record to produce auditable budgetary, proprietary, and managerial cost accounting reports for external and internal stakeholder use, and which is responsive to DoD management information needs. All such financial management systems **must** establish an [Advancing Analytics](#) (Advana) data sharing agreement, [see Chapter 10](#).

3.2.3.2. [Development and reporting of cost information](#).

3.2.3.3. [Integration of accounting and budgeting information](#).

3.2.3.4. Financial and/or program performance data used in budget and financial statement preparation.

3.2.3.5. [Adequate controls over real property, equipment, and inventories](#).

3.2.3.6. [Systematic measurement of performance](#).

3.3 Agency Financial Report

As required by [OMB Circular A-136](#), DoD must prepare and transmit an Agency Financial Report (AFR) to the Secretary of Defense, OMB, U.S. Department of the Treasury (Treasury), the Government Accountability Office, and the Congress. The Department's AFR preparation and reporting requirements are identified in Volume 6B.

3.4 Budget Execution

3.4.1. Monitor the financial execution of the DoD budget in relation to actual expenditures, and prepare and submit to the Secretary of Defense timely performance reports.

3.4.2. Administer and provide analysis and recommendations for the budgeting and execution phases of the DoD Planning, Programming, Budgeting, and Execution process, utilizing advice from the Director, Cost Assessment and Program Evaluation and the [DA&M](#).

3.4.3. Direct the formulation and presentation of DoD budgets, the interactions with the OMB and Congress on budgetary and fiscal matters, and the execution and control of approved budgets. Maintain effective control and accountability over the use of all DoD financial resources. In coordination with the [DA&M](#), conduct analyses [to increase](#) the efficiency of defense spending.

3.5 Biennial Review

Review, on a biennial basis, the fees, royalties, rents, and other charges imposed by the Department for services and things of value it provides, and make recommendations on revising those charges to reflect costs incurred in providing those services and things of value.

4.0 CHIEF FINANCIAL OFFICER AUTHORITY

4.1 Title 10 United States Code

In accordance with 10 U.S.C. § 2222, the USD(C) in conjunction with the DA&M must, in consultation with the Defense Business Council (DBC), document and maintain any common enterprise data for their respective areas of authority. Under this authority, they may also:

4.1.1. Participate in any related data governance process;

4.1.2. Extract defense business systems data as needed for priority activities and analyses;

4.1.3. When appropriate, ensure the source data is the same as that used to produce the financial statements subject to annual audit;

4.1.4. Provide access, except as otherwise provided by law or regulation, to such data to the Office of the Secretary of Defense, the Joint Staff, the military departments, the combatant commands, the Defense Agencies, the DoD Field Activities, and all other DoD offices, agencies, activities, and commands; and

4.1.5. Maintain consistent common enterprise data of their respective organizations.

4.2 Title 31 United States Code

To carry out CFO duties and responsibilities, the USD(C)/CFO has the authority to:

4.2.1. Access all records, reports, audits, reviews, documents, papers, recommendations, or other material that are DoD property, are available to the DoD, and which relate to programs and operations with respect to DoD CFO responsibilities.

4.2.2. Request such information or assistance from any Federal, State, or local governmental entity as may be necessary.

4.2.3. To the extent and in such amounts as may be provided in advance by appropriations Acts, the USD(C)/CFO may enter into contracts and other arrangements with public agencies and with private persons for the preparation of financial statements, studies, analyses, and other services; and make such payments as may be necessary.

5.0 CHIEF FINANCIAL OFFICERS COUNCIL

The DoD CFO is a member of the Chief Financial Officers Council (CFOC) consisting of the Deputy Director for Management of OMB, the Controller of the Office of Federal Financial Management of OMB, the Fiscal Assistant Secretary of the Treasury, and agency CFOs. The CFOC meets periodically to advise and coordinate the activities of its agency members on such matters as consolidation and modernization of financial systems, improved quality of financial information, financial data and information standards, internal controls, legislation affecting financial operations and organizations, and other financial management matters.

6.0 ESTABLISHMENT OF THE DEPUTY CHIEF FINANCIAL OFFICER

The CFO Act requires the establishment of DoD Deputy Chief Financial Officer (DCFO), who must report directly to the DoD CFO on financial management matters. The position of DCFO must be a career-reserved position in the Senior Executive Service. Consistent with qualification standards developed by, and in consultation with, the DoD CFO and the Director of OMB, the Secretary of Defense must appoint as DoD DCFO an individual with demonstrated ability and experience in accounting, budget execution, financial and management analysis, systems development, and not less than 6 years practical experience in financial management at large governmental entities.

7.0 DEPARTMENT OF DEFENSE STAFF ORGANIZATIONS

*7.1 Deputy Comptroller (Program/Budget)

The Deputy Comptroller (Program/Budget) is responsible for overseeing and implementing budgetary functions within the DoD on a day-to-day basis. The Office of the Deputy Comptroller (Program/Budget) is organized into four directorates:

7.1.1. The Directorate for Investment is responsible for advising the Deputy Comptroller (Program/Budget) on all matters pertaining to: Procurement; Research, Development, Test, and Evaluation; the National Intelligence Program; and for the Defense Acquisition Board program.

7.1.2. The Directorate for Military Personnel and Construction is responsible for advising the Deputy Comptroller (Program/Budget) on all matters pertaining to operating and maintaining the U.S. military force structure to include active, reserve, and retired military; Defense Health Program; military construction; family housing; homeowners assistance; North Atlantic Treaty Organization infrastructure; Base Realignment and Closure; and Real Property Maintenance.

7.1.3. The Directorate for Operations is responsible for advising the Deputy Comptroller (Program/Budget) on all matters pertaining to operating and maintaining the U.S. military force structure to include active and reserve military personnel and civilian personnel. This directorate is also responsible for advising on all matters pertaining to Contingency and International programs.

7.1.4. The Directorate for Program and Financial Control is responsible for budget review tracking, the submission of the automated defense budget for the President's budget, maintenance of

the budget databases, apportionment of funds, reprogramming and transfer of funds, obligation and outlay forecasting and tracking, budget concepts and scorekeeping, and information system support.

*7.2 Deputy Comptroller for Enterprise Financial Transformation

The Deputy Comptroller for Enterprise Financial Transformation (EFT) is responsible for improving enterprise-wide performance and data-driven decision making by accelerating digital transformation, process improvement, and the use of data and analytics. The Office for EFT is organized into two directorates:

7.2.1. The Directorate for Digital Transformation (DT) is responsible for the oversight and management of DoD's financial management systems environment, including system audit compliance, and other digital transformation efforts which leverage data, data standards, technology, and analytics to automate and improve business processes. In alignment to the National Defense Strategy, DT also leads the development and implementation of DoD CFO's Financial Management Functional Strategy to drive alignment with 21st century mission requirements and re-investment of savings to core DoD missions.

7.2.2. The Directorate for Financial Management Operations and Analysis is responsible for Defense-wide Working Capital Funds, the Pentagon Reservation Maintenance Revolving Fund, the Building Maintenance Fund, the Conventional Ammunition Working Capital Fund, the National Defense Stockpile Transaction Fund, and the Military Services' Management and Trust Funds. The directorate also supports the migration of all legacy DoD Fund Balance with Treasury (FBwT) reconciliations into the Advana platform, the ongoing development, operation, and maintenance of the Department's FBwT reconciliations with Advana, developing, implementing, and sustaining the Dormant Account Review Quarterly process, producing a supportable Universe of Transactions for financial statement line-item balances, analysis and reporting on budgetary and financial execution data, and executing other Financial Management Analytics missions as needed.

7.3 Deputy Chief Financial Officer

The DCFO is responsible for overseeing and implementing accounting policy, improvements in financial management, as well as other financial management functions for the DoD on a day-to-day basis. The Office of the DCFO is organized into **two** directorates:

7.3.1. The Directorate for FIAR is responsible for audit oversight, management, and liaison functions; **supporting** Components **to** remediate findings and achieve post-audit sustainment. FIAR develops and **annually** revises a detailed FIAR Plan that identifies financial process, system, and statement deficiencies and provides detailed corrective actions to address those deficiencies. Additionally, FIAR manages the Defense-wide Statement of Assurance process by monitoring and reporting the status of auditor and manager-identified material weaknesses and corrective action plans; implementing the Federal Manager's Financial Integrity Act program for DoD to include [OMB Circular A-123, Appendix A](#), "Management of Reporting and Data Integrity Risk;" managing the Improving Financial Performance Initiative of the President's Management Agenda; and advocating for the USD(C)/CFO on various interagency forums and internal DoD councils, boards, committees, and external organizations as required.

* 7.3.2. The Directorate for Financial Management Policy and Reporting (FMPR) is responsible for developing, promulgating, implementing, and interpreting DoD-wide accounting and finance policies; supporting the USD(C)/CFO and DCFO on various interagency forums; advocating for the USD(C)/CFO on various interagency organizations, and representing the USD(C)/CFO on various internal DoD councils, boards and committees pertaining to financial management policy. In addition, FMPR provides oversight of and liaisons with DoD Components on financial management operations, systems, responses to audit reports, policy clarifications, and other financial matters; and administers this Regulation. The Directorate develops and issues the DoD AFR (see Volume 6B), oversees the DoD-wide consolidated financial statements and notes—to include Component Level Account transactions—and manages the DoD Payment Integrity and Antideficiency Act programs, and other external financial reporting. Additionally, the Directorate supports the CFO and DCFO's strategic vision for a strong internal control environment by facilitating DoD implementation of large-scale, end-to-end financial and business process and/or system adoption, and removing barriers from DoD, other federal, and industry stakeholders for more efficient interoperable systems, data standards, and Government-wide accounting best practices.

7.4 Director, Defense Finance and Accounting Service

The Director of DFAS is the principal DoD executive for finance and accounting requirements, systems, and functions under the authority and direction of the USD(C). DFAS:

7.4.1. Directs and oversees finance and accounting requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities, including security assistance.

7.4.2. Establishes and enforces requirements, principles, standards, systems, procedures, processes, and practices necessary to comply with finance and accounting statutory and regulatory requirements applicable to the DoD.

7.4.3. Provides professional finance and accounting services for DoD Components and other Federal agencies, as designated by the USD(C)/CFO.

7.4.4. Directs the consolidation, standardization, and integration of finance and accounting requirements, functions, procedures, operations, and systems and ensures proper relationship with other DoD functional areas (e.g., budget, personnel, logistics, acquisition, and civil engineering).

7.4.5. Executes statutory and regulatory financial reporting requirements and provides financial statements, pursuant to 31 U.S.C. § 3515, to include supporting customers' audit assertions and audit execution.

7.4.6. Provides advice and recommendations to the USD(C)/CFO on finance and accounting matters and provides documentation that discloses the internal controls within DFAS-assigned systems that may impact customers' control environment in supporting auditability.

7.4.7. Coordinates on the establishment of all DoD finance and accounting activities independent of the DFAS and supports the development and implementation of a compliant business solution with common business processes and data standards for horizontal end-to-end processes in the Business Enterprise Architecture.

7.5 Director, Defense Contract Audit Agency

The Director of Defense Contract Audit Agency (DCAA) is under the authority, direction, and control of the USD(C)/CFO, pursuant to 10 U.S.C. § 192, DoDD 5118.03, and DoDD 5105.36. The Director exercises authority, direction, and control over DCAA and all assigned resources. DCAA performs all necessary DoD contract audits and provides accounting and financial advisory services regarding contracts and subcontracts. DCAA executes the following:

7.5.1. Assists procurement and contract administration officials in achieving the objective of prudent contracting by providing financial information and advice on proposed or existing contracts and contractors, as appropriate.

7.5.2. In accordance with Government Auditing Standards, the Federal Acquisition Regulation, the Defense Federal Acquisition Regulation Supplement (DFARS), and other applicable laws and regulations, to the extent and manner considered necessary, to permit proper performance of the other functions; DCAA audits, examines, and reviews:

7.5.2.1. Contractors' and subcontractors' records, documents, and other evidence;

7.5.2.2. Systems of internal control;

7.5.2.3. Compliance with regulations; and

7.5.2.4. Accounting, costing and general business practices and procedures.

7.5.3. Audits compliance with DFARS Contractor Business Systems Clauses for contractors' accounting, material management and accounting, and estimating systems.

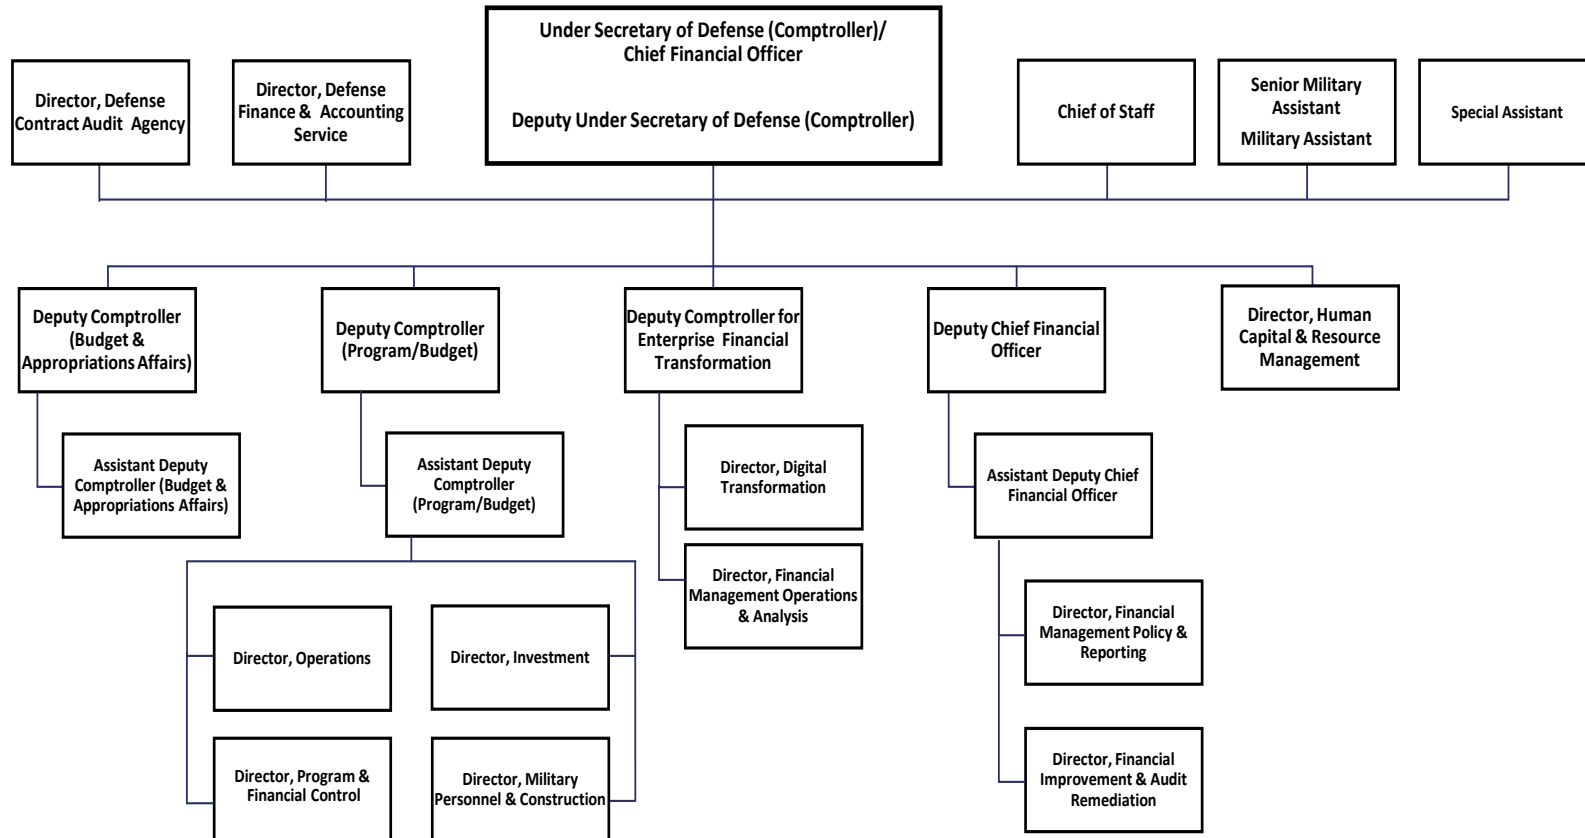

7.5.4. Directs audit reports to the Government management level having authority and responsibility to act on the audit findings and recommendations.

7.5.5. As an advisor, attends and participates, as appropriate, in contract negotiation and other meetings where contract costs, audit reports, or related financial matters are under consideration.

8.0 DEPARTMENT OF DEFENSE COMPONENTS

The Heads of the DoD Components must direct and manage financial management activities within their respective Components, consistent with the policies, requirements, principles, standards, procedures, and practices prescribed by the USD(C)/CFO, and other internal policies as prescribed by the Heads of the other DoD Components.

CHAPTER 2

FEDERAL ACCOUNTING STANDARDS HIERARCHY

1.0 GENERAL

1.1 Overview

The Federal Accounting Standards Advisory Board (FASAB) is the body designated by the American Institute of Certified Public Accountants (AICPA) as the source of generally accepted accounting principles (GAAP) for federal reporting entities. As such, the FASAB is responsible for identifying the sources of accounting principles and providing federal entities with a framework for selecting the principles used in the preparation of general purpose financial reports that are presented in conformity with GAAP. FASAB promulgates accounting standards for U.S. government agencies after considering financial and budgetary information needs of Congress, executive agencies, and other users of federal financial information. FASAB considers comments from the public on its proposed Statements, which are widely distributed as “exposure drafts.” FASAB publishes adopted statements as Statement of Federal Financial Accounting Standards (SFFAS) that become GAAP for federal government entities. FASAB Standards and other FASAB authoritative publications, including FASAB Interpretations, Technical Bulletins, and Technical Releases are published on the [FASAB](#) website. Documents recently issued and not yet codified are also presented at this location.

1.2 Purpose

1.2.1. This chapter includes the FASAB hierarchy of accounting principles and standards. These standards are used to promulgate accounting and financial reporting policy within the Department of Defense (DoD) Financial Management Regulation (FMR). The purpose of these principles and standards is to improve the usefulness of federal financial reports.

1.2.2. The provisions of this chapter apply to all DoD Components, including the Defense Working Capital Fund activities. However, this chapter does not apply to Nonappropriated Fund (NAF) accounting. NAF accounting policies are in Volume 13.

1.2.3. Interim policies and guidance issued by the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) through various memoranda can be found on the OUSD(C) DoD FMR website. Such interim guidance will be incorporated into the DoD FMR once it is finalized.

1.3 Authoritative Guidance

1.3.1. The [Chief Financial Officers \(CFO\) Act of 1990](#), as amended, requires federal financial managers, accountants and auditors to apply appropriate accounting principles and standards.

1.3.2. FASAB develops accounting standards and principles for the United States Government.

1.3.3. The [AICPA Code of Professional Conduct](#), Part 1.320.020 recognized FASAB as the board that promulgates GAAP for federal entities.

1.3.4. [SFFAS 34](#) “The Hierarchy of Generally Accepted Accounting Principles, Including the Application of Standards Issued by the Financial Accounting Standards Board” identifies the GAAP hierarchy for federal reporting entities.

1.3.5. The [Government Management Reform Act of 1994 \(GMRA\)](#) mandates executive agencies prepare their financial statement in accordance with GAAP.

2.0 HIERARCHY

2.1 Hierarchy of Accounting Standards

2.1.1. The SFFASs are GAAP applicable to the federal government and must be followed by all federal agencies in reporting under the GMRA. DoD Components must adhere to the GAAP hierarchy prescribed in SFFAS 34. The sources of accounting principles that are generally accepted are categorized in descending order of authority as follows:

2.1.1.1. FASAB SFFAS and Interpretations;

2.1.1.2. FASAB Technical Bulletins and, if specifically made applicable to federal reporting entities by the AICPA and cleared by FASAB, AICPA Industry Audit and Accounting Guides. Such pronouncements specifically made applicable to federal reporting entities are presumed to have been cleared by FASAB, unless the pronouncement indicates otherwise;

2.1.1.3. Technical Releases of the Accounting and Auditing Policy Committee (AAPC) of the FASAB; and

2.1.1.4. Implementation guides published by FASAB staff, as well as practices that are widely recognized and prevalent in the federal government.

2.1.2. If the accounting treatment for a transaction or event is not specified by a pronouncement or established in practice as described in subparagraph 2.1.1., a federal reporting entity should first consider accounting principles for similar transactions or events within categories in subparagraphs 2.1.1 before considering Other Accounting Literature discussed in paragraph 2.2.

2.1.3. A federal reporting entity should not follow the accounting treatment specified in accounting principles for similar transactions or events in cases in which those accounting principles either, (a) specifically prohibit the application of the accounting treatment to the particular transaction or event or (b) indicate that the accounting treatment should not be applied to other transactions or events by analogy.

2.2 Other Pronouncements and Practices

2.2.1. Other Accounting Literature includes

2.2.1.1. FASAB Concepts Statements;

2.2.1.2. AICPA Industry Audit and Accounting Guides that have not specifically been made applicable to federal reporting entities by FASAB;

2.2.1.3. Pronouncements of other accounting and financial reporting standards-setting bodies, such as Financial Accounting Standards Board, Governmental Accounting Standards Board, the International Accounting Standards Board, and the International Public Sector Accounting Standards Board;

2.2.1.4. Publications of professional associations or regulatory agencies; and

2.2.1.5. Accounting textbooks, handbooks, and articles.

2.2.2. The appropriateness of other accounting literature depends on its relevance to particular circumstances, the specificity of the guidance, and the general recognition of the issuer or author as an authority. FASAB Concepts Statements would normally be more influential than other sources in this category.

3.0 COMMUNICATION AND COORDINATION

3.1 Guidance and Clarification

To ensure the consistent application of SFFAS throughout DoD, the OUSD(C), Office of the Deputy Chief Financial Officer (ODCFO), Financial Management Policy and Reporting (FMPR) Directorate must be contacted when clarification, technical guidance, implementation guidance or other information regarding federal accounting standards is needed.

3.2 Correspondence

3.2.1. Formal and informal requests addressed to FASAB or the AAPC for an interpretation, clarification, technical guidance, implementation guidance or other information regarding SFFAS must be submitted through the OUSD(C), ODCFO, FMPR Directorate.

3.2.2. All correspondence presenting a DoD position on FASAB Exposure Drafts and on any other matters before FASAB or the AAPC will be signed by either the DoD CFO, DCFO or ADCFO.

3.2.3. Individuals submitting responses to exposure drafts will clearly indicate in the correspondence that the opinions expressed are those of the individual and do not represent the official position of DoD.

3.2.4. The Office of the Director of National Intelligence (ODNI) is not a component of DoD and, accordingly, may communicate with accounting standards-setting bodies in the same manner as other federal agencies. DoD components, including the Defense Intelligence Agency, the National Geospatial-Intelligence Agency, and the National Security Agency, provide input into ODNI correspondence with accounting standards-setting bodies. DoD Components should ensure that ODNI communications are not presented as official DoD positions. Further, to ensure the completeness of DoD communications, any DoD component input into ODNI correspondence with accounting standards-setting bodies should be coordinated with the ODCFO.

3.3 Task Force Participation

3.3.1. Full participation by DoD in Task Forces sponsored by FASAB and the AAPC is critical to ensuring that DoD's views are considered as accounting standards and guidance are formulated. This participation includes Task Force membership, meeting attendance, participation in group discussions, preparing draft documents, and commenting on draft Task Force documents.

3.3.2. To ensure complete coverage by DoD, Task Force participants should notify the OUSD(C), ODCFO, Financial Improvement and Audit Remediation, and FMPR Directorates of membership in FASAB and AAPC Task Forces. Task Force participants should also remain alert to the fact that many issues will impact multiple DoD Components. Coordination with the FMPR Directorate and other DoD components will ensure that DoD is properly represented as government-wide accounting standards are formulated.

VOLUME 1, CHAPTER 3: “FEDERAL FINANCIAL MANAGEMENT IMPROVEMENT ACT COMPLIANCE”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by [blue](#) font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [bold, italic, blue, and underlined font](#).

The previous version dated [September 2023](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Streamlined chapter to remove instructional language.	Revision
1.1	Added interdependencies between Federal Financial Management Improvement Act (FFMIA) and other compliance requirements.	Addition
1.3	Added the following to the Authoritative Guidance section: Title 10, United States Code, Section 2222; Government Accountability Office, Financial Audit Manual, Volumes 1, 2, and 3; and the Department of Defense (DoD) Instruction 5000.75.	Addition
2.0	Added and revised definitions.	Revision
3.0	Added and revised FFMIA compliance requirements.	Revision
4.0	Added and revised responsible entities.	Revision
Table 4-1	Added table for the DoD Information Technology Investment Portal (DITIP) DoD Auditability Requirements Compliance assertion criteria.	Addition

CHAPTER 3

FEDERAL FINANCIAL MANAGEMENT IMPROVEMENT ACT COMPLIANCE

1.0 GENERAL

*1.1 Overview

1.1.1. The Federal Financial Management Improvement Act of 1996 ([FFMIA](#)) is intended to ensure Federal financial systems provide reliable, consistent, and uniform disclosure of financial data using accounting standards. FFMIA requires the [Department of Defense \(DoD\)](#) to implement and maintain financial management (FM) systems that substantially comply with Federal Financial Management System Requirements (FFMSR), applicable Federal accounting standards, and the United States Standard General Ledger (USSGL) at the transaction level. FFMIA requires DoD management to annually assess and [document](#) the Department's compliance [with FFMIA and report the results to the Office of Management and Budget \(OMB\), accomplished through the annual Statement of Assurance \(SOA\) processes.](#) Generally Accepted Government Auditing Standards (GAGAS), the Financial Audit Manual (FAM), and OMB Bulletin 24-02 require the Department's financial statement auditors [to evaluate and report on whether the agency's financial management systems comply with FFMIA requirements, accomplished through the Agency Financial Report \(AFR\) process.](#) Financial statement auditors use the results of DoD management's internal control assessments, including FFMIA and other compliance assessments, [to inform the scope and rigor of their testing.](#) The results of management's own assessment and [the auditors' independent evaluation determine](#) whether the Department's financial management systems substantially comply with FFMIA. If not, [management is responsible for developing and implementing](#) remediation [and risk management](#) plans as applicable.

1.1.2. While FFMIA compliance centers on these three [requirements](#), it is not limited to them. Other [relevant](#) standards and requirements [include](#) the Federal Managers' Financial Integrity Act, the Agency Chief Financial Officers Act, the Federal Information Security Management Act of 2002 (FISMA), and OMB Circular A-123 requirements.

1.2 Purpose

This chapter prescribes the Department's policy for achieving [substantial](#) compliance with FFMIA. It provides the basis for the implementation of FFMIA for the Department to generate timely, accurate, and useful financial information with which the Department leadership can make informed decisions and ensure accountability on an ongoing basis.

* January 2025

*1.3 Authoritative Guidance

The requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.1. Title 10, United States Code, section 2222 ([10 U.S.C. § 2222](#)), “Defense business systems: business process reengineering; enterprise architecture; management.”

1.3.2. [10 U.S.C. § 2223 \(a\) & \(b\)](#), “Information technology: additional responsibilities of Chief Information Officers.”

1.3.3. [31 U.S.C. § 1115](#), “Federal Government and agency performance plans.”

1.3.4. [31 U.S.C. § 3512](#), “Executive agency accounting and other financial management reports and plans”; with emphasis on sections 801 – 807 (FFMIA).”

1.3.5. [31 U.S.C. Chapter 9](#), “Agency Chief Financial Officers.”

1.3.6. [44 U.S.C. Chapter 35, Subchapter III](#), “Confidential Information Protection and Statistical Efficiency.”

1.3.7. [44 U.S.C. § 3601](#), “Definition.”

1.3.8. [OMB Bulletin No. 24-02](#), “Audit Requirements for Federal Financial Statements.”

1.3.9. [OMB Circular A-123, Memorandum M-23-06, Appendix D](#), “Management of Financial Management Systems – Risk and Compliance.”

1.3.10. [OMB Circular A-130, Appendix I](#), “Responsibilities for Protecting and Managing Federal Information Resources.”

1.3.11. Statement on Standards for Attestation Engagements No. 18, ([SSAE No. 18 Examinations, AT-C Section 320](#)), “Reporting on an Examination of Controls at a Service Organization Relevant to User Entities’ Internal Control Over Financial Reporting.”

1.3.12. National Institute of Standards and Technology ([NIST Special Publication 800-53](#)), Revision 5, “Security and Privacy Controls for Information Systems and Organizations.”

1.3.13. U.S. Department of Treasury Financial Manual (TFM), Volume 1, Part 6, Chapter 9500 ([1 TFM 6-9500](#)), “Fiscal Year 2024 Revised Federal Financial Management System Requirements for Fiscal Reporting.”

* January 2025

1.3.14. Government Accountability Office (GAO), Financial Audit Manual (FAM), Volume 1 ([GAO-24-107278](#)), “Audit Methodology”, Section 350 and 360.”

1.3.15. GAO, FAM, Volume 2 ([GAO-24-107279](#)), “Detailed Implementation Guidance”, Section 701 – 710.”

1.3.16. GAO, FAM, Volume 3 ([GAO-24-107280](#)), “Federal Financial Reporting Checklist.”

1.3.17. GAO, Federal Information System Controls Audit Manual (FISCAM), ([GAO-24-107026](#))

1.3.18. [DoD Instruction \(DoDI\) 5000.75](#), “Business Systems Requirements And Acquisition.”

1.3.19. [DoDI 5010.40](#), “DoD Enterprise Risk Management and Risk Management and Internal Control Program”

1.3.20. [DoDI 8510.01](#), “Risk Management Framework (RMF) for DoD Systems.”

1.3.21. DoD Internal Control Over Reporting - Financial Reporting and Financial Systems ([ICOR-FR & FS](#)).

1.3.22. DoD Statement of Assurance Executive Handbook ([SOA Executive Handbook](#))

*2.0 DEFINITIONS

The definitions outlined in this section cover both the Federal and DoD vernaculars. Paragraphs 2.1 through 2.3 are the Federal vernacular contained in OMB Circular A-123, Memorandum M-23-06, Appendix D, while paragraphs 2.4 through 2.6 conform to the vernacular the Department uses to categorize DoD-owned financial management systems based on the functions the system supports. DoD Components should utilize the definitions in 2.4 through 2.6 to meet the requirements of paragraph 4.4.2.1 of this chapter.

2.1 Financial Management Systems

FM systems include the **core** financial systems and the financial portions of mixed systems necessary to support financial management, including automated and manual processes, procedures, controls, data hardware, software, and support personnel dedicated to the operation and maintenance of system functions. Both financial systems and mixed systems may directly or indirectly trigger a financial event within the system itself or in another system and may be required to comply with some or all FFMIA requirements. The ICOR-FR & FS systems recorded in the FIAR Systems Database (FSD) will be used to identify DoD FM Systems that are subject to FFMIA requirements and compliance reviews.

2.2 Core Financial Systems

2.2.1. Core financial systems and financial systems are synonymous terms and consist of six functional areas: general ledger management, funds management, payment management, receivable management, cost management, and financial reporting.

2.2.2. Core financial systems are comprised of one or more software programs (commonly referred to as applications), that are used for:

2.2.2.1. Collecting, processing, maintaining, transmitting, or reporting data about financial events;

2.2.2.2. Supporting financial planning or budgeting activities;

2.2.2.3. Accumulating and reporting costs information; or

2.2.2.4. Supporting the preparation of financial statements.

2.3 Mixed Systems

Mixed systems are information systems that support both financial and nonfinancial functions of the federal government or components thereof. FFMIA requirements apply only to the financial portion of mixed systems.

2.4 Accounting Systems

Accounting systems are core financial systems configured to post transactions to an internal USSGL-compliant subsidiary or general ledger. Depending on the functions performed, accounting systems may be required to comply with some or all FFMIA requirements.

2.5 Financial Business Feeder Systems

Financial business feeder systems may be core financial or mixed systems. Financial business feeder systems create or process transactions with financial or accounting impacts and exchange financial/accounting data with another business feeder system(s) and/or accounting system(s). The term financial business feeder system is synonymous with feeder systems. Depending on the functions performed, financial feeder systems may be required to comply with some or all FFMIA requirements.

2.6 No (Neither) Systems

No (Neither) systems are FM systems that do not fit into the accounting system or financial business feeder system categories. These systems do not directly handle financial transactions but play significant roles in supporting the overall system functionalities and user interactions. They serve purposes such as access and identity management or data visualizations. Advanced Analytics (ADVANA) is an example of a no (neither) system.

2.7 Service Providers

Service Providers refer to external parties that perform the operational process(es) for an entity. Service Providers providing services to user entities that are likely to be relevant to those user entities' internal control over reporting – financial reporting and financial systems may undergo an SSAE No. 18 Examination covering systems used and common controls performed uniformly for user entities. The results of the examination are captured in a System and Organization Control (SOC 1) Report. The SOC 1 Report is specifically intended to meet the needs of entities that use service organizations (user entities) and the independent public accountants (IPAs) that audit the user entities' financial statements (user auditors). It assists them in understanding the control environment and evaluating the effectiveness of the controls at the service organization and their impact on the user entities' financial statements.

2.8 Hosting Organization

Hosting Organizations provide application hosting services for systems owned by DoD. Examples of hosting organizations include the Defense Information Systems Agency (DISA) and commercial Cloud Service Providers.

*3.0 FFMIA COMPLIANCE REQUIREMENTS

3.1 FFMIA Compliance

3.1.1. In determining whether the Department's financial management systems substantially comply with FFMIA, management and auditors must consider the degree to which a system's performance prevents the Department from meeting the specific requirements of FFMIA as listed in paragraph 1.1.

3.1.1.1. DoD management may use OMB Circular A-123, Appendix D, Attachment 1, "FFMIA Compliance Determination Framework", to determine whether a system is substantially compliant with FFMIA.

3.1.1.2. Financial statement auditors apply OMB Bulletin 24-02 or the latest version and the GAO FAM Volumes 2 and 3 in combination with the results of their own independent testing and documentation provided by DoD management to determine DoD management's overall compliance with FFMIA.

* January 2025

3.1.2. The DoD strategy for FFMIA compliance is integrated with related efforts to achieve auditability and maintain effective Internal Control over Reporting (ICOR) including [ICOR-FR & FS systems](#). Documentation that supports these related requirements also supports FFMIA compliance and may be used to avoid duplication of efforts.

3.1.3. The [DoD ICOR-FR & FS Guide](#) serves as a standard reference for users involved in financial reporting internal control activities within the DoD. This includes the annual requirements prescribed in the OMB Circular A-123, the FFMIA, and other applicable laws, regulations, and guidance. A system is subject to FFMIA if it is determined to be [ICOR-FR & FS](#) relevant as defined in the DoD [ICOR-FR & FS](#) Guide and performs any business functions with FFMIA compliance controls.

3.1.4. The DoD [ICOR-FR & FS Guide](#) identifies the Federal Information System Controls Audit Manual (FISCAM) as the methodology to be used for performing IT control assessments and audits. It groups IT controls into two categories, General Controls (GC) and Business Process Controls (BP). See section 3.5 for additional details.

3.1.5. The selection of applicable FISCAM controls is governed by the application of the FM Overlay developed by OUSD(C). All DoD Components are required to implement the FM Overlay for each system that is relevant to ICOR-FR & FS. Compliance is enforced in the controls selection phase of assessment and authorization processes in the Enterprise Mission Assurance Support Service (eMASS) system or other software/tools implemented for this purpose. Components must consider the results of control assessments, regardless of who performs them, when evaluating federal financial systems' compliance with laws and regulations, such as FFMIA and FISMA.

3.1.6. The Defense Business Systems (DBS) annual Certification Guidance memorandum identifies the annual FFMIA requirements as DoD Auditability Requirements consistent with 10 U.S.C. § 2222(g) and requires DoD Components with priority or covered ICOR-FR & FS DBS to comply or plan to comply with applicable requirements, to include FFMIA controls in financially relevant business events (operational activities) within the DoD business enterprise architecture (BEA). The [ADVANA FM Functions – Requirements Matrix](#) (requires ADVANA Qlik access) provides the financially relevant business events associated with BEA operational activities.

3.1.7. The GAO FAM Volumes 1 and 2 and OMB Bulletin 24-02 provide guidance to auditors for the assessment of FFMIA compliance and state the requirements for auditors to report whether an agency's financial management systems comply substantially with FFMIA requirements. The auditor's report should include the nature and extent of the noncompliance, including areas in which there is substantial but not full compliance; the primary reason or cause of noncompliance; the entity or organization responsible for the noncompliance, any relevant comments from any responsible officer or employee, and a statement with respect to the recommended remedial actions and the time frames for implementing those actions.

3.2 USSGL at the Transaction Level

3.2.1. The Department's financial management systems must maintain accounting data at the transaction level. Financial management systems include both financial and mixed systems. Every DoD financial event (budgetary and proprietary) must be recorded by applying the requirements of the USSGL guidance in the TFM, and DoD USSGL transaction library (See Chapters 4 and 7 for additional guidance).

3.2.2. Every financial relevant business event that results in an automated or manual transaction in a core financial system must generate accurate and compliant postings to all relevant budgetary and proprietary general ledger accounts according to the rules defined in the DoD USSGL transaction library guidance and website. The GAO FAM provides procedural guidance for testing compliance with USSGL.

3.3 Federal Accounting Standards

DoD financial events (budgetary and proprietary) must be recorded by applying the requirements of the Federal accounting standards governed by the Federal Accounting Standards Advisory Board. (See Chapter 2 for additional guidance). Applicable Standard Federal Financial Accounting Standard (SFFAS) requirements have been integrated into the DoD BEA operational activities. The GAO FAM provides procedural guidance for testing compliance with federal accounting standards.

3.4 Federal Financial Management System Requirements

3.4.1. The FFMSRs were originally developed to support the adoption of uniform financial systems, standards, and reporting required by the FFMIA. Subsequently, the FFMSRs were incorporated into the Federal Financial Management (FFM) Federal Integrated Business Framework (FIBF) Business Capabilities and their use was expanded beyond compliance with FFMIA.

3.4.2. The FFM FIBF Business Capabilities are a component of the Financial Management Capability Framework, which provides a common set of standards and capabilities that are the foundation for all offerings in the Financial Management Quality Service Management Office Marketplace. The FFMSRs are maintained by the U.S. Department of the Treasury in the TFM, Volume 1, Part 6, Chapter 9500. The GAO FAM provides procedural guidance for testing compliance with FFMSRs.

3.5 Information System Controls

3.5.1. GC are policies, procedures, and controls that apply to all or large segments of an entity's information systems and to individual systems and applications. General control categories include security management, access control, segregation of duties, configuration management, and contingency planning. The Financial Management Overlay leverages the audit methodology and criteria found in the GAO FISCAM and NIST SP 800-53 respectively to provide

* January 2025

the NIST-to-FISCAM control mapping used during controls selection and hybrid assessment procedures that help to ensure that controls are tested to the same rigor as is used by auditors.

3.5.1.1. Security Management provides the foundation of a security-control structure and reflects senior management's commitment to addressing security and privacy risks and provides a framework and continuous cycle of activity for managing risk, developing and implementing effective security policies, assigning and communicating responsibilities, and monitoring the adequacy of the entity's IS controls over the infrastructure, data processing environment and applications.

3.5.1.2. Access Control limits access or detects inappropriate logical access to information resources (e.g., data, systems, files, and other resources), thereby protecting these resources against unauthorized modification, loss, and disclosure, and restricting physical access to information resources and facilities.

3.5.1.3. Segregation of Duties relates to the policies, procedures, and organizational structure for managing who can control key aspects of computer-related operations and thereby prevent unauthorized actions or unauthorized access to assets or records.

3.5.1.4. Configuration Management relates to identifying and managing security features for information technology (e.g., hardware, software, firmware, equipment, media, and services) at a given point and systematically controlling changes to that configuration during the system's life cycle.

3.5.1.5. Contingency Planning provides for the continuation of critical or essential mission and business functions in the event of a system disruption, compromise, or failure and the restoration of the information system following a system disruption.

3.5.2. Business Process Controls include the structure, policies, and procedures for the input, processing, storage, retrieval, and output of data that operate over individual transactions; activities across business processes; and events between business process applications, their components, and other systems. They relate to the completeness, accuracy, validity, and confidentiality of transactions and data during application processing. The Financial Management Overlay leverages the audit methodology and criteria found in the GAO FISCAM and NIST SP 800-53 respectively to provide the NIST-to-FISCAM control mapping used during controls selection and hybrid assessment procedures that help to ensure that controls are tested to the same rigor as is used by auditors. Specific control areas of business process controls are:

3.5.2.1. Input: relates to controls over data that is entered into the application (e.g., data validation and edit checks).

3.5.2.2. Processing: relates to controls over data integrity within the application (e.g., review of transaction processing logs).

* January 2025

3.5.2.3. Output: relates to controls over data output and distribution (e.g., output reconciliation and review).

3.5.2.4. Master Data Setup and Maintenance relates to controls over master data, the key information that is relatively constant and shared between multiple functions or applications (e.g., vendor file).

3.6 Compliance Determination Framework

The FFMIA Compliance Determination Framework (Framework) assists in determining whether the Section 803(c) requirements of FFMIA are followed. The Framework is a risk and evidence-based assessment model that leverages existing audit tests, evaluations, and reviews that auditors, agency management, and others already perform. This work may include the external audit report and internal reports prepared by the agency in providing any assurances over the financial statements. Consistent with OMB Circular A-123, Appendix D, Attachment 1, the Department has developed an auditor perspective within the FM Systems – FFMIA Scorecard within ADVANA to identify systems associated with internal and external auditor evaluations and other findings.

*4.0 RESPONSIBILITIES

The responsibilities identified in this section are limited to those specific to FFMIA compliance and are not meant to be an exhaustive list of all the responsibilities of these entities. This includes the authorities and framework that the Department employs to monitor, analyze, validate, integrate, and control FFMIA compliance requirements.

4.1 Office of the Under Secretary of Defense (Comptroller)

4.1.1. The Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) is supported by the Deputy Comptroller for Enterprise Financial Transformation (EFT) and Deputy Chief Financial Officer (DCFO), through its subordinate organizations (the Financial Improvement and Audit Remediation (FIAR) Directorate and the Financial Management Policy and Reporting (FMPR) Directorate). OUSD(C) is responsible for providing Department-wide oversight of substantial compliance with the FFMIA requirements.

4.1.1.1. If the DoD Component's financial management systems do not substantially comply with the requirements of Section 803(c), the FFMIA requires that a remediation plan be developed, in consultation with OMB that describes the resources, remedies, and milestones for achieving substantial compliance, and/or a risk management plan to meet management assurance requirements.

4.1.1.2. OUSD(C) must annually report to OMB the progress made towards resolving identified deficiencies and such progress must be discussed in the DoD Components remediation plan, capital planning and investment control plans, risk management plan, and other

* January 2025

planning documents, when applicable. The findings or analysis of noncompliance must be included with a discussion of ongoing remediation activities. Progress towards resolving the deficiencies must not be construed as substantial compliance with FFMIA.

4.1.1.3. Remediation plans are expected to bring the Department's financial management systems into substantial compliance no later than three years after the date a noncompliance determination is made by OUSD(C) or its auditors. However, if OUSD(C), with the concurrence of OMB, determines that the Department's financial management systems cannot be brought into substantial compliance within three years, the DoD Component (in consultation with OUSD(C)) may specify a longer period. In either case, the DoD Component must designate a DoD Component official responsible for bringing the DoD Component's financial management systems into substantial compliance by the date specified in the DoD Information Technology Portfolio Repository (DITPR) and for reporting progress to EFT (acting on behalf of the Defense Business Council) on a scheduled basis.

4.1.2. The EFT governs the enterprise FFMIA oversight program. Annually, EFT will publish the oversight schedule and other FFMIA substantially compliance details, consistent with OMB Circular 123, Appendix D, and the DoD SOA Execution Handbook. for DoD Components to execute in support of FFMIA compliance. EFT utilizes the ICOR-FR & FS system inventory established by the FIAR Directorate to identify systems that are required to comply with FFMIA. EFT uses transaction-level data from ICOR-FR & FS systems ingested into ADVANA to support oversight of FFMIA compliance. EFT develops and utilizes ADVANA tools to enable governance and oversight of the DoD-owned financial management system environment. These tools and governance capabilities inform the Department's annual business system investment decisions and other management actions. EFT is responsible for reporting the progress of the DoD financial management information technology roadmap and overall FFMIA compliance progress within the SOA section of the DoD AFR.

4.1.3. The Office of the DCFO (ODCFO) is responsible for developing and implementing financial improvement audit strategies, monitoring auditors' findings, and providing internal control training to improve the quality and security of financial information. Additionally, the ODCFO develops and interprets DoD-wide accounting and finance policies, ensuring consistency with laws and regulations, and oversees financial integrity initiatives such as the Standard Financial Information Structure (SFIS) USSGL program. Ultimately, both FIAR and FMPR Directorates work to support the DoD's financial management and audit requirements, with the goal of achieving accurate and reliable financial information and unmodified audit opinions.

4.1.3.1. FIAR Directorate. The FIAR Directorate develops, publishes, and issues detailed financial improvement audit strategies, methodologies, and implementation guidance. The FIAR Directorate establishes the ICOR-FR & FS systems inventory subject to FFMIA compliance reporting, monitors auditors' findings and recommendations around FFMIA compliance, provides internal control training to reporting entities on improving the design and operating effectiveness of IT controls, publishes the results of the Department's SOA for FFMIA within the DoD AFR. As a result, the FIAR Directorate, improves the quality and security of the financial information, with an unmodified audit opinion as the desired outcome.

* January 2025

4.1.3.2. FMPR Directorate. The FMPR Directorate develops, publishes, implements, and interprets DoD-wide accounting and finance policies and ensures the DoD Financial Management Regulation (DoD 7000.14-R) is consistent with laws and other applicable guidance. The FMPR Directorate leads and oversees DoD financial integrity to include the DoD SFIS USSGL program. As a result, FMPR develops, publishes, and interprets DoD-wide financial management improvements and guidance that supports statutory requirements for the Department to audit its full set of financial statements.

4.2 DoD Chief Information Officer

4.2.1. The DoD Chief Information Officer (CIO) executes and governs information technology oversight.

4.2.2. Deputy CIO for Information Enterprise (IE) establishes information technology policy and guidance for the infrastructure components of the DoD IE to include networks, computers, and software. The IE directorate also maintains the DoD BEA and oversees DBS compliance with all applicable laws, including Federal accounting, financial management, and reporting requirements. See 10 U.S.C. § 2222 for additional guidance.

4.2.3. Deputy CIO for Cybersecurity (CS) is responsible for providing expert policy, technical, program, and Defense-wide oversight on all aspects and matters related to DoD CS. The CS Directorate oversees the risk management framework for DoD systems. See DoDI 8501.01 for additional guidance.

4.2.4. Deputy CIO for Resources and Analysis provides guidance on the information technology/cyberspace activities budget submission. See Volume 2B, Chapter 18 for additional guidance.

4.3 Director of Administration and Management

The Director of Administration and Management (DA&M) is the principal management office for the Secretary of Defense responsible for optimizing the business environment across the DoD enterprise. DA&M executes the DoD Enterprise Risk Management and Internal Controls Over Reporting - Operations programs, providing resources and assistance with evaluating and managing risk associated with systems non-compliance with applicable FFMIA requirements. The DA&M delivers program management, oversight, security services, and support functions that enable uninterrupted operations of the Department Headquarters.

4.4 DoD Components

4.4.1. DoD Components must establish and maintain financial management systems that substantially comply with FFMIA Section 803(c) requirements. DoD-owned ICOR-FR & FS relevant systems must be developed and maintained to generate reliable, timely, and consistent information necessary for the Department to comply with FFMIA requirements and enable the

* January 2025

preparation of accurate, reliable, and timely financial statements and other required financial and budget reports using information generated by the financial management systems. DoD Component management must annually test and report financial management systems for FFMIA compliance.

4.4.2. DoD Components must maintain records of systems and transactional data that substantially comply with applicable FFMIA requirements. Applicable FM systems (see definitions section) must annually assess/test compliance to maintain complete and accurate data in:

4.4.2.1. DoD Information Technology Portfolio Repository (DITPR). DoD Components must ensure their financial system portfolio is accurately reported in DITPR. DoD financial systems must review, report, and update appropriately all applicable DITPR FFMIA reporting requirements and DoD business enterprise architecture operational activity aligned to federal financial management functions (see the FM Functions – Requirements Matrix) on an annual basis in accordance with 10 U.S.C. § 2222(g). DoD Components must ensure their FM systems align to applicable financial events represented in the DoD BEA as operational activities, end-to-end processes, and capabilities; and ensure the system complies with the controls associated with the DoD BEA operational activity. DoD Component FFMIA oversight officials and system owners must ensure their FM system’s current level of compliance with each of the applicable FFMIA requirements is recorded in DITPR and consistent with their Annual SOA reporting.

4.4.2.2. FSD. DoD Components must utilize FSD to identify, capture, and report on the universe of financially relevant systems to support internal controls, financial audits, executive leadership, and Congressional reporting requirements. DoD Component FFMIA oversight officials and system owners must ensure their FM system’s current overall compliance with FFMIA is recorded in the FSD and asserted in their Annual SOA reporting.

4.4.2.3. ADVANA. DoD Components must provide budgetary and proprietary transactional data to ADVANA from FM systems and ensure their ADVANA common data models remain complete and accurate. See Chapter 10 for additional guidance.

4.4.2.4. DoD Information Technology Investment Portal (DITIP). DoD Components must report compliance with the DoD Auditability Requirements in the investment certification module of DITIP as required by 10 U.S.C. § 2222 and consistent with the DBS Annual Certification Guidance memorandum. For ICOR-FR & FS DBS, Table 4-1 provides the applicable reporting criteria.

4.4.2.5. Notice of Findings and Recommendations (NFR) Database. DoD Components must ensure complete, accurate, and timely CAPs are established and recorded in the NFR Database. This includes IT and non-IT NFRs from stand-alone financial statement audits and SSAE No. 18 Examinations. Intelligence community DoD Components with stand-alone financial statement audits are exempted from this requirement. DoD Component officials must ensure their IT budget reflects the funding needed to complete all milestones identified in the CAP to address/close potential vulnerabilities identified by the open IT NFRs.

4.4.2.6. eMASS and FM Overlay. eMASS is a comprehensive solution used to support FISMA compliance and cybersecurity oversight and management. Features include dashboard reporting, control scorecard measurement, and the generation of a system security authorization package to support system authorization decisions. The FM Overlay helps DoD Components to efficiently and consistently meet the RMF and controls-based financial statement audit expectations for ICOR-FR & FS-relevant systems. DoD Components that use eMASS are required to apply the FM Overlay to all ICOR-FR & FS systems eMASS records. DoD Components that use other software or tools to support FISMA compliance and cybersecurity oversight and management are likewise required to implement and apply the reporting requirements of the FM Overlay to all ICOR-FR & FS relevant systems.

4.4.3. DoD Components must ensure the applicable FFMIA requirements are included in their pre-acquisition requirements documentation, and applicable FFMIA requirements are implemented with the deployment of new financial management solutions (manual or automated) as well as included in acquisition strategies for commercial off-the-shelf and software-as-a-service solutions consistent with DoDI 5000.75.

4.4.4. DoD Component must ensure the system portfolio and remediation plans are consistent with modernization priorities identified in 44 U.S.C. §3601.

4.4.5. DoD Components are required to perform an assessment to identify all Service Providers that are relevant to their internal control over financial reporting and obtain copies of the applicable SOC 1 Reports. DoD Components are also required to design, document, and implement effective controls to address the applicable Complementary User Entity Controls and when relevant, the applicable Complementary Subservice Organization Controls in the applicable SOC 1 Reports. This includes reviewing the Service Providers' and Hosting Organizations' FFMIA assessment results and addressing any deficiencies identified by the Service Providers / Hosting Organizations that may impact the DoD Component's internal controls.

4.4.6. DoD Component oversight officials must ensure all DBS, both priority/non-priority and covered/non-covered that are not substantially compliant with FFMIA are conditioned and remediated consistent with 10 U.S.C. § 2222, and/or have substantiated compensating controls for areas of non-compliance.

4.5 Service Providers

Service Providers must develop and maintain FFMIA compliance assessment and remediation plans in coordination with using DoD Components (user entities). For each financial system and mixed system managed by a Service Provider, a Memorandum of Agreement (MOA) or other suitable agreement, must be established with each using DoD Component. As part of the MOA, compliance testing must be conducted to support DoD Component (user entity) end-to-end business process testing. For systems covered by an SSAE No. 18 Examinations, Service Providers must provide DoD Components (user entities) with a Report on Controls at a Service

* January 2025

Providers Relevant to User Entity's ICOR-FR & FS also known as a Service SOC 1 Report. The SOC 1 Report documents management's description of the control environment and the design and operating effectiveness of the controls in place at the service organization and/or subservice organizations. It describes the user entities' responsibilities for certain controls, known as Complementary User Entity Controls and Complementary Subservice Organization Controls.

4.6 Hosting Organizations

Hosting Organizations, internal to DoD (e.g., DISA) and external to DoD (e.g., commercial Cloud Service Providers), provide application hosting services for systems owned by DoD. As a result, hosting organizations are responsible for most of the ITGC over the computing environment in which many financial, personnel, and logistics applications reside and often provide a SOC 1 Report. For Service Providers and DoD Components to rely on automated controls and documentation within these applications, controls must be appropriately and effectively designed and operated effectively.

4.7 Inspector General

4.7.1. The Office of the Inspector General (IG) performs FFMIA compliance evaluations as part of financial statement audits and/or oversees evaluations performed by IPA firms during financial statement audits. This includes identifying in writing the nature and extent of non-compliance when appropriate. The IG reports to Congress instances and reasons when the Department has not met the intermediate target dates established in the remediation plan required under FFMIA Section 803(c).

4.7.2. The IG oversees many of the DoD's financial statement audits performed by the IPAs. Oversight includes monitoring the IPAs' adherence to the FAM requirements, GAGAS, and OMB Bulletin 24-02.

* January 2025

*Table 4-1 DITIP DoD Auditability Requirements Compliance Reporting Criteria for DoD ICOR-FR & FS systems

Assertion Category	Assertion Criteria
Y-Assessed Compliant	The system does not have open IT NFRs, and the system is substantially compliant with applicable FFMIA requirements: -Applicable SFIS business rules, FFMSR, and/or SFFAS (accounting and feeder systems) -Chart of Accounts; Posting Logic and Trial Balance requirements (accounting systems)
P-Assessed Planned Compliant	DoD Component has reported planned compliance dates for each applicable FFMIA requirement that is not substantially compliant in DITPR and/or validate corrective action plan (CAP) with milestone dates for each open IT and system-impacting BP NFR.
N-Assessed Not Compliant	Non-reporting of levels of compliance and planned compliance dates and/or compliance levels below published substantial compliance thresholds for any of the FFMIA requirements in DITPR and/or system has open GC and BP-impacting NFRs in the NFR Database without a validate CAP.
X-Assessment Not Completed	Not applicable for enduring ICOR-FR & FS systems. All ICOR-FR & FS systems must be assessed and reported annually.
Z-Not Applicable	Not applicable for enduring ICOR-FR & FS systems

CHAPTER 4

STANDARD FINANCIAL INFORMATION STRUCTURE

1.0 GENERAL

1.1 Overview

The [*Standard Financial Information Structure*](#) (SFIS) is a comprehensive data structure that supports requirements for budgeting, financial accounting, cost/performance, interoperability, and external reporting needs across the Department of Defense (DoD) enterprise. It is a common business language that enables budgeting, performance-based management, and the generation of financial statements. SFIS standardizes financial reporting across DoD and allows revenues and expenses to be reported by programs that align with major goals, rather than basing reporting primarily on appropriation categories. It also enables decision-makers to efficiently compare programs and their associated activities and costs across DoD and provides a basis for common valuation of DoD programs, assets, and liabilities. The SFIS matrix that defines each data element is available on the SFIS resources web page.

1.2 Purpose

This chapter prescribes the requirements for SFIS and Standard Line of Accounting (SLOA)/Accounting Classification compliance for DoD business systems. SFIS and SLOA/Accounting Classification compliance provides a means for DoD business systems to meet statutory requirements and additional requirements implemented by the Office of Management and Budget (OMB), and the United States Department of the Treasury (Treasury).

1.3 Authoritative Guidance

1.3.1. Title 10, United States Code (U.S.C.), section 2222(e)(3) ([*10 U.S.C. § 2222\(e\)\(3\)*](#)), *Defense business systems: business process reengineering; enterprise architecture; management*, requires the DoD Business Enterprise Architecture (BEA) include an information infrastructure that, at a minimum, enables DoD to:

1.3.1.1. Comply with all applicable law, including Federal accounting, financial management, and reporting requirements;

1.3.1.2. Routinely produce verifiable, timely, accurate, and reliable business and financial information for management purposes;

1.3.1.3. Integrate budget, accounting, and program information and systems; and

1.3.1.4. Identify whether each existing business system is a part of the business system environment outlined by the Defense BEA, will become a part of that environment with appropriate modification, or is not a part of that environment.

1.3.2. 10 U.S.C. § 2222(e)(3)(A) requires establishment of policies, procedures, business data standards, business performance measures, and business system interface requirements that are applied uniformly throughout DoD.

1.3.3. [31 U.S.C. § 902\(a\)\(3\)](#), *Authority and functions of agency Chief Financial Officer*, requires agencies to develop and maintain an integrated agency accounting and financial management system, including financial reporting and internal controls that:

1.3.3.1. Complies with applicable accounting principles standards and requirements, and internal control standards;

1.3.3.2. Complies with such policies and requirements as may be prescribed by the Director of OMB;

1.3.3.3. Complies with any other requirements applicable to such systems; and

1.3.3.4. Provides for:

1.3.3.4.1. Complete, reliable, consistent, and timely information which is prepared on a uniform basis and which is responsive to the financial information needs of agency management;

1.3.3.4.2. The development and reporting of cost information;

1.3.3.4.3. The integration of accounting and budgeting information; and

1.3.3.4.4. The systematic measurement of performance.

1.3.4. The [Federal Financial Management Improvement Act of 1996](#) (FFMIA) requires agencies to incorporate accounting standards and reporting objectives established for the Federal Government into financial management systems so that all the assets and liabilities, revenues, expenditures or expenses, and the full costs of programs and activities of the Federal Government **are** consistently and accurately recorded, monitored, and uniformly reported throughout the Federal Government.

1.3.5. The [Government Performance and Results Act of 1993](#) (GPRA), as amended by the [GPRA Modernization Act of 2010](#), requires annual performance reporting that links performance planned to performance achieved.

1.3.6. The [OMB Circular A-123, Appendix D](#), provides FFMIA compliance guidance including the requirement for agencies' financial management systems to reflect an agency-wide financial information classification structure that is consistent with the United States Standard General Ledger (USSGL). Application of the USSGL at the transaction level means that each time an approved transaction is recorded in a financial management system, it must generate the appropriate general ledger accounts for posting the transaction according to the rules defined in the USSGL guidance. OMB Circular 123, Appendix D was incorporated into Chapter 3.

1.3.7. The OMB, [Office of Federal Financial Management](#) requires, within each department or agency, standard accounting classification elements and definitions to ensure uniform and efficient accounting treatment, classification, and reporting.

1.3.8. The Treasury Bureau of the Fiscal Service publishes the USSGL which is updated annually in the [Treasury Financial Manual](#) (TFM). The TFM Volume 1, Supplements includes the latest USSGL Bulletin and seven major sections that comprise the Treasury USSGL guidance: (I) Chart of Accounts, (II) Accounts and Definitions, (III) Account Transactions, (IV) Account Attributes for USSGL Proprietary Account and Budgetary Account Reporting, (V) Crosswalks to Standard External Reports for Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) Reporting, (VI) Crosswalks to Reclassified Statements for Reporting, and (VII) GTAS Validations and Edits for Reporting. The USSGL standardizes federal agency accounting and supports the preparation of standard external reports required by the OMB and Treasury.

2.0 DEFINITIONS

2.1 Business Enterprise Architecture

The BEA is the enterprise architecture for the DoD business mission area that guides and constrains implementation of interoperable Defense business system solutions as required by 10 U.S.C. § 2222. The BEA defines the DoD business transformation priorities, the business capabilities required to support those priorities, and the combinations of enterprise systems and initiatives that enable those capabilities. It is used to determine compliance for systems reviewed by the Defense Business Council (DBC) and includes the SFIS requirements. The BEA structure/framework was developed using a set of integrated DoD Architecture Framework products to include the All View, Operational View, Systems and Services View, and Technical Standards View. It includes activities, processes, data, information exchanges, business rules, system functions, system data exchanges, terms, and linkages to laws, regulations, and policies.

2.2 Financial Management System Types

This paragraph defines DoD financial management system types in the current environment for purposes of SFIS and SLOA/Accounting Classification compliance. See the Glossary for a complete definition of a financial management system and Chapter 3 for definitions of a financial system and a mixed system.

2.2.1. [Target Accounting System](#). A target accounting system is configured to post transactions to an internal USSGL compliant subsidiary or general ledger and does not have a system retirement plan and date.

2.2.2. [Target Financial Business Feeder System](#). A target financial business feeder system creates or processes transactions with financial impacts and exchanges accounting data with another business feeder system(s) and/or accounting system(s). [This type of](#) system does not qualify as a target accounting system and does not have a retirement plan and date.

2.2.3. Legacy Accounting System. Same definition as paragraph 2.2.1 except it has a retirement plan and date.

2.2.4. Legacy Financial Business Feeder System. Same definition as paragraph 2.2.2 except it has a retirement plan and date.

2.3 Investment Review Process

DoD implemented a business systems investment review process through the DBC. The DBC is the principal subsidiary governance body to the Deputy's Management Action Group (DMAG) for defense business operations. The DBC also assumes the role of the Department's Investment Review Board (IRB) for Defense Business Systems investments. A primary goal of the IRB process is to facilitate development and implementation of integrated business systems across DoD business functions and capabilities; thereby providing a framework for effective investment decision-making and enabling the Department's senior leadership to guide investments to maximize the impact to the warfighter. SFIS/SLOA is a critical part of this process.

2.4 SFIS Business Rules

The SFIS business rules specify how SFIS data elements must be implemented and are the primary mechanism that drives SFIS compliance. The SFIS business rules dictate compliance requirements such as syntax, storage, derivation and usage.

2.5 SFIS Compliance Checklist

The SFIS Compliance Checklist is based on the SFIS business rules. DoD Components use the Checklist to document financial system compliance with the SFIS business rules. The Checklist provides the Office of the Secretary of Defense leadership, DoD Component program managers, and other financial and operations managers with a means for determining whether their accounting and financial business feeder systems comply with SFIS requirements.

2.6 SFIS Values Library Service

The SFIS Values Library Service houses allowable SFIS values for specific SFIS data elements. Systems must be compliant with the value lists as outlined in the data elements authoritative source. The SFIS Values Library Service is located on the OUSD(C)/Chief Financial Officer SFIS webpage.

2.7 Standard Data

Standard data relates to information that is transmitted, processed, maintained, and/or accessed in a standard format. It is a structured communication medium that is exchanged within and between entities and other groups for business transactions. The standards describe structures that emulate documents; e.g., purchase orders to automate purchasing. The standard data is also used to refer to the implementation and operation of systems and processes for creating,

transmitting, and receiving information. It simplifies the aggregation of data, limiting crosswalks and mapping procedures.

2.8 SLOA/Accounting Classification

The DoD SLOA/Accounting Classification is a subset of the SFIS data standard elements. The SLOA/Accounting Classification is comprised of the minimum SFIS data elements that must be exchanged for business events that have an accounting impact at any point from the initial commitment to the final posting in the appropriate general ledger. This includes commitments, obligations, expenditures, and disbursements. The SLOA accommodates Treasury reporting requirements for daily cash reporting.

3.0 COMPLIANCE REQUIREMENTS

3.1 SFIS

3.1.1. SFIS compliance is required for all target accounting systems and target financial business feeder systems that comprise the target environment, as identified in the Component's Functional Strategy and Organization Execution Plan that support financial transactions. SFIS is also considered for legacy accounting systems and legacy financial business feeder systems on a case-by-case basis. SFIS provides an enterprise-wide standard for categorizing financial information along several dimensions to support financial management and financial reporting functions; enable decision-makers to efficiently compare similar programs and activities across DoD; and provide a level of detail required for information retrieval and auditability. SFIS is aligned to federal-wide standards, at summary levels, for federal-level financial statements.

3.1.2. Systems must meet all applicable SFIS Business Rules. SFIS data element transactions are required to be posted to the financial accounting system using the required USSGL accounts and accounting standards. DoD Component program managers are required to use the SFIS checklist to determine SFIS compliance and to guide implementation and configuration efforts.

3.2 SLOA/Accounting Classification

3.2.1. The DoD SLOA/Accounting Classification is a subset of SFIS data elements that is used to ensure accurate accounting transactions and interoperability between systems. The SLOA/Accounting Classification requirement is applicable for all systems that process business events with accounting impacts between the time of commitment through disbursement. This includes, but is not limited to, accounting, contract writing, logistics, civilian pay, military pay, travel, medical, and transportation. Target systems must send, receive, capture, store, and maintain the SLOA/Accounting Classification data constructed as discrete data. Further, systems must meet all applicable SFIS Business Rules.

3.2.2. For legacy accounting systems and legacy financial business feeder systems that have a retirement plan and date, the implementation of SFIS and SLOA/Accounting Classification is considered on a case-by-case basis depending upon its impact on audit readiness.

3.3 Interoperability of Data between Systems

Systems that support the financial management purchasing process such as contracts, intergovernmental orders, and payroll for audit readiness purposes must be interoperable with SLOA/Accounting Classification data elements. Supporting transactions are required to be posted to the target accounting system using proper USSGL accounts and accounting standards. A transaction broker and translation service may be used for legacy systems with a retirement plan and date to translate non-SFIS data elements to SFIS data elements.

3.4 Defense Departmental Reporting System SFIS Trial Balance

Target accounting systems must interface with the Defense Departmental Reporting System using an SFIS Compliant Trial Balance. The SFIS Compliant Trial Balance must meet all necessary USSGL and DoD financial reporting requirements.

4.0 ROLES AND RESPONSIBILITIES

4.1 Office of the Under Secretary of Defense (Comptroller)

The Office of the Under Secretary of Defense (Comptroller) (OUSD(C)):

4.1.1. Serves in a leadership role and establishes policy for the development of DoD enterprise business and financial systems to include SFIS implementation across DoD.

4.1.2. Is responsible for providing stewardship for SFIS financial data elements, and serves as a primary representative on the DMAG and DBC (reference paragraph 2.3).

4.1.3. Provides business and financial system insight on all issues presented at committee/board meetings and serves as the primary office of responsibility for actions stemming from the DMAG and the IRB.

4.1.4. Is responsible for publishing and maintaining the SFIS resources repository.

4.1.5. Works with DoD Components and Enterprise Resource Planning (ERP) integration teams to properly implement SFIS.

4.2 Office of the Chief Information Officer

The Office of the Chief Information Officer leads the extraction and analysis of data to support business reform as well as lead the operation of a DoD-wide data governance body to oversee the preparation, extraction, and provision of common, transparent enterprise data throughout the business enterprise, including coordination on all data standards, to include SFIS, cost management, and overall data management.

4.3 DoD Components

DoD Components are responsible for:

4.3.1. Implementing SFIS for all applicable systems and ensuring interoperability between systems that have a financial impact. This includes asserting compliance with SFIS by using the Compliance Checklist for SFIS and maintaining their systems consistent with SFIS requirements.

4.3.2. Ensuring that all financial management systems (as defined in the Glossary) provide complete, reliable, consistent and timely budgetary and proprietary transaction-level information in accordance with SFIS; and are recorded in general ledgers of the accounting systems of record to produce auditable budgetary, proprietary, and managerial cost accounting reports for use by external and internal stakeholders.

4.4 Defense Finance and Accounting Service

The Defense Finance and Accounting Service is responsible for maintaining the SFIS values library and ensuring all service provider applications and enterprise systems are compliant with SFIS.

5.0 SFIS RESOURCES

The SFIS web page contains several resources that define the SFIS requirements and provides tools to assist with compliance including the following:

5.0.1. SFIS Matrix (SFIS data elements, definitions, examples, business rules, syntaxes, primary stewards, authoritative sources, required reports, and Extensible Markup Language Schemas).

5.0.2. SFIS Compliance Checklist.

5.0.3. SFIS/Standard Line of Account/Accounting Classification.

5.0.4. SFIS Values Library Service.

5.0.5. SFIS Enterprise Resource Planning Standard Configurations.

5.0.6. [DoD Accounting Scenarios](#).

5.0.7. DoD USSGL Transaction Library.

5.0.8. DoD Standard Chart of Accounts Implementation Guidance.

5.0.9. DoD Chart of Accounts Tie-Points Standard.

5.0.10. Defense Departmental Reporting System Chart of Account Guidance and Account Attribute Alignment Guidance

5.0.11. Archived DoD Chart of Account Guidance.

5.0.12. Authoritative Guidance Pertaining to SFIS (External Links).

Table 4-1. SFIS Compliance Summary

Financial Management System Type	SFIS Compliance Requirement
Target Accounting System	SFIS DoD SLOA/Accounting Classification DoD USSGL Transaction Library DoD Standard Chart of Accounts
Target Financial Business Feeder System (processes business events with accounting impacts between the time of commitment through disbursement)	SFIS DoD SLOA/Accounting Classification
Legacy Accounting System	SFIS and DoD SLOA/Accounting Classification are considered on a case-by-case basis
Legacy Financial Business Feeder System (creates or processes transactions with financial impacts and exchanges accounting data with other business feeder systems or accounting systems)	SFIS and DoD SLOA/Accounting Classification are considered on a case-by-case basis

CHAPTER 6

**UNDER SECRETARY OF DEFENSE (COMPTROLLER) FINANCIAL
MANAGEMENT AWARDS PROGRAM**

1.0 GENERAL

1.1 Overview

The Under Secretary of Defense (Comptroller) (USD(C)) Financial Management Awards Program is a respected program that recognizes and acknowledges the significant contributions of both civilian and military members of the financial management (FM) community. This chapter outlines award categories and descriptions, award criteria, and individual responsibilities associated with the program.

1.2 Purpose

The purpose of the USD(C) Financial Management Awards Program is to recognize significant contributions of individuals or teams to financial management improvement.

1.3 Authoritative Guidance

1.3.1. The Government Employees Incentive Awards Act at Title 5, United States Code, section 4503 [5 U.S.C. § 4503](#) authorizes agency heads to award an honorary recognition to an employee who contributes to the efficiency, economy, or other improvement of government operations or achieves a significant reduction in paperwork or performs a special act or service in the public interest in connection with or related to his official employment. [10 U.S.C. § 1125](#) authorizes the Secretary of Defense to award medals, trophies, badges, and similar devices to members, units, or agencies of an armed force under his jurisdiction for excellence in accomplishments.

1.3.2. [10 U.S.C. § 240b](#) (Statutory Notes and Related Subsidiaries) provides that “the Under Secretary of Defense (Comptroller), acting through the Deputy Chief Financial Officer of the Department of Defense, will develop and issue guidance to provide incentives for the achievement by each department, agency, and other Component of the Department of Defense of unqualified audit opinions on their financial statements”.

2.0 POLICY

2.1 Military and Civilian Members

Military and civilian members who make outstanding contributions to the improvement of [Department of Defense \(DoD\)](#) FM may be recognized.

2.2. Awards

Recognition for their significant contribution(s) during the preceding calendar year, in the form of a memento such as an engraved plaque, will be presented to, and retained by, the individual and team within each award category. Awards are conferred in the following categories:

2.2.1. Contributions to Workforce Development:

2.2.1.1. Individual at Headquarters and Major Command Level

2.2.1.2. Individual below Headquarters and Major Command Level

2.2.1.3. Team at Headquarters and Major Command Level

2.2.1.4. Team below Headquarters and Major Command Level

2.2.2. Contributions to Taxpayer Dollar Optimization:

2.2.2.1. Individual at Headquarters and Major Command Level

2.2.2.2. Individual below Headquarters and Major Command Level

2.2.2.3. Team at Headquarters and Major Command Level

2.2.2.4. Team below Headquarters and Major Command Level

2.2.3. Contributions to Financial Integrity and Audit Results:

2.2.3.1. Individual at Headquarters and Major Command Level

2.2.3.2. Individual below Headquarters and Major Command Level

2.2.3.3. Team at Headquarters and Major Command Level

2.2.3.4. Team below Headquarters and Major Command Level

2.2.4. Contributions to End-to-End Business Environment Optimization:

2.2.4.1. Individual at Headquarters and Major Command Level

2.2.4.2. Individual below Headquarters and Major Command Level

2.2.4.3. Team at Headquarters and Major Command Level

2.2.4.4. Team below Headquarters and Major Command Level

2.2.5. Contributions to Data-Driven Decision-Making:

2.2.5.1. Individual at Headquarters and Major Command Level

2.2.5.2. Individual below Headquarters and Major Command Level

2.2.5.3. Team at Headquarters and Major Command Level

2.2.5.4. Team below Headquarters and Major Command Level

2.2.6. Contributions to Financial Management in a Contingency Operation:

2.2.6.1. Individual at any level

2.2.6.2. Team at any level

2.3. USD(C) Salute to Excellence in Government Service

2.3.1. These awards specifically allow the USD(C) to recognize **exceptional contributions made** throughout the past calendar year in Savings and Innovation. The Board members will recommend to USD(C) for selection winners of these awards from among the nominations submitted in the categories in subparagraphs 2.2.1 through 2.2.6.

2.3.2. USD(C) Salute to Excellence in Government Service – Exceptional Savings. This category recognizes actions **which** resulted in a significant savings to the taxpayer.

2.3.3. USD(C) Salute to Excellence in Government Service – Exceptional Innovation. This category recognizes actions **which** resulted in significant innovations in Financial Management.

2.4. Program Applicability

The Program applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Combatant Commands, the Office of the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities, and all other organizational entities within the DoD (hereafter referred to collectively as “the DoD Components”). The individual or team’s accomplishment must have occurred within the preceding calendar year.

2.5. Nomination Categories

Any military member or DoD civilian employee (to include Reserve Components) is eligible for nomination. General/Flag Officers, Senior Executive Service, and contractors cannot be nominated for individual awards, but can be named and recognized as members of team awards.

3.0 AWARD LEVELS, TYPES, AND CATEGORIES

3.1. Award Levels

The two award levels in the USD(C) Financial Management Awards Program are:

3.1.1. Headquarters level and Major Command level.

3.1.1.1. Headquarters level is defined as the headquarters of a Military Service Department, Defense Agency, or Field Activity.

3.1.1.2. Major Command Level is defined as the highest level of command below headquarters level within the Military Department. For the Defense Agencies and Field Activities, Major Command level is based on the organization's structure, not the nature of the work covered by the award. Major Command level refers to the next level of subordinate organizations to the Headquarters location. Table 6-1 provides examples.

3.1.2. Below Major Command level includes any organization not meeting the requirements to be considered Headquarters and Major Command level. For Defense Agencies and Field Activities, this includes regional offices or other organizations subordinate to the Headquarters or Major Command level. Table 6-1 provides examples.

Table 6-1. Award Level Matrix

Organizational Level Performing the Work	Award Level
Headquarters	Headquarters and Major Command
Military Department Major Command	Headquarters and Major Command
Combatant Command Headquarters	Headquarters and Major Command
Brigade/Afloat Command/Group	Below Major Command
Regional Office	Below Major Command
Examples	
DFAS Headquarters	Headquarters and Major Command
DFAS Major Center (Cleveland, Columbus, Indianapolis)	Headquarters and Major Command
DFAS Other (Rome, Limestone, Japan, Europe, Non-Appropriated Funds, to include Support Offices)	Below Major Command
DCAA (HQ, Regional and Corporate Offices)	Headquarters and Major Command
DCAA (Field Offices and Sub Offices)	Below Major Command
DLA (Headquarters)	Headquarters and Major Command
DLA (Major Subordinate Command and Below)	Below Major Command

3.2. Award Types

The two award types in the USD(C) Financial Management Awards Program are:

3.2.1. Individual awards [may be rewarded](#) at the Headquarters and Major Command level and Below Major Command level.

3.2.2. Team awards [may be rewarded](#) to teams at the Headquarters and Major Command level and the Below Major Command level. Teams are made up of 2 to 20 individuals brought together to perform a specific task within a specific time frame. Teams of greater than 20 individuals are not eligible for these awards. The team lead must be one of the 20 members of the team. Contractors cannot comprise more than 20 percent of the team. Contractors cannot use these awards as support for performance clauses in contracts.

3.3. Award Categories

The award categories in the USD(C) Financial Management Awards Program are:

3.3.1. Contributions to Workforce Development. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions to building and maintaining a premier FM workforce; optimizing and evolving FM training solutions; or fostering an FM community of practice. Improvements may be in areas such as workforce development, innovative practices in recruiting and retention, and training and information sharing. Examples of appropriate efforts include:

3.3.1.1. Establishing an innovative training program to improve workforce proficiency in a key area of critical competencies.

3.3.1.2. Establishing a program to improve recruiting, employee engagement, satisfaction, and retention.

3.3.1.3. Establishing forums to implement best practices and accomplishments.

3.3.1.4. Instituting a mentorship or partnership program to help guide the future development of workforce members.

3.3.2. Contributions to Taxpayer Dollar Optimization. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions to optimizing support to the budget and execution process; innovating cost, performance, and risk management; or fostering a high integrity funds control environment. Improvements may be in areas such as budget formulation, budget execution, cost management, or accountable financial stewardship. Examples of appropriate efforts include:

3.3.2.1. Refining the budget to execution process to optimize mission capability with agility.

3.3.2.2. Creating efficiencies through new guidance and/or reducing outdated regulations, processes, and policies.

3.3.2.3. Delivering innovative financial cost, performance, and enterprise risk management insights to improve resource budgeting and forecasting activity.

3.3.2.4. Improving fiscal control over assets, dissemination of funds, budget execution tracking, and funds realignment through innovative solutions.

3.3.3. Contributions to Financial Integrity and Audit Results. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions toward remediating material weaknesses aligned with the Department's audit priorities to accelerate its path to an unmodified audit opinion. Improvements may be in areas such as increasing the number of favorable (unmodified or qualified) financial statement or Statement on Standards for Attestation Engagements No. 18 audit opinions, implementing end-to-end business process reengineering efforts leading to improved auditability for a priority area, innovating processes and improving controls to reduce undistributed disbursements and or collections in a timely manner, and developing innovations to achieve unmodified audit opinions. When considering this category, reference 10 U.S.C. § 240b "Incentives for the Achievement by the Components of the Department of Defense of Unqualified Audit Opinions on the Financial Statements." Examples of appropriate efforts include:

3.3.3.1. Developing innovations to support achieving unmodified audit opinions.

3.3.3.2. Closing a notice of finding and recommendation related to a priority area.

3.3.3.3. Closing or downgrading a material weakness related to a priority area.

3.3.3.4. Implementing effective improvements to controls over financial reporting for a priority area.

3.3.4. Contributions to End-to-End Business Environment Optimization. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions to automating FM operations and the identification of business processes that will form tomorrow's environment. Improvements may be in areas such as system security, leveraging innovative digital and automation solutions, or simplifying FM regulation and policy. Examples of appropriate efforts include:

3.3.4.1. Retiring legacy systems and accelerating optimization of modern enterprise solutions.

3.3.4.2. Increasing automation of repeatable processes and interfaces between enduring systems.

3.3.4.3. Simplifying regulations or policies that address barriers to fully enable standardization.

3.3.5. Contributions to Data-Driven Decision-Making. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions to innovating and empowering data-driven, fiscally informed decision-making; driving universal use of secure, single-source reporting; or instilling confidence in FM data for decision-making. Improvements may be in areas such as improving financial data management standards, increasing data analytics capabilities, and enhancing the usage of real-time data to support decision-making through innovative practices. Examples of appropriate efforts include:

3.3.5.1. Improving the quality of data and universal data management and modeling standards.

3.3.5.2. Developing innovative methods to increase access to real-time data.

3.3.5.3. Supporting a Universe of Transaction balance as a percentage of financial statement balances.

3.3.6. Contributions to Financial Management in a Contingency Operation. This category recognizes one individual and one team, at any level, who have made significant contributions to modernize and improve financial management while in support of a contingency operation. Improvements can be in auditing, accounting, budget, cost analysis, workforce development, and other Financial Management fields. Examples of appropriate efforts include:

3.3.6.1. Implementing controls that improve auditability of funds managed in the contingency operation.

3.3.6.2. Changing and/or reengineering a process or steps of a process to make the process better, faster, and/or less expensive by using technology as an enabler in a contingency operation.

3.3.6.3. Identifying, proposing, and implementing an improvement to a problem, project, or effort using analysis to better utilize resources and improve mission effectiveness in a contingency operation.

3.3.7. USD(C) Salute to Excellence in Government Service. These awards specifically allow the USD(C) to recognize **exceptional contributions** throughout the past calendar year have made exceptional contributions in Savings and Innovation. The Board members will recommend to USD(C) for selection winners of these awards from among the nominations submitted in the categories in paragraph 2.3.

3.3.7.1. USD(C) Salute to Excellence in Government Service - Exceptional Savings. This category recognizes actions **which** resulted in a significant savings to the taxpayer.

3.3.7.2. USD(C) Salute to Excellence in Government Service - Exceptional Innovation. This category recognizes actions **which** resulted in significant innovations in Financial Management.

4.0 RESPONSIBILITIES

4.1 The USD(C)

4.1.1. Will select awards recipients for each category, type, and level.

4.1.2. May select one or more recipients for the USD(C) Salute to Savings Award from among the pool of nominations submitted in the other six categories.

4.1.3. Will present awards to each recipient.

4.1.4. Will release an annual memorandum announcing any changes to this regulation, call for the submission of nominations for this awards program, and delineate the nomination and review timeline.

4.2 The OUSD(C) Human Capital Resource Management Director (HCRM)

4.2.1. Will annually convene a Financial Management Awards Program Board to review nominations from the DoD Components.

4.2.2. Will make award recommendations to the USD(C).

4.2.3. Will appoint a representative from among the Defense Agencies and DoD Field Activities (other than the Defense Finance and Accounting Service (DFAS)) to the FM Awards Program Board.

4.2.4. Will ensure OUSD(C) Financial Improvement and Audit Remediation Director (FIAR) is represented on the FM Awards Program Board.

4.3 Heads of the Military Departments and DFAS

Will each select a representative to the Financial Management Awards Program Board and notify the Director, HCRM in accordance with the annual USD(C) memorandum, of the representative selected from their Component.

*4.4 DoD Component Heads

4.4.1. Will encourage the nomination of individuals and teams for the Financial Management Awards in accordance with the procedures and criteria in section 5.0.

4.4.2. Will appoint a Final Reviewer by email for all nominations submitted by members of their Component in accordance with the annual call memorandum.

4.4.3. Responsibility for individual award nominations is vested with the DoD Component owning the position of the person being nominated.

4.4.4. Responsibility for team award nominations is vested with the DoD Component owning the position of the team lead.

4.5 The Financial Management Awards Program Board

4.5.1. Is chaired by the OUSD(C) HCRM Director, or designee.

4.5.2. Is comprised of one voting representative from each of the Military Departments, DFAS, one from the Defense-wide community, which encompasses all other Defense Agencies and DoD Field Activities, and the OUSD(C) FIAR Director. Members will not delegate attendance of the Board Member meeting. Members will not serve more than two consecutive years with exception of the OUSD(C) FIAR Director.

4.5.3. Is comprised of members of the Senior Executive Service, general/flag officers, and/or E-9s.

4.5.4. Members must not be the Nominating Officials for any of the award nominations submitted.

4.5.5. Is convened annually to evaluate nominations and make recommendations for winners in each award category based on the criteria in paragraph 5.1.

4.6 Final Reviewers

4.6.1. Are responsible for vetting the nominations prior to submission to the Board. Nominations must be examined for duplications, incomplete submissions, and noncompliance with instructions.

4.6.2. May not be a Nominating Official.

4.6.3. Are responsible for approving or denying each nomination submitted for their Component before all nominations are due to OUSD(C). Only approved nominations will go before the Board.

4.7 The Nominating Official

4.7.1. Will review each one of their nominations ensuring nominee names and contact information are correct and accurate.

4.7.2. Will certify, by electronic signature, that each submission complies with the nomination submission instructions outlined on [FM Online](#).

4.8 The Supervisor

4.8.1. Will consider members of their workforce whose achievements merit recognition in the USD(C) FM Awards Program.

4.8.2. Will serve as the Nominating Official for appropriate nominations.

4.9 The Submitter

4.9.1. Will input all data into the nomination template for the appropriate nomination in accordance with the procedures and criteria in this chapter and on FM Online as directed by the Nominating Official.

4.9.2. May be the same person as the Nominating Official.

5.0 AWARD CRITERIA AND NOMINATION INFORMATION

The award criteria and nomination information for the DoD Financial Management Awards are as follows:

5.1 Award Criteria

5.1.1. Nominations for DoD Financial Management Awards must be based on individual or team achievements during the preceding calendar year. Board Members will evaluate nominations, assigning a numeric score, after considering the following criteria:

5.1.2. Scope and Significance, examples include:

5.1.1.1. DoD Enterprise / Warfighter / Mission Impact

5.1.1.2. Fiscal Stewardship (cost/manpower savings, cost avoidance)

5.1.1.3. Results were Actionable and Repeatable

5.1.1.4. FM Workforce Development and or Strategic Partnering Improvement

5.1.1.5. Focused on Outcomes – maximizing dollars spent and funding priorities

5.1.1.6. Embraced innovation by streamlining automation solutions

5.2 Nomination Information

For specifics on procedures for submitting nominations refer to [FM Online](#). Information included in the nominations is used for formal recognition.

5.2.1. Nominations [should](#) be written to a broad and diverse audience.

5.2.2. Nominations [should](#) be written in a concise manner that clearly describes the impact. Limit use of acronyms or superlative wording.

5.2.3. DoD Components **may** not submit more than one nomination for the same achievements. For example:

5.2.3.1. A DoD Component may not submit a team nomination and an individual nomination for the same achievements.

5.2.3.2. A DoD Component may not submit a nomination, either team or individual, with the same achievements, for different award categories, types, or levels.

5.2.4. For Team awards, DoD Components may identify additional personnel from other DoD Components who participated in the actions leading to the recognized achievements. The addition of other DoD Components to an award does not affect the nomination restrictions set in paragraph 5.3.

5.3 Submission of Nominations

5.3.1. Heads of DoD Components must submit nominations to the OUSD(C) HCRM Director via the OUSD(C) awards nomination site.

5.3.2. OUSD(C) HCRM must receive nominations by the date designated in the memorandum sent to the Components.

5.3.3. Final Reviewers must review nominations by the date designated in the memorandum sent to the Components. OUSD(C) HCRM will not accept nomination edits after the end of the review period.

5.3.4. Heads of DoD Components are restricted in the number of nominations they can submit for consideration in each Category, Type, and Level:

5.3.4.1. DoD Components with an FM workforce of at least 1,000 personnel can submit up to two nominations per Category, Type, and Level; allowing a maximum of 44 nominations.

5.3.4.2. DoD Components with an FM workforce of fewer than 1,000 personnel can submit up to one nomination per Category, Type, and Level; allowing a maximum of 22 nominations.

5.3.4.3. Combatant Command Support Agents may submit one nomination per Category, Type, and Level for personnel serving in the Headquarters of a Unified Combatant Command. These nominations will compete as Combatant Command nominations.

5.3.5. Components may not submit nominations for the USD(C) Salute to Savings award category. The USD(C) will select winners for this category from among the pool of nominations submitted in the other six award categories.

5.4 Nomination Responsibilities

Responsibility for individual and team award nominations is vested with the DoD Component owning the position of the person being nominated.

5.5 Individual and Team Awards

Each individual award recipient will receive a memento such as an engraved plaque. Each team will receive a single memento such as an engraved plaque, while team members will each receive a memento such as a certificate.

CHAPTER 7

DEPARTMENT OF DEFENSE STANDARD CHART OF ACCOUNTS

1.0 GENERAL

1.1 Purpose

This chapter prescribes the Department of Defense (DoD) Standard Chart of Accounts (SCOA) requirements that are based on United States Standard General Ledger ([USSGL](#)) general requirements. The SCOA prescribes the mandatory general ledger accounts for all DoD accounting systems and all budgetary and proprietary transactions.

1.2 Authoritative Guidance

1.2.1. The Federal Financial Management Improvement Act of 1996 ([FFMIA](#)) requires agencies to implement and maintain financial management systems that comply with the USSGL at the transaction-level. See Chapter 3 for FFMIA compliance information.

1.2.2. The United States Department of the Treasury (Treasury) Financial Manual ([TFM](#)) prescribes the USSGL requirements. The USSGL is a TFM Supplement that prescribes the structure for budgetary and proprietary accounts at the 6-digit USSGL account level. Because central agency reporting requires a lower level of detail, the USSGL Board developed attributes containing domain values that, when added to a basic 6-digit USSGL account, provide the appropriate level of detail needed for central agency reporting. Treasury issues bulletins at least annually notifying agencies of changes to the USSGL Supplements that are effective immediately and later codified in the TFM. As part of the overall Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) reporting requirements, the USSGL guidance contains seven major sections:

- I. Chart of Accounts,
- II. Accounts and Definitions,
- III. Account Transactions,
- IV. Account Attributes for USSGL Proprietary Account and Budgetary Account Reporting,
- V. Crosswalks to Standard External Reports for FY 20XX¹ GTAS Reporting,
- VI. Crosswalks to Reclassified Statements for FY 20XX Reporting, and
- VII. GTAS Validations and Edits for FY 20XX Reporting.

1.2.3. Office of Management and Budget ([OMB Circular A-123 Appendix D](#)), “Compliance with the Federal Financial Management Improvement Act,” requires that agencies record financial events in the core accounting systems, applying the requirements of the USSGL.

¹ “XX” represents the applicable fiscal year.

2.0 DEFINITIONS

2.1 Standard Financial Information Structure

2.1.1. The [Standard Financial Information Structure](#) (SFIS) is a comprehensive data structure that supports requirements for budgeting, financial accounting, cost/performance, and external reporting needs. The SCOA is a key element in the SFIS data structure. The SCOA and other SFIS products are published on the SFIS web page. [Also](#), see Chapter 4.

2.2 DoD Standard Chart of Accounts SFIS Attribute Alignment File

The SFIS Attribute Alignment File (“FY20XX DoD [SCOA](#) Account Attribute Alignment File”) identifies standard interface file format requirements for the Defense Departmental Reporting System ([DDRS](#)), [providing](#) a means to determine which SFIS data element and value combinations are necessary for consistent financial reporting. For each Standard General Ledger (SGL) account, the Attribute Alignment File identifies additional SFIS data elements required for financial reporting [and](#) which value combinations are permissible for SFIS attributes. The [file](#) and corresponding instructions are available on the SFIS web page.

2.3 Tie-Point Reconciliations

Tie-Point Reconciliations, also referred to as “Tie-Points,” are a series of standard USSGL accounting relationships, i.e., financial management equations that facilitates the validation of trial balance data. The [SCOA](#) Tie-Points are revised annually and published on the SFIS web page. Tie-Points indicate whether certain account balances within a general ledger trial balance are consistent with other account balances. Components and accounting service providers must combine budgetary and proprietary general ledgers to a self-balancing trial balance and conduct edits and Tie-Point validations prior to reporting data in the [DDRS](#). [Components](#) must [expeditiously](#) resolve [unreconciled](#) Tie-Points [in](#) support of accurate and reliable agency-wide trial balances to Treasury via GTAS for consolidation into the Governmentwide financial statements.

2.4 Financial System

[A](#) financial system [is](#) an information system or set of applications that maintains all summary and detailed financial events resulting from budgetary and proprietary activity. [The](#) system must record at the transaction-level to the appropriate general ledger accounts. See FFMIA section 803(a) and OMB Circular A-123, Appendix D.

3.0 ACCOUNT DESIGN

3.1 DoD SCOA

The SCOA is comprised of budgetary and proprietary USSGL accounts and related DoD standard account extensions required [for](#) consistent USSGL implementation, Component trial balance consolidation, [and](#) [compliance](#) with OMB and Treasury budgetary and financial reporting

requirements. The Office of the Under Secretary of Defense (Comptroller)/Chief Financial Officer (OUSD(C)/CFO) issues enterprise-wide implementation guidance to:

- 3.1.1. Reduce customization of accounting systems,
- 3.1.2. Eliminate departmental reporting system translations and account value crosswalks,
- 3.1.3. Improve comparability of data across accounting systems, and
- 3.1.4. Improve consolidation of data across accounting systems for DoD-wide reporting.

3.2 Account Structure

The basic SCOA structure consists of a 6-digit USSGL account number followed by a period and a 4-digit DoD account extension. SGL accounts with an extension of “.9000” (e.g., 101000.9000, 211000.9000) are identified as Treasury level USSGL accounts. SGL accounts with extensions other than .9000 are DoD specified accounts. The basic structure of the DoD SCOA follows that of the USSGL. The basic 6-digit structure of the USSGL consists of:

100000	Assets
200000	Liabilities
300000	Net Position
400000	Budgetary
500000	Revenue and Other Financing Sources
600000	Expenses
700000	Gains/Losses/Miscellaneous Items
800000	Memorandum

3.3 DoD USSGL Transaction Library

3.3.1. The Library establishes enterprise-wide implementation requirements and provides a framework with detailed transaction and posting rules for updating existing financial systems and deploying new accounting systems.

3.3.2. The Library is a decomposition of the accounting transactions from the TFM, Part 1, Section III USSGL Supplement, that provides both budgetary and proprietary accounting entries for events occurring throughout the federal government. The Library organizes generalized Treasury USSGL business event transactions into appropriate pairings of budgetary, proprietary, and memorandum accounts uniquely identified by DoD Transaction Codes (DTCs).

3.3.3. Components must not group multiple DTCs into one transactional posting, so that the individual transaction posts separately and supports each business event and is uniquely identified in the business process. While Component financial systems are not required to store and maintain the exact DTC reference used in the Library for each posted transaction, Component or agency financial systems must maintain a chart of accounts and utilize general ledger posting logic that produces the same business event result as the DoD USSGL Transaction Library.

3.3.4. The SCOA, USSGL Transaction Library, Account Attribute Alignment File, and Tie-Points are updated as applicable following each corresponding Treasury update to ensure DoD policy aligns with the current USSGL Supplement.

3.4 Reporting

3.4.1. All DoD accounting systems must report financial transactions to DDRS using the account structure of the SCOA. Detailed attribute alignment at the SGL account level is updated concurrently with the SCOA.

3.4.2. Components must implement the SCOA to satisfy both internal and external reporting requirements. For external reporting, all budgetary and proprietary financial reporting data are summarized in DDRS into the six-digit USSGL accounts and GTAS standard attributes.

3.4.3. Components must ensure systems provide complete, reliable, consistent, and timely budgetary and proprietary transaction-level information and are recorded in accounting systems of record general ledgers to produce auditable budgetary, proprietary, and managerial cost accounting reports for internal and external stakeholders.

4.0 ACCOUNT RELATIONSHIPS

4.1 Budgetary and Proprietary Accounts

4.1.1. The SGL account structure provides a self-balancing set of budgetary accounts to record the appropriation, apportionment, allotment, allocation, commitment, obligation, and expenditure process. The SCOA is driven by debit and credit normal balance indicators, so debits should always equal credits. The budgetary total and budgetary resources accounts should always equal the total status of budgetary resources accounts.

4.1.2. The SGL account structure provides a self-balancing set of proprietary accounts to report the results of operations and net position. Proprietary asset and liability accounts cover the collection and disbursement of funds, the proper classification of assets (e.g., Fund Balance with Treasury, receivables, advances and prepayments, inventory, and fixed assets), and the recognition and proper classification of liabilities. Revenue and expense accounts measure the realization of revenues from the sale of goods and services, and the recognition of costs, including gains and losses through the use and consumption of assets. Total asset accounts should always equal total liability accounts plus net position.

4.1.3. Accurate posting of budgetary and proprietary transactions to the SGL enables budgetary, proprietary, and managerial cost accounting essential for good stewardship, proper financial control over resources, and financial reporting.

4.2 Accounts Applicable to Fund Type

4.2.1. The SCOA identifies SGL accounts applicable to General Fund, Working Capital Fund (WCF), and Special and Trust Funds. The SCOA also identifies those USSGL accounts that are not applicable to the DoD.

4.2.2. Component accounting systems must incorporate, at a minimum, those SGL accounts and posting logic for applicable business processes and transactions. For example, general fund accounting systems must include, at a minimum, accounts designated as applicable to general funds, and not those restricted to working capital or special/trust fund systems. Similarly, WCF accounting systems must include accounts designated as applicable to WCF but not those accounts restricted to general or special/trust fund systems. Combined systems handling both general and WCF must include both general and working capital general ledger accounts, but not those accounts restricted to special/trust fund systems. Components are not required to add accounts designated as not applicable for DoD.

4.3 Account Attributes

4.3.1. The account attributes required for Treasury reporting of both budgetary and proprietary account information are defined in the TFM USSGL Supplement, Section IV, USSGL Account Attributes.

4.3.2. The data structure for each SGL account attribute is defined in the SFIS Matrix, to include syntax and allowable values. The SFIS Matrix and the SFIS Values Library are located on the SFIS web page.

4.3.3. When including specific general ledger accounts in an accounting system, all attributes assigned to the specific general ledger accounts must also be included and correctly aligned to those accounts.

4.3.4. Allowable values for each SGL account attribute are identified and defined at the SGL account level in the SCOA Attribute Alignment File published on the SFIS web page.

4.4 Request for Account Exemption

4.4.1. A Component's specific mission area may allow for an accounting system exemption to certain SGL accounts. Components must request an exemption from standard DoD account alignment based on business processes and transactions within a specific fund type.

* 4.4.2. The SCOA is re-published annually with updates. Component system owners must review existing accounts and submit any changes or revisions to the OUSD(C)/CFO within 30 days of the SCOA update.

4.5 DoD Assigned USSGL Accounts

The SCOA includes five specific accounts for recording internal fund distributions within direct program authority (see Figure 7-1). Refer to Volume 3, Chapters 13, 14, and 15 for policy on the use and application of these accounts at the Department and execution levels. Funds distribution guidance for the Military Services and Office of the Secretary of Defense Treasury Index-97 organizations is located at SFIS under the “DoD Accounting Scenarios” section.

Figure 7-1. DoD Assigned Accounts for Internal Fund Distributions

Account Number: 454000.9000
Account Title: Internal Fund Distributions Issued
Normal Balance: Credit

Definition: The amount of direct budgetary authority allotted from department, headquarters, or Office of the Secretary of Defense (OSD) level to intermediate or execution level, as determined by organizational funding structure.

Account Number: 455000.9000
Account Title: Internal Fund Distributions Received
Normal Balance: Debit

Definition: The amount of direct budgetary authority received from department, headquarters, or OSD level by an intermediate level component.

Account Number: 456000.9000
Account Title: Funds Available for Allotment
Normal Balance: Credit

Definition: The amount of direct budgetary authority available at an intermediate level component for allotment to execution level component(s) or for suballotment to other intermediate level component(s).

Account Number: 457000.9000
Account Title: Allotments Issued
Normal Balance: Credit

Definition: The amount of direct budgetary authority either allotted by an intermediate level component to an execution level component(s), or suballotted between two or more intermediate or execution level components.

Account Number: 458000.9000
Account Title: Allotments Received
Normal Balance: Debit

Definition: The amount of direct budgetary authority received by an execution level component through either allotment or suballotment of authority.

1.0 GENERAL	3
1.1 Purpose	3
1.2 Authoritative Guidance	3
2.0 RETENTION REQUIREMENTS	4
2.1 Record Retention Requirements	4
2.2 Documentation Requirements	5
FIGURE 9-1. MINIMUM RETENTION PERIODS	6

CHAPTER 9

FINANCIAL RECORDS RETENTION

1.0 GENERAL

1.1 Purpose

This chapter [identifies](#) the proper retention period for financial records. This policy applies only to the records supporting financial transactions and financial statement balances or necessary to document evidence of effective internal controls over financial reporting (e.g., reviews and approvals). This policy does not apply to related management records, such as maintenance logs, and other documents important for proper management of Department of Defense (DoD) operations but incidental to the support of financial transactions and balances, unless the [records](#) are being used as secondary evidence to support financial transactions and balances.

1.2 Authoritative Guidance

1.2.1. [The National Archives and Records Administration \(NARA\) promulgates requirements](#) for the management and disposal of all United States (U.S.) Government records.

1.2.1.1. Title 36, Code of Federal Regulations (CFR), Chapter XII, Subchapter B, Parts 1220-1239 ([36 CFR §§ 1220 – 1239](#)) provides NARA general policies.

1.2.1.2. NARA's disposal guidance for administrative records are outlined in [General Records Schedule \(GRS\) 5.7, "Administrative Management and Oversight Records."](#)

1.2.2. [Federal Acquisition Regulations \(FAR\), Part 4.805](#) provides procedures and schedules for storage, handling, and disposal of contracting office records.

1.2.3. The DoD records management policy and responsibilities are outlined in [DoD Instruction 5015.02](#), "DoD Records Management Program."

1.2.3.1. Within DoD, there are several Records Management Programs, each with an appointed [Federal Agency Records Officer](#); Records Management Manual, Instruction, or Regulation; and Records Disposition Schedules (RDS). NARA approves all records identified in DoD's RDS, which can contain additional financial records used in DoD business operations that are not listed in the NARA GRS.

1.2.3.2. The [DoD Directive 3210.06](#), "Defense Grant and Agreement Regulatory System," provides for the collection, retention, and dissemination of management and fiscal data related to grants activities.

1.2.3.3. The [DoD Guidebook for Miscellaneous Payments](#) provides guidance on supporting financial documentation for miscellaneous transactions.

2.0 RETENTION REQUIREMENTS

2.1 Record Retention Requirements

2.1.1. [Title 44 United States Code Section 3301](#) defines the term “records” to include all recorded information, regardless of form or characteristics, made or received by a Federal agency under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the U.S. Government or because of the informational value of data in them. Records do not include library and museum material made or acquired and preserved solely for reference or exhibition purposes; or duplicate copies of records preserved only for convenience.

2.1.2. NARA GRS 1.1, “[Financial Management and Reporting Records](#)”

2.1.2.1. GRS 1.1 provides disposition authority for records created and received in the course of carrying out an agency’s financial management and reporting responsibilities. Financial management includes procuring goods and services, paying bills, collecting debts, accounting for all financial transactions, and monitoring net worth.

2.1.2.1.1. GRS 1.1 covers financial records of grants and cooperative agreements. [The administrative records of grants and agreements](#) are covered in GRS 1.2.

2.1.2.1.2. GRS 1.1 covers financial transactions and reporting [records](#). [Records for financial planning \(i.e., budgeting records\)](#) are covered under GRS 1.3.

2.1.2.1.3. GRS 1.1 covers contract records maintained by Federal agencies. [Contractor-maintained contract records](#) are governed by [FAR, Part 4, Subpart 4.7](#).

2.1.2.1.4. GRS 1.1 covers financial transactions as an administrative function common to all agencies, but not administrative records documenting unique agency missions, such as student loan collection or seeking reimbursement for Superfund cleanups.

2.1.2.2. Each record noted within the GRS includes [the](#) item number, the records description, [the](#) disposition instructions [that describe](#) the point at which an item can be destroyed (unless longer retention is authorized and required for “business use”), and the disposition authority for records created and received in the course of carrying out an agency’s financial management and reporting responsibilities.

2.1.3. Figure 9-1 provides general guidelines for minimum retention periods by assessable unit in support of the DoD-wide financial statement audit. Supporting a financial statement audit is an example of “business use” where documentation must be retained for a longer period of time than required by NARA in order to preclude a scope limitation. During an audit, management must furnish a written representation as to the availability of all financial records and related data and the auditors must obtain a reasonable basis for an opinion. These guidelines must be supplemented by professional judgment that considers the specific circumstances related to each financial transaction. For records supporting financial statement audits and held for purposes other than a financial statement audit that require a longer retention period, continue to follow appropriate document retention guidance. At a minimum, Components must comply with NARA and the DoD Records Management Program requirements.

2.1.4. Consult your DoD appointed Federal Records Officer for additional guidance regarding record retention.

2.2 Documentation Requirements

Component financial transaction **records** must be prepared, retained, and, at a minimum, support the following:

2.2.1. Authority. Evidence the transaction was approved and/or certified in accordance with established requirements.

2.2.2. Amount. Evidence of transactions dollar values.

2.2.3. Date. Evidence of transaction dates to ensure transactions are recorded in the proper accounting period.

FIGURE 9-1. MINIMUM RETENTION PERIODS

Assessable Unit(s)	Type of Documentation	Minimum Retention Period
Contract Pay / Vendor Pay / Interfund / Intragovernmental	<p>Financial transaction records related to procuring goods and services, paying bills, collecting debts, and accounting.</p> <p>Retain key supporting documents (KSDs) for the following financial statement line items (FSLIs):</p> <ul style="list-style-type: none"> • Accounts Payable • Accounts Receivable • Uncollected payments, federal sources, brought forward • Unpaid obligations, brought forward • Unobligated balance, brought forward • Other liabilities • Revenue • Gross Cost 	<p>Ten years after the final invoice or Intra-Government Payment and Collection or other similar documentation.</p> <p>Note: This is an increase over the NARA six-year minimum retention standards, is applicable to contract payment offices, and includes obligation document records.</p>
Financial Reporting / Accounting	<p>Records supporting compilation of agency financial statements and related audit, and all records of all other reports.</p> <p>Retain KSDs for the following FSLIs:</p> <ul style="list-style-type: none"> • Financial Reporting • Other Adjustments 	<p>Two years after completion of financial statement audit for which the records were initially prepared.</p> <p>Note: The remaining categories are consistent with the NARA minimums. As these documents will not be required to support more than the year under, and subsequent year audit(s), no more than a two-year retention period is necessary.</p>

FIGURE 9-1. MINIMUM RETENTION PERIODS (Continued)

Assessable Unit(s)	Type of Documentation	Minimum Retention Period
Property, Plant and Equipment / Inventory / Operating Materials and Supplies	<p>Records supporting the book value, ownership, and any modifications to assets.</p> <p>Retain KSDs for the following FSLIs and/or Notes to the Financial Statements:</p> <ul style="list-style-type: none"> • General Equipment • Real Property • Internal Use Software • Inventory and Related Property • Other Assets 	Two years after asset is disposed of and/or removed from agency's financial statements.
Civilian Pay / Military Pay	<p>Records documenting payroll and benefit disbursements and liabilities.</p> <p>Retain KSDs for the following FSLIs and/or Notes to the Financial Statements:</p> <ul style="list-style-type: none"> • Other Liabilities • Gross Costs • Military Retirement and Other Federal Employment Benefits 	Two years after pay period.
Fund Balance with Treasury (FBWT)	<p>Documentation supporting the reporting and reconciliation of FBWT.</p> <p>Retain KSDs for Fund Balance with Treasury.</p>	Two years after the month of the Reconciliation or Report is prepared.

CHAPTER 10

**ADVANA – COMMON ENTERPRISE DATA REPOSITORY FOR THE
DEPARTMENT OF DEFENSE**

1.0 GENERAL

1.1 Overview

Advana (derived from the term “Advancing Analytics”) is a common enterprise data repository for the Department of Defense (DoD), required by the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2018. Advana is a centralized data and analytics platform that provides DoD users with common business data, decision support analytics, and data tools. It was developed by the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), through the Directorate for [Enterprise Financial Transformation \(EFT\)](#), and is [now](#) maintained by the [Chief Digital and Artificial Intelligence Office](#). The Advana platform and program supports the National Defense Strategy by amassing data that is accessible, understandable, and usable across the Defense enterprise, and by advancing analytic capabilities to address the complex challenges of the Department.

1.2 Purpose

This chapter establishes Advana as an official DoD repository of common enterprise data and the roles and responsibilities of OUSD(C) and DoD Components in the development, maintenance, and use of Advana within the supported business domain areas. The use of Advana will ensure that any performance measure or data product that relies on DoD data originates from an authoritative source of transaction-level detail.

1.3 Authoritative Guidance

The policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.1. Title 10, United States Code, sections 135 and 2222 as amended by the NDAA for FY 2018 (sections 911 – 913).

1.3.2. Public Law 113-101, Digital Accountability and Transparency Act of 2014.

1.3.3. Statement of Federal Financial Accounting Standards 4, “Managerial Cost Accounting Standards and Concepts.”

1.3.4. DoD National Defense Strategy, issued by the Secretary of Defense.

1.3.5. DoD Annual Performance Plan, issued by the [Director of Administration and Management](#).

1.3.6. OUSD(C), [Financial Management Strategy](#).

1.3.7. Acting Assistant Deputy Chief Financial Officer (DCFO) memorandum (December 2020), “Advancing Analytics (Advana) Financial Reconciliations for the Fourth Estate.”

2.0 ROLES AND RESPONSIBILITIES

2.1 OUSD(C) Responsibilities

The Department’s vision of “Financial Management (FM) [Analytics](#)” outlines the expectations of tomorrow’s financial management professionals, leveraging the foundation of auditable data to drive more meaningful, data-informed decisions of the future. Using Advana as an enabler and accelerator for FM [Analytics](#), OUSD(C) will:

2.1.1. Leverage data as a strategic asset, connecting it with advancing technology to continuously advance analytic capabilities across the Department. Any data contained in a Defense business system related to business operations and management is an asset of the Department, and a strategy must be developed for making the data discoverable in Advana.

2.1.2. Maintain alignment of Advana capabilities and products with the functional requirements of its customers by communicating and validating regularly with the user community as continuous development occurs, partnering with the appropriate officials to establish enterprise standards.

2.1.3. Acquire, incorporate, and standardize data to support the business domain areas that align with the organizational structure of the Department and the responsibilities of DoD Components.

2.1.4. Manage data sharing agreements with system owners to ensure data is timely and accurate. Extract data from the relevant systems to facilitate DoD-wide analysis and management of business operations, and execute controls over data management.

2.1.5. Provide reasonable assurance to data consumers that data controls are clearly defined and executed in accordance with control objectives.

2.1.6. Maintain regulated security over the system and its data and ensure compliance with user access security requirements and DoD continuity of operations policy and planning.

2.1.7. Ensure sensitive activity data is secure and comply with DoD security classification guidance.

*2.2 DoD Component Responsibilities

DoD Components (i.e., the Office of the Secretary of Defense, the Military Departments, the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the Defense Agencies and DoD Field Activities, and all other organizational entities within DoD with the exception of the DoD Office of Inspector General) must:

2.2.1. Provide authoritative source-level transactional data to Advana from all DoD business systems daily, using the most cost effective and secure methods available. The authoritative source-level transactional data must be obtained and imported by Advana from the business system in which the data originated (i.e., not a separate data warehouse or data lake but the system that originated the transaction). Where a strategy does not exist to provide such data, one must be developed in partnership with OUSD(C) [EFT](#).

2.2.2. Sign agreements that govern accurate and timely transmission of data. DoD Components are responsible for defining business rules that map source data elements to the Advana common data model. The Advana common data model includes but is not limited to the Standard Financial Information Structure, Procurement Data Standard, and subsequent domain-specific data models under development.

2.2.3. Use Advana for delivery of their Universe of Transactions to any entity that issues an audit request, data call request, or other bona fide requirement for reconciled transaction details.

2.2.4. [Use the Advana Feeder to General Ledger Reconciliations Audit Workbooks – Monthly reconciliations between disbursing, obligation, funding, and entitlement financial management systems to general ledger accounting systems.](#)

2.2.5. [Use the General Ledger to Unadjusted Trial Balance Reconciliations Audit Workbooks – Quarterly reconciliations between general ledger accounting systems and their unadjusted trial balance.](#)

2.2.6. [Use the Unadjusted Trial Balance to Adjusted Trial Balance Reconciliations Audit Workbooks – Quarterly reconciliations between the unadjusted trial balance and the adjusted trial balance within the Defense Departmental Reporting System.](#)

2.2.7. [Use Advana to reconcile Fund Balance with Treasury and retire all legacy micro-applications no later than December 2024.](#)

2.2.8. Use the Advana Dormant Account Review – Quarterly tool to conduct all DoD dormant account reviews unless otherwise approved by OUSD(C) [EFT](#) and [DCFO](#).

2.2.9. Provide functional assistance to the Advana program, when necessary, to reconcile DoD Components' general ledger data to outputs from the Defense Departmental Reporting System and other required data reconciliations.

3.0 BUSINESS DOMAIN AREAS

A business domain represents a line of business for DoD and its corresponding business events. Advana will acquire, incorporate, and standardize data to support the various business domain areas across the Department including, but not limited to:

3.0.1. Acquisition Analytics

- 3.0.2. Budget Analytics
- 3.0.3. Cost Management Analytics
- 3.0.4. Executive Analytics
- 3.0.5. Financial Management, Reporting, and Accounting Analytics
- 3.0.6. Health Analytics
- 3.0.7. Information Technology Analytics
- 3.0.8. Logistics and Supply Chain Analytics
- 3.0.9. People Analytics
- 3.0.10. Policy Analytics
- 3.0.11. Procurement Analytics
- 3.0.12. Readiness Analytics
- 3.0.13. Real Property Analytics

VOLUME 1, APPENDIX A: “OBJECT CLASSIFICATION”**SUMMARY OF MAJOR CHANGES**

1.2	Basic Concepts	3
2.0	MAJOR OBJECT CLASSIFICATION	4

APPENDIX A

OBJECT CLASSIFICATION

1.0 GENERAL

1.1 Purpose

The purpose of this appendix is to provide necessary information on the object classes that are used as a uniform classification for identifying the transactions of the Federal Government by the nature of the goods or services purchased. Every obligation recorded by the Department of Defense (DoD) must be coded with an object class. Every purchase requisition and commitment recorded by the DoD must be coded with an object class code and product service code.

1.2 Basic Concepts

1.2.1. Obligations incurred are the amounts of orders placed, contracts awarded, services received, and similar transactions during an accounting period that will require payment during the same or a future period. Such amounts include payments for which obligations have not been previously recorded, along with adjustments for differences between obligations previously recorded and actual payments to liquidate those obligations. The installation-level budgetary account structure requires that the amount of obligations incurred be segregated into undelivered orders and accrued expenditures - unpaid or paid.

1.2.2. Obligations are classified by the initial purpose for which they are incurred, rather than for the end product or service provided. For example, if payments are made directly for personal services or supplies used in the construction of a building, the amounts should be classified as obligations for personnel compensation or supplies rather than for land and structures. Conversely, if contracts are awarded for the construction of a building, the amounts should be classified in the object class for lands and structures rather than in the object class used to report individual types of materials and services required to construct the building.

1.2.3. Object class information is incorporated into DoD accounting systems, or derived from applicable expense and asset accounts, to allow for reporting by object class. Object Class Code is a required data element in the DoD [*Standard Financial Information Structure*](#) (SFIS), as defined in Volume 1, Chapter 4. Based on the Office of Management and Budget (OMB) Circular A-11, the specific values for Object Class Code and all other SFIS data elements are documented in the SFIS Values Library Service on the SFIS web page.

2.0 MAJOR OBJECT CLASSIFICATION

All Federal Government object classifications are defined in the [*OMB Circular No. A-11*](#), Part 2, III, Section 83, Schedule O. [These are the major object classes:](#)

2.01. 10 Personnel compensation and benefits

2.02. 20 Contractual services and supplies

2.03. 30 Acquisition of assets

2.04. 40 Grants and fixed charges

2.05. 90 Other

1.1 Purpose (010101)

1.1.1. Volume 2 of the Financial Management Regulation (FMR) provides general guidance on the formulation and submission of the budget requests to the Office of the Secretary of Defense for the program and budget review submission and the presentation and justification of the budget requests to the Congress. This volume is established under the authority of DoD Instruction 7000.14.

1.1.2. Volume 2 is intended as a comprehensive reference book on budget matters of the Department of Defense. Budget policy memoranda issued throughout the year will provide any necessary changes or revisions to this standing document, as well as special instructions and nonrecurring requirements unique to that year's budget cycle.

1.1.3. The provisions of Volume 2 apply to all military and specified civil functions of the Department of Defense.

1.1.4. An introduction to the total Financial Management Regulation, DoD 7000.14-R can be found in Volume 1.

1.2 Organization (010102)

Volume 2B is organized into 19 chapters that provide specific guidance, required budget exhibits and formats along with instructions for their preparation, and automated submission requirements.

1.3 Changes to Volume 2 (010103)

1.3.1. Changes to Volume 2 will be issued biennially, prior to the program and budget review of the initial biennial budget cycle. Pen and ink changes will not be issued.

1.3.2. Generally, significant changes on a page will be indicated by ★ preceding the paragraph or section containing a change and the changed material will be printed in blue ink.

1.4 Reports Control Symbol (010104)

Data requirements established by this volume are exempt from the requirement for assignment of a Report Control Symbol.

1.5 Requests for Exceptions to [OMB Circular A-11](#) (010105)

1.5.1. Each year the Office of Management and Budget ([OMB](#)) issues Circular No. A-11, which addresses the preparation and submission of budget estimates for all Federal agencies.

1.5.2. Federal agencies are allowed to request exceptions to the requirements of Circular A-11 by submitting in writing to OMB all required exceptions by August 1. Exceptions approved by OMB are valid only for 1 year.

1.5.3. Each year the USD(Comptroller) requests certain exceptions to OMB Circular A-11. Generally, these exceptions concern special situations that are unique to the Department of Defense.

1.5.3.1. Subsequent to the issuance of Circular A-11 by OMB each year, any DoD Component requiring an exception to the requirements of Circular A-11 should submit in writing the specific section for which an exception is required and provide adequate rationale to justify the exception. The memorandum addressing the requested exceptions should be submitted directly to the Office of the USD(Comptroller), Program/Budget, Program and Financial Control Directorate (Room 3C689, telephone (703) 697-0021) no later than July 15 of each year.

1.5.3.2. If the requested exception is acceptable to the USD(Comptroller), these proposals will be consolidated and forwarded to OMB for approval. Components will be advised of any exceptions approved by OMB.

1.5.3.3. All DoD Components are required to comply with any requested exceptions not approved and to properly reflect the information in the budget submissions.

1.6 Proposed Changes in Budget Structure and Appropriation Language (010106)

1.6.1. Under the provisions of OMB Circular A-11, the following types of changes must be cleared with OMB:

1.6.1.1. Changes in the appropriation pattern, including proposed new accounts and changes in the titles and sequence of existing accounts.

1.6.1.2. Changes in the methods of funding a program.

1.6.1.3. Changes in program or budget activity classifications for the program and financing schedules for all appropriation accounts and funds.

1.6.2. Any proposed changes on the items listed above must be submitted by memorandum to the Office of the USD(Comptroller) that explains the proposal and the rationale for the changes. If acceptable to the USD(Comptroller), these proposals will be forwarded to OMB for approval.

1.6.3. Proposed changes in the wording of appropriation language should be submitted to the Office of the Deputy General Counsel (Fiscal) (Room 3B688, telephone (703) 697-7228) as soon as possible after the passage of the current year's appropriations acts. ODGC(Fiscal) will coordinate changes with OMB.

1.7 Budget Terminology/Definitions (010107)

1.7.1. Standard Government-wide definitions of budget terminology are provided in the Office of Management and Budget's issuances, most notably Circular A-11 (Section 20).

1.7.2. For the Department of Defense, some of the more common budget concepts applicable to budget formulation follow:

1.7.2.1. Accrual Basis of Accounting. A method of accounting in which revenues are recognized in the period earned and costs are recognized in the period incurred, regardless of when payment is received or made. There have been many initiatives over the years to convert the Federal Budget to an accrual accounting basis. Although the budget is on a cash basis, DoD accounting is on the accrual basis.

1.7.2.2. Advance Procurement. Authority provided in an appropriations act to obligate and disburse during a fiscal year before that in which the related end item is procured. The funds are added to the budget authority for the fiscal year and deducted from the budget authority of the succeeding fiscal year. Used in major acquisition programs for advance procurement of components whose long-lead-times require purchase early in order to reduce the overall procurement lead-time of the major end item. Advance procurement of long lead components is an exception to the DoD "full funding" policy and must be part of the President's budget request.

1.7.2.3. Appeal. A request for reconsideration of an action taken to adjust, reduce, or delete funding for an item during the congressional review of the Defense budget (authorization and appropriation). This process is discussed in Section 4.6.

1.7.2.4. Apportionment. A distribution by the Office of Management and Budget of amounts available for obligation in appropriation or fund accounts of the Executive Branch. The distribution makes amounts available on the basis of specified time periods, programs, activities, projects, or combinations thereof. The apportionment system is intended to achieve an effective and orderly use of funds. The amounts so apportioned limit the obligations that may be incurred.

1.7.2.5. Appropriations. A provision of legal authority by an act of the Congress that permits Federal agencies to incur obligations and to make payments out of the Treasury for specified purposes. An appropriation usually follows enactment of authorizing legislation. An appropriation act is the most common means of providing budget authority (see Budget Authority). Appropriations do not represent cash actually set aside in the Treasury for purposes specified in the appropriation act; they represent limitations of amounts which agencies may obligate during the time period specified in the respective appropriation acts.

1.7.2.6. Authorization (Authorizing Legislation). Basic substantive legislation enacted by the Congress which sets up or continues the legal operation of a Federal program or agency either indefinitely or for a specific period of time or sanctions a particular type of obligation or expenditure within a program. Such legislation is normally a prerequisite for subsequent appropriations or other kinds of budget authority to be contained in appropriation acts. It may limit the amount of budget authority to be provided subsequently or may authorize the appropriation of “such sums as may be necessary.”

1.7.2.7. Biennial Budget. The FY 1986 Department of Defense Authorization Act required the submission of two-year budgets for the Department of Defense and related agencies beginning with FY 1988/FY 1989. The Department has fully institutionalized a biennial cycle for the Planning, Programming, Budgeting and Execution (PPBE) Process, including the Strategic Planning Guidance (SPG), the Program Objective Memorandum (POM), Volume 2 of the Financial Management Regulation (FMR) and budget formulation memoranda. A biennial budget, as currently structured, represents program budget estimates for a two-year period in which fiscal year requirements remain separate and distinct.

1.7.2.8. Budget Activity. Categories within each appropriation and fund account which identify the purposes, projects, or types of activities financed by the appropriation or fund.

1.7.2.9. Budget Amendment. A formal request submitted to the Congress by the President, after his formal budget transmittal but prior to completion of appropriation action by the Congress, that revises previous requests, such as the amount of budget authority.

1.7.2.10. Budget Authority. The authority becoming available during the year to enter into obligations that result in immediate or future outlays of Government funds.

1.7.2.11. Budget Deficit. The amount by which the Government’s budget outlays exceed its budget receipts for any given period. Deficits are financed primarily by Treasury borrowing from the public.

1.7.2.12. Budget Receipts. Amounts received by the Federal Government from the public that arise from the exercise of governmental or sovereign power (primarily tax revenues, but also receipts from premiums of compulsory social insurance programs, court fines, license fees, etc.); premiums from voluntary participants in Federal social insurance programs; and gifts and contributions. Excluded from budget receipts are collections resulting from business-type transactions and payments between government accounts as a result of intragovernmental transactions.

1.7.2.13. Change Proposal. Components use this mechanism to revise programs and approved budgets in the second year of the 2-year program and budget cycle, in lieu of submitting a Program Objective Memorandum and a Budget Estimate Submission with complete documentation. A format will be provided with the annual program and budget guidance. See “Two-year Program and Budget Cycle.”

1.7.2.14. Closed (Canceled) Appropriations. An appropriation that is no longer available for the adjustment or payment of obligations. Appropriation accounts are closed (canceled) after being in the expired status for five years. A Comptroller General opinion has provided the DoD with authority to make disbursement adjustments to closed appropriations to correct errors only. (See Expired Appropriation.)

1.7.2.15. Concurrent Resolution. A resolution passed by both Houses of Congress, but not requiring the signature of the President, setting forth, reaffirming, or revising the congressional budget for the United States Government for a fiscal year. A concurrent resolution on the budget, due by April 15, must be adopted before legislation providing new budget authority, new spending authority, new credit authority or changes in revenues or the public debt limit is considered. Other concurrent resolutions for a fiscal year may be adopted at any time following the first required concurrent resolution for that fiscal year.

1.7.2.16. Constant Dollars. A dollar value adjusted for changes in prices. Constant dollar series are derived by dividing current dollar estimates by appropriate price indices, a process generally known as deflating. The result is a time series as it would presumably exist if prices were the same throughout as in the base year - in other words, as if the dollar had constant purchasing power. Any changes in such a series would reflect only changes in the real (physical) volume of output. Constant dollar figures are commonly used for gross national product and its components.

1.7.2.17. Continuing Resolution. Legislation enacted by the Congress to provide budget authority for specific ongoing activities in cases where the regular fiscal year appropriation for such activities has not been enacted by the beginning of the fiscal year. The continuing resolution usually provides formulas which the agency uses to compute amounts available for continuing programs at minimum levels. Formulas typically include obligation rates of the prior year, the President's budget request, or an appropriation bill passed by either or both Houses of the Congress.

1.7.2.18. Current Services Estimates. Estimated budget authority and outlays for the upcoming fiscal year based on continuation of existing levels of service, i.e., assuming that all programs and activities will be carried on at the same level as in the fiscal year in progress and without policy changes in such programs and activities. These estimates of budget authority and outlays, accompanied by the underlying economic and programmatic assumptions upon which they are based (such as the rate of inflation, the rate of real economic growth, pay increases, etc.), are required to be transmitted by the President to the Congress.

1.7.2.19. Deferral of Budget Authority. Any action or inaction by any officer or employee of the United States that withholds, delays, or effectively precludes the obligation or expenditure of budgetary resources, including the establishment of reserves under the Antideficiency Act, as amended by the Impoundment and Control Act. Section 1013 of the Impoundment Control Act of 1974 requires a special message from the President to the Congress reporting a proposed deferral of budget authority. Deferrals may not extend beyond the end of the fiscal year in which the message reporting the deferral is transmitted and may be overturned by the passage of an impoundment resolution by either House of Congress.

1.7.2.20. Disbursements. In budgetary usage, gross disbursements represent the amount of checks issued, cash, or other payments made, less refunds received. Net disbursements represent gross disbursements less income collected and credited to the appropriation or fund account, such as amounts received for goods and services provided.

1.7.2.21. Discretionary Authority. Budgetary resources (except those provided to fund mandatory spending) provided in appropriations acts.

1.7.2.22. Emergency Appropriations. Appropriations that have been designated by the Congress and the President as an emergency requirement under the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.

1.7.2.23. End Strength. In general, strength at the end of a fiscal year. Single point strengths for other points in time must be specified, such as end first-quarter strength.

1.7.2.24. Expenditures/Disbursements. A term generally used interchangeably with outlays (See outlays).

1.7.2.25. Expired Appropriation. An appropriation whose period of availability for incurring new obligations has expired but the appropriation is not closed (canceled). During this period, the appropriation is available for adjustment to, or payment of, existing obligations. Appropriations remain in an expired status for 5-years as shown in the table below. At the end of the five-year expiration period, the appropriation is closed (canceled) and is no longer available for the payment of unliquidated obligations. (See Closed (Canceled) Appropriations.)

Normal Life Cycle of Appropriations:

Approp	Years For New Obligations Unexpired	Years For Obligation Adjust. & Disburse. Expired	Years For Closed End of Year Canceled
MilPers	1	2-6	6
O&M.	1	2-6	6
RDT&E	2	3-7	7
Proc.	3	4-8	8
SCN	5	6-10	*10
Mil. Con.	5	6-10	10

* Extended to 15-years under certain circumstances.

1.7.2.26. Federal Debt. Federal debt consists of public debt and agency debt. Public debt is that portion of the Federal debt incurred when the Treasury Department or Federal Financing Bank (FFB) borrows funds directly from the public or another fund or account. Agency debt is that portion of the Federal debt incurred when a Federal agency authorized by law, other than Treasury or the Federal Financing Bank, borrows funds directly from the public or another fund or account.

1.7.2.27. Fiscal Year. Any yearly accounting period without regard to its relationship to a calendar year. The fiscal year for the Federal Government begins on October 1 and ends on September 30. The fiscal year is designated by the calendar year in which it ends. Fiscal years are further designated as follows:

Past Year-1: Also referred to as Prior Year-1, the fiscal year immediately preceding the past year

Past Year (PY): Also referred to as Prior Year, the fiscal year immediately preceding the current year; the last completed fiscal year.

Current Year (CY): The fiscal year in progress. Immediately precedes the budget year.

Budget Year (BY): The next fiscal year for which estimates are submitted if not a biennial budget.

Budget Year 1 (BY1): In a biennial budget submission (Department of Defense), the first fiscal year of a 2-year period for which the budget is being considered.

Budget Year 2 (BY2): In a biennial budget submission (Department of Defense), the second fiscal year of a 2-year period for which the budget is being considered.

Budget Year(s)+1 (BY(s)+1): The fiscal year immediately following the budget year(s). This format continues through Budget Year +5 (BY+5), the fifth fiscal year following the budget year(s).

* 1.7.2.28. Full Funding Policy. The practice of funding the total cost of major procurement and construction projects in the fiscal year in which they will be initiated. [The full funding policy requires the total estimated cost of a complete, military useable end item or construction project funded in the year in which the item is procured. If a future year's appropriation is required for delivery of an end item, the end item is not fully funded. It prevents funding programs incrementally and provides a disciplined approach for program managers to execute their programs within cost. See Section 2.2 for further information.](#)

1.7.2.29. Full-time Equivalent (FTE). Reflects the total number of regular straight-time hours (i.e., not including overtime or holiday hours) worked by employees divided by the number of compensable hours applicable to each fiscal year. Annual leave, sick leave and compensatory time off and other approved leave categories are considered to be "hours worked" for purposes of defining full-time equivalent employment.

1.7.2.30. Future Years Defense Program (FYDP). The Future Years Defense Program is the program and financial plan for the Department of Defense as approved by the Secretary of Defense. The FYDP arrays cost data, manpower and force structure over a 6-year period (force structure for an additional 3 years), portraying this data by major force program for DoD internal review for the program and budget review submission. It is also provided to the Congress in conjunction with the President's budget.

1.7.2.31. Impoundment. Any action or inaction by an officer or employee of the United States that precludes the obligation or expenditure of budget authority provided by the Congress.

1.7.2.32. Impoundment Resolution. A resolution of the House of Representatives or the Senate disapproving a deferral of budget authority set forth in a special message ordinarily transmitted by the President under section 1013 of the Impoundment Control Act of 1974. Passage of an impoundment resolution by either House of Congress has the effect of overturning the deferral and requires that such budget authority be made available for obligation.

1.7.2.33. Incremental Funding. The phasing of total funding of programs or projects over two or more fiscal years based upon levels and timing of obligational requirements for the funds. Differs from full funding concept where total funds for an end item, program or project are provided in the fiscal year of program or project initiation, regardless of the obligational requirement for the funds.

1.7.2.34. Mandatory Authority. (Also known as Entitlement Authority) Authority controlled by laws other than appropriations.

1.7.2.35. Management Initiative Decision (MID). A decision document similar to a Program Budget Decision, but designed to institutionalize management reform decisions. A MID may be issued at any time during the year. The Comptroller will incorporate any funding adjustments into the next President's Budget.

1.7.2.36. Multiyear Procurement. Procurement of a particular end item or system under a multiyear contract approved by specific provision of law. For the Department of Defense, multiyear procurement contracting of military hardware or systems must generally be specifically, and individually, approved by the Congress (see 10 U.S.C. 2306b(1)).

1.7.2.37. Object Classification. A uniform classification identifying the transactions of the Federal Government by the nature of the goods or services purchased without regard to the agency involved or the purpose of the programs for which they are used.

1.7.2.38. Obligations. Binding agreement that will result in outlays immediately or in the future.

1.7.2.39. Offsetting Collections. Payments to the Government that are credited directly to the expenditure account and deducted from gross budget authority and outlays of the expenditure account. They result from business-type or market oriented activities with the public and intragovernmental transactions with other government accounts (commonly called reimbursable transactions).

1.7.2.40. Outlays. The amount of checks issued or other payments made (including advances to others), net of refunds and reimbursements collected. Outlays are net of amounts that are adjustments to obligational authority. The terms “expenditure” and “net disbursement” are frequently used interchangeably with the term “outlay.” Gross outlays are disbursements and net outlays are disbursements (net of refunds) minus reimbursements collected.

1.7.2.41. President’s Budget. The budget for a particular fiscal year transmitted to the Congress by the President in accordance with the Budget and Accounting Act of 1921, as amended. Some elements of the budget, such as the estimates for the legislative branch and the judiciary, are required to be included without review by the Office of Management and Budget or approval by the President.

1.7.2.42. Program Budget Decision (PBD). A budget decision document issued during the joint review of Service budget submissions by analysts of the Office of the Secretary of Defense (OSD) and the Office of Management and Budget ([OMB](#)). PBDs reflect the decisions of the Secretary of Defense as to appropriate program and funding to be included in the annual Defense budget request which, in turn, is included in the President’s Budget.

1.7.2.43. Program Decision Memorandum (PDM). A document containing the decisions by the Secretary of Defense reflecting broad strategic trades related to the program and resource levels identified in the Program Objectives Memorandum.

1.7.2.44. Program Objectives Memorandum (POM). The final product of the programming process within the Department of Defense, the Components Program Objectives Memorandum (POM) displays the resource allocation decisions of the Military Departments in response to and in accordance with Strategic Planning Guidance (SPG) and Joint Programming Guidance (JPG).

1.7.2.45. Program Year. The fiscal year in which authorization was provided and in which funds were appropriated for a particular program, regardless of the fiscal year in which funds for that program might be obligated.

1.7.2.46. Reapportionment. A revision by the Office of Management and Budget of a previous apportionment of budgetary resources for an appropriation or fund account. A revision would ordinarily cover the same period, project, or activity covered in the original apportionment.

1.7.2.47. Reappropriation. Congressional action to restore the obligational availability, whether for the same or different purposes, of all or part of the unobligated portion of budget authority that has expired or would otherwise expire in an annual or multi-year account. Obligational authority in a current appropriation may also be extended by a subsequent appropriation act.

1.7.2.48. Reconciliation Process. A process used by the Congress to reconcile amounts determined by tax, spending, and debt legislation for a given fiscal year with the ceilings enacted in the second and required concurrent resolution on the budget for that year. Section 310 of the Congressional Budget and Impoundment Control Act of 1974 provides that the second required concurrent resolution on the budget, which sets binding totals for the budget, may direct committees to determine and recommend changes to laws, bills, and resolutions, as required to conform with the binding totals for budget authority, revenues, and the public debt.

1.7.2.49. Recovery of Prior Year Obligations. Amounts made available for obligation in no-year and unexpired multi-year accounts through downward adjustment of prior year obligations.

1.7.2.50. Reimbursable Obligation. Obligation financed by offsetting collections credited to an expenditure account in payment for goods and services provided by that account. See Offsetting Collection.

1.7.2.51. Reprogramming. Utilization of funds in an appropriation account for purposes other than those contemplated at the time of appropriation. Reprogramming is generally accomplished pursuant to consultation with and approval by appropriate congressional committees. Instructions are contained in Volume 3.

1.7.2.52. Rescission. The consequence of enacted legislation which cancels budgetary resources previously provided by the Congress prior to the time when the authority would otherwise lapse. Section 1012 of the Impoundment Control Act of 1974 requires a special message from the President to the Congress reporting any proposed rescission of budgetary resources. These proposals may be accepted in whole or in part through the passage of a rescission bill by both Houses of the Congress.

1.7.2.53. Rescission Bill. A bill or joint resolution that provides for cancellation, in whole or in part, of budgetary resources previously granted by the Congress. Under Section 1012 of the Impoundment Control Act of 1974, unless Congress approves a rescission bill within 45 days of continuous session after receipt of the proposal, the budgetary resources must be made available for obligation.

1.7.2.54. Revolving Fund. A fund established to finance a cycle of operations through amounts received by the fund. Within the Department of Defense, such funds include the Defense Working Capital Fund, as well as other working capital funds.

1.7.2.55. Sequestration. The reduction or cancellation of new budget authority; unobligated balances, new loan guarantee commitments or limitations; new direct loan obligations, commitments, or limitations; spending authority; and obligation limitations. OMB Circular A-11, section 20 provides additional information on sequestration rules of the Budget Enforcement Act of 1990 (BEA).

1.7.2.56. Supplemental Appropriation. An act appropriating funds in addition to those in an annual appropriation act. Supplemental appropriations provide additional budget authority beyond original estimates for programs or activities (including new programs authorized after the date of the original appropriation act) for which the need for funds is too urgent to be postponed until enactment of the next regular appropriation act.

1.7.2.57. Total Obligational Authority (TOA) Availability. The sum of (1) all budget authority granted (or requested) from the Congress in a given year, (2) amounts authorized to be credited to a specific fund, (3) budget authority transferred from another appropriation, and (4) unobligated balances of budget authority from previous years which remain available for obligation. In practice, this term is used primarily in discussing the Department of Defense budget, and most often refers to TOA as “direct program” which equates to only (1) and (2) above.

1.7.2.58. Transfer Authorities. Annual authorities provided by the Congress via annual appropriations and authorization acts to transfer budget authority from one appropriation or fund account to another.

1.7.2.59. Two-year Program and Budget Cycle. For the budget review, this cycle coincides with the biennial budget process required by law. It is part of the Department’s internal 2-year Planning, Programming, Budgeting, and Execution (PPBE) process. The first year of the cycle includes a full review of the budget for the following two years. Full budget documentation is required. The end result is a budget baseline for the next two years. The second year of the cycle limits changes to the baseline program. It focuses on fact-of-life changes to include congressional action and program execution. Components will request adjustments to the baseline through Change Proposals (CP). However, while the second year of the process will require only limited budget documentation for the internal review, full budget documentation is still required for the President’s budget submission.

1.7.2.60. User Fee. A fee, charge, or assessment levied on those directly benefiting from, or subject to regulation by, a Federal government program or activity, to be utilized solely to support the program or activity. Collections from other Federal accounts are not user fees. (See OMB Circular A-11, section 20.7)

1.8 Security Classifications (010108)

1.8.1. General

1.8.1.1. Instructions concerning premature disclosure of budget information prior to presentation to the Congress are contained in OMB Circular A-11.

1.8.1.2. Instructions concerning security classification of the program and budget review submissions to OSD are contained in Section 3.5.

1.8.1.3. Paper copies of the P-1 and R-1 exhibits must be submitted by DoD Components with a certification signed by the Security Office confirming that all line items are classified properly.

1.8.1.4. Instructions concerning security classification of congressional justification material are contained in Section 4.1.

1.8.2. Classification of Military Personnel M-1 line items, Operation and Maintenance O-1 line items, Procurement Exhibit P-1 line items, RDT&E Exhibit R-1 line items, and the Construction Programs (C-1):

1.8.2.1. The Military Personnel Programs (M-1) is designed to be an unclassified document. See Section 5.1 for instructions.

1.8.2.2. The Operation and Maintenance Exhibit O-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program's Security Classification Guide so dictates or when conditions in paragraph C. (below) apply.

1.8.2.3. Procurement Exhibit P-1 line items: P-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program's Security Classification Guide so dictates or when conditions in paragraph C. (below) apply.

1.8.2.4. RDT&E Exhibit R-1 line items: R-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program's Security Classification Guide so dictates or when conditions in paragraph C. (below) apply.

1.8.2.5. The Construction Programs (C-1) is designed to be an unclassified document. See Section 5.5 for instructions.

1.8.3. Security classification instructions for Intelligence Programs/Activities Resource Information are contained in Chapter 16.

1.9 Budget and Performance Integration (010109)

1.9.1. The President's Management Agenda (PMA) targets the most apparent deficiencies in the government where the opportunity to improve performance is the greatest. The Office of Management and Budget (OMB) developed standards for success in the government-wide Budget and Performance Integration Initiative of the PMA. As a result, the OMB requires federal agencies to use performance measures in managing and justifying program resources.

1.9.2. Components shall use performance measures to justify 100 percent of the resources requested in the Budget Year. The Components shall comply with the performance measure requirements that are included in other chapters. Additionally, OMB has directed the use of the Program Assessment Rating Tool (PART) for some programs. The PART is a diagnostic tool that formalizes performance evaluation. The Components shall comply with PART taskings and suspense dates. For those programs that have been assessed using the PART, the Components shall include OMB's PART Summary (published in February each year) in congressional budget justification materials, press releases, testimony, and briefings to congressional committee staffs. OMB Circular A-11, section 26 – Summary of Performance Information Requirements, and the OMB PART Web site (www.whitehouse.gov/omb/part), provide additional information about the PART and the PART process. Absent a PART or performance measures prescribed in other chapters, the Components may use existing, or create new, performance measures.

1.10 Combatant Command Business Rules (Joint Task Assignment Process (JTAP)) (010110)

1.10.1. The following business rules will be followed to govern the financial management arrangements between Combatant Command Support Agents (CCSAs) and Combatant Commands (COCOM). The CCSA assignments are as follows:

1.10.1.1. Initial funding for new COCOM missions will be established by OSD. Funding for new missions assigned by the Secretary or Deputy Secretary will be established and provided for by OSD as part of the JTAP process and in conjunction with the Planning, Programming, Budgeting and Execution (PPBE) processes.

1.10.1.2. It is the responsibility of the Combatant Command Support Agent (CCSA) to maintain funding for the directed COCOM missions.

1.10.1.2.1. CCSAs will adjust COCOM accounts across the FYDP consistent with the OSD/OMB approved inflation indices.

1.10.1.2.2. COCOMs will be subjected to a proportionate share (on a percentage basis) of total CCSA reductions from undistributed congressional and/or OSD general reductions.

1.10.1.3. All Service business and efficiency reductions require prior COCOM or OSD approval to ensure they do not impede the conduct of directed missions.

CCSAs will pre-coordinate any Service-initiated reductions to COCOM resources with the COCOMs during each phase of the PPBE process for all years in the FYDP, and Service-initiated reductions will not be applied to any COCOM funds without the prior approval of the COCOM or the OSD staff.

1.10.1.4. OUSD(C), PA&E, Joint Staff, Combatant Commands and Combatant Command Support Agents will meet annually to validate, and adjudicate as necessary, all adjustments to COCOM resources.

OUSD(C) will review and coordinate CCSA budget exhibits that specifically pertain to COCOM resources with COCOMS prior to approval and publication to ensure that CCSA's have fully complied with Program Budget Decision or Program Decision Memorandum direction.

1.10.2. Combatant Command Support Agents must ensure adequate visibility of COCOM directed missions and other costs for each O&M funded COCOM. A minimum of two Sub Activity Groups (SAG)s within each Military Department's active components' Operation and Maintenance Appropriation will be established as follows:

1.10.2.1. Mission Funding (one or more SAGs);

1.10.2.2. Headquarters (HQ) and Headquarters Support Funding: (single SAG)

1.10.3. Budget and execution structure for USTRANSCOM will continue to follow the normal Working Capital Fund business area structure.

1.10.4. USSOCOM budget structure is not governed by this guidance as USSOCOM resources are already visible in Major Force Program-11 (MPF-11).

2.0 FUNDING POLICIES (0102)

2.1 Criteria for Determining Expense and Investment Costs (010201)

2.1.1. Appropriation accounts form the structure for the President's budget request and are the basis for congressional action. The appropriations are further organized into budget activities of appropriations with programs, projects or activities of similar purposes. To support management of the Department of Defense's programs, projects or activities, resource requirements should be organized and categorized consistently within the appropriation and budget activity structure. The following sections provide guidance for categorizing resource requirements into the various appropriations.

2.1.2. Basic Distinctions Between Expense and Investment Costs. The criteria for cost definitions consider the intrinsic or innate qualities of the item such as durability in the case of an investment cost or consumability in the case of an operating cost and the conditional circumstances under which an item is used or the way it is managed. In all cases where the definitions appear to conflict, the conditional circumstances will prevail. The following guidance is provided to determine whether a cost is either an expense or an investment. All costs are classified as either an expense or an investment.

2.1.2.1. Expenses are the costs incurred to operate and maintain the organization, such as personal services, supplies, and utilities.

2.1.2.2. Investments are the costs that result in the acquisition of, or an addition to, end items. These costs benefit future periods and generally are of a long-term character such as real property and personal property.

2.1.3. Policy for Expense and Investment Costs

2.1.3.1. DoD policy requires cost definition criteria that can be used in determining the content of the programs and activities that comprise the Defense budget. The primary reasons for these distinctions are to allow for more informed resource allocation decisions and to establish criteria for determining which costs are appropriate to the various defense appropriations.

2.1.3.2. The cost definition criteria contained in this policy are only applicable to the determination of the appropriation to be used for budgeting and execution. Cost definitions for accounting purposes are contained in Volume 1.

2.1.3.3. Costs budgeted in the Operation and Maintenance (O&M) and Military Personnel appropriations are considered expenses. Costs budgeted in the Procurement and Military Construction appropriations are considered investments. Costs budgeted in the Research, Development, Test and Evaluation (RDT&E), Base Realignment and Closure (BRAC), and Family Housing appropriations include both expenses and investments. Definitions for costs within the Defense Working Capital Funds are provided in Chapter 9 and in Section 2.14.

2.1.3.4. Items procured from the Defense Working Capital Funds will be treated as expenses in all cases except when intended for use in weapon system outfitting, government furnished material (GFM) on new procurement contracts, or for installation as part of a weapon system modification, major reactivation, or major service life extension.

2.1.4. Procedures for Determining Expenses Versus Investments. The following criteria will be used to distinguish those types of costs to be classified as expenses from those to be classified as investments for budgeting purposes:

2.1.4.1. Expenses. Expenses are costs of resources consumed in operating and maintaining the Department of Defense. When costs generally considered as expenses are included in the production or construction of an investment item, they shall be classified as investment costs. Military personnel costs are an exception to this rule. The following guidelines shall be used to determine expense costs:

2.1.4.1.1. Labor of civilian, military, or contractor personnel.

2.1.4.1.2. Rental charges for equipment and facilities.

2.1.4.1.3. Food, clothing, and fuel.

2.1.4.1.4. Supplies and materials designated for supply management of the Defense Working Capital Funds.

2.1.4.1.5. Maintenance, repair, overhaul, rework of equipment.

2.1.4.1.6. Assemblies, spares and repair parts, and other items of equipment that are not designated for centralized item management and asset control and which have a system unit cost less than the currently approved dollar threshold of \$250,000 for expense and investment determinations. This criterion is applied on the basis of the unit cost of a complete system rather than on individual items of equipment or components that, when aggregated, become a system. The concept of a system must be considered in evaluating the procurement of an individual end item. A system is comprised of a number of components that are part of and function within the context of a whole to satisfy a documented requirement. In this case, system unit cost applies to the aggregate cost of all components being acquired as a new system.

2.1.4.1.7. Cost of incidental material and items that are not known until the end item is being modified are conditional requirements and are considered expenses because the material is needed to sustain or repair the end item.

2.1.4.1.8. Engineering efforts to determine what a modification will ultimately be or to determine how to satisfy a deficiency are expenses.

2.1.4.1.9. Facilities sustainment, O&M-funded restoration and modernization projects. Planning and design costs are excluded from the cost determination for purposes of determining compliance with the amounts established in 10 U.S.C. 2805 for minor construction projects; however, design costs are not excluded from capitalization.

2.1.4.2. Investments. Investments are costs to acquire capital assets such as real property and equipment. The following criteria shall be used to determine those costs to be classified as investments:

2.1.4.2.1. All items of equipment, including assemblies, ammunition and explosives, modification kits (the components of which are known at the outset of the modification), spares and repair parts not managed by the Defense Working Capital Funds, that are subject to centralized item management and asset control.

2.1.4.2.2. All equipment items that are not subject to centralized item management and asset control and have a system unit cost equal to or greater than the currently approved expense and investment dollar threshold of \$250,000 (for working capital funds investment criteria see Volume 2B, Chapter 9, Section 090103C). The validated requirement may not be fragmented or acquired in a piecemeal fashion in order to circumvent the expense and investment criteria policy.

2.1.4.2.3. Construction, including the cost of land and rights therein (other than leasehold). Construction includes real property equipment installed and made an integral part of such facilities, related site preparation, and other land improvements. (See paragraph 2.1.4.2.6 below for special guidance concerning real property facilities.)

2.1.4.2.4. The costs of modification kits, assemblies, equipment, and material for modernization programs, ship conversions, major reactivations, major remanufacture programs, major service life extension programs, and the labor associated with incorporating these efforts into or as part of the end item are considered investments. All items included in the modification kit are considered investment even though some of the individual items may otherwise be considered as an expense. Components that were not part of the modification content at the outset and which are subsequently needed for repair are expenses. The cost of labor for the installation of modification kits and assemblies is an investment.

2.1.4.2.5. Supply management items of the Defense Working Capital Funds designated for weapon system outfitting, government-furnished material on new procurement contracts, or for installation as part of a weapon system modification or modernization, major reactivation or major service life extension.

2.1.4.2.6. Also considered as investments are support elements such as data, factory training, support equipment and interim contractor support (ICS), which are required to support the procurement of a new weapon system or modification.

2.1.4.3. Conditional Cases. The following are conditional cases that take precedence over the criteria contained in paragraphs 2.1.4.1 and 2.1.4.2 above:

2.1.4.3.1. A major service-life extension program, financed in procurement, extends the life of a weapon system beyond its designed service life through large-scale redesign or other alteration of the weapon system.

2.1.4.3.2. Depot and field level maintenance is the routine, recurring effort conducted to sustain the operational availability of an end item. Depot and field level maintenance includes refurbishment and overhaul of end items, removal and replacement of secondary items and components, as well as repair and remanufacturing of reparable components. The maintenance effort may be performed by a depot maintenance activity in the Defense Working Capital Fund, by a direct funded DoD activity, by another government agency, or by a contractor.

2.1.4.3.3. Maintenance, repair, overhaul, and rework of equipment are funded in the operation and maintenance appropriations. However, maintenance of equipment used exclusively for research, development, test, and evaluation efforts will be funded by the RDT&E appropriations. Continuous technology refreshment is the intentional, incremental insertion of newer technology to improve reliability, improve maintainability, reduce cost, and/or add minor performance enhancement, typically in conjunction with depot or field level maintenance. The insertion of such technology into end items as part of maintenance is funded by the operation and maintenance appropriations. However, technology refreshment that significantly changes the performance envelope of the end item is considered a modification and, therefore, an investment (See section on "Product Improvement" 2.13.3.7). This definition applies equally to technology insertion by commercial firms as part of contractor logistics support, prime vendor, and similar arrangements and to technology insertion that is performed internally by the Department.

2.1.4.3.4. Initial outfitting of an end item of investment equipment, such as a ship or aircraft, with the furnishings, fixtures, and equipment necessary to make it complete and ready to operate is a part of the initial investment cost. Material procured through the Defense Working Capital Funds for initial outfitting will be financed by procurement appropriations when drawn from the supply system. This concept includes changes to the allowance lists of ships, vehicles, and other equipment. Changes to allowance lists will be budgeted as investment costs. Procurement appropriations are not required to satisfy initial outfitting requirements if assets are available for issue through reuse/redistribution programs, such as the Navy's Consumable Asset Reutilization Program.

2.1.4.3.5. Initial outfitting of a facility construction project financed by a Military Construction appropriation is financed as either expense or investment based on the general criteria. Collateral equipment and furnishings are not considered construction costs since these items are movable and are not installed as an integral part of the facility.

2.1.4.3.6. When family housing is initially outfitted with kitchen equipment to include refrigerator, shades, carpeting, etc., these items are considered part of the construction costs.

2.1.4.3.7. Construction program costs, associated with construction management in general, as distinguished from supervision of specific construction projects, are expenses. Costs incident to the acquisition (i.e., design, direct engineering, technical specifications) and construction of a specific project are investments. The cost of administering the facilities sustainment program is an expense at all levels.

2.1.4.3.8. Costs of facilities restoration and modernization projects, not financed by Military Construction appropriations, meeting the current criterion for funding from appropriations available for operation and maintenance are considered expenses. However, this definition does not abrogate the prohibition against the planned acquisition of, or improvements to, a real property facility through a series of minor construction projects (i.e., incremental construction).

2.1.4.3.9. The cost of civilian personnel compensation and other direct *costs* (i.e., travel, office equipment leasing, maintenance, printing and reproduction) incurred in support of procurement and/or production programs by departmental headquarters staff, contracting offices, contract audit offices, system project offices, and acquisition managers are expenses. Procurement and/or production direct support costs such as production testing, quality assurance, production engineering, and equipment assembly, whether performed under contract or by in-house personnel funded on a reimbursable basis are investments.

2.1.4.3.10. When investment equipment is to be installed in a real property facility, the costs of both the equipment and its installation are considered investments.

2.1.5. Special Guidance Concerning Real Property Facilities

2.1.5.1. Construction includes real property equipment (often called installed equipment) which is affixed and built into a facility as an integral part of a facility. The cost of this equipment and its installation is part of the construction cost.

2.1.5.2. Items of equipment that are movable in nature and not affixed as an integral part of a facility are not normally considered construction costs, except for initial outfitting of family housing, as detailed in paragraph D3 above. This equipment includes all types of production, processing, technical, information systems, communications, training, servicing and RDT&E equipment. The cost of this equipment is an expense or an investment according to the policy criteria above. In addition, modifications to an existing facility required to support the installation of movable equipment, such as the installation of false floors or platforms, prefabricated clean rooms, or utilities, will be considered an integral part of the equipment costs. As such, the costs are either expense or investment, as long as the modifications do not include structural changes to the building. If the modifications include structural changes, they will be considered investment costs and budgeted as construction.

2.1.6. Expense/Investment Cost Determination

Expense/Investment Cost Determination						
Is the item a	If	Then	If	Then	If	Then
Centrally Managed/Asset Controlled Item?	Yes	Is the item purchased from DWCF?	Yes	Is the item part of a full funding effort? *	Yes	Classify as Investment
Centrally Managed/Asset Controlled Item?	Yes	Is the item purchased from DWCF?	Yes	Is the item part of a full funding effort? *	No	Classify as Expense
Centrally Managed/Asset Controlled Item?	Yes	Is the item purchased from DWCF?	No	Classify as Investment		
Centrally Managed/Asset Controlled Item?	No	Is the unit cost more than \$250,000?	Yes	Classify as Investment		
Centrally Managed/Asset Controlled Item?	No	Is the unit cost more than \$250,000?	No	Classify as Expense		
* When intended for use in weapon system outfitting, government furnished material on new procurement contracts or for installation as part of a weapon as part of a weapon system modification, major reactivation or major service life extension.						

*2.2 Full Funding of Procurement Programs (010202)

2.2.1. General. A budgeting rule that requires the total estimated cost of a, military useable end item, be funded in the fiscal year in which the item is procured. Under the full funding policy, the entire procurement cost of a weapon or piece of military equipment is to be funded in the year in which the item is budgeted. An end item budgeted in a fiscal year cannot depend upon a future years funding to complete the procurement. Regulations governing the full funding policy are found in Office of Management and Budget (OMB) Circular A-11 and DoD Directive 7000.14-R.

2.2.1.1. The full funding policy is intended to prevent the use of incremental funding, under which the cost of a weapon system is divided into two or more annual portions or increments. Thus, full funding provides disciplined approach for program managers to execute their programs within cost and available funding.

2.2.1.2. There are two general exceptions to the full funding policy: one permits the use of Advance Procurement (AP) funding for components or parts of an item that have long production lead times; the other permits advance procurement funding for economic order quantity (EOQ) procurement, which normally occurs in programs that have been approved for multiyear

procurements (MYP). Advance Procurement funding is used routinely and extensively in the procurement of components for major end items due to manufacturing and production lead times. The use of MYP has to be approved by the Congress on a program-by-program basis. Congressional approval permits DoD to use a single contract to procure multiple copies of a given item that are scheduled to be procured across a series of years. MYP arrangements are governed by 10 USC 2306(b). EOQ procurement involves procuring multiple copies of a key component of a weapon covered by an MYP at the start of the MYP period in order to achieve significantly reduced costs on that component.

2.2.2. Policy for Full Funding. The total estimated cost of a complete, military useable end item or construction project must be fully funded in the year it is procured. There are 2 basic policies concerning full funding.

2.2.2.1. To provide funds in the budget for the total estimated cost of a complete, military usable end item to document the dimensions and cost of a program.

2.2.2.2. Exceptions to this policy are advance procurement for long lead-time items and advance economic order quantity (EOQ) procurement. EOQ may be used only in connection with multiyear procurements. Both efforts must be identified in an Exhibit P-10, Advance Procurement, for the Budget Estimate Submission and the President's Budget request.

2.2.3. Procedures for Full Funding

2.2.3.1. Cost Estimates. Full funding applies to an initial estimate and can exist only at a point in time because estimates change. However, the Future Years Defense Program (FYDP) shall be a consistently reliable foundation for stating the total cost of acquiring defense systems. Thus, the FYDP shall reflect a DoD Component's best estimate at completion of the program. The estimate should reflect the most likely cost of a procurement. Program estimates shall be kept current and fully financed through the Planning, Programming, Budgeting and Execution (PPBE) System process and established reprogramming procedures.

2.2.3.2. Time-Phased Procurement. Within defense system acquisition programs, nonrecurring costs and costs of certain production items related to, but not integral to, the end item of equipment are considered part of the overall acquisition cost. DoD Components shall plan and budget in a manner to ensure completion of the nonrecurring effort or delivery of such production items consistent with the planned delivery of the associated end items. That is, the programming and budgeting shall be on a time-phased "lead-time away" or "need to commit" basis. The Funded Delivery Period is part of the process to determine the quantities required to be budgeted in a particular fiscal year. DoD Components may not budget funds for obligation for items such as support, trainers, or data before the design or specifications of such items are essentially complete. These items shall be budgeted on an "ability to contract" basis as well as on a "lead-time away" basis.

2.2.3.3. Advance Procurement (Long Lead-time Items). Advance procurement requests for long lead-time items shall be limited to the end items in major procurement appropriations. Long lead-time procurements shall be for components, parts, and material whose

lead-times are greater than the life of the appropriation (3-5 years). In some circumstances, Advance Procurement is also warranted when items have significantly longer lead-times than other components, parts, and material of the same end item or when efforts must be funded in an advance procurement timeframe in order to maintain a planned production schedule. For new development programs, the planned production schedule should be based on a full funding basis without the use of long lead material. Planning the program content this way provides additional flexibility should development delays arise. When advance procurement is part of the program, however, the cost of components, material, parts, and effort budgeted for advance procurement shall be relatively low compared to the remaining portion of the cost of the end item. Each budget request for advance procurement shall represent, at a minimum, the termination liability associated with the total cost of the long lead-time components, material, parts, and effort for which the advance procurement request is being made. The termination liability should not cover the cost of the end item budgeted in the following fiscal year(s). The full cost of components, material, parts, and effort included in the advance procurement request should be budgeted in the FYDP consistent with full funding procedures. The budget requests will properly debit and credit advance procurement budget requests as defined in Exhibits P-1, P-5, P-10 and P-40 instructions.

2.2.3.4. Economic Order Quantity (EOQ) Procurement. EOQ may be used only in connection with multiyear procurement. It is the general policy of the Department of Defense not to create unfunded contract liabilities for EOQ procurements. Rather, funding for EOQ procurements shall be included in advance procurement budget requests unless an exception to the general policy is granted by the USD(Comptroller). The EOQ procurement may satisfy procurement requirements for no more than the number of program years covered by the multiyear procurement contract. Unless it would be more effective to fully fund the EOQ, or the USD(Comptroller) has granted an exception to the general policy to allow inclusion of EOQ costs in a cancellation clause, the advance procurement funding for an EOQ procurement shall cover, at a minimum, the estimated termination liability of the EOQ procurement.

2.2.3.5. Relationship of Budgeting and Contracting. An end item is fully funded only when funds are budgeted, programmed and available to cover the total estimated cost of the item at the time the procurement action is begun. Contracting, on the other hand, is a part of the execution phase or acquisition process within the framework of a program. The number of contracts required to procure a defense system, the type of contract awarded, and the timing of the award have no bearing upon whether or not an item is fully funded. In executing a program, no procurement of material or equipment, or work or services, therefore, shall be directed or implemented unless the full program amount is available, except for authorized economical order quantity (EOQ) and advance procurement. Similarly, the value of existing contracts for the procurement of material or equipment shall not be increased (through contract modifications) unless the funds are available to fully fund the new contract price. Limitations of funds clauses shall not be used as a mean of avoiding the requirement to fully fund procurement programs. (Note that this guidance does not affect the proper use of limitations of funds clauses in incrementally funded development contracts.) For multiyear contracts, the test of full funding does not include the cancellation ceiling associated with items in the FYDP to be procured in fiscal years not yet funded (that is, beyond the budget year). Multiyear contracts may not be awarded unless the contract and the multiyear program are fully funded within the approved FYDP funding.

2.3 Multiyear Procurement (010203)

2.3.1. Multiyear procurement (MYP). This is a generic term describing the process, planning, and contract under which the government may contract for the purchase of supplies or services for more than one, but not more than five, program years. Such a contract may provide that performance during the second and subsequent years of the contract is contingent upon the appropriation of funds, and may provide for a cancellation payment to be made to the contractor if such appropriations are not made. Multiyear procurements are budgeted and funded annually.

2.3.2. Statutory Requirements. Section 2306b of title 10 of the United States Code and section 8008 of the annual DoD Appropriations Act, require that approval, initiation, and execution of a multiyear contract follow certain guidelines.

2.3.2.1. MYP approval is predicated on:

2.3.2.1.1. Substantial Savings. The use of a multiyear contract will result in substantial savings of the total anticipated costs of carrying out the program through annual contracts.

2.3.2.1.2. Stability of Requirement. The minimum need for the property to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, procurement rate, and total quantities.

2.3.2.1.3. Stability of Funding. There is a reasonable expectation that throughout the contemplated contract period, the head of the agency will request funding for the contract at the level required to avoid contract cancellation.

2.3.2.1.4. Stable Design. There is a stable design for the property to be acquired and the technical risks associated with such property are not excessive.

2.3.2.1.5. Realistic Cost Estimates. The estimates of the cost of the contract and the anticipated cost avoidance through the use of a multiyear contract are realistic.

2.3.2.1.6. National Security. Use of a multiyear contract will promote the national security of the United States.

2.3.2.2. In addition to the approval criteria, Congress requires that:

2.3.2.2.1. MYP contracts cannot be initiated for any system or component thereof if the value of the MYP contract would exceed \$500.0 million unless specifically provided for in an Appropriations Act and an Act other than an Appropriations Act.

2.3.2.2.2. Proposed legislation and funding must accompany the MYP request in the President's budget submission; or the MYP request must be formally submitted as a budget amendment.

2.3.2.2.3. Funds appropriated for the purchase of an end item under a multi-year contract may only be used for a complete and usable end item.

2.3.2.2.4. Funds appropriated for advanced procurement under a multi-year contract may only be used to fund the long lead items necessary for a complete and usable end item planned and budgeted for a subsequent fiscal year. Advanced procurement funds may also be used for economic order quantity procurements in connection with a multi-year contract when authorized by law.

2.3.2.2.5. Congressional defense committees must be notified at least 30 days in advance of a proposed contract award that: employs economic order quantity procurements in excess of \$20.0 million in any one year of the contract; employs advance procurement leading to a multi-year procurement contract that employs economic order quantity procurement in excess of \$20.0 million in any one year; or includes an unfunded contingent liability in excess of \$20.0 million.

2.3.2.2.6. A multi-year procurement contract cannot be initiated for which the economic order quantity advance procurement is not funded at least to the limits of the government's liability.

2.3.2.2.7. A multi-year procurement contract must provide for production at not less than the minimum economic rate given the existing tooling and facilities.

2.3.2.2.8. A present value analysis must be used to determine the present value, or real worth, of the multi-year savings. Comparing the multi-year contracting approach to a conventional annual-buy approach derives the savings (see section 8008 for additional (new) requirements).

2.3.2.2.9. The Secretary of Defense must certify to the Congress that the support costs associated with the multiyear procurement with a value greater than \$500 million are fully funded within the Future Years Defense Program (FYDP). The Secretary of Defense in a March 23, 1998 memorandum delegated this certification to the USD Comptroller. Components must submit the certification letter to the USD Comptroller at least 30 days prior to the anticipated contract award for approval, signature, and transmittal to the congressional defense committees.

2.3.2.2.10. Multi-year procurement contracts may provide for cancellation provisions to the extent that such provisions are necessary and in the best interests of the United States. The cancellation provisions may include consideration of both recurring and nonrecurring costs of the contractor associated with the production of the items to be delivered under the contract, but may not include recurring costs associated with unfunded units. The Agency Head and the USD(C) must approve the inclusion of recurring costs in a cancellation ceiling (see paragraph 2.2.3 below).

2.3.2.2.11. Before any multiyear procurement contract that contains a clause setting forth a cancellation ceiling in excess of \$100.0 million may be awarded, the head of the agency concerned shall give written notification of the proposed contract and of the proposed

cancellation ceiling for that contract to the congressional defense committees. The contract may not be awarded until the end of a 30-day waiting period beginning on the date of such notification.

2.3.2.2.11.1. MYP contracts cannot be terminated without a 10-day prior notification to the congressional defense committees.

2.3.3. DoD Requirements.

2.3.3.1. The item should be technically mature, normally having completed RDT&E (including development testing, or equivalent) and Initial Operational, Test and Evaluation (IOT&E), with relatively few changes in item design anticipated. Deliveries of production items will indicate that the underlying technology is stable. This does not mean that changes will not occur but that the estimated cost of such changes is not anticipated to drive total costs beyond the proposed funding profile.

2.3.3.2. Estimates should be based on prior cost history for the same or similar items or proven cost estimating techniques. Normally, production assets should have been delivered in order to obtain actual costs for the comparisons (exceptions include satellites and ships).

2.3.3.3. With the exception of funding for economic order quantity (EOQ) procurement and advance procurement for long lead-time items as defined in section 2.2, multi-year procurement contracts will comply with full funding. The full funding policy shall apply to each individual year of the multiyear contract. Multi-year contracts shall not be used as a vehicle for incrementally funding the items across the fiscal years covered by the contract. The production lots on the contract shall be the same as those described in the budget and advance procurement shall not be used to achieve a higher production rate for the end item. Funds shall not be “borrowed” from the amounts budgeted for items in the early fiscal years of a multi-year contract to begin work on items not budgeted until later fiscal years of the contract.

2.3.3.4. The inclusion of recurring costs in cancellation ceilings is an exception to normal contract financing arrangements and requires approval by the Agency Head (FAR 17.106-3(e)) and the USD Comptroller.

2.3.3.5. An exception, to be approved by the USD Comptroller, is needed to structure a contract with an unfunded cancellation ceiling. Justification explaining why an unfunded cancellation ceiling is the chosen acquisition strategy should be provided. This justification should specify what costs comprise the unfunded cancellation ceiling and why these costs are not funded under the full funding policy.

2.3.3.6. In keeping with the DoD policy of not relying upon industry to finance the cost of Defense programs, even on a temporary basis, the use of unfunded cancellation ceilings on multi-year contracts shall be rare and shall not be unreasonably large relative to the total budget for any individual fiscal year.

2.3.3.7. Funds obligated for multiyear contracts must be sufficient to cover any potential termination costs. The costs of cancellation or termination may be paid from (1) appropriations originally available for the performance of the contract concerned; (2) appropriations currently available for procurement of the type of property concerned, and not otherwise obligated; or (3) funds appropriated for those payments.

2.4 Buy-to-Budget for Acquisition of End Items (010204)

2.4.1. In accordance with United States Code Title 10, Section 2308, the head of an agency making the acquisition may acquire a higher quantity of the end item than the quantity specified in applicable Appropriations Acts if the following conditions are met:

2.4.1.1. The agency has an established requirement for the end item that is expected to remain substantially unchanged throughout the period of the acquisition.

2.4.1.2. It is possible to acquire the higher quantity of the end item without additional funding because of production efficiencies or other cost reductions.

2.4.1.3. The amount of the funds used for the acquisition of the higher quantity of the end item will not exceed the amount provided under that law for the acquisition of the end item.

2.4.1.4. The amount provided is sufficient to ensure that each unit of the end item acquired within the higher quantity is fully funded as a complete end item.

2.4.2. For noncompetitive acquisitions, the acquisition of additional quantities is limited to not more than 10 percent of the quantity approved in the justification and approval prepared in accordance with United States Code Title 10, Section 2304, and Federal Acquisition Regulation Part 6.

2.4.3. The agency head must notify the congressional defense committees of a decision to buy more items than specified in an Appropriations Act not later than 30 days after the date of the decision.

2.5 Transportation (010205)

2.5.1. First Destination Transportation (FDT) is that transportation required to deliver new, an upgraded model, or recapitalized production items from the manufacturer's plant or source of procurement to the first point of delivery where the Military Service or Defense Agency takes possession and/or ownership of that item. The procurement source, as used herein, is any supplier outside the DoD supply system or any DoD industrial activity that fabricates new materiel. The procurement source or the first point of delivery may be in the Continental United States (CONUS) or overseas. FDT is not applicable to components or items reworked by an industrial activity. In the case where the Government accepts the production item at the manufacturer's plant or source of production and legally owns the item, FDT extends to the first point of delivery for either use or storage by the Military Service or Defense Agency. For shipments destined to overseas

locations that will enter the Defense Transportation System, FDT terminates at the port of embarkation (CONUS or overseas).

2.5.2. Second Destination Transportation (SDT) is any transportation other than FDT

2.5.3. Budgeting Responsibilities for Transportation

2.5.3.1. Transportation of Supply Management Materiel of the Defense Working Capital Funds. Transportation among the 50 states is financed by the supply management business area responsible for the shipment. Transportation of supply management standard items overseas is financed by the appropriation or fund ordering the materiel if within the definition of FDT, otherwise it is financed as SDT. Transportation of DWCF nonstandard items overseas is financed in the same manner as transportation of standard items overseas except for items that are shipped on a free-on-board (FOB) destination basis. In this case, the overseas shipment transportation cost is included in the cost of the nonstandard item and no additional transportation charges should be incurred for the overseas shipment.

2.5.3.2. Transportation of Items Procured by Other Than Procurement and O&M Appropriations, or Defense Working Capital Funds. In general, FDT is financed by the appropriation, which financed acquisition of the item, i.e., RDT&E appropriations for RDT&E materiel and Military Construction appropriations for items that are shipped to support such construction projects. All over-ocean shipment of subsistence items financed by the Military Personnel appropriations is considered as an exception and is financed as SDT.

2.5.3.3. Transportation of Items Procured by Procurement Appropriations. FDT is normally financed by the Procurement appropriation that financed acquisition of the item. SDT is normally financed by the Operation & Maintenance (O&M) appropriations. The following additional guidance applies:

2.5.3.3.1. Transportation costs integral to production contract price such as FOB destination charges are considered part of the end item unit price and are financed by the procurement appropriation that financed acquisition of the item.

2.5.3.3.2. All transportation of government furnished equipment (GFE) and government furnished materiel (GFM) prior to installation into an end item is considered FDT and is financed by the procurement appropriation that financed acquisition of the item.

2.5.3.3.3. The transportation of items that are not owned by DoD - such as nuclear materials and warheads that DOE provides to DoD but DOE retains ownership - is considered FDT and is financed by the procurement appropriation that financed the acquisition of the end item into which the item will be incorporated.

2.5.3.4. Transportation of Items Procured by O&M Appropriations. Transportation is financed by the O&M appropriation according to the FDT and SDT definitions.

2.6 Engineering Change Orders (010206)

Engineering change orders should be funded commensurate with the level of risk in the program.

2.7 Factory Training (010207)

Factory training course costs for initial cadre training are considered investment costs and should be budgeted and funded in the investment appropriation and the specific program used to procure the development, acquisition, or modification of the related end item. Temporary Duty (TDY) travel costs of military or civilian personnel attending factory training courses are funded in the Operation and Maintenance appropriations. Factory training courses acquired for end items no longer in production are to be funded in the Operation and Maintenance appropriations.

2.8 Interim Contractor Support (010208)

Interim contractor support (ICS) is the maintenance and support of a new weapon system provided by a commercial vendor pending transition to organic support. Because ICS is a major component of the initial logistics support of a newly fielded system and integral to program acquisition, ICS funding requirements should be budgeted in the Procurement appropriations. However, ICS is intended to provide support for the brief period between initial item deployment and the permanent organic support. All acquisition strategies should attempt to minimize ICS requirements and duration. ICS will only be funded in Procurement appropriations until the organic support date specified in the acquisition program baseline is achieved. Continued funding of ICS after the baseline support transition date will be approved on an exception basis.

2.9 Commercial Off-the-Shelf (COTS) and Non-Developmental Item (NDI) Procurement (010209)

Items purchased directly from a commercial source that can be utilized without alteration or modification are classified as COTS or NDI. All COTS and NDIs, including the first article and associated first article acceptance testing should be funded in the Procurement or O&M appropriations, as determined by the Expense and Investment criteria. If an end item requires design and development in order to accept the COTS or NDI, or if Operational Test & Evaluation (OT&E) is required to determine military suitability and effectiveness; or if Live Fire Test & Evaluation (LFT&E) is required to determine whether the COT/NDI possesses survivability and lethality characteristics needed by operational forces, then the entire effort is not COTS or NDI, and funding for that effort should be budgeted in RDT&E. If a COTS or NDI is required for RDT&E test purposes, the cost is funded in RDT&E.

2.10 Spares and Repair Parts (010210)

2.10.1. This Section provides instructions applicable to funding requests for spares and repair parts procured with direct appropriations in the Procurement Title.

2.10.1.1. Initial Spares and Repair Parts. Initial spares and repair parts will include those repairable components, assemblies, and subassemblies required as initial stockage at all levels including the pipeline to permit fielding of new end items. Whole spare engines will be classified as initial spares through the life of system. Funding will be budgeted based on a first year obligation rate of 92 percent.

2.10.1.2. War Reserve Spares and Repair Parts. War reserve material (WRM) spares and repair parts for initial stockage will be budgeted in replenishment except for whole spare engines in accordance with the above definitions. See Section 2.17, Defense Working Capital Funds - War Reserve Materiel, for additional budgeting WRM policies.

2.10.2. The Operation and Maintenance (O&M) accounts will finance the purchase of depot level repairables (DLRs) and consumable repair parts, primarily through the Defense Working Capital Fund (DWCF), for maintenance of all Class IX equipment (excluding medical peculiar repair parts).

2.10.3. Spares budgeting can be aggregated by weapon system except for Selected Acquisition Report (SAR) systems.

2.11 Direct and Reimbursable Budget Plans (010211)

2.11.1. Direct Budget Plan. This plan includes those items of materiel to be purchased for delivery to service inventory and those procurement programs that support the acquisition of materiel for US forces. Financing for the direct budget plan is derived from: new budget authority provided by the Congress, the transfer of resources from other appropriations, and reimbursements. When dealing with reimbursements involving the sale of materiel, three situations can arise:

2.11.1.1. Replacement-in-Kind. In this situation an item of materiel is sold and will require replacement with an item of the identical type, model, and series or modified version of the same basic model (i.e., the sale of C-130E aircraft and purchase of C-130E aircraft). In this situation the reimbursement from the sale will be included in reimbursable financing and the buy-back of the item in the reimbursable program. There will be no reflection of this transaction in the Direct Budget Plan. For an ammunition item, the replacement-in-kind policy permits replacement of a round with any round that provides the same warfighting mission capability, providing the round to be purchased has been previously approved by the Congress for procurement, and the inventory objective presented to the Congress is not exceeded.

2.11.1.2. Replacement. In this situation an item of materiel is sold and will require replacement to compensate DoD inventories for the resultant loss of capability or readiness. Because of one or more circumstances, the replacement item will not be identical to the item sold. It must, however, be a later series or modified version of the same basic model (e.g., sale of a C-130A aircraft and purchase of a C-130E aircraft) or an acceptable substitute item used in the requirements computations (e.g. sale of an M-48 tank and purchase of an M-60 tank). In this situation the reimbursement from the sale will be included under reimbursable financing but the buy-back of the replacement item must be shown under the Direct Budget Plan and must comply with reprogramming requirements.

2.11.1.2.1. Items sold from inventory with a unit cost less than \$5,000 will be treated as a replacement-in-kind if an improved model of the same end item is being procured, it provides the same warfighting capability, and the inventory objective presented to Congress is not exceeded.

2.11.1.2.2. If an item is eligible for replacement or replacement-in-kind and is not replaced, the reimbursement should be treated as a "free asset."

2.11.1.3. Free Assets. In this situation an item of materiel is sold and will not require replacement. All free assets from FMS transactions are required to be deposited into the Miscellaneous Receipts of the US Treasury in accordance with 10 U.S.C. 114(c)(2).

2.11.2. Reimbursable Budget Plan. This plan includes those items of materiel to be purchased for delivery to and use by customers. Financing for the reimbursable budget plan is derived from:

2.11.2.1. Anticipated reimbursement based upon customer orders received for items (not stocked by or purchased for procuring service use) to be purchased for direct delivery to a customer. (Direct citation of customer funds for procurement against this type of order is encouraged where common components and/or common assembly with service production of similar items are not involved.)

2.11.2.2. Anticipated reimbursement based upon customer orders received or to be received for items common to the procuring service and customer, for direct delivery to the customer.

2.11.2.3. Where the materiel item is to be made available from on-order quantities under an existing contract of a Military Department, the sales transactions will be reflected as reimbursable transactions. The quantities and costs of the replacement procurement will be included in the reimbursable program.

2.11.2.4. Where the materiel item is to be made available directly from a contract awarded after the date of the sales agreement and the contract includes a particular quantity of the item to fulfill the sales agreement, the transaction will be reflected as a direct cite transaction.

2.11.2.5. In "Replacement-in-Kind" situations, the proceeds from the sale will be included under reimbursable financing and the buy-back program will be included in the Reimbursable Budget Plan.

2.11.2.6. In "Replacement" situations, the proceeds from the sale will be included under reimbursable financing but the buy-back program will be included under the Direct Budget Plan (not the Reimbursable Budget Plan).

2.11.2.7. Reimbursements from customer orders for secondary items, because of the nature of such commodities and the way they must be managed, will always be treated as a generic category requiring, by definition, "replacement-in-kind." Accordingly, the proceeds from such transactions will be included under reimbursable financing and the buy-back of an equivalent value of such commodities will be included in the Reimbursable Budget Plan.

2.12 Budgeting for Information Technology and Automated Information Systems (010212)

2.12.1. Information Technology and Automated Information Systems that are not embedded in weapons systems and/or major end item procurements are budgeted according to the investment and expense criteria (see 2.1) and the appropriation or fund's purpose.

2.12.2. The correct appropriation for budgeting an IT effort is dependent on the activity and the underlying tasks that make up the IT effort. RDT&E activities and Working Capital Fund activities follow unique procedures as noted in the following paragraphs. All other activities budget for IT efforts based solely on the underlying purpose for the IT effort.

2.12.2.1. An IT effort may require funding for more than one appropriation. The underlying purpose for each discrete task within an IT effort determines the correct appropriation for budgeting of that task. An effort that is so broadly defined that it contains separate tasks appropriate to budgeting in different appropriations should be separated into discrete tasks, each of which is budgeted in the correct appropriation.

2.12.2.2. The following guidelines are provided to help determine which appropriation to use:

2.12.2.3. RDT&E appropriations: Development, test and evaluation requirements, including designing prototypes and processes, should be budgeted in the RDT&E appropriations. The RDT&E funds should be used to develop major upgrades increasing the performance envelope of existing systems, purchase test articles, and conduct developmental testing and/or initial operational test and evaluation prior to system acceptance. In general, all developmental activities involved in bringing a program to its objective system are to be budgeted in RDT&E.

2.12.2.3.1. Reaching the objective system, as defined in the requirements documents, is a critical determinate. Some software programs, particularly those following a spiral or incremental development pattern, may be approved for initial fielding even though the early capability is below the objective system requirements. The follow-on development and test activities required to reach the objective system performance will be budgeted in RDT&E.

2.12.2.3.2. Commercial-off-the-shelf (COTS) systems that require engineering design, integration, test, and evaluation to achieve the objective performance will be budgeted in RDT&E.

2.12.2.3.3. The acquisition, operation and maintenance of IT systems that are used exclusively to support RDT&E activities will be budgeted and funded within an RDT&E appropriation.

2.12.2.4. Procurement appropriations: Acquiring and deploying a complete system with a cost of \$250,000 or more is an investment and should be budgeted in a Procurement appropriation. Complete system cost is the aggregate cost of all components (e.g., equipment, integration, engineering support and software) that are part of, and function together, as a system to meet an approved documented requirement. For modification efforts, only the cost of the upgrade (e.g., new software, hardware, and technical assistance) is counted towards the investment threshold. The total cumulative cost of the system is not considered when deciding what appropriation to use to fund modernization.

2.12.2.4.1. Procurement of fully developed and tested modification kits and associated installation, including technical assistance is financed from Procurement appropriations. Equipment purchased after successful system testing and a favorable fielding decisions is funded with procurement dollars.

2.12.2.4.2. Proprietary software carries a copyright from the vendor that prohibits duplication or modification. Essentially, the purchaser is buying a license from the vendor to use the software on a particular system. Proprietary software is an investment, subject to the expense-investment criteria, unless it is financed on an "annual fee" basis. In the latter case, it is an expense item properly financed in RDT&E or O&M.

2.12.2.5. O&M appropriations: Expenses incurred in continuing operations and current services are budgeted in the O&M appropriations. Modernization costs under \$250,000 are considered expenses, as are one-time projects such as developing planning documents and studies.

2.12.2.5.1. Software releases categorized as iterations on the basic release and not involving significant performance improvements or extensive testing are considered a maintenance effort. Minor improvements in software functionality which are accomplished during routine maintenance may also be O&M funded.

2.12.2.5.2. Items purchased from a commercial source that can be used without modification (e.g., COTS and nondevelopmental items) will be funded in either the Procurement or O&M appropriations, as determined by the expense and investment criterion.

2.12.2.6. The IT systems developed and acquired through the Defense Working Capital fund will be reflected in the Capital Budget if the system is \$100,000 or more. Systems costing less than \$100,000 are funded through the Operating Budget.

2.12.2.7. Capitalization of Software Cost. For accounting purposes, the total cost of software should be capitalized when the total cost of the system exceeds the Department's capitalization threshold amount, which is currently \$100,000. Capitalization of software is not dependent on the appropriation used to fund its purchase or development. Further information on capitalization may be found in the DoD FMR, Volume 4, Chapter 6, paragraph 060210.

2.13 Research, Development, Test and Evaluation (RDT&E) - Definitions and Criteria (010213)

2.13.1. Definitions. The term "research and development (R&D)" is intended broadly to include the work performed by a government agency or by private individuals or organizations under a contractual or grant arrangement with the government. It includes R&D in all fields, including the physical sciences, engineering, etc.

2.13.1.1. Research is systematic study directed toward fuller scientific knowledge or understanding of the subject studied.

2.13.1.2. Development is systematic use of the knowledge and understanding gained from research, for the production of useful materials, devices, systems, or methods, including the design and development of prototypes and processes.

2.13.2. General Criteria. When, after consideration of the following criteria, there is doubt as to the proper assignment of costs between appropriations, the issue should be resolved in favor of using RDT&E funding. In general, the types of costs to be financed by RDT&E and related appropriations are:

2.13.2.1. RDT&E Appropriations.

2.13.2.1.1. RDT&E will finance research, development, test and evaluation efforts performed by contractors and government installations, including procurement of end items, weapons, equipment, components, materials and services required for development of equipment, material, or computer application software; its Development Test and Evaluation (DT&E); and its Operational Test and Evaluation (OT&E) as provided for in paragraph 2.13.3.5 (Test Articles and Test Support) below.

2.13.2.1.2. The operation of R&D installations and activities engaged in the conduct of R&D programs, including direct and indirect efforts, expense and investment costs.

2.13.2.1.3. The acquisition or construction of industrial facilities costing less than \$750,000 at government owned, government operated (GOGO) facilities under the criteria of DoD Directive 4275.5 as provided for under 10 U.S.C. 2805 (unspecified minor construction). Use of RDT&E funds for acquisition and construction at contractor owned or contractor operated government facilities is authorized under 10 U.S.C. 2353, Contracts; Acquisition, Construction, or Furnishings of Test Facilities and Equipment.

2.13.2.2. Related Appropriations

2.13.2.2.1. All construction at R&D installations and activities other than that covered above will be funded in the Military Construction appropriations.

2.13.2.2.2. Equipment and material approved for production and intended for operational use or inventory upon delivery will be funded in the Procurement appropriations. Product improvement within the current performance envelope on systems in production, will be funded in the Procurement appropriations as long as no development or operational tests by an independent operational test agency are required.

2.13.2.2.3. Family housing construction, operation and maintenance at R&D installations and activities will be funded in the Family Housing appropriations.

2.13.2.2.4. Expenses of Headquarters R&D management, organizational management analyses, test and evaluation for system sustainment personnel and command support, and product improvement within the current performance envelope for systems out of production will be funded in the Operation and Maintenance (O&M) appropriations.

2.13.3. Specific Determinations. Additional details on the determination of proper funding for specific items or efforts are provided in the following paragraphs.

2.13.3.1. Organizational Funding Criteria.

2.13.3.1.1. The RDT&E appropriation will finance expenses and investments for the operation and maintenance of R&D organizations, equipment (including R&D aircraft, ships and ship-type vehicles), installations and activities (including those operated by contract).

2.13.3.1.2. Expenses for the support of tenant activities will be funded in accordance with the following:

2.13.3.1.2.1. Expenses for the support of tenant activities at R&D installations and activities will be RDT&E funded by the host activity, pending the establishment of reimbursable arrangements. Subsequent to the establishment of reimbursable arrangements, expenses for the support of the tenant will be funded by the tenant or as mutually agreed with the host.

2.13.3.1.2.2. Where reimbursable arrangements exist, expenses for the support of R&D activities or organizations that are tenant activities at installations having a primary function other than research, development, test and evaluation will be funded by RDT&E.

2.13.3.1.2.3. Expenses for the support of R&D activities or organizations which are tenant activities at installations having a primary function other than R&D will be funded by the host, pending the establishment of reimbursable arrangements.

2.13.3.1.3. Expenses of R&D management and administrative organizations at major systems commands, headquarters organizations and administrative organizations at DoD component departmental headquarters levels (except for the Defense Advanced Research Projects Agency and the Missile Defense Agency) will be financed in the Operation and Maintenance (O&M) appropriations.

2.13.3.1.4. Expenses and investments for the operation and maintenance of major range and test facilities, as defined under DoD Directive 3200.11, that conduct developmental and operational testing as a primary mission as determined by workload, will be financed by the RDT&E appropriation. Major range and test facilities that primarily support testing after system acceptance for operational use or training exercises will be financed in the O&M appropriations.

2.13.3.1.5. Costs of evaluating organizational structure and distribution of function, administrative operating policies, procedures, methods and systems (management studies) and applications of the management sciences to improve effectiveness in carrying out assigned functions are financed in the O&M appropriations.

2.13.3.1.6. Expenses of operational military forces having a primary mission other than R&D and not specifically assigned to R&D that may, from time to time, be engaged in or support R&D activities, will be funded in the O&M appropriations.

2.13.3.2. Facilities Construction and Modification. When it is determined that DoD financing of real property projects is required, the projects shall be programmed, budgeted, and financed as follows:

2.13.3.2.1. Government-Owned, Government-Operated (GOGO) Facility on Government Land. When GOGO property is to be constructed on government-owned land, such construction will normally be financed as a Military Construction project. Construction of facilities for RDT&E costing \$750,000 or less may be funded with RDT&E appropriations. Such expenditures are authorized under 10 U.S.C. 2805 (unspecified minor construction). All minor construction must result in a complete and usable facility. In no event are two or more construction projects or minor and major construction projects to be contrived to be a usable facility. Construction projects at R&D installations and activities whose costs are greater than \$750,000 will be financed by the Military Construction appropriation in accordance with Chapter 6.

2.13.3.2.2. Government-Owned, Contractor-Operated (GOCO) Facility

2.13.3.2.2.1. When the GOCO facility is on a military installation (post, camp or station) the primary funding is the Military Construction appropriation. However, if the facilities are contractor-operated, and the contractor is solely responsible for the complete and total operation and maintenance of the facility complex, construction may be financed in Procurement or RDT&E in accordance with DoD Directive (DoDD) 4275.5 and 10 U.S.C. 2353 criteria. New construction or improvements having general utility are not authorized under 10 U.S.C. 2353.

2.13.3.2.2.2. When GOCO facilities are constructed on government property other than a military installation, the Procurement or RDT&E appropriation will finance the construction in accordance with DoDD 4275.5 criteria.

2.13.3.2.3. Contractor-Owned, Contractor-Operated Facility. Under 10 U.S.C. 2353, a research or development contract may provide for the acquisition, construction, or furnishing of facilities and equipment that are necessary for the performance of the contract to the contractor. Improvements having general utility or new construction are not authorized under 10 U.S.C. 2353. Facilities that would not be readily removable or separable without unreasonable expense may not be installed or constructed on property not owned by the government, unless the contract contains:

2.13.3.2.3.1. A provision to reimburse the government for the fair value of the facilities;

2.13.3.2.3.2. An option for the government to acquire the underlying land; or

2.13.3.2.3.3. An alternative provision that protects the interests of the United States in the facilities.

2.13.3.2.4. All proposed RDT&E real property facilities will be identified to Congress in accordance with Chapter 5, Section 050402.

2.13.3.2.5. The Family Housing appropriation will provide for Family Housing construction and Family Housing O&M at R&D installations and activities.

2.13.3.3. Equipment. RDT&E appropriations will finance the development, design, purchase, installation, and acceptance testing of equipment or instrumentation required to support RDT&E activities. Costs of specialized equipment and instrumentation required for the support of research, development, test and evaluation contractor effort at government-owned, contractor-operated (GOCO) activities will be financed in RDT&E. DoD Directive 4275.5 applies. Installation costs include directly related foundations, shielding, environmental control, weather protection, structural adjustments, utilities and assets. Installation costs are excluded from RDT&E financing if the effort is accomplished concurrently with a military construction project, and in these instances, the military construction appropriation finances the installation cost. To the extent that the equipment installation occurs at a government activity and the cost exceeds \$500,000, no new facility or physical outer dimension expansion to an existing facility shall result from an RDT&E-funded equipment installation project.

2.13.3.4. Establishment of Pilot Line and Tooling Requirements

2.13.3.4.1. The costs associated with establishing an initial pilot line, which are necessary to acquire a limited number of representative items for test purposes, including the test items, will be financed by RDT&E. All items and costs associated with maintaining the initial pilot line beyond the quantity sufficient to test for operational acceptability will be financed from other appropriations.

2.13.3.4.2. When an end item under development has also been approved for procurement, operational use, or included in the force structure, then hard tooling requirements common to both the development and procurement phases will be financed by Procurement appropriations. When an end item under development has not been approved for procurement, operational use, or included in the force structure, then tooling and other preliminary production facilities required to produce realistic development items for test and evaluation will be financed by RDT&E, even though such tooling and facilities might later be used for production.

2.13.3.5. Test Articles and Test Support

2.13.3.5.1. As a general rule, the procurement of test articles and test support, including "Special Support" costs and "Command Support" costs (see Glossary), for all RDT&E tests preceding and leading to acceptance for operational use will be RDT&E funded. Test articles and components or materials to be assembled into test articles shall be budgeted in accordance with the need for them in the development and test program. Purchases of fully configured or near fully configured test articles (e.g., off-the shelf drones) should be budgeted in accordance with the need for full units to test.

2.13.3.5.1.1. Development and preproduction prototypes (RDT&E financed) will be used for Developmental Test and Evaluation (DT&E), including scientific, technical and weapons effects tests. DT&E programs must provide complete and reliable data that can be used to estimate the military utility of new items as a basis for considering decisions to continue engineering development. To this end, it is essential to plan, program, budget and fund for an adequate number of R&D articles for development, test and evaluation that will be fabricated, manufactured or produced in a realistic preliminary production manner and thus provide such data.

2.13.3.5.1.2. Development and preproduction prototypes (RDT&E financed) will be used for OT&E. When so used, they must be sufficiently representative of the expected production items' to provide from OT&E a valid estimate of production items operational effectiveness and suitability (including compatibility, interoperability, reliability, maintainability, and logistic and training requirements).

2.13.3.5.1.3. Low Rate Initial Production (LRIP) assets. LRIP, as defined in DoD 5000.2-R, is to provide production configured or representative articles for operational test (RDT&E funded, see paragraph (2)); establish an initial production base for the system (procurement funded); and permit an orderly increase in production rate for the system (procurement funded). If the asset will be used for developmental or operational testing by an independent operational test agency, then it should be procured with RDT&E funds. The LRIP quantity will be determined as part of the Production and Deployment approval (Milestone C). RDT&E funds will be budgeted to procure the items required for operational test to facilitate the testing of LRIP assets. LRIP test articles must be specifically identified in the budget documentation. Should LRIP items beyond the test quantity be required, they would need to be included in the Milestone C decision and a determination made at that time. Ships and space systems do not have LRIP periods like other systems. Special guidance relating to the transition of ships and space systems from RDT&E to Procurement is provided in paragraph 2.13.3.9 of this section.

2.13.3.5.2. Conduct of testing that is not associated with RDT&E, or testing conducted after fielding or acceptance for operational use, such as the examples noted below, will be financed in the Procurement or O&M appropriations, as appropriate.

2.13.3.5.2.1. Acceptance, quality control and surveillance testing of articles obtained for other than RDT&E purposes.

2.13.3.5.2.2. Routine testing in connection with logistic support.

2.13.3.5.2.3. Testing related to the operation and maintenance of equipment and material acquired for use under appropriations other than RDT&E.

2.13.3.5.2.4. Testing required to prove the capability of facilities to produce items which have been approved for production will be funded by procurement as part of the initial acquisition cost.

2.13.3.5.3. The acquisition of commercial or nondevelopmental items for testing and operational evaluation that do not require RDT&E engineering, design or integration effort will be financed by O&M or Procurement appropriations (as determined by the Expense and Investment criteria). O&M appropriations will finance personnel and command support costs for test and evaluation of commercial and nondevelopmental items by field units for doctrine, operational, or organizational purposes. If the commercially available item is modified and requires testing prior to approval for service use or inventory it is to be funded in RDT&E as are all developmental items.

2.13.3.5.4. Articles (including end items, weapons, equipment, major test vehicles such as ballistic missile boosters or upper stages, components and materials) of types regularly procured to meet established general requirements such as operational training, operational use, or inventory which are assigned or allocated on a priority basis for use in support of approved R&D programs and which are not consumed in testing, may be financed by Procurement or O&M appropriations using the expense and investment criteria. In addition, excess items that can be made available on a priority basis from existing inventory will be reassigned for use in R&D test and evaluation programs without reimbursement. However, all items, expected to be consumed in R&D test and evaluation will be financed by RDT&E appropriations.

2.13.3.5.5. Consumable rounds of ammunition or rounds of similar tactical missiles otherwise procured in quantity for inventory under existing procedures, may be issued on a priority basis for use in R&D testing without reimbursement.

2.13.3.5.6. The acquisition of test articles will be financed by O&M or Procurement appropriations (as determined by the Expense and Investment criteria), and personnel and command support costs will be financed by O&M appropriations for all test and evaluation (T&E) subsequent to acceptance for operational use and T&E to demonstrate the operational employment or develop operational tactics (i.e., subsequent to RDT&E efforts).

2.13.3.6. Modification and Refurbishment of Test Articles.

2.13.3.6.1. Costs associated with modifying or reconfiguring an existing item for R&D test purposes will be funded in RDT&E. When an item that has been diverted from another use is not consumed in R&D testing, any costs necessary to return the item to serviceable condition or to its pre-existent configuration will be financed in RDT&E.

2.13.3.6.2. If an article initially acquired with RDT&E funds as part of an RDT&E test effort is still available at the completion of the test program, it may be reassigned for operational use or inventory. The cost to modify such an article for operational use would be borne by the Procurement and O&M appropriations, as appropriate.

2.13.3.7. Product Improvement.

2.13.3.7.1. "Product improvement" of major end items and major components of major end items currently in production or in the operational inventory, is subject to the following:

2.13.3.7.1.1. Redesign of an item to increase the current performance envelope, including related development, test and evaluation effort, will be financed in RDT&E.

2.13.3.7.1.2. Engineering services or related manufacturing efforts applied to an item currently in production to extend its useful military life within the current performance envelope should be funded by Procurement appropriations as long as no developmental testing (DT) or operational test and evaluation (OT&E) by an independent operational test agency is required. If DT or OT&E by an independent operational test agency is required, RDT&E finances the improvement. The phrase "an item currently in production" implies that the item has end item procurement funding in the year the product improvement effort is to take place.

2.13.3.7.1.3. Engineering services or related manufacturing efforts applied to an out-of-production, but still operational item to extend its useful military life within the current performance envelope should be financed by O&M appropriations as long as no developmental testing (DT) or operational test and evaluation (OT&E) by an independent operational test agency is required. If DT or OT&E is required by an independent operational test agency, RDT&E finances the improvement.

2.13.3.7.1.4. In both cases (2) and (3) above, the determination that the improvement is "within the current performance envelope" and that "no development testing (DT) or operational test and evaluation (OT&E) by an independent operational test and evaluation agency is required" should be determined after formal coordination with the Director, Operational Test and Evaluation.

2.13.3.7.2. While existing off-the-shelf equipment may be procured with Procurement funds, items that require engineering design, integration, test, or evaluation effort shall be procured with RDT&E funds in sufficient numbers to support such effort.

2.13.3.7.3. Costs of fully developed and tested modification kits and associated installation costs should be financed from Procurement appropriations. If DT or OT&E by an independent operational test agency is required, RDT&E finances the RDT&E effort and the kits required for RDT&E testing. Procurement funds would then be used to procure the follow-on kits.

2.13.3.7.4. Aircraft engine component improvement costs are budgeted in the RDT&E appropriations to provide for continuing improvements in the aircraft engines in the areas of reliability, maintainability, durability, correction of Service-revealed deficiencies, safety of flight, time-between-overhaul, etc. "Component Improvement" is established at the point in time when:

2.13.3.7.4.1. There has been a Government acceptance of the first procurement funded engine, and

2.13.3.7.4.2. The engine has successfully completed stringent qualification or verification testing to demonstrate initial production suitability subject to:

2.13.3.7.4.2.1. Compliance with contractual specifications, performance guarantees and military specifications, as applicable to individual Service requirements;

2.13.3.7.4.2.2. Completion of endurance testing representative of the anticipated Service use to include completion of specified post test inspections, certification, and penalty runs;

2.13.3.7.4.2.3. Demonstration of prescribed performance capability; and

2.13.3.7.4.2.4. Accomplishment of prescribed durability, reliability, and environmental testing.

2.13.3.8. Ships and Ship-type Vehicles.

2.13.3.8.1. An experimental test bed type of ship or an experimental ship will be financed by RDT&E appropriations. This will include all such experimental ships required to support an approved R&D program or for the purpose of experimenting with new or radical ship concepts or to demonstrate the military usefulness of new ship designs, configurations or fabrication techniques, when the ship-type test vehicle itself can be predicted to be consumed or expended in testing, or to have little or no operational usefulness in the force structure. Prototype ships, when designated by the Secretary of Defense, are included.

2.13.3.8.2. A ship of demonstrated, conventional concept and design having a high probability of military usefulness and inclusion in the force structure, even though first of a class, will be constructed using procurement funds. A ship of demonstrated conventional concept and design temporarily or permanently assigned from inventory to support R&D effort will be furnished without reimbursement, but the cost of providing all R&D types of equipment or instrumentation, the cost of "nonstandard" modifications of the ship required to make the ship suitable for R&D support, as well as the cost of any related restoration to conventional or operational ship conditions upon release from assignment to R&D, will be financed by RDT&E appropriations.

2.13.3.8.3. Preliminary or contract design for new ship construction will be financed by RDT&E appropriations, including contractor and "field activity" effort costs. Detail design for ships appropriate for procurement funding will be funded by procurement accounts.

2.13.3.8.4. Land-based or sea-based combat system test installations will be financed by RDT&E appropriations.

2.13.3.9. Space Systems. The following guidance describes the circumstances in which RDT&E funds may be used for the acquisition of operational space systems.

2.13.3.9.1. Expendable launch vehicles. The first rocket of a new design is normally used to launch an operational satellite into orbit. This rocket may be financed with either RDT&E or Procurement appropriations. The second and subsequent expendable launch vehicles shall in all cases be financed with Procurement appropriations. The full funding policy shall apply to all expendable launch vehicles budgeted in Procurement appropriations.

2.13.3.9.2. Satellites. The first satellite of a new design is normally placed into operational use. For programs in which satellites are launched individually, the first two satellites may be financed with either RDT&E or Procurement appropriations. The third and subsequent satellites shall in all cases be financed with Procurement appropriations. For programs in which multiple satellites are launched with a single rocket, the satellites comprising the first launch may be financed with either RDT&E or Procurement appropriations depending upon which budgetary approach is most consistent with the contract structure. Satellites for the second and subsequent launches shall in all cases be financed with Procurement appropriations. The full funding policy shall apply to all satellites budgeted in Procurement appropriations. It is expected that satellite programs will make frequent use of advance procurement, combined parts buys, and multiyear contracts to efficiently use funds within the context of the full funding policy. To achieve these efficiencies, advance procurement funding may be budgeted two years (and, in rare instances, three years) prior to the year of full funding. The total advance procurement funding for a satellite should not exceed 20 percent of the unit cost of the satellite.

2.13.3.9.3. Ground Control and Ground Processing Systems. The design and implementation of ground control and ground processing systems is an integral part of the development of new satellite systems. The entire cost of the primary ground system (including off-the-shelf workstations, power supplies, etc., but not including military construction) shall normally be financed with RDT&E appropriations. The cost of backup ground systems shall be financed with Procurement appropriations, and the full funding policy shall apply.

2.13.3.9.4. User Terminals. User terminals for space systems shall transition from RDT&E to Procurement in the same manner as non-space-related communications and electronics equipment.

2.13.3.10. Training Devices. A training device is composed of components and software that have been designed or modified to demonstrate or illustrate a concept or simulate an operational circumstance or environment. The initial or prototype training device and all its support costs through service acceptance for operational use will be funded in RDT&E. RDT&E will not fund beyond the initial system unless more than one full system is required to demonstrate the training device performance. The initial or prototype training device that employs new or off-the-shelf computers and system components, but has training system unique software and interface components, will be developed and procured with RDT&E funds. Typically, these training devices have small quantity requirements and the initial or prototype device is used for operational training. Modifications or updates to existing training devices will normally be funded in the applicable Procurement or O&M appropriation, subject to the expense and investment

criteria. Any necessary development effort for these modifications or updates will be funded in RDT&E.

2.13.3.11. Joint Test and Evaluation.

2.13.3.11.1. The Joint Test and Evaluation (JT&E) program provides quantitative information used for analyses of joint military capabilities and to develop potential options for increasing military effectiveness. The program is complimentary to, rather than part of the acquisition process. A JT&E project brings two or more Military Services or other Components together to: assess Service system interoperability in joint operations; evaluate joint technical and operational concepts, and recommend improvements; increase joint mission capability, using quantitative data for analysis; validate testing methodologies that have joint applications; improve modeling and simulation validity with field exercise data; provide feedback to the acquisition and joint operations communities; and improve joint tactics, techniques, and procedures. JT&E projects focus on improving the warfighter's capability to conduct joint military operations with existing equipment. DOT&E manages the JT&E program and coordinates with Combatant Commanders, the Joint Staff, and the Services to ensure warfighter involvement.

2.13.3.11.2. The JT&E program is financed in the Operational Test and Evaluation (OT&E), Defense appropriation (program element 0605804D). DOT&E funds the costs incurred for the direction, supervision, and performance of activities that are unique to the needs of the JT&E projects. When directed as Executive Agent for a particular JT&E project, the Component, Service or COCOM is responsible for ensuring that all resources necessary for the successful accomplishment of the JT&E project are available to the Joint Test Director (JTD). This includes administrative, management and facilities support for the JTD. The Executive Agent support costs (O&M, Procurement, and RDT&E) are to be programmed and budgeted in accordance with established procedures.

2.13.3.12. Manufacturing Technology. The Department of Defense Manufacturing Technology program, which demonstrates factory application of new or improved technology in producing defense items, will be financed in the RDT&E appropriations.

2.13.3.13. Development Efforts Related to Future Leased Services. When the provider of a leased service that will ultimately be financed in O&M requires initial funding in order to design or develop major changes or improvements to meet the government's requirement for that service, then the costs of such development efforts will be financed in RDT&E.

2.13.3.14. Subsystem Integration into Weapon Systems. Research and development necessary for the integration of subsystems into weapon systems should be financed from the weapon system program. For example, the R&D cost of integrating an electronic warfare black box into an aircraft should be borne by the aircraft R&D program.

2.13.3.15. Engineering change orders should be funded commensurate with the level of risk in the program.

2.14 RDT&E - Incremental Programming and Budgeting Basis (010214)

2.14.1. Purpose.

This Chapter specifies the principles to be followed, and establishes the criteria and definitions to be used, in the preparation of the annual Research, Development, Test and Evaluation (RDT&E) budget estimates on an incrementally funded basis. The incremental budgeting policy provides that only those funds required for work in a given fiscal year shall be included in the RDT&E budget request for that fiscal year for most classes of effort.

2.14.2. Policy.

The annual budget estimates for Research, Development, Test and Evaluation (RDT&E) projects and programs, including developmental and operational test and evaluation programs, are to be prepared on an incrementally programmed basis (as opposed to the fully funded program basis used in preparing procurement budget estimates.)

2.14.3. Guidance.

2.14.3.1. The budget request for DoD projects and programs will be developed and presented in accordance with the following principles:

2.14.3.1.1. Annual estimates of initial financing needed for new major weapon systems and other development programs and projects requiring several years to complete, and which involve contracts spanning more than one year, should be formulated to cover costs expected to be incurred during each fiscal year. Generally this will represent a 9-month or lesser period for the initial, first year increment of a new start program due to the nature and timing of the congressional budget approval. The second and succeeding increments will be programmed and financed for the entire fiscal year. However, the Service or Defense Agency Comptroller must approve extensions of up to 3 months beyond the end of the fiscal year for which funds are requested. In this regard, DoD components should make every effort to align subsequent years' funding requirements on an annual basis coincident with the fiscal year, although it is recognized that there may be circumstances where this will not be feasible. The estimate of the financing required in the budget year to continue development projects must always take into account any changes (such as slippage's) that have occurred. RDT&E funding requirements should be based on forecasted obligations that consider costs and timelines for each milestone and other programmatic event.

2.14.3.1.2. There are requirements in which there is no logical way to divide the work; it is clearly unfeasible to limit the contract to a shorter period; or the planned technical effort is such that no responsible contractor can be found who will accept a contract for a less-than-completion increment. For these type efforts that take longer than 12 months but less than 18 months, the Service or Defense Agency Comptroller may approve financing the total requirement in one fiscal year.

2.14.3.1.3. While it is intended that the foregoing guidelines will be applicable to program execution as well as program formulation, there may be circumstances that could delay the start of an annual increment (such as legal, administrative, or technical problems). The 2-year availability of funds authorized for the Research, Development, Test and Evaluation appropriation provides the necessary flexibility for program execution in those circumstances.

2.14.3.1.4. Engineering change orders should be funded commensurate with the level of risk in the program.

2.14.3.2. Budgeting for Termination Liability on Incrementally Funded RDT&E Contracts. The legal requirements of the Anti-Deficiency Act and the long-standing policy of not committing a successor Congress to a course of action both make it necessary that the unliquidated obligation for an incrementally-funded, multiple-year contract be sufficient at all times to cover the cost of terminating that contract for the convenience of the Government. Budgeting to cover termination liability will not increase the total amount budgeted for the program. It will require that the distribution of funds by fiscal year be shifted more towards the earlier years of the contract than if funds had been budgeted only to cover the actual bill to be paid in each year. The distribution of funds by fiscal year shall be such that, if a contract is terminated at any point during the fiscal year, all termination costs can be financed from the unliquidated obligation on the contract without recourse to reprogramming of funds, supplemental appropriations, or awaiting the appropriation of funds for the succeeding fiscal year's funding increment. All programs shall adhere to this policy with the following two exceptions, both of which are to be used rarely.

2.14.3.2.1. Special Termination Cost Clause (STCC). DoD FAR Parts 249.50170 and 252.249-7000 permit the use of STCC in fixed-price incentive contracts and incrementally funded cost reimbursement contracts. If contracts containing an STCC are terminated before completion, the special termination charges are covered by the unobligated balance of the applicable appropriation, subject to any congressional approval required for reprogramming. The extent to which the STCC can be used is limited to the ability of the Service or Agency to cover expected termination costs from unobligated balances. A recordable obligation under the STCC arises when the contract is actually terminated. If a proposed STCC would require an above threshold reprogramming action when a program is terminated, the approval to use the STCC shall be obtained from the USD (Comptroller) before the contract or contract modification is awarded. All STCCs, regardless of dollar amount, require prior notification of the House and Senate Appropriations Committees.

2.14.3.2.2. Statutory Waivers. The Department is not required to budget for, or obligate funds sufficient to cover, termination liability in connection with an incrementally-funded RDT&E contract if Congress has expressed exempted the program or contract from that requirement. When this situation arises, however, the budget exhibits for the program shall clearly indicate the value of the unfunded termination liability by year for the current year, budget year, and the outyears covered by the FYDP.

2.15 Defense Working Capital Funds - Operating Budget (010215)

The operating budget represents the annual operating costs of an Activity or Component, including depreciation and amortization expenses. Detailed requirements and guidance can be found in Chapter 9.

2.16 Defense Working Capital Funds - Mobilization/Surge Costs (010216)

2.16.1. Separate funding is provided for those costs related to mobilization and wartime surge capacity that would not otherwise be incurred to meet peacetime requirements. The prices of services and products provided to peacetime customers exclude these costs to more appropriately reflect consistent pricing between competing activities. Similarly, better visibility of surge or readiness requirements is provided to decision makers at every level. These “mobilization” costs, although funded and justified as direct appropriations to Component budgets, are elements of business area costs and must be fully justified on the SM-3 and/or Fund-30 schedules. Detailed requirements and guidance can be found in Chapter 9, section 090103.

2.16.2. Unutilized capacity that is associated with the ability to satisfy a projected surge capability is considered a mobilization requirement that is to be funded by appropriated funds provided by the DoD Component having management responsibility for the Fund activity. Costs applicable to unutilized plant and equipment, such as depreciation, or maintenance, are not to be charged to the customers of the Fund activity.

2.16.3. The justification for costs related to mobilization and wartime surge capacity must identify the scenario assumptions or other basis for the requirement under which these costs were calculated. Additionally, a description of how these costs will be collected and accounted for in execution must be provided. The UPC Funding Exhibit Fund-30 will be used to support the request for UPC Funding.

2.16.4. Chapter 9 provides additional guidance and instructions associated with mobilization/surge requirements.

2.17 Defense Working Capital Funds - War Reserve Materiel (010217)

War reserves are procured and maintained to meet wartime requirements as determined by the Strategic Planning Guidance (SPG). These costs will be funded with direct Working Capital Fund appropriations in the Components’ budgets, not through customer rates. However, since the war reserve materiel will be under the management of supply management businesses, war reserve requirements will also be described and justified on the SM-3. In addition, exhibit SM-6 War Reserve Material, will be prepared by the Components to justify WRM Requirements. Detailed requirements and guidance can be found in Chapter 9.

2.18 Defense Working Capital Funds - Military Personnel Costs (010218)

2.18.1. Military personnel costs have been included in revolving funds since FY 1991. This change was made to ensure that the total costs of the business were being captured. The cost

of military personnel assigned to DWCF activities will be included in the total cost of operations of DWCF activities at civilian equivalent rates and reflected in the stabilized rates charged to customers. This policy is based on the concept of total costing, which is designed to ensure that the total cost of producing products and services is being identified to both DWCF activities and customers.

2.18.2. The amount expensed for military personnel by DWCF activities and the amount reimbursed to the appropriate military personnel will be the same as the amount budgeted. The budget amount will equal the average end strength multiplied by the civilian equivalency rate for each grade. The average end strength for the budget year(s) will be calculated using the average fill rate for the three prior years. The fill rate is calculated by dividing actual average strength by the authorized end strength for each grade. No adjustments will be made to the DWCF cost of operations to reflect the actual cost of military personnel employed by DWCF activities.

2.18.3. See Chapter 9; section 090103G, for budget formulation, execution, and reimbursement procedures.

2.19 Defense Working Capital Funds - Full Recovery of Costs/Setting Prices (010219)

2.19.1. General Guidelines.

2.19.1.1. All business areas in the Fund are required to set their prices based upon full cost recovery, including all general and administrative support provided by others. Prices are established through the budget process. Except for Depot Maintenance Groups, and under special circumstances as specified in Volume 2B, Chapter 9, 090103H, prices remain fixed during the year of execution; actual costs are evaluated against revenue generated by workload at established prices; and the financial condition of the business assessed accordingly. Volume 2B, Chapter 9, paragraph 090105, specifies pricing guidance for sales by DoD depot maintenance activities to private sector entities as part of depot maintenance public-private partnership agreements. Subparagraph C. below summarizes that guidance. Profits or losses will be determined at the end of the year and will be employed as a basis for evaluating operating efficiency.

2.19.1.2. Prices for every Defense Component business activity are established for each fiscal year. Once established, these prices are held constant (stabilized) through program execution unless fund balances require an out-of-cycle rate change. This stabilized rate policy serves to protect customers from unforeseen inflationary increases and other cost uncertainties and better assures customers that they will not have to reduce programs to pay for potentially higher than anticipated prices. In turn, this policy allows activities to execute the budgeted program level and permits a more effective utilization of Fund resources.

2.19.1.3. Prices for the budget year(s) will be set to recover costs over the long run. This means that prices will be set to achieve an Accumulated Operating Result (AOR) of zero. During budget execution, business areas will have either a positive or negative Net Operating Result. Accordingly, prices in the budget year will be set to either make up actual/projected losses or to give back actual/projected gains in the budget year(s).

2.19.1.4. An activity group may request that AOR variances be recovered outside the budget year. This request must be included in the budget submission, and must demonstrate that the delay in the recovery of *variances* will not adversely affect the cash balance of the activity group. A phased recovery schedule must be provided with the budget. The Director for Revolving Funds will provide final approval for any extended AOR *variances* recovery plans.

2.19.1.5. In the supply management businesses, the price setting process will be consistent with the rate changes approved during the budget review.

2.19.2. Unplanned Gains/Losses.

2.19.2.1. Under Special Circumstances the DWCF rules for pricing and operating loss recovery or gain distribution may be waived if one or more of the following conditions exist.

2.19.2.1.1. Fund Liquidity. Fund managers are expected to maintain a monthly total fund cash balance between 7-10 days of operations (plus 6 months outlay for capital purchases). However, several factors could cause the Funds to operate outside the target area. Therefore, in order to prevent the build-up of excess cash balances, or ensure fund solvency the Director for Revolving Funds or Fund Managers, with the written permission of the Director for Revolving Funds, may direct out of cycle rate adjustments at any time during the fiscal year.

2.19.2.1.2. Depot Maintenance Additional Requirements. As long as Fund cash balances are within 10% of targeted levels depot maintenance activities will recoup losses and return gains in the budget year. However, if cash balances are outside the target areas the Director for Revolving Funds or Service Fund Managers, with the written permission of the Director for Revolving Funds, may direct out of cycle rate adjustments or surcharges at any time during the fiscal year to restore cash to the targeted levels. Also unplanned depot losses recouped in subsequent years may be financed with prior year funds provided all other criteria associated with prior year upward obligations are met.

2.19.2.1.3. Contingency or Emergency Operations. DWCF pricing and financing requirements may be waived by Fund managers in order to facilitate Department operations during times of war or other national emergencies. Notification of Fund Managers actions must be provided in writing to the Director for Revolving Funds within 30 days of the event.

2.19.3. Public-Private Partnerships at Defense Working Capital Fund Depot Maintenance Activities.

2.19.3.1. Pricing guidance for sales of goods and services by DoD depot maintenance activities to private entities engaged in public-private partnerships is set forth in Volume 2B, Chapter 9, paragraph 090105. In general, such prices are subject to the requirements of Chapter 9, with the exception that the prices may be based upon the most recent actual and projected costs applicable to the workload, rather than upon approved stabilized billing rates. Rates and prices to private entity partners may also be tailored to include only those direct and

indirect production overhead costs that contribute to the finished product or service. However, full General and Administrative (G&A) costs shall continue to be allocated on the same basis as for DoD customers.

2.19.3.2. Fixed pricing of sales to private party entity partners, including multiyear fixed price agreements, is authorized when production costs can be reasonably predicted and the risk of future operating losses is not significant. Such fixed prices may include provisions for adjustments to accommodate the effect of scope-of-work changes, annual inflation, and specified contingencies. When future production costs or risks cannot be reasonably predicted, cost reimbursable pricing is more appropriate.

2.19.4. Detailed requirements and guidance can be found in Chapter 9.

2.20 Defense Working Capital Funds - Capital Budgeting (010220)

2.20.1. Budgetary resources for capital investments will be separately identified in an approved capital budget. Beginning in FY 2007, the Capital Budget will have two thresholds. For Real Property (Land, Buildings, and Minor Construction), capital assets with a useful life of two years or more, the capital threshold is \$100,000 and above. For all other capital assets including depreciable plant, equipment, and software developed, manufactured, transferred or acquired during a fiscal year with a useful life of two years or more, the capital threshold is \$250,000 or more. Once assets are capitalized by the DWCF activity, they will continue to be reported as a capital asset and depreciated until the book value of the asset reaches zero or its salvage value, as appropriate. Changes in the capitalization threshold will not impact assets already capitalized unless directed by higher authority. These limits are consistent with accounting guidance published in Volume 4, Chapter 6.

2.20.2. Minor Construction.

2.20.2.1. Minor Construction projects costing \$100,000 but less than or equal to \$750,000 will be funded through the capital budget and depreciated.

2.20.2.2. In the year of execution the Director of OUSD (Comptroller) Revolving Funds may approve a capital investment reprogram request for Minor Construction projects costing up to \$1,500,000 if the project is required to correct a deficiency that is life-threatening, health threatening, or safety threatening.

2.20.2.3. Project planning and design costs are considered a capital investment cost that is capitalized by the DWCF activity and financed in the minor construction portion of the capital budget. Planning and design costs are not included as part of the statutory threshold for minor construction projects.

2.20.2.4. See Chapter 9, section **090103**, for budget formulation and execution procedures.

2.20.3. Depreciation.

All capital assets owned by activities in the Fund will be depreciated or amortized by the individual Component business area. Depreciation will be on a straight-line basis and based on the acquisition cost, less residual value when residual value is expected to be 10 percent or more of the acquisition cost, including installation and related costs. Depreciation schedules may be found in Volume 4, Chapter 6, paragraph 0602061.

2.21 Defense Working Capital Funds - Base Support (010221)

2.21.1. Interservice and intragovernmental support, as identified in DoDI 4000.19, is reimbursable by the DWCF activity to the extent that the specified support for the DWCF activity increases the host activity's direct costs (i.e., incremental direct cost). Costs associated with common use infrastructure are non-reimbursable, except for support provided solely for the benefit of one or more tenants. Support costs that are charged to a tenant DWCF activity (i.e., reimbursable cost) must be measurable and directly attributable to the DWCF activity. Indirect costs will not be included in reimbursement charges, except those included in stabilized rates charged for DWCF mission products and services. Host activities (suppliers of base support) are permitted to waive reimbursement from tenants who use or benefit from available support without appreciably increasing the host activities' costs (i.e., revenues would be less than the anticipated expense of billing and disbursing funds).

2.21.2. DWCF activities that use any of the common base support functions identified in DoDI 4000.19 (Interservice and Intragovernmental Support) are to reimburse host activities for this support. Reimbursement for DWCF mission products and services (e.g., depot supply, depot maintenance, public works center services, information processing, communications, and software development) shall be based on the approved stabilized rate. Other support incidental to the DWCF activity's primary mission or purpose is to be budgeted and reimbursed based on direct costs measurable and directly attributable to the DWCF activity. Only the incremental change in cost attributable to the DWCF activity (incremental direct cost) shall be chargeable to the DWCF activity. Indirect costs are not to be included as a cost to the DWCF activity.

2.21.3. Chapter 9 provides budget formulation and execution procedures.

2.22 Defense Working Capital Funds - Dual Funded Organizations (010222)

2.22.1. A dual funded organization is an organization that is funded (including reimbursable funding) by both the DWCF and other appropriations or accounts. In those instances where a function is funded with a combination of both DWCF and appropriated funds, the function initially will be funded in its entirety either by the DWCF or by appropriated funds. The determination of whether the particular function initially is to be funded by the DWCF or appropriated funds will be based on the predominance of definable units of measure for the function. Examples of definable units of measure include work load, productive hours, outputs, or ultimate use. The appropriation or account initially funding the function shall be reimbursed by the other account(s) at the same unit of measure as was used to determine the initial funding source.

The amount of reimbursement shall be determined based on the relative portion of that unit of measure attributable to each part of the organization (or funding source) involved.

2.22.2. This policy does not change the policy for reimbursement for base support services provided by the DWCF to tenant activities. The DoDI 4000.19 and sections 0102021 and 090103K provide guidance for funding base support services.

2.23 Defense Working Capital Funds - Customer Mandated Schedule (010223)

2.23.1. When a job order is canceled or reduced in scope, after a DWCF activity has commenced work or incurred costs on the order, the costs incurred plus the applied overhead (that is indirect and other normally allocated overhead (G&A) costs)) plus costs associated with the cancellation or reduction shall be charged to the customer.

2.23.2. Examples of directly associated cancellation or reduction costs to be charged to customers are advance planning costs, non-creditable direct material, special test equipment, necessary preservation and/or shipment effort, and any additional effort necessitated by the cancellation and/or reduction (e.g., salvaging of material). In addition, costs charged to customers should include the costs of salaries payable to employees hired specifically to work on the canceled order until the employees are or could have been separated through a reduction in force or other appropriate action (taking into account appropriate administrative lead time), or reassigned to other direct jobs. Costs which are indirectly associated with the cancellation or reduced customer orders, under-applied overhead costs that may result in a DWCF activity as a whole from a reduced work load base shall not be charged to the customer canceling or reducing their order but shall be recorded against the net operating results of the performing DWCF activity.

2.24 Glossary of Terms – Procurement (010224)

<u>Term</u>	<u>Meaning/Funding Connotation</u>
Advance Procurement (Long Lead Items)	A pre-approved exception to the full funding policy that allows procurement of long lead-time components, material, parts, and effort in a fiscal year before that in which the related end item is to be procured.
Cancellation	Cancellation means the cancellation (within a contractually specified time) of the total requirements of all remaining program years. Cancellation results when the contracting officer notifies the contractor of nonavailability of funds for contract performance for any subsequent program year or fails to notify the contractor that funds are available for performance of the succeeding program year requirement.
Cancellation Ceiling	The maximum cancellation charge that the contractor can receive in the event of cancellation (reference Federal Acquisition Regulation (FAR) 17.103).
Cancellation Charge	The amount of unrecovered costs that would have been recouped through amortization over the full term of the contract, including the term canceled.
Contingent Liability	As a budgetary term, contingent liability represents variables that cannot be recorded as valid obligations. Such variables include: (1) outstanding fixed price contracts containing escalation, price redetermination, potential liability under incentive clause; or (2) contracts authorizing variations on quantities to be delivered; or (3) contracts where allowable interest may

<u>Term</u>	<u>Meaning/Funding Connotation</u>
	become payable by the U.S. government on contractor claims supported by written appeals pursuant to the DISPUTES clause contained in the contract.
Construction	The erection, installation, or assembly of a new facility; the addition, expansion, extension, alteration, conversion, or replacement of an existing facility; the acquisition of a facility; or the relocation of a facility from one installation to another.
Detail Design Costs	The final design effort on ships normally performed in conjunction with lead ship construction, is called "detail design." This effort is procurement funded (SCN).
Economic Order Quantity (EOQ) Procurement	An exception to the full funding policy that allows the use of advance procurement to purchase more than one fiscal year's program increment of components, materials, and parts in order to obtain the economical advantages, sustain a production line, etc.
Facility Modernization	The alteration or replacement of facilities solely to implement new or higher standards, to accommodate new functions, or to replace building components that typically last more than 50 years (such as the framework or foundation).
Facility Restoration	The restoration of real property to such a condition that it may be used for its designated purpose. Restoration includes repair or replacement work to restore facilities damaged by inadequate sustainment, excessive age, natural disaster, fire accident, or other causes
Facility Sustainment	The maintenance and repair activities necessary to keep an inventory of facilities in good working order. Examples include regular roof replacement, refinishing of wall surfaces, repair and replacement of heating and cooling systems, and replacement of tile and carpeting.
Full Funding	Requires the total estimated cost of a complete, military useable end item or construction project funded in the year in which the item is procured. If a future year's appropriation is required for delivery of an end item, the end item is not fully funded. It prevents funding programs incrementally and provides a disciplined approach for program managers to execute their programs within cost.
Funded Delivery Period (FDP)	A funded delivery period encompasses a 12-month period that begins when the contractor delivers the first item of a fiscal year procurement. Confusion exists regarding this time period because, in many instances, accurate administrative and production lead-times (ALT/PLT) have not been included in the calculation. The calculation should begin with October 1. From this point in time, the ALT and PLT should be added. This amount of time plus the next 12 months are included in the funded delivery period. When excessive lead-times are included in the calculation, additional quantities are procured that could have been funded in the following fiscal year with no change in the delivery schedule.
Maintenance	The routine, recurring effort conducted to maintain an end item of investment equipment at its intended capability or designed performance level.
Nonrecurring Costs	Nonrecurring costs are generally incurred on a one-time basis. Costs may include: plant or equipment relocation; plant rearrangement; special tooling and test equipment; preproduction engineering; initial spoilage and rework; pilot runs; allocable portions of the costs of facilities acquired or established to conduct the work; costs incurred for the assembly, training, and

<u>Term</u>	<u>Meaning/Funding Connotation</u>
	transportation of a specialized work force to and from the job site; and unrealized labor learning.
Production Rates	<u>Minimum Sustaining Rate</u> is the production rate for each budget year that is necessary to keep production lines open while maintaining a base of responsive vendors and suppliers; the quantity that will preclude start-up costs in the case of a production break; or the quantity that the contractor is willing to accept and produce at a reasonable cost. <u>Economical Production Rate</u> is the most efficient production rate for each budget year at which the item can be produced with existing or planned plant capacity and tooling, with one shift a day running for eight hours a day and five days a week (1-8-5). <u>Maximum Production Rate</u> is the maximum capacity rate that a contractor can produce with extant or prior year funded tooling.
Recurring Costs	Production costs that vary with the quantity being produced, such as labor and materials.
System	The combination of a number of components that are functioning with the context of a whole to satisfy a documented requirement.
Termination	The right of the government to terminate the performance of work in whole or part under a contract as specified by the contract's Termination for Convenience or Default provisions. Unlike cancellation, which is effected between fiscal years and must apply to all subsequent fiscal years' quantities of items, termination may be effected at any time during the life of a contract and may apply to the total quantity or to a partial quantity of items.

2.25 Glossary of Terms – RDT&E (010225)

<u>Term</u>	<u>Meaning/Funding Connotation</u>
Accepted for Service Use	This is the major milestone in a development program that represents the formal acceptance of an item for operational use by the Service. In some instances items are approved for Service use with qualifying restrictions or provisions pending completion of specific development deficiencies. In such instances the appropriation to fund the correction and test must be determined on a case-by-case basis, according to the expense and investment criteria. Typically, all post-Service acceptance effort will be funded in Procurement appropriations.
Command Support Costs	This term also is used in the context of the T&E programs. It refers to the "people-related" costs of the command and operational units providing collateral support to the T&E effort. These are additional costs incurred because of this test support. Examples are per diem pay, travel allowances, overtime, etc.
Contract Design Costs	The contract design phase of shipbuilding programs follows the preliminary design phase and results in a design that carries the equipment specifications necessary to meet the Navy requirements. These costs are RDT&E-funded.
Developmental Test and Evaluation (DT&E)	DT&E is that test and evaluation conducted to assist the engineering design and development process and to verify attainment of technical performance specifications and objectives.
Government Acceptance of the First Procurement-Funded Engine	This term, which is one of the two minimum requirements for initiation of engine component improvement funding, refers to the date the Government formally accepts delivery (DD Form 250) of the first engine funded under procurement appropriations.

<u>Term</u>	<u>Meaning/Funding Connotation</u>
Initial Operational Test and Evaluation (IOT&E)	It is DoD policy that there shall be conducted, before commitment of a system to production, at least an initial phase of operational test and evaluation (OT&E) adequate to provide a valid estimate of expected system operational effectiveness and suitability (including compatibility, interoperability, reliability, maintainability, and logistic and training requirements). This early phase of the normally longer, overall OT&E program is known as IOT&E.
Operational Test and Evaluation (OT&E)	OT&E is that test and evaluation conducted to estimate a system's operational suitability, identify needed modifications, and provide information on tactics, doctrine, organization, and personnel requirements.
Performance Envelop	The demonstrated capability of a system, system components, and special purpose software to perform its mission in relation to essential characteristics such as: speed, range, payload, altitude, rate of fire, etc.
Preliminary Design Costs	This term refers to those costs incurred in shipbuilding programs in the early stages of the cycle. They should result in a design that, on a performance or requirement basis, approaches the Navy's goal. These costs are RDT&E funded.
Product Improvement	This term embraces all efforts of a research, development, design, or engineering nature that have the objective of improving major end items or major components of major end items. The improvement may involve expanding the useful life of the end item or component, or it may increase the performance capability.
Prototype	This term connotes an item from an R&D program and also connotes RDT&E financing.
R&D Installation or Activity	This term refers to those installations or activities whose support and operating costs are financed predominantly with RDT&E funds.
Special Support Costs	This term, as used in the context of test and evaluation programs, refers to those acquisition or hardware costs, other than those associated with the item that is the subject of the test, which are incurred in direct support of the T&E effort. A good example would be special range instrumentation costs.
Test Article	A system representative prototype designed to obtain, verify or provide data for the evaluation of research and development or evaluate progress in accomplishing development objectives.
Unique Joint Test and Evaluation (JT&E) Costs	This refers to costs such as: feasibility determinations of proposed joint tests; the provision for test design and planning support for joint tests selected; the development, procurement, installation, and operation of special instrumentation; transportation, travel, and per diem costs for the Test Director's staff; the modification of test articles as surrogates and to permit obtaining test data; transportation of equipment from permanent bases to the test site and return; and the provision for data collection/collectors, data reduction, analysis, and test reporting services. Transportation and per diem of participating personnel and maintenance and supply costs are not considered unique.

2.26 Prohibition on Parking of Funds (010226)

Section 1053 of the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2007, to be codified in title 10, United States Code, specifically prohibits an officer or employee of the Department of Defense (DoD) from directing the designation of funds for a particular purpose in the President's budget submission, or in the budget justification materials

submitted in support of the budget, with the knowledge or intent that such funds will not be used for the designated purpose. Further, violation of this prohibition will be treated as a violation of the Anti-Deficiency Act (section 1341(a)(1)(A) of title 31, United States Code).

2.27 Use of Operation and Maintenance Funds under Contingency Construction Authority (CCA) (010227)

The criteria and procedures for the use of O&M funds under CCA (also known as Section 2808 Authority) are listed in Volume 3, Chapter 17, Section **170102(L)**.

3.0 PROGRAM AND BUDGET REVIEW SUBMISSION (0103)

3.1 General (010301)

3.1.1. This section provides guidance for the development and submission of the biennial budget estimates to OSD as part of the program and budget review process. The internal 2-year Planning, Programming, Budgeting, and Execution (PPBE) process will guide the Department's strategy development, identification of needs for military capabilities, program planning, resource estimation and allocation, acquisition, and other decision processes. The Quadrennial Defense Review (QDR) will continue to serve as the department's major statement of defense strategy and business policy. It also will continue to be the single link throughout DoD that integrates and influences all internal decision processes.

3.1.1.1. The first year of the 2-year cycle will include the Strategic Planning Guidance (SPG), a Joint Programming Guidance (JPG), a Program Objective Memorandum (POM), and a Budget Estimate Submission (BES). Program Decision Memoranda (PDMs) will implement POM decisions; Program Budget Decisions (PBDs) will implement BES decisions.

3.1.1.2. The second year of the internal Defense Department 2-year cycle, or the off-year, will include an SPG, if the Secretary of Defense decides an SPG is necessary. If an off-year SPG is issued, it will not introduce major changes to the defense program, except as specifically directed by the Secretary or Deputy Secretary of Defense. Rather than a POM during the off-year, the Components will submit Change Proposals to accommodate real world changes, and as part of the continuing need to align the defense program with the defense strategy. Instead of full budget documentation, the change proposals will accommodate fact-of-life changes (e.g., cost increases, schedule delays, management reform savings, workload changes, etc.) as well as changes resulting from congressional actions. The off-year also includes execution reviews that will provide the opportunity to make assessments concerning current and previous resource allocations and whether the Department achieved its planned performance goals. Performance metrics will be the analytical underpinning to ascertain whether an appropriate allocation of resources exists in current budgets.

3.1.2. The USD(Comptroller) guidance memorandum, transmitted in June of each year will provide specialized instructions such as program basis for the estimates, key assumptions to be used, and special supporting material requirements. In addition, "supplementary instructions" memoranda issued on an "as needed" basis (usually in July/August) will be limited to specific

instructions which amplify guidance included in the OUSD (Comptroller) memorandum and in this volume. The use of other memoranda to transmit program and budget guidance will be restricted to new or nonrecurring requirements.

3.1.3. Guidance for development of the National Intelligence Program and budget review submission will be issued by the Director of National Intelligence. Additional detail is found in Chapter 16.

3.1.4. The instructions for submitting certain summary schedules are provided in Section 3.5. The instructions for back-up material tailored to each appropriation or fund category are provided in subsequent chapters. Materials required by OMB Circular A-11, which are not otherwise required by this manual, will be submitted in accordance with that Circular, unless specific exception is granted by the OMB. This is covered in Section 1.5.

3.1.5. A budget work schedule will be forwarded by a separate memorandum at the beginning of each budget formulation cycle. This schedule will show the dates to be used for planning the various phases involved in the formulation process.

3.1.6. Common Program and Budget Review Exhibits – a number of exhibits will be identified subsequent chapters and in the annual call memorandum that will be common to both the program and budget review. In most cases this will involve Web based input through the Select and Native Programming (SNaP) data Input System. The process is addressed in section 9.0.

3.1.7. Budget Material

3.1.7.1. As stated in section 3.2, limited paper copies of unclassified budget documents will be provided to the primary OUSD (Comptroller) reviewing Directorate and to OMB. This section also provides detailed distribution guidance on classified material as well as certain summary material.

3.1.7.2. All budget material required in a paper format for the budget submission will be prepared in the formats prescribed in this section. Also, while the unclassified material is to be posted on the Internet, the format size/margins described below should be adhered to. Material submitted in accordance with OMB Circular A-11 will follow the format prescribed by that Circular. All material, with the exception of fold-in charts and tables which may be included, will be prepared on 8.5" x 11" paper. Material fulfilling Circular A-11 requirements will be bound on the left side. All exhibit books, except for Military Construction, Family Housing, Base Closure, and Information Technology, will be printed horizontally (landscape) on 11" x 8½" paper. Addressees will reduce all larger pages to the standard 11" x 8.5" size. All pages in each book are to be consistent in size. The following identifies specific requirements:

3.1.7.2.1. Military Personnel - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. Use at least font size 10. All material will be printed head to toe

with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

3.1.7.2.2. Operation and Maintenance (to include the Defense Health Program) - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. Use at least font size 10. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

3.1.7.2.3. Research, Development, Test and Evaluation - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Begin each program element on a facing page. Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

3.1.7.2.4. Procurement. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

3.1.7.2.5. Military Construction. The justification material for Military Construction will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

3.1.7.2.6. Family Housing. The justification material for Family Housing will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

3.1.7.2.7. Base Closure. The justification material for Base Closure will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

3.1.7.2.8. Facility Sustainment, Restoration and Modernization (FSRM). Provide justification material in accordance with Chapter 8.

3.1.7.2.9. Revolving Funds. Material submitted for the budget estimate submission for **revolving funds** is to be submitted by business area on 8.5"x 11" paper, with 3 holes punched along the 11 inch side to fit standard three-hole binders. Capital Investment Program exhibits will be prepared in landscape format. Budget submitting offices should ensure that all narrative type is consistent. Revolving funds justification books prepared by the Components are to be unclassified. Classified exhibits will be submitted under separate cover.

3.1.7.2.10. Information Technology. Provide justification material in accordance with Chapter 18, Section **180202**.

3.1.7.3. Whenever revisions or correction sheets are necessary, the revised pages showing the date of the change will be inserted in each budget book by a staff member of the DoD Component submitting the change. OUSD (Comptroller) Program/Budget staff will instruct the DoD Component's staff member as to the location of the budget books. Corrections should be held to a minimum and are not necessary for minor typographical errors which make no material difference in the analysis and evaluation of the estimates.

3.1.8. Second Year of the Department's Two-year Budget Review Cycle - Budget Material. Budget documentation will be limited in the second year of the 2-year cycle. The primary budget document is the Change Proposal. Other budget exhibit requirements will be determined as this review process evolves. The specific requirements will be identified in the annual Program and Budget Review call memorandum.

3.2 Distribution (010302)

Limited paper copies of unclassified budget documents will be provided to the primary OUSD (Comptroller) reviewing Directorate and to OMB. Additionally, classified budget exhibits, the transmittal memorandum with attachments to the Secretary of Defense, and the budget overview booklets, will be provided in paper format. Submitting Components will also post all unclassified budget material to an access controlled Internet site unless provided for otherwise in the annual budget call memorandum. This will allow all OSD staff offices access to Component budgets while minimizing the need for hard copies of the submissions. Under current procedures, each submitting Component will individually post unclassified budget justification material on an OUSD (Comptroller) hosted NIPRNET site. Additional guidance on accessing this site and content guidance and restrictions will be provided annually. Paper copy distribution of classified/unclassified program and budget review submission material will be made in accordance with the charts on the following pages for the first year of the 2-year budget cycle. Guidance for distribution of paper copies of Component BCPs in the second year of the 2-year budget review cycle will be provided in the annual call memorandum. All required copies will be delivered directly by each Military Department/Defense Agency to the appropriate offices at the room numbers listed on the following page unless guidance elsewhere in this volume or in the annual call memorandum indicates otherwise. However, because of numerous room changes during the Pentagon Renovation and building access changes at non-Pentagon locations, call the listed office prior to delivery of budget material:

3.3 Preparation of the Biennial Budget Estimates (010303)

3.3.1. General Guidance

3.3.1.1. The Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) will send, in June or July, a budget guidance memorandum establishing submission requirements not included in this volume. Included in this guidance will be budget material due dates and instructions for preparing estimates for the prior year (PY), current year (CY), budget years BY1, and BY2 (in the biennial budget year), and the outyears.

3.3.1.2. Estimates for the biennial budget years and outyears will be based upon the force levels, program decisions, and the TOA levels contained in the Program Objective Memorandums (POMs). The current review schedule provides for concurrent program and budget reviews. If the program review ever precedes the budget review, the TOA levels should reflect the POM levels as modified by any Program Decision Memorandums (PDMs).

3.3.1.3. At various organizational levels throughout the Department of Defense, a systematic cost-benefit analysis of proposed expenditures can be of significant value in program formulation. Investments and expenditures in each appropriation category will normally be supported by an analysis which matches estimated costs with benefits (outputs), subject to the following criteria:

3.3.1.3.1. Funding is, for the first time, shown as required in the period covered by the fiscal guidance, or

3.3.1.3.2. Previously established funding requirements in these years are significantly altered by changed program or project plans.

3.3.1.3.3. The criteria in DoDI 7041.3, "Economic Analysis for Decisionmaking," will apply. Budget submissions will, as a minimum, be accompanied by a statement that (1) the submission is supported by an economic analysis, or (2) an economic analysis is not required, citing the reason. Submission of detailed backup information to OSD will be on "as requested" basis.

3.3.1.4. Transfers of functions between DoD Components will not be reflected in the program and budget review submissions unless they have been approved by the Component Head and the dollar amounts and personnel spaces to be transferred in the current year are fully decided upon by all DoD Components concerned when the estimates are prepared. Under these circumstances, both the gaining and losing Components will reflect the decisions in their estimates with equal and offsetting manpower and dollar amounts. The gaining DoD Component is responsible to confirm that this is the case. If this cannot be confirmed, then neither Component will reflect the transfer in their budget estimates. The exhibit PB-14, Functional Transfers, found in Chapter 19 will identify all functional transfers included in the budget. Each Component will also notify OUSD (Comptroller) Program/Budget of the planned functional transfers not reflected in the budget.

3.3.1.5. Adjustments necessary to properly reflect functional transfers agreed upon by the parties, but not included in the Program and budget review submission, may be accomplished in the budget review process. Functional transfers not submitted in the program and budget review submission or incorporated during the budget review process will be financed by transfer in the current year and the budget year. Necessary exceptions to this general rule will be authorized on a case-by-case basis. Functional transfers during the budget review process should be kept to a minimum.

3.3.1.6. Material should be “Unclassified” and “For Official Use Only” unless contents otherwise require a higher classification. All Program and budget review submission material is subject to DoD 5400.7-R, DoD Freedom of Information Act Program, Chapter II, Exemptions and in particular exemption number 5. Hard copy revised Procurement (P-1 exhibit) and RDT&E Program (R-1 exhibit) must be submitted by the DoD Components with a certification, signed by the Security Officer, confirming that all line items are classified properly.

3.3.2. Pricing in the Biennial Budget Estimates

3.3.2.1. It is DoD policy to reflect the most likely or expected full costs (including military and civilian personnel pay) for the current year, the biennial budget years, and outyear estimates for all appropriations.

3.3.2.2. Estimated price level changes will be based on data provided by OUSD (Comptroller). These indices, which will be updated as economic conditions warrant, will be used to (1) determine the amount of price escalation for a procurement line item, major RDT&E system, or construction item over a given time period, and (2) project inflation in other noncompensation areas of all other appropriations.

3.3.2.3. Military and civilian personnel compensation will be fully funded in the biennial budget estimates using the rates provided by the OUSD (Comptroller).

3.3.2.4. Biennial budget estimates for goods and services will in all cases reflect the following considerations:

3.3.2.4.1. Cost-quantity relationships as they affect unit prices -- e.g., the unit price forecast in the biennial budget estimates will be higher or lower than the unit price current when the estimates are prepared, if differences in the quantities involved are price-significant.

3.3.2.4.2. The state of development or production and the learning curve.

3.3.2.4.3. Specific price changes, to take effect at a future date -- e.g., a specific and authoritative rate or tariff schedule to take effect on a definite future date, which may involve higher or lower prices than those in effect at the time estimates are prepared.

3.3.2.4.4. Predictable cost increases due to risk.

3.3.3. Preparation of Biennial Budget Estimates - Multiple Appropriations

3.3.3.1. Section 10.0 contains formats for those exhibits applicable to more than one appropriation.

3.3.3.2. In addition to those exhibits identified in Section 10.0, there are exhibits required by other chapters which require identification of budget estimates/requirements for more than one appropriation. This is particularly true of requirements discussed in Chapter 19 and personnel exhibits required in Chapter 3. Offices responsible for budget submissions must ensure that all such exhibits reflect total requirements for all appropriations.

3.3.4. Preparation of Biennial Budget Estimates - Operations

3.3.4.1. Separate identification and justification (including cost- benefit studies) is required for management actions such as data automation and systems engineering. The development, implementation and expansion of automated data systems will be based on an economic analysis which should show that the proposed management action will produce an early and demonstrably high return on investment or result in substantial increases in mission performance and effectiveness. Savings from previously approved investments and management actions will be separately identified.

3.3.4.2. The Dependents' Education Program in the budget years would be based on the best estimate of student load and planned at the current year program level in accordance with the criteria for the regular school program established by USD(P&R).

3.3.5. Preparation of Biennial Budget Estimates - Procurement

3.3.5.1. In development of requirements for procurement of modern equipment to offset consumption or attrition of older items, all assets of the older items, as well as acceptable substitutes, will be applied against gross requirements in determining net procurement requirements.

3.3.5.2. Administrative lead-time requirements in the budget years for any principal item should not exceed the lead-time used in the development of the current year budget program.

3.3.5.3. Production lead-times utilized in preparation of estimates for the budget years should be based on the latest contract experience and current conditions, and generally should not be greater than those used for the same item in the development of the current year budget program. Any increases should be clearly identified and accompanied by an explanation of the reason along with an identification of the pricing components/manufacturers used causing the increase.

3.3.5.4. Use of long lead-time component procurement will be consistent with the full funding policy expressed in OMB Circular A-11. In this regard, long lead-time component procurement will be limited to those few critical components whose lead-times exceed the obligation availability of the appropriation or are significantly longer than other components of the same end item.

3.3.5.5. Budget estimates will reflect economic production rates, unless there is strong justification (other than funding constraints) for the use of other rates.

3.3.6. Preparation of Biennial Budget Estimates - Research, Development, Test and Evaluation

3.3.6.1. In the development and review of RDT&E programs, special attention will be devoted to the numbers of civilian and military personnel required for support of those programs.

3.3.6.2. Increased emphasis will be placed on application of standards and austere limitations to housekeeping and support activities including facilities sustainment, facilities operations, equipment replacement and maintenance, and supply inventory levels.

3.3.7. Preparation of Biennial Budget Estimates - Revolving Funds

3.3.7.1. Revolving fund programs and biennial budget estimates will be consistent with, and justified by, related support requirements; that is, program and budget estimates will be based on anticipated customer needs for associated supplies, equipment, and services, loan purchase requirements for production guarantee accounts, scope of operations to be financed through management funds, etc. Biennial budget estimates will be consistent with the anticipated customer needs that can be financed by the related program included in the customers' budget estimates. Increased emphasis should be directed toward assuring that customers are getting maximum value for their appropriated funds.

3.3.7.2. Appropriations funded requirements for the Defense Working Capital Fund will be computed under the same guidance as outlined above for the specific appropriations.

3.4 Second Year of the Department's Two-year Budget Review Cycle - Budget Material. (010304)

Budget documentation will be limited in the second year of the 2-year cycle. The specific requirements will be identified in the annual Program and Budget Review call memorandum.

3.5 Budget Estimates Summaries and Transmittal (010305)

3.5.1. Budget Estimates Transmittal

3.5.1.1 The budget estimates will be transmitted by memorandum to the Secretary of Defense from the Secretary of each Military Department, the Director of each Defense Agency, the Under Secretary, Assistant Secretary or Deputy Assistant Secretary of Defense submitting a Defense-wide budget estimate, and the Director, The Joint Staff. While it is mandatory that the exhibits below be submitted in the precise formats specified, any explanations or highlight information that the submitting official considers appropriate may accompany the transmittal. Exhibits PB-1A, PB-3, PB-4, and PB-8 include budget estimates summary data and will be "Unclassified" "For Official Use Only" unless the contents otherwise require a higher classification.

PB-1A. Fiscal Guidance Track – TOA in Millions of Dollars. (FY 20BY1 thru 20BY2+4) [Section 10.0]

PB-3. Current Year Reprogramming/Transfers Between Appropriations – TOA in Thousands of Dollars [Section 10.0]

PB-4 FY 20BY1 and 20BY2 Budget Estimates – Schedule of Civilian and Military Personnel (FY 20PY through 20BY2+4) [Section 10.0]

PB-8. FY 20CY Supplemental Appropriation Requirements (Described in Section 3.6) [Section 10.0]

3.5.1.2. The specified exhibits, transmittal memorandum to the Secretary of Defense, and other explanatory or highlight information will be submitted as follows:

3.5.1.2.1. Secretary of Defense transmittal memorandum, with exhibits PB-1A, PB-3, PB-4, and PB-8 attached. Deliver six copies to OSD Correspondence Control, Room 3A948. Other copy requirements are identified in Section 3.2.

3.5.1.2.2. Overview booklets, such as the Air Force "Highlights," Navy "Blue Book," etc. Copy requirements are identified in Section 3.2.

3.5.1.3. Budget estimates for the Defense portion of the National Intelligence Program will be submitted as prescribed by the Director of National Intelligence (DNI). In addition to budget exhibits specified by the DCI, the Office of the Secretary of Defense requires certain other materials as outlined in Chapter 16.

3.5.1.4. Electronic data will be submitted to support Exhibit PB-4 (see Section 5.5). Extreme care must be exercised to assure that the submission and the exhibits are identical in data content. As described in Section 5.6, the electronic data submissions are the basis for the OSD budget review.

3.5.2. Program and Financing (P&F) Schedules

3.5.2.1. The P&F schedule consists of a budget plan, obligations by object class, and an expenditure tail. For multi-year accounts, the P&F schedule will also include an obligation plan. See Section 5.6, CIS Automation Requirements for the Biennial Budget Submission, for guidance on submitting a P&F schedule.

3.5.2.2. Program data will be presented in the Program and Financing schedule on an obligation basis consistent with the presentation in the President's Budget of previous years, unless other directions are transmitted by separate memorandum.

3.5.2.3. Components will not submit prior year data in the program and budget review submission. Components will submit an actual prior year object class and manpower data update when available in accordance with specific update instructions issued separately.

3.5.2.4. Special Program Categories will be shown on Program and Financing schedules in all cases as they appear in the CIS Budget Structure Listing referenced in Section 5.7.

3.5.2.5. Special care should be taken to assure that data presented in the object classification schedule (Section 5.7) is consistent with information required on special exhibits. For example, object class data provided for advisory and assistance services (CIS Object Class Direct/Reimb. 25110) is the basis for Exhibit PB-15 (Chapter 19).

*3.6 Supplemental Appropriations Submissions (010306)

3.6.1. Budget Estimates Transmittal

3.6.1.1. Supplemental appropriations are normally allowed to meet unforeseen contingencies [or national emergencies](#) of a magnitude that cannot be absorbed or accommodated through reprogrammings and transfers. Specific guidance on this will be provided on a case-by-case basis.

3.6.1.2. OMB Circular A-11 provides additional policy guidance on supplemental estimates.

3.6.2. Supplemental appropriation requirements will be submitted on a schedule in the format of Exhibit PB-8, provided in Section 10.0 [or as prescribed in specific or separate guidance](#). This exhibit will be transmitted in the same manner as the budget estimate summaries (see Section 3.5).

3.6.3. Material Included for Informational Purposes

3.6.3.1. Under the 41 U.S. Code authorizations (formerly Section 3732 of the revised statute), the law provides that the President may exempt appropriations, funds, and contract authorizations which are available for military functions under the Department of Defense from the antideficiency provisions of 31 U.S. Code 1517 (formerly Section 3679 of the revised statute) whenever he deems such action necessary in the interests of national defense. Upon determination by the President, that such action is necessary, the Secretary of Defense is authorized to provide for the cost as an accepted expense. For example, if the President determines that it is necessary to increase the number of military personnel on active duty beyond the number for which funds are provided in the annual appropriation act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel as an accepted expense. Obligations are then authorized to be incurred in excess of amounts appropriated. After substantially all obligations have been liquidated, an appropriation is requested to liquidate any unfinanced balances.

3.6.3.2. The law provides essentially that, notwithstanding the balances available, revolving funds may incur obligations to provide for making issues through the production lead-time period (10 U.S.C. 2210(b)). As a technical matter, this constitutes a form of contract authority, and is so displayed in the President's Budget.

3.6.4. Disaster Situations and Management of Disaster/Contingency Supplemental Funds

3.6.4.1. In the event of a disaster or emergency situation, Components will notify OUSD(C), as soon as possible, of needs resulting from the event. Components must be able to quantify the need for disaster relief by providing the OUSD(C) with adequate information for determining that funds are needed to protect people, restore facilities, and/or save lives. If required, OUSD(C) will issue specific guidance and instruction for collecting requirements information. OUSD(C) will review cost and requirements data submitted by the Components to determine if the Department requires additional funding and/or if the appropriate spending authorities are available to support the emergency situation.

3.6.4.2. Supplemental appropriations provided to the Department for war-related costs, and/or costs associated with international or domestic disasters will often have unusual periods of availability for a particular appropriation (for example, Operation and Maintenance appropriations may have a period of availability of more than one year). The emergency funds may be provided in a transfer account that would have an extended period of availability (for example, a three year transfer account). Funds control issuing agents and appropriation managers should ensure that the period of availability of the funds is optimized, to include obligating the amounts in a timely manner, and returning unused or unneeded funds to a transfer account immediately upon becoming available. For example, funds transferred from a three year transfer account to an Operation and Maintenance appropriation will take on the period of availability of the account where transferred, which is one year for Operation and Maintenance. If the funds are not used before the end of the period of availability and if statutory transfer authority is available, the Component's funds control agent should initiate a reprogramming action to transfer those funds back to the transfer account where they, once again, take on the remainder of the three-year period of availability. This practice ensures the funds provided by the Congress are optimized and are

available to support the disaster or emergency event in subsequent years in accordance with Congressional intent.

3.7 Additional Budget Submissions (ABS) (010307)

3.7.1. General Guidance. Following the initial program and budget review submission (initial submit), Additional Budget Submissions may be made, where warranted by specific changes in circumstances, within approved TOA control totals established by the USD(Comptroller) and under the following restrictions:

3.7.1.1. Additional Budget Submissions must be submitted as adjustments to, not substitutes for, the initial submit.

3.7.1.2. Unless otherwise directed by the USD(Comptroller), Additional Budget Submissions must be offset with equal or greater cost tradeoffs, and must clearly indicate the areas of increase and decrease consistent with the justifications submitted as part of the initial submit.

3.7.1.3. Proposed decreases may not consist of reductions already effected or imminently planned to be effected as part of the budget review.

3.7.1.4. Additional Budget Submissions may not be used to compensate for incomplete or inadequate initial submits.

3.7.1.5. Additional Budget Submissions may not be used to appeal budget decisions.

3.7.1.6. If an additional budget submission results in an impact on revolving funds, those related requirements must be incorporated in the additional budget submission.

3.7.2. Submission Requirements. In order to be considered during the budget review, all additional budget submissions must be received no later than the date specified in the annual guidance. Additional budget estimates for the biennial years 1 and 2 will be accompanied by Exhibit PB-10, provided in Section 10.2, plus the necessary justification material. This should take the form of a complete narrative justification and may be included on the transmittal memorandum or as an attachment to Exhibit PB-10. The applicable out-year impact of the Additional Budget Submission will also be shown on Exhibit PB-10. The additional estimates will be transmitted in two copies (plus two additional copies for each appropriation affected) by memorandum to the USD(Comptroller) and signed by the same official who submitted the initial budget estimates or his appointed deputy. All Additional Budget Submissions will be hand carried to the Office of the USD(Comptroller), Directorate for Program and Financial Control, Room 3C689, for OSD processing. The Additional Budget Submission will be addressed in subsequent budget decision document(s).

3.8 Major Budget Issues (MBIs) (010308)

Near the end of the budget review process, the Secretary of Defense and the Deputy Secretary of Defense may provide for the review of Component major policy or budget issues that have not yet been resolved. Resolution of these issues may displace other programs within the fixed DoD topline. Copy requirements of Component issues will be provided if an MBI review is scheduled. A general format is provided in Section 10.2.

3.9 Budget Review Procedures (010309)

3.9.1. Comptroller Information System (CIS). The automated CIS is the official OSD record of the budget estimates as submitted by the DoD Components and adjusted by Secretary of Defense decisions known as Program Decision Memorandums (PDMs) and Program Budget Decisions (PBDs). The data contained in the CIS is the base for data required for the OMB MAX Budget System, as required by OMB Circular No. A-11. CIS data is electronically transmitted to OMB for preparation of the President's Budget. In addition, CIS is used to prepare a comprehensive set of management information summaries to support the budget press release, statements to the Congress and other information requirements. Financial data, military end strength, and civilian full time equivalent (FTE) data are provided. Program and Budget Review Submissions are entered into the system through electronic submissions from the DoD Components or through on-line interaction with the system. During the joint OMB/OSD Program and Budget Review, program and budget decision documents are recorded into CIS and the current status of the program and budget review is readily available soon after the data are processed.

3.9.2. Development of Out-year Data During the Program and Budget Review

3.9.2.1. Throughout the Program and Budget Review a continuing update of the out-year TOA and manpower is performed to reflect the extension of CY, BY1, and BY2 decisions made during the budget review.

3.9.2.2. TOA, military end strength and civilian FTE data for the initial out-year database are provided by each of the DoD Components. During the program and budget review, as program and budget decision documents are approved and recorded into CIS, the TOA and manpower out-year impact of each decision is addressed on the decision document and is also entered into CIS. The program and budget decision document will contain one of the following descriptors of out-year impact:

3.9.2.2.1. The estimated out-year impact for each year in thousands of dollars and full-time equivalents/end strength.

3.9.2.2.2. Substantive program direction for the out-years as a basis for DoD Component determination of dollar amounts and manpower involved (to be used if out-years are not specifically addressed in a budget decision document).

3.9.2.2.3. No known out-year impact

3.9.2.3. As with the CY, BY1, and BY2 decisions, the out-year adjustments approved in the Secretary of Defense decisions are entered into the CIS. TOA adjustments are recorded at the appropriation account level, Budget Activity/Special Program Category, and by Program Budget Decision number. Manpower data is recorded at the appropriation account level, by Program Budget Decision number and special program code with active military manpower detailed by officer, enlisted and cadets; selected reserve manpower detailed by officer and enlisted personnel category; and civilian FTE detailed by U.S. direct hire (direct and reimbursable), foreign national direct hire (direct and reimbursable), and foreign national indirect hire (direct and reimbursable).

3.9.2.4. The CIS produces Out-year Impact Status Reports on a recurring basis throughout the *program and* budget review. These reports, which are *available* to the applicable DoD Components, show TOA & manpower data by appropriation, special program code and personnel category for the budget submission base and all adjustments to the base resulting from decisions made during the budget review. The final reports at the conclusion of the budget review reflect the out-year numbers (TOA and manpower) which are the control numbers for the President's Budget update of the Future Years Defense Program (FYDP). It is essential that the Out-year Impact Status Reports be reviewed by the DoD Components on a recurring basis during the budget review so the out-year numbers are under continuous scrutiny and the President's Budget update for the FYDP may proceed in a timely manner.

3.9.3. Printing Schedule for Budget Material

3.9.3.1. OMB Circular No. A-11 prescribes the requirements for materials to be included in the President's Budget document. Annually, the ODC(P/B), OUSD (Comptroller) publishes instructions on the procedures to be followed during the budget review. These instructions detail the sequence of events necessary to finalize the budget review and complete the printing phase of the budget. All actions concerning printing of budget material will be accomplished in accordance with these references and the following paragraphs.

3.9.3.2. Electronic galleys

3.9.3.2.1. The OMB will provide OUSD (Comptroller) and Office of the Deputy General Counsel (Fiscal) within the OSD, General Counsel with an electronic copy of the galleys based on the previous year's President's Budget document. The OMB electronic galley version is divided into two parts, Appropriation Language and Narrative Language. The OSD, General Counsel is responsible for all Appropriation Language galleys (except for the dollar amounts); the OUSD (Comptroller) is responsible for all Narrative Language galleys. The Narrative Language galleys include any "text tables" such as Active/Reserve End Strength Forces tables and Defense Health Program Eligible Beneficiary Category tables.

3.9.3.2.2. The dollar amounts contained in the Appropriation Language galleys such as the amount to be appropriated are the responsibility of the OUSD (Comptroller), Program and Financial Control Directorate. In most cases, these dollar amounts are generated electronically from the Comptroller Information System (CIS) and loaded directly into OMB budget system. However, amounts for Emergencies and Extraordinary Expenses need to be posted

to the electronic galleys. The Program and Financial Control Directorate (P&FC) will identify these items, coordinate with other OUSD (Comptroller) Directorates, and ensure that accurate dollar amounts are reflected in the OSD, General Counsel version submitted to OMB.

3.9.3.2.3. Both Appropriation Language and Narrative Language galleys are updated and submitted electronically to OMB. The Appropriation Language galleys will be electronically updated by the OSD, General Counsel and coordinated with the OUSD (Comptroller) around mid-December. The Narrative Language galleys are updated within OUSD (Comptroller) in the same timeframe. New accounts, accounts with supplementals requiring separate schedules, rescission proposals and other material to be presented in the President's Budget document will also be accomplished electronically. The submission of electronic galleys is intended to fill technical budget preparation needs (i.e., determine that all lines, account titles, text, and appropriation language are correct and that all required schedules are in print). The OMB will post the electronic submission along with OMB-initiated changes for OSD, General Counsel, and OUSD (Comptroller) review until the Department has made the final submission to OMB's MAX system in early January.

4.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (0104)

4.1 General (010401)

4.1.1. Purpose

4.1.1.1. This section provides instructions for the preparation of justification material for presentation to congressional committees. Justification material should be developed using the guidelines established herein as the minimum requirements to be included in the Justification Books. Any exception to these minimum requirements must be cleared with OUSD (Comptroller) Program/Budget.

4.1.1.2. Justification of proposed supplemental appropriations and budget amendments are covered in OMB Circular A-11 and Section 4.2; however, separate instructions will be issued by OUSD (Comptroller) Program/Budget as the need arises.

4.1.1.3. General preparation and submission instructions pertaining to individual appropriations, Intelligence Programs and Communications, Command and Control (C³) Programs are contained in Chapters 2 thru 7, 9, 10, 12, 13, 16 and 19.

4.1.1.4. All congressional budget/presentation material is subject to DoD 5400.7-R, DoD Freedom of Information Act (FOIA) Program requirements. Chapter 3, Exemptions, should be reviewed carefully before denial of any FOIA request. Exemptions will generally fall into exemption 5. Use of For Official Use Only (FOUO) must meet the requirements of DoD 5400.7-R, Chapter 4.

4.1.2. Preparation of Material

4.1.2.1. Separate Justification Books will be furnished for each appropriation relating to each Military Department. Material prepared by individual Defense Agencies and Office of the Secretary of Defense organizations will be consolidated by OUSD (Comptroller) Program/Budget into a single Justification Book for each appropriation. Material for the Operation and Maintenance, Defense-wide; U.S. Court of Appeals for the Armed Forces, Defense; Environmental Restoration, Defense; Office of the Inspector General; Overseas Humanitarian Disaster and Civic Aid; and other operation and maintenance type appropriations will be consolidated into a single Justification Book. The OUSD (Comptroller) Program/Budget will also develop an O&M Overview book as well as a consolidated overview of Multiyear Procurement programs based on submissions of the Military Departments and Defense-wide components. Additionally, information technology budget material prepared by the Military Departments and other DoD Components will be consolidated by the Office of the ASD(NII)/DoD CIO Resource Management Directorate into a single Justification Book. Combating Terrorism budget material prepared by DoD Components will be consolidated into a single justification book by the assistant secretary of Defense for Special Operations and Low Intensity Conflict (SO/LIC). The Department of the Army will prepare a justification book for Chemical Demilitarization programs and will consolidate material for the Army Family Housing and Homeowners' Assistance Fund, Defense appropriations into a single Justification Book. Each Department will prepare a Justification Book for each Base Closure Account. In addition, separate Justification Books will be prepared for Intelligence-Related Activities and the Defense portion of the National Intelligence Program, the latter as prescribed by the Director of National Intelligence. All other Justification Books will be annotated as appropriate to indicate items and resources supported in Intelligence Program Justification Books. Also, separate Justification Books will be prepared for NIP/MIP program aggregations as prescribed in Chapter 16.

4.1.2.2. Classified and unclassified data will be included in the single volume or set of volumes for each appropriation with the classified pages bearing the appropriate security classification, except that all materials contained in the Military Personnel and Operation and Maintenance justification books will be unclassified. Classified exhibits will be submitted separately and explanation provided for their being classified. Fiscal data pertaining to explicitly identified portions of the National Intelligence Program shall be classified in accordance with instructions in Chapter 16.

4.1.2.3. The highest security classification of data included in Justification Books will be SECRET. Information requiring a higher classification will be discussed with OUSD (Comptroller) Program/Budget on an individual situation basis. All classified data will be bracketed by pencil [] to permit the congressional committees to publish an unclassified version. Data not bracketed will be assumed to be unclassified. In bracketing classified columnar data, each column will be individually bracketed. Care must be taken to assure that unclassified data are not bracketed. Security classification markings should be centered at the top and bottom of applicable pages to assure clarity. The appropriate automatic downgrading notation will be used in accordance with DoD 5200.1-R, Information Security Regulation. The appropriate classification cover sheet must be utilized.

4.1.2.4. Military Departments and Defense Agencies will be responsible for clearing the justification material with the Washington Headquarters Services, Directorate for Freedom of Information and Security Review, prior to transmittal to OMB and the congressional committees.

4.1.2.5. The Program and Financing, Object Classification and Personnel Summary schedules will reflect current year program supplemental appropriation requirements as directed by OMB.

4.1.2.6. Reports of the Program and Financing and Object Classification Schedules will be available from OUSD (Comptroller) Comptroller Information System (CIS) and will be used in the Justification and Backup Books as specified for each appropriation title in the following chapters.

4.1.2.7. Printing of Congressional Budget Material:

4.1.2.7.1. General. Tabs will be used only where specified by OSD; McCall (edge) indexing will be used as appropriate. Justification material should be printed on both sides of the page wherever feasible. Headings for an appropriation or budget activity will appear on the initial page of the subdivision and will not be repeated on subsequent pages, except RDT&E Program Element Listings. The Components will work with Defense Automation and Production Service (DAPS) to determine the most appropriate and quickest method of printing and fastening each of the books subject to the guidance by appropriation title below.

4.1.2.7.2. Military Personnel. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling. Font size must be at least size 10.

4.1.2.7.3. Operation and Maintenance. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling. Font size must be at least size 10.

4.1.2.7.4. Research, Development, Test and Evaluation. Material is to be printed horizontally (landscape) on both sides of the page on 11" x 8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. Components will request DAPS to reduce all larger pages to the standard 11" x 8.5" size so that all of the pages in each book are consistent in size. The material will be printed head to toe with 3 holes punched across the top margin. The following is the fastening preference: staples, screw posts, ACCO fasteners, etc. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling. Books are to be a

maximum range of about 600-650 pages where possible (300-325 sheets of paper printed both sides).

4.1.2.7.4.1. Since the justification material is printed double sided, then each PE package must begin on the front side of a new page. When the last page of a PE package does not end on the backside of the paper, then a blank page must be inserted with the wording "This page intentionally left blank" in bold letters, centered on the page. The reason for this is so that the justification material can be easily broken apart and sorted by PE with all of the pertinent exhibits.

4.1.2.7.4.2. For those Components that have a large number of PEs and printing the material all in one volume is impractical, it is preferred that the justification material be submitted by budget activity with the Science and Technology budget activities (BA 1 through BA 3) printed in one volume and the remaining budget activities printed in a separate volume or in individual volumes. Each separate book should include an R-1 listing and a table of content indicating which volume and page the applicable program element can be found.

4.1.2.7.5. Procurement. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

4.1.2.7.6. Military Construction. The justification material for Military Construction will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. All exhibits will be printed utilizing white paper. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

4.1.2.7.7. Family Housing. The justification material for Family Housing will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

4.1.2.7.8. Base Closure. The justification material for Base Closure will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

4.1.2.7.9. Revolving Funds. Justification books for revolving funds are to be submitted in one volume with 3 sections: Component Overview; Operating Budget and Capital Budget. Component Overview and Operating Budget sections are to be printed in portrait format

(vertically) on 8.5" x 11" paper head to head on 2 sides. Capital budget exhibits are to be printed in landscape format (horizontally) on 11" x 8.5" paper head to toe on 2 sides. Budget submitting offices should ensure that all narrative type is consistent. All justification material will be punched to fit standard three-hole binders. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

4.1.2.7.10. Intelligence Programs. Instructions for these books are contained in Chapter 16.

4.1.2.7.11. Information Technology. Provide material in accordance with guidance contained in Chapter 18.

4.1.2.8. Justification book cover inserts will be 220 index stock using the following colors: **Army - green; Navy - buff; Air Force - blue; Defense-wide justification material (Agencies, Office of the Secretary of Defense, Defense Health Program, and Commander In Chiefs to include the U.S. Special Operations Command) - white**. Covers will bear the appropriate security markings, title of the volume as specified herein, the phrase "Submitted to Congress February 20...", and the appropriations included.

4.1.2.9. The use of acronyms and abbreviations in the justification material should be held to a minimum. However, where acronyms and abbreviations are used, they must be identified on the page on which they appear.

4.1.2.10. The exhibit numbers used in this section are for reference purposes only and should not be used in the Justification Books.

4.1.3. Submission of Justification Books for Review

4.1.3.1. Before the justification material can be released to the Congress, it must be reviewed by the appropriate OUSD (Comptroller) or OASD(NII) /DoD CIO to ensure that policies and decisions made by the President and Secretary of Defense are fully reflected. Accordingly, three advance sets of Justification Books will be forwarded to the appropriate OUSD (Comptroller) Directorate for review or for Information Technology exhibits as directed by OASD(NII)/DoD CIO. The following is a list of the directorates:

Directorate	Room	Phone Number
Directorate for Operations	3C710	697-2609
Directorate for Military Personnel and Construction	3C654	697-6359
Directorate for Investment	3C749	695-2235
Directorate for Revolving Funds	3D755	697-4210
Office of the ASD(NII)/DoD CIO Resource Management Directorate	3D228	695-3937 (For IT Justification)

4.1.3.1.1. In addition, one set of the Military Personnel and Operation and Maintenance Justification Books for the Reserve Components will be delivered to OASD(RA), Room 2E195.

4.1.3.1.2. The Military Departments should also send two copies of advance sets of justification books to Washington Headquarters Services, Directorate for Freedom of Information and Security Review ((703) 696-4538) for clearance. Clearing material through this Directorate should be accomplished piecemeal to expedite the final review. Clearance by OUSD (Comptroller) P/B will be evidenced by an approval from the applicable Program/Budget Directorate designated official, initialed on one of the advance copies of each Justification Book and returned to the applicable service. The OUSD (Comptroller) Directorate having cognizance over the budget material will obtain any necessary clearance from the Office of Management and Budget (OMB). Upon advice from OUSD (Comptroller) P/B and Washington Headquarters Services, Directorate for Freedom of Information and Security Review that the advance sets of justification books are acceptable, the DoD Components will complete preparation and assembly of Justification Books.

4.1.3.1.3. Under no circumstances will justification material be released to congressional committees or the public prior to receipt of these clearances.

4.1.3.2. Except as specified herein, submission dates will be provided in separate correspondence from OUSD (Comptroller) Program/Budget.

4.2 Supplemental and Amended Appropriations Requests (010402)

4.2.1. Organization of Supplemental Appropriations Requests Justification Books

4.2.1.1. Justification Books in support of supplemental appropriations requests will be prepared by OUSD (Comptroller) P/B, based on material furnished by the DoD Components. Justification materials will be addressed in separate correspondence from OUSD (Comptroller) P/B.

4.2.1.2. The Justification Book will generally be arranged as follows:

4.2.1.2.1. Table of Contents and Summaries. These items will be prepared by OUSD (Comptroller), P/B.

4.2.1.2.2. Section 1 – Narrative Justification. This section will contain narrative justifications, and any special exhibits in support of program supplemental requests. Supplemental appropriation requests related to all program supplementals will be supported by a narrative justification.

4.2.1.2.3. Section 2 – Appropriation Act language. This section will contain required appropriation act language. The appropriation language will be extracted by OUSD (Comptroller) P/B from the Budget Appendix.

4.2.2. Organization of Amended Appropriations Requests Justification Books

4.2.2.1. A separate abbreviated Justification Book will be prepared by OUSD (Comptroller) and/or each Military Department for each affected appropriation title; e.g., Operation and Maintenance; Procurement; RDT&E; etc. (Additional justification materials required of Defense Agencies and for Defense-wide accounts will be identified in separate correspondence from OUSD (Comptroller). Related Justification Books will be prepared by OUSD (Comptroller) P/B.) Justification books will be organized by supplemental category (e.g., contingencies, natural disasters, etc.) Each Book should be stapled but must contain holes punched to fit existing Justification Book binders. (NOTE: Depending on the magnitude of a particular budget amendment; i.e., number of DoD components and appropriation accounts affected, single Justification Books may be prescribed for each DoD Component, or a single Justification Book may be prepared by OUSD (Comptroller) P/B with input from the affected DoD Components.)

4.2.2.2. Each Justification Book will contain the following, as a minimum:

4.2.2.2.1. A single Table of Contents

4.2.2.2.2. By individual appropriation account:

4.2.2.2.2.1. Revised appropriation language (retyped from Budget Appendix to reflect revised request).

4.2.2.2.2.2. Budget Amendment Summary, in the format of Exhibit PB-37R (see Section 10.0), highlighting changes to the pending request.

4.2.2.2.2.3. Program and Financing Schedule (abbreviated) in the format of Exhibit PB-37S (see Section 10.0). Both the Budget Plan and Obligation Plan will be shown for multi-year accounts.

4.2.2.2.2.4. Narrative Justification by Budget Activity in the format of Exhibit PB-37T (see Section 10.0). Narrative will discuss dollar, quantity, personnel changes, etc., at least at the level of changes indicated on the Budget Amendment Summary (Exhibit PB-37R).

4.2.2.2.2.5. Existing P-1 and R-1 Exhibits will be marked up to indicate changes resulting from the proposed amendment.

4.2.2.2.2.6. Procurement and RDT&E Justification material will be retyped, where applicable, to encompass changes resulting from the proposed amendment.

4.2.2.3. When prepared by a Military department, three advance sets of materials will be forwarded to the Directorate for Budget and Appropriations Affairs, OUSD (Comptroller), Room [3D755](#). Two copies should also be submitted at that time to Washington Headquarters Services, Directorate for Freedom of Information and Security Review, (703) 696-4538, for

security clearance. Other appropriate provisions of Section 4.1 pertain. Military Departments will make the same distribution of above Books as for regular congressional justification materials.

4.2.3. References. Additional instructions are contained in OMB Circular A-11.

4.3 Distribution/Internet Posting of Budget Material (010403)

4.3.1. Copies of **OSD-generated** justification materials for congressional distribution will be delivered to OUSD (Comptroller), Budget & Appropriations Affairs, Room 3D755 for delivery to the congressional committees.

4.3.2. Each Military Department will deliver copies of its justification material to congressional committees, GAO, Library of Congress, CBO, and OMB, etc. The OUSD (Comptroller) (P/B) will distribute copies of the consolidated Defense-wide justification material unless assigned to a Military Department. The Office of the ASD(NII)/DoD CIO Resource Management Directorate will distribute copies of the consolidated Information Technology Justification.

4.3.3. Copies of classified material and other backup documentation for OSD will be delivered directly by each Military Department to the offices listed. Total distribution including the number of copies is also provided on the following tables. Advance books (40) are required to be produced by the due dates so that immediate distribution may be made to the congressional committees. The remaining quantities will be delivered/distributed 3 to 5 days thereafter.

4.3.4. Internet Posting of Unclassified Budget Justification Material

4.3.4.1. Justification material for the President's budget will have limited paper copy distribution as shown on the distribution charts. No internal DoD distribution will be made of unclassified justification material that is provided to the Congress, OMB and other non-DoD organizations. This justification material will be available solely through posting to Component Internet sites.

4.3.4.2. However, classified budget justification and budget backup material as identified in the distribution tables will be provided in paper copy to the organizations listed. Appropriate OUSD (Comptroller) directors should be consulted prior to distribution of material not listed.

4.3.4.3. Internet posting on Component Web Sites.

4.3.4.3.1. Web pages presenting Defense budget documents must be designed to facilitate user discovery of the information. These pages will be used extensively by Congressional staffs, the media, and the public, and the presentation of material reflects upon the organization sponsoring the site. Budget documentation should be logically grouped, and link names should be clear and concise, to allow the user to rapidly navigate to the document of interest. Graphical content should be limited, to allow reasonable download times when accessed via modem. The Military Departments must ensure that established web pages meet these criteria.

4.3.4.3.2. Defense Agencies and managers of Defense-wide accounts will be provided separate guidance for the submission of budget justification in an electronic format. OUSD (Comptroller) will consolidate Defense-wide justification and distribute/post to the Comptroller Internet site.

4.3.4.3.3. Posting of justification material on Component web pages should occur no later than 5 working days after delivery of the paper copies to the Congress, but not prior to delivery to the Congress.

4.3.4.3.4. As a reminder, for Freedom of Information requests received prior to posting the unclassified budget material on the Internet, it is the responsibility of the DoD component to comply with the request in accordance with DoD 5400.7-R.

4.3.5. CD-ROM Production. Upon completion of the posting of budget justification material to the Component Internet site, a CD-ROM containing all of this material will be produced and distributed in accordance with the distribution tables that follow. This CD-ROM should be distributed not later than 45 days after the Budget of the United States Government is presented to the Congress. This process will make budget material available for those that lack Internet access and for historical purposes.

4.4 Witness Statements (010404)

4.4.1. Purpose. This section provides instructions for preparation of witness statements for testimony at hearings before congressional committees.

4.4.2. Preparation

4.4.2.1. Each witness statement should contain a cover page that includes the name, grade/rank, and position title of the witness; the full title of the congressional committee or subcommittee before which the witness is to appear; the date the witness is to testify; the subject of the hearing; and an embargo statement “Not for Publication Until Released by the Committee” (or Subcommittee, if applicable).

4.4.2.2. The various congressional committees publish instructions for preparation of witness statements for their committee. These instructions, unique to each committee, are available from the following offices:

4.4.2.2.1. House and Senate Defense, House Military Quality of Life and Veterans Affairs and Related Agencies, and Senate Military Construction Appropriations Subcommittees – Budget and Appropriations Affairs Directorate, USD(Comptroller) and Service Budget Liaison offices.

4.4.2.2.2. House and Senate Armed Services Committees and House and Senate Budget Committees - Office of the Assistant Secretary of Defense (Legislative Affairs) and Service Legislative Affairs offices.

4.4.2.2.3. Other congressional committees - Instructions are normally included in the letter requesting the hearing. First time before the committee.

4.4.3. Security Review

4.4.3.1. DoD Directive 5400.4 calls for DoD witnesses to submit their prepared statements to Washington Headquarters Services, Office of Security Review, (703) 696-4538, for clearance.

4.4.3.2. This should be done as far in advance of the required date of transmittal to a congressional committee as possible, usually 5 or more working days prior to the date clearance is desired.

4.4.4. Number of Copies

4.4.4.1. Upon completion of the security review process, the originating office should ensure that 75 copies of unclassified statements are delivered to the Directorate for Defense Information, Office of the Assistant to the Secretary of Defense (Public Affairs), Room 2E565, Pentagon. This should be done at least 24 hours in advance of the scheduled appearance of the witness before the congressional committee. Be prepared to provide additional copies on short notice.

4.4.4.2. These procedures will allow the Office of the Assistant Secretary of Defense (Public Affairs) to meet news media requirements as soon as statements are released by the congressional committee or subcommittee.

4.4.4.3. A chart identifying the various oversight committees' copy requirements for witness statements and the date that the statements are due to the committee is republished periodically by the Budget and Appropriations Affairs Directorate, USD(Comptroller), as committee requirements change. Be careful to use the most recent chart.

4.4.4.4. Special care should be exercised to ensure that specified due dates are met. The committees use the witness statement in preparing for the hearing and so suspense dates are important. Committees will routinely predicate cooperation in discussing or releasing possible hearing questions or topics on the timely delivery of these statements.

4.4.4.5. Offices responsible for arranging the attendance of principal and supporting witnesses at a hearing normally prepare a listing of witnesses known as the Witness List. These offices will contact all involved parties to obtain the names and positions of the witnesses for the Witness List.

4.5 Transcript Processing (010405)

4.5.1. Purpose. This section provides instructions for processing transcripts of witness testimony at hearings before congressional committees.

4.5.2. Initial Receipt

4.5.2.1. The House and Senate Appropriations Subcommittees on Defense, the House Subcommittee on Military Quality of Life and Veterans Affairs and Related Agencies, and the Senate Military Construction Appropriations Subcommittee provide hearing transcripts directly to Budget Liaison offices of the Services and to the Director for Budget and Appropriations Affairs, Under Secretary of Defense (Comptroller). All other hearing transcripts are provided directly to the Legislative Affairs office of the Services and to the Office of the Assistant Secretary of Defense (Legislative Affairs).

4.5.2.2. The original copy of the transcript is then provided to the office of the principal witness utilizing DD Form 1587, Record of Congressional Transcript Review, as the transmittal document. To meet committee requirements and allow time for final review by Washington Headquarters Services, Security Review, each element in the review process must give cooperative consideration to the time requirements of all elements in meeting due out dates. DoD Directive 5400.4 provides guidance in utilizing DD Form 1587. Instructions are also printed on DD Form 1587.

4.5.2.3. The various committees publish instructions for processing transcripts for their committee hearings. These instructions, unique to each committee, are available from the following offices:

4.5.2.3.1. House and Senate Defense, House Military Quality of Life and Veterans Affairs and Related Agencies, and Senate Military Construction Appropriations Subcommittees - Directorate for Budget and Appropriations Affairs, USD(Comptroller) and Service Budget Liaison offices.

4.5.2.3.2. House and Senate Armed Services Committees and House and Senate Budget Committees - Office of the Assistant Secretary of Defense (Legislative Affairs) and Service Legislative Affairs offices.

4.5.2.3.3. Other congressional committees - Instructions are normally included in the letter requesting the hearing.

4.5.3. Processing Procedures

4.5.3.1. Upon receipt of the transcript in the office of the primary witness, that office will review and edit the transcript and prepare the necessary inserts including questions for the record. At the same time, those staff offices required to provide input to the transcript should be tasked, in writing, for their specific portion. Page and line number/question number should be referenced when tasking inserts for the record.

4.5.3.2. Offices providing input to transcripts should clear their internal security review office prior to providing their input to the principal witness' office. After consolidation of the edit/review of the transcript and inclusion of necessary inserts, the office of the principal witness will then need to obtain the proper security clearance for the transcript and inserts from Washington Headquarters Services, Directorate for Freedom of Information and Security Review. A DD 1790, Prepared Testimony Review must be used. DoD Directive 5400.4 provides instructions to be followed in processing the transcript through the security review process.

4.5.3.3. Plain bond (8.5" x 11.0" with left and right margins of 1.5") Insert for the Record, will be utilized for all inserts to congressional testimony and questions/answers for the record. Formats for completing these for the four oversight committees are provided in Section 10.0.

4.5.3.4. After completing the security review process and required coordination's, the completed transcript should be returned to the office from which the transcript was received (Transcript Action Monitor) for final review and delivery to the congressional committee.

4.5.3.5. Special care should be exercised to ensure that transcript processing suspense dates are met. The committees emphasize that the deadline dates imposed by them must be met. As the committees approach mark-up, the importance of meeting deadlines becomes even more critical. Transcripts should not be unduly delayed while gathering information for the record. If a delay is encountered, a note that the data will be furnished at some specified date should accompany the transcript and processing should proceed.

4.5.4. Congressional Hearings and Reporting Requirements Tracking System (CHARRTS). CHARRTS is an OUSD (Comptroller) web based application for tasking Hearing transcripts, inserts for the record, and questions for the record. Components will be notified by email for each tasking for which they are responsible to complete. CHARRTS is a controlled site accessed through <https://charrts.osd.mil/> and requires an access password for each user. Components will input all responses to both inserts and questions for the record directly into CHARRTS. Formats have been established within CHARRTS for each Committee for these responses and must be used. Input that does not follow the established standards will be rejected by the system. Contact the OUSD (Comptroller), Budget and Appropriations Affairs Directorate at (703) 697-1101 for all questions related to CHARRTS.

4.5.5. Page Proofs/Galleys. Often committees allow DoD to review page proof/galleys of congressional testimony to ensure that changes have been incorporated and that if classified data has been included that it be deleted from the version that will be made public. Extreme care must be exercised to ensure that all classified data have been excised.

4.6 Appeal Process on Congressional Actions (010406)

4.6.1. Purpose. Each year the actions taken by congressional committees during consideration of the DoD authorization and appropriation bills are reviewed by DoD components. This Section provides policy guidance and procedures for appealing such congressional actions.

4.6.2. Scope of Material

4.6.2.1. DoD appeals to congressional committees may be in the form of a letter to the appropriate committee chairman (or chairmen in the case of appeals to joint conferees), which sets forth the Department's position on the most significant programs/items impacted by congressional actions. This letter is prepared for the signature of the Secretary of Defense. Only the Secretary will provide the Department's position on appeal items.

4.6.2.2. DoD appeals also may be in the form of an appeal package consisting of one page for each action being appealed. This package is submitted to the appropriate committee by the USD(Comptroller). It is not submitted as an enclosure to an appeal letter, but may be referred to in the letter.

4.6.2.3. The submission of appeal material can vary each year and is primarily dependent upon the timing of each committee's actions on the budget request. The preparation of appeal items begins when the actions of the committees become known, usually with release of the committee's report. Normally, appeal material will be modified to reflect final floor action since amendments adopted on the floor can significantly change positions reported out by the committees. In most cases, the process is as follows:

4.6.2.3.1. To Authorization Conferees. This appeal is based on the actions of both the House and Senate Armed Services Committees, as modified by House and Senate floor action.

4.6.2.3.2. To Appropriations Conferees. This appeal is based on the actions of both the House and Senate Appropriations Committees, as modified by House and Senate floor actions.

4.6.3. Preparation of Appeals

4.6.3.1. Once the actions of an oversight committee become known, DoD components normally will be requested to provide input on high priority items for incorporation into the Secretary's appeal letter or appeal package. Appeal input will be submitted in the general format of Exhibit PB-39A-1 and PB-39A-2 (provided in Section 10.0) in both hard copy and by e-mail in Microsoft Word format (with no graphics). Components may be asked to assign a priority to the actions they want appealed.

4.6.3.2. All appeal materials must be unclassified. Verification that materials are entirely unclassified must be obtained by the DoD component from the component's security review prior to submission to OSD. USD(Comptroller) will obtain clearance of the consolidated appeal package from the Washington Headquarters Services, Directorate for Freedom of Information and Security Review, (703) 696-4538.

4.6.4. Policy Guidance, Preparation and Coordination of Budget Appeals

4.6.4.1. By memorandum of May 27, 1983, Subject: "Congressional Justification of the President's Annual Defense Budget," the Secretary of Defense charged the Comptroller with the responsibility to coordinate all justification actions for his consideration that may be interpreted as reprogramming, supplementals, amendments, or appeals to the Defense budget. Therefore, in order to ensure that the Department speaks to the Congress in this area with one voice and remains consistent with the Secretary's policy direction, all appeals to congressional committees will be prepared by the USD(Comptroller).

4.6.4.2. The Directorate for Budget and Appropriations Affairs, within the Office of the USD(Comptroller) (Program/Budget), will issue instructions for submission of appeal input. Along with other Comptroller directorates, Budget and Appropriations Affairs will review the input and prepare a draft appeal letter and appeal package. Normally, these drafts will be sent for comments to the appropriate DoD offices. Clearance on all appeal materials will be requested from the Office of Management and Budget.

4.6.4.3. While responsibility for consolidation and coordination of appeal materials resides with the USD(Comptroller), all offices are responsible for ensuring that the materials they submit remain up to date. Submitting components, e.g. The Joint Staff, should provide only one position on each issue submitted.

4.6.5. Classified Appeals. Actions of congressional committees documented in classified annexes (such as by the Intelligence Committees) to reports or classified letters may be addressed in classified appeals prepared by the OUSD(I). Further guidance is contained in Chapter 16.

5.0 BUDGET AUTOMATION REQUIREMENTS (0105)

5.1 Automated Military Personnel Programs Database (010501)

5.1.1. Purpose and Objectives. The purpose of the Military Personnel Programs database is to provide supporting budgetary documentation to the Congress, OMB and the public with each year's President's Budget. Data submission is through the Program Resources Collection Process (PRCP) System. The Military Personnel Programs database supports, and must be consistent with, other budgetary data in the Comptroller Information System (CIS). This section provides for the maintenance of the Military Personnel Programs as an automated database that is the primary structure for budget activity and budget subactivity level of detail. The Military Personnel Programs (M-1) (unclassified) is produced from the Military Personnel Programs database.

5.1.2. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD) and the Military Departments.

5.1.3. Reporting Requirements. The automated database was established for the FY 2005 President's budget. Subsequent updates will be required coincident with the (1) Program and Budget Review and (2) the President's Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

5.1.4. General Instructions - Preparing the Detailed Military Personnel Programs (M-1). The Military Personnel Programs provide resources in a budget activity and budget subactivity line item level of detail with appropriation identification consistent with other budgetary data in the CIS database. A detailed description of line item entries is listed in Volume 2A, Chapter 2. The minimum information required in the Military Personnel Programs is as follows:

5.1.4.1. A summary by appropriation account with subtotals for DOD Components.

5.1.4.2. A summary of each appropriation account by budget activity/budget subactivity with budget activity subtotals and an appropriation total.

5.1.4.3. Entries for the individual line items should be on the same basis as that used for program and budget submissions.

5.1.4.4. Costs of prior year programs will be adjusted annually to reflect actual obligations, including deobligations, recoveries of prior year obligations, upward obligation adjustments, transfers, and rescissions, as appropriate, and must match prior year values in the Comptroller Information System.

5.1.4.5. The OUSD(C) P/B Military Personnel and Construction Directorate will obtain the Security classification review certification.

5.1.5. General Instructions - Preparing the Military Personnel Programs (M-1). The M-1 document is derived from and consistent with other budgetary data in the CIS database. The M-1 is provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President's Budget. The minimum information required in the M-1 is as follows:

5.1.5.1. Identification codes and a detailed description of line item entries are explained in paragraph F below.

5.1.5.2. The line item data provided is PY, CY, BY1 (and BY2 if biennial submission).

5.1.5.3. The security classification will be in accordance with the criteria set forth in Section 1.8.

5.1.6. Military Personnel Data Elements and Record Formats

5.1.6.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.1.6.2. Other Military Personnel Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the Military Personnel Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).

5.2 Automated Operation and Maintenance Programs Databases (010502)

5.2.1. Purpose and Objectives. The purpose of the Operation and Maintenance Programs databases are to provide supporting budgetary documentation to the Congress, OMB and the public with each year's President's Budget. Data submission is through the Program Resources Collection Process (PRCP) System. The Operation and Maintenance Programs databases support, and must be consistent with, other budgetary data in the Comptroller Information System (CIS). This section provides for the maintenance of the Operation and Maintenance Programs as an automated database that is the primary structure for budget activity and activity group cost at the Program Element and expense aggregate level of detail. The O-1 reports are produced from the Operation and Maintenance Programs database. Operation and Maintenance Programs data extracts are provided to the Office of the Director, Program Analysis and Evaluation (hereafter referred to as "OD,PA&E") to update the Future Years Defense Program database. In addition,

the Civilian Personnel Costs and O&M Summary of Price and Program Changes automated exhibits are processed through this system. The Civilian Personnel Costs exhibit is required for each appropriation/fund, not limited to O&M appropriations, in which civilian personnel are funded. Updates and documents produced include:

- 5.2.1.1. Operation and Maintenance Programs (O-1) (classified)
- 5.2.1.2. Operation and Maintenance Programs (O-1) (unclassified)
- 5.2.1.3. Future Years Defense Program Update Data for OD,PA&E
- 5.2.1.4. Civilian Personnel Costs (OP-8) (classified)
- 5.2.1.5. Civilian Personnel Costs (OP-8) (unclassified)
- 5.2.1.6. Summary of Price and Program Changes (OP-32) (classified)
- 5.2.1.7. Summary of Price and Program Changes (OP-32) (unclassified)

5.2.2. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Defense Agencies, and any other DoD Component that contribute data to the Operation and Maintenance Programs.

5.2.3. Reporting Requirements. The initial Operation and Maintenance Programs automated database was established for the FY 2005 President's budget. Subsequent updates will be required coincident with the (1) Program and Budget Review and (2) the President's Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

5.2.4. General Instructions - Preparing the Detailed Operation and Maintenance Programs. The Operation and Maintenance Programs provide resources in a budget activity and activity group line item level of detail with appropriation identification consistent with other budgetary data in the CIS database. A detailed description of line item entries is listed in Volume 2B, Chapter 3, Section 030402. The minimum information required in the Operation and Maintenance Programs is as follows:

5.2.4.1. A summary by appropriation account with subtotals for DOD Components.

5.2.4.2. A summary of each appropriation account by budget activity/activity group/sub-activity group with budget activity/activity group subtotals and an appropriation total.

5.2.4.3. A detailed sub-activity group by program element and expense aggregate listing in budget activity/activity group sequence.

5.2.4.4. Entries for the individual line items should be on the same basis as that used for program and budget submissions.

5.2.4.5. Costs of prior year programs will be adjusted annually to reflect actual obligations, including deobligations, recoveries of prior year obligations, upward obligation adjustments, transfers, and rescissions, as appropriate, and must match prior year values in the Comptroller Information System.

5.2.4.6. Security classification of line items is determined by the submitting Component subject to OSD Security review. DoD Components must provide a security classification review certification to OUSD(C) P/B P&FC. Except for information published in the unclassified version of the O-1 Report, data contained in the Operation and Maintenance Programs may not be released outside the DoD without the expressed written consent of the Under Secretary of Defense (Comptroller).

5.2.5. General Instructions - Preparing the Operation and Maintenance Programs (O-1). The O-1 document is derived from and consistent with other budgetary data in the CIS database. The O-1 is provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President's Budget. An unclassified version is provided to OASD(PA) for use by non-DoD activities. The minimum information required in the O-1 is as follows:

5.2.5.1. Identification codes and a detailed description of line item entries are explained in paragraph 5.2.6 below.

5.2.5.2. The line item data provided is PY, CY, BY1 (and BY2 if biennial submission) for the O-1 production, and outyears for the FYDP update.

5.2.5.3. The security classification will be in accordance with the criteria set forth in Section 1.8.

5.2.6. Operation and Maintenance Data Elements and Record Formats

5.2.6.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.2.6.2. Program element codes and titles are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook). This publication is available at <http://www.dtic.mil/whs/directives> under "Publications," and in approved decision documents posted to the FYDP Resource Structure Management (RSM) web site (see Section 7.2) but not yet reflected in DoD 7045.7-H. A listing of expense aggregate codes is available at the SIPRNET home pages of the OUSD (Comptroller) and OD, PA&E.

5.2.6.3. Other Operation and Maintenance Program Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the Operation and Maintenance Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).

5.2.7. Instructions on OP-32 and OP-8 are at Section 030201.G. Automated Submission and 0304 Operation and Maintenance Appropriation Submission Formats. Detailed guidance on the automated submission is provided on the OUSD (Comptroller) home page of the SIPRNET at <http://cisweb.ousdc.osd.smil.mil>.

5.3 Automated Procurement Programs Database (010503)

5.3.1. Purpose and Objectives. The purpose of the Procurement Programs database is to provide supporting budgetary documentation to the Congress, OMB and the public with each year's President's Budget. Data submission is through the Program Resources Collection Process (PRCP) System. The Procurement Programs database supports, and must be consistent with, other budgetary data in the Comptroller Information System (CIS). This section provides for the maintenance of the Procurement Programs as an automated database that is the primary structure for quantity and program cost at the line item and Program Element level of detail for a number of related Procurement Program documents. The following are produced from the Procurement Programs database:

5.3.1.1. Detailed Procurement Programs (classified)

5.3.1.2. Procurement Programs (P-1) (classified)

5.3.1.3. Procurement Programs (P-1/P-1R) (unclassified)

5.3.1.4. Program Acquisition Costs by Weapon System (unclassified)

5.3.1.5. P-1/P-1R database for the Senate Appropriations Committee, the House Appropriations Committee, the Senate Armed Services Committee, and the House Armed Services Committee.

5.3.1.6. Future Years Defense Program Update Data for OD,PA&E

5.3.1.7. Data for USD(AT&L), USD(I), ASD(NII)/DoD CIO, Director, PA&E, The Joint Staff, OMB, and GAO.

5.3.2. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Defense Agencies, and any other DoD Component that contribute data to the Procurement Programs.

5.3.3. Reporting Requirements. The initial automated database was established consistent with the procurement data submitted to the Congress in support of the FY 1974 Budget. Since that time subsequent updates have been required coincident with submission of the (1) Program and Budget Review and (2) the President's Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

5.3.4. General Instructions - Preparing the Detailed Procurement Programs. The Procurement Programs provide resources in a line item level of detail with appropriation identification consistent with other budgetary data in the CIS database. A detailed description of line item entries is listed in Volume 2B, Chapter 4, Section 0402. The minimum information required in the Procurement Programs is as follows:

5.3.4.1. A summary by appropriation account with subtotals for DOD Components.

5.3.4.2. A summary of each appropriation account by budget activity with an appropriation total.

5.3.4.3. A detailed line item listing in budget activity/budget subactivity sequence.

5.3.4.4. Entries for the individual line items should be on the same basis as that used for budget submissions. Multiyear procurements (MYP) are identified for P-1 line items with MYP as defined in Section 2.3. Advance procurement entries should be used as specified in Volume 2B, Section 040502. Initial spares listed with the procurement item (post-delivery and outfitting costs for Shipbuilding and Conversion, Navy) should be shown immediately following the line as a memorandum entry--non-add to the budget activity total.

5.3.4.5. Costs of prior year programs will be adjusted annually to reflect actual obligations, including deobligations, recoveries of prior year obligations, upward obligation adjustments, transfers, and rescissions, as appropriate.

5.3.4.6. The cost to complete column provides the data necessary to obtain the total procurement cost for acquisition of weapon items. It is necessary to estimate the cost of completing the approved program for major weapon systems included in the Selected Acquisition Report (SAR) reporting system and for multiyear contracts utilizing economic order quantity advance procurement. Such costs will be entered in the "cost to complete" column of the Procurement Programs. Entries in the "cost to complete" column are not required for other procurement line entries. The "cost to complete" estimate will include: (1) the portion of the "approved quantity" to be procured beyond the FYDP, and (2) costs to complete acquisition of units procured in prior years such as outfitting and post-delivery requirements for ships which will not deliver during the FYDP.

5.3.4.7. Security classification of line items is determined by the submitting Component subject to OSD Security review. DoD Components must provide a security classification review certification to OUSD(C) P/B P&FC. Except for information published in the unclassified version of the P-1 Report, data contained in the Procurement Programs may not be released outside the DoD without the expressed written consent of the Under Secretary of Defense (Comptroller).

5.3.5. General Instructions - Preparing the Procurement Programs (P-1). The P-1 document is derived from and consistent with other budgetary data in the CIS database. The P-1 is provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President's Budget. An unclassified version is provided to OASD(PA) for use by non-DoD activities. The minimum information required in the P-1 is as follows:

5.3.5.1. Identification codes and a detailed description of line item entries are explained in paragraph 5.3.6 below.

5.3.5.2. The line item data provided is PY, CY, BY1 (and BY2 if biennial submission).

5.3.5.3. The security classification will be in accordance with the criteria set forth in Section 1.8.

5.3.6. Procurement Data Elements and Record Formats

5.3.6.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.3.6.2. Program element codes and titles are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook. This publication is available at <http://www.dtic.mil/whs/directives> under "Publications," and in approved decision documents posted to the FYDP Resource Structure Management (RSM) web site (see Section 7.2) but not yet reflected in DoD 7045.7-H.

5.3.6.3. Other Procurement Program Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the Procurement Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).

5.4 Automated RDT&E Programs Database (010504)

5.4.1. Purpose and Objectives. The purpose of the RDT&E Programs database is to provide supporting budgetary documentation to the Congress, OMB and the public with each year's President's Budget. Data submission is through the Program Resources Collection Process (PRCP) System. The RDT&E Programs database supports, and must be consistent with, other budgetary data in the Comptroller Information System (CIS). This section provides for the maintenance of the RDT&E Programs as an automated database that will be the primary structure for program element and project level detail for a number of related RDT&E Program documents. The following are produced from the RDT&E Programs database:

5.4.1.1. Detailed RDT&E Programs (classified)

5.4.1.2. RDT&E Programs (R-1) (classified)

5.4.1.3. RDT&E Programs (R-1) (unclassified)

5.4.1.4. R-1 database for the Senate Appropriations Committee, the House Appropriations Committee, the Senate Armed Services Committee, and the House Armed Services Committee.

5.4.1.5. Future Years Defense Program Update Data for OD,PA&E

5.4.1.6. Data for USD (AT&L), USD(I), ASD (NII)/DoD CIO, Director, PA&E, The Joint Staff, OMB, and GAO.

5.4.2. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Defense Agencies, and any other DoD Component that contribute data to the Procurement Programs.

5.4.3. Reporting Requirements. The initial automated database was established consistent with the RDT&E data submitted to the Congress in support of the FY 1976/1977 Budget. Since that time subsequent updates have been required coincident with submission of the (1) Program and Budget Review, and (2) President's Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

5.4.4. General Instructions - Preparing the Detailed RDT&E Programs. The RDT&E Programs is consistent with the program element identification of resources contained in the Future Years Defense Program Summary and Program Element Detail. Data in the RDT&E Programs is summarized by appropriation account with recaps by budget activity and FYDP programs. Security classification of line items is determined by the submitting Component subject to OSD Security review. DoD Components must provide a security classification review certification to OUSD(C) P/B P&FC.

5.4.5. General Instructions - Preparing the R-1 Document. The R-1 document is derived from, and consistent with, other budgetary data in the CIS database. The R-1 is provided annually to the DoD Oversight Committees of the Congress coincident with the transmittal of the President's Budget. An unclassified version is provided to OASD(PA) for use by non-DoD activities. The unclassified R-1 is the only document from the RDT&E Programs database available for public distribution. The minimum information required in the R-1 is as follows:

5.4.5.1. The program element line item data provided is PY, CY, BY1 (and BY2 if biennial submission).

5.4.5.2. The security classification shall be in accordance with the criteria set forth in Section 1.8.

5.4.5.3. A detailed program element listing in budget activity sequence.

5.4.6. RDT&E Data Elements and Record Formats

5.4.6.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.4.6.2. Other RDT&E Program Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the RDT&E Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).

5.5 Automated Construction Program Database (010505)

5.5.1. Purpose and Objectives. This section provides guidelines for the Automated Construction Program Database to supplement the Defense Components' military construction justification materials. Data submission is through the Program Resources Collection Process (PRCP) System. The Construction Program also will be used to track Program Budget Decisions at the project level, track congressional action on the President's Budget submission, and provide the baseline data required for special analysis such as the facilities recapitalization metric.

5.5.2. Applicability. The provisions of this section apply to all requirements financed by the Military Construction, NATO Security Investment Program, Base Realignment and Closure, Family Housing, DoD Family Housing Improvement Fund and Homeowners Assistance appropriations of the DoD Components as applicable.

5.5.3. Responsibilities. The DoD Components will submit Construction Program data for their Active, Guard and Reserve Forces construction projects, their portions of the Family Housing, DoD Family Housing Improvement Fund and Homeowners Assistance programs. DoD Components will also submit Construction Programs data for multi-service or national level projects for which they are the executive agent as described in Volume 2B, Chapter 6, Section 060301.

5.5.4. Reporting Requirements. Update submissions will coincide with the Program and Budget Review submissions and the January budget presentation. Detailed requirements not contained herein will be specified by memorandum for all update submissions. Data will be consistent with budgetary data in the CIS database.

5.5.5. Construction Data Elements and Record Formats

5.5.5.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.5.5.2. Program element codes and titles are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook. This publication is available at <http://www.dtic.mil/whs/directives> under “Publications,” and in approved decision documents posted to the FYDP Resource Structure Management (RSM) web site (see Section 7.2) but not yet reflected in DoD 7045.7-H.

5.5.5.3. Other Construction Program Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the Construction Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).

5.5.6. Level of Detail

5.5.6.1. Data will be reported at the level specified for the justification material [(DD Form 1391) in Volume 2B, Chapters 6 and 7]. A summary of the levels required follows:

5.5.6.2. Military Construction 1

5.5.6.2.1. Major Construction - project detail

5.5.6.2.2. Minor Construction - lump-sum for exigent minor construction

5.5.6.2.3. Planning and Design - lump-sum

5.5.6.2.4. Supporting Activities - project detail

5.5.6.2.5. Program Element

5.5.6.3. NATO Security Investment Program - lump-sum 1

5.5.6.4. Base Realignment and Closure - lump-sum 1

5.5.6.5. Family Housing Construction 1

5.5.6.5.1. Construction of new housing - project detail. A separate data element will be used to identify the number of units being constructed for each project.

5.5.6.5.2. Construction Improvements - lump-sum.

5.5.6.5.3. Planning and Design - lump-sum.

5.5.6.6. Family Housing, Operation & Maintenance 1/ Lump-sum for each budget activity except the Operating Expenses budget activity will be reported by subaccount. The Family Housing Operation and Maintenance entries are shown below:

5.5.6.6.1. Management Account

5.5.6.6.2. Services Account

5.5.6.6.3. Furnishings Account

5.5.6.6.4. Miscellaneous Account

5.5.6.6.5. Utilities Account

5.5.6.6.6. Leasing

5.5.6.6.7. Maintenance of Real Property

5.5.6.6.8. Interest Payments

5.5.6.6.9. Mortgage Insurance Premiums

5.5.6.6.10. Housing Privatization Support

5.5.6.7. Homeowners Assistance Fund 1/

5.5.6.7.1. Payment to Homeowners

5.5.6.7.2. Other Operating Costs

5.5.6.7.3. Acquisition of Real Property

5.5.6.7.4. Mortgages Assumed

5.5.6.8. DoD Family Housing Improvement Fund - lump sum 1/

5.5.6.8.1. Nomenclature records for all lump-sum values will be generated by the automated Construction Programs database system; DoD Components should not submit nomenclature records for lump-sum values.

5.5.7. Security Classification. A project may be classified due to the nature of the project, the location of the project, or both. Since the Construction Programs (C-1) is an unclassified document generated from an unclassified database, use the conventions provided in the instructions for submission of updates to the Construction Programs database on the SIPRNet home page of the OUSD (Comptroller).

5.6 CIS Automation Requirements for the Biennial Program and Budget Review Submission (010506)

5.6.1. Purpose. Electronic data are the basis for the OSD budget review. Components' program and budget review submission form the baseline from which all Program Budget Decision dollar and manpower deltas are made. The program and budget review submission is entered into Comptroller Information System (CIS) by the Military Departments and Defense Agencies. This chapter outlines the requirements for submission of the data.

5.6.2. Requirement for the CIS Budget Structure. DoD must comply with the budget submission requirements in OMB Circular A-11, "Preparation, Submission, and Execution of the Budget," which applies to all Executive Branch agencies. OMB's MAX budget system provides the structure for the data that must be submitted to OMB for each appropriation and receipt account. The data is published annually in the Budget of the United States Government, commonly referred to as the President's Budget. OMB publishes detailed account data for each Federal agency in a separate "Appendix" of the Budget. The OUSD (Comptroller)'s CIS database is designed to satisfy the annual submission of Defense Budget data to OMB's automated MAX budget system. The CIS budget structure for an account is the Program and Financing (P&F) Schedule. The P&F Schedule consists of a budget plan, object class, and expenditure tail for all accounts, except for multi-year accounts that also have a separate obligation plan in addition to the budget plan.

5.6.3. Submission Requirements:

5.6.3.1. Submission of Budget Estimates for Budget Years (BY1) and BY2:

5.6.3.1.1. Budget Submission (Dollars). Military Departments and Defense Agencies, as applicable, will submit budget plan, and object class data entries for all applicable appropriation and receipt accounts which are consistent with and reconcilable to hard copy submission of budget estimates exhibits required by other sections of the Financial Management Regulation. Budget plan data must be submitted for all years by period of obligational availability. Object class entries will be at the summary level (not by period of obligational availability) and exclude the outyears. Detailed data entries only will be submitted since subtotals and summary totals are CIS computer generated. All TOA values by Component by fiscal year will agree with budget submission TOA dollars on Exhibit PB-1A.

5.6.3.1.2. Budget Submission (Personnel Data). Budget submission of on-board year end personnel data entries for military end strength and civilian full-time equivalents (FTEs) will be in exact agreement with the PB-4 exhibit.

5.6.3.1.3. Budget Submission for Prior Year (PY). The Directorate for Program and Financial Control, OUSD (Comptroller)(P/B) will replicate PY from the CY column of the previous year's budget. Components may make limited changes as part of the program and budget review submission. The PY will be updated once accounting and manpower actuals are available.

5.6.3.1.4. Obligation Plan Data for Multi-Year Accounts. Obligation plans for the program and budget review submissions will be computer generated in CIS once PY accounting actuals are input and as budget adjustments are recorded in CIS. Components will be asked to review obligations by budget activity after the updated rates have been implemented in CIS.

5.6.3.1.5. Expenditure Tail Data. Components are not required to submit expenditure tail data. Expenditure tail data for the program and budget review submissions will be computer generated in CIS. Outlay rates used in the previous year's Defense Budget will generate outlays as part of the baseline submission. The Directorate for Program and Financial Control will adjust outlay rates later in the budget review process once PY accounting actuals are available.

5.6.3.2. Submission of Outyear Estimates:

5.6.3.2.1. Budget Submission (Dollars). The submission of TOA (Direct Program) for appropriation accounts (general fund and revolving fund) and concept obligations for trust revolving fund, trust fund, special fund, and receipt accounts for BY2+1 through BY2+4 will be made at the same time as the budget submission. Input to the database for the outyears will be formatted in accordance with the CIS Budget Structure, by appropriation account at the budget activity/special program category level. Budget plan outyear entries for TOA for applicable appropriation accounts and concept obligations for trust revolving fund, trust fund, special fund, and receipt accounts are the only dollar data to be submitted by Components for the outyears. TOA dollars must agree with Exhibit PB-1A.

5.6.3.2.2. Budget Submission (Personnel Data). Budget estimates for BY2+1 through BY2+4 military end strength and civilian full-time equivalents (FTEs) will be made coincident with the budget submission. Input to the database for the outyears will be formatted in accordance with the CIS Budget Structure Listing and will be in exact agreement with the PB-4 exhibit.

5.6.3.3. Account Data Elements and Account Structure. Program and budget review submissions will be in thousands of dollars for all data elements for each account's budget plan, obligation plan, and object classification schedules and must be submitted in accordance with the CIS Budget Structure Listing. (Expenditure tail for CY through the outyears will be computer generated in CIS.) Personnel data for applicable accounts will be submitted for all years in accordance with the detail prescribed by the CIS Budget Structure Listing. The Budget Structure Listing may be generated by running the BATF1 through BATF6 reports from the CIS Report Processor subsystem. Questions and changes to the CIS Budget Structure Listing should be

directed to the Directorate for Program and Financial Control, OUSD (Comptroller)(P/B), phone 703-697-7564.

5.6.3.4. Data Submission. Guidance is provided on the SIPRNET home page of the OUSD (Comptroller) on “Coding CIS Transactions for FY BY1/BY2 Budget.” Components must use the record layouts and file formats prescribed in this guidance.

5.7 CIS Budget Structure Listing (BSL) (010507)

5.7.1. Purpose. The BSL reflects the official Department of Defense budget account structure for Component submission of the budget estimates in machine readable form. The BSL contains the following sections:

5.7.1.1. Appropriation Account Names/Codes. This section lists all the valid and active codes in the CIS database. Appropriation accounts have four-digit to six-digit numeric plus one-digit Treasury agency alpha account code. Receipt accounts have six-digit numeric plus one-digit Treasury agency alpha account code. Account coding in CIS agrees with codes used in OMB’s MAX automated budget system for compatibility in the Department’s electronic submission of the Defense Budget to OMB.

5.7.1.2. Budget Plan and Obligation Plan Name Codes. This section provides the detailed budget structure for data elements in the budget plan and obligation plan of all appropriation and receipt accounts in CIS. In this section of the BSL, the presence of a “P” and/or “\$” in the “PER/\$\$ Inputs” column indicates those budget activities/special program codes against which resources (\$ or personnel) may be entered in the CIS database. Requests to add “P” or a “\$” to an existing line may be made to the Directorate for Program and Financial Control, OUSD (Comptroller)(P/B), through the respective Program/Budget Directorate responsible for that appropriation.

5.7.1.3. Financing, Budget Authority, and Expenditure Tail Name/Codes. This section lists the financing (FIN), budget authority breakout (BAB), and expenditure tail (EXP) codes used in the Program and Financing Schedule for each appropriation and receipt account.

5.7.1.4. Object Classification Codes. OMB Circular A-11 requires agencies to report account obligations by object class for PY, CY, BY1 and BY2. This section aligns Program and Financing Schedule obligations with the object class codes in OMB Circular A-11.

5.7.2. Input Requirements

5.7.2.1. Input coding for all budget estimates will be entered in accordance with guidance provided on the SIPRNET OUSD (Comptroller) home page. Features that should be considered in the preparation of data are:

5.7.2.1.1. Military Personnel Accounts:

5.7.2.1.1.1. The Military Departments will prepare and submit the military personnel account data (see Budget Structure Listing on the SIPRNET home page of the OUSD (Comptroller)). Input for military personnel dollars should not be submitted by Defense Agencies.

5.7.2.1.1.2. The Military Departments will prepare and submit end strength data on a Component basis; i.e., Army submits data on personnel assigned to Army as well as Army personnel assigned to each Defense Agency (see Budget Structure Listing on the SIPRNet home page of the OUSD (Comptroller)). The Defense Agencies must coordinate their end strength requirements with the Military Departments prior to the Military Departments' data submissions.

5.7.2.1.2. Input coding for Working Capital Fund must include the appropriate three-position special program code assigned to each business area for operating and capital expenses, civilian full-time equivalents (FTEs), and military end strengths.

5.7.3. Object Classification Schedules

5.7.3.1. Object class definitions are provided in OMB Circular A-11, Section 83. The major object class categories are:

5.7.3.1.1. 10 Personnel compensation and benefits

5.7.3.1.2. 20 Contractual services and supplies

5.7.3.1.3. 30 Acquisition of assets

5.7.3.1.4. 40 Grants and fixed charges

5.7.3.1.5. 90 Other

5.7.3.2. DoD-unique object class major/minor codes include:

5.7.3.2.1. 12.210 Military – accrued retirement benefits

5.7.3.2.2. 12.220 Military – other personnel benefits

5.7.3.2.3. 12.230 Military – accrued health care Military benefit categorization guidance for the three above is provided in Chapter 2, Section 020202.

5.7.3.2.4. 25.320 Payments to foreign national indirect hire

5.7.3.2.5. 25.330 Purchases from revolving funds. Obligations for purchases from Defense Working Capital Funds and other DoD revolving and management accounts. Differentiate from object class 25.310 purchases of goods and services from other government agencies (examples include non-revolving fund support agreement obligations).

5.7.3.3. The object classification codes specified in OMB Circular A-11 are augmented in CIS by type that identifies Direct Obligations (type = “1”), Reimbursable Obligations (type = “2”), Allocation Accounts (type = “3”), and Receipt Obligations (type = “4”).

5.7.3.4. All revolving and management accounts will be coded in the reimbursable (type = “2”) object class series followed by the appropriate object class number.

5.7.3.5. Object class data will be submitted for all accounts (including concept obligations) in the Program and Financing schedules in the PY, CY, BY1 or BY2.

5.7.3.6. Object Class Default Major/Minor Codes. When an obligation adjustment occurs in CIS and an object class is not specified for the obligation change, CIS will automatically make an adjustment in the amount of the obligation to the default object class for the account. For example, if a TOA delta is made to an annual account in a Program Budget Decision (PBD) and if an object class obligation delta is not coded and included as part of the PBD transaction, CIS will automatically generate an object class delta in the default object class code for the account. Components must redistribute obligations by object class for each of their accounts after PY actuals are available, and before the budget review process has been completed, to provide consistent and explainable object class amounts from PY through BY2. A chart displaying CIS object class default Major/Minor code for each account is available on the SIPRNet home page of the OUSD (Comptroller).

5.7.4. CIS P&F Schedule Diagnostics Rules and Report. CIS Report 22 has been developed to provide diagnostic and balancing checks for appropriation and receipt accounts. Report 22 provides a listing of balance diagnostic errors and warnings for each appropriation account and supplemental account as well as for each defense agency within a defense-wide account where appropriate. An example of a balancing requirement checked in this report is: Total Direct Program (Total Obligational Authority (TOA)) in the P&F section must equal total Direct Obligations in the Object Classification section for each year within a defense agency or appropriation account (for annual accounts).

5.7.5. Update of the PY Column

5.7.5.1. OMB Circular A-11 requires agencies to submit PY data to OMB's MAX budget system which is based on Treasury certified accounting actuals. The update of PY dollars in CIS is accomplished using data from the SF Form 133 and the DD Comp 1002 plus AR 1307 for Revolving Funds. PY amounts must reconcile to Treasury's yearend annual report called the Treasury Alignment Statement.

5.7.5.2. Components will be requested to validate budget activity data and update object class obligations and manpower actuals once accounting data has been certified by Treasury for each Defense account. All PY actuals updates for budget plans, obligations plans and expenditure tail data will be done electronically by the Directorate for Program and Financial Control. Business rules used by CIS for updating PY actuals for an account's budget plan, obligation plan and expenditure tail are available on the SIPRNet home page of the OUSD (Comptroller).

6.0 UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATIONS (0106)

6.1 General (010601)

6.1.1. This Section establishes the functional title classifications and subdivisions by which appropriation and fund accounts of the Department of Defense are required to be arranged, grouped, or classified in budgetary and fiscal presentations. These classifications are designed to permit consolidation of budget and fiscal data for the several Components of the Department of Defense into over-all Departmental summaries.

6.1.2. These instructions cover all appropriation and receipt accounts for military functions of the Department of Defense. Detailed DoD budget account structure used in the Comptroller Information System is displayed in the Budget Structure Listing available on the SIPRNet home page of the OUSD (Comptroller).

6.2 Functional Titles – Military Functions (010602)

The following functional titles are to be used in appropriate budgetary and fiscal presentations:

6.2.1. Military Personnel

6.2.2. Operation and Maintenance

6.2.3. Procurement

6.2.4. Research, Development, Test, and Evaluation

6.2.5. Military Construction

6.2.6. Family Housing

6.2.7. Revolving and Management Funds

6.2.8. Defense-Wide Contingencies

6.2.9. Offsetting Receipts

6.2.10. Trust and Trust Revolving Funds

6.2.11. Interfund Transactions

6.3 Definitions of Functional Titles and Subdivisions – Military (010603)

This Section lists currently active appropriations within each functional title. Budget activities for Procurement and RDT&E titles are also listed. Budget activities for other appropriations are displayed in the Budget Structure Listing available on the SIPRNet home page of the OUSD (Comptroller).

6.3.1. Functional Title - Military Personnel

6.3.1.1. The functional title "Military Personnel" for military functions is defined as comprising the accounts listed below.

6.3.1.1.1. Active Forces

21_2010	Military Personnel, Army
21_1004	Medicare-Eligible Retiree Health Fund Contribution, Army
17_1453	Military Personnel, Navy
17_1000	Medicare-Eligible Retiree Health Fund Contribution, Navy
17_1105	Military Personnel, Marine Corps
17_1001	Medicare-Eligible Retiree Health Fund Contribution, Marine Corps
57_3500	Military Personnel, Air Force
57_1007	Medicare-Eligible Retiree Health Fund Contribution, Air Force

6.3.1.1.2. Reserve and Guard Forces

21_2070	Reserve Personnel, Army
21_1005	Medicare-Eligible Retiree Health Fund Contribution, Reserve Personnel, Army
17_1405	Reserve Personnel, Navy
17_1002	Medicare-Eligible Retiree Health Fund Contribution, Reserve Personnel, Navy
17_1108	Reserve Personnel, Marine Corps

17_1003	Medicare-Eligible Retiree Health Fund Contribution, Reserve Personnel, Marine Corps
57_3700	Reserve Personnel, Air Force
57_1008	Medicare-Eligible Retiree Health Fund Contribution, Reserve Personnel, Air Force
21_2060	National Guard Personnel, Army
21_1006	Medicare-Eligible Retiree Health Fund Contribution, National Guard Personnel, Army
57_3850	National Guard Personnel, Air Force
57_1009	Medicare-Eligible Retiree Health Fund Contribution, National Guard Personnel, Air Force
97_0041	Concurrent Receipt Accrual Payments to the Military Retirement Fund

6.3.1.2. Lower level subdivisions susceptible to consolidation are available under the uniform budget and accounting structure prescribed for these appropriations in Chapter 2 of Volume 2A.

6.3.2. Functional Title - Operation and Maintenance

The functional title "Operation and Maintenance" for military functions is defined as comprising the accounts listed below:

21_2020	Operation and Maintenance, Army
17_1804	Operation and Maintenance, Navy
17_1106	Operation and Maintenance, Marine Corps
57_3400	Operation and Maintenance, Air Force
97_0100	Operation and Maintenance, Defense-Wide
21_2080	Operation and Maintenance, Army Reserve
17_1806	Operation and Maintenance, Navy Reserve
17_1107	Operation and Maintenance, Marine Corps Reserve
57_3740	Operation and Maintenance, Air Force Reserve
21_2065	Operation and Maintenance, Army National Guard
57_3840	Operation and Maintenance, Air National Guard
97_0104	United States Court of Appeals for the Armed Forces
97_0105	Drug Interdiction and Counter-Drug Activities, Defense
97_ / 0107	Office of the Inspector General
97X0118	Overseas Contingency Operations Transfer Fund
97_ / 0130	Defense Health Program
97_ / 0134	Former Soviet Union Threat Reduction
97_0141	Iraq Freedom Fund
97_ / 0143	Strategic Reserve Readiness Fund
97X0801	Foreign Currency Fluctuations, Defense
21X0810	Environmental Restoration, Army
17X0810	Environmental Restoration, Navy
57X0810	Environmental Restoration, Air Force

97X0810	Environmental Restoration, Defense
97X0811	Environmental Restoration, Formerly Used Defense Sites
97 / 0819	Overseas Humanitarian, Disaster and Civil Aid
97X0833	Emergency Response Fund
97X0838	Support for International Sporting Competitions
97 / 0839	Quality of Life Enhancements
97X0840	OPPLAN 34A - 35 P.O.W. Payments
97X0842	Defense Vessels Transfer Program Account
17X1236	Payment to Kaho'olawe Island Conveyance, Remediation, and Environmental Restoration Fund
21 / 2091	Afghanistan Security Forces Fund
21 / 2092	Iraq Security Forces Fund
97X4965	Emergency Response Fund
21X5098	Restoration of the Rocky Mountain Arsenal
17X5185	Kaho'Olawe Island Conveyance Remediation, and Environmental Restoration Fund
97X5187	Defense Cooperation Account
97X5188	Disposal of Department of Defense Real Property
97X5189	Lease of Department of Defense Real Property
97X5193	Overseas Military Facility Investment Recovery Account
21X5194	DoD 50 th Anniversary of World War II Commemoration
97X5195	Use of Proceeds from the Transfer or Disposal of Commissary Facilities
21X5286	National Science Center, Army
97X5394	Use of Proceeds from Cash Equalization Payments from Acquisition of Facilities
97X5441	Burdensharing Contribution

6.3.3. Functional Title - Procurement

The functional title "Procurement" for military functions is defined as comprising the following appropriations and budget activities:

21 / 2031	Aircraft Procurement, Army
	-Aircraft
	-Modification of Aircraft
	-Spares and Repair Parts
	-Support Equipment and Facilities
21 / 2032	Missile Procurement, Army
	-Other Missiles
	-Modification of Missiles
	-Spares and Repair Parts
	-Support Equipment and Facilities

- 21 _ _ 2033 Procurement of Weapons and Tracked Combat Vehicles, Army
 - Tracked Combat Vehicles
 - Weapons and Other Combat Vehicles
 - Spares and Repair Parts
- 21 _ _ 2034 Procurement of Ammunition, Army
 - Ammunition
 - Ammunition Production Base Support
- 21 _ _ 2035 Other Procurement, Army
 - Tactical and Support Vehicles
 - Communications and Electronics Equipment
 - Other Support Equipment
 - Spares and Repair Parts
- 21 _ _ 2093 Joint Improvised Explosive Device Defeat Fund
- 17 _ _ 1506 Aircraft Procurement, Navy
 - Combat Aircraft
 - Airlift Aircraft
 - Trainer Aircraft
 - Other Aircraft
 - Modification of Aircraft
 - Aircraft Spares and Repair Parts
 - Aircraft Support Equipment and Facilities
- 17 _ _ 1507 Weapons Procurement, Navy
 - Ballistic Missiles
 - Other Missiles
 - Torpedoes and Related Equipment
 - Other Weapons
 - Other Ordnance
 - Spares and Repair Parts
- 17 _ _ 1508 Procurement of Ammunition, Navy and Marine Corps
 - Procurement of Ammunition, Navy
 - Procurement of Ammunition, Marine Corps

6.3.4. Functional Title - Procurement (Continued)

- 17__1611 Shipbuilding and Conversion, Navy
-Fleet Ballistic Missile Ships
-Other Warships
-Amphibious Ships
-Mine Warfare and Patrol Ships
-Auxiliaries, Craft and Prior-Year Program Costs
- 17__1810 Other Procurement, Navy
-Ships Support Equipment
-Communications and Electronics Equipment
-Aviation Support Equipment
-Ordnance Support Equipment
-Civil Engineering Support Equipment
-Supply Support Equipment
-Personnel and Command Support Equipment
-Spares and Repair Parts
- 17__0380 Coastal Defense Augmentation
-Coast Guard Support
- 17__1109 Procurement, Marine Corps
-Weapons and Combat Vehicles
-Guided Missiles and Equipment
-Communications and Electronics Equipment
-Support Vehicles
-Engineer and Other Equipment
-Spares and Repair Parts
- 57__3010 Aircraft Procurement, Air Force
-Combat Aircraft
-Airlift Aircraft
-Trainer Aircraft
-Other Aircraft
-Modification of In-Service Aircraft
-Aircraft Spares and Repair Parts
-Aircraft Support Equipment and Facilities
- 57__3011 Procurement of Ammunition, Air Force
-Procurement of Ammunition, Air Force
-Weapons

57 __ 3020	Missile Procurement, Air Force -Ballistic Missiles -Other Missiles -Modification of In-Service Missiles -Spares and Repair Parts -Other Support -Munitions and Related Equipment
57 __ 3080	Other Procurement, Air Force -Munitions and Associated Equipment -Vehicular Equipment -Electronics and Telecommunications Equipment -Other Base Maintenance and Support Equipment -Spares and Repair Parts
97 __ 0300	Procurement, Defense-Wide -Major Equipment -Special Operations Command -Chemical/Biological Defense
97 __ 0303	Rapid Acquisition Fund
97 __ 0350	National Guard and Reserve Equipment -Reserve Equipment -National Guard Equipment
97 __ 0360	Defense Production Act Purchases
97 __ 0390	Chemical Agents and Munitions Destruction, Defense -Operation and Maintenance -Research, Development, Test, and Evaluation -Procurement

6.3.5. Functional Title – Research, Development, Test and Evaluation

The functional title "Research, Development, Test and Evaluation" for military functions is defined as comprising the following accounts and budget activities:

21 __ 2040	Research, Development, Test, and Evaluation, Army
17 __ 1319	Research, Development, Test, and Evaluation, Navy
57 __ 3600	Research, Development, Test, and Evaluation, Air Force
97 __ 0400	Research, Development, Test, and Evaluation, Defense-Wide
97 __ 0460	Operational Test and Evaluation, Defense
57 __ 3024	Tanker Replacement Transfer Fund, Air Force

Budget Activities for RDT&E Accounts

- 01 - Basic Research
- 02 - Applied Research
- 03 - Advanced Technology Development
- 04 - Advanced Component Development and Prototypes
- 05 - System Development and Demonstration
- 06 - RDT&E Management Support
- 07 - Operational System Development

6.3.6. Functional Title – Military Construction

6.3.6.1. The functional title "Military Construction" for military functions is defined as comprising the accounts listed below.

21 _ / 2050	Military Construction, Army
17 _ / 1205	Military Construction, Navy
57 _ / 3300	Military Construction, Air Force
97 _ / 0500	Military Construction, Defense-Wide
97X0510	Base Realignment and Closure Account, Part II, Defense
051001	Base Realignment and Closure Account, Army
051002	Base Realignment and Closure Account, Navy
051003	Base Realignment and Closure Account, Air Force
051004	Base Realignment and Closure Account, Defense
97X0512	Base Realignment and Closure Account, 2005
051201	Base Realignment and Closure Account, 2005, Army
051202	Base Realignment and Closure Account, 2005, Navy
051203	Base Realignment and Closure Account, 2005, Air Force
051204	Base Realignment and Closure Account, 2005, Defense
97X0803	Foreign Currency Fluctuations, Construction, Defense
97X0804	North Atlantic Treaty Organization Security Investment Program
21 _ / 2085	Military Construction, Army National Guard
57 _ / 3830	Military Construction, Air National Guard
21 _ / 2086	Military Construction, Army Reserve
17 _ / 1235	Military Construction, Naval Reserve
57 _ / 3730	Military Construction, Air Force Reserve
97 _ / 0391	Chemical Demilitarization Construction, Defense

6.3.6.2. Lower level subdivisions susceptible to consolidation are available under the uniform accounting classifications prescribed for these appropriations in Chapter 6, Section 0602, and Chapter 7, Section 0702.

FUNCTIONAL TITLE - FAMILY HOUSING

The functional title "Family Housing" for military functions is defined as comprising the accounts listed below:

97X0834	Department of Defense Family Housing Improvement Fund
97X0836	Department of Defense Military Unaccompanied Housing Improvement Fund
21 _ / 0720	Family Housing, Construction, Army
21 _ 0725	Family Housing, Operation and Maintenance, Army
17 _ / 0730	Family Housing, Construction, Navy and Marine Corps
17 _ 0735	Family Housing, Operation and Maintenance, Navy and Marine Corps
57 _ / 0740	Family Housing, Construction, Air Force
57 _ 0745	Family Housing, Operation and Maintenance, Air Force
97 _ / 0760	Family Housing, Construction, Defense-Wide
97 _ 0765	Family Housing, Operation and Maintenance, Defense-Wide
97X4090	Homeowners' Assistance Fund, Defense
97X4166	Family Housing Improvement Fund, Direct Loan, Financing Account
97X4167	Family Housing Improvement Fund, Guaranteed Loan, Financing Account

FUNCTIONAL TITLE - REVOLVING AND MANAGEMENT FUNDS

The functional title "Revolving and Management Funds" for military functions is defined as comprising the accounts listed below. Since each account, in its entirety, is classified within a single first level subdivision of the functional title, the accounts are grouped by the subdivisions.

Public Enterprise Funds

97X4555	National Defense Stockpile Transaction Fund
97X4950	Pentagon Reservation Maintenance Revolving Fund
17X4557	National Defense Sealift Fund
21X4275	Arms Initiative, Guaranteed Loan Financing Account, Army
97X4282	Defense Coalition Support Fund

Intragovernmental Funds

97X493001	Defense Working Capital Fund, Army
97X493002	Defense Working Capital Fund, Navy
97X493003	Defense Working Capital Fund, Air Force
97X493004	Defense Working Capital Fund, Defense Agencies
97X493005	Defense Working Capital Fund, Defense Commissary Agency
97X4179	Reserve Mobilization Income Insurance Fund
21X4528	Army Conventional Ammunition Working Capital Fund *
97X4931	Buildings Maintenance Fund

*Closing after existing orders are completed

FUNCTIONAL TITLE - DEFENSE-WIDE CONTINGENCIES

The functional title "Defense-Wide Contingencies" for military functions is defined as comprising the accounts listed below:

97 9912	Other Legislation (including Management Improvements)
97 9918	General Transfer Authority Outlay Allowance

FUNCTIONAL TITLE - OFFSETTING RECEIPTS

The functional title "Offsetting Receipts" for military functions is defined as comprising the accounts listed below:

General Fund Proprietary Offsetting Receipts

184000A	Offsetting Receipts, Rent of Equipment and Other Personal Property, Army
184000N	Offsetting Receipts, Rent of Equipment and Other Personal Property, Navy
184000F	Offsetting Receipts, Rent of Equipment and Other Personal Property, Air Force
184000D	Offsetting Receipts, Rent of Equipment and Other Personal Property, Defense
246200A	Offsetting Receipts, Deposits for Survivors Annuity Benefits, Army
246200N	Offsetting Receipts, Deposits for Survivors Annuity Benefits, Navy
246200F	Offsetting Receipts, Deposits for Survivors Annuity Benefits, Air Force
246200D	Offsetting Receipts, Deposits for Survivors Annuity Benefits, Defense
223600D	Sales of Certain Material in National Defense Stockpile
264400D	Defense Vessels Transfer Receipt Account
265100D	Sale of Scrap and Salvaged Materials, Defense
262100D	Sale of Lands, Etc., Mil Post Construction Fund

301900A	Offsetting Receipts, Recoveries for Government Property Lost or Damaged, Army
301900N	Offsetting Receipts, Recoveries for Government Property Lost or Damaged, Navy
301900F	Offsetting Receipts, Recoveries for Government Property Lost or Damaged, Air Force
301900D	Offsetting Receipts, Recoveries for Government Property Lost or Damaged, Defense
304100A	Offsetting Receipts, Recoveries Under FMS Program, Army
304100N	Offsetting Receipts, Recoveries Under FMS Program, Navy
304100F	Offsetting Receipts, Recoveries Under FMS Program, Air Force
304100D	Offsetting Receipts, Recoveries Under FMS Program, Defense
321000A	Offsetting Receipts, General Fund Propriety Receipts, Army
321000N	Offsetting Receipts, General Fund Propriety Receipts, Navy
321000F	Offsetting Receipts, General Fund Propriety Receipts, Air Force
321000D	Offsetting Receipts, General Fund Propriety Receipts, Defense

Special Fund Proprietary Offsetting Receipts

509810A	Rocky Mountain Arsenal Offsetting Receipts
518510N	Offsetting Receipts, Kaho' Olawe Island Fund
518710D	Defense Cooperation Receipts
518720D	Earnings on Investments, Defense Cooperation Account (Non-051)
518821D	Offsetting Receipts, Disposal of DoD Real Property, Army
518817D	Offsetting Receipts, Disposal of DoD Real Property, Navy
518857D	Offsetting Receipts, Disposal of DoD Real Property, Air Force
518897D	Offsetting Receipts, Disposal of DoD Real Property, Defense Agencies
518921D	Offsetting Receipts, Lease of DoD Real Property, Army
518917D	Offsetting Receipts, Lease of DoD Real Property, Navy
518957D	Offsetting Receipts, Lease of DoD Real Property, Air Force
518997D	Offsetting Receipts, Lease of DoD Real Property, Defense Agencies
519321D	Deposits, DoD Overseas Military Facility Investment Recovery Account, Army
519317D	Deposits, DoD Overseas Military Facility Investment Recovery Account, Navy
519357D	Deposits, DoD Overseas Military Facility Investment Recovery Acct, Air Force
519397D	Deposits, DoD Overseas Military Facility Investment Recovery Account
519410A	Royalties for Use of DoD Military Insignia and Trademarks
519510D	Proceeds from the Transfer or Disposition of Commissary Facilities
528610A	Fees Collected for the Use of the National Science Center
539421A	Cash Equalization Proceeds from Acquisition of Facilities, Army
539417N	Cash Equalization Proceeds from Acquisition of Facilities, Navy

539457F	Cash Equalization Proceeds from Acquisition of Facilities, Air Force
539497D	Cash Equalization Proceeds from Acquisition of Facilities, Defense

544150D	Burdensharing Contribution, Defense, Qatar
544210D	Proceeds DoD Korean War Commemoration Account
556210N	Ford Island Improvement Account, Net Sale of Assets

Trust Fund Receipts (Non-Function 051)

806310A	Bequest of Major General Fred C. Ainsworth, Library, Walter Reed
General Hospital Trust Fund	
806320A	Earnings on Investments, Ainsworth Library Trust Fund
817410A	Collections for the National Science Center Gift Fund
892710A	Deposits, Dept. of the Army General Gift Fund
892720A	Earnings on Investments, Dept. of the Army General Gift Fund
873310N	Contributions to U.S. Naval Academy Gift and Museum Fund
873320N	Earnings on Investments, U.S. Naval Academy Gift and Museum Fund
871610N	Deposits, Dept. of the Navy General Gift Fund
871620N	Earnings on Investments, Dept. of the Navy General Gift Fund
892810F	Deposits, Dept. of Air Force General Gift Fund
892820F	Earnings on Investments, Dept. of Air Force General Gift Fund
833710D	Contributions from Kuwait, Host Nation Support for U.S. Relocation Activities
833720D	Earnings on Investments, Host Nation Support for U.S. Relocation Activities
833730D	Contributions from Japan, Host Nation Support for U.S. Relocation Activities
833740D	Contributions from S. Korea, Host Nation Support for U.S. Relocation Activities
833750D	Contributions from Qatar, Host Nation Support for U.S. Relocation Activities
816310D	Contributions to the DoD General Gift Fund
835810D	Contributions from Japan, Support for U.S. Relocation to Guam Activities
835820D	Earnings on Investments, Support for U.S. Relocation to Guam Activities

FUNCTIONAL TITLE - TRUST AND TRUST REVOLVING FUNDS

The functional title "Trust Funds" for military functions is defined as comprising the accounts listed below:

21X8063	Ainsworth Library (Trust)
97X8335	Voluntary Separation Incentive Fund
21X8927	Army General Gift Fund
17X8733	USN Academy Gift and Museum Fund
17X8716	Navy General Gift Fund
17X8723	Ships Stores Profit, Navy
57X8928	Air Force General Gift Fund
17X8423	Midshipmen's Store, USN Academy (Trust Revolving)
57X8418	Air Force Cadet Fund (Trust Revolving)
97X8164	Surcharge Collections, Sales of Commissary Stores, Defense (Trust Revolving)
97X8165	Foreign National Employees Separation Pay, Defense
97X8168	National Security Education Trust Fund, Defense
21X8174	National Science Center Gift Fund, Army
97X8337	Host Nation Support for U.S. Relocation Activities, Defense
97X8163	Department of Defense General Gift Fund
97X8358	Support for U.S. Relocation to Guam Activities

FUNCTIONAL TITLE - INTERFUND TRANSACTIONS

The functional title "Interfund Transactions" for military functions is defined as comprising the accounts listed below:

872310N	Interfund Transactions, Profits from Sales of Ship Stores, Navy
816810D	Interfund Transactions, Payment from General Fund, National Security Education Trust Fund, Defense
816820D	Interfund Transactions, Earnings on Investments, National Security Education Trust Fund, Defense (Non-051)
816830D	Interfund Transactions, Recoveries, National Security Education Trust Fund, Defense
816510D	Interfund Transactions, Employing Agency Contributions, Foreign National Employee Separation Pay, Defense
833510D	Interfund Transactions, Employing Agency Contributions, Voluntary Separation Incentive, Defense
833520D	Interfund Transactions, Earnings on Investments, Voluntary Separation Incentive Trust Fund, Defense (Non-051)

6.4 Functional Titles and Definitions – Other Defense Civil Programs (010604)

FUNCTIONAL TITLE – OTHER DEFENSE CIVIL PROGRAMS

The function title “Other Defense Civil Programs” is defined as comprising the accounts listed below:

97X8097	Military Retirement Fund
97 0040	Payments to Military Retirement Fund, Defense
97 0041	Concurrent Receipt Accrual Payments to the Military Retirement Fund
97X8098	Education Benefits Fund
97X5472	Uniformed Services Retiree Health Care Fund
97 0850	Payment to DoD Medicare Eligible
21X5095	Wildlife Conservation, etc., Military Reservation, Army
17X5095	Wildlife Conservation, etc., Military Reservation, Navy
57X5095	Wildlife Conservation, etc., Military Reservation, Air Force
21X5285	Department of Defense, Forest Products Program, Army

Trust Fund Receipts and Special Fund Offsetting Receipts include:

809710D	Employing Agency Contributions, DoD Military Retirement Fund
809720D	Earnings on Investments, DoD Military Retirement Fund
809730D	Federal Contribution, DoD Military Retirement Fund
809740D	Offsetting Receipts, Payment to Military Retirement Fund
809810D	Employing Agency Contribution, DoD Education Benefits Fund
809820D	Earnings on Investments, DoD Education Benefits Fund
547210D	Employing Agency Contributions, DoD Retiree Health Care Fund
547220D	Earnings on Investment, DoD Retiree Health Care Fund
547230D	Federal Contribution, DoD Retiree Health Care Fund
509510A	Sale of Hunting and Fishing Permits, Military Reservations, Army
509510N	Sale of Hunting and Fishing Permits, Military Reservations, Navy
509510F	Sale of Hunting and Fishing Permits, Military Reservations, Air Force
528510A	Reserve Account, Department of Defense, Forest Products Program, Army

7.0 AUTOMATED FUTURE YEARS DEFENSE PROGRAM (FYDP) DATABASES (0107)

7.1 Standard Data Collection System (SDCS) (010701)

7.1.1. Purpose and Objectives.

7.1.1.1. This Section provides for the maintenance of the FYDP. The FYDP is a series of reports that record and display resource decisions made during the biennial Planning, Programming, Budgeting and Execution (PPBE) cycle. The FYDP contains defense resources—people, forces (equipment and organizations), and dollars—categorized by programs and related to the budget's appropriation structure. The FYDP provides a record of past decisions that assists senior leaders in deciding on future issues such as operations tempo, force structure size and composition, and investment strategies.

7.1.1.2. Data are entered into the FYDP through the SDCS system. SDCS allows all DoD organizations to submit FYDP data electronically, receiving real-time feedback on their inputs. SDCS is a web-based application hosted on the Secret Internet Protocol Router Network (SIPRNet). It allows users to update, correct, and view their organization's portion of the FYDP.

7.1.1.3. The OUSD (Comptroller) maintains databases consisting of Operation and Maintenance TOA data, Procurement TOA data, RDT&E TOA data and Military Construction TOA data at a more detailed level than used in the FYDP. All DoD organizations reporting FYDP data will submit these appropriations through the OUSD (Comptroller) automated programs databases as outlined in sections 5.2, 5.3, 5.4, and 5.5. The SDCS will rollup up these appropriations to the proper level for inclusion in the FYDP report. Formats for Operation and Maintenance TOA, Procurement TOA data, RDT&E TOA data and Military Construction TOA data are the same as required for the automated programs databases, covered in sections 5.2, 5.3, 5.4, and 5.5.

7.1.1.4. Amounts entered for TOA, military endstrength, and civilian Full-Time Equivalents (FTE's) by Program Element must agree with the amounts submitted for the budget. POM submissions for TOA must adhere to controls established by Fiscal Guidance or other controls as announced in subsequent guidance.

7.1.2. Applicability and Scope.

The provisions of this Section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Combatant Commands and the Defense Agencies/Field Activities (hereafter referred to as "DoD Components") that contribute data to the FYDP. The Office of the Director, Program Analysis and Evaluation (hereafter referred to as "OD, PA&E") administers updating and general management of the FYDP. OD, PA&E controls access to SDCS, for the purpose of providing data.

7.1.3. Reporting Requirements.

Updates to the FYDP are required coincident with the (1) Program and Budget Review and (2) the President's Budget (PB), and (3) for major restructures of the FYDP itself when directed by the OD, PA&E. Specific guidance relative to approved changes, due dates, and special requirements is provided in a memorandum from OD, PA&E announcing each update. In the Program and Budget Review FYDP submissions, acceptable update years are normally limited to the budget years and programming years (generally six years for TOA and manpower, and nine years for forces). In the PB FYDP submission, acceptable update years include the most recent prior year of the budget cycle to the end of the programming cycle (generally eight years for TOA and manpower, and 11 years for forces). Since some appropriations—procurement, RDT&E, and military construction—are authorized for obligation over multiple years, it is periodically necessary to update historical years (the years prior to the first year of a PB FYDP update). Historical changes will be accepted once during the PPBE cycle—usually during the President's Budget FYDP update—but only when explicitly directed by OD, PA&E. These updates enable the FYDP to reflect transfers, rescissions, supplemental appropriations, reappropriations, and other authorized adjustments to total obligational authority, which might occur in multi-year appropriations, as well as to reflect actual accounting data. Particular instructions for conducting historical-year updates will be issued by OD, PA&E as required.

7.1.4. Publication of FYDP Related-Information.

7.1.4.1. Section 221 of Title 10 of the United States Code (U.S.C.) requires that:

7.1.4.2. “The Secretary of Defense shall submit to Congress each year, at or about the time that the President's budget is submitted to Congress that year under section 1105(a) of title 31, a future-years defense program (including associated annexes [now called "programs"]) reflecting the estimated expenditures and proposed appropriations included in that budget.”

7.1.4.3. In accordance with the U.S.C., OD, PA&E will prepare the President's Budget FYDP Summary and Program Element Detail for transmission to the Congress. In addition, OD PA&E will provide FYDP-related information at all other updates for within DoD. Historical updates, if collected at the time of the President's Budget FYDP update, will be issued with the subsequent PPBE cycle.

7.1.5. Other Databases Related to the FYDP. Consistent with the FYDP are separate but related databases and documents constituting, the Operation and Maintenance Program, the Procurement Program, the RDT&E Program and the Military Construction Program. These databases produce the Operation and Maintenance programs Report (O-1), the Procurement Programs Report (P-1), the RDT&E Programs Report (R-1) and the Military Construction Programs report (C-1). Detailed information regarding these databases is provided in section 5.0. The FYDP Resource Structure Management (RSM) database maintains information about the program elements and other related attributes critical to the production of the FYDP. Detailed information regarding this database is provided in Section 7.2.

7.1.6. Instructions for Updating the FYDP.

7.1.6.1. General.

7.1.6.1.1. FYDP Forces, Manpower, Military Pay Rates, and remaining appropriations data not elsewhere submitted shall be submitted by DoD Components to the Programming and Fiscal Economics Division, OD, PA&E, over the SIPRNet, as directed.

7.1.6.1.1.1. Operation and Maintenance, Procurement, RDT&E, and Military Construction appropriations data included in the FYDP will be submitted to OUSD (Comptroller) and forwarded to OD, PA&E for inclusion in the FYDP. Reference section 5.0 for further instructions.

7.1.6.1.1.2. All FYDP data provided directly to OD, PA&E will be input into the SDCS system on the SIPRNet. The following file formats may be used to submit data to SDCS. Specific information and examples of these formats may be found on the SDCS web page located on the SIPRNet at <https://dpd.pae.osd.smil.mil>.

7.1.6.1.1.2.1. Standard ASCII text file, fixed record length, with either single year per row or multiple years per row.

7.1.6.1.1.2.2. Excel spreadsheet file with either single year per row or multiple years per row.

7.1.6.1.2. All resource changes to the data file shall be on a net change basis; that is, data currently in the file shall be revised (plus or minus) by an incremental amount to reflect the new approved position.

7.1.6.1.3. Program element codes and titles, resource identification codes, and DoD Component identifier codes are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook). This publication is available at <http://www.dtic.mil/whs/directives> under "Publications," and in approved decision documents posted to the FYDP Resource Structure Management (RSM) web site (see Section 7.2) but not yet reflected in DoD 7045.7-H.

7.1.6.2. Submission of Changes. Changes submitted for net change/add record resource data (Data Format as prescribed in Section 7.1.6.1) must provide specific identification of quantitative resource information by program element, resource identification code, and fiscal year.

7.1.6.3. Military Pay Rates. Submission of each FYDP update should include average annual military pay rates which shall include permanent change of station (PCS) data, rounded to the nearest dollar for each fiscal year for each military personnel end-strength category identified in the FYDP. Pay rates are used in updating the FYDP, and are also a FYDP data end-product in their own right. It is the intent of OD, PA&E to reflect the most accurate pay rates available in each update to the FYDP.

7.2 FYDP Resource Structure Management (RSM) System (010702)

7.2.1. Purpose and Objectives. This section provides for the maintenance of the automated database of the FYDP's structure, and describes the procedures used for requesting changes to the FYDP's structure, such as establishing new program element codes and definitions or changing program element titles and definitions. The primary information resource in the DoD for FYDP structure is the FYDP Resource Structure Management (RSM) website <https://rsm.pae.osd.smil.mil/RSM> located on the SIPRNet.

7.2.2. Applicability and Scope. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Combatant Commands and the Defense Agencies/Field Activities (hereafter referred to as "DoD Components") that contribute data to the FYDP. Updating and general management of the FYDP structure is administered by OD, PA&E.

7.2.3. Reporting Requirements. New program elements must be created when PPBE decisions shift resources among DoD Components or fund new programs. It is the responsibility of the DoD Components and the OUSD (Comptroller), Program/Budget to recommend changes to the FYDP structure via the RSM web site as the need arises. In addition, OUSD (Comptroller), Program/Budget will work with OD, PA&E in the establishment of new TOA Resource Identification Codes (RICs) to coincide with new Treasury Codes created by the Office of Management and Budget, or as otherwise required by PPBE decisions.

7.2.4. Update and Publication of FYDP Structure Management Handbook, DoD 7045.7-H. DoD 7045.7-H will be revised periodically (typically *two* times a year or with each update of the FYDP), as specified in DoDI 7045.7, Implementation of the Planning, Programming, and Budgeting System (PPBS), May 23, 1984. The RSM and DefenseLink web site will contain the most recent version to 7045.7-H, updated to reflect the Program and Budget Review, and President's Budget phases of the PPBE. FYDP Structure Coordination Documents (which are approved and placed on the RSM web site) should be used to supplement the most recent version of DoD 7045.7-H; they reflect the latest approved changes to the FYDP's structure.

7.2.5. Other Databases Related to RSM. The FYDP report, which is managed by OD, PA&E and updated by the components via the SDCS system, is referenced in Section 7.1. The Operation and Maintenance Program, the Procurement Program, the RDT&E Program and the Military Construction Program are referenced in Section 5.0.

7.2.6. Instructions for Making Changes to the FYDP Structure on RSM. Requests for changes to the FYDP's program structure, such as establishing new program element codes and definitions or clarifying program element titles and definitions, shall be submitted to OD, PA&E for coordination with the DoD Components. The primary instrument for submitting change requests is the RSM web site. The RSM web site provides instructions for formatting and submitting change requests. Each DoD Component has a designated representative authorized to submit change requests. Coordination cycles run continually throughout the year. Approved changes are reported periodically in the FYDP Structure Coordination Documents. These

documents are posted on the RSM web site, and the approved structure changes are incorporated in the RSM database.

8.0 AUTOMATED BUDGET, INTELLIGENCE, AND RELATED DATABASE (BIRD) (0108)

The Budget, Intelligence, and Related database (BIRD) maintained by OUSD(I) is the most complete, automated source of resource data for Intelligence and related activities for use by the Office of the Secretary of Defense and the Joint Staff. The BIRD database is essential to the preparation of the Military Intelligence Program (MIP) justification books. It facilitates functional analyses for OSD and the Joint Staff, and is compatible with the NIP resources database used by the Director of National Intelligence. It is also fully consistent with data contained in the FYDP, R&D and Procurement Annexes, and budget databases, and is electronically matched to relevant data in these databases prior to use. OUSD(I) collects MIP narrative data to support Program Budget Review and publication of the MIP Congressional Justification Book (CJB). Specific instructions for the update of the BIRD database are contained in Chapter 16, Volume 2B.

9.0 SELECT AND NATIVE PROGRAMMING (SNaP) DATA INPUT SYSTEM (0109)

Basic guidance for input through SNaP of programming detail data and selected budget exhibits for joint use of the program and budget review.

9.1 Select and Native Programming (SNaP) Data Collection System (010901)

9.1.1. Purpose. This section provides the instructions for electronic submission of all programming detail data; and certain budget data requirements that have been combined with the corollary programming requirement. The combined program/budget requirements are identified in the FMR issued by the OUSD (Comptroller), and the Programming and Budgeting Data Requirements (PBDR) instruction issued by the Office of the Director, Program Analysis and Evaluation, (OD, PA&E). SNaP is a web based data collection and review system designed to collect and validate designated data for the combined Program and Budget review, and in some cases it is used to update the program and budget detail for the President's Budget. SNaP is available on the SIPRNet at <https://SNaP.pae.osd.smil.mil>; and the unclassified NIPRNet at <https://SNaP.pae.osd.mil>.

9.1.2. Applicability and Scope. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Combatant Commands, and the Defense Agencies/Field Activities (here after referred to as “DoD Components”) that provide either a POM or a Budget to OSD. Updating and general management of the data collected through SNaP is administered by the OD, PA&E. OD, PA&E, Program Resources and Information Systems Management (PRISM) Division controls access to SNaP, for the purpose of submitting data.

9.1.3. Reporting Requirements. Updates to SNaP are required coincident with the Program and Budget Review, and for some requirements the President’s Budget (PB). Specific guidance relative to approved changes, due dates, and special requirements is provided in a memorandum announcing each update. In all submissions, acceptable update years may include the two most recent prior years of the budget cycle to the end of the programming cycle (generally nine years for TOA and manpower, and 12 years for forces).

9.1.4. Instructions for submitting designated programming and budgeting data in SNaP.

9.1.4.1. System and Software Requirements. To interface with SNaP, users must have access to the NIPRNet and the SIPRNet (If the DoD Components’ submission is classified). Windows 95 or higher, and either the Microsoft Internet Explorer 4.x or Netscape Communicator 4.x or higher browser. All narrative files must be in Microsoft Word format. Any supporting files such as the cover letter or executive summary must be in Microsoft Word, Excel, or PowerPoint.

9.1.4.2. Submission. SNaP will be available through password and user id to all those designated by the Primary Point of Contact (POC) from your organization. You may submit, edit, and share your data with other members of your organization for a set period of time prior to the Program/Budget due date. Once your data requirements are complete, (or by the due date) the Primary POC for your organization is responsible for making the submission official. This action is completed on-line.

9.1.4.3. Your work-in-progress. Your work-in-progress is only available to your organization. Programming and Budgeting Data requiring edits after the official due date will occur through permission granted by the system administrator.

9.1.4.4. Preparing Data Structure and Format. SNaP provides pre-formatted Microsoft Excel data files and on-line standard formats to assist you in building your data submission. Wherever possible you are given a standard option menu to describe the data you are providing. Each SNaP data requirement outlined in the PBDR and FMR identifies the data elements, and provides data definitions, instructions and business rules that will assist you in filling out the data tables accurately. All required narrative is submitted as Microsoft Word documents, unless an alternative is specified in the specific data requirement.

9.1.4.5. Each of the data requirements collected. SNaP has specific formats that will be used throughout this information management process. Use of the pre-formatted data tables and on-line upload minimizes error. Data ownership is created as soon as you log in and upload a file or submit data on-line.

9.1.4.6. Review & Edit. SNaP validates and verifies the information and rejects incorrect records. A transaction summary is available for each batch upload submitted and an instant message is provided for each on-line transaction. Once data is submitted it is instantly available for review in the format in which it will be displayed. This may include any necessary data calculations or regroupings. Users can go back and edit any part of their submission prior to official submission, and other members of the organization can also review it.

9.1.4.7. Final Displays. Official Program/Budget submissions through SNaP are available for the Program and Budget Review in the password protected Defense Programming Database Warehouse (DPD DW).

10.0 GENERAL GUIDANCE SUBMISSION FORMATS (0110)

10.1 Purpose (011001)

The formats provided on the following pages reflect guidance presented in previous sections. Unless modified in a submission budget call, these formats should be adhered to.

10.2 Exhibits in Support of Section 3.0 – Program and Budget Review Submission (011002)

Exhibit PB-1A. Fiscal Guidance Track	163
Exhibit PB-3. Reprogramming/Transfers Between Appropriations.....	164
Exhibit PB-4. Schedule of Civilian and Military Personnel.....	166
Exhibit PB-8. FY 20CY. Supplemental Appropriation Requirements.....	170
Exhibit PB-10. Additional FY 20BY Budget Estimates.....	172
Major Budget Issue Format	174

10.3 Exhibits in Support of Section 4.0 – Congressional Justification/Presentation (011003)

PB-37A Justification of Supplemental Requirements.....	175
PB-37R Budget Amendment Summary	176
PB-37S Program and Financing Schedule (Abbreviated).....	177
PB-37T Narrative Justification.....	178
PB-39A-1 Format - Appeal Input (Program Adjustments).....	179
PB-39A-2 Format - Appeal Input (Language Items)	180
DD 1587 Record of Congressional Transcript Review.....	181
DD 1790 Prepared Testimony Review.....	182
HAC QFR.....	183
HASC QFR	184
SAC QFR	185
SASC QFR.....	186
Insert - All Committees	187

10.4 Exhibits in Support of Section 5.0 (011004)

Budget Automation Requirements (See Section 5.0)

10.5 Exhibits in Support of Section 7.0 (011005)

Automated FYDP Databases Requirements (See Section 7.0)

INSTRUCTIONS

- Column (1): Stub lines will be the same as those on Exhibit PB-1 on a budget basis. Three lines of data (BA, outlays and military/civilian personnel impacts) are required for each account included in the supplemental proposal.
- Column (2): The dollar amounts in this column for BA and outlays must agree with FY 20CY amounts submitted in the automated Comptroller Information System (CIS) database for the Program and budget review submission. Likewise, civilian FTE and Military E/S data must agree with amounts reported in the Component's automated CIS for the Program and budget review submission.

INSTRUCTIONS FOR PREPARATION
OF EXHIBIT PB-10

The following instructions apply to all appropriations and funds:

Indicate in the heading the name of the submitting component, subject, date, and component submission control number. Leave "USD (Comptroller) Serial No." blank.

Column (1): List the appropriation or fund and the Budget Subactivity Number. For the procurement appropriations, P-1 line items will be shown. For the RDT&E appropriations, program elements will be shown.

Columns (2), (3) and (4): List the TOA changes. If there are also changes in financing adjustments, show these separately and then show the change in budget authority. The military personnel amount to be used here will be the sum of the products of the workyears/\$ rates shown to the right, using the standard rate.

Column (5): List the military or civilian personnel categories affected by the change. Military personnel change will be in end-strength (E/S) and civilian personnel change in full time equivalent (FTE). Use the categories illustrated in Exhibit PB-4.

Columns (6), (7), (9), (10), (12) and (13): List the military end strength and workyear changes, by activity. Likewise, list civilian FTE changes by activity.

Columns (8), (11) and (14): Show the average salary at which these changes were priced.

If there are no personnel changes, Columns (5) through (14) will be left blank.

Show a total for increases and decreases.

The outyear impact of the additional budget submission will be included at the end of Exhibit PB-10. This will show the net change by appropriation budget subactivity number for each of the applicable outyears.

Narrative justification must also accompany Exhibit PB-10.

DEPARTMENT OF AIR FORCE
WEAPONS PROCUREMENT, AIR FORCE
NARRATIVE JUSTIFICATION

(Dollars in Thousands)

FY BY Pending Request

FY BY Proposed Amendment

FY BY Revised Request

Budget Activity: Other Missiles

Justification of proposed amendment.

AGM-69B SRAM. Deletes the \$xx,xxx,xxx FY BY requirement. Due to the recent evolution of the Air Launch Cruise Missile (ALCM) as an effect weapon system and the continued ability to use the B-52 bomber well into the 1980's, the President directed the B-1 production be halted. With the decision to not deploy the B-1, the Air Force requirement for the SRAM-B which was to be used on the B-1 is no longer valid.

Air Launched Cruise Missile. The Air Launched Cruise Missile (ALCM) is an aerodynamic air-to-ground strategic missile propelled by a turbo-fan engine. It has a high degree of accuracy through the combination of inertial guidance and terrain correlation update. The missile is designed to be carried internally and/or externally on the B-52. The ALCM is to be employed from a stand-off position against a wide variety of pre-selected lightly or undefended ground hard targets. This budget amendment requests an additional \$xx,xxx,xxx to accelerate the ALCM Initial Operating Capability (IOC).

CHAPTER 2

MILITARY PERSONNEL APPROPRIATIONS

1.0 GENERAL (0201)

1.1 Purpose (020101)

1.1.1. This Chapter prescribes the justification materials required for the Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations for both the Active and the Reserve Forces to support the program and budget review submission and the presentation of the President's budget submission to the Congress.

1.1.2. The following appropriations and accounts are covered:

1.1.2.1. In Section 2.0: Active Personnel, Army, Navy, Marine Corps, Air Force and Medicare-Eligible Retiree Health Fund Contribution, Army, Navy, Marine Corps, Air Force.

1.1.2.2. In Section 3.0: Reserve Personnel, Army, Navy, Marine Corps, Air Force; National Guard Personnel, Army, Air Force; Medicare-Eligible Retiree Health Fund Contribution, Reserve Personnel, Army, Navy, Marine Corps, Air Force and Medicare-Eligible Retiree Health Fund Contribution, National Guard Personnel, Army, Air Force.

1.1.2.3. In Section 4.0: Military Personnel Retirement Requirements.

1.1.2.4. In Section 5.0: Military Retirement Fund, Education Benefits Fund, and Retiree Health Care Fund.

1.1.3. Fund requirements for the Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations will be presented using the budget and fiscal accounting classifications as set forth below in sections 2.0 and 3.0. Program and Budget estimates will be based upon approved military personnel/strength programs as contained in the exhibits required in this Chapter, and in accordance with such special instructions as may be issued by the Office of the Under Secretary of Defense (P&R) as part of the call for the services' military strength programs.

1.1.4. Budgeting for Inflation. Anticipated inflation will be included in the Program and Budget Review Submission for clothing, subsistence-in-kind, basic allowances for housing and subsistence, the commercial portions of permanent change of station travel, and temporary lodging allowances overseas. The inflation rates to be used will be based upon approved price escalation indices provided as an enclosure to the annual FY 20CY revised and FY 20BY Program and Budget Review Guidance memorandum.

2.0 ACTIVE MILITARY PERSONNEL AND MEDICARE-ELIGIBLE RETIREE HEALTH FUND CONTRIBUTION APPROPRIATIONS (0202)

2.1. General (020201)

2.1.1. The purpose of this section is to provide general information applicable to the Active Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations including funding policies, classifications, and definitions unique to these accounts. Generic policies and requirements are addressed in Volume 2A, Chapter 1. The Military Components should consult all of the other chapters for exhibit requirements that are not specifically addressed in this chapter including the Other Special Analysis chapter (See Volume 2A, Chapter 1 and Volume 2B, Chapter 19).

2.1.2. This section provides the budget and fiscal accounting classifications for the military personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of Title 10, United States Code (U.S.C.), section 115. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification, which shall be used on a uniform basis for the military personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds for the Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations.

*2.2 Uniform Budget and Fiscal Accounting Classification (020202)

2.2.1. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in paragraph 1.1, above. Variations in the activity and subactivity classification and titles shall not be made, except that additional accounts consistent with this budget and accounting classification may be established in order to meet administration requirements of the various elements of the Military Departments. The scope of each account is described below.

2.2.2. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and the same sequence and will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

2.2.3. Chart of Accounts - The chart of accounts that follows represents a summary of the accounting and reporting structure under the Active Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations. However, for purposes of presentation of budget estimates, as distinguished from monthly reporting, additional statistical breakdown will be required as shown in paragraph 2.3, below.

BA/BSA – Medicare-Eligible Retiree Health Fund Contribution Appropriations

1 Officers

2 Enlisted

a/ Proper coding will be assigned to each Military Department in accordance with fiscal codes for all appropriation activities.

2.2.4. Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions are provided on the following pages.

2.2.5. Object Classification - The object classifications that follow the Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts.

BA/BSA – Active Military Personnel Appropriations

1. Pay and Allowances of Officers - For the pay and allowances authorized by law to be paid to officers, including commissioned and warrant of the Regular Forces and officers of the Reserve Components on extended active duty. In accordance with the provisions of 31 U.S.C. 371(b), officers may not receive a bonus or incentive pay under both subchapter I and subchapter II of Chapter 5 of title 37, USC (37 U.S.C. §§301-330 and 31 U.S.C. §§331-355, respectively) for the same activity, skill, or period of service.

1 -A. Basic Pay: For basic compensation of officers, including length of service increments, under provisions of Title 37, United States Code (U.S.C.), sections 201, 203 and 205.

1 -B. Retired Pay Accrual: For the Department of Defense's Contribution to its Military Retirement Fund under provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay. Retired pay accrual does not apply to academy cadets or midshipmen.

1 -C. Thrift Savings Plan (TSP) Matching Contributions: For the Department of Defense's contribution to the Thrift Savings Fund for the benefit of the member under provisions of 5 U.S.C. 8432. For those member's participating in the blended retirement plan, the amount

contributed shall not be more than 5 percent of the member's basic pay for such pay period.

1 -D-1. Incentive Pay for Hazardous Duty: For pay of officers for performance of hazardous duty required by competent authority under provisions of 37 U.S.C. 301 or 37 U.S.C. 351. Includes:

- a. Duty as a crew member as determined by the Secretary concerned, involving frequent and regular participation in aerial flight.
- b. Duty involving frequent and regular participation in aerial flights not as a crew member pursuant to paragraph a, above.
- c. Duty involving parachute jumping as an essential part of military duty.
- d. Duty involving the demolition of explosives as a primary duty, including training for such duty.
- e. Duty inside a high or low pressure chamber.
- f. Duty as a human acceleration or deceleration experimental subject.
- g. Duty as human test subject in thermal stress experiments.
- h. Duty involving frequent and regular participation in flight operations on the flight deck of an aircraft carrier or of a ship other than an aircraft carrier from which aircraft are launched.
- i. Duty involving service as an air weapons controller.
- j. Duty involving use of toxic fuel or waste.
- k. Duty involving highly toxic pesticides or live, hazardous organisms.
- l. Duty involving visit, board, search and seizure.

1 -D-2. Incentive and Special Pay for Aviation Career Duty: For pay of officers for performance of aviation duty required by competent authority under provisions of 37 USC 301a, 301b, and 334. Includes:

- a. For the frequent and regular performance of operational or proficiency flying duty required by orders.
- b. For the written agreement to remain on active duty in aviation service for at least 1 year in an aviation specialty designated as critical.

1 -D-3. Incentive Pay for Submarine Duty: For pay of officers for performance of duty required by competent authority under provision of 37 USC 301c. while attached under competent orders to a submarine, while serving as an operator or crew member of an operational submersible (including an undersea exploration or research vehicle), while undergoing training preliminary to assignment to a nuclear-powered submarine, while undergoing rehabilitation after assignment to a nuclear-powered submarine, or, in the case of a member qualified in submarines, while

attached as a member of a submarine operational command staff whose duties require serving on a submarine during underway operations.

1 -E. Special Pay: For special and incentive pay to officers on active duty as physicians, dentists, optometrists, pharmacists, veterinarians, nurses and psychologists under the provisions of 37 U.S.C. 301d, 301e, 302, 302a, 302b, 302c, 302c-1, 302d, 302e, 302h, 302i, 302j, 302k, 302l, 303, and 335; certain designated officers in positions of unusual responsibility which are of a critical nature to the Service concerned under provisions of 37 U.S.C. 306; officers on duty subject to hostile fire or imminent danger under provisions of 37 U.S.C. 310 or 37 U.S.C. 351; personal money allowance to certain Generals and Admirals under provisions of 37 U.S.C. 414; for diving duty pay under the provisions of 37 U.S.C. 304; for hardship duty pay while assigned to locations or duties designated by the Secretary of Defense under the provisions of 37 U.S.C. 305; for career sea pay under the provisions of 37 U.S.C. 305a; for nuclear officer incentive pay under the provisions of 37 U.S.C. 312, 312b, 312c, or 333; for members extending duty at designated overseas locations under the provisions of 37 U.S.C. 314; for engineering and scientific duty performed by officers under the provisions of 37 U.S.C. 315; for foreign language proficiency under the provisions of 37 U.S.C. 316 or 353; for special warfare officers extending period of active duty under the provisions of 37 U.S.C. 318; for surface warfare continuation pay under the provisions of 37 U.S.C. 319; for judge advocate continuation pay under the provisions of 37 U.S.C. 321; for assignment incentive pay under the provisions of 37 U.S.C. 307a or 352; for skill incentive pay or skill proficiency bonus under the provisions of 37 U.S.C. 353; for retention incentives for members qualified in critical military skills under the provisions of 37 U.S.C. 332 or 355; for accession bonus for new officers in critical skills under the provisions of 37 U.S.C. 324, 330, 332, or 336; for incentive bonuses to transfer between armed forces under the provisions of 37 U.S.C. 327 or 332; for continuation of pays during hospitalization and rehabilitation under the provisions of 37 U.S.C. 372; and for continuation pay authorized under the provisions of 37 U.S.C. 356.

1 -F. Basic Allowance for Housing: For housing allowances payable to officers under the provisions of 37 U.S.C. 403. BAH is comprised of BAH-Domestic and BAH-Overseas.

1 -G. Basic Allowance for Subsistence: For subsistence allowances payable to officers under the provisions of 37 U.S.C. 402.

1 -H. Station Allowances, Overseas: For per diem allowances payable to officers stationed outside the Continental United States or in Hawaii or Alaska based on cost of living for members stationed outside the United States as prescribed by Joint Federal Travel Regulations and authorized under the provisions of 37 U.S.C. 475.

1 -I. CONUS Cost of Living Allowance: For payments to eligible officers assigned to high cost areas under the provisions of 37 U.S.C. 403b.

1 -J. Clothing Allowances: For payments to officers for purchase of required uniform under the provisions of 37 U.S.C. 415 - 419

1 -K. Family Separation Allowances: For family separation allowances payable to officers under the provision of 37 U.S.C. 427.

1 -L. Separation Payments:

a. For payments to officers for accumulated annual leave under the provisions of 37 U.S.C. 501.

b. For severance pay to officers, including elimination severance pay to officers not eligible for retirement under any provision of law on the date of elimination by promotion list passover, under the provisions of 10 U.S.C. 1174; elimination severance pay for cause under the provisions of 10 U.S.C. 1181; disability severance pay under the provisions of 10 U.S.C. 1212.

c. For lump sum readjustment payments to Reserve officers under the provisions of 10 U.S.C. 12312.

d. Voluntary Separation Incentive (VSI) - For payment of an annuity to officers voluntarily separating from active duty during the drawdown under the provisions of 10 U.S.C. 1175.

e. Voluntary Separation Pay (VSP) – For a lump sum payment to officers who have served on active duty or full-time National Guard duty for more than 6 years but not more than 12 years and voluntarily separate under the provisions of 10 U.S.C. 1175a.

f. Special Separation Benefit (SSB) - For a lump sum payment to officers separating from active duty during the drawdown under the provisions of 10 U.S.C. 1174a.

g. Temporary Early Retirement Authority (TERA) - For payment of retired pay to selected active duty officers who retire with between 15 and 20 years of service under the provisions of 10 U.S.C. 1293, 3911, 3914, 6323, 6330, 8911 and 8914. Section 504(b) of the FY 2012 National Defense Authorization Act (NDAA), P.L. 112-81, reinstates temporary retirement authorities in section 4403 of the FY 1993 NDAA (P.L. 102-484) from fiscal year 2012 to December 31, 2018.

h. \$30,000 Lump Sum Bonus – For payment to service members who entered the uniformed service on or after August 1, 1986, who opt to retire under the Redux retirement plan (40 percent retirement benefit at 20 years of service with partial COLA) under the provisions of 37 U.S.C. 354.

1 -M. Special Compensation for Assistance with Activities of Daily Living – Officer: For payment of monthly compensation to an officer with catastrophic injuries or illnesses requiring assistance in everyday living under the terms and conditions specified by 37 U.S.C. 439.

1 -N. Social Security Tax Employer's Contribution: For payment of tax of employer to Social Security Administration as provided by Federal Insurance Contributions Act (FICA).

2. Pay and Allowances of Enlisted Personnel - For the pay and allowances authorized by law to be paid to enlisted personnel of the Regular forces and enlisted members of the Reserve Components on extended active duty. In accordance with the provisions of 31 U.S.C. 371(b), enlisted members may not receive a bonus or incentive pay under both subchapter I and subchapter II of Chapter 5 of title 37, USC (37 U.S.C. §§301-330 and 31 U.S.C. §§331-355, respectively) for the same activity, skill, or period of service.

2 -A. Basic Pay: For basic compensation of enlisted personnel, including length of service increments, under the provisions of 37 U.S.C. 201, 203 and 205.

2 -B. Retired Pay Accrual: For the Department of Defense's Contribution to its Military Retirement Fund, under provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

2 -C. Thrift Savings Plan (TSP) Matching Contributions: For the Department of Defense's contribution to the Thrift Savings Fund for the benefit of the member under provisions of 5 U.S.C. 8432. For those member's participating in the blended retirement plan, the amount contributed shall not be more than 5 percent of the member's basic pay for such pay period.

2 -D-1. Incentive Pay for Hazardous Duty: For pay of enlisted personnel for performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 and 37 U.S.C. 351. Includes:

- a. Duty as a crew member as determined by the Secretary concerned, involving frequent and regular participation in aerial flight.
- b. Duty involving frequent and regular participation in aerial flights not as a crew member pursuant to paragraph a, above.
- c. Duty involving parachute jumping as an essential part of military duty.
- d. Duty involving the demolition of explosives as a primary duty, including training for such duty.
- e. Duty inside a high or low pressure chamber.
- f. Duty as a human acceleration or deceleration experimental subject.
- g. Duty as human test subject in thermal stress experiments.
- h. Duty involving frequent and regular participation in flight operations on the flight deck of an aircraft carrier or of a ship other than an aircraft carrier from which aircraft are launched.
- i. Duty involving service as an air weapons controller.
- j. Duty involving use of toxic fuel or waste.
- k. Duty involving highly toxic pesticides or live, hazardous organisms.
- l. Duty involving Visit, Board, Search and Seizure.

2 -D-2. Career Enlisted Flyer **Incentive** Pay: For career enlisted flyer pay under the provisions of 37 U.S.C. 320. To be paid to an enlisted member of the armed forces who holds an enlisted military occupational specialty or enlisted military rating designated as career enlisted flyer specialty or rating by the Secretary concerned, performs duty as a dropsonde system operator, or is in training leading to qualification and designation of such a specialty or rating or the performance of such duty and meets the other requirements as designated in 37 U.S.C. 320 or 353 outlined in DoD Instruction 7730.67.

2 -D-3. Incentive Pay for Submarine Duty: For enlisted submarine pay under provision of 37 USC 301c. for performance of duty while attached under competent orders to a submarine, while serving as an operator or crew member of an operational submersible (including an undersea exploration or research vehicle), while undergoing training preliminary to assignment to a nuclear-powered submarine, while undergoing rehabilitation after assignment to a nuclear-powered submarine, or, in the case of a member qualified in submarines, while attached as a member of a submarine operational command staff whose duties require serving on a submarine during underway operations.

2 -E. Special Pay: For hardship duty pay while assigned to locations or duties designated by the Secretary of Defense under the provisions of 37 U.S.C. 305; for career sea pay under the provisions of 37 U.S.C. 305a; for diving duty pay under the provisions of 37 U.S.C. 304; for assignment incentive pay under the provisions of 37 U.S.C. 307a; for duty subject to hostile fire or imminent danger under the provisions of 37 U.S.C. 310 or 37 U.S.C. 351; for nuclear-trained and qualified, and for nuclear career accession and annual incentive bonuses under the provisions of 37 U.S.C. 312b; for qualified enlisted members extending duty at designated locations overseas under the provisions of 37 U.S.C. 314; for foreign language proficiency under the provisions of 37 U.S.C. 316 or 353; for retention incentives for members qualified in a critical military skill under the provisions of 37 U.S.C. 355; for conversion to military occupational specialty to ease personnel shortage under the provisions of 37 U.S.C. 326; for transfer between armed forces under the provisions of 37 U.S.C. 327; for continuation of pays during hospitalization and rehabilitation under the provisions of 37 U.S.C. 372; and for continuation pay authorized under the provisions of 37 U.S.C. 356.

2 -F. Special Duty Assignment Pay: For pay to enlisted personnel for possessing special proficiency in a military skill, under the provisions of 37 U.S.C. 307 or 352.

2 -G. Reenlistment Bonus: For payment to enlisted personnel of a bonus for reenlistment, under the provisions of 37 U.S.C. 308 or 331.

2 -H. Enlistment Bonus: For payment to enlisted personnel of a bonus for enlistment (or extension) in a skill designated as critical, in accordance with the provisions of 37 U.S.C. 309 or 331.

2 -I. Education Benefits: For payment to the Department of Defense Education Benefits Fund, a trust fund, in accordance with 38 U.S.C. Chapter 30. This program funds the additional and supplemental benefit payments above a basic benefit (the Montgomery GI Bill) to be budgeted by the Department of Veteran Affairs (DVA). The program is budgeted on an accrual basis by the Department of Defense.

2 -J. Loan Repayment Program: For payment to enlisted personnel to repay education loans, in accordance with the provisions of 10 U.S.C. 2171.

2 -K. Basic Allowance for Housing: For housing allowances payable to enlisted personnel under the provisions of 37 U.S.C. 403. BAH is comprised of BAH-Domestic and BAH-Overseas.

2 -L. Station Allowances, Overseas: For per diem allowances payable to enlisted personnel stationed outside the United States or in Hawaii or Alaska based on cost of living for members stationed outside the Continental United States as prescribed by Joint Federal Travel Regulations and authorized under the provisions of 37 U.S.C. 475.

2 -M. CONUS Cost of Living Allowance: For payments to eligible members assigned to high cost areas under the provisions of 37 U.S.C. section 403b.

2 -N. Clothing Allowances: For payment to enlisted personnel of cash allowance for purchase of prescribed clothing, for cost of clothing issued in kind, and for cash payment of maintenance allowances for clothing under the provisions of 37 U.S.C. 418. (Excludes replacement of clothing lost, damaged, or destroyed.)

2 -O. Family Separation Allowances: For family separation allowances payable to enlisted personnel under the provisions of 37 U.S.C. 427.

2 -P. Separation Payments:

a. For payments to enlisted personnel for accumulated unused annual leave under the provisions of 37 U.S.C. 501.

b. For severance pay to enlisted personnel who are denied retention or continuation for non-disability reasons under the provisions of 10 U.S.C. 1174; for disability severance pay under the provisions of 10 U.S.C. 1212.

c. For authorized donations for discharge under certain conditions under the provisions of 10 U.S.C. 1048.

d. Voluntary Separation Incentive (VSI) - For payment of an annuity to enlisted members voluntarily separating from active duty under the provisions of 10 U.S.C. 1175.

e. Special Separation Benefit (SSB) - For a lump sum payment to enlisted members separating from active duty under the provisions of 10 U.S.C. 1174a.

f. Temporary Early Retirement Authority (TERA) - For payment of retired pay to selected active duty enlisted members who retire with between 15 and 20 years of service under the provisions of 10 U.S.C. 1293, 3911, 3914, 6323, 6330, 8911 and 8914. Section 504(b) of the FY 2012 National Defense Authorization Act (NDAA), P.L. 112-81, reinstates temporary retirement authorities in section 4403 of the FY 1993 NDAA (P.L. 102-484) from fiscal year 2012 to December 31, 2018.

g. \$30,000 Lump Sum Bonus – For payment to service members who entered the uniformed service on or after August 1, 1986 who opt to retire under the Redux retirement plan (40 percent retirement benefit at 20 years of service with partial COLA) under the provisions of 37 U.S.C. 354.

2 -Q. Special Compensation for Assistance with Activities of Daily Living – Enlisted: For payment of monthly compensation to an enlisted service member with catastrophic injuries or illnesses requiring assistance in everyday living under the terms and conditions specified by 37 U.S.C. 439.

2 -R. Social Security Tax - Employer's Contribution: For payment of tax on employer to Social Security Administration as provided by Federal Insurance Contributions Act (FICA).

3. Pay and Allowances of Cadets and Midshipmen - For the pay and allowances of cadets and midshipmen at the United States Military Academy, United States Naval Academy, and the United States Air Force Academy.

3 -A. Academy Cadets and Midshipmen: For basic pay, commuted ration allowance, and employer's share of FICA tax for cadets and midshipmen appointed to the United States Military Academy, United States Naval Academy, and United States Air Force Academy, under the provisions of 37 U.S.C. 203 and 422.

a. For payment of nuclear accession bonus under the provisions of 37 U.S.C. 312b.

b. For the difference between the value of the commuted ration allowance and the cost of operational rations.

4. Subsistence of Enlisted Personnel - For the payment of authorized basic allowances for subsistence to enlisted personnel and for the cost of procuring food and beverage supplies for issue as rations to enlisted personnel on extended active duty, including emergency and operational rations; also includes the payment of meals furnished under contract (when approved by competent authority) at commercial facilities where the payment of commuted rations would create an individual hardship and/or the costs for establishment of a Government mess facility are prohibitive or the contract feeding of enlisted personnel is determined to be more economical or advantageous.

4 -A. Basic Allowance for Subsistence: For subsistence allowances payable to enlisted personnel under the provisions of 37 U.S.C. 402.

4 -B. Subsistence in Kind: For cost of subsistence issued as rations to enlisted personnel, including emergency and operational rations, and for payment of meals furnished under contract by commercial facilities under the provisions of 10 U.S.C. 4561, 6081 and 9561.

4 -C. Family Subsistence Supplemental Allowance (FSSA): For members eligible for food stamps, a supplemental allowance is provided not to exceed \$500 per month under the provisions of 37 U.S.C. 402a.

5. Permanent Change of Station (PCS) Travel - For expenses incident to permanent change of station travel of military personnel, individually or as part of organized units. The PCS travel costs include mileage; monetary allowance in lieu of transportation; transportation by common carrier (rail, bus, air, or water, including Air Mobility Command and Military Sealift Command); per diem allowances, actual and necessary expenses and cost of subsistence while in a PCS travel status; issue of meal tickets in lieu of subsistence; temporary lodging expense; travel of dependents and transportation of baggage and household goods, port handling charges for personnel, their household goods, baggage and privately owned automobiles passing through CONUS MTMC terminals; payments of dislocation allowances; authorized transportation of dependents and personal and household effects of deceased military personnel; costs of contract packing, crating, handling and temporary storage of household goods; cost of non-temporary storage of household goods; cost of trailer allowances; travel incident to organizational movements on permanent change of station whether for training or non-training purposes; expenses incident to PCS movement of any military group traveling under one order from the same point of origin to the same destination; minor supplies and services incident to troop or organizational PCS movements; expenses and allowances incident to separation travel, discharge or release. Also included are all authorized Temporary Duty Travel directly related to and an integral part of PCS movement of individuals or organizational units. Excludes Temporary Duty Travel other than that directly related to and an integral part of PCS movements. All authorized PCS travel expenses provided for under this budget program account shall be charged to the same subprogram account cited in PCS travel order of the military member. The term "CONUS" (Continental United States) referred to herein applies to the United States Territory, "including the adjacent territorial waters located within the North American Continent between Canada and Mexico."

5 -A. Accession Travel:

a. Officers. Covers PCS movements of (1) officers appointed to a commissioned grade from civil life, military academies or ROTC/NROTC, Reserve and National Guard officers called or recalled to extended active duty from home or a point where orders were received to first permanent duty station or training school of 20 weeks or more duration and (2) officers or warrant officers appointed or recalled from enlisted status from station where they served as enlisted to new permanent duty station or training school of 20 weeks or more duration. (Includes officers appointed from enlisted status upon graduation from Officer Candidate School (OCS), Officer Training School (OTS), or basic flying training.) (Marine Corps basic military training for officers

will be a part of an accession move; this is the only exception to the 20-week rule.)

b. Enlisted. Covers PCS movements of (1) enlistees, reenlistees, and prior service personnel from recruiting station or place of enlistment to first permanent duty station or training school of 20 weeks or more duration and (2) recalled enlisted reservists from home to first permanent duty station or training school of 20 weeks or more.

c. Cadets and Midshipmen. Covers PCS movements of (1) individuals selected as academy cadets or midshipmen upon entry into the academies and (2) individuals who travel to the academies but fail to pass the entrance physical examinations and are required to return home.

5 -B. Training Travel:

a. Officers. Covers PCS movements of (1) officers and warrant officers from previous CONUS permanent duty station to formal service or civilian schools, including technical schools, flying training schools, factory training, and other approved courses of instruction of 20 weeks' duration or more; and (2) officer and warrant officer school graduates and eliminates from school to their next permanent CONUS duty station. (Excludes academy graduates, OCS or OTC graduates, flying training graduates, ROTC graduates and others chargeable to Accession Travel.)

b. Enlisted. Covers PCS movements of (1) enlisted personnel from previous CONUS permanent duty station to formal service or civilian schools, including technical schools, flying training schools, factory training, and other approved courses of instruction, of 20 weeks duration or more; (2) enlisted school graduates and eliminates from school to their next CONUS permanent duty station; and (3) enlisted personnel ordered to training leading to a commission if such training period is of 20 weeks duration or more.

5 -C. Operational Travel: Between Duty Stations (within CONUS and within Overseas):

a. Officers. Covers PCS movements of (1) officers, and warrant officers to and from permanent duty stations located within the United States; (2) officers and warrant officers to and from permanent duty stations located within an overseas area when no transoceanic travel is involved; and (3) dependents, household goods, personal effects and privately owned vehicles of officers and warrant officers who are interned, missing, or captured when no transoceanic travel is involved.

b. Enlisted. Covers PCS movements of (1) enlisted personnel to and from permanent duty stations located within the United States; (2) enlisted personnel to and from permanent duty stations located within an overseas area when no transoceanic travel is involved; and (3) dependents, household goods, personal effects and privately owned vehicles of enlisted personnel who are interned, missing, or captured when no transoceanic travel is involved.

5 -D. Rotational Travel to and from Overseas:

a. Officers. Covers PCS movements of (1) officers and warrant officers from permanent duty stations in CONUS, or training of 20 weeks or more duration, to permanent duty stations overseas; (2) officers and warrant officers from permanent duty stations overseas to permanent duty stations in CONUS, or training of 20 weeks or more duration; (3) officers and warrant officers from permanent duty stations in one overseas area to permanent duty stations in another overseas area when transoceanic travel is involved; and (4) dependents, household goods, personal effects and privately owned vehicles of officers and warrant officers who are interned, missing or captured when transoceanic travel is involved.

b. Enlisted. Covers PCS movements of (1) enlisted personnel from permanent duty stations

in CONUS, or training of 20 weeks or more duration, to permanent duty stations overseas; (2) enlisted personnel from permanent duty stations overseas to permanent duty stations in CONUS, or training of 20 weeks or more duration; (3) enlisted personnel from permanent duty stations in one overseas area to permanent duty stations in another overseas area when transoceanic travel is involved; and (4) dependents, household goods, personal effects, and privately owned vehicles of enlisted personnel who are interned, missing, or captured when transoceanic travel is involved.

5 -E. Separation Travel:

a. Officers. Covers PCS movements of (1) officers and warrant officers upon release or separation from the Service from last permanent duty station to home of record or point of entry into service, or to home of selection when authorized by law; and (2) dependents, household goods, trailer allowances, and personal effects of officers and warrant officers who are deceased.

b. Enlisted. Covers PCS movements of (1) enlisted personnel upon release or separation from the Service from last permanent duty station to home of record or point of entry into service or to home of selection when authorized by law; and (2) dependents, household goods, trailer allowances, and personal effects of enlisted personnel who are deceased.

c. Cadets and Midshipmen. Covers PCS movements of eliminated academy cadets/midshipmen to home of record or point of entry into service.

5 -F. Travel of Organized Units:

a. Officers. Covers PCS movements of (1) officers and warrant officers directed to move as members of an organized unit movement; and (2) officer and warrant officer fillers and replacements directed to move as part of the unit move.

b. Enlisted. Covers PCS movements of (1) enlisted personnel directed to move as members of an organized unit movement; and (2) enlisted fillers and replacements directed to move as part of the unit move.

6. Other Military Personnel Costs - For costs incident to the apprehension of military deserters, absentees, and escaped prisoners; interest on uniformed services savings deposits; death gratuities; unemployment benefits; education benefits; adoption expenses; mass transportation benefits; partial dislocation allowance payments; servicemembers' group life insurance; reserve officer training corps; and junior reserve officer training corps.

6.-A. Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners: For the expenses of apprehension and delivery of military deserters, absentees, and escaped military prisoners, including the payment for travel of guards; payment of rewards or reimbursement of reasonable and actual expenses to persons or agencies apprehending and detaining or delivering absentees or deserters to military control.

6.-B. Interest on Uniformed Services Savings Deposits: For the payment of interest at a rate not to exceed 10 percent per annum on any sum of not less than \$5 deposited by members of the uniformed services under the provisions of 10 U.S.C. 1035.

6.-C. Death Gratuities: For the payment of death gratuities to beneficiaries of military personnel under the provisions of 10 U.S.C. 1475-80.

6.-D. Unemployment Benefits: For the payment of unemployment benefits to ex-service members who are discharged or released under honorable conditions under the provisions of Title 5, United States Code (U.S.C.), section 8521.

6.-E. Education Benefits: For amortization payments to the DoD Education Benefits Fund, a trust fund, as prescribed by 10, U.S.C., 2006. This program is governed by 38 U.S.C. Chapter 30 and is budgeted on an accrual basis by the Department of Defense.

6.-F. Adoption Expenses: To provide reimbursement for qualifying adoption expenses under the provisions of 10 U.S.C. 1052.

6.-G. Mass Transportation Benefit: For payment of mass transportation benefits as required by Executive Order 13150 on federal workforce transportation, dated April 21, 2000.

6.-H. Partial Dislocation Allowance: To provide payment for either vacating or moving into quarters for renovation purposes under the provision of the FY 2002 National Defense Authorization Act, Section 636.

6.-I. Reserve Income Replacement: For the payment of monthly active-duty income differential of a Reserve Component member when the total monthly military compensation of the member is less than the average monthly civilian income of the member under the provisions of 37 U.S.C 910.

6.-J. Servicemembers' Group Life Insurance: To provide Extra Hazard reimbursement for Servicemembers' Group Life Insurance (SGLI) under the provisions of 38 U.S.C. 1969, payment for Traumatic Injury Protection Coverage under the SGLI (T-SGLI) program under the provisions of 37 U.S.C. 437, and payment for SGLI/T-SGLI insurance premium allowance under provisions of 37 U.S.C. 437.

6.-K. ROTC: All the military personnel-type costs associated with the Senior Reserve Officers' Training Corps (except the scholarship program) of an armed force, provided for in 10 U.S.C. 2101-2111. All the military personnel costs associated with the financial assistance program for specially selected members of the Senior R.O.T.C. program. This program is intended to offer regular commissions to cadets and midshipmen successfully completing the academic and military requirements of the 4-year program. Authority for the program is contained in 10 U.S.C. 2107. Retired pay accrual does not apply to R.O.T.C. personnel. Costs include the subsistence allowance per month authorized by 37 U.S.C. 209, costs of uniform clothing authorized by 10 U.S.C. 2109-2110, pay and allowances authorized by 37 U.S.C. 209, incentive pay for members of precommissioning programs pursuing foreign language proficiency under the provisions of 37 U.S.C. 316a, and the cost of subsistence issued as rations to enlisted personnel including emergency and operational rations authorized by 10 U.S.C. 2109-2110.

6.-L. JROTC: All the military personnel costs associated with the Junior R.O.T.C. units at public and private secondary educational institutions provided for in 10 U.S.C. 2031. Retired pay accrual does not apply to J.R.O.T.C. personnel.

BA/BSA – Medicare-Eligible Retiree Health Fund Contribution Appropriations

1. Officers - For the Department of Defense's contribution to the Medicare-Eligible Retiree Health Care Fund for the future Medicare-Eligible health care costs for current military officers in accordance with 10 U.S.C. Chapter 56. Defense Health Care Accrual amounts are to be paid into the fund based upon approved actuarial rate multiplied by the expected average force strength for each fiscal year. The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108-375) provided permanent, indefinite appropriations to finance the cost of accruing TRICARE benefits for uniformed service member. These costs are included in the DoD discretionary total.
2. Enlisted - For the Department of Defense's contribution to the Medicare-Eligible Retiree Health Care Fund for the future Medicare-Eligible health care costs for current military enlisted personnel in accordance with 10 U.S.C. Chapter 56. Defense Health Care Accrual amounts are to be paid into the fund based upon approved actuarial rate multiplied by the expected average force strength for each fiscal year. The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108-375) provided permanent, indefinite appropriations to finance the cost of accruing TRICARE benefits for uniformed service member. These costs are included in the DoD discretionary total.

OBJECT CLASSIFICATION
ACTIVE MILITARY PERSONNEL APPROPRIATIONS

<u>Budget Subactivity</u>	<u>Object Class</u>
Accrued Retirement Benefits	12.210
Accrued Health Care Benefits (Medicare-Eligible Retiree Health Fund Contributions)	12.230
Adoption Expenses	12.220
Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners: Rewards and Expenses	11.810
Travel of Guards	21.010
Basic Allowance for Housing	11.610
Basic Allowance for Subsistence	11.710
Basic Pay	11.710
CONUS Cost of Living Allowance	11.710
Death Gratuities	42.010
Education Benefits	12.220
Enlistment Bonuses	12.220
Family Separation Allowances	12.220
Family Subsistence Supplemental Allowance	11.710
Incentive Pay for Hazardous Duty (to include Hostile Fire, Hardship Duty, Diving, and Sea Duty Pay)	11.710
Interest on Uniformed Services Savings Deposits	43.010
Loan Repayment Program	12.220
Mass Transit Subsidy	21.010
Permanent Change of Station, Travel:	
Dislocation Allowance	12.220
Global POV Storage	25.710
Non-temporary Storage	25.710
Port Handling Charges	25.710
Trailer Allowances	22.010
Transportation of Household Goods	22.010
Transportation of POVs	22.010
Travel of Military Members and Dependents	21.010
Temporary Lodging Expense	12.220
Monetary Allowance in Lieu of Transportation	21.010
Reenlistment Bonuses	12.220
Separation Payments: Lump Sum Terminal Leave Payments	11.710
All Others	12.220
SGLI (Extra Hazard Payments for survivor claims)	42.010
SGLI/T-SGLI Insurance Premium Allowance	42.010
T-SGLI	42.010
TSP Matching Contributions	12.220
Social Security Tax-Employer's Contribution	12.220
Special Compensation for Assistance with Activities of Daily Living	12.220
Special Duty Assignment Pay	11.710
Special Pay: Medical, Dental, Nurse, Optometrists and Veterinarians Pay, Nuclear Officer Incentive Pay, Nuclear Accession Bonus, Aviation Retention Bonus, Scientific/Engineering Bonus, and Personal Money Allowances for General/Flag Officers, Continuation Pays , etc.	12.220
Station Allowances, Overseas	12.220
Stop Loss Special Pay	13.010
Subsistence Allowance (ROTC)	11.710

Subsistence: In Kind	11.710
Monetary Allowances	11.710
Unemployment Compensation	13.010
Uniform and Clothing Allowances: In Kind	26.010
Monetary Allowances	12.220
\$30,000 Lump Sum Bonus	11.710

***2.3 Budget Presentation Structure Requirements (020203)**

2.3.1. For purposes of preparing certain material for presentation and justification of program and budget estimates, the following budget activities will be used for the Active Military Personnel Appropriations:

- 2.3.1.1. Pay and Allowances of Officers
- 2.3.1.2. Pay and Allowances of Enlisted
- 2.3.1.3. Pay and Allowances of Cadets and Midshipmen
- 2.3.1.4. Subsistence of Enlisted Personnel
- 2.3.1.5. Permanent Change of Station Travel
- 2.3.1.6. Other Military Personnel Costs

2.3.2. The following additional breakdown of each budget activity is required to be shown in the applicable justification exhibits:

BA/BSA

1. Pay and Allowances of Officers:

- a. Basic Pay
- b. Retired Pay Accrual
- c. [Thrift Savings Plan – Matching Contributions](#)
- d. Incentive Pay for Hazardous Duty
 - (1) Flying Duty
 - (a) Crew
 - (b) Noncrew
 - (c) Aviation Continuation Pay
 - (d) Crew (Nonrated)
 - (2) Submarine Duty
 - (3) Parachute Jumping
 - (a) Parachute Jumping (regular)
 - (b) Parachute Jumping (High Altitude/Low Opening)
 - (c) Other Incentive Pay
 - (4) Duty inside a high or low pressure chamber inside observer, human acceleration or deceleration, experimental subject and test subject in thermal stress

experiments

- (5) Demolition Duty
- (6) Flight Deck Duty
- (7) Air Weapons Controller Duty
- (8) Duty Involving Toxic Fuel/Waste
- (9) Duty Involving Live/Hazardous Biological Organisms
- (10) Visit, Board, Search and Seizure
- e. Special Pay
 - (1) Medical Pay
 - (a) Variable Special Pay
 - (b) Additional Special Pay
 - (c) Board Certified Pay
 - (d) Medical Incentive Pay
 - (e) Multi-Year Retention Bonus
 - (f) Critically Short Wartime Specialties Accession

Bonus

- (2) Dental Pay
 - (a) Variable Special Pay
 - (b) Additional Special Pay
 - (c) Board Certified Pay
 - (d) Accession Bonus
 - (e) Multi-Year Retention Bonus
 - (f) Dental Critical Skills Retention Bonus
- (3) Nurse Pay
 - (a) Accession Bonus
 - (b) Anesthetist Pay
- (4) Special Pay for Optometrists
- (5) Special Pay for Pharmacists
 - (a) Accession Bonus
 - (b) Special Pay
- (6) Special Pay for Veterinarians
- (7) Board Certified Pay for Non-Physician Health Care

Providers

- (8) Personal Money Allowances - General/Flag Officers
- (9) Responsibility Pay
- (10) Diving Duty
- (11) Special Pay - Nuclear Officer Incentive Pay
- (12) Scientific/Engineering Bonus
- (13) Sea Duty Pay
 - (a) Career Sea Pay
 - (b) Premium Sea Pay
- (14) Overseas Extension Pay
- (15) Foreign Language Proficiency Pay
- (16a) Hostile Fire Pay
- (16b) Imminent Danger Pay
- (17) Hardship Duty Pay
- (18) Judge Advocate Continuation Pay
- (19) Special Warfare Officer Pay (extend period of active duty)
- (20) Surface Warfare Officer Continuation Pay
- (21) Critical Skills Retention Bonus
- (22) New Officers in Critical Skills Accession Bonus
- (23) Transfer between Armed Forces Incentive Bonus
- (24) Hospitalization and Rehabilitation Pay
- (25) Assignment Incentive Pay

- (26) Continuation Pay
- f. Basic Allowance for Housing
 - (1) With Dependents – Domestic
 - (2) Without Dependents – Domestic
 - (3) Partial Allowance – Bachelor – Domestic
 - (4) Substandard Housing - Domestic
 - (5) With Dependents – Overseas
 - (6) Without Dependents – Overseas
 - g. Basic Allowance for Subsistence
 - h. Station Allowances, Overseas
 - (1) Cost of Living
 - (2) Temporary Lodging
 - i. CONUS Cost of Living Allowances
 - j. Clothing Allowances
 - (1) Initial Military Allowance
 - (2) Additional Military Allowance
 - (3) Civilian Clothing Allowance
 - k. Family Separation Allowances
 - (1) On permanent change of station with dependents not authorized, Government quarters not available.
 - (2) On permanent change of station with dependents not authorized.
 - (3) On board ship for more than 30 days.
 - (4) On temporary duty for more than 30 days with dependents not residing near temporary duty station.
 - l. Separation Payments
 - (1) Lump sum terminal leave payments.
 - (2) Lump sum readjustment payments.
 - (3) Lump sum payments to reservists
 - (4) Severance pay, failure of promotion.
 - (5) Severance pay, disability.
 - (6) Severance pay, non-disability
 - (7) Voluntary Separation Incentive (VSI)
 - (8) Voluntary Separation Pay (VSP)
 - (9) Special Separation Benefit (SSB)
 - (10) 15 Year Temporary Early Retirement Authority
 - (11) \$30,000 Lump Sum Bonus
 - m. Special Compensation for Assistance with Activities of Daily Living
 - n. Social Security Tax - Employer's Contribution
2. Pay and Allowances of Enlisted Personnel:
- a. Basic Pay
 - b. Retired Pay Accrual
 - c. Thrift Savings Plan – Matching Contribution
 - d -1. Incentive Pay for Hazardous Duty
 - (1) Flying Duty
 - (a) Crew
 - (b) Noncrew
 - (2) Submarine Duty
 - (3) Parachute Jumping
 - (a) Parachute Jumping (regular)
 - (b) Parachute Jumping (High Altitude/Low Opening)
 - (c) Other Incentive Pay

(4) Duty inside a high or low pressure chamber inside observer, human acceleration or deceleration, experimental subject and test subject in thermal stress experiments

- (5) Demolition Duty
- (6) Flight Deck Duty
- (7) Air Weapons Controller Duty
- (8) Duty Involving Toxic Fuel/Waste
- (9) Duty Involving Live/Hazardous Biological Organisms
- (10) Visit, Board, Search, and Seizure
- d-2. Career Enlisted Flyer Pay
- e. Special Pay
 - (1) Diving Duty
 - (2) Sea Duty Pay
 - (a) Career Sea Pay
 - (b) Premium Sea Pay
 - (3) Overseas Extension Pay
 - (4) Nuclear Accession Bonus
 - (5) Foreign Language Proficiency Pay
 - (6a) Hostile Fire Pay
 - (6b) Imminent Danger Pay
 - (7) Hardship Duty Pay
 - (8) Critical Skill Retention Bonus
 - (9) Conversion to Military Occupational Specialty to ease personnel shortage
 - (10) Transfer Between Armed Forces Incentive Bonus
 - (11) Hospitalization and Rehabilitation Pay
 - (12) Assignment Incentive Pay
 - (13) Continuation Pay
- f. Special Duty Assignment Pay
- g. Reenlistment Bonus
- h. Enlistment Bonus
 - (1) New Payments
 - (2) Residual New
 - (3) Anniversary
- i. Education Benefits (College Fund)
- j. Loan Repayment Program
- k. Basic Allowance for Housing
 - (1) With Dependents – Domestic
 - (2) Without Dependents – Domestic
 - (3) Partial Allowance – Bachelor – Domestic
 - (4) Substandard Housing - Domestic
 - (5) With Dependents – Overseas
 - (6) Without Dependents - Overseas
- l. Station Allowances, Overseas
 - (1) Cost of Living
 - (2) Temporary Lodging
- m. CONUS Cost of Living Allowances
- n. Clothing Allowances
 - (1) Initial
 - (a) Military
 - (b) Civilian
 - (2) Maintenance Allowances
 - (a) Basic Allowance
 - (b) Standard Allowance

- (c) Special Allowance
 - (3) Supplementary Allowances
 - (4) Other Allowances
 - o. Family Separation Allowances
 - (1) FSA-R - On permanent change of station with dependents not authorized.
 - (2) FSA-S - On board ship for more than 30 days.
 - (3) FSA-T - On temporary duty for more than 30 days with dependents not residing near temporary duty station.
 - p. Separation Payments
 - (1) Lump sum terminal leave payments.
 - (2) Severance pay, disability
 - (3) Severance pay, non-disability
 - (4) Authorized donations
 - (5) Voluntary Separation Incentive (VSI)
 - (6) Special Separation Benefit (SSB)
 - (7) 15 Year Temporary Early Retirement Authority
 - (8) \$30,000 Lump Sum Bonus
 - q. Special Compensation for Assistance with Activities of Daily Living
 - r. Social Security Tax - Employer's Contribution
- 3. Pay and Allowances of Cadets and Midshipmen: Academy Cadets and Midshipmen
 - a. Basic Pay
 - b. Subsistence - Commuted Ration
 - c. Operational rations
 - d. Social Security Tax - Employer's Contribution
 - e. Nuclear Accession Bonus
- 4. Subsistence of Enlisted Personnel:
 - a. Basic Allowance for Subsistence
 - (1) When Authorized to Mess Separately
 - (2) When Rations in Kind Not Available
 - (3) Augmentation of Commuted Ration Allowance for Meals Taken Separately
 - (4) Less Collections
 - b. Subsistence in Kind
 - (1) Subsistence in Messes
 - (a) Trainee/NP Status
 - (b) Members Taking Meals in Mess
 - (c) Reimbursable
 - (2) Operational Rations
 - (a) MREs
 - (b) Unitized Rations
 - (c) Other Package of Rations
 - (d) Reimbursable
 - (3) Augmentation Rations/Other Programs
 - (a) Augmented Rations
 - (b) Other - Region
 - (c) Other - Messing
 - c. Family Subsistence Supplemental Allowance
- 5. Permanent Change of Station Travel:
 - a. Summary of Move Requirements. For each type of move reflected in c through h below, show the number of moves and the dollar amount for the PY, CY, and BY

at the aggregate level (combine officers, enlisted and officer candidates).

b. Summary of Requirements by Types of Costs. Show the number and amount of the following entries for the PY, CY, and BY, regardless of the type of move.

- midshipmen)
- (1) Travel of Military Members (include cadets and

6. Mileage and Per Diem - The costs of travel relating to use of privately owned vehicle or commercial modes other than air or sea. Includes per diem paid to the individual member. It excludes movement of mobile trailers even if the trailer is moved by the member. The unit of measurement is number of member moves.

7. Air Mobility Command (AMC) - The costs of travel for movement of an

8. Commercial Air - The costs for movement of an individual member paid directly to a commercial company. (Excludes any costs paid to AMC.) The unit of measurement is number of member moves.

9. Mileage - The costs of travel relating to the use of privately owned vehicles or commercial modes other than air or sea for the dependents of an individual member. Includes per diem paid to dependents. The unit of measurement is number of family moves.

10. Air Mobility Command (AMC) - The costs of travel for movement of dependents reimbursed to AMC. The unit of measurement is number of dependents.

11. Commercial Air - The costs for movement of dependents paid directly to a commercial company (excludes any costs paid to AMC). The unit of measurement is number of dependents.

12. For each permanent change of station travel account, the following data will be shown, as applicable, for officers, enlisted and cadets/midshipmen:

a. Member Travel - Costs related to the movement of each member of a military service making a permanent change of station move.

b. Dependent Travel - Costs related to the movement of dependents when authorized as part of a permanent change of station of a member of a military service. The number of dependent moves should reflect the number of families moved as a unit of measure.

c. Transportation of Household Goods - Costs related to movement of household goods as authorized by Joint Federal Travel Regulations including shipment of unaccompanied baggage.

(1) Land Shipments, CONUS and Overseas - The costs of shipment of goods for the portion in CONUS and overseas of shipments other than International Through Government Bill of Lading (ITGBL). The unit of measurement is member move.

(2) ITGBL - The costs of shipment from point of origin to destination on ITGBL. Includes both land and overwater portion of the movement. The unit of measurement is member move.

(3) Overseas - The costs of shipments, including unaccompanied and excess baggage, either reimbursed to the Military Sealift Command (MSC), Air Mobility Command (AMC), or paid directly to a commercial company.

d. Dislocation Allowance - The costs of dislocation allowance as authorized in the JTR. The unit of measurement is number of members paid.

e. Trailer Allowance - The costs of movement of mobile trailers whether moved by commercial contract or moved by the individual member. The unit of measurement is number of trailer moves.

f. Privately Owned Vehicles (POV) - The costs to the Government of transporting or storing a POV to or from overseas.

(1) Military Sealift Command (MSC) - The cost of shipping POVs reimbursed to MSC. The unit of measurement is number of POVs shipped. If number of

POVs shipped is not available, use 11.2 measurement tons per vehicle to convert measurement tons to vehicles.

(2) Military Traffic Management Command (MTMC) – The cost of storing POVs reimbursed to MTMC. The unit of measurement is number of POVs stored.

(3) Port Handling (Military Traffic Management Command) - The cost of port processing of vehicles reimbursed to MTMC. The unit of measurement is number of POVs processed. If number of POVs processed is not available, use 11.2 measurement tons per vehicle to convert measurement tons to vehicles.

g. Port Handling Costs (HHGs) - The port handling costs for household goods and unaccompanied baggage reimbursed to MTMC. The unit of measure is measurement tons.

h. Non-temporary Storage - The costs to the government of placing goods in storage or moving them to another specified destination under the provisions of 37 U.S.C. 476 when a member entitled to a PCS move is ordered to a duty station to which the shipment of household goods is not authorized. No unit of measure will be shown for non-temporary storage, only costs.

i. Temporary Lodging Expense (TLE) - The cost of reimbursing the member for expenses incurred as a result of a PCS move, not to exceed \$290 per day for up to 10 days under the provisions of 37 U.S.C. 474a. TLE requirements should reflect members paid as the unit of measure.

j. Pet Quarantine Fees – The cost of reimbursing the member for mandatory pet quarantine fees incident to a Permanent Change of Station under the provisions of 37 U.S.C. 476(a)(1).

13. Other Military Personnel Costs:
- Military Prisoners
- a. Apprehension of Military Deserters, Absentees, and Escaped
 - b. Interest on Uniformed Services Savings Deposits
 - c. Death Gratuities
 - (1) Officers
 - (2) Enlisted
 - (3) Cadets and Midshipmen
 - d. Unemployment Benefits
 - e. Education Benefits (Amortization Payments)
 - f. Adoption Expenses
 - g. Mass Transportation Benefit
 - h. Partial Dislocation Allowance
 - i. Reserve Income Replacement
 - j. SGLI/T-SGLI
 - (1) SGLI Extra Hazard Payments
 - (2) Traumatic Injury Protection Coverage (T-SGLI)
 - (3) SGLI/T-SGLI Insurance Premium Allowance
 - k. ROTC
 - l. JROTC

*2.4 Program and Budget Review Submission (020204)

2.4.1. This section prescribes the justification materials required for the Active Military

Personnel appropriations to support budget estimates. Fund requirements for these appropriations will be presented using those budget and accounting classifications set forth in paragraphs 2.2 and 2.3, above.

2.4.2. Exhibits in Support of Program and Budget Estimates - The following justification exhibits will be prepared and submitted in support of the program and budget review for the OSD/OMB program and budget review submission. These exhibits will be organized by Service military personnel account. Examples of the required exhibits are provided in paragraph 6.2. The required justification material will be organized in a single unclassified volume with the unclassified data displayed in the sequence shown below:

Table of Contents

Section 1 - Summary of Requirements by Budget Program (PB-30A)

The Summary of Requirements will include a Medicare-Eligible Retiree Health Fund Contribution Appropriation line displaying the total amounts budgeted as shown in section 6.2 of this chapter. These amounts will be supported by detailed calculations provided in the MP-13 Exhibit included in the separate backup justification book.

Section 2 – Introduction, Summary of Economic Assumptions, and Performance Measures

1. The Introduction will include an Introductory Statement that should provide the highlights of the budget submission and a general discussion of the relationship of the resources requested to the proposed military strength program. This should include a discussion of the military strength characteristics in terms of gains and losses and promotion and assignments policies. It also should address strength changes in programmatic terms such as force structure gains and losses and other matters of an overall nature as considered appropriate by the Service. For those Services ordering Selected Reserve members to active duty for preplanned missions in support of Combatant Commands (12304b authority), active Military Personnel budget justification material must include a description of the mission for which such units are anticipated to be ordered to active duty and the anticipated length of time of the order of such units to active duty on an involuntary basis. Finally, the Introduction will include the following statement:

“The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108-375) provided permanent, indefinite appropriations to finance the cost of TRICARE benefits accrued by uniformed service members. Since these costs are actually borne in support of the Department of Defense, they will be shown as part of the DoD discretionary total. The appropriations requested for the military personnel accounts exclude retiree health accrual funding. Total obligations on behalf of military personnel include both the amounts requested for appropriation and amounts paid from the permanent, indefinite authority.”

2. Economic Assumptions will summarize funding projections, end strength, average strength, retired pay accrual (full-time and part-time), military pay raise, and inflation rates assumed for Basic Allowance for Housing (BAH), Basic Allowance for Subsistence (BAS), and non-pay funding items. This summary can be formatted to summarize by fiscal year or by element of expense as preferred by the Service.

3. The Dwell Time Assessment directed by the FY 2013 NDAA should include a statement

on the estimated dwell time for both the active and reserve components in the prior year (PY), current year (CY), and budget year (BY). The assessment should identify military occupational specialties and types of units that did not achieve the Service's dwell time goals. In addition, the assessment should include a statement of whether requested reductions in active duty end-strength are reversible within 1 year. This section of the Introductory Statement is required through the FY 2017 President's Budget.

4. Performance Measures and Evaluation Summary (PB-30Y) (example provided in paragraph 6.2).

Section 3 - Summary Tables (examples provided in paragraph 6.2, below)

1. Personnel Summaries (PB-30B through PB-30F)
2. Summary of Entitlements by Subactivity (PB-30J)
3. Analysis of Appropriation Changes and Supplemental Requirements (PB-30K)
4. Schedule of Increases and Decreases [Summary](#) (PB- 30Q)

Section 4 - Detail of Military Personnel Entitlements

Justification materials will be provided for each entitlement as prescribed in paragraphs 2.2 and 2.3, above for each of the following six budget activities for military personnel:

1. Pay and Allowances of Officers
2. Pay and Allowances of Enlisted Personnel
3. Pay and Allowances of Cadets/Midshipmen
4. Subsistence of Enlisted Personnel
5. Permanent Change of Station Travel
6. Other Military Personnel Costs

Each of the military personnel budget activities above will be introduced by a schedule of increases and decreases (PB-30P). The Incentive/Bonus Payment Stream exhibit (PB-30V) will be included in Section 4, Detail of Military Personnel Entitlements (See paragraph 6.2, below for format).

Section 5 - Special Analyses (examples provided in paragraph 6.2, below)

1. Schedule of Military Assigned Outside DoD (PB-30Q)
2. Reimbursable Programs (PB-30R)
3. Reserve Officer Training Corps Enrollment (PB-30S)
4. Reserve Officer Training Corps Program (PB-30T)

5. Monthly End Strength by Pay Grade (PB-30Z)

2.4.3. Justification material for each subactivity will contain a purpose and scope as well as a justification of funds requested. The requirements for each entitlement under each military personnel category will be justified on a gross basis to include total obligations for both direct and reimbursable personnel. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory, program enhancements, solving deficiencies, etc.). Also provide a general explanation for each type of entitlement. The computation for each entitlement will display data for the prior year (PY), current year (CY), and budget year (BY). An example of the exhibit to meet this requirement is Exhibit PB-30X in section 6.2.

2.4.4. The following exhibits will be provided in a separate backup justification book in support of the budget estimate. Examples of these exhibits are provided in paragraph 6.2, below:

- MP-2 [Basic Allowance for Housing Costs Summary](#)
- MP-3 Summary of Outyear Data
- MP-4 Military Personnel by Region and Country
- MP-6 Education Benefits - Additional Basic Benefits (38, U.S.C. Chapter 30)
- MP-9 Summary of Basic Pay and Retired Pay Accrual Costs
- MP-11 Gains Phased by Month
- MP-12 Pay Raise Data
- MP-13 Medicare-Eligible Retiree Health Fund Contributions

For the Department of Defense's contribution to the Medicare-Eligible Retiree Health Care Fund for the future Medicare-Eligible health care costs for current military personnel in accordance with 10 U.S.C. Chapter 56. Defense Health Care Accrual amounts are to be paid into the fund based upon approved actuarial rates.

- MP-15 Monthly Obligation Phasing Plan
- MP-16 Summary of Recruiting and Retention Data
- MP-17 Reimbursable Program (Reimbursing Customers)
- PB-16 Legislative Proposals (See Volume 2B, Chapter 19, paragraph 191205 for format)
- PB-18 Foreign Currency Exchange Data (See Volume 2B, Chapter 19, paragraph 191205 for format)

A submission is **required** for all components approved to participate in the foreign currency account. These components must submit a PB-18 for all appropriations to include an estimate of military spendable income, COLA and OHA estimates, and troop strength. It is submitted in conjunction with and in support of the OSD Program and Budget Review Submission and the President's Budget submission for the four active military personnel appropriations.

2.5 Congressional Justification/Presentation (020205)

2.5.1. Justification books will be organized by Service military personnel account.

2.5.2. Justification Book, other exhibit requirements, and electronic data submissions in support of the congressional submission are identical to what is shown in paragraph 2.4, Program and Budget Review Submission. Exhibits provided to OUSD(C), consistent with subparagraph 2.4.4, above will **not** be provided to Congress but will be provided under separate cover to OUSD(C) at the time of the President's budget submission.

2.5.3. M-1 Exhibit. Since FY 1998, appropriations language has required the submission of an M-1 exhibit in support of the President's budget. The Military Departments are required to submit M-1 data through the Program Resources Collection Process (PRCP) system consistent with paragraph 010501 of Chapter 1.

3.0 RESERVE MILITARY PERSONNEL AND MEDICARE-ELIGIBLE RETIREE HEALTH FUND CONTRIBUTION APPROPRIATIONS (0203)

3.1 General (020301)

3.1.1. The purpose of this chapter is to provide general information applicable to the Reserve Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations including funding policies, classifications, and definitions unique to these accounts. Generic policies and requirements are addressed in Chapter 1. The Military Components should consult all of the other chapters for exhibit requirements that are not specifically addressed in this chapter including the Other Special Analysis chapter (See Volume 2B, Chapter 19).

3.1.2. This section provides the budget and fiscal accounting classifications for the Reserve and National Guard Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 U.S.C. 115. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification, which shall be used on a uniform basis for the Reserve Component personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds for the Reserve and National Guard Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations.

*3.2 Uniform Budget and Fiscal Accounting Classification (020302)

3.2.1. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in this section. Variations in the budget program, activity, and subactivity classification and titles shall not be made, except that additional accounts consistent with this budget and accounting classification may be established in order to meet administration requirements of the various elements of the Military Departments. The scope of each account is described below.

3.2.2. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same sequence and will be consistent with the fiscal

codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

3.2.3. Chart of Accounts - The chart of accounts represents a summary of the accounting and reporting structure under the Reserve Components' Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations. Obligations and disbursements for individual clothing and uniform allowances, and for subsistence of enlisted personnel may be allocated by activity on a statistical basis if not reported by the different types of training. Subactivities may be combined in reporting on the status of funds, provided the subactivity is maintained for program and budget review and presentation purposes:

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTIONS
Budget Activity (BA) and Budget Subactivity (BSA)

BA/BSA – Reserve and National Guard Personnel Appropriations

The joint explanatory statement accompanying the DoD Appropriations Act, 2009 (P.L. 110-329, Division C) requested that the DoD make permanent the consolidated budget structure for Reserve and Guard personnel appropriations; therefore, the budget justification material shall reflect only one budget activity.

1. Reserve Component Training and Support

1-A Training - Pay Group A

- 1-A-1 Basic pay, active duty for training, officers
- 1-A-2 Other pay and allowances, active duty for training, officers
- 1-A-3 Basic pay, active duty for training, enlisted
- 1-A-4 Other pay and allowances, active duty for training, enlisted
- 1-A-5 Basic pay, inactive duty training, officers
- 1-A-6 Basic pay, inactive duty training, enlisted
- 1-A-7 Individual clothing and uniform allowances, officers
- 1-A-8 Individual clothing and uniform allowances, enlisted
- 1-A-9 Subsistence of enlisted personnel
- 1-A-10 Travel, active duty for training, officers
- 1-A-11 Travel, active duty for training, enlisted
- 1-A-12 Retired pay accrual, officers
- 1-A-13 Retired pay accrual, enlisted

1-B Training - Pay Group B

- 1-B-1 Basic pay, active duty for training, officers
- 1-B-2 Other pay and allowances, active duty for training, officers
- 1-B-3 Basic pay, active duty for training, enlisted
- 1-B-4 Other pay and allowances, active duty for training, enlisted
- 1-B-5 Basic pay, inactive duty training, officers
- 1-B-6 Basic pay, inactive duty training, enlisted
- 1-B-7 Individual clothing and uniform allowances, officers
- 1-B-8 Individual clothing and uniform allowances, enlisted
- 1-B-9 Subsistence of enlisted personnel
- 1-B-10 Travel, active duty for training, officers
- 1-B-11 Travel, active duty for training, enlisted
- 1-B-12 Retired pay accrual, officers
- 1-B-13 Retired pay accrual, enlisted

1-C Training - Pay Group F

- 1-C-1 Basic pay, active duty for training, enlisted
- 1-C-2 Other pay and allowances, active duty for training, enlisted
- 1-C-3 Individual clothing and uniform allowances, enlisted
- 1-C-4 Subsistence of enlisted personnel
- 1-C-5 Travel, active duty for training, enlisted
- 1-C-6 Retired pay accrual, enlisted

1-D Training - Pay Group P

- 1-D-1 Basic pay, inactive duty training, enlisted
- 1-D-2 Individual clothing and uniform allowances, enlisted
- 1-D-3 Subsistence of enlisted personnel
- 1-D-4 Retired pay accrual, enlisted

1-E Mobilization Training

- 1-E-1 Basic pay, active duty for training, officers
- 1-E-2 Other pay and allowances, active duty for training, officers
- 1-E-3 Basic pay, active duty for training, enlisted
- 1-E-4 Other pay and allowances, active duty for training, enlisted
- 1-E-5 Individual clothing and uniform allowances, officers
- 1-E-6 Individual clothing and uniform allowances, enlisted
- 1-E-7 Subsistence of enlisted personnel
- 1-E-8 Travel, active duty for training, officers
- 1-E-9 Travel, active duty for training, enlisted
- 1-E-10 Retired pay accrual, officers
- 1-E-11 Retired pay accrual, enlisted
- 1-E-12 Muster pay stipend, officers
- 1-E-13 Muster pay stipend, enlisted

1-F School Training

- 1-F-1 Basic pay, active duty for training, officers
- 1-F-2 Other pay and allowances, active duty for training, officers
- 1-F-3 Basic pay, active duty for training, enlisted
- 1-F-4 Other pay and allowances, active duty for training, enlisted
- 1-F-5 Individual clothing and uniform allowances, officers
- 1-F-6 Individual clothing and uniform allowances, enlisted
- 1-F-7 Subsistence of enlisted personnel
- 1-F-8 Travel, active duty for training, officers
- 1-F-9 Travel, active duty for training, enlisted
- 1-F-10 Retired pay accrual, officers
- 1-F-11 Retired pay accrual, enlisted

1-G Special Training

- 1-G-1 Basic pay, active duty for training, officers
- 1-G-2 Other pay and allowances, active duty for training, officers
- 1-G-3 Basic pay, active duty for training, enlisted
- 1-G-4 Other pay and allowances, active duty for training, enlisted
- 1-G-5 Individual clothing and uniform allowances, officers

- 1-G-6 Individual clothing and uniform allowances, enlisted
- 1-G-7 Subsistence of enlisted personnel
- 1-G-8 Travel, active duty for training, officers
- 1-G-9 Travel, active duty for training, enlisted
- 1-G-10 Retired pay accrual, officers
- 1-G-11 Retired pay accrual, enlisted

1-H Administration and Support

- 1-H-1 Basic pay of officers
- 1-H-2 Other pay and allowances of officers
- 1-H-3 Basic pay of enlisted
- 1-H-4 Other pay and allowances of enlisted
- 1-H-5 Subsistence of enlisted personnel
- 1-H-6 Permanent change of station travel
- 1-H-7 Death gratuities, officers
- 1-H-8 Death gratuities, enlisted
- 1-H-9 Disability and hospitalization benefits, officers
- 1-H-10 Disability and hospitalization benefits, enlisted
- 1-H-11 Reenlistment Bonus
- 1-H-12 Enlistment Bonus
- 1-H-13 Educational Assistance (Other than Montgomery G.I. Bill)
- 1-H-14 Loan Repayment
- 1-H-15 NROTC Nuclear Bonus
- 1-H-16 Affiliation Bonus
- 1-H-17 Individual Ready Reserve Enlistment/Reenlistment Bonus (PS)
- 1-H-18 Individual Ready Reserve Enlistment Program Bonus (NPS)
- 1-H-19 Critical Skills Retention Bonus (CSRB)
- 1-H-20 Health Professionals Stipend (SELRES)
- 1-H-21 Health Professionals Stipend (IRR)
- 1-H-22 Health Professionals Loan Repayment
- 1-H-23 Specialized Training Assistance Program (STRAP)
- 1-H-24 Health Professionals Medical Officer Recruiting Program (HPMORP)
- 1-H-25 Retired pay accrual, officers
- 1-H-26 Retired pay accrual, enlisted
- 1-H-27 Adoption Expenses
- 1-H-28 \$30,000 Lump Sum Bonus, officers
- 1-H-29 \$30,000 Lump Sum Bonus, enlisted
- 1-H-30 CONUS Cost of Living Allowances (COLA)
- 1-H-31 Mass Transportation Benefit, Officer
- 1-H-32 Mass Transportation Benefit, Enlisted
- 1-H-33 [Continuation Pay, Officer](#)
- 1-H-34 [Continuation Pay, Enlisted](#)

1-I Education Benefits

- 1-I-1 MGIB-SR (Chap 1606), Per Capita Normal Cost
- 1-I-2 MGIB-SR (Chap 1606), Critical Skill or Critical Unit Benefit
- 1-I-3 MGIB-SR (Chap 1606), Amortization
- 1-I-4 Reserve Educational Assistance Program (REAP) (Chap 1607), Per Capita Normal
- 1-I-5 REAP (Chap 1607), Amortization

1-J Platoon Leaders Class or Reserve Officer Candidates

- 1-J-1 Uniforms -- issue in kind
- 1-J-2 Basic pay (Summer training camp)
- 1-J-3 Other pay and allowances (Summer training camp)
- 1-J-4 Subsistence of reserve officer candidates
- 1-J-5 Travel of reserve officer candidates
- 1-J-6 Retired pay accrual

1-K Branch Officer Basic Course

- 1-K-1 Basic pay, active duty for training
- 1-K-2 Other pay and allowances, active duty for training
- 1-K-3 Uniform allowances
- 1-K-4 Travel and per diem
- 1-K-5 Retired pay accrual

1-L Armed Forces Health Professions Scholarship/Financial Assistance Program

- 1-L-1 Stipend
- 1-L-2 Individual clothing and uniform allowances, officers
- 1-L-3 Basic pay, active duty for training, officers
- 1-L-4 Other pay and allowances, active duty for training, officers
- 1-L-5 Travel, active duty for training, officers
- 1-L-6 Retired pay accrual, officers
- 1-L-7 Financial Assistance Grant
- 1-L-8 Nurse Candidate Bonus
- 1-L-9 Accession Bonus

1-M Chaplain Candidate Program

- 1-M-1 Basic pay, active duty for training
- 1-M-2 Other pay and allowances, active duty for training
- 1-M-3 Uniform allowances
- 1-M-4 Travel
- 1-M-5 Retired pay accrual

1-N Thrift Savings Plan (TSP) Matching Contributions

- 1-N-1 TSP Matching Contributions, Officer
- 1-N-2 TSP Matching Contributions, Enlisted

BA/BSA – Medicare-Eligible Retiree Health Fund Contribution Appropriations

1. Reserve Component Training and Support

A. Chart of Accounts, Budget Activities, and Subactivities Definitions/Descriptions are provided on the following pages.

B. Object Classification - The object classifications that follow the Chart of Accounts, Budget Activities, and Subactivities Definitions/Descriptions shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTIONSA. Budget Program

There will be a separate budget program for each Reserve Component of the Department of Defense and for each military service having those programs listed in paragraph 3.2, as appropriate.

B. Budget Activities

The budget activities are established to present all of the military type costs associated with a particular type of training within the unit and individual training or other training and support programs. The following descriptions are for the chart of accounts listed in paragraph 3.2.

BA/BSA – Reserve and National Guard Personnel Appropriations

The joint explanatory statement accompanying the DoD Appropriations Act, 2009 (P.L. 110-329, Division C) requested that the DoD make permanent the consolidated budget structure for Reserve and Guard personnel appropriations; therefore, the budget justification material shall reflect only one budget activity.

1. Reserve Component Training and Supporta. Training, Pay Groups A, B, F and P

The Pay Group activities contained in paragraph 3.2 are for costs, including retired pay accrual associated with the uniform training/pay categories within the National Guard and Reserve Personnel programs as defined in DoD Instruction 1215.06, "Uniform Reserve, Training and Retirement Categories."

b. Mobilization Training

Costs, including retired pay accrual, associated with the readiness training and mission support training of the Individual Ready Reserve (IRR) and Merchant Marine Training. Also included are costs associated with the allowance for annual muster duty as provided by 37 U.S.C. 433.

c. School Training

Include tours of paid active duty for training as students at regular, refresher and technical courses of service schools, area schools, unit schools, officer candidate schools, and other schools that provide training. Retired pay accrual costs are included.

d. Special Training

Include all authorized paid active duty for training, other than those covered by pay groups, mobilization, and school training. These include the staff and faculty for schools; special field, fleet and joint exercises; indoctrination training; promoting or policy boards; administrative support of training programs; and tours of not more than 45 days for failure to perform reserve training duty satisfactorily. Retired pay accrual costs are included.

e. Administration and Support

Include the costs, including retired pay accrual, of active duty military

personnel authorized to be funded in the Reserve Component personnel appropriations, death and disability gratuities for officer and enlisted Reserve Component personnel injured or killed while in a Reserve or Guard training status, [continuation pays](#), and reserve incentive and bonus programs.

f. Platoon Leaders Class (PLC)

All military personnel costs, including retired pay accrual, associated with the Marine Corps Reserve PLC.

g. Branch Officer Basic Course

Costs associated with ROTC graduates designated for Reserve Forces Duty, including retired pay accrual, to attend full-length resident Branch Officer Basic Courses of the active components.

h. Armed Forces Health Profession Scholarship and Financial Assistance Program

All the military personnel costs, including retired pay accrual, associated with the financial assistance program to obtain adequate numbers of officers for the active forces who are qualified in various health professions. Qualifications are that the candidate be a citizen of the United States, be accepted for or be enrolled in an accredited institution in a course of study designated for a health profession, and meet moral and physical qualifications for an officer. Such recipients are commissioned as a Second Lieutenant and remain in that grade for the duration of the scholarship program. Authority for the program is contained in 10 U.S.C. 2120-2128. In addition to the stipend, also provides for the annual grant authorized under 10 U.S.C. 2121 and financial assistance to nurse officer candidates under 10 U.S.C. 2130a.

i. Chaplain Candidate Program

All military personnel costs, including retired pay accrual, for the Chaplain Officer Basic Course and Chaplain Active Duty for Training Practicum to qualify officers commissioned as Chaplain Candidates for future service as chaplains in either the Active or Reserve Component.

j. Education Benefits (New G.I. Bill)

Includes funds for payment to the DoD Education Benefits Fund, a trust fund, as prescribed by 10 U.S.C. 2006. The program is governed by 10 U.S.C. Chapter 1606 and 1607 and is budgeted on an accrual basis. Also includes payments for vocational/technical training under the Reserve Compensation G.I. Bill as provided by 10 U.S.C. 2131.

k. Thrift Savings Plan (TSP) Matching Contributions

Includes costs associated with the blended retirement system, to include an automatic 1 percent of basic pay government contribution to a member's TSP account beginning 60 days following entry, and Department of Defense's matching contributions up to 4 percent from the 3rd through the 26th year of service. Authority for the program is contained in 5 U.S.C. 8432. For those member's participating in the blended retirement plan, the amount contributed shall not be more than 5 percent of the member's basic pay for such pay period.

C. Budget Subactivities

The budget subactivities are grouped to present all of the military personnel-type costs for

the particular activity. Rather than repeat the same definitions for each activity, the descriptions of the subactivities are shown below by their various titles:

1. Pay and Allowances, Active Duty for Training, Officers

For the pay and allowances of commissioned and warrant officers of the Reserve Components on active duty for training. These include:

a. Basic Pay

For basic compensation, including length of service increments, under the provision of 37 U.S.C. 201 and 203-205.

b. Retired Pay Accrual

For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. Incentive Pay for Hazardous Duty

Refer to the descriptions of the subactivities in paragraph 2.2, 1-C, as applicable, as well as involving use of ski-equipped aircraft on the ground in Antarctica or the Arctic ice-pack. Also includes incentive pay for hazardous duty for members of a Weapons of Mass Destruction Civil Support Team under the provisions of 37 U.S.C. 305b.

d. Special Pay

Refer to the descriptions of the subactivities in paragraph 2.2, 1-D as applicable. Includes selected reserve officers receiving an affiliation bonus under the provisions of 37 U.S.C. 308j and 332; also includes selected reserve health care professionals in critically short wartime specialties under provisions of 37 U.S.C. 302g.

e. Basic Allowance for Housing

For housing allowances payable to officers under the provisions of 37 U.S.C. 403.

f. Family Separation Allowances

For family separation allowances payable to officers under the provisions of 37 U.S.C. 427.

g. Basic Allowance for Subsistence

For subsistence allowances payable to officers under the provisions of 37 U.S.C. 402.

h. Separation Payments

Payments for accumulated annual leave under the provisions of 37 U.S.C. 501.

i. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

2. Pay and Allowances, Active Duty for Training, Enlisted

For the pay and allowances of enlisted personnel of the Reserve Components on active duty for training. These include:

a. Basic Pay

For basic compensation, including length of service increments, under the provision of 37 U.S.C. 203-205.

b. Retired Pay Accrual

For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. Incentive Pay for Hazardous Duty

Refer to the descriptions of the subactivities in paragraph 2.2, 2-C-1 and 2-C-2 as applicable as well as involving use of ski-equipped aircraft on the ground in Antarctica or the Arctic ice-pack. Also includes incentive pay for hazardous duty for members of a Weapons of Mass Destruction Civil Support Team under the provisions of 37 U.S.C. 305b.

d. Special Pay

Refer to the descriptions of the subactivities in paragraph 2.2, 2-D and 2-E, as applicable. Includes affiliation, enlistment, and reenlistment bonuses for selected reserve enlisted members under the provisions of 37 U.S.C. 308b, 308c, 308d, 308g, 308h, 308i, and 331.

e. Basic Allowance for Housing

For housing allowances payable to enlisted personnel under the provisions of 37 U.S.C. 403.

f. Family Separation Allowances

For family separation allowances payable to enlisted personnel under the provisions of 37 U.S.C. 427.

g. Separation Payments

For accumulated unused annual leave under the provisions of 37 U.S.C. 501.

3. Pay, Inactive Duty Training, Officersa. Basic Pay

For basic compensation, including length of service increments, under the provisions of 37 U.S.C. 201-203, 205, and 206.

b. Retired Pay Accrual

For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 or 37 U.S.C. 351. Also includes incentive pay for hazardous duty for members of a Weapons of Mass Destruction Civil Support Team under the provisions of 37 U.S.C. 305b.

d. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

4. Pay, Inactive Duty Training, Enlisteda. Basic Pay

For basic compensation, including length of service increments, under the provisions of 37 U.S.C. 203 and 206.

b. Retired Pay Accrual

For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 or 37 U.S.C. 351. Also includes incentive pay for hazardous duty for members of a Weapons of Mass Destruction Civil Support Team under the provisions of 37 U.S.C. 305b.

d. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

5. Individual Clothing and Uniform Allowances, Officers

Payments of allowances to officers for the purchase of required uniforms under the

provisions of 37 U.S.C 415-417.

6. Individual Clothing and Uniform Allowances, Enlisted

For the costs of uniform clothing authorized to be issued in kind to enlisted personnel under the provisions of 37 U.S.C. 418.

7. Subsistence of Enlisted Personnel

For the cost of subsistence issued as rations to enlisted personnel including emergency and operational rations under the provisions of 37 U.S.C. 402.

8. Travel, Active Duty Training, Officers, and Travel, Active Duty for Training, Enlisted

For expenses incident to training travel of Reserve Component officer or enlisted member, individually or as an organized unit. Travel costs include mileage; per diem; transportation by common carrier (rail, bus, air, water including Air Mobility Command and Military Sealift Command); actual and necessary expenses and costs of subsistence while in a travel status; issue of meal tickets; transportation of baggage; port handling charges; and expenses incident to movement of any military group traveling under one order from the same point of origin to the same destination.

9. Pay and Allowances of Officers, Enlisted and Permanent Change of Station Travel for Active Guard and Reserve (AGR)

These subactivities are to provide for the AGR military personnel expenses financed from the Reserve Components personnel appropriations. The descriptions of these subactivities are identical to those shown for the activities with the same titles in paragraph 2.2, above.

10. Death Gratuities, Officers, and Death Gratuities, Enlisted

For the payment of death gratuities to beneficiaries of Reserve Component personnel under the provisions of 10 U.S.C. 1475-1480.

11. Disability and Hospitalization Benefits, Officers, and Disability and Hospitalization Benefits, Enlisted

For payment of disability and hospitalization benefits for Reserve Component personnel, except for costs covered by orders to active duty for training or inactive duty training under the provisions of 37 U.S.C. 204 and 206.

12. Reserve Incentives

For Reenlistment Bonus for Selected Reserves under the provisions of 37 U.S.C. 308b; Affiliation or Enlistment in the Selected Reserves under the provisions of 37 U.S.C. 308c; Non-Prior Service Enlistment Bonus for the Individual Ready Reserve under the provisions of 37 U.S.C. 308g; Individual Ready Reserve Enlistment, Reenlistment or Extension Bonus under the provisions of 37 U.S.C. 308h; Prior Service Enlistment Bonus under the provisions of 37 U.S.C. 308i; Accession or Affiliation Bonus for New Reserve Component Officers under the provisions of 37 U.S.C. 308j; [Continuation Pay for Reserve Component personnel under the provisions of 37 U.S.C. 356](#); and any other bonus incentive listed in section 2.2, as applicable.

13. Other

Items that are not accounted for in numbers 1 through 12.

14. Health Professions Scholarship Programa. Stipend

For the allowances of commissioned officers while attending school under the Armed Forces Health Professions Scholarship Program under the provisions of 10 U.S.C. 2120-2122. This includes a monthly allowance (stipend) as authorized by 10 U.S.C. 2121 and payment of FICA tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

b. Financial Assistance Grant

For an annual grant for persons participating in specialized training under the provisions of 10 U.S.C. 2127.

c. Accession Bonus

Bonus to persons entering into an agreement under 10 U.S.C. 2122(a)(2).

d. Nurse Candidate Bonus Program

For an accession bonus paid in periodic installments and a monthly stipend for nurse officer candidates under the provisions of 10 U.S.C. 2130a.

e. Individual Clothing and Uniform Allowances, Officers

Payments of allowances for the purchase of required uniforms under the provisions of 37 U.S.C. 415-417.

f. Pay and Allowances, Active Duty for Training, Officers

For the pay and allowances of commissioned officers of the Reserve Components on active duty for training.

g. Travel, Active Duty Training, Officers

For expenses incident to travel of Reserve Component officers.

BA/BSA – Medicare-Eligible Retiree Health Fund Contribution Appropriations

1. Reserve Component Training and Support - For the Department of Defense's contribution to the Medicare-Eligible Retiree Health Care Fund for the future Medicare-Eligible health care costs for current military personnel in accordance with 10 U.S.C. Chapter 56. Defense Health Care Accrual amounts are to be paid into the fund based upon approved actuarial rate multiplied by the expected average force strength for each fiscal year. The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108-375) provided permanent, indefinite appropriations to finance the cost of accruing TRICARE benefits for uniformed service member. These costs are included in the DoD discretionary total.

OBJECT CLASSIFICATION RESERVE PERSONNEL APPROPRIATIONS

In addition to the object classifications prescribed in paragraph 2.2, above, the object classifications prescribed herein shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts:

Object Class

Disability and Hospitalization Benefits (See the various components of this pay, i.e., basic pay, BAH, BAS, etc.)	-
Education Benefits (MGIB-SR and Reserve Education Assistance Program (REAP))	12.220
Financial Assistance Grant	41.010
Inactive Duty Pay (Exclusive of Incentive and Special Pays)	11.710
Reserve Incentives (Reenlistment, Enlistment, Continuation Pays and Educational Bonuses)	12.220
Stipend (Health Professions Scholarship Program)	11.710
Subsistence Allowance (Platoon Leaders Course (PLC), etc.)	11.710
TSP Matching Contributions	12.220
Uniform, Commutations	26.010

*3.3 Program and Budget Review Submission (020303)

3.3.1. This section prescribes the justification materials required for the Reserve Components' Military Personnel appropriations to support budget estimates. Fund requirements for these appropriations will be presented using those budget and accounting classifications set forth in paragraph 3.2, above.

3.3.2. Exhibits in Support of Budget Estimates - The following justification exhibits will be prepared and submitted in support of program and budget review submission for the OSD/OMB program and budget review. These exhibits will be organized by Service military personnel account. Examples of the required exhibits are provided in paragraph 6.2 and 6.3, below. The required justification material will be organized in a single unclassified volume with the unclassified data displayed in the sequence shown below:

Table of Contents

Section 1 - Summary of Requirements by Budget Program (PB-30A)

The Summary of Requirements will include a Medicare-Eligible Retiree Health Fund Contribution Appropriation line displaying the total amounts budgeted as shown in section 6.2 of this chapter. These amounts will be supported by detailed calculations provided in the

MPR-8 Exhibit included in the separate backup justification book.

Section 2 - Introduction and Performance Measures.

1. The statement should provide the highlights of the budget submission and a general discussion of the relationship of the resources requested to the proposed military strength program. This should include a discussion of the military strength characteristics in terms of gains and losses and promotion and assignment policies. It also should address strength changes in programmatic terms such as force structure and other matters of an overall nature as considered appropriate by the Service.

2. Performance Measures and Evaluation Summary (PB-30Y) (example provided in paragraph 6.3)

Section 3 - Summary Tables (examples provided paragraphs 6.2 and 6.3, below)

1. Personnel Summaries (PB-30G, PB-30H, PB-30I, PB-30F)
2. Summary of Entitlements by Subactivity (PB-30J)
3. Analysis of Appropriation Changes and Supplemental Requirements (PB-30K)
4. Summary of Basic Pay and Retired Pay Accrual Costs (Reserve Components Only) (PB-30L)
5. Summary of Basic Allowance for Housing (BAH) Costs (Reserve Components Only) (PB-30M)
6. Summary of Travel Costs (Reserve Components Only) (PB-30N)
7. Schedule of Increases and Decreases (PB-30Q)

Section 4 - Detail of Reserve Personnel Entitlements

Justification materials will be provided in support of entitlements for each of the following applicable Reserve Component activities:

1. Training - Pay Group A
2. Training - Pay Group B
3. Training - Pay Group F
4. Training - Pay Group P
5. Mobilization Training
6. School Training
7. Special Training
8. Administration and Support
9. AGR Personnel
10. Death and Disability Gratuities
11. Reserve Incentives and Bonuses
12. Education Benefits
13. Platoon Leaders Class
14. Reserve Officer Candidates
15. Branch Officers Basic Course
16. Health Professions Scholarship
17. Chaplain Candidate Program
18. TSP Matching Contributions

Justification material for each activity will contain a purpose and scope section, a schedule of increases and decreases (PB-30P), as well as data in support of the funds requested. Generally, this data will include appropriate narrative comments relative to program/pricing as well as supporting computational data. For each subactivity/entitlement, include an

explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory change, program enhancements, solving deficiencies, etc.) and should also explain decreases programmatically. Also provide a general explanation for each type of entitlement. Data should be shown for the prior year (PY), current year (CY), and budget year (BY). School, Special, and Mobilization Training data will be grouped by similar types of training and will be fully explained and justified. At the end of each section for School, Special, and Mobilization Training provide a total that summarizes the training categories. Within the Administration and Support subactivity, subtotals are required for AGR personnel and for total incentives and bonuses. See paragraph 6.3, below for format.

Section 5 - Special Analyses (examples provided in paragraph 6.2 and 6.3, below)

1. Reimbursable Programs (PB-30R)
2. Selective Reenlistment Bonuses (PB-30V) Use this form for other applicable bonus programs.
3. Full-Time Support Personnel (PB-30W)

3.3.3. Justification material for each subactivity will contain a purpose and scope section as well as a justification of funds requested. The requirements for each entitlement under each military personnel category will be justified on a gross basis to include total obligations for both direct and reimbursable personnel. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for, i.e., statutory, program enhancements, solving deficiencies, etc. and should also explain decreases programmatically. Also provide a general explanation for each type of entitlement. The computation for each entitlement will display data for the prior year (PY), current year (CY), and budget year (BY). An example of the exhibit to meet this requirement is Exhibit PB-30X in section 6.3.

3.3.4. The following exhibits will be provided in a separate backup justification book in support of the budget estimate. Examples of these exhibits are provided in paragraph 6.3, below:

MPR-2	Basic Allowance for Housing Costs
MPR-3	Summary of Outyear Data
MPR-4	Education Benefits (Title 10 USC, Chapter 1606 and 1607)
MPR-5	Retired Pay Accrual Costs
MPR-6	Active Guard and Reserve (AGR) Costs
MPR-7	Pay Raise Data
MPR-8	Medicare-Eligible Retiree Health Fund Contributions
MPR-10	Monthly Obligation Phasing Plan
MPR-11	Summary of Recruiting and Retention Data
MPR-12	Reimbursable Program (Reimbursing Customers)
PB-16	Legislative Proposals (See Volume 2B, Chapter 19, paragraph 191205 for format)

3.4 Congressional Justification/Presentation (020304)

- 3.4.1. Justification books will be organized by Service military personnel account.

3.4.2. Justification Book and other exhibit requirements in support of the congressional submission are identical to those shown above in paragraph 3.2 and 3.3, Program and Budget Review Submission. Exhibits provided to OUSD(C), consistent with paragraph 3.3.4. will **not** be provided to Congress but will be provided under separate cover to OUSD(C) at the time of the President's budget submission.

3.4.3. M-1 Exhibit. Since FY 1998, appropriations language has required the submission of an M-1 exhibit in support of the President's budget. The Military Departments are required to submit M-1 data through the Program Resources Collection Process (PRCP) system consistent with paragraph 010501, above.

4.0 DoD MILITARY PERSONNEL RETIREMENT REQUIREMENTS (0204)

4.1 Uniform Budget and Fiscal Accounting Classifications (020401)

4.1.1. This Section prescribes the budget and fiscal accounting classifications for the Military Retirement Fund for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 U.S.C. 1461-1467.

4.1.2. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification which shall be used on a uniform basis for military retired pay throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds under this Trust Fund as required by Volume 4, of this Regulation.

4.1.3. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in paragraph 4.1.5 below. Variations in the activity and subactivity classification and titles shall not be made except that additional accounts consistent with this budget and accounting classification may be established in order to meet administrative requirements of the various elements of the Military Departments. The scope of each account is described in later in this section.

4.1.4. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same sequence as will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

4.1.5. The chart of accounts represents a summary of the accounting and reporting structure under the Military Retirement Fund arranged in the order and in the detail for which reporting in accordance with DoD 7000.14R, Financial Management Regulation, is required.

Budget Activity and Subactivity

1. Nondisability

- 1-A - Regular Officers
- 1-B - Regular Enlisted
- 1-C - Nonregular Officers
- 1-D - Nonregular Enlisted

2. Temporary Disability

- 2-A - Regular Officers
- 2-B - Regular Enlisted
- 2-C - Nonregular Officers
- 2-D - Nonregular Enlisted

3. Permanent Disability

- 3-A - Regular Officers
- 3-B - Regular Enlisted
- 3-C - Nonregular Officers
- 3-D - Nonregular Enlisted

4. Fleet Reserve

- 4-A - Regular Enlisted
- 4-B - Nonregular Enlisted

5. Survivors' Benefits

- 5-A - Old Plan, Retired Servicemen's Family Protection Plan (RSFPP)
- 5-B - New Plan, Survivor Benefits Plan (SBP)
- 5-C - Guaranteed Minimum Income
- 5-D - Dependence and Indemnity Compensation (DIC) Supplemental Payments

BA/BSA

4.1.6. Budget Activities. The budget activities are established to present the retirement benefits associated with a particular type of retirement. The following descriptions are for the chart of accounts as listed above.

4.1.6.1. Nondisability retirements, under applicable statutes, are given on the following basis:

4.1.6.1.1. Voluntarily on or after completion of the required length of service.

4.1.6.1.2. Involuntarily because of attainment of statutory age or completion of the maximum length of service authorized by law for the several grades.

4.1.6.1.3. Automatically upon completion of 30 years of combined active service and service in the Fleet Reserve.

4.1.6.2. Temporary Disability retirements, under Title IV of the Career Compensation Act of 1949 (10, U.S.C., 1201-1221), are given on the following basis:

Interim classification in cases where there is doubt as to the degree or permanence of disability. Persons on temporary disability rolls are given periodic physical examinations at least once every 18 months and may be:

4.1.6.2.1. Restored to active duty.

4.1.6.2.2. Separated from the service with severance pay.

4.1.6.2.3. Transferred to permanent disability retired list.

4.1.6.2.4. Continued on temporary list for another 18-month period.

4.1.7. Final determination is required within 5 years of initial classification and temporary disability retirement.

4.1.7.1. Permanent Disability retirements, under Title IV of the Career Compensation Act of 1949 (10, U.S.C., 1201-1221), are given when:

4.1.7.1.1. There is no doubt as to the degree or permanence of the disability at the time of initial retirement.

4.1.7.1.2. By periodic examination of temporary disability and Fleet Reserve rolls, it is determined that permanent disability exists.

4.1.7.2. Fleet Reserve status, under Title II of the Naval Reserve Act of 1938, as amended (10 U.S.C., 6330, 6331), is given when: Enlisted personnel of the Navy and Marine Corps having 20 but less than 30 years' service may be transferred to the inactive Fleet Reserve with retainer pay at rates prescribed by law. They remain in the Fleet Reserve until their status is changed by reason of:

4.1.7.2.1. Completion of 30 years' service.

4.1.7.2.2. Recall to active duty.

4.1.7.2.3. Physical unfitness for further military service.

4.1.7.2.4. Death.

4.1.7.3. Survivors' Benefits payments, under the old Retired Serviceman's Family Protection Plan, and the new Survivor Benefit Plan (SBP), are provided on the following basis:

4.1.7.3.1. Two of the benefits are contributory: the old Serviceman's Family Protection Plan and the new Survivor Benefit Plan (SBP). Under both of the contributory benefits, a member of the uniformed services may elect to receive a reduced amount of any retired pay that may be awarded him/her in order to provide one or more annuities to his/her survivors, as specified by law. The basic options include the choice of annuities to provide for (1) surviving spouse, (2) surviving children, (3) surviving family, including both spouse and children, or (4) other persons with insurable interest (under the new plan only).

4.1.7.3.2. The other two benefits are noncontributory, both the Guaranteed Minimum Income and the Dependency and Indemnity Compensation (DIC) Supplemental Payments. The Guaranteed Minimum Income has a special provision benefiting women who are now widows of deceased members of the Uniformed Services who were receiving, or were entitled to receive, retired pay. The provision that guarantees these widows annual incomes will not fall below a certain amount. The DIC Supplemental Payments provide supplemental payments to widows of retirement-eligible members who die on active duty if DIC payments (by VA) are less than the maximum payments that the widow would have received if the member had been retired. The SBP payments covering the difference between the two will be paid.

4.1.8. Budget Subactivities. The budget subactivities are established to show the

retirement benefits associated with a particular personnel classification. Subactivities for Regular Officers, Regular Enlisted, Nonregular Officers, and Nonregular Enlisted are used for Budget Activities 1, 2 and 3; Budget Activity 4 has only the two enlisted classifications; and Budget Activity 5 now has four subactivities showing survivors covered under (1) the Old Plan (RSFPP), (2) the New Plan (SBP), (3) Guaranteed Minimum Income (to current widows), and (4) DIC Supplemental Payments (to future widows).

5.0 DoD MILITARY PERSONNEL - CIVIL FUNCTIONS (0205)

5.1 Purpose (020501)

This Section prescribes the justification material required for the Military Personnel civil function trust fund accounts.

5.2 Military Retirement Fund/Education Benefits Fund/Retiree Health Care Fund (020502)

5.2.1. Appropriate exhibits and schedules will be prepared by OUSD(C) P/B, Military Personnel and Construction Directorate unless specified otherwise in the annual OUSD(C) guidance memorandum.

5.2.2. Unless otherwise specified, exhibit requirements will only include the Program and Financing Schedule and a Status of Fund for the Military Retirement Fund, the Education Benefits Fund, and the Uniformed Services Retiree Health Care Fund.

6.0 BASELINE MILITARY PERSONNEL APPROPRIATION SUBMISSION FORMATS (0206)

6.1 Purpose (020601)

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

Exhibit PB-30K Analysis of Appropriation Changes and Supplemental Requirements (Active) Continued
(Page 3 of 4)

INSTRUCTIONS FOR COMPLETION OF EXHIBIT
ANALYSIS OF APPROPRIATION CHANGES AND SUPPLEMENTAL REQUIREMENTS

FY 20CY President's Budget - Show costs as included in the original FY 20CY President's Budget request. The total of all such costs should equal the FY 20CY appropriation request.

Congressional Action - Show the delta(s) associated with final congressional action on the FY 20CY appropriations request.

Appropriation - Show the final funding level appropriated by Congress for the FYCY. This value should tie explicitly by budget activity and total to the values reported on the DD 1414 Base for Reprogramming.

Internal Realignment/Reprogramming - Include those adjustments, which are necessary to align the amounts shown in the appropriation column of this exhibit with the FY 20CY column of the FY 20BY President's Budget exclusive of other price/program changes described below.

Subtotal - Should include the appropriated amount plus or minus internal realignments/reprogrammings.

Proposed DD 1415 Actions - Amounts shown in this column would include approved reprogrammings/transfers.

FY 20CY Column of FY 20BY President's Budget - Show amounts as included in the FY 20BY President's Budget request. These amounts should be equal to the sum of the amounts shown in the preceding two columns.

NOTE: An explanation should be provided for each adjustment in excess of \$1 million included in the column showing realignments and reprogramming. Such explanation should not be included as part of this exhibit, but rather should be submitted separately to the OUSD(C) (P/B) Military Personnel and Construction Directorate, Room 3C654, Pentagon.

- A separate similar exhibit must be prepared for enlistment bonuses and other incentive/bonuses not covered by other formats (i.e., Active bonuses exceeding \$5,000 and Reserve component incentives and bonuses addressed in the Administration and Support subactivity).
Examples: Enlistment Bonus (EB), Critical Skills Retention Bonus (CSRB), Assignment Incentive Pay (AIP), Loan Repayment Program (LRP)
- This exhibit should be incorporated into the detailed justification material within the appropriate subactivity detail (i.e., Active within BA 2, Pay and Allowances of Enlisted, and Reserve Component within BA 2, Administration and Support subactivity).
- * **Additional columns must show thru FY 20BY+4 so that the outyear payment stream of bonus contracts granted in FY 20PY thru FY 20BY is shown.**

MILITARY PERSONNEL, _____
SELECTED REENLISTMENT BONUS (SRB)
(\$ in Thousands)

- NOTE:
1. Prior obligations are only anniversary payments associated with contracts entered into during preceding years.
 2. Number of bonus recipients (initial or anniversary payments) must be entered in any year funds are entered.
 3. Add additional BY columns as required for the total bonus contract period.
 4. Initial payments are not to be shown in the outyears.
 5. Accelerated payments are the remainder of entitlements due to enlisted personnel when separating early (not due to voluntary reasons or misconduct) and for advance payments related to financial hardship.

Exhibit PB-30X Subactivity Detailed Justification (Active)

	(\$ in Thousands)
Program: * (e.g., Basic Pay)	FY 20BY Estimate \$xxx,xxx
	FY 20CY Estimate \$xxx,xxx
	FY 20PY Estimate \$xxx,xxx

***A separate exhibit must be prepared for each M-1 line item reflecting subactivity detail. See sections 2.4.3 and 3.3.3 for more guidance.**

Part I – Purpose and Scope

Include a description of what the funds requested are for to include any references to legislative authorities.

Part II – Justification of Funds Required

Include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory, program enhancements, solving deficiencies, etc.).

	<u>FY 20PY</u>			<u>FY 20CY Est</u>			<u>FY 20BY Est</u>		
<u>Number</u>	<u>Rate</u>	<u>Amount</u>	<u>Number</u>	<u>Rate</u>	<u>Amount</u>	<u>Number</u>	<u>Rate</u>	<u>Amount</u>	

Program (e.g., Basic Pay)

Total

Note: Average number may represent the number of workyears or average number of personnel budgeted to receive a particular type of pay.

For the Retired Pay Accrual (RPA) exhibit, each active military personnel account must include a breakout of the RPA costs by Active Duty Component (Full-Time) soldiers and Reserve Component (Part-time) soldiers who are mobilized or on active duty for operational support.

Exhibit PB-30Y Performance Measures and Evaluation Summary

MILITARY PERSONNEL, _____
Performance Measures and Evaluation Summary

Activity: Active Military Personnel

Activity Goal: Maintain the correct Active Military Personnel to execute the National Strategy.

Description of Activity: The Active Military Personnel appropriations provide resources necessary to compensate military personnel required to man approved force structure and support infrastructure, which include pay, allowances, individual clothing, subsistence, and permanent change of station.

PERFORMANCE MEASURES:

	<u>PY Actual</u>	<u>CY Planned</u>	<u>BY Planned</u>
Average Strength	xxx,xxx	xxx,xxx	xxx,xxx
End Strength	xxx,xxx	xxx,xxx	xxx,xxx
Authorized End Strength	xxx,xxx		

Include a narrative section after each measure to provide any important information concerning the data reflected, explanations for variances from targets, and a subjective assessment of the program's performance and outlook. The narrative should also explain any differences in how the Services define these items. Include a statement referencing that this display provides the information to meet the Office of Management and Budget requirement for PART - Program Assessment Rating Tool.

Recruiting

- | | | | |
|--|--------|--------|--------|
| 1. Numeric goals | xx,xxx | xx,xxx | xx,xxx |
| Actual | xx,xxx | | |
| - Total recruiting mission is compared to actual accessions for the fiscal year. The percent of goal accomplished is the measurement. | | | |
| 2. Quality goals | | | |
| a. HSDG percent | xx% | xx% | xx% |
| Actual | xx% | | |
| b. Test Score Category I-IIIa percent | xx% | xx% | xx% |
| Actual | xx% | | |
| a. The percent Tier 1 High School Degree Graduate (HSDG) is the measure, which is a measure of educational achievement - Total number of Tier 1 HSDG non-prior service accessions + Delayed Entry Program (DEP) is compared to total number of non-prior service accessions + DEP for the fiscal year. (DoD target is 90%) | | | |

- b. The percent CAT I-III A is the measure - Total number of non-prior service accessions + DEP who scored at or above 50th percentile (CAT I-III A) is compared to total number of non-prior service accessions + DEP for the fiscal year. (DoD target is 60%. CAT I-III A - scores at or above 50 on the Armed Forces Qualification Test (measure of aptitude). CAT IV - percentages are not shown as the Services historically have no difficulty meeting the 4% limitation.)

The narrative for recruiting should explain that the numeric goals will change between budget and fiscal year completion and why Services resource to quality levels while the DoD benchmarks are lower.

Exhibit MP-17 Reimbursable Program (Reimbursing Customers)

MILITARY PERSONNEL, _____
Reimbursable Program (Reimbursing Customers)
(\$ in Thousands)

<u>Category</u>	<u>Customer</u>	<u>Mission Description</u> ^{1/}	<u>Reimbursing Account</u> ^{2/}	<u>FY 20PY</u>			<u>FY 20CY</u>			<u>FY 20BY</u>		
				<u>Number</u>	<u>Rate</u>	<u>Amt</u>	<u>Number</u>	<u>Rate</u>	<u>Amt</u>	<u>Number</u>	<u>Rate</u>	<u>Amt</u>
<u>Examples</u>												
Pay and Allowances	Army Working Capital Fund	Supply Management	WCF, Army									
Pay and Allowances	DIA	Intelligence Related	O&M, Defense-Wide									
Subsistence-in-Kind	Dept of State	MREs for Humanitarian Mission (specify)	Dept of State									

Total ^{3/}

^{1/} Mission Description must be unclassified. For intelligence related activities, the mission description should simply state "Intelligence Related".

^{2/} Only specify account if within DoD (e.g., Army Working Capital Fund), otherwise specify reimbursing organization.

^{3/} Total must match CIS controls and Justification Book amounts for reimbursable authority.

Guidance on Military Personnel Reimbursables.

A direct appropriation is provided for paying military personnel; therefore, the cost of military labor shall not be charged to another DoD entity except for:

- Military personnel assigned to the Defense Working Capital Fund activities;
- If provided in the annual DoD Appropriations Act, National Guard and Reserve members who provide intelligence or counterintelligence support to Combatant Commands, Defense Agencies and Joint Intelligence Activities, including the activities and programs included within the National Intelligence Program and the Military Intelligence Program; and
- National Guard and Reserve personnel conducting military-to-military contacts as authorized in 10 U.S.C. 168 and utilizing funds specifically appropriated for that purpose.

Military labor shall be charged to non-DoD organizations on the basis of the actual hours worked or assigned.

(Page 4 of 5)

**INSTRUCTIONS FOR COMPLETION OF EXHIBIT
ANALYSIS OF APPROPRIATION CHANGES AND SUPPLEMENTAL REQUIREMENTS**

FY 20CY President's Budget - Show costs as included in the original FY 20CY President's Budget request. The total of all such costs should equal the FY 20CY appropriation request for each line item.

Congressional Action - Show the delta(s) associated with final congressional action on the FY 20CY appropriations request.

Appropriation - Show the final funding level appropriated by Congress for the FY CY. This value should tie explicitly by budget activity and total to the values reported on the DD 1414 Base for Reprogramming.

Internal Realignment/Reprogramming - Include those adjustments, which are necessary to align the amounts shown in the appropriation column of this exhibit with the FY 20CY column of the FY 20BY President's Budget exclusive of other price/program changes described below.

Subtotal - Should include the appropriated amount plus or minus internal realignments/reprogrammings.

Proposed DD 1415 Actions - Amounts shown in this column would include approved reprogrammings/transfers.

FY 20CY Column of FY 20BY President's Budget - Show amounts as included in the FY 20BY President's Budget request. These amounts should be equal to the sum of the amounts shown in the preceding two columns.

NOTE: An explanation should be provided for each adjustment in excess of \$1 million included in the column showing realignments and reprogramming. Such explanation should not be included as part of this exhibit, but rather should be submitted separately to the OUSD(C) (P/B) Military Personnel and Construction Directorate, Room 3C654, Pentagon.

*Excludes military technicians assigned to USSOCOM who are associated with the Special Operations Forces.

Notes: Exhibit should be provided for each Reserve Component justification book. Data must be provided for prior year (PY), current year (CY), and budget year (BY). Civilian end strength should exclude military technicians.

Exhibit PB-30X Subactivity Detailed Justification (Reserve)

Program: * (e.g., Special Training)	(\$ in Thousands)	
	FY 20BY Estimate	\$xxx,xxx
	FY 20CY Estimate	\$xxx,xxx
	FY 20PY Estimate	\$xxx,xxx

*A separate exhibit must be prepared for each M-1 line item reflecting subactivity detail. See section 3.3.3 for more guidance.

Part I – Purpose and Scope

Include a description of what the funds requested are for to include any references to legislative authorities.

Part II – Justification of Funds Required

Include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory, program enhancements, solving deficiencies, etc.).

Exhibit PB-30Y Performance Measures and Evaluation Summary (Reserves)

RESERVE PERSONNEL, _____
Performance Measures and Evaluation Summary

Activity: Active Reserve/Guard Military Personnel

Activity Goal: Maintain the correct Reserve/Guard Active Military Personnel to execute the National Strategy.

Description of Activity: The Reserve/Guard Active Military Personnel appropriations provide resources necessary to compensate military personnel required to provide trained units and qualified personnel in the Armed Forces in time of war, or national emergency, and at such other times as the national security requires. The Reserve/Guard also fills the needs of the Armed Forces whenever more units and persons are needed than are in the Active component to achieve the planned mobilization.

PERFORMANCE MEASURES:

	<u>FY 20xx Actual</u>	<u>FY 20xx Planned</u>	<u>FY 20xx Planned</u>
Average Strength	xxx,xxx	xxx,xxx	xxx,xxx
End Strength	xxx,xxx	xxx,xxx	xxx,xxx
Authorized End Strength	xxx,xxx		

Include a narrative section after each measure to provide any important information concerning the data reflected, explanations for variances from targets, and a subjective assessment of the program's performance and outlook. The narrative should also explain any differences in how the Services define these items. Include a statement referencing that this display provides the information to meet the Office of Management and Budget requirement for PART - Program Assessment Rating Tool.

Special Training	FEMA	Disaster Support	FEMA									
Special Training	DIA	Intelligence Related	O&M, Defense-Wide									
Total ^{3/}												

^{1/} Mission Description must be unclassified. For intelligence related activities, the mission description should simply state "Intelligence Related".

^{2/} Only specify account if within DoD, otherwise specify reimbursing organization.

^{3/} Total must match CIS controls and Justification Book amounts for reimbursable authority.

Guidance on Military Personnel Reimbursables.

A direct appropriation is provided for paying military personnel; therefore, the cost of military labor shall not be charged to another DoD entity except for:

- Military personnel assigned to the Defense Working Capital Fund activities;
- If provided in the annual DoD Appropriations Act, National Guard and Reserve members who provide intelligence or counterintelligence support to Combatant Commands, Defense Agencies and Joint Intelligence Activities, including the activities and programs included within the National Intelligence Program and the Military Intelligence Program; and
- National Guard and Reserve personnel conducting military-to-military contacts as authorized in 10 U.S.C. 168 and utilizing funds specifically appropriated for that purpose.

Military labor shall be charged to non-DoD organizations on the basis of the actual hours worked or assigned.

***7.0 OVERSEAS CONTINGENCY OPERATIONS (OCO) MILITARY PERSONNEL
APPROPRIATION SUBMISSION FORMATS (0207)**

7.1 Purpose (020701)

7.1.1. The formats provided on the following pages reflect required exhibits for the Overseas Contingency Operations (OCO) justification book. Unless modified in a submission budget call, these formats should be adhered to. Justification material for the OCO Request is to be submitted under separate cover.

7.1.2. In addition to deployed strength, estimates should include required levels of Reserve Component personnel who are called to active duty in support of approved contingency operations, but not deployed OCONUS. This includes not only those preparing for deployment (e.g., training) but personnel in a leave status upon return.

7.1.3. Operational changes driving force level changes from the current year budgeted OCO level to the budget year OCO estimate must be fully explained and consistent with the approved troop strength planning assumptions (provided in separate guidance).

7.1.4. Each Service is required to provide a single justification book, with sections for the Active, Reserve, and National Guard appropriations. The M-1 exhibits and overview explanations must include all Components (i.e., Active, Reserve, and National Guard).

7.1.5. Microsoft Excel tables reflecting all of the tables in the submission must be provided for OSD analysts review. The justification books must include the following:

7.1.5.1. Table of Contents

7.1.5.2. Overview

7.1.5.3. M-1 Detail

7.1.5.4. Detailed exhibits by the following major categories in the order of the M-1 line items.

7.1.5.4.1. Reserve and Guard Mobilization

7.1.5.4.2. Active Deployment Costs

7.1.5.4.3. Overstrength Costs

7.1.5.4.4. Subsistence-in-Kind

7.1.5.4.5. Permanent Change of Station (PCS)

7.1.5.4.6. Casualty and Disability Benefits

7.1.5.4.7. Additional Mobilization/Deployment Costs

7.1.5.4.8. Pre and Post Mobilization Training

7.1.5.5. The justification material for the OCO estimate must be presented at the M-1 line item level and further broken down by major category such as mobilization, active deployment, and overstrength. Generally, the exhibits will mirror the regular justification book submission for the Active Components. One exception is that by-grade-level detail will not be required.

7.1.5.6. Costs for mobilization, Active deployment, and overstrength must be separately identified on each exhibit as applicable (e.g., basic pay, retired pay accrual, basic allowance for housing, etc.). All Active special pays will be categorized as active deployment costs in the summary tables.

7.1.5.7. For the Reserve Components, the level of detail is also at the M-1 level. For all budget line items, Part II, Justification of Funds Required, must describe specific details of the OCO requirements and should not be general in nature.

7.1.5.8. Each OCO exhibit will reflect prior year, current year, and budget year. The prior year amount should match projected obligations that will be reported on the Cost of War report for the Program/Budget submission (BES) and actual obligations on the Cost of War report for the President's Budget submission. The current year column will reflect total projected obligations in support of approved contingency operations. The budget year column will reflect the total requested amount for approved contingency operations. The budget year request must display total requirements for approved contingency operations consistent with the Program Resources Collection Process (PRCP) system.

7.2 Exhibits in support of Military Personnel OCO Request. (020702)

The following exhibit formats are provided for the combined Active Military Personnel and Reserve Component Personnel Appropriations justification book.

FY 20BY Request Summary

The FY BY military personnel request of \$x,xxx million is comprised of the following major costs:

Reserve & Guard Mobilization (\$x,xxx million)

Provide explanation of why this request is necessary.

AC Deployment Costs (\$x,xxx million)

Provide explanation of why this request is necessary.

Other Mobilization and Deployment Costs (\$x,xxx million)

Provide explanation of why this request is necessary.

Active Component Overstrength (\$x,xxx million)

Provide explanation of why this request is necessary.

Subsistence-in-Kind (SIK) (\$x,xxx million)

Provide explanation of why this request is necessary.

Permanent Change of Station (\$x,xxx million)

Provide explanation of why this request is necessary.

Casualty and Disability(\$x,xxx million)

Provide explanation of why this request is necessary.

Pre and Post Mobilization Training(\$x,xxx million)

Provide explanation of why this request is necessary.

CHAPTER 3**OPERATION AND MAINTENANCE APPROPRIATIONS****1.0 GENERAL (0301)****1.1 Purpose (030101)**

1.1.1. This Chapter covers the budget formulation and congressional justification requirements for operation and maintenance appropriations for the baseline and overseas contingency operations (OCO) requirements. Volume 12 chapter 23 **section 2309** provides the guidelines for determining war/overseas contingency operations costs

1.1.2. The following appropriations and accounts are covered:

Paragraph 2.1

Operation and Maintenance, Army
Operation and Maintenance, Army Reserve
Operation and Maintenance, Army National Guard
Operation and Maintenance, Navy
Operation and Maintenance, Navy Reserve
Operation and Maintenance, Marine Corps
Operation and Maintenance, Marine Corps Reserve
Operation and Maintenance, Air Force
Operation and Maintenance, Air Force Reserve
Operation and Maintenance, Air National Guard
Operation and Maintenance, Defense-Wide
Office of the Inspector General
Defense Health Program
Former Soviet Union Threat Reduction
Overseas Contingency Operations Transfer Fund
Overseas Humanitarian, Disaster Assistance, and Civic Aid
Support of International Sporting Competition, Defense

Paragraph 2.2

United States Court of Military Appeals for the Armed Forces

1.2 Submission Requirements (030102)

1.2.1. General guidance with regard to submission requirements is presented in Chapter 1. Chapter 3 covers specific back-up material requirements for the above accounts. The Components should also consult all of the other chapters for exhibit requirements for the above appropriations/accounts that are not specifically addressed in this chapter including Chapter 19-Other Special Analyses. (See Volume 2A, Chapter 1, and Volume 2B, Chapter 19)

1.2.2. For designated exhibits, the Department will collect both POM and budget data through the SNaP (Select & Native Programming Data Input System) process. In addition, the Military Departments and applicable Defense Agencies shall develop and submit to the Comptroller separate narrative justification material (including any program increases and decreases) for their respective programs as part of their Program and Budget Review Submission.

1.3 Preparation of Material (030103)

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapters 8 (Facilities Sustainment and Restoration/Modernization), 12 (Defense Health Program), and 19 provide additional specific guidance with regard to the back-up material required in this section of the manual. (See Volume 2A, Chapter 1 and Volume 2B, Chapters 8, 12 and 19)

1.4 References (030104)

Paragraph 010212 provides policies and definitions concerning costs that are to be financed by the O&M appropriations as opposed to other appropriations in the Research, Development, Test and Evaluation (RDT&E) area. Paragraph 010201 provides policies and definitions regarding the application of expense and investment criteria for budgetary purposes.

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION (0302)

2.1 Operations Accounts (030201)

2.1.1. Purpose. This Section prescribes justification materials required to support the budget estimates for the following operations accounts:

- Operation and Maintenance, Army; Army Reserve; and Army National Guard
- Operation and Maintenance, Navy and Navy Reserve
- Operation and Maintenance, Marine Corps and Marine Corps Reserve
- Operation and Maintenance, Air Force; Air Force Reserve; and Air National Guard
- Operation and Maintenance, Defense-Wide
- Office of the Inspector General
- Defense Health Program
- Former Soviet Union Threat Reduction
- Support for International Sporting Competitions, Defense
- U.S. Court of Appeals for the Armed Forces
- Overseas Contingency Operations Transfer Fund
- Overseas Humanitarian, Disaster Assistance, and Civic Aid

2.1.2. Submission Requirements. All Operation and Maintenance appropriations are required to submit the back-up exhibits listed in the following table, if appropriate. An exception is that the OP 50 and OP 78 exhibits will be submitted on an as needed basis. Examples of these exhibits, along with instructions for their preparation, are provided in Section 4.0. The Components should also consult all of the other chapters for exhibit requirements which are not specifically addressed in this chapter including Chapter 19 - Other Special Analyses. (See section 4.0, below and Chapter 19)

OPERATIONS ACCOUNTS EXHIBITS

<u>Exhibit Number</u>	<u>Exhibit Title</u>	<u>Components Required to Submit</u>
*O-1	O&M Funding by Budget Activity/Activity Group/Subactivity Group	All including DW, baseline and OCO
OP-5	Detail by Subactivity Group	All
OP-5	Attachment 1 Flying Hours	All
OP-5	Attachment 2 Ship Operations	All
OP-5	Attachment 3 Land Forces	All

* December 2010

- * In instances where a specific component is designated as required to submit, this includes the Reserve Components of that Service. (e.g. The OP-80 should be submitted by Active Air Force, Air Force Reserve and Air National Guard.)
- ** Also required to be submitted by applicable RDT&E, Military Construction, Family Housing, Defense Working Capital Fund, etc., accounts.
- *** Refer to Volume 2B, Chapter 15.
- ****COCOM should only submit if unable to provide OP-5.

Note: Additional budget exhibit requirements can be found in other chapters to include Chapters 8 and 19. (See Volume 2B, Chapters 8 and 19)

2.1.3. Preparation of Material. The following instructions pertain to the back-up material required by this Section.

2.1.3.1. The information will cover the prior year (PY), current year (CY), and budget year (BY), unless otherwise indicated.

2.1.3.2. Operation and Maintenance data will be submitted in terms of obligations.

2.1.3.3. Additional data may be provided by expanding the prescribed formats and exhibits, or by cross-referencing to additional exhibits, where prescribed material is considered inadequate to justify requested programs or estimates. No prescribed material may be omitted unless inapplicable or unless the omission is specifically approved by the OUSD (Comptroller) P/B. The inapplicable stubs and column headings may be omitted but will not be redesignated when completing standard exhibits.

2.1.3.4. The purpose of the back-up exhibits is to describe the program and justify the estimates. If the data collection systems or management systems utilized provide for cost accounts or program units or workload indicators different from those specified in this section, Components should request OUSD (Comptroller) P/B to change the provisions of this regulation.

2.1.3.5. The use of annex exhibits to reduce bulk is encouraged providing the required material is fully covered and presented in a logical manner. Machine printouts of required data will be accepted but should be designed to minimize bulk. Narrative data related to machine printouts should be assembled with the most appropriate page of the printout in a consistent manner.

2.1.4. OMB Circular No. A-11

The Components must submit any additional exhibits required by OMB Circular No. A-11. Consult OMB Circular No. A-11 for instructions pertaining to the completion of the required exhibits.

2.1.5. Facilities Sustainment and Restoration/Modernization (FSRM) and Demolition

Each Component must ensure that the OP-5, Attachment 4 (Facilities Sustainment and Restoration/Modernization (SRM), and Demolition) and PBA-7 FSRM and Demolition in section 4.2 of this chapter are submitted to the Military Personnel and Construction Directorate (Room 3C654) on the same date as all other submissions required under this chapter. (See Volume 2B, Chapter 8) Each Defense Agency is required to complete these exhibits. Data used to

develop estimates should be consistent with data identified in the automated OP-32 for the Facilities Sustainment, Restoration & Modernization subactivity and data contained in the Facilities Data Quality Assurance.

2.1.6. Copies of back-up material in support of budget estimates will be submitted as identified in Section 3.2. Two additional copies of the OP-5 exhibits for Security Programs will be delivered to Director for Military Personnel and Construction, OUSD (COMPTROLLER) P/B, Room 3C654, Pentagon, on the same date as all other submissions required under this Chapter.

2.1.7. Automated Submissions

2.1.7.1. Automated submissions are required for the following exhibits for both the OSD/OMB Budget Estimate Submission and the President's budget request:

Group/Subactivity Group (PRCP)	O-1	O&M	Funding by	Budget	Activity/Activity
	OP-8	Civilian Personnel Costs (PRCP)			
	OP-20	Flying Hours Program (SNaP)			
	OP-30	Depot Maintenance Program (SNaP)			
	OP-32	Price and Program Growth by Subactivity Group (PRCP)			
	OP-41	Ship Operating Cost Data (SNaP)			
	PB-20	Aircraft Inventory (Excel Spreadsheet)			

Additional guidance on the automated submission requirements is provided in Chapter 1, sections 010502 and 0109 and in this chapter, section 4.0.

2.1.7.2. In addition to the appropriations and accounts listed in paragraph 2.1, an OP-32, Price and Program Growth Exhibit for BOTH the OSD/OMB submission and the President's budget request will be submitted for the following appropriations and accounts with the Program Managers annotated in parentheses:

	Environmental Restoration, Army (Department of Army)
	Environmental Restoration, Navy (Department of Navy)
	Environmental Restoration, Air Force (Department of Air Force)
	Environmental Restoration, Defense-Wide (ODASD(ES),
OUSD(AT&L)	
(Department of Army)	Environmental Restoration, Formerly Used Defense Sites
(OUSD(C)/PB/O&P)	Defense Against Weapons of Mass Destruction
	Emergency Response Fund, Defense (OUSD(C)/PB/O&P)
	OPPLAN 34 A-35 P.O.W. (OUSD(C)/PB/O&P)
	Special Olympics World Games (Department of Army)
	Quality-of-Life Enhancements, Defense (OUSD(C)/PB/MILCON)
	Drug Interdiction/Counterdrug Activities, Defense
	Payment to Kaho'Olawe (Department of Navy)
Service)	Pentagon Renovation Transfer Fund (Washington Headquarters

2.1.7.3. The electronic submission will be the official submission of these exhibits. Hard copies of the exhibits should be generated from the PRCP or SNaP electronic database.

2.2 U.S. Court of Military Appeals for the Armed Forces (030202)

2.2.1. Purpose. This Chapter prescribes budget justification backup requirements for the appropriation “United States Court of Appeals for the Armed Forces.”

2.2.2. Submission Requirements

2.2.2.1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following: (See Volume 2A, Chapter 1)

Appropriation Language. Submit justification for proposed changes.

Purpose and Scope. Describe the missions and functions of the Court of Military Appeals.

Summary of Obligations by Object Classification.

Summary of Personnel by Grades. Show the number of civilian positions in each grade, the number of statutory positions, total permanent positions, lapse, and workyears.

Summary of Price and Program Changes.

Explanation of Estimate. Explain changes in costs and provide a statement of case workload and opinions rendered.

Also include applicable exhibits required by Section 2.1 and any of the other chapters of this regulation including Chapter 19 – Other Special Analyses. (See Volume 2B, Chapter 19)

2.2.2.2. Chapter 1 identifies copies of the above material required.

2.3 Civil Functions-Operation and Maintenance (030203)

2.3.1. Purpose. This Chapter prescribes budget justification backup requirements for the civil functions appropriations.

2.3.2. Cemeterial Expenses (Department of the Army).

2.3.2.1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following. All data will be provided for the past (PY), current (CY), and budget year (BY) fiscal years. (See Volume 2A, Chapter 1)

2.3.2.1.1. Appropriation Language. Submit justification for proposed changes.

2.3.2.1.2. Multiyear Financial Plans. Show budget authority and outlays by budget project and in total for the past (PY), current (CY), and budget year (BY) fiscal years and for 4 subsequent fiscal years. Also show planned end-of-year employment (permanent positions and other positions) by budget project and in total for the same years.

2.3.2.1.3. Analysis of Budget Authority (BA) and Outlays. Show BA and outlays by budget project and in total. Also show the difference between the budget year (BY) and the current year (CY) and the outlays in the budget year (BY) resulting from BA in the budget year (BY).

2.3.2.1.4. Program and Performance. Describe the major workload considerations and activity factors on which the estimates for each budget project have been based.

2.3.2.1.5. Summary of Obligations by Object Classification.

2.3.2.1.6. Statement Relating Past Year (PY), Current Year (CY), Budget Year (BY) Programs. List the increases and decreases necessary to reconcile the obligations incurred in each year with an analysis by budget project showing the obligations for each year and the related increases and decreases between each year.

2.3.2.1.7. Project 0861 - Operation and Maintenance. Provide narrative justification and amounts for each project classification within the project. Separately identify yearend employment (end strength) and workyears for supervisory, interment and maintenance categories.

2.3.2.1.8. Project 0864 - Administration. Provide narrative justification and amounts for each object classification within the project. Separately identify yearend employment (end strength) and workyears for National Cemetery activities, headstone activities, and administrative services and staff planning.

2.3.2.1.9. Project 0865 - Special Construction, Arlington National Cemetery.

2.3.2.1.9.1. Provide amounts by each object classification within the project. Separately identify yearend employment (end strength) and workyears.

2.3.2.1.9.2. List and provide a narrative justification and amount for each planned construction or development project.

2.3.2.1.10. Report of Motor Vehicle Data. Provide the following summary:

2.3.2.1.10.1. Fleet as of October 1.

2.3.2.1.10.2. Acquisitions:

2.3.2.1.10.2.1. New orders placed

2.3.2.1.10.2.2. By forfeiture

2.3.2.1.10.2.3. By transfer

2.3.2.1.10.3. Number disposed of (deduct):

2.3.2.1.10.3.1. Disposals accomplished (carryover)

2.3.2.1.10.3.2. Disposals accomplished (newly scheduled)

2.3.2.1.10.4. Vehicles replaced (newly scheduled).

2.3.2.1.10.5. Active fleet, September 30 (a + b + c).

2.3.2.1.10.6. Vehicles unused on a term basis (add).

2.3.2.1.10.7. Total vehicles available full-time (e + f).

2.3.2.1.10.8. Obligations for vehicles ordered.

Personnel Justification. Submit Exhibit OP-8 and OP-9 which are described in Section 2.1 and an example of which is found in Section 4.0. (See section 2.1, above and section 4.0, below)

2.3.2.2. Chapter 1 identifies copies required of the above material.

2.3.3. Wildlife Conservation, Etc., Military Reservations; Forestry Program (Department of Army).

2.3.3.1. In addition to the Program and Financing Schedule and Personnel Summary, submit an Exhibit OP-5 prescribed in Section 2.1 and an example of which is provided in Section 4.0. (See section 2.1, above and section 4.0, below)

2.3.3.2. Chapter 1 identifies copies required of the above material.

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (0303)

3.1 Purpose (030301)

This Section presents the justification book organization and the exhibit requirements for submission to Congress. Examples of budget exhibits can be found in Section 4.0.

3.2 Submission Requirements (030302)

For designated exhibits, the Military Departments and applicable Defense Agencies will update the SNaP immediately upon completion of the Program Budget Decisions and budget lock by the Department. In addition, the Military Departments and applicable Defense Agencies shall provide the USD(Comptroller) with a revised narrative justification for their respective programs reflecting any changes from the program and budget review. The SNaP system will reformat the data into congressional justification exhibits, which can be printed out by the respective Components and included in their justification materials.

All O&M overview exhibits are to be submitted via email to OPSMAIL@osd.mil in a MICROSOFT WORD format. Submit each Overview exhibit as a separate file. Embedded Excel Spreadsheets should be used for tables included in the Word document as required.

*3.3 Organization of Justification Books (030303)

3.3.1. Justification Books will be organized into separate books for each appropriation. The only exceptions to organizing justification books into separate books for each appropriation are for the United States Court of Military Appeals for the Armed Forces and the Office of the Inspector General appropriations. These should be included in the same book as the Defense-Wide. The Defense Health Program (DHP) will be a separate justification book. The procurement and RDT&E DHP budget activities will follow the organization prescribed for the procurement and RDT&E appropriations in Chapters 4 and 5, respectively. (See Volume 2B, Chapters 4 and 5)

3.3.2. Justification books for the Active Component of each Military Service should be organized into three volumes (in separate books) as follows:

3.3.2.1. Volume I - "Justification of Estimates"

3.3.2.2. Volume II - "Data Book"

3.3.2.3. Volume III – "Overseas Contingency Operations Request" for Operations Enduring Freedom and Operations New Dawn

3.3.2.4. Reserve and National Guard Components should combine the above volumes into one book for each Component.

3.3.3. The justification books for the Operation and Maintenance, Defense-Wide appropriation will include a Volume III classified volume in addition to the volumes for "Justification of Estimates" and "Data Book".

3.3.4. Volume I - Justification of O&M Estimates. The Operation and Maintenance (O&M) Justification Books will be submitted on an operations basis to include active military force personnel strength, Reserve and National Guard personnel strength, and civilian personnel. (Related dollars financed from the active and Reserve military personnel appropriations, however, should not be included.) The content and arrangement of exhibits for the operations accounts are indicated at the end of this section. Applicable exhibits for the Reserve and Guard Component operations accounts will be consistent with the active operations accounts. Exhibit formats are provided in Section 4.0. Separate volumes for active and reserve component operation appropriations will be submitted. Funds for the National Intelligence Program (NIP) or Military Intelligence Program (MIP) will be specifically identified. Justification classification will not exceed that required for other operations funds. (See section 4.0, below)

3.3.5. Volume II - Data Book. The Data Book will include summary and special interest exhibits as well as the Facilities Sustainment and Restoration/Modernization (FSRM), and Demolition exhibits. The content and arrangement of exhibits for the operations accounts are included at the end of this section.

Two copies of the FSRM OP-5 and FSRM PBA-7 exhibits will be submitted to the Directorate for Military Personnel and Construction, OUSD (COMPTROLLER), P/B, Pentagon, Room 3C654 for review and approval.

3.3.6. Volume III – Overseas Contingency Operation (OCO). The OCO request will include the O-1 Line Item Summary, the OP-32 Price and Program Growth by Appropriation summary, the OCO OP-5, performance criteria, and the OP-32 Price and Program Growth by Subactivity Group for the operations defined in Volume 12 Chapter 23 [Section 2309](#) or in the budget guidance.

3.3.7. Additional Accompanying Exhibits. Although not to be included in any of the Justification Books submitted to Congress, the exhibits at the end of this section are required to be submitted to the OUSD (Comptroller) P/B Directorate for Operations, Pentagon, Room 3C749, simultaneously with the submission of the other budget justification material. THESE EXHIBITS ARE NOT TO BE INCLUDED IN JUSTIFICATION BOOKS SUBMITTED TO THE CONGRESS. Examples are provided in Section 4.0 (O&M), Chapter 13 (Defense Environmental Restoration Program), or Chapter 19 (Other Special Analyses). (See Volume 2B, Chapters 13 and 19) (See section 4.0, below)

3.3.8. O&M Overview. The Operation and Maintenance Overview exhibits (PBA-xx) are required for submission to the OUSD (Comptroller) P/B Directorate for Operations, Pentagon, Room 3C749, and the OUSD (Comptroller) P/B Military Personnel and Construction Directorate, Pentagon, Room 3C654. Specific suspense dates will be furnished in the annual budget justification call memorandum supporting the President's budget request. The parent service is responsible for ensuring that ALL required data including Reserve Component appropriations are submitted.

3.3.8.1. Exhibit formats are provided in Section 4.0. Each exhibit must provide narrative data to explain price and program changes between all fiscal years displayed. In addition, Components are responsible for cross checking data among the exhibits to ensure data provided is consistent among all PBA exhibits and all other exhibits supporting the President's budget request, including the backup exhibits. (See section 4.0, below)

3.3.8.2. Two copies of each exhibit are required and will identify the Component, exhibit number and title, date prepared, and name/telephone number of the responsible point of contact for the exhibit. The exhibits will be consolidated at the Operation & Maintenance title level for printing and submission to the Congress. The Defense Agencies should provide as a minimum the PBA-7, PBA-19 and the PBA-20 exhibits and address resource requirements in one or more of the major mission categories as appropriate.

ORGANIZATION/EXHIBIT REQUIREMENTS

(Exhibits should be ordered as shown below)

VOLUME I - JUSTIFICATION OF O&M ESTIMATES

Table of Contents

Introductory Statement (use the PBA 19 exhibit - Appropriation Highlights)

O-1*	O&M Funding by Budget Activity/Activity Group/Subactivity Group
OP-32*	Appropriation Summary of Price/Program Growth
PB-31R	Personnel Summary
PB-31D	Summary of Funding Increases and Decreases
OP-5	Operation and Maintenance Detail by Subactivity Group (Exhibit formats are provided in Section 4.0)
PB-58	Combatant Command Direct Funding (Only submit if unable to provide OP-5).

VOLUME II - DATA BOOK

Table of Contents

PB-31Q**	Manpower Changes in FTEs	
PB-55	International Military Headquarters	(CH. 19)
PB-24	Professional Military Education	(CH. 19)
PB-15	Advisory and Assistance Services	(CH. 19)
OP-34	Appropriated Fund Support for MWR Activities (SNaP Budget Years only)	
OP-30*	Depot Maintenance Program (SNaP Summary exhibit only)	
Env-30A-C	Defense Environmental Restoration Program	(CH. 13)
PB-28/28A	Summary of Budgeted Environmental Projects	(CH. 19)
OP-31	Spares and Repair Parts	
PB-34A	Revenue from Leasing Out DoD Assets	(CH. 8)
PB-34B	Proceeds from Transfer or Disposal of DoD Real Property	(CH. 8)

* Automated submission is also required.

** Input from Reserve and Guard organizations are to be consolidated by the parent Component (i.e., Army, Navy, Air Force) for submission to OSD. Guard and Reserve organizations should not include these exhibits in their submission.

*VOLUME III – OVERSEAS CONTINGENCY OPERATIONS REQUEST

Table of Contents

O-1*	O&M Funding by Budget Activity/Activity Group/Subactivity Group
OP-32*	Price and Program Growth by Appropriation
OP-5	O&M Detail by Overseas Operation, Subactivity Group and Cost Breakdown Structure
OP-32	Price and Program Growth by Subactivity Group

ADDITIONAL ACCOMPANYING EXHIBITS *

(Submission is required in both hard copy and electronic formats)

OP-8**	Civilian Personnel Costs (All Appropriations/Funds)	
OP-9	Analysis of Changes in FTE Costs (All Appropriations/Funds)	
OP-14	Individual Training Data (Parts A – F, Attachments 1 & 2)	
OP-15,A,B	Department of Defense Overseas Dependents' Schools	
OP-16	Department of Defense Section 6 Schools	
OP-20**	Analysis of Flying Hour Program	
OP-24	Emergency and Extraordinary Expense Limitation	
OP-25	Ground Vehicle Operations	
OP-26	POL Consumption and Costs (All Appropriations/Funds)	
OP-30S**	Ship Depot Maintenance Program	
OP-34	Appropriated Fund Support for Morale, Welfare, and Recreation Activities	
OP-40	Ship Fuel Data	
OP-41**	Ship Operating Data	
OP-50	Operation and Maintenance, Air Force – Units by Program Element	
OP-53, 53A	Overseas Cost Report	(CH. 15)
OP-58	Operation and Maintenance, Air Force – Units by Program Element	
OP-73	Repair Parts – Army Reserve	
OP-78	Force Structure Data	
OP-80	Aircraft Repair/Modification & Engine Overhaul	
OP-81	O&M Monthly Obligation Phasing Plan	
PB-14	Functional Transfers	(CH. 19)
PB-16	Legislative Proposals	(CH. 19)
PB-18	Foreign Currency Exchange Data	(CH. 19)
PB-20**	Aircraft Inventory	
PB-23	Acquisition and Technology Work Force	(CH. 19)
PB-25	Host Nation Support	(CH. 19)
PB-28b	Operational Range Sustainment and Environmental Management	(CH. 19)
PB-50	Child Development, School-Age Care (SAC), Family Centers, and Family Advocacy Programs	(CH. 19)
PB-53	Budgeted Military and Civilian Pay Raise	(CH. 19)
PB-54	Civilian Personnel Hiring Plan	(CH. 19)

* To be submitted separately to OUSD (COMPTROLLER) P/B, Operations Directorate (Pentagon, Room 3C749)

** Automated submission is also required.

O&M OVERVIEW

<u>PBA #</u>	<u>TITLE</u>
PBA-2	Air Operations
PBA-3	Ship Operations
PBA-4	Land Forces
PBA-5	Depot Maintenance Program
PBA-7	Facilities Sustainment and Restoration/Modernization (FSRM), and Demolition Programs (Chapter 8)
PBA-8	Training and Education
PBA-9	Defense Health Program
PBA-10	Base Support
PBA-11	Reserve Forces
PBA-12	Command, Control, and Communications
PBA-13	Transportation
PBA-17	Recruiting, Advertising, and Examining
PBA-19*	Appropriation Highlights
PBA-20A	Manpower Data (Civilian)
PBA-22	Mobilization
PBA-26	Special Operations Forces (USSOCOM only)
*PBA-27	Psychological Operations
*PBA-28	Body Armor and Other Protective Gear

* Every Component (Active, Guard, Reserve and Defense Agency) is required to submit.

** All O&M overview exhibits are to be submitted via email to OPSMail@osd.mil in a MICROSOFT WORD format. Embedded Excel Spreadsheets should be used for tables included in the Word document as required. Submit each Overview exhibit as a separate file.

4.0 OPERATION AND MAINTENANCE APPROPRIATION SUBMISSION FORMATS (0304)

4.1 Purpose (030401)

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in submission budget call memoranda, these formats should be utilized.

4.2 Exhibits in Support of Section 2.0 - Program and Budget Review Submission (030402)

Total Operation and Maintenance, _____

Provide Budget Activity, Activity Group, and
 Subactivity subtotals funding levels.

All O&M Components including Defense Agencies must submit an automated O-1 for both the OSD/OMB and congressional submissions through the Program Resources Collection Process (PRCP). Components will submit data that shows the prior year (PY) through budget year +4 (BY+4). Automated submission requirements for the PCRP are provided in Chapter 1, section 5.2.

Exhibit O-1 O&M Funding by Budget Activity/Activity Group/Subactivity Group
 (Page 1 of 2)

Exhibit OP-5 Instructions

INSTRUCTIONS FOR PREPARATION OF OP-5

1. Agencies/Activities are required to submit this exhibit at the lowest level of their budget structure. The purpose of the OP-5 is to provide a summary of and justification for changes in the level of resources required for each SAG.
2. The Combat Support Agent will submit an OP-5 for the new SAGs created by the Military Service, in accordance with the Joint Task Assignment Process business rules, for its Combatant Commands. Each Combat Support Agent will create two new SAGs, one SAG for Combatant Command Headquarters Functions and one for Combatant Command Missions. These SAGS will include only Combatant Command justification data and will include all Combatant Commands under the purview of the Combat Support Agent. Do not create separate SAGs for each Combatant Command. Price and Program changes will be reported separately by COCOM.
3. Each of the O&M appropriations listed below, will be supported by OP-5 Exhibits.
 - Operation & Maintenance, Army, Army Reserve, and Army National Guard
 - Operation & Maintenance, Navy and Navy Reserve
 - Operation & Maintenance, Marine Corps and Marine Corps Reserve
 - Operation & Maintenance, Air Force, Air Force Reserve, and Air National Guard
 - Operation & Maintenance, Defense-Wide
 - Defense Health Program
 - Former Soviet Union Threat Reduction
 - Office of the Inspector General
 - United States Court of Military Appeals for the Armed Forces
 - Wildlife Conservation, Etc., Military Reservations
 - Overseas Humanitarian, Disaster, and Civic Aid
 - Support of International Sporting Competition, Defense
4. The OP-5 provides essential information for justification of the OSD and President's budget estimates. The "Reconciliation of Increases and Decreases" portions of Section III should identify what changes are occurring and provide programmatic reason for the changes and explain why they are necessary.
5. The FY PY estimate column of the OSD submit should reflect actual data through the first three quarters plus a realistic projection for the remaining quarter. For the PB submit, the FY PY column will reflect actuals and agree with the data reflected in the certified DD Comp 1002 report for September.
6. The "Reconciliation of Increases and Decreases" section will be included in the OP-5 for both the OSD budget submission and the President's budget submission. Reconciliations will show all changes from fiscal year to fiscal year and, for the current year, a track from the estimate requested in the previous President's budget. Specifically display:
 - The FY BY estimate included in the previous President's budget submission to the current FY CY estimate included in this submission,
 - The current FY CY estimate to FY BY estimate reflected in this submission.

INSTRUCTIONS FOR PREPARATION OF OP-5

7. Performance criteria must be provided for each OP-5 at the subactivity level and should support the dollar amounts being requested in the subactivity. Performance criteria for some subactivity groups are specified in the attachments to the OP-5 but additional criteria and metrics are encouraged. These data and metrics are critical to the successful defense of the budget request.
8. Personnel summaries are required for each subactivity group and for each Defense Agency.
9. With the exception of selected Defense Agencies, all Components will submit unclassified O&M justification materials.

Program Changes		n/a				
Current Estimate						

Reconciliation Summary Instructions: For the changes in the Current Fiscal Year (FY CY), provide information from the President's budget request for that fiscal year to the current estimate in this submission for that same fiscal year. For the changes from the FY CY to the FY BY, use the current estimate in this submission.

* The O&M budget is generally stratified into three levels: Level 1, Budget Activity (BA); Level 2, Budget Activity Group (BAG); and Level 3, Subactivity Group (SAG) (also referred to as O-1 line items). The O&M budget structure for some Defense Agencies/Activities stops at the BA or BAG level. The Defense Agencies/Activities are required to submit this exhibit at the lowest level of their budget structure.

Activity Group _____

Detail by Subactivity Group _____

C. Reconciliation of Increases And Decreases: Provide a trail of changes from the previous President's budget request for the current fiscal year in this submission to the appropriated amount for the current FY CY in this submission to the current estimate for FY CY in this submission; and from the FY CY current estimate to the FY BY estimate. Provide a single entry in each year for price changes. Itemize and justify the major program changes in each year (**provide the baseline in dollars to which the increase or decrease applies**). Such justification should clearly explain programmatic changes in resource levels including why increases are required or decreases occur. Additionally, the narrative justification should relate cost to force structure changes, performance criteria, workload and manpower data, as well as identify the impact if requested changes are not funded. The DoD Components should report in thousands.

In the reconciliation of changes from the previous President's budget request for the FY CY to the estimate for FY CY in the current submission, the DoD Components should include the following adjustments:

- Distributed Congressional Adjustments: Adjustments that Congress specifically makes to the President's budget request. These adjustments must match the Appropriation Conference Report table and the FY CY Rebaseline Report (for Active Military Components only) at the subactivity group level.
- Undistributed Congressional Adjustments: Adjustments outlined on the tables contained in the statement of managers accompanying the appropriations conference report. The Components must use discretion as to how these adjustments are applied to minimize negative impacts on force readiness. These adjustments must match the Appropriation Conference Report table and the FY CY Rebaseline Report at the appropriation level and subactivity group level, respectively.
- Adjustments to Meet Congressional Intent: Adjustments that are required in order to align funding for a congressionally approved program into the proper budget activity and subactivity in order to carry out the intent of the Congress. These adjustments must match the FY CY Rebaseline Report at the subactivity group level.
- General Provisions: Adjustments directed by the Congress in appropriations law, the distribution of which is not explicitly stated. The OP-5 should separately display each General Provision adjustment. These adjustments must match the FY CY Rebaseline Report at the subactivity group level.
- Fact-of-Life Changes: The Operation and Maintenance (O&M) fact of life changes are programmatic, intra-appropriation adjustments made by DoD Components to address significant, unforeseen operational readiness issues within the following categories:
 1. Functional Transfers – Funding realignments to reflect a transfer of function, responsibility, or duty from one major command to another within each Military Department or Defense Agency. These adjustments do not change the purpose for which the funds were appropriated.
 2. Technical Adjustments – Accounting adjustments to properly align funding with the appropriate O&M subactivity group (SAG) where costs are actually accrued and executed. These adjustments do not change the purpose for which the funds were appropriated.

Exhibit OP-5 Detail by Subactivity Group

(Page 2 of 9)

3. Emergent Requirements – Adjustments to funding requirements resulting from changes in policy, legal direction, or other unforeseen (e.g., operational readiness, health or safety, etc. related) events that occurred after the submission of the President's Budget.

These adjustments must not change the congressional priorities and are subject to congressional review as reported in the Rebaseline Report. The Rebaseline Report, as amended by any congressional action, will be used to develop the DD 1414, Base for Reprogramming Actions. See Volume 3, Chapter 6 regarding the policies for the reprogramming of O&M funds subsequent to the establishment of the base for reprogramming actions.

Performance Criteria and Evaluation Summary: The Performance Criteria and Evaluation Summary (OP-5, Part IV) must provide supporting detail sufficient to demonstrate how the budgeted resources for each subactivity group contribute to the Department's mission. The Components must provide meaningful performance and work load data by SAG for each year FY PY, FY CY, and FY BY, where appropriate. Performance criteria must be displayed for each subactivity group. The goal is for the performance criteria to justify the budget request. If no performance criteria are provided, then a statement must be included explaining why there is no performance criteria.

The House of Representatives Report (Report 108-106, page 303) on the National Defense Authorization Act for Fiscal Year 2004 directed the Office of the Secretary of Defense (Comptroller) and the service's assistant secretaries of financial management to improve the current performance criteria to reflect measurable metrics. In response, the Department modified the performance criteria for some SAGs supporting the O&M and DHP justification materials and reported the improvements in a report to the Congress in January 2004 and the FY 2005 President's Budget submission in February 2004. The Components must continue to report these improved performance measures in the Performance Criteria section of the OP-5 justification book. The following subactivity groups have specific performance criteria required.

Flying Hour Program (Attachment 1)

Ship Operations (Attachment 2)

Land Forces (Attachment 3)

FSRM (Attachment 4)

Depot Maintenance (Attachment 5)

Defense Health Program (Attachment 6)

The following programs also have specific performance criteria required (See attachments 1-4 to the OP-5 in the FMR):

JCS Exercise Program (Attachment 7)

Base Operations Support (Attachment 8)

Transportation (Attachment 9)

Training (includes multiple subactivity groups) (Attachment 10)

Budget Activity _____

Activity Group _____

Detail by Subactivity Group _____

(FY PY, FY CY, and FY BY)

Variance Reporting: Describe all variances in quantities and dollars from the original President's Budget submission for both the Prior Year and the Current Year. In addition to the explanations as to the reasons for the variances, this area should also be used to discuss how the variances contributed to/hindered achievement of activity goal.

Explanation of Performance Variances**Prior Year:****Current Year:****Instructions and Definitions****Exhibit Scope:**

Report detailed information only on major end items of equipment. Use the other category for minor items. Fill in only the area for funding for the other category.

Definitions:

Budget Qty (Columns B, H, M and O): The quantities contained in the President's budget submission for the fiscal year indicated. Info for the Prior Year will reflect the amount requested in the President's Budget for that fiscal year, not the updated column reflecting congressional adjustments.

Budget \$ (Columns C, I, N and P): The funding requested in the President's Budget submission for the fiscal year indicated. Info for the Prior Year will reflect the amount requested in the President's Budget for that fiscal year, not the updated column reflecting congressional adjustments.

Actual Inductions Qty (Column D): The number of units actually funded for induction during the Prior Year.

Actual Inductions \$ (Column E): The cost of the items contained in Column D.

Completions Prior Year (Column F): Items completed during the Prior Year that were funded in a previous fiscal year.

Completions Current Year (Column G): Items in Column D that were completed during the Prior Year.

Estimated Inductions Qty (Column J): Revised Current Year quantity estimate.

Estimated Inductions \$ (Column K): The cost of the items contained in Column J.

Carry-In QTY (Column L): The number of items funded in prior years that have not been delivered.

IV. Performance Criteria and Evaluation (Defense Health Program)

	<u>FY PY</u>		<u>FY CY</u>		<u>FY BY</u>
	<u>Budgeted*</u>	<u>Actual</u>	<u>Budgeted</u>		<u>Estimate</u>
Beneficiary Satisfaction with Health Plan					
Inpatient Production Targets (Relative Weighted Products) *					
Outpatient Production Targets (Relative Value Units)					
Primary Care Productivity					
Medical Per Member Per Year - Annual Cost Growth*					

Information for the Prior Year (FY PY) Budgeted will reflect the amount requested in the President's Budget for that fiscal year, not the updated column reflecting congressional adjustments

* As compared with private sector health care plan increases

Variance Reporting: Describe all variances in quantities and dollars from the original President's Budget submission for both the Prior Year and the Current Year. In addition to the explanations as to the reasons for the variances, this area should also be used to discuss how the variances contributed to/hindered achievement of activity goal.

Explanation of Performance Variances

Prior Year:

Current Year:

Exhibit OP-5 Defense Health Program (Attachment 6)
(Page 1 of 3)

These performance metrics will be used to focus on the overall performance of the health benefit plan offered to DoD beneficiaries. Measuring performance to goals allows the DHP to track internal effectiveness as well as effectiveness relative to other health plan benefits in the private sector. Results of these performance metrics will be reported annually in Defense Health Program O&M Overview Exhibit.

Questions	Ans.	Explanation	Evidence/Data
Is the satisfaction with the TRICARE Health Plan increasing, decreasing, or staying the same?	Increasing = 10, Steady = 5, Decreasing = 0	An increase in the satisfaction with the TRICARE Health Plan indicates that actions being taken are improving the overall functioning of the plan from the beneficiaries perspective. Goal is to improve overall satisfaction level to that of civilian plans using a standardized survey instrument.	Satisfaction with the TRICARE Health Plan is related to two primary functional areas: timeliness of claims adjudication and access to medical services for beneficiaries. Improvements in either of these functions generally improves the measures, whereas problems will cause a decline.
Did the DHP achieve its inpatient production targets (number of Relative Weighted Products (RWP's))?	At or above target = 10, = or > 95% target = 5, Below 95% target = 0	Achieving the production targets ensures that the initial plans for allocation of personnel and resources are used appropriately in the production of inpatient workload	Failing to achieve production target suggests that facilities may not be appropriately using their resources and may signal need to align assets to other areas within the facility or other facilities that are not at capacity. Surpassing the target signifies opportunities to achieve saving through recapture of purchased care workload.
Did the DHP achieve its outpatient production targets (number of Relative Value Units (RVU's))?	At or above target = 10, = or > 95% target = 5, Below 95% target = 0	Achieving the production targets ensures that the initial plans for allocation of personnel and resources are used appropriately in the production of outpatient workload	Failing to achieve production target suggests that facilities may not be appropriately using their resources and may signal need to align assets to other areas within the facility or other facilities that are not at capacity. Surpassing the target signifies opportunities to achieve saving through recapture of purchased care workload.

Questions	Ans.	Explanation	Evidence/Data
Is the productivity of the Primary Care Providers increasing, decreasing, or staying the same?	Increasing = 10, Steady = 5, Decreasing = 0	In order to run a premier Health Maintenance Organization (HMO), the critical focus area is primary care. The primary care provider frequently represents the first medical interaction between the beneficiary and the HMO. In this role the primary care provider is responsible for the majority of the preventive care to keep beneficiaries healthy and away from more costly specialty care.	This metric looks at the complexity of care and the number of patients seen by the primary care providers each day, with a goal of increasing the complexity and/or number of patients seen each day by the provider. As more care is provided by the direct care facilities, there is better utilization of the assets, and the average cost per encounter will decrease. Goal is to increase productivity to levels comparable to the civilian sector while still maintaining readiness.
Is the Medical Per Member Per Year (PMPY) cost growth rate at or below private sector health care plan rate increases?	At or below Nat'l Rate = 10, Up to 105% of Nat'l Rate = 5, Above 105% of Nat'l Rate = 0	The medical cost per member per year looks at the overall cost of the Prime enrollees for the DHP. This tracks all costs related to care delivered to enrollees. The objective is to keep the rate of cost growth for the treatment of TRICARE enrollees to a level at or below the civilian health care plan rate increases at the national level.	The cost has multiple components that all must be operating properly to effectively deliver the appropriate health care services to the enrollee. This measure incorporates the cost of producing the care in the direct care facilities, as well as issues of utilization for both direct care and purchased care. If the cost to produce the individual units of care in the direct care system is high, then the cost per enrollee will increase. Similarly, if the enrollees receive high numbers of encounters, then the cost will also increase. The objective is to properly manage both the production of care in the direct care facilities, and the utilization of health care services for the enrollees to effectively keep the enrollee healthy.

IV. Performance Criteria and Evaluation (Combatant Commander's Exercise Engagement and Training Transformation (CE2T2) Program)

<u>Exercise Name & Location</u> ^{1/}	<u>Time Period of Exercise</u>	<u>Work Load Measure</u> ^{2/}	<u>Cost (\$ in Thousands)</u>		<u>Total</u> ^{3/}
			<u>Transportation</u>	<u>Other</u>	
Directed Exercises (List by exercise) Total	<u>1/</u>	Identify each initiative by category, CINC, and exercise name.			
	<u>2/</u>	<u>Airlift</u> : Reflect C-130, C-141, C-17, or C-5 hours, as appropriate, for transportation costs. Separately identify C-130, C-141, C-17, or C-5 hour requirements, as appropriate, for commercial augmentation effort. Indicate in footnote JCS Exercise rate used for pricing.			
		<u>Sealift</u> : Express work measurement tons (differentiate between break bulk and containers) to be transported via MSC and MSC per diem ship days as applicable. In footnote indicate rates used for each.			
		<u>Land Transportation</u> : Express program values, in measurement tons to be transported overland. Indicate rates used in footnote.			
Coordinated Exercises (List by exercise) Total		<u>Port Operations</u> :			
		<u>CONUS</u> :	Express work load in terms of measurement tons to be transported through CONUS Ports. Indicate rates used in footnote.		
		<u>Overseas</u> :	Express work load in terms of measurement tons to be transported through Overseas Ports. Indicate rates used in footnote.		
<u>Total Directed and Coordinated Exercises</u>	<u>3/</u>	<u>For FY PY and FY CY</u> : Show by footnote both the amount appropriated for FY PY and the amount requested for the FY CY in the FY CY President's budget. For FY CY, explain the difference between the amount requested in the President's budget and the current estimate.			
		<u>For FY BY</u> : Briefly describe changes in the program from that of the previous year. To the extent that specific exercises have not been approved at the time of the budget submission, estimate total program levels. Estimated amounts should be distributed between transportation and other costs, as applicable, and should be related to estimated work load. Explanations of changes in both costs and work load are required between the FY CY and FY BY. This information should be provided in sufficient detail to justify the budget estimate.

ADDITIONAL INSTRUCTIONS

This schedule should exclude those funds supporting maintenance and repair of real property and minor construction (which should be reported on Attachment 4).

- Additional performance criteria and work load indicators may be included for any of the above functional categories as applicable. Additional criteria/indicators are
- Especially encouraged for "Other Base Services" and "Other Personnel Support" categories as they relate to more important or unique support functions. Include direct Operation and Maintenance funds only. (Exclude amounts funded from Military Personnel appropriations.)
- This format should be followed in preparing an OP-5 Exhibits for Base Support.

NOTE: Information on this exhibit must be consistent with information on Exhibit PBA-10, Base Support.

Glossary

Performance Metrics:

Schedule Adherence: Two metrics, Average Percentage Late and Maximum Percentage Late. The percentage late is calculated by dividing the availability actual duration by the scheduled duration (as stated in the last Presidential Budget).

Manday Budget Performance: Two metrics, Average Percentage Over Manday Budget and Maximum Percentage Over Manday Budget. The percentage over manday budget is calculated by dividing the availability actual mandays by the budgeted mandays (as stated in the last Presidential Budget).

Quality of Work: This metric reports the number of post-delivery discrepancies per 1,000 mandays of actual expenditures.

Unit Cost: This metric reports the total cost less direct material, direct contract, other direct, and MILCON per direct labor manday delivered. CY and BY reflect the budgeted values.

Administrative Efficiency: This metric reports the total cost less direct material and direct labor divided by total cost less direct material. CY and BY reflect the budgeted values.

CNO Availabilities Complete: This metric reports the total number of CNO availabilities completed during the PY.

CNO Availabilities in Progress at end of FY: The metric reports the number of CNO availabilities in progress at the end of the PY.

Homeported Aircraft Carriers Supported: Number of homeported aircraft carriers supported by activity. Determines activities non-depot workload.

Homeported Submarines Supported: Number of homeported submarines supported by activity. Determines activities non-depot workload.

Homeported Surface Ships Supported: Number of homeported surface ships supported by activity. Determines activities non-depot workload.

Shipyard Capacity Utilization: This metric reports the total workload compared to the modified dry-dock capacity index. CY and BY reflect the budgeted values.

**Navy Shipyards (Direct Funded)
Integrated Intermediate & Depot Level Maintenance**

Performance Information:

Direct Civilian Labor: Includes actual direct civilian labor cost (accelerated by benefits) plus direct overtime cost.

Direct Military Labor: Total military salary cost times percentage of military mandays spent on direct work.

Direct Material: Actual material (piece-part) costs.

Direct Contracts: Includes all contract labor costs.

Other Direct Costs: Includes direct costs not included in direct material and direct contracts. Examples include travel costs and equipment rental costs.

Overhead Civilian Labor: Includes actual overhead civilian labor cost (accelerated by benefits), overhead overtime, differential costs, bonuses, lump sum leave costs, and transportation incentive program costs. .

Overhead Military Labor: Total military salary cost less that reported as direct military labor.

Overhead Non-Labor: Includes such non-labor costs as overhead travel, telecommunications, office, shop, and furniture purchases less than OPN \$250,000 threshold, crane maintenance, and Janitorial services. ...

Infrastructure Accounts: These accounts provide the funding for infrastructure operation, maintenance, and replacement as follows:

Base Operating Support (OMN): Base Operating Support finances utilities, maintenance, security, transportation, and port operations costs required to support industrial operations.

Capital Expenditures (OPN): The Capital Budget Authority reflects the financing of essential fleet support equipment and other capital improvements critical to sustaining shipyard operations, improving productivity, meeting health, safety and environmental requirements and lowering production costs.

Facilities Sustainment, Restoration, & Modernization (OMN): The Sustainment, Restoration, and Modernization Budget Authority reflect the financing of essential infrastructure maintenance and modernization.

Military Construction (MILCON): Budget Authority reflects the financing of essential infrastructure replacement critical to sustaining shipyard operations, improving productivity, meeting health, safety and environmental requirements and lowering production costs.

Exhibit OP-5 Overseas Contingency Operations (Attachment 12)

COMPONENT NAME

Summary Information

Overseas Contingency Operation(s): **Operation Enduring Freedom (OEF) and Operation Iraqi Freedom/Operation New Dawn (OIF/OND)**
Operation and Maintenance, _____

- I. Description of Operations Financed:** Provide a narrative explanation for each contingency operation (Operation Enduring Freedom (OEF) and Operation Iraqi Freedom/Operation New Dawn (OIF/OND)), characterizing the mission and major functions funded in this appropriation.
- II. Force Structure Summary:** Provide a narrative explanation and identification of force structure (e.g., quantity number of operational and support units, numbers of Active, Reserve and Guard personnel deployed, or in-training for rotation into theater-of-operation, and other types of assistance) supported by funding in this appropriation.
- III. O-1 Line Item Summary:** Provide a tabular O-1 line item summary.
- IV. OP-32 Summary:** Provide a summary OP-32 for the appropriation.

CIVILIAN PERSONNEL COSTS)

CIVILIAN PERSONNEL COSTS**OP-8 Instructions**

All Components, to include the classified components, must submit an automated OP 8 Civilian Personnel Costs exhibit for all appropriations that fund civilian personnel (e.g., RDT&E appropriations, DWCF). For this year's budget submission, funding requirements related to personnel under the National Security Personnel System (NSPS) must be identified. Therefore, separate OP-8 data must be submitted for the NSPS and non-NSPS personnel and the PRCP system will create the Component appropriation total OP-8.

Separate OP-8 exhibits must be prepared for PY, CY, BY for each Military Department in total and for each appropriation/fund in which civilian personnel are funded. Each Defense Agency, including those Defense Agencies that have only RDT&E funded civilian personnel must also provide a separate exhibit. If a Defense Agency has civilian personnel financed in more than one appropriation/fund, then a total for the Defense Agency must be provided.

The same level of detail will be reflected for direct funded and reimbursable funded civilian personnel. For each fiscal year covered by the budget submission, a "direct funded" section, a "reimbursable funded" section, and a "total (direct + reimbursable)" funded section will be included.

OP-8 Automated Exhibit. The Program Resources Collection Process (PRCP) System is used as the central collection point for the OP-8. Submission of the OP-8 will be through the PRCP System.

To calculate the required rate data, use the formulas displayed on the OP-8 exhibit. Show the average rates for Basic Compensation, Total Compensation, and Compensation and Benefits. Also show rates reflecting total variables and benefits as a percentage of basic compensation.

End strength onboard as of September 30 vice end strength authorizations will be displayed for all beginning and ending end strengths. The beginning end strength must agree with previous FY's September 30 end strength. For the PY supporting the FY BY President's budget request, the end strength data must agree with the SF-113A, Monthly Report of Federal Civilian Employment, provided to OPM to report military functions employment levels as of September 30.

In accordance with OMB Circular A-11, full-time equivalent (FTE) employment is the total number of hours (worked or to be worked) divided by the number of compensable hours applicable to each fiscal year. FTE is synonymous with workyear.

Total full-time equivalents must agree with the amounts reflected in the Comptroller Information System (CIS).

Include in the OP-8 the category of US Direct Hire personnel for Highly Qualified Experts as authorized in Section 9903 of title 5, United States Code (U.S.C.), as enacted by section 1101 of the National Defense Authorization Act for FY 2004, P.L. 108-136. The total number of highly qualified experts DoD-wide may not exceed 2,500 at any one time. The Deputy Under Secretary of Defense (Civilian Personnel Policy) will manage allocation reserves and approve cross leveling of allocations.

CIVILIAN PERSONNEL COSTS**OP-8 Instructions**

(Continued)

In accordance with the Federal Employees Part-time Career Employment Act of 1978 (Public Law 95-437), part-time permanent employees are counted on a full time equivalent basis, i.e., an individual working 30 hours a week becomes .75 of an FTE. There is no adjustment for other part-time or intermittent employees - these employees would be counted on an individual basis not on a fractional basis.

All Benefits for Former Employees must be reported under the Object Class 13 sections (D5. for direct funded and R5. for reimbursable funded). Voluntary separation incentives must be reported in Benefits for Former Employees (Object Class 13).

Do not include overtime workyears in FTE totals. The FTEs on the OP-8 are for straight time workyears only.

FTEs (direct and reimbursable) in the OP-8 exhibits must agree with the FTEs reported in the OMB galleys used for the printed budget. (OMB Circular A-11.)

Direct hire end strength data on the OP-8 must agree with data provided on the September 30th supplement to the SF-113A report. This supplement is entitled, Report of Part-Time Permanent Employees on a Fractional Basis. Indirect hire end strength data must agree with the Indirect Hire supplement to the September 30th SF-113A report.

The OP-8, Part 2, Reimbursable Civilian Personnel Costs will provide reimbursable sources by appropriation, and by Component/Agency.

Department of Defense Education Activity (DoDEA) will submit separate OP-8 exhibits for: Department of Defense Dependents Schools (DoDDS) and DoD Domestic Dependent Elementary and secondary Schools (DDESS), in addition to providing a consolidated OP-8 exhibit for the total Department of Defense Dependents Education (DoDDE) program. For the required automated submission, DoDEA is only required to submit the consolidated DoDDE OP-8 exhibit, not individual exhibits for DoDDS and DDESS.

Reimbursable Civilian Personnel Costs, Part 2**Instructions for Preparation of the OP-8 Part 2 Reimbursable Pay**

This is mandatory for the Military Departments and the Defense Agencies. If a Service shows that civilian pay is to be reimbursed from a Defense Agency that does not submit this form, then the agency coordination must be shown on this form. This is required only for the Program and Budget Review Submission (BES).

Each appropriation account in the prior year (PY), current year (CY), and budget year (BY) for which civilian pay is reimbursed must identify the following in thousands of dollars:

On line 1, total civilian pay *.

On line 2, total reimbursable pay *.

On line 3, the amount of line 2 that is reimbursed within the account.

On line 4, the amount by account of line 2 that is reimbursed from accounts within the Service or Defense Agency. The sum of all accounts must equal the total intra service.

On line 5, the amount by account of line 2 that is reimbursed from other Services or Defense Agency accounts. The sum of all accounts must equal the total inter service.

On line 6, the amount of line 2 that is reimbursed from all other sources. The sum from all accounts must equal the total all other.

On line 7, the total civilian pay that is reimbursed to other Services or Defense Agencies **.

Notes:

* Lines 1 and 2 MUST agree with the totals reported by the Service or Defense Agency on the OP-8 and the sum of lines 3 through 6 of this must equal line 2.

** Any amounts identified on line 5 **MUST** appear on line 7 of the reimbursing Service or Defense Agency submission of this exhibit.

 (Page 4 of 5)

**ANALYSIS OF CHANGES IN FULL-TIME EQUIVALENT (FTE) COST
INSTRUCTIONS**

1. The intent of the OP-9 is to identify the factors that have an impact on changes in average salary and average FTE cost from fiscal year to fiscal year.
2. Prepare separately for each appropriation and Fund account for U.S. direct hire, classified and wage system, and Foreign National Direct Hire (FNDH). Complete amounts and rates for WS, etc., as in SES/GS column.
3. All end strength will be displayed as actual or planned to be onboard as of September 30. Do not use end strength authorizations.
4. Cost, FTEs, and end strength should be consistent with those shown on OP-8, Analysis of Civilian Personnel Costs.
5. Show each classified pay raise in separate stub.
6. Data is to be reflected at appropriation or account.
7. The "Average Basic Annual Salary" for a FY is computed by dividing the "Basic Compensation" total by the number of straight time workyears.
8. The "Overall Average Annual Salary" for a FY is computed by dividing the "Total Compensation" (Object Class 11) by the number of straight time workyears.
9. The "Average FTE Cost" for a FY is computed by dividing "Total Compensation and Benefits" (Object Class 11 and 12) by the number of straight time FTEs.
10. The OP-9 will be prepared for both the Budget Submission and the President's budget. However, for the latter, the OP-9 will be submitted separately to OSD and will not be included in the congressional justification material.

Footnotes

- 1/ Reflect as % rate of basic compensation.
- 2/ Express as decimal to five places. Develop effective pay raise as ratio of No. of applicable days to total compensable days in year times pay raise percentage. Identify computation in footnote.
- 3/ Show computation - derivation of rate.
- 4/ Provide an explanation if the rate is different from the previous fiscal year rate, e.g. changes in overtime rate, changes in health benefits, FERS, etc.

Second Class Loss									
Second Class Carryover									
First Class Loss									
Graduates									
Graduates Commissioned									
Cadet/Midshipman End Strength									
Graduation Load									
Autumn Load									
<u>PREP SCHOOL</u>									
Entrants To Prep School									
Grads Entered Academy									
Prep School Load									
Prep School Grads Attrit As Fourth Classmen									

NOTE: Carryover is to be calculated as of graduation (unless another time is specified uniformly for an academy).

"Graduation Load" is the sum of carryover for each class plus graduates.

"Autumn Load" is the sum of carryover for each class plus net new entrants at the beginning of the autumn term.

Reconcile and explain in footnotes differences between Autumn Load and "Cadet/Midshipman End Strength" reflected here and in the FYDP update.

"Prep School Load" is to be a forecast of average onboard students on a "best estimate" basis (specify formula).

If this table is presented on an academic year basis, so state.

Instructions for Completion of Preceding

1. Enter Army, Navy, or Air Force, as applicable.
2. Enter the appropriate fiscal year (data should be shown for the Prior, Current, and Budget fiscal years).
3. Enter the average number (average strength) of officers, enlisted personnel, civilians (Full-Time Equivalents), and combined total, respectively, assigned to ROTC units and ROTC command level staffs, respectively. The ROTC command level staff should include all personnel up to the departmental level who are associated with the ROTC program but are not assigned to a ROTC unit.
4. Enter the total costs of pay and allowances/salary of military and civilian personnel, as applicable, plus any related O&M support costs. Pay and allowances/salaries will be determined through the use of standard rates for military and civilian personnel, respectively.
5. Enter the average staff and the average cost of the staff per unit. Average staff will be determined by dividing the applicable total staff (unit or command level) by the number of units shown in item C (see paragraph 6, below). The average cost of staff per unit will be arrived at by dividing the applicable total costs for the unit and command level staffs, respectively, by the number of units shown in item C.
6. Enter the applicable number of operating units.
7. Enter the total ROTC costs, other than those shown in A or B, included in the Service's O&M appropriation(s). (This should be equal to the sum of D.1.a and b discussed below in paragraphs 8 and 9.)
8. Show in parenthesis () the total applicable costs of ROTC scholarships (include only tuition, fees, books, and other related student expenses).
9. Show in parenthesis () the applicable O&M administrative costs, by categories shown, related to the ROTC program.

Exhibit OP-14 Part D: ROTC Program Data

(Page 9 of 16)

INDIVIDUAL TRAINING DATA FOR FY __ BUDGET (SERVICE)

PART D: ROTC PROGRAM DATA (PE 847230)

(Continued)

10. Enter the total ROTC costs included in the Service's applicable Reserve Component appropriations. This should be equal to the sum of D.2.a, b, and c, as discussed in paragraphs. 11, 12, and 13 below.
11. Enter in parenthesis () the total costs relative to the monthly subsistence allowance paid to college freshmen and sophomores who are recipients of ROTC scholarships.
12. Enter in parenthesis () the aggregate sum included in the Service's applicable Reserve Component appropriations for ROTC Pay and Allowance (Summer Training), Subsistence of Reserve Officer Candidates (Summer Training), and Travel of Reserve Officer Candidates (Summer Training).
13. Enter in parenthesis () all costs of the ROTC program, other than those discussed in paragraphs. 11 and 12, above, included in the Service's Reserve Component appropriations.
14. Enter and detail by appropriation, and explain by footnote, any costs attributable to the ROTC program which have not been included in either A, B, or D (1 and 2).
15. Enter the total cost data shown in D.1, 2, and 3.
16. Enter in parenthesis () the number of candidates participating in and total costs of Flight Instruction Program and the Aviation Indoctrination Program, respectively, included in the above data.
17. Enter by the scholarship and non-scholarship programs, respectively, the average number of candidates participating in MS I, II, III, IV, and applicable totals, respectively. Leave dollar columns blank.
18. Enter the total costs of the ROTC program. Total costs should be equal to the aggregate sum of A, B, and D, above.

Instructions for creating the display

The OP-20 data will be submitted via the Select and Native Programming Data Input System (SNaP) located at <https://snap.cape.osd.mil>. The most current version of this exhibit will be found at this site. Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-20 should be referred to (703) 697-3248. Questions about the SNaP interface should be referred to the Office of the Director (Program Analysis & Evaluation) Programming and Fiscal Economics Division (703) 693-0223.

- 1) Display the Organization and Component under the report title
- 2) For each Weapon System display the weapon system detail as organized above
- 3) Sum all weapon detail reported by SAG and PE at weapon system level

Data Center: Operations and Support, Program/Budget

Display Variations for Warehouse: In addition to Organization breaks create one Department wide Display including all organizations, no grand totals.

Database Requirement: One XLS of all data for all organizations as provided-- no calculations

Instructions for Completing the Weapon Systems Readiness-Flying Hour Summary

- 1) For Army, Navy and Air Force, provide the funding level--by Active, Reserve, and Guard--for the Flying Hour Program (FHP) by SAG, PE, Treasury Code and weapon system type. The funding levels reported here should be the same as those reported in Budget Exhibit OP-20.
- 2) Provide Narrative in a Word Document that discusses reasons for cost growth from the PB 03 position for any major weapons systems whose cost per flying hour increased more than 10 percent. Discuss any accounting changes in the flying hour program made since the PB 03 position.
- 3) For Navy, provide a list of Program Elements included in each of the following: TACAIR/ASW, Fleet Training, and Fleet Air Support

Definitions:

Organization: The Military Departments, All components

Appropriation: Treasury Code, Defined set of four-digit numeric codes from the Comptroller that identifies resources by type, organization and component.

Exhibit OP-20 Flying Hours Program

(Page 2 of 3)

OP-20 Flying Hours Summary (Continued)

SAG: Sub-Activity Group, budget term denoting groupings of resources

Army SAGs: 111, 112, 113, 114, 121, 135, 311, 321, 322, 423, 434, and 441.

Navy SAGs: 1A1A, 1A2A, and 1C1C

Air Force SAGs: By appropriate SAGs.

Program Element: Identify the PE containing the weapon system described by the detail.

Weapon System Type: Provide Type/Model/Series detail for the weapon system described by the detail.

Weapon System Detail:

Quantity-Identify the number of weapon system type used to determine flying hour program funding

Flying Hours: - flying hour per Aircraft per Month, required and funded

Utilization Rate:

Crew Ratio: - number of crews funded per weapon system

Funded: Identify direct funding level for Fuel, DLRs, Consumables, and Indirect funding for Contract, Maintenance and Other OPTEMPO.

Army -- See definition of Indirect OPTEMPO in Notes section below.

Navy--Special Interest Codes

Air Force--Consumables (General Support (GS) + System Support (SS))

Total TOA Required: Provide total TOA required to meet the flying hour requirement

Notes:

- 1) Indirect OPTEMPO is the portion of the Army's total OPTEMPO that is structure based, or those costs that are based on the number of personnel supported rather than the costs that vary directly with training activities/events (called Direct OPTEMPO). Some examples of Indirect OPTEMPO costs include organizational clothing and equipment, civilian pay, and contract logistic support. If it is not possible to report Indirect OPTEMPO costs by PE and weapon system, report total Indirect OPTEMPO costs for the Army flying hour program and include a narrative in a word document explaining how this number is achieved and what steps will be taken to provide more detailed data in the next POM submission
- 2) For each PE/Treasury Code/SAG combination, the sum of DLRs and Consumables will be compared with the O&M FYDP Expense Aggregate, Repair Parts, for the same combination.
- 3) For each PE/Treasury Code/SAG combination, the Fuel entered will be compared with the O&M FYDP Expense Aggregate, Fuel, for the same combination.

Technical Issues: If you are having difficulty with the data collection system—SNaP, contact the SNaP administrators via the email link at the web site.

Exhibit OP-20 Flying Hours Program

(Page 3 of 3)

Exhibit OP-24 Emergency and Extraordinary Expense Limitation

INSTRUCTIONS FOR OP-24**Emergency and Extraordinary Expense Limitation****A. Purpose**

1. This section provides guidance for the submission of Exhibit OP-24 (Emergency and Extraordinary Expense Limitation) and the quarterly emergency and extraordinary expenses expenditure report required by section 127 of Title 10, United States Code.

2. This section supersedes OASD(C) memorandum, 14 August 1975, subject: Quarterly Reporting of Emergency and Extraordinary Expenses, and OASD(C) memorandum, 6 August 1976, subject: Quarterly Reporting of Emergency and Extraordinary Expenses.

B. Submission Requirements

1. General. In the annual DoD appropriations acts, Congress provides the Secretary of Defense, secretaries of the military departments, DoD Inspector General, and the US Court of Appeals for the Armed Forces, the authority to make obligations and expenditures for emergency and extraordinary expenses. These authorities are provided in terms of dollar limitations and are available for the fiscal year in which they are provided in the DoD appropriations act. Defense agencies, the office of the Secretary of Defense, the office of the Joint Chiefs of Staff, and Combatant Commands are allocated (usually via a Deputy Secretary of Defense memorandum) a portion of the Secretary of Defense's annual emergency and extraordinary expenses authority.

The use of emergency and extraordinary expenses authority is limited to those expenditures which cannot be anticipated or classified, or are not specifically appropriated for such purposes, and includes expenditures for emergent confidential military requirements and official representation activities.

In order to strengthen the management of, and budgeting for, emergency and extraordinary expense authority, and continue to comply with 10 USC 127 for the submission of required reports to Congress, it is necessary to improve the emergency and extraordinary expense data collection process. Therefore, the following guidance is provided:

2. OP-24

a. This exhibit will be submitted by each military department and Defense activity that require emergency and extraordinary expense authority, or authority to expend funds for official representation activities, for both the OSD budget review and the President's budget submit. In addition to the budgetary data, the OP-24 must include a full and complete narrative justification to support the request.

b. If more space is required, the justification material may be continued on a second page, or additional information may be attached to OP-24, as appropriate.

Exhibit OP-24 Emergency and Extraordinary Expense Limitation

(Page 1 of 4)

c. The Defense components that submit an OP-24 with only the budgetary data, but inadequate or no narrative justification risk not receiving any, or significantly reduced, emergency and extraordinary expense authority.

d. For the President's budget submission, the OP-24 should be submitted concurrently but separately to OUSD (Comptroller) Operations Directorate (Pentagon, Room 3C749).

3. Quarterly Reports

a. 10 USC 127 requires the Secretary of Defense to submit an annual report of expenditures made under the authority of this statute. (Although Congress requires an annual submission, quarterly inputs are required for management purposes.)

b. The categories of expenditure for reporting the quarterly emergency and extraordinary expenses were defined in the 14 August 1975 ASD(Comptroller) memorandum, and are shown below (Mapping and Charting Activity has been changed to Geospatial Intelligence):

Emergency and Extraordinary Expenses Expenditures through _____		
	Obligation	Expenditure
1. Cryptologic Intelligence	x	x
2. HUMINT	x	x
3. Counterintelligence and Investigative Activities	x	x
4. Scientific and Technical	x	x
5. Intelligence and Management Support	x	x
6. Geospatial Intelligence	x	x
7. Attaché Activities	x	x
8. Tactical Intelligence	x	x
9. Other Intelligence *	x	x
10. Representation Allowance	x	x
11. Criminal Investigations	x	x
12. Other Non-Intelligence Activities *	x	x
Total	xx	xx

* "Other" categories should be specifically identified with their related expenditures in separate lines below lines 9 and/or 12.

c. The quarterly expenditure amounts reported are expenditures made against recorded obligations for the fiscal year being reported. If current fiscal year expenditures being reported are expenditures made against prior year obligations, provide a separate expenditure listing for each fiscal year for which expenditures in the current fiscal year are being reported. The quarterly expenditure amounts will be on a cumulative basis for the fiscal year for which the expenditures are being reported.

Exhibit OP-24 Emergency and Extraordinary Expense Limitation

(Page 2 of 4)

d. In addition, the Defense components shall also report to the Office of the Under Secretary of Defense (Comptroller) the obligation amounts made against the emergency and extraordinary expense authority for the fiscal year being reported.

e. The military departments, DoD Inspector General, and the US Court of Appeals for the Armed Forces shall submit quarterly reports of all emergency and extraordinary expense obligation and expenditures to the Office of the Under Secretary of Defense (Comptroller) no later than 31 days following the close of the quarter being reported.

f. Defense agencies and other DoD activities that receive their emergency and extraordinary expense authority from the Secretary of Defense (usually via a Deputy Secretary of Defense memorandum) shall continue to submit their quarterly expenditure data for official representation activities to the Director of Administration and Management no later than 25 days following the close of the quarter, in accordance with DoD Directive 7250.13 (Official Representation Funds). Defense agencies and DoD activities must also include their obligation data for official representation activities, in addition to the expenditure data, in their quarterly submissions to the Director of Administration and Management.

g. Relative to the emergency and extraordinary expense expenditures for confidential military purposes, Defense agencies and other DoD activities, including the Washington Headquarters Services, that receive their emergency and extraordinary expense authority from the Secretary of Defense, shall submit their quarterly obligation and expenditure report for confidential military purposes directly to the Office of the Under Secretary of Defense (Comptroller) no later than 31 days following the close of the quarter being reported.

Operation and Maintenance, _____

EMERGENCY AND EXTRAORDINARY EXPENSE LIMITATION

Scope: Covers all expenses subject to the congressional limitation on "Emergency and Extraordinary Expenses"

Instructions for creating the display

The OP-25 data will be submitted via the Select and Native Programming Data Input System (SNaP) located at <https://snap.cape.osd.mil>. The most current version of this exhibit will be found at this site. Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-20 should be referred to the Operations Directorate at OPSDirectorate@osd.mil. Questions about the SNaP interface should be referred to the Office of the Director (Program Analysis & Evaluation) Programming and Fiscal Economics Division (703) 693-7825. Technical questions regarding SNaP should be referred to the Information Management and Analysis Group (703) 604-6349.

- 1) Display the Organization and Component under the report title
- 2) For each Weapon System display the weapon system detail as organized above
- 3) Sum all weapon detail reported by SAG and PE at weapon system level

Crystal Reports Sort Order: Organization, Component then Weapon System

Data Center: Operations and Support, Program/Budget

Data Source: SNaP

Display Variations for Warehouse: In addition to Organization breaks create one Department wide Display including all organizations, no grand totals.

Database Requirement: One XLS of all data for all organizations as provided-- no calculations

				Total TOA Required	\$	\$	\$	\$	\$	\$	\$	\$

Instructions for Completing the Weapon Systems Ground Vehicle Operations Summary

- 1) For Army, Marine Corps and SOCOM, provide the funding level--by Active, Reserve, and Guard--for Ground Vehicle Operations. Provide as much of the PE, Treasury Code, SAG and Weapon System Type information as possible
- 2) Provide a list of Weapon Systems and the type of OPTEMPO miles (Tank, Battalion, etc.). Include a definition for each type of OPTEMPO mile with the derivation/calculations used. Can be in either Word or Excel.

Definitions:

Organization: The POM reporting entities directed to submit this data requirement. For a complete list of organizations by data requirement see Appendix A of the PDR.

Appropriation: Treasury Code, Defined set of four-digit numeric codes from the Comptroller that identifies resources by type, organization and component.

SAG: Sub-Activity Group, budget term denoting groupings of resources

Program Element: Identify the PE containing the weapon system described by the detail.

Weapon System Type: Provide Major Fighting Vehicles by type for the weapon system described by the detail. For each type of major combat vehicle in an Excel document, provide the average number of annual tank miles budgeted and executed, and cost per average tank mile for Fuel, DLRs and Consumables by the warfighting units in the following training/operational categories:

- Combatants (exclude CCTT, CTCs & Contingency Operations)
- Close Combat Tactical Training (CCTT)
- National Training Center (NTC)
- Other Combat Training Centers (CTCs)
- Contingency Operations (i.e., Bosnia)
- Other (Please specify)
- Total Ground OPTEMPO (should be consistent with Weapon System Readiness total)

Include direct Operation and Maintenance funds only. (Exclude amounts funded from other appropriations or other source of funding (e.g. reimbursement from foreign government).)

Weapon System Detail:

Quantity-Identify the number of major fighting vehicle weapon systems by type used to determine the tank miles program funding

OPTEMPO Miles: -Annual number of OPTEMPO Miles driven for Major Fighting Vehicles, required and funded

Funded: Identify funding level for Fuel, DLRs, Consumables, and Contract Funding and Indirect OPTEMPO costs (Army only).

Total TOA Required: Provide total TOA required to meet the ground vehicle operations requirement

Business Rules:

For Ground Vehicles only, for each PE/Treasury Code/SAG combination, include vehicles not on the starter list or considered major combat vehicles in Weapon System Type = Other Vehicles.

Notes:

- 1) Indirect OPTEMPO is the portion of the total OPTEMPO that is structure based, or those costs that are based on the number of personnel supported rather than the costs that vary directly with training activities/events (called Direct OPTEMPO). Some examples of Indirect OPTEMPO costs include organizational clothing and equipment, civilian pay, and contract logistic support. If it is not possible to report Indirect OPTEMPO costs by PE and weapon system, report Indirect OPTEMPO costs for the Army ground operations program by cost category and include a narrative in a word document explaining how this number is achieved and what steps will be taken to provide more detailed data in the next POM submission
- 2) For each PE/Treasury Code/SAG combination, the sum of DLRs and Consumables will be compared with the O&M FYDP Expense Aggregate, Repair Parts, for the same combination.
- 3) For each PE/Treasury Code/SAG combination, the Fuel entered will be compared with the O&M FYDP Expense Aggregate, Fuel, for the same combination.

Technical Issues: If you are having difficulty with the data collection system – SNAP, contact the SNAP administrators via the email link at the web site.

<u>FINANCIAL OPERATIONS</u>		
Financial Operations (DFAS)		673
<u>OTHER</u>		
Purchases from Pentagon Reservation Maintenance Revolving Fund	672	
DLA Disposition Services		675
Defense Commissary Operations		676
Industrial Mobilization Capacity	(55)	682
Cost Reimbursable Purchases	(27)	679
Purchases from the Buildings Maintenance Fund	(27)	680
Other Activity Groups (List)		680-689

* These lines should include only Defense Working Capital Fund purchases made at stabilized rates. Cost reimbursable purchases should be included in line 679.

INSTRUCTIONS FOR COMPLETION OF OP-32

- (1) Enter the applicable component, i.e., Army, Navy, Marine Corps Reserve, Air National Guard, etc.
- (2) Enter the fiscal year for which this exhibit is being prepared.

NOTE: A separate exhibit should be submitted for each O&M appropriation at the total appropriation level for the President's Budget

- (3) Enter the prior year (PY), current year (CY), and budget year (BY), as applicable.
- (4) For the CY exhibit, amounts entered in this column should agree with the prior year actual costs as shown in the prior year column of the applicable budget submission. For the BY exhibit, these amounts should agree with the far right hand column of the CY exhibit.
- (5) This column should show the rate (percent) of price growth for various items. The price escalation indices prescribed by OSD (and rates provided by OMB) should be used for all lines, particularly fuel and civilian pay. Other price growth rates may be used for other items when actual experience supports a rate of increase different from that prescribed for the OSD/OMB submit. In those instances, supporting documentation for the rate used should be provided. If the rate is approved during the budget review, the revised rate may be used in the President's budget. To the extent that a separate rate of increase is used for any portion of a line item, for example, Equipment Maintenance by Contract, the applicable item should be subdivided into appropriate subcategories for each separate rate of increase used. The rate of price change for lines 401, 402, 411-415, 502-506, 601-693, and 701-721 should agree with applicable rates approved by OSD. Applicable rates of price growth, as prescribed by OSD, or as estimated and justified, as appropriate, should be shown for all items where there is a price change. The rate of price growth included in the President's budget will in all instances reflect the rate of increase approved during the OSD budget review.
- (6) The amount shown for each appropriate line (exclusive of line 991), the Foreign Currency Rate Difference column will reflect the difference in the budgeted foreign currency exchange rates between the two years. For the prior and current years, the budgeted foreign currency exchange rates are the exchange rates that have been approved for recording obligations during execution. If the current year execution rates have not yet been established by the Congress in time for the budget submission, the foreign currency exchange rates reflected in that fiscal year's President's budget request will be used – unless changed by subsequent guidance from the OUSD (COMPTROLLER). For the biennial budget years, the budgeted foreign currency exchange rates are the exchange rates reflected in the OUSD (C) budget call memorandum for the budget submission or in the PBD issued during the budget review in the formulation of the President's budget request. (Note: Variances from the budgeted rates will be reflected only on line 991. These variances do not enter into the calculation on any of the other lines.) The column total, including line 991, will reflect (1) for the PY to the CY: the difference between prior year actuals and the current year budgeted rates, and (2) for the CY to the BY: the difference between budgeted rates in each year. If transfers are approved for the current year, the column total will reflect (1) for the PY to the CY: the difference between PY actuals and CY anticipated expenditures and (2) for the CY to the BY: the difference between the CY anticipated expenditures and the BY budgeted rates. No foreign currency rate difference will be shown for Defense Working Capital Fund Purchases and Travel or Transportation for AMC, MSC or MTMC. Only in unusual circumstances should an amount for foreign currency rate difference shown for other travel and/or transportation costs. (See end notes for further discussion of foreign currency entries.)

Exhibit OP-32 Summary of Price and Program Change

(Page 7 of 13)

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (7) The price growth column should show the amount of price growth for various items. **Where a percent increase by line item is shown in column 6, the amount included in column 7 will be the sum/difference of the previous fiscal year's program amount (column 4) and the foreign currency rate difference amount (column 5) times the percent shown in column 6.** The amount of the price growth will be consistent with the rate of change prescribed by OSD. The price increase for all items should be the additional/reduced funds, as a result of price changes, that would be required to accomplish the previous year's program at applicable fiscal year rates.
- (8) Enter the amount of program growth for each item. Program growth is to be priced in current year dollars for the current year exhibit, biennial budget year 1 dollars for the biennial budget year 1 exhibit, and biennial budget year 2 dollars for the biennial budget year 2 exhibit.
- (9) Enter the sum of (4), (5), (7) and (8) for each item.
- (10) Subtotals should be included in (4), (5), (7), (8) and (9) for Civilian Personnel, Travel, Defense Working Capital Fund Supplies and Materials Purchases, Defense Working Capital Fund Equipment Purchases, Other Defense Working Capital Fund Purchases, Transportation, and Other Purchases, as applicable.
- (11) Program amounts for Civilian Personnel compensation should be consistent with amounts shown in both the object class distribution reflected in the Program and Financing Schedules for Object Classes 11, 12 and 13 (Direct Obligations only) and in the OP-8 Exhibit, Civilian Personnel Costs (Direct Funded), Chapter 3 of the Financial Management Regulation for the applicable fiscal year. Payments made to the Department of Labor for expenses associated with employee's disability compensation are included in Object Class 12. Change in the number of compensable days per fiscal year will be reflected as program growth, not price growth. The annualization of the prior year's pricing changes (i.e., the previous fiscal year's pay raise), merit pay, bonuses, FERS participation, etc. will be reflected as changes in price growth. (See Volume 2A, Chapter 3)
- (12) Program amounts for travel should be consistent with amounts shown in Object Class 21 (including subclasses), for the applicable fiscal year.
- (13) AMC, MSC, and MTMC costs displayed for items; 701, 702, 703, 705, 706, 707, 708, 711, 714, 715, 716, 717, 718, 719, 720, 721, 725, and 771 should include all purchases from these transportation funds. These amounts should exclude all non-Defense Working Capital Fund purchases such as reimbursement to MTMC of non-Defense Working Capital Fund (overseas) port operations.
- (15) Line 703 JCS Exercises includes only those services in support of JCS exercises and paid only by The Joint Staff (TJS).
- (16) The total of the program amounts for Defense Energy Support Center (DESC) Fuel, Defense Working Capital Fund Fuel, and Locally Procured Fuel (Non-Fund) line items must agree with the amounts shown on the OP-26 Exhibit, POL Consumption and Costs, Chapter 3, Financial Management Regulation.

Exhibit OP-32 Summary of Price and Program Change

(Page 8 of 13)

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (17) Include Object Class 26 supplies and materials purchased from each Defense Working Capital Fund, including DLA.
- (18) Include Object Class 26 supplies and materials purchased from GSA.
- (19) Include all equipment (including furniture) purchased from Defense Working Capital Fund, including DLA.
- (20) Include all equipment (including furniture) purchased from GSA.
- (21) Include amounts to be paid for motor vehicles leased from both commercial services and the General Services Administration (GSA) Interagency Fleet Management System (IFMS). .
- (22) Includes centrally managed items procured by the Defense Working Capital Fund from sources other than Defense Working Capital Fund or non-Defense Stock Funds.
- (23) Include purchases of MTMC services for non-Fund services such as overseas port terminal operations.
- (24) Program amounts should be consistent with Fund purchases included in Object Class 25.3.
- (25) Budget year (BY) program amounts should reflect stabilized rates as requested by the Service (OSD submission) or as approved by OSD (President's Budget), as applicable, to include the impact of biennial budget years' pay raises. Cost reimbursable purchases should be included on line 679. Separate elements of expense for each Defense Working Capital Fund activity group are shown on page 3. Include only those elements of expense for Defense Working Capital Fund activity groups from which purchases were made or are planned, as applicable.
- (26) Includes the Aerospace Maintenance & Regeneration Center (AMARC).
- (27) Line 653, Airlift Services, Other AMC Purchases, includes Medical Evacuation Operations, Training, Search and Rescue, and other AMC costs not provided for in lines 701, or 702.
- (28) Includes all Defense Working Capital Fund purchases made on a cost reimbursable (rather than stabilized rate) basis.

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (29) Includes contractual charges for transportation of things via commercial air, sea, or surface mode and payments for commercial port operations and other transportation services exclusive of payments to the Defense Working Capital Fund.
- (30) Program amounts should be consistent with direct obligation amounts shown in the OP-8 Exhibit, Civilian Personnel Costs, Chapter 3. (See Volume 2A, Chapter 3)
- (31) Charges for rental of space and related services assessed by GSA as Standard Level User Charge (SLUC) charges. Program amounts will be consistent with the amount shown in Object Class 23.1.
- (32) Program amounts included for items 913-915 and 917 will be consistent with the amounts shown in Object Class 23.
- (33) Purchases from non-Defense Working Capital Fund sources heat, light, power, water, gas, electricity and other utility services, exclusive of transportation and communication services.
- (34) Purchases of communication services from non-Defense Working Capital Fund sources.
- (35) Payments for possession and use of land, structures, and equipment (other than transportation equipment) owned by another, except for SLUC charges assessed by GSA.
- (36) Purchases from the U.S. Postal Service including postage (other than Parcel Post), rental of post office boxes, postage meter machines and mailing machines. Also includes payments made to the U.S. Postal Service for handling of officially franked mail (i.e., Indicia Mail).
- (37) Includes supplies and materials purchased from other than Defense and non-Defense Working Capital Fund.
- (38) Program amounts should be consistent with the amounts shown in Object Class 24.
- (39) Covers contractual equipment maintenance other than depot level (e.g., ADP/office equipment, etc.) not otherwise covered under IT Contract Support Services.
- (40) Includes costs for sustainment and restoration/modernization of buildings, facilities, pavement, airfields and like items when done by contracts with the private sector.
- (41) Equipment purchased from the private sector, including equipment included in Federal Supply Group 71, Furniture. Program amounts should be consistent with amounts reported under Object Class 31.01.

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (42) Covers overseas contractor operated installation costs when covered in a single contractual agreement or when service is provided by a single contractor (excludes separate contracts for specific, limited services such as contract ADP services).
- (43) Covers contracted service cost of Air Force Air Defense Systems (e.g., BMEWS, DEW Line, Spacetrack, Thule AFB base maintenance contracts, DSP) and Space Support programs.
- (44) Includes the cost of ship related repair and the performance of regularly scheduled ship overhauls at commercial shipyards.
- (45) Includes the cost to Depot Maintenance to purchase aircraft maintenance from commercial sources.
- (46) Includes payments for all other non-Defense Working Capital Fund depot maintenance costs whether performed in-house or by contracts which have not been reported under lines 928 or 929.
- (47) Program amounts should be consistent with Exhibit PB-15, (Advisory and Assistance Services), Chapter 19 of the Financial Management Regulation). The amounts reflected should agree with Object Class 25.1.
- (48) Program amounts should be consistent with the amounts shown in Object Class 41.
- (49) Charges for contractual services not otherwise reported elsewhere and consistent with amounts shown in Object Class 25.2.
- (50) Amounts on line 991 will reflect variances from budgeted rates, as prescribed by OUSD (COMPTROLLER) guidance, which have actually occurred in the prior year or which have been approved (by DD-1415 or PBD) for the current year. There will be no amounts reflected on line 991 in the price and program growth columns. For the President's budget, the amount in the prior year column will be the realized variance on the 30 Sep DD Comp(M) 1506 report. Under no circumstances will there be an entry on line 991 in the biennial budget year. (For a further discussion, see Foreign Currency notes at the end of these instructions).
- (51) Total program amounts, in (4) and (9), will be equal to the total direct program for prior year (PY), current year (CY), and budget year (BY), as applicable.
- (52) Includes fuel purchased from sources other than the Defense Working Capital Fund.
- (53) Includes funds for the purchase of pharmaceutical drugs budgeted in the Defense Health Program.
- (54) Usage of long distance communications comparable to commercial services.

Exhibit OP-32 Summary of Price and Program Change

(Page 11 of 13)

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (55) Include costs of long distance communications mandated by military readiness, security and interoperability.
- (56) Funding supports critical Army production capabilities and maintains essential infrastructure to meet mobilization surge requirements for ammunitions processing, ordnance, and depot maintenance activities during national emergencies.
- (57) Other Intra-government purchase includes purchases between other Components not already included in another OP-32 line item.
- (58) Program amounts should be consistent with the amounts shown in Object Class 25.6
- (59) Program amounts should be consistent with Section 803 of Public Law 111-84 (FY 2010 National Defense Authorization Act).
- (60) Program amounts should reflect reimbursements to the Defense Security Service for personal security investigations.
- (61) Includes amounts reported, respectively, under Object Classes: 25.6, 25.8; 32.0; 42.0; 43.0; and 91.0.
- (62) For use by SOCOM only to record MFP-11 civilian pay reimbursements.

Note: In order to be consistent with the OMB A-11, all Components are required to comply with the Crosswalk of OP-32 Line Items to CIS Object Classes.

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

Foreign Currency Notes

- A. The Total for Foreign Currency Rate Difference (Column 2) must reflect the difference between:
1. PY to CY: Prior year actuals and current year budgeted rates or anticipated expenditures in the current year if transfers have also been approved for the Current Year. (For the latter, individual line items in column 2 (except for line 991) will reflect the difference in budgeted rates and line 991 in column 2 will reflect the transfer amount.)
 2. CY to BY: Current year budgeted rates or anticipated expenditures in the current year if transfers have also been approved for the current year, and biennial budget year 1 budgeted rates.
- B. Individual line items in Column 2 (except for line 991) must reflect the difference in program costs that are caused only by a difference in budgeted foreign currency exchange rates between fiscal years.
- C. Line 991 - Foreign Currency Variance
1. Prior Year (PY) to Current Year (CY)
 - a. PY column equal Realized variance (DD Comp (M) 1506 Report 30 Sep). Column 2 equal Reverse the realized variance amount in the PY column. CY column equal zero
 - b. If transfers have been approved in the CY, PY column equal Realized variance (DD Comp (M) 1506 Report 30 Sep). Column 2 equal Reverse the realized variance amount in the PY column and add the transfer amount approved for the CY to determine the total. CY column equal the transfer amount approved for the CY.
 2. Current Year (CY) to Budget Year (BY)
 - a. If the budgeted rates change between the CY and the BY and transfers from the Foreign Currency Fluctuations, Defense (FCF, D) appropriation are not reflected in the budget, then the CY column, Column 2, and the BY column for line 991 are all zero.
 - b. If budgeted rates change between the CY and the BY and the FCF,D transfers have been reflected in the budget for the CY, then the CY column for line 991 will reflect the value of the transfers and Column 2 for line 991 will reflect the reversal of the transfers. The BY column for line 991 will be zero.

Definitions

Component: All DoD Military Departments, active and reserve components, including the Defense Activities and Agencies that have Selected Quality of Life resources, are to submit the OP-34 Exhibit each year.

Programs:

Military MWR Program -- as defined in DoDI 1015.10, "Programs for Military Morale, Welfare, and Recreation (MWR)"

Civilian MWR Program -- as defined in DoDD 1015.8, "DoD Civilian Employee Morale, Welfare, and Recreation (MWR) Activities and Supporting Non-Appropriated Fund Instrumentalities (NAFIs)"

Lodging Program -- as defined in DoDI 1015.12, "Lodging Program Resource Management"

Overseas Contingency Operations Mission NAFI -- as defined in DoDD 1015.1, "Establishment, Management and Control of NAFIs"

Armed Services Exchange -- as defined in DoDD 1015.1, "Establishment, Management and Control of NAFIs" and DoDD 1330.9, "Armed Services Exchanges"

Family Support -- as defined in DoDI 1342.22, "Family Centers"

Off Duty and Voluntary Education -- as defined in DoDI 1322.25, "Voluntary Education Programs" includes tuition assistance and other voluntary education programs.

Exhibit OP-34 Fund Support for Selected Quality of Life Activities

(Page 1 of 7)

Exhibit OP-34 Fund Support for Selected Quality of Life Activities (Continued)

Category:

Military MWR Category A -- Mission Sustaining Programs

Military MWR Category B -- Basic Community Support Programs

Military MWR Category C -- Revenue-Generating Programs

TDY Lodging -- Temporary Duty (TDY) Lodging is official travel quarters for TDY personnel

PCS Lodging -- Permanent Change of Station (PCS) Lodging is official travel quarters for PCS personnel and their families and normally provides some type of kitchen facilities.

Tuition Assistance -- Funds provided solely for direct, enrollment-related military tuition assistance

Other Voluntary Education -- Other costs not identified or captured under the tuition assistance category above; voluntary education-related personnel, equipment, supplies, travel and conference attendance should be included here. PACE, DANTES, VEAP, eArmyU and any other similar programs not paid for directly from tuition assistance funding should be included here.

Fund Source: Direct Support is direct program operation and direct overhead as defined below.

Direct Program Operation: All appropriated fund costs (in-house and contract) provided to directly operate an individual MWR program, such as physical fitness, libraries, or recreation (as defined in enclosure 4 of DoDI 1015.10 for military MWR programs). Costs include military and civilian personnel including benefits; travel; training; supplies; equipment (includes rental and maintenance); contracted services; and Family Child Care subsidy. For Overseas Contingency Operations Mission NAFIs include only the appropriated funds related directly to the operation of the NAFI. Do not include appropriated fund costs of the mission program.

Direct Overhead: At installation and headquarters, overhead is appropriated fund direct costs that are attributable to more than one MWR program and are associated with the general management or administrative support of MWR programs. Overhead costs include military and civilian personnel including benefits; travel; training; supplies; equipment (includes rental and maintenance); contracted services; and other support related to all levels of managerial staff functions and positions located above the direct program managerial and operational level of individual MWR programs. These resources support planning, organizing, directing, coordinating, and controlling the overall operations of MWR programs. It consists of program, fiscal, logistical, and other managerial functions that are required to ensure oversight.

Indirect Support: All appropriated fund Base Operations support costs to MWR programs and activities. Base Operation costs are budgeted and executed by a non-MWR activity that supports installation-wide services. Costs include military personnel support; civilian personnel services; facility and infrastructure support (including fire, health, safety); equipment operation; financial and accounting services; installation procurement and common warehousing; communication; installation information systems; legal services; transportation services; second destination transportation; utilities and real property rents; refuse collection; custodial and janitorial services.

Activity: Individual MWR programs within Military MWR Categories listed above.

Appropriation: Treasury Code, defined set of four-digit numeric codes from the Comptroller that identifies funding resources by type, organization and components.

Resource Type: Identify Funding by Appropriation (i.e., O&M and dollars in thousands) or Appropriation and Manpower type (i.e., O&M and Civilian FTE and number)

Exhibit OP-34 Fund Support for Selected Quality of Life Activities (Continued)

Instructions for Completing the Quality of Life Resources Database

- 1) For PY-1 through BY provide direct funding for Fund Source=Direct Program Operation by QOL Category, Activity, Appropriation and Resource Type. Provide funding for all other Fund Sources where specified in the matrix below by QOL Category, Appropriation, and Resource Type. Provide Manpower using Fund Source= Direct Program Operation by QOL Category, Appropriation and Resource Type. Do not enter any cost more than once.
- 2) For BY+1 through BY+4 provide direct funding for Fund Source =Direct Program Operation by Appropriation and Resource Type rolled up at the QOL Category level except for the following Activities in the matrix below—A.3, and B.1.1 through B.1.5. Provide funding for all other Fund Sources where specified in the matrix below by QOL Category, Appropriation, and Resource Type. Provide Manpower using Fund Source= Direct Program Operation, by QOL Category, Appropriation and Resource Type. Do not enter any cost more than once.
- 3) Choose an appropriation with each resource type reported on -- for example O&M and funding for dollars or O&M and Civilian FTES, and Military Personnel and Officer and Military Personnel and TOA for funding.
- 4) Provide Indirect Support at the MWR Category level for PY-1 to BY.
- 5) Provide URD Practice and USA Practice (considered memo entries) dollars at the MWR Category level for PY-1 to BY.
- 6) In preparing the OP-34 detail the Services/Defense Agencies should use the program definitions contained in the DoDI 1015.10, "Programs for Military Morale, Welfare, and Recreation (MWR)"; DoDI 1015.12, "Lodging Program Resource Management"; DoDD 1015.8, "DoD Civilian Employee Morale, Welfare, and Recreation (MWR) Activities and Supporting Non-Appropriated Fund Instrumentalities (NAFIs)"; DoDD 1015.1, "Establishment, Management and Control of NAFIs"; DoDI 1342.22, "Family Centers"; and DoDI 1322.25, "Voluntary Education Programs."
- 7) **MWR only:** Provide in Microsoft Word document a short narrative description of resource changes between CY, and BY, identified separately by MWR category, if 10 percent above or below inflation.

The OP-34 Budget Exhibit must be included in the Budget Estimates Submission and the Congressional justification book each year. The OP-34 data will be **submitted via the Select and Native Programming Data Input System (SNaP) located at <https://snap.cape.osd.mil>. The most current version of this exhibit will be found at this site.** Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-20 should be referred to (703) 697-3101. The **SNaP system will generate this display** from the data provided for MWR programs (military, civilian, lodging, Overseas Contingency Operations mission NAFIs, and armed services exchanges) that includes a title page with the following description of the exhibit: "The Exhibit OP-34 displays total appropriated fund support for the Department of _____ managed Morale, Welfare, and Recreation (MWR) programs." The title page will also include the following definition of MWR programs (from DoDI 1015.10): "The MWR programs are vital to mission accomplishment and form an integral part of the non-pay compensation system. These programs provide a sense of community among patrons and provide support services commonly furnished by other employers, or other State and local governments to their employees and citizens. The MWR programs encourage positive individual values, and aid in recruitment and retention of personnel. They provide the physical, cultural, and social needs, and general well-being of Service members and their families, providing community support systems that make DoD bases temporary hometowns for a mobile military population."

Business Rules

Refer to the table below to identify Program, Category, Fund Source, and Activity Relationships

Indirect Support, URD Practice (memo), and USA Practice (memo) are reported at the MWR Category level only

Subject Matter Experts: Questions regarding this data requirement should be directed to Ms. Carol Potter 703-602-4997 and Major Greg Wise 703-692-8046.

Technical Issues: If you are having difficulty with the data collection system—SNaP, contact the SNaP administrators via the email link at the Web site: <https://snap.cape.osd.mil>

Exhibit OP-34(MWR) Appropriated Fund Support for Morale, Welfare and Recreation (MWR) Activities

APPROPRIATED FUND SUPPORT FOR MORALE, WELFARE AND RECREATION ACTIVITIES (MWR)
(\$ in Thousands)

INSTRUCTIONS:

1. The OP-34 must contain a title page that includes the following description of the exhibit: “The Exhibit OP-34 displays total appropriated fund support (APF) for Dept. of the _____ managed Morale, Welfare, and Recreation (MWR) programs and joint services managed programs.”

The title page must also include the following definition of MWR programs (from DoDI 1015.10): “The MWR programs are vital to mission accomplishment and form an integral part of the non-pay compensation system. These programs provide a sense of community among patrons and provide support services commonly furnished by other employers, or other State and local governments to their employees and citizens. The MWR programs encourage positive individual values, and aid in recruitment and retention of personnel. They provide for the physical, cultural, and social needs, and general well-being of Service members and their families, providing community support systems that make DoD bases temporary hometowns for a mobile military population.”

The title page must also include a short narrative description of all major program changes, identified separately by MWR category.

2. In preparing the OP-34 Exhibit, the Services/Defense Agencies must use the program definitions contained in the DoD Directive 1015.10, subject: Programs for Military Morale, Welfare, and Recreation (MWR), DoDI 1015.12, subject: Lodging Program Resource Management; and DoDD 1015.8, subject: DoD Civilian Employee Morale, Welfare, and Recreation (MWR) and Supporting Nonappropriated Fund Instrumentalities (NAFIs).

3. APF support should include both direct and indirect APF support provided to MWR activities and should include the cost categories reported on the Appropriated and Nonappropriated Fund Expense Summary required by DoDI 7000.12. Direct costs include those costs that can be directly attributable to the activity and include civilian and military pay and benefits, travel, training, supplies and equipment, contracts, and Family Child Care subsidy. Indirect costs include costs that are attributed to more than one activity and include rents, utilities, communications, minor construction, repair and maintenance, contracts, engineering support, etc.

4. APF Common Support - That appropriated fund support, identified as APF support used in the management, administration and operation of more than one MWR program, however, that support or cost is not easily nor readily identifiable to a specific MWR program.

Some examples of APF common support would include: managerial operational functions and positions at an installation, major command or Service, executive and upper management supervision that is functionally located above the operating program manager level and having responsibility for several MWR programs; an installation’s civilian personnel functions; and central accounting office functions.

5. The OP-34 Exhibits must be submitted for the OSD/OMB budget submission each year. The OP-34 exhibit should also be included in the congressional justification books (Volume II - Data Book) each year.

Instructions for creating the display Instructions for creating the display

The OP-41 data will be **submitted via the Select and Native Programming Data Input System (SNaP) located at <https://snap.cape.osd.mil>. The most current version of this exhibit will be found at this site.** Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-20 should be referred to (703) 697-2609. Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-30S should be referred to the Operations Directorate at OPSDirectorate@osd.mil. Questions about the SNaP interface should be referred to the Office of the Director (Program Analysis & Evaluation) Programming and Fiscal Economics Division (703) 693-7825. Technical questions regarding SNaP should be referred to the Information Management and Analysis Group (703) 604-6349.

- 1) Display the Organization and Component under the report title
- 2) For each Weapon System display the weapon system detail as organized above
- 3) Sum all weapon detail reported by SAG and PE at weapon system level

Crystal Reports Sort Order: Organization, Component then Weapon System

Data Center: Operations and Support, Program/Budget

Data Source: SNaP

Database Requirement: One XLS of all data for all organizations as provided-- no calculations

Instructions for Completing the Weapon Systems Readiness Database--Ship Operations

- 1) For Navy only, provide the funding level--by Active and Reserve--for Ship Operations as defined by the Budget Exhibit OP-41 (described in the DoD Financial Management Regulation). Identify the relevant Navy SAG for Ship Operations.
- 2) If OPTEMPO Types are constant for all ships across the program, provide narrative in a word document explaining why.

Definitions:

Organization: The POM reporting entities directed to submit this data requirement. For a complete list of organizations see by data requirement see Appendix A of the PDR.

Component: Active, Guard, and Reserve

SAG: Sub-Activity Group, budget term denoting groupings of resources e.g., Navy SAG: 1B1B.

Program Element: Identify the PE containing the weapon system described by the detail.

Weapon System Type: Provide Ship Type detail for the weapon system described by the detail.

OP-41 Ship Operations Program (Continued)

Weapon System Detail:

Quantity-Identify the number of ships per Ship Type used to determine the steaming days program funding

Steaming Days: -This OPTEMPO Type is the number of steaming days per Ship per Quarter for Deployed and Non-Deployed for both required and funded. For inventory, PEs will be pulled from the Forces FYDP and compared to the Inventory values provided by the Navy.)

Ship Operational (Op) Months - This OPTEMPO Type is the number of months a ship is “operational” (i.e., not in a major repair period)

Funded: Identify funding level for Repair Parts (including reparable parts), Fuel, Consumables, Utilities, Nuclear Fuel, Charter and Other using the OP-41 guidelines, generally defined by Navy Special Interest Codes

Total TOA Required: Provide total TOA required to meet the funded steaming days.

Technical Issues: If you are having difficulty with the data collection system—SNaP, contact the SNaP administrators via the email link at the web site.

Exhibit OP-73 Repair Parts, Army Reserve Components
 (Page 1 of 2)

INSTRUCTIONS FOR COMPLETION OF OP-73

1. **Backlog carried forward from prior years** - unfunded requirements at the end of the previous fiscal year.
2. **Backlog of obsolete parts** - backlog of repair parts associated with equipment that is being retired from the Reserve Forces.
3. **Inflation** - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces times the OSD rate for “general purchases inflation--O&M” or the Defense Working Capital Fund, whichever is applicable.
4. **Adjusted prior year backlog** - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces plus inflation (1-2+3)
5. **Recurring requirements** - annual repair parts requirements to support equipment fielded in previous years.
 - a. **Annual consumption** - those parts consumed annually to support weapons systems fielded in previous years.
 - b. **Change in equipment inventories** - increases or decreases in annual consumption requirements necessary to reflect changes in equipment inventory levels (e.g., retirement of equipment).
 - c. **Change in stockage levels** - increases or decreases in requirements due to changes in the level of repair parts support required annually for a particular equipment.
6. **Nonrecurring requirements** - one time requirements associated with introduction of new equipment to the Reserve Force.
 - a. **Force modernization initiatives** - initial inventory of repair parts associated with fielding of force modernization systems.
 - b. **Introduction of other new equipment** - introduction of other equipment not previously provided to the Reserve Force.
7. **Total funding required** - adjusted prior year backlog plus recurring requirements and nonrecurring requirements.
8. **Funds budgeted for repair parts** - amount budgeted for repair parts each year.
9. **Backlog, end of year** - “total funding required” less “funds budgeted for repair parts”.

INSTRUCTIONS

Report force structure for each model/design/series (MDS) aircraft within each program element. Also identify the command to which the equipment is assigned and the purpose code for the equipment. The force structure should be reported at end of year for the prior year and the outyears and at the end of each quarter for the current year and the budget year (BY). Totals should be provided for MDS and each PE.

Separate exhibits are required for Active Air Force, Air Force Reserve, and Air National Guard.

OP-81 O&M Monthly Obligation Phasing Plan

(Page 1 of 2)

Monthly Obligation Phasing Plan
Current Year (CY)
(continued)

Definitions:

Appropriation: Submit a separate exhibit for each appropriation in the O&M Title. Enter the name of the appropriation in this line.

Component: DoD Component that is the holder of the appropriation.

Total Obligation Authority (TOA): Provide the phased obligation plan for anticipated current year (CY) obligation authority using the TOA as shown in the Comptroller Information System (CIS).

Budget Activity: The phased monthly obligation plan by Budget Activity matching the Budget Activity TOA shown in CIS.

Subactivity Group: Provide all phased monthly obligation plans by relevant Subactivity Group. Totals for Subactivity Groups should reconcile to the phased monthly obligation plan by Budget Activity matching the Budget Activity TOA shown in CIS.

Month: Enter the estimated monthly obligations.

Cum.: Enter the cumulative obligations (current month's obligations plus the sum of previous month's obligations).

Instructions

Reflect program data under “Description of Operations Financed” and “Program Data” sections.

Narrative Explanation of Changes: Provide a succinct narrative explanation of total resource changes (for \$ provide in nearest tenth of a million) between the Current Year (CY) and Budget Year 1 (BY) by relating it to program changes (force structure, end strength, etc.) for the period. Also, identify any applicable major pricing changes between years. Explanation of price and program changes should be provided separately for the Active Fleet as well as the Reserve Fleet. Include all other direct ship operations related costs (fuel, supplies/DLRs, consumables). Do not include indirect support costs such as Base Operations, Facilities Sustainment Repair and Modernization etc.

Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits. Data entered on this exhibit must match the corresponding data entered on the Reserve Components (PBA-11), Appropriation Highlights (PBA-19), Key Activity Indicators (PBA-21), and Special Operations Forces (PBA-26) Exhibits. In addition, the data contained in the O&M Overview should match the data reported in other budget justification material such as the OP-5 (performance criteria), Ship Fuel Data and OPTEMPO Data (OP-40), Ship Operating Cost Data (OP-4), Funding for Depot Level Repairables (OP-31), and Special Operations Forces (OP-52).

Identify on the bottom of the exhibit the preparation date and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

LAND FORCES
COMPONENT TITLE (Con't)

Narrative Explanation of Changes:

Provide a succinct narrative explanation of total resource changes (for \$ provide in nearest tenth of a million) between the current year (CY) and budget year (BY) by relating it to program changes (force structure, end strength, etc.) for the period. Also, identify any applicable major pricing changes between years. For program and personnel data, explain the changes in terms of programs affected and identify changes in functional requirements. . Include all other direct funded land forces-related costs (fuel, supplies/DLRs, consumables). Do not include indirect support costs such as Base Operations, Facilities Sustainment Repair and Modernization etc.

Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Subactivity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits). Data entered on this exhibit must match the corresponding data entered on the Reserve Components (PBA-11), Appropriation Highlights (PBA-19), Key Activity Indicators (PBA-21), and Special Operations Forces (PBA-26) Exhibits as appropriate. In addition, the data contained in the O&M Overview should be consistent with the data reported in the performance criteria of the Detail by Subactivity Group (OP-5).

Identify on the bottom of the exhibit preparation date and a point-of-contact who is knowledgeable about the content of the data reflected on the exhibit, as well as a telephone number for the individual.

PROGRAM NARRATIVE EXPLANATION OF CHANGES. For all DHP, O&M programs, provide a succinct narrative explanation of total resource changes (for \$ provide in nearest tenth of a million) between the current year and biennial budget year 1 and between biennial budget year 1 and biennial budget year 2 by relating it to program changes (force structure, end strength, etc.) and pricing changes for the period. Also, identify any applicable major pricing changes between years. Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and OP-5 exhibits and with data included in other justification material. Identify on the bottom of the exhibit the preparation date and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

NOTE: Procurement, RDT&E and Major OT&E justification material should be presented in accordance with the requirements in the applicable chapters of the Financial Management Regulation.

NOTE: Information on this exhibit must be consistent with information on PB 11, PB 11A, and PB 11B (Defense Health Program Summary Data).

Narrative Explanation of Changes: Provide a succinct narrative explanation of total resource changes (for \$ provide in nearest tenth of a million) between the Current Year (CY) and Budget Year (BY) by relating it to program changes (force structure, end strength, etc.) for the period. Also, identify any applicable major pricing changes between years. Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits. Identify on the bottom of the exhibit the preparation date and a point of contact (POC) who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

Exhibit PBA-27 Psychological Operations

InstructionsExhibit PBA-27 Psychological Operations (Information Operations)

1. Purpose. This exhibit identifies funding for Psychological Operations (Information Operations) programs. The data is used to prepare the overall Psychological Operations (Information Operations) budget exhibit for the O&M Overview Book.

2. Submission.

a. Exhibit PBA-27 should identify all Psychological Operations (Information Operations) funding by Combatant Command for all PSYOP activities. PSYOPS are planned operations to convey selected information and indicators to foreign audiences to influence their emotions, motives, objective reasoning, and ultimately the behavior of foreign governments, organizations, groups, and individuals. The execution of the PSYOP includes conducting research on various foreign audiences; developing, producing, and disseminating products to influence these audiences; and conducting evaluations to determine the effectiveness of the PSYOPS activities.

b. Data are to be provided in millions of dollars, using 3 decimal points and will include both Baseline and Overseas Contingency Operation funding for all appropriations.

c. Submission of the required exhibit will be made in hard paper copy and in an Excel format.

d. The submission of the completed exhibit is required for both the Program Budget Review and with the President's Budget submissions. Both submissions must be provided and emailed to the OUSD(Comptroller), Operations Directorate, at OPSMAIL@OSD.MIL . The President's Budget Submit must be submitted no later than January 15 in order to be included in the "Operations and Maintenance Overview" Justification Book.

3. Entries.

Exhibit PB-27 Psychological Operations (Information Operations)

a. Header: Classification of the Document: Unclassified, if at all possible keep the information unclassified if not indicate what portions of the document is classified.

b. Description of Operations Financed. Brief description of items funded, i.e., COCOM Voice Programs, MIST, Media/Video Print Production, Web initiatives, surveys, audience/media analysis, radio broadcasting.

c. Appropriation/COCOM. List the COCOM that has oversight of the funding and the appropriation. Also indicate if the funds are budgeted in OCO or Baseline programs.

Exhibit PBA-27 Psychological Operations

Exhibit PB-58 COCOM Direct Funding

**Combatant Command Direct Funding
Instructions for completing the PB-58 Exhibit**

The PB-58 will not be required for either the Budget Estimate Submission or the President's Budget if the Joint Task Assignment Process Business Rules have been incorporated to include the Military Service's creation of a SAG for the Combatant Commands headquarters functions and a SAG for the mission set.

Component/Agencies are required to submit this exhibit for programs funded in Operation and Maintenance appropriations and obligated by the Commanders of the Combatant Command (COCOMs). The purpose of the PB-58 is to provide program and budget justification and visibility for changes in the level of resources required for each COCOM.

The PB-58 provides essential information for justification of the OSD/OMB Program and Budget Review Submission and the President's budget. Section III; The "Reconciliation of Increases and Decreases" should identify changes that are occurring. Each change must be explained with programmatic reasons and an explanation as to why the change is necessary.

The PY column of the OSD/OMB Program and Budget Review submission should reflect actual data through the first three quarters plus a realistic projection for the remaining quarter. For the PB submission, the PY column will reflect actuals and agree with the data reflected in the certified annual yearend DD Comp 1002 report.

The "Reconciliation of Increases and Decreases" section will be included in the PB-58 for both the OSD/OMB Program and Budget Review Submission and the President's budget submission. Reconciliations will show all changes from fiscal year to fiscal year and, for the current year, a track from the estimate requested in the previous President's budget. Specifically display:

The BY estimate included in the previous President's budget submission to the current CY estimate included in this submission,
The current FY CY estimate to BY estimate reflected in this submission.

Personnel summaries are required for each subactivity group and for each Defense Agency.

Copy requirements are identified in Chapter 1. In addition, one electronic copy (each) of the PB-58 Exhibit is to be provided to the OUSD(C) P/B Operations directorate, (OPSMail@osd.mil).

This exhibit includes five sections:

- I. Financial Summary: (O&M and Other Appropriations)
- II. Individual COCOM Financial/Program Data

Provide P-58 Section II detail for each COCOM separately. 2. Use continuation pages, as necessary for mission descriptions. 3. The CY/BY amounts include all funds appropriated/budgeted in this appropriation for execution by this COCOM. 											

COCOM O&M Direct Funding

COMPONENT/AGENCY NAME _____
Operation and Maintenance, _____

I. Reconciliation of Increases And Decreases (O&M only): (Provide Section IIIA as a total summary of all COCOMs supported, and a separate one for each COCOM)

Provide a trail of changes from the previous President's budget request for the current fiscal year in this submission to the appropriated amount for the CY in this submission to the CY in this submission; and from the CY current estimate to the FY BY estimate. Provide a single entry in each year for price changes. Itemize and justify the major program changes in each year (**provide the baseline in dollars to which the increase or decrease applies**). Such justification should clearly explain programmatic changes in resource levels including why increases are required or decreases occur. The DoD Components should report in thousands.

In the reconciliation of changes from the previous President's budget request for the CY to the estimate for CY in the current submission, the DoD Components should include the following adjustments:

Distributed Congressional Adjustments: Adjustments that Congress specifically makes to the President's budget request.

Undistributed Congressional Adjustments: Adjustments outlined on the tables contained in the statement of managers accompanying the appropriations conference report. The Components must use discretion as to how these adjustments are applied to minimize negative impacts on force readiness.

Adjustments to Meet Congressional Intent: Adjustments that are required in order to align funding for a congressionally approved program into the proper budget activity and subactivity to carry out the intent of the Congress.

General Provisions: Adjustments directed by the Congress in appropriations law, the distribution of which is not explicitly stated. The PB-58 should separately display each General Provision adjustment.

Program Increases and Decreases: The Operation and Maintenance (O&M) fact of life changes (functional transfers and emergent requirements) are programmatic, intra-appropriation adjustments made by DoD Components to address significant, unforeseen operational readiness issues.

This section needs to be provided by Military Department for each COCOM supported.

CHAPTER 4

PROCUREMENT APPROPRIATIONS

1.0 GENERAL (0401)

1.1 Purpose (040101)

This chapter provides instructions applicable to budget formulation and congressional justification for procurement and production activities. Unless otherwise specified, these instructions apply to all procurement appropriations and to all budgets.

1.2 References (040102)

Volume 2A, Chapter 1, Section 0102, provides policies and definitions concerning costs that are to be financed by the procurement appropriations.

1.3 Submission Requirements (040103)

1.3.1. General guidance with regard to submission requirements is presented in Volume 2A, Chapter 1. This chapter provides guidance for the preparation of procurement appropriation backup material required to support the Budget Estimates Submission (BES) and the President's budget request. The procurement accounts should also submit applicable exhibits required by other chapters in the Financial Management Regulation. The Components will also submit any exhibits required by the Office of Management and Budget (OMB) Circular A-11, Preparation and Submission of Budget Estimates.

1.3.2. Military Departments and Defense Agencies are responsible for clearing the justification material with the Washington Headquarters Services, Directorate for Freedom of Information and Security Review, prior to transmittal to OMB and the congressional committees.

1.4 Classification (040104)

The budget justification material should be unclassified. All classified material shall be submitted separately. Components must include a P-40 Budget Justification exhibit for special access programs (SAPs) that are not labeled as secret. The P-40 exhibits for SAPs must only include funding streams and cite the following justification: "This program is reported in accordance with Title 10, United States Code, Section 119(a)(1) in the Special Access Program Annual Report to Congress." All other (non-intel and non-SAP) classified funding requests must be identified (submit a one page P-40 exhibit) within unclassified justification budget materials.

2.0 PROCUREMENT EXHIBIT REQUIREMENTS (0402)

2.1 Purpose (040201)

This section prescribes instructions for the preparation and submission of procurement appropriations budget material to support the BES and the President's budget request. See Volume 2A, Chapter 1, Section 0104, for specific printing requirements.

SUMMARY OF EXHIBIT REQUIREMENTS

<u>Exhibit</u>	<u>Appropriation</u>
P-1 Procurement Program	All
P-1M Procurement Program - Modification Summary	Aircraft/Missiles
P-1R Procurement Program - Reserve Components	All, except SCN
P-3a Individual Modification Program	All, except SCN
P-5 Cost Analysis	All
P-5a Procurement History and Planning	All, except SCN
P-8a Analysis of Ship Cost Estimates - Major Equipment	SCN
P-10 Advance Procurement Requirements Analysis	All, as applicable
P-18 Initial and Replenishment Spares Requirements	All, except SCN
P-20 Requirements Study	All, as applicable
P-21 Production Schedule	All
P-27 SCN Ship Production Schedule	SCN
P-29 SCN Outfitting Costs	SCN
P-30 SCN Post Delivery Costs	SCN
P-35 Major Ship Component Fact Sheet	SCN
P-40 Budget Item Justification Sheet	All
P-40a Budget Item Justification for Aggregated Items	All
MYP-1 Multiyear Procurement Criteria (SNaP)	All, as applicable
MYP-2 Total Program Funding Plan (SNaP)	All, as applicable
MYP-3 Contract Funding Plan (SNaP)	All, as applicable
MYP-4 Present Value Analysis (SNaP)	All, as applicable

2.2 Submission Requirements (040202)

2.2.1. Extensible Markup Language (XML) Exhibits. All Components must submit required budget exhibits as PDFs with the source XML file embedded. These PDFs will be generated by one of the following two processes:

2.2.1.1. Submit an XML file to the XML Tools section of the Comptroller XML Exhibits web site, <https://exhibits.dtic.mil/r2/app> (for Components capable of building an XML file from an internal system). The XML files submitted through the XML Tools section must be compliant with the latest Procurement XML schema, located within the same section of the web site; or,

2.2.1.2. Create a Procurement exhibit manually within the "Create New P-40" section of the Comptroller XML Exhibits web site, <https://exhibits.dtic.mil/p40>.

2.2.1.3. The result of either process will be a PDF file with an XML file embedded. All Procurement exhibit PDFs/XMLs must be assembled into a Justification Book(s) within the same website using one of the Justification Book tools and posted to the SIPRNET website <https://cisweb.ousdc.osd.smil.mil/>.

2.2.1.4. Formats and examples of the exhibits are contained in Section 3.0.

2.2.2. Each backup book will include an Exhibit P-1, Procurement Program, an index of procurement lines (including P-1 line number, line item title, line item number, and backup book page number), and specific exhibits for those items covered by the backup book.

* 2.2.3. All applicable budget exhibits will be prepared for those programs with a budget year (BY) funding value of \$5 million or greater. For non- Major Defense Acquisition Programs (MDAPs)/Major Automated Information Systems (MAIS) programs with a BY funding value less than \$5 million, only the P-40 exhibit is required. No other subordinate exhibits will be submitted for those programs with a total BY funding value less than \$5 million. MDAP/MAIS programs must submit all required budget exhibits regardless of BY funding value.

2.2.4. Periodically, changes to standard budget exhibit formats may be directed through separate guidance (for example, through the Budget Estimates Submission guidance). This guidance may precede formal adoption of exhibit changes into the Financial Management Regulation, or direct temporary exhibit changes, such as including funding for Overseas Contingency Operations (OCO). These changes will be incorporated into the applicable XML exhibit templates.

2.2.5. The exhibits will be aggregated in the following order for each P-1 line item, as applicable to that line item and submitted in P-1 line item order.

Arrangement of Exhibits – General (except as noted below)

P-1	Procurement Program
P-40	Budget Item Justification
P-40a	Budget Item Just for Aggregated Items
MYP 1-4	Multiyear Procurement
P-10	Advance Procurement Requirements Analysis
P-5	Cost Analysis
P-5a	Procurement History and Planning
P-21	Production Schedule
P-25	Production Support and Industrial Facilities Cost Analysis
P-18	Initial and Replenishment Spares Requirements
P-20	Requirements Study (BES only, as applicable)

Arrangement of Exhibits for Modifications

P-1	Procurement Program
P-1M	Modification Summary
P-40	Budget Item Justification
MYP 1-4	Multiyear Procurement
P-3a	Individual Modification Program
P-40a	Budget Item Just for Aggregated Items

Arrangement for Ship Procurement Accounts

P-1	Procurement Program
P-40	Budget Item Justification
MYP 1-4	Multiyear Procurement
P-10	Advance Procurement Requirements Analysis
P-5	Cost Analysis
P-27	Ship Production Schedule
P-8a	Analysis of Ship Cost Estimates - Major Equipment
P-29	Outfitting Costs
P-30	Post Delivery Estimates
P-35	Major Ship Component Fact Sheet

Arrangement for Ammunition Accounts

P-1	Procurement Program
P-40	Budget Item Justification
P-40a	Budget Item Just for Aggregated Items
P-5	Cost Analysis
P-5a	Procurement History and Planning
P-21	Production Schedule
MYP 1-4	Multiyear Procurement
P-18	Initial and Replenishment Spares Requirements
P-20	Requirements Study (BES only, as applicable)

Chemical Agents and Munitions Destruction

The Chemical Agents and Munitions Destruction, Defense appropriation contains multiple types of funds (Operation and Maintenance (O&M), Research, Development, Test and Evaluation (RDT&E), and Procurement) in separate budget activities. While the RDT&E and O&M efforts may be incrementally funded, the Procurement program must comply with the full funding policy. The Army is required to provide the justification book in the following order:

Table of Contents

Appropriation Language

Appropriation Justification

Part I	Purpose and Scope
Part II	Justification of Funds Required
Part III	Milestones

Budget Activity 1: Operation and Maintenance

Part I	Purpose and Scope
Part II	Justification of Funds Required
Part III	Financial Summary

Budget Activity 2: Research, Development, Test and Evaluation

Part I	Purpose and Scope
Part II	Justification of Funds Required
Part III	Financial Summary
RDT&E	RDT&E Exhibits (See Chapter 5)

Budget Activity 3: Procurement

Part I	Purpose and Scope
Part II	Justification of Funds Required
Part III	Financial Summary
P-40	Budget Item Justification
P-5	Cost Analysis
P-5a	Procurement History & Planning
OP-5 (Pt 1)	Budget Activity Summary (See Volume 2A, Chapter 3)
OP-5 (Pt 2)	Activity Group Detail, Including a Reconciliation of Increases and Decreases (See Volume 2A, Chapter 3)
OP-32	Summary of Price and Program Changes (See Volume 2A, Chapter 3)

2.2.6. P-Series Major Platform Quantities

Congress requires that all Major Platform end items, including Service Life Extension Programs, Major Defense Acquisition Programs (MDAPs), and Major Automated Information Systems (MAIS), reflect quantities on all P-series (i.e., P-1, P-40, P-5, etc.) budget exhibits. For those Major Platform end items where there are different variants being procured (e.g., Family of Medium Tactical Vehicles), total quantities should not be entered on the P-1 exhibit or in the Program Resources Collection Process (PRCP) database, but specific quantities by variant must be provided on all other P-series documents. Major Platform end items are defined as the new procurement of:

- Aircraft
- Unmanned Air Vehicles
- Ships
- Missiles
- Tanks
- Combat and Tactical Vehicles
- Satellites

For programs that are not considered Major Platforms, quantities are to be included in all P-series exhibits (e.g., P-40, P-5, P-5a, etc.) with the exception of the P-1 exhibit.

2.2.7. Major Defense Acquisition Programs (MDAPs)/Major Automated Information Systems (MAIS)

2.2.7.1. Joint budget guidance from the Under Secretaries of Defense for Acquisition, Technology & Logistics (AT&L) and Comptroller directs that all MDAPs or MAIS will be budgeted in separate, dedicated Procurement (P-1) line items, and associate all of the funding for a given MDAP/MAIS with a PRCP Program Number (PNO).

2.2.7.2. For all MDAP/MAIS programs, the P-40 Budget Item Justification exhibit must include the PNO. Components must also ensure that all applicable years of the PRCP and FYDP annex data bases are updated to reflect the program budget estimates for all MDAP/MAIS programs, including all prior years and cost-to-complete columns. Each MDAP/MAIS subprogram is a component that will be identified by appropriation, budget line item, and budget activity under the End Item P-1 Line Item header.

2.2.8. Multiyear Procurements (MYP)

2.2.8.1. Volume 2A, Chapter 1, section 010203, provides guidance for MYP programs. The MYP exhibits are required for new candidate systems seeking MYP funding in the budget year (BY); multiyear contracts approved in prior years that have been significantly restructured; and MYP candidates that are requesting BY advance procurement funding in support of a later year MYP contract. Any changes to the MYP budget justification and backup materials, as approved by OUSD(C), must be re-submitted via SNaP. The approved MYP exhibits must be included in the Justification book along with the other procurement exhibits for that program.

2.2.8.2. Annual Congressional Multiyear Reporting Requirement. Section 2306b(1) of Title 10, United States Code (Multiyear Contracts) directs the Secretary of Defense to submit an annual report to the congressional defense committees regarding multiyear contracts. The OUSD(C) is responsible for coordinating the consolidated report.

2.2.9. Subsystem Budget Estimates

Any platform that includes funding for subsystems that are designated as Defense Acquisition Executive Summary or Selected Acquisition Reporting programs must identify the specific subsystem funding by fiscal year and by subsystem on the P-5 exhibits (or P-35 exhibit for SCN). The program must be labeled “MDAP/MAIS Subprogram: Program Name” and include the associated PNO. For example, “MDAP/MAIS Subprogram: Air Missile Defense Radar (AMDR), PNO: 384.”

2.2.10. Congressionally authorized and requested Advance Procurement funds for major end items must be clearly identified on all P-series exhibits for each end item by fiscal year for the program. Programs authorized to execute advance construction labor within their advance procurement must cite in the P-10 Exhibits description that “advance procurement items, including advance construction labor, is limited to components whose long-lead times require purchase early in order to reduce the overall procurement leadtime of the major end item.”

2.2.11. If an amended budget is submitted, applicable revised budget exhibits are required.

2.2.12. Guard and Reserve Procurement

2.2.12.1. Exhibit P-1R, Procurement Program - Reserve Components, shows all investment funding allocated for National Guard and Reserve Component equipment, to include quantities and costs of procurement items. The Military Departments are required to identify the applicable memo entries by P-1 Budget Line Item those lines that include quantity and funding for the National Guard and Reserve Components for each fiscal year (PY, CY, BY, BY+1 through BY+4, To Complete). The Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) generates the P-1R based on the FYDP data in PRCP.

2.2.12.2. All supporting procurement justification documentation must clearly annotate equipment allocated to the National Guard and Reserves. Specifically, the P-40 Budget Item Justification exhibit and the P-21 Production Schedule exhibit must contain a non-add memo entry indicating the funding and delivery schedule for all of the items being procured for allocation

to the National Guard and Reserve Components. This data must balance to the data in the PRCP database.

2.2.13. Dual-Use Equipment

All Components must include the following statement on their P-40 exhibit for all Army, Navy, Marine Corps, and Air Force Active and Reserve dual-use equipment items: “In accordance with section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.”

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (0403)

This Section presents the backup book organization and the exhibit requirements for submission to Congress. See Volume 2A, Chapter 1, Section 0104 for specific printing requirements. Justification material will be organized into a Committee Staff Procurement Backup Book. Volume 2A, Chapter 1, Section 010403 provides a detailed distribution schedule for the procurement backup books. A separate congressional committee backup book will be prepared for the President’s budget request for each procurement appropriation.

Section 1 - Summary Material

Table of Contents

P-1 listing (P-1 Exhibits will be prepared using the OUSD(C) automated system with input from the Services and Defense Agencies)

Section 2 - Budget Appendix Extract Language

Section 3 - P-1 Line Item Detail. Procurement budget exhibits will be organized as discussed in paragraph 040203.D.

4.0 PROCUREMENT APPROPRIATION BUDGET EXHIBIT FORMATS (0404)

4.1 Standardized budget exhibit formats. (040401)

Section 4.2 describes the use of XML budget exhibits for procurement appropriations. In addition to the key attribute of making budget exhibit data electronically searchable, the XML exhibits standardize the various budget displays, enabling more effective and efficient budget formulation, review, analysis, and submission.

4.1.1. The exhibit formats provided on the following pages reflect guidance presented in previous sections.

4.1.2. The use of XML exhibits is mandatory for BES and President's budget request backup justification material.

4.1.3. XML exhibits will automatically standardize formatting, to include:

4.1.3.1. Exhibits displayed on 8 1/2 inch by 11 inch paper in landscape format.

4.1.3.2. Actual fiscal years (e.g., FY 2016, FY 2017, etc.) rather than the template entries (i.e., Prior Years (PYs), Prior Year (PY), Current Year (CY), Budget Year (BY), BY+1, BY+2, BY+3, and BY+4 and "to complete" where applicable).

4.1.3.3. Annotating the applicable P-1 line item number (using the number shown on the OSD-generated P-1 exhibit from PRCP) and page number within the line item (e.g., Item 1-1 of 5, 2-1 of 1, 3-1 of 20, etc.) at the bottom center of each exhibit page.

4.1.3.4. Properly paginate the backup book.

***4.2 Procurement exhibit formats (040402)**

There are 22 procurement exhibits that support the formulation and submission of the BES and the President's budget request. The exhibits provide data and information that justifies budgetary requirements for the various procurement appropriations. The exhibit formats follow. Volume 2B, Chapter 19, Other Special Analyses, also identifies budget exhibits that may be required.

Instructions – Procurement ProgramExhibit P-1, Procurement ProgramExhibit P-1M, Procurement Program - Modification SummaryExhibit P-1R, Procurement Program - Reserve Components

General.

A. A summary by budget project/activity will be prepared for each appropriation, showing the amount for each project/activity and the total program for each appropriation. The detail of the consolidated line items in this entry should be available upon request. There should be no consolidation into a "Less than \$5.0 million" line item for any line item requiring specific quantity authorization and for any Code B item (i.e., items not approved for Service use).

B. Unless otherwise prescribed for a specific commodity area, only procurement line items with funding of \$5.0 million or more in the Prior Year (PY), Current Year (CY) or Budget Year (BY) will be listed individually. Items less than \$5.0 million should be consolidated into a single line item entry, "Items less than \$5.0 million," under each budget activity.

Exhibit P-1, Procurement Program Instructions. Provide funding and applicable quantities by budget activity and line item. Data must match submission to the PRCP data base.

Advance Procurement. Advance procurement should be debited and credited according to the lead-times of the advance procurement. For instance, if FY 2015 and FY 2016 Advance Procurement funds are required for a FY 2017 procurement, the FY 2015 Advance Procurement funds would be debited in FY 2015, the FY 2016 Advance Procurement funds would be debited in FY 2016, and the total of the FY 2015 and FY 2016 Advance Procurement funds would be credited in FY 2017.

Advance Procurement

FY TOA	<u>FY 2015</u>	<u>FY 2016</u>	<u>FY 2017</u>	<u>FY 2018</u>	<u>FY 2019</u>	<u>FY 2020</u>

FY 2019 for FY 2020 (memo)					x	
FY 2019 for FY 2021 (memo)					x	
FY 2020(memo)						-x
FY 2020 for FY 2021 (memo)						x
FY 2020 for FY 2022 (memo)						x

(Exhibit P-1, page 4 of 6)

Exhibit P-1 Instructions (Continued)

List each aircraft and missile type and model separately, for both new procurement and modifications. Each ship type, Outfitting, Post Delivery, Cost Growth, Escalation, Service Craft, and Landing Craft will be listed as separate line items.

Include initial and replenishment spares financed in procurement appropriations in a single line item. Indicate the amounts included for initial and replenishment spares separately as subentries. For this purpose, all spare aircraft engines shall be considered initial spares.

All line items will be double spaced.

Costs will be expressed in millions of dollars using one decimal place, i.e.:

(\$ in Millions)
15.6

List the following Support Equipment and Facilities as separate line items:

Common Ground Equipment
Industrial Facilities
War Consumables
Other Production Charges
Classified Projects
Production Base Support
Space Programs (list separately)
Astronautics

Specific instructions.

Appropriation. Include the title and number of the appropriation, i.e., 2034A, Procurement of Ammunition, Army.

Budget Activity. Include the number and title of the budget activity, i.e., Budget Activity 04, Spare and Repair Parts.

Column 1: Include the P-1 line item number (generated from the OSD PRCP database).

Column 2: Item Nomenclature. Identify the name of the program. This must match what is shown in PRCP.

Exhibit P-1 Instructions (Continued)

Column 3: Identification Code. The letter "A" or "B" will be entered in this column. Line items will be appropriately coded according to the status of the item at the time the exhibit is prepared as follows:

Code "A". Line items of material that have been approved for Service use. The term "approved for service use" means that:

Army. The item has been type-classified as Standard (STD) and excludes Limited Procurement (LP) type-classification that is included in the development category.

Navy. The item has been approved for full rate production.

Air Force. The item has been approved for full rate production.

USSOCOM. The system is effective, suitable, safe, and logistically supportable. Release for Special Operations Forces is in conjunction with full rate production decision.

Code "B". Line items or material that has not been approved for Service use.

Columns 4-11: Self-explanatory.

Exhibit P-1M, Procurement Program - Modification Summary Instructions

This exhibit will be prepared for all years reflected on the sample P-1M exhibit and will represent a summary by weapon system of all individual modifications that are requested for that weapon system.

Show the total procurement cost in millions using at least one decimal place for each individual modification and total cost for that weapon system or family of models of that weapon system. For example, all models of the F-4 aircraft would be included in the F-4 line (e.g., RF-4B, F-4B, F-4E, F-4G, etc.), and all models of the AIM-7 missile would be included in the AIM-7 line (e.g. AIM-7E, AIM-7F, AIM-7M, etc.). Total modification cost will include only those costs budgeted in the individual P-1 line item, including installation costs.

Exhibit P-1R, Procurement Program - Reserve Components Instructions

In addition to the instructions for the P-1, Procurement Program, the P-1R line item entries will be exactly the same line item entries as the P-1. The Exhibit P-1R line items will include 2 sub-line items. One is for the National Guard and one is for the Reserve. Subtotal of the two lines is not required, but the total for the Reserve Components cannot exceed the amount of funding included in the P-1 line item. All procurement line items having funding for National Guard and Reserve requirements, including advance procurement, ammunition, and spares and repair parts, will be included in the P-1R exhibit and be provided for all years (i.e., for PY, BY, BY+1 – BY+4). Each Military Department is required to update the PRCP database for this information supporting the National Guard and Reserve for both the BES and the President's Budget submissions.

(Exhibit P-3a, page 2 of 5)

Instructions - Exhibit P-3a, Individual Modification

* This exhibit will be submitted for all individual modifications whose costs are greater than \$5.0 million in the budget year. Except as noted, individual modifications whose costs are less than \$5.0 million in the budget year will not submit this exhibit.

For Other Procurement appropriations, when only a simple modification kit is being procured and installation is being performed at the organizational level, there is no need to submit an Exhibit P-3a as long as the P-5 and P-21 include the necessary information.

The sample exhibit displays additional line items for equipment and Group A installation kits. Tailor line item entries to the modification content. Use additional lines when quantities for these components differ from the quantity of end items being procured or when a unit cost comparison between years cannot be performed.

Model. Enter the model and series designation (e.g., A-10, AGM-86, F/A-18, etc.).

Classification. Enter the modification classification or type (e.g., safety, reliability, added capability, etc.), as applicable.

Modification No. And Title: Identify the modification number and title.

Description/Justification: Provide a description of what additional capability is added to the system by this modification, and why the modification is necessary (i.e., to increase reliability, maintainability, or mission capability). If the modification is related to reliability and maintainability, indicate the current Mean-Time Between Failure (MTBF) rate of the system, what MTBF will be specified in the development/production contract, and the estimated annual savings. Identify all engineering change proposals included in the modification and provide a brief description of each and how they relate to the particular overall effort. Identify the operational requirement document (ORD) that validates the modification. Identify the quantity of aircraft in the inventory and the quantity that will receive the modification, as identified in the ORD. For example, the total objective for a radar modification might be 75 units at an estimated unit cost of \$300,000 each or total cost of \$23.5 million. Twenty units have been procured in prior years, 10 units are included in the budget year leaving 45 units to be procured in subsequent years. Identify when a different number of Group A and Group B kits are being procured (the ORD should also include this information). Identify the applicable quantity of National Guard and Reserve end items ensuring quantities and costs match the P-1R. Do not use abbreviations or acronyms of a highly technical nature. Spell the acronyms the first time and abbreviate thereafter.

Development Status/Major Development Milestones: Provide status of engineering effort testing and data package availability as of the budget submission date. Provide significant accomplished and planned milestone dates such as Preliminary Design Review (PDR), Critical Design Review

(Exhibit P-3a, page 3 of 5)

Exhibit P-3a Instructions (Continued)

(CDR), completion of Contractor Test and Evaluation (CTE), completion of Development Test and Evaluation (DTE), completion of Initial Operational Test and Evaluation (IOT&E), etc.

Financial Plan:

Note: Prior year column includes all funding from beginning of program through the Prior Year-2 (PY-2). Quantities and costs should be provided for all applicable line items. PY-1, PY, and CY are the fiscal years currently available for obligation.

RDT&E: Enter programmed RDT&E resources by fiscal year. These resources should be consistent with the Program Element Summary Data Sheets for RDT&E programs.

* Procurement: Categories of cost shall be tailored to the individual system consistent with the program's approved work breakdown structure (WBS) elements or modification content. Use as many line items as necessary to show this data. Enter the recurring and nonrecurring cost of the installation kits. Installation kits (Group A kits) are the provisions (e.g., cables, brackets, interface devices) necessary to prepare the system to accept the new equipment. Enter the recurring and nonrecurring cost of the equipment (Group B kits) to be installed (e.g., radar, ECM, engine etc.). If different quantities of kits are being procured for various engineering change proposals within a modification (or operational system improvement program), list the ECP A kit and ECP B kit as separate line item entries (i.e., a line item for the A kit and a line item for the B kit). Do not use an asterisk to indicate that the quantity cannot be shown because a mix of end items with different procurement quantities is being procured. This precludes the need for an addendum and presents all cost information together. Exhibits should reflect all costs and quantities from prior years (PYs) through To Complete (TC).

Installation. The installation costs should be portrayed in the year of actual installation so that the total cost of the installation is portrayed for each year's procurement of end items. Procurement quantities and installation quantities reflected in the procurement detail should equal the quantity displayed in the installation schedule.

Method of Implementation: Indicate how installation will be accomplished (e.g., Contractor, Depot field team, Depot modification line, etc.).

Contract Date: Enter the actual/estimated contract date (month/year, not quarter) for the item with the longest lead time.

Production Delivery Date: Enter the actual/estimated production delivery dates (month/year, not quarter) for the initial item of installed equipment for the current year and budget year.

Exhibit P-3a Instructions (Continued)

Installation Schedule: For modifications procured through the Budget Year (BY), show system inductions and modification completions by quarter. An installation schedule is required for all programs requiring installation funds. However, if the modification is being installed organically (i.e., by service managed and operated depots or field activities) and no installation funds are required, then no schedule is required. The schedule will include completed inductions for total Prior Years, Prior Year, and planned inductions for all uninstalled equipment for CY, BY, BY+1, BY+2, BY+3, and BY+4, and To Complete, as necessary, to account for installation of all modifications procured through the BY. Input and output must equal each other, as well as equal the total quantity of kits procured. Input and output refer to the start and end date of the modification into the aircraft (or end item). This information is required to determine when kits need to be procured. The input and output date is used as a barometer to determine the feasibility of the schedule (and thus, the procurement profile). For ongoing programs, identify the separate program using alpha or alpha-numeric suffixes to the current modification number. Include separate installation schedules for those items that have more than one method of implementation.

Exhibit P-5, Cost Analysis
(Exhibit P-5, page 1 of 8)

Instructions - Exhibit P-5, Cost Analysis

Purpose. The purpose of this exhibit is to provide detailed cost information in support of Exhibit P-1 line items consistent with the appropriate work breakdown structure (WBS) elements for the program. It is essential that this exhibit be complete and accurate, as it is the most important exhibit in the backup book. Requirement exhibits and production schedules are related to the entries on this exhibit, and it is used as the framework for line item review. The program and budget review submission will include P-5 exhibits containing detailed cost element data for fiscal years (FYs) from prior years (PYs) through the Budget Year (BY). Out-year cost element data is no longer required and will not be submitted.

General. This exhibit will be prepared for all procurement programs for which funds are requested in the P-1 exhibit. If two or more Services procure the same system, the P-5 exhibit cost elements should be as identical as possible except for Service unique requirements. A P-5 exhibit is not required for those programs that use a P-40a exhibit to display items included in an aggregated line item or if an Exhibit P-3a Modification Summary, has been prepared for a line item.

Entries:

Heading. Insert Appropriation, Budget Activity, and identification code (as identified on the Exhibit P-1 generated from the OSD PRCP database) in the appropriate block. Insert the Exhibit P-1 line item title and add after the title the subhead number for the line item in parenthesis.

Elements of Cost. Categories of cost shall be tailored to the individual system consistent with the program's approved work breakdown structure (WBS) elements. Standard categories are to be used for similar type systems (i.e. aircraft, ships, missiles, tanks, satellites, ammunition, etc.).

Production Support Services. Use generic entries such as Production Engineering, Engineering Services, Quality Assurance, Acceptance Testing, Product Improvement, etc. Include the name of the performing activity (for example, Production Support - NOP Indian Head, or Material Handling - Iowa AAP) only when needed to further clarify the generic categories.

Quantity/Total Cost entries. The quantity related to any cost element will be stated in units (not thousands). Only those entries where quantitative measurement is applicable should have entries in the quantity column. For example, the term "1 set" should not be used for publications, entries, documentation, etc. If the item is not subject to quantitative measurement, leave the column blank. The total cost for a cost element entry will be shown in millions, using 3 decimal places, i.e., 1.225. All cost columns will be totaled.

Advance Procurement Funding. Add (debit) the advance procurement funding in each fiscal year and subtract the advance procurement funding (credit) from the fiscal year the advance procurement supports. Ensure the credit is against the correct fiscal year (check leadtimes). Generally, Advance Procurement debits and credits will net to zero in the "total costs" column. If they do not net to zero, Components must provide rational why they do not.

Initial Spares. Separately identify initial spares funding and include in the total for the net weapon system/end item cost.

Instructions - Exhibit P-5, Cost Analysis (Continued)

Unit Cost. The unit cost should be displayed for each flyaway cost element on the P-5 exhibit. This should be a manual entry, not computed. Otherwise, there could be lost budget authority if a reviewer (OSD, GAO, or congressional staff) asks to see the unit cost for a particular item from the contract. The last entry line, or overall weapon system unit cost, for each FY is the procurement unit cost.

Aircraft Cost Element Categories.

Airframes/Contractor Furnished Equipment (CFE): Enter estimate for recurring airframe cost, airframe contractor furnished equipment, and engineering changes.

Engine/Accessories: Enter total engine cost including accessories. As part of stub entry, enter quantity of engines per aircraft and indicate model designation including all “dash” designators (example: Engines (4) 53-L-13). Engine unit cost column will reflect the cost of one engine.

Avionics: Separately identify CFE and Government Furnished Equipment (GFE) avionics equipment.

Armament: Enter costs for all armament.

Software: Software costs are to be separately identified.

Other GFE: Enter costs for all Other GFE.

Engineering Change Orders (ECOs) - Flyaway: Include cost of anticipated, but unknown ECOs and value engineering changes for all installed aircraft components (CFE or GFE). Engineering Change Orders should be funded commensurate with the level of risk in the program.

Nonrecurring Costs: Enter total nonrecurring costs associated with production of the flyaway article. Identify and separately display funds budgeted for production tooling in the nonrecurring cost category.

Other Costs: Use as many line items as necessary to identify elements and associated costs.

Airframe Peculiar Ground Support Equipment (PGSE): Enter cost of peculiar airframe ground support equipment.

Engine PGSE: Enter cost of peculiar engine ground support equipment.

Peculiar Training Equipment: Enter cost of all peculiar training equipment.

Publications/Technical Data: Enter cost of all CFE/GFE publications and technical data.

ECOs - All Support Items. Enter cost of ECOs anticipated but unknown for all support and training equipment.

Other: Use as many line items as necessary (example: aerial cameras, or jammer transmitter sets, receiver sets or sensor sets for special mission aircraft). These items are not necessarily procured on a one-for-one basis with aircraft.

(Exhibit P-5, page 3 of 8)

Exhibit P-5 Instructions (Continued) Missile Cost Analysis

A missile P-5 exhibit will be submitted by all Services for each missile/drone type and model. If more than one model or configuration is procured in the same P-1 line item, then individual P-5 exhibits will be prepared for each model or configuration and a summary P-5 exhibit will also be prepared for the P-1 line item. Weapon systems that are composed of fire units or launchers that are procured in the same P-1 line item as the missile will provide separate cost identification for each vehicle of the fire unit or launching system (launcher, launch control center, radar set, vehicle, etc.). The cost categories on the P-5 exhibit represent a number of elements and the list should be tailored as appropriate to adequately depict the missile system cost. The flexibility exists to revise the elements to depict unique system characteristics, but a comparable cost detail to that shown in the P-5 exhibit format should be maintained.

Missile P-5 Cost Element CategoriesMissile Hardware - Recurring

- Airframe
- Propulsion (By stage, where applicable)

(Exhibit P-5, page 6 of 8)

Exhibit P-5 Instructions (Continued)**Other Procurement Cost Analysis.**

A. Unique entries will vary depending on the nature of the procurement item. Most line items require more than one procurement action to complete the program. If only one contract is involved, the line item is composed of several separate cost elements such as the end item itself, publications, engineering services, production support, etc. Each of these elements (called "building blocks" for simplicity) carries its own dollar value. The sum of the building block values equals the line item value. In general, entries on this form should be structured in the same way that procurement has been accomplished (or is planned) and/or the way that the cost estimate for the line item was derived. For new programs, it is not always possible to predict exactly how procurement will be accomplished but the cost estimate for the line item is built up through price out of separate cost elements that are known to be required.

B. Care should be taken to ensure that the building block title accurately describes the effort. Frequently, attempts are made to use the same building block entry for more than one year when the program effort in the following year is not exactly the same. For example, Model A of particular equipment is procured in one year and an improved Model B version planned for the following year. Separate stub entries should be used to avoid comparisons of unlike items.

Ammunition Procurement Cost Analysis.

A. For items to be procured through the Single Manager for Conventional Ammunition (SMCA), the P-5 will be used to display the program cost breakdown. The Service is responsible for justifying and defending its budget request for ammunition even if the item has transitioned to the SMCA for procurement. The production support section should depict the cost of production support materials and services that are included in the P-1 line item. When the developing Service retains configuration management responsibility for a SMCA-procured item, the developing Service will formulate the production engineering cost estimate, but all other estimates will be formulated by the SMCA.

B. Actual ammunition quantities will be displayed unless the quantities being procured are in the millions (the quantities will then be displayed in thousands). Dollars will be displayed in millions, using 3 decimal places, i.e., 1.225. Normal rounding methodology will be utilized.

C. The hardware section should include the full cost of hardware incorporated into the round or item that is included in the P-1 item line. The hardware section entries should be tailored to match the major components of the ammunition item and should reflect the acquisition strategy. If two or more Services procure the same ammunition/ordnance round, the P-5 Exhibit should be as identical as possible except for Service-unique requirements. If the round is to be procured using a component breakout strategy, the entries should include, as applicable, the following: load-assemble-pack, major metal parts, fuzes, explosives, propellants and shipping containers.

(Exhibit P-5, page 7 of 8)

Exhibit P-5 Instructions (Continued)

Any small-dollar value components that are non-significant/non-problem can be rolled up into an Other, Miscellaneous line (the dollar amount of this line will not exceed 20 percent of the program value). Where an all-up round is to be delivered under a systems contract, the cost of the all-up round may be displayed as a single entry.

D. The production support section should depict the cost of production support materials and services that are included in the P-1 line item. The following standard entries should be used as applicable: production engineering, quality assurance, proof and acceptance testing, interim transportation and industrial stock support. Any other categories should be added as required and identified accordingly (e.g., special testing). When configuration management responsibility is retained by the Navy or Air Force as developing Service, the production engineering cost estimate will be formulated by the developing Service, but all other estimates will be formulated by the SMCA.

E. The nonrecurring cost section should depict the cost of such items as first article testing, product improvement, value engineering, tooling and test equipment, procurement technical data package updates, start-up/layaway costs and/or other special requirements identified accordingly. In the event that applying government-furnished material or components can reduce the cost of the round, the negative entry will be shown in this section.

F. Each section's subtotal should be displayed at the end of the subentries listing.

G. The total P-1 line item is equal to the sum of subtotal cost of hardware, procurement support and nonrecurring less the Government Furnished Material (GFM) applications. This entry must agree with the P-1 value for the ammunition item.

P-1 Line Item No X

Exhibit P-5a, Procurement History and Planning

Instructions - Exhibit P-5a, Procurement History and Planning

1. Purpose. This exhibit provides detailed information on the P-5 entries regarding all prior years having contracts with undelivered assets, current year (CY) and budget year (BY). Contract information is used to compare cost estimates between fiscal years by comparing unit costs on previous contracts. For example, if an item was awarded in FY 2015 using FY 2014 funding, is the FY 2017 cost based on an FY 2014 cost inflated 3 years, or to an FY 2016 cost inflated one year? The contract information is used to determine if there has been a problem awarding the contract early or late in the fiscal year and if it occurred as planned. The contract information also is used to identify potential current year assets and to answer congressional inquiries.

2. Submission. Exhibit P-5a will be submitted for all P-5 elements of cost (building block) entries involving quantities in the current or budget year. Information for PY, CY, and BY will be updated for each succeeding submission.

3. Entries.

Cost Elements (Building Blocks)/Fiscal Year. The cost element/building block title is to be taken from the Exhibit P-5 Cost Analysis for items meeting the criteria of paragraph 2. For each cost element, provide information for the PY, CY, and BY. The first fiscal year line will provide information on the last buy prior to the current year (if the item was procured in a fiscal year that is no longer available for obligation, identify the fiscal year for which the item was last procured. Update CY and PY entries to show actual contractor and contract award dates. For the BY, use best estimates.

If Advance Procurement funding is part of the program, then provide contract data for each subsequent year to support the leadtime of the advance procurement. For example, if advance procurement is required 2 years in advance of BY, then provide contract data through BY+2.

Quantity and Unit Cost. Insert PY actual quantity procured and actual unit cost. For the CY and BY lines, insert actual or estimated unit costs. The quantities and unit costs should agree with entries on the Exhibit P-5 Cost Analysis exhibit, except for the ammunition items that are fixed standard priced. For these ammunition items, the entries should be the actual unit costs that were negotiated and/or estimated. This update is necessary for the initial starting point for computing future fixed standard prices. Provide an explanation in the remarks block for all items for which the actual unit costs vary significantly with the forecasted unit costs.

Procurement Contracting Office (PCO) Location. Identify the organization that will award the contract. Also identify the organization preparing the purchase request, if different.

Contractor. For each fiscal year, insert actual contractor name, and facility or plant location (city and state). For the current year, insert contractor name if item is to be sole source or if procurement has been accomplished; otherwise insert "Unknown". For budget year, insert contractor name if sole source; otherwise use "Unknown". Identify the city/state location of the contractor plant.

(Exhibit P-5a, page 3 of 5)

Instructions - Exhibit P-5a, Procurement History and Planning (Continued)

Contract Method/Type. The following codes will be used to identify the "Contract Method/Type":

Contract Method

SS - Sole Source
C - Competitive
MIPR - Military Interdepartmental Purchase Request (use only if MIPR obligates funding)
PO - Project Order
WR - Work Request
Allot - Allotment
Reqn - Requisition
Other - Explain by footnote

Contract Type

FP - Fixed Price
CPIF - Cost Plus Incentive Fee
CPAF - Cost Plus Award Fee
FPI - Fixed Price Incentive
Option - Option to prior year contract
Other - Explain by footnote

Additionally, indicate those contracts that are multiyear procurements by placing the code "MYP" and a corresponding number to indicate the year of the MYP after the Contract Method/ Contract Type as in the following 5-year MYP example:

SS/FPIF/MYP-1 (indicates this is the first year of the MYP)
SS/FPIF/MYP-2
SS/FPIF/MYP-3
SS/FPIF/MYP-4
SS/FPIF/MYP-5

Follow the pattern of the "Contractor" block in displaying actual and estimated contract method and type. "Option" refers to an existing contract that contains an option clause for future procurement. Identify whether the option is priced (already negotiated) or unpriced.

Award Date. For the last actual buy, provide the date that the contract was awarded. For the current year, provide the actual or estimated date. Provide estimated contract award dates for the BY. If the contract is a multiyear contract or a contract with options, identify the date that the option will be exercised.

Date of First Delivery. Same basis as Award Date.

Technical Data Package Available Now. Answer "yes" or "no" for the current year and budget year. No entry is required for prior year. The answer is to be provided as of the time the exhibit is prepared. The term "specifications" refers to full competitive specifications (or their equivalent in the case of a sole source contract).

(Exhibit P-5a, page 4 of 5)

Instructions - Exhibit P-5a, Procurement History and Planning (Continued)

Date Revisions Available. No entry is required for the prior year line if the contract has been awarded. If revisions are required, provide in last column the date or estimated date when they will be available.

Use Footnotes to provide reasons for Sole Source procurement; to provide reasons for use of letter contracts; to provide reasons why a multiyear contract cannot be used; to explain significant variations in unit cost from year to year, etc.

P-1 Line Item No X

Exhibit P-10, Advance Procurement Funding
(Exhibit P-10, page 2 of 4)

Instructions - Exhibit P-10, Advance Procurement Requirements Analysis**Page 1 - Budget Justification entries.**

This format will include funding for all Prior Years through the Budget Year (BY). Out-year data is not required and will not be submitted.

Appropriation (Treasury) Code/CC/BA/BSA/Item Control Number. This entry should match the procurement annex.

P-1 Line Item Nomenclature: Self-explanatory.

Weapon System Type: End item for which advance procurement is required.

First System Award and Completion Date: Enter the month/year (do not use quarters) of the projected contract award for the end item for which the funds in the budget year supports. For example: FY 2017 advance procurement funds are required in support of an FY 2018 procurement. The FY 2017 AP supporting the FY 2018 end item procurement will be awarded in March 2017 and the FY 2018 procurement will be awarded in January 2018. Enter March 2017. If the manufacturing processes require 24 months, then the item will be delivered in March 2019. Enter March 2019.

Interval Between Systems: Enter the time between end item deliveries.

Column 1. The first entry should be the procurement quantity budgeted for each year (specify the actual fiscal year rather than showing the template years) for the end item for which the advance procurement is requested. In addition, list the items that are required to be purchased ahead of the end item. Be specific as possible. Some examples are:

Contractor Furnished Equipment (CFE): This entry includes all advance procurement funding associated with effort accomplished by the prime weapon system contractor (e.g. airframe contractor for aircraft; guidance and control contractor for missiles, satellites; chassis contractor for tanks, engines, nuclear propulsion equipment for ships).

Government Furnished Equipment (GFE): This entry should include a separate entry for each major subcomponent furnished by the government (e.g. engines and radars for ships and aircraft; warhead, fuzes, and rocket motors for missiles; engines and major electronic subsystems for tanks, satellites).

Economic Order Quantity (EOQ): This entry includes items for which an economic order is justified. List each item separately. The entry will require additional justification showing the analysis that supports an EOQ procurement in an advance procurement line.

Instructions-Exhibit P-10, Advance Procurement Requirements Analysis (Continued)

Other Advance Funding. This would normally include non-EOQ funding that is requested in advance of authorization of the end item and is not based on leadtime considerations but based on price/cost considerations only.

Column 2. Production Leadtime (PLT). Enter the number of months required to manufacture the end item.

Column 3. Enter the number of months after the manufacturing process begins that the item is required for incorporation into the end item.

Columns 4-15. Enter the approved funding for all years of the program.

Page 2 Entries:

Column 1. List the items that need to be purchased ahead of the end item. This column should match the entries in column 1 on page 1.

Column 2. Production Leadtime (PLT): Enter the production leadtime of this particular item.

Column 3. Quantity Per Assembly (QPA): Indicate the quantity of the item required for each end item.

Column 4. Unit Cost: Enter the unit cost in tenths of millions.

Column 5. BY Qty: Enter the total quantity being procured in the BY. For the end item enter the quantity (qty) of end items being procured in subsequent years and identify by qty and year for which the advance procurement in the BY supports.

Column 6. BY Contract Forecast Date: Enter the date of the planned contract award for each of the items listed in column 1. For the end item enter the date of planned contract award of the end items being procured in subsequent years for which the advance procurement in the BY supports.

Column 7. Cost: Enter the cost in millions with one decimal place.

Description. Describe the technique used to estimate the termination liability request. If advance procurement funding is to be applied to years beyond the immediately succeeding year, the amounts and quantities by year should be specified and explained.

Exhibit P-18, Initial and Replenishment Spares and Repair Parts Justification
(Exhibit P-18, page 1 of 2)

Instructions - Exhibit P-18, Initial/Replenishment Spares Requirements

The purpose of this exhibit is to provide the funding requirements for the procurement of initial and replenishment spares and repair parts in support of end items of equipment and in support of modifications to existing end items of equipment where end items of equipment are being supported by procurement appropriations. A copy of this exhibit will be included in the budget justification book for the end item for the Budget Estimates Submission only.

Entries:

Column 1. Enter the budget Exhibit P 1 line item and end items of equipment for which the initial spares and repair parts are required.

Columns 3 through 13. Enter the total cost of the initial or replenishment spares and repair parts for each fiscal year displayed in support of the end items procured. Funding must be consistent with the P-1 and P-40 exhibits.

If some of the initial spares and repair parts are to be financed by the DWCF or for buy-out by a procurement appropriation, provide a memorandum entry to indicate the DWCF-financed portion or footnote accordingly.

Include the following information in the remarks block.

Procurement Requirement:

Funded Initial Spares.

Funded Replenishment Spares.

Funded Mobilization (War Reserve) Spares.

Total Funded.

Repair Turnaround time.

REMARKS: For ammunition items, list all substitute items for the round.					

P-1 Line Item No X
(Page X of X)

Exhibit P-20, Requirements Study
(Exhibit P-20, page 1 of 4)

Instructions - Exhibit P-20, Requirements Study

1. Purpose. The purpose of this form is to provide detailed information with regard to the determination of asset availability and requirements.

2. Submission. The P-20 exhibit is required only for the Budget Estimates Submission (BES) for ammunition and weapons procurement accounts but can be used for other procurement accounts as determined by the Services and Defense Agencies. The P-20 exhibit is required for only those items costing \$20.0 million or more in the budget year (BY).

3. Entries.

Leadtimes: Administrative leadtime is the amount of time after October 1 that is required to award a contract. Procurement leadtime is the amount of time from contract award until delivery of the first unit.

Quantity Budgeted. Show the quantities, unit cost, and funding approved for this program.

Asset Dynamics. This section will reflect the changing asset position starting with the assets on hand and adjusting for gains and losses. Tailor the entries to the program being represented.

Beginning Asset Position. Use the inventory position as of the end of the prior fiscal year or specify other date. As a memo entry in the remarks section, identify assets that are not in a serviceable condition.

Deliveries from all prior year funding and deliveries from CY and BY funding. Enter the quantity funded during all prior years that are not yet delivered. Show the deliveries or other gains in the fiscal year in which they will be received. The analyst can then compare these entries to the P-21 Production Schedule (deliveries and leadtimes).

Deliveries from subsequent years' funding. Enter the quantity in the appropriate fiscal year. The due-ins should match the P-21 Production Schedule and be reflective of the procurement leadtimes and planned delivery schedules to be included on the contract.

Other Gains. Quantity due in for loans to other Services, other receipts, etc.

Usage. Identify projected annual usage, disposals, retirements, etc. that are projected for each fiscal year. There should be some correlation of the projected usage to actual expenditures. For aircraft, usage equates to attrition, retirement, FMS sales, etc. For vehicles, usage equates to disposals (quantity of vehicles scheduled for disposal through sale, salvage or transfer to another agency).

End of Year Asset Position. Add the gains and subtract the losses from the beginning of the year asset position.

Exhibit P-20 Instructions (Continued)

Inventory Objective (IO). Identify the elements of the IO and the Approved Acquisition Objective, as applicable and approved through the Program Objective Memorandum process. For missiles, munitions, and munitions-related items, use the capabilities based munitions requirements process. Annotate in the Remarks block if the IO is different for any of the FYDP years. Cite the document and the date of the document that established the IO.

Actual Expenditures (for ammunition items). Identify actual expenditures for training and other than training for at least 3 years. For example, for the FY 2018 submission, FY 2017 will be the current year but no usage will have occurred. FY 2016 would be the Prior Year but data will probably not be available for the entire fiscal year prior to the submission. Therefore, show actual usage for FY 2016 through June 30, 2016 and the usage for 3 fiscal years (FY 2015 (Prior Year minus one, PY-1), FY 2014 (Prior Year minus two, PY-2), and FY 2013 (Prior Year minus three, PY-3)).

Authorized Allowances. Enter the authorized Vehicle allowances for units, installations, and activities supported by the appropriations of the service preparing the form. Replacement requirements will be excluded.

Vehicles Eligible for Replacement: Enter the quantity of vehicles eligible for replacement during the budget year funded leadtime based upon the age, repair limits and mileage criteria of DoD 4500.36-R, Acquisition, Management, and Use of DoD Non-Tactical Vehicles.

Vehicle Augmentation. Enter the quantity that represents an augmentation to the inventory. On a separate sheet, list the organizational units and quantities for each unit involved in the augmentation and include a full justification for the augmentation.

Aircraft. Include memo entries for each configuration of aircraft. Identify the acquisition objective determined by The Joint Staff (TJS) inventory category (see Chairman of the Joint Chiefs of Staff Instruction (CJCSI) 4410.01G, Standardized Terminology for Aircraft Inventory Management) for each FY. Explain the basis for the approved acquisition objective and identify the applicable requirements document and approval authority (e.g., TJS/Service) that provides the basis for the approved acquisition objective number.

Also each Service should submit documentation, by aircraft type, that provides the average age and average hours projected for the aircraft and the current age and hours. This documentation is required for all aircraft being procured and modified, as well as for the aircraft that are being replaced. Identify Active, National Guard and Reserve aircraft. Each Service may submit this documentation in formats currently used by each Service, as long as the above information is incorporated.

Entries should include: (1) total overall aircraft inventory; (2) active aircraft inventory, including primary aircraft inventory (with appropriate subcategories for mission aircraft, training aircraft, dedicated test aircraft, etc.), backup aircraft inventory, and attrition/reconstitution reserve; (3) inactive aircraft inventory, including bairment's, drones, foreign military sales or other transfers, leases, loans, maintenance training, reclamation, and storage; and (4) the Joint Staff approved inventory requirements.

Exhibit P-20, Requirements Study (Continued)

Not Installed Nonconsumables. Tailor the asset position to elements that pertain to this category. Include a brief explanation in the remarks block to explain why the entire quantity to meet the IO is not being procured. Include memo entries for those items that total to the entire program inventory objective. Where applicable, the IO will be supported by showing the number of units or activities, by type and quantity required per unit or activity. Example:

	<u>Required</u>
20 Units	40
30 Activities	60
Spares	10
Total IO	110

REMARKS: Identify any items that can be substituted and explain why substitutes cannot be used to satisfy the IO, why expenditures do not represent an accurate portrayal of usage, and any other anomalies.

REMARKS: Use continuation pages as necessary to complete all procurements. If only one component or item is being delivered, show deliveries on one page.

P-1 Line Item No X

Exhibit P-21, Production Schedule
(Exhibit P-21, page 1 of 3)

Instructions - Exhibit P-21, Production Schedule

1. Purpose. The purpose of this exhibit is to provide detailed information with regard to the monthly production of all applicable items.

*2. Submission. Exhibit P-21 will be submitted to show the planned contractual production deliveries for Exhibit P-5 cost elements that have a value of \$5.0 million or more in the budget year (BY). Exhibit P-5 cost elements that have a value of less than \$5.0 million in the BY will not submit Exhibit P-21. Each Service, whether a leader or follower, is to provide the delivery schedule for the entire program. This ensures that each Service has the opportunity to adjust procurement quantities in terms of contractor capability to deliver all assets during the funded delivery period.

3. Entries.

a. Entries will be displayed in the same order as they appear on the Exhibit P-5 Cost Analysis.

b. Use "E" for "each," "M" for "millions" and "K" for "thousands" for unit of measure.

c. Production rates should be yearly rates. The following definitions apply.

Minimum Sustaining Rate. This is the production rate that is necessary to keep production lines open while maintaining a base of responsive vendors and suppliers; the quantity that will preclude start-up costs in the case of a production break; or the quantity that the contractor is willing to accept and produce at a reasonable cost

Economical Production Rate. This is the most efficient production rate for each budget year at which the item can be produced with existing or planned plant capacity and tooling, with 1 shift a day running for 8 hours a day and 5 days a week (1-8-5).

Maximum Production Rate. This is the maximum capacity rate that a contractor can produce with extant or PY planned tooling. Indicate the number of shifts.

d. The following leadtime definitions apply.

Administrative Leadtime (ALT). This is the amount of time required to complete the administrative actions leading to contract award. Since these actions do not require funding, the ALT can be separately identified into prior to October 1 and after October 1. The ALT is used to forecast contract awards. Longer leadtimes require that a larger quantity be purchased to support yearly requirements. Leadtimes should therefore reflect an accurate assessment of the time required to process the administrative actions.

Production Leadtime (PLT). This is the amount of time required by a contractor to produce an item once a contract is awarded. Leadtimes should be based on a realistic projection of a contractor's capability.

(Exhibit P-21, page 2 of 3)

Exhibit P-21 Instructions (Continued)

Procurement Leadtime. This is the total of ALT (post October 1) and PLT.

e. Where procurements are being made for customers such as the FMS program or another Service, a separate line will be used to reflect each customer's planned buy and phased deliveries with a total provided by item by manufacturer. Use A for Army, N for Navy, AF for Air Force, F for FMS, and O for Other (and explain in the remarks section).

f. Enter respective schedules for all prior fiscal years with undelivered assets, for CY, and BY. Show detail of production by month so that analysis can be accurately performed.

g. Missile Delivery Schedule. A separate P-21 exhibit will be prepared for each missile system reflecting the latest actual deliveries and scheduled outyear requirements. When the missile system includes the procurement of fire units or launching systems within the P-1 line item, the missiles and the major components of the fire unit or launching system (launcher, launch control center, radar set, track vehicle) will be depicted on the P-21 exhibit.

h. Ammunition. The total production plan for hardware items should be displayed to include time-phased schedules for LAP and the major limiting or pacing component as applicable. For Improved Conventional Munitions, display schedules for all major components. Provide separate information in those cases where procurement leadtimes for LAP and major components differ.

(Exhibit P-21, page 3 of 3)

Narrative Explanation										

P-1 Shopping List - Item No 20-1 of 20-20

Exhibit P-25, Production Support and Industrial Facilities Cost Analysis
(Exhibit P-25, page 1 of 2)

Instructions - Exhibit P-25 Production Support and Industrial Facilities Cost Analysis

The P-25 exhibit will be used to display costs for each funded production facilities project at all government owned, government operated (GOGO) and government owned, contractor operated (GOCO) facilities. In addition the exhibit will display the costs associated with a facilities project for those government owned lines that are located at contractor owned, contractor operated (COCO) facilities. The cost categories on the P-25 exhibit represent a number of elements and the list should be tailored to adequately depict the production facility project cost. This exhibit is to be submitted only when funding for production support and facilities is part of the current year budget or requested for the budget year. The sections on the P-25 exhibit are to be completed as follows.

Entries:

Construction Cost. The Construction Cost depicts the cost for construction that is funded in this line. If construction funds are required that are programmed in another appropriation, these funds and the associated amount should be identified in the Other Costs section.

Equipment Cost. The Equipment Cost identifies the cost for individual equipment (list separately) costing more than \$0.5 million and a cumulative cost line for all equipment costing less than \$0.5 million.

Equipment Installation Cost. The Equipment Installation Cost identifies the cost to install all the equipment listed.

Contractor Support Cost. The Contractor Support Cost identifies any cost for contractor support included in the production facility project.

Corps of Engineers Support Cost. The Corps of Engineers Support Cost identifies any cost for the Corps of Engineers support included in the production facility project.

Other In-house Support Cost. Should identify any cost for other in-house support (excluding the Corps of Engineers support costs) included in the production facility project.

Other Cost. The Other Cost reflects other costs associated with the project such as facility prove-out cost, military construction appropriation costs, etc.

Facility. The Facility specifies the name, location, and type of facility.

Related Projects. The Related Projects include prior year and outyear funding required to complete the project.

Industrial Facilities - Provide specific line item identification for each project. Group projects under each appropriate subclassification, such as facility expansion, machine tool replacement, etc.

A DD Form 1391, Military Construction Project Data, is required for each project for proposed construction, alteration, expansion, or modernization of government owned facilities.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

(Exhibit P-25, page 2 of 2)

Exhibit P-27, SCN - Ship Production Schedule

[illegible]

Exhibit P-27, SCN - Ship Production Schedule
(Exhibit P-27, page 1 of 2)

Instructions - Exhibit P-27, SCN – Ship Production Schedule

Purpose. The purpose of this exhibit is to provide information concerning production of ships authorized for construction, but not yet delivered, and for each ship programmed for construction in the Future Years Defense Program (FYDP).

General. This exhibit will be prepared for all Ship Construction, Navy (SCN) programs for which ship construction funds are requested in the P-1 exhibit. Ships will be listed in chronological order by the year authorized, then date of contract award, and then by start of construction.

Entries:

Heading. Insert Appropriation, Budget Activity, and identification code (as identified on the Exhibit P-1 generated from the OSD PRCP database) in the appropriate block. Insert the Exhibit P-1 line item title and add after the title the subhead number for the line item in parenthesis.

Ship. Identify each individual ship by Ship Class and hull number (e.g., SSN 792, CVN 79) that has previously been authorized for construction, but has not yet delivered, and each ship that is programmed for construction in the FYDP.

Shipbuilder. Identify the shipbuilder(s) for each ship.

Fiscal Year. List the year funds were appropriated or are programmed for each ship.

Contract Award. Enter the month and year of the shipbuilding contract award (actual or planned) using “MMM YYYY” format (e.g., Dec 2017).

Start of Construction. Enter the month and year that construction began/is scheduled to begin using “MMM YYYY” format.

Delivery Date. Enter the month and year each ship is planned to deliver using “MMM YYYY” format.

Exhibit P-29, SCN Outfitting Costs

[illegible]

P-1 Line Item No X

Exhibit P-29, SCN Outfitting Costs
(Exhibit P-29, page 1 of 3)

Instructions - Exhibit P-29, SCN – Outfitting Costs

Purpose. The purpose of this exhibit is to provide detailed information concerning Outfitting funds for ships authorized for construction, but not yet delivered, and for each ship programmed for construction in the Future Years Defense Program (FYDP).

General. This exhibit will be prepared for all Ship Construction, Navy (SCN) programs for which ship Outfitting funds are requested. Outfitting funds are used to acquire on board repair parts, other secondary items, equipment, recreation items, pre-commissioning crew support and general use consumables furnished to the shipbuilder or the fitting-out activity to fill the ship's initial allowances as defined by the baseline coordinated shipboard allowance list (COSAL). Outfitting funds are also budgeted for contractor-furnished spares, at lead-time away from delivery. The SCN funding for the initial fill of allowance list items are limited to those items on the COSAL and authorized requirements through the Obligation Work Limiting Date (OWLD). While most outfitting funds are executed prior to ships' completion of fitting out dates, some outfitting funding may be required in the fiscal year following the scheduled Delivery Date.

Ships will be listed by Ship Class, then in chronological order by the year authorized, then date of contract award, and then by start of construction.

Entries:

Heading. Insert Appropriation, Budget Activity, and identification code (as identified on the Exhibit P-1 generated from the OSD PRCP database) in the appropriate block. Insert the Exhibit P-1 line item title and add after the title the subhead number for the line item in parenthesis.

Ship Class and Hull Number. Identify each individual ship by Ship Class and hull number (e.g., SSN 792, CVN 79) that has previously been authorized for construction, but has not yet delivered, and each ship that is programmed for construction in the FYDP.

Program Year. List the year ship construction funds were appropriated or are programmed for each ship.

Contract Award. Enter the month and year of the shipbuilding contract award (actual or planned) using “MMM YYYY” format (e.g., Dec 2017).

Start of Construction. Enter the month and year that construction began/is scheduled to begin using “MMM YYYY” format.

Delivery Date. Enter the month and year each ship is planned to deliver using “MMM YYYY” format.

Completion of Fitting Out (CFO). Enter the month and year each ship is planned to complete fitting out using “MMM YYYY” format.

Post-Shakedown Availability (PSA) Start. Enter the month and year each ship is planned to begin PSA using “MMM YYYY” format.

PSA Finish. Enter the month and year each ship is planned to finish PSA using “MMM YYYY” format.

Obligation Work Limiting (OWL) Date. Enter the OWLD for each ship using “MMM YYYY” format.

Funding. Enter Outfitting funding for each ship. Annual funding will be provided in the Prior Year (PY), Current Year (CY) and Budget Year (BY) columns only. Total Outfitting funding received in all fiscal years before the Prior Year (PY) will be entered in the Prior Years column. All Outfitting funds programmed in the FYDP years (i.e., BY+1 through BY+4) will be entered in the To Complete column. The total Outfitting cost for each ship will be entered in the Total column.

P-1 Line Item No X

Instructions - Exhibit P-30, SCN – Post Delivery Costs

Purpose. The purpose of this exhibit is to provide detailed information concerning Post Delivery funds for ships authorized for construction, but not yet delivered, and for each ship programmed for construction in the Future Years Defense Program (FYDP).

General. This exhibit will be prepared for all Ship Construction, Navy (SCN) programs for which ship Post Delivery funds are requested. Post Delivery funding covers the fixing of government-responsible items which were believed to have been complete to standard and/or operable at delivery, as well as funding to conduct tests and trials after delivery. The Post Shakedown Availability (PSA) is a shipyard availability assigned to commence after delivery and to be completed prior to the expiration of the SCN Obligation Work Limiting Date (OWLD). Funding is used for corrections authorized by the ship's Program Manager as a result of builders' trials (pre-delivery), acceptance or underway trials, final contract trials, trial board items, and correction of production-related defects or deficiencies which develop during the post delivery period. Although the majority of post-delivery funding occurs after ships' delivery dates, some funding is required prior to the delivery date in preparation for post-delivery events.

Ships will be listed by Ship Class, then in chronological order by the year authorized, then date of contract award, and then by start of construction.

Entries:

Heading. Insert Appropriation, Budget Activity, and identification code (as identified on the Exhibit P-1 generated from the OSD PRCP database) in the appropriate block. Insert the Exhibit P-1 line item title and add after the title the subhead number for the line item in parenthesis.

Ship Class and Hull Number. Identify each individual ship by Ship Class and hull number (e.g., SSN 792, CVN 79) that has previously been authorized for construction, but has not yet delivered, and each ship that is programmed for construction in the FYDP.

Program Year. List the year ship construction funds were appropriated or are programmed for each ship.

Contract Award. Enter the month and year of the shipbuilding contract award (actual or planned) using “MMM YYYY” format (e.g., Dec 2017).

Start of Construction. Enter the month and year that construction began/is scheduled to begin using “MMM YYYY” format.

Delivery Date. Enter the month and year each ship is planned to deliver using “MMM YYYY” format.

Completion of Fitting Out (CFO). Enter the month and year each ship is planned to complete fitting out using “MMM YYYY” format.

Post-Shakedown Availability (PSA) Start. Enter the month and year each ship is planned to begin PSA using “MMM YYYY” format.

PSA Finish. Enter the month and year each ship is planned to finish PSA using “MMM YYYY” format.

Obligation Work Limiting (OWL) Date. Enter the OWLD for each ship using “MMM YYYY” format.

Funding. Enter Post Delivery funding for each ship. Annual funding will be provided in the Prior Year (PY), Current Year (CY) and Budget Year (BY) columns only. Total Post Delivery funding received in all fiscal years before the Prior Year (PY) will be entered in the Prior Years column. All Post Delivery funds programmed in the FYDP years (i.e., BY+1 through BY+4) will be entered in the To Complete column. The total Post Delivery cost for each ship will be entered in the Total column.

P-1 Line Item No X

Exhibit P-35, Major Ship Component Fact Sheet
(Exhibit P-35, page 1 of 2)

Instructions - Exhibit P-35, Major Ship Component Fact Sheet

Item: A separate sheet is to be submitted for each component having a unit cost of \$3.0 million or more.

Description/Characteristics/Purpose. Self-explanatory.

Current Funding. The cost details will be provided for each ship type for which equipment is being procured on a hull basis for the prior year (PY), current year (CY), and budget year (BY).

Identify estimates on an end item cost basis. If equipment was procured in a prior year with advance procurement funds, it should be reflected on the exhibit next to the end cost estimates in parenthesis. The equipment costs in this section of the exhibit will include the building block elements listed below:

- Major Hardware
- Ancillary Equipment
- Technical Data and Documentation
- Spares
- System Engineering
- Technical Engineering Services
- Other Costs

Major hardware costs in excess of \$20 million must be broken down into sub-element hardware components that comprise the equipment cost estimate included on the P-5a cost analysis.

Contract Data. This section will be prepared for major hardware procurement. The exhibit will include the contract plans for the BY, the planned or actual contract information for the current year (CY) and the actual information for the last buy prior to the current year. The last buy should be included even though it is two or more years prior to the current year. The following codes should be used for indicating contract types: Fixed Price Incentive (FPI); Cost Plus Incentive Fee (CPIF); Fixed Price (FP); Sole Source (SS); and Competitive (C). Indicate whether it is a new contract or an option to an existing contract. Also indicate estimated or actual award dates and item delivery dates. List quantities for each fiscal year and the production leadtime associated for each type of equipment.

Delivery Data. This section should indicate delivery plans for BY, CY and Prior Year (PY) programs contained in Section II of this exhibit. The required award date entry is determined by subtracting the months required before delivery and production leadtime from the earliest ship delivery date.

Competition/Second Source Initiatives. Describe any competition or second source initiatives associated with major hardware items.

P-1 Line Item No X
(Page X of X)

Exhibit P-40, Budget Item Justification
(Exhibit P-40, page 1 of 4)

Instructions - Exhibit P-40, Budget Item Justification

1. Purpose. The purpose of this exhibit is to provide overall narrative justification and total procurement costs for each P-1 line item. Include all advance procurement, initial spares and repair parts for acquisition category 1 programs.

* 2. Submission. A separate P-40 exhibit will be submitted to support each P-1 line item with funding of \$5.0 million or more in the budget year (BY) or \$5.0 million or more in either the Prior Year (PY) or Current Year (CY). Funding will be provided for all years displayed on the P-40 exhibit for all programs for both the program and budget review submission and the President's budget submission. If the prior years and to complete data are not relevant (i.e., items have a continuing requirement such as vehicles or ammunition), then leave those fields blank. In order to ensure compliance with the Department's policy to fully fund procurement programs, exhibits must reflect all costs and quantities from prior years through to complete for those programs buying a finite quantity. Note: for non- Major Defense Acquisition Programs (MDAPs)/Major Automated Information Systems (MAIS) programs with a funding value less than \$5.0 million, only the P-40 exhibit is required. No other budget exhibits will be submitted for programs with a funding level less than \$5.0 million in the BY. MDAP/MAIS programs must submit all required budget exhibits if a P-40 exhibit is required.

3. Entries.

a. Enter the applicable information that identifies the appropriation number and title, budget activity, procurement line item number, and serial number (the combination of these codes should match the procurement annex). Include the P-1 line item title (must be identical to what is shown in PRCP for that line item) and identify nicknames in parenthesis. Identify the program element for all Code B items shown on the P-5. Also list all other Program Elements associated with this procurement.

b. Funding will be presented for all Prior Years before the current prior year (i.e., PY-1, PY-2, PY-3, etc.), the Prior Year, the Current Year, the Budget Year, the FYDP years, to complete, and total on all line items having a finite quantity requirement. It is not relevant to show funding or quantities for items that are continuing requirements such as ammunition or non-tactical vehicles. It is relevant to show funding for all fiscal years for items being procured to specified quantity, such as aircraft, missiles, tactical vehicles, or modifications. The funding should agree with the funding approved in the FYDP Procurement Annex. Omit line items that do not apply (for example, ammunition items would not include an initial spares line).

c. Procurement programs that include funding for National Guard and Reserve Components will list Secondary Distribution to Active, National Guard, and Reserve Components, as applicable. Secondary Distribution will include quantity and funding for each component for the Prior Year, the Current Year, the Budget Year, and the FYDP years. This data must match submission to the PRCP data base.

d. A complete narrative description of the line item will be provided. The description will include, but not be limited to, the nature, purpose and intended use of the item with sufficient depth of information to serve as a justification for funding.

(Exhibit P-40, page 2 of 4)

e. If the item is a Code B item, provide the month and calendar year, actual or projected, for each applicable Developmental Test & Evaluation (DTE), Initial Operational Test & Evaluation (IOT&E), Operational Test & Evaluation (OTE), and technical data package (TDP) or performance specification milestone date. The TDP is assumed to be the date when all data necessary to initiate the procurement is available. Also provide the planned date for type classification as Standard or Alternate Standard (Army and Air Force) or approved by the Chief of Naval Operations (CNO) or other responsible official (Navy). Provide the nomenclature and model number of each item (as applicable) that will be replaced, as well as the comparative information in definitive terms with units of measure such as range, speed, cycle rate, meantime before failure, useful life, etc. Enter a brief but specific discussion of pertinent test results and development effort to date (i.e., successful firings, slippages, test failures, cost overruns, etc.).

f. For those programs that include advance procurement funds that support more than just the next or one subsequent FY program, specific FY detail needs to be provided to identify which FY programs are supported by prior year advance procurement. Advance procurement should be debited and credited according to the leadtimes of the advance procurement. For instance, if FY 2015 and FY 2016 Advance Procurement funds are required for a FY 2017 procurement, the FY 2015 Advance Procurement funds would be debited in FY 2015, the FY 2016 Advance Procurement funds would be debited in FY 2016, and the total of the FY 2015 and FY 2016 Advance Procurement funds would be credited in FY 2017.

Advance Procurement

(Exhibit P-40, page 3 of 4)

Instructions Exhibit P-40, Budget Item Justification (Continued)4. Specific Guidance by Program Type.a. Shipbuilding and Conversion, Navy Programs. Include the following information:

Mission

Characteristics (hull length overall, beam, displacement, draft)

Armament

Major Electronics

Production status, by hull

Contract Award Planned (Month/Year)

Months to Complete

a) Award to Delivery

b) Construction

Start to Delivery

Delivery Date

Completion of Fitting Out

Obligation Work Limiting Date (OWLD)

The P-40 exhibit must list all Service and Other Small Craft Items by types and provide funding for all years still being executed.

b. Modification Programs. For procurement modification programs the P-40 exhibit shall include the following information; a complete narrative description of the weapon system, its overall mission, number of aircraft in the inventory (include a breakout by Active, National Guard and Reserve), the designed service life, and the average service life remaining. The exhibit will, just below the narrative, include the specific modifications budgeted and programmed displayed in the format provided below:

Mod/	Total	(TOA, \$ in Millions)			
OSIP <u>No.</u>	<u>Title</u>	<u>PYs</u>	<u>PY</u>	<u>CY</u>	<u>BY</u>

Mod/OSIP No. Enter the modification number as applicable. List each modification on the aircraft P-40 exhibit. All P-3a exhibits must be included in the budget backup book in this numerical order.

Exhibit P-40a, Budget Item Justification for Aggregated Items

[illegible]

P-1 Line Item No X
(Page X of X)

Exhibit P-40a, Budget Item Justification for Aggregated Items
(Exhibit P-40a, page 1 of 2)

Instructions - Exhibit P-40a, Budget Item Justification for Aggregated Items

1. Purpose. The purpose of this exhibit is to provide the quantities and funding covering the procurement programs included in aggregated P-1 line items such as "Items Less Than \$5.0 million." A P-5 exhibit is not required for items included on a P-40a exhibit.

2. Entries.

a. Enter the applicable information that identifies the appropriation, budget activity, and title. There should be no Code B (not approved for service use) items on the P-40a exhibit. If an item is a Code B item, however, the item must be listed as separate line items in the P-1, P-5 and P-40 exhibits.

b. Unit Cost, Quantity and Total Cost will be presented for all Prior Years, Prior Year (PY), Current Year (CY), Budget Year (BY). The funding should agree with the funding approved in the FYDP Procurement Annex.

Instructions - Exhibit Multiyear Procurement

1. Provide a narrative justification (MYP-1 Multiyear Procurement Criteria) for all proposed multiyear procurements candidates regardless of costs. Exhibits MYP-1, MYP-2 Total Program Funding, MYP-3 Total Contract Funding and MYP-4 Present Value Analysis will be included for all MYP candidate systems in the Program Budget Review submission. The President's Budget request will include a P-5a MYP-annotated entry for those multiyear programs not requiring congressional authorization and appropriation language and exhibits. Exhibits MYP-1 through MYP-4 are required for all multiyear candidate systems for which any of the following is true:
 - a. The anticipated multiyear procurement contract is \$500 million or greater.
 - b. There are economic order quantity (EOQ) procurements in excess of \$20 million in any one year.
 - c. There are EOQ procurements in advance of an MYP contract in excess of \$20 million in any one year.
 - d. There will be an unfunded contingent liability in excess of \$20 million in any one year.
 - e. The procurement quantities of a previously approved MYP have been adjusted.
2. Detailed instructions for filling out MYP exhibits are published in SNaP on the home page of the SNaP-Multiyear Procurement (MYP) application.
3. If a system proposed for a multiyear contract includes more than one P-1 line item, prepare combined MYP-1 and MYP-2 exhibits. Prepare separate exhibits for the remaining MYP exhibit formats. All the exhibits associated with the system will be combined in one package, and submitted in numerical order MYP-1, MYP-2, MYP-3¹, MYP-3², etc.
4. If multiple MYPs are proposed for components of the same P-1 line item, prepare a separate set of exhibits for each component. Note that the MYP-3 will be the same in each package.
5. If a joint Service program is proposed for multiyear procurement, the executive Service is responsible for submission of all multiyear exhibits and the congressional authorization language.
6. Provide the narrative description in sufficient detail to define the multiyear procurement, i.e., this multiyear procurement will procure "x" number of units over "x" number of fiscal years by using one (or more) multiyear contract.

7. Describe in detail the benefit to the government of the MYP. The process of deciding to use or not to use a multiyear procurement (MYP) for production programs as well as how best to tailor and structure the MYP requires management judgment. A MYP should yield substantial cost avoidance or other benefits when compared to conventional annual contracting methods. Any MYP alternatives with greater risk to the government should demonstrate increased cost avoidance or other benefits over those with lower risk. Savings can be defined as significant either in terms of dollars or percentage of total costs. Detailed descriptions of benefits justifying the MYP should cover the following: Substantial Savings, Stability of Requirements, Stability of Funding, Stable Design, Realistic Cost Estimates, and National Security.

8. Identify the Substantial Savings detailing the sources of savings to include, as appropriate, inflation, vendor procurement, manufacturing, design/engineering, tool design, and support equipment. Each identified source of savings must include a narrative description of the specific savings, an estimate for that specific source and how the estimate was derived. The sum of the detailed sources should equal the total savings.

9. The narrative justification for Stability of Requirement must contain the statement that “the minimum need for the property to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, procurement rate, and total quantities.” The item should be technically mature, have completed RDT&E (including development testing, or equivalent) and Initial Operational, Test and Evaluation (IOT&E), with relatively few changes in item design anticipated. Deliveries of production items will indicate that the underlying technology is stable. This does not mean that changes will not occur but that the estimated cost of such changes is not anticipated to drive total costs beyond the proposed funding profile.

10. Identify the advantages the MYP will achieve and how they will achieve them. These advantages include: production of items in economic order quantities, thereby resulting in lower costs; enhancement of standardization; reduction of administrative burden in the placement and administration of contracts; substantial continuity of production or performance, thus avoiding annual startup costs, pre-production testing costs, make-ready expenses, and phase-out costs; stabilization of contractor and subcontractor work forces; avoiding the need to establish quality control techniques and procedures for a new contractor each year; broadening the competitive base with opportunity for participation by firms not otherwise willing or able to compete for lesser quantities, particularly in cases involving high startup costs; providing incentives to contractors to improve productivity through investment in capital facilities, equipment, and advanced technology; enhancing partnering efforts between contractors/government and prime contractor/subcontractor; providing stable environment; and enhancing best commercial practices.

11. Exhibit MYP-2, Total Program Funding Plan, will compare the funding for the annual proposal and the multiyear proposal and Exhibit MYP-3, Total Contract Funding Plan, will compare the funding for the annual proposal and the multiyear proposal for the multiyear contract.

12. All multiyear procurements (MYP), regardless of cost, require the use of a present value analysis to determine lowest cost compared to an annual procurement. This analysis will be completed by the SNaP based on funding plans provided and results displayed as Exhibit MYP-4, Present Value Analysis. Present value analysis will be calculated in accordance with DoD Instruction 7041.3, Economic Analysis for Decision Making, and OMB Circular A-94.

**VOLUME 2B, CHAPTER 5: “RESEARCH, DEVELOPMENT, TEST, AND
EVALUATION APPROPRIATIONS”****SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by **blue font**.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue and underlined font**.

The previous version dated **November 2017** is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Updated hyperlinks and ensured compliance with administrative instructions.	Revision
1.2	Added Authoritative Guidance section in compliance with administrative instructions	Addition
1.5.8	Incorporated definition of BA 08 and cancelled the OUSD(C) “Software & Digital Technology Pilot Programs Interim Financial Management Regulation Policy” dated June 4, 2020.	Addition
Exhibit R-3	Updated required Test & Evaluation cost categories and updated instructions	Revision

CHAPTER 5

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION APPROPRIATIONS

1.0 GENERAL

1.1 Purpose

This chapter provides instructions applicable to budget formulation and congressional justification for Research, Development, Test, and Evaluation (RDT&E) appropriations. Unless otherwise specified, these instructions apply to all RDT&E appropriations and to all budgets.

*1.2 Authoritative Guidance

1.2.1. The instructions and related requirements prescribed in this chapter are derived primarily from, and in accordance with Title 10, United States Code, section 113 ([10 U.S.C. §113](#)).

1.2.2. The [Office of Management and Budget \(OMB\) Circular A-11](#) is the governing document for preparation, submission and execution of the budget.

1.2.3. Volume 2A, Chapter 1, Section 2.13 provides policies and definitions concerning costs that are to be financed in RDT&E appropriations.

1.3 Submission Requirements

1.3.1. General guidance on submission requirements is in Volume 2A, Chapter 1. This chapter provides guidance for the preparation of RDT&E appropriation backup material required to support the Budget Estimates Submission (BES) and the President's budget request. Other chapters in the Financial Management Regulation require additional exhibits. The Components will also submit any exhibits required by the Office of Management and Budget (OMB) Circular A-11, Preparation and Submission of Budget Estimates.

1.3.2. Military Departments and Defense Agencies will be responsible for clearing the justification material with the Washington Headquarters Services, Directorate for Office of Security Review, prior to transmittal to the OMB, the Office of the Secretary of Defense (OSD), and the congressional committees.

1.4 Classification

The budget justification material should be unclassified. All classified material **must** be submitted separately. Components must include a R-2 RDT&E Budget Justification exhibit for special access programs (SAPs) that are not labeled as secret. The R-2 exhibits for SAPs must only include funding streams and cite the following justification: "This program is reported in accordance with Title 10, United States Code, Section 119(a)(1) in the Special Access Program Annual Report to Congress." All other (non-intel and non-SAP) classified funding requests must be identified (i.e., submit a one page R-2 exhibit) within unclassified justification budget materials.

1.5 RDT&E Budget Activities

The RDT&E budget activities are broad categories reflecting different types of RDT&E efforts. The definitions are provided in [section 1.5.1 through 1.5.8 below](#). The acquisition milestones identified in the definitions are established by Department of Defense Instruction 5000.02, "Operation of the Defense Acquisition System." Acquisition program developmental criteria and administrative requirements for each milestone are set forth in this instruction.

1.5.1. Budget Activity 1, Basic Research. Basic research is systematic study directed toward greater knowledge or understanding of the fundamental aspects of phenomena and of observable facts without specific applications towards processes or products in mind. It includes all scientific study and experimentation directed toward increasing fundamental knowledge and understanding in those fields of the physical, engineering, environmental, and life sciences related to long-term national security needs. It is farsighted high payoff research that provides the basis for technological progress. Basic research may lead to: (a) subsequent applied research and advanced technology developments in Defense-related technologies, and (b) new and improved military functional capabilities in areas such as communications, detection, tracking, surveillance, propulsion, mobility, guidance and control, navigation, energy conversion, materials and structures, and personnel support. Program elements in this category involve pre-Milestone A efforts.

1.5.2. Budget Activity 2, Applied Research. Applied research is systematic study to understand the means to meet a recognized and specific need. It is a systematic expansion and application of knowledge to develop useful materials, devices, and systems or methods. It may be oriented, ultimately, toward the design, development, and improvement of prototypes and new processes to meet general mission area requirements. Applied research may translate promising basic research into solutions for broadly defined military needs, short of system development. This type of effort may vary from systematic mission-directed research beyond that in Budget Activity 1 to sophisticated breadboard hardware, study, programming and planning efforts that establish the initial feasibility and practicality of proposed solutions to technological challenges. It includes studies, investigations, and non-system specific technology efforts. The dominant characteristic is that applied research is directed toward general military needs with a view toward developing and evaluating the feasibility and practicality of proposed solutions and determining their parameters. Applied Research precedes system specific technology investigations or development. Program control of the Applied Research program element is normally exercised by general level of effort. Program elements in this category involve pre-Milestone B efforts, also known as Concept and Technology Development phase tasks, such as concept exploration efforts and paper studies of alternative concepts for meeting a mission need.

1.5.3. Budget Activity 3, Advanced Technology Development (ATD). This budget activity includes development of subsystems and components and efforts to integrate subsystems and components into system prototypes for field experiments and/or tests in a simulated environment. Budget Activity 3 includes concept and technology demonstrations of components and subsystems or system models. The models may be form, fit, and function prototypes or scaled models that serve the same demonstration purpose. The results of this type of effort are proof of technological feasibility and assessment of subsystem and component operability and producibility

rather than the development of hardware for service use. Projects in this category have a direct relevance to identified military needs. Advanced Technology Development demonstrates the general military utility or cost reduction potential of technology when applied to different types of military equipment or techniques. Program elements in this category involve pre-Milestone B efforts, such as system concept demonstration, joint and Service-specific experiments or Technology Demonstrations and generally have Technology Readiness Levels of 4, 5, or 6. (For further discussion on Technology Readiness Levels, see the Assistant Secretary of Defense for Research and Engineering's Technology Readiness Assessment (TRA) Guidance.) Projects in this category do not necessarily lead to subsequent development or procurement phases but should have the goal of moving out of Science and Technology (S&T) and into the acquisition process within the Future Years Defense Program (FYDP). Upon successful completion of projects that have military utility, the technology should be available for transition.

1.5.4. Budget Activity 4, Advanced Component Development and Prototypes (ACD&P). Efforts necessary to evaluate integrated technologies, representative modes, or prototype systems in a high fidelity and realistic operating environment are funded in this budget activity. The ACD&P phase includes system specific efforts that help expedite technology transition from the laboratory to operational use. Emphasis is on proving component and subsystem maturity prior to integration in major and complex systems and may involve risk reduction initiatives. Program elements in this category involve efforts prior to Milestone B and are referred to as advanced component development activities and include technology demonstrations. Completion of Technology Readiness Levels 6 and 7 should be achieved for major programs. Program control is exercised at the program and project level. A logical progression of program phases and development and/or production funding must be evident in the FYDP.

1.5.5. Budget Activity 5, System Development and Demonstration (SDD). System Development and Demonstration (SDD) programs have passed Milestone B approval and are conducting engineering and manufacturing development tasks aimed at meeting validated requirements prior to full-rate production. This budget activity is characterized by major line item projects, and program control is exercised by review of individual programs and projects. Prototype performance is near or at planned operational system levels. Characteristics of this budget activity involve mature system development, integration, demonstration to support Milestone C decisions, conducting live fire test and evaluation, and initial operational test and evaluation of production representative articles. A logical progression of program phases and development and production funding must be evident in the FYDP consistent with the Department's full funding policy.

1.5.6. Budget Activity 6, RDT&E Management Support. This budget activity includes management support for research, development, test, and evaluation efforts and funds to sustain and/or modernize the installations or operations required for general research, development, test, and evaluation. Test ranges, military construction, maintenance support of laboratories, operation and maintenance of test aircraft and ships, and studies and analyses in support of the RDT&E program are funded in this budget activity. Costs of laboratory personnel, either in-house or contractor operated, would be assigned to appropriate projects or as a line item in the Basic Research, Applied Research, or ATD program areas, as appropriate. Military construction costs directly related to major development programs are included in this budget activity.

1.5.7. Budget Activity 7, Operational System Development. This budget activity includes development efforts to upgrade systems that have been fielded or have received approval for full rate production and anticipate production funding in the current or subsequent fiscal year. All items are major line item projects that appear as RDT&E Costs of Weapon System Elements in other programs. Program control is exercised by review of individual projects. Programs in this category involve systems that have received approval for Low Rate Initial Production (LRIP). A logical progression of program phases and development and production funding must be evident in the FYDP, consistent with the Department's full funding policy.

* 1.5.8. Budget Activity 8, Software and Digital Technology Pilot Programs.

1.5.8.1. Software and Digital Technology Pilot Program requirements for funding in BA 8 includes software, electronic tools, systems, applications, resources, acquisition of services, business process re-engineering activities, functional requirements development, technical evaluations, and other activities in direct support of acquiring, developing, deploying, sustaining, enhancing, and modernizing Software Digital Technology Pilot Programs.

1.5.8.2. Pilot programs may purchase Commercial off the Shelf (COTS) software, tools, and services necessary to meet the program's requirements.

1.5.8.3. Software and Digital Technology Pilot Programs may be nominated to Under Secretary of Defense (Acquisition & Sustainment). Approved pilot program nominations will be submitted with the President's Budget request.

1.5.8.4. A system project participating in the Pilot Program may be removed from BA 8 if the project has not been successful in meeting criteria established for the Pilot Program by the Secretary of Defense.

1.6 Establishing RDT&E Program Elements

1.6.1. The program element is the primary data element in the FYDP and is the major aggregation, at which RDT&E efforts are organized, budgeted, and reviewed. All funding associated with a major system new start must be identified in a unique program element. Requests to establish program elements should be forwarded to Office of the Secretary of Defense (OSD) Cost Assessment and Program Evaluation (CAPE) for coordination and approval.

1.6.2. In general, the coding symbology identifies the RDT&E budget activity for the program element. Program elements in RDT&E budget activities 1 through 6 will have "06" in the first two positions; "06" indicates it is part of Major Force Program 6, Research and Development. The third and fourth position will identify the specific budget activity (e.g., 0602 is an RDT&E budget activity 2 program element). Program elements in RDT&E budget activity 7 reflect the Major Program of the fielded system in the first two positions (e.g., "01" indicates a strategic system).

2.0 RDT&E EXHIBIT REQUIREMENTS

2.1 Purpose

This section prescribes instructions for the preparation and submission of RDT&E appropriations budget material to support the BES and the President's budget request. See Volume 2A, Chapter 1, Section 4.0, for specific printing requirements.

SUMMARY OF EXHIBIT REQUIREMENTS

<u>Exhibit Reference</u>	<u>Exhibit</u>	<u>Appropriation</u>
R-1	RDT&E Programs	All
R-2	RDT&E Budget Item Justification	All
R-2a	RDT&E Project Justification	All
R-3	Cost Analysis	All
R-4	RDT&E Program Schedule Profile	All
R-4a	RDT&E Program Schedule Detail	All

2.2 Submission Requirements

2.2.1. Extensible Markup Language (XML) Exhibits. All Components must submit required budget exhibits as PDFs with the source XML file embedded. These PDFs will be generated by one of the following two processes:

2.2.1.1. Submit an XML file to the XML Tools section of the Comptroller XML Exhibits web site, <https://exhibits.dtic.mil/r2/app> (for Components capable of building an XML file from an internal system). The XML files submitted through the XML Tools section must be compliant with the latest RDT&E XML schema, located within the same section of the website; or

2.2.1.2. Create a RDT&E exhibit manually within the "Create New R-2" section of the Comptroller XML Exhibits web site, <https://exhibits.dtic.mil/r2>.

2.2.1.3. The result of either process will be a PDF file with an XML file embedded. All RDT&E exhibit PDFs/XMLs must be assembled into a Justification Book(s) within the same website using one of the Justification Book tools and posted to the SIPRNET website <https://cisweb.ousdc.osd.smil.mil/>.

2.2.1.4. Formats and examples of the exhibits are contained in Section 3.0.

2.2.2. Each backup book will include an Exhibit R-1, RDT&E Program, two indices of program elements (including R-1 line number, program element title, program element number, and backup book page number), one alphabetically by program element title and on by budget activity and R-1 line number, and specific exhibits for those items covered by the backup book.

2.2.3. The exhibits will be aggregated in the following order for each R-1 line item, as applicable to that line item and submitted in R-1 line item order.

Arrangement of Exhibits – General

- R-1 RDT&E Programs
- R-2 RDT&E Budget Item Justification
- R-2a RDT&E Project Justification
- R-3 RDT&E Project Cost Analysis
- R-4 RDT&E Program Schedule Profile
- R-4a RDT&E Program Schedule Detail

Note: The R-3/R-4/R-4a supporting each R-2a Project Justification will be arranged immediately following the R-2a.

2.2.4. Major Defense Acquisition Programs (MDAPs)/Major Automated Information Systems (MAIS)

2.2.4.1. Joint budget guidance from the Under Secretaries of Defense for Acquisition, Technology & Logistics (AT&L) and Comptroller directs that all MDAPs or MAIS will be budgeted in separate, dedicated Program Elements (R-1 line items), and associate all of the funding for a given MDAP/MAIS with a PRCP Program Number (PNO).

2.2.4.2. For all MDAP/MAIS programs, the R-2 RDT&E Budget Item Justification exhibit must include the PNO. Components must also ensure that all applicable fiscal years of the PRCP and FYDP annex data bases are updated to reflect the program budget estimates for all MDAP/MAIS programs, including all prior years and cost-to-complete columns. Each MDAP/MAIS subprogram is a component that will be identified by appropriation, budget line item, and budget activity under the End Item R-1 Line Item header.

2.2.5. If an amended budget is submitted, identify the revised budget exhibits accordingly.

2.2.6. Facilities Exhibit. For improvements to and construction of government-owned facilities funded in the RDT&E appropriation, a DD Form 1391, Military Construction Project Data, must be provided separately for each Budget Year (BY) project and any Prior Year (PY) or Current Year (CY) projects not previously reported. These exhibits will be included with the program element justification. In addition, a copy of all DD Forms 1391 should be packaged together and a copy provided to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) Program/Budget (P/B) Investment Directorate and to the Military Personnel and Construction Directorate. A copy of the form and the instructions are in Chapter 6.

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION

This Section presents the backup book organization and the exhibit requirements for submission to Congress. See Volume 2A, Chapter 1, Section 4.0 for specific printing requirements. Justification material will be organized into a Committee Staff Procurement Backup Book. Volume 2A, Chapter 1, Section 4.3 provides a detailed distribution schedule for the procurement backup books. A separate congressional committee backup book will be prepared for the President's budget request for each RDT&E appropriation.

4.0 RDT&E APPROPRIATION BUDGET EXHIBIT FORMATS

4.1 Standardized budget exhibit formats

Section 2.2 describes the use of XML budget exhibits for RDT&E appropriations. In addition to the key attribute of making budget exhibit data electronically searchable, the XML exhibits standardize the various budget displays, enabling more effective and efficient budget formulation, review, analysis, and submission.

4.1.1. The exhibit formats provided on the following pages reflect guidance presented in previous sections.

4.1.2. The use of XML exhibits is mandatory for BES and President's budget request backup justification material.

4.1.3. XML exhibits will automatically standardize formatting, to include:

4.1.3.1. Exhibits displayed on 8 1/2 inch by 11 inch paper in landscape format.

4.1.3.2. Actual fiscal years (e.g., FY 2016, FY 2017, etc.) rather than the template entries (i.e., Prior Years (PYs), Prior Year (PY), Current Year (CY), Budget Year (BY), BY+1, BY+2, BY+3, and BY+4).

4.1.3.3. Annotating the applicable R-1 line item number and page number within the line item (e.g., Item 1-1 of 5, 2-1 of 1, 3-1 of 20, etc.) at the bottom center of each exhibit page.

4.1.3.4. Properly paginate the backup book.

4.2 RDT&E exhibit formats

There are six RDT&E exhibits that support the formulation and submission of the BES and the President's budget request. The exhibits provide data and information that justifies budgetary requirements for the various RDT&E appropriations. The exhibit formats follow. Volume 2B, Chapter 19, Other Special Analyses, also identifies budget exhibits that may be required.

Exhibit R-1: RDT&E Programs

Exhibit R-1, RDT&E Programs								
Appropriation: _____			Department of the _____			Date: _____		
						<u>TOA, \$ in Millions</u>

Exhibit R-1: RDT&E Programs (Continued)

Exhibit R-1: RDT&E Programs

A. General Instructions:

Unless otherwise specified, this format will be used to present the Research, Development, Test and Evaluation (RDT&E) program to:

1. The Office of the Under Secretary of Defense (Comptroller) in support of the OSD/OMB budget review and,
2. The Congress in support of the President's budget request.

B. RDT&E Line Item Content:

The basic document for presenting RDT&E requirements is the Exhibit R-1, RDT&E Programs. The R-1 line items are program elements, which define a development effort with specific design, cost, schedule and capability parameters. All costs of basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, and lease/operation of facilities and equipment will be included in appropriate R-1 line items. The R-1 exhibit will contain the following information:

1. Program element title and number. Appropriate security classification coding should be included as part of each program element title listed. All classified material should be bracketed.
2. Line items will be arranged in ascending program element order within each budget activity.
3. Approved funding for the Prior Year (PY), the Current Year (CY), and Budget Year (BY).
4. Subtotals by Budget Activity and total funding for the appropriation for the Prior Year (PY), the Current Year (CY), and Budget Year (BY).

Exhibit R-2: RDT&E Budget Item Justification

Exhibit R-2, RDT&E Budget Item Justification: BES/PB 20xx Service/Agency										DATE: Month/Year	
APPROPRIATION/BUDGET ACTIVITY Appropriation Code: Appropriation Name BA Number: Budget Activity Title						R-1 ITEM NOMENCLATURE Program Element Number: Program Element Title

Note Identify when a Program Element or a Project: 1) is a new start, 2) was terminated/completed, 3) was previously funded, or will be funded, in a different Program Element, or 4) has had a Title change. For Program Element or Project transfers, include the current and previous Program Element number and title, and Project number and title, if applicable.											
A. Mission Description and Budget Item Justification The R-2 shall include a general description and justification of the efforts included in the program element. The R-2A shall include a detailed description and justification of the efforts included in the specific project. Every Project shall include an R-2A exhibit; including where a Project is an aggregate of Congressional Adds. An exception may be to create an R-2 without an R-2A for Single Project PEs. For ACAT 1D programs, identify Cost to Complete and Total Cost for the program and all projects; otherwise, the appropriate value shall be "Continuing". An R-3 Exhibit must be provided for Budget Activity 4, 5, and 7 Programs.

Remarks															
Discuss Acquisition Strategy and items of interest. Acquisition Strategy is NOT required for BA 1, 2, 3, or 6.															

Exhibit R-2a: RDT&E Budget Item Justification (Project) (Continued)

Exhibit R-2a: RDT&E Budget Item Justification (Project)**Exhibit R-2: RDT&E Budget Item Justification**

A. General Instructions:

1. An Exhibit R-2 **must** be prepared for each program element. An Exhibit R-2a **must** be prepared for each RDT&E project, even if there is only one project and even if a project is funded only in a Prior Year (PY) and/or a Current Year (CY), regardless of funding amount. To provide full-funding visibility, every program, project, and activity specifically added by Congress to the President's Budget Request (a.k.a. Congressional Adds) **must** be identified within an Exhibit R-2a. The programs, projects, and activities may be treated as individual projects, grouped, but separately identified, in one or more "Congressional Adds" projects, and/or included within "core" projects. Classified material will be submitted separately.

2. All funding within any R-exhibit will be expressed in millions, with three decimal places, unless specifically noted otherwise.

3. Care should be taken to see that exhibits are clear and concise. Abbreviations **must** be identified on the page on which they occur.

B. Exhibit Instructions:

1. Date. Include the month and year of submission of the exhibit. If an Amended Budget is submitted, identify the date of the revised submission.

2. Exhibit R-2 RDT&E Budget Item Justification. Identify the Budget Cycle/Budget Year/Service Agency Name. Identify BES (Budget Estimates Submission) or PB (President's Budget) for Budget Cycle, the Budget Year, and the Service Agency Name. Information **must** match the Program Resources Collection Process (PRCP) (R-1) data base lock position.

3. Appropriation/Budget Activity. Identify Appropriation Code (Treasury Account Symbol) and Name/Budget Activity Number and Title. Identify the appropriation and budget activity. Information **must** match the RDT&E PRCP (R-1) data base lock position.

4. R-1 Item Nomenclature/Title (Program Element Name). Identify the name of the R-1 line item. Information **must** match the RDT&E PRCP (R-1) data base lock position.

5. Program Element Number. Identify the program element. Information must match the RDT&E PRCP (R-1) data base lock position.

6. Project Number and Nomenclature. Identify the project number and nomenclature.

Exhibit R-2a: RDT&E Budget Item Justification (Project) (Continued)

7. Resource Summary. The Exhibit R-2 **must** include a fiscal resource summary total for the total program element and, if there is more than one project in that program element, a fiscal resource summary for each project in that program element. Ensure the total funding for the program element matches the RDT&E PRCP (R-1) data base lock position by budget line item and that total costs for Acquisition Category 1 (ACAT) programs are consistent with Selected Acquisition Reports.

8. For ACAT 1 programs, identify Cost-to-Complete and Total Cost for the program and all projects; otherwise, the appropriate value **must** be “Continuing”. The XML process will automatically insert “Continuing” if no data is submitted.

9. RDT&E Articles (R-2a only). Identify the test articles (engineering development models, test articles, low rate initial production test article, government furnished equipment articles) that are being procured and why. Test Articles can be identified for a project and/or for activities identified in Accomplishments/Planned Programs.

10. Program Element and Project Notes. Identify when a program element or project is: (1) a new start, (2) was terminated/completed, (3) was previously funded, or (4) will be funded in a different program element, or Title changes.

11. For program element or project transfers, include the current and previous program element number and names, and projected number and name if applicable.

12. Mission Description and Budget Item Justification. The R-2 will include a description and justification of the efforts included in the program element. The R-2a will include a description and justification of the efforts included in the specific project.

13. Program Change Summary. If there have been changes to the total funding, schedule, or technical parameters since the previous President’s budget submission, the Exhibit R-2 **must** include a concise narrative summary explaining the changes in the total program element for the PY, CY, and BY. Further adjustments will be broken out into the following categories:

- Congressional General Reductions

- Congressional Directed Reductions

- Congressional Rescissions

- Congressional Adds

- Congressional Directed Transfers

- Reprogrammings

- SBIR/STTR* Transfers

- Total Other Adjustments – (unique titles may be added to describe the change)

- Small Business Innovation Research (SBIR)/Small Business Technology Transfer (STTR)

Exhibit R-2a: RDT&E Budget Item Justification (Project) (Continued)

14. Congressional Add Details (Exhibit R-2). Each “Congressional Add” will be identified separately by project and may be included as: (1) an individual project, (2) as groups in one or more “Congressional Add” projects, and/or (3) within “core” projects. The title (provided by Congress) and the funding for PY and CY will be listed in a bullet format. Congressional Adds should include only the funding provided by Congress.

15. Change Summary Explanation. Provide a separate, concise narrative summary explaining the changes in the total program element in the Prior Year, the Current Year, and the Budget Year, as applicable.

* 16. Accomplishments/Planned Programs (Exhibit R-2a). Provide a concise narrative summary and associated funding for each project for CY, and BY in a bullet format. The PY narrative summary is deleted. The total funding reflected should match the total project funding. Briefly discuss why project funding changed from the CY to the BY in the Increase/Decrease Statement. The explanation must be sufficient to justify the BY request but should not be a restatement of Planned Program in the BY. (For example: “Funding increases \$30 million due to procurement of 2 System Development Test Articles (STDA).”) MINOR changes in funding from CY to BY need not be addressed. Each Software and Digital Technology Pilot Program will specifically identify Operation & Maintenance (O&M) efforts and Procurement efforts as separate entries.

17. Other Program Funding Summary (Exhibit R-2a). Development projects often lead to subsequent development phases, production, and military construction. Also, some projects may depend on concurrent development in other projects. These related efforts and the funding profiles for other appropriation efforts must be identified by appropriation, budget activity, R-1 line item and program element, and P-1 line item title and number. If there are funding dependencies among related research, development, test, and evaluation programs, then the funding profiles for these related programs must be included.

18. Acquisition Strategy (Exhibit R-2a). An explanation of acquisition, management, and contracting strategies must be provided for each project in the Remarks section. This section is not required for the program element budget line items in Budget Activities 1 (Basic Research), 2 (Applied Research), 3 (Advanced Technology Development) and 6 (RDT&E Management Support).

*Exhibit R-3: RDT&E Project Cost Analysis

Remarks: An R-3 Exhibit shall be provided for Budget Activity Number 4, 5, and 7 PE's. The Project Total Cost shall be equal to the Project Cost on the R-2A. Contract Method may be any one of C, SS, TBD, or Various. Contract Type may be any one of CPAF, DPFF, DPIF, FFP, FPI, TBD, or Various. Funding Vehicle may be any one of Allot, BPA, FFRDC, MIPR, PO, Reqn, RO, TM, of Various.													

Exhibit R-3: RDT&E Project Cost Analysis (Continued)

Exhibit R-3: RDT&E Project Cost Analysis

A. General Instructions:

1. The R-3 exhibit is required for programs funded in budget activities 4 (Advanced Component Development and Prototypes), 5 (System Development and Demonstration), and 7 (Operational System Development) only. A separate R-3 exhibit **must** be prepared for each project in an applicable R-1 line item.

2. These exhibits **must** be printed on 8 1/2 by 11 inch paper in landscape format. Classified material **must** be submitted separately.

3. All funding within any R-exhibit will be expressed in millions, with three decimal places.

B. Exhibit Instructions:

1. Identify the month and year of submission of the exhibit. If an Amended Budget is submitted, identify the date of the revised submission.

2. Appropriation Code (Treasury Account Symbol)/ and Name/Budget Activity Number and Title. Identify the appropriation and budget activity. This information must match the PRCP (R-1) lock position.

3. R-1 Item Nomenclature/Title (Program Element Name): Identify the name of the R-1 line item as identified in PRCP (R-1) lock position. This information must match the PRCP (R-1) lock position.

4. Program Element Number: The Program Element must be unique. An R-2 Exhibit with a Budget Activity Number that is different from the previous years should include PY and CY information within the current R-2 Exhibit.

5. Project Number and Nomenclature: Identify the project number and nomenclature as identified in PRCP (R-1) lock position.

6. Project Cost Categories. Cost information **must** be provided for each project regardless of funding amount, with project costs broken down into cost categories. Total of all project costs **must** equal the project funding for any funding years. Sample cost categories shown are typical of various types of defense research and development efforts. Costs **must** be distributed among categories in accordance with the project work breakdown structure (WBS) or other categories used by the project office in project execution.

Exhibit R-3: RDT&E Project Cost Analysis (Continued)

* a. For the T&E information category, the Project Cost Categories must be Developmental Test & Evaluation (DT&E), Operational Test & Evaluation (OT&E), and Live Fire Test & Evaluation (LFT&E).

* b. For the other information categories (Product Development, Support Costs, and Management Services), the illustrated sample cost categories may be used if they correspond to the project's work breakdown structure. There is no requirement to use Project Cost Categories other than those used by the project office in project execution.

Sample cost categories not used in project execution need not be included in the exhibit for that project.

7. If the program office tracks efforts by major contract, then display the information accordingly. The cost categories **must** be separated into 4 information categories as follows:

a. Product Development. Efforts associated with the delivery of a fully integrated system that are in direct support of the system and essential to the development, training, operation, and maintenance of the system. Include all efforts directly supporting system development and delivery to include primary contracts, major component contracts, contracted services, in-house support, and government furnished property. Contracts or government efforts greater than \$1 million in any displayed budget year **must** be reported individually.

b. Support Costs. Efforts not directly associated with the delivery of the primary product, including technical engineering services, research studies, and technical support not related directly to product development or to testing and evaluation. Contracts or government efforts greater than \$1 million in any displayed budget year **must** be reported individually.

c. Test and Evaluation. Efforts (other than those included within contracts or government efforts) associated with engineering or support activities to determine the acceptability of a system, subsystem, or component. Contracts or government efforts greater than \$1 million in any displayed budget year **must** be reported individually. **For the T&E information category, the Project Cost Categories must be Developmental Test & Evaluation (DT&E), Operational Test & Evaluation (OT&E), and Live Fire Test & Evaluation (LFT&E).**

d. Management Services. Efforts associated with services provided in support of program office management and administration processes such as: program oversight, resource justification, budget and programming, milestone and schedule tracking. Federally Funded Research and Development Centers (FFRDCs) are in this category. Contracts or government efforts greater than \$1 million in any displayed budget year **must** be reported individually.

Exhibit R-3: RDT&E Project Cost Analysis (Continued)

8. Government Furnished Property. Property, such as hardware, software, or information, which the government is contractually obligated to furnish a contractor or government performing activity **must** be identified. Provide a brief identification of the item to be provided, and the contractor or government activity providing the item. Provide the estimated date that the government furnished property will be provided to the requiring contractor or activity. Provide the name of the requiring contractor or activity.

9. Award Fees. Identify amounts budgeted for award fees and indicate contractor performance and percentage of award fees actually awarded in past award fee periods.

10. Contract Method/Type or Funding Vehicle. The following codes **must** be used to identify the contract method, contract type, and funding vehicle:

<u>Contract Type</u>	<u>Contract Method</u>
CPIF	Cost Plus Incentive
SS	Sole Source
TBD	To Be Determined
VAR	Various
FFP	Firm Fixed Price
FP	Fixed Price
FPI	Fixed Price Incentive
C	Competitive
CPAF	Cost Plus Award Fee
CPFF	Cost Plus Fixed Fee

Funding Vehicle (when a government agency is the performing activity)

MIPR	Military Interdepartmental Purchase Request
PO	Project Order
WR	Work Request
Allot	Allotment
Reqn	Requisition
BPA	Blanket Purchase Agreement
FFDC	Federally Funded Research and Development Center
VAR	Various

11. Performing Organizations. Identify each contractor and government or performing activity and the location for each effort greater than \$1 million in any of the displayed years.

12. Total Prior Year (PY) Cost. Provide actual amounts for the total of all years before the Current Year (CY).

13. CY - BY. Provide actual or budget amounts for each year for the Current Year (CY) and the Budget Year (BY).

Exhibit R-3: RDT&E Project Cost Analysis (Continued)

14. Award or Obligation Date. Provide actual or estimated date of contract award or the estimated date that funds will be obligated to government performing activities.

15. To Complete. Provide the amount required to complete this effort beyond.

16. Total Cost. Provide the cumulative total of all budgeted funds for the program (including funds obligated/budgeted for PY, CY, BY and to complete). Provide a comment in the Remarks section when the Project Office Estimate at Completion (EAC) differs from the total cost. Also provide a comment when the Performing Activity EAC differs from the Project Office EAC.

17. Target Value of Contract. Identify the target value of the contract and explain those cases where total cost differs significantly. For example, if the budget is at ceiling value of the contract vice target value or if budget is "program manager's best estimate" vice target value, then explain.

Exhibit R-4: RDT&E Schedule Profile

R-1 Line Item No. XX

(Page X of X)

R-4 Program Schedule Profile

Exhibit R-4a: RDT&E Schedule Detail (Continued)

A. General Instructions:

1. The R-4 and R-4a exhibits are required for programs or projects funded in budget activities 4 (Advanced Component Development and Prototypes), 5 (System Development and Demonstration), and 7 (Operational System Development) only. Separate R-4 and R-4a exhibits **must** be prepared for each project in an applicable R-1 line item.

2. These exhibits **must** be printed on 8 1/2 by 11 inch paper in landscape format. If a program element is not divided into projects, then the program element itself is defined as a project for purposes of submitting R-4 and R-4a exhibits, and the exhibits and instructions apply to the entire program element. Classified material **must** be submitted separately.

B. Detail Instructions:

1. Date: Identify the month and year of submission of the exhibit. If an Amended Budget is submitted, identify the date of the revised submission.

2. Appropriation Code (Treasury Account Symbol) and Name/Budget Activity Number and Title. Identify the appropriation and budget activity. The budget activity title must match the RDT&E annex and the Program Resources Collection Process (PRCP) (R-1) locked position.

3. R-1 Item Nomenclature: Identify the name of the R-1 line item as identified in PRCP (R-1) locked position.

4. Program Element Number and Name: Identify the number and nomenclature of the program element as identified in PRCP (R-1) locked position.

5. Project Number and Nomenclature: Identify the project number and nomenclature on each page as identified in PRCP (R-1) locked position.

6. For the R-4, Schedule Profile, provide a schematic display (in image file format: tif, jpeg, gif, bmp, or png) of major program milestones that reflect engineering milestones, acquisition approvals, test and evaluation events, and other key milestones for the program events. Cover the program years, not just the budget year. Stub entries should be tailored to the events and activities of the reported program. Congressional “staffer day” briefing schematics are desired to minimize potential schedule display inconsistencies. However, the option to build the Schedule Profile using XML software is still available.

7. For the R-4a, Schedule Detail, provide a tabular display of the major program milestones identified on the R-4 as well as any additional programmatic events that contribute to and support the schedule profile identified on the R-4.

VOLUME 2B, CHAPTER 6: “MILITARY CONSTRUCTION/FAMILY HOUSING APPROPRIATIONS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by [blue](#) font.

Substantive revisions are denoted by an (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [***bold, italic, blue and underlined font***](#).

The previous version dated [June 2013](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Updated and changed paragraph numbering system throughout the chapter.	Revision
All	Changed “Planning & Design” to “Design” to reflect the Under Secretary of Defense for Acquisition and Sustainment’s guidance.	Revision
All	Updated authoritative guidance references throughout the chapter.	Revision
1.0	Substantively revised the General paragraph to update the Purpose narratives and add the required list of Authoritative Guidance information. Added the Military Unaccompanied Housing Improvement Fund (MUHIF) and the Military Housing Privatization Initiative (MHPI) Investments and Credit Financing to the list of appropriations and accounts.	Revision/ Addition
2.0	Established the Policies and Procedures paragraph to capture policies and procedures previously included in paragraph 1.0. Updated narratives to reflect the current offices responsible for managing and/or overseeing the programs in this chapter. Added MUHIF to description of Treasury Accounts.	Revision/ Addition
3.0	Moved the Uniform Budget and Fiscal Accounting Classification paragraph from 2.0 to 3.0 and updated contents for relevancy. Updated the unspecified minor military construction (MILCON) thresholds and added the MUHIF as a Major Functional Category.	Revision/ Addition

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
4.0	Moved the Program and Budget Review Submission paragraph from 3.0 to 4.0. and updated contents for relevancy. Updated full funding policy, Economic Analysis requirements, and DD 1391 requirements. Added Exhibit UH-6 MHPI - Military Unaccompanied Housing Privatization to the submission for MILCON appropriations and updated narratives detailing the current process for MHPI credit financing and investment information reflected in the President's Budget. Added clarification for use of category codes applicable to MILCON. Added reference to Building Condition Index (BCI) and replaced Q-Ratings with BCI. Added the MUHIF.	Revision / Addition
3.2.2.13, 3.2.2.20.3, & 3.2.2.20.5 (previous version)	Removed requirement to report Family Housing (FH) maintenance and repair costs over \$20,000 per unit. Removed Exhibits FH-6 Budget Estimate Submission (BES) and FH-13 Detail of Awarded Family Housing Privatization Projects because the consolidated Exhibit FH-6 replaced these exhibits.	Deletion
5.0	Moved the Congressional Justification/Presentation paragraph from 4.0 to 5.0. and updated contents for relevancy. Removed reference to Exhibit FH-6 BES because it is not applicable.	Revision/ Deletion
6.0	Established the MILCON/Family Housing Appropriation Exhibits paragraph to display the list of required exhibits.	Addition
Appendix A	Created appendix to capture detailed instructions and formats/templates for BES MILCON exhibits previously included in paragraph 5.2. Added the Exhibit UH-6 MHPI.	Revision/ Addition
Appendix B	Created appendix to capture detailed instructions and formats/templates for BES Family Housing exhibits previously included in paragraph 5.3. Replaced Exhibit FH-6 BES with the FH-6 Consolidated MHPI exhibit. Deleted FH-10, General and Flag Officer Quarters 6,000 Net Square Feet (NSF). Updated the FH-11 exhibit to include BCI. Removed Exhibit FH-13, Detail of Awarded FH Privatization Projects (replaced with consolidated FH-6 exhibit).	Revision/ Addition
Appendix C	Created appendix to capture detailed instructions and formats/templates for BES Homeowners Assistance exhibits previously included in paragraph 5.4.	Revision/ Addition
Appendix D	Created appendix to capture detailed instructions and formats/templates for BES NATO Security Investment exhibits previously included in paragraph 5.5.	Revision/ Addition

CHAPTER 6

MILITARY CONSTRUCTION/FAMILY HOUSING APPROPRIATIONS

*1.0 GENERAL

1.1 Purpose

1.1.1. This chapter provides instructions for budget formulation and congressional justification of Military Construction (MILCON), Family Housing, Homeowners' Assistance Program (HAP), North Atlantic Treaty Organization (NATO) Security Investment Program, Family Housing Improvement Fund (FHIF), Military Unaccompanied Housing Improvement Fund (MUHIF), and Military Housing Privatization Initiative (MHPI) Investments and Credit Financing appropriations. This chapter covers specific back-up material requirements for these accounts and provides additional specific guidance for the back-up material required for MILCON, Family Housing, Homeowners' Assistance Program and NATO Security Investment Program appropriations.

<u>Paragraph</u>	<u>Appropriations and Accounts</u>
3.1:	<u>MILCON</u> MILCON, Army MILCON, Navy and Marine Corps MILCON, Air Force MILCON, Defense-Wide MILCON, Army National Guard MILCON, Air National Guard MILCON, Army Reserve MILCON, Navy Reserve MILCON, Air Force Reserve Chemical Demilitarization Construction, Defense
3.2:	<u>Family Housing</u> Family Housing, Army Family Housing, Navy and Marine Corps Family Housing, Air Force Family Housing, Defense-Wide
3.3:	<u>Homeowners' Assistance Program</u> Homeowners' Assistance Fund, Defense
4.4:	<u>NATO Security Investment Program</u>
4.5:	<u>NATO Security Program Expansion Costs</u>
4.6:	FHIF/MUHIF Program
4.7:	MHPI Investments and Credit Financing

1.1.2. Volume 2A, Chapter 1 provides general guidance for submission requirements, format, preparation of material, policies, and definitions concerning costs. The definitions clarify costs for MILCON appropriations to finance, as opposed to other appropriations for Research and Development facilities.

1.1.3. The covered appropriations/accounts will also submit any applicable exhibits required in Chapter 19.

1.2 Authoritative Guidance

The financial management and requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.1. Title 2, United States Code, Chapter 17A, SUBCHAPTER III, (*2 U.S.C., Chapter 17A, Subchapter III*), “Federal Credit Reform Act of 1990”

1.2.2. *10 U.S.C. Chapter 169*, “Military Construction and Military Family Housing”

1.2.3. *10 U.S.C. Chapter 169, Subchapter IV*, “Alternative Authority for Acquisition and Improvement of Military Housing”

1.2.4. *10 U.S.C. § 114*, “Annual authorization of appropriations”

1.2.5. *10 U.S.C. § 2667*, “Leases: non-excess property of military departments and Defense Agencies”

1.2.6. *10 U.S.C. § 2672*, “Protection of buildings, grounds, property, and persons”

1.2.7. *10 U.S.C. § 2686*, “Utilities and services: sale; expansion and extension of systems and facilities”

1.2.8. *10 U.S.C. § 2801*, “Scope of chapter; definitions”

1.2.9. *10 U.S.C. § 2802*, “Military construction projects”

1.2.10. *10 U.S.C. § 2804*, “Contingency construction”

1.2.11. *10 U.S.C. § 2805*, “Unspecified minor construction”

1.2.12. *10 U.S.C. § 2806*, “Contributions for North Atlantic Treaty Organization’s Security Investment”

1.2.13. *10 U.S.C. § 2807*, “Architectural and engineering services and construction design”

- 1.2.14. 10 U.S.C. § 2809, “Long-term facilities contracts for certain activities and services”
- 1.2.15. 10 U.S.C. § 2812, “Lease-purchase of facilities”
- 1.2.16. 10 U.S.C. § 2824, “Authorization for acquisition of existing family housing in lieu of construction”
- 1.2.17. 10 U.S.C. § 2828, “Leasing of military family housing”
- 1.2.18. 10 U.S.C. § 2835, “Long-term leasing of military family housing to be constructed”
- 1.2.19. 10 U.S.C. § 2836, “Military housing rental guarantee program”
- 1.2.20. 10 U.S.C. § 2837, “Housing Requirements and Market Analysis”
- 1.2.21. 10 U.S.C. § 2851a, “Supervision of military housing by Chief Housing Officer”
- 1.2.22. 10 U.S.C. § 2865, “Work in Process Curve charts and outlay tables for military construction projects”
- 1.2.23. 10 U.S.C. § 2884, “Reports”
- 1.2.24. 12 U.S.C. Chapter 13: “National Housing”
- 1.2.25. 31 U.S.C. SUBTITLE II, Ch 15, Subchapter III, “Transfers and Reimbursements”
- 1.2.26. 37 U.S.C. § 403, “Basic allowance for housing”
- 1.2.27. Public Law 101-526 (P.L. 101-526), “Title II - Closure and Realignment of Military Installations”
- 1.2.28. P.L. 101-510, “Title XXIX - Defense Base Closures and Realignments”
- 1.2.29. Fiscal Year 2009 National Defense Authorization Act, Section 2801 (FY09 NDAA § 2805), “Imposition of requirement that acquisition of reserve component facilities be authorized by law”
- 1.2.30. (FY 96 NDAA § 2801), “Alternative authority for construction and improvement of military housing”
- 1.2.31. Office of Management and Budget Circular A-11 (OMB Circular A-11), “Preparation, Submission, and Execution of the Budget”

1.2.32. [OMB Circular A-76](#), “Performance of Commercial Activities”

1.2.33. [OMB Circular A-94](#), “Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs”

1.2.34. DoD Directive 2010.05 ([DoDD 2010.05](#)), “The North Atlantic Treaty Organization Security Investment Program”

1.2.35. [DoDD 4165.06](#), “Real Property”

1.2.36. [DoDD 4165.50E](#), “Homeowners Assistance Program (HAP)”

1.2.37. [DoDD 4270.5](#), “Military Construction”

1.2.38. DoD Instruction 1225.08 ([DoDI 1225.08](#)), “Reserve Component (RC) Facilities Programs and Unit Stationing”

1.2.39. [DoDI 4165.03](#), “DoD Real Property Categorization”

1.2.40. [DoDI 4165.63](#), “DoD Housing”

2.1.1. Policy

2.1.1.1. It is DoD Policy: 1) to provide Military Family Housing for military families and for eligible civilian families only when suitable housing in the community does not exist; 2) to provide for the housing and support services, as authorized by law, that are necessary to meet the requirements of the DoD; 3) that the program **must** be financed and managed in the most cost effective and efficient manner possible in order to support these requirements and to maximize the use of available program resources; 4) that the program **must** include the provision of assistance to all military personnel and certain eligible civilians in locating and utilizing privately owned housing including leasing; 5) that the program **must** include, within available resources, the provision of Government-owned or leased family housing and furnishings (referred to as Defense Family Housing Property); and 6) that the program **must** include the efficient and effective financial and program management of Defense Family Housing Property, including acquisition, privatization, operation, improvement, maintenance, debt financing, leasing, and family housing support programs.

2.1.1.2. The Family Housing Program encompasses Military Family Housing as defined and authorized by the provisions of 10 U.S.C. Chapter 169 and includes all DoD Component family housing in the Defense Family Housing Property Account, leases of real property utilized by DoD Components for family housing, and associated family housing support services programs.

2.1.2. Responsibilities

2.1.2.1. The Under Secretary of Defense for Acquisition and Sustainment (USD(A&S)) is responsible for program management as set forth in the DoDI 4165.63, and DoDM 4165.63, which also addresses Unaccompanied Housing. 10 U.S.C. § 2851a established the Assistant Secretary of Defense for Energy, Installations, and Environment (ASD(EI&E)) as the DoD Chief Housing Officer (CHO). The CHO oversees family and unaccompanied housing under the jurisdiction of the DoD or acquired or constructed under the MHPI. The Office of the Deputy Assistant Secretary of Defense for Housing (ODASD(H)) carries out the day-to-day responsibilities of the CHO with respect to the creation and administration of policies and processes regarding privatized, DoD-owned, and DoD-controlled family and unaccompanied housing. The ODASD(H) also has responsibility for overseeing the HAP. The Under Secretary of Defense (Comptroller) (USD(C)) is responsible for financial management, program budget policies, program accounting policies, and financial reporting. As prescribed by the USD(C), the Director, Defense Finance and Accounting Service, is responsible for central accounting and financial reporting for the program. As prescribed by DoDI 4165.63, the Secretaries of the Military Departments and the Directors of the Defense Agencies are responsible for execution of the program for personnel under their respective jurisdictions, including program and financial management, accounting and reporting.

2.1.2.2. In the financial management and execution of the program, DoD Components **must** conduct program budget formulation, presentation, and execution in accordance with the guidance and provisions contained in this chapter and adhere to the program accounting and financial reporting guidance and provisions contained in Volume 4.

2.1.3. Objectives and Procedures

2.1.3.1. Assistance in Locating and Utilizing Privately Owned Family Housing. Assistance provided to DoD personnel to obtain privately owned family housing under the program includes privatized housing referral service, including administration of private rental housing for DoD personnel overseas; DoD leasing of private housing; rental guarantee payments pursuant to 10 U.S.C. § 114 and service members' mortgage insurance payments on their privately owned housing made pursuant to 12 U.S.C. Chapter 13.

2.1.3.2. Defense Family Housing Property. The Family Housing Program will manage and control all DoD-owned or DoD-controlled physical property described in subparagraph 2.1.3.2.1. The properties will be recorded in a property account entitled the Defense Family Housing Property Account, which should be fully consistent with the DoD Real Property Inventory and Select & Native Programming (SNaP) databases. Guidance for the maintenance of property accounting records is contained in Volume 4. A continuing permanent accounting record

will be maintained of the real property included in each installation's Family Housing Property Account. Appropriate classifications will be entered on the records to distinguish between real and personal property. Property will be removed from the Defense Family Housing Property account when the property is disposed of as (DoD property), when it is transferred to DoD non-family housing use. The Report Control Symbol assigned to the special record keeping requirements is DD-COMP (AR)1501.

2.1.3.2.1. The Defense Family Housing Property Account includes the following properties, under the jurisdiction of the DoD, to which the Government has a right, title, or interest, with exceptions noted in paragraph 2.1.3.2.2.

2.1.3.2.1.1. All types of family dwelling units and mobile home park facilities, without regard to the military status of the occupant and including housing that is: located on or off station, owned or leased, occupied or unoccupied; situated in dispersed locations or in community-type areas; located at an active, inactive, standby, or reserve facility; or, operated or maintained by the Government, directly or by contract.

2.1.3.2.1.2. Non-dwelling buildings directly associated with family dwelling units or a family housing area, including structures outside the housing area required solely for family housing support.

2.1.3.2.1.3. Roads, driveways, walks, and utility systems which primarily serve family housing units or areas.

2.1.3.2.1.4. The grounds area of a group of family housing units and the yards of dispersed family housing units or areas.

2.1.3.2.1.5. Community facilities which are integral to a family housing area and are available for use only by family housing area residents and their house guests.

2.1.3.2.1.6. Fixtures and other appliances or equipment in a housing unit that are either integral components or movable items, such as: refrigerators, kitchen ranges and, when authorized, food freezers, room air conditioners, washing machines, clothes dryers, dishwashing machines, garbage disposals, exhaust fans, roof or attic television antennas; and those appliances provided for family housing rented privately by DoD personnel in areas outside the conterminous United States, pursuant to DoDM 4165.63.

2.1.3.2.1.7. Furniture, furnishings, and other personal property that are directly associated with providing and supporting family housing units, including personal property provided for use outside the conterminous United States, pursuant to DoDM 4165.63.

2.1.3.2.2. The Defense Family Housing Property Account excludes the following properties, irrespective of the Government's right, title, or interest therein:

***February 2025**

2.1.3.2.2.1. Aerial roads, public walks, utility lines, and utility mains that may pass through or in front of family housing locations but serve those locations as an incidental or secondary purpose to other station requirements.

2.1.3.2.2.2. Facilities similar to hotels or motels, which are provided for temporary family occupancy.

2.1.3.2.2.3. Community facilities which are not integral to a family housing area or are available for use by other than family housing area residents and their house guests.

2.1.3.2.2.4. Educational facilities.

2.1.3.2.2.5. Telephone and other communication facilities for official use, and telephone facilities for unofficial use, installed in a family housing unit.

2.1.3.2.2.6. Community Antenna Television distribution service by other Government agency, commercial cooperative, or private enterprise.

2.1.3.2.2.7. Properties financed by and supporting the Defense Security Assistance Program.

2.1.3.2.2.8. Food service facilities.

2.1.3.2.2.9. Facilities used primarily for religious services or religious activities.

2.1.3.3. Management of Defense Family Housing Property. Management undertakings, which arise in connection with the DoD responsibility for and jurisdiction over Defense Family Housing Property, include:

2.1.3.3.1. The acquisition, privatization, construction, and replacement of family housing facilities and the preliminary design studies on prospective projects, including housing requirement surveys.

2.1.3.3.2. The conversion of other real property facilities to family housing quarters.

2.1.3.3.3. The upgrading to “adequate public quarters” of those family dwelling units designated as rental, substandard, or inadequate.

2.1.3.3.4. The alteration of, or addition, expansion, or extension to, family housing facilities.

2.1.3.3.5. The outfitting of family housing facilities, as defined in [subparagraph 2.1.3.1.2.](#), with fixtures and other equipment that are either integral components or

movable items of major equipment of a housing unit, including major appliances; and furniture, furnishings, and other personal property. This function includes maintenance and repair (M&R).

2.1.3.3.6. The M&R of family housing facilities.

2.1.3.3.7. The furnishing of the following services to family housing facilities: utilities services, except telephone service and cable television; refuse collection and disposal; insect and rodent control; snow removal; handling and moving Government-owned furnishings; police and fire protection; and administrative, supervisory and clerical services related to the performance of services rendered the family housing facilities.

2.1.3.3.8. The maintenance and security of family housing property declared excess to DoD needs, which rests with the DoD Component until the DoD is relieved of this responsibility. The following rules and principles apply:

2.1.3.3.8.1. If the General Services Administration (GSA) is disposing the property, the transfer of financial responsibility to GSA will be in accordance with Federal Property Management Regulations, Part 101-47, 402.

2.1.3.3.8.2. When the DoD recommends to GSA that disposal of excess property be delayed because of economic considerations and a contract has been made with a local agency to rent the property and to protect and maintain it, the residual financial responsibility for maintenance and security rests with the DoD.

2.1.3.3.8.3. It has been agreed with the GSA that, in interpreting property disposal regulations, the DoD will be deemed to have declared the property excess to GSA on the date that the protection and maintenance contract is discontinued.

2.2 Family Housing Procedures for Administration and Management of Program Funds

2.2.1. Treasury Accounts

For Family Housing Construction, funds are appropriated to remain available for five years. For Family Housing Operation and Maintenance (O&M), funds are appropriated with annual account limitations. For the DoD FHIF and MUHIF, funds are appropriated to support MHPI administrative program expenses, including accounting and financial reporting services, and remain available until expended. These and other funds made available for family housing are administered under the Treasury accounts outlined in Volume 2A, Chapter 1, paragraph 6.3.

2.2.2. Funding the Family Housing Program

2.2.2.1. The Family Housing Program will be financed from:

2.2.2.1.1. Those funds primarily appropriated for family housing purposes.

2.2.2.1.2. Authorized reimbursements and collections from housing rentals and services furnished as set forth in subparagraphs 2.2.2.1.2.1 through 2.2.2.1.2.8.

2.2.2.1.2.1. Charges will be made for rentals and services furnished certain occupants or users of family housing facilities. Determine the amount of rent charged in accordance with the provisions of DoDM 4165.63. Disposition of the proceeds of handling or disposal of excess family housing property is treated in subparagraph 2.2.2.1.3.

2.2.2.1.2.2. Collections for rents and services to finance family housing expenses in accordance with applicable statutes are listed in subparagraphs 2.2.2.1.2.3 through 2.2.2.1.2.8. Such reimbursements will be utilized within the financial authority issued by the USD(C) but limited to the amount of reimbursements earned.

2.2.2.1.2.3. Utilize the collections received for rental of Defense housing within the applicable DoD Component family housing account to defray O&M expenses. If the housing is rented with Government furniture provided, treat the combined total charge for shelter rent and furniture rent as indicated in subparagraph 2.2.2.1.2.2.

2.2.2.1.2.4. Utilize the collections from the sale of utilities and services within the appropriation currently available for the supply of that utility or service in accordance with the authority set forth in 10 U.S.C. § 2686.

2.2.2.1.2.5. Collections from other agencies related to O&M charges pursuant to 31 U.S.C. Chapter 15, Subchapter III will be affected.

2.2.2.1.2.6. When non-excess family housing property is leased, pursuant to 10 U.S.C. § 2667, deposit the rental moneys received in a special account in the U.S. Treasury established for DoD Components for allocation as prescribed in 10 U.S.C. § 2667. Deposit the moneys received for utilities or services to the applicable DoD Component family housing account.

2.2.2.1.2.7. For accounting purposes, identify those reimbursements described in subparagraph 2.2.2.1.2 to be used for O&M purposes as financing the operations portion of the O&M expenses.

2.2.2.1.2.8. Deposit all collections for family housing rents or services, other than those described in subparagraph 2.2.2.1.2 and in subparagraph 2.2.2.1.3 to Treasury Miscellaneous Receipt Account 1830, "Rent of Real Property not Otherwise Classified," under a citation which includes the appropriate DoD Component two-digit prefix symbol. Such collections include those to cover costs of repairing damages to family housing facilities (including replacement of items) caused by family housing occupants.

2.2.2.1.3. Other funds which are available from disposal of excess family housing property as set forth in subparagraphs 2.2.2.1.3.1 through 2.2.2.1.3.4.

***February 2025**

2.2.2.1.3.1. In the case of family housing in the United States disposed of pursuant to P.L. 101-526, Title II, the Defense Authorization Amendments and Base Closure and Realignment Act or P.L. 101-510, Defense Base Closure and Realignment Act of 1990, deposit the proceeds in the DoD Base Closure Account 1990.

2.2.2.1.3.2. In the case of family housing disposed of under authorities contained in 10 U.S.C. Chapter 169, Subchapter IV, as added by FY96 NDAA § 2801, for purposes of using the proceeds to carry out activities authorized under those provisions, deposit the proceeds in the DoD FHIF. 10 U.S.C. Chapter 169, Subchapter IV, § 2883(d) limits the funds that can be expended from the account to such amounts as provided in the appropriations act. Therefore, non-appropriated proceeds deposited into the FHIF account cannot be used to fund privatization projects, without it being appropriated, first.

2.2.2.1.3.3. In the case of family housing overseas disposed of under circumstances which fall within the provisions of P.L. 101-510, § 2921 as amended, the deposit the proceeds in the Defense Overseas Military Facility Investment Account.

2.2.2.1.3.4. In the case of family housing disposed of under other circumstances, deposit the proceeds in the appropriate military family housing account.

2.2.2.2. The DoD Component having responsibility for the Defense installation or housing area will program, budget, and account for Family Housing Program costs, regardless of the DoD Component of the housing occupant. Reimbursement for such costs will not be made between DoD Components.

2.2.2.3. Funding will be on a program-year basis. The detailed program-year criteria for the major functional categories and for the immediate subordinate accounts is set forth in subparagraphs 2.2.2.3.1 through 2.2.2.3.3.

2.2.2.3.1. The program year for the undertakings (projects for new construction, acquisition of housing, construction improvements, and minor construction) must be the same as the year of the applicable annual MILCON Authorization Act.

2.2.2.3.2. After the program year for a specific project is established, administer the related appropriation for that project under the designated program year, irrespective of when the work is undertaken. In the event there are savings due to lower bids or change in scope, these savings may be reprogrammed for projects authorized in different program years in accordance with guidance provided in Volume 3, Chapter 7, “Reprogramming of Military Construction and Family Housing Appropriated Funds.”

2.2.2.3.3. For design, which is a “level of effort” type activity, the following program year concept applies:

2.2.2.3.3.1. Budget estimates for the budget year (BY) and each future year will include the design work programmed to be placed on contract or intragovernmental order during the program year and the design work expected to be performed with in-house

capabilities during the program year. **Determine** the dollar value of a planned program on the basis of estimated obligations to be incurred during the program year for the program scope embraced by subparagraphs 2.2.2.3.1 and 2.2.2.3.2.

2.2.2.3.3.2. **Request and issue** obligation authorities by program year on the basis of obligations estimated to be incurred as a result of the issuance during the program year of contracts or other orders which constitute valid obligations pursuant to Volume 4 for design work, irrespective of when the work **will** be performed and the accomplishment during the program year of design work with in-house capability. **Charge** obligations by program year on these same bases.

2.2.2.3.3.3. **Make** adjustments to obligations charged against a prior program year only to the extent of an adjustment in the amount of an obligation recorded for specific work ordered in that prior program year or de-obligations to reflect cancellation of work ordered in that prior year (PY). New obligations for design work for a particular project which are in addition to that ordered in prior program years for that project are charges against the program year in which those new obligations are incurred.

2.2.2.3.3.4. For rental guarantee payments, the program year **must** be the fiscal year in which the rental guarantee payments are obligated. No new obligations may be incurred under a program year obligation authority after the close of that program fiscal year. **Make necessary** adjustments to obligations for rental guarantee payments to reflect actual obligations incurred during the fiscal program year in accordance with existing procedures covering adjustment to annual accounts.

2.2.2.3.3.5. The major functional categories of O&M and debt payment are considered “level of effort” type activities. **Develop** program planning and budget estimates for these categories in accordance with that concept. **Request and issue** obligational authority for O&M and debt payment by program year **because the authority** will not be available for new obligations after the close of the fiscal year for which such authority is issued. **Make necessary** adjustments to obligations for O&M and debt payment to reflect actual obligations incurred during the fiscal program year in accordance with existing procedures covering adjustment to annual accounts.

2.2.2.4. **Apply economic analysis** to all program investment proposals in accordance with this **chapter** which sets forth budget submission requirements.

2.2.2.5. **Obtain apportionment of funds and issuance of financial authorities** as follows: each DoD Component (except Defense Agencies) **must** submit to the OUSD(C) an apportionment request, as prescribed in Volume 3, Chapter 2, “Apportionment/Reapportionment and Funds Distribution.” The OUSD(C) will issue specific financial authority to the DoD Components concerned in such amounts and at such levels as appropriate for efficient and economical administration of the Family Housing Program.

2.2.2.6. For the Construction category, **provide the** Office of the Secretary of Defense (OSD) program approval and obligating authority by fiscal year, generally at the

construction element level (immediate subordinate account level) or at project level where circumstances warrant. Volume 3 defines the scope of realignment authority delegated to the DoD Components. [Report](#) all program/fund realignments in accordance with Volumes 2 and 4.

[2.2.2.7. Record and report](#) obligations, incurred costs, accrued expenditures, accrued revenues, disbursements and receipts in accordance with Volume 4. When another appropriation, e.g., O&M, initially incurs a funded cost, [bill](#) the applicable DoD Component family housing account at least monthly. [Charge the](#) obligations, incurred costs, accrued expenditures and disbursements to the applicable accounts.

[2.2.2.8.](#) The balance due on indebtedness previously assumed should be in a “Borrowing Account” in conformance with Federal budget concepts.

[2.2.2.9. Record](#) the acquisition of property in accordance with Volume 4. [Record](#) the amount of the mortgage assumed as an increase in the “Borrowing Account” and report [it](#) to the Treasury under Code (97).

[2.3](#) Use of O&M Funds under Contingency Construction Authority

The criteria and procedures for the use of O&M funds under Contingency Construction Authority (also known as [§ 2804](#) Authority) are listed in Volume 3, Chapter 17, [paragraph 3.3](#).

[*3.0](#) UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATION

[3.1](#) [MILCON](#) Appropriations

[Accomplish](#) programming, budgeting, financing, and accounting for the [MILCON](#) Program under an account structure uniformly used for these purposes by all DoD Components. The uniform account structure and scope of each account prescribed for the administration of the [MILCON](#) Program are as follows:

[3.1.1.](#) Major Functional Category: Construction

[3.1.1.1. Immediate Subordinate Account: Major Construction.](#) Includes construction projects authorized under 10 U.S.C. § 2801 and § 2802 for the purposes of erection, installation, or assembly of a new facility; the addition, expansion, extension, alteration, conversion, or replacement of an existing facility; or the relocation of a facility from one installation to another. Includes equipment installed and made a part of such facilities, and related site preparation, demolition, excavation, filling and landscaping, or other land improvements.

[3.1.1.2. Immediate Subordinate Account: Minor Construction.](#) Includes any construction project not otherwise authorized by law having a cost equal to or less than [\\$9,000,000](#). Minor construction projects costing more than \$750,000 may not be carried out unless 10 U.S.C. § 2805 requirements are met. This includes advance approval by the Secretary concerned, and notification to the Congress [if the project amount is more than \\$4,000,000](#). An

unspecified MILCON project costing not more than \$4,000,000 may be funded from appropriations available for O&M.

3.1.1.3. Immediate Subordinate Account: Design. Includes architectural and engineering services, construction design, working drawings, specifications and estimates for construction projects. 10 U.S.C. § 2807 pertains to architectural and engineering services and construction design.

3.1.1.3.1. Design Status. Consider projects with parametric cost estimates and supporting documentation, e.g., site plan, economic analysis, and National Environment Policy Act (NEPA) documentation, at the 15 percent design level.

3.1.1.3.2. Projects using the traditional method of design, being designed in-house, using a standardized design, or site adapting a previous design should use the milestone chart to gauge their design status.

Milestone Chart	
Design Milestone	Design Status
1% Design Complete	Design instructions issued to major command.
2% Design Complete	Major command design instructions issued to design agent.
3% Design Complete	Notice to proceed issued to architect/engineering firm (A&E) by the design agent.
30% Design Complete	Concept plan, early preliminary working drawings, design analyses, and outline specifications issued by the designer.
35% Design Complete	Concept or early preliminary review comments forwarded to the design agent.
60% Design Complete	Regular preliminary working drawings, design analyses, and updated cost estimate and outline specifications issued by the designer
65% Design Complete	Regular preliminary review comments forwarded to the design agent.
90% Design Complete	Final design (working drawings, design analyses, cost estimates, and specifications) completed by the designer.
95% Design Complete	Final design review comments forwarded to the design agent
100% Design Complete	Corrected final design accepted by the DoD Component.

3.1.1.4. Immediate Subordinate Account: Supporting Programs. Includes Defense access roads and land acquisitions.

3.1.2. Major Functional Category: NATO Security Investment Program

Includes contributions for the United States share of the cost of multilateral programs for the acquisition and construction of military facilities and installations (including international military headquarters) and for the related expenses for the collective defense of the North Atlantic Treaty Area. 10 U.S.C. § 2806 pertains to contributions for NATO Security Investment Program.

3.2 Family Housing

DoD Components will use the uniform account structure established for programming, budgeting, financing and accounting for the family housing program. [Administer](#) the account structure so as to provide program and financial control of the family housing program consistent with applicable statutes. The uniform account structure and scope of each account for the family housing program are as follows:

3.2.1. Major Functional Category: Construction

3.2.1.1. Immediate Subordinate Account: New Construction (by Installation and Project). Includes the erection, installation, assembly, relocation or replacement of single or multifamily dwelling units, related land acquisition, site preparation, excavation, filling and landscaping, or other land improvements. Also included are the initial outfitting during construction of a dwelling unit with fixtures and other requirements which are either integral components or movable items of major equipment thereof, including major appliances, and architectural and engineering supervision and inspection of construction. Includes design costs of contractor to perform a turnkey contract. New construction also includes the construction of items included in subparagraphs [2.1.3.2.2.1 through 2.1.3.2.2.3](#) and [2.1.3.2.2.5](#).

3.2.1.2. Immediate Subordinate Account: Construction Improvements (formerly Post Acquisition Construction). Includes major construction projects (projects beyond those authorized under the minor construction program) for the following (by installation and project): upgrading inadequate public quarters, rental housing and acquired units to produce adequate public quarters; conversion of existing facilities to public quarters; alterations, additions-expansions-extensions; construction of family housing real property, other than dwelling units required subsequent to and because of previously acquired dwelling units; and the payments made to military personnel for telephone reconnection charges **must** be included in project costs under this subaccount when a construction project involves relocation, alteration, improvement, or other work necessitating Government directed, non-Permanent Change of Station moves between Government quarters. However, in cases where concurrent maintenance/repair work is involved, telephone reconnection costs **must** be charged to the maintenance account.

3.2.1.3. Immediate Subordinate Account: Design. Includes the **design**, working drawings, specifications and estimates for construction projects approved by the Secretary of Defense for inclusion in the President's Budget. Also includes consolidated DoD guide drawings, specifications, and **design** efforts on projects which are not subsequently constructed.

3.2.2. Major Functional Category: O&M

3.2.2.1. Immediate Subordinate Account: Operation. This account includes the costs associated with Management, Services, Furnishing, and Miscellaneous subaccount categories identified in subparagraphs [3.2.2.1.1 through 3.2.2.1.4](#).

3.2.2.1.1. Management. This account includes costs for management, administrative, and support-type services at the installation level, such as, inspection of

construction and administration of rental guarantee projects, housing referral administration, housing office base support costs, surveys, engineering studies, and other identifiable management costs.

3.2.2.1.2. Services. This account includes cost associated with refuse collection and disposal, fire protection, police protection, entomological services, custodial services, snow removal, street cleaning, and other municipal-type services.

3.2.2.1.3. Furnishings. This account includes initial acquisition, maintenance, repair and replacement of furniture, furnishings and other personal property (see subparagraph 2.1.3.2.1.7); the furnishing of services included in subparagraph 2.1.3.3.7.

3.2.2.1.4. Miscellaneous. This account includes other family housing program operational costs that do not fall into the other Operation categories.

3.2.2.2. Immediate Subordinate Account: Housing Privatization Support. Includes the costs that the government incurs in direct support of the family housing privatization program under the authorities of 10 U.S.C. Chapter 169, Subchapter IV, **except for** those costs that will be included as part of the privatization project. These costs include all administrative, planning, development, solicitation, award, transition, construction oversight, and portfolio management activities associated with military housing privatization and specifically for:

3.2.2.2.1. Site Assessment Costs. Includes all costs in direct support of the family housing privatization program for environmental baseline assessments, environmental assessments, environmental impact statements, and any efforts required to be accomplished by the government prior to privatization for, environmental mitigation, site surveys, or real estate costs.

3.2.2.2.2. Project Costs. Includes all costs in direct support of the family housing privatization program for project feasibility studies, concept development, consultant fees, solicitation, procurement, contracting, execution, transition, construction management (supervision, inspection and overhead), post award management/monitoring, and portfolio management.

3.2.2.2.3. Administrative Costs. Includes all costs in direct support of the family housing privatization program for civilian pay, travel, training, supplies, equipment, and for any services provided by a Component in support of the privatization program.

3.2.2.3. Immediate Subordinate Account: Maintenance of Real Property Facilities. This account includes **M&R** of buildings, roads, driveways, walks, exterior and interior utility systems and grounds care; and maintenance, repair and replacement of fixtures and other equipment which are integral components of a housing unit. This account also finances the costs of reimbursements made to military personnel for telephone reconnection charges when maintenance or repair work necessitates Government-directed, non-PCS moves. This includes such charges resulting from improvement/repair projects funded in part from the family housing construction account.

3.2.2.4. Immediate Subordinate Account: Leasing. This account includes leasing of family housing facilities by the Government as outlined in subparagraph 2.1.3.1.

3.2.2.5. Immediate Subordinate Account: Utilities. This account includes costs for utilities consumed in government-owned family housing, including electricity, water, sewage, natural gas, fuel oil, or other heating fuels. It excludes the costs associated with the M&R of utility systems covered under the Maintenance of Real Property Facilities Account.

3.2.2.6. Immediate Subordinate Account: Mortgage Insurance Premiums (or also known as Servicemen's Mortgage Insurance Premiums). This account includes payments of servicemen's mortgage insurance premiums pursuant to 12 U.S.C. Chapter 13, as amended.

3.2.3. Major Functional Category: DoD FHIF. Includes activities required for family housing in connection with the MHPI program planning, execution, accounting and financial reporting, and administration of contracts entered into under the authorities of 10 U.S.C. Chapter 169, Subchapter IV.

3.2.4. Major Functional Category: MUHIF. Includes activities required for unaccompanied housing in connection with the MHPI program planning, execution, accounting and financial reporting, and administration of contracts entered into under the authorities of 10 U.S.C. Chapter 169, Subchapter IV.

3.3 Homeowners' Assistance Fund, Defense

Exhibits HA-1 through HA-4 in Appendix C prescribe the program/budget account classification structure for the HAP.

*4.0 PROGRAM AND BUDGET REVIEW SUBMISSION

4.1 MILCON

4.1.1. General Guidance. Concurrently submit supporting data for each of the MILCON appropriation requests with all other DoD appropriation requests. To facilitate the review and decision-making process, it is essential that the packaging of justification materials conform to the uniform facility category structure established by DoDI 4165.03.

4.1.1.1. Determine construction requirements in consonance with Program Decision Memorandum (PDM) guidance and with applicable Executive Orders, OMB Circulars, and relevant DoD instructions and directives.

4.1.1.2. Support each proposed construction project with DD Form 1391/1391C, MILCON Project Data and a DoD Construction Agent assessment. Prepare these exhibits in accordance with guidance contained in Appendix A. Projects associated with intelligence or intelligence-related operations will be so identified. Block 5, Program Element, DD Form 1391, will include the annotation National Intelligence Program (NIP) or Military Intelligence Program (MIP) as appropriate. Prepare DD Form 1390, MILCON Program, for each installation at which

major construction is planned, utilizing the format prescribed in [Appendix A](#). The Guard and Reserve Components will utilize DD Form 1390S, Guard and Reserve Forces MILCON. Additionally, for projects over \$90 million each Component must submit a Work-in-Progress curve in accordance with 10 U.S.C. § 2865.

4.1.1.3. Each Component will also submit a Major Initiative code for every MILCON budget line item in the electronic Next Generation Resource Management System.

4.1.1.4. OMB is enforcing the full funding policy contained in OMB Circular A-11. The Components are required to ensure that all projects are fully funded in compliance with OMB Circular A-11. However, DoD Components may submit an exception request from the full funding policy with the Budget Estimate Submission (BES) to the OUSD(C) for construction projects over \$250 million. OUSD(C) will request an exception to the full funding policy from OMB. If granted, components may budget increments for the construction project. Additionally, for projects costing less than \$250 million, the Components may break projects down into complete and usable phases, with phases in multiple years.

4.1.1.5. In the case that OMB grants a waiver to allow budgeting for the incremental funding of a project, the Components have the flexibility to move funding between increment/years to allow for flexibility, but only if there is no increase in the total cost of the project or number of increments. When projects fully funded in a given year's President's Budget request are incrementally funded by Congress, the Components must fund the remaining amount within two subsequent increments (for a total of no more than three increments). Budget justification materials (1391/1391C) should include a chart depicting all outyear liabilities resulting from incremental funding decisions.

4.1.1.6. To ensure prudent and economic investments, a life cycle, net present value economic cost analysis is required to support all new construction or renovation projects estimated to cost in excess of the amount specified in 10 U.S.C. § 2805(a)(2), as adjusted by paragraph (f). DoD Components must retain copies of these studies and provide them, when requested, during the OSD - OMB program and budget review. In accordance with Volume 2A, Chapter 1, subparagraph 3.3.1.3.3, components are required to indicate on the justification page for each individual construction project whether or not an economic analysis is applicable or pertinent. If not applicable, a statement is required indicating why.

4.1.1.7. In accordance with guidance provided in DoDD 2010.05 Section 2.5.d, components are required to indicate on the justification page for each individual construction project for U.S. forces committed to NATO, a statement whether or not the project is planned for prefinancing, with appropriate explanation as to: (a) why U.S. unilateral financing is being proposed; and (b) as appropriate, follow-on actions planned to seek reimbursement through NATO channels. A similar statement is required for any other overseas construction, describing why the project is not eligible for host nation funding. DoDD 2010.05 provides more specific guidance.

4.1.1.8. [Submit](#) justification materials DD Forms 1390/1391/1391C in book form, with appropriate cover, bound on the left margin. [Submit](#) classified materials in separate volumes, with appropriate security classification markings on covers.

4.1.1.9. The following [paragraphs](#) outline the specific materials to be provided including special guidance as to formats to be followed. [Volume 2A, Chapter 1](#) identifies the numbers of copies required. [Volume 2B, Chapter 16](#) outlines other special materials required for intelligence activities.

4.1.1.10. All budget submissions for [MILCON](#) and family housing programs should include outyear project level detail in the format specified in [Appendix A](#).

4.1.1.11. For any joint funded Guard or Reserve [MILCON](#) project, the lead component [must](#) submit a DD Form 1391 for the complete joint facility and a signed Memorandum of Agreement (MOA). Additionally, the lead component will submit the Guard and Reserve Joint [MILCON](#) Project Exhibit, MC-2, in accordance with the format contained in [Appendix A](#).

4.1.2. Construction Programs for the Active Forces and Defense Agencies. [Arrange](#) the books containing the DD Forms 1391/1391C by facility category, following the guidelines established by DoDI 4165.03. For each project, the DD Form 1390 will immediately precede the DD Form 1391/1391C. In each DD Form 1391/1391C provided for the OSD submission, the following design status is required: (1) date of design or parametric cost estimate initiation; (2) percentage of design complete on the OSD submission date; (3) date on which 35 percent design or a parametric cost estimate (15 percent design level) will be or has been completed (including review and approval of 35 percent drawings); (4) projected or actual date of design completion; (5) percentage of design utilizing standard design, (6) if the project cost is based on parametric estimates, include the annotation “Parametric estimates have been used to develop project costs;” and (7) type of design contract, i.e. design-build, design-bid-build, or other. [If other, provide a brief explanation of the design contract.](#) [The information should be displayed on the DD Form 1391, section 12, Supplemental Data.](#) Projects proposed for alternative construction methods such as turnkey, or private financing alternatives, for which percent design is not appropriate, should be noted in place of the design status required for normal projects. Prior to the submission of the President’ Budget to Congress, [notify](#) the OUSD(C) Military Personnel and Construction (MPC) Directorate of any projects in the request where the cost estimate is not based on either 35 percent design or a parametric cost estimate (15 percent design level).

4.1.2.1. Major Construction. For purposes of the OSD and OMB review:

4.1.2.1.1. [The project will identify and list each distinct facility indicating the appropriate five- or six-digit Military Department category code adjacent to the item description. A distinct facility possesses a unique real property category code described by the functional requirement and a quantity in the unit measure for the category code. When a project includes multiple distinct facilities, the project title must correspond to the code of the predominant use for the facility. Components of distinct facilities, even if quantified, do not constitute distinct facilities. Items such as cost premium for design features \(e.g., sustainable design\) that are](#)

represented by “lump sum” quantities do not constitute distinct facilities. See paragraph Appendix A for further instructions on submission formats.

4.1.2.1.2. Each DD Form 1391 for a major construction project must show the construction contract award date. Indicate month and year the contract is planned to be awarded to the construction firm. Indicate month and year construction is planned to start (construction start date) and indicate month and year construction is planned to be completed (construction completion date). The information should be displayed on the DD Form 1391, section 12, Supplemental Data.

4.1.2.1.3. All DD Forms 1391 for projects submitted in the BES must include the office and phone number of the installation responsible for the requested project. Display this information on the bottom left-hand corner of the last page of the DD Form 1391.

4.1.2.2. Minor Construction. The total minor construction program request should be submitted as a lump sum submission on a single Form DD Form 1391, specifying the amount proposed for unspecified (unforeseen) minor construction projects costing up to \$9.0 million per project.

4.1.2.3. Supporting Activities. The funding request for Supporting Activities will continue to be reflected as a lump sum amount on DD Form 1391. Supporting detail (location/cost) will be shown parenthetically following the lump sum estimate. While this item will be addressed for decision making purposes in the document covering Utilities and Real Estate, it should be listed separately and not included in the indexes for either Utilities or Real Estate, which fall under different facility category codes.

4.1.2.4. Restrictions on Omnibus Construction Packages. Apart from the specific exceptions noted for the pollution abatement, energy conservation, and minor construction programs, which are discrete decisions, there are to be no other omnibus packages or breakouts in the DD Form 1391 justification books. List all other projects under the appropriate facility category. In this respect, the Marine Corps facilities program will be integrated with the Navy facilities program so that all Navy and Marine facilities are included in a single Department of Navy facility category listing covering the entire “MILCON, Navy and Marine Corps” appropriation request. However, a separate “non-add” listing or index of all Marine Corps unique facilities, similar to those provided in the past, is both useful and desired.

4.1.2.5. Budget Summary and Indexing. Each Component will provide a one-page Budget Summary at the front of the justification book that provides a summary of the total construction program request. The summary will show, by column, the Total Obligation Authority (TOA), Budget Authority (BA), and authorization requested with subtotals by budget activity. Additionally, the books containing the DD Forms 1391/1391C should provide, immediately preceding each category section, an index showing facility category code numbers, installation and location, project number and title, cost, and DD Form 1391 page number. The index should also identify each project as either new mission or current mission.

4.1.2.6. Multi-service and National Level Support Programs. **Program/Budget** projects providing multi-service or national level support under the appropriation “MILCON, Defense-Wide,” or, in the case of NATO Security Investment Program, under the appropriation “NATO Investment Program.” These are to be determined on a case-by-case basis and should be identified as early as possible in the program planning phase. **Identify** such items in the Program Objective Memorandum (POM) and PDM process with appropriate programmatic adjustment or treatment during that phase of the review.

4.1.2.7. Should, on rare occasions, other candidates surface outside of the POM/PDM process, they will require review in the budget review process. The following guidelines apply:

4.1.2.7.1. The individual military departments will serve in an executive agency capacity for support of those construction items. The military department assigned executive agency responsibility will continue to provide all necessary and appropriate management support for such projects, including preparation of budget justification materials, and will continue to fully manage and execute the program including the preparation of all budget justification materials and defense of estimates submitted to Congress.

4.1.2.7.2. For those projects which have been identified and programmed as multi-service or national level support programs during the POM and PDM process, the executive agent will provide, at the time of its own budget submission, a separate submission consisting of all justification materials (DD Forms 1391/1391C) necessary for OSD and OMB review. Such projects are not to be reflected (duplicated) in the submission covering the department’s own program (i.e., financial program, facility category listings).

4.1.2.7.3. For those projects which may surface outside the POM and PDM process as possible additional candidates, the sponsoring military departments will include these in their own construction program submissions as outlined earlier in this chapter, within their own fiscal levels, and separately highlight such items, providing a narrative explaining the basis for change.

4.1.3. Construction Programs for the Guard and Reserve Forces. **Submit** justification materials for the Guard and Reserve construction programs on DD Forms 1391/1391C (Project Data). A separate justification book is required for each of the five Guard and Reserve appropriations.

4.1.3.1. The DD Forms 1391/1391C will be in a single volume covering total requirements for each appropriation. **Sequence** the materials in alphabetical order, by state and by installation within state. The justification pages covering the lump-sum amount requested for minor construction will appear last. The DD Form 1390S will be in a separate section following the DD Forms 1391/1391C. Each book **must** include an index in the front, showing the installation and location, project title, project cost, DD Form 1391 page number, and arranged in alphabetical order by state.

4.1.3.2. Each Guard and Reserve program submission **must** include separate listings identifying amounts requested in the budget year for: (a) air and water pollution abatement; and (b) energy conservation investment programs. Each listing **must** show the installation and location, project title, project cost, and DD Form 1391 page number. “Negative response” listings are required to assure complete coverage.

4.1.4. Construction Design. Identify and justify the annual estimates for **design** on DD Form 1391. In preparing the annual estimates, **give** full consideration to the lead-time required to meet the objective of having each construction project at the 35 percent design stage at the time the Budget is submitted to OSD. Guard and Reserve component construction projects will meet the **design** criteria established in DoDI 1225.08 at the time the budget request is submitted to OSD.

4.1.4.1. The Military Departments will develop and submit **design** estimates in support of the construction programs for the individual Active Forces, Guard and Reserve programs.

4.1.4.2. OSD will prepare a DD Form 1391, consolidating estimates to be submitted by the Defense Components having justified requirements for Defense Agencies design funds.

4.1.4.2.1. Each Defense Agency **with a** requirement for **design** funds during the current and **BYs must** submit its estimates on a DD Form 1391.

4.1.4.2.2. The individual Military Departments may have a justified requirement for use of Defense-Wide **design** funds under circumstances where the Military Departments serve as executive agents for certain multi-service or national-level support projects if funding is required to design a project which will be constructed using **MILCON**, Defense-Wide funds. Under such circumstances, the Military Department **will** submit its estimates on a separate DD Form 1391.

4.1.5. Automated Data Requirement. All **MILCON** estimates for the Active Forces, Defense Agencies, Guard and Reserve Components **must** be addressed in the Exhibit C-1 Construction Annex input prescribed in Volume 2A, Chapter 1.

4.1.6. Long-Term Facilities Contracts. **Submit** DD Forms 1390 and 1391 for each project proposed under the authorities of 10 U.S.C. Chapter 169. All additional supporting justification should be included in the DD Form 1390 and DD Form 1391 Justifications. These include **10 U.S.C. § 2809, § 2812, § 2835, § 2836, and other third party financed construction authorities**. **Closely review** private financing initiatives to ensure their programmatic and budgetary viability. So that an informed decision regarding inclusion of the project in the budget may be made during the program and budget review, **support** proposed projects **with** an economic analysis. **Submit a lease-versus-buy analysis, conducted in accordance with the provisions of OMB Circular A-94, as backup documentation for the DD Form 1391** to establish a reasonable expectation that the long-term facility project meets Congressional guidance **and** that all third party financed projects,

including proposed childcare facilities, **will** be at least five percent less expensive than regular **MILCON** appropriation.

4.1.6.1. In development of cost estimates, **MILCON** alternatives should not exceed the published DoD pricing guidance. Private sector construction estimates should be fully supported by documentation and include all pertinent cost factors.

4.1.6.2. DoDI 7041.03 contains the guidance for development of the basic economic analysis required to support these long-term facility contracts. The separate lease-versus-buy analysis must conform with OMB Circular A-94 and include full life-cycle costs and net present value discounting of each alternative.

4.1.6.3. Proposed childcare facilities should also include in their justification the results of a market survey of childcare services available in the local community, and the results of a need assessment and installation interest survey that documents and supports the need for the proposed project.

4.1.6.4. Authorization and appropriation procedures for long-term lease and lease-purchase contracts are special cases and may not be treated as regular **MILCON** in some respects. General guidance for the treatment of budget authority, outlays, and scorekeeping guidelines for lease-purchase and capital lease contracts is contained in OMB Circular A-11.

4.1.6.4.1. Under the provisions of public law, these contracts may, depending on the authority used, be for periods of up to thirty-two years exclusive of the period of construction. However, for projects proposed under the authority of 10 U.S.C. § 2809, § 2835, and § 2836, the obligation of the United States to make payments under the contract in any fiscal year is subject to appropriations being provided specifically for that fiscal year and specifically for that project.

4.1.6.4.2. Annual lease or annual lease-purchase payments commence at the time of beneficial occupancy, usually after the **BY** in which the project is proposed for authorization.

4.1.6.4.3. Components will request authorization for the full asset value of the contract (the estimated construction or acquisition cost, the differential cost of financing, and any contract termination liability costs). Components will request budget authority for each project in the amount equal to the full extent of the Government's first year liability under the contract (the sum of all cost and contract termination liability costs), in the **BY** the project is submitted for approval.

4.1.6.5. Components **must** submit proposals for long-term facilities contracts in a separate section in the OSD/OMB Justification books. The section **must** be entitled "Long-Term Facilities Contracts." The section will include all DD Form 1390 and DD Form 1391's for newly proposed projects and be preceded with an index showing facility category code numbers, installation and location, project number and title, estimated **MILCON** cost and DD Form 1391-page number. Long-term leases and lease-purchases will be separately summarized in the index.

To assess the long-term financial impact of these proposals, the section should also include a financial table that provides project data and cumulative totals for; total estimated project authorization, estimated annual lease payment, and year of planned beneficial occupancy.

[4.1.6.6.](#) Congressional budget presentation Justification Book guidance is provided in [paragraph 5.0](#).

[4.1.6.7.](#) Following approval of projects for inclusion in the President's Budget, Components may then proceed with project development.

[4.1.6.8.](#) In accordance with 10 U.S.C. [§ 2809](#), these projects must be submitted to Congress for final review or approval 14 days in advance of contract award. Unless denied by Congress, Components may make contract award following the 14-day notification period.

[4.1.6.8.1.](#) Components will submit these projects for approval to the [USD\(A&S\)](#), and the [OUSD\(C\)](#), prior to congressional notification, and again prior to the final submission to Congress.

[4.1.6.8.2.](#) To ensure that only economical investments are approved, and that budget requests are sufficient to cover the full financing of the contract, only those projects demonstrated to be more cost effective than regular [MILCON](#) will be approved for submission to Congress.

[4.1.7.](#) Construction Programs for Working Capital Funds. The Working Capital Funds related capital construction projects costing over \$750,000 will be included in the component [MILCON](#) appropriation (including budget authority) program and budget estimates submission for review.

[4.1.7.1.](#) [MILCON](#) projects supporting the Working Capital Funds must be clearly labeled as Working Capital Fund projects. The C-1 Annex will include the Working Capital Fund projects (annotated as such) with their associated budget authority.

[4.1.7.2.](#) Provide a separate copy of [MILCON](#) projects supporting the Working Capital Funds the [OUSD\(C\) Revolving Funds Directorate, Pentagon Room 3D755](#).

[4.1.7.3.](#) Provide separate copies of associated economic analysis studies supporting the construction requirements for Fund projects to the [OUSD\(C\) MPC Directorate, Pentagon Room 3C654](#).

[4.1.8.](#) Facilities Programming and Financing at DoD Installations Utilized by Two or More DoD Components. This [paragraph](#) establishes the policy for programming and financing facilities at DoD installations where utilization by more than one DoD Component is involved, including host-tenant relationships.

4.1.8.1. Responsibilities

4.1.8.1.1. To ensure joint use construction is considered when assessing the Department facilities' needs, each DD Form 1391 must include a certification by the Secretary of Defense Agency Director concerned that the proposed project has been considered for joint use potential; a recommendation for either joint use or unilateral construction; and the reason(s) for that recommendation if joint use is not recommended. The certification may be delegated not lower than the Assistant Secretary responsible for the project. This certification is not required for family housing construction and improvement projects.

4.1.8.1.2. Single-Use Facilities. The DoD Component requiring a facility for its own use must program and budget for the construction project involved.

4.1.8.1.3. Joint-Use Facilities. The DoD Component which has jurisdiction over the host command must program and budget for a facility which is planned for the joint use or joint occupancy of two or more DoD Components.

4.1.8.1.4. Common-Purpose Facilities. On a case-by-case basis, the individual DoD Components must function as executive agents for programs whose output directly and uniquely operates to the benefit of two or more DoD Components. The executive agent must be responsible for planning and programming all facilities.

4.1.8.1.5. Required Facilities. Generally, the host Military Department will program and budget an extension, expansion, and/or increase the capacity of the main utilities and communications or transportation systems, consistent with the master plan of the installation, to support any required facilities, including those required by a tenant. However, programming and budgeting for such connecting utilities and communications or transportation systems as an integral part of any single-use facility are the responsibilities of the DoD Components requiring the facility.

4.1.8.1.6. Siting Facilities. Siting of any facility for a tenant will conform to the master plan of the installation or will be in accordance with an agreed-upon location by the DoD Components concerned.

4.1.8.1.7. Design. Standards of design and construction will conform to those of the host Military Department, consistent with the master plan of the installation. However, exceptions will be made in those instances where tactical or other operational considerations requiring limited duration of occupancy economically would not justify construction of facilities to higher standards.

4.1.8.2. Utilization

4.1.8.2.1. The tenant DoD Component will have exclusive use of any facility constructed for the duration of the tenant's requirement. Upon termination of tenancy or use by the tenant, the facility will revert to the host Military Department for utilization without fee.

4.1.8.2.2. Should the tenant DoD Component, at a later date have a requirement for use of the same facility, the host Military Department will make the facility, or an acceptable existing facility, available within a reasonable time period to the tenant. The host Military Department will not reconstruct or acquire a new facility for the tenant instead of returning the original facility or an acceptable existing substitute. If the host Military Department is not able to make a facility available to the tenant without creating unacceptable conditions for the host, the tenant will be responsible for obtaining a new facility.

4.1.8.2.3. Maintenance and Service Support. Determination as to the levels of maintenance and service support and reimbursement therefore will be made by the DoD Components concerned consistent with DoD policies for host-tenant agreements.

4.1.9. Energy Resilience and Conservation Investment Program (ERCIP). [Submit](#) DD Forms 1391s for each ERCIP project requested in the budget. These forms will include the project title, location of the project, a brief description of the scope of work, and the project cost estimated. DD Forms 1391 for energy conservation, will also include savings-to-investment ratio and simple payback estimates and measurement and verification cost estimate. DD Forms 1391 for energy resilience or energy security projects [must](#) include the rationale for how the project would enhance mission assurance, support mission critical functions, and address known vulnerabilities. The Components [will](#) submit these forms to the OUSD(A&S) ERCIP Program Manager to allow sufficient time for the ERCIP Program Manager to review them prior to transmittal to OUSD(C).

4.1.10. Military Unaccompanied Housing Privatization (UH-6). [Submit](#) this exhibit with the budget justification material for the Services MILCON appropriations. It compares the OSD/OMB approved privatized project scoring with the actual/current project scoring. Include the all-military unaccompanied housing privatization projects (past, current and future); privatization date; MHPI project name; each installation and state in the project; funding sources for financing and investments by appropriation, fiscal year and project (include project number); number of units conveyed; number of end-state units, and MHPI authorities. This exhibit must reflect the OSD/OMB approved project scoring with the actual/current project scoring.

4.2 Family Housing

4.2.1. Budget Estimates. Each DoD Component [must](#) submit data to support the budget requirement for Family Housing [based on](#) the accounts and account structure set forth in the detail prescribed in [subparagraph 4.2.3](#). In addition, each DoD Component will address Family Housing estimates in the Exhibit C-1 Construction Annex input prescribed in Volume 2A, Chapter 1, [paragraph 5.5](#).

4.2.2. General Instructions

4.2.2.1. [Provide](#) all data (including the OP-5 exhibit) on 8-1/2 inch by 11-inch size paper, typed across the short dimension of the paper, except for the formal exhibits contained in [paragraph 5.0](#). Bind all pages on the 11-inch side.

4.2.2.2. [Bind](#) the family housing budget data in separate books for the Army, Navy (including Marine Corps, with O&M Cost and Debt Payment for Marine Corps shown separately), Air Force, and Defense Agencies.

4.2.2.3. The number of required copies of material is specified in Volume 2A, Chapter 1, paragraph [3.2](#).

4.2.3. Preparation of Material. Submit data using forms and formats as indicated in subparagraphs [4.2.3.1.](#) and [4.2.3.2.](#) [Submit](#) separate tabbed sections for each of the categories.

4.2.3.1. Index. Provide a detailed index to the submission.

4.2.3.2. Summary

4.2.3.2.1. Provide a narrative summary describing the most significant features of the request. This summary need not cover every facet of the request and is intended to highlight those items of special significance. [10 U.S.C. § 2837](#) requires a listing of HRMA to be conducted in the BY. Include the following narrative as the last paragraph of “MAJOR FACTORS” under the “SUMMARY” exhibit: “In accordance with 10 U.S.C. § 2837, the [insert Military Department name here] plans to conduct the following Housing Requirements Market Analysis in FY 20BY: [insert military installation here], [insert military installation here].”

4.2.3.2.2. Provide a one-page financial summary of the entire request. This should include, as a minimum, the amounts requested for authorization and appropriation for the major programs and their immediate subordinate accounts (Construction: New Construction, Post Acquisition Construction, Design; O&M: Operating Expenses, Utilities, Maintenance, Leasing, Housing Privatization Support, Debt Payment, Servicemen’s Mortgage Insurance Premium and Reimbursable Program).

4.2.3.2.3. Provide the summary metric tables, Exhibit FH-11, Inventory and Condition of Government-owned Family Housing Units, (which replaced the Summary of Inadequate Unit Elimination, FH-7 Exhibit) and Exhibit FH-8, Annual Inadequate Family Housing Elimination.

4.2.3.2.3.1. These exhibits support the measures and targets developed in the DoD Performance Budget, which are based on the [Building Condition Index \(BCI\)](#) and maintaining a minimum specified percentage level of adequate housing units.

4.2.3.2.3.2. All government-owned Family Housing inventory should be reflected in these exhibits, including transitional units. Inventory should be consistent with number of units and [BCI](#) contained in the Real Property Inventory database. Additional information on [BCI](#) is available [from the ASD\(EI&E\)](#).

4.2.4. Legislative Language. Provide the required authorization and appropriation language for the **BY**. The current year (**CY**) language should serve as the base, with changes and omissions bracketed.

4.2.5. New Construction

4.2.5.1. Summary. Provide a brief summary of the New Construction program. The summary should include, as a minimum: a short narrative highlighting the most significant features of the request, a comparison of the **PY** program with the request, and a listing of each project requested showing new construction or replacement, location, number of units and the estimated cost. The listing should also identify each project as either new mission or current mission requirement, as well as provide the major initiative category.

4.2.5.2. Project Justification. For each New Construction project, including the construction of mobile home spaces, the following forms and exhibits are required. Additionally, in accordance with Title 10 U.S.C. § 2824, provide documentation of consultations with the Department of Housing and Urban Development on the availability of suitable alternative housing at each construction location.

4.2.5.2.1. MILCON Project Data – DD Form 1391. Prepare form in accordance with the instructions contained in **Appendix A**. It is important to avoid the use of “boiler-plate” justification. Cost estimates for new construction projects will include the maximum level of detail practicable, including construction contract award date. Indicate month and year the contract is planned to be awarded to the construction firm. Include month and year construction is planned to start (**construction start date**) and indicate month and year construction is planned to be completed (**construction completion date**). Identify and fully justify any unusual features impacting the cost of the project. In order to ensure prudent and economic investments, a life-cycle net present value economic cost analysis is required to support all new construction projects estimated to **the amount specified in 10 U.S.C. § 2805(a)(2) as adjusted by paragraph (f)**. Provide copies of these analyses with the Family Housing budget estimates. Each DD Form 1391 will (1) state if an economic analysis has been prepared and provide a summary of the results of that analysis, including the calculated savings-to-investment ratio, or (2) provide the specific reasons why an economic analysis is not required. Assemble the DD Form 1391’s in the same sequence as the listing of projects on the summary page.

4.2.5.2.2. DD Form 1523, Military Family Housing Justification. Prepare form in accordance with DoDM 4165.63. Data supplied should be in agreement with the latest formal housing survey for the location, and with the information provided on the DD Form 1390. Specify the date of the survey. The form must include a statement indicating whether a private sector housing market analysis has been conducted and the date the market analysis was completed. When a market analysis has been conducted and is used as justification for new construction, a copy of the analysis must be available for review upon request. Since this form deals with housing deficit calculations, the DD Form 1523 is needed only for new requirements.

4.2.5.2.3. Tri-Service Family Housing Cost Model. Provide, for each housing project, the calculations on which the budget estimate is based, using Exhibit FH-1, the

“Tri-Service Family Housing Cost Model.” Use the appropriate DoD cost factors in the calculations. In addition, prepare Tri-Service Family Housing Cost Models using metric units of measure.

4.2.6. Construction Improvements

4.2.6.1. Summary. Provide a general summary of the Construction Improvements program being requested. The summary should include, as a minimum, a short narrative highlighting the most significant features of the request, and a comparison of the PY program with the request. For consistency, the program should be referred to as “Construction Improvements” rather than “Post Acquisition Construction” or any other title.

4.2.6.2. Project Justification. Provide a DD Form 1391 covering the entire Construction Improvements program and DD Form 1391C listing each project requested. Project description should be specific with the work to be done. Specify the number of units to be improved by intended occupant grade: senior officer, junior officer, or enlisted. Show any planned concurrent, non-routine, maintenance costs, including construction contract award date. Indicate month and year the contract is planned to be awarded to the construction firm). Include month and year construction is planned to start (construction start date) and indicate month and year construction is planned to be completed (construction completion date). Arrange projects alphabetically by state and country. Provide separate totals for Federal Energy Management Program funding, if any. Identify projects, or portions of projects, for General and Flag Officer Quarters (GFOQ) separately. For improvement projects, where the unit improvement cost exceeds seventy percent of the replacement cost, the project must be supported by a life-cycle economic analysis which demonstrates that renovation is more cost effective than replacement construction or other available alternatives, such as demolition and reliance on housing allowances.

4.2.6.3. Projects in Excess of \$50,000 Per Unit. A separate DD Form 1391 is required for each project for which the per unit cost exceeds \$50,000, taking into consideration the applicable area cost factor. If the improvement is required to make the unit suitable for habitation by a handicapped person, the threshold is \$60,000 multiplied by the applicable area cost factor. The cost estimate should also include concurrent repair to be funded under O&M. The justification for the project must detail the findings of an economic analysis and the resulting savings-to-investment ratio. Any unusual features impacting on the cost of the project must be clearly cited. Additionally, note the total Construction Improvements and non-routine maintenance for the unit or set of units over the past five years.

4.2.6.4. Restriction on the Amount Invested in Improving Foreign Source Housing Units. The three-year limitation on overseas units is \$35,000. If the Services intend to program improvements to specific units which exceed \$35,000 over a period of three years, total funding should be requested in one year. The justification for each unit should identify all improvements and major maintenance work done in the past three years, and all improvements and major maintenance planned in the following three years.

4.2.7. Rental Guarantee Housing. For each rental guarantee housing project, both foreign and domestic, provide a listing showing: (1) location, (2) number of units (by intended occupants

(senior officer, junior officer, enlisted), (3) term of contract, (4) FY and month of contract renewal, and (5) maximum termination costs.

4.2.8. Design. **Submit** all requirements for Design in the format prescribed for **MILCON** in **paragraph 4.1**.

4.2.9. O&M Summary

4.2.9.1. Narrative Summary. Provide a general summary of the entire O&M program being requested, excluding leasing, housing privatization support, debt, and servicemen's mortgage insurance premium, which are to be addressed elsewhere in the budget submission. The summary should include, as a minimum, a succinct narrative highlighting the significant features of the request and a comparison of the **PY** program with the budget request, particularly the reasons for any significant upward or downward shifts in funding levels.

4.2.9.2. Inventory and Funding Summary

4.2.9.2.1. Provide the data called for in Exhibit FH-2, Family Housing O&M Summary. Include for each fiscal year, as a subset of "Average Inventory for Year," the total number of units that are classified as historic (units that DoD must manage in accordance with the National Historic Preservation Act of 1966). Display the historic figures in parenthesis **underneath** the Average Inventory line.

4.2.9.2.2. Provide the total civilian personnel compensation for all U.S. Direct Hires, Foreign National Direct Hires and Foreign National Indirect Hires. **Provide** this information for the **PY**, **CY** and **BYs** in the format of Exhibit OP-8, Civilian Personnel Costs, shown in Volume 2A, Chapter 3, **paragraph 4.2**. This exhibit is only required for inclusion in the OMB and OSD review but should be provided separately for the President's Budget submission.

4.2.10. Operations. The sub-accounts of Operations are Management, Services, Furnishings and Miscellaneous. For each of these provide:

4.2.10.1. Summary. Provide a short narrative describing what the funds will be used for, how the budget was developed, major assumptions made, and highlighting the most significant features of the request. The summary should also explain the effect that the housing privatization program has on the budget estimates for each of the O&M accounts and subaccounts. For the Furnishings program only, provide additional information in the format of Exhibit FH-3, "Furnishings Summary."

4.2.10.2. Reconciliation of Increases and Decreases. **Provide** a reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President's Budget for the **CY** and **BYs**. The format of this reconciliation **must** be identical to the Exhibit OP-5 shown in **Appendix B**. For each program increase or decrease, **provide** quantitative and qualitative information relative to the proposed change. Increases and decreases should be supported by specific reasons why these adjustments in the program are necessary, particularly

changes in the number of family housing units being supported or changes in the FH-2 and FH-3 exhibits.

4.2.11. Utilities. For the Utilities program, separate from Operations, provide the following:

4.2.11.1. Provide a short narrative describing what the funds will be used for, how the budget was developed, major assumptions made, and highlighting the most significant features of the request. The summary should also explain the effect that the housing privatization program has on the budget estimates for the account. This section must address energy consumption reductions accomplished and progress made towards meeting Congressional and Defense energy conservation goals.

4.2.11.2. Include a table that breaks out, for each FY reflected in the budget submission, kilowatt hour of electricity, tons of coal, cubic feet of gas, barrels of oil, and other forms of energy that support the utilities budget request.

4.2.11.3. Reconciliation of Increases and Decreases. Provide a reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President's Budget for the **CY** and **BYs**. The format of this reconciliation **must** be identical to the Exhibit OP-5 shown in **Appendix B**. For each program increase or decrease, **provide** quantitative and qualitative information relative to the proposed change. Increases and decreases should be supported by specific reasons why these adjustments in the program are necessary, particularly changes in the number of family housing units being supported or changes in the FH-2 exhibit.

4.2.12. Maintenance

4.2.12.1. Provide a short narrative describing what the funds will be used for, how the budget was developed, major assumptions made, and highlighting the most significant features of the request. The summary should also explain the effect that the housing privatization program has on the budget estimates for the account.

4.2.12.2. Reconciliation of Increases and Decreases. Provide a reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President's Budget for the **CY** and **BYs**. The format of this reconciliation **must** be identical to the Exhibit OP-5 shown in **Appendix B**. For each program increase or decrease, **provide** quantitative and qualitative information relative to the proposed change. Increases and decreases should be supported by specific reasons why these adjustments in the program are necessary, particularly changes in the number of family housing units being supported or changes in the FH-2 exhibit.

[4.2.12.3.](#) Provide a summary on the backlog of deferred maintenance. Describe the plans for reducing the backlog to a manageable level. Provide an analysis of types of projects, type and accuracy of reporting and special efforts to reduce the backlog. Provide a table covering the Future Years Defense Program (FYDP) including: (1) backlog at beginning of year, (2) recurring maintenance arising during the year, (3) maintenance funds approved or planned, (4) backlog at end of year, and (5) backlog reduction (-) or growth (+) during the FY.

[4.2.13.](#) GFOQ [M&R](#) Cost Over \$35,000 Per Unit

[4.2.13.1.](#) Provide a narrative summary, detailing efforts to control and reduce expenditures for the “high cost” GFOQ units.

[4.2.13.2.](#) Provide a listing of all GFOQ for which total [M&R](#) cost per unit exceeds \$35,000 for the [BY](#). Listing should include, for each unit: (1) state/country/location, (2) quarters identification, (3) size of unit, (4) age of unit, (5) total operations cost, (6) total utilities cost, (7) total [M&R](#) cost, (8) total O&M cost, and (9) a short narrative description and justification of the work, including results of economic analysis and savings-to-investment ratio. In addition, identify any Construction Improvements project and funding requested for any GFOQ in the listing.

[4.2.13.3.](#) This listing will include all GFOQ projects for which total [M&R](#) cost exceeds \$35,000, including those listed in other sections of the submission.

[4.2.13.4.](#) Provide a similar listing for the [PY](#) and [CY](#) units with [M&R costs](#) over \$35,000 and which were not included in the previous budget request.

[4.2.13.5.](#) To satisfy Congressional reporting requirements, provide:

[4.2.13.5.1.](#) A report identifying each family housing unit used, or intended for use, as a quarters for a general officer or flag officer for which the total operations, utilities, leasing, maintenance, and repair costs are anticipated to exceed \$35,000 in the next fiscal year. For each family housing unit so identified, specify the total of such anticipated operation, utilities, leasing, maintenance, and repair costs for the unit. This [must](#) be reported in the format of Exhibit FH-5 General and Flag Officers Quarters (Anticipated expenditures for O&M exceeding \$35,000).

[4.2.13.5.2.](#) A report specifying for each family housing unit used as quarters for a general officer or flag officer at any time during the most recently completed fiscal year, the total expenditures for O&M, utilities, leasing, maintenance, and repair costs of the unit during that fiscal year. This [must](#) be reported in the format of Exhibit FH-9 GFOQ (O&M Expenditures for FY 20XX). [Provide](#) this report to the [OUSD\(C\) MPC](#) Directorate in electronic excel format, no later than December 1.

[4.2.13.5.3.](#) As amended by [the FY09 NDAA § 2805, 10 U.S.C. § 2884](#) requires annual reporting of privatized GFOQ units and the total operation, maintenance, and repair costs incurred by private sector developer/partners that exceed \$50,000 per housing unit. Therefore, the Components are required to complete the Exhibit FH-12, Privatized GFOQ

Operation, **M&R** Costs Incurred by Private Sector Developer/Partner/Owner Exceeding \$50,000 per Housing Unit, annually.

4.2.14. Reimbursable Program. Provide a detailed justification for the Reimbursable Authority requested. Include information on what precisely is funded through the reimbursable program and details on the sources of receipts for the **PY**, **CY** and **BY**.

4.2.15. Leasing

4.2.15.1. Provide a short narrative describing what the funds will be used for, how the budget was developed, major assumptions made, and highlighting the most significant features of the request. The summary **must** also explain the effect that the housing privatization program has on the budget estimates for the account. The summary **must** include a table reflecting the authorized number of leases, average number of leases supported and costs for each of the **PY**, **CY**, and **BY**, for Domestic Leasing, Section 801 and Section 802 leases, and foreign leasing.

4.2.15.2. For both domestic and foreign leases, provide a summary justification statement. Also provide data on the leasing program in the format of Exhibit FH-4, “Analysis of Leased Units.” Information should be provided at the installation or community level, whichever is most applicable. For each new project requested, include a full justification and description, in the same format as for a New Construction project (see **subparagraph 4.2.6.**).

4.2.15.3. Reconciliation of Increases and Decreases. **Provide a** reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President’s Budget for the **CY** and **BYs**. The format of this reconciliation **must** be identical to the Exhibit OP-5 shown in **Appendix B**. For each program increase or decrease, **provide** quantitative and qualitative information relative to the proposed change. Increases and decreases should be supported by specific reasons why these adjustments in the program are necessary, particularly changes in the number of family housing units being supported.

4.2.15.4. For each new **10 U.S.C. § 2828** lease project requested, include a full justification and description, in the same format as for a New Construction project (see **paragraph 4.2.6.**), including the results of the economic analysis.

4.2.15.5. Under 10 U.S.C. § 2828, the Components are allowed not more than 10,000 domestic (United States, Puerto Rico, or Guam) leased family housing units. The cost of domestic leases may not exceed \$12,000 (including the cost of utilities, maintenance, and operation) per unit per year.

4.2.15.5.1. 10 U.S.C. § 2828 permits an exception for 500 of these domestic leased units that may exceed \$12,000 per unit per year but cannot exceed \$14,000 per unit per year as adjusted from time to time. At the beginning of each fiscal year, the Secretary concerned **must** adjust the maximum lease amount for domestic leases for the previous fiscal year by the percentage (if any) by which the national average monthly cost of housing (as calculated for purposes of determining rates of Basic Allowance for Housing under **37 U.S.C. § 403** for the preceding fiscal year exceeds the national average monthly cost of housing (as so calculated) for

the fiscal year before such preceding fiscal year.

4.2.15.5.2. The Army has authority to lease eight units in Miami, Florida for key and essential personnel, as designated by the Secretary, for the United States Southern Command. Total lease cost for all eight units may not exceed \$280,000 per year as adjusted from time to time. The terms of any lease under this paragraph may not exceed 5 years. At the beginning of each FY, the Secretary of the Army **must** adjust the maximum aggregate amount for these leases for the previous FY by the percentage (if any) by which the annual average cost of housing for the Miami Military Housing Area (as calculated for purposes of determining Basic Allowance for Housing under **37 U.S.C. § 403** for the preceding FY) exceeds the annual average cost of housing for the Miami Military Housing Area (as so calculated) for the FY before such preceding FY. Additionally, not more than 600 domestic housing units may be leased by the Secretary of the Army for which the expenditure for the rental of such units does not exceed \$35,000 per unit per year, as adjusted from time to time.

4.2.15.6. Under 10 U.S.C. § 2828, the Components are allowed not more than 55,775 foreign leased units. Foreign leases may not exceed \$20,000 per unit per year (including the cost of utilities, maintenance, and operation). **10 U.S.C. § 2828** permits exceptions for 450 leased units that may exceed \$20,000 but that cannot exceed \$25,000 per unit per year and for 350 leases that may exceed \$25,000 per unit per year.

4.2.15.6.1. In addition to the 450 units:

4.2.15.6.1.1. The Secretaries of the military departments may lease not more than 3,300 units of family housing in Italy that may not exceed \$25,000 per unit per year.

4.2.15.6.1.2. The Army may lease not more than 1,175 units in Korea that may exceed \$25,000. Also, the Army may lease not more than 2,800 units of family housing in Korea subject to a maximum lease amount of \$35,000.

4.2.15.6.2. Per **10 U.S.C. § 2828**, the maximum lease amounts for the previous FY will be adjusted at the beginning of each FY, by the percentage (if any) by which the Consumer Price Index (CPI) for all Urban Consumers, published by the Bureau of Labor Statistics, during the preceding FY exceeds such CPI for the FY before such preceding FY and for foreign currency fluctuations from October 1, 1987. To determine the impact of foreign currency fluctuation on the rental rate, these high cost “cap” rental rates must be computed for each foreign country, each year to adjust for the impact of foreign currency fluctuation (**using October 1, 1987 as a baseline to compute from**). After the caps of \$20,000, \$25,000 and \$35,000 U.S. dollars are adjusted by country, the adjusted rates become the new cap for determining whether a lease must be counted against the exception limits for a given **BY**. Then, if a rental exceeds the adjusted maximum costs, it counts against the high-cost ceiling limitations of 450 and 350, units, respectively, DoD-wide. For each country, **apply the following formula**: \$20,000 adjusted for CPI changes or \$25,000 adjusted for CPI changes or \$35,000 adjusted for CPI changes * [FY 1988 exchange rate / current budget exchange rate] = new cap limit.

4.2.15.6.2.1. Where the “FY 1988 exchange rate” is the exchange rate that USD(C) published for use in preparing the FY 1988 budget estimates, stated in units of foreign currency for one (1) U.S. dollar:

<u>Country</u>	<u>Monetary Unit</u>	<u>FY 1988 Exchange Rate</u>
Belgium	Franc	42.77
Canada	Dollar	1.39
Denmark	Krone	7.75
Germany	Mark	2.06
France	Franc	6.72
Greece	Drachma	139.90
Italy	Lira	1,423.00
Japan	Yen	163.10
Netherlands	Guilder	2.33
Norway	Krone	7.52
Portugal	Escudo	150.50
Spain	Peseta	137.60
Turkey	Lira	743.50
UK	Pound	0.70

For countries not listed, use the October 1, 1987 exchange rate.

4.2.15.6.2.2. Where the “current budget exchange rate” is the rate that USD(C) published for use in preparing the fiscal year budget estimates for which the lease funds are being requested, stated in units of foreign currency for one (1) U.S. dollar.

4.2.15.6.2.3. The new cap limit is the maximum amount in dollars that a lease may cost per unit per annum for each nation before that unit must count against the worldwide 350 and 450 unit limits on exceptions for high-cost leases for the fiscal year for which the budget resources are being requested.

4.2.15.6.2.4. Provide a summary table showing application of the formula for each nation where high-cost leases exist or are proposed, and the total number of such leases.

4.2.16. Mortgage Insurance Premium (also known as Servicemen’s Mortgage Insurance Premium).

4.2.16.1. Provide a brief justification statement describing the requested program.

4.2.16.2. Provide a table identifying separately the total of the principal payments, and interest charges, and the totals for the Servicemen’s Mortgage Insurance Premium program for the prior, current, and BYs.

4.2.16.3. For the Servicemen’s Mortgage Insurance Premium program provide a listing for each fiscal year, showing: the number of terminations, the number of mortgages on

which payments are to be made, the average payment per mortgage, and the estimated payments for the year. This table should start with the **PY**, and end with **BY+1**.

4.2.17. Foreign Currency Exchange Data. All Family Housing O&M appropriations that participate in the Foreign Currency Fluctuations, Construction, Defense appropriation are required to prepare and submit a PB-18 Exhibit using the approved foreign currency exchange rates. The format for the PB-18 Exhibit is in Volume 2B, Chapter 19, **paragraph 12**.

4.2.18. Each Component will also submit a Major Initiatives exhibit which must include a general description of each of its major initiatives for the **BY** and what the Component plans to accomplish in the **BY** to support that initiative. Be specific, including the impact on force structure. **Prepare** this exhibit in accordance with the format contained in **Appendix B**.

4.2.19. Housing Privatization Support. The Components **must** add a separate tab and section called “Housing Privatization Support” (after the Leasing section) in the family housing justification book, and include, as a minimum, the following information in the new section:

4.2.19.1. Provide a narrative summary of the Component's overall family housing privatization efforts and accomplishments/progress to date. **This summary will include the following narrative to meet the reporting requirement of 10 U.S.C. § 2884 (b) (2). The narrative must comprise the final two paragraphs of the Components’ Privatization Summary exhibit and must read as follows:**

4.2.19.1.1. “It is estimated that the [Component] will pay basic allowance for housing (BAH) under 37 U.S.C. § 403 to members living in privatized housing the amounts of [\$] in FY 20CY and [\$] in FY 20BY. The number of units of military family housing upon which these estimated payments are made is [X] in FY 20CY and [X] in FY 20BY. The number of units of military unaccompanied housing upon which these estimated payments are made is [X] in FY 20CY and [X] in FY 20BY.

4.2.19.1.2. These estimates meet the reporting requirement stipulated in 10 U.S.C. § 2884 (b) (2). However, it must be noted that it is difficult to project the true cost of BAH allowances provided to members living in privatized housing. BAH allowances for members in privatized housing are not specifically tracked in budget or execution data, as these members receive the same allowances as those who live on the economy. BAH accounting data is available for only the various categories of payments (e.g., domestic with and without dependents, partial, overseas housing allowances).”

4.2.19.2. Provide a summary list of privatization projects and associated funding requested in the Construction portion of the program and budget submission. DD Form 1391 for New Construction and Construction Improvement projects should indicate which projects are intended as a source of funding for privatization initiatives.

4.2.19.3. Family Housing Privatization (FH-6). **This exhibit compares the OSD/OMB approved privatized project scoring with the actual/current project scoring. Include all the family housing privatization projects (past, current and future); privatization date; MHPI**

project name; each installation and state in the project; funding sources for financing and investments by appropriation, fiscal year and project (include project number); number of units conveyed; number of end-state units, and MHPI authorities. This exhibit must reflect the OSD/OMB approved project scoring with the actual/current project scoring.

4.2.19.4. Reconciliation of Increases and Decreases (OP-5). Prepare this exhibit for the Housing Privatization Support (as defined previously in subparagraph 3.2.2.1) budget and include detailed explanation/justification for the request, and explanation for all increases and decreases from prior budget request. See paragraph 4.6.

4.3 Homeowners' Assistance Fund, Defense

4.3.1. Responsibilities

4.3.1.1. The Department of the Army, which has been assigned the overall responsibility for the administration and management of the DoD HAP by DoDD 4165.50E, will submit budget estimates.

4.3.1.2. Each Component is responsible for including sufficient resources in its budget to fund HAP costs related to the Component's actions associated with base closures, realignments, and force reductions. Develop the level of resources required to fund HAP costs in consultation with the Army, HAP executive agent. Separately identify and submit budget estimates for HAP costs in the Component' Base Realignment and Closure (BRAC) submissions for HAP costs associated with realignments and closures and in the O&M submission for non-BRAC related HAP costs.

4.3.2. Submission Requirements

4.3.2.1. Submit the following exhibits, as prescribed in paragraph Appendix C:

HA-1	Workload and Obligation Data
HA-2	Status of Accounts
HA-3	Work Unit Data
HA-4	Program and Financing

4.3.2.2. In addition, the Army will input Homeowners' Assistance Fund estimates for the C-1 Construction Annex input prescribed in Volume 2A, Chapter 1.

4.3.2.3. Volume 2A, Chapter 1 identifies the required copies of material.

4.3.2.4. For the biennial budget, [provide](#) separate sections or volumes for BY1 and BY2. For the BY2 section, [consider](#) BY1 as the [PY](#) and BY2 as the [BY](#).

4.3.3. Preparation of Material. [Provide](#) all materials on 8-1/2 inch by 11 inch size paper and [bind them](#) on the long side. [Type Exhibits HA-1, 2, 3, and 4 across the long dimension.](#) [Type all other narrative data across the short dimension of the paper.](#)

4.4. NATO Security Investment Program

4.4.1. Responsibilities.

The OUSD(A&S) has been assigned the overall responsibility for the oversight and management of the NATO Security Investment Program by DoDD 2010.05, thereby responsible for submitting the corresponding budget estimates.

4.4.2. Submission Requirements.

4.4.2.1. Submit a detailed exhibit, NATO Security Investment Program-1 (NSIP-1), listing requirements at the project level for both construction and procurement requirements. The listing should be sufficiently detailed to identify discrete projects and initiatives. Aggregations at the capability package level i.e., Defense of the Mediterranean, are not sufficiently detailed and should be broken down further to show the individual projects/initiatives comprising the capability packages. [Provide a](#) narrative explanation and description of each of the requirements for the current and [BYs](#). The NSIP-1 exhibit is provided in [paragraph 6.5](#) for the NATO Security Investment Program to identify the following information: Location, Installation, Project Title, Description of Project, Budget Scheme (how many NATO Nations participating in the funding of the project), Project Cost, U.S. Cost Share, Other Nations Cost Share. This will be provided for both the [CY](#) and [BY](#).

4.4.2.2. Submit a detailed exhibit, NSIP-2, listing each NSIP major construction project that are eligible for recoupment (reimbursement by other member countries for eligible costs). The NSIP-2 exhibit is provided in [Appendix D](#) for the NATO Security Investment Program to identify the following information: Component, Appropriation, FY, Location, Installation, Project Title, Slice/Serial (if known), Recoupment Budget Estimate, and Rate of Conversion.

4.4.3. Preparation of Material. [Provide](#) all material on 8-1/2 inch by 11 inch size paper and [bind them](#) on the long side. [Type all](#) narrative data across the short dimension of the paper.

4.5. NATO Security Investment Program Expansion Costs

Expansion Costs. Submit a list of all requirements, construction and procurement, associated with NATO expansion. The listing should be sufficiently detailed to identify discrete projects and initiatives. Aggregations at the capability package level i.e., Defense of the Southern Region, are not sufficiently detailed and should be broken down further to show the individual projects/initiatives comprising the capability packages. The NSIP-1 exhibit is provided in [Appendix D](#) for the NATO Security Investment Program to identify the following information of

projects associated with NATO Expansion: Location, Installation, Project Title, Description of Project, Budget Scheme (how many NATO Nations participating in the funding of the project), Total Project Cost, U.S. Cost Share, Other Nations Cost Share. Provide information for both the CY and BY. Provide a narrative explanation and description of each of the requirements for the BYs. Identify the budget estimate for NATO Expansion Costs in BA 02 as presented in Volume 2A, Chapter 1.

4.6 FHIF/MUHIF Program

4.6.1. This paragraph prescribes instructions for the preparation and submission of budget estimates for the DoD FHIF and MUHIF. The requirements submitted in the budget estimates will be for MHPI oversight and administrative program expenses, including accounting and financial reporting services.

4.6.2. Submission Requirements. The ODASD(H) must submit a memorandum, which includes a narrative overview of the MHPI, current status of the MHPI, and future plans for the program to the OUSD(C) MPC Directorate. In addition, the ODASD(H) memorandum must include funds required for the BY for administration and oversight of the MHPI program, including accounting and financial reporting services, and detailed justification for these funds. Complete the FHIF/MUHIF Admin Requirements Exhibit (FH-14) and provide electronically to OUSD(C) MPC, Family Housing.

4.7 MHPI Investments and Credit Financing

4.7.1. The Federal Credit Reform Act of 1990 and OMB Circular A-11 require credit financing and investment information for privatization projects to be reflected in the President's budget. OMB Circular A-11, Part 5, Section 85 (Federal Credit) explains the credit financing information required for the President's budget. On an annual basis, OMB sends out Budget Data Requests (BDR) for Credit Re-estimates, MAX Schedule updates, and Credit Supplemental Reporting information for the President's Budget (for PY, CY, and BY).

4.7.2. Annually, the OUSD(C), Program Budget, MPC and the ODASD(H) jointly issue a "Consolidated MHPI Data Call for the Fiscal Year 20BY President's Budget" that supports the upcoming OMB BDRs for both Federal credit and non-credit financing aspects of MHPI, including the development of the Fiscal Year (FY) 20CY Credit Subsidy Re-estimates, Credit Supplement Report Exercise information, and OMB MAX A-11 database inputs for the FY20 BY President's Budget (PB). OUSD(C) P/B MPC will retain responsibility for providing OMB with required MHPI Federal credit and non-Federal credit data for the FY 20BY PB. ODASD(H) will perform OSD-level reviews of MHPI programmatic data and related files, providing technical instructions with corresponding templates and feedback to the Services regarding their submissions to OUSD(C) P/B MPC.

4.7.3. Credit Re-estimates. Re-estimates are performed throughout the life of each cohort of direct loans or loan guarantees to account for differences between the original assumptions of cash flow and the actual cash flow or revised assumptions about future cash flow. There are two types of Re-estimates: Interest Rate Re-estimates and Technical Re-estimates.

4.7.3.1. Interest Rate Re-estimates (IRR) adjust for the effect on the subsidy of differences between the actual interest rate and the discount rates assumed when the estimates were made for budget formulation and obligation. IRR are performed once, in the fiscal year following the fiscal year in which the direct or guaranteed loan was “originally” estimated to be at least 90 percent disbursed.

4.7.3.2. Technical Re-estimates adjust for revised assumptions about loan performance, such as differences between assumed and actual default rates or new projections of repayments; and are performed annually for outstanding direct and guaranteed loans.

4.7.3.3. Re-estimates are used for yearend financial reporting and for the President’s Budget.

4.7.3.4. OUSD(C) MPC Directorate and ODASD(H) jointly send out the Re-estimate Data Call as part of the “Consolidated MHPI Data Call for the FY 20BY President’s Budget” and forward the associated direct loan and loan guarantee cash flow files and re-estimate timeline to the Services for review and completion, and coordination with DFAS. The FH-15 Re-estimate Cash Flow Status questionnaire format is incorporated in Appendix B. Electronically forward all files and completed questionnaire to the OUSD(C) MPC Family Housing Budget Analyst by the deadlines provided in the data call.

4.7.3.4.1. The Services are required to prepare cash flow files for new direct loans and loan guarantees, as needed; review all risk factors; substitute re-amortization schedules in the files for existing loans after coordination with DFAS, as needed; and complete the Re-estimate Questionnaire on the status of the cash flows.

4.7.3.4.2. DFAS is required to enter transactions with Treasury into the new and existing cash flow files and coordinate any re-amortization schedules with the Services before substitution into the cash flow files.

4.7.4. Federal Credit Budget (OMB MAX Schedules). For all privatization projects that have been awarded and those planned for award in the President’s Budget, the Components must provide the relevant investment and credit financing data required for the preparation of credit financing schedules.

4.7.4.1. OUSD(C) MPC Directorate and ODASD(H) jointly send out the annual Federal Credit Budget Data Call and template to the Services for review and completion as part of the “Consolidated MHPI Data Call for the FY 20BY President’s Budget.” Use this data to update the MAX schedules for the FHIF Program, FHIF Financing for Direct Loan, and FHIF Financing for Loan Guarantee accounts.

4.7.4.2. A separate list by Component and FY will include, the installation name, state, type of financing, total number of end-state units in the privatized project (breakout total units conveyed, renovated, replaced, and/or new/added units, total scored amount for each type of financing, and source of funds. Break out the source of funds by FY of funds, account (new construction or construction improvements), project name, and amount.

4.7.4.3. Cash flows for future new direct or guaranteed loans will also be required. **Provide** the completed template and cash flows electronically, to OUSD(C) MPC Family Housing by the **required** deadline.

4.7.5. Credit Supplemental Reporting (CSR). OUSD(C) MPC Directorate and ODASD(H) jointly send out the annual CSR Data Call and template to the Services for completion as part of the “Consolidated MHPI Data Call for the FY 20BY President’s Budget.”

4.7.5.1. Additional project information, such as, subsidy percentage, financing, defaults, average contractual loan maturity (in years), average contractual loan interest rate, maximum grace period (in years) and other data **are** required to update the CSR for the President’s Budget.

4.7.5.2. **Provide** the completed template electronically to OUSD(C) MPC Family Housing by the **required** deadline.

5.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION

5.1 Guidance on Presentation

This **paragraph** presents the justification book organization and the exhibit requirement for submission to Congress. **Paragraph 6.0 provides the list** of budget exhibits.

5.2 Organization of Justification Book

5.2.1. **Use the following** justification material titles:

Supporting Data for Fiscal Year
20BY Budget Estimates
Descriptive Summaries

5.2.2. **Divide** the budget justification book into sections **and organize it in the following sequence:**

1. Organization
2. Table of Contents and Summary Data
3. The summary data will include a state list of all major, minor and family housing construction projects.

Section 1 Special Program Considerations

This section will include the following topics with a short narrative or summary table, and other special interest items as applicable.

	Facilities Funded Through Other Than MILCON
	Pollution Abatement Program
	Energy Conservation Program
	Drug Interdiction Program
Section 2	Budget Appendix Extract Legislative Language
Section 3	Installation and Project Justification Data DD Forms 1390 and 1391
Section 4	Architectural and Engineering Services and Construction Design
Section 5	Unspecified Minor Construction
Section 6	Defense Access Roads
Section 7	Family Housing
Section 8	Homeowners' Assistance (Army Only)
Section 9	Long-Term Facilities Contracts
Section 10	Working Capital Fund Capital Construction

5.2.3. Organize the volume by state/country and location. **Show** projects precisely in the same order as they appear in the State List portion of the Construction Annex (C-1).

5.2.4. Summarize all construction line items included in the funding program in support of the total obligational authority for the MILCON appropriations in the President's Budget on Installation and Project Justification Data, DD Forms 1390 and 1391/1391C. In addition to data provided on DD Forms 1390 and 1391, justification books submitted to the House and Senate Appropriations, the House Armed Services Committee, and the Senate Armed Services Committees in support of MILCON Program requests will contain supplemental data prepared in the formats prescribed in paragraphs 5.2.5. and 5.2.6. on the reverse of DD Form 1391. The Guard and Reserve Forces will use a DD Form 1390S continuation page in lieu of DD Form 1390. **Group** all forms required for a project and combine them in the same book arranged in category code order within state and station.

5.2.5. Section 5 will include an exhibit entitled "Long-Term Facilities Contracts," separately listing projects proposed under Title 10 U.S.C. §§ 2809 and 2812 authorities, arranged in the same order as they would appear in the State list portion of the Construction Annex (C-1). DD Forms 1390 and 1391 for each new project proposed will follow this exhibit. The section will

also include a special financing table reflecting both prior approved long-term facility contracts and new requests.

5.2.6. Appendix A contains detailed instructions for preparation of DD Forms 1390 and 1391/1391C. Detailed instructions for preparation of the supplementary justification material are given in paragraph 5.5. The following additional instructions apply:

5.2.6.1. In addition to other data requirements, components are required to indicate on the DD Form 1391C for each individual project a statement indicating whether or not an economic analysis has been utilized in evaluating the project. In those instances where an economic analysis has not been prepared, a statement is required indicating why such analysis is not applicable or pertinent.

5.2.6.2. Lump-sum requests for a number of construction projects at a single location or for related projects at several locations will not be considered.

5.2.6.3. Identify projects associated with intelligence or intelligence-related operation. Block 5, Program Element, DD Form 1391, will include the annotation NIP or MIP as appropriate.

5.2.6.4. All DD Forms 1391 should include the office and phone number of at the installation responsible for the requested project. Display this information on the bottom left-hand corner of the last page of the 1391.

5.2.6.5. The budget submission should include the Restoration and Modernization (R&M) unfunded requirement at all installations for which there is a requested construction project. Provide this information as subsection c. in block 9 of the DD Form 1390 (Block 10 for the Guard and Reserve 1390s) under the heading, “R&M Unfunded Requirement.” In addition, for all unaccompanied housing project requests, the DD Form 1391 must show all unaccompanied housing R&M conducted in the past 2 years (BY-2 and BY-1) and all future R&M requirements (defined as R&M funding for unaccompanied housing included in the FYDP years) for unaccompanied housing at that installation. This information should appear as the last data in the DD Form 1391 under the heading “BY-2 Unaccompanied Housing R&M Conducted,” “BY-1 Unaccompanied Housing R&M Conducted,” and “Future Unaccompanied Housing R&M Requirements.”

5.2.7. Justification Book Covers and Binding of Data

5.2.7.1. Provide justification materials on 8-1/2” x 11” white paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with Accor fasteners. Print material on both sides of the page using 1” margins. Print the DD Form 1390 on white paper, not on yellow paper as previously required.

5.2.7.2. Prepare separate justification books for those projects which require classified information on the DD Forms 1390 and 1391/1391C.

5.2.7.3. The individual Defense Agencies will submit either originals of DD Forms 1390 and 1391/1391C, or copies of a quality suitable for printing. Use these for preparation of consolidated justification books for submission to congress. Do not punch, bind, or use page numbers on these submissions. Covers are not required. Deliver one complete set of each justification book to the OUSD(C) MPC Directorate and the ASD(EI&E).

5.2.7.4. Each justification book (and each submission of the Defense Agencies described in paragraph 5.2.7.3) must include an index of installations and projects by state and country, arranged alphabetically, in precisely the same order as the projects appear in the State List portion of the Construction Annex (C-1).

5.3 Submission of MILCON Justification Books

5.3.1. OSD Review. The OUSD(C) must review the justification material to ensure it fully reflects the President's and the Secretary of Defense's policies and decisions before the Military Departments release to Congress. As requested, submit the Defense Agencies' prepared justification material to the OUSD(C) for preparation of consolidated justification books and submission to the Committees on Appropriations.

5.3.2. Security Clearances. Each Military Department will be responsible for the clearance of its justification books through OSD Security Review. The OUSD(C) will be responsible for the clearance of the Defense Agencies justification books through OSD Security Review.

5.3.3. Number of Copies. Forward three advance sets of justification books for review to the OUSD(C) MPC Directorate, Pentagon Room 3C654. See Volume 2A, Chapter 1 for the detailed instructions on number of copies and distribution of printed material.

5.3.4. Instructions for Preparation of Supplemental Justification Data in Support of Annual MILCON Programs. Fill in each data requirement as appropriate, including negative responses to indicate that the item has been addressed.

5.3.4.1. Instructions for Preparation of Summary Lists. Each Military Service and Defense Agency must prepare a State List and an Installation List. These lists must include every project for which funds have been requested.

5.3.4.2. Instructions for Preparation of DD Form 1390 Supplemental Installation Data. Provide the following data in an appropriate place on DD Form 1390:

5.3.4.2.1. Air Pollution. Enter cost of all air pollution abatement projects for the out years. Do not include cost of BY projects.

5.3.4.2.2. Water Pollution. Follow instructions for Air Pollution, 5.3.4.2.1.

5.3.4.2.3. Safety and Occupational Health Deficiencies. Provide information on any safety and occupational health deficiencies.

***February 2025**

5.3.4.3. Instructions for Preparation of DD Form 1391 Supplemental (Facility) Data. **Provide** the following data for each facility in the program using the back of standard DD Form 1391.

5.3.4.3.1. Design Data (Estimates)

5.3.4.3.1.1. Status

5.3.4.3.1.1.1. Enter date design was started (i.e., date when all appropriate design contracting procedures have been completed and the designer directed to proceed with design).

5.3.4.3.1.1.2. Enter the percent of design completed as of January 1, of the year in which the budget is submitted to the Congress (e.g., January 2, 2000, for FY 2001 projects).

5.3.4.3.1.1.3. Enter date design expected to be 35% completed.

5.3.4.3.1.1.4. Enter date design will be completed (i.e., date when all reviews will be completed and construction contract ready for advertising).

5.3.4.3.1.1.5. Include the annotation “parametric estimates have been used to develop project cost” if the cost estimate is based on parametric estimates in lieu of the traditional 35% design.

5.3.4.3.1.1.6. Enter the type of design contract (design-bid, design-bid-build, or other, if other, provide a brief description of the design contract).

5.3.4.3.1.1.7. Indicate whether an energy study and a life-cycle analysis **were** performed in support of the design of the proposed facility.

5.3.4.3.1.2. Basis

5.3.4.3.1.2.1. Indicate whether or not design is based on a standard or definitive design.

5.3.4.3.1.2.2. If answer to (a) is affirmative, indicate where design was previously used.

5.3.4.3.1.3. Total Design Cost. Indicate total federal cost (all costs to be charged to **the design account**) as follows:

5.3.4.3.1.3.1. Cost of the production of plans and specifications (those costs included within the 6 percent statutory cost limitations).

[5.3.4.3.1.3.2.](#) All other costs of design.

[5.3.4.3.1.3.3.](#) Total Cost (a + b or d + e).

[5.3.4.3.1.3.4.](#) Amount of cost estimated to be spent on contracts.

[5.3.4.3.1.3.5.](#) Amount of cost to be spent in-house (total cost if design is all within house; overhead and administration costs if design is contracted out, or other breakout).

[5.3.4.3.1.4.](#) Construction Contract Award Date. Indicate month and year the contract is planned to be awarded to the construction firm.

[5.3.4.3.1.5.](#) Construction Start Date. Indicate month and year construction is planned to start.

[5.3.4.3.1.6.](#) Construction Completion Date. Indicate month and year construction is planned to be completed.

[5.3.4.3.2.](#) Equipment Associated with This Project Which Will be Provided from Other Appropriations. List only those items which support the cost shown in Block 9 of the DD Form 1391, for Equipment Provided from Other Appropriations. Enter the equipment nomenclature, procuring appropriation, fiscal year in which the equipment was appropriated or [will](#) be requested, and the cost in thousands of dollars.

[5.3.4.3.3.](#) Working Capital Fund Projects. [Label](#) DD Form 1391s submitted in support of Working Capital Fund Capital Budget requirements as such in Block 4, [atop](#) the project title.

[5.3.5.](#) FYDP Project Listing. [Submit MILCON](#)/Family Housing Outyear Project Data via the Automated Construction Program (C-1 Annex) at the time program and budget submissions are due to OSD for review. Volume 2A, Chapter 1, [paragraph 5.5 provides](#) additional guidance on the Automated Construction Program. Construction data elements and record formats for the Automated Construction Database are prescribed on the Secret Internet Protocol Router Network (SIPRNET) of the OUSD([C](#)). The out-year project data exhibits for the Active Forces will not be included in the justification books provided to Congress. However, the justification book for each component of the National Guard and Reserve, as well as the Defense Agencies will contain a listing of all projects that are funded in the FYDP.

[5.4](#) Submission of Family Housing Justification Books

[5.4.1.](#) Family Housing Justification, Military Departments. The format for the Congressional justification books for Family Housing will be identical to that detailed in [paragraph 4.2](#) for the budget estimates, with the following exceptions:

5.4.1.1. Submission Requirements. For each military department, submit Family Housing Congressional justification material with the MILCON justification books. The Family Housing material will follow the instructions provided for MILCON in paragraph 4.2.

5.4.1.2. DD Form 1390, MILCON Program. Prepare the form in accordance with paragraph 5.2. One form is required for each location. Use the latest approved totals for the installation or area as basis for personnel data. Only include Family Housing assets on inventory data. Print the form on white paper. This form must precede the DD Form 1391.

5.4.1.3. Tri-Service Family Housing Cost Model. This form is not required. See subparagraph 4.2.5.2.3.

5.4.1.4. Civilian Personnel Costs -- Exhibit OP-8. This form is not required. See subparagraph 4.2.9.2.2.

5.4.1.5. Furnishings Summary -- Exhibit FH-3. This form is not required. See subparagraph 4.2.10.1.

5.4.1.6. Department of the Army Submission Only. Since the Department of the Army has been designated as the executive agent to execute the DoD HAP, only the Department of the Army will submit justification material as described in subparagraph 4.3.1.

5.4.2. Family Housing Justification, Defense Agencies

5.4.2.1. Component Responsibilities. Individual Defense Agencies will provide separate justification material, in the format described in paragraph 4.2 and similar to the format specified for the Military Departments. The submissions will provide separate Construction, O&M, and Leasing exhibits, as appropriate, for Defense Intelligence Agency, Defense Logistics Agency, and National Security Agency.

5.4.2.2. OSD Consolidation and Review. As requested, submit the individual Defense Agencies' original pages of justification material to the OUSD(C) Program/Budget MPC Directorate, Pentagon Room 3C654, for preparation of consolidated justification books and submission to Congress. Concurrently submit one copy of the justification material to the ASD(EI&E).

5.4.2.3. Justification Material Format. Do not bind the Defense Agencies' submitted justification material. Covers are not required. Pages will not be numbered. Provide all data on 8-1/2 inch by 11-inch paper. Type data for FH-2 and FH-4 exhibits across the long dimension. Type data for all others across the short dimension of the paper with 1-inch margins.

5.4.2.4. Classification. All justification material will be unclassified.

[5.5](#) Submission of Justification Books for the Homeowners' Assistance Fund, Defense Appropriation

[5.5.1. Organization of Justification Books.](#) Justification data will include items detailed in [paragraph 4.3](#) for the budget estimates. [Incorporate](#) material as the final section of the Army's MILCON/family housing justification book.

[5.5.2. Department of the Army Submission Only.](#) Since the Department of the Army has been designated as the executive agent to execute the [HAP](#) for the DoD, only the Department of the Army will submit justification data.

[5.5.3. OSD Review.](#) Before the justification material can be released to the Congress, the OUSD(C) must review to [ensure](#) that policies and decisions made by the President and Secretary of Defense are fully reflected.

[5.5.4. Security Clearances.](#) The Department of the Army will be responsible for obtaining clearance of the justification book through OSD Security Review.

[5.5.5. Number of Copies.](#) See Volume 2A, Chapter 1, [paragraph 3.2](#) for instructions on the number of copies required and the distribution.

***6.0 MILCON/FAMILY HOUSING APPROPRIATION SUBMISSION EXHIBITS**

The formats provided on the following [Appendices](#) reflect guidance presented in previous [paragraphs](#). Unless modified in a submission budget call, [adhere to](#) these formats.

Instructions for Preparation of DD Form 1390, FY [MILCON](#) Program

The [active services will use](#) DD Form 1390 to list the projects proposed for inclusion in the [MILCON](#) Program, including requests for (1) new authorization, (2) funding of new authorization, and (3) funding of [PYs'](#) authorization. The Guard and Reserve Forces will use a DD Form 1390s instead of the DD Form 1390.

Instructions for preparation of DD Form 1390:

Items 1 and 2 - Component and Date: Self-explanatory. Date prepared or the date the budget justification material is due to OSD.

Item 3 - Installation and Location: Enter the official name of the installation. Enter the name of the state if within the United States or the name of the country or island chain if outside the United States. In the case of Guard and Reserve facilities, enter the city and state if the facility is not to be constructed on a military installation. Use "classified location" only when necessary to meet security classification guidelines.

Item 4 - Command: Enter the name of the host major command responsible for management control of the installation.

Item 5 - Area Construction Cost Index: Enter the construction cost index used in estimating the cost of the project(s). Consult the latest guidance published by [ASD\(EI&E\)](#).

Item 6 - Personnel Strength: Enter personnel strengths for permanent, student, and support activities. Include transient personnel where applicable.

a. As of: Enter September 30 of the year of submittal to OSD.

b. End FY 20₂: Enter end of the [BY](#), plus 5 years.

Item 7 - Inventory Data (\$000):

a. Total Acreage: Enter the number of acres owned and/or leased by the Government, under accountability of the Military Department concerned, as shown in the latest Inventory of Military Real Property.

b. Inventory Total As Of September 30, 20₂: Enter the date and the current real property inventory total (except land rent). These totals should include inventory amounts for family housing.

c. Authorization Not Yet In Inventory: Enter the amount of funded and unfunded authorization for the construction of facilities or acquisition of land which have not been included in the September 30 Inventory of Real Property. This amount will include only such authorization as is related to either the [MILCON](#) Program or the Family Housing Program as the case may be.

d. Authorization Requested In This Program: Enter the total cost for construction and land acquisition being requested for authorization in the [BY](#).

(Page 2 of 4)

Instructions for Preparation of DD Form 1390 (Continued)

e. Authorization Included in Following Program: Enter the total estimated cost of construction and land acquisition required for authorization for the program year following the **BY**.

f. Planned in Next Three Program Years: Enter the total estimated cost of construction and land acquisition required for the three years beyond the **BY** and following year programs (i.e., second, third, and fourth years beyond the **BY**). This amount should agree with the data used in the preparation of the **MILCON** or family housing estimates contained in the **FYDP**.

g. Remaining Deficiency: Enter the total estimated cost of construction and land acquisition required for existing facilities deficiencies remaining beyond the three program years covered in 7.f.

h. Grand Total: Enter the total of items 7.b. through 7.g.

Item 8 - Projects Requested In This Program: Installation or activity projects for the **BY must** be listed individually with attendant information provided in the appropriate column. Both major and minor construction projects are to be included as shown on the sample form.

a. Column 1 - Category Code: Enter the applicable category code consistent with the category code shown in Item 6 of the DD Form 1391 for the project.

b. Column 2 - Projects Title: Enter the project title consistent with the title shown in Item 4 of the DD Form 1391.

c. Column 3 - Scope: Enter the same quantity shown in Item 9 of the DD Form 1391, "Cost Estimates," and include the unit of measure (e.g., SM, SY, LF, PR, EA, CY). Immediately following or directly beneath the metric quantity and unit of measure, parenthetically include the English quantity and measurement. In those instances where a specific quantity cannot be satisfactorily identified, enter LS for lump sum.

d. Column 4 - Cost (\$000): Enter the project cost consistent with the cost shown in Item 8 of the DD Form 1391. If two or more projects are listed, enter the total in this column, and use this figure in Item 7.d.

e. Column 5 - Design Status: Enter the most accurate possible dates for the start and completion of design using numerals (e.g., 6/94, 11/95).

Item 9 - Future Projects:

a. Included in Following Program (FY__): List all installation projects regardless of the number and include columnar data comparable to that provided in Item 8 but leave design status blank.

b. Planned Next Three Years: List projects planned for next three years in 9.b. and include columnar data comparable to that provided in Item 8 but leave design status blank. The total costs of the projects listed under Items 9.a. and 9.b. should be identical to the entries under Items 7.e. and 7.f., respectively. If additional space is required to list all projects under Items 9.a. and 9.b., a separate sheet of paper should be utilized.

(Page 3 of 4)

Instructions for Preparation of DD Form 1390 (Continued)

c. Also include the R&M unfunded requirement in this block under the heading “R&M Unfunded Requirement.”

Item 10 - Mission or Major Functions: Enter the principal types of peacetime units and/or functions assigned or scheduled for assignment to the installation that require facilities or substantially contribute to the base population. Also enter the current mission stating precisely what the activity will do and list the major functions performed. All entries should address the time period shown in Items 6.a. and 6.b.

Item 11 - Outstanding Pollution and Safety Deficiencies (\$000): List all projects included in the budget request and planned for the next three years that are programmed for outstanding pollution and safety deficiencies. Use the format in Item 8.

Notes:

1. Space requirements for Items 8, 9, 10, and 11 may vary. Therefore, remaining space on the DD Form 1390 may be utilized as necessary for the specific entries and continued on a separate sheet of paper. A solid black line should be used to set Items 8, 9, 10, and 11 apart and individual item titles and subheadings should be added.

2. Projects that were authorized (but not appropriated) in prior years will be listed in the same manner as projects for which new authorization is requested. The fiscal year in which the project was authorized will be shown after the project title in Item 8.

DD1390S/2 Guard and Reserve Military Construction

Instructions for Preparation of DD Form 1390s, FY__ Guard and Reserve Forces **MILCON**

The Guard and Reserve Forces will use the DD Form 1390 to supplement the data entered in the DD Form 1391, FY **20__ MILCON** Program.

Instructions for preparation of DD Form 1390s follow:

Item 1 - Component: Enter the specific Guard or Reserve Forces component of the active services. Recognized abbreviations such as ARNG (Army National Guard) **or** ANG (Air National Guard) are acceptable.

Item 2 - Date: Date prepared or the date to OSD.

Item 3 - Installation and Location: For facilities not located at DoD installations or commercial airfields, enter the name of the city and State in which the projects are located. For other facilities, enter the name of the DoD installation and its geographical location to the extent that it is not included in the installation name.

Item 4 - Area Construction Cost Index: Enter the construction cost index used in estimating the cost of the project(s). Consult the latest guidance published by DUSD(IA&I).

Item 5 - Frequency And Type Of Utilization: Enter the type of utilization (e.g., weekend drill, weeknight drill, unit training activities, annual active duty for training) and indicate number of days the installation is used per month/year, as appropriate.

Item 6 - Other Active/Guard/Reserve Installations Within 15 Mile Radius: List the nearest six existing Active and existing or programmed (within the next five years) Reserve component facilities and their distances, within a fifteen-mile radius of the proposed construction site. If no facilities exist within the fifteen-mile radius, identify the three closest installations. Indicate the year the facilities were constructed and the size of the facility.

Item 7 - Projects Requested In This Program: Installation or activity projects for the **BY must** be listed individually with attendant information provided in the appropriate column. Both major and minor construction projects are to be included.

a. Column 1 - Category Code: Enter the applicable category code consistent with the category code shown in Item 6 of the DD Form 1391.

b. Column 2 - Project Title: Enter the project title consistent with the title shown in Item 4 of the DD Form 1391.

c. Column 3 - Scope: Enter the same quantity shown in Item 9 of the DD Form 1391, Cost Estimates, and include the unit of measure (e.g., SM, SY, LF, PR, EA, CY). Immediately following or directly beneath the metric quantity and unit of measure, parenthetically include the English quantity and measurement. In those instances where a specific quantity cannot be satisfactorily identified, enter LS for lump sum.

Instructions for Preparation of DD Form 1390s, FY__ Guard and Reserve Forces MILCON
(Continued)

d. Column 4 - Cost (\$000): Enter the project cost consistent with the cost shown in Item 8 of the DD Form 1391. If two or more projects are listed, enter the total in this column. In the case of Army National Guard projects where part of the financing is from other than Federal sources, enter only the Federal share.

e. Column 5 - Design Status: Enter the most accurate possible dates for the start and completion of design using numerals (e.g., 6/94, 11/95).

Item 8 - State Guard/Reserve Forces Facilities Board Recommendations (Date): Enter the following statement "facilities identified in Item 6 have been examined by the State Reserve Forces Facilities Board for possible joint use/expansion. The Board recommendations are ____." (Note: Project folders will contain justification data to support the recommendation.)

Item 9 - Land Acquisition Required (Number of Acres): Enter the acreage required for the project and the method of acquisition (e.g., fee, title, donation, lease). For all projects involving land acquisition, a site survey must be conducted in accordance with DoDI 4165.71, and the following statement must be entered, either in Item 9 or Item 10: "Site survey has been completed and site is suitable for constructing the proposed project at the estimated cost indicated."

Item 10 - Projects Planned In Next Four Years: Enter the Project Title and Estimated Cost for projects planned at the installation identified in Item 3 for the next four years beyond this program year. A maximum of five projects should be identified. For armory-type projects, list those facilities which are programmed for replacement within the next four years within a fifteen-mile radius of the proposed project as well as the year the facilities were constructed. If none are planned, so indicate. Items **must** contain columnar data comparable to that provided in Item 7 **except for** design status which should be left blank. Also include the restoration and modernization (R&M) unfunded requirement in this block under the heading "R&M Unfunded Requirement."

Item 11 - Personnel Strength As Of ____: In the appropriate columns, enter the number of authorized and actual personnel at this facility as of six months prior to project submission.

Item 12 - Reserve Unit Data: List the designated units assigned and/or scheduled to be trained in the requested facilities. Enter the corresponding authorized and actual strengths of each unit, indicating actual strength as of the date listed in Item 11.

Item 13 - Major Equipment and Aircraft: List the vehicular and/or other large equipment and aircraft which are to be accommodated at the installation and which have a bearing on the type and/or scope of the facility requirement. When vehicle maintenance shops are being requested, the Weighted Equipment Density (WED) for the vehicles to be maintained will be included in this item.

Instructions for Preparation of DD Form 1391/1391C FY __MILCON Project Data

1. The DD Form 1391 will be used, as applicable, by the Active, Guard, and Reserve Forces to support each project proposed for inclusion in the MILCON Program. This includes both new authorization projects in the program as well as urgent unforeseen projects using emergency or contingency authorization. This form will also be used to transmit supporting data for the following types of projects:

- a. Minor construction projects, 10 U.S.C. § 2805.
- b. O&M type projects required to be submitted to OSD in accordance with the provisions of DoDD 4165.06.
- c. Non-appropriated fund construction projects requiring OSD concurrence or approval.
- d. Family housing projects.

2. The continuation sheet (DD Form 1391c) will be used as required for explanation of the requirement for the project (item 11.) and other mandatory statements concerning flood plains and wetlands environmental impact, accessibility to the handicapped, or fallout shelters. However, when submitting an annual MILCON Program, these mandatory statements may be included in the front of the program book.

3. Instructions for preparation of DD Form 1391:

- a. ITEMS 1 and 2 - COMPONENT AND DATE: Self-evident.
- b. ITEM 3 - INSTALLATION AND LOCATION: Enter the official name of the installation. Use code name or designations only when necessary to preclude security classification or when an official name is not available. Enter the name of the State if within the United States or the name of the country or island chain if outside the United States. In the case of Guard and Reserve Forces facilities, enter the city and State if the facility is not to be constructed on a military installation.
- c. ITEM 4 - PROJECT TITLE: Enter the title used in item 8, column 2 of the DD Form 1390, assuring that it corresponds to the category code in item 6.
 - (1) The title of the project should reflect the facility provided by the project.
 - (2) The scope of a project or number of buildings involved will not be shown in the title (i.e., and “Enlisted Quarters” project will not be shown as “Two 250 Man Enlisted Quarters.”)
 - (3) Avoid the inclusion of acronyms.
 - (4) If a project requires land acquisition estimated to cost in excess of \$50,000, the project title will be suffixed with “With Land Acquisition.”
- d. ITEM 5 - PROGRAM ELEMENT: Enter the appropriate number as it relates to the “Future Years Defense Program,” except when inclusion of this number would require classification of an otherwise unclassified form.

Instructions for Preparation of DD Form 1391/1391C (Continued)

e. **ITEM 6 - CATEGORY CODE:** Enter the applicable category code using no less than three or more than six digits consistent with item 8, column 1 on DD Form 1390, [for the Active Forces](#) and item 7, column 1 on DD Form 1390S2, [for the Guard and Reserve Forces](#). When a project includes multiple distinct facilities, use the real property category code which corresponds to the predominant facility use.

f. **ITEM 7 - PROJECT NUMBER:** Enter the number of the project assigned by the Component concerned. If no number has been assigned, indicate N/A (not applicable).

g. **ITEM 8 - PROJECT COST:** Enter the estimated cost in thousands of dollars (excluding design except for family housing) for which funding is being requested. The amount indicated should be identical to that shown in item 8, column 4 of the DD Form 1390 and should include the costs of the primary facilities, supporting facilities, contingencies, supervision, inspection, and overhead. Figure will be the Total Request entered in item 9. and will not include the figure entered for "Equipment Provided From Other Appropriations."

h. **ITEM 9 - COST ESTIMATES:** This portion of the DD Form 1391 is comprised of several elements which collectively comprise the Total Request. Each element will be identified, quantified, and costed in a series of five column entries as follows:

(1) **Item:** Identity of the Primary or Supporting Facility. After each "Item" entry where the metric measurement (square meters) is used in the Unit of Measure column, include in parenthesis the size of the facility in the English measurement (Square Feet).

(2) **U/M (unit of Measure):** Each entry in the "item" column will be followed in the "U/M" column by the accepted two-character abbreviation for the unit of measure associated with the quantity of the item concerned (e.g., SM, SY, LF, KV). Where it is not feasible to show a specific unit of measure, use LS (Lump Sum).

(3) **Quantity:** Enter the required number of units of measure comprising the "item" entry. Where "LS" is the unit of measure, enter a dash (-).

(4) **Unit Cost:** Enter the appropriate unit cost for each "item" entry where a unit of measure is indicated. Where the unit of measure is "LS" enter a dash in the unit cost column.

(5) **COST (\$000):**

(a) Enter the cost, in thousands of dollars, represented by the product of the "Quantity" and "Unit Cost" entries.

(b) When a single primary facility is listed enter the cost of the facility without parentheses. If unusual features or functional areas of the primary facility are listed, the cost of each [must](#) be enclosed with parentheses. The total cost of these features [must](#) equal the figure entered for the primary facility.

(c) When more than one primary facility is listed, the cost of each facility will be entered in the cost column without parentheses.

Instructions for Preparation of DD Form 1391/1391C (Continued)

(d) The cost entry for the item “Supporting Facilities” **must** be entered without parentheses and **must** be the total of the various supporting facilities listed. However, each of the individual supporting facility costs **must** be enclosed by parentheses.

(e) The cost entered for items such as “Subtotal,” “Contingency,” “Contract Cost,” “SIOH,” and “Total Request” **must** be entered without parentheses. However, the cost for Equipment Provided From Other Appropriations” **must not** be entered as **an additive** item.

(f) Projects in category Code 500 will have separately identified the equipment purchased for the Surgeons General as “Category Equipment” showing the total cost of such equipment added to the “Total Request.” Labor cost for installation of “Category E” equipment should be included in the unit cost for the primary facility because it is part of the “Total Contract Cost.”

(6) **PRIMARY FACILITY:** Enter the identity and required columnar data for the primary facility. When the primary facility consists of two or more components the cost of the primary facility will be the sum of the costs of the individual components. In addition, subordinate components will be entered under the primary facility after indenting two spaces.

(a) Normally, the cost of fixed equipment provided as part of the construction contract (e.g., cooling, heating, and electrical systems) will be included in the cost of the primary facility. However, when the primary facility includes unusual features of significant cost, such as hyperbaric vessels and standby cooling, such features should be identified under the primary facility.

(b) Land acquisition required specifically for the project and estimated to cost \$50,000 or more **must** be listed in the same manner as an unusual feature. Conversely, land acquisitions estimated to cost less than \$50,000 are to be accomplished under 10 U.S.C. § 2672 and should not be listed.

(c) For family housing new construction, the entry under primary facility will show the total number of units in the project. As subordinate components to the primary facility “Units to 5’ line,” “GFE,” and “Land Acquisition” will be shown in parentheses in the cost column to add up to the cost of the primary facility shown. “Item 10 will be used to show the numbers and cost computations for the various types of living units which comprise the primary facility.

Instructions for Preparation of DD Form 1391/1391C (Continued)

(d) Lump-sum funding requests are prohibited. The only instance for which separate construction projects can be combined under a single DD Form 1391 is when each of the projects is in the same general facility category (i.e., supply facilities, maintenance and production facilities, unaccompanied housing). Programs such as “facility upgrades,” “ATB Beddown Facilities,” and others combining a number of disparate construction efforts must be justified as separate projects. If it is planned, in execution, to construct several of these projects at a single location under one contract, a statement to that effect should be included in the “Additional” section of Item 10.

(e) Antiterrorism Force Protection/physical security measures: The entry under primary facility will show physical security improvements (e.g., special structural improvements, ballistic glass). Where land acquisition serves a specific purpose such as stand-off distance for force protection, the acquisition **must** be listed as an antiterrorism force protection subordinate component to the primary facility.

(7) **SUPPORTING FACILITIES**: List those items of construction directly related to and required for the support of the primary facility. Such items should include (a) special construction features (piles, spread footings, seismic, fill); (b) utilities (gas, oil, steam, electric, and water supply lines as well as sanitary and storm sewers); (c) site preparation; (d) roads, sidewalks, and parking; (e) site improvements (seeding, sodding, landscaping); (f) antiterrorism force protection/physical security measures such as physical security site improvements (e.g. fencing, perimeter/area lighting, blast mitigation barriers, berms and landscaping); and (g) demolition. All supporting facility items should be listed in terms of accepted units of measure and quantity whenever practicable. For family housing, design cost will be identified under “Supporting Facilities.”

(8) **ESTIMATED CONTRACT COST**: Enter the sum of the costs shown for all primary and supporting facilities.

(9) **CONTINGENCY**: Enter the appropriate contingency rate, in parentheses, immediately following the item designation in column 1, and enter the cost equivalent in the proper column.

(10) **SUBTOTAL**: Enter the sum of the “Subtotal” and the “Contingency” costs. In the case of Army National Guard, armory projects which are funded, in part, from other than Federal funds, enter the Federal costs on the first line and the State or other cost on the next line.

(11) **SUPERVISION, INSPECTION, AND OVERHEAD (SIOH)**: Enter the appropriate SIOH rate in column 1 after the item designation and reflect the cost equivalent in the proper column.

(12) **DESIGN/BUILD**: For major construction projects where the Design/Build contracting method is planned to be used, the design cost associated with the contract should be included in the Cost Estimates (Block 9) section of the DD Form 1391. The entry “Design/Build – Design Cost” will be used and should appear after the “SIOH” entry and before the “Total Request” entry with the associated cost in the proper column.

Instructions for Preparation of DD Form 1391/1391C (Continued)

(13) **TOTAL REQUEST:** Enter the sum of the “Total Contract Cost” and the “SIOH.” This figure should be identical to the entry in item 8, “Project Cost (\$1000).” Total request should be rounded-off to provide a more realistic approach to the presentation of MILCON programs.

(14) **TOTAL REQUEST ROUNDED:** The following guidance is provided for “rounding-off” a projects’ total request:

Project (P) Estimate (\$000)	<u>Rounding Guidance</u> (\$000)
< 1,000	Nearest \$ 10K
1,000 to 5,000	Nearest \$ 50K
5,000 to 10,000	Nearest \$ 100K
10,000 to 15,000	Nearest \$ 200K
15,000 to 20,000	Nearest \$ 500K
> 20,000	Nearest \$ 1,000K

(15) **INSTALLED EQUIPMENT PROVIDED FROM OTHER APPROPRIATIONS:** Enter the total cost of equipment which is procured with other than MILCON funds and which is essential to the mission of the facility. DD Form 1391 should reflect only the cost of equipment identified in the Associated Equipment Report. If no such major equipment is associated with the project, enter a “zero” in the appropriate space. Note that this figure is not included in the “Total Request.” This excludes minor items procured with O&M funds, and in the case of Army National Guard, excludes equipment provided from other then Federal appropriations.

i. **ITEM 10 - DESCRIPTION OF PROPOSED CONSTRUCTION:**

(1) In a clear and concise manner, provide a complete outline of all principal features of the work and its correlation with the various data entered in item 9.

(2) State whether or not the proposed construction is in compliance with applicable antiterrorism force protection measures and antiterrorism force protection standards.

(3) Begin with an accurate description of the primary facility and the associated functions that will be supported in them. Continue with a description of the features of work identified in each line item of the Block 9. Avoid the use of generalities such as “most economical means” or “modern methods and materials.”

(4) Provide only such additional descriptive details as are necessary for clarity.

(5) Identify and list the buildings or structures to be demolished in connection with the proposed construction, if applicable.

(6) For single person quarters projects, indicate the grade mix of personnel, officer or enlisted, who will occupy the facilities.

Instructions for Preparation of DD Form 1391/1391C (Continued)

(7) For projects involving additions, alterations, or conversions, describe the changes to be made.

j. **ITEM 11 - REQUIREMENT:** This portion of the DD Form 1391 is comprised of seven elements which are to be set forth in the following format:

(1) Immediately after the item title “Requirement” indicate, in appropriate units of measure, the total facility requirement (e.g., 5,500 SM), followed by two additional entries giving the status of the existing facility (e.g., adequate: 66,134 SF; substandard: -0-). [For a project with multiple distinct facilities, include information for each facility category code.](#)

(2) **PROJECT:** Provide a one-sentence statement indicating what this project provides.

(3) **REQUIREMENT:** Provide detailed, informative statements as to precisely why the project is needed. Use positive statements to support the requirement and avoid the use of such words as “inadequate,” “uneconomical,” and “necessary” unless they are fully explained. Similarly, when identifying contributing factors, assure that the presentation leaves no pertinent questions unanswered (e.g., vulnerability to terrorist threats (reference threat/vulnerability assessment); excessive maintenance (show cost comparison); self-liquidation (show amortization); or advanced deterioration (describe effects)). The requirements must establish maximum utilization of existing facilities and identify alternatives considered, along with reasons for their rejection. If the project is a result of the Integrated Global Posture and Basing study, include the phrase, “This project is associated with the global Defense posture changes.”

(4) **CURRENT SITUATION:** Describe how and under what conditions the requirement is presently being met. Comments should support the stated requirement and include the identity and description of current assets as well as the reason they are considered unsuitable for continued use. For Guard and Reserve Forces projects which are to replace existing facilities, identify and describe the disposition to be made of them. Similarly, for Guard and Reserve Forces facilities to be constructed and/or utilized jointly with other Guard/Reserve components, include pertinent information and status of coordination or negotiations.

(5) **IMPACT IF NOT PROVIDED:** Describe the manner and extent to which mission accomplishment would be affected if the project were not approved.

(6) **ADDITIONAL:** If the project is justified on an economic basis (primary economic analysis), so state and indicate the projected payback period. As a minimum, all renovation, upgrade, and replacement projects must be supported by an economic analysis. For all other projects, state precisely why a primary economic analysis cannot be applied to the project. When providing supporting documentation for the OSD budget submission, enter appropriate statements on commercial/industrial operations.

OMB Circular A-76 and as required by applicable [DoDI](#). Entry of this information on the DD 1391 or on a separate DD 1391c is optional. For all overseas projects, state whether or not the project is eligible for NATO Infrastructure or other host nation funding.

Instructions for Preparation of DD Form 1391/1391C (Continued)

(7) **JOINT USE CERTIFICATION:** Include the following certification: “The (enter the title of the certifying official) certifies that this project has been considered for joint use potential. Joint use construction is recommended.” Or “The (enter the title of the certifying official) certifies that this project has been considered for joint use potential. Unilateral construction is recommended. The reasons for this recommendation are...” The Joint Use Certification is not required for family housing construction projects.

(8) For all unaccompanied housing project requests, the DD Form 1391 **will** show all unaccompanied housing restoration and modernization conducted in the past 2 years (BY-2 and BY-1) and all future R&M requirements (defined as R&M funding for unaccompanied housing included in the FYPD years) for unaccompanied housing at that installation. This information should appear as the last data in the DD Form 1391 under the heading “BY-2 Unaccompanied Housing R&M Conducted,” “BY-1 Unaccompanied Housing R&M Conducted,” and “Future Unaccompanied Housing R&M Requirements.”

Space requirements for items 10 and 11 will vary. Therefore, remaining space on the DD Form 1391 may be used as necessary for the specific entries and continued on a DD Form 1391c as appropriate. A solid, black line should be used to set items 10 and 11 apart, and individual item titles and subheadings should be added.

k. **ITEM 12 – SUPPLEMENTAL DATA:** This portion of the DD Form 1391 is comprised of three elements which should be provided in the following format:

(1) **A. EXECUTION DATA:** Include (1) Acquisition Strategy, (2) Design data – start date, % of design completed; design complete date; total design cost (\$000), energy studies and/or life cycle analysis performed (Yes or No); and standard or definitive design used (yes or no), and (3) Construction data - contract award date, construction start date and construction complete date.

(2) **B. EQUIPMENT ASSOCIATED WITH THIS PROJECT:** Include table listing equipment name, procuring appropriation, fiscal year appropriated of requested, and cost (\$000).

(3) **C. FUNDING PROFILE:** include table listing history of authorizations and appropriations (1) fiscal year for enacted, cost variation, current budget request and future request, (2) authorization amount (\$000), authorization of appropriation amount (\$000), and (3) appropriated amount (\$000). Totals for Authorized and Appropriated should be provided at the bottom of the table.

(4) **D. PROJECT SPENDING PLAN WITH CHART:** Provide table of monthly and cumulative costs (\$000) of funding, obligations and outlays by month-year from construction start through construction completion, as follows:

*February 2025

PROJECT SPENDING PLAN**PROJECT: Project Title, Installation, State****As of: Month Day, Year**

All Costs in thousands (\$000)

Month- Year	FUNDING		OBLIGATIONS		OUTLAYS	
	Monthly	Cumulative	Monthly	Cumulative	Monthly	Cumulative

Instructions:

1. For each joint project, fill in the information (each project should be identified separately).
2. In the “Funding Requirement” section, enter the amounts that each Component is expected to contribute to the joint project.
3. In the Budgeted Amount” section, enter the amount that has been included in the FY_____ - FY_____ budget submission.
4. All dollars should be in thousands.

***Exhibit UH-6 Military Housing Privatization (MHPI) – Military Unaccompanied Housing Privatization**

DEPARTMENT OF _____
 Exhibit UH-6 Military Housing Privatization Initiative (MHPI) - Military Unaccompanied Housing Privatization
 Fiscal Year 20XX

Privatization Date ¹	MHPI Project Name ²	Installation/ State ³	Approved by OSD & OMB ⁴						Actual/Current Plan ⁸							MHPI Authorities ¹
			No. Units Conveyed ⁵	No. End State Units ⁶	Funding Source(s) ⁷				No. Units Conveyed ⁹	No. End State Units ¹⁰	Total No. Units in Current Inventory ¹¹	Funding Source(s) ¹²				
					Amount (\$M) ^{7a}	Budget Year(s) ^{7b}	Type of Funds ^{7c}	Source Project Name ^{7d}				Amount (\$M) ¹²	Budget Year(s) ¹²	Type of Funds ¹²	Source Project Name ¹²	
Grand Totals ¹⁴			0	0	\$0				0	0	0	\$0				

Notes:

1. The date the real property is transferred (land and family housing units) to the private owner/developer, and when service members become entitled to receive BAH.
2. Provide the name of the MHPI Project given to the privatization project, including the name given to integrated/grouped projects. The MHPI project name should be consistent with the MHPI project name used in the previously approved OSD/OMB Scoring report and/or subsequent notification to Congress.
3. List the MHPI project location by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.
4. This section relates the previously approved OSD/OMB project scope and funding amounts contained in the scoring package and/or subsequent Notification of Funds Transfer letters to Congress.
5. Provide the number of unaccompanied housing units to be conveyed by installation and state to the Developer, including each installation and state incorporated into the integrated/grouped MHPI project, as previously approved in the OSD/OMB Scoring report.
6. Provide the end state number of family housing units by installation and state to the Developer, including each installation/state incorporated into the integrated/grouped MHPI project, as previously approved in the OSD/OMB Scoring report.
7. Provide all of the funding source information for the MHPI project as reflected in the previously approved OSD/OMB report and consistent with the project summary details accompanying the Notification of Transfer letter to Congress, such as:
 - a. The amount of funds to be used for the Government's cost of the project (i.e., equity contribution, credit subsidy costs, differential lease payments).
 - b. The fiscal year(s) of the funding sources to be used to cover the Government's cost of the MHPI project.
 - c. The type of funds (e.g., MILCON) to be used to cover the Government's cost of the MHPI project.
 - d. The project(s) that are used to source the Government's cost of the privatization project.

8. This section relates to the Military Departments' actual and/or current plan, which might or might not be consistent with the details contained in the previously approved OSD/OMB Scoring report and project summary to Congress for the MHPI project due to extenuating circumstances.

9. Provide the actual and/or revised planned number of unaccompanied housing units conveyed to the Developer by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.

10. Provide the actual and/or revised, planned number of unaccompanied housing end state units by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.

11. Provide the total number of privatized unaccompanied housing units in the inventory for each MHPI project by installation/state, including each installation/state incorporated into the integrated/grouped MHPI project, regardless if they are currently occupied or not.

12. Provide all the “actual and/or current” funding sources used to fund the MHPI project, which might or might not be consistent with the details contained in the previous-approved OSD/OMB Scoring report and project summary (i.e., project amount, budget year of funds, source project, appropriation) to Congress for the MHPI project due to extenuating circumstances. If possible and/or available, provide the requested funding information by installation/state.

13. Provide the applicable MHPI authorities in 10 U.S.C. Chapter 169 Subchapter IV used and/or proposed to be used for the privatization project. Designators are as follows:

1 = 10 U.S.C. § 2873 - Government Direct Loans

2 = 10 U.S.C. § 2873 - Loan Guarantees

3 = 10 U.S.C. § 2875 - Investments, such as DoD Equity Contributions in non-governmental entities

4 = 10 U.S.C. § 2877 - Differential Lease Payments

5 = 10 U.S.C. § 2878 - Conveyance or Lease of Existing Property and Facilities

14. Totals of number of units conveyed, number of end state units, and funding amounts.

Exhibit FH-3 Furnishings Summary (Page 1 of 2)

***February 2025**

Instructions for Preparation of Family Housing Furnishings Summary Exhibit FH-3

General. Furnishings to be included in Exhibit FH-3 are defined in Enclosure 6 to [DoDI 4165.63](#). For Unaccompanied Personnel Housing furnishings, see Exhibit OP-21, Chapter 232, this Manual.

PY Data. For the prior year, enter estimated end year obligations.

CY and BY Data. Estimates should be based on requirements determined to be in accordance with Section XI of [DoDI 4165.63](#) and applicable experience data. Provide an explanation for differences of more than \$1 million or 10%, whichever is less, between the total amount shown for furnishings in the [CY](#) and the [BY](#).

Moving and Handling. All identifiable transportation, handling and storage costs should be included here.

Initial Issue. Certain initial issue movable equipment, such as stoves and refrigerators, is usually procured as part of a construction project with construction funds, instead of operation funds. Likewise, in some circumstances leasing funds are utilized for furnishings in leased quarters. The FH-3 should reflect all family housing resources applied to furnishings, with memo entries to indicate the amounts funded from accounts other than the Furnishings portion of Operations and Maintenance.

 Exhibit FH-6 Military Housing Privatization Initiative (MHPI) - Family Housing Privatization
 Fiscal Year 2019

Privatization Date ¹	MHPI Project Name ²	Installation/ State ³	Approved by OSD & OMB ⁴						Actual/Current Plan ⁸						MHPI Authorities ¹³	
			No. Units Conveyed ⁵	No. End State Units ⁶	Funding Source(s) ⁷			Source Project Name ^{7d}	No. Units Conveyed ⁹	No. End State Units ¹⁰	Total No. Units in Current Inventory ¹¹	Funding Source(s) ¹²				
					Amount (\$M) ^{7a}	Budget Year(s) ^{7b}	Type of Funds ^{7c}					Amount (\$M) ¹²	Budget Year(s) ¹²	Type of Funds ¹²		Source Project Name ¹²
Grand Totals ¹⁴			0	0	\$0				0	0	0	\$0				

Instructions:

1. The date the real property is transferred (land and family housing units) to the private owner/developer, and when service members become entitled to receive BAH.
2. Provide the name of the MHPI Project given to the privatization project, including the name given to integrated/grouped projects. The MHPI project name should be consistent with the MHPI project name used in the previously approved OSD/OMB Scoring report and/or subsequent notification to Congress.
3. List the MHPI project location by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.
4. This section relates the previously approved OSD/OMB project scope and funding amounts contained in the scoring package and/or subsequent Notification of Funds Transfer letters to Congress.
5. Provide the number of family housing units to be conveyed by installation and state to the Developer, including each installation and state incorporated into the integrated/grouped MHPI project, as previously approved in the OSD/OMB Scoring report.
6. Provide the end state number of family housing units by installation and state to the Developer, including each installation/state incorporated into the integrated/grouped MHPI project, as previously approved in the OSD/OMB Scoring report.
7. Provide all of the funding source information for the MHPI project as reflected in the previously approved OSD/OMB report and consistent with the project summary details accompanying the Notification of Transfer letter to Congress, such as:
 - a. The amount of funds to be used for the Government's cost of the project (i.e., equity contribution, credit subsidy costs, differential lease payments).
 - b. The fiscal year(s) of the funding sources to be used to cover the Government's cost of the MHPI project.

c. The type of funds (e.g., FH New Construction, FH Construction Improvements, FH Improvement Funds) to be used to cover the Government's cost of the MHPI project.

d. The project(s) that are used to source the Government's cost of the privatization project.

8. This section relates to the Military Departments' actual and/or current plan, which might or might not be consistent with the details contained in the previously approved OSD/OMB Scoring report and project summary to Congress for the MHPI project due to extenuating circumstances.

9. Provide the actual and/or revised planned number of family housing units conveyed to the Developer by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.

10. Provide the actual and/or revised, planned number of family housing end state units by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.

11. Provide the total number of privatized family housing units in the inventory for each MHPI project by installation/state, including each installation/state incorporated into the integrated/grouped MHPI project, regardless if they are currently occupied or not.

12. Provide all the “actual and/or current” funding sources used to fund the MHPI project, which might or might not be consistent with the details contained in the previous-approved OSD/OMB Scoring report and project summary (i.e., project amount, budget year of funds, source project, appropriation) to Congress for the MHPI project due to extenuating circumstances. If possible and/or available, provide the requested funding information by installation/state.

13. Provide the applicable MHPI authorities in 10 U.S.C. Chapter 169 Subchapter IV used and/or proposed to be used for the privatization project. Designators are as follows:

- 1 = 10 U.S.C. § 2873 - Government Direct Loans
- 2 = 10 U.S.C. § 2873 - Loan Guarantees
- 3 = 10 U.S.C. § 2875 - Investments, such as DoD Equity Contributions in non-governmental entities
- 4 = 10 U.S.C. § 2877 - Differential Lease Payments
- 5 = 10 U.S.C. § 2878 - Conveyance or Lease of Existing Property and Facilities

14. Totals of number of units conveyed, number of end state units, and funding amounts.

Exhibit FH-8 Inadequate Family Housing Elimination

Family Housing _____
Annual Inadequate Family Housing Elimination

Unit Description	Total Inventory	Total Inadequate Inventory	Total Inadequate Addressed
Total Units at beginning of FY 20XX	1/	2/	
FY 20XX total traditional MILCON projects to eliminate inadequate units	3/	3/	3/
project 1/installation	3/	3/	3/
project 2/installation	3/	3/	3/
FY 20XX total units privatized (no longer require FH O&M) to eliminate inadequate housing	3/	3/	3/
project 1/installation	3/	3/	3/
project 2/installation	3/	3/	3/
FY 20XX total units demolished/divested/ or otherwise permanently removed from family housing inventory	3/	3/	3/
project 1/installation			
project 2/installation			
Total Units at end of FY 20XX	1/	2/	
Note: The beginning total inventory and total inadequate inventory figures represent the total for all installations world-wide. The data listed for the individual projects/installations is a subset.			

1/ These total figures for the beginning and end of the fiscal year must cross-reference to the similar figures in Exhibit FH-2 and the FH-11 summary tables in the budget justification book.

2/ These total figures for the beginning and end of the fiscal year must cross-reference to the similar figures in Exhibit FH-11 summary table in the budget justification book.

3/ The Total Inventory data, Total Inadequate Inventory data, and Total Inadequate Addressed data should be included for each location in which the Service has a funded traditional [Milcon](#) project, will award a privatization project, or expects to demolish, divest, or otherwise permanently remove units from the family housing inventory.

***APPENDIX D: BES / NATO SECURITY INVESTMENT PROGRAM EXHIBITS IN
SUPPORT OF PARAGRAPH 4**

Exhibit NSIP -1 NSIP Project Data

NATO Security Investment Program (NSIP) Project Data

Location	Installation	Project Title	Project Description	Budget Scheme	Project Cost	U.S. Cost Share	Other Nation Cost Share

Instructions:

1. This exhibit will identify the NSIP requirements, both **MILCON** and procurement, at the project level detail. The exhibit should be completed for both the normal NSIP requirements and NATO Expansion requirements. The listing should be sufficiently detailed to identify discrete projects and initiative; aggregation at the capability package level i.e., Defense of the Mediterranean, is NOT sufficiently detailed.
2. **Submit** data in hard copy and on a disk in a Microsoft Access format or in Microsoft Excel format.
3. Location: State or country where the project will be executed, i.e. Alaska, Turkey, or Italy.
4. Installation: Base where the project will be executed, i.e. Aviano AB.
5. Project Title.
6. Project Description: Explanation and description of each project.
7. Budgeted Scheme: Identify the number of NATO nations sharing in the cost of the project.
8. Project Cost: The total cost for the NSIP project. The project's cost should be displayed in thousands.
9. U.S. Cost Share: Identify the estimated U.S. share of the project cost. The U.S. share should be displayed in thousands.
10. Other NATO Cost Share: Identify the estimated share of the other NATO nations. The cost should be displayed in thousands.
11. This exhibit should be completed for the current year and budget year, i.e., current year FY 2001; budget Year FY 2002.
12. The hard copy and electronic submission should include a total that reflects the cost of normal NSIP requirements and NSIP Expansion requirements by fiscal year.

Exhibit NSIP-1 NSIP Project Data

***February 2025**

Exhibit NSIP-2 NSIP Recoupment Estimates

North Atlantic Treaty Organization Security Investment Program Recoupment Estimates

Component	Appropriation	Fiscal Year	Location	Installation	Project Title	Slice/Serial (if known)	Recoupment Budget Estimate	Rate of Conversion

Instructions:

1. This exhibit will be executed at the project level for each NSIP major construction project that is eligible for recoupment (reimbursement by other member countries for eligible costs). No project level detail is required for minor construction, [design](#), family housing improvement or BRAC.
2. [Submit](#) data in hard copy and on a disk in a Microsoft Excel format.
3. Component should be the specific Service Active, Guard or Reserve Force component or Defense Agency. A recognized abbreviation such as ARNG (Army National Guard) is acceptable.
4. Appropriation should be a four-digit number (treasury code).
5. Fiscal year should be a four-digit number.
6. Location is the two-digit state or country code.
7. Installation is the military base where the project is being built.
8. Slice/Serial, if known, or pre-financing notification reference number.
9. Recoupment budget estimate amount is in thousands.
10. The estimated budget recoupment should reflect the rate of conversion at the time of estimate.
11. For the hard copy, the data should be sorted by fiscal year, location and then by installation. The hard copy and should also include a total for each fiscal year.

Date
Point of Contact: Name, Organization, and Phone number

VOLUME 2B, CHAPTER 7: “BASE REALIGNMENT AND CLOSURE APPROPRIATIONS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [bold, italic, blue, and underlined font](#).

The previous version dated [December 2010](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
2.1 (070201)	Added information on the new BRAC account 0516. Deleted reference to implementation periods to BRAC IV & V.	Addition
3.2 (070302)	Updated section to reflect only one BRAC justification book is required.	Revision
070303 (deleted)	Deleted section – referenced BRAC 2005 only. BRAC 2005 submission requirements consolidated with other BRAC rounds under 3.2.	Deletion
070403 (deleted)	Deleted section – referenced BRAC 2005 only. BRAC 2005 submission organization consolidated with other BRAC rounds under 4.2.	Deletion
0706 (deleted)	Deleted section – referenced BRAC 2005 submission formats only. BRAC 2005 submission formats consolidated with other BRAC rounds under 5.0.	Deletion

CHAPTER 7

BASE REALIGNMENT AND CLOSURE APPROPRIATIONS

1.0 GENERAL (0701)

1.1 Purpose (070101)

1.1.1. This chapter provides instructions applicable to budget formulation and congressional justification for Base Realignment and Closure (BRAC) appropriations.

1.1.2. The following appropriations and accounts are covered in Section 2.1:

DoD Base Closure Account (1988 Commission)

DoD Base Closure Account 1990 (1991, 1993 & 1995 Commissions)

DoD Base Closure Account 2005 (2005 Commission)

[DoD Base Closure Account \(Consolidated\)](#)

1.2 Submission Requirements (070102)

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 7 covers specific back-up material requirements for the above accounts. Components should also submit any applicable exhibits required in Volume 2, Chapter 19 for the above appropriations/accounts, as applicable.

1.3 Preparation of Material (070103)

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 7 provides additional specific guidance with regard to the back-up material required for the Base Realignment and Closure appropriations.

1.4 References (070104)

Chapter 3 provides guidance related to Operation and Maintenance costs and Chapter 6 provides guidance and formats related to Military Construction and Family Housing costs.

2.0 UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATION (0702)

2.1 Base Closure Account, Defense Appropriations (070201)

2.1.1. Overview

Defense Authorization Amendments and Base Closure and Realignment Act, Public Law 100-526, established the Defense Base Closure Account (Part I) as a mechanism to provide the required funding to implement the approved recommendations of the Base Closure and Realignment Commissions. Public Law 101-510, Title XXIX, Defense Base Closure and Realignment Act of 1990, established Base Closure Account 1990 (Part II), the FY 2002 National Defense Authorization Act established the DoD Base Closure Account 2005 (BRAC 2005), and [Section 2711 of the FY 2013 National Defense Authorization Act established the DoD Base Closure Account, which directed the transfer of remaining balances from all three previous BRAC accounts.](#) Funding approved by Congress in these Accounts is appropriated and authorized in a lump sum amount and may be spent for construction, planning and design, civilian severance pay, civilian permanent change in station, transportation of things, and other costs related to the realignment or closure of the subject bases. The management structure of the program is described below.

2.1.2. Guidance

2.1.2.1. The [Assistant Secretary of Defense \(Sustainment\)](#) is responsible for issuing policy for management of the BRAC program and overseeing the DoD Components' execution of the program.

2.1.2.2. To properly account for and manage appropriated fund resources, the DoD Base Closure Accounts were established on the books of the Treasury to aid the DoD Components in the closure and realignment of certain military installations. Treasury has assigned account symbol [097-0103](#) to identify the DoD Base Closure Account - Part I, [097X0510](#) to identify DoD Base Closure Account 1990 - Part II, Part III, and Part IV, [097X0512](#) to identify DoD Base Closure Account 2005, and [097X0516](#) to identify DoD Base Closure Account (consolidated).

2.1.2.3. Funds made available to the DoD Components are subdivided and distributed to the activities responsible for base closure actions. Separate allocations are made for each of the accounts by program year. Each DoD Component distributes the base closure funds in accordance with its normal fund distribution procedures. The applicable reporting requirements include:

- Military Construction
- Construction
- Planning and Design
- Family Housing
- Construction
- Operations
- Environmental

Operation and Maintenance
Homeowner's Assistance
Civilian Severance Pay
Civilian Permanent Change of Station (PCS) costs
Transportation of things
Facilities Maintenance
Program Management (civilian work years, TDY travel, and related support dedicated to implementation efforts)
Military Personnel (limited to PCS expenses dedicated to implementation efforts)
Other (including procurement type items)

2.1.2.4. The Under Secretary of Defense (Comptroller) makes funds available to the DoD Components based on their official financial plans. Financial plans are prepared by the DoD Components in cooperation with and at the direction of the program manager, the [Assistant Secretary of Defense \(Sustainment\)](#). The DoD Components' financial plans and the subsequent allocation of funds are supported by detailed, line-item military and family housing construction justification. Separate narrative explanations for other planned expenditures are also submitted to the Under Secretary of Defense (Comptroller) in sufficient detail to support the DoD Component's financial plan. Each DoD Component is allocated funds based upon its official budget justification and financial plan.

2.1.2.5. All closures and realignments must be completed no later than the end of the six-year implementation period beginning on the date on which the President transmitted to Congress the report containing the recommendations of such closures or realignments.

2.1.2.6. [Section 2711 of the National Defense Authorization Act \(NDAA\) for FY 2013 established a new appropriation \(097X0516\) as DoD Base Closure Account.](#) Funds in this account shall be available only to incur new obligations for environmental restoration, property management and disposal, and other caretaker costs at closed or realigned installations and for the purpose of recording, adjusting and liquidating obligations properly chargeable to the account under Title 31, United States Code, section 1553. [With the enactment of the FY 2014 NDAA \(Public Law 113-66, dated December 26, 2013\), the previous DoD BRAC accounts \(097X0510 and 097X0512\) remain as no-year accounts, and must be accounted for similarly to an expired appropriation. Unobligated balances from the 0510 and 0512 accounts were transferred to the new BRAC account \(0516\) in January 2014.](#)

2.1.3. Fiscal Accounting Classification

The account classification structure for the Base Closure Account, Defense is prescribed in Volume 12, Chapter 13. Treasury Code [097X0516](#) has been established as a single account on the books of the Treasury to execute actions [for environmental restoration, property management and disposal, and other caretaker costs for all BRAC installations.](#)

3.0 PROGRAM AND BUDGET REVIEW SUBMISSION (0703)

3.1 Purpose (070301)

3.1.1. This Section prescribes instructions for the preparation and submission of budget estimates for the Base Realignment and Closure appropriation.

3.1.2. Data submitted must be consistent with the budget estimate being supported.

3.1.3. Examples of budget exhibits can be found in Section 5.0.

3.2 Submission Requirements (070302)

3.2.1. General Guidance. Each Service will prepare a Base Closure justification book. The justification book will include a summary BC-02 exhibit showing cost and savings data for each prior round (BRAC Parts I, II, III, IV, V) covering the six-year implementation period for that respective closure round. The Services will also prepare a continuing environmental restoration and caretaker cost exhibit (BC-04) for funds requested [in the budget year](#). The justification book will include BC-01, BC-02, BC-03 and BC-04 exhibits [organized alphabetically by state only for those recommendations requesting budget year funding](#). Environmental Exhibits, BRAC ENV-30 will be submitted separately and not included in the bound justification book. These exhibits will be included in the Component's Environmental Summary justification material as mentioned in Chapter 13. For Base Closure Account-Part I, the summary BC-02 will include cost and savings data for FY 1990 through FY 1995. For Base Closure Account-Part II, the summary BC-02 will include cost and savings data for FY 1992 through FY 1997. For Base Closure Account-Part III, the summary BC-02 will include cost and savings data for FY 1994 through FY 1999. [For Base Closure Account-Part IV, the summary BC-02 will include cost and savings data for FY 1996 through FY 2001.](#) [For Base Closure Account-Part V, the summary BC-02 will include cost and savings data for FY 2006 through FY 2011.](#) Section 5.0 contains sample exhibits BC 01 through BC 04 and ENV-30 for use in preparing justification material. Included in the sample exhibits are instructions pertaining to the substance and format of the information to be displayed.

3.2.2. Base Realignment and Closure Service Overview Exhibit (BC-01). Each Service will prepare an overview exhibit (BC-01), as described in section 5.2, for the Base Closure-Account summarizing by fiscal year, the names and locations of the affected bases, and how much [funding in](#) the DoD Base Closure Account will be [requested](#) in that fiscal year. The BC-01 should separately identify the amount of funds expended for environmental restoration and caretaker functions at installation closed under prior rounds of base closure. The overview will also address mission impact and environmental considerations affecting closures and realignments.

3.2.3. Base Realignment and Closure Cost and Saving Exhibit (BC-02). Each Service will prepare a summary BC-02 Exhibit, as described in section 5.2, showing costs and savings data for each round of closure. Continuing environmental restoration and caretaker costs [after the implementation period for all BRAC rounds](#) will be separately displayed on the BC-04 exhibit as described below. BRAC saving estimates reported in Exhibit BC-02 must be based on the best

projection of what savings will actually accrue from approved realignments and closures. Prior year estimated savings must be updated to reflect actual savings when available.

3.2.4. Base Realignment and Closure Package Description Exhibit (BC-03). Each Service will prepare a short narrative exhibit (BC-03), as described in section 5.2, for each [recommendation, for which funding is requested](#), describing the actions necessary to complete the realignment or closure at that location.

3.2.5. Continuing BRAC Environmental Restoration and Caretaker Cost Exhibit (BC-04). Each Service will prepare a [summary](#) continuing environmental and caretaker cost exhibit [for all BRAC funding as well as a recommendation specific exhibit \(for recommendations requiring funding in the budget year\)](#), as described in Section 5.0.

3.2.6. Base Realignment and Closure Environmental Exhibits. Each service will prepare environmental progress and funding by priority exhibits BRAC ENV-30 as provided in section 5.2 below. These BRAC environmental exhibits include requirements by relative risk category and each phase of environmental restoration, as well as requirements for environmental compliance and planning. These exhibits will be prepared for the President's Budget and included in the Component's justification material for Environmental Restoration as provided in Chapter 13. The totals for these exhibits will match the [Environmental](#) totals submitted in the BC-01.

3.2.7. Budget Submission. Coincident with the hard copy submission of the Base Closure budget estimates, Military Departments and Defense Agencies, as applicable, will submit budgetary data via the Automated Construction Program Database as described in Volume 2, Chapter 1, paragraph [010504](#).

4.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION FOR BRAC (0704)

4.1 Purpose (070401)

This Section presents the justification book organization and the exhibit requirements for submission to Congress for [the BRAC account](#). Examples of budget exhibits can be found in Section 5.0, below and reflect those addressed in Section 3.0, above.

4.2 Organization of Justification Books for BRAC (Incorporating Prior Rounds of BRAC, Parts I, II, III, IV, [V](#)) (070402)

4.2.1. Justification material consolidated into a single volume entitled:

[Department of Defense](#) Base Closure Account

4.2.2. The justification book will be organized as shown [below](#).

ORGANIZATION/EXHIBIT REQUIREMENTS FOR PRIOR ROUND BRACS

INSTRUCTIONS FOR PREPARATION OF EXHIBIT BC-01
“FY ____ BASE REALIGNMENT AND CLOSURE DATA”
19__ COMMISSION

Service Overview

Plan: Summarize by fiscal year, the names and locations of the affected bases, and how much of the DoD Base Closure Account will be expended in the fiscal year. Discuss possible problems in meeting the schedule.

Mission Impact: Describe possible mission impact in completing the realignment/closure.

Environmental Considerations: Describe potential problems in closing an installation due to the complexity in cleaning up environmental wastes and hazards.

Address any other items/issues appropriate for the overview section.

(Page 2 of 2)

Exhibit BC-03 BRAC Package Description

BASE REALIGNMENT AND CLOSURE
19__ COMMISSION
PACKAGE DESCRIPTION

Service/Location/Package: Cross-reference to standard terminology employed in the Commission's report.

Closure/Realignment Package: Brief description of the actions necessary to complete the realignment or closure at this location. A package is defined as all actions, costs and savings associated with the closing or realignment of a base or installation as recommended by the Commissions. Include how the physical plant will be affected and the missions that must be terminated or transferred to other locations. Reflect planning and design and management overhead costs in a separate package covering, overall one-time implementation cost. All military construction savings should also be addressed in this same package.

Costs:

Military Construction: New facilities that must be constructed to accommodate a realignment or closure action. List the construction projects associated with the package as follows:

<u>Location/Project Title</u>	<u>Fiscal Year of Award</u>	<u>Amount (\$ in 000)</u>
-------------------------------	---------------------------------	-------------------------------

Subtotal for Each Fiscal Year

Family Housing Construction: Specify the number of units and location. As with military construction, list each family housing construction project.

Family Housing Operations: The one-time family housing operations costs associated with package implementation.

Operation and Maintenance: Includes PCS of civilian personnel, civilian severance costs, transportation of things, RPM and other one-time implementation costs as a result of closure or realignment. Program management costs should also be addressed, but only in the separate package covering overall one-time implementation costs.

Exhibit BC-03 BRAC Package Description (Continued)

Procurement Items: Items normally funded from procurement appropriations.

Revenues From Land Sales: Provide statistics and narrative to adequately describe the land being proposed for sale. Describe the method and date of appraisal.

Environmental: Indicate the environmental restoration actions that will occur at both the losing and gaining locations, the funding requirements and status of all such restoration actions.

Savings: Demonstrated savings that will accrue from the partial or complete closure of the base.

Military Construction: To be addressed in the single package addressing overall/program management costs.

Family Housing Construction: Self-explanatory.

Family Housing Operations: Savings (offset by increased recurring costs).

Operation and Maintenance: One-time and recurring savings (offset by increased recurring costs) in civilian personnel, base operations, and other costs as a result of closure or realignment. Be specific as to the category,

Military Personnel: One-time and recurring savings (offset by increased recurring costs) in military personnel as a result of closure or realignment. Be specific as to the category.

Other: Self-explanatory.

ENV 30 DERA and BRAC Funds for Environmental Cleanup

Class	DoDComponent	FundSource	ActivityCategory	Activity	Resource Type	FY20 XX	FY20 XX	FY20 XX	FY20 XX	FY20 XX	FY20 XX	FY20 19	BalanceTo Complete
-------	--------------	------------	------------------	----------	---------------	---------	---------	---------	---------	---------	---------	---------	--------------------

Instructions

- 1) The new ENV 30 exhibit replaces the former ENV 30 Part 1 DERA and BRAC Funds Budgeted for Environmental Clean-Up Program Management and Support and the former ENV 30 Part 2 DERA and BRAC Funds for Environmental Clean-Up Project Management. The new ENV 30 captures funding for DERP-eligible activities at IRP sites, MRSs, and BD/DR sites, including site-specific requirements and program management; funding for BRAC Planning and Compliance activities; funds generated from the sale of real property; obligations of prior year BRAC funds; and the number sites funded or to be funded with the total obligational authority (TOA) for the activity in the applicable fiscal year.
- 2) Provide by DoD Component (Active, Defense Agency/Defense Wide, and BRAC), the total costs (TOA) and total number of sites funded or to be funded with TOA by Fund Source, Activity Category and Activity for fiscal years 20XX (budget year) through 20XX (end of FYDP) and the balance to completion (i.e., beyond the FYDP).
- 3) Report TOA in \$K (thousands) and the total number of sites in actual numbers. DO NOT report sites in thousands.
- 4) Only the Army will report Formerly Used Defense Sites (FUDS) data.
- 5) For Fund Sources "BRAC Planning" and "BRAC Compliance", provide the number of installations in lieu of the number of sites. For Fund Sources "Environmental Restoration-Management", "BRAC-Management", "BRAC-Land Sale Revenue", and "BRAC-Prior Year Funds", the reporting of the total number of sites is not required.
- 6) BRAC funding sources include both Legacy BRAC (BRAC Rounds I through IV) and BRAC 2005. For the POM/budget estimate and President's Budget submissions, provide separate breakouts of the funding for Legacy BRAC and BRAC 2005 in a Word document accompanying the ENV 30 exhibit (see #11 in the Instructions section for more information about the Word document).
- 7) Include land sale revenue and prior year BRAC funds applied to each applicable activity in the TOA. Report the total amount of land sale revenue and prior year BRAC funds applied to all activities against the "Land Sale Revenue" and "Prior Year Funds" Fund Sources; SNaP will deduct these amounts from the BRAC totals to calculate the BRAC appropriated funding.
- 8) Program adequate resources in each year of the FYDP to achieve program goals.
- 9) Provide to the DUSD(I&E) (in accordance with DUSD(I&E) data call schedules) updated DERP data for each site regarding status, schedule, and CTC, as required by DoDI 4715.07.
- 10) Ensure the Program/budget estimate and President's Budget submissions contain sufficient funding to annually update the inventory of defense sites that are known or suspected to contain UXO, DMM, or MC, as required by section 2710(a) of title 10 U.S.C. and as specified in DoDM 4715.20.
- 11) Provide a narrative in a Word document that includes the following information:
 - a) A list of installations at which the Agency for Toxic Substances and Disease Registry (ATSDR) performed/will perform health assessments or health studies for fiscal years 20XX (budget year) through 20XX (end of FYDP) and the balance to completion. Include the number of health assessments and health studies planned each year.
 - b) The number of installations by state that received/will receive funding for the Defense State Memorandum of Agreement (DSMOA) program for fiscal years 20XX (budget year) through 20XX (FYDP) and the balance to completion. Include the amount of funding planned for each year.

- c) An explanation of any significant fluctuations (i.e., 25% or more) in the funding for current year and budget year as compared to the funding for budget year in the previous year's Program/budget estimate and Presidents Budget submissions.
 - d) An explanation of any significant program increases or decreases (i.e., 25% or more) from current year to budget year.
 - e) An itemized list of "Other" program management requirements and funding amounts by fiscal year.
 - f) A list of sites where the CTC estimate is truncated at 30 years.
 - g) An explanation of program increases and decreases; reprogramming actions; cost recovery; and the use of prior year funds for cleanup work at BRAC installations.
- 12) See Appendix A on the SNaP Web site for reporting requirements for your organization.

Definitions

Class: System Field: Classification

C: CONFIDENTIAL

C/NF: CONFIDENTIAL//NOFORN

F: FOR OFFICIAL USE ONLY

S: SECRET

S/NF: SECRET//NOFORN

U: UNCLASSIFIED

FUDS: Closed List. Used by Army to identify FUDS data.

No:

Yes:

DoDComponent: Closed List. Identifies the Military Department or Defense Agency whose data are presented on the exhibit. For the Military Departments, report by Active (including Guard and Reserve) and BRAC. The Defense Agencies should select "Defense Agency/Defense Wide." The Army will report FUDS.

Active: Used by the Military Departments and includes Active Guard and Reserve Components

BRAC: Used by Military Departments to report BRAC

DADW: Defense Agency/Defense Wide. Used by non-service defense agencies.

FundSource:

BRAC-Compliance: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. See DoDI 4715.6.

BRAC-IRP: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Identifies funding associated with sites that require response actions to address releases of hazardous substances and pollutants or contaminants; POLs (subject to the exception in subparagraph 2.a.(2)(b) of DoDM 4715.20); hazardous wastes or hazardous waste constituents; and explosive compounds released to soil, surface water, sediment, or groundwater as a result of ammunition or explosives production or manufacturing at ammunition plants; as well as response activities to address UXO, DMM, or MC posing an explosive, human health, or environmental hazard that are incidental to an existing IRP site.

BRAC-Land Sale Revenue: Identifies funds recovered from the sale of real property and used to offset cleanup funding requirements.

BRAC-Management: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Identifies administrative and overhead funding associated with the DERP that cannot be attributed to individual sites (e.g., manpower).

BRAC-MMRP: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON

appropriation. Identifies funding associated with sites (referred to as MRSs) that are known or suspected to contain UXO, DMM, or MC. This sub-element does not include funding for operational ranges, operating storage and manufacturing facilities, and munitions resulting from combat.

BRAC-Planning: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. See DoDI 4715.9.

BRAC-Prior Year Funds: Identifies funds obligated/to be obligated from prior year BRAC appropriations.

Environmental Restoration-IRP: Funded by Environmental Restoration appropriations. Identifies funding associated with sites that require response actions to address releases of hazardous substances and pollutants or contaminants; POLs (subject to the exception in subparagraph 2.a.(2)(b) of DoDM 4715.20); hazardous wastes or hazardous waste constituents; and explosive compounds released to soil, surface water, sediment, or groundwater as a result of ammunition or explosives production or manufacturing at ammunition plants; as well as response activities to address UXO, DMM, or MC posing an explosive, human health, or environmental hazard that are incidental to an existing IRP site. Also identifies funding associated with the demolition and removal of unsafe buildings and structures and the removal of unsafe debris in accordance with the DERP general eligibility requirements in subparagraph 2.a.(2)(f) of DoDM 4715.20.

Environmental Restoration-Management: Funded by Environmental Restoration appropriations. Identifies administrative and overhead funding associated with the DERP that cannot be attributed to individual sites (e.g., manpower).

Environmental Restoration-MMRP: Funded by Environmental Restoration appropriations. Identifies funding associated with sites (referred to as MRSs) that are known or suspected to contain UXO, DMM, or MC. This sub-element does not include funding for operational ranges, operating storage and manufacturing facilities, and munitions resulting from combat.

Activity/Category: Closed List. The environmental activity category supporting the fund source.

Compliance:

Investigation:

Land Sale Revenue:

Management:

Planning:

Post RA:

Prior Year Funds:

Remedial Action (RA):

Activity: Closed List. The environmental activity associated to the activity category.

ATSDR: Captures funding requirements for ATSDR.

Building Demolition/Debris Removal: Refers to the demolition and removal of unsafe buildings and structures and the removal of unsafe debris in accordance with the DERP general eligibility requirements in subparagraph 2.a.(2)(f) of DoDM 4715.20.

Compliance: Refers to activities associated with closure-related procedures necessary to achieve compliance with applicable Executive Orders and Federal, State, inter-state, regional, and local statutory and regulatory environmental requirements at BRAC installations.

DSMOA: Captures funding requirements for the DSMOA program.

EPA Funding: Captures requirements for payments to the U.S. Environmental Protection Agency (EPA) for support at Legacy BRAC installations per the memorandum of understanding with EPA.

Interim Remedial Actions: Refers to the interim remedial action (IRA) phase of cleanup. The IRA is a remedial action undertaken prior to the selection of the final remedy as a part of a larger remedy.

Land Sale Revenue: Identifies funds recovered from the sale of real property and used to offset cleanup funding requirements.

Long-Term Management: Refers to the long-term management (LTM) phase of cleanup. LTM involves environmental monitoring, review of site conditions, and maintenance of a remedial action to ensure continued protection as designed once a site achieves RC. LTM includes the operations and maintenance measures required to maintain the effectiveness of response actions. LTM should be used until no further environmental restoration response actions are appropriate or anticipated.

Manpower: Captures funding requirements for all recurring government (civilian and military manpower costs) and contractor costs applicable to the management of the environmental cleanup program but not directly attributable to sites.

Other: Captures all other administrative and overhead funding associated with the DERP that cannot be attributed to individual sites.

Planning: Refers to activities associated with the process of identifying and considering environmental factors that impact on, or are impacted by, planned DoD activities or operations at BRAC installations.

Potentially Responsible Parties: Refers to a site where DoD pursues a potentially responsible party when associated with the Investigation activity category. Refers to activities at a site where DoD may bear potential liability for hazards or hazardous substance releases along with other parties when associated with the RA activity category.

Preliminary Assessment/Site Inspection: Refers to the preliminary assessment (PA) and site inspection (SI) phases of cleanup. The PA is a review of existing information about a release such as information on pathways of exposure, exposure targets, and source and nature of release. The SI builds upon the PA and involves, as appropriate, on- and off-site field investigatory efforts including sampling.

Prior Year Funds: Identifies funds obligated/to be obligated from prior year BRAC appropriations.

Project Closeout: Refers to project closeout (PCO). PCO involves the shutting down/dismantling of remedial actions, seeking regulator concurrence, and closeout reports.

RABs/Community Relations: Captures funding requirements for support to restoration advisory boards and other community relations activities.

Remedial Action Construction: Refers to the remedial action construction (RA-C) phase of cleanup. The RA-C represents the period of time during which a response action is being implemented, but is not yet operating as designed. At the end of this phase of work, a remedy is in place.

Remedial Action Operations: Refers to the remedial action operation (RA-O) phase of cleanup. The RA-O represents the period of time that a selected remedy must operate before achieving remedial action objectives. At the end of this phase of work, the response is complete.

Remedial Design (including Records of Decision/Decision Documents): Refers to the remedial design (RD) phase of cleanup. The RD involves the development of the actual design of the selected remedy.

Remedial Investigation/Feasibility Study: Refers to the remedial investigation (RI) and feasibility study (FS) phases of cleanup. The RI involves collecting data to characterize site conditions, determine the nature of the waste, assess risk to human health and the environment, and conduct treatability testing to evaluate the potential performance and cost of the treatment technologies that are being considered. The FS is the mechanism for the development, screening, and detailed evaluation of alternative remedial actions.

ResourceType: Closed List. The type or resources (TOA or Number of Sites/Installations) associated to the Fund Source.

Sites: Total number of sites funded or to be funded for the activity with the TOA.

TOA: Total funding required to complete the activity.

Business Rules

- 1) For Fund Sources "Environmental Restoration-Management", "BRAC-Management", "BRAC-Land Sale Revenue", and "BRAC-Prior Year Funds", the reporting of the total number of sites is not required.
- 2) Only Army will provide "FUDS" data.
- 3) For DoDComponent "Active" the activity "EPA Funding" is not required when Funding Source Environmental Restoration-Management and Activity Category "Management" are selected.

CHAPTER 8

FACILITIES SUSTAINMENT AND RESTORATION/MODERNIZATION

1.0 GENERAL (0801)

1.1 Purpose (080101)

1.1.1. This chapter provides instructions applicable to budget formulation and congressional justification for Facilities Sustainment and Restoration/Modernization (FSRM).

1.1.2. The following appropriations and accounts are covered:

Section 2.0

- Operation and Maintenance Appropriations
- Research, Development, Test, and Evaluation Appropriations
- Defense Working Capital Funds
- Military Construction
- Other Funds

Section 4.0

- Transfer or Disposal of DoD Real Property
- Lease of DoD Real Property

Section 5.0

- DoD Overseas Military Facility Investment Recovery Account

1.2 Submission Requirements (080102)

Volume 2, Chapter 1 provides general guidance on the formulation and submission of the budget requests to the Office of the Secretary of Defense for the program and budget review submission and the presentation and justification of the budget requests to Congress. Chapter 8 provides specific additional back-up material requirements for the above Facilities Sustainment and Restoration/Modernization accounts.

1.3 Preparation of Material (080103)

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 8 provides additional specific guidance with regard to the back-up material required for Facilities Sustainment, Restoration and Modernization.

1.4 References (080104)

Chapter 3 provides guidance related to Operation and Maintenance costs and O&M exhibits. Chapter 5 provides guidance related to Research, Development, Test, and Evaluation appropriations, Chapter 6 provides guidance related to Military Construction, and Chapter 9 provides guidance related to the Defense Working Capital Fund.

1.5 Definition of Sustainment and Restoration/Modernization (080105)

1.5.1. Sustainment means the maintenance and repair activities necessary to keep an inventory of facilities in good working order. It includes regularly scheduled adjustments and inspections, preventive maintenance tasks, and emergency response and service calls for minor repairs. It also includes major repairs or replacement of facility components (usually accomplished by contract) that are expected to occur periodically throughout the life cycle of facilities. This work includes regular roof replacement, refinishing of wall surfaces, repairing and replacement of heating and cooling systems, replacing tile and carpeting, and similar types of work. It does not include environmental compliance costs, facility leases, or other tasks associated with facilities operations (such as custodial services, grounds services, waste disposal, and the provision of central utilities).

The DoD facilities sustainment model (FSM) is used as the standardized model for forecasting facilities sustainment resource requirements. The FSM uses the following formula to develop the sustainment requirement:

1.5.1.1. ***Annual sustainment requirement = facility quantity x sustainment unit cost x location factor x inflation.***

1.5.1.2. **Facility quantity** – the facility size expressed in the Facility Analysis Category (FAC) unit of measure (such as square feet).

1.5.1.3. **Sustainment unit cost** – the average annual unit cost (in current year dollars) for sustaining the average size facility in the given FAC.

1.5.1.4. **Location factor** – a location adjustment based upon the local costs for labor, equipment, materials, and currency exchange rates (overseas) compared with an overall base-city average.

1.5.1.5. **Inflation** – factor to adjust current year prices to the target future year.

The Department uses a sustainment metric which is the comparison of sustainment funding to the requirement for a given year, expressed as a rate.

1.5.1.6. ***Sustainment rate*** (%) = sustainment funding/FSM requirement:

1.5.2. Restoration means the restoration of real property to such a condition that it may be used for its designated purpose. Restoration includes repair or replacement work to restore facilities damaged by inadequate sustainment, excessive age, natural disaster, fire, accident, or other causes.

1.5.3. Modernization means the alteration or replacement of facilities solely to implement new or higher standards, to accommodate new functions, or to replace building components that typically last more than 50 years (such as the framework or foundation)

1.5.4. Recapitalization means the major renovation or reconstruction activities (including facility replacements) needed to keep existing facilities modern and relevant in an environment of changing standards and missions. Recapitalization extends the service life of facilities or restores lost service life. It includes restoration and modernization of existing facilities, as well as replacement of existing facilities with new.

Plant replacement value (PRV) is used as a common measure of facility and inventory size, as well as the basis for generating facility condition index (FCI) values and estimating recapitalization requirements. The DoD standardized formula for calculating PRV is:

1.5.4.1. ***Plant Replacement Value*** = facility quantity x replacement unit cost x location factor x planning & design (P&D) factor x historical factor x contingency factor x SIOH x inflation

1.5.4.2. **Facility quantity** – the facility size expressed in the FAC unit of measure (such as square feet)

1.5.4.3. **Replacement unit cost** – the average annual unit cost (in current year dollars) for constructing the average size facility to current standards in the given FAC

1.5.4.4. **Location factor** – a location adjustment based upon the local costs for labor, equipment, materials, and currency exchange rates (overseas) compared with an overall base-city average

1.5.4.5. **P&D factor** – an adjustment to account for typical project planning and design costs

1.5.4.6. **Historical factor** – an adjustment for historical architecture and materials (when applicable)

1.5.4.7. **Contingency factor** – an adjustment for typical contingency costs during construction

1.5.4.8. **Supervision, Inspection, and Overhead (SIOH)** – an adjustment for supervision, inspection, and overhead costs associated with construction management

1.5.4.9. **Inflation** – factor to adjust current year prices to the target future year

1.6 Facilities Data Quality Assurance (FDQA) (080106)

1.6.1. The Facilities Data Quality Assurance website was implemented to improve the quality of facilities data used by the Department in its PPBE process, and it displays the data sources of record for all facilities data reporting. This application integrates and displays facilities data submitted by the Components to OSD via Program Resources Collection Process (PRCP), the Standard Data Collection System (SDCS), and Select and Native Programming (SNaP) systems. The data within the FDQAW subsequently produce facilities sustainment metric displays which are displayed in the performance criteria of the OP-5, Detail by Subactivity Group.

1.6.2. Components must ensure O&M exhibits are consistent with the PRCP and SDSCS data submissions. Verification of the accuracy of the data contained within the FDQA application must be completed PRIOR to the final lock of these databases for preparation of the Program/Budget Review and President's Budget materials.

1.6.3. Standard operating procedures for the FDQA can be found at <https://dpd.pae.osd.smil.mil>.

1.7. Data Displays (080107)

Facility Sustainment, Restoration and Modernization exhibits must be consistent. The following list should be used as a reference for validating data:

- OP-5 Detail by Subactivity Group (Facility Sustainment, Restoration and Modernization)
- OP-32 Automated submission
- O-1 O&M funding by Budget Activity/Activity Group/Subactivity Group
- Facilities Data Quality Assurance application

To the extent a Component submits different estimates in any of the preceding displays; the automated OP-32 will serve as the prevailing display for O&M resources. For Defense Agencies, the object sub-class 923 will serve as the prevailing estimate.

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION (0802)

2.1 Purpose (080201)

2.1.1. This Section prescribes instructions for the preparation and submission of budget estimates for Facilities Sustainment, Restoration and Modernization requirements.

2.1.2. Guidance covers all Facilities Sustainment and Restoration/Modernization (FSRM) costs. Facilities Sustainment and Restoration/Modernization include all recurring maintenance and repair projects costs, real property renovation project costs, and planning and design costs associated with projects; providing funding support to maintain, repair, and modernize buildings, structures, roadways, aprons, railway trackage, utility plants, distribution systems, and other real property.

2.1.3. Program funding submitted in Component justification materials must correspond to funding levels identified in the Facilities Sustainment and Restoration/Modernization Program Elements.

2.1.4. When budgeting for facilities sustainment and [restoration/modernization](#), Components will consider the anticipated levels of military personnel monies that fund part of the labor for facilities sustainment and [restoration/modernization](#). As appropriate, components will adjust the levels of either operations and maintenance or military construction funding for either facilities sustainment or facilities [restoration/modernization](#) to recognize the contribution of military personnel funds that help maintain the Department's facilities. When determining the military personnel contribution Components must use the method documented on page 12 of the Facilities Recapitalization Metric Front-End Assessment Report, dated August 2002. Additionally components must, for considering the effect of military personnel funds on operation and maintenance and military construction accounts, use the same personnel allocation information and cost rates they provide for the FYDP.

2.1.5. When budgeting for facilities sustainment, Components will consider the anticipated levels of Host Nation Support monies and Non-Federal Domestic Facilities Contributions that will be available to reduce the need for appropriated facilities sustainment funding. Components must identify in the FYDP the anticipated levels of both Host Nation Support monies and Non-Federal Domestic Facilities Contributions that are expected to fund facilities sustainment. Specifically, these funds must be booked in the appropriate FYDP facilities sustainment program elements using Resource Identification Code 0800.

2.1.6. When budgeting for facilities sustainment and restoration/modernization, Components will consider the anticipated levels of Defense Working Capital Fund (DWCF) monies that fund facilities sustainment and restoration and modernization. Components must identify DWCF facilities sustainment and facilities restoration/modernization funds in the appropriate FYDP facilities sustainment and facilities restoration/modernization program elements. Additionally, as appropriate, Components will adjust the levels of appropriated funding for either facilities sustainment or facilities restoration/modernization to recognize the contributions of DWCF monies that help maintain the Department's facilities.

2.1.7. When budgeting for facilities sustainment and restoration/modernization, Components will consider the anticipated levels of RDT&E monies that fund facilities sustainment and [restoration/modernization](#). Components must identify RDT&E facilities sustainment and facilities restoration/modernization funds in the appropriate FYDP facilities sustainment and facilities [restoration/modernization](#) program elements. Additionally, as appropriate, components will adjust the levels of either operations and maintenance or military construction funding for either facilities sustainment or facilities [restoration/modernization](#) to recognize the contribution of RDT&E funds that help maintain the Department's facilities.

2.2 Submission Requirements (080202)

2.2.1. General Guidance: All Components (i.e., active forces, defense agencies, National Guard and reserve forces) shall submit [the OP-5 Attachment 4: Facilities Sustainment, Restoration and Modernization \(FSRM\), and Demolition](#) justification data to support budget estimates for Facilities Sustainment, Restoration and Modernization, in a separate bound attachment (see Chapter 3, Section [030201](#)). Two copies of this attachment will be delivered to: Military Personnel & Construction Directorate, Program/Budget, OUSD(Comptroller) Room 3C654, Pentagon, on the same date as all other submissions required for O&M Appropriations. The OP-5 subtotal levels for a) sustainment, b) restoration and modernization, and c) demolition must correspond to funding levels identified in the Facilities Data Quality Assurance website.

NOTE: As demolition can be identified separately by program element, it should be broken out as such whenever the other two elements are separated, and it should be noted that it's included when it's part of the total.

2.2.2. Military and civilian personnel costs will include only those personnel assigned in support of FSRM accounts. It will include those personnel performing planning and design functions for both projects and installation FSRM surveys and FSRM master planning, but will exclude those involved in other base operating services or support services.

2.2.3. The format for the OP-5 exhibit is in Volume 2A, Chapter 3, section [0304](#) of this regulation.

2.3 Preparation of Material (080203)

All material will be provided on 8-1/2 inch by 11 inch size paper, and bound on the long side. All narrative data will be typed across the short dimension of the paper, while exhibits will be typed across the long dimension.

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (0803)

3.1 General (080301)

Components are required to conform to the PBD approved funding levels when submitting final budget exhibits to Congress.

3.2 Organization of Justification Books (080302)

See chapters covering specific appropriation (Operation and Maintenance - Chapter 3, RDT&E Chapter 5).

4.0 REVENUE FROM TRANSFER OR DISPOSAL OF DoD REAL PROPERTY AND REVENUE FROM LEASING OUT OF DOD ASSETS (0804)

4.1 General (080401)

Section 572 of 40 U.S.C. and Section 2667 of 10 U.S.C. provide for the receipt of proceeds from the disposal or lease of DoD real property and prescribe the use of these funds.

4.2 Revenue From Transfer or Disposal of DoD Real Property (40 U.S.C. 572) (080402)

When revenue from the transfer or disposal of DoD Real property is received, there is a statutory requirement to identify each transfer and disposal made during the fiscal year, including a detailed explanation of each such transfer and disposal and of the use of the proceeds received. An estimate for the current and budget year transfers or disposals should also be included.

4.3 Revenue From Leasing Out of DoD Assets (10 U.S.C. 2667) (080403)

The identification of each lease entered into during the fiscal year, including a detailed explanation of each lease and amendments, and of the use of the lease proceeds that were expended is no longer required by 10 U.S.C. 2667. However, the Military Departments will still provide the total actual receipts for the prior year, and an estimate of total receipts for the current year and budget year.

4.4 Deposit and Accounting Procedures (080404)

Cash receipts obtained from the transfer or disposal of real property will be deposited into the Disposal of DoD Real Property Account, 97X5188. Cash receipts obtained from leasing out of DoD assets will be deposited into the Lease of DoD Real Property, 97X5189. Accounting instructions are included in Volume 12, Chapter 14.

4.5 Funds Release Procedures (080405)

Funds deposited into the Disposal of DoD Real Property Account, 97X5188, are available only for purposes of maintenance and repair and environmental restoration at U.S. facilities as specified in 40 U.S.C. 572. Funds deposited into the Lease of DoD Real Property Account, 97X5189, are available for: A) maintenance, protection, alteration, repair, improvement or restoration (including environmental restoration) of facilities; B) construction or acquisition of new facilities; C) lease of facilities; and/or D) facilities operation Support. The Components may request release of funding, based on verifiable deposits, by memorandum to the USD Comptroller, Director for Military Personnel & Construction.

4.6 Budget Exhibits for Congressional Submission (080406)

The Military Departments will be complete a PB-34A Exhibit (Revenue from Leasing of DoD Real Property) and a PB-34B Exhibit (Proceeds from Disposal of DoD Real Property). Both the PB-34A and PB-34B will be included in the O&M Justification Book (Volume II) as described in Chapter 3 of Volume 2A of this regulation.

5.0 DOD OVERSEAS MILITARY FACILITY INVESTMENT RECOVERY ACCOUNT (0805)

5.1 General (080501)

Section 2921 of P.L. 101-510, FY 1991 National Defense Authorizations Act, established the Department of Defense Overseas Military Facilities Investment Recovery account. The purpose of the account is to collect payments from host nations for the value of new construction and improvements made by the United States at overseas military installations being returned.

5.2 Deposit and Accounting Procedures (080502)

Cash receipts obtained from return of overseas real property and improvements to host nations will be deposited into the DoD Overseas Military Facility Investment Recovery Account, 97X5193. For accounting instructions see Volume 12, Chapter 13.

5.3 Funds Release Procedures (080503)

Funds deposited into the DoD Overseas Military Facility Investment Recovery Account are available only for purposes of maintenance and repair and environmental restoration at U.S. facilities and maintenance and repair and environmental compliance at military facilities outside the U.S. that are anticipated to be occupied by U.S. Forces for an extended period of time. The Components may request release of funding, based on verifiable deposits, by memorandum to the USD (Comptroller), Director for Military Personnel & Construction.

5.4 Budget Estimate Submission Exhibit (080504)

Components returning overseas military facilities to host nations that have resulted in collections to this account must complete an OP-29 exhibit. This exhibit provides information on the cost and improvements, depreciation, residual value, and amount collected from the host nation that is necessary in accomplishing an annual report to the Congress. It also documents proposed sustainment, restoration and modernization or environmental restoration/compliance projects at military installations to be financed from the proceeds deposited into this account.

5.5 Budget Execution Oversight (080505)

In accordance with paragraph 080401 of Volume 3, Chapter 8, the Military Departments and designated fund holders are required to periodically review DoD Overseas Military Facility Investment Recovery Account (DOMFIRA) commitments and obligations, whether current or

dormant. Appropriate action should be taken to resolve any DOMFIRA unliquidated commitments and obligations, and minimize DOMFIRA unobligated balances resulting from prior year carryover funds.

6.0 FACILITIES SUSTAINMENT and RESTORATION/MODERNIZATION FORMATS (0806)

6.1 Purpose (080601)

The special formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

6.2 Exhibits in Support of Section 0802 - Program and Budget Review Submission (080602)

The format for the FSRM OP-5 exhibit is in Volume 2A, Chapter 3, Section 0304.

6.3 Exhibit in Support of Section 0804 - Revenue From Transfer or Disposal of DoD Real Property and Revenue from Leasing out DoD Assets: Congressional Justification/Presentation (080603)

PB-34A Revenue from Leasing Out of Department of Defense Assets

PB-34B Proceeds from Disposal of Department of Defense Real Property

6.4 Exhibit in Support of Section 0805 - DoD Overseas Military Facility Investment Recovery Account: Program and Budget Review Submission (080604)

SUMMARY OF MAJOR CHANGES

All changes are denoted by [blue font](#).

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [bold, italic, blue, and underlined font](#).

The previous version dated [December 2014](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Changed the term “Budgetary Depreciation” to “Capital Investment Recovery”	Revision
All	Updated hyperlinks and formatting to comply with current administrative instructions	Revision
1.1	Identified other Revolving Funds separate from the DWCF.	Revision
1.2	Added Authoritative Guidance Section in compliance with administrative guidance.	Addition
Policy Memo	Incorporated DWCF cash policy and cancelled “Cash Management Policy for the Defense Working Capital Fund Activities (FPM21-03)” published June 25, 2021.	Cancellation
1.5	Clarified CIP using reimbursable authority. Clarified Fund-9c requirements. Updated Minor Construction Thresholds. Added new DBMSC certification requirement for CIP carryover.	Revision
1.6	Updated that budgeted rates are aggregate composite rates. Incorporated cash policy revision. Clarified CIP for software in dual funded organizations. Clarified unusual and infrequently occurring losses not affecting budgetary resources.	Revision
1.9.7	Updated that Direct Reimbursable Work is work performed outside the rate structure.	Revision
2.4.8	Updated the CIS database input requirements.	Revision
2.6.2	Updated the definitions of the terms “Replenishment Cost,” “Provisioning Item” and “Variability Target.”	Revision
2.7.1	Added the terms and definitions for “Mission Cost” and “Non-mission Cost.”	Addition
Exhibit SM-16a	Added the SM-16a exhibit.	Addition
Exhibit Fund-1	Updated the term “CIS obligations”.	Revision

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
Exhibit Fund 1a	Updated definition that “All entries are obligations” to “All entries are expenses.”	Revision
Exhibit Fund-11a	Updated the display for each approved carryover waiver separately. Updated the Carryover Calculation methodology.	Revision
Exhibit Fund-12	Added the Fund-12 exhibit.	Addition
Exhibit Fund-13b	Added the Fund-13b exhibit.	Addition
Exhibit Fund-14	Clarified that NOR may be retained to ensure availability of budgetary resources.	Revision
Exhibit PB-32	Added the PB-32 exhibit.	Addition

CHAPTER 9

DEFENSE WORKING CAPITAL FUND BUDGET JUSTIFICATION ANALYSIS

1.0 GENERAL

*1.1 Purpose

This chapter describes and documents the policies and procedures for budget formulation and justification of the Department of Defense (DoD) Working Capital Funds (WCFs), the Defense Working Capital Fund (DWCF), Building Maintenance Fund (BMF), and the Defense Counterintelligence and Security Agency (DCSA) WCF. In addition, this chapter provides guidance for the National Defense Stockpile Fund and Pentagon Reservation Maintenance Revolving Fund (PRMRF), where applicable. The DWCF is also referred to as the “Fund” in this chapter.

*1.2 Authoritative Guidance

The National Security Act of 1947, as amended Title 10 United States Code, section 2208 ([10 U.S.C. § 2208](#)), and other provisions of [10 U.S.C. § 131](#) provide the Department’s revolving fund authority. The BMF, and DCSA WCF were also established under 10 U.S.C. § 2208 as separate and distinct revolving funds and therefore are not part of the DWCF. The PRMRF was established by the 1991 National Defense Authorization Act (NDAA) and codified in [10 U.S.C. § 2674](#).

1.3 Background

1.3.1. The DWCF was established to satisfy recurring DoD requirements using a buyer-and-seller approach. The customers of the DWCF are the generators of requirements. Federal customers which operate using appropriated funds justify their budget requests to the Congress. The requiring activities (i.e. customers) place orders with DoD WCF organizations that have expertise in the service or product required, and operate under business management principles. Unlike profit-oriented commercial businesses, the WCF goal is to break even over the long term. The WCF establishes selling prices in the budget that are normally stabilized or fixed during execution to mitigate the impact of unforeseen fluctuations that would impact on customers’ ability to execute the programs approved by the Congress. Exceptions to stabilized prices are listed in section 1.8 of this document.

1.3.2. The intent of the WCF is to operate as a self-supporting entity to fund business-like activities. The basic principle of the WCF structure is to create a customer-provider relationship between military operating units and other federal and non-federal customers and support organizations. This relationship is designed to make managers of support organizations funded through WCF and decision-makers at all levels more cost conscious.

1.3.3. Prior to the establishment of an activity as a WCF, the Secretary or Assistant Secretary of the Military Department or the Director for a Defense Agency, as applicable, must

prepare, sign, and submit a charter that sets forth the scope of the activity to the Under Secretary of Defense (Comptroller) (USD(C)) for approval. Four criteria are used in evaluating potential activities for inclusion into the Fund. The four criteria are: 1) identification of outputs that relate to products or services provided by the business to customers; 2) establishment of a cost accounting system to collect costs of producing outputs; 3) identification of customers so that resources can be aligned with the requirements; and 4) evaluation of buyer-seller advantages and disadvantages to include assessment of the customers' ability to influence cost by changing demand.

1.3.4. The DWCF evolved from two distinct types of activities. The first type, the Stock Funds that procured materiel from commercial sources and held an inventory, are now known as Supply activities. These activities sell the materiel to authorized customers who need the materiel to achieve weapon systems readiness or provide required personnel support items. The second type, known then and now as Industrial Funds, provide industrial and commercial goods and services such as depot maintenance, transportation, and research and development. Although both types of revolving funds are financed primarily by reimbursements from customers' appropriated accounts, Supply activities use contract authority (CA) and Industrial Funds use reimbursable authority.

1.3.5. The DoD expanded the use of business-like financial management practices through the establishment of the Defense Business Operations Fund (DBOF) on October 1, 1991. Building on Stock and Industrial Fund principles, cost and performance are linked and the Fund's managers are expected to operate within cost goals established in operating and capital budgets.

1.3.6. The DBOF combined existing operations that were previously managed as individual funds into a single Treasury account. On December 11, 1996, the USD(C) reorganized the DBOF, retaining the numerous benefits and improvements resulting from the implementation of DBOF while clearly establishing each DoD Component's responsibility for managing the functional and financial aspects of their respective WCF activities, by creating four DoD Component WCFs: Army, Navy, Air Force, and Defense-Wide. On December 16, 1997, a separate DoD Component WCF was established to consolidate the separate Military Departments' commissaries into the Defense Commissary Agency effective in FY 1999.

1.3.7. Prior to FY 1992, industrially-funded activities did not receive Annual Operating Budget (AOB) funding documents. All funding authority was provided through customer orders. With the implementation of the DBOF, the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) began to issue AOBs that provide official and administrative management cost goals and contract authority for the Capital Investment Program (CIP) for each WCF activity within a DoD Component. The Department has retained this process for the WCFs.

*1.4 Cash Management Policy

1.4.1. The Components will maintain a positive, daily cash balance at levels exceeding the minimum necessary to meet operating, capital investment, and other justified requirements throughout the year and to support continuing requirements into the subsequent year. Cash generated from operations is the primary means of maintaining adequate cash levels. The ability to maintain sufficient, appropriate cash levels is dependent on setting rates to recover full costs to

include prior year losses, projecting workload accurately, and meeting established operational goals.

1.4.2. Cash management and accountability are integral parts of operational and cost management. Each DoD Component is responsible for managing its cash at the activity group level and in compliance with applicable laws and guidelines. Components must manage cash at each subordinate DWCF sub-account, organization, and activity, since most cash transactions occur and cash is most effectively controlled at these levels. Components must submit budget exhibits (Fund-13, and Fund-13b) for each activity group that displays plans to maintain cash balances within the lower and upper operating range. The ending cash balance must be above the lower operating range at the end of each budget year. Decentralizing cash management to the activity group level provides the DoD Components with additional control, because each level of management becomes an accountable participant in the execution of the cash plan or policy.

1.4.3. In addition to proper rate setting, cash managers at all levels should employ the management mitigation strategies available to control cash flows and cash balances to the full extent possible. These cash management tools include, but are not limited to:

1.4.3.1. Negotiating the timing of customer order receipt, completion and the related collections;

1.4.3.2. Controlling the timing of delivered goods/services from the supplier/service provider and the related disbursements;

1.4.3.3. Requesting policy waivers when necessary from the OUSD(C) Program/Budget (P/B) Director or Deputy Director for Revolving Funds, for example: an approval for an out-of-cycle rate adjustment, or non-recoverable costs to maintain/reduce cash.

1.4.4. The DoD Components and cash managers at all levels should consider the following when determining appropriate levels of cash to budget and maintain.

1.4.4.1. Effective cash management is dependent on the availability of accurate and timely data on cash activity, demand planning, rate setting, and operational results.

1.4.4.2. Activities must budget to achieve an operating cash level that will maintain a positive cash balance throughout the year within the upper and lower operating range, and an adequate ending balance to support continuing operations into the subsequent year. In determining required cash levels, activities will document average disbursements and the expected range of cash balances, adjusted to accommodate seasonality, known changes in the business environment, and the inherent risk associated with estimation error and unplanned events outside management's control.

1.4.4.3. Each DoD Component and subordinate activity, command, or business line must establish a cash requirement based on business events, trends, activities, and risks relevant to its operations. The cash requirement will be developed based on four primary elements: 1) the rate of disbursements, 2) the range of operations, 3) risk mitigation, and 4) reserves. The

amount of cash needed for each of the four cash requirement elements will be determined by the DoD Component and presented by activity in the exhibit, Fund-13b, Cash Requirements, which will be reviewed and approved by Revolving Funds Directorate during the Program and Budget Review (PBR). The four cash requirement elements are explained further in the instructions to the Fund 13b and also in the following four paragraphs.

1.4.4.4. Rate of Disbursement. The rate of disbursement is the average amount disbursed between collection cycles. It is calculated by dividing the total amount of disbursements planned for the year by the number of collection cycles planned for the year. The rate describes the average amount of cash needed to cover disbursements from one collection cycle to the next. Changing the number of collection cycles can influence the amount of cash needed to cover the volatility created by cyclical collections. Both the average disbursements and the number of collection cycles will be based on authoritative, auditable data.

1.4.4.5. Range of Operations. The range of operations is the difference between the highest and lowest cash level required based on budget assumptions and past experience. Cash balances are not static and volatility can be expected due to annual, quarterly, and more frequent seasonal trends and significant one-time events. Historical trends should be normalized for such factors as Annual Operating Result (AOR) return/recovery, capital investments, the amount of work, and changes in operations, and used to estimate future fluctuations in cash flows and balances. Studying the causes of cash volatility enables the development of strategies for reducing the range of operation and the amount of cash required for normal operations.

1.4.4.6. Risk Mitigation. Some amount of cash is required, beyond the range of operation, to mitigate the inherent risk of unplanned and uncontrollable events. Examples of these risks are budget estimation error, commodity price fluctuation, and other contingency or response missions. The amount of cash held for risk mitigation will depend on the activity's sensitivity to anticipated types of risk, the effectiveness of other cash management and risk mitigation tools, and management's level of risk tolerance.

1.4.4.7. Reserves. Cash reserves are funds held for known future requirements. This element identifies cash on hand that must be kept for specific requirements that are not expected to disburse until subsequent fiscal years. Examples of reserve requirements include return of AOR, advances/pre-payments received, liquidation of unexpended appropriations, liquidation of unpaid obligations, and planned capital investments. Since reserves are only for specific known requirements, they may not be needed every year.

1.4.4.8. The following figure depicts how the four elements (rate, range, risk mitigation, and reserves) come together to build the complete cash requirement.

1.4.4.9. Components will develop **monthly phased** cash plans, incorporating collections, disbursements, appropriations, and other cash transactions based on Component estimates, to facilitate the cash management process. **The plans** will be initially developed during the budget process and will be an integral part of the budget document (Fund-13).

1.4.4.10. Components will monitor and **control to the extent possible** execution of collections and disbursements **to ensure a sufficient cash balance is maintained throughout the year**. Components will also monitor execution against monthly phased plans to increase management attention on reducing costs, emphasizing timely billing, collecting revenue, and disbursing. Components should consider leveraging the aforementioned available cash management tools when cash execution is trending below/above plan for more than three consecutive months of execution.

1.4.4.11. Components must be able to reconcile and explain variances between cash balances and AOR. In addition to explaining variances based on operations, components must also explain events that affect cash **but not revenues and expenses**.

1.4.5. Transfers of cash between DWCF activities, whether directed internally by the Components or as the result of audit, Departmental guidance, or Congressional direction, will be included in all the affected activities' budgets (Fund-13). Transfers between DoD Component WCFs (e.g., Army to Air Force) or between the DWCF and appropriation-funded activities require Congressional approval.

1.4.6. Advance Billings.

1.4.6.1. The term "advance billing" means a billing to a customer by the fund, or a requirement for a customer to reimburse or otherwise credit the fund, for the cost of goods or services provided (or for other expenses incurred) on behalf of the customer. The term "customer" means a requisitioning component or agency.

1.4.6.2. Except as provided in paragraph f, the total amount of advance billings executed by the Department for a fiscal year may not exceed the amount specified in 10 U.S.C. § 2208 (l) or as amended by public law.

1.4.6.3. Components may use advance billings of customers as a cash mitigation strategy. The OUSD(C) or the Military Department, as applicable, must submit written notification to Congress within 30 days after the end of the month in which the advance billing is made. The notification must include the reasons for the advance billing, an analysis of the effects of the advance billing on military readiness, and an analysis of the effects of the advance billing on the customer. Military Departments must provide the Revolving Fund Directorate copies of all advance billing notification letters provided to Congress. Defense agencies will submit their requests to the Revolving Fund Directorate, who will notify Congress on their behalf.

1.4.6.4. Advance billing requires authorization within the activity's Annual Operating Budget (AOB). Components will request this authority and, if approved, the Advanced Billing Authority will be added to their AOB.

1.4.6.5. Advance payments received from non-federal entities are not subject to 10 U.S.C. § 2208, advance billing limitations, and are required by Volume 11B, Chapter 11. The billing of customers by Supply Management Activities upon shipment rather than delivery also is not subject to paragraph (l) advance billing limitations.

1.4.6.5.1. 10 U.S.C. § 2208, paragraph (l)(4) provides that advance billing for background investigations and related services performed by the Defense Counterintelligence and Security Agency is not subject to section 2208's congressional notification requirements and dollar limitations.

*1.5 Capital Investment Program (CIP) Policy

These policy statements address preparation of the PBR submission.

1.5.1. The legal requirements related to the CIP are found in 10 U.S.C. § 2208, paragraphs (k), (m), and (o). The legal requirements for unspecified minor military construction projects are found in 10 U.S.C. § 2805.

1.5.2. The CIP may be used by WCF activities to purchase capital assets meeting the criteria in 10 U.S.C. § 2208, paragraph (k).

1.5.3. With the exception of major **military** construction and items listed in paragraphs 1.5.6 and 1.5.9 below, acquisition of all capital assets for use by activities within the Fund will be financed through the Fund using contract authority. Components **may** not use the CIP to establish a new or expand an existing organic capability except as specifically justified in the President's Budget Request (Exhibit Fund-9b, "Capital Investment Justification").

1.5.4. Revolving Fund activities outside the DWCF that are not authorized contract authority (e.g. the PRMRF) must build the full cost of capital investments into their rate structure to ensure funds are available prior to obligation.

1.5.5. The CIP consists of the following four major categories of assets: 1) Automated Data Processing Equipment (ADPE); 2) Non-ADPE Equipment; 3) Software Development, whether internally or externally developed; and 4) Minor Construction.

1.5.6. The WCF Capital Budget specifically excludes the following items, which must be financed by appropriated funds.

1.5.6.1. Major Range and Test Facility (MRTF) installations (equipment and minor construction) that meet the DoD Investment capitalization criteria in accordance with 10 U.S.C. § 2208, paragraph (k).

1.5.6.2. Military and tenant support functions

1.5.6.3. Major weapons systems (such as aircraft, ships, tanks, barges, etc.), and general-purpose passenger type vehicles

1.5.6.4. Equipment and minor construction projects for mobilization requirements, but not used during peacetime operations

1.5.6.5. Equipment initially procured and usually furnished as part of a weapons system and/or support system including modifications (includes initial common support equipment for depot maintenance support of new weapons systems)

1.5.6.6. Materiel normally funded by appropriated funds and provided to contractors as Government-Furnished Materiel (GFM). The GFM is incorporated into, used in conjunction with, or consumed in the production of an end product. The customer **must** use appropriated funds to purchase the GFM and provide it at no cost to the WCF

1.5.6.7. Minor construction projects for non-WCF activity or military support functions

1.5.6.8. Construction and facility investment projects that exceed the amount specified in 10 U.S.C. § 2805 for funding under Operation and Maintenance appropriations

1.5.6.9. Environmental projects financed or submitted for funding by the applicable Environmental Restoration Transfer appropriation

1.5.6.10. Capital Investments for morale, welfare, and recreation activities

1.5.6.11. Such other exclusions as may be approved by the USD(C).

1.5.7. The AOB permits a WCF activity to obligate contract authority to purchase capital assets prior to receiving funded customer orders and collecting cash from customers. Those

obligations must be funded by offsetting collections since cash does not come with contract authority.

1.5.8. As an administrative control of resources subject to the rules of [31 U.S.C. § 1517](#), the Anti-Deficiency Act, the AOBs provide a specific amount of CIP contract authority. Therefore, obligations may not exceed the amount provided [on the AOB](#).

1.5.9. The [WCF](#) customers may procure capital assets through direct appropriations for use by a [WCF](#) activity. However, these assets remain the property of the customer and will not be recorded as Property, Plant and Equipment assets on revolving fund financial statements unless the asset is transferred to [WCF](#) ownership.

1.5.9.1. At the time of transfer, the [WCF](#) activity will record the asset at its net book value and depreciate it [for accounting purposes](#) over the remaining useful life. Depreciation does not have to be incorporated into the [WCF](#) rate structure if the [WCF](#) did not [outlay any cash resources](#). [If the asset is expected to be replaced](#) at the end of its useful life, [then a capital surcharge may be collected prior to the acquisition of the replacement asset](#).

1.5.9.2. The appropriate procurement account will continue to fund the purchase and installation costs for the initial procurement of depot maintenance capital equipment unique to newly introduced platforms or weapon systems (this includes modifications). The capital equipment becomes the property of the depot when it is transferred to or otherwise capitalized by the depot. The depot will treat the equipment as a capital asset and depreciate it for accounting purposes. Funding of subsequent replacement and maintenance of the equipment in the DWCF should be included in the DWCF capital and operating budgets.

1.5.10. [WCF activities must recover costs to purchase capital assets by including a Capital Investment Recovery \(CIR\) factor in rates billed to customers](#). The CIR factor is the amount added to the rate to substitute and then liquidate contract authority obligated to purchase capital assets. To do this, the Component will allocate a portion of the collections from revenue on customer orders to liquidate the contract authority. This process allocates cash (i.e. FBwT) from the operating program to the capital program. The amount of collections used to liquidate contract authority will equal the amount of obligated contract authority at the end of each FY, net of any decreases to contract authority or contract authority withdrawn. If there are insufficient budgetary resources to liquidate the full amount of contract authority obligated, then at a minimum, the Activities must liquidate enough to cover outlays associated with CIP. This will ensure there is sufficient cash in the capital program to fund outlays associated with the obligated contract authority. The CIR factor will differ from the depreciation expense. Collections associated with the CIR fund capital outlays while depreciation expense is an allocation of costs over an asset's useful life.

1.5.10.1. In addition to [the CIR](#), a capital surcharge may be used to collect cash for the capital outlay if minimum balances are not sufficient to provide adequate budgetary resources to offset budgetary claims (See Volume 3, Chapter 19).

1.5.11. Guidance on accounting for capital assets is contained in Volume 4, Chapter 24, Chapter 25, Chapter 26, and Chapter 27.

1.5.12. The following budget exhibits are required to document an activity's capital budget request.

1.5.12.1. Exhibit Fund-9a, "Capital Investment Summary," represents the summary data of the four asset categories (ADPE, Non-ADPE, Software, and Minor Construction) at the approved DoD Component [aggregate project line item](#) level. The exhibit displays data on annual capital [obligations](#), cash outlays, and budgeted [CIR](#). The prior-year column on the Exhibit Fund-9a will show all amounts approved in the most recent President's Budget, adjusted for actual project year obligations, [additional authorizations and all](#) reprogramming (as depicted on the Exhibit Fund-9c, "Capital Budget Execution").

1.5.12.2. Exhibit Fund-9b, "Capital Investment Justification," provides detailed cost data and narrative justification for each approved DoD Component [aggregate project line item level](#). Components will provide a corresponding Exhibit Fund-9b for each [aggregate project line item](#) on the Fund-9a exhibit. The exhibit displays the Benefit to Investment Ratio, Savings to Investment Ratio and/or the Payback period. Exhibits Fund-9a and Fund-9b data should agree with, and also should be used for cross-referencing, Exhibit 53 of the Information Technology budget.

1.5.12.3. Exhibit Fund-9c, "Capital Budget Execution" compares and explains the differences between the most recent President's Budget and the current submission by the DWCF activity for the four asset categories (ADPE, Non-ADPE, Software, and Minor Construction). [This includes prior year \(PY\) execution adjustments and adjustments to the current year \(CY\) due to unexecuted programs or new emerging requirements. Adjustments to project years not displayed in the budget submission are not recorded on the Fund-9c.](#)

1.5.13. Each proposed CIP project [must](#) be reviewed to ensure that it satisfies the following criteria for justification and backup:

1.5.13.1. The acquisition of a capital asset meets the Department's long-range planning and programming objectives and satisfies a documented need for capability to perform valid operations, functions, or services that cannot be performed as effectively or economically by the use of existing equipment and facilities or by contract.

1.5.13.2. The acquisition of a capital asset complies with policies and regulations governing the acquisition and management of facilities, special tooling, and special test equipment as established by [DoD Directive 4275.5](#), "Acquisition and Management of Industrial Resources," as well as other applicable policies and regulations governing the lease and acquisition of equipment and facilities.

1.5.13.3. The workload projections used to justify capital purchases take into account the results of inter-service decisions, workload posture planning decisions, readily

available commercial alternatives, and other reasonable options available for accomplishing applicable work load.

1.5.13.4. The acquisition of a capital asset efficiently and effectively accomplishes the objective for which it is justified. The criteria are: improved efficiency (savings) or effectiveness of operations; replacement of unsafe (locally determined *by an authorized safety representative*), beyond economical repair, or inoperative and unusable assets; and environmental, hazardous waste reduction, or regulatory agency (state, local, or Federal) mandated requirements.

1.5.14. A formal pre investment analysis or a cost comparison is required to justify investment projects for capital budget submissions in the four investment categories (ADPE, Non-ADPE, Software, and Minor Construction).

1.5.14.1. Either an economic analysis or cost comparison **will** be used to support a project substitution or accomplish a reprogramming request. An economic analysis will be used for all projects with a cost of \$5,000,000 or more. A cost analysis will be used for projects under \$5,000,000.

1.5.14.2. Activities must complete this pre-investment analysis prior to including the capital asset in the capital budget submission, a reprogramming action, or a project substitution. The originating office of the DoD Component **will** maintain these analyses as project documentation support for the capital budget submission and program execution.

1.5.14.3. A cost comparison for investment projects under \$5,000,000 will be prepared in constant base year dollars and present a differential cost display by year for up to a 6-year evaluation period, beginning with the budget year for which investment funds are requested.

1.5.14.3.1. Documentation for a cost comparison **should** describe the functional process performed; define the need/requirement/objective; identify workload projections; address feasible alternatives; present total costs attributed to each alternative and the differential costs/monetary benefits expected in constant and current dollars over the 6-year evaluation period; and provide significant assumptions, constraints, estimating methods, rationale, data sources.

1.5.14.3.2. The payback period **should** be the primary economic indicator used for cost comparisons to rank order within the investment categories of each activity.

1.5.14.4. A pre-investment economic analysis **should** be prepared to justify capital investment projects of \$5,000,000 or more. The economic analysis **should** be prepared on a net present value (NPV) basis and must comply with applicable DoD or Component guidance and functional program guidance. The economic analysis initially **should** be prepared in constant base year dollars and **should** present a differential cost display by year over the project's expected economic life, beginning with the budget year of the investment fund request.

1.5.14.4.1. Documentation **should** describe the functional process performed; define the need/requirement/objective; present and explain workload projections;

identify feasible alternatives; present total costs and the differential costs/monetary benefits in constant, discounted, and current dollars over the expected economic life of the project; present estimating methods/relationships, and data sources; identify significant constraints, assumptions, and variables; treat sensitivity and uncertainty of key parameters; and address all other quantifiable benefits as well as any intangible benefits influencing the recommended course of action.

1.5.14.4.2. Quantifiable benefits are all outputs/results achieved in return for investment dollars associated with an alternative.

1.5.14.4.3. Benefit-to-Investment Ratio (BIR) [should](#) be the primary indicator used to rank order projects of \$5,000,000 or more within the investment categories of each activity. Also consider the payback period in the ranking process.

1.5.14.4.4. Automated economic analysis programs and reports may be used if the programs provide comparable information to that of standard economic analysis reports.

1.5.14.5. Compute the payback period to compare the period of time, in years, necessary for an alternative to repay its investment cost based on the monetary benefits expected. Present this metric in tenths of years (for example, 7.2 years.)

1.5.14.6. Use the BIR to compare project alternatives in terms of all expected monetary benefits, inclusive of whole and partial manpower productivity savings resulting from increased efficiency and other cost avoidance achieved over the total project life under evaluation. Calculate the BIR using discounted constant dollars, as an index value and rounded to two decimal places. A BIR of greater than one indicates the project is cost-beneficial; the larger the ratio, the greater the advantage of the project.

1.5.14.7. Calculate the Savings-to-Investment Ratio (SIR) between actual savings in terms of funds no longer required and the investment cost for Automated Information Systems, using discounted dollars.

[1.5.14.8. A post-investment analysis should also be done after project completion to assess the actual costs and benefits and inform future investments.](#)

1.5.14.9. Exemptions to the investment analysis include environmental, hazardous waste reduction, or regulatory agency (state, local, or Federal) mandated requirements. This includes action directed by a higher DoD or Component authority that precludes a choice among alternatives, and DoD instruction or other directive that waives the requirement (e.g., equipment age or condition replacement criteria).

[1.5.15. Internal Use Software as defined in DoDI 5000.76 is: Acquired or developed to meet the entity's internal or operational needs \(intended purpose\); A standalone application, or the combined software components of an IT system that can consist of multiple applications, modules, or other software components integrated and used to fulfill the entity's internal or operational needs \(software type\); Used to operate an entity's programs \(e.g. financial and administrative software, including that used for project management\); Used to produce the entity's goods and to](#)

provide services (e.g., maintenance work order management, loan servicing); or Developed or obtained for internal use and subsequently provided to other federal entities with or without reimbursement. This excludes software that is integrated into and necessary to operate general property, plant, and equipment.

1.5.15.1. Software that is integrated into hardware and is necessary to operate the hardware, rather than to perform an application, should be budgeted with and capitalized as part of the hardware. Systems application software, however, should be budgeted separately as either an expense or a capital investment, depending on whether it meets the criteria for a capital asset.

1.5.15.2. [Budget for new acquisitions of and improvements](#) to software by project. The full scope of a software development project may consist of costs incurred in: 1) Preliminary Design, 2) Software Development, and 3) Post Implementation. While all of these costs are part of the project, only the software development phase is capitalized. [Refer to Volume 4, Chapter 27 for more information on the accounting requirements.](#)

1.5.15.2.1. The preliminary design phase consists of conceptual formulation of alternatives, evaluation and testing of alternatives, determining the existence of needed technology, and final selection of an alternative. This phase consists of all functional actions, including source selection for COTS and all actions prior to Systems Requirements Specification for internally developed software. Expense the [preliminary design phase](#) costs as part of the operating budget and identify them on the Exhibit Fund-1a, "Details of Price and Program Changes - Costs

1.5.15.2.2. [Capitalize](#) the software development phase [consisting](#) of the design of a chosen alternative including software configuration and interfaces, coding, installation of software and related hardware, and testing, which may include parallel processing development of user manuals and training.

1.5.15.2.3. Expense the post implementation/operational phase costs of data conversion and application maintenance, including functional training and documentation, operational testing, and evaluations conducted after technical acceptance of the software.

1.5.15.3. Exclude from the capital budget all costs incurred prior to Milestone 0, Concept Exploration and Definition. Expense costs such as basic research, study, exploratory development establishing feasibility and practicality of proposed solutions and rough order of magnitude estimates. Also expense costs for technical software support and maintenance software support occurring after system installation.

1.5.15.4. [Only include](#) those software development or acquisition efforts for the benefit of the activity in the DWCF capital budget submissions. Software developed or acquired for a specific customer order should be charged to and reimbursed by the requesting customer. Types of cost to be included in a software development project include total labor and non-labor costs such as: 1) all direct costs for civilian and military personnel; 2) contractor labor; 3) [supplies](#); 4) [travel](#); 5) [processing support for testing](#); 6) [indirect production costs](#); and 7) [general and](#)

administrative (overhead) costs (e.g., base operations support, higher headquarters, and costs for central design activity-owned assets).

1.5.15.5. Software projects may be accomplished in modules. A module is an application that may be operated or used independent of other modules within a system. Where an entire system consists of more than one severable module, request funding for each severable module in the year that the module is started. Funding requests **must** be sufficient to complete the module. If several modules make up a complete ADP system, show the cost of all modules related to the system.

1.5.15.6. Separately identify ADP equipment and ADP software in the capital budget.

1.5.15.7. In accordance with [10 U.S.C. § 2222](#), paragraph (c) and [DoDI 5000.75](#), current services (CS), development and modernization (DevMod) to a business system with budget authority and/or spending of **\$250 million or more** over the Future Years Defense Program (FYDP) for Priority Defense Business Systems or \$25 million or more for Fourth Estate Defense Business Systems over the FYDP must be approved by the Defense Business Council (DBC), tri-chaired by the Director, Administration and Management (DA&M), OUSD (C), and DoD CIO for certification **prior** to obligating funds.

1.5.16. Unspecified minor military construction projects costing more than **the threshold established in 10 U.S.C. § 2805** **must** be funded within the DoD Component's Military Construction appropriation. Exceptions to this limitation are noted below in 1.5.16.1.

1.5.16.1. Authority provided by 10 U.S.C. § 2805, **paragraph (c)** to use funds available for operation and maintenance for unspecified minor construction projects costing not more than **the threshold established therein** is available for DWCF-funded unspecified minor construction. However, projects that have an estimated cost that exceed the thresholds established in 10 U.S.C. § 2208 that have not been documented in a corresponding budget exhibit (Exhibit Fund-9b, "Activity Capital Investment Summary") must be approved through the **Congressional notification process or in a subsequent budget** and displayed as an adjustment on the Exhibit Fund-9c, "Capital Budget Execution." **The approval will be reflected in the Component's Annual Operating Budget.**

1.5.16.2. In 10 U.S.C. § 2805, paragraph (d), Congress authorized a DoD Laboratory Revitalization Program that increases to the upper ceiling threshold for certain minor construction projects at DoD laboratories. The authority is not permanent, but is subject to periodic congressional extension. Laboratory Revitalization Program projects must be for the revitalization and recapitalization of Defense laboratories owned by the U.S. and under the jurisdiction of the Secretary of Defense or a Military Department. **In accordance with 10 U.S.C. § 2805, paragraph (d)(3) any projects using the Laboratory Revitalization Program requires the concerned Secretary to provide the appropriate Congressional committees a 14 day notification prior to obligation of funds.** Fund activities designated to participate in the DoD Laboratory Revitalization Program must obtain prior approval **from the Director or Deputy Director for Revolving Funds for all**

projects estimated to exceed the thresholds established in 10 U.S.C. § 2208 so that those projects can be specifically identified in the capital program within the AOB prior to project execution.

1.5.16.3. Capital investment costs financed in the minor construction portion of the capital budget include project planning and design costs associated with minor construction projects. Planning and design costs are not included as part of the statutory threshold for minor construction projects.

1.5.17. DoD Components may reprogram capital funds between DWCF activities, or categories or projects within a DWCF activity. There is no minimum or maximum limit on this type of reprogramming. Except as noted below, capital reprogramming does not require the written approval of the Director or Deputy Director for Revolving Funds in the form of a signed AOB. The following approval levels and dollar threshold apply to changes to projects approved in the capital budget including reprogramming, substitutions, cancellations, and additions:

1.5.17.1. Obtain certification from the approval authority as directed in the guidance displayed in DoDI 5000.75. All transfers between information technology capital projects (ADP Equipment and Software) must be documented in the Activity's next AOB, but will not require a new AOB solely for such documentation.

1.5.17.2. Fund managers may approve transfers between the Non-ADP Equipment and Minor Construction categories or among their individual projects. Components are required to document the transfers in the activity's next AOB, but will not require a new AOB solely for such documentation. CIP transfers between DWCF activities within a DoD Component (e.g., supply to non-supply) must be approved by the Director or Deputy Director for Revolving Funds, in the form of a signed AOB, before the transfer is executed.

1.5.17.3. Components must charge capital obligation adjustments to the program year cited in the President's Budget for the original project. The prior year capital investment program limitation is equal to actual obligations on September 30 of that fiscal year plus adjustments approved by the Director or Deputy Director for Revolving Funds to the prior year program. Fund managers may request approval to carry over authority for any unobligated capital projects before the end of the fiscal year.

1.5.17.4. Capital obligation authority may be adjusted for prior year within-scope increases provided that there is contract authority available to finance the increase. Before making such increases, the Component must have equal off reductions (deobligations) of current year capital authority to finance the prior year increase. Prior approval from the Director or Deputy Director for Revolving Funds is only required if cumulative adjustments exceed 20 percent of the total CIP budget of the current fiscal year. All adjustments should be documented in the activity's next AOB, but will not require a new AOB solely for such documentation.

1.5.17.5. For current fiscal year capital projects that will not obligate by September 30, components must request in writing permission to carry over these projects via a memo to the Director or Deputy Director for Revolving Funds. If the Director or Deputy Director for Revolving Funds approves the request in a signed memorandum, the approved carry over

amounts for projects not obligated by the end of the fiscal year will be carried forward to the next fiscal year's AOB.

1.6 Mobilization/Surge Costs and War Reserve Materiel

1.6.1. Mobilization capability costs include the costs to maintain a surge capacity; procure and maintain approved war reserve materiel levels; and/or maintain other assets, functions, or capabilities required to meet an operational contingency as documented in Defense planning guidance or operational plans.

1.6.2. The DWCF activities should identify all costs related to maintaining a capacity to meet mobilization requirements. These costs are not considered normal operating costs and may be reimbursed by direct appropriations so that customer rates are not burdened by contingency requirements.

1.6.2.1. War Reserve Materiel. Obligations for the procurement of war reserve materiel **must** be funded by a direct appropriation to the Fund **with one exception; if Congress is notified, and a cost recovery rate is included in the rates, contract authority may be used**. Such appropriated amounts for secondary items **must** be reflected as a separate goal within the applicable Supply Management or Commissary Resale activity AOB. Use the SM-6 "War Reserve Materiel" exhibit to justify War Reserve Materiel Requirements.

1.6.2.2. Unutilized and Underutilized Plant Capacity.

1.6.2.2.1. Unutilized/**Underutilized** Plant Capacity (UPC) represents costs associated with maintaining facilities to meet surge capacity needed for mobilization or war. The UPC is a mobilization requirement budgeted in and funded by Operation and Maintenance appropriated funds of the DoD Component responsible for the activity's management. Do not include UPC costs in the DWCF rate structure. As a general rule, UPC funding includes the pro-rata facilities support costs for any month in which 1) mobilization facilities are not used or 2) **facilities are used 20 percent or less of available work days**.

1.6.2.2.2. Mobilization expenses related to UPC may include both maintenance and labor costs related to mobilization.

1.6.2.2.3. Each non-supply DWCF activity should prepare a UPC Budget Exhibit (Fund-30). This exhibit documents total capacity, Unutilized Capacity Index, justification, and cost used in developing the request for UPC. All non-supply DWCF activities should complete the three capacity-index metrics found in Part I of the exhibit. Any non-supply activity requesting UPC funding will also complete the funded UPC line in Part I and the UPC justification in Part II of the exhibit.

1.6.3. Industrial Mobilization Costs. The Army established a category of costs that includes both UPC and underutilized facilities cost called "Industrial Mobilization Cost." The Army will use the Exhibit Fund-30, "**Underutilized** Plant Capacity" to justify their IMC costs.

1.6.4. Airlift Readiness Account (ARA). The U.S. Transportation Command (USTRANSCOM) must maintain sufficient airlift capability to respond to transportation requirements for a wide variety of mobilization conditions. This requirement exists in both peacetime and contingency environments. To the extent customer revenue is insufficient to support the costs of maintaining this capability; the Air Force **must** provide appropriated funds from the ARA. USTRANSCOM will coordinate with military services and Combatant Commanders to understand airlift workload requirements and adjustments to workload projections on a routine basis. USTRANSCOM must provide the Air Force with the budgeted ARA amount that will be part of the Transportation Working Capital Fund Budget Estimate Submission (BES) and President's Budget with enough lead time for the Air Force to incorporate in its budget submissions. The Air Force must submit a matching amount in its BES and President's Budget submission within its Operation & Maintenance account. USTRANSCOM must submit the Fund-8, "Air Mobility Command Common User Services" exhibit to justify the ARA requirement. The USTRANSCOM will record as a funded order and revenue.

1.7 Military Personnel

1.7.1. Components will use the civilian-equivalent rates provided by the OUSD(C) to price military labor at DWCF activities. The difference between the civilian-equivalent costs, included in the DWCF budget, and the actual military personnel cost will be budgeted directly in the appropriate military personnel appropriation. The number of military included in the budget **should** be the average strength of military assigned to the DWCF business, using the average fill rate for the 3 prior fiscal years, **unless there is a significant change projected in the budget year**. The fill rate is calculated by dividing actual average strength by the authorized strength for each grade. The budget amount will equal the average strength for each grade multiplied by the applicable civilian-equivalency rate.

1.7.2. The amount expensed for military personnel by DWCF activities and the amount reimbursed to the appropriate military personnel appropriation will equal the amount budgeted. No adjustments will be made to the DWCF cost of operations to reflect the actual cost of military personnel employed by DWCF activities. Military Departments having military personnel assigned to other Components will provide to each Component the number of work years that should be included in the DWCF budget submission. The DWCF activities that augment their manpower requirements with National Guard or Reserve personnel, to include those participating in the Personnel Force Innovation (PFI) program, will reimburse the appropriate military personnel appropriation at the DWCF civilian-equivalency rates.

1.7.3. **The civilian-equivalent costs are provided by the OUSD(C) and are calculated in accordance with Volume 11A, Chapter 6.**

1.7.4. See Volume 2A, Chapter 1 for active duty military personnel pricing policy.

*1.8 Full Recovery of Costs and the Setting of Prices

1.8.1. Managers of DWCF activities within each Component will set their prices based on full cost recovery, including all general and administrative support. Prices are established by the

budget process and are represented at the aggregate level in the form of a composite rate. Prices and corresponding rates should remain fixed during the year of execution (exceptions are listed in Volume 11B, Chapter 15). This stabilized price policy serves to protect customers from unforeseen inflationary increases and other cost uncertainties and better assures customers that they will not have to reduce programs to pay for potentially higher-than-anticipated prices. In turn, this policy allows activities to execute the budgeted program level and permits a more effective use of DWCF resources.

1.8.2. Except in unusual circumstances, prices for the budget year will be set to break even over the long run at the activity level. This means that prices will be set to achieve an AOR of zero in the budget year, provided that cash and budgetary resources are available to support AOR returns. In budget execution, activities will incur either a positive or negative operating result. Accordingly, activities will increase their budget year prices to make up actual or projected losses of budgetary resources or reduce their budget year prices to return actual excess cash resources or projected budgetary gains to customers.

1.8.3. An activity may request recovery of AOR outside the budget year. This request must be included in the budget submission, and must demonstrate that the alternative recovery period will not adversely affect the cash balance of the activity. A phased recovery schedule must be provided with the budget.

1.8.4. Special Circumstances: DWCF rules for pricing and operating loss recovery or gain distribution may be waived or deferred if one or more of the following conditions exist.

1.8.4.1. Fund Liquidity: Component fund managers must maintain a positive cash balance throughout the year. The cash requirement developed on the exhibit, Fund 13b, Cash Requirements, provides a management guide for maintaining cash sufficiency. Several factors, however, could cause activities to operate outside the requirement range. To prevent the buildup of excess cash balances, or to ensure fund solvency, the Director or Deputy Director for Revolving Funds may direct out-of-cycle rate adjustments at any time during the fiscal year.

1.8.4.2. Depot Maintenance Additional Requirements: If Component cash balances are projected to be sufficient (see paragraph 1.4) by the end of the budget year, depot maintenance activities will recoup losses and return gains in the budget year. However, if cash balances will be outside the cash requirement range, an out-of-cycle rate adjustment or surcharges may be directed, to restore cash to appropriate levels, at any time in accordance with paragraph 1 above. Also, unplanned depot losses recouped in subsequent years may be financed with prior year resources, provided all other criteria associated with prior year upward obligations are met.

1.8.4.3. Contingency or Emergency Operations: Fund managers may waive DWCF pricing and financing requirements to facilitate Department operations during times of war or other national emergencies. The DWCF activity must notify the Director and Deputy Director for Revolving Funds in writing within 30 days of this action.

1.8.4.4. Impact of Foreign Currency Exchange Rates: A DWCF activity operating overseas may experience significant operating losses or gains due to changes in foreign currency exchange rates.

1.8.4.4.1. While these operating losses and gains are normally recovered or returned through stabilized rate adjustments in budget years, fund managers may propose out-of-cycle rate adjustments to the [Director and Deputy Director for Revolving Funds](#) to address such losses and gains in execution. In calculating any gain or loss from foreign currency fluctuations, the DWCF must use the foreign currency exchange rates published as part of the Department's budget justification materials submitted to Congress in support of the President's budget request and follow applicable procedures in Volume 6A, Chapter 7.

1.8.4.4.2. The DWCF activities are not eligible to participate directly in the Foreign Currency Fluctuations, Defense (FCF,D) (97-X-0803) and the Foreign Currency Fluctuations – Construction, Defense (FCF-C,D) (97-X-0801) accounts.

1.8.4.5. In addition to spreading contract costs when developing rates for all customers, the DWCF activities may incur and recover costs for contracts awarded specifically to fill the requirements of one customer by charging that customer an amount equivalent to the DWCF activity's expense in funding, awarding, and administering the contract.

1.8.4.6. Unbillable costs and operational losses that cannot be billed to an identifiable customer or that were generated from unforeseen cost overruns are to be treated as costs in the fiscal year in which the costs were incurred. The resulting operating losses **must** be included in calculating net and accumulated operating results.

1.8.4.7. Unless approved in writing by the [Director or Deputy Director for Revolving Funds](#) as an [out-of-cycle rate adjustment](#), the prices **must be consistent with the rates** set for all activity products, goods, or services approved during the budget review and documented in a memorandum signed by the USD(C), or designated representative.

1.8.4.8. Reimbursement procedures humanitarian efforts are as follows:

1.8.4.8.1. Users **must** pay for the goods and services provided by all DWCF activities, including deployment or other emergency response for military or humanitarian assistance.

1.8.4.8.2. See Volume 11B, Chapter 11, Section 2.7 for guidance.

1.8.4.8.3. Consistent with this policy, third party collections for transportation provided in response to a Request-for-Assistance (RFA) from another government agency are prohibited. The Military Department that controls the equipment or personnel is responsible for reimbursing USTRANSCOM. It is then the responsibility of the Military Department that accepted the RFA to collect any required reimbursements due that Military Department by the requesting government agency.

1.8.4.8.4. The sole exception to this policy occurs when the USTRANSCOM receives an order from the Joint Chiefs of Staff requiring transportation of non-U.S. owned equipment and/or non-U.S. personnel such as non-reimbursed efforts in support of the United Nations. In those instances, the Army will pay Surface Deployment and Distribution Command (SDDC) costs, the Navy will pay Military Sealift Command (MSC) costs, and the Air Force will pay Air Mobility Command (AMC) costs. Bills may be centralized for more convenient processing if appropriate; however, billings **must** be forwarded to the appropriate Military Department within 30 days from the commencement of service or humanitarian effort. The Military Departments must pay these bills, including transportation bills, in a timely manner.

1.8.4.8.5. This guidance does not address any contingency operation designated by the Secretary of Defense as a “National Contingency Operation” under the provision of the [10 U.S.C. § 127](#). Special rules apply for such an operation and those rules should be promulgated separately in conjunction with any designation by the Secretary under the provisions of that section.

1.8.4.9. Base Realignment and Closure (BRAC) cost reimbursement policies are as follows:

1.8.4.9.1. BRAC-Related Costs. Costs incurred in implementing the recommendations of the BRAC Commissions will be funded by the appropriate BRAC account and are not to be included in the rates and costs of businesses within the Fund. The DWCF activities may incur BRAC expenses prior to receiving an allocation of BRAC funding; however, all costs properly charged against the BRAC account must be reimbursed with BRAC funds. The DWCF activities may not expend funds prior to complying with the notification requirements imposed by law with respect to the obligation of BRAC funds. The BRAC account must reimburse all costs incurred by DWCF activities to carry out BRAC prior to the end of the fiscal year in which costs were incurred. Prior year, current year, or budget year operating losses in DWCF are not to be budgeted in the base closure accounts. Costs attributable to base closure actions at DWCF activities to be budgeted in BRAC may include:

1.8.4.9.1.1. BRAC directed reductions-in-force, separation incentives, plant closures, plant layaway or custody costs, or other BRAC-related expenses, such as all costs not associated with a valid work order during the year of closure

1.8.4.9.1.2. Environmental restoration and mitigation, to include reducing, removing, and recycling hazardous waste, and removing unsafe building debris

1.8.4.9.1.3. Planning, to include conducting such advance planning and design as may be required to transfer from an activity being closed to another military installation

1.8.4.9.1.4. Outplacement assistance in relocating, training, or providing other necessary assistance to civilian employees employed by the Department at installations being closed

1.8.4.9.1.5. Community programs, to include economic adjustment assistance to a community in which the closed base is located, or community planning assistance to the community to which functions will be transferred as a result of closure of a military installation.

1.8.4.9.2. BRAC and DWCF Rates. Overhead, not specific to BRAC and not in support of producing goods or services for customers, will be financed in the year the costs are incurred with the Components' Operation and Maintenance (O&M) appropriations. The DWCF losses occurring in years prior to closure will be recovered through the rate structure to the extent that there are new customer orders. When there are no new customer orders in the budget year, the Component responsible for the activity incurring the loss will finance, as a pass through from O&M appropriations to the DWCF, all overhead not included in rates supported by ongoing work or prior year losses to be recovered in the budget year. All costs at a closing activity in the year of closure that are not associated with a valid work order or are not valid BRAC costs are O&M costs and must be budgeted in the fiscal year when they will be incurred.

1.8.4.9.3. BRAC-Related Permanent Change of Station (PCS) Moves for DWCF Activities. Costs incurred to recruit and hire civilian personnel (including associated PCS costs) to fill vacant positions at an activity that is being transferred from a closing or realigning installation to another military installation in accordance with a BRAC recommendation may properly be considered BRAC costs under the Base Closure and Realignment Act of 1990. As a matter of Department policy, however, BRAC funds will not be used for such costs except in the case of DWCF activities, which may temporarily charge such costs against the DWCF, provided the DWCF is reimbursed with BRAC or O&M funds by the end of the fiscal year in which the costs are incurred.

1.8.4.10. Funding of Civilian Voluntary Separation Incentive Program will be financed and included in stabilized rates for civilian separation incentive requirements of assigned employees unless they must be offered as a result of directed BRAC action, in which case the appropriate BRAC account will fund the civilian separation incentive.

1.8.4.11. Any DWCF activities that use any of the services as listed in Exhibit Fund-22, "Summary of Base Support" as [tenants](#) must reimburse [installation](#) host activities in accordance with [DoDI 4000.19](#) (Support [Agreements](#)) to the extent that the specified support for the DWCF activity increases the host activity's direct costs. Costs for DWCF mission products and services (e.g., depot supply, depot maintenance, facility engineering services, information processing, communications, and software development) [should](#) be based on the approved stabilized rate. Other support incidental to the DWCF activity's primary mission or purpose [must](#) be budgeted based on direct costs measurable and directly attributable to the DWCF activity (e.g., incremental direct cost). [Only](#) the incremental direct cost attributable to the DWCF activity [may](#) be chargeable to the DWCF activity. Overhead costs are not to be included as a cost to the DWCF activity. The cost of operations budgeted for these services either as a host or tenant activity should be noted on Exhibit Fund-22, "Summary of Base Support" in the fall budget submission.

1.8.4.12. First line supervision is that **position** level immediately over **non-supervisory** workers. First line supervisors and above **occupy an** official supervisory **designated position**, and when acting in a supervisory capacity, **should have** their labor costs charged **by the DWCF activity** as an indirect production cost of the cost center supervised, **unless all the supervisor's time is in direct support of a single project**. First line supervisors may be borrowed and when used as direct labor, DWCF activities must classify the time of the first line supervisor as direct labor and charge it to the applicable job order rather than as an indirect production cost. "Crew chiefs," "snappers," "team leaders," and other subordinate job leaders are not first line supervisors. Volume 11B, Chapter 13 contains additional information related to charging labor costs.

1.8.4.13. Management Headquarters Costs for DWCF activities may be allocated using the following guidance:

1.8.4.13.1. A management headquarters is a discrete organization or part of an organization that has authority over the management of the DWCF activity. The OSD and Service Departmental activities normally do not have this direct responsibility. All the major systems/logistics organizations in the Services include headquarters elements directly supporting DWCF activities that should be funded or reimbursed by the DWCF activities.

1.8.4.13.2. Costs for discrete DWCF management headquarters organizations and parts of organizations that perform direct DWCF management headquarters functions can be financed directly in the DWCF or reimbursed by the DWCF activity (whichever is more practical). In addition, Components may allocate significant costs for common support functions, such as counsel or personnel services, at DWCF management headquarters to other users based on workload percentages in those functions.

1.8.4.14. Dual-Funded Organizations are organizations that are funded (including reimbursable funding) by both the DWCF and other appropriations or accounts.

1.8.4.14.1. Functions. In instances where a non-management headquarters function is funded with a combination of WCF and **General Funds**, the function initially will be funded in its entirety by either the DWCF or **General Funds**, based on the preponderance of definable units of measure for the function (e.g., workload, productive hours, outputs, or ultimate use).

1.8.4.14.1.1. The part of the organization (or funding source provided) initially funding the function **should** be reimbursed for appropriate amounts by other parts of the organization (or financing sources or customers) involved, based on the unit of measure that was used to determine which organization or funding source would provide initial funding; and the amount of reimbursement **should** be based on the relative portion of that unit of measure attributable to each part of the organization or funding source involved. If the part of an organization that is within the WCF accounts for more than 50 percent (e.g., 60 percent) of the unit of measure for a function shared with the part of the organization funded through appropriated funds, then the WCF portion of the organization initially would fund all of the costs of performing

that function. However, the applicable part of the organization funded through [General Funds](#) would reimburse the WCF for, and be allocated, the remainder of the costs (e.g., 40 percent).

1.8.4.14.1.2. Notwithstanding this policy, the amount of reimbursement for base support services provided by the DWCF to tenant activities [must](#) be determined in accordance with the policies in DoDI 4000.19 (Support [Agreements](#)).

1.8.4.14.2. Capital Investments. When a capital asset purchased by a WCF activity is also used by the part of the organization financed by appropriated funds, the Fund activity will capitalize the asset and bill the appropriated fund customer for the use of the capital asset. Such billings will use a rate that recoups both [the CIR](#) and operating costs. When a capital asset is financed by [General Funds](#) and also used by the DWCF part of the organization, the [General Funds](#) will capitalize the asset and may bill the DWCF for operating costs. [General Funds](#) activities do not bill DWCF activities for depreciation of capital assets.

1.8.4.15. Revenue Recognition Procedures for DWCF activities.

1.8.4.15.1. The DWCF activities must recognize revenue and associated costs in the same accounting period. There are two types of customer orders: (1) end-product (end-item) type orders which, at the completion of the customer order, produce a usable end-product (i.e., overhaul, repair, manufacture, construction, modification, supply transactions, etc.); and (2) service type orders that provide a service over a specified period of time. Revenue must be recognized in the same manner (that is, a standard policy for recognizing and reporting revenue must apply) for all activities within a DWCF activity. The policy varies based on the type of customer order, the length of time necessary to complete the order, and the value of the order; however, non-supply DWCF activities must use the “Percentage of Completion Method” for revenue recognition. The amount of revenue recognized cannot exceed the amount specified in the order.

1.8.4.15.2. Revenue recognition procedures must include gain and loss recognition in the same period in order for the activity managers to evaluate the performance of an organization. The revenue recognition policy does not encompass or establish policies for billings to customers or payments from customers.

1.8.4.15.3. Volume 11B, Chapter 11 provides specific revenue recognition guidance by DWCF activity.

1.8.4.16. Customer Workload Changes.

1.8.4.16.1. When a work order or project is canceled or reduced in scope after a DWCF activity has commenced work or incurred costs, the DWCF activity [should](#) charge the customer for the direct and indirect production costs incurred, plus the applied overhead plus costs associated with the cancellation or reduction.

1.8.4.16.2. Volume 11B, Chapter 11 provides specific guidance for the types of directly associated cancellation or reduction costs that can be charged to customers.

1.8.4.17. Write-offs of [unusual or infrequently occurring](#) losses [are](#) not chargeable against Accumulated Operating Results and [should](#) not be recovered through increases in customer rates [unless recovery of a cash loss or outlays is required and in accordance with accounting policies](#). [Examples of unusual or infrequently occurring losses not recovered in rates include losses resulting from the disposal or divestiture of capital budget items that have not been fully depreciated at the time they are taken out of service due to BRAC action; or losses associated with systematic inventory reductions by disposal of assets associated with force drawdowns. Only unusual or infrequently occurring write-offs that require a cash resource will be separately identified in the Component's budget submission using the Fund-14, "Revenue and Expenses" exhibit.](#)

1.8.4.18. [Net Operating Results \(NOR\) Adjustments](#). There are instances where additional adjustments to the Fund-14 and NOR are required. For example: [Cash Transfers in and out of the fund not directly related to operational performance \(Direct Appropriations associated with natural disasters, humanitarian relief, pandemics, cash infusions, and reprogramming actions e.g., transfers in/out\) may use below-the-line adjustments to the NOR to adjust for transfers that are not directly related to operational performance and subsequently does not support returning or collecting AOR.](#)

1.9 [Rate Setting for DWCF Activities](#)

1.9.1. In accordance with paragraph 1.8 [above](#), stabilized rates reflecting full cost will be set during the budget process for all individual DWCF activities. The DWCF uses four methods for rate setting purposes based on the nature of an activity.

1.9.1.1. [Percentage Markup on Cost](#). A cost recovery percentage is applied to the purchase or repair cost of secondary supply items to recover overhead costs and other pricing adjustments. This method is typically used for supply management DWCF activities.

1.9.1.2. [Direct Labor Hour \(DLH\)](#). A specific dollar value, including all direct costs, overhead, and other pricing adjustments, is charged per DLH associated with the completion of a customer order. This method is typically used for industrial DWCF activities (i.e., depot maintenance, ordnance, and research and development).

1.9.1.3. [Specific Unit of Output](#). The DWCF activities that provide services via numerous outputs that do not have a common measure for calculation will establish separate rates for each output. When multiplied by projected customer workload for each output, the rates will produce revenue that approximates, to the extent possible, recovery of the full cost, including approved adjustments, of providing the specific outputs (e.g., transportation, finance and accounting, information systems, and base support). This includes direct systems reimbursement.

1.9.1.4. [Standard Fuel Price \(SFP\)](#). During the budget development cycle, the Revolving Funds Directorate will establish the standard fuel price (SFP) for use by the Defense agencies and military departments to develop their fuel estimates for the budget. The Revolving Funds Directorate will use the Office of Management and Budget (OMB) economic assumptions (EA) and the refined product costs experienced by the department to develop the SFP. The SFP

consists of the refined fuel cost and the non-product cost, which includes cost for Sustainment, Restoration and Modernization (SRM), terminal operations, transportation, operations and product losses. During the year of execution, the SFP may be set at the budgeted rate or may be adjusted due to updated economic assumptions from OMB, the latest refined product cost experienced by the Department, changes in projected product costs, or the DLA Energy cash balance. The OUSD(C) must approve the SFP that will be used for the budget and changes thereafter.

1.9.2. Definitions and Procedures

1.9.2.1. Stabilized Price. Under the stabilized price recovery method, customers are charged for products and services provided by a DWCF activity. Activities establish stabilized prices for the budget year that are adjusted and approved during the budget review process. The stabilized rate is determined by [projecting](#) workload and costs, [including return/recovery of prior year AOR gains/losses](#). DWCF activities will charge this annual stabilized rate for all new customer orders received and accepted during that specific fiscal year, regardless of when the work is actually executed and billed.

1.9.2.2. Stabilized Price Exceptions. See paragraph 1.10 for guidance applicable to the sale of goods and services to public-private partnerships by DoD depot maintenance activities. In the Supply activities, customers are charged the price in effect when the item is dropped from inventory.

1.9.2.3. OP-32/PB-32 Rate Change. The annually published rate change for DWCF activities is the percentage change of prices between fiscal years.

1.9.3. Budgeted Rates. The OUSD(C) or designee will review and approve all final composite rates and prices developed for the President's budget and documented subsequent in the OUSD(C) Rates Memo.

1.9.4. Alternative Rate Development. Components may propose methods other than the standardized rates for recovering the cost of operations so long as they are mathematically equivalent to the standardized rate. Any alternative pricing methods must be fully documented and justified in the DoD Components' PBR. Any method (such as percentage of sales instead of markup on cost) must demonstrate recovery of all operating costs, provide a comparison of the current method to the method proposed, show the impact to customer funding requirements, and provide a timeline for implementation. Any change in the presentation of standardized rates for budget purposes must be approved in advance by the Director [or Deputy Director](#) for Revolving Funds and documented in the appropriate decision document.

1.9.5. Budget Formulation Rates and Prices. All DWCF activities will establish rates using the following multiple step process:

1.9.5.1. Each DoD Component must carefully review all projected costs for its projected operations for the fiscal year, and propose the most cost-efficient operation possible.

1.9.5.2. Customer requirements must be projected to include all anticipated workload programmed for accomplishment during the budget year based on identified outputs such as DLHs by product, tons shipped, line items received, and all other approved output measures for each activity. Prior year execution **must** also be factored into the projection of anticipated customer orders and overhead costs and significant deviations from prior year workload must be fully explained in both the activity's and the customer's budget justification materials.

1.9.5.3. Components will include adjustments required to comply with OSD and OMB guidance on the impact of inflation, projected pay changes, and other programmatic and policy changes in developing proposed rates.

1.9.5.4. Components will propose costs, program levels, and rate changes by DWCF activity in their Program/Budget estimate submissions. Components may propose exclusion of customer unique, non-labor direct costs from the stabilized rates, and charge these costs on an actual cost reimbursable basis. Components must show the impact the change in rates structure would have on overall stabilized rates. In other words, all costs must be accounted for and reconciled on the corresponding budget exhibit. Final **composite** rate and price adjustments will be documented in a memorandum signed by the USD(C), or designated representative, at the completion of the budget review. **Afterward, any internal realignment of rates within the composite rate structure must be approved as an out-of-cycle rate adjustment by the Director or Deputy Director for Revolving Funds.**

1.9.5.5. Final approved costs, program levels, and rate changes will be established by decision documents, after adjustments required to balance changes to customer funding with anticipated Fund costs, inter-Fund sales and transactions, and adjustments for NOR to bring the AOR to zero for the budget year for each DWCF activity.

1.9.6. Financing of Unusual or Infrequently Occurring Losses. Alternatives exist for financing sunk costs when activities terminate capital investments before a project is completed. These costs may be funded through one-time capital surcharges to operating costs or through the normal budgeted **CIR** previously established. If charged to operating costs through a capital surcharge and depending on the size of the charge, the loss may be recovered through rates over a 2-year period. If a usable product is produced, even though it is less than the planned product, costs may be reasonably assigned to that product and those costs may be appropriately recovered through **the CIR**.

* 1.9.7. Direct Reimbursable Work, Service Level Billings and Other Income. **Work performed may be billable outside the rate structure as approved in the President's budget. In these cases, revenue generated by direct reimbursable work, service level billings and any additional form of "other income" is subtracted from total revenue before the rates are developed. Forms of direct reimbursable work may include materiel purchases for non-supply activities, provisioning purchases for supply activities, work performed outside the mission scope of the activity, or if the customer has a centralized billing process to pay for a significant number of multiple outputs.**

1.10 Public-Private Partnerships at Depot Maintenance Activities

1.10.1. Public-private partnerships are agreements between organic depot maintenance activities and private industry or other entities to perform work and/or to utilize facilities and equipment. Partnerships improve utilization of DoD facilities, equipment, and personnel and enhance support to the warfighter. To advance the goal of increased partnering between DoD and private industry, this section provides guidance for the pricing of DWCF depot maintenance goods and services to private sector entities in partnering arrangements. Conditions for the sale of goods and services to non-DoD entities must be based on specific statutory authority.

1.10.2. In accordance with the authority granted to the Secretary of Defense by [10 U.S.C. § 2208](#), paragraph (h) to prescribe regulations governing the operation of DWCF activities and the use of inventories, this guidance is intended to clarify existing legal authority applicable in certain specific circumstances. The guidance set forth in this section:

1.10.2.1. May not be used to compete for non-defense related work.

1.10.2.2. Does not apply when otherwise precluded by public law.

1.10.2.3. Does not apply to products or services produced under work-share arrangements in which a DoD sponsor assigns work and separately funds the DoD depot maintenance activity and the private sector entity.

1.10.2.4. May be used for sales to private sector entities only when the transaction is part of an arrangement that is officially recognized as a depot maintenance public-private partnership.

1.10.3. Sales Prices

1.10.3.1. In order to minimize potential DoD operating losses or gains, sales prices to private sector entities in depot maintenance public-private partnership relationships may be tailored to the most recent actual and projected costs, rather than the approved stabilized billing rates charged to DoD customers ([10 U.S.C. § 2474](#)).

1.10.3.2. Tailored rates or prices charged for sales to private sector partners, if used, **must** ensure full cost recovery for the work involved in producing the specific products and services. Such tailored rates and prices **must** include: (a) all direct costs, (b) production or shop overhead costs that contribute to the final product and (c) a full allocation of General and Administrative (G&A) overhead costs, distributed on the same basis as for DoD customers. (Since G&A overhead costs cannot be attributed to specific products or services, there is no basis to include or exclude specific items of cost from prices charged to customers.)

1.10.3.3. Exceptions to WCF pricing policy for sales to private sector parties in depot maintenance partnership arrangements, as addressed in subparagraphs 1 and 2 above, do not change the requirement that sales prices include unfunded costs, as prescribed in Volume 11B, Chapter 11.

1.10.4. Fixed Pricing

1.10.4.1. Sales of DoD goods and services to private sector entities on a fixed price basis are authorized when the work is well defined and there is a reasonable basis upon which to predict costs. This mirrors private sector practice, improves the ability of private sector partners to predict production costs, and serves to constrain unit cost by more fully utilizing the production capacity of DoD maintenance depots. Cost reimbursable pricing is appropriate when future production costs cannot be reasonably predicted.

1.10.4.2. Multiyear fixed price agreements are authorized when future production costs can be reasonably predicted and the potential for future operating losses and gains are minimal. Prices may be fixed at a predetermined level taking into account future year escalation factors like pay rate changes, general inflation, and the number of units produced. Multiyear fixed price agreements may also incorporate other pricing techniques such as establishment of a base price with provisions for economic price adjustments to accommodate inflation.

1.10.5. Advance Payment. When appropriate to the scope of, and risks associated with, a prospective contract, the DoD partner may elect to accept incremental advance payments.

1.11 Military Clothing Items and Individual Equipment

1.11.1. The Defense Logistics Agency (DLA) Supply Management Activity procures military clothing requirements and bills users at standard prices. This includes uniforms, combat equipment, tents, tool sets and kits, hand tools, and cleaning equipment and supplies. The Military Services **must** include the costs of new clothing bag items in the Military Personnel appropriation budget request and new organizational items in the Operation and Maintenance appropriation budget request. A replacement item **must** be deemed a new item for the purposes of this policy if the cost of a replacement item exceeds the cost of the prior item by more than 10 percent in constant dollars.

1.11.2. The Military Personnel appropriation budget and the Operation and Maintenance appropriation budget should be sufficient to fund the quantity of the initial buy of an item of clothing including the establishment of wholesale inventory levels. New clothing items required prior to receipt of appropriated funds **may** be funded in these same accounts by reprogramming action.

*2.0 BUDGET JUSTIFICATION PRESENTATION

2.1 Purpose

This section provides guidance for preparation and submission of budget justification material and execution review estimates for the DWCF activities.

2.2 Preparation of Materials

General guidance with regard to format and preparation of material is presented in Volume 2A, Chapter 1. [This chapter](#) provides specific guidance with regard to the back-up material required for the DWCF and other unit cost budget areas.

2.3 References

Volume 2A, Chapter 1 provides funding policies to include those that impact other appropriations and accounts. Volume 2A, Chapter 2 provides guidance related to military personnel costs. Chapter 8 provides guidance related to Real Property Maintenance and Minor Construction and Volume 2A, Chapter 3 provides guidance related to Operation and Maintenance costs.

2.4 General

2.4.1. Each DoD Component will submit operating and CIP budget justification material to the OUSD(C), Revolving Funds Directorate, in preparation for submitting the President's budget request to the Congress following a review and approval by the OUSD(C) and the Office of Management and Budget. Each Defense Agency will prepare and submit their portion of the Defense-wide volume material to OUSD(C), Revolving Funds Directorate, for review and approval prior to submission to DLA for incorporation into the Defense-wide justification book. The DLA may require support from the submitting organizations to assemble the final justification book containing the Defense-wide DWCF activities. The DLA will supervise printing and distribution of the Defense-wide justification book for the President's budget.

2.4.1.1. The DWCF Program Budget/Review focuses on an integrated set of budgetary schedules for evaluating progress towards meeting cost and productivity targets. Unit cost goals and customer prices are set for each DWCF activity for the budget year to ensure resources are available to finance all costs.

2.4.1.2. The Budget Call letter may request updates for selected schedules that have not yet been documented in this regulation.

2.4.1.3. The documentation supporting the President's budget should be consistent with approved costs, work load and productivity assumptions.

2.4.1.4. The DWCF justification books submitted to Congress will be unclassified, in one volume organized into three sections: Component Overview, Operating Budget, and Capital Budget. All congressional budget material will be submitted electronically and posted on the respective Service's unclassified web site.

2.4.2. The following table lists all required budget justification exhibits.

2.4.2.1. The "Exhibit Requirements" column lists the universe of budget exhibits for DWCF activities.

2.4.2.2. The “WCF Activity” column identifies, for each exhibit, which activities are required to submit the exhibit. Activities must provide the exhibits as follows: “All” indicates all DWCF activities; “S” indicates Supply activities; “NS” indicates non-Supply activities; “I” indicates industrial activities; and “D” indicates depot maintenance activities.

2.4.2.3. The remaining three columns are marked “Y” or “N” to indicate that submission of the exhibit is required (“Y”) or not required (“N”), respectively, to support the PBR, for the Revolving Funds Directorate’s internal use (the exhibit will not be published) to support the President’s budget (“Backup to PB”) request, and for publication as part of the congressional justification materials for the President’s budget request (“President’s Budget”). The single exception is the Fund-28 Execution Performance Analysis, which must be submitted for budget execution reviews only.

1/ OUSD(C) RF electronic format required.

2/ USTRANSCOM must submit separate Fund-15 exhibits for its Commercial and Military airlift augmentation efforts.

2.4.3. Component Narrative. A component narrative is required for the President's budget submission to the Congress. Each DoD Component will provide a Summary by Component in table form consisting of cash and net outlays; revenue, expenses, and operating results; civilian full-time equivalents and military end strength; unit costs, rates, and other key indicators. In addition, each Component will provide a summary table for each of its DWCF activities. Discuss any planned changes in DWCF activity make up, location, or product lines. Provide short explanatory bullets where significant changes occur.

2.4.4. WCF Activity Narrative. For each DWCF activity, the DoD Component will submit a narrative analysis that, as a minimum, addresses the following areas:

2.4.4.1. A general description of the DWCF activity to include names and locations of subordinate commands, its outputs and customers, and performance and quality metrics. Discuss any planned changes in the DWCF activity make up, location, or product lines. Display cash and net outlays, revenue and expenses, operating results, civilian full-time equivalents and military end strength, unit costs and rates and other key indicators in tabular form. [If a section of the narrative, an exhibit or set of exhibits is not required by a specific activity, please provide an explanatory statement.](#) Provide short explanatory bullets where significant changes occur.

2.4.4.2. The analysis should focus on the changes from year to year and how these changes are related to work load and productivity trends; an analysis of any special business-type schedules requested in the Budget Call letter; and a discussion of work load and manpower trends, productivity initiatives/cost reductions, unit costs, and customer prices incorporated in the DWCF activity budget.

2.4.5. Copies. Numbers of copies of the required materials to be submitted with the annual budget estimates are identified in Volume 2A, Chapter 1. In addition, for the PBR, an electronic copy of the justification material for each DWCF activity will be provided to the respective Revolving Fund analyst and an electronic copy will be made available to the OUSD(C) Program and Financial Control Directorate on the SIPRNET. The OUSD(C) will notify Fund Managers if additional copies are required. The Budget Call Letter will provide any additional submission instructions, such as posting of the electronic copy to the internet.

2.4.6. Classification. The DWCF justification books prepared by the Components are to be unclassified. Submit any classified exhibits under separate cover.

2.4.7. Formats. Paper copies of justification material will be submitted on 8-1/2 x 11-inch paper. Variations in format to facilitate printing are permissible. Additionally, modifications may be made to exhibit formats with the approval of the respective Revolving Fund analyst to eliminate redundant information or provide further clarification.

* 2.4.8. Database Requirements. Consistent with the guidance contained in Volume 2A, Chapter 1, the DWCF budget estimates for financing and civilians will be entered into the Comptroller Information System (CIS). The CIS is typically loaded in August before the review of the justification material. The CIS entries are in obligations, as opposed to expenses. [The financing entries for federal and non-federal orders correspond to new orders displayed on the Fund-11 and must be entered.](#) System requirements may affect the minimum amount of required

financing entered into the database. Specific instructions on entering CIS data can be found on the SIPRNET CIS website.

2.4.8.1. The DWCF Operating Budgets will be entered into the CIS as new obligations. However, certain budget exhibits may reflect expense rates where applicable. Each component is responsible for ensuring that expenses and obligations reconcile in the budget justification and that each depicts a reasonable estimate of costs. For non-supply activities, inconsistencies will become apparent in the final rate worksheet reconciliation to CIS entries.

2.4.8.2. The DWCF Capital Budgets will be entered into the CIS as the amount of contract authority expected to be obligated in that fiscal year. This amount should be equal to the program totals displayed on the Fund-9c “Capital Budget Execution” exhibit. The CIP prior year carryover request amounts are not entered into CIS for the CY. The actuals for CIP PY Obligations in CIS must reflect the total obligations from AR(M) 1307 Statement of Operations, Part VI – Capital Program, Obligations This Fiscal Year Column, inclusive of all program years.

2.4.8.3. Enter estimates of civilian full-time equivalents (FTEs) for civilian personnel data and military end strength for military personnel data.

2.4.8.4. Changes to CIS data submitted by the DoD Components will be recorded in a decision document or technical adjustment. Technical adjustments may be used when a DoD Component requests minor changes due to new information or correction of errors during the PBR. The changes to the budget reflected in the final decision document will be expressed as obligations, FTEs for civilian personnel, and end strength for military personnel, and adjusting entries will be generated. Final composite rate and price adjustments will be documented in a memorandum signed by the USD(C), or designee, at the completion of the PBR.

2.4.9. Special Schedules - For the Supply Management activities, the narrative must include a section on workload and economic assumptions. These assumptions must include the following data for the prior, current, and budget fiscal years: items managed (#), requisitions received (#), receipts (#), issues (#), contracts executed (#), and supply materiel availability (%).

2.5 DWCF Application of Commonly Used Financial Management Terms

2.5.1. Commitment. A firm administrative reservation of funds, based on firm procurement directives, orders, requisitions, authorizations to issue travel orders, or requests which authorize the recipient to create obligations without further recourse to the official responsible for certifying the availability of funds. The recording of a commitment reserves funds for future obligations. The DWCF activities are not limited to the amount of commitments that can be incurred in the course of operations (unlike other DoD appropriations). Annual Operating Budgets (AOBs) provide legal and administrative restrictions only on the amount of contract authority that may be obligated in a given fiscal year.

2.5.2. Direct Appropriations. Amounts appropriated by the Congress to the DWCF for war reserve materiel, Defense Commissary Agency, or other purposes.

2.5.3. End of Period (EOP). The last day of a specified fiscal year, normally September 30, used to determine the closing status of resources.

2.5.4. Outlays. Disbursements issued from the U.S. Treasury for goods and services received. Gross outlays are equal to the cumulative amount of disbursements made for the fiscal period to date. Net outlays are equal to gross outlays less the cumulative amount of collections received for the fiscal period to date, [plus/minus transfers out/in, minus Direct Appropriations received](#).

2.6 Supply Management DWCF Activity Definitions

2.6.1. This section provides standard definitions to Supply Management terminology associated with the development of budget justification material. [The category of the term, Financial Management \(FM\), Logistics, or both is indicated in parenthesis.](#)

* 2.6.2. Definition of Terms Used in Supply Management DWCF Activities

2.6.2.1. Acquisition Leadtime ([Logistics](#)). The interval in months between the initiation of procurement action and the receipt into the supply system of the production model (excludes prototypes) purchased as the result of such actions. Acquisition Leadtime is composed of two elements, production leadtime and administrative leadtime.

2.6.2.2. Administrative Leadtime ([Logistics](#)). That portion of the Acquisition Leadtime that begins with the identification of the need to buy and the contract award. The time between the initiation of paperwork and contract.

2.6.2.3. Allocation ([FM](#)). [Following approval of apportionment / reapportionment requests by OMB, OUSD\(C\) P/B allocates funds to the Military Services and Defense Agencies. Funds distributed by OUSD\(C\)/PB may be further subdivided through sub-allocation and sub-allotment to lower levels within the organizations or across organizations for execution.](#)

2.6.2.4. Beginning of Period (BOP) ([both](#)). The start of a specified fiscal year, normally on October 1, used to determine the opening “snapshot” status of resources. Typically, the [end of period accounting balances](#) from the previous fiscal year [become](#) the BOP [balances](#) of the current FY; [BOP balances may be](#) adjusted for price changes.

2.6.2.5. Capitalized Inventory ([Both](#)). On-hand and on-order inventories of supplies funded by other appropriations and funds are considered as contributed capital as of the date when management responsibility for the items is undertaken (see Provisioning).

2.6.2.6. Capitalization ([Both](#)). The process whereby the Fund assumes management responsibility and ownership of assets ([such as inventory](#)) without reimbursing other DoD appropriations or funds.

2.6.2.7. Contingency Retention Stock ([Logistics](#)). That portion of the quantity of an item excess to the Approved Acquisition Objective for which there is no predictable demand or

quantifiable requirement and that normally would be allocated as potential reutilization stock, except for a determination that the quantity will be retained for possible contingencies. This is a budget stratification category and is not the same as “War Reserve Materiel,” which is held for immediate use of military deployments.

2.6.2.8. Cost of Goods (Materiel) Sold (COGS) (FM). The COGS is the expensed value of the items sold at the standard or exchange price, respectively. The COGS cannot be recorded until a sale occurs even though the purchase and cash outlay occurred in a previous fiscal year. The COGS is [based on](#) inventory valuation that may not be directly related to actual cash required to purchase inventory for the continuity of operations ([see Materiel Cost Adjustment](#)).

2.6.2.9. Cost Recovery Elements/Surcharges (FM). Factors added to the acquisition cost or repair cost price of an item to arrive at the customer’s standard or exchange price. Cost Recovery Elements/Surcharges include: (1) transportation deliveries from production site to points of use or storage (Second Destination Transportation (SDT)); (2) inventory obsolescence and loss, for the costs of pilferage, damage, deterioration, physical inventory shortages and excess; (3) inventory maintenance; (4) supply operations support costs; (5) [inventory augmentation](#); (6) [CIR factor](#); (7) [cash surcharge](#); and (8) [Depot Level Repairable \(DLR\) carcass attrition costs, if applicable](#).

2.6.2.10. Decapitalization (Both). The transfer of DWCF assets ([such as inventory](#)) to other appropriations or funds without reimbursement. Transfers of [on order](#) inventory between DWCF DoD Components are not considered de-capitalizations. Gains and losses of cash, relative to continuing operations at the DWCF activity level, should be taken into consideration to establish an acceptable reimbursement process based on validated undelivered orders (dues in).

2.6.2.11. Demand (Customer Order) (Both). Demand is an indication of a requirement (i.e., requisition, request, issue, repairable generation, etc.) for issue of serviceable materiel. Demands are categorized as either recurring or nonrecurring and are also referred to as [funded](#) orders. Demands for repairable items should indicate whether or not a carcass will be returned.

2.6.2.12. Economic Retention Stock (Logistics). That portion of the quantity of an item greater than the Approved Acquisition Objective determined to be more economical to retain for future peacetime issue than to dispose and satisfy projected future requirements through procurement or repair. To warrant economic retention, items must have a reasonably predictable demand rate. [The use of available resources](#) for replenishment and growth of economic retention stock [should be evaluated relative to the need](#) to reduce potential inventory shortages in other commodities that have higher reoccurring demands.

2.6.2.13. Exchange Price (EP) (FM). In a system that supports exchange pricing, this is the price charged to customers returning a DLR part that needs repair [and purchasing](#) a serviceable one (new or repaired). Equates to the latest repair price plus wash out costs (condemnations) per item plus pricing elements necessary to recover other operating costs. (Note: If no carcass ([unserviceable item](#)) is returned, the customer [must be](#) charged the full standard

price.) The discount the customer receives for exchanging a DLR part that needs repair will be the same for all items in the same Interchangeable and Substitutable (I&S) family, with the exception of any obsolete items that are no longer suitable substitutes in an I&S family. This applies to both exchange sales and primary inventory control activity (PICA) / secondary inventory control activity (SICA) transactions where the customer pays full price and then receives a payment for returning the DLR.

2.6.2.14. Expendable Supplies and Materiel (Logistics). Supplies, sometimes referred to as consumable supplies and materiel, that are consumed (e.g., paint, fuel, cleaning, preserving materiel, surgical dressings, drugs, and medicines) or lose their identity in use.

2.6.2.15. Initial Spare and Repair Parts (both). Those spares and repair parts introduced through the provisioning process to establish inventory levels prior to reoccurring demands for that item. These inventory levels must be provided or funded by other DoD appropriations (see Volume 4, Chapter 4). Components may request, subject to approval by the Director or Deputy Director for Revolving Funds a cost recovery element in the pricing structure to cover these requirements (See Volume 11B Chapter 15).

2.6.2.16. Insurance Item (Logistics). A non-demand-based stocked essential item for which no failure is predicted through normal usage. However, if a failure were to be experienced or a loss occur through accident, abnormal equipment or system failure, or other unexpected occurrence, lack of replacement would seriously hamper the operational capability of a weapon system.

2.6.2.17. Inventory (Supply) (both). Materiel titled to the U.S. Government, held for sale or issue, held for repair, or held pending transfer to disposal.

2.6.2.17.1. Consumer Level of Materiel and Supplies: Materiel and Supplies, usually of limited range and depth, held only by the final element in an established supply distribution system for the sole purpose of internal consumption. Materiel and Supplies at the consumer level is normally no longer considered DWCF inventory.

2.6.2.17.2. Intermediate Level of Inventory (Local): Materiel and Supplies held between the wholesale and consumer levels, regardless of funding source.

2.6.2.17.3. Wholesale Level of Inventory (National): Inventory, regardless of funding sources, over which the inventory manager at the inventory control point level has asset knowledge and exercises unrestricted asset control to meet worldwide inventory management responsibilities.

2.6.2.17.4. Inventory Augmentation (Both). A growth in inventory beyond initial stockage levels that is not demand based. This includes changes in engineering estimates resulting in higher stockage levels. Costs may be recouped by direct appropriation or a cost recovery element in the pricing structure to cover these requirements (See Volume 11B, Chapter 15).

2.6.2.17.5. Retail Inventory. Supplies/materiel held at a second point of sale below the wholesale level (e.g., management of DLA inventory purchases within a specific Military Department).

2.6.2.18. Inventory Cost Categories (FM)

2.6.2.18.1. Operating Costs. All costs not associated with the purchase or repair of materiel that must be incurred in order for the DoD Components to manage a supply DWCF activity. Does not include materiel-related costs, which constitute the basis for cost of goods sold.

2.6.2.18.2. War Reserves. Direct appropriation funding is required to procure items for war reserve stocks. These materiels are required to support approved force mobilization objectives. The approved force mobilization objective is the quantity required, in addition to peacetime assets normally available on any given date, to equip and support the approved force structure.

2.6.2.18.3. Historic Cost. The price paid for an item at the time it was purchased from a supplier.

2.6.2.18.4. Moving Average Cost (MAC): A historical cost method of valuing inventory. Each time a new quantity is purchased, the average value of all items on hand is recalculated. This value is used for accounting purposes including the COGS value on the Fund-14 "Revenue and Costs."

2.6.2.18.5. Replenishment Cost. The current price of an item from a vendor that will result in a cash outlay resulting from an obligation in the current fiscal year.

2.6.2.19. Numeric Stockage Objective (NSO) Item (Logistics). A non-demand-based, stocked, essential item for which, although failure may be predicted, the probability of demand is so low that it does not meet the stockage criteria at a given activity and, as a demand-based item, would not be stocked. Since the lack of a replacement item would seriously hamper the operational capability of a weapon or weapon systems, the item is therefore stocked; using direct appropriations, as non-demand-based. Also included in this category are:

2.6.2.19.1. Items needed to support particular programs of a nonrecurring or sporadic nature (e.g., set assembly, non-repetitive overhaul programs) where re-procurement is not required once the particular program has been completed.

2.6.2.19.2. Items that are procured on a life-of-type basis or which are "bought out" at the termination of a production program.

2.6.2.19.3. Items that are not fully consumed during a one-time or non-repetitive program but which should be retained for possible future need on a similar program.

2.6.2.20. Inventory on Order (Logistics). The quantities of materiel required to sustain operations in the interval between requisitions and the arrival of successive shipments; the amount of inventory required to satisfy current demands when leadtimes are taken into account. These quantities should be based on the established replenishment period (i.e., monthly, quarterly, etc.). This is also referred to as the “Pipeline,” “Undelivered Orders,” or “Due ins from Procurement and Repair.”

2.6.2.21. Other War Reserve Materiel Requirements (Logistics). The total war reserve materiel requirement less the sum of the pre-positioned war reserve requirements. These are also known as non-prepositioned requirements.

2.6.2.22. Pre-positioned War Reserve Materiel Requirement (PWRMR) (Logistics). That portion of the war reserve stocks required to be on hand on M-Day which approved Defense Guidance dictates be reserved and/or positioned at or near the point of planned use or issued to the user prior to hostilities, to reduce reaction time and to assure timely support of a specific force/project until replenishment can be effected.

2.6.2.23. Price Stabilization (FM). The Department’s policy [that requires components to maintain](#) the standard price of each cataloged supply item throughout each fiscal year except for correction of errors ([See Volume 11B Chapter 15](#)).

2.6.2.24. Materiel Cost Adjustment (MCA) (FM). The amount of [cost increase](#) realized from suppliers above the MAC, used on the SM-5b “OP-32 Price Change.” (MAC + Inflation + MCA = Replenishment Costs.) This amount is typically above the standard rate of inflation. Standard inflation should be accounted for in the “Materiel Inflation Adjustment” recovery element; [it should not be](#) double counted in the MCA. For example, if a new part has been upgraded by the manufacturer, the price may increase by 10 percent. In this case, 2 percent may be “normal inflation” and 8 percent can be attributable to the MCA. [In some cases, normal inflation may be the only recovery element required. For pricing purposes, inflation and an MCA may have to be applied as a cost recovery element to ensure receipt of sufficient budgetary resources to support the cash outlays required for replenishment.](#)

2.6.2.25. Production Lead Time (Logistics). The time interval between the letting of a contract or the placing of an order and the first significant receipt into the supply system of materiel purchased as a result of such action.

2.6.2.26. Provisioning Item (Logistics). Spares and repair parts required as both demand and non-demand-based levels in the supply system to support new fielding of end items. Typically, these are new inventory requirements [or increased requirements for system modifications or service life extensions \(including clothing and textiles\)](#) that require direct appropriations [by other DoD Components](#) to establish the supply chain. [This includes required safety stocks and other inventory stratification categories.](#) In some cases, upon approval by the [Director or Deputy Director for Revolving Funds](#), customers may be charged for the establishment of new inventory as a recovery element. [An agreement between the program manager and the DWCF activity should be made prior to the obligation of any DWCF resources \(See Volume 11B, Chapter 15\).](#)

2.6.2.27. Provisioning Item (Outfitting) (Both). That portion of Provisioning consisting of items for which a sale is anticipated to an appropriated outfitting (buy-out) account. Direct appropriations are required to establish inventory levels for these items until requirements can be forecast based on actual demands for their replenishment using obligation authority.

2.6.2.28. Reclassification (Logistics). The logistics term referring to the transfer of assets between inventory strata (e.g., from Economic Retention to Contingency), used on the SM-4 “Inventory Status.

2.6.2.29. Repair Cycle Level (Logistics). The quantity of reparable items required to sustain operations during the repair cycle that commences when a maintenance replacement takes place and ends when the unserviceable asset is returned to stock in a serviceable condition. This includes such stages as removed, awaiting shipment, in transit, in pre-repair screening, in process of repair, and being returned to serviceable stock. Any extraordinary awaiting-parts delays and any intentional extended-transit, storage, or repair-process delays should be excluded from the repair cycle.

2.6.2.30. Reparable Item (Logistics). An item of supply subject to economical repair and for which the repair (at either depot or field level) is considered in satisfying computed requirements at any inventory level.

2.6.2.31. Replenishment Spare and Repair Parts (Logistics). Demand-based spare and repair parts required for re-supplying current inventory levels. Inventory levels may increase above initial stockage when there is a concurrent increase in [customer orders](#). Fewer inventories will be required when there is a decrease in [customer orders](#). These include both reparable and consumable parts in support of fielded items.

2.6.2.32. Requisitioning Objective (also known as the “Authorized Acquisition Objective”) ([Logistics](#)). The maximum quantities of materiel to be maintained on hand and on order to sustain current operations and core war reserve. It will consist of the sum of stocks represented by the operating level, safety level, and the order and shipping time or procurement time, as appropriate.

2.6.2.33. Safety Level of Supply (Logistics). The quantity of materiel required to be on hand to permit continuous operations in the event of minor interruption of normal replenishment or unpredictable fluctuations in demand.

2.6.2.34. Standard Price (both). The price that customers are charged for DoD Inventory Control Point (ICP)-managed items (excluding subsistence). The standard price remains constant (stabilized price) throughout a fiscal year except for the correction of significant errors. The standard price is computed based on various factors, including the replenishment cost of the item plus surcharges to recover costs for transportation; inventory loss, obsolescence and maintenance; [CIR](#); and supply operations. (Note: See [Exchange Price](#) for prices of Depot Level Repairables in systems that support exchange prices.)

2.6.2.35. Stockage Objective (Logistics). The maximum authorized quantity of materiel on hand to sustain current operations. It consists of the sum of stock represented by the operating level, the safety level, the repair cycle level, and authorized additive levels.

2.6.2.36. Stratification Process (Both). A uniform portrayal of requirements and asset application that is a computer-generated simulation of actions causing changes in the supply position, e.g., procurement, repair, receipt, issue, terminations, and disposal of materiel.

2.6.2.37. Unfunded Requirement for Spares (both). The difference between the spare and/or repair parts requirement computed in accordance with DoD Policy (e.g., [DoDI 4140.01](#), “DoD Supply Chain Materiel Management Policy”) and the amount of that requirement that is funded.

2.6.2.38. Unobligated Commitments (FM). Amount of commitments incurred this fiscal year to date that have not resulted in obligation at the end of the report period.

2.6.2.39. Variability Target (FM). The projected amount of additional contract authority reflected on the SM-1 “Supply Management Summary” exhibit to allow supply activities to respond to variances in costs and/or [unexpected changes in recurring customer demands during the execution year](#). The release of the variability target is associated with increased mission requirements due to the operating tempo of the military departments. Budgetary resources are provided by increased sales associated with customer purchases and the accompanying cash flow. The variability target may not be used as a source for inventory augmentation or provisioning because these requirements should be supported by appropriated funds or a cash surcharge element of the cost recovery rate in follow-on years, to ensure the needed balance between budgetary and proprietary resources.

2.6.2.40. Anticipated Recoveries of Prior Year Contract Authority. Components must estimate additional contract authority requirements and include on SM-1 Supply Management Summary by Division exhibit.

2.6.2.41. War Reserves (both). Stocks of materiel amassed in peacetime to meet the increase in military requirements forecasts contingent on an outbreak of war. War reserves are intended to provide the interim support essential to sustain operations until re-supply can be effected.

2.7 Non-Supply Definitions

* 2.7.1. Definitions Used in Non-Supply Activities

2.7.1.1. Maintenance Depot. Industrial DWCF facilities whose primary missions are to overhaul, manufacture, and re-manufacture weapon systems, ordnance, or other forms of equipment. These activities include Army and Marine Corps Maintenance Depots, Ordnance Depots, Arsenal, Navy Fleet Readiness Centers, and Air Force Aviation Depots.

2.7.1.2. DLH Rate. The stabilized rate method that assigns revenue per DLH. The DLH rate is computed by dividing the sum of all direct and indirect production labor, non-labor,

and materiel, and general and administrative expenses, adjusted for direct reimbursements, NOR, and Capital Investment Program (CIP) or Cash surcharges, by the total number of DLHs (or other outputs) anticipated to be accomplished during the fiscal year.

2.7.1.3. DLH. The DLHs, sometimes referred to as Direct Product Standard Hours, are the hours required to perform the direct work on a product, or to perform a billable service for customers. The DLHs generally include the hands-on maintenance, repair, overhaul, test, and related direct production effort that follows the established sequence and content of work necessary to accomplish the billable job. The DLHs do not include the support work or man-hours identified as either indirect production (such as supervisory) or general and administrative in nature. The DLHs are estimated for budget purposes by product or service, based on industrial or management engineering standards developed using time, method, and motion studies, historical usage averages, or professional estimating and evaluation (E&E) techniques.

2.7.1.4. Fixed Price Catalogs. Depot Maintenance activities may maintain a catalog of products and services (major end items, componentry, depot level reparable, modification kits, etc.) with their associated rework, repair, overhaul, installation, etc., based on the Standard Depot Level Maintenance (SDLM) or Planned Depot Maintenance (PDM) work package DLHs. The DLHs associated with the product or service multiplied by the stabilized composite rate for a fiscal year constitutes the firm fixed price for the catalog item. Catalogs may be maintained in hard copy or in electronic databases accessible to customers.

2.7.1.5. Total Cost of Goods Sold. The total expenses incurred in the operating budget of the activity associated with the revenue planned to be recognized for the budgeted fiscal year.

2.7.1.6. Carryover. The dollar value of work that has been ordered and funded (obligated) by customers, typically using other DoD appropriations, but not yet completed by DWCF activities [at the end of the fiscal year](#). [Carryover consists of the unfinished portion of work accepted but not yet completed.](#)

2.7.1.7. Mission Costs. [Total costs incurred to support the mission \(repair of end items; selling of inventory; providing payroll services\) of the DWCF activity.](#)

2.7.1.8. Non-mission Costs. [Additional costs incurred to provide services related to, but not essential to, the function of the DWCF activity. Income associated with these additional costs should be recognized as "Other Income" \(Installation services; system implementation; other supply reimbursable operations\).](#)

2.7.2. Clarification of Rate Estimation. During the budget review process, each non-supply DWCF activity will use proposed new customer orders for each budget year to establish rates that will remain stabilized through the execution year. Accurate customer order projections are essential in determining the annual increase or decrease in rates.

2.7.2.1. Industrial activities ([to include the maintenance and repair function of base support activities](#)) will identify total DLHs required to accomplish the budget year's work

program. The work program is the total number of DLHs planned to be executed in support of known and projected customer requirements during execution of the budget. All DLHs should be identified in the budget, even though some workload may be direct reimbursable rather than rate based.

2.7.2.2. Total costs estimated to be incurred in execution of this workload will be projected. This process should include application of general inflation, pay raise, and other inflation or OUSD(C)-directed price adjustments, as specified in the OUSD (Comptroller) budget formulation Budget [Guidance](#). The sum of all these costs (including supplies, materiel, pay, [CIR](#), and other charges, etc.) is the estimate of the total [costs](#).

2.7.2.3. Customer requirements must be projected and separately identified to include: current (on hand) unfilled customers' orders expected to be executed during the budget year (carry-in or backlog), and work in process that will be completed; new orders anticipated to be accepted and executed during the budget year; and orders anticipated to be accepted but not executed during the year (anticipated carry-over).

2.7.2.4. Workload mix (outputs), availabilities, and production schedules must be assessed, along with any other factors that may impact program outputs such as policy changes, productivity initiatives, planned workload competitions, plant capacity, and other factors. Based on these factors, the work counts associated with each major workload category (output or product) will be identified and reported.

2.7.2.5. Total costs required to execute the planned program to produce the outputs in the approved execution program will be identified and reported in budget exhibits, with significant changes from the prior year highlighted in the Exhibit Fund-2, "Changes in the Costs of Operations."

*3.0 DWCF ACTIVITY EXHIBIT FORMATS

3.1 Purpose

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Adhere to these formats unless they are modified in a submission budget guidance. Modifications may be made to exhibit formats with the approval of the respective Revolving Fund analyst to eliminate redundant information or provide further clarification.

*Formats and Instructions for these exhibits are in Volume 2B, Chapter 3 for the OP-8 exhibits and Volume 2B, Chapter 19 for the PB-15, PB-22 and PB-54 exhibits. These exhibits should be included as part of the DoD Component's Appropriated Budget Justification

Exhibit SM-1 Supply Management Summary

[illegible]

Exhibit SM-1 Supply Management Summary (Continued)

INSTRUCTIONS FOR PREPARATION OF
SUPPLY MANAGEMENT SUMMARY (EXHIBIT SM-1)

The purpose of the SM-1, Supply Management Summary by Activity Division exhibit, is to provide summary obligation justification for the DoD Component DWCF activity. [This exhibit is also used to reconcile CIS data for supply activities.](#) Instructions for preparation of SM-1 exhibit follow:

1. Prepare the SM-1 exhibit for each year being reviewed (i.e., prior year, current year, and budget year).
2. Present dollars in millions to the third decimal place for [CIS reconciliation](#).
3. The current year request should represent current identified requirements and may not be equal to previous amounts approved in prior year budget submissions. The minimum information required for each activity division is as follows:

Net Customer Orders (New orders from Fund-11 less Credit Returns)

Net Sales

Operating Obligations

Mobilization Obligations

Direct Appropriations

Total Operating Obligations- This amount is entered into the program line in the CIS.

Total Capital Obligations- This amount is entered into the capital line in CIS.

Variability Target- This amount is not entered into CIS but is documented on the budget exhibit for inclusion in the apportionment from OMB.

Anticipated recoveries of prior year contract authority

Target Total

Exhibit SM-3a Requirements to Budget (Continued)

INSTRUCTIONS FOR PREPARATION OF
REQUIREMENTS TO BUDGET (EXHIBIT SM-3a)

The purpose of the SM-3a Requirements to Budget exhibit provides backup information to support obligations based on inventory requirements determined by customer demand. That is, the SM-3a Requirements to Budget exhibit identifies resources required to replenish sales of inventory for each fiscal year (i.e., prior year, current year, budget year).

1. Prepare an SM-3a exhibit for each DWCF Supply activity (not each division). Non-inventory costs, as reflected on the Fund-1/1a Summary/Details of Price, Program and Other Changes exhibits, are considered “Overhead and Other Management Costs”. Total obligations reported on this exhibit represent obligations for inventory procurement and repair. Present dollars in millions to the third decimal place.

2. Use the latest inventory cycle available since the exhibit is due in September. Instead of using the standard price, it is recommended that MAC value be used and the MCA applied as a growth factor to the MAC for each fiscal year. This will represent the projected price change over time. If a standard price is used, the overhead costs (surcharge) must be removed as part of this exhibit to get to a more representative cost of inventory and the MCA will not be added.

3. The exhibit **does not** reconcile to the total inventory; rather, it will focus on the time-phased customer demands (sales or exchanges) including any backorders. Inventory available (i.e., on hand and projected serviceable deliveries from buy or repair), that will satisfy those demands will be applied against the customer requirements. Finally, the portion of the customer demands that will not be satisfied with the current projected funded deliveries will be calculated so they can be satisfied through funding for new purchases or repairs. Documented unfunded requirements will also include the other projected funding needs (e.g., first destination transportation and projected repair cost increases). This exhibit will only reflect mobilization requirements to reconcile to the SM-1 exhibit; it will not include unfunded WRM demands.

4. The exhibit will include new requirements (e.g., initial provision and establishing a new stock number to replace an existing one) paid through the DWCF and **reimbursed by including a cost recovery element in prices**. It will also require all DoD Components to show (as a memo entry) other requirements (sponsor-owned stock, BP 28, etc.) not in the DWCF. Note: the memo entry on this exhibit provides reconciliation for other inventory purchased outside of the DWCF that may later migrate into DWCF.

5. Section A of the exhibit will reflect the Customer Demands (historical & projected for the first fiscal year and projected for the following 2 fiscal years). Section B of the exhibit will reflect the inventory (serviceable on hand and projected deliveries from buy or repair) for each of the 3 fiscal years. Section C of the exhibit will reflect the funding requirements (part of the budget) and any other unfunded (deferred) requirements. Section D of the exhibit will reflect the initial provision (memo entry) that is not funded through the DWCF. It is the total initial provisioning dollar value not under DWCF that is on hand or projected to be delivered by the BOP.

Exhibit SM-3b By Weapon System Requirements

[illegible]

Exhibit SM-3b By Weapon System Requirements (Continued)

INSTRUCTIONS FOR PREPARATION OF
WEAPON SYSTEM REQUIREMENTS (EXHIBIT SM-3B)

The SM-3B Weapon System Requirements exhibit provides a breakout of the operating obligation request by type of supply system action (procurement versus repair) and by weapon system or category.

1. For the OSD/OMB budget review, prepare the SM-3B for each DWCF Supply activity (wholesale division) that provides military spare parts (excludes fuel, medical/dental, subsistence, etc.). For each division, prepare one Exhibit SM-3B for each fiscal year (CY, BY).

2. Definitions.

a. Special Purchases column includes outfitting, special programs and any initial spares financed through a cost recovery element on the SM-5a Markup on Materiel Cost exhibit.

b. Basic Purchases column consists of replacement spares *based on demands*.

c. Basic Rework column is repair obligations for sales replacement.

d. Initial Spares column includes any new inventory levels financed through other DoD appropriations in this column. In theory, this column should reconcile with the P-18 exhibits provided with the Initial Spares Budget Activity of the DoD Component's procurement appropriations.

e. Total Program column shows the total operating obligation request for each weapon system.

f. Non-MCRS Percent (Non-Mission Capable Rate Supply) column shows the percentage, by weapon system, that is not mission capable due to the lack of spare parts. Report this rate target for each budgeted fiscal year.

3. Present dollars in millions to the third decimal place. Weapon systems, as defined by the applicable Service, may be aggregated into categories when individual systems are less than \$25 million. The Director or Deputy Director for Revolving Funds will approve appropriate levels of aggregation. Common parts may be grouped by category such as radios or may be allocated to specific systems such as F-16 aircraft. Obligation authority requests for non-weapon system-related requirements, such as reverse engineering and forging & casting, must be separately identified.

4. Estimated data may be used and noted as such until accurate systems can be developed to provide accurate data.

5. This form will be prepared at replenishment cost or repair cost as appropriate.

Exhibit SM-4 Inventory Status

FY	BUDGET	DIVISION			DATE
SUPPLY MANAGEMENT		(Dollars in Millions)			
(DoD Component) INVENTORY STATUS	TOTAL	DEMAND BASED	MOBILIZATION	NON-DEMAND BASED

A. Economic Retention (Memo)					
B. Contingency Retention (Memo)					
C. Potential DoD Reutilization (Memo)					
8. Inventory On Order EOP (Memo)					
9. NARRATIVE (Explanation of unusual changes)					

Exhibit SM-4 Inventory Status (Continued)

The SM-4 Inventory Status exhibit shows estimated inventory levels that will result from the proposed budgets and operating levels. Prepare the SM-4 at the MAC value for the prior fiscal year, current year, and budget year for each supply management DWCF activity for each Program/Budget and President's Budget submission. A consolidated summary for the total Supply activity will be prepared for the OSD/OMB Review. The TOTAL column in the prior fiscal year exhibit must reflect the amount from supply management general ledgers used in preparation of fiscal and accounting reports. Amounts in the DEMAND BASED, MOBILIZATION, and NON-DEMAND BASED columns may be statistically derived from related inventory reports. Instructions for preparation of SM-4 Inventory Status are as follows:

1. Inventory, BOP. Amounts of inventory on hand and in transit reported must equal amounts reported as of the end of the prior year. If not, explain any difference in a footnote. The DoD Component must have title to all inventory listed here.

2. BOP Inventory Adjustments. Enter any adjustments required to the beginning position.

3. Purchases. Add the amount of inventory value on which title has passed or will pass to the reporting supply management division during the period of the report.

4. Gross Sales at MAC value. Materiel sold to customer during the period of the report. Should match the Cost of Goods Sold base value.

5. Inventory Adjustments.

a. Capitalizations (Net). Report the inventory value of materiel capitalized or de-capitalized during the period of the report. Show a net de-capitalization with (-) preceding value.

b. Returns from Customers for Credit. Show the cumulative amount of materiel returned from customers on which title has passed to the reporting supply management division during the period of the report for which credit has been given. *For fuel returns, show the cumulative amount of fuel returned based on market price valuation of current inventory.*

c. Returns from Customers without Credit. Show the cumulative amount of materiel returned from customers on which title has passed to the reporting supply management division during the period of the report for which credit was not given.

d. Returns to Suppliers. Show as a negative number the cumulative amount of materiel returned to supplier during the period of the report.

e. Transfers to Property Disposal. Show the net amount of materiel transferred to/from the DLA Disposition Service on which title has been passed to DLA.

Exhibit SM-4 Inventory Status (Continued)

f. Issues/Receipts without Reimbursement. Show the net cumulative amount of materiel issued or received without reimbursement during the period of the report. This item could include transfers from other divisions or materiel categories, etc., as required. Show net issued with (-) preceding value.

g. Other. Identify and report the amounts of other adjustments to inventory. Include all other adjustments to inventory such as adjustments for physical inventory count and unusual or infrequently occurring losses (fire, weather). Explain with footnotes if necessary. Show (+) or (-) as appropriate.

h. Total Adjustments. Add 5a through 5g.

6. Inventory EOP. Report the amount of inventory available at the end of the reporting period, including all on hand, in transit, work-in-process, and other stocks to which the reporting stock fund division holds title.

7. Inventory EOP, Revalued (MAC, Discounted). Enter any adjustments required to the ending position.

8. Inventory on Order, EOP (memo). Report the amount of demand based and mobilization undelivered orders (excluding in transit) for materiel outstanding at the end of the period.

9. Narrative. Provide additional information and description as needed.

c. Total Wholesale Revenue (a + b)			
4. Total Markup on Materiel Cost (Standardized Rate) (a / b)			

Exhibit SM-5a Markup on Materiel Cost (Continued)

INSTRUCTIONS FOR PREPARATION OF EXHIBIT SM-5a
MARKUP ON MATERIEL COST

The SM-5a Markup on Materiel Cost exhibit shows how to calculate the Standardized Rate for Supply DWCF activities. Each Service/Agency will provide a consolidated exhibit for the sum of all wholesale divisions managed by that Service/Agency. **All Components will report expenses.** The CY requested on this exhibit will match all CY data represented on all other reconciling budget exhibits (Fund-14, Fund-1). The CY approved represents what was submitted in previous budgets; in theory, all adjustments from previous budgets will be reflected in the AOR adjustment line of the budget year (BY).

Materiel Costs Section. There are three factors that make up materiel costs. Total Materiel Costs is the denominator in the Markup on Materiel Cost calculation.

a. Materiel Costs without Inflation. This is a representation of the historic value of inventory (and repair costs). The official valuation methodology for the DWCF is MAC, based on proprietary accounting. However, valuing inventory solely at the MAC value for budget purposes will not generate sufficient resources for cash outlays to maintain current inventory levels.

b. Materiel Inflation (normal inflation). This line represents the amount of “normal inflation” as approved by OMB and OUSD(C) in published memoranda. The line **must** be used by the DoD Component to break out this **normal** inflation separately from any other materiel cost growth for reconciliation purposes; it is a mandatory line and these costs **must not** be included in line C as part of the “MCA”. Do not double count “normal inflation” on both lines.

c. Materiel Cost Adjustments (MCAs) (includes obsolescence, losses and washouts). All other adjustments involving the actual purchase or repair of inventory above that of the previous year. This line **must not** include normal inflation. Materiel costs associated with losses, obsolescence and wash out (condemnation) of **reparable** are also included in this line.

Overhead Costs (Fund-1/1a) Section. Total overhead costs should reconcile to the Fund-1 Summary of Price, Program and Other Changes exhibit less the amount displayed (if any) on the Fund-14 Revenue and Costs exhibit for direct reimbursable revenue. In theory, direct reimbursable revenue should not include a cost recovery rate and should cover all costs involved for the work performed. **CIR** is shown as a price adjustment instead of an overhead cost because it is a cash recovery element for capital obligations. Overhead categories directly relate to the corresponding line on the Fund-1/1a Summary/Detail of Price, Program and Other Changes exhibit.

Exhibit SM-5a Markup on Materiel Cost (Continued)

Pricing Adjustments Section. Pricing adjustments increase or decrease budgetary resources but are not related to Materiel or Overhead costs. There are three types of price adjustments.

Exhibit SM-5a Markup on Materiel Cost (Continued)

a. Capital Investments. Represents the amount of cost incurred to purchase capital assets through the CIP. This is a mandatory line.

b. AOR Recovery. This amount should be equal to the NOR for the respective year on the Fund-14. This is a mandatory line.

c. Cash Adjustment. May be used to adjust the cash resources available to that specific DWCF activity (not as an adjustment to the cash available at the DoD Component level). All cash adjustments at the DWCF activity level should reconcile to the Fund-13, Cash Management Plan. This is not a mandatory line.

Markup on Materiel Cost Section. Line 4. Total Markup on Materiel Cost (Standardized Rate (a/b) equals (Line 2. Total Overhead Costs + Line 3. Total Pricing Adjustments) divided by Line 1. Total Materiel Costs, displayed as a percentage. Adding Materiel Costs, Total Overhead Costs, and Total Pricing Adjustment equals total wholesale revenue as displayed on the SM-16 Unit Cost Summary exhibit. Total wholesale revenue, retail revenue and direct reimbursables equals total Gross Sales as displayed on the Fund-14 Revenue and Costs and SM-16 Unit Cost Summary exhibits.

Exhibit SM-5b OP-32 Price Change to Customers

OP-32 Price Change to Customers	CY (Approved)	BY

Price Growth for OP-32		
Materiel Inflation (if used) plus MCA (Line 1b + Line 1c)		
Total Overhead Costs plus Total Pricing Adjustments (Line 2 + Line 3)		
B. Total Additional Price to Customer		
C. Additional Price Percentage (B/A)		
D. OP-32 Price Change (Percent Change in Additional Price Percentage from CY (Approved) to BY)		

Exhibit SM-5b OP-32 Price Change to Customers (Continued)

INSTRUCTIONS FOR PREPARATION OF EXHIBIT SM-5b
OP-32 PRICE CHANGE TO CUSTOMERS

The OP-32 Price Change to Customers exhibit may be presented on the same page as the SM-5a Markup on Materiel Cost exhibit. For the President's Budget Justification Book, the published OP-32 Price Change to Customers exhibit for the PY, CY, and BY will be presented in the narrative section with a brief explanation of the change from the previous year. The SM-5b OP-32 Price Change to Customers exhibit will be required as a backup exhibit to the President's Budget. All figures for the OP-32 Price Change are depicted in the SM-5a Markup on Materiel Cost exhibit.

A. Total Materiel Costs without Inflation (Line 1a). These are the amounts displayed on the SM-5a Markup on Materiel Cost exhibit that represent changes in purchases without inflation or pricing factors.

B. Total Additional Price to Customer.

Materiel Inflation plus MCA. The amount of "normal inflation" (SM-5a Line 1b) plus other Materiel Costs not accounted for by "normal inflation" (SM-5a Line 1c).

Total Overhead Costs plus Pricing Adjustments. This should be equal to the SM-5a Markup on Materiel Cost exhibit Line 4a.

C. Additional Price Percentage. This represents the composite cost recovery rate (CRR) for the activity, this divides the Total Additional Price to Customer (B) by the Total Materiel Costs without Inflation (A) and is displayed as a percentage.

D. OP-32 Price Change. The OP-32 price change is the percentage of change from the prior year approved CRR to the current budget year's CRR. The formula for the percentage change to customers is: $((1 + \text{BY Line C}) \div (1 + \text{CY (Approved) Line C})) - 1$.

This change represents the change in price at the item level that were affected by both price and program changes in the customer budget.

Exhibit SM-6 War Reserve Materiel (Continued)

WAR RESERVE MATERIEL (WRM)
EXHIBIT SM-6

The purpose of the WRM exhibit is to notify Congress of the Department's intentions regarding the management of secondary item war reserves. Stockpile status and costs sections show the current and budgeted amounts for the inventory and the costs associated with maintaining these levels. The budget request section notifies Congress of the amounts of obligations to be used to acquire or maintain war reserve items and quantities. "Protected status" applies to items that may not be sold. "Other" applies to WRM that must be sold and replenished due to stock rotation or shelf-life issues. Exhibit instructions are as follows:

1. Stockpile Status (Same instructions as the SM-4 Inventory Status exhibit). Components should use the "reclassification" line to transfer inventory into the "protected" WRM category from "WRM Other," if desired.

2. Stockpile Costs. The WRM stockpile costs are those incurred in the WCF to store WRM materiel, to manage WRM stocks to include a portion of total Inventory Control Point costs (normally based on surcharges for purchased/repared items funded with the obligations identified below), and any other DWCF costs to maintain the WRM inventory.

3. WRM Budget Request. This area addresses the amounts of obligation authority to be used specifically for WRM items or WRM quantities, whether from an appropriation, from cash balances, or from future sales.

a. Additional WRM Investment. (Normally reimbursed or funded by an appropriation.) The amount of obligations to purchase or repair new or additional items that will increase the value of the total WRM inventory.

b. Replenishment/Repair WRM Reinvestment. The amount of obligation authority to be used to replenish or repair WRM inventory that is sold, and the amount to be used to reinvest in new inventory with the funds from the sale of old inventory. Should normally be a one for one or dollar for dollar (excluding surcharges) replacement.

c. Stock Rotation/Obsolescence. (Separate from the stock replenishment from sales above). This is to replace stocks that are not sold but must be rotated or replaced periodically because of shelf life or obsolescence (can be related to an appropriation, if required, but normally maintains, and not increases, the value of the WRM inventory).

d. Assemble/Disassemble. The amount of obligations to be used to change the configuration of WRM inventory items.

e. Other. As appropriate.

Exhibit Fund-1 Summary of Price and Program Changes – Costs (Continued)

Instructions for Preparation of Exhibit Fund-1
Summary of Price, Program, and Other Changes

This exhibit reflects the total obligations (including direct reimbursements from non-rate based work) to accomplish the DWCF activity mission. The Fund-1 is the Summary Exhibit that consolidates the information from the Fund-1A Details of Price, Program and Other Changes exhibit. The Components are required to address changes in cost between fiscal years as either price or program. Price changes are restricted by the inflation index published in OUSD(C) guidance with the exception of price increase resulting from another DWCF activity's rate changes.

Exhibit Fund-1a Details in Price and Program Changes – Costs (Continued)

Definitions of Fund-1a Categories - Cost
Details of Price, Program, and Other Changes (Operating Budget)

General. The Fund-1a exhibit reflects the total costs of supporting the applicable activity for each fiscal year PY, CY, and BY. Components must address changes in cost between years as price- or program-driven for each line item. All entries are [expenses](#). Round data to at least the nearest tenth of a million (e.g., show \$10.4 million, not \$10 million).

Military Personnel Compensation - Chapter 26 depicts cost elements for Military Personnel.

Civilian Personnel Compensation - The cost elements include VERA and RIF as well as the costs to offset the short-term costs of buyouts. Line 112 Retirement Fund Offset (15 percent of Employee's final basic pay) applies to employees who take a buyout and voluntary early retirement under the Civil Service Retirement System (CSRS).

[Cost of Goods Sold](#) – This element represent the cost of goods sold for Supply Activities

[Travel](#) – These elements represent the cost of transportation of people.

Materiel & Supplies - These elements support internal materiel, equipment, and supply costs associated with operations. Distinguish between costs associated with materiel purchased from Fund businesses and that purchased from non-Fund businesses.

[General Property, Plant & Equipment non-capital](#) – These elements are for equipment purchases made with operating funds for non-capital assets.

Other Revolving Fund Purchases - Purchases from other DoD WCF activities (to include the PRMRF and BMF) to support the internal operations of the activity. Include purchases by supply activities from depot maintenance activities in the respective 600 Other Revolving Fund Purchases category. Report purchases from the DWCF supply activities to support internal General and Administrative operations (not consumed as part of direct or indirect business operations) in category 400. Lines 601-675 should include purchases made at stabilized rates.

Transportation – These elements represent the transportation of things.

[General Property, Plant, and Equipment \(Depreciation\)](#) – These elements are for the depreciation of general property, plant, and equipment.

Other Purchased Services

Line 941 Technical Drawings (Supply Operations only) - The amount entered for Technical Drawings [represent purchases from contractors](#).

Line 942 Forgings & Castings (Supply Operations only)- The amount entered for Forgings and Castings [represent purchases from contractors](#).

Purchases of engineering services, other than those shown on lines 932-934, should be included on line 969, Other Engineering Services and Support.

Delete lines for which there are no costs, [for any of the included years \(PY, CY, BY\)](#), from the submitted exhibit (rather than including them with an amount of zero).

Exhibit Fund-2 Changes in Costs of Operations (Continued)

Instruction for the Preparation of the Fund-2 Exhibit
Changes in the Cost of Operations

The Fund-2 exhibit will explain the changes in the operating budget (costs) from one fiscal year to the next (i.e., FY to CY to BY) at a meaningful level of detail, relating program changes to changes in the level of work load (Unit Cost outputs) to the maximum extent possible. A Fund-2 exhibit for each non-supply DWCF activity is required. Strategies and plans to improve activity productivity and quality are of particular interest. **Reform initiatives which impact changes in costs and rates should also be documented.** Accordingly, the cost impacts of productivity initiatives should be separately identified on this schedule. Each DWCF activity should include a paragraph outlining major productivity improvement plans and associated resources including but not limited to capital investment, education and training initiatives, process improvements, consolidation and streamlining, work force motivations, and incentives.

Provide a narrative explanation for changes. Round data to at least the nearest tenth of a million (e.g., show \$ 10.4 million, not \$ 10 million).

For changes in cost due to productivity initiatives, list the detailed initiatives and amounts for each. Distinguish the cost reductions associated by individual productivity initiatives.

Exhibit Fund-3 Labor and Manpower Breakdown (Continued)

Instruction for the Preparation of Exhibit Fund-3
Labor and Manpower Breakout

The Fund-3 exhibit stratifies, by fiscal year (i.e., PY, CY, BY), the total DWCF activity costs in the operating budget by Direct, Indirect Production, and General and Administrative (G&A) (overhead) categories. For the G&A category, only the military and civilian personnel carried in and paid for by the DWCF activity should be reflected in the personnel FTE and end strength numbers. This includes personnel paid from the activity payroll such as assigned security guards and personnel working in the office of the DWCF activity director. However, this does not include the personnel assigned to a general & administrative activity that provides base operations support to the activity unless they are carried in the end strength of the DWCF activity.

For installations owned and operated by a DWCF activity whose primary mission is other than installation management, costs associated specifically with installation management should be identified as G&A Other. These costs will be considered separate and distinct from mission G&A costs.

Compute FTEs by dividing the applicable total number of hours by the number of hours in a work year (e.g., 2080; see OMB Circular A-11 for the correct hours for each year).

Exhibit Fund-5 Total Cost Per Output Summary (Continued)**Instruction for the Preparation of Exhibit Fund-5
Total Cost Per Output Summary**

The Fund-5 is required for all activities except supply activities. Only a single line is required for industrial activities summarizing the cost rate (not the standardized rate for revenue collection) per DLH for the PY, CY and BY. Activities that have multiple outputs and use a standardized rate based on a revenue per specific unit of output (Transportation, Base Support, DFAS, DISA) should report the cost per specific unit of output (not revenue rate) as depicted on the DWCF activity's respective annual operating budget (AOB).

Narrative:

Exhibit Fund-6 Depot Maintenance -6 Percent Capital Investment Plan (Continued)

Instructions for the Preparation of Exhibit Fund-6,
Depot Maintenance –6 Percent Capital Investment Plan

Minimum Capital investment for certain depots is required in accordance with [10 U.S.C. § 2476](#). Instructions for preparation of Exhibit Fund-6 are as follows:

A. Prepare a Summary Exhibit Fund-6 that provides the total for the activity and a separate Fund-6 for each maintenance depot to include Army Depots, Navy Aviation Depots, Navy Shipyards, Marine Corps Depots, and Air Force Depots.

B. Dollars in millions and tenths of a million.

C. The following will be defined:

1. Revenue (Avg): Only revenue for Maintenance, Repair and Overall will be included in accordance with amendment (1).

2. Revenue (3 Year Average): The preceding 3 years of actual or estimated revenue divided by three for Prior Year, Current Year, and Budget Year columns.

3. Categories of applicable capital investment:

a. Modernization. Typically refers to upgrades associated with the available current technology.

b. Efficiency. Typically refers to efforts to improve workflow and increase throughput while maintaining or reducing current costs. Also may refer to improved quality of work performed.

c. If a modernization leads to an efficiency, then the investment is still considered a modernization. An efficiency not dependent on a modernization is classified an efficiency. If an investment has elements of both, the DoD Component should record the best representation that can be determined.

d. A narrative should be included with the Exhibit Fund-6 to address the following:

1. A specification of any statutory, regulatory, or operational impediments to achieving the minimum percentage requirement.

2. A description of the benchmarks for capital investment established for each covered depot and military department and the relationship of the benchmarks to applicable performance measurement methods used in the private sector.

Exhibit Fund-6 Depot Maintenance -6 Percent Capital Investment Plan (Continued)

3. If the minimum percentage requirement is not met for a military department for the fiscal year covered by the report, a statement of the reasons why the requirement was not met and a plan of actions for meeting the requirement for the fiscal year beginning in the year in which the report is submitted.

e. The legislation provides waiver authority for the Secretary of Defense if the Secretary determines that the waiver is necessary for reasons of national security and notifies congressional defense committees.

Exhibit Fund-7 Customer Rate Computations (Continued)**Instructions for the Preparation of Exhibit Fund-7,
Customer Rate Computations**

The purpose of this exhibit is to establish a standardized rate to customers that reconciles Revenue, Total Costs, and NOR for industrial DWCF activities using DLHs.

For industrial activities, program financing (revenue) is a function of the estimated of the total cost of goods sold (total expenses) adjusted for NOR, Capital Requirements and other surcharges, divided by the programmed output (total DLHs), to identify an initial revenue rate per DLH.

The number of military and civilian DLHs associated with carry-in workload (unfilled customer orders on hand at the start of the current year) times the prior year stabilized rate (rate in effect when the carry-in orders were accepted) will be identified as revenue earned in the current fiscal year. The DLHs and associated dollars will be subtracted from the BY total DLHs and revenue as identified above.

Part I: All revenue associated with direct reimbursable costs (non-rate based workload) and orders received in the current year must be removed with the associated DLHs in order to forecast a BY Revenue Rate for new orders. Total revenue must cover all projected costs and NOR adjustments as depicted on the Fund-14. The BY revenue rate is the revenue expected from new orders divided by the DLHs associated with that workload.

Part II: The NOR adjustment must be subtracted from the total rate based revenue (not just the new order revenue) because total expenses in the BY will be a combination of CY and BY workload. Subtracting a negative NOR will add to the costs reflecting costs greater than revenue as depicted on the Fund-14. The BY cost rate is total rate based costs divided by total rate based DLHs (not just new order revenue DLHs). The BY cost rate, total rate based costs, and total rate based DLHs should reconcile to the Fund-5.

Part III: Total Fund-1 Summary of Price, Program, and Other Changes costs should reconcile with total rate based costs and direct reimbursables.

**Instruction for the Preparation of Exhibit Fund-8
Common User Transportation Services**

This exhibit displays the costs, revenues, NOR, and AOR of USTRANSCOM's operations, with emphasis on the explanation of item 3B, Total Airlift Readiness Revenue. The USTRANSCOM must include a narrative outlining reasons for variances greater than 20 percent for each line of Airlift Readiness Revenue from one year to the next.

For changes in Airlift Readiness Revenue, distinguish the factor(s) that causes the change (e.g., utilization factors, airlift rates set to compete with private sector rates, commercial transportation prices, aircraft maintenance prices).

Round data to the nearest tenth of a million.

**Fund 9a Summary exhibit must reconcile to the Fund 9b project justification.*

Exhibit Fund-9a Activity Capital Investment Summary (Continued)

Instructions for the Fund-9a Exhibit
Capital Investment Summary

General - The [aggregate](#) project line items listed for each major category are the minimum submission requirements. Projects may be added or modified to meet the specific requirements of the DWCF activity as long as there is a corresponding Fund-9b that describes what is being purchased and the reason for the requirement. The summary item description and the [aggregate](#) project amounts on the Fund-9a must correspond to the individual Fund-9b. All Prior Year projects will be shown by line item detail cross-referenced to the corresponding Fund-9b. In addition, the ADPE and Telecommunications equipment and software development Fund-9b Exhibit line number assigned should also be used for cross-referencing within the Information Technology Exhibits as outlined in Chapter 18 of this regulation. Use the approved DWCF activity name. The four major categories for Capital Investment Programs are as follows:

(1) Non-ADPE & Telecommunication Equipment > \$250K: Equipment, other than ADPE and Telecommunications Resources. A separate Fund-9b will be provided for each [aggregate](#) project. Each project will include cost estimates for at least the subcategories shown above (unless no equipment of that kind is purchased). Other project categories may be added.

(2) ADPE & Telecommunications > \$250K: ADPE and Telecommunications Equipment Component will provide a Fund-9b for each of the aggregate projects listed above (unless no equipment of that kind is being purchased). Other project categories may be added. One Fund-9b narrative may address all projects under \$5,000,000 by category (e.g. "Other ADPE Support Equipment under \$5,000,000"). Items that exceed \$5,000,000 will be addressed separately in the narrative.

(3) Software Development > \$250K

a. Software Development [must](#) be shown on a separate Fund-9b by item detail for projects equal to or greater than \$5,000,000. All software projections must comply with DoD Chief Information Officer (CIO) requirements/approvals.

b. One Fund-9b may be submitted for software development under \$5,000,000 that does not need DoD CIO approval. This Fund-9b may be submitted with a general statement of the enhancements that will be provided. In addition, the Fund-9bs must include a system delivery date/s. If it is a spiral development, all delivery dates and amounts to be capitalized will be included in the Fund-9bs.

(4) Minor Construction within the thresholds contained in 10 U.S.C. § 2805.

a. Minor Construction may be combined into one Fund-9b as long as each project listed is below the threshold. The Fund-9b must contain a statement that no Minor Construction project exceeds the current MILCON threshold.

Exhibit Fund-9a Activity Capital Investment Summary (Continued)

b. All special categories of minor construction will be listed and justified separately (such as Navy R&D). 10 U.S.C. § 2805, paragraph (d) [authorizes activities to use up to of funds available for operation and maintenance for unspecified minor construction projects for laboratory revitalization and recapitalization](#). However, Congressional notification is still required for projects exceeding the threshold.

1. Section 1.4, Policy, provides specific guidelines for inclusion or exclusion of an item in the capital budget, and the necessary analysis required to substantiate a capital budget request.

2. Definitions for these capital budget categories are provided below:

A. [Non-ADPE Equipment exceeding the capitalization threshold](#) will be capitalized and depreciated. Equipment should be aggregated into projects by like-types. There is no limit on the number of projects that may be used.

B. ADPE and Telecommunications Equipment having a system unit cost [exceeding the capitalization threshold](#) will be capitalized and depreciated.

(1) ADPE and telecommunications resources consist of computer hardware, operating system software (including utility and communications software) and telecommunications equipment as defined in OMB Circular A-11.

(2) ADPE costs will be displayed in five parts: (1) Computer Hardware (Production), (2) Computer Hardware (Network) (3) Computer Software (Operating System), (4) Telecommunications, and (4) Other Support Equipment. The last category includes investments such as uninterrupted power sources and air conditioning that must be purchased to support computer and telecommunications resources.

C. Software Development/Modernization with a system unit or lifecycle cost [exceeding the capitalization threshold](#) will be capitalized and depreciated. Internally developed software and externally developed Software will be listed separately.

(1) Software development includes the actual development and acquisition of the information system as defined in OMB circular A-11. This category does not include software developed for a customer for use in a weapon system.

(2) Software development/modernization will be budgeted by project. A project is defined as any change, modernization, or improvement to a system, subsystem or severable module of a system that by itself will provide an economic benefit or improvement in a business process. This must include all changes or improvements needed to interface or integrate with other ancillary systems. A project has a start and stop date, a specific amount of funds, and results in a usable end product.

Exhibit Fund-9a Activity Capital Investment Summary (Continued)

(3) Software development/modernization projects will exclude CIP ADPE investments. These will be identified separately in the ADPE and telecommunications section of the Fund-9a and Fund-9b.

D. Minor Construction projects financed by the activity and exceeding the capitalization threshold will be capitalized and depreciated.

E. Column Entries

(1) Item Description. Enter the projects/item descriptive title of Software projects to be procured.

(2) Quantity. As applicable, enter the quantity of items procured/estimated to be procured during, as FY PY, FY CY, and FY BY.

(3) Amount should reflect all costs associated with program changes through the date of preparation of the exhibit regardless of whether such changes have been previously reported. Costs will be expressed in millions of dollars to at least the nearest tenth (i.e., \$2.6 million).

F. Capital Outlays – For each fiscal year, indicate the estimated total cash outlays for all capital budgeted items (above and below threshold) expended in that fiscal year regardless of the year in which the project was originally obligated.

G. Capital Investment Recovery (CIR) – For each fiscal year, show the estimated budget CIR that will be included in customer rates for all capital assets in that year. This amount will agree with the CIR reported on the Revenue and Expense Statement (Fund-14) and in the CIR Section of the Fund-1a.

Exhibit Fund-9b Activity Capital Purchase Justification

* ACTIVITY GROUP CAPITAL INVESTMENT JUSTIFICATION (\$ in Thousands)				A. Budget Submission						
B. Component / Business Area / Date		C. Line No. & Item Description				D. Activity Identification				
Element of Cost		FY PY			FY CY			FY BY		
		Quantity	Unit Cost	Total Cost	Quantity	Unit Cost	Total Cost	Quantity	Unit Cost	Total Cost
Non-ADPE & Telecom										
ADPE and Telecommunications										
Software Development (line item – by project)										
Minor Construction										

Narrative Justification:
 This exhibit will provide detailed justification by line item in support of summary capital investment purchases shown on the Fund-9a Exhibit.

- Describe the enhancement afforded by the existing equipment/ADPE and telecommunications resources/software development/facility and the shortcomings inherent in the current situation.
- Describe the benefits to be realized from the proposed capital investment.
- Indicate whether an economic analysis or cost analysis has been performed and, if not, why not. Summarize the net present value advantages of the proposed investment over alternatives considered and discarded. Be prepared to provide a copy of supporting economic analysis upon request.
- For MILCON projects, provide a copy of the supporting Form 1391 for new projects not previously submitted or identified.
- Describe the impact of not making the proposed capital investment.
- For computer software, separately identify license fees.
- Alternatively, dollars in millions may be used out to three decimal places.

Exhibit Fund-9b Activity Group Capital Purchase Justification

Exhibit Fund-9b Activity Capital Investment Justification (Continued)

Instructions for the Preparation of Exhibit Fund-9b
Capital Investment Justification

I. General

A. The purpose of this exhibit is to provide narrative justification in support of each project/line item detailed on the Fund-9a. A separate Fund-9b justification is required for each applicable software investments. For ADPE Telecommunication Equipment items that are equal to or greater than \$5,000,000, a separate Fund-9b is not required and may be summarized into the categories displayed in the Fund-9a. Software projects over \$5,000,000 and/or that need DoD CIO approval must be line itemed with individual Fund-9bs. It is important that the Fund-9b be completed and accurate as it is the primary justification for activity's capital purchases.

B. Separate Fund-9b exhibits will be submitted for each project/line item on the Fund-9a where there is an entry in either the current year or budget year(s) columns. Prior year capital investments do not require Fund-9bs for projects with only a PY entry.

II. Headings

A. For the PBR, insert "FY XX OSD/OMB submission" (XX is used for illustration purposes only. Insert the applicable fiscal year in lieu of XX).

B. Identify the applicable DoD Component/DWCF activity for the proposed capital investment. Use the approved DWCF activity name. Identify the activity that will benefit from the capital item, if possible.

C. For each project/line item (e.g., forklifts), indicate the item description contained in Exhibit Fund-9a.

D. Project/Item Description. Enter a line item identification number to cross-reference the corresponding entry on the Fund-9a along with a description of the investment.

III. Column Entries

A. Element of Cost. For items purchased under the Project/Line Item, provide applicable subcategories (i.e., vehicles may be broken down into cars, trucks, buses, etc.). For Software provide the item, and if applicable, break into module delivery subcategories.

B. Quantity. Provide the approximate number of items to be purchased under the subcategory or as applicable for software.

C. Per Unit Cost. Enter the actual or estimated unit cost, when appropriate, for each element listed. Express unit costs in thousands of dollars, to the nearest tenth (i.e., \$20.1 thousand). Unit costs should be expressed in terms of "the year" costs.

Exhibit Fund-9b Activity Capital Investment Justification (Continued)

D. Total Costs. Enter the total cost of Element of Cost and where applicable, taking into consideration the quantity to be estimated to be procured and the unit costs.

IV. Narrative Justification

A. Provide complete narrative description for each applicable project/line item. This narrative justification should include sufficient information to serve as the sole justification for funding the project/line item. Include a brief description for special interest items such as ADPE Equipment equal to or great than \$5,000,000. The narrative description should include, but not be limited to:

1. The nature, purpose, and intended use of the project or item(s).
2. Indicate whether an economic analysis was performed (all items within a project require the appropriate analysis).
3. Indicate the dollar value of estimated savings/cost avoidance after the equipment is installed or the project is complete and the fiscal year when the savings/cost avoidance should begin. If no savings/cost avoidance should result from the purchase, an explanation must be provided to indicate why.

Exhibit Fund-9c Capital Budget Execution

Department of (Component Name)				
Activity: _____				
FY 20 _____				
FY 20 _____ Program/Budget Submission				
(Dollars in Millions)				
Major Category	<u>Initial</u>	<u>Current</u>	<u>Approved</u>	<u>Explanation</u>
	<u>Request</u>	<u>Proj Cost</u>	<u>Change</u>	
Non-ADPE				
ADPE and Telcom				
Software Development				
Minor Construction				
Total FY _____				

Instructions:

Complete for each fiscal year required in the Program/Budget Submission (i.e., PY, CY, and FY preferably all on one page), summarized by major category. The “Current Projected Column” is the program approved in the current President’s Budget submission.

Initial Request. For the PY, this will be the CY column of the previous year’s President’s Budget. For the CY, this will be the BY column of the previous year’s President’s Budget. For the BY, only the “Initial Request Column” will be filled in (the BY will be displayed for comparison purposes).

Current Projected Costs. For the PY, this is the amount approved at the end of the fiscal year. For the CY, this is the amount in the current President’s budget. The delta between the Initial Request and Current Projected Costs will be displayed in the “Approved Change” column. The BY is only used for display purposes.

Explanation. Provide a brief and concise explanation why the changes needed to occur.

Exhibit Fund-11 Source of New Orders & Revenue

**ACTIVITY ANALYSIS
COMPONENT/ACTIVITY:
SOURCE OF NEW ORDERS AND REVENUE
(Dollars in Millions)**

<u>BY</u>	<u>FY PY</u>	<u>FY CY</u>	<u>FY</u>

<u>Supply activities use the following: to complete the Fund - 11</u>			
4. Carry-Out Orders (-)			
5. Gross Sales (-)			
6. Credit (-)			
7. Net Sales			

Exhibit Fund-11 Source of New Orders & Revenue (Continued)

Instructions for the Preparation of Exhibit Fund-11
Source of [New Orders](#) & Revenue

This Exhibit will identify the customers of each DWCF activity by DoD Component and the appropriation level. Be specific as to the source of funding by listing the appropriation name. Entries such as OSD or Army are not acceptable on this Exhibit. Lack of specificity will indicate that the funding source is unknown and may not be considered as a legitimate source of funding. The identification will be on the basis of funded orders so that DWCF activity may be linked to the appropriations for goods and services.

For line 1.a (Orders from DoD Components), show the amounts by appropriation (i.e., Operation and Maintenance, Army National Guard; RDT&E, Army; etc.) for orders accepted within the submitting Service/Component. For orders accepted from other DoD Components, show the appropriation detail for significant customers.

For line 1.b (Orders from Other Fund Activities), show the orders accepted from other Defense WCF activities. Be specific as to the activity.

The Total for New Orders on Line 1 must match data provided on other reconciling exhibits.

For line 2, Carry-In Orders, display the carry-in orders from prior fiscal years. For the Supply Management activities, carry-in orders represent back orders. [This is line 3090 on the SF-133 “Uncollected Federal Payments” less accounts receivable. Accounts receivable is typically displayed on the sub-activity SF-133 as supplemental information.](#)

For line 3, Total Gross Orders, add the sum of lines 1, Total for New Orders, and line 2, Carry-In Orders.

Line 4, Revenue, will equal total gross sales shown on the Revenue and Expense Statement.

Line 5, End of Year Work-in-Process, should equal orders from line 3, Total Gross Orders that will not be sold in the current year. For Supply Management activities, this line should equal backorders.

Components will submit summary Fund-11 exhibits for activities that have subdivisions and will submit a summary Fund 11 at the Component level.

*Exhibit Fund-11a Carryover Reconciliation

Narrative Justification:

Note: Carryover \$ Value by Service & Appropriation – Include orders from other Services and Customers.

Exhibit Fund-11a Carryover Reconciliation (Continued)

Instructions for Carryover Calculations
for the Preparation of Exhibit Fund-11a, Carryover Reconciliation

The reporting of carryover will be accomplished on the Fund 11a exhibit, Carryover Reconciliation. The Fund-11a exhibit, Carryover Outlay Calculation, displays and reconciles the detail of the Fund-11 exhibit by providing revenue, customer orders, and months of carryover by fiscal year, appropriation.

Carryover calculation. All DoD Components should pay close attention to their carryover amounts as reported on the AR(M) 1307 as “unfilled customer orders”. Components must budget to end each fiscal year with between five and seven months of carryover. The following metrics will be used to assess each fiscal year in the budget exhibit: ≥ 5 and < 7 of carryover is green (within range); > 3 and < 5 and ≥ 7 and < 8 months of carryover is yellow (at risk); ≤ 3 or ≥ 8 months of carryover is red (out of range). Components must include justification for carryover that is rated yellow or red. The justification for a yellow or red rating for each year must include the mitigating actions that will be taken to get to green including a timeline for when that will occur.

PART A - Carryover Calculation Categories.

- Line 1 (Total New Orders) displays the new orders projected to be received during the fiscal year.
- Line 2 (Net Carry-in Orders) displays the orders projected to be carried into the fiscal year from the prior fiscal year.
- Line 3 (Total Gross Orders) is the sum of lines 1 and 2.
- Line 4 (Revenue) displays the revenue projected to be earned during the fiscal year.
- Line 5 (Carryout) equals line 3 minus line 4 and displays the carryout projected at the end of the fiscal year.
- Line 6 (Workload Completed Per Month) equals line 4 divided by 12 and calculates the average revenue per month.
- Line 7 (Months of Carryover)

PART B.- Carryover \$ Value & Months by Location Activity

- Line 1 (Activity 1) Enter the Fund-11 projected dollar value of carryover and months of carryover for Activity 1
- Line 2 (Activity 2) Enter the Fund-11 projected dollar value of carryover and months of carryover for Activity 2
- Line 3 (Activity 3) Enter the Fund-11 projected dollar value of carryover and months of carryover for Activity 3

Continue with as many Activities that are within your Component.

Total. Sum the projected dollar value of carryover for all Activities

PART C. - Carryover \$ Value by Appropriation & Service

On each line, enter the projected dollar value of carryover for the appropriation.

Total. Sum the projected dollar value of carryover for all appropriations.

The total value of carryover from Part C and Part B must equal the total value of carryout from Line 5 of Part A.

Exhibit Fund-12 Customer Orders to Customer Funding Reconciliation (Continued)**Instructions for the Preparation of Exhibit Fund-12**

The source of new orders section displays data directly from the Fund-11. The customer funding section displays data from the Program Resources Collection Process (PRCP) system entered by the DoD Components consisting of funding levels for each sub-object class related to each Component's Working Capital Fund Activity Group. The delta section displays the value and percentage difference between the source of new orders section and the customer funding section. Customer funding – source of new orders = delta (\$). Delta (\$) / customer funding = delta (%).

Exhibit Fund-13 Cash Management Plan

CASH MANAGEMENT PLAN
Component:
Activity Group:
(Dollars in Millions)

Incremental Cumulative	Fiscal Year:						
	Operations			Financing		Appropriation	Total Change in Cash
	Disbursements	Collections	Net Outlays	Transfers Out	Transfers In		Cash Balance
Balances:							
October							
November							
December							
January							
February							
March							
April							
May							
June							
July							
August							
September							

Provide a monthly and cumulative phasing for each and every activity group displaying disbursements, collections, transfers in, transfers out, appropriations, net outlays, and beginning and ending cash balances for the prior, current, and budget year(s). Put each year on a separate page.

Cash balance at the beginning of the FY (+/-) Total Change in Cash = Cash Balance at the end of the FY.

Submit Excel workbook (by activity including total fund roll up) to the OUSD(C) Revolving Funds Directorate's cash manager.

*Exhibit Fund-13b Cash Requirements

CASH REQUIREMENT
Component:
Activity Group:
(Dollars in Thousands)

	Cash Requirement	Fiscal Year: _____
1.	Rate of Disbursement (Average Amount Disbursed per Collection Cycle)	
1a.	Total Disbursements	
1b.	Number of Collection Cycles	
2.	Range of Operation	
2a.	Upper Estimate of Expected Operating Range	
2b.	Lower Estimate of Expected Operating Range	
3.	Risk Mitigation (Identify amounts held to mitigate specified risk categories)	
3a.		
3b.		
4.	Reserves (Identify amounts held to meet specified future requirements)	
4a.		
4b.		

The Fund 13b exhibit provides each activity group's average rate of disbursement and stratifies its cash requirement based on the amount of cash held for current year operations, subsequent operations and risk mitigation.

Submit Excel workbook to the OUSD(C) Revolving Funds Directorate's cash manager.

Exhibit Fund-13b Cash Requirements (Continued)

Instructions for Cash Requirements

1. Rate of Disbursement (Average Amount Disbursed per Collection Cycle) = Result of dividing Line 1a divided by Line 1b.
 - 1a. Total Disbursements – total amount budgeted for disbursement from the exhibit Fund-13.
 - 1a. Number of Collection Cycles – the total number of collections cycles planned for the year.
2. Range of Operation – header, no entry required
 - 2a. Upper Estimate of Expected Operating Range – The maximum cash level expected based on budgeted assumptions and historical trends.
 - 2b. Lower Estimate of Expected Operating Range – The lowest cash level expected based on budgeted assumptions and historical trends. Provide an explanation if the lower bound does not equal the sum of Line 3 and Line 4.
3. Risk Mitigation (Cash held to mitigate specified risks) – Total amount of cash held for risk mitigation. The specific risks for which cash is being reserved should be provided along with amounts on lines 3a., 3b., etc. Examples of specified risks include, but are not limited to, items such as budget estimation error and commodity price fluctuation.
4. Reserves (Cash held to meet specified future requirements) – Total amount of cash held through the fiscal year to meet specified requirements in subsequent years. A description of the requirements for which cash is being held should be provided along with amounts on lines 4a., 4b., etc. Examples include, but are not limited to, unexpended appropriations, planned capital investments, and funds retained to support the return of accumulated operating results (AOR) in subsequent fiscal years.
5. For further explanation of each of the four major elements of the cash requirement, see paragraphs 090103.A.4.d-g.
6. A narrative is required describing the methodology and makeup of 1 through 4 above as appropriate.

Note: A graphic display of the elements included in the exhibit, Fund-13b, Cash Requirements, is provided on the following page.

Exhibit Fund-14 Revenue and Expenses (Continued)

Instructions for Statement of Revenue and Costs
Keyed to Statement Footnotes

Note: Information on this exhibit should reconcile to other exhibits that display Revenue and Costs (Fund-7, Customer Rate Computations; SM-5a, OP-32 Price Change; Fund-11, Source of Revenue; Fund-1/1a, Summary/Details of Price, Program, and Other Changes).

- A. For supply management activities, the line should reflect **Gross** sales. Credit returns should be displayed in the Refunds/Discounts line.
- B. Capital Surcharge represents the increase in prices (and projected revenue) due to surcharging the capital budget requirement to provide sufficient cash to support the capital budget. This line is blank if a capital surcharge is not included in price (also see note F).
- C. Other income is to include pass-through revenue such as direct reimbursable.
- D. Cost of materiel sold from inventory includes the MAC value of materiel sold from inventory and the cost of repair. Both wholesale and retail costs should be included. [For Supply activities, this figure does not represent required budgetary resources for inventory. If additional resources are required, a surcharge pricing element should be added on the SM-5a and an "Inventory Retention" category as an operating adjustment should be identified on the Fund-14. At the discretion of the Supply activity, "Inventory Retention" may also be used to display the difference of Total Materiel Costs on the SM-5a and Materiel Costs without inflation. In either case, the final NOR should be the same.](#)
- E. Capital Investment Recovery (CIR) reflects the estimated [recoupment](#) of all assets defined by the capital program in terms of recoupment of outlays.
- F. This represents the "gross" result from operations, prior to adjustments.
- G. Includes all "Other Adjustments" to NOR; multiple lines may be used. For example, Capital Surcharge reservation here should offset capital surcharge in revenue. Include any appropriations realized to offset current period costs (e.g., pass-through appropriations to cover underutilized plant capacity). Appropriations for war reserve materiel do not offset current period expenses, do not affect NOR, and should be subtracted if reported as part of revenue or be reported as an adjustment below NOR. This includes:

Transfers to correct for prior period over- or under-pricing;

1. Other approved transfers for collections from customers for which an expense has not been recorded;
2. Other collections (that are not transferred out, but placed in some sort of reserve) from customers for which an expense has not been recorded; or,
3. Unfunded expenses resulting from a policy change, which must be deleted prior to determining NOR.
4. Changes in Work-in-Process or Inventory for [activity retention](#).

Exhibit Fund-14 Revenue and Expenses (Continued)

H. The NOR is the fiscal year gain or loss from operations. The NOR will be carried into Accumulated Operating Results (inception to date) in the equity portion of the balance sheet. NOR and AOR are key performance indicators. Sufficient unobligated and cash resources must be available to return AOR. If not, then the minimum cash retention becomes a non-recoverable adjustment. Likewise, non-supply activities must have sufficient PY unobligated balances to return AOR. If not, then AOR must be retained and a non-recoverable cash surcharge may be required in order to generate sufficient budgetary resources. In addition, CIR for DWCF activities do not typically represent the total CIP cash requirement.

I. The Deferred AOR are revenue, expenses, gains, or loss transactions that impact WCF cash and are temporarily deferred in the budget to be recovered/returned in a future year.

J. The Non-Recoverable AOR are revenue, expenses, gains, or loss transactions that do not impact WCF cash and are permanent (though they could be reversed if necessary). Common examples of non-recoverable is the depreciation of real property purchased with MILCON and reported by the WCF activity or equipment purchased with appropriated funds and then transferred without reimbursement to a Depot for use. The Depot records the depreciation but does not include those costs when developing their rates.

Exhibit Fund-15 Fuel Data (Continued)

Instructions for the Preparation of Exhibit Fund-15 Fuel Data

The purpose of Fund-15, Fuel Data, exhibit is to provide reconciliation between the Defense Logistics Agency (DLA) [Energy](#) activity, and the customer budgets. Prepare the Fund-15 exhibit for the prior year actual, current year, and budget year. The DLA [Energy activity](#) will prepare the exhibits for both petroleum and aerospace fuel products. Prepare the exhibit for each division that procures petroleum fuel products and a consolidated exhibit. Instructions for preparation of Fund-15, Fuel Data:

1. Barrels. Use 42 gallons per barrel. Show barrels in nearest tenth of million barrels.
2. Cost per Barrel. Use cost in dollars and cents per barrel.
3. Extended Price. Multiply number of barrels by cost per barrel. Use dollars in millions and display results in tenths of a million.
4. Product. List by product.
5. Stabilized Price. Show current approved stabilized price.

The USTRANSCOM must submit separate Fund 15 exhibits for its Organic, Commercial and Military airlift missions.

Exhibit Fund-16 Materiel Inventory Data

Materiel Inventory EOP

Materiel inventory for the purposes of this exhibit is inventory that will be consumed in production to complete a finished product (i.e., bolts, screws, clamps, metal plates, etc.). It does not include operating materials such as pens, pencils, paper, staples and toner cartridges.

Complete one exhibit for each fiscal year (i.e., PY, CY, and BY) for the non-supply activities (i.e., depot maintenance, etc.). Inventory pricing will be based on current policy on inventory valuation.

*This would also include reductions due to obsolescence. All other reasons for inventory reductions would be listed in item C.

Exhibit Fund-28 Execution Performance Analysis (Continued)

Instructions for the Preparation of Exhibit Fund-28
Execution Performance Analysis

The OUSD(C) P/B Revolving Funds Directorate conducts first, second, and third quarter Budget Execution Reviews (BERs) each fiscal year for the DWCF, PRMRF/BMF, and DCSA WCF. Each Component is required to complete the Fund-28, Execution Performance Analysis, for each of their business areas and is expected to be prepared to discuss, by separate business areas [on the items presented in the Fund-28](#). An official BER announcement memorandum is sent out each of the three quarters with instructions, suspense dates, and any changes to the list.

[All Components must complete a Fund-28 Execution Performance Analysis, for each of their activity groups. The Accounting Report \(Monthly\) 1307 or Standard Form \(SF\) 133, Report on Budget Execution and Budgetary Resources, should be the source for the financial data. If another source is used, identify the source and provide the actual documents as supplemental information. Components will also identify any areas of concern and examples of improving efficiency or effectiveness of operations, either realized or planned. Use the narrative tab for your write-up.](#)

[BER Reporting will include the following:](#)

- [1. The FY CY phasing plans for cash and NOR found in the FY BY President's Budget.](#)
- [2. Must utilize the SF-133 and 1307 report data for the reporting periods December \(Q1\) /March \(Q2\)/June \(Q3\) for the FY.](#)
- [3. Cash levels by business activity, and EOY projections as for the reporting period.](#)
- [4. Total New Orders vs. Plan and EOY projections.](#)
- [5. Financial data variances from plan and EOY projections.](#)
- [6. Obligations, Revenues, Costs, Collections, Disbursement, Net Operating Result \(NOR\), and Accumulated Operating Result \(AOR\) actual data for the reporting period.](#)

Exhibit Fund-30 Underutilized Plant Capacity (Continued)

Instructions for the Preparation of Exhibit Fund-30
Unutilized and Underutilized Plant Capacity (UPC)**PART I.**

The purpose of this exhibit is to determine capacity indices and mobilization funding requirements for DWCF industrial activities. Unutilized (Reserve), Underutilized Plant Capacity and Industrial Mobilization Capacity costs should be excluded from the DWCF rate structure. Overburdening the customer for costs associated with idle expansion capability is not a fair reflection of operating costs associated with workload. In many cases, these costs must be incurred by a federal facility where the private sector can choose to downsize its operations.

Appropriated funding supports equipment that is utilized 20 percent or less of capacity (hereafter referred to as “unutilized”) and has a requirement to support surge and/or replenishment. It is not excess capacity; it is necessary to support core industrial maintenance requirements.

This exhibit may apply to all industrial activities (mostly Depots and Ordnance activities) whether or not the respective Service is identifying UPC funding as part of the topline submission in the O&M budget submission. Thus, at a minimum, the capacity-related indices for items numbered one through three should be completed for each industrial activity.

There are four types of facilities that may qualify:

1. Ammunition Storage
2. Ammunition Production
3. Maintenance
4. Manufacturing

Each qualifying facility must be identified and listed separately.

PART II.

For each activity with an amount in the Funded UPC (i.e., 1.F., 2.J., 3.F., 4.F.) category identified in the exhibit Fund 30 format, the following is required:

- A. Narrative describing the nature of these UPC costs being incurred at the activity. Provide justification as to what is being accomplished with these funds.
- B. Breakdown of costs by element.

*Exhibit PB-32 Summary of Price and Program Changes

INSTRUCTIONS FOR PREPARATION OF
THE SUMMARY OF PRICE AND PROGRAM CHANGES (EXHIBIT PB-32)

The PB-32 Rates Changes exhibit provides a breakout of the detailed price and program that drive the rate changes from prior year (PY), current year (CY), and budget year (BY), by sub-object classification, as applicable.

1. For the OSD/OMB budget review, prepare the PB-32 to show the rate (percent) of price and program growth for the various object sub classifications.

2. The price growth column should show the amount of price growth for various object sub-classifications. The rate of price change for lines 401, 411-415, 502-506, 601-693, and 701-721 should agree with applicable rates approved by OSD.

3. Program amounts should be consistent with Fund purchases included in Object Class 25.3. For, AMC, MSC, and MTMC costs displayed for items; 702, 703, 705, 706, 707, 708, 711, 714, 718, 719, 720, and 771 should include all purchases from these transportation funds. These amounts should exclude all non-Defense Working Capital Fund purchases such as reimbursement to MTMC of non-Defense Working Capital Fund (overseas) port operations.

4. Line 703 JCS Exercises includes only those services in support of JCS exercises and paid only by The Joint Staff (TJS).

5. Includes centrally managed items procured by the Defense Working Capital Fund from sources other than Defense Working Capital Fund or non-Defense Stock Funds.

6. Budget year (BY) program amounts should reflect stabilized rates as requested by the Service (OSD submission) or as approved by OSD (President's Budget), as applicable, to include the impact of biennial budget years' pay raises.

C. Exhibit PB-32 Summary of Price and Program Changes (Continued)

VOLUME 2B, CHAPTER 10: “PUBLIC ENTERPRISE, MANAGEMENT, AND TRUST FUNDS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [***bold, italic, blue and underlined font***](#).

The previous version dated [June 2010](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
1.1, 1.3, & 3.1 (100101, 100103, & 100301)	Removed reference to the closed Conventional Ammunition Working Capital Fund.	Deletion
1.2 (100102)	Replaced reference to tenants with customers.	Revision
1.4, 1.5, & 1.6 (100104, 100105, & 100106)	Updated references.	Revision
2.2, 3.1 (100202, 100301)	Updated list of budget exhibits required for the Pentagon Reservation Maintenance Fund and the Buildings Maintenance Fund.	Revision
4.2 (100402)	Replaced the word Costs with Expenses on the PR-2 exhibit to clarify the requirement. Revised the SP-1 exhibit to include prior year figures and update the format.	Revision

CHAPTER 10

PUBLIC ENTERPRISE, MANAGEMENT, AND TRUST FUNDS

1.0 GENERAL (1001)

1.1 Purpose (100101)

1.1.1. This chapter highlights the policies and justification procedures underlying budget formulation and congressional justification. The provisions of Volume 11B “Reimbursable Operations, Policy and Procedures – Working Capital Funds (WCF),” and of Volume 2B, Chapter 9, apply to the Pentagon Reservation Maintenance Revolving Fund and Buildings Maintenance Fund.

1.1.2. The following accounts are covered:

Public Enterprise Funds

National Defense Stockpile Transaction Fund
Pentagon Reservation Maintenance Revolving Fund
National Defense Sealift Fund
Buildings Maintenance Fund

Management Funds

None

Trust Funds

National Security Education Trust Fund
Surcharge Collections, Sales of Commissary Stores, Defense
(see Volume 2A, Chapter 1, Section 010603 for listing of all current trust fund accounts)

1.2 Background (100102)

1.2.1. Public Enterprise Funds are expenditure accounts authorized by Congress to be credited with collections, primarily from the public, that are generated by, and earmarked to finance, a continuing cycle of business-type operations.

1.2.2. The Pentagon Reservation Maintenance Revolving Fund and Buildings Maintenance Funds are Enterprise Funds that operate in accordance with the provisions of Volume 11B of the DoD FMR “Reimbursable Operations Policy – Working Capital Funds (WCF)” and of Volume 2B, Chapter 9, “Defense Working Capital Funds Activity Group Analysis”. These Funds satisfy recurring Department of Defense requirements by using a businesslike buyer-and-seller approach. Unlike profit-oriented commercial businesses, [these activities budget](#) to break even over the long term. Selling prices established in the budget are stabilized or fixed during execution to protect customers from unforeseen rate and price fluctuations that would impact customer ability to execute the programs approved by the Congress.

1.2.3. A basic principle of the enterprise fund structure is to create a customer-provider relationship [designed to make activity managers](#) and decision-makers at all levels more concerned

with the costs of goods and services. Requiring [customers](#) to pay for support they receive provides increased assurance that services supplied and paid for are actually needed.

1.2.4. Trust Funds. The following definitions apply to trust fund accounts.

1.2.4.1. Trust fund receipt account. Trust fund receipt accounts are credited with receipts generated by the terms of a trust agreement or statute. At the point of collection, these receipts are available for transfer to a trust fund expenditure account or are not available for transfer depending upon the terms of the trust agreement or statutory authority.

1.2.4.2. Trust fund expenditure account. Trust fund expenditure accounts are established to record amounts appropriated or otherwise made available by transfer from a trust fund receipt account to be obligated and expended in carrying out the specific purposes or programs in accordance with the terms of the trust agreement or statute. Funds transferred or appropriated to a trust fund expenditure account are normally available for obligation and expenditure within the limits imposed by the trust agreement or authorizing statute.

1.2.4.3. Trust revolving fund account. A trust revolving fund is a single account that is authorized to be credited with receipts and incur obligations and expenditures in support of a continuing cycle of business-type operations in accordance with the provisions of the trust agreement or statute. Trust revolving fund receipts are available for obligation and expenditure without further action by Congress.

1.2.4.4. Unavailable collections are either (1) unappropriated receipts or receipts that are precluded from obligation because of a provision of law, such as a benefit formula or limitation on obligations in PY, CY, or BY, or (2) collections unavailable for obligation because of limitations on obligations in PY, CY, or BY. Section 36.6 of [OMB Circular A-11](#) provides instructions on MAX Schedule N on unavailable collections for trust funds and O&M special funds which Federal agencies must include in their annual budget submission to OMB.

1.3 General (100103)

1.3.1. In general, DoD trust funds authorized to incur obligations and expend receipts have been exempted from apportionment by OMB. However, the Surcharge Collections, Sales of Commissary Stores, Defense trust revolving fund, and the National Security Education Trust Fund are subject to apportionment by OMB. Each trust fund must be viewed as a unique fund in light of any special provisions in the trust agreement or the enabling legislation.

1.3.2. Trust funds have been assigned account symbols between 8000 and 8999. Within this range trust revolving funds have been assigned symbols between 8400 and 8499. Some trust funds used by DoD are:

Surcharge Collections, Sales of Commissary Stores, Defense
National Security Education Trust Fund

1.4 Submission Requirements (100104)

General guidance with regard to submission requirements is presented in the DoD Financial Management Regulation (DOD 7000.14-R), [Volume 2A](#), Chapter 1. [Volume 2B](#), [Chapters 9 and 19](#) cover specific back-up material requirements for the above areas.

1.5 Preparation of Material (100105)

General guidance with regard to format and preparation of material is presented in the DoD Financial Management Regulation (DOD 7000.14-R), [Volume 2A](#), Chapter 1. [Volume 2B](#), [Chapters 9 and 19](#) provide additional specific guidance with regard to the back-up material required for Public Enterprise, Management Fund and Trust Fund accounts.

1.6 References (100106)

The DoD Financial Management Regulation (DOD 7000.14-R), [Volume 2A](#), Chapter 1 provides funding policies, [including](#) those that impact other appropriations/accounts. [Volume 2B](#), Chapter 9 provides guidance related to Defense Working Capital Fund accounts. Certain exhibits required by this chapter are found in [Volume 2B](#), [Chapters 9 and 19](#).

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION (1002)

2.1 Purpose (100201)

This section highlights the policies and justification procedures underlying budget formulation for Public Enterprise, Management Fund, and Trust Fund accounts.

2.2 Submission Requirements (100202)

2.2.1. Public Enterprise Funds

2.2.1.1. The Defense Working Capital Fund schedules referenced here are in the DoD Financial Management Regulation (DOD 7000.14-R), [Volume 2B](#), Chapter 9. The O&M type exhibits (PB, OP) are found in [Volume 2A](#), Chapter 3 and [Volume 2B](#), Chapter 19. Budget exhibits noted below should be submitted for the OSD/OMB budget review.

National Defense Stockpile Transaction Fund
Exhibits Fund-1, 1a, 2, 4, 11, 14, 17, 21, & 23.

Pentagon Reservation Maintenance Revolving Fund

Exhibits Fund-1, 1a, 2, 3, 9a, 9b, [9c](#), 11, [13](#), [13b](#), [13c](#), 14, and [26](#).
OP-8 and PB-22.

Building Maintenance Fund

Exhibits Fund-1, 1a, 2, 3, 9a, 9b, [9c](#), 11, [13](#), [13b](#), [13c](#), 14, and [26](#).
OP-8 and PB-22.

National Defense Sealift Fund (NDSF)

Exhibits Fund-1a, 2, 11, & 12.

2.2.1.2. The instructions and formats for the preparation of the NDSF required procurement and RDT&E exhibits are included in the DoD Financial Management Regulation (DoD 7000.14-R), Chapters 4 and 5, respectively.

Procurement/Ship Acquisition:

Budget Item Justification Sheet (P-40)
Weapon System Cost Analysis (P-5)
Analysis of Ship Cost Estimates (P-8a/8b)
Advance Procurement Analysis (P-10/10a)
Ship Production Schedule (P-27)
Ship Outfitting Costs (P-29)
Ship Post Delivery Estimates (P-30)

National Defense Features (NDF):

Budget Item Justification Sheet (P-40)

RDT&E:

Budget Item Justification Sheet (R-2)
Program Element/Project Cost Breakdown (R-3)
Program Schedule Profile (R-4)
Program Schedule Detail (R-4a)

2.2.1.3. Additional data required by OMB Circular [A-II](#) will be submitted in accordance with annual USD (Comptroller) budget guidance.

2.2.2. Management and Trust Funds - For Trust Funds, Trust Revolving Funds and other Management Funds, program and financing, and object classification schedules will be submitted for each account. The budget authority for each trust fund account must agree with the amounts reported against the applicable receipt accounts as required by DoD accounting guidance related to offsetting receipts. The receipt accounts are published in Treasury's Federal Account Symbols and Titles. For the Defense Commissary Agency, a footnote to the program and financing schedule will show the value of the obligations for renovation/construction of commissaries included in total obligations of the trust revolving fund.

2.2.3. Special Budget Exhibits - Unique data pertaining to a particular fund are required as follows:

National Defense Stockpile

Stockpile Financial Status Report (SP-1)

Pentagon Reservation Maintenance Revolving Fund

Cost of Services (PR-1)

Summary Statement (PR-2)

Buildings Maintenance Fund

Cost of Services (PR-1)

Summary Statement (PR-2)

Surcharge Collections, Sales of Commissary Stores, Defense

Summary (CT-1)

Facility Programs Justification (CT-2)

National Defense Sealift Fund (NDSF)

Ready Reserve Force (RRF):

Budget Item Justification Sheet (RRF-1)

Ship Composition Funding Requirements (RRF-2)

Ship Readiness Operational Status (ROS) Composition (RRF-3)

2.2.4. Budget exhibits will be submitted in accordance with the schedule published annually in DoD Comptroller budget guidance. Formats and instructions for preparation of the Special Exhibits are provided Section 4.0.

2.2.5. All NDSF related budget justification materials should be submitted directly to the Director for Investment, room 3C749. In addition to the DWCF schedules, procurement, and RDT&E exhibits referenced in paragraph 2.2 above, the special exhibits identified above must be included in the NDSF justification budget backup book for both the OSD and Congressional submissions. The backup book should include a table of contents, a computer generated FYDP funding report identifying each business area, and each business area/section should be tabbed.

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (1003)

3.1 Purpose (100301)

This chapter provides the policies and procedures to guide the development of budget justification and supporting narrative to be submitted by Components to the OUSD (Comptroller) in development of congressional justification material.

3.2 Submission Requirements (100302)

3.2.1. Guidance is applicable to the following DoD Public Enterprise, Management Funds, and Trust Funds:

Public Enterprise Funds

- (1) National Defense Stockpile Transaction Fund
- (2) Buildings Maintenance Fund
- (3) Pentagon Reservation Maintenance Revolving Fund
- (4) National Defense Sealift Fund

Management Funds

Trust Funds

- (5) National Security Education Trust Fund
- (6) Surcharge Collections, Sales of Commissary Stores, Defense

3.2.2. The following table presents the exhibit requirements to be submitted as part of the President's budget for the funds identified in paragraph 3.2.1, above. Additional budget justification material to accompany the President's budget may be prescribed by separate USD (Comptroller) budget guidance.

2.1 General Instructions	3

CHAPTER 11

OFFSETTING RECEIPTS

1.0 GENERAL

1.1 Purpose

This chapter prescribes budget justification requirements for offsetting receipts consistent with the provisions of the Office of Management and Budget (OMB).

***1.2 Authoritative Guidance**

The financial management and requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.1. **OMB Circular No. A-11**, “Preparation, Submission, and Execution of the Budget”

1.2.2. OMB Annual Budget Data Request, “Preparation of the Fiscal Year (FY) 20XX Budget Appendix”

1.2.3. OMB MAX A-11 Database

1.2.4. **Federal Account Symbols and Titles (FAST) Book**

1.2.5. Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) Annual Budget Guidance

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION

2.1 General Instructions

* 2.1.1. Each Military Department will include offsetting receipts in their annual program and budget submission. See Volume 2A, Chapter 1, for general guidance on submission requirements. The detailed Department of Defense (DoD) budget account structure is displayed in the FAST Book, Part II and III, on the Department of Treasury (Treasury) page. Any new accounts will be available in the OUSD(C) budget formulation account reference reports.

2.1.2. Each Military Department will also submit estimated receipts in thousands of dollars for the current year, budget year, and the outyears. These estimates will include the impact of all proposed legislation. Upon OUSD(C)’s completion of the prior year update within the **budget formulation system**, each Military Department will **also** update their current year, budget year and outyear Budget Authority (BA) and outlay estimates for receipt and any receipt-related (special and trust fund) expenditure accounts. The Military Departments will upload the required transactions in **the budget formulation system**. The due date will be established by OUSD(C) based on certification to the Treasury of actual execution data for the prior fiscal year.

2.1.3. Amounts reported should include all collections credited to the component's receipt accounts, including "F" (clearing) accounts if applicable. Prior year clearing ("F") accounts except the undistributed intragovernmental payment account (3885) will be merged with the Military Department's General Fund Proprietary Receipts (3210). Exclude collections credited to receipt accounts of other DoD components. Receipts will be reported on the basis of collections credited to receipt accounts during the year, plus or minus any adjustments during the year. Amounts for the prior year will agree with receipts reported to Treasury on the Treasury Combined Statement. Only zero (0) estimates are permitted in the current year, budget year, and the outyears for "F" accounts. For indefinite appropriations of receipts (Wildlife Conservation, Military Reservations; special fund accounts; and trust fund accounts), the amount of estimated collections will be equal to the related estimates of appropriations BA.

2.1.4. Receipts data are required for DoD-Military and DoD-Civil accounts.

2.1.5. Components must refer to the Treasury FAST Book for any changes to the account listing.

VOLUME 2B, CHAPTER 12: “DEFENSE HEALTH PROGRAM”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by [blue font](#).

CHAPTER 12

DEFENSE HEALTH PROGRAM

1.0 GENERAL

1.1 Purpose

1.1.1. This chapter provides instructions applicable to budget formulation and congressional justification for the Defense Health Program (DHP).

1.1.2. The following appropriations are covered as subsections of the DHP appropriation:

1.1.2.1. Operation and Maintenance (O&M)

1.1.2.2. Procurement

1.1.2.3. Research, Development, Test and Evaluation (RDT&E)

***1.2 Authoritative Guidance**

1.2.1. Title 10, United States Code, Section 1100 ([10 U.S.C. §1100](#))

1.2.2. [Department of Defense Directive \(DoDD\) 5136.01 Assistant Secretary of Defense for Health Affairs \(ASD\(HA\)\)](#)

1.2.2. [DoDD 5136.13 Defense Health Agency](#)

1.2.3. [DoDD 3000.06 Combat Support Agencies \(CSAs\)](#)

1.2.4. DoD Financial Management Regulation (FMR), Volume 2A, Chapter 1 provides general funding and appropriation policies.

1.2.5. [House Report 116-453](#) – Department of Defense Appropriations Bill, 2021, Title IV, Page 337, “Reporting on Medical Readiness”

1.3 Submission Requirements

General guidance about submission requirements is in Volume 2A, Chapter 1. This chapter covers specific backup material requirements for the above accounts. The Assistant Secretary of Defense (Health Affairs) (ASD(HA)) should also consult all of the other chapters of this Regulation for exhibit requirements that are not specifically addressed in this chapter including Volume 2B, Chapter 19 – Other Special Analyses. The ASD(HA) is also responsible for providing data to update the [Program and Budget data system and the Future Years Defense Program \(FYDP\) automated systems](#) for the DHP appropriation. The Military Components must reconcile all DHP personnel data and submit all proposed military and civilian medical personnel changes to the

Defense Health Agency [Financial Operations Directorate, DHP Programming Division](#) before these changes [will be accepted](#) in these automated systems.

1.4 Preparation of Material

General guidance [about the](#) format and preparation of material is presented in Volume 2A, Chapter 1. Volume 2B, Chapter 12 provides additional specific guidance [concerning](#) the back-up material required for the DHP.

1.5 References

Volume 2A, Chapter 3 provides guidance related to O&M costs. Chapter 4 provides guidance and formats related to Procurement appropriations, and Chapter 5 provides guidance and [templates](#) related to RDT&E appropriations.

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION

2.1 Purpose

This Section [guides the](#) preparation and submission of budget estimates for the DHP. The budget estimates consist of all O&M, procurement, and RDT&E resources that support the medical activities that were consolidated into the DHP.

2.2 Submission Requirements

2.2.1. The ASD(HA) is responsible for submitting all exhibits required for the O&M, procurement, and RDT&E appropriations as specified in Volume 2A, Chapter 3, and Chapters 4, and 5 respectively. The ASD(HA) is also responsible for submitting exhibit requirements specified in the other chapters of this Regulation including Chapter 19 – Other Special Analyses.

2.2.2. In addition, the Cost of Medical Activities Exhibit (PB-11, PB-11A, PB-11B) will be prepared and submitted to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) concurrent with the program and budget review submission. Formats for these exhibits are provided at the end of this chapter. Two printed copies and one electronic copy of each exhibit should be provided to the OUSD(C) Program/Budget (P/B) Military Personnel & Construction Directorate, Room 3C654, Washington, DC 20301-1100.

2.2.3. For all updates of the OUSD(C) automated budget system databases, DoD Components must reconcile all DHP personnel data with, and submit all proposed military and civilian medical personnel changes through the Defense Health Agency [Financial Operations Directorate, DHP Programming Division](#).

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION

3.1 Purpose

This section presents the exhibit requirements for submission to Congress. Examples of budget exhibits are in Section 4.0.

3.2 Submission Requirements

3.2.1. The ASD(HA) is responsible for submitting all exhibits required for the O&M, procurement, and RDT&E appropriation as specified in Volume 2A, Chapter 3, and Chapters 4, and 5 respectively. The ASD(HA) is also responsible for submitting exhibit requirements specified in the other chapters of this regulation including Chapter 19-Other Special Analyses.

3.2.2. In addition, the cost of Medical Activities Exhibit (PB-11, PB-11A, PB-11B) will be prepared and submitted to the OUSD (C) for the DHP. Formats for these exhibits are provided at the end of this chapter. Two printed copies and one electronic copy of each exhibit should be provided to the OUSD (C), P/B, Military Personnel Construction Directorate, Room 3C654, the Pentagon.

3.2.3. The required format for the PBA-9 is provided at Volume 2A, Chapter 3, Section 4.0.

3.2.4. The OP-5 exhibit and other supporting exhibits will be prepared for each of the following activities. Meaningful performance criteria should be displayed for each activity.

- In-House Care
- Private Sector Care
- Consolidated Health Support
- Information Management
- Management Activities
- Education and Training
- Base Operations/Communications

3.2.5. The ASD(HA) will prepare the DHP Volume 1 (Justification of Estimates), Volume 2 (Data Book), and Volume 3 (Services Medical Readiness Exhibits Activities). The Services will submit the data for Volume 3 (Service's Medical Readiness Activities) to ASD(HA), which will consolidate, and print the required exhibit. Prepare all exhibits and volumes following the annual President's Budget Submission Guidance instructions.

4.0 DEFENSE HEALTH PROGRAM SUBMISSION FORMATS

4.1 Purpose

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, the formats should be followed.

4.2 Unique Exhibits in Support of the Defense Health Program

VOLUME 2B, CHAPTER 13: “DEFENSE ENVIRONMENTAL RESTORATION”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by **blue** font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue and underlined font**.

The previous version dated **October 2008** is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Updated formatting to comply with the current administrative instructions.	Revision
All	Updated text throughout for clarity and to reflect updated office names.	Revision
1.1.1.1 – 1.1.1.5 (previous version)	Removed Defense Environmental Restoration Program goals.	Deletion
1.0	This paragraph was substantively revised to add an Overview, update the Purpose narrative, and add the required list of Authoritative Guidance information.	Revision/ Addition
2.0	Created paragraph to capture and update the definitions listed in paragraph 1.5 of the previous version.	Addition/ Revision
3.0	Moved and updated the Program and Budget Review Submission narratives listed in section 2.0 of the previous version.	Revision
4.0	Moved and updated the Congressional Justification/ Presentation narratives listed in section 3.0 of the previous version. Removed ENV 30 Part 3 (Performance Metrics).	Revision
Appendix A	Modified and combined the ENV 30 Parts 1 and 2 and renamed it to match the previously modified ENV 30. Updated the instructions for completing the ENV 30; the definitions, and business rules to match the previously modified instructions, definitions, and data matrices.	Revision/ Addition
Appendix B	Added appendix for the data matrices.	Addition

CHAPTER 13

DEFENSE ENVIRONMENTAL RESTORATION

*1.0 GENERAL

1.1 Overview

The Military Departments and applicable Defense Agencies with Defense Environmental Restoration Program (DERP) requirements use transfer account appropriations to fund DERP-eligible cleanup activities at active installations and Formerly Used Defense Sites (FUDS) properties. General funding policies are available in [Volume 2A, Chapter 1](#). Base Realignment and Closure (BRAC) appropriations to fund cleanup activities are addressed in [Chapter 7](#).

1.2 Purpose

1.2.1. This chapter provides instructions applicable to program and budget formulation for the Department's combined Program and Budget Review and congressional justification for Environmental Restoration Account (ERA) appropriations. This chapter contains instructions for providing the programming, budgeting, and performance data necessary to meet reporting requirements, respond to congressional concerns, and conform to Office of Management and Budget (OMB) guidance to link the Department's budget to the DERP performance goals for active installations and FUDS properties. This chapter also provides additional specific guidance for the required DERP backup material.

1.2.2. The appropriations eligible to receive funds from the Defense Environmental Restoration Transfer Accounts and their corresponding source for specific policies are listed below.

Operation and Maintenance (O&M) – [Volume 2A, Chapter 3](#)

Procurement – [Chapter 4](#)

Research, Development, Test, and Evaluation (RDT&E) – [Chapter 5](#)

1.3 Authoritative Guidance

The Department's Environmental Restoration programs must comply with the requirements prescribed by this chapter, in accordance with the applicable provisions of:

1.3.1. Title 10, United States Code, Chapter 160, ([10 U.S.C. Ch 160](#)), "Environmental Restoration"

1.3.2. [31 U.S.C.](#), "Money and Finance"

1.3.3. [42 U.S.C. Ch 103](#), "Comprehensive Environmental Response Compensation and Liability Act of 1980 (CERCLA)"

1.3.4. Resource Conservation and Recovery Act of 1976 ([RCRA](#))

1.3.5. Title 40, Code of Federal Regulations, Part 300 ([40 CFR 300](#)), “National Oil and Hazardous Substances Pollution Contingency Plan”

1.3.6. [DoD Directive \(DoDD\) 4715.1E](#), “Environment, Safety, and Occupational Health (ESOH)”

1.3.7. [DoD Instruction \(DoDI\) 4715.07](#), “Defense Environmental Restoration Program (DERP)”

1.3.8. [DoD Manual \(DoDM\) 4715.20](#), “Defense Environmental Restoration Program (DERP) Management”

*2.0 DEFINITIONS

2.1 Installation Restoration Program (IRP)

The IRP sub-element identifies funding associated with sites that require response actions to address releases of hazardous substances and pollutants or contaminants; petroleum, oil, or lubricants (POL) that create an imminent and substantial endangerment to the public health or to the environment; hazardous wastes or hazardous waste constituents; explosive compounds released to soil, surface water, sediment, or groundwater as a result of ammunition or explosives production or manufacturing at ammunition plants; and funding for response activities to address unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC) posing an explosive, human health, or environmental hazard that are incidental to an existing IRP site. This sub-element also identifies funding associated with the demolition and removal of unsafe buildings and structures and the removal of unsafe debris that meet the DERP general eligibility requirements in DoDM 4715.20.

2.2 Management

The Management sub-element identifies administrative and overhead funding associated with the DERP that cannot be attributed to individual sites (e.g., manpower).

2.3 Military Munitions Response Program (MMRP)

The MMRP sub-element identifies funding associated with sites (referred to as munitions response sites (MRSs)) that are known or suspected to contain UXO, DMM, or MC; and funding for response activities to address releases eligible under the IRP category that are incidental to an existing MRS. This sub-element does not include funding for operational ranges, operating storage and manufacturing facilities, and munitions resulting from combat, or facilities that are used for or were permitted for the treatment of disposal of military munitions.

*3.0 PROGRAM AND BUDGET REVIEW SUBMISSION

3.1 Guidance

This section provides guidance for the preparation and submission of the program [objective memorandum \(POM\)](#) and budget estimate submission (BES) for the DERP. The BES component consists of all O&M, Procurement, and [RDT&E](#) resources that support the DERP. The [Military Departments and applicable Defense Agencies](#) should consult all other relevant chapters for exhibit requirements that are not specifically addressed in this chapter, including Chapter 19, Other Special Analyses.

3.2 Submission Requirements

[3.2.1.](#) Volume 2A, Chapter 1 provides general submission guidance, including format, preparation of material, and copy requirements. This chapter covers specific backup material requirements for the DERP. [Under the authority, direction, and control of the Under Secretary of Defense for Acquisition and Sustainment \(USD\(A&S\)\) and through the Deputy Assistant Secretary of Defense for Environmental Management and Restoration \(DASD\(EMR\)\), the Assistant Secretary of Defense for Energy, Installations, and Environment \(ASD\(EI&E\)\) is responsible for identifying all submission requirements to support the DERP. The Military Departments and applicable Defense Agencies are responsible for programming and budgeting for all cleanup requirements in their respective organizations.](#)

[3.2.2.](#) The Department will collect both POM and BES data through the Select & Native Programming Data Input System (SNaP) process. For ERA appropriations, the Department will collect the Programming Data Requirements in the ENV 30 budget exhibit. In addition, the Military Departments and applicable Defense Agencies [must](#) develop separate narrative justification material (including program increases and decreases) for their respective programs as part of their POM/BES and [upload these materials in SNaP. Under the authority, direction, and control of the USD\(A&S\) and through the DASD\(EMR\), the ASD\(EI&E\) is responsible for commenting on and compiling the ENV 30 budget exhibits and narrative justification materials for the FUDS ERA and the Defense-wide ERA, which include non-BRAC funding for the ASD\(EI&E\) and Defense Logistics Agency \(DLA\).](#)

[3.2.3.](#) The Military Departments, applicable Defense Agencies, and the DASD(EMR) will submit data in accordance with the annual Office of Under Secretary of Defense (Comptroller) (OUSD(C)) guidance. Generally, POM/BES data are due in August or September each year.

[3.2.4.](#) In accordance with the schedule established by the DASD(EMR), the [Military Departments and applicable Defense Agencies](#) must provide appropriate updates to their DERP data as required by DoDI 4715.07, for each site regarding status, schedule, and cost to complete (CTC). [The Military Departments and applicable Defense Agencies will submit updated data to the official central DoD-wide system of record \(hereinafter referred to as the “DERP information system”\).](#)

3.2.5. The Military Departments, applicable Defense Agencies, and the DASD(EMR) are also responsible for providing data to update the Next Generation Resource Management System (NGRMS) and the Future Years Defense Program (FYDP) automated systems for the various ERA appropriations as identified in Volume 2A, Chapter 1, and for updating the OP-32 exhibit (Summary of Price and Program Change) identified in Volume 2A, Chapter 3.

3.2.6. Appendices A and B contain instructions for completing the ENV 30 budget exhibit, along with definitions and data matrices.

*4.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION

4.1 Guidance

This section provides guidance for the preparation and submission of the President's Budget data for the DERP to Congress. The President's Budget component consists of all O&M, Procurement, and RDT&E resources that support the DERP. The Military Department and applicable Defense Agencies should consult all other relevant chapters for exhibit requirements that are not specifically addressed in this chapter, including Chapter 19, Other Special Analyses.

4.2 Submission Requirements

4.2.1. The Military Departments, applicable Defense Agencies, and the DASD(EMR) will update SNaP immediately upon completion of the Resource Management Decisions and the Department's budget lock. In addition, the Military Departments and applicable Defense Agencies must provide the OUSD(C) with a revised narrative justification for their respective programs reflecting any changes from the POM/BES review. The SNaP system will format the data into congressional justification exhibits, which the Military Departments and applicable Defense Agencies can print out and include in their justification materials. Under the authority, direction, and control of the USD(A&S), through the DASD(EMR), the ASD(EI&E) is responsible for review, final approval, and consolidation of the congressional justification material and ENV 30 budget exhibits for the FUDS ERA and the Defense-wide ERA, which includes non-BRAC funding for the ASD(EI&E) and DLA.

4.2.2. The Military Departments, applicable Defense Agencies, and the DASD(EMR) will submit data in accordance with the annual OUSD(C) guidance. Generally, President's Budget data are due in January each year.

4.2.3. In accordance with the schedule established by the DASD(EMR), the Military Departments and applicable Defense Agencies must provide appropriate updates to their DERP data, reflecting any changes from the POM/BES review, as required by DoDI 4715.07 for each site regarding status, schedule, and CTC. The Military Departments and applicable Defense Agencies will submit updated data to the DERP information system.

4.2.4. [The Military Departments, applicable Defense Agencies, and the DASD\(EMR\)](#) are responsible for providing data to update the FYDP automated systems for the various ERA appropriations as identified in Volume 2A, Chapter 1, and for updating the OP-32 exhibit (Summary of Price and Program Change) identified in Volume 2A, Chapter 3.

4.2.5. Appendix A provides detailed instructions for completing the ENV 30 budget exhibit, along with definitions [and business rules](#). [Refer to the OUSD\(C\) annual guidance for any updates to these instructions](#).

4.2.6. [Appendix B provides data matrix for DoDComponent, FundSource, ActivityCategory, and Activity Relationship](#).

*APPENDIX A: INSTRUCTIONS, DEFINITIONS, AND BUSINESS RULES

ENV 30 DERA AND BRAC FUNDS FOR ENVIRONMENTAL CLEANUP

Class	FUDS	DoDComponent	FundSource	ActivityCategory	Activity	ResourceType	PY	EY	BY	BY+1	BY+2	BY+3	BY+4	BalanceToComplete
-------	------	--------------	------------	------------------	----------	--------------	----	----	----	------	------	------	------	-------------------

Instructions

- 1) The ENV 30 exhibit captures funding for DERP-eligible activities at IRP, MMRP, and Building Demolition/Debris Removal (BD/DR) sites, including site-specific requirements and program management; funding for BRAC Planning and Compliance activities; funds generated from the sale or lease of real property; obligations of prior year BRAC funds; reprogrammed funds; and the number sites funded or to be funded with the total obligational authority (TOA) for the activity in the applicable fiscal year.
- 2) Provide by DoD Component (Active, Defense Agency/Defense Wide, and BRAC), the total costs (TOA) and total number of sites funded or to be funded with the TOA by Fund Source, Activity Category, and Activity for the prior year (PY), execution year (EY), budget year (BY), BY+1 through BY+4, and the balance to complete (i.e., beyond the FYDP).
- 3) Report TOA in \$K (thousands) and the total number of sites in actual numbers. DO NOT report sites in thousands.
- 4) Only the Army will report FUDS data.
- 5) For Fund Sources “BRAC Planning” and “BRAC Compliance,” provide the number of installations in lieu of the number of sites. For Fund Sources “Environmental Restoration-Management,” “BRAC-Management,” “BRAC-Land Sale Revenue,” “BRAC-Prior Year Funds,” “Environmental Restoration-Reprogrammed Funds,” and “Environmental Restoration-Lease Proceeds,” reporting the total number of sites is not required.
- 6) BRAC Fund Sources include all rounds of BRAC.
- 7) Funding reported for the PY through BY+4 and the balance to complete should only include the reporting DoD Component’s program requirements and not the program requirements of another DoD Component (e.g., for Defense and State Memorandum of Agreement (DSMOA) funding, the Army should only report its DSMOA requirements and not those of the other DoD Components).
- 8) Include land sale revenue and prior year BRAC funds applied to each applicable activity in the TOA for the PY through BY+4 and the balance to complete. Report the total amount of land sale revenue and prior year BRAC funds applied to all activities for the PY through BY+4 and the balance to complete against the “Land Sale Revenue” and “Prior Year Funds” Fund Sources; SNaP will deduct these amounts from the BRAC totals to calculate the BRAC appropriated funding. Note that the land sale revenue and prior year BRAC funding for the PY should only include obligations that occurred during the PY and should not reflect the de-obligation of funds obligated in previous fiscal years. The de-obligation of funds obligated in previous fiscal years should be explained in accordance with the Word document requirement in paragraph 14.c below.

APPENDIX A: INSTRUCTIONS, DEFINITIONS, AND BUSINESS RULES (continued)

- 9) Include proceeds from the lease of real property at non-BRAC excess locations applied to each applicable activity in the TOA for the PY through BY+4 and the balance to complete. Report the total amount of proceeds from the lease of real property at non-BRAC excess locations applied to all activities for the PY through BY+4 and the balance to complete against the “Lease Proceeds” Fund Source; SNaP will deduct these amounts from the Environmental Restoration totals to calculate the Environmental Restoration appropriated funding. The use of proceeds from the lease of real property should be explained in accordance with the Word document requirement in paragraph 14.c. below.
- 10) Use the “Reprogrammed Funds” line to identify funds returned to the transfer account during the PY; received from the transfer account during the PY; and received, or to be received, from the transfer account in the EY/BY that are above and beyond the annual appropriation. Report the total amount of reprogrammed funds applied to all activities in the TOA for the PY through the BY, as appropriate, against the “Environmental Restoration-Reprogrammed Funds” Fund Source; SNaP will deduct these amounts from the Environmental Restoration totals to calculate the Environmental Restoration appropriated funding. The reprogramming actions should be explained in accordance with the Word document requirement in paragraph 14.c. below.
- 11) Program adequate resources in each year of the FYDP to achieve program goals.
- 12) Provide to the ODASD(EMR) (in accordance with the ODASD(EMR) data call schedules) updated DERP data for each site regarding status, schedule, and CTC, as required by DoDI 4715.07.
- 13) Ensure the POM/BES and President’s Budget submissions contain sufficient funding to annually update the inventory of defense sites that are known or suspected to contain UXO, DMM, or MC, as required by section 2710(a) of Title 10 U.S.C. and as specified in DoDM 4715.20.
- 14) Provide a narrative in a Word document that includes the following information:
 - a) An explanation of any significant fluctuations (i.e., +/- 25% or more) in the funding for the PY and EY as compared to the funding for those two years in the previous year’s President’s Budget submission. In addition, provide an explanation of any significant fluctuations (i.e., +/- 25% or more) in the balance to complete as compared to the balance to complete in the previous year’s President’s Budget submission. Provide a separate explanation for each of the following: Under the IRP category, the Investigation Subtotal, the Remedial Action (RA) Subtotal, and the IRP Subtotal; under the MMRP category, the Investigation Subtotal, the RA Subtotal, and the MMRP Subtotal; the Compliance Total; and the Management Subtotal. Include the calculated percent change in PY and EY funding, and the balance to complete, for each subtotal and total, regardless of whether the fluctuations were significant.
 - b) An explanation of any significant program increases or decreases (i.e., +/- 25% or more) from the EY to BY. Provide a separate explanation for each of the following: Under the IRP category, the Investigation Subtotal, the RA Subtotal, and the IRP Subtotal; under the MMRP category, the Investigation Subtotal, the RA Subtotal, and the MMRP Subtotal; the Compliance Total; and the Management Subtotal. Include the calculated percent change from the EY to BY for each subtotal and total, regardless of whether the program increases or decreases were significant.
 - c) An explanation of all reprogramming actions (including funds returned to the transfer account in the PY); cost recovery; lease proceeds; land sale revenue; the use of prior year funds for cleanup work at BRAC locations; and the de-obligation of land sale revenue and prior year BRAC funds obligated in previous fiscal years and that are now available to address future requirements.

APPENDIX A: INSTRUCTIONS, DEFINITIONS, AND BUSINESS RULES (continued)

- d) A justification of why there is a need for appropriated funding in the BY, if the available unobligated balance for the BY exceeds the amount in the budget request.
- e) An explanation of variances between the ENV 30 budget exhibit and the Environmental totals submitted in the BC-04 exhibit.

15) See Appendix A on the SNaP Website for reporting requirements for your organization.

S/NF: SECRET//NOFORN

U: UNCLASSIFIED

FUDS: Closed List. Used by the Army to identify FUDS data.

No

Yes

DoDComponent: Closed List. Identifies the Military Department or Defense Agency whose data are presented on the exhibit. For the Military Departments, report by Active (including Guard and Reserve) and BRAC. The Defense Agencies should select “Defense Agency/Defense Wide.” The Army will report FUDS.

Active: Used by the Military Departments and includes Active Guard and Reserve Components.

BRAC: Used by the Military Departments to report BRAC.

DADW: Defense Agency/Defense Wide. Used by non-service defense agencies.

FundSource:

BRAC-Compliance: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Includes funding for hazardous waste permits and other similar permits that are not associated with site cleanup. See DoDI 4715.06, *Environmental Compliance in the United States*.

BRAC-IRP: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Identifies funding associated with sites that require response actions to address releases of hazardous substances and pollutants or contaminants; POLs that create an imminent and substantial endangerment to the public health or to the environment; hazardous wastes or hazardous waste constituents; and explosive compounds released to soil, surface water, sediment, or groundwater as a result of ammunition or explosives production or manufacturing at ammunition plants; and response activities to address UXO, DMM, or MC posing an explosive, human health, or environmental hazard that are incidental to an existing IRP site.

APPENDIX A: INSTRUCTIONS, DEFINITIONS, AND BUSINESS RULES (continued)

BRAC-Land Sale Revenue: Identifies funds recovered from the sale of real property and used to offset cleanup funding requirements.

BRAC-Management: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Identifies administrative and overhead funding associated with the DERP that cannot be attributed to individual sites (e.g., manpower). This sub-element excludes funding for requirements that are not associated with site cleanup, such as Compliance-related cleanup, hazardous waste and other similar permits, and National Environmental Policy Act (NEPA) activities.

BRAC-MMRP: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Identifies funding associated with sites (referred to as MRSs) that are known or suspected to contain UXO, DMM, or MC; and response activities to address releases eligible under the IRP category that are incidental to an existing MRS. This sub-element does not include funding for operational ranges, operating storage and manufacturing facilities, and munitions resulting from combat.

BRAC-Planning: Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Includes funding for all NEPA requirements.

BRAC-Prior Year Funds: Identifies funds obligated/to be obligated from prior year BRAC appropriations.

Environmental Restoration-IRP: Funded by Environmental Restoration appropriations. Identifies funding associated with sites that require response actions to address releases of hazardous substances and pollutants or contaminants; POLs that create an imminent and substantial endangerment to the public health or to the environment; hazardous wastes or hazardous waste constituents; and explosive compounds released to soil, surface water, sediment, or groundwater as a result of ammunition or explosives production or manufacturing at ammunition plants; and response activities to address UXO, DMM, or MC posing an explosive, human health, or environmental hazard that are incidental to an existing IRP site. Also identifies funding associated with the demolition and removal of unsafe buildings and structures and the removal of unsafe debris that meet the DERP general eligibility requirements in DoDM 4715.20.

Environmental Restoration-Lease Proceeds: Identifies proceeds from the lease of real property at non-BRAC excess locations and used to offset cleanup funding requirements.

Environmental Restoration-Management: Funded by Environmental Restoration appropriations. Identifies administrative and overhead funding associated with the DERP that cannot be attributed to individual sites (e.g., manpower).

Environmental Restoration-MMRP: Funded by Environmental Restoration appropriations. Identifies funding associated with sites (referred to as MRSs) that are known or suspected to contain UXO, DMM, or MC; and response activities to address releases eligible under the IRP category that are incidental to an existing MRS. This sub-element does not include funding for operational ranges, operating storage and manufacturing facilities, and munitions resulting from combat, or facilities that are used for or were permitted for the treatment or disposal of military munitions.

Environmental Restoration-Reprogrammed Funds: Identifies funds returned to the transfer account during the PY; received from the transfer account during the PY; and received, or to be received, from the transfer account in the EY/BY that are above and beyond the annual appropriation.

APPENDIX A: INSTRUCTIONS, DEFINITIONS, AND BUSINESS RULES (continued)

ActivityCategory: Closed List. The environmental activity category supporting the fund source.

Compliance:

Investigation:

Land Sale Revenue:

Lease Proceeds:

Management:

Planning:

Post RA:

Prior Year Funds:

Remedial Action (RA):

Reprogrammed Funds:

Activity: Closed List. The environmental activity associated to the activity category.

Building Demolition/Debris Removal: Refers to the demolition and removal of unsafe buildings and structures and the removal of unsafe debris that meet the DERP general eligibility requirements in DoDM 4715.20.

Compliance: Refers to activities associated with closure-related procedures necessary to achieve compliance with applicable Executive Orders and Federal, State, inter-state, regional, and local statutory and regulatory environmental requirements at BRAC locations.

DSMOA: Includes funding for State support under the DSMOA. Also includes funding for alternative approaches to the DSMOA for reimbursing costs of State DERP related services, in accordance with the requirements in DoDM 4715.20.

EPA Funding: Includes payments from the Navy to the U.S. Environmental Protection Agency (EPA) for support at Hunters Point.

Interim Remedial Actions: Refers to the interim remedial action (IRA) phase of cleanup. The IRA is a remedial action undertaken prior to the selection of the final remedy as a part of a larger remedy.

Land Sale Revenue: Identifies funds recovered from the sale of real property and used to offset cleanup funding requirements.

Lease Proceeds: Identifies proceeds from the lease of real property at non-BRAC excess locations and used to offset cleanup funding requirements.

Long-Term Management: Refers to the long-term management (LTM) phase of cleanup. LTM involves environmental monitoring, review of site conditions, and maintenance of a remedial action to ensure continued protection as designed once a site achieves Response Complete. LTM includes the operations and maintenance measures required to maintain the effectiveness of response actions. LTM should be used until no further environmental restoration response actions are appropriate or anticipated.

Manpower - Contractor: Includes funding that is not directly attributable to sites for contractor employees who support the management of the environmental cleanup program.

Manpower - Government: Includes funding that is not directly attributable to sites for government civilian employees who support the management of the environmental cleanup program.

APPENDIX A: INSTRUCTIONS, DEFINITIONS, AND BUSINESS RULES (continued)

Other: Includes funding for all other Program Management requirements (i.e., management plans, base-wide studies, Information Technology, travel, training, Interstate Technology & Regulatory Council support, support for specialized technical issues, Agency for Toxic Substances and Disease Registry health assessments and health studies).

Planning: Refers to activities associated with the process of identifying and considering environmental factors that impact on, or are impacted by, planned DoD activities or operations at BRAC locations.

Potentially Responsible Parties: Refers to a site where DoD pursues a potentially responsible party when associated with the Investigation activity category. Refers to activities at a site where DoD may bear potential liability for hazards or hazardous substance releases along with other parties when associated with the RA activity category.

Preliminary Assessment/Site Inspection: Refers to the preliminary assessment (PA) and site inspection (SI) phases of cleanup. The PA is a review of existing information about a release such as information on pathways of exposure, exposure targets, and source and nature of release. The SI builds upon the PA and involves, as appropriate, on- and off-site field investigatory efforts including sampling.

Prior Year Funds: Identifies funds obligated/to be obligated from prior year BRAC appropriations.

Project Closeout: Refers to project closeout (PCO). PCO involves the shutting down/dismantling of remedial actions, seeking regulator concurrence, and closeout reports.

Remedial Action Construction: Refers to the remedial action construction (RA-C) phase of cleanup. The RA-C represents the period of time during which a response action is being implemented but is not yet operating as designed. At the end of this phase of work, a remedy is in place.

Remedial Action Operations: Refers to the remedial action operation (RA-O) phase of cleanup. The RA-O represents the period of time that a selected remedy must operate before achieving remedial action objectives. At the end of this phase of work, the response is complete.

Remedial Design: Refers to the remedial design (RD) phase of cleanup. The RD involves the development of the actual design of the selected remedy.

Remedial Investigation/Feasibility Study (including Records of Decision/Decision Documents): Refers to the remedial investigation (RI) and feasibility study (FS) phases of cleanup. The RI involves collecting data to characterize site conditions, determine the nature of the waste, assess risk to human health and the environment, and conduct treatability testing to evaluate the potential performance and cost of the treatment technologies that are being considered. The FS is the mechanism for the development, screening, and detailed evaluation of alternative remedial actions. Include the TOA associated with developing Records of Decision/Decision Documents with the TOA for the RI/FS phases.

Reprogrammed Funds: Identifies funds returned to the transfer account during the PY; received from the transfer account during the PY; and received, or to be received, from the transfer account in the EY/BY that are above and beyond the annual appropriation.

APPENDIX A: INSTRUCTIONS, DEFINITIONS, AND BUSINESS RULES (continued)

ResourceType: Closed List. The type or resources (TOA or Number of Sites/Installations) associated to the Fund Source.

Installations: Total number of installations funded or to be funded for the activity with the TOA. Applies to the “BRAC-Planning” and “BRAC-Compliance” Fund Sources only.

Sites: Total number of sites funded or to be funded for the activity with the TOA.

TOA: Total funding required to complete the activity.

Business Rules

- 1) For Fund Sources “Environmental Restoration-Management,” “BRAC-Management,” “BRAC-Land Sale Revenue,” “BRAC-Prior Year Funds,” “Environmental Restoration-Reprogrammed Funds,” and “Environmental Restoration-Lease Proceeds,” the reporting of the total number of sites is not required.
- 2) Only Army will provide “FUDS” data.
- 3) For DoD Components “Active” and “DADW,” the Activity “EPA Funding” must be blank when Fund Source “Environmental Restoration-Management” and Activity Category “Management” are selected. For DoD Components “BRAC” and “DADW,” the Activity “EPA Funding” must be blank when Fund Source “BRAC-Management” and Activity Category “Management” are selected by a DoD Component other than the Navy.

CHAPTER 14

DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES, DEFENSE

*1.0 GENERAL

1.1 Overview

1.1.1. The Department of Defense (DoD) Counternarcotics program provides appropriation for four budget activities: Counter-Narcotics Support, Drug Demand Reduction Program, National Guard Counter-Drug Program, and National Guard Counter-Drug Schools. The funds are appropriated to the Department's Central Transfer Account (CTA) titled "Drug Interdiction and Counter-Drug Activities, Defense." This CTA is funded as an Operation and Maintenance (O&M) appropriation but can be executed in another appropriation (e.g., Research, Development, Test, and Evaluation or Procurement), as deemed appropriate. This CTA also supports centralized budgeting and oversight, while allowing funds to be executed across the entire range of DoD Military Departments, Combatant Commands, and Combat Support Agencies.

1.1.2. Counter-Narcotics Support budget activity includes detect and monitor of aerial and maritime transit, and counter the production, trafficking, and use of illegal drugs into the United States.

1.1.3. The Drug Demand Reduction Program budget activity includes prevention, education, and outreach to ensure the dangers of drug abuse and misuse within the DoD are understood, prevented, identified, and treated to keep the fighting force at the highest levels of readiness.

1.1.4. The National Guard Counter-Drug Program budget activity includes support State National Guard assistance to Federal, State, tribal, and local law enforcement agencies, and community-based organizations in efforts to disrupt and degrade illicit drug production and trafficking within the United States.

1.1.5. The National Guard Counter-Drug Schools budget activity funds the operation of five National Guard counter-drug schools, which provide counter-drug and related counter transnational organized crime courses of instruction to Federal, State, local and community-based organizations from the 50 states, three territories, and the District of Columbia.

1.2 Purpose

This chapter provides instructions applicable to budget formulation and congressional justification for Drug Interdiction and Counter-drug Activities, Defense. This chapter also provides specific guidance and templates relative to the preparation of exhibits for budget presentation.

1.3 Authoritative Guidance

The financial management and requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.1. Title 5, United States Code, section 7301, (5 U.S.C. § 7301), “Presidential Regulations;”

1.3.2. 10 U.S.C. § 124, “Detection and Monitoring of Aerial and Maritime Transit of Illegal Drugs: Department of Defense to be Lead Agency;”

1.3.3. 10 U.S.C. § 284, “Support for Counterdrug Activities and Activities to Counter Transnational Organized Crime;”

1.3.4. 10 U.S.C. § 978, “Drug and Alcohol Abuse and Dependency: Testing of New Entrants;”

1.3.5. 32 U.S.C. § 112, “Drug Interdiction and Counter-Drug Activities;”

1.3.6. 2004 National Defense Authorization Act section 1022, (2004 NDAA § 1022), “Authority for joint task forces to provide support to law enforcement agencies conducting counter-terrorism activities,” as amended;

1.3.7. 2005 NDAA § 1021, “Use of funds for unified counterdrug and counterterrorism campaign in Colombia,” as amended; and

1.3.8. Executive Order 12333 (E.O. 12333), “United States Intelligence Activities.”

*2.0 RESPONSIBILITIES

The Office of the Deputy Assistant Secretary of Defense (Counternarcotics Stabilization and Policy) (ODASD/CNSP) is responsible for all submission requirements for this program. The Components are responsible for providing all needed input to ODASD(CNSP) consistent with the submission requirements and due dates established by ODASD(CNSP).

*3.0 PROGRAM AND BUDGET REVIEW (PBR) SUBMISSION

3.1 Preparation of Material

Volume 2A, Chapter 1 provides general guidance for format and preparation of material. Volume 2B, Chapter 14 provides additional specific guidance for the required back-up materials.

3.2 References

Volume 2A, Chapter 1 provides general funding policies. Volume 2A, Chapter 3 provides specific policies and formats related to O&M appropriation. Volume 2B, Chapter 16 provides specific instructions applicable to budget formulation, implementation and congressional justification for intelligence program aggregations, and is applicable to the

Defense Intelligence Counternarcotics Program (DICP) of the Military Intelligence Program (MIP) aggregation. (See Volume 2A, Chapters 1 and 3, and Volume 2B, Chapter 16).

3.3 PBR Exhibits

The DoD counternarcotics program will be financed in a CTA appropriated with O&M funds. The following exhibits are required for the OSD PBR submission.

Volume I – Justification of O&M Estimates

PBA-19	Introductory Statement (Appropriation Highlights) (Chapter 3)
O-1	Appropriation Summary (Chapter 3)
OP-32A	Summary of Price and Program Changes (Chapter 3) (automated submission also required)
PB-31R	Personnel Summary (Chapter 3)
PB-31D	Summary of Funding Increases and Decreases (Chapter 3)
OP-5	Detail by Subactivity Group (Chapter 3)

Volume II – Data Book

OP-8 Part 1	Civilian Personnel Summary (Chapter 3)
PB-31Q	Manpower Changes in Full-Time Equivalents (Chapter 3)
PB-15	Contract Advisory and Assistance Services (Chapter 19)
OP-32E	Contract Services Reports (C-1) (Chapter 3)

Additional Accompanying Exhibits

PB-57	Office of National Drug Control Policy (Chapter 14)
PB-45	Project Codes by Component and Fiscal Year (Chapter 14)
PB-47	Project Definitions (Chapter 14)
PB-44	Authorities (Chapter 14)

*4.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION

The ODASD(CNSP) must include the following exhibits in the justification material to Congress. Copy requirements are identified in Volume 2A, Chapter 1. Examples of budget exhibits can be found in paragraph 5.0 or as identified on this list:

Volume I – Justification of O&M Estimates

PBA-19	Introductory Statement (Appropriation Highlights) (Chapter 3)
O-1	Appropriation Summary (Chapter 3)
OP-32	Summary of Price and Program Changes (Chapter 3) (automated submission also required)
PB-31R	Personnel Summary (Chapter 3)
PB-31D	Summary of Funding Increases and Decreases (Chapter 3)
OP-5	Detail by Subactivity Group (Chapter 3)

Volume II – Data Book

OP-8 Part 1	Civilian Personnel Summary (Chapter 3)
PB-15	Contract Advisory and Assistance Services (Chapter 19)
OP-32E	Contract Services Reports (C-1) (Chapter 3)

Additional Accompanying Exhibits

PB-57	Office of National Drug Control Policy (Chapter 14)
PB-45	Project Codes by Component and Fiscal Year (Chapter 14)
PB-47	Project Definitions (Chapter 14)
PB-44	Authorities (Chapter 14)

***5.0 DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES SUBMISSION FORMATS**

The formats provided on the following pages reflect guidance presented in [paragraphs 3.0 and 4.0](#). Unless modified in a submission budget call, adhere to these formats.

CHAPTER 15

OVERSEAS COST REPORT

1.0 GENERAL

1.1 Purpose

1.1.1. This chapter provides instructions applicable to congressional justification material for the Overseas Cost Report which consists of the OP-53 Exhibit (Overseas Funding).

1.1.2. The following appropriations and accounts are covered in the scope of the subsections of the Overseas Cost Report:

1.1.2.1. Military Personnel appropriations (including Reserves and National Guard)

1.1.2.2. Operation and Maintenance appropriations

1.1.2.3. Family Housing Construction and Family Housing Operations appropriations

1.1.2.4. Military Construction appropriations

*1.2 Authoritative Guidance

The instructions and related requirements prescribed in this chapter are derived primarily from, and in accordance with Title 10, United States Code, section 113 ([10 U.S.C. §113](#)).

1.3 Submission Requirements

Chapter 1 provides the general guidance about submission requirements for justification material. Chapter 15 covers specific material requirements for the Overseas Cost Report (See Volume 2A, Chapter 1 of this regulation).

1.4 Preparation of Material

Chapter 1 stipulates the general guidance concerning format and preparation of material. Chapter 15 provides additional specific guidance with regard to the material required for the Overseas Cost Report (See Volume 2A, Chapter 1 of this regulation).

1.5 References

Chapter 1 provides general funding policies, Chapter 2 provides specific policies related to Military Personnel appropriations, Chapter 3 provides specific policies related to Operation and Maintenance costs, Chapter 6 provides specific policies and formats related to Military Construction and Family Housing appropriations, and Chapter 9 provides specific policies and

formats related to Revolving Funds. (See Volume 2A, Chapters 1 - 3 and Volume 2B, Chapter 6, and 9-10).

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION

2.1 General

General guidance with regard to submission requirements is presented in Chapter 1. Service components and Defense Agencies and Field Activities will submit the OP-53, Overseas Cost Report for the OSD Program/Budget Estimates Submission.

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION

3.1 Purpose

This Section presents the exhibit requirement for submission to Congress and formats for the Overseas Cost report. Section 8125 of the FY 1989 DoD Appropriations Act (P.L. 100-463) as codified in 10 U.S.C. §113, requires that the Department of Defense separately identify the amounts necessary for payment of all personnel, operations, maintenance, facilities, and support costs for all DoD overseas military units and the costs of supporting all dependents who accompany DoD personnel outside the United States.

3.2 Submission Requirements

3.2.1. The Overseas Cost Report consists of the OP-53 exhibit (Overseas Funding). Chapter 1 contains general guidance on congressional justification material.

3.2.2. The OP-53 addresses all funding and personnel resources related to overseas activities as defined below.

* 3.2.3. The OP-53 data will be entered into and collected through the Office of the Director of Cost Assessment and Program Evaluation's (CAPE) Select & Native Programming Data Input System (SNaP). SNaP is available on unclassified network at <https://snap.cape.osd.mil/> and classified <https://snap.cape.osd.smil.mil/home.aspx>. The electronic submission will be the official submission of this exhibit.

* 3.2.4. The Military Departments will report all military personnel permanently assigned overseas and associated costs to include those assigned to Defense Agencies and Field Activities. Therefore, the Defense Agencies should not report data citing military personnel appropriations or line items. All Military Departments, Defense Agencies, and Field Activities must complete the OP-53 input for each country regardless of total annual costs.

3.3 Definitions

The following definitions pertain to the costs to be included in Military Department and Defense Agency input:

3.3.1. Overseas costs will include amounts only from the following appropriations: military personnel; operation and maintenance; family housing operation and maintenance; family housing construction; and military construction.

3.3.2. Overseas amounts include the appropriated support of all DoD activities located outside the United States that are being performed on a permanent basis at U.S. military bases and other locations (U.S. Embassy, U.S. Consulates, U.S. Mission, etc). Components must ensure to report costs and number of United States Foreign and National Direct and Foreign National Indirect full-time equivalents.

3.3.3. Overseas amounts also include the cost of transporting personnel, material, and equipment to and from permanent overseas locations. The overseas amounts do not include incremental costs associated with contingency operations.

3.3.4. The United States includes all 50 states, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States (e.g., Guam, U.S. Virgin Islands, Puerto Rico, and Northern Mariana Islands).

3.3.5. Military and civilian personnel amounts will be based on the number of personnel assigned to permanent duty ashore outside the United States. Accordingly, personnel on temporary duty outside the United States are not included in the overseas amounts. Because personnel assigned to the deployed fleet are excluded from overseas troop strengths, amounts for deployed steaming days are not included.

3.3.6. Generally, funding for DoD activities in the United States in support of overseas activities is excluded. For example, overseas amounts exclude the funding of depot maintenance performed in the United States on components/aircraft used by an overseas unit. Similarly, flight/specialized training that is conducted in the United States would be excluded.

4.0 OVERSEAS COST REPORT SUBMISSION FORMATS

4.1 Purpose

The [information](#) provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

*4.2 Exhibits in Support of Overseas Cost Report

OP-53 Overseas Funding

*Exhibit OP-53 Overseas Funding

Class CountryCode ResourceType ManpowerType TreasuryCode BACode PY CY BY

Description of Data Elements: The Components should provide the following data elements for each appropriation and operation/activities financed with the funding identified. Updated guidance on the OP-53 exhibit can be found on the SNaP website by clicking the “Instructions” tab, then selecting the “Data Requirements.” (<https://snap.cape.osd.mil>)

A. Class: The Class data element is the classification of the data entered in the row.

B. CountryCode: The Country Code is a three-digit alphabetical code used to represent a country name. The Country Code list can be found on the SNaP website within the OP-53 Overseas Report Instructions document.

C. ResourceType: Identify the resource type for each appropriation and operation/activity. The resource type will be either a Total Obligation Authority (TOA) or manpower. If the resource type is TOA, select manpower type N/A. If the resource type is manpower, then select the manpower type civilian, enlisted, or officer.

D. ManpowerType: Identify funding by appropriation and manpower type. The manpower type list includes civilian, enlisted, officer, or N/A. Select manpower type N/A only when the resource type is TOA.

E. TreasuryCode: Treasury Code is a defined set of four-to-six digit numeric codes from the Comptroller that identifies resource types. The list of Treasury Code values can be found on the SNaP web site website by clicking the "Instructions" tab, then selecting the "Documents". The document is named “Appropriations List”. (<https://snap.cape.osd.mil>)

F. BA Code: Budget Activity is a two-digit identifier for the categories within each appropriation and fund account to identify the purposes, projects, or types of activities financed by the appropriation. Utilize applicable BA codes (e.g. Military Personnel appropriations should include costs associated with BA01 (Officer Pay and Allowance), BA02 (Enlisted Pay and Allowances), BA04 (Subsistence of Enlisted Personnel – Basic Allowance for Subsistence only), and BA05 (Permanent Change of Station Travel).

G. PY, CY, and BY: For Past Year (PY), Current Year (CY), and Budget Year (BY) provide direct funding by Country for payment of all military personnel, operation and maintenance, military construction, and family housing. of all DoD activities located outside the United States that are being performed on a permanent basis at U.S. Military bases and other locations (U.S. Embassy, U.S. Consulates, U.S. Mission, etc.) Overseas amounts also include the cost of transporting personnel, material, and equipment to and from permanent overseas locations. The overseas amounts do not include incremental costs associated with contingency operations.

Military construction costs will be computer generated from the Program Resources Collection Process for the OP-53 display. Data on this exhibit must match the Family Housing(Construction &

Operation and Maintenance) and Military Construction data in the Construction Programs (C-1) budget exhibit submitted in support of the President's budget.

*Definitions: Overseas Personnel and Related Costs Categories

U.S. Personnel

Categories

Description

1. American Salaries: Includes salary costs for full-time U.S. direct hires overseas.
2. Benefits: Includes standard benefits costs for full-time U.S. direct hires overseas, such as retirement contributions, health insurance, life insurance, and [Federal Insurance Contributions Act](#) payments.
3. Overtime/Availability Pay: Includes costs for overtime pay and Law Enforcement availability pay for U.S. direct hires overseas.
4. Danger Pay: Includes costs for Danger Pay Allowance, calculated as a percentage of basic compensation (15, 20 or 25%) paid for imminently dangerous conditions when the official U.S. community is the target of political violence.
5. Language Incentive Pay: Includes costs of language incentive pay to U.S. direct hires overseas.
6. Post (Cost of Living) Allowance: Includes costs for Cost of Living Adjustments (COLA) for U.S. direct hires overseas.
7. Difficult to Staff Incentive Differential (DTSID): Includes costs for the DTSID allowance, which is calculated as a percentage of basic compensation (15%) for serving at a determined difficult to staff post which has a 15%, 20% or 25% Post (“Hardship”) Differential.
8. Post (“Hardship”) Differential: Includes costs for post differential allowance, which is calculated as a percentage of basic compensation (5%, 10%, 15%, 20% and 25%) for environmental conditions significantly worse than the U.S. In addition to being paid to permanently assigned personnel.
9. Separate Maintenance Allowance (SMA): Includes cost for involuntary and voluntary SMA, which is paid when family members are prohibited from residing at a foreign post or when family members may go to a foreign post but opt not to for personal reasons.
10. Special Differential: Special differentials are available to Foreign Service officers who are required because of the nature of their assignments to perform additional work on a regular basis in substantial excess of normal requirements ([22 U.S.C. § 3972](#)).
11. Pay and Allowance: Includes MILPERS costs for military personnel assigned overseas at a U.S. Embassy, U.S. Consulate or U.S. Mission.
12. Housing: Includes costs for overseas housing for U.S. direct hires, including rents, leases, housing pool costs, and/or allowances provided for private leased quarters in lieu of Government provided housing.

Definitions: Overseas Personnel and Related Costs Categories (Continued)

13. Residential furnishings/Equipment (DPC only): Includes costs of residential furnishings, equipment, and appliances.
14. Education Allowance (DPC only): Includes costs for the education expenses for U.S. direct hire dependents (K-12) overseas.
15. Educational Travel (DPC only): Includes costs for one round trip annually between school attended in the U.S. and the foreign post of assignment.
16. [Permanent Change of Station \(PCS\)](#) Travel (employee & family moving expenses): Includes costs associated with [PCS](#) travel of employees and eligible family members, shipment of household effects and privately-owned vehicles, and placement of household effects into storage.
17. Rest and Recuperation (R&R) Travel: Includes the costs of R&R travel provided for U.S. direct hires overseas.
18. Home Leave Travel: Includes costs of travel for U.S. Direct Hires overseas to provide overseas employees the opportunity to spend significant periods of time in the United States while pursuing careers overseas.
19. Office Furnishings/Equipment/Information Management: Includes agency costs for the purchase and maintenance of office furnishings and equipment, such as computers, phones, computer networks, copiers, and communications equipment, including classified networks.
20. Office Leases: Includes the costs of all leased office space (off embassy/consulate compound) overseas.
21. Miscellaneous Office Expenses: Includes non-programmatic miscellaneous office expenses, such as utilities and supplies.
22. [International Cooperative Administrative Support Services \(ICASS\)](#) Charges: Includes costs of participation in ICASS.
23. Field Travel: Includes costs of all field travel conducted by U.S. direct hires overseas.
24. Representation: Includes costs for representation overseas in furthering the interests of the United States.
25. Security: Includes the costs of guards, alarms, cameras, etc. NOT covered under ICASS.
26. Other: Includes costs not captured above, such as language and other training, vehicles, agency specific benefits or allowances not included above, medical costs (physicals), etc. Please identify the items calculated as part of this category.

Definitions: Overseas Personnel and Related Costs Categories (Continued)

<u>Staffing</u>	<u>Description</u>
	<ul style="list-style-type: none">• <u>Full-time Permanent U.S. Direct Hires</u>: Full-time, permanent U.S. direct hire personnel• <u>US Military Personnel</u>: U.S. military personnel (services members)• <u>US-contracted PSCs</u>: Personal services contractors (PSCs) hired from the United States and stationed overseas, eligible for similar support benefits (i.e., travel, housing, etc.) as U.S. direct hires.• <u>Foreign Service National (FSN)</u>: An FSN employee is a non-U.S. citizen directly hired by a U.S. mission• <u>Local Personal Services Contractors (PSCs) or Personal Services Agreement (PSAs)</u>: Individuals contracted locally to perform an identifiable task under the supervision and control usual to government employees rather than to furnish an end item of supply (U.S. citizen hired locally as a PSC should be accounted for under category no. 31).• <u>Third Country Nationals (TCNs)</u>: Individuals who are neither citizens of the United States nor of the country in which employed, who are employed on a limited appointment or personal services contract, and who are eligible for return travel at U.S. Government expenses to their home country or country from which recruited.• <u>Locally Hired Americans, including Eligible Family Members</u>: U.S. citizens (AMCITs) hired locally as temporary employees or PSC personnel.• <u>Long-term / rolling TDY positions</u>: (A TDY position is defined as any position requiring workspace (desk or non-desk) for more than six months in a year or positions routinely filled by TDY personnel on a rotating basis, even though no individual ever stays for more than six months).
