*See Capital Improvements/Enhancements in paragraph 250205 .		

2.6.3. The event that triggers the calculation of depreciation is the date of receipt shown on the asset receiving document in cases where no installation is required; the date installed (if required); or the date the asset is available for use, also known as the acceptance date (regardless of whether it is actually used). Generally, the actual commencement of depreciation will be based on the Month Available for Service method. Under this method, the month the asset was accepted, installed, or available for use as applicable, is the month used to commence the calculation of depreciation expense for the first year.

2.6.4. DoD policy permits only the use of the straight line method of depreciation. In some cases, exceptions can be made to using the straight line method. Straight line depreciation expense is calculated as the depreciable basis (recorded cost less salvage value, if applicable) divided equally among accounting periods during the asset's useful life based on useful lives in Table 25-2. DoD Components may desire to depreciate certain weapon systems using an activity based or usage based method of depreciation. Activity based depreciation, referred to in DoD as Operational Tempo (OPTEMPO) recognizes changes in expected utilization rates and fatigue caused by operating environment and mission as set forth in the OPTEMPO methodology. DoD Components wanting to implement the OPTEMPO methodology for a certain weapon system should submit an approved written request from the DoD Component's Accounting Policy Office to the OUSD(C)/ODCFO for approval to proceed.

2.6.5. If an asset remains in use longer than its estimated useful life, it must be retained in the APSR, as well as the accounting records, and reflect both its recorded cost and accumulated depreciation until disposition of the asset.

2.6.6. WCF activities are required to depreciate general equipment assets in accordance with the guidance in this chapter without regard to whether such assets are procured through a WCF activity's Capital Purchase/Investment Program budget or whether depreciation for such assets is included in rates charged to customers. The recognition of general equipment assets and the depreciation of such assets by WCF activities therefore may be different for financial statement reporting purposes than the depreciation amounts used for WCF rate development and budget presentation. All general equipment depreciation of WCF activities must be recognized as an expense on the Statement of Net Cost, included in accumulated depreciation amounts on the Balance Sheet, and reported in the "Defense Working Capital Fund Accounting Report [Accounting Report (Monthly) 1307] (AR(M)1307)." Depreciation recorded on general equipment that was not acquired nor will be replaced through use of Defense WCF resources must be classified as non-recoverable for rate setting purposes and reported appropriately on the AR (M) 1307. Defense WCF rates charged to customers are based on guidance in Volume 2B and Volume 11B.

2.7 Impairment (250207)

2.7.1. Description. SFFAS 44 defines impairment as a significant and permanent decline in the service utility of general equipment (which includes general equipment assets) or expected service utility of CIP that results from events or changes in circumstances that are not considered normal and ordinary.

2.7.1.1. See subparagraph [250207.B.2](#) for a discussion of determining the significance and permanence of a service utility decline.

2.7.1.2. The service utility of general equipment is the usable capacity that, at acquisition, was expected to be used to provide service. The current usable capacity of general equipment may be less than its original usable capacity due to the normal or expected decline in useful life or to impairing events or changes in circumstances, such as physical damage, obsolescence, enactment or approval of laws or regulations or other changes in environmental or economic factors, or changes in the manner or duration of use.

2.7.1.3. Normal and ordinary events or circumstances are those that fall within the expected useful life of the general equipment such as standard maintenance and repair requirements. Events or circumstances that are not considered normal are those that, at the time the general equipment was acquired, the event or change in circumstance would not have been expected to occur during the useful life of the general equipment or, if expected, was not sufficiently predictable to be considered in estimating the general equipment's useful life.

2.7.2. Identification of Potential Impairment Loss. The determination of whether general equipment remaining in use is impaired is a two-step process which includes (1) identifying potential impairment indicators and (2) testing for impairment.

2.7.2.1. Step 1 - Identify Indicators of Potential Impairment. Indicators of potential impairment can be identified and brought to DoD Component's attention in a variety of ways, such as procedures related to DM&R. Although DoD Components are not required to establish additional or separate procedures beyond those that may already exist, they should evaluate existing processes and internal controls to determine if they are sufficient to reasonably assure the identification of potential impairment indicators and implement appropriate additional processes and internal controls if necessary. Once identified, indicators are not conclusive evidence that a measurable or reportable impairment exists; DoD Components should carefully consider the surrounding circumstances to determine whether a test of potential impairment is necessary given the circumstances. Some common indicators of potential impairment include:

2.7.2.1.1. Evidence of physical damage;

2.7.2.1.2. Enactment or approval of laws or regulations which limit or restrict general equipment usage;

2.7.2.1.3. Changes in environmental or economic factors;

2.7.2.1.4. Technological changes or evidence of obsolescence (however, if obsolete general equipment continues to be used, the service utility expected at acquisition may not be diminished);

2.7.2.1.5. Changes in the manner or duration of use of general equipment;

2.7.2.1.6. Construction stoppage or contract termination; and

2.7.2.1.7. General equipment idled or unserviceable for excessively long periods.

2.7.2.2. Step 2 - Impairment Test. Identified general equipment should be tested for impairment by determining whether these two factors are present: (i) the magnitude of the decline in service utility is significant and (ii) the decline in service utility is expected to be permanent.

2.7.2.2.1. Significant declines in service utility are those that cause costs (including operational and maintenance costs) to be disproportionate to the new expected service utility. The determination of whether or not an item is significant is a matter of professional judgement and is distinct from materiality considerations. Such judgements may be based on the relative costs of providing the service before and after the decline, the percentage decline in service utility, or other considerations.

2.7.2.2.2. The decline in service utility is considered permanent when the DoD Component has no reasonable expectation that the lost service utility will be replaced or restored; that is, the DoD Component expects that the general equipment will remain in service so that its remaining service utility will be utilized. In contrast, reasonable expectation that the lost service utility will be replaced or restored may exist when the DoD Component has:

2.7.2.2.2.1. Specific plans to replace or restore the lost service utility of the general equipment,

2.7.2.2.2.2. Committed or obligated funding for remediation efforts, or

2.7.2.2.2.3. A history of remediating lost service utility in similar cases or for similar general equipment.

2.7.2.3. For CIP, the testing of impairment in subparagraph **250207.B.2** should be performed over the period of expected future service utility rather than current service utility.

2.7.3. Determining the Appropriate Measurement Approach. Impairment losses on general equipment that will continue to be used by the entity should be estimated using a measurement approach that reasonably estimates the portion of net book value associated with the diminished service utility of the general equipment. A measurement method would not be considered appropriate if it would result in an unreasonable net book value associated with the remaining service utility of the general equipment. Conversely, a reasonable measurement method may result in no impairment loss to be recorded. Regardless of the method used, recognition of impairment loss should be limited to the asset's net book value at the time of impairment. Widely recognized methods for measuring impairment include:

2.7.3.1. Replacement Approach. Impairment of general equipment with physical damage generally may be measured using a replacement approach. This approach uses the estimated cost to replace the lost service utility of the general equipment at today's standards (i.e., at current market prices and in compliance with current statutory, regulatory, or industry standards) to identify the portion of the historical cost of general equipment that should be written off due to impairment. It may be appropriate to apply the ratio of estimated cost to replace the diminished service utility over total estimated cost to replace the general equipment, to the net book value of general equipment to determine the impairment amount.

2.7.3.2. Restoration Approach. This approach uses the estimated cost to restore the diminished service utility of the general equipment to identify the portion of the historical cost of the general equipment that should be written off. This approach does not include any amounts attributable to improvements and additions to meet today's standards. The estimated restoration cost can be converted to historical cost by restating (i.e., deflating) the estimated restoration cost using an appropriate cost index. Alternatively, it may be appropriate to apply the ratio of estimated restoration cost to restore the diminished service utility over total estimated restoration cost to the net book value of the general equipment to determine the impairment amount.

2.7.3.3. Service Unit Approach. Impairment of general equipment that are affected by enactment or approval of laws or regulations or other changes in environmental factors or are subject to technological changes or obsolescence generally may be measured using a service unit approach. This approach compares the service units provided by the general equipment before and after the impairment to isolate the historical cost of the service utility that cannot be used due to the impairment to determine the impairment amount.

2.7.3.4. Deflated Depreciated Current Cost Approach. Impairment of general equipment that are subject to a change in manner or duration of use generally may be measured using a deflated depreciated current cost approach. Under this approach, a current cost for a general equipment to replace the current level of service is estimated. This estimated current cost is then depreciated to reflect the fact that the general equipment is not new, and is then subsequently deflated to convert it to historical cost dollars. A potential impairment loss results if the net book value of the general equipment exceeds the estimated historical cost of the current service utility (i.e., deflated depreciated current cost).

2.7.3.5. Cash Flow Approach. Recognizes an impairment loss only if the net book value (i) is not recoverable and (ii) exceeds the higher of its NRV or value-in-use estimate.

2.7.3.5.1. The net book value of general equipment is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the general equipment.

2.7.3.5.2. NRV is the estimated amount that can be recovered from selling, or any other method of disposing, of an item less estimated costs of completion, holding, and disposal. SFFAC 7 describes value-in-use as the benefit to be obtained by an entity from the continuing use of an asset and from its disposal at the end of its useful life.

2.7.3.5.3. If the net book value is not recoverable, the impairment loss is the amount by which the net book value of the general equipment exceeds the higher of its NRV or value-in-use estimate. No impairment loss exists if the net book value is less than the higher of the general equipment's NRV or value-in-use estimate.

2.7.3.6. Lower of (a) Net Book Value or (b) Higher of NRV or Value-in-Use Approach. General equipment impaired from either construction stoppages or contract terminations, which are expected to provide service, should be reported at their recoverable amount; the lower of (i) the general equipment's net book value or (ii) the higher of its NRV or value-in-use estimated. Impaired general equipment, which are not expected to provide service, should be accounted for in accordance with paragraph 250208.

2.7.4. Recognizing and Reporting Impairment Losses. The loss from impairment, if any, should be recognized and reported in the Statement of Net Cost in the period in which the DoD Component concludes that the impairment is both (1) a significant decline in service utility and (2) expected to be permanent. Such losses may be included in program costs or costs not assigned to programs. A general description of the general equipment for which an impairment loss is recognized, the nature (e.g., damage or obsolescence) and amount of the impairment and the financial statement classification of the impairment loss must be disclosed in the notes to the financial statements in the period the impairment loss is recognized.

2.7.5. Recoveries. The impairment loss must be reported net of any associated recovery when the recovery and loss occur in the same fiscal year. Recoveries reported in subsequent fiscal years must be reported as revenue or other financing source as appropriate. The amount and financial statement classification of recoveries should be disclosed in the notes to the financial statements.

2.7.6. Remediating Previously Reported Impairments. The costs incurred to replace or restore the lost service utility of impaired general equipment remaining in use must be accounted for in accordance with applicable standards (i.e., recognized according to the nature of the costs incurred and the appropriate capitalization threshold).

2.7.7. Diminished Service Utility Without Recognized Impairment Loss. If the future service utility has been adversely affected but the impairment test determines that a loss does not need to be recognized, a change to the estimates used in depreciation calculations (such as estimated useful life and salvage value, if applicable) should be considered and adjusted as appropriate.

2.8 Removal/Disposal (250208)

2.8.1. FASAB TR 14 defines removal from service as an event that terminates the use of a general equipment asset. Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or identification as excess to mission needs. Removals from service should be considered other than permanent unless (1) the asset's use is terminated and (2) there is documented evidence of the DoD Component's decision to permanently remove the asset from service (e.g. by selling,

donating, or demolishing the asset). If only one of the two business events has occurred, permanent removal from service has not occurred (i.e., the removal is considered other than permanent).

2.8.2. If an asset's normal use is terminated (i.e., it no longer provides service in the operations of the entity) but the DoD Component has not yet decided to permanently remove the asset from service, the removal from service must be accounted for as other than permanent. Other than permanent removal from service is evidenced by activities such as continuing low-level maintenance to sustain the asset in a recoverable status or until reutilization efforts are exhausted. For example, assets that have been removed from service and sent to a depot for temporary storage with the intent to use the assets again in the future and other assets taken out of service on a temporary basis are considered other than permanently removed from service. There is no change in the reported value for assets that have been other than permanently removed from service and the assets must continue to be depreciated.

2.8.3. If (1) an asset's use is terminated and (2) the DoD Component has documented its decision to permanently remove the asset from service, the removal from service must be accounted for as permanent. Permanent removal from service is evident from the DoD Component's documented decision to dispose of an asset by selling, scrapping, recycling, donating, or demolishing the asset. For example, assets that are part of a Base Realignment and Closure or are declared as excess under a special legislation are considered permanently removed from service. The recorded cost as well as the accumulated depreciation of an asset permanently removed from service must be removed from the accounts in which they are reported, and the asset must be recorded at its NRV in general PP&E Permanently Removed But not Yet Disposed (USSGL Account 199500). USSGL Account 199500 is defined therein as the NRV of general PP&E that is permanently removed from service but not yet disposed and is reclassified in accordance with FASAB TR 14, paragraphs 10 and 12. NRV is the estimated amount that can be recovered from disposing of the asset less estimated costs of completion, holding, and disposal. Any difference between the net book value of the asset and its expected NRV must be recognized as a gain or loss. The expected NRV should be evaluated at the end of each fiscal year and any change in NRV should be recognized as a gain or loss. Assets permanently removed from service are no longer depreciated.

2.8.4. When an asset is disposed of (e.g., by selling, scrapping, recycling, donating, or demolishing the asset) the asset must be written off and the difference between any disposal proceeds and the asset's net book value must be recognized as a gain or loss. Disposals of general equipment will be conducted in accordance with DoDM 4160.21. The disposal start date is the calendar date of a legally enforceable and recognizable obligation to complete the disposal action. For demolitions, this represents the demolition contract's start date. For transfers to a non-DoD entity and sales, this represents the date on which the instrument is endorsed or operation is ceased, whichever comes later. For natural disasters, this represents the actual date of the incident if the asset is a complete loss.

2.8.5. Absent separate contract terms and conditions for GFP and CAP disposition, and provided the property was not reutilized, transferred, or otherwise disposed of, the contractor, as directed by the Plant Clearance Officer or authorizing official, must use Standard Form 1428, Inventory Disposal Schedule or electronic equivalent, to identify and report:

2.8.5.1. GFP that is no longer required for performance of the contract;

2.8.5.2. CAP, which is no longer required for performance of the contract; and

2.8.5.3. Termination Inventory.

2.8.6. Plant clearance officers follow the direction of FAR Subpart 45.6, DFARS Subpart-245.6, and DFARS PGI 245.602-70. Following the plant clearance officer's acceptance of an inventory disposal schedule, the property must be screened for reutilization DoD-wide. Surplus personal property with commercial value that is processed through the reutilization screening process without success may be sold. Proceeds of any sale of surplus property are to be credited to the Treasury as miscellaneous receipts, unless otherwise provided by statute or the contract or any subcontract thereunder authorizing the proceeds to be credited to the price or cost of the work (40 U.S.C. § 571 and § 574, FAR 45.604-3).

3.0 ADDITIONAL CONSIDERATIONS (2503)

3.1 Use of Cancelled Treasury Account Symbol (250301)

3.1.1. The Treasury's Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) is a data collection system that replaced the reporting functionalities of Federal Agencies Centralized Trial-Balance System I and II, Intragovernmental Fiduciary Confirmation System, and Intragovernmental Reporting and Analysis System as the primary means for DoD Components to report their trial balance data to the Treasury. Capitalized assets are required to be reported and remain in GTAS after the original purchasing Treasury Account Symbol (TAS) has expired and been cancelled. If a capitalized asset has not been moved to a cancelled ("C") TAS as described in **250301.B**; GTAS will provide a "C" TAS on the GTAS Super Master Account File (SMAF) for each fund family represented on the SMAF. The system generated "C" TAS will have three components: the three-digit agency identifier, availability type "C", and a four-digit main account.

3.1.2. All DoD Components must use the "C" availability type TAS to report capitalized assets. Assets may be moved to a "C" TAS at any time from the purchase date to the date the original purchasing fund cancels. (Refer to the TFM Volume 1, Part 2, Chapter 4700 for additional information.)

3.1.3. To transfer an asset to a “C” TAS:

3.1.3.1. Use USSGL account transaction E510 to transfer out the asset from the purchasing fund account.

3.1.3.2. Use USSGL account transaction E606 to transfer in the asset into the appropriate “C” TAS.

3.2 Supporting Documentation (250302)

Entries to record financial transactions in accounting system general ledger accounts and/or the [APSR](#) and/or [other](#) systems must:

3.2.1. Be supported by source documents that reflect all transactions affecting the Component’s investment in the [general equipment](#).

3.2.1.1. All [general equipment](#) acquisitions, whether by purchase, transfer from other agencies, donation, or other means, [must be supported](#) as of the date of delivery and acceptance (including acceptance where constructive receipt has occurred) by the DoD Component. The documents listed in Table 25-3, where applicable, [must](#) be readily available to support the changes in asset value or physical attributes as a result of new acquisition or capital improvement.

Table 25-3. Examples of Supporting Documentation for General Equipment Acquisition
(Note: These examples may not be all inclusive for all circumstances.)

Evidence	Examples
Unique Identification	Assignment of unique identifier
Project Approval	Such as, but not limited to a Work Order
Obligation on Behalf of the Government	Such as, but not limited to: <ol style="list-style-type: none"> For contracts, contract modifications, or change orders: <ul style="list-style-type: none"> Statement of Work; Dollar Amount of Contract; Location; Source of Funds; Parties to the Contract; and Signature Page [Signature of All Parties]. Documentation of troop labor hours; Approved Work Order; or Purchase Order; or Reimbursable Agreement; or Military Interdepartmental Purchase Requests
Payment Submitted	Such as, but not limited to: <ol style="list-style-type: none"> Approved last invoice reflecting the total amount submitted for payment and received to date; Evidence of in-house construction costs, including labor; Indirect Costs incurred internally by the gaining activity that relate to the new acquisition or capital improvement.
Acceptance/Receipt (Acceptance of New Acquisitions and receipt or requisition of equipment items)	Such as, but not limited to: <ol style="list-style-type: none"> DD Form 250, Material Inspection and Receiving Report; General Services Administration (GSA) 1334, Request for Transfer of Excess Real and Related Personal Property; Executed acquisition document and appraisal results for the donated assets; Signed lease for leased property; Executed reversionary document; Transfer letter and documents for transferred assets to include DD Form 1348-1A, Issue Release/Receipt Document; and equivalent Electronic Turn-In Document; Receiving report, e.g., iRAPT receiving report; DD Form 1149, Requisition and Invoice/Shipping Document; DD Form 1150, Request for Issue/Transfer/Turn-In; DD Form 1155, Order for Supplies or Services.
Project Closeout	Such as, but not limited to a final DD 1354 with associated source documentation retained by the responsible party.

3.2.1.2. All disposals or retirements **must be supported as of the date** the **general equipment** leaves the custody of the DoD Component to provide an adequate audit trail for the disposal of **the** asset. The execution of certain disposal events will generate financial or administrative accountability transactions. **These documents, where applicable, must be readily available to support disposals:**

3.2.1.2.1. 'Declaration of excess' document;

3.2.1.2.2. Approval documentation;

3.2.1.2.3. Original acquisition documents;

3.2.1.2.4. Legal instruments (such as a contract) to indicate legal obligation to dispose of an asset;

3.2.1.2.5. Document showing the disposal start date **and disposal end date**;

3.2.1.2.6. Receipt documentation; and

3.2.1.2.7. Transfer documents for transferred assets or as otherwise stated.

3.2.1.3. Documents that support the recorded cost of **general equipment** assets **must** be retained by the DoD Component in accordance with the requirements contained in Volume 1, Chapter 9 or as otherwise stated. Documentation (original documents and/or hard and electronic copies of original documentation) **must** be maintained in a readily available location during the applicable retention period to permit the validation of information pertaining to the asset such as the purchase cost, purchase date, and cost of improvements. The documentation must also be linked to the appropriate unique identifier(s). Supporting documentation may include, but is not limited to, the documentation as outlined **in this subparagraph**.

3.2.2. Include sufficient information indicating the physical quantity, location, and unit cost of the **general equipment**. The **APSR and/or other systems must** be designed to be of maximum assistance in making procurement and utilization decisions, including decisions related to identifying potential excess **general equipment** that may be available for reuse, transfer to other DoD Components, or made available for disposal in accordance with current DoD regulations and other regulatory requirements.

3.2.3. Enable periodic, independent verification of the accuracy of the accounting and **APSR and/or other systems** through periodic physical counts/inventories of **general equipment** (existence and completeness--"book to floor and floor to book"). Such periodic inventories also **must** include reconciling the **APSR** and/or **other** systems with the general ledger accounts and physical **counts**. Personal hand receipt self-validations are not acceptable for meeting the independent verification of physical inventory requirements (see DoDI 5000.64).

3.2.4. Identify and classify [general equipment](#) that was capitalized, recorded in the APSR and accounting system, and reported in the financial statements.

3.2.4.1. All DoD Components (i.e., Military Departments, Washington Headquarters Service and Other Defense Organizations) must reconcile their APSR to their financial statements (or to their trial balance if financial statements are not required to be prepared) on a quarterly basis.

3.2.4.2. All DoD Components funding CIP must reconcile their recorded CIP balances on a quarterly basis with any service provider/contractor working on the CIP. CIP should reflect the value associated with the actual progress of work completed which may be more or less than amounts invoiced to the DoD Component as of the quarter end.

3.2.5. Be based on the same documents, to ensure that entries to the [financial accounting/reporting](#) and APSR are the same. This will ensure that the [APSR is](#) integrated and subsidiary to the [financial](#) accounting system and that such records can be reconciled with the accounting system.

3.2.6. Include documents used to accumulate the cost of construction or developmental projects. Each document must link to the appropriate asset unique identifier. For a listing of those costs that may be incurred during the construction, see Annex 1.

3.2.7. Include all [general equipment](#) possessed by the DoD (to include property held by others) and [general equipment](#) of others held by DoD through seizure, forfeiture, loss, or abandonment.

3.2.8. Provide information to identify and account for leased [general equipment](#), regardless of whether the [general equipment](#) was acquired by a capital lease or operating lease or whether the value of the [general equipment](#) exceeds DoD capitalization thresholds. Refer to DoDI 5000.64 for accountability requirements for general equipment.

3.2.9. Provide information to identify and account for capitalized improvements to [general equipment](#).

3.3 Physical Inventories of [General Equipment](#) (250303)

DoD Components must perform periodic physical inventories of [general equipment](#) in accordance with DoDI 5000.64.

3.4 [DM&R](#) (250304)

3.4.1. Description

3.4.1.1. Per SFFAS 42, [DM&R](#) is defined as maintenance and repairs that were not performed when they should have been or were scheduled to be and which are put off or delayed to a future period.

3.4.1.2. Maintenance and repairs are activities directed toward keeping fixed assets in an acceptable condition. Maintenance and repairs include preventive maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain the asset.

3.4.1.3. Maintenance and repairs exclude activities aimed at expanding the capacity or capability of an asset or otherwise upgrading it to serve needs different from, or significantly greater than its current use.

3.4.2. Measurement

3.4.2.1. Amounts for DM&R may be measured using condition assessment surveys, life-cycle cost forecasts, or other methods that are similar to the condition assessment survey or life-cycle costing methods.

3.4.2.1.1. Condition assessment surveys are periodic physical inspections of general equipment to determine their current condition and estimated cost to correct any deficiencies. DoD Components should assess the condition of general equipment assets as a function of their day-to-day operations and document condition through periodic assertion/assessment statements provided by their field office managers. DoD Components also need to evaluate the cost and benefits of doing condition assessment surveys. Such things as cycling the assessments on a rotating basis, the frequency of assessments (i.e., every three or five years) and the criteria and methodology used for making such assessments need to be considered.

3.4.2.1.2. Life-cycle costing is an acquisition or procurement technique, which considers operating, maintenance, and other costs in addition to the acquisition cost of assets. Since it results in forecasts of maintenance and repairs expense, these forecasts may serve as a basis against which to compare actual maintenance and repairs expense to arrive at an estimate of DM&R.

3.4.2.2. DoD Components should determine what condition standards are acceptable and which DM&R measurement methods to apply. Once determined, condition standards and measurement methods must be consistently applied unless the DoD Component determines that changes are necessary. Changes deemed necessary by the DoD Component must be accompanied by an explanation documenting the rationale for the change(s) and any related impact the change(s) will have on the DM&R estimates.

3.4.2.3. DM&R must be measured for capitalized and non-capitalized general equipment and fully depreciated general equipment. In addition, DM&R must be measured for inactive and/or excess general equipment to the extent that it is required to maintain the general equipment in acceptable condition (e.g., to comply with existing laws and regulations or to preserve value pending disposal). In addition, DM&R must measure funded maintenance and repairs that have been delayed for a future period as well as unfunded maintenance and repairs.

3.4.3. RSI

DoD Components who report general equipment must report material amounts of DM&R as RSI to the financial statements (see Volume 6B, Chapter 12). At a minimum, this information must be presented as RSI for all general equipment:

3.4.3.1. Estimates of the beginning and ending balances of DM&R for each major category of equipment;

3.4.3.2. A summary of the DoD Component's maintenance and repairs policies and a brief description of how they are applied (i.e., method of measuring DM&R);

3.4.3.3. Policies for ranking and prioritizing maintenance and repair activities;

3.4.3.4. Factors the Components consider in determining acceptable condition standards;

3.4.3.5. Whether DM&R relates solely to capitalized general equipment or also to amounts relating to non-capitalized or fully depreciated general equipment;

3.4.3.6. Capitalized general equipment for which the DoD Component does not measure and/or report DM&R and the rationale for the exclusion; and

3.4.3.7. If applicable, explanation of any significant changes to

3.4.3.7.1. DM&R amounts from the prior year; and

3.4.3.7.2. The policies and factors subject to the reporting requirements established in subparagraphs 250304.E.2 through 250304.E.6.

3.4.4. Weapon Systems

Maintenance and repair of weapon systems is accomplished by two different, yet complementary components—depot level maintenance and repair activities and field level maintenance and repair activities. The term “field level maintenance and repair” includes all non-depot level maintenance and repair activities (e.g., organizational, intermediate, and regional). DoD Components should determine whether the year-end amounts of field level DM&R on weapon systems are material when compared to their component depot level amounts of DM&R. This determination should be updated and documented on an annual basis. Material amounts of weapon systems field level DM&R should be reported in the financial statements. Materiality is defined in subparagraph 250201.G.

3.4.4.1. Depot level maintenance and repair includes: major repair, overhaul, or complete rebuilding of weapon systems, end items, parts, assemblies, and subassemblies; manufacture of parts; technical assistance; and testing. Material amounts of depot level deferred maintenance due to the unavailability of funding and/or capacity constraints have been historically

reported through the DoD's budget process by the Military Departments. Such amounts are provided annually to the Congress in the President's Budget submission and also satisfy the intent of the federal accounting standard definition. The same budget submission amounts **must** be reported in the financial statements of the Military Departments.

3.4.4.2. Field level maintenance **and repair** comprises maintenance **and repair** activities at lower organizational levels than depot level. The Military Departments may or may not separate this level of maintenance **and repair** into intermediate and organizational maintenance **and repair** activities when describing the field level maintenance **and repair** structure and capability.

3.4.4.2.1. Intermediate field level maintenance **and repair** includes limited repair of commodity oriented components and end items; job shop, bay and production line operations for special mission requirements; repair of printed circuit boards; software maintenance; and fabrication or manufacture of repair parts, assemblies, and components. The intermediate maintenance **and repair** mission is to sustain the combat readiness and mission capability of supported activities by providing quality and timely materiel support at the nearest location with the lowest practical resource expenditure.

3.4.4.2.2. Organizational field level maintenance **and repair** is normally performed by an operating unit on a day-to-day basis in support of its own operations. The organizational maintenance **and repair** mission is to maintain assigned equipment by performing functions such as inspections, servicing, preventive maintenance, and corrective maintenance.

3.5 Reporting Requirements (250305)

3.5.1. DoD Components with general equipment should reference a note on the Balance Sheet that discloses information about the reported general equipment assets. Note 1 of the financial statements should include a disclosure related to the DoD Component's general equipment reporting accounting policy. DoD Components should state that they are financially reporting property that they have accountability for according to DoDI 5000.64. Additionally, DoD Components should disclose that they may use assets to complete their mission which are financially reported by another DoD Component. See Volume 6B, Chapter 10 for the specific reporting requirements.

3.5.2. DoD Components must disclose in the notes to the financial statements those instances where they are using general equipment provided by a host nation/foreign government without reimbursement by DoD to the host nation/foreign government, as applicable, that:

3.5.2.1. The DoD Component is utilizing general equipment provided by and owned by a host nation/foreign government in its operations outside of the United States without reimbursement by DoD to the host nation/foreign government and that there are no amounts recorded in the financial statements related to these assets.

3.5.2.2. The general nature of the agreement with the host nation/foreign government. It is not intended or recommended that the geographic location of the foreign government/host nation be disclosed.

3.6 Environmental Liabilities/Cleanup Costs (250306)

The accounting policy for environmental liabilities/cleanup costs pertaining to [general equipment](#) is contained in Chapter 13.

Annex 1. Construction-in-Progress Cost Matrix
(Costs to be accumulated for construction items)

Cost Type	Description
Cost of contract work	Amounts paid for work performed under contract, as well as any incentive fees paid to contractors to reward performance goals.
Direct cost of labor	The direct cost of labor and all associated fringe benefits in connection with the construction project. Includes both military and civilian labor costs.
Direct cost of materials and supplies	The purchase price, the cost of inspection, and loading assumed by the carrier.
Cost of Supervision, Inspection, and Overhead	Support associated with the administration of contracts for facility projects. May include contract award, payments, inspections, material testing, and other actions taken during contract execution.
Cost of transportation	Amounts paid for transportation of workers, materials, and supplies in connection with the construction project.
Cost of handling and storage	Amount paid for packaging and storing the materials and supplies and equipment used in the construction project.
Cost of legal and recording fees	Legal fees incurred to bring the asset to its intended use (e.g., title or recording fees).
Cost of architecture and engineering studies	Amounts paid for engineering, architectural, and other outside services for designs, plans, specifications, and surveys.
Cost of government-furnished property	An appropriate share of the cost of the government-furnished equipment and material and facilities used in construction work.
Cost of donated assets	The fair value of facilities and equipment donated to the government, as authorized by a special legislation, in connection with the construction project.

Annex 2. Alternative Valuation Methodologies for Establishing Opening Balances for General Equipment

1.0 Establishing Opening Balances for General Equipment (A20101)

The alternative valuation methodologies for establishing opening balances for general equipment including Government-Furnished Property (GFP), Contractor-Acquired Property (CAP) and Construction-in-Progress (CIP) for Equipment are:

1.1 The alternative valuation methods for establishing opening balances for Property, Plant and Equipment described in Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standards (SFFAS) 50, “Establishing Opening Balances for General Property, Plant and Equipment: Amending Statement of Federal Financial Accounting Standards (SFFAS) 6, SFFAS 10, SFFAS 23, and Rescinding SFFAS 35” is available only once to each reporting entity. Therefore, prior to the establishment of opening balances for general equipment, including GFP, CAP and CIP for equipment (general equipment), Department of Defense (DoD) Components must validate that they are prepared to account for and comply with the recognition, measurement, presentation and disclosure requirements for general equipment at historical cost in accordance with FASAB SFFAS 6, as amended, “Accounting for Property, Plant and Equipment.”

1.2 If historical cost, as described in SFFAS 6 has not already been recorded and included in financial statements that have been audited by an Independent Public Accountant and received an unmodified (“clean”) opinion, deemed cost will be used as a surrogate to establish opening balances for general equipment. In this context, deemed cost is an amount used as a surrogate for initial amounts that otherwise would be required by SFFAS 6 to establish opening balances. Deemed cost may be based on any one of, or a combination of, allowable valuation methods such as cost of similar assets at the time of acquisition, contract based estimates and budget based estimates. Once established using deemed cost, opening balances will be used as a surrogate for the initial amounts that would have existed had an SFFAS 6 compliant valuation method been used.

1.3 When evaluating general equipment for the purpose of establishing opening balances, DoD Components should apply the applicable capitalization threshold to their entire population of general equipment retroactively, irrespective of the capitalization thresholds in effect for years prior to October 1, 2013. When doing so, DoD Components need to take the appropriate steps to ensure all relevant prior period adjustments and note disclosures are included in their annual financial statements in accordance with SFFAS 50. As part of their evaluation, DoD Components should not simply value assets already recorded above the capitalization threshold. DoD Components should perform additional analytical procedures to identify any assets that have been improperly capitalized or expensed. Examples of this type of review can include searching for equipment with values of \$0 or \$1 which are indications of erroneous values. An additional example can include equipment for which an additional zero was added in error, incorrectly placing the asset above the capitalization threshold.

1.4 When establishing opening balances using Deemed Cost:

1.4.1. DoD Components will calculate a gross value and an accumulated depreciation value for General Equipment assets. Both the gross value Deemed Cost and accumulated depreciation Deemed Cost will be recorded in the accounting records. The difference between the Net Book Value (NBV) of the Deemed Cost on the opening Balance Sheet of the current fiscal year presented and the existing/historical NBV of the general equipment as of the ending Balance Sheet of the previous fiscal year, is considered a prior period adjustment. This prior period adjustment represents a change in accounting principle in accordance with paragraph 13 of FASAB SFFAS 21, "Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources." If any depreciation based on the original historical equipment value has been recorded in the year in which the prior period adjustment for Deemed Cost is recorded, that depreciation expense should be reversed and depreciation for the Deemed Cost value should be recorded.

1.4.2. Any adjustment must be properly documented and supported to assist ongoing audit efforts including retaining documentation of the existing/historical equipment value in the Accountable Property System of Record (APSR) and documentation supporting the Deemed Cost value. The existing/historical gross value and accumulated depreciation of the general equipment will need to be removed from the APSR and be replaced with the new gross value and accumulated depreciation for Deemed Cost.

2.0 Financial Statement Disclosure Requirements (A20102)

DoD Components who apply the deemed cost methodology to adjust their opening general equipment balances, must disclose in their financial statements that an alternative valuation method was applied in establishing their opening balances and describe the method used in the first reporting period in which the reporting entity makes an unreserved assertion that its financial statements, or one or more line items, are presented fairly in accordance with Generally Accepted Accounting Principles. An unreserved assertion is an unconditional statement. No disclosure of the distinction or breakout of the amount of deemed cost of general equipment included in the opening balances is required.

3.0 Deemed Cost Methodology (A20103)

3.1 When a Component cannot apply the initial amount measurement approach (historical cost) outlined in SFFAS 6, it is acceptable to estimate the initial amounts (historical cost) to establish the opening balances for general equipment. Estimates should be based on any one or a combination of the following allowable valuation methods:

3.1.1. Replacement Cost;

3.1.2. Fair Value;

3.1.3. Cost of similar assets at the time of acquisition;

3.1.4. Contract based estimates; or

3.1.5. Budget based estimates.

3.2 DoD Components must estimate the historical cost for establishing opening balances of general equipment based on a deemed cost method if historical costs cannot be adequately supported with appropriate documentation as described in paragraph A20104. The DoD Components must consider the deemed cost methods described in subparagraph A20103.B.1 through A20103.B.3 and select the approach that will be most efficient in producing an auditable value. DoD Components that anticipate substantial use of replacement cost or fair value methodologies for equipment valuation must contact the Office of the Under Secretary of Defense (Comptroller)/Office of the Deputy Chief Financial Officer and the Office of the Deputy Assistant Secretary of Defense for Logistics prior to committing significant resources to these methods.

3.2.1. Cost of Similar Assets at the Time of Acquisition. This method is frequently used for commercial off-the-shelf general equipment, but may also be used for other general equipment, such as weapon systems when appropriate. When using this method, DoD Components must:

3.2.1.1. Work closely with other organizations to gather the information needed to support the valuation when using general equipment from another organization as a comparable asset;

3.2.1.2. Exercise due care to ensure that the source value is supported. If the comparable asset is not properly supported, the subject general equipment is also not properly supported; and

3.2.1.3. Apply appropriate price indices to estimate the cost of the general equipment in the period when it was placed into service if the comparable general equipment has a different in-service date. See FASAB Federal Financial Accounting and Auditing Technical Release 13, "Implementation Guide for Estimating the Historical Cost of General Property, Plant & Equipment," for additional details for using indices to inflate or deflate costs.

3.2.2. Contract Based Estimates. This methodology involves valuing general equipment using the pricing data included in contracts. A complete understanding of the acquisition program, including the structure of all related contracts is required to implement this methodology. DoD Components must align activities and costs of general equipment with relevant accounting standards to isolate the costs that are to be capitalized versus those that are to be expensed (e.g., research and development costs, factory training). When using this methodology, DoD Components must consider the complexity of multiple contracts used to develop or acquire the general equipment assets. Steps for performing contract based estimates include:

3.2.2.1. Identification by Program Management Offices (PMOs) of all contracts for the acquisition or modification of the general equipment. Relevant contracts include those that have a financial impact on the value of the asset and/or establish its placed-in-service date;

3.2.2.2. Working with Financial Managers, Procurement Contracting Officers, and PMOs will review all line items in the contract to identify costs that will be included in the capitalized acquisition costs and the costs that will be excluded;

3.2.2.3. Compiling documentation supporting the valuation including copies of relevant contract documents; and

3.2.2.4. Documenting the process and results.

3.2.3. Budget Based Estimates. This methodology utilizes information included in DoD Component budget exhibits to estimate the value of the general equipment. The key requirement is that the available procurement budget detail must allow DoD Components to clearly associate budgeted amounts with the general equipment end items. When using this methodology DoD Components must consider that acquisition programs can span many years; and, not all costs associated with the budgeted amount should be capitalized. Steps for performing budget based estimates include:

3.2.3.1. Reviewing the relevant President's Procurement Budget documentation for the general equipment acquisition program to determine whether the budget has adequate detail to support the budget valuation methodology. Specifically, determining whether the budget detail provides visibility of the various cost estimates comprising the general equipment acquisition program (e.g., end items versus spares);

3.2.3.2. Identifying costs and determining which costs should be included in the capitalized costs of the general equipment;

3.2.3.3. Compiling documentation supporting the valuation including copies of the referenced budget exhibits; and

3.2.3.4. Documenting the process and results.

4.0 Historical Cost for Commercial Off-the-Shelf General Equipment (A20104)

4.1 Some general equipment is acquired "off-the-shelf" and not developed as part of a program. This includes commercially available items acquired via Simplified Acquisition Procedures (see Federal Acquisition Regulation (FAR) Part 13); Sealed Billing (see FAR Part 14); or Contracting by Negotiation (see FAR Part 15). Examples of general equipment in this category include:

4.1.1. Commercial vehicles;

4.1.2. Heavy-duty construction equipment;

4.1.3. Railroad engines;

4.1.4. Dockside Cranes;

4.1.5. Depot machinery (e.g., computer driven lathes);

4.1.6. Computer hardware; and

4.1.7. Medical equipment.

4.2 The procurement of general equipment following these existing acquisition processes, require obtaining an approved purchase request, following the acquisition procedures in accordance with either FAR Part 13, FAR Part 14, or FAR Part 15, receiving and accepting the general equipment, receiving a vendor invoice, and submitting payment for the invoice. The acquisition cost for these assets is determined from the invoice amount and may also be shown on the receiving report. If this supporting documentation is readily available, valuing these assets based on actual historical cost is encouraged but not required to establish opening balances. The DoD Component must determine the most efficient and cost effective approach to assign and support auditable values for general equipment opening balances.

5.0 CIP for Equipment (A20105)

5.1 Capital expenditures or progress payments paid to contractors, coinciding with the portion of the work completed for general equipment being manufactured or constructed, should be recorded in a CIP account. The CIP balance is included in the notes to the financial statements (generally Note 10) and is included in the general equipment line of the Balance Sheet, and must therefore be included in the general equipment opening balance. As a result, each DoD Component's Financial Management Community, working with their Acquisition Community, must establish a CIP balance for each existing/ongoing acquisition program with outstanding general equipment deliverables at the date for which the opening balance is established. To create the CIP balances, DoD Components must determine capital versus non-capital costs (if the expected value of the completed general equipment asset will be equal to or greater than the applicable capitalization threshold and it will have a useful life of two years or more then it is a capital cost and should be accumulated in CIP). Where possible, transaction detail should be evaluated to identify costs that need to be capitalized. The opening balance for CIP should represent the amount disbursed to contractors (capital costs only) from program inception less the acquisition cost of general equipment delivered and capitalized. The difference between the two amounts should be the CIP opening balance. The CIP opening balance formula is:

$$\text{CIP Opening Balance} = \text{Total Capital Costs Paid to Contractor} - \text{Total Amount of General Equipment Capitalized based on Deemed Cost}$$

5.2 For some contract types that include contract finance payments, the Component must reconcile the payments to actual progress completed by the Contractor. If the CIP balance based on the formula in this subparagraph surpasses progress on the contract and is material, the DoD Component must move the appropriate amount from CIP into the Advances account (USSGL 141000).

5.3 CIP Go Forward Process – End State Target Environment

5.3.1. DoD Components must be able to capture capital costs paid to contractors and accumulate them (where they meet the criteria for capitalization) in CIP. DoD Components must maintain reasonable estimates of per unit costs which will be used to relieve CIP and capitalize the resulting general equipment asset. Costs which should be capitalized include other direct and indirect costs such as program management costs. These costs need to be captured as incurred, recorded in CIP, and allocated to the end item value. DoD Components need to determine how they will capture actual program management costs as well as other costs and the method for how they will allocate these costs.

5.3.2. Advance Payments, as defined in FAR 32.202-2, are to be recorded in an advance account until the end items are delivered. All other contract financing payments must be recorded as CIP. CIP must reflect actual progress on the contract. To ensure that CIP amounts reflect actual progress on the contract, DoD Components must perform a periodic reconciliation (at least quarterly) between amounts recorded in CIP and the actual progress on the contract. This may require working with the contractor to perform the reconciliation. Costs incurred in excess of finance payments should be reported as a liability. Figure A2-1 illustrates the CIP go forward process.

Figure A2-1. CIP Go Forward Process

Note: Asset acquisition cost based on financial transactions and cost allocation (SFFAS 6)

5.4. Programs and Contracts in Effect as of the Opening Balance

5.4.1. Figure A2-2 illustrates the process for capturing actual capital costs paid to a contractor and accumulating them in a CIP account for existing programs with remaining deliverable equipment end items. Capital costs will be relieved from CIP as the assets are delivered. The value of an asset constructed after the opening balance can be based upon a reasonable estimate of the per unit cost in accordance with SFFAS 6 and SFFAS 4, “Managerial Cost Accounting Standards and Concepts.” Reasonable estimates may be based on established methods that will approximate historical cost such as contracts, budget documents, engineering and acquisition documents, or reports reflecting amounts to be expended. Figure A2-2 also illustrates the allocation of estimates based on expenditures.

Figure A2-2. Allocation of Estimates Based on Expenditures

5.4.2. Some assets will be under construction at the time the opening balance is established. The value assigned to these assets will consist of two parts. One part will be the portion of the asset under construction as of the opening balance. The value of this portion will be based on how it was estimated when initially calculated and recorded as a Deemed Cost. The second part of the value will be the portion of the asset constructed after the opening balance. The value of this portion of the asset will be recorded in accordance with SFFAS 4 and SFFAS 6 as described in subparagraph **A20105.C**. The resulting value of the asset that will be debited to the general equipment account and credited to the CIP account, upon completion of the construction when the asset is available for use, will be the sum of both parts.

Annex 3. Illustrative Examples and Journal Entries Relating to Financial Reporting Responsibilities for General Equipment

1.0 Construction-In-Progress (CIP) (A30101)

1.1 CIP Example: The Air Force, Missile Defense Agency (MDA), and National Geospatial-Intelligence Agency (NGA), fund the construction of a satellite to be launched into space. Each entity will report their portion of CIP in their CIP accounts until a depreciable asset is recognized. The Air Force is the accountable entity under DoD Instruction (DoDI) 5000.64 once the asset is placed in service. When the satellite is placed into service all funding entities will recognize the capitalized costs of the satellite and transfer the capitalized costs to their Equipment account. MDA and NGA will then transfer the costs in their Equipment account to the Air Force's Equipment account. The Air Force will subsequently record depreciation for the full cost of the asset.

1.2 Table A3-1 illustrates the general ledger (G/L) entries that are required to liquidate CIP and recognize a depreciable asset.

Table A3-1. Liquidation of CIP

Funding Entity	G/L Entry – Liquidation of CIP by the Entity Funding Construction to Place the Asset in Service (Transaction Code D510)
	Debit 175000 Equipment Credit 172000 Construction-in-Progress

2.0 In-Service Assets (including weapon systems and Government-Furnished Property) (A30102)

2.1 Following are three illustrative examples for In-Service Assets:

2.1.1. The Army is conducting an inventory of capital assets and identifies a Humvee that was not previously reported on their Accountable Property System of Record (APSR). They are unable to locate any procurement documentation for the asset, but the Army has been using and maintaining the asset and will assume accountability for the asset in accordance with DoDI 5000.64. Because the Army has accountability for the asset it will also be responsible for the financial reporting of the asset.

2.1.2. The Defense Health Program (DHP) funds the acquisition of a magnetic resonance imaging (MRI) machine, and records it in its APSR as the accountable entity in accordance with DoDI 5000.64. The MRI machine will be located at a Navy hospital, but will remain in DHP's APSR. DHP will have financial reporting responsibility for the asset. To facilitate an information request from an auditor of the Navy or DHP on the MRI machine, the Navy and DHP must have processes in place that will allow them to easily demonstrate the designation of the responsible reporting entity based on the policy in Chapter 25.

2.1.3. The US Special Operations Command (USSOCOM) funds the acquisition of a mine resistant ambush protected (MRAP) vehicle and records it in its APSR as the accountable entity in accordance with DoDI 5000.64. The MRAP is later issued to an Army special operations unit, where it is added to the Army's APSR. USSOCOM transfers accountability and financial reporting responsibility to the Army at the time of issuance. All required financial information and supporting documentation should be provided to the Army to support their financial reporting.

2.2 Table A3-2 illustrates the G/L entries to be recorded if a transfer is required to implement the policy in Chapter 25 or if a transfer is needed after an asset is placed in service.

Table A3-2. Transfer of In-Service General Equipment Reporting Responsibility

Entity Transferring Out	G/L Entry Upon Transfer Out to New Reporting Entity (Transaction Code E510)
	Debit 573000 Financing Sources Transferred Out Without Reimbursement Debit 175900 Accumulated Depreciation on Equipment Credit 175000 Equipment
Entity Transferring In	G/L Entry for New Reporting Entity Upon Transfer In (Transaction Code E606)
	Debit 175000 Equipment Credit 175900 Accumulated Depreciation on Equipment Credit 572000 Financing Sources Transferred In Without Reimbursement

3.0 In-Service Capital Improvements (A30103)

3.1 Once capital improvements are placed in service they become a part of the total recorded value of the depreciable asset (regardless of whether or not the asset is tracked or depreciated separately from the base asset). Following are two illustrative examples for capital improvements:

3.1.1. The Air Force provides USSOCOM a C-130 for use in its operations. USSOCOM makes an improvement to convert it to an AC-130 aircraft. Because the Air Force is responsible for the financial reporting of the base asset, it is also responsible for the financial reporting of any capital improvements to the base asset.

3.1.2. An F-18E Super Hornet (i.e., the base asset) that was the financial reporting responsibility of the Navy received a capital improvement package that significantly increased its capacity to perform its mission. The improvement package was added to a Navy asset so the Navy is responsible for the financial reporting of the capital improvement.

3.2 Table A3-3 illustrates the G/L entries to be recorded if a transfer is required to implement the policy in Chapter 25. If the transfer is not completed during the month the improvement was placed in service and depreciation has been incurred, the accumulated depreciation will transfer with the asset.

Table A3-3. Transfer of In-Service Capital Improvements

Funding Entity of Capital Improvement	G/L Entry Upon Transfer Out from Funding Entity (Transaction Code E510)
	Debit 573000 Financing Sources Transferred Out Without Reimbursement Debit 175900 Accumulated Depreciation on Equipment Credit 175000 Equipment
Funding Entity of Base Asset	G/L Entry for Base Asset Funding Entity upon Transfer In (Transaction Code E606)
	Debit 175000 Equipment Credit 175900 Accumulated Depreciation on Equipment Credit 572000 Financing Sources Transferred In Without Reimbursement

VOLUME 4, CHAPTER 26: “ACCOUNTING FOR LEASES”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by **blue font**.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

The previous version dated **August 2018** is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
Policy Memo	The Deputy Chief Financial Officer memorandum, “Implementation of Federal Financial Accounting Standard 54, Leases (FPM20-03),” dated September 25, 2020, was incorporated into this chapter and cancelled.	Cancellation
Various	The Federal Accounting Standards Advisory Board issued new accounting standards, technical releases, and a technical bulletin for leases, which required substantive changes to the policy contained in this chapter.	Revision
1.0	Updated the General section to incorporate the Statement of Federal Financial Accounting Standards 54.	Revision
2.0	Added lease-related definitions.	Addition
3.0	Revised the Accounting for Leases section.	Revision
3.4 (previous version)	Removed the Deferred Maintenance and Repair Costs section as these costs no longer apply to leases.	Deletion
4.1	Added reference for Standard Financial Information Structure webpage for United States Standard General Ledger accounts and transaction illustrations.	Addition
4.6	Added list of required supporting documentation.	Addition
Table 26-1	Added Capitalization Threshold table.	Addition

CHAPTER 26**ACCOUNTING FOR LEASES*****1.0 GENERAL****1.1 Purpose**

This chapter prescribes the Department of Defense (DoD) accounting policy for leases. This chapter addresses lease accounting for both DoD lessees and lessors. The Federal Accounting Standards Advisory Board (FASAB) issued Statement of Federal Financial Accounting Standards 54 ([SFFAS 54](#)) to update the financial reporting policy for Federal Agencies, including DoD. This chapter does not apply to leases (licenses) of internal use software (see Chapter 27) or leases of assets under construction. Budgetary accounting treatment of capital leases and lease purchases are found in the Office of Management and Budget Circular A-11, "Preparation, Submission, and Execution of the Budget," Appendix B, and does not fall under the scope of this chapter.

1.2 Authoritative Guidance

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.1. FASAB Statement of Federal Financial Accounting Standards ([SFFAS 1](#)), "Accounting for Selected Assets and Liabilities;"

1.2.2. FASAB [SFFAS 4](#), "Managerial Cost Accounting Standards and Concepts;"

1.2.3. FASAB [SFFAS 5](#), "Accounting for Liabilities of The Federal Government;"

1.2.4. FASAB [SFFAS 6](#), "Accounting for Property, Plant, and Equipment;"

1.2.5. FASAB [SFFAS 7](#), "Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting;"

1.2.6. FASAB [SFFAS 21](#), "Statement of Federal Financial Accounting Standards 21: Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources;"

1.2.7. FASAB [SFFAS 44](#), "Accounting for Impairment of General Property, Plant, and Equipment Remaining in Use;"

1.2.8. FASAB [SFFAS 47](#), "Reporting Entity;"

1.2.9. FASAB [SFFAS 54](#), "Leases;"

- 1.2.10. FASAB SFFAS 58, “Deferral of the Effective Date of SFFAS 54, Leases;”
- 1.2.11. FASAB SFFAS 60, “Omnibus Amendments 2021: Leases-Related Topics;”
- 1.2.12. FASAB SFFAS 61, “Omnibus Amendments 2023: Leases-Related Topics II;”
- 1.2.13. FASAB SFFAS 62, “Transitional Amendment to SFFAS 54;”
- 1.2.14. FASAB Technical Release (TR) 20, “Implementation Guidance for Leases;”
- 1.2.15. FASAB TR 21, “Omnibus Technical Release Amendments 2022: Conforming Amendments;”
- 1.2.16. FASAB TR 22, “Leases Implementation Guidance Updates;”
- 1.2.17. FASAB Technical Bulletin (TB) 2023-1, “Intragovernmental Leasehold Reimbursable Work Agreements;”
- 1.2.18. DoD Directive 5110.4, “Washington Headquarters Services;”
- 1.2.19. DoD Instruction (DoDI) 4165.14, “Real Property Inventory and Forecasting;” and
- 1.2.20. DoDI 5000.64, “Accountability and Management of DoD Equipment and Other Accountable Property.”

*2.0 DEFINITIONS

2.0.1. Consolidation Entity. An organization is considered a consolidation entity if, based on an assessment of the following characteristics as a whole, the organization: (1) is financed through taxes and other non-exchange revenues, (2) is governed by the Congress and/or the President, (3) imposes or may impose risks and rewards to the federal government, or (4) provides goods and services on a non-market basis.

2.0.2. Embedded Lease. A contract or agreement that contains both a lease element and a non-lease element, or a lease that contains multiple underlying assets. The lease element in the contract or agreement is an embedded lease.

2.0.3. Initial Direct Lease Costs. Initial direct lease costs are costs that are directly attributable to negotiating and arranging a lease or portfolio of leases that would not have been incurred without entering into the lease.

2.0.4. Intragovernmental Lease. An intragovernmental lease is a contract or agreement occurring within a consolidation entity (e.g., between two or more DoD Components) or between two or more consolidation entities (e.g., between DoD and one or more federal agencies), whereby one entity (lessor) conveys the right to control the use of Property, Plant, & Equipment (PP&E)

(the underlying asset) to another entity (lessee) for a period of time as specified in the contract or agreement in exchange for consideration.

2.0.5. Intragovernmental Leasehold Reimbursable Work Agreement. An agreement whereby one federal entity (the provider-lessor) acquires, constructs, improves, and/or alters an underlying asset that is or will be leased to another federal entity (the customer-lessee), and the customer-lessee agrees to reimburse the provider-lessor for direct and indirect costs for the acquisition, construction, improvement, and/or alteration.

2.0.6. Lease. A lease is a contract or agreement whereby one entity (lessor) conveys the right to control the use of PP&E (the underlying asset) to another entity (lessee) for a period of time as specified in the contract or agreement in exchange for consideration.

2.0.7. Lease Asset. An expression of the economic benefit that the lessee expects to receive from the right to control the underlying asset.

2.0.8. Lease Concessions. Lease concessions are rent discounts made by the lessor to entice the lessee to sign a lease. For example, lease concessions may include rent holidays/free rent periods or reduced rents.

2.0.9. Lease Incentives. Lease incentives include lessor payments made to, or on behalf of, the lessee to entice the lessee to sign a lease. Lease incentives may include up-front cash payments to the lessee; for example, moving costs, termination fees to the lessee's prior lessor, or the lessor's assumption of the lessee's lease obligation under a different lease with another lessor.

2.0.10. Lease-Leaseback Transactions. An asset is leased by one party (first party) to another party and then leased back to the first party.

2.0.11. Lease Liability. An expression of the amount to be paid by the lessee for the right to control the underlying asset.

2.0.12. Lease Term. The lease term is the non-cancelable period plus certain periods subject to options to extend or terminate the lease. The noncancelable period is the shorter of the (1) period identified in the lease contract or agreement that precedes any option to extend the lease or (2) the period identified in the lease contract or agreement that precedes the first option to terminate the lease.

2.0.13. Leasehold Improvements. Leasehold improvements are additions, alterations, remodeling, renovations, or other changes to leased property that either extend the useful life of the existing property or enlarge or improve its capacity and are paid for (financed) by the lessee. Leasehold improvements may include easements and rights-of-way, buildings, structures, and linear structures utilized by the United States Federal Government.

2.0.14. Lessee. Refers to the entity receiving the right to control the use of PP&E from another entity (lessor) through a contract or agreement that qualifies as a lease.

2.0.15. Lessor. The entity that conveys the right to control the use of PP&E (underlying asset) to another entity (lessee) for a period of time as specified in the contract or agreement in exchange for consideration.

2.0.16. Lessor Improvements. Lessor improvements are additions, alterations, remodeling, renovations, or other changes to the leased property that either extend the useful life of the existing property or enlarge or improve its capacity and are paid for (financed) by the lessor rather than by the lessee.

2.0.17. Materiality. Materiality, as defined by the SFFAS 1, is the degree to which omitting or misstating information about the item makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or the misstatement.

2.0.18. Probable. That which can reasonably be expected or is believed to be more likely than not (greater than 50% probability) based on available evidence or logic.

2.0.19. Right to Control. To determine whether a contract or agreement conveys the right to control the use of the underlying asset, assess whether the lessee receives both: (1) the right to obtain, and (2) the right to control access to the economic benefits or services from the use of the underlying asset as specified in the contract or agreement.

2.0.20. Sale-Leaseback. The sale of an underlying asset by the owner and a lease of the property back to the seller (the original owner).

2.0.21. Short-Term Lease. A short-term lease is a non-intragovernmental lease with a lease term of 24 months or less.

2.0.22. Sublease. A lease involves three parties – the original lessor, the original lessee (who is also the lessor in the sublease), and the new lessee.

2.0.23. Variable Payments. A payment where the amount is not fixed. One type may include payments based on an index or rate (e.g., Consumer Price Index), the future performance of the lessee (e.g., percentage of sales), or usage of the underlying asset.

*3.0 ACCOUNTING FOR LEASES

3.1 Short-Term Leases (Non-Intragovernmental)

3.1.1. Lessee Treatment of Short-Term Leases. A DoD Component as the lessee must recognize short-term lease payments as an expense based on the payment provisions of the contract or agreement and standards regarding recognition of accounts payable and other related amounts. The DoD Component (lessee) must recognize an asset if payments are made in advance of the reporting period to which they relate or liability for rent due and unpaid at the end of the reporting period to which they relate. Rental increases, rental decreases, lease incentives, and lease concessions must be recognized when incurred as increases/reductions to lease rental expenses.

3.1.2. Lessor Treatment of Short-Term Leases. A DoD Component as the lessor must recognize short-term lease payments as revenue based on the payment provisions of the contract or agreement and standards regarding recognition of accounts receivable and other related amounts. The DoD Component (lessor) must recognize a liability if payments are received in advance of the reporting period to which they relate or an asset for rent due and to be received after the reporting period to which they relate. Rental increases, rental decreases, lease incentives, and lease concessions must be recognized when incurred as increases/reductions to lease rental income.

3.2 Contracts or Agreements That Transfer Ownership

A contract or agreement that (a) transfers ownership of the underlying asset to a lessee by the end of the contract or agreement and (b) does not contain options to terminate, but that may contain availability of funds or cancellation clause that is not probable of being exercised, must be reported as a purchase of that asset by a lessee or a financed sale of the asset by the lessor. For this purpose, options to purchase the underlying asset prior to the transfer of ownership are not considered options to terminate.

3.3 Intragovernmental Leases

3.3.1. Any lease, regardless of the lease term, that meets the definition of an intragovernmental lease must follow the accounting and disclosure guidance described in subparagraphs 3.3.2 – 3.3.3.

3.3.2. Lessee Treatment of Intragovernmental Leases

3.3.2.1. Lease Payments. A DoD Component as the lessee must recognize lease payments, including lease-related operating costs (for example, maintenance, utilities, and taxes) paid to the lessor, as expenses based on the payment provisions of the contract or agreement and standards regarding recognition of accounts payable and other related amounts. Prepaid rent or payable for rent due must be recognized as an asset or liability, respectively, and an expense must be recognized in the appropriate reporting period based on the specifics of the lease provisions.

3.3.2.2. Leasehold Improvements. Leasehold improvements that meet or exceed the capitalization threshold and are placed in service at or after the beginning of the lease term must be amortized over the useful life (the normal operating life in terms of utility to the lessee) of the leasehold improvement, but no longer than the expected lease term. This recognition is consistent with PP&E capital improvements outlined in SFFAS 6, paragraph 37. Refer to paragraph 3.13 for capitalization thresholds.

3.3.2.3. Disclosures. A DoD Component as the lessee must disclose the following regarding intragovernmental lease activities (which may be grouped for purposes of disclosure): (1) a general description of significant intragovernmental leasing arrangements, including general lease terms with any applicable specific intragovernmental requirements; and (2) annual lease expense in total and by major underlying asset category.

3.3.3. Lessor Treatment of Intragovernmental Leases

3.3.3.1. Lease Payments. A DoD Component as the lessor must recognize lease receipts, including lease-related operating costs (for example, maintenance, utilities, or taxes) received from the lessee as income based on the provisions of the contract or agreement and standards regarding recognition of accounts receivable and other related amounts. Rent paid in advance, or a lease receivable must be recognized as a liability or asset, respectively, and income must be recognized in the appropriate reporting period based on the specifics of the lease provisions.

3.3.3.2. Lessor Improvements. Lessor improvements, which are elements of the leased property that meet or exceed the capitalization threshold, must be capitalized, and depreciated by the lessor over their useful life. This accounting treatment aligns with the lessor's handling of PP&E and is consistent with the capital improvement guidelines outlined in SFFAS 6, paragraph 37.

3.3.3.3. Disclosures. Lessors must disclose the following regarding intragovernmental lease activities (which may be grouped for purposes of disclosure): (1) a general description of significant leases; and (2) future lease payments that are to be received to the end of the lease term for each of the five subsequent fiscal years and in five-year increments thereafter.

3.3.4. Other Considerations for Lessees and Lessors

3.3.4.1. Fixed Rental Increases/Decreases. Rental increases/decreases may be fixed in the lease and take place over time (for example, be based on such factors as anticipated increases/decreases in costs or anticipated appreciation/depreciation in property values, but the amount of the increase/decrease is specified in the lease), or they may be contingent on future events.

3.3.4.2. Variable Rental Increases/Decreases. Rental increases/decreases may also be variable and based on future changes in specific economic factors on which lease payments are based, for example, future sales or usage activity levels or future inflation/deflation (tied to a specific economic indicator where the specific amount of the change is not known).

3.3.4.3. Treatment of Rental Increases/Decreases, and Lease Incentives/Concessions. Rental increases/decreases and lease incentives/concessions must be recognized by the lessee and lessor when incurred as increases/reductions to lease rental expense and income, respectively. Refer to paragraph 3.6 for lease incentives and lease concessions.

3.3.4.4. Initial Direct Lease Costs. Initial direct lease costs incurred by the lessee must be expensed when incurred. Initial direct lease costs incurred by the lessor must be expensed when incurred.

3.3.4.5. Lease terminations and modifications. Refer to paragraph 3.9.

3.4 Lessee Recognition, Measurement, and Disclosure for Leases Other than Short-Term Leases, Contracts or Agreements that Transfer Ownership, and Intragovernmental Leases

3.4.1. At the commencement of the lease term, a DoD Component as the lessee must recognize a lease liability and a right-to-use lease asset (hereinafter referred to as the lease asset), for leases other than short-term leases, contracts, or agreements that transfer ownership, and intragovernmental leases, that meet the capitalization thresholds in section 3.13. For leases that do not meet the capitalization threshold, a lease expense must be recognized in the current period.

3.4.2. Lease Liability. A lessee must initially measure the lease liability at the present value of payments expected to be made during the lease term. Measurement of the lease liability must include the following if required by a lease:

3.4.2.1. Fixed payments;

3.4.2.2. Variable payments that depend on an index or a rate (such as the Consumer Price Index or a market interest rate), initially measured using the index or rate as of the commencement of the lease term;

3.4.2.3. Variable payments that are fixed in-substance as described in 3.4.3;

3.4.2.4. Amounts that are probable of being required to be paid by the lessee under residual value guarantees;

3.4.2.5. The exercise price of a purchase option if it is probable that the lessee will exercise that option;

3.4.2.6. Payments for penalties for terminating the lease, if the lease term reflects the lessee exercising (1) an option to terminate the lease or (2) an availability of funds or cancellation clause;

3.4.2.7. Any lease incentives/concessions (see paragraph 3.6) receivable from the lessor; and

3.4.2.8. Any other payments to the lessor that are probable of being required based on an assessment of all relevant factors.

3.4.3. Variable payments based on the future performance of the lessee or usage of the underlying asset must not be included. Rather, these variable payments must be recognized as an expense in the reporting period in which those payments are incurred. However, any portion of these variable payments that is fixed in-substance must be included in the lease liability. An example is a lease payment based on a percentage of sales or usage but with a required minimum amount to be paid. That required minimum payment is fixed in-substance.

3.4.4. Interest Rate. The future lease payments must be discounted using the interest rate the lessor charges the lessee. If the interest rate is not stated in the lease, it must be based on the

interest rate on marketable U.S. Department of the Treasury (Treasury) securities at the commencement of the lease term (or at the subsequent financial reporting date), with a similar maturity to the term of the lease (as determined by the Treasury).

3.4.4.1. The interest rate may be based on a recent interest rate on marketable Treasury securities or a historical average interest rate on marketable Treasury securities of similar maturity to the term of the lease, provided that the interest rate is consistent with the interest rate on marketable Treasury securities at the commencement of the lease term (or subsequent financial reporting date).

3.4.4.2. When selecting an interest rate based on marketable Treasury securities of similar maturity to the term of the lease, reporting entities may round up or down to the nearest maturity or interpolate the interest rate for the period between two maturities. The methodology for selecting an interest rate based on marketable Treasury security maturities must be consistent from period to period.

3.4.4.3. DoD Components must not extrapolate beyond the longest Treasury maturity when the lease term exceeds it; rather, they must select the longest Treasury maturity. For example, if the longest Treasury maturity at the commencement of the lease term is 30 years, DoD Components must select the 30-year rate as the discount rate for a lease with a 75-year term.

3.4.4.4. In subsequent financial reporting periods, the lessee must calculate the amortization of the discount on the lease liability and recognize that amount as interest expense for the period. Any payments made must be allocated first to the accrued interest liability and then to the lease liability.

3.4.5. Remeasurement of Lease Liability. The lessee must remeasure the lease liability at subsequent financial reporting dates if one or more of the stipulated changes in subparagraphs 3.4.5.1 through 3.4.5.6 have occurred at or before that financial reporting date, based on the most recent lease contract or agreement before the changes, and if the changes individually or in the aggregate, are expected to significantly affect the amount of the lease liability since the previous measurement. Changes arising from amendments to a lease contract or agreement must be accounted for under the provisions of paragraph 3.9 for lease modifications and terminations.

3.4.5.1. There is a change in the lease term;

3.4.5.2. An assessment of all relevant factors indicates that the likelihood of a residual value guarantee being required to be paid has changed from probable to not probable or vice versa;

3.4.5.3. An assessment of all relevant factors indicates that the likelihood of a purchase option being exercised has changed from probable to not probable, or vice versa;

3.4.5.4. There is a change in the estimated amounts for payments already included in the liability (except as provided in subparagraph 3.4.5.7);

3.4.5.5. There is a change in the interest rate the lessor charges the lessee if used as the initial discount rate; or

3.4.5.6. A contingency, upon which some or all of the variable payments that will be made over the remainder of the lease term are based, is resolved such that those payments now meet the criteria for measuring the lease liability. For example, an event occurs that causes variable payments that were contingent on the performance or use of the underlying asset to become fixed payments for the remainder of the lease term.

3.4.5.7. If a lease liability is remeasured for any of the changes in subparagraphs 3.4.5.1 through 3.4.5.6., the liability also must be adjusted for any change in an index or rate used to determine variable lease payments if that change in the index or rate is expected to significantly affect the amount of the liability since the previous measurement. A lease liability is not required to be remeasured solely for a change in an index or rate used to determine variable payments.

3.4.5.8. The lessee also must update the discount rate as part of the remeasurement if one or both of the following changes have occurred and the changes individually or in the aggregate are expected to significantly affect the amount of the lease liability: (1) There is a change in the lease term or (2) An assessment of all relevant factors indicates that the likelihood of a purchase option being exercised has changed from probable to not probable, or vice versa.

3.4.5.9. A lease liability is not required to be remeasured, nor is the discount rate required to be reassessed, solely for a change in the interest rate on marketable Treasury securities.

3.4.5.10. If the discount rate is required to be updated based on the provisions in subparagraph 3.4.5.8., the discount rate must be based on the revised interest rate the lessor charges the lessee at the time the discount rate is updated. If that interest rate cannot be readily determined, the interest rate on marketable Treasury securities with a similar maturity to the term of the lease at the time the discount rate is updated must be used as described in subparagraph 3.4.4.

3.4.6. Lease Asset. A lessee must initially measure the lease asset as the sum of subparagraphs 3.4.6.1 through 3.4.6.3:

3.4.6.1. The amount of the initial measurement of the lease liability, as determined by section 3.4.2;

3.4.6.2. Lease payments made to the lessor (e.g., prepaid rents) at or before the commencement of the lease term, less any lease incentives; and

3.4.6.3. Initial direct lease costs that are necessary to place the lease asset into service.

3.4.6.4 A lease asset must be amortized in a systematic and rational manner over the shorter of the lease term or the useful life of the underlying asset, except as provided in subparagraph 3.4.6.5. For example, if the useful life for the asset is five years but the lease term is 4 years, the amortization of the lease asset is 4 years. If the useful life of the asset is five years,

but the lease term is 7 years, the amortization of the lease asset is 5 years. The amortization of the lease asset must be reported as amortization expense. Refer to Chapter 25 for more information on asset useful life.

3.4.6.5. If a lease contains a purchase option that the lessee has determined is probable of being exercised, the lease asset must be amortized over the useful life of the underlying asset. However, if the underlying asset will be capitalizable and non-depreciable in the reporting period the purchase option is expected to be exercised, the lease asset must not be amortized. If the underlying asset will be non-capitalizable in the reporting period the purchase option is expected to be exercised, the lease asset must be amortized over the remaining lease term.

3.4.6.6. The lease asset generally must be adjusted by the same amount when the lease liability is remeasured. However, if this change reduces the carrying value of the lease asset to zero, any remaining amount must be reported in the statement of net cost as a gain. Changes arising from amendments to a lease contract or agreement must be accounted for under the provisions of lease terminations and modifications.

3.4.6.7. Leased assets are subject to SFFAS 44, Accounting for Impairment of General Property, Plant, and Equipment Remaining in Use. The presence of impairment indicators to the underlying asset may result in a change in the manner or duration of use of the lessee's rights to obtain and control access to economic benefits and services derived from the underlying asset and the application of SFFAS 44. The change in the manner or duration of use of the underlying asset is an indicator that the lease asset may be impaired. If impaired, the lease asset must be reduced first for any change in the lease liability resulting from remeasurement under subparagraph 3.4.5., or terminations or modifications under paragraph 3.9. Any remaining amount must be recognized as an impairment loss. SFFAS 44 provides criteria for testing for impairment, along with recognizing, reporting, and disclosing impairment losses. This guidance must be applied to lease assets to the extent that impairment losses exceed any reduction to the lease liability and lease asset that may stem from the impairment.

3.4.7. Lease Term. The lessee's lease term includes the noncancelable period and the following periods, if applicable:

3.4.7.1. Those periods specified in the lease contract or agreement that relate to a lessee's option to extend the lease if it is probable, based on all relevant factors, that the lessee will exercise that option; and

3.4.7.2. Those periods specified in the lease contract or agreement that follow a lessee's option to terminate the lease (up until the point in time when there is another option or, if none, the end of the lease) if it is probable, based on all relevant factors, that the lessee will not exercise that option.

3.4.8. Disclosure Requirements for Lessees

Lessees must disclose the following regarding lease activities (which may be grouped for purposes of disclosure), other than short-term leases, contracts or agreements that transfer ownership, and intragovernmental leases:

3.4.8.1. A general description of its leasing arrangements, including the basis, terms, and conditions on which any variable lease payments not included in the lease liability are determined;

3.4.8.2. The total amount of lease assets and the related accumulated amortization, are to be disclosed separately from PP&E assets;

3.4.8.3. The amount of lease expense recognized for the reporting period for variable lease payments not previously included in the lease liability;

3.4.8.4. Principal and interest requirements to the end of the lease term, presented separately, for the lease liability for each of the five subsequent years and in five-year increments thereafter; and

3.4.8.5. The amount of the annual lease expense and the discount rate used to calculate the lease liability.

3.5 Lessor Recognition, Measurement, and Disclosures for Leases Other than Short-Term Leases, Contracts or Agreements that Transfer Ownership, and Intragovernmental Leases

3.5.1. At the commencement of the lease term, a DoD Component as the lessor must recognize a lease receivable and unearned revenue, for leases other than short-term leases, contracts or agreements that transfer ownership, and intragovernmental leases. Any initial direct lease costs incurred by the lessor must be reported as an expense of the period.

3.5.2. Lease Receivable. A lessor initially must measure the lease receivable at the present value of lease payments to be received for the lease term, reduced by any provision for uncollectible amounts. Measurement of the lease receivable must include the following types of payments that might be required by a lease:

3.5.2.1. Fixed payments;

3.5.2.2. Variable payments that depend on an index or a rate (such as the Consumer Price Index or a market interest rate), initially measured using the index or rate as of the commencement of the lease term;

3.5.2.3. Variable lease payments that are fixed in-substance;

3.5.2.4. Residual value guarantees that are fixed payments in-substance; and

3.5.2.5. Any lease incentives payable to the lessee.

3.5.3. Variable payments based on the future performance of the lessee or usage of the underlying asset must not be included in the measurement of the lease receivable. Rather, those payments must be recognized as revenue in the reporting period to which those payments relate. However, any portion of those variable payments that are fixed in-substance must be included in the lease receivable. For example, if a lease payment is based on a percentage of sales but has a required minimum payment, that required minimum is a fixed payment in-substance. Similarly, a residual value guarantee is an in-substance fixed payment if it stipulates the underlying asset will be sold at the end of the lease term, with the lessee assuming liability for any shortfall if the sales price is less than an agreed-upon minimum amount.

3.5.4. Amounts to be received under residual value guarantees (that are not fixed in-substance) must be recognized as a receivable and revenue when (a) a guarantee payment is required (as agreed to by the lessee and lessor) and (b) the amount can be reasonably estimated. Amounts to be received for the exercise price of a purchase option or penalty for lease termination must be recognized as a receivable and revenue when those options are exercised.

3.5.5. Interest Rate. The future lease payments to be received must be discounted using the interest rate the lessor charges the lessee. If the interest rate is not stated in the lease, it must be based on the interest rate on marketable Treasury securities at the commencement of the lease term (or at the subsequent financial reporting date), with a similar maturity to the term of the lease (as determined by the U.S. Department of the Treasury).

3.5.5.1. If the interest rate is based on marketable Treasury securities, it must be consistent with the interest rate on marketable Treasury securities at the commencement of the lease term (or the interest rate on marketable Treasury securities on the subsequent financial reporting date).

3.5.5.2. The interest rate may be based on a recent interest rate on marketable Treasury securities or a historical average interest rate on marketable Treasury securities of similar maturity to the term of the lease, provided that the interest rate is consistent with the interest rate on marketable Treasury securities at the commencement of the lease term (or subsequent financial reporting date).

3.5.5.3. When selecting an interest rate based on marketable Treasury securities of similar maturity to the term of the lease, reporting entities may round up or down to the nearest maturity or interpolate the interest rate for the period between two maturities. The methodology for selecting an interest rate based on marketable Treasury security maturities must be consistent from period to period.

3.5.5.4. DoD Components must not extrapolate beyond the longest Treasury maturity when the lease term exceeds it; rather, they must select the longest Treasury maturity. For example, if the longest Treasury maturity at the commencement of the lease term is 30 years, DoD Components must select the 30-year rate as the discount rate for a lease with a 75-year term.

3.5.5.5. In subsequent financial reporting periods, the lessor must calculate the amortization of the discount on the receivable and report that amount as interest revenue for the period. Any payments received must be allocated first to the accrued interest receivable and then to the lease receivable.

3.5.6. Remeasurement of Lease Receivable. The lessor must remeasure the lease receivable at subsequent financial reporting dates if one or more of the changes in subparagraphs 3.5.6.1 through 3.5.6.3 have occurred at or before that financial reporting date, based on the most recent lease contract or agreement before the changes and the changes individually or in the aggregate, are expected to significantly affect the amount of the lease receivable since the previous measurement. Changes arising from amendments to a lease contract or agreement must be accounted for under the provisions of paragraph 3.9 for lease modifications and terminations.

3.5.6.1. There is a change in the lease term;

3.5.6.2. There is a change in the interest rate the lessor charges the lessee;

3.5.6.3. A contingency, upon which some or all of the variable payments that will be received over the remainder of the lease term are based, is resolved such that those payments now meet the criteria for measuring the lease receivable. For example, an event occurs that results in variable payments that are contingent on the performance or use of the underlying asset becoming fixed payments for the remainder of the lease term.

3.5.6.4. If a lease receivable is remeasured for any of the changes described in subparagraphs 3.5.6.1 through 3.5.6.3, the receivable also must be adjusted for any change in an index or rate used to determine variable lease payments if that change in the index or rate is expected to significantly affect the amount of the receivable since the previous measurement. A lease receivable is not required to be remeasured solely for a change in an index or rate used to determine variable lease payments.

3.5.6.5. The lessor also must update the discount rate as part of the remeasurement if one or both of the following changes have occurred and the changes individually or in the aggregate are expected to significantly affect the amount of the lease receivable: (1) there is a change in the lease term, or (2) there is a change in the interest rate the lessor charges the lessee.

3.5.7. Unearned Revenue.

3.5.7.1. A lessor must initially measure the unearned revenue to include the following: (1) the amount of the initial measurement of the lease receivable, and (2) lease payments received from the lessee at or before the commencement of the lease term that relates to future periods (for example, the final month's rent), less (3) any lease incentives paid to, or on behalf of, the lessee at or before the commencement of the lease term.

3.5.7.2. A lessor subsequently must amortize the unearned revenue, recognizing it as earned revenue, in a systematic and rational manner over the term of the lease. The unearned revenue generally must be adjusted using the same amount as the change resulting from the

remeasurement of the lease receivable. However, if the change reduces the carrying value of the unearned revenue to zero, any remaining amount must be reported in the statement of net cost as a loss.

3.5.8. Underlying Asset. A lessor must not derecognize the asset (PP&E) underlying the lease. A lessor must continue to apply other applicable guidance to the underlying asset, including depreciation and impairment. However, if the lease contract or agreement requires the lessee to return the asset in its original or enhanced condition, a lessor must not depreciate the asset during the lease term.

3.5.9. Lease Term. The lessor's lease term includes:

3.5.9.1. Those periods specified in the lease contract or agreement that relate to a lessor's option to extend the lease if there is significant evidence, based on all relevant factors, that the lessor will exercise that option; and

3.5.9.2. Those periods specified in the lease contract or agreement that follow a lessor's option to terminate the lease (up until the point in time when there is another option or, if none, the end of the lease) if there is significant evidence, based on all relevant factors, that the lessor will not exercise that option.

3.5.9.3. Lease term options should be considered in chronological order - with the lessee options considered first. If a determination is made that an additional period will not be added to the lease term for an option based on the likelihood criteria listed in section 3.5.9, subsequent options will not be considered.

3.5.10. Disclosures Requirements for Lessors. Lessors must disclose the following regarding lease activities (which may be grouped for purposes of disclosure), other than short-term leases, contracts or agreements that transfer ownership, and intragovernmental leases:

3.5.10.1. A general description of its leasing arrangements, including the basis, terms, and conditions on which any variable lease payments not included in the lease receivable are determined;

3.5.10.2. The carrying amount of assets on lease by major classes of assets, and the amount of related accumulated depreciation;

3.5.10.3. The total amount of revenue (for example, lease revenue, interest revenue, and any other lease-related revenue) recognized in the reporting period from leases; and

3.5.10.4. The amount of revenue recognized in the reporting period for variable lease payments and other payments not previously included in the lease receivable, including revenue related to residual value guarantees and termination penalties.

3.5.10.5. If a DoD Component's principal ongoing operations consist of leasing assets through the use of non-intragovernmental leases, the DoD Component must disclose a

schedule of future lease payments that are included in the lease receivable, showing principal and interest, for each of the five subsequent years and in five-year increments thereafter.

3.6 Lease Incentives and Lease Concessions

3.6.1. Lease incentives and lease concessions reduce the amount that a lessee is required to pay for a lease. For leases other than short-term leases and intragovernmental leases, lease incentives and lease concessions that provide payments to, or on behalf of, a lessee at or before the commencement of a lease term are included in the initial measurement by directly reducing the amount of the lease asset.

3.6.2. Lease incentive and lease concession payments to be provided after the commencement of the lease term must be accounted for by lessees and lessors as reductions of lease payments for the periods in which the incentive or concession payments will be provided. Those payments must be measured by lessees consistently with the lessee's lease liability and by lessors consistently with the lessor's lease receivable. Accordingly, lease incentive and lease concession payments to be provided after the commencement of the lease term are included in the initial measurement and any remeasurement if they are fixed or fixed in-substance, whereas variable or contingent lease incentive or lease concession payments are not included in the initial measurement.

3.6.3. Lessor improvements that are made to or on behalf of the lessee without additional cost to the lessee must be accounted for by the lessee and the lessor consistent with other lease incentives and lease concessions. As leasehold improvements are paid for (financed) by the lessee, leasehold improvements would not be considered a lease incentive or concession received from the lessor.

3.7 Contracts or Agreements With Multiple Elements

3.7.1. Lessors and lessees may enter into contracts or agreements that contain multiple elements, such as a contract or agreement that contains both a lease element and a non-lease element, or a lease that contains multiple underlying assets.

3.7.2. If a lessor or lessee enters into a contract or agreement that contains both a lease (such as the right to use a building) and non-lease elements (such as maintenance services for the building), the lease and non-lease elements must be accounted for as separate contracts or agreements unless the contract or agreement meets the exception in subparagraph 3.7.5.

3.7.3. If a lease involves multiple underlying assets and the assets have different lease terms, the lessor and lessee must account for each underlying asset as a separate lease element. The provisions of paragraph 3.7 must be applied unless the contract or agreement meets an exception in subparagraph 3.7.5.

3.7.4. To allocate the contract or agreement price to the different elements, lessors and lessees must first use any prices for individual elements that are included in the contract or agreement, as long as the price allocation does not appear to be unreasonable based on the terms

of the contract or agreement and professional judgment, maximizing the use of observable information, for example, using readily available observable stand-alone prices. Stand-alone prices are those that would be paid or received if the same or similar assets were leased individually or if the same or similar non-lease elements (such as services) were contracted individually. Some contracts or agreements provide discounts for bundling multiple leases or lease and non-lease elements together in one contract or agreement. These discounts may be considered when determining whether individual element prices do not appear to be unreasonable. For example, if the individual element prices are each discounted by the same percentage from normal market prices, those element prices would not be considered unreasonable.

3.7.5. If a contract or agreement does not include prices for individual elements or if any of those prices appear to be unreasonable, lessors and lessees must use professional judgment to determine their best estimate for allocating the contract or agreement price to those elements, maximizing the use of observable information. If it is not practicable to determine the best estimate for price allocation for some or all elements in a contract or agreement, those elements must be accounted for as a single lease unit.

3.7.6. If multiple elements are accounted for as a single lease unit, the accounting for that unit must be based on the primary lease element within that unit. For example, the primary lease element's lease term must be used for the unit if the lease elements have different lease terms.

3.8 Contract or Agreement Combinations

3.8.1. Contracts or agreements that are entered into at or near the same time with the same counterparty must be considered to be part of the same lease contract or agreement if either of the following criteria is met: (1) the contracts or agreements are negotiated as a package with a single objective; and (2) the amount of consideration to be paid in one contract or agreement depends on the price or performance of the other contract or agreement.

3.8.2. If multiple contracts or agreements are determined to be part of the same lease contract or agreement, that contract or agreement must be evaluated in accordance with the guidance for contracts or agreements with multiple elements as described in paragraph 3.7.

3.9 Lease Terminations and Modifications

3.9.1. The provisions of a lease contract or agreement may be amended while the contract or agreement is in effect. Examples of amendments to lease contracts or agreements include changing the contract or agreement price, lengthening, or shortening the lease term, and adding or removing an underlying asset. An amendment must be considered a lease modification unless the lessee's right to use the underlying asset decreases, in which case the amendment must be considered a partial or full lease termination. By contrast, exercising an existing option, such as an option to extend or terminate the lease, is subject to the guidance for remeasurement.

3.9.2. Lease Terminations. The lessee and lessor must account for an amendment during the reporting period resulting in a decrease in the lessee's right to use the underlying asset (for

example, the lease term is shortened, or the number of underlying assets is reduced) as a partial or full lease termination.

3.9.2.1. Lessee Treatment of Lease Terminations. A lessee generally must account for the partial or full lease termination by reducing the carrying values of the lease asset and lease liability and recognizing a gain or loss for the difference. However, if the lease is terminated because of the lessee purchasing the underlying asset from the lessor, the lease asset must be reclassified to the appropriate class of owned asset.

3.9.2.2. Lessor Treatment of Lease Terminations. A lessor must account for the full or partial termination of a lease by reducing the carrying values of the lease receivable and related unearned revenue and recognizing a gain or loss for the difference. However, if the lease is terminated because of the lessee purchasing an underlying asset from the lessor, the carrying value of the underlying asset also must be derecognized and included in the calculation of any resulting gain or loss.

3.9.3. Lease Modifications. The lessee and lessor must account for an amendment during the reporting period resulting in a modification to a lease contract or agreement as a separate lease (that is, separate from the most recent lease contract or agreement before the modification) if both of the following conditions are present: (1) the lease modification gives the lessee an additional lease asset by adding one or more underlying assets that were not included in the original lease contract or agreement; and (2) the increase in lease payments for the additional lease asset does not appear to be unreasonable based on (a) the terms of the amended lease contract or agreement and (b) professional judgment, maximizing the use of observable information (for example, using readily available observable stand-alone prices).

3.9.3.1. Lessee Treatment of Lease Modifications. Unless a modification is reported as a separate lease, a lessee must account for a lease modification by remeasuring the lease liability. The lease asset must be adjusted by the difference between the remeasured liability and the liability immediately before the lease modification. However, if the change reduces the carrying value of the lease asset to zero, any remaining amount must be reported in the statement of net cost as a gain.

3.9.3.2. Lessor Treatment of Lease Modifications. Unless a modification is reported as a separate lease, a lessor must account for a lease modification by remeasuring the lease receivable. The unearned revenue must be adjusted by the difference between the remeasured receivable and the receivable immediately before the lease modification. However, to the extent the change relates to payments for the current period, the change must be recognized as revenue or expense for the current period.

3.10 Subleases

3.10.1. A sublease involves three parties: the original lessor, the original lessee (who also is the lessor in the sublease), and the new lessee. The original lessor must continue to apply the general lessor guidance. The DoD Component that is the original lessee and becomes the lessor in the sublease must account for the original lease and the sublease as two separate transactions,

as a lessee and a lessor, respectively. Those two separate transactions must not be offset against one another. The new lessee must apply the general lessee guidance.

3.10.2. The original lessee (and now the lessor in a sublease) must include the sublease in its disclosure of the general description of lease arrangements. Its lessor transactions related to subleases must be disclosed separately from its lessee transactions related to the original lease.

3.11 Sale-Leaseback Transactions

3.11.1. Sale-leaseback transactions involve the sale of an underlying asset by the owner and a lease of the property back to the seller (original owner). A sale-leaseback must include a transaction that qualifies as a sale to be eligible for sale-leaseback accounting. A sale-leaseback transaction that does not include a transaction that qualifies as a sale must be accounted for as a borrowing by both the seller-lessee and the buyer-lessor. Refer to SFFAS 7, "Accounting for Revenue and Other Financial Sources and Concepts for Reconciling Budgetary and Financial Accounting," paragraph 295 (with the public) and paragraphs 314-315 (intragovernmental).

3.11.2. The sale and lease portions of a sale-leaseback transaction must be accounted for as two separate transactions: (1) a sale transaction; and (2) a lease transaction, except that the difference between the carrying value of the capital asset that was sold and the net proceeds from the sale must be reported as unearned revenue or deferred expense to be recognized in the statement of net cost systematically and rationally over the term of the lease. However, if the lease portion of the transaction qualifies as a short-term lease, any difference between the carrying value of the capital asset that was sold and the net proceeds from the sale must be recognized immediately.

3.11.3. A sale-leaseback transaction is considered to have off-market terms if there is a significant difference between: (a) the sales price and the estimated fair value of the asset; or (b) the present value of the contractual lease payments and the estimated present value of what the lease payments for that asset would be at a market price, whichever of the two differences is more readily determinable. The difference must be reported based on the substance of the transaction (for example, as a borrowing, a non-exchange transaction, or an advance lease payment) rather than as a part of the sales-leaseback transaction.

3.11.4. A seller-lessee must disclose the terms and conditions of sale-leaseback transactions as part of the disclosures required of a lessee. A buyer-lessor must disclose the terms and conditions as part of the disclosures required of a lessor.

3.12 Lease-Leaseback Transactions

In a lease-leaseback transaction, an asset is leased by one party (first party) to another party and then leased back to the first party. The leaseback may involve an additional asset (such as leasing a building that has been constructed by a developer on land owned by and leased back to a DoD Component) or only a portion of the original asset (such as leasing back only one floor of a building to the owner). A lease-leaseback transaction must be displayed in the financial statements as a net transaction. Both parties to a lease-leaseback transaction must disclose the amounts of the lease and the leaseback separately.

3.13 Capitalization Thresholds

A capitalization threshold is the amount that determines the financial reporting of an asset or expensing its cost. See Table 26-1 for capitalization thresholds. The applicable capitalization threshold for the underlying assets (PP&E) is applied to the lease assets. Refer to Chapters 4 and 25 for additional guidance on capitalization thresholds for real property and general equipment, respectively.

3.14 Intragovernmental Leasehold Reimbursable Work Agreements

3.14.1. Normally, for intragovernmental reimbursable leasehold work agreements, the customer-lessee is expected to be the predominant beneficiary of the acquisition, construction, improvement, and/or alteration to the underlying asset. The customer-lessee must recognize the leasehold improvement, which is a type of PP&E asset in accordance with subparagraphs 3.3.2.2 and paragraph 3.13.

3.14.2. The provider-lessor would not be expected to derive significant residual economic benefits or services from such reimbursable work under these types of agreements. The provider-lessor must expense the costs incurred for the reimbursable work and recognize the amounts received as reimbursement as intragovernmental revenue. The provider-lessor must account for the underlying asset other than the leasehold improvement (recognized by the customer-lessee in these types of agreements) in a manner consistent with subparagraph 3.5.8.

3.14.3. However, for acquisitions, construction, improvements, and/or alterations under an intragovernmental reimbursable leasehold work agreement with an expected useful life beyond the remaining lease term and for which the provider-lessor is expected to derive a significant level of residual economic benefits and services from the reimbursable work, the customer-lessee would not be considered the predominant beneficiary. For these types of agreements, the customer-lessee and provider-lessor must follow the guidance under this subparagraph.

3.14.3.1. Customer-Lessee. The federal entity paying for the acquisition/construction of, or improvements and/or alterations to, the underlying asset provided by the provider-lessor on a reimbursable basis.

3.14.3.1.1. Customer-lessees must initially recognize an intragovernmental reimbursable work asset for the amount payable for reimbursable work acquisition, construction, improvement, and/or alteration costs (in accordance with subparagraph 3.3.3.1).

3.14.3.1.2. Customer-lessees must amortize the intragovernmental reimbursable work asset systematically and rationally over the shorter of: (a) the remainder of the lease term; or (b) the useful life of the underlying asset acquired/constructed, or improvements/alterations thereto associated with the reimbursable work. The amortization of the intragovernmental reimbursable work asset must commence when the customer-lessee has access to economic benefits and services resulting from the reimbursable work and be reported as amortization expense.

3.14.3.1.3. Coordination with the provider-lessor on asset amount and subsequent amortization can facilitate the elimination of inter-entity balances and costs in a manner consistent with SFFAS 4 (i.e., paragraphs 108-113) when appropriate for purposes of recognizing the full cost of goods and services provided for inter-entity business-type activities, and the elimination of inter-entity balances and transactions.

3.14.3.1.4. Customer-lessees must disclose a general description of significant reimbursable work agreement activities. Such disclosures may be separate from or incorporated within the general description disclosures provided for under subparagraph 3.3.2.3.

3.14.3.2. Provider-lessor. The federal entity providing the acquisition/construction of, or improvements and/or alterations to, the underlying asset to the customer-lessee on a reimbursable basis.

3.14.3.2.1. Provider-lessors must initially recognize an intragovernmental unearned reimbursable work revenue liability for the amount receivable for reimbursable work acquisitions, construction, improvements, and/or alterations (in accordance with subparagraph 3.3.3.1).

3.14.3.2.2. Provider-lessors must recognize the intragovernmental reimbursable work revenue systematically and rationally over the shorter of (a) the remainder of the lease term or (b) the useful life of the underlying asset acquired/constructed, or improvements/alterations thereto associated with the reimbursable work. Revenue recognition must commence when the provider-lessor provides access to the economic benefits and services resulting from the reimbursable work.

3.14.1.3.3. Coordination with the customer-lessee on revenue recognition can facilitate the elimination of inter-entity balances and earned revenues (in accordance with subparagraph 3.3.3.1).

3.14.1.3.4. Provider-lessors must disclose a general description of significant reimbursable work agreement activities. Such disclosures may be separate from or incorporated within the general description disclosures provided for under subparagraph 3.5.10.

4.0 ADDITIONAL CONSIDERATIONS

*4.1 Standard General Ledger Accounts

The U.S. Standard General Ledger (USSGL) accounts used to report DoD lease entries are provided in the Transaction Library and Standard Reporting Chart of Accounts available on the Office of the Deputy Chief Financial Officer Standard Financial Information Structure ([SFIS](#)) web page.

4.2 Recognition Uncertainty

4.2.1. In situations where doubt exists as to which DoD Component must record an item, the DoD Components involved must reach an agreement with the other applicable DoD Component(s) or federal agencies as to which entity will record the item.

4.2.2. If the DoD Components cannot reach an agreement, the matter must be referred to the Office of the Deputy Chief Financial Officer, Office of the Under Secretary of Defense (Comptroller) for resolution. Requests for resolution must be accompanied by adequate supporting documentation to assist in the resolution of the matter and be submitted through the Financial Management and Comptroller of the submitting Military Department or Defense Agency.

4.2.3. The DoD Component that procures an item of PP&E by entering a lease will be the DoD Component that must initially record the lease transaction. In the event a DoD Component other than the initial lessee uses and benefits from a lease asset, the recognition responsibility of the lease asset must be re-evaluated.

4.3 Bulk Acquisitions Through Leases

Other than short-term contracts or agreements that transfer ownership, and intragovernmental leases, a bulk acquisition is defined as the acquisition of like items, of which their individual value does not meet the capitalization threshold, as part of multiple leases with a single lessor within a fiscal year. Acquisitions through multiple leases with a single lessor during separate fiscal years are to be considered separately within each fiscal year. To determine proper recognition of bulk acquisitions through leases, the acquisition cost of all like items leased, under multiple leases with a single lessor within a fiscal year must be totaled, and the resulting total must be considered against the lease criteria for capitalization and the capitalization threshold prescribed by paragraph 3.13. Refer to Volume 4 Chapter 25 for additional guidance regarding Bulk Acquisitions.

4.4 Accounting for Real Property Leases Outside of the United States and Managed by the Department of State.

As used in this chapter, the term “outside of the United States” means other than the 50 States of the United States, the District of Columbia, and the commonwealths, territories, and possessions of the United States. For real property leases that are managed by the Department of the State, the Department of State’s Bureau of the Comptroller and Global Financial Services (CGFS) will provide relevant lease data to any agencies who occupy real property overseas and will allocate the residential housing pool lease balances (i.e., liability, corresponding right to use asset, and amortization) across the participating agencies. The applicable DoD Component with the assigned leases, will have to record the applicable allocation/portion in their book and records. The housing pool allocation will be based on each federal agency’s share of the estimated expenses for the next fiscal year and will be applied across the entire housing pool’s net present value calculation. For further information or assistance contact CGFS at sffas54leases-cgfs@state.gov.

4.5 Use of Canceled Treasury Account Symbol

4.5.1. The Treasury's Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) is a data collection system that replaces the reporting functionalities of Federal Agencies Centralized Trial Balance System I and II, Intra-governmental Fiduciary Confirmation System, and Intra-governmental Reporting and Analysis System, as the primary means for DoD Components to report their trial balance data to Treasury. Capitalized assets are required to be reported and remain in GTAS after the original purchasing Treasury Account Symbol (TAS) has expired and been canceled. If a capitalized asset has not been moved to a canceled ("C") TAS as described in subparagraph 4.5.2; GTAS will provide a "C" TAS on the GTAS Super Master Use of Canceled Treasury Account Symbol Account File (SMAF) for each fund family represented on the SMAF. The system-generated "C" TAS will have three elements: the three-digit agency identifier, availability type "C", and a four-digit main account.

4.5.2. All DoD Components must use the "C" availability type TAS to report capitalized assets. Assets may be moved to a "C" TAS at any time from the purchase date to the date the original purchasing fund is canceled. (Refer to the [*TFM Volume 1, Part 2, Chapter 4700*](#) for additional information.)

4.5.3. To transfer an asset to a "C" TAS

4.5.3.1. Use USSGL account transaction E510 to transfer-out the asset from the purchasing fund account.

4.5.3.2. Use USSGL account transaction E606 to transfer-in the asset into the appropriate "C" TAS

*4.6 Supporting Documentation

4.6.1. Entries to record financial transactions must be supported by source documents reflecting all transactions affecting the DoD Component's investment in assets under a lease.

4.6.2. All leases must be supported as of the date the DoD Component takes custody of the asset. The documents listed in [Table 26-2](#) must be readily available to support the changes in lease asset value or physical attributes because of a new lease, leasehold improvements, impairments, modifications, and terminations:

4.6.3. Lease documents must be retained by the DoD Component in accordance with the Volume 1, Chapter 9 requirements or as otherwise stated. Documentation (original documents and/or hard and electronic copies of original documentation) must be maintained in a readily available location during the applicable retention period. The documentation must also be linked to the appropriate unique identifier(s).

4.6.4. Include sufficient lease information indicating the physical quantity, location, and unit cost of the PP&E underlying assets. The accountable property records must support

procurement and utilization decisions, including identifying potential excess PP&E for reuse, transfer to other DoD Components, or disposal.

4.6.5. Documentation must enable periodic, independent verification of the accounting and accountable property records through periodic physical counts/inventories of PP&E underlying assets (existence and completeness – “book to floor and floor to book”). Reconcile the Accountable Property System of Record (APSR) and accounting systems with the USSGL accounts and physical counts. Personal hand receipt self-validations are not acceptable. See DoDI 5000.64 (excluding real property) and DoDI 4165.14 for real property.

4.6.6. Identify and classify PP&E that was capitalized, recorded in the APSR and accounting system, and reported in the financial statements.

4.6.7. Use the same documents for the accounting and accountable property records. Property accountability records must be integrated and reconciled with the accounting system.

4.6.8. Include all PP&E possessed by the Department (to include DoD leased property held by contractors).

4.6.9. Identify and account for all leased PP&E.

4.6.10. Identify and account for improvements to PP&E lease assets.

4.7 Physical Inventories of PP&E

DoD Components must perform periodic physical inventories of real property and general equipment in accordance with DoDI 4165.14 and DoDI 5000.64, respectively.

4.8 Reporting Requirements

DoD Components with leased PP&E must reference a note on the Balance Sheet that discloses information about the reported assets. See Volume 6B for the specific reporting requirements.

4.9 Environmental Liabilities/Cleanup Costs

The lease agreement must clearly identify the party responsible for environmental liabilities/cleanup costs. The accounting policy for environmental liabilities/cleanup costs on PP&E is contained in Chapter 13.

*Table 26-1 Capitalization Thresholds

Entity	Capitalization Threshold
Army Real Property	\$1,000,000
Air Force Real Property	\$1,000,000
Air Force General Fund General Equipment	\$1,000,000
Navy Real Property	\$1,000,000
Navy General Fund General Equipment	\$1,000,000
Marine Corps Real Property	\$500,000
Army Corps of Engineers Buildings and Structures Related to Hydropower	Capitalized regardless of cost
Army Corps of Engineers General PP&E Other than Buildings and Structures Related to Hydropower	\$25,000
DoD Intelligence Community Entities (All PP&E)	\$1,000,000
All Other DoD Component General Funds and Working Capital Funds' PP&E	\$250,000

Signed lease for leased property; 5. Executed Occupancy agreement; and 6. Transfer letter and documents for transferred assets.

VOLUME 4, CHAPTER 27: “INTERNAL USE SOFTWARE”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [bold, italic, blue, and underlined font](#).

The previous version dated [August 2018](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Administrative updates to include clarifying language in accordance with Department of Defense Financial Management Regulation Revision Standard Operating Procedures.	Revision
Throughout	Deleted references and tables related to Capital Leases. Capital Leases are discussed in Chapter 26 , “Accounting for Leases”.	Deletion
1.1	Refined the definition of General Property, Plant, and Equipment.	Revision
2.1.4.3	Updated the internal use software definition based on FASAB Technical Release 16: “Implementation Guidance for Internal Use Software”, footnote 4.	Revision
2.3.1	Added clarifications for when capitalization starts.	Revision
2.4	Moved “Alternative Valuation Methodology for Establishing Opening Balances for Internal Use Software” to paragraph 2.4, (previously Annex 2).	Revision
2.5.5	Moved specific cost treatment from Valuation section 2.3 to Recognition section 2.5. Valuation is full cost. However, recognition differs based on criteria described in section.	Revision
Annex 2	Moved Software Development Life-Cycle Phases section Annex (previously 2.3.2) to provide additional clarity.	Revision
Annex 3	Moved Software Development Methods section to Annex (previously 2.3.3) to provide additional clarity.	Revision

CHAPTER 27

INTERNAL USE SOFTWARE

1.0 GENERAL

*1.1 Purpose

1.1.1. This chapter prescribes the Department of Defense (DoD) accounting policy for Internal Use Software (IUS), which is a subset of General Property, Plant, and Equipment (PP&E). General PP&E, per Statement of Federal Financial Accounting Standards (SFFAS 10), “Accounting for Internal Use Software,” includes IUS and consists of tangible and intangible assets that (1) have an estimated service life of two years or more; (2) are not intended for sale in the ordinary course of business; and (3) are intended to be used or available for use by the entity.

1.1.2. The IUS general ledger accounts are listed in the government-wide United States Standard General Ledger (USSGL) contained in Volume 1, Chapter 7. The accounting entries for these accounts and the DoD Standard Chart of Accounts are specified in the DoD USSGL Standard Transaction Library. Unless otherwise stated, this chapter is applicable to all DoD Components, including Working Capital Fund (WCF) activities.

1.2 Authoritative Guidance

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.1. Federal Accounting Standards Advisory Board (FASAB) SFFAS 1, “Accounting for Selected Assets and Liabilities;”

1.2.2. FASAB SFFAS 4, “Managerial Cost Accounting Standards and Concepts;”

1.2.3. FASAB SFFAS 10, “Accounting for Internal Use Software;”

1.2.4. FASAB SFFAS 50, “Establishing Opening Balances for General Property, Plant, and Equipment: Amending SFFAS 6, SFFAS 10, and SFFAS 23, and Rescinding SFFAS 35;”

1.2.5. FASAB SFFAC 5, “Definitions of Elements and Basic Recognition Criteria for Accrual-Basis Financial Statements;”

1.2.6. FASAB SFFAC 7, “Measurement of the Elements of Accrual-Basis Financial Statements in Periods After Initial Recording;”

1.2.7. FASAB Technical Release (TR 13), “Implementation Guide for Estimating the Historical Cost of General Property, Plant, and Equipment;”

1.2.8. FASAB [TR 14](#), “Implementation Guidance on the Accounting for the Disposal of General Property, Plant & Equipment;”

1.2.9. FASAB [TR 15](#), “Implementation Guidance for General Property, Plant, and Equipment Cost Accumulation, Assignment and Allocation;”

1.2.10. FASAB [TR 16](#), “Implementation Guidance for Internal Use Software;”

1.2.11. FASAB [TR 17](#), “Conforming Amendments to Technical Releases for SFFAS 50, Establishing Opening Balances for General Property, Plant, and Equipment;”

1.2.12. FASAB [TR 18](#), “Implementation Guidance for Establishing Opening Balances;”

1.2.13. FASAB [TR 23](#), “Omnibus Technical Release Amendments 2024: Conforming Amendments to Technical Releases 10, 16, 20, and 21;”

1.2.14. Office of Management and Budget (OMB) [Circular No. A-136](#), “Financial Reporting Requirements;”

1.2.15. [Treasury Financial Manual \(TFM\) Volume1, Part 2, Chapter 4700](#) “Federal Entity Reporting Requirements for the Financial Report of the United States Government;”

* 1.2.16. [DoD Instruction \(DoDI\) 5000.75](#); “Business Systems Requirements and Acquisition;”

1.2.17. [DoDI 5000.76](#); “Accountability and Management of Internal Use Software (IUS).”

2.0 ACCOUNTING FOR IUS

2.1 Definition

2.1.1. “Software” includes the application and operating system programs, procedures, rules, and any associated documentation pertaining to the operation of a computer system or program. Most often, software is an integral part of an overall system(s) having interrelationships between software, hardware, personnel, procedures, controls, and data. IUS is software that:

2.1.1.1. Is acquired or developed to meet the entity’s internal or operational needs (*intended purpose*); and

2.1.1.2. Is a stand-alone application, or the combined software components of an information technology (IT) system that can consist of multiple applications, modules, or other software components integrated and used to fulfill the entity’s internal or operational needs (*software type*).

2.1.2. IUS can be:

2.1.2.1. Purchased from commercial off-the-shelf (COTS) vendors and be ready for use with little or no changes;

2.1.2.2. Internally developed by employees of DoD, including new software and existing or purchased software that is modified with or without a contractor's assistance; or

2.1.2.3. Contractor-developed software that a DoD Component paid a contractor to design, program, install, and implement, including new software and the modification of existing or purchased software.

2.1.3. IUS includes software that is:

2.1.3.1. Used to operate an entity's programs (e.g., financial and administrative software, including that used for project management);

2.1.3.2. Used to produce the entity's goods and to provide services (e.g., maintenance work order management and loan servicing); and

2.1.3.3. Developed or obtained for internal use and subsequently provided to other Federal Entities with or without reimbursement.

2.1.4. Integrated (embedded) software is not IUS.

2.1.4.1. IUS **excludes** computer software that integrates with and is necessary for operating General PP&E, rather than performing an application. **DoD Components must consider** such software as part of the PP&E of which it is an integral part, and must capitalize and amortize accordingly. **They must use** the aggregate cost of the hardware and software to determine whether to capitalize or expense the costs. In situations where software and the hardware on which it runs have independent service lives, **they must** determine the useful life of the software independently of the useful life of the hardware. **They must** determine **this** on a case-by-case basis and **document** the rationale.

2.1.4.2. Software used in conjunction with the operation of equipment is not the same as the integrated or embedded software **and** can be considered IUS if all of the following criteria apply:

2.1.4.2.1. The software was developed separately from the equipment;

2.1.4.2.2. The software is not required for the equipment to perform its core purpose and functions; and

2.1.4.2.3. The quantity of equipment items on which the software will be installed is unknown.

* 2.1.4.3. Additionally, software developed separately and installed on several assets at different times may be treated as a separate IUS asset, rather than integrated or embedded software. For example, anti-ballistic missile software installed on multiple radar systems at different times can be treated as a separate IUS asset if the software meets the capitalization threshold (see subparagraph 2.5.5 for capitalization thresholds).

2.1.5. DoD Components may purchase IUS as part of a package of products and services (e.g., training, maintenance, data conversions, reengineering, site licenses and rights to future upgrades and enhancements). They must allocate costs based on the relative fair values of the IUS and the services if the costs are not readily separable between the IUS and the services on the invoice. They must capitalize the cost of the IUS (assuming it meets the capitalization criteria) and expense the cost of the training/maintenance. They must expense non-IUS costs (e.g., training and maintenance services) that are not susceptible to allocation between maintenance and relatively minor enhancements.

2.1.6. SFFAS 1 defines materiality as the degree to which omitting or misstating an item in a financial statement is likely to change or influence the judgment of a reasonable person relying on the information.

2.1.7. Additional definitions can be found in Annex 1.

Figure 27-1. IUS is Generally One Component of an IT System

2.2 USSGL Accounts

2.2.1. The DoD Components must record IUS transactions to general ledger accounts in the financial statements required by the Treasury and other reporting requirements mandated by Congress and OMB. The USSGL Transaction Library outlines detailed posting transactions, and the DoD Standard Chart of Accounts provides detailed account descriptions. The DoD standard Chart of Accounts is located on the Office of the Deputy Chief Financial Officer (ODCFO) Standard Financial Information Structure webpage.

2.2.2. DoD Components may elect to create subaccounts within their general ledger systems to track software under development at a detailed level; however, the internal subaccounts must summarize to one USSGL/DoD account.

2.2.3. Management must retain adequate supporting source documentation for entries in accordance with Volume 1, Chapter 9, “Financial Records Retention.”

2.3 Valuation

* 2.3.1. Record the acquisition and other costs necessary to make the software operable.

2.3.1.1. DoD Components calculate the cost of COTS software by adding the actual purchase price of the COTS license to any costs incurred to place the software in service or otherwise make the software ready for use.

2.3.1.2. The cost of contractor-developed software includes the amount paid to the contractor to design, program, install, and implement new software or to modify existing or COTS software, plus any costs incurred to implement or otherwise make the software ready for use.

2.3.1.3. The costs of internally developed software must include the full cost incurred. Full cost includes both direct and indirect costs of new software (e.g., salaries of programmers, systems analysts, project managers, and administrative personnel; associated employee benefits; outside consultants’ fees; rent; and supplies and overhead) and technical documentation.

2.3.1.4. Considering economic feasibility, a cost estimation technique could be developed to trace the costs to outputs based on the SFFAS 4, paragraph 124, provision that “[in] principle, costs should be assigned to outputs in one of the methods listed in the order of preference:

2.3.1.4.1. Directly tracing costs wherever economically feasible;

2.3.1.4.2. Assigning costs on a cause-and-effect basis; and

2.3.1.4.3. Allocating costs on a reasonable and consistent basis.

*2.4 Alternative Valuation Methodology for Establishing Opening Balances

2.4.1. Establishing Opening Balances for Internal Use Software

2.4.1.1. The alternative valuation method for establishing opening balances for IUS described in FASAB SFFAS 50, “Establishing Opening Balances for General Property, Plant and Equipment: Amending SFFAS 6, SFFAS 10, SFFAS 23, and Rescinding SFFAS 35” is available only once to each reporting entity. Therefore, prior to the establishment of IUS opening balances, DoD Components must validate that they are prepared to account for and comply with the recognition, measurement, presentation, and disclosure requirements for IUS in accordance with FASAB SFFAS 10, “Accounting for Internal Use Software.”

2.4.1.2. DoD Components must identify any IUS that they have capitalized prior to establishing opening balances, including capitalized development costs. All DoD Components that have not previously undergone a financial statement audit where they received an unmodified (i.e., “clean”) audit opinion will exclude the value of all IUS, including development costs, from opening balances of General Property, Plant, and Equipment on their Balance Sheet. This means that DoD Components who have not undergone a financial statement audit where they received a “clean” audit opinion will adjust their capitalized IUS, including development costs and opening balances to zero in the year the DoD Component makes an unreserved assertion. A DoD Component that has received a “clean” audit opinion should continue to account for IUS, including development costs, in accordance with FASAB SFFAS 10 and will not reduce their balances to zero.

2.4.1.3. Entries in the DoD Component accounting systems/records to record IUS opening balances at zero are subject to the reporting requirements under paragraph 13 of FASAB SFFAS 21, “Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources”. Accordingly, reflect the entries as a change in accounting principle. Document and support any adjustments to assist ongoing audit efforts.

2.4.2. Financial Statement Disclosure Requirements

DoD Components who adjust their opening IUS balances must disclose in their financial statements that they used an alternative valuation method in establishing their opening balances. They must include a disclosure in the financial statements describing the use of the alternative valuation method in the first reporting period in which the reporting entity makes an unreserved assertion that its financial statements, or one or more line items, are in accordance with Generally Accepted Accounting Principles. An unreserved assertion is an unconditional statement.

2.4.3. Prospective Accounting for Internal Use Software

2.4.3.1. DoD Components must capitalize IUS costs for IUS in-service and IUS in development in accordance with the provisions of FASAB SFFAS 10 after recording the opening balances at zero as described in paragraph 2.4.1.2. This capitalization requirement includes IUS development costs incurred after the establishment of opening balances for projects started prior

to the establishment of opening balances. DoD Components must have sufficient source documentation to support the capitalized amounts of IUS based on actual historical cost. DoD Components must apply the provisions of FASAB SFFAS 10 regarding amortization and impairment to any unamortized capitalized cost of the IUS.

2.4.3.2. DoD Components **must** fully implement the systems, internal controls, processes and procedures to be compliant with accounting for IUS under FASAB SSFAS 10. They must also periodically review and update the documentation of the systems, processes, and procedures as needed.

2.5 Recognition

2.5.1. DoD Components must recognize all acquired IUS for accountability and financial reporting purposes. Recognition requires the proper accounting treatment (expense or capitalization with amortization) and the reporting of capitalized amounts and accumulated amortization on the appropriate DoD Component's financial statements. **The capitalizable cost phase begins after the entity has completed all preliminary planning, designing, coding, and testing activities that are necessary to establish that the IUS can meet the design specifications. Capitalize IUS that has a useful life of two years or more and meets the capitalization criteria described in subparagraph 2.5.5. Expense IUS items with a cost below the capitalization threshold; except for IUS items acquired as part of a qualifying bulk purchase (see subparagraph 2.5.8). Expense data conversion and training cost in the period incurred.**

2.5.2. Recognition Responsibility

2.5.2.1. The DoD Component's financial reporting responsibility can be determined using two-tier criteria:

2.5.2.1.1. Exclusive/sole Use. When a DoD Component is the exclusive/sole user of capitalized IUS, it will report the IUS on its Balance Sheet. If there is no exclusive/sole user, the DoD Component must apply the second criteria.

2.5.2.1.2. Control. If an exclusive/sole user does not exist, the DoD Component that controls the IUS will have financial reporting responsibility. Evidence of control can include funding the software maintenance, exercising access control, and prioritizing enhancements.

2.5.2.2. DoD Components that possess and/or control IUS items that materially contribute to the Component's mission must maintain accounting and financial reporting for such items, regardless of the organization that originally acquired or provided the funding for the items. If a DoD Component prepares financial statements, **it** must appropriately recognize IUS in its financial statements.

2.5.3. Recognition Uncertainty

2.5.3.1. It is important that the overall accounting records of the DoD and the Federal Government are not duplicative. In situations where doubt exists as to which DoD Component should recognize an item, DoD Components involved must reach an agreement with the other applicable DoD Components or Federal agencies as to which entity will recognize the item. DoD Components must document the process used to reach this agreement and the terms of the agreement in a memorandum of agreement, which will serve as supporting documentation.

2.5.3.2. If DoD Components cannot reach an agreement, they must refer the matter to the ODCFO, Office of the Under Secretary of Defense (Comptroller) for resolution. DoD Components must submit requests for resolution with adequate supporting documentation to assist in resolving the matter, and they should send these requests through the Financial Management and Comptroller of their respective Military Department or Defense Agency.

2.5.4. Recognition Timing

2.5.4.1. Recognition of the COTS IUS for financial reporting purposes must occur no later than the technical acceptance of the software.

2.5.4.2. Record IUS in development anticipated to meet capital criteria in the IUS in Development account during the design, development, and testing, phases. Annex 2 describes the various phases of software development. After completing technical acceptance testing, DoD Components must recognize the IUS asset, transfer capital costs to the IUS account, and establish accountability in the APSR.

2.5.4.2.1. Larger and more complex software systems, such as Enterprise Resource Planning systems, are developed and placed in service over time. For each module or component of a software project, when a module or component has been successfully tested, move costs from IUS in Development to Internal Use Software, and begin amortization.

2.5.4.2.2. If the use of a module is dependent on the completion of another module(s), move costs from IUS in Development to IUS when both that module and the other module(s) have successfully completed testing.

2.5.4.2.3. For example, a DoD Component may develop an accounting software system containing three modules: a general ledger, an accounts payable sub-ledger, and an accounts receivable sub-ledger. In this example, each module could be analyzed to determine whether it could be treated as a separate IUS asset. Specifically, if the module provides economic benefit through distinct, substantive functionality, and meets the tests for capitalization threshold, ownership, and eligibility for capital treatment, then the module could be treated as a separate IUS asset.

2.5.4.3. For IUS assets acquired by a contractor on behalf of a DoD Component (i.e., the DoD Component that will ultimately hold title/license to the assets), recognize the software upon completion of the technical acceptance testing by the contractor performing the

service, or by the DoD Component. Record contract financing payments (e.g., progress payments, performance-based payments, and commercial interim payments) made to a contractor prior to completion of final technical acceptance testing in a Software in Development account until the IUS is placed in service. Capitalize upon completion of technical acceptance testing.

* 2.5.5. Capitalization Threshold, Criteria, and Cost Treatment

2.5.5.1. The current IUS capitalization threshold for all DoD Components is \$250,000. However, DoD Intelligence Community Entities may elect to use a capitalization threshold of \$1 million. The capitalization threshold described above is for financial reporting purposes. The requirement for accountability of IUS is discussed in subparagraph 2.5.12.

2.5.5.2. Capitalize IUS if it meets the following criteria for General PP&E:

2.5.5.2.1. Useful life of two years or more;

2.5.5.2.2. Intended for use or being available for use by the entity;

2.5.5.2.3. Not intended for sale in the normal course of business; and

2.5.5.2.4. Total cost is greater than the capitalization threshold.

2.5.5.3. DoD Components must apply the treatment of costs based on the nature of the costs incurred, not the exact sequence of the work. Annex 2 provides IUS project phases, activities, deliverables, and accounting treatment.

2.5.5.3.1. Capitalize direct labor costs of government employee and contractor project teams (e.g., programmers, engineers, managers) incurred during the Design/Development and Testing/Implementation Phase as part of the costs of the software project. Project managers and/or program managers must track direct labor costs and allocate to individual software projects. The allocation methodology used must be consistent between projects and must be auditable.

2.5.5.3.2. Expense indirect labor costs for Program Management Office personnel overseeing more than one software project when immaterial compared with the overall costs of a software project. Decisions regarding the materiality of indirect labor costs, when such costs are expensed, must be justified, documented, and must be auditable. If determined material to a software project or projects, allocate costs based on a distribution methodology that is consistently applied, documented, and auditable.

2.5.5.3.3. Overhead costs are costs associated with rent, utilities, building maintenance, and supplies that are essential to the overall accomplishment of a software project. In many instances, overhead costs are immaterial when compared with the overall costs of a project. If determined immaterial, expense these costs and document the expense justification. If determined material to a project or projects, allocate costs based on a consistent and documented distribution methodology that is auditable.

2.5.5.3.4. DoD components must evaluate contractor costs to determine the correct treatment. Such determination is based on the type of work performed by the contractors. Annex 2 breaks down the criteria to expense or capitalize various work activities.

2.5.5.3.5. Expense data conversion costs as incurred for internally developed, contractor-developed, or COTS software, including the cost to develop or obtain software that allows for access or conversion of existing data to the new software. Such costs may include the purging or cleansing of existing data, reconciliation or balancing of data, and the creation of new or additional data.

2.5.5.3.6. Capitalize the cost of development of technical documentation and manuals and expense costs of mass-producing manuals in the period incurred.

2.5.5.4. The capitalized costs of internally developed software should be limited to costs incurred:

2.5.5.4.1. After the DoD Component authorizes and commits to a software project and believes that it is more likely than not that the project will be completed and the software will be used to perform the intended function(s), and it will have an estimated service life of two years or more; and

2.5.5.4.2. After the completion of the planning and requirements phase (i.e., project evaluation, concept testing, and evaluation of alternatives) as evidenced by a documented approval decision.

2.5.5.5. Technical acceptance testing is testing undertaken to verify if a software product meets technical specifications. Capitalize technical acceptance testing costs. After technical acceptance, expense operational testing, evaluation, and other functional testing.

2.5.5.5.1. If the software consists of multiple individual components or modules, the capitalization phase must end for each component/module after technical acceptance testing is complete for that component/module.

2.5.5.5.2. In some development practices, teams conduct acceptance testing for each iteration within an IUS development before moving forward to the next iteration and may not always conduct final acceptance testing. The DoD Component should identify a pre-determined agency milestone such as the go-live or in-service date, which is equivalent to a final technical acceptance test for capitalization cut-off purposes.

2.5.5.6. Capitalize the amounts paid to a COTS vendor for the software. Capitalize amounts paid to a contractor to design, program, install, and implement contractor-developed software. Capitalize material internal costs incurred by the Federal Entity to implement the COTS or contractor-developed software and otherwise to make it ready for use.

2.5.6. Documentation

2.5.6.1. DoD Components must assign a dollar value (i.e., recorded cost) to the IUS when recording the acquisition of IUS in the Accountable Property System of Record (APSR) and/or accounting system. Appropriate documentation must be available to support the dollar value. Paragraph 3.2 includes a complete discussion of supporting documentation related to IUS.

2.5.6.2. To establish proper PP&E financial control when acquiring IUS from another DoD Component or Federal Agency, the acquiring DoD Component must request from the losing DoD Component or other Federal Agency, the necessary source information and financial transfer documents, to include a unique identifier(s) for the software(s); location; original acquisition cost(s); cost of enhancements; the date the software was developed, or acquired; the estimated useful life; the amount of accumulated amortization; and other relevant information linked to that software. If this information is not available, the gaining and losing entities must develop and document a reasonable estimate to support the financial transfer of the software.

2.5.6.3. Capitalized IUS costs must have sufficient supporting documentation as discussed in paragraph 3.2, including support for costs incurred in the development of the IUS. DoD Components must provide narratives, software architectural documentation, user manuals, and other similar documents to substantiate whether they treat the IUS as separate IUS assets, supporting the functionality of the components/modules of a software system.

2.5.7. Joint Ventures

If two or more entities, including at least one entity outside of the DoD, develop the IUS through a joint venture, the DoD Component must capitalize the IUS asset if it meets the criteria for capitalization, based on its share of the development cost in relation to the capitalization threshold. The DoD Component only capitalizes the portion it funded if it meets the criteria for capitalization.

2.5.8. Bulk Purchases of Software Applications/Programs

2.5.8.1. Bulk purchases must be considered if they materially affect the fiscal year financial statements during which they were purchased. Bulk purchases of software with an aggregate cost that exceeds the capitalization threshold must be capitalized.

2.5.8.2. When multiple acquisitions of the same IUS application(s)/programs (for example spreadsheets, word processing programs, etc.) or modules or components of a software system are made as part of a single contract within a fiscal year, the purchases must be added together to determine whether they meet the capitalization threshold. Purchases made on a single contract during separate fiscal years are to be considered separately. DoD Components must not split bulk purchases into multiple transactions with the intent of avoiding capitalization.

2.5.8.3. Bulk purchases of licensed IUS with terms less than two years in length do not need to be considered for capitalization. Table 27-1 provides capitalization guidelines for bulk purchase licenses.

2.5.9. Software Licenses

2.5.9.1. Software licenses [grant the](#) license holder [the right to use](#) the software for a specific time period. After this period expires, the license holder must renew the license or purchase a new one to continue using the software. License agreements to use software come in many forms and vary in length of the license period. Software licenses can be term or perpetual.

2.5.9.1.1. Term licenses provide [DoD Components](#) the right to use [IUS](#) for a specified period of time. [Capitalize or expense](#) term licensed IUS per criteria in Table 27-1.

2.5.9.1.2. Perpetual software licenses [allow](#) the DoD Component to use the software [indefinitely](#) in exchange for an upfront cost, which [they can pay](#) as a one-time payment or finance over a set period. [Apply capitalization criteria](#) if the license is perpetual, to determine to capitalize or expense.

2.5.9.2. If one of the following criteria applies, the IUS can be expensed:

2.5.9.2.1. The license term is less than two years;

2.5.9.2.2. The license cost (excluding any maintenance agreements) is less than the capitalization threshold; or

2.5.9.2.3. The aggregate cost of a bulk license purchase (excluding any maintenance agreements) is less than the capitalization threshold. See subparagraph [2.5.8](#) for guidance related to bulk purchases of software.

2.5.9.3. A license agreement may include executory costs for maintenance and technical support. DoD Component judgment should apply in determining what portions of license fees are attributable to software capitalizable costs versus executory costs. DoD Components may also want to consider having each license agreement specifically identify the various costs throughout the license life cycle, for example, initial license, maintenance, and enhancement.

2.5.9.4. Additional guidance regarding accounting for license agreements includes:

2.5.9.4.1. Expense maintenance costs agreed to as part of the initial license agreement in the period they are incurred;

2.5.9.4.2. Expense “True-up” costs associated with unlimited license agreements or enterprise licenses that may occur (depending on the agreement terms) at the end of each year to reconcile and account for the actual quantity of users; and

2.5.9.4.3. Expense software upgrades from annual maintenance and security assurance agreements, do not capitalize as enhancements or separate assets.

2.5.10. Cloud and Other Subscription-Based Services

2.5.10.1. A cloud computing service is any resource that is [accessible](#) over the Internet. It has the following essential characteristics: on-demand self-service, broad network access, resource pooling, rapid elasticity, and measured service. The most common cloud service resources are: software as a service, platform as a service, and infrastructure as a service. Cloud services can take a number of forms. To determine whether the arrangement includes capitalized IUS, the DoD Component will need to examine the nature of the arrangement and apply the capitalization criteria.

2.5.10.2. When a DoD Component pays regular subscription fees to access and use software from a non-DoD entity, it should expense subscription costs in the period incurred. This scenario is a service and does not constitute an IUS asset for the DoD Component.

2.5.10.3. A subscription arrangement using a cloud with a non-DoD entity can result in DoD-owned IUS if the using DoD Component takes possession, or has the ability to take possession of a software application without incurring a significant penalty. DoD Components must capitalize this IUS if it meets the capitalization criteria as described in subparagraph [2.5.6](#).

2.5.10.4. When a cloud or subscription arrangement exists between DoD Components, the Component that owns the software (see subparagraph [2.4.1](#)) will report it as IUS. The subscribing DoD Component(s) will expense any fees paid for the service in the period incurred.

2.5.10.5. If a cloud computing arrangement includes a software license, the customer must account for the software license element of the arrangement consistent with the acquisition of other software licenses in accordance with the Table 27-1 criteria discussed in subparagraph [2.5.9](#). SFFAS 10 is not applicable to a cloud computing arrangement that does not convey a contractual right to the IUS or to ones that do not include an IUS license. The entity that develops and owns the software, platform, or infrastructure used in the cloud computing arrangement would account for the software development in accordance with SFFAS 10. If the funding to develop cloud computing is shared among entities without clear ownership, the service provider entity that receives funding and is responsible for maintaining the software, platform, or infrastructure must account for the software in accordance with SFFAS 10 and the full cost/inter-entity cost requirements of SFFAS 4.

2.5.11. Shared Services

2.5.11.1. Shared services means a mission or support function provided by one business unit to other business units within or between organizations. The funding and resourcing of the service is shared and the providing entity effectively becomes an internal/external service provider.

2.5.11.2. There are three types of shared service structures in the Federal Government:

2.5.11.2.1. Intra-agency. Intra-agency shared services include those provided within the boundaries of a specific organization such as a Federal Department or Agency, to that organization's internal units. Intra-agency shared services would be those between one DoD Component and another DoD Component.

2.5.11.2.2. Inter-agency. Inter-agency shared services are those provided by one Federal Organization to other Federal Organizations that are outside of the provider's organizational boundaries. Inter-agency shared services would be those between one DoD Component and another Federal Agency/Organization outside of DoD.

2.5.11.2.3. Commercial. Commercial shared services are those provided by private vendors.

2.5.11.3. For intra-agency shared services, a cost allocation methodology could be developed in accordance with SFFAS 4, paragraphs 120-125. Additional guidance on cost allocation methodology can be found in [Chapter 19](#). For inter-agency shared services and commercial shared services, the service provider entity that owns (receives funding/responsible for maintaining) the software must account for the software in accordance with SFFAS 10. In the event that the entity receiving the service (the customer) has the contractual right to take possession of the software at any time during the hosting period without significant penalty, and it is feasible for the customer to either run the software on its own hardware or contract with another party unrelated to the vendor to host the software, then the customer must account for the software in accordance with SFFAS 10.

2.5.11.4. If the shared service arrangement includes a software license, the DoD Component must account for the software license element of the arrangement consistent with the acquisition of their other software licenses, as discussed in subparagraph 2.5.9. SFFAS 10 is not applicable to a shared service arrangement that does not convey a contractual right to the IUS or to ones that do not include an IUS license.

2.5.12. Accountable Records of IUS

DoD Components must establish accountable records for all government IUS. Account for IUS which meets the criteria for capitalization in an APSR. [DoD Components must also establish and maintain accountability records](#) for IUS which does not meet the criteria for capitalization in either an APSR or approved managerial system [through disposition or transfer](#). Managerial systems must contain all general data elements contained in a data-compliant APSR. In addition, managerial systems must document controls and procedures in place that are sufficient to withstand potential audit scrutiny and support the audit requirement of a complete universe of assets. The primary Accountable Property Officer (APO) or designated delegate should grant managerial system approval. See DoDI 5000.76.

2.6 IUS Enhancements

2.6.1. An IUS enhancement is a modification to [an](#) existing IUS that provides it with significant additional capabilities and enables the software to perform tasks that it was previously

incapable of performing. DoD Components must capitalize an enhancement that increases the capability of the IUS when its cost meets or exceeds the capitalization threshold. Criteria to capitalize enhancements to IUS differs from that of other PP&E; expense changes that merely extend the useful life or improve efficiency, irrespective of the cost. Even though the DoD component expenses the costs associated with extending the useful life, it must extend the amortization of any previously capitalized amount to reflect the new useful life period. Capitalizable enhancements normally require new software specifications and may require a change to all or part of the existing software specifications. For example, DoD Components should capitalize the cost of modifying existing software for making ad hoc queries, if it requires new software specifications and/or changes to existing software specifications and it also exceeds the capitalization threshold. In addition, the DoD Components should expense the nominal charges paid for enhanced versions of software in the period incurred.

2.6.2. Evaluate modules together as one enhancement if one module is dependent upon another to function. DoD Components must amortize all costs of an enhancement that they have capitalized based on the IUS capitalization criteria, including any costs they carry over or allocate from the original software, over the enhancements' estimated useful life, which should not exceed five years.

2.6.3. DoD Components must begin to accumulate costs for enhancements when these enhancements are more likely than not to produce new capabilities; and the project phase in which the costs are being incurred and the nature of the cost meets the criteria for capitalization treatment set out in Annex 2; and the estimated total cost of the enhancement meets the IUS capitalization threshold. When the development of the enhancement takes place over multiple periods, the costs will accumulate in account 183200 (IUS in Development) until the completion of the enhancement (see subparagraph 2.8.3 on placed-in-service dates), at which time the costs are moved to account 183000 (Internal Use Software).

2.6.4. DoD Components must separately account for enhancements in a manner that allows them to specifically identify and support each capitalized enhancement made to the IUS.

2.6.5. Expense an enhancement to IUS that meets or exceeds the capitalization threshold to correct a design flaw, and in effect doubles its useful life, in the period incurred, unless the enhancement adds new capabilities to the software. However, the useful life of the IUS is subject to adjustment and must reflect the enhancement. Knowledgeable personnel must determine and document the additional useful life, which should not exceed five years added to the existing useful life.

2.6.6. Expense the cost of minor enhancements resulting from ongoing systems maintenance or incurred solely to repair a design flaw without adding additional capabilities in the period incurred. Examples of minor enhancements include updating data tables, web-enabling, customizing reports, or changing graphic user interfaces. Expense enhancements that extend the useful life of the software without adding significant capabilities. However, in instances where the useful life of IUS is extended, DoD Components must adjust the amortization period as described in subparagraph 2.6.5.

2.6.7. A specific software development project may include expenditures for enhancements and maintenance that cannot be easily separated but may be reasonably and consistently allocated. One approach that can be used is a ratio, based on the projected development phase activities work hours relative to other types of work. Apply the ratio to determine the expenditures to capitalize when the expenses meet the other capitalization criteria. Apply the basis for allocating costs consistently and in accordance with GAAP.

2.6.8. Retain documentation related to IUS enhancement decisions, such as the justification for capitalizing the enhancement, a change of useful life, and the amount to capitalize. Specific documents that support these decisions can vary by organization and asset but could include an analysis from software developers or a cross-functional review team that defines the enhancement's impact on functionality and useful life.

2.6.9. Only capitalize the cost of enhancements to more than one IUS asset as identified by a unique identifier, when performed under a single contract or work order that cannot be specifically identified by asset if the allocated cost per IUS equals or exceeds the appropriate DoD capitalization threshold and the enhancements are more likely than not to add additional capability to the existing software.

2.6.10. When a single IUS goes under more than one enhancement and the enhancements are part of one overall effort to increase the software's functionality, and/or useful life; the sum of the costs of the enhancements must be capitalized if the summed costs equal or exceed the appropriate DoD capitalization threshold. This is required even when the enhancements are funded separately. The enhancements must be capitalized when the determination has been made that it is more likely than not that the enhancements will result in new significant capabilities.

2.7 Maintenance and Repair

2.7.1. Maintenance and repair costs are not capital enhancements, regardless of whether the cost equals or exceeds the DoD capitalization threshold. Maintenance and repairs are activities directed toward keeping IUS assets in an acceptable condition so that they continue to provide services and achieve their expected useful life. Maintenance and repair activities include subsequent security accreditations (not included in user acceptance testing); software diagnostics; repair processing and/or performance failures; updates to documentation; minor software updates; minor corrections to design flaws; and other activities needed to preserve or maintain the software. Maintenance and repairs, as distinguished from enhancements, exclude activities directed towards expanding the capacity of IUS or otherwise upgrading it to serve needs different from, or significantly greater than, its current use.

2.7.2. When determining whether to capitalize the IUS, do not include the costs of maintenance agreements purchased with a software license in the historical cost of the IUS. If DoD Components cannot distinguish maintenance costs from the cost of the license itself, they must use reasonable and documented estimating methods. Do not capitalize upgrades included in annual maintenance and security assurance agreements.

2.8 Amortization

2.8.1. Amortization is the systematic and rational allocation of the acquisition cost of IUS, over its estimated useful life. The DoD recovery periods (useful life) for IUS amortizable assets are set out in Table 27-2. During the planning phase of IUS development, determine the useful life based on how long the IUS is expected to provide economic benefit or service potential to the DoD Component. The decision regarding the useful life must be documented and made with input from personnel who are familiar with the software's technical characteristics and planned use. Amortize IUS acquired for research and development with no alternative future use over the period of the project as opposed to the normal life-cycle amortization.

2.8.2. Amortize the recorded cost of IUS and enhancements to IUS, which have been capitalized according to the guidance in Annex 2. Reflect such capitalized amounts, as well as associated amounts of accumulated amortization and amortization expense, in DoD Component's financial statements.

2.8.3. DoD Components must document the placed-in-service dates for both acquired IUS and developed IUS. Documentation of placed-in-service dates is critical in determining when to start amortization of capitalized IUS costs. IUS is considered placed in service when final technical acceptance testing is completed. The point at which this milestone is reached can vary for different types of software acquisitions.

2.8.3.1. For IUS acquired through a Major Automated Information System acquisition program, the Full Deployment Decision date made by the Milestone Decision Authority will serve as the placed-in-service date.

2.8.3.2. Use the Initial Operational Capability (IOC) date for other IUS system acquisitions, as the placed-in-service date. The system's Capability Development Document (CDD) and/or Capability Production Document (CPD) often define the IOC. DoD Components can use other supporting documents for acquisitions that do not require a CDD or CPD.

2.8.3.3. Use the alternate placed-in-service date if knowledgeable parties within a DoD Component determine that a placed-in-service date other than the ones listed in subparagraphs 2.8.3.1 and 2.8.3.2 better aligns with the completion of final technical acceptance testing for a specific software acquisition. However, the DoD Components must document and justify the decision.

2.8.4. Successfully complete final acceptance testing before beginning amortization for the IUS asset. This criteria is necessary, especially for internally developed software but also for contractor-developed and COTS software because testing plays a major role for software assets by demonstrating that the software product can meet the requirements and the need for a clear point for ending the developmental phase.

2.8.5. When replacing the IUS with new software, expense the unamortized cost of the old IUS when the new IUS successfully completes testing. No adjustments will be made to the

previously recorded amortization. Treat any additions to the book value or changes in useful life prospectively. Account for the change during the period of the change and future periods.

2.8.6. Account for all IUS in an APSR. Figure 27-2 provides a decision tree to assist in determining what elements of an IUS project should be capitalized for financial reporting purposes.

2.8.7. The program office must retain proper supporting documentation to justify the estimated useful life of the program. Examples of proper documentation are engineering estimates, operational requirements documents, mission needs statements, commercial industry-equivalent information, contracts, and acquisition documents (such as the Select Acquisition Report). See paragraph 3.2 for additional information on supporting documentation requirements.

2.8.8. In the case of IUS assets, after the successful completion of the final technical acceptance testing described in subparagraph 2.8.4, the event that triggers the calculation of amortization is the date the asset is installed and placed in service (regardless of whether it is actually used). In the case of internally developed IUS, record the costs of developing the IUS that is capitalizable in the IUS in Development account (183200) but do not amortize until the software is placed in service, at which time transfer the balance (total capitalizable development costs) to the IUS account (183000). Begin amortization when the testing of a module or component is successful. If the use of a module is dependent on the completion of another module(s), the movement from account 183200 to account 183000 will take place and amortization will begin when both that module and the other module(s) have successfully completed testing and are placed-in-service.

2.8.9. DoD policy permits the use of only the straight-line method of amortization. Calculate straight-line amortization expense based on the recorded cost divided equally among accounting periods during the software's useful life based on recovery periods in Table 27-2. The salvage value for all capitalized IUS for the DoD Components should be zero.

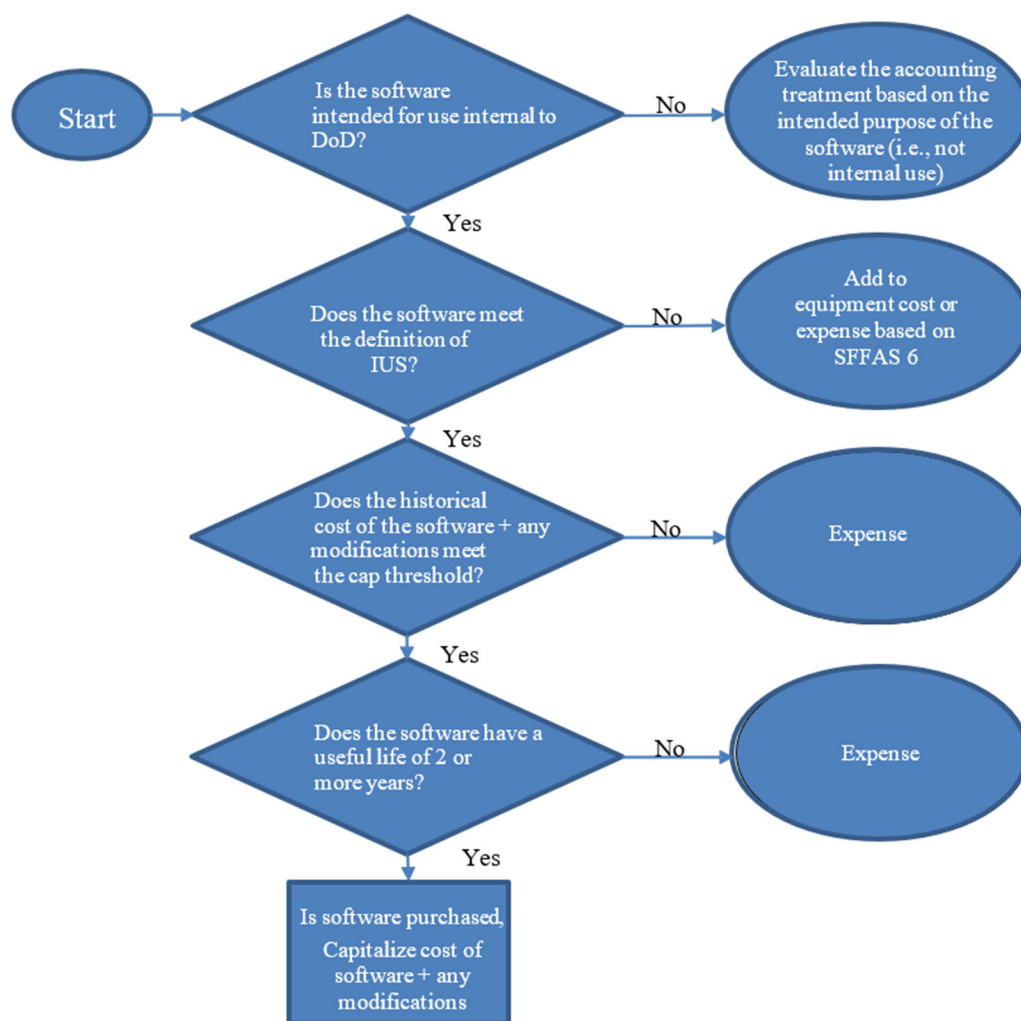

2.8.10. Retain the IUS asset in APSR if it remains in use longer than its estimated useful life, as well as the accounting records, and reflect both its recorded cost and accumulated amortization until disposition of the software.

2.8.11. WCF activities are required to recognize and amortize IUS assets in accordance with the guidance in this chapter without regard to whether such assets are procured through a WCF activity's Capital Purchase/Investment Program budget or whether amortization for such assets is included in rates charged to customers. The recognition of IUS assets and the amortization of such assets by WCF activities therefore may be different for financial statement reporting purposes than the amortization amounts used for WCF rate development and budget presentation. All IUS asset amortization of WCF activities must be recognized as an expense on the Statement of Net Cost, reflected in the Statement of Changes in Net Position, included in accumulated amortization amounts on the Balance Sheet, and reported in the "Defense Working Capital Fund Accounting Report [Accounting Report (Monthly) 1307] (AR(M)1307)." Accounting Report 1307 is described in [Volume 6A, Chapter 15](#). Amortization recorded on IUS assets that were not acquired nor will be replaced through the use of Defense WCF resources must be classified as non-

recoverable for rate-setting purposes and reported appropriately on the AR(M)1307. Defense WCF rates charged to customers are based on guidance in [Volume 2B](#) and [Volume 11B](#).

Figure 27-2. Capitalization Decision Tree

Use the following decision tree for IUS Purchased from Commercial Off-the-Shelf Vendors; IUS Internally Developed by DoD and IUS Developed by a Third Party on Behalf of DoD.

2.9 Impairment

2.9.1. Impairment must be recognized and measured when one of the following occurs and is related to post-implementation/operational [IUS assets](#):

2.9.1.1. The [IUS asset](#) is no longer expected to provide substantive service potential and will be removed from service; or

2.9.1.2. A significant reduction occurs in the software's or software module's capabilities, functions, or uses.

2.9.2. If the impaired software is to remain in use, the loss due to impairment must be measured as the difference between the book value and either:

2.9.2.1. The cost to acquire software that would perform similar remaining functions (i.e., the unimpaired functions) or, if that is not feasible;

2.9.2.2. The portion of the book value attributable to the remaining functional elements of the software.

2.9.3. Recognize the loss upon impairment and reduce the book value of the asset accordingly. If the criteria listed in subparagraph 2.9.2 cannot be determined, the DoD Component should continue to amortize the book value over the remaining useful life of the software. Document and retain this decision and associated analyses.

2.9.4. If the impaired IUS asset is to be removed from use, measure the loss as the difference between the book value and the Net Realizable Value (NRV), if any. Recognize the loss upon impairment and reduce the book value of the asset accordingly. Transfer the NRV, if any, to an appropriate asset account until the software is disposed of and the amount is realized.

2.9.5. When it is more likely than not that a developmental software project will not be completed, no further costs are to be capitalized and any costs that have been capitalized must be expensed. Indications that the software development may no longer be completed include:

2.9.5.1. The expenditures are neither budgeted nor incurred to fund further development;

2.9.5.2. The discontinuance of the business segment for which the software was designed;

2.9.5.3. The inability to resolve programming difficulties timely;

2.9.5.4. A decision to obtain COTS software instead and abandon the current software development; or

2.9.5.5. Major cost overruns occur.

2.9.6. When an IUS developmental software project is suspended pending management's evaluation as to whether to resume or terminate the project, the software development cost may remain capitalized in an IUS in Development account (USSGL 183200) as long as it is more likely than not that the developmental software project will eventually be completed and the cost incurred or expected to be incurred meets the capitalization threshold. Reevaluate the status of the project periodically and write off capitalized costs if management concludes that it is more likely than not that the software will not be placed in service in the future.

2.9.7. Recognize and report the loss from impairment, if any, in the Statement of Net Cost in the period in which the DoD Component concludes that the impairment is both (1) a significant decline in service utility and (2) expected to be permanent. Include such losses in program costs or costs not assigned to programs. A general description of the IUS for which an impairment loss is recognized, the nature (e.g., damage or obsolescence) and amount of the impairment and the financial statement classification of the impairment loss must be disclosed in the notes to the financial statements in the period the impairment loss is recognized if the amount is significant to the financial statements.

2.9.8. Report the impairment loss net of any associated recovery of the net realizable value when the recovery and loss occur in the same fiscal year. Report recoveries reported in subsequent fiscal years as revenue or other financing source as appropriate. Disclose the amount and financial statement classification of recoveries in the notes to the financial statements.

2.9.9. Account for the costs incurred to replace or restore the lost service utility of impaired IUS remaining in use in accordance with applicable standards (i.e., recognized according to the nature of the costs incurred and the appropriate capitalization threshold).

2.10 Removal/Disposal

2.10.1. In TR 14, FASAB defines removal from service as an event that terminates the use of a General PP&E asset. [DoD Component Heads must establish and maintain effective policies and procedures for the removal \(disposal or transfer\) of IUS assets.](#) Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or identification as excess to mission needs. Removal from service must be considered other than permanent unless (1) the asset's use is terminated and (2) there is documented evidence of the DoD Component's decision to permanently remove the asset from service. If only one of the two business events has occurred, permanent removal from service has not occurred (i.e., the removal is considered other than permanent).

2.10.2. If an IUS's normal use is terminated (i.e., it no longer provides service in the operations of the entity) but the DoD Component has not yet decided to permanently remove the IUS from service, the removal from service is considered other than permanent. Other than permanent removal from service is evidenced by activities such as continuing low-level maintenance to sustain the IUS in a recoverable status or until reutilization efforts are exhausted. For example, IUS taken out of service on a temporary basis is considered other than permanently removed from service. In such cases, the recorded cost of the IUS will remain in the IUS account (USSGL 183000). There is no change in the reported value for IUS that has been other than permanently removed from service and the IUS must continue to be amortized. Amortization charges to expense for IUS will continue to be recorded in USSGL 183900.

2.10.3. If (1) an IUS's use is terminated and (2) the DoD Component has documented its decision to permanently remove the IUS from service, the removal from service must be accounted for as permanent. Permanent removal from service is evident from the DoD Component's documented decision to dispose of an IUS by selling, recycling, or donating the IUS. The recorded cost as well as the accumulated amortization of an IUS permanently removed from service must

be removed from the accounts in which they are reported, and the IUS must be recorded at its NRV in a General Property, Plant and Equipment Permanently Removed But not Yet Disposed account (USSGL 199500). USSGL account 199500 is defined in the DoD Standard Reporting Chart of Accounts under the DoD Account Definitions tab as the NRV of General PP&E that is permanently removed from service but not yet disposed of and is reclassified in accordance with FASAB TR 14, paragraphs 10 and 12. NRV is the estimated amount that can be recovered from disposing of the asset less estimated costs of completion, holding, and disposal. Any difference between the net book value of the asset and its expected NRV must be recognized as a gain or loss. Any gain should be recorded in the Gains on Disposition of Assets – Other account (USSGL 711000); any loss should be recorded in the Losses on Disposition of Assets – Other account (USSGL 721000). The expected NRV should be evaluated at the end of each fiscal year and any change in NRV should be recognized as a gain or loss. IUS permanently removed from service is no longer amortized.

2.10.4. When an IUS is disposed of (e.g., by selling, recycling, donating, or destruction) the IUS must be written off from the financial records and financial statements and the difference between any disposal proceeds and the IUS's net book value must be recognized as a gain or loss as described in subparagraph 2.10.3. In such case, if the DoD Component receives a consideration (e.g., cash) for the disposal, a receipt of cash should be recorded in the Fund Balance with Treasury account (USSGL 101000). If the funds (consideration received) are not apportioned to the DoD Component, the fund must be transferred to miscellaneous receipts of the Treasury. There will be no consideration received for a donation. The disposal start date is the calendar date of a legally enforceable and recognizable obligation to complete the disposal action. For transfers and sales, this represents the date on which the instrument is endorsed or operation is ceased, whichever comes later. For natural disasters, this represents the actual date of the incident.

2.10.5. Upon authorized disposition, APOs are responsible for ensuring that all IUS asset dispositions and transfers are properly recorded in the APSR or managerial system, including updating the asset's status to "Disposed," recording the date and method of disposition. The reason for disposition or transfer of IUS assets must be properly documented. The APO retains all supporting documentation per record retention policies. Refer to DoD Instruction 5000.76 for additional information.

3.0 ADDITIONAL CONSIDERATIONS

3.1 Use of Canceled Treasury Account Symbol

3.1.1. The Treasury's Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) is a data collection system that replaces the reporting functionalities of Federal Agencies Centralized Trial-Balance System I and II, Intragovernmental Fiduciary Confirmation System and Intragovernmental Reporting and Analysis System as the primary means for DoD Components to report their trial balance data to the Treasury. Capitalized assets are required to be reported and remain in GTAS after the original purchasing Treasury Account Symbol (TAS) has expired and been canceled. If a capitalized asset has not been moved to a "C" TAS as described in 3.1.2. GTAS will provide a "C" TAS on the GTAS Super Master Account File (SMAF) for

each fund family represented on the SMAF. The system-generated “C” TAS will have three components: the three-digit agency identifier, availability type “C”, and a four-digit main account.

3.1.2. All DoD Components must use the “C” availability type TAS to report capitalized assets. Assets may be moved to a C TAS at any time from the purchase date to the date the original purchasing fund is canceled. (Refer to the TFM, Part 2, Chapter 4700 for additional information.)

3.1.3. To transfer an asset to a C TAS:

3.1.3.1. Use the USSGL account transaction E510 to transfer-out the asset from the purchasing fund account.

3.1.3.2. Use USSGL account transaction E606 to transfer-in the asset into the appropriate C TAS.

3.2 Supporting Documentation

Entries to record financial transactions in accounting system general ledger accounts and/or the supporting subsidiary accountable property records and/or systems must:

3.2.1. Be supported by source documents that reflect all transactions affecting the DoD Component’s investment in the IUS.

3.2.1.1. Support all acquisitions, whether by purchase, transfer from other agencies, donation, or other means, as of the date the DoD Component takes custody of the IUS. The documents listed in Table 27-3, where applicable, must be readily available to support the changes in asset value or physical attributes because of new acquisition or capital enhancement.

3.2.1.2. Support all disposals or retirements as of the date the IUS leaves the custody of the DoD Component to provide an adequate audit trail for the disposal of an asset. The execution of certain disposal events will generate financial or administrative accountability transactions. These documents, where applicable, must be readily available to support disposals:

3.2.1.2.1. ‘Declaration of excess’ document;

3.2.1.2.2. Approval documentation for the disposal;

3.2.1.2.3. Original acquisition documents;

3.2.1.2.4. Legal instruments (such as a license agreement or contract) to indicate a legal obligation to dispose of an asset;

3.2.1.2.5. Document showing the disposal start date;

3.2.1.2.6. Receipt documentation; and

3.2.1.2.7. Transfer documents for transferred assets or as otherwise stated.

3.2.1.3. Retain documents that support the recorded cost of IUS assets by the DoD Component in accordance with the requirements contained in Volume 1, Chapter 9, or as otherwise stated. Maintain documentation (original documents and/or hard and electronic copies of original documentation) in a readily available location during the applicable retention period to permit the validation of information pertaining to the asset such as the purchase cost, purchase date, and cost of enhancements. The documentation must also be linked to the appropriate unique identifier(s). Supporting documentation may include, but is not limited to, the documentation as outlined in this subparagraph. DoD Component asset managers will maintain all applicable documentation for the retention period outlined in Volume 1, Chapter 9.

3.2.2. Include sufficient information indicating the quantity (as applicable would include the number of seats for which the IUS asset is loaded; the number of licenses; and/or the number of copies of a computer disk purchased), location, and unit cost (as measured consistently with the criteria for quantification) of the IUS. Designate the accountable property records to be of maximum assistance in making procurement and utilization decisions, including decisions related to identifying potential excess IUS that may be available for reuse, transfer to other DoD Components, or made available for disposal in accordance with current DoD regulations and other regulatory requirements.

3.2.3. Identify and classify IUS that was capitalized, recorded in the APSR and accounting system, and reported in the financial statements.

3.2.4. Be based on the same documents, to ensure that entries to the accounting and accountable property records are the same. This will ensure that the property accountability records are integrated and subsidiary to the accounting system and those records can be reconciled with the accounting system.

3.2.5. Include documents used to accumulate the cost of developmental projects. Each document must link to the appropriate asset unique identifier. For a listing of those costs that may be incurred during the development, see [Annex 2](#).

3.2.6. Include all IUS possessed by the Department (to include property held by others) and IUS of others held by DoD through seizure, forfeiture, loss, or abandonment.

3.2.7. Provide information to identify and account for capitalized enhancements to IUS.

3.3 Reporting Requirements

DoD Components with IUS should reference a note on the Balance Sheet that discloses information about the reported IUS assets. See [Volume 6B, Chapter 10](#) for the specific reporting requirements.

Table 27-1. Capitalization is Dependent on Term and Aggregate Purchase Amount

Bulk Purchased License Terms	Aggregate Purchase Amount	Guidance
License Term < 2 years	N/A	Expense
License Term = / > 2 years or Perpetual	Under capitalization threshold	Expense
License Term = / > 2 years or Perpetual	Equal to or exceeding capitalization threshold*	Capitalize
*Maintenance agreements included in the purchase of licenses are not to be considered part of the cost for this determination.		

Table 27-2. DoD Recovery Periods for Amortizable IUS Assets

DOD RECOVERY PERIODS FOR AMORTIZABLE IUS ASSETS (IUS is capitalized only if it meets the capitalization threshold)	
Description of IUS Assets	Recovery Period
Capitalized IUS	2, 3, 4, 5 or 10 Years*
Licenses	Term of the license agreement
Perpetual Licenses	5 Years
IUS Upgrades	Not capitalized**
Enhancements	Not more than 5 years***
<p>* The useful life will be determined during the planning phase of the asset's development based on the length of time it is expected to have economic benefit or service potential to the DoD Component.</p> <p>** The amortization period of an IUS must be adjusted (not extending more than 5 years) if minor upgrades resulting from ongoing systems maintenance or repair of a design flaw extend the useful life of the software without adding additional capabilities. The cost of the upgrades should be expensed in the period incurred. Also, note the upgrades that do add additional capabilities would be considered enhancements and would be capitalized and amortized if they meet the capitalization criteria in subparagraph 2.5.6.</p> <p>***See paragraph 2.6 on the criteria for capitalizing versus expensing of IUS enhancements.</p>	

Table 27-3. Supporting Documentation for IUS Acquisition

Evidence	Examples
Unique Identification	Assignment of a unique identifier
Project Approval	Such as, but not limited to, a Work Order
Obligation on Behalf of the Government	Such as, but not limited to: <ol style="list-style-type: none"> 1. For contracts, contract modifications, or change orders: <ul style="list-style-type: none"> • Statement of Work; • Dollar Amount of Contract; • Location; • Source of Funds; • Parties to the Contract; and • Signature Page [Signature of All Parties]. 2. Documentation of labor hours; 3. Approved Work Order.
Payment Submitted	Such as, but not limited to: <ol style="list-style-type: none"> 1. Approved the last invoice reflecting the total amount submitted for payment and received to date; 2. Evidence of in-house development costs, including labor; 3. Indirect Costs incurred internally by the gaining activity that relates to the new acquisition or capital enhancement.
Acceptance	Such as, but not limited to: <ol style="list-style-type: none"> 1. DoD <u>DD Form 250</u> Material Inspection and Receiving Report; 2. Executed acquisition document and appraisal results for the donated IUS; 3. Signed agreement for software licenses; 4. A signoff document confirming key development milestones such as technical acceptance tests are met; 5. Documents to support the amount that has been expensed versus capitalized during the software development phase. 6. Executed reversionary document; and 7. Transfer letter and documents for transferred assets.

Annex 1. Definitions and Examples

The following Table A1-1 contains common terms as they are generally defined by information technology and software programming professionals. It also includes scenarios relevant to IUS.

Table A1-1. Definitions and Examples

Definition	Classified as IUS?	Capitalization	DoD Examples**
Access Control Software			
This type of software, which is external to the operating system, provides a means of specifying who has access to a system and the specific capabilities authorized users are granted.	No	Include equipment costs	CA-ACF2, RACF
Application Software			
A software program that performs a specific function directly for a user and can be executed without access to system control, monitoring, or administrative privileges.	Yes	Yes - When capitalization criteria is met	Microsoft Excel, Adobe Photoshop
Cloud – Public			
A cloud-based environment that is generally external to the Department with infrastructure owned and managed by a third party. Public cloud services are generally subscription-based.	No	No	Dropbox
Cloud – Private			
A cloud based environment that is generally internal to the Department and used solely by DoD Components.	Yes	Yes – When the capitalization criteria is met, the DoD Component that controls the IUS has financial reporting responsibility	DISA milCloud
Database Management System (DBMS)			
Computer software applications that interact with the user, other applications, and the database itself to capture and analyze data.	Yes	Yes - When capitalization criteria is met	Oracle Enterprise Manager

**DoD examples provided may or may not be capitalized

Definition	Classified as IUS?	Capitalization	DoD Examples**
Enterprise Resource Planning System			
Commercial software that integrates business information flowing through the Component. ERP systems contain functional modules (e.g., financial, accounting, human resources, supply chain, and customer information) that are integrated within the core system or interfaced with external systems.	Yes – portions of ERP systems are IUS (excluding any hardware acquired as part of the system)	Yes – portions of ERP systems are capitalized	Navy ERP, GFEBS, LMP, DAI
Firmware			
A program recorded in permanent or semi-permanent computer memory.	No	May be capitalized as part of general equipment depending on applicable capitalization criteria being met	Radar system software, lathe software
Freeware / Open Source Software (OSS)			
Software that is offered at no cost.	No	No	Internet browser
Hardware			
The physical components of IT, include computers, peripheral devices such as printers, disks, and scanners, cables, switches, and other IT equipment.	No	May be capitalized as general equipment depending on applicable capitalization criteria being met	Router, Server, Modem, Switch
License – Annual			
A software license that must be renewed annually to continue using the software.	Yes	No - an annual license does not meet the useful life criteria of 2 years for capitalization	Microsoft Lync, VMWARE vSphere
License – Perpetual			
A software license that gives the Department the right to use the software in perpetuity.	Yes	Only if it meets the capitalization threshold	SAP Chrystal Reports

**DoD examples provided may or may not be capitalized.

Definition	Classified as IUS?	Capitalization	DoD Examples**
Middleware			
Computer software that provides services to software applications beyond those available from the operating system.	Yes	Yes - If the system it is part of meets capital criteria	Linux Kernel
Portal			
A web-based application that provides personalization, single sign-on, and content aggregation from different sources, and hosts the presentation layer of information systems	Yes	Yes – When capitalization criteria is met	Audit Response Center (ARC) Tool
Simulation Software			
Based on the process of modeling a real or proposed system with a set of mathematical formulas that allows the user to observe an operation before performing it.	Yes	Yes – When capitalization criteria is met	F-35 Lightning II Training Software
Operating System			
The software that controls the execution of other computer programs, schedules tasks, allocates storage, manages the interface to peripheral hardware, and presents a default interface to the user when no application program is running.	No	Include in equipment costs	Windows, Linux
System / IT System			
The term “system” by itself is not limited to any specific resource. A system may be any two resources that work together to produce a specific outcome. Internal use software may or may not be one component of an overall “system”.	Yes – software components of a system or IT system are IUS	Yes - When capitalization criteria are met	Navy ERP, GFEBS, DAI, CAMIS, OMIS-A
Utility Program			
System software designed to perform a particular function or system maintenance.	No	Include in equipment costs	CD burner, Disk defragmenter, virus scan
Web Application			
An application that is accessed via the web over a network.	Yes (assuming it is owned by a DoD Component)	Yes - When capitalization criteria is met	Outlook Webmail

**DoD examples provided may or may not be capitalized.

*Annex 2. The Software Development Life-Cycle (SDLC)

1.0 SDLC Phases Include Planning, Development, and Operations.

Generally, capitalize costs incurred during the development phase and expense costs incurred in the planning and operations phases. IUS development under other methods, such as agile software developments, may not follow this linear approach, and capitalization decisions absent distinct phases are more difficult. Regardless of timing, capitalize or expense the cost incurred for development phase activities based on their substance/task activity rather than their phase. Table A3-1 depicts the three phases with a linear sequential paradigm.

1.1 In the Preliminary Design phase, DoD Components will most likely do the following:

1.1.1. Make strategic decisions to allocate resources between alternative projects at a given time. (e.g., decide whether to develop a new IUS asset or fix existing IUS problems);

1.1.2. Determine performance requirements

1.1.3. Invite vendors to perform demonstrations of how their software will fulfill a DoD Component's needs.

1.1.4. Explore alternative means of achieving specified performance requirements. For example, should a DoD Component make or buy the software? Should the software run on a mainframe or client-server system?

1.1.5. Determine if technology exists to meet requirements.

1.1.6. Select a vendor if a DoD Component chooses to obtain COTS software.

1.1.7. Select a consultant to assist in the software's development or installation.

1.2 In the Development phase, the DoD Components may:

1.2.1. Use a system to manage the project;

1.2.2. Track and accumulate life-cycle cost and compare it with performance indicators;

1.2.3. Determine the reasons for any deviations from the performance plan and take corrective actions;

1.2.4. Test the deliverables to verify that they meet the specifications.

1.3 In the Operations phase, the DoD Components may:

1.3.1. Operate and maintain the IUS asset and provide user training.

1.3.2. Convert data from the old [system](#) to the new system;

1.3.3. Compare asset usage with the original plan; and/or

1.3.4. Track [SDLC](#) cost and compare it with the original plan.

1.3.5. Capitalize costs of enhancements to the IUS if they meet the capital enhancement requirements.

2.0. Capital Versus Expense IUS Activities.

Many government and contractor personnel conduct a variety of activities throughout the SDLC for various IUS programs and contracts. [Capitalize](#) some costs associated with these activities as part of the cost of the IUS and expense other costs. Capitalization decisions follow the activity regardless of the software development method (e.g., waterfall, prototyping, agile, or spiral). [Software development methods are described in Annex 3.](#) When reviewing contracts and budget documentation, [take care to](#) distinguish between activities to determine to capitalize [or](#) expense.

Table [A2-1.](#) Traditional IUS SDLC Phases, Tasks, and Accounting Treatment

Project Phase	Task	Treatment
Planning	Project Evaluation	Expense
	Concept testing	Expense
	Evaluation of alternatives	Expense
	Project approval	Expense
Development	Design and Configuration	Capitalize
	Coding	Capitalize
	Installation to Hardware	Capitalize
	Direct personnel costs	Capitalize
	Technical Acceptance Testing	Capitalize
	Quality assurance testing	Capitalize
	Documentation	Capitalize
	Indirect and Overhead costs	Allocate*
	Data conversion software	Expense
Operations	Testing	Expense
	Training	Expense
	Data conversion	Expense
	Help desk	Expense
	Enhancement	See “IUS Enhancements”, section 2.6.
	Maintenance/Bug Fix	Expense
*Expense or capitalize indirect and overhead costs depending on 1) the materiality to overall costs of individual IUS development projects, and 2) the phase in which the costs are incurred.		

*Annex 3. Software Development Methods

1.1 Software development methods are ever-evolving, with new methods and techniques being introduced over time. Included in the following subparagraphs are several descriptive examples of common software development methods.

1.1.1. Linear/Waterfall Software Development Method. The linear/waterfall software development method is a sequential design process, used in software development in which progress is seen as flowing steadily downwards (like a waterfall) through the software development phases. The linear/waterfall software development method follows the phases outlined in [Annex 2](#) in sequence, whereas the other software development methods as can move between phases during the life of the development. Regardless of the development method (e.g., waterfall, prototyping, agile, or spiral), the capitalization decisions follow the tasks identified.

1.1.2. Prototyping Software Development Method. The prototyping software development method is a system development method in which a prototype (an early approximation of a final system or product) is built, tested, and then reworked as necessary until an acceptable prototype is finally achieved from which the complete system or product can be developed. This model works best in scenarios where not all the project requirements are known in detail ahead of time. An iterative, trial-and-error process takes place between the developers and the users.

1.1.3. Agile Software Development Method. The agile software development method is a group of software development methods in which requirements and solutions evolve through collaboration between self-organizing, cross-functional teams.

1.1.3.1. In an agile project, working software is deployed in iterations of typically one to eight weeks in duration, each of which provides a segment of functionality. Initial planning regarding cost, scope, and timing is usually conducted at a high level, and the project status is primarily evaluated based on software demonstrations.

1.1.3.2. The IUS development phases listed in [Annex 2](#) could be applied to agile development projects on an iteration basis. If an iteration developed meets the module or component asset description in accordance with subparagraph [2.5.4.2.1](#) and the capitalization cut-off period described in subparagraph [2.5.5.5.2](#), then it could be treated as an individual IUS project. If the number of iterations is dependent on the outcomes of multiple processes for a complete function, the cost incurred in these iterations should be grouped together based on the nature of the activities (capital or expense) and treated as one project for the purposes of recognition, measurement, and disclosure. Any future incremental releases that result in additional functionality can be treated as an enhancement of the original IUS project and accounted for in accordance with paragraph [2.6](#).

1.1.4. Spiral Software Development Method. The spiral software development method combines the features of the waterfall and prototyping incremental models, but with more emphasis placed on risk analysis and management.

1.1.4.1. The spiral methodology projects are typically separated into phases like the waterfall method: planning, risk analysis, engineering, and evaluation. However, they are broken up into incremental releases of the product, or incremental refinement each time around the spiral and through continuously analyzing the requirements and improving the definition and implementation. At each iteration around the cycle, the project is improved and extended.

1.1.4.2. The IUS development phases listed in subparagraph [Annex 2](#) could be applied to a spiral development project on a process iteration basis. If an iteration developed meets the module or component asset description in accordance with subparagraph [2.5.4.2.1](#) and the capitalization cut-off period described in subparagraph [2.5.5.5.2](#), then it could be treated as an individual IUS project. If the number of iterations is dependent on the outcomes of multiple spiral processes for a complete function, the cost incurred in these iterations should be grouped together based on the nature of the activities (capital or expense) and treated as one project for the purposes of recognition, measurement, and disclosure. Any future incremental releases that result in additional functionality can be treated as an enhancement of the original IUS project and accounted for in accordance with paragraph [2.6](#).

1.2 Cross-Functional IUS Reviews. Software development can be complex and accounting decisions often require a measure of judgment and expertise found throughout an organization. Examples of these decisions can include identifying assets that meet the IUS definition, determining the point at which an IUS project is more likely than not to be completed, whether an enhancement should be capitalized, and determining the useful life. DoD Components will ensure that key stakeholders from the IUS program, acquisition, and accounting organizations have adequate visibility into the major milestones throughout the acquisition process to make these decisions. This could take the form of an IUS acquisition review board, consisting of knowledgeable stakeholders who assess pending and active IUS projects to make such decisions. It could also include leveraging portfolio management processes already in place at some DoD Components. Stakeholders will meet periodically and with enough frequency to make timely decisions concerning the IUS and the decisions will be documented. Additional cross-functional decisions and deadlines for making them are found in Table [A3-1](#). This review activity can also serve as a key control.

Table A3-1. Cross-Functional Review Decisions and Timeline

Decision	Decision Timeline
Identify potential IUS	During the budget process and not later than end of the planning phase
Determine that it is more likely than not that the IUS project will be completed	Prior to the completion of the planning phase
Assign a useful life	Prior to the end of final technical acceptance testing
Confirm that the cost has been correctly accumulated and assigned to the asset	Prior to the end of final technical acceptance testing
Confirm that indirect costs have been appropriately allocated	Prior to the end of final technical acceptance testing
Assign an in-service date	Upon completion of final technical acceptance testing

***VOLUME 4, CHAPTER 28: “HERITAGE ASSETS, MULTI-USE HERITAGE ASSETS AND STEWARDSHIP LAND”**

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by **blue font**.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

This is the initial publication.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	This chapter contains updated policy for heritage assets, multi-use heritage assets and stewardship land; and supersedes policy contained in Volume 4, Chapter 6 dated June 2009 related to heritage assets, multi-use heritage assets and stewardship land.	New Chapter
Policy Memo	The Deputy Chief Financial Officer’s policy memorandum, “Elimination of Military Equipment Definition and Increase to Capitalization Thresholds for General Property, Plant and Equipment,” dated September 20, 2013, was incorporated into the chapter as applicable.	Revision
Policy Memo	The Deputy Chief Financial Officer’s policy memorandum, “Requests to Increase Capitalization Thresholds,” dated March 14, 2014, was incorporated into the chapter as applicable.	Revision
Policy Memo	The Deputy Chief Financial Officer’s policy memorandum, “Financial Reporting Policy for Real Property Estimated Useful Lives, Land Valuation, and Accounting for Real Property Outside of the United States,” dated June 27, 2016, was incorporated into the chapter as applicable.	Revision

CHAPTER 28*HERITAGE ASSETS, MULTI-USE HERITAGE ASSETS AND STEWARDSHIP LAND**

1.0 GENERAL (2801)

1.1 Purpose (280101)

This chapter prescribes Department of Defense (DoD) accounting policy for heritage assets, multi-use heritage assets and stewardship land, which are subsets of property, plant and equipment (PP&E). Within PP&E, two categories have been defined for accountability and financial reporting purposes. The categories are: (1) general PP&E which includes multi-use heritage assets; and, (2) stewardship PP&E. Stewardship PP&E includes heritage assets and stewardship land. The applicable general ledger accounts are listed in the United States Standard General Ledger (USSGL) discussed in Volume 1, Chapter 7. Both the DoD Standard Chart of Accounts and the accounting entries for these accounts are specified in the [DoD USSGL Transaction Library](#). Unless otherwise stated, this chapter is applicable to all DoD Components, including Working Capital Fund (WCF) activities.

1.2 Authoritative Guidance (280102)

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.1. Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standards ([SFFAS](#) [1](#), “Accounting for Selected Assets and Liabilities”;

1.2.2. FASAB [SFFAS](#) [5](#), “Accounting for Liabilities of the Federal Government”;

1.2.3. FASAB [SFFAS](#) [6](#), “Accounting for Property, Plant, and Equipment”;

1.2.4. FASAB [SFFAS](#) [7](#), “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting”;

1.2.5. FASAB [SFFAS](#) [29](#), “Heritage Assets and Stewardship Land”;

1.2.6. FASAB [SFFAS](#) [40](#), “Definitional Changes Related to Deferred Maintenance and Repairs: Amending Statement of Federal Financial Accounting Standards 6, Accounting for Property, Plant and Equipment”;

1.2.7. FASAB [SFFAS](#) [42](#), “Deferred Maintenance and Repairs: Amending Statements of Federal Financial Accounting Standards 6, 14, 29, and 32”;

1.2.8. FASAB [SFFAS](#) [44](#), “Accounting for Impairment of General Property, Plant, and Equipment Remaining in Use”;

1.2.9. FASAB SFFAS 50, “Establishing Opening Balances for General Property, Plant, and Equipment: Amending SFFAS 6, 10, and 23, and Rescinding SFFAS 35”;

1.2.10. FASAB SFFAS 55, “Amending Inter-entity Cost Provisions”;

1.2.11. FASAB Federal Financial Accounting and Auditing Technical Release (TR 9), “Implementation Guide for SFFAS 29: Heritage Assets and Stewardship Land”;

1.2.12. FASAB TR 13, “Implementation Guide for Estimating the Historical Cost of General Property, Plant & Equipment”;

1.2.13. FASAB TR 14, “Implementation Guidance on the Accounting for the Disposal of General Property, Plant & Equipment”;

1.2.14. FASAB TR 15, “Implementation Guidance for General Property, Plant, and Equipment Cost Accumulation, Assignment and Allocation”;

1.2.15. Office of Management and Budget Circular No. A-136, “Financial Reporting Requirements”;

1.2.16. DoD Instruction (DoDI 4165.14), “Real Property Inventory (RPI) and Forecasting”;

1.2.17. DoDI 4165.70, “Real Property Management”;

1.2.18. DoDI 4715.16, “Cultural Resources Management”;

1.2.19. DoDI 5000.64, “Accountability and Management of DoD Equipment and Other Accountable Property”;

1.2.20. Title 54 United States Code, Section 306131 (54 U.S.C. § 306131), “Standards and Guidelines”;

1.2.21. Code of Federal Regulations, Title 36, Chapter 1, Part 60, National Register of Historic Places, Section 60.4 Criteria for Evaluation; and

1.2.22. Treasury Financial Manual (TFM) Volume 1, Part 2, Chapter 4700 "Agency Reporting Requirements for the Financial Report of the United States Government."

2.0 ACCOUNTING FOR HERITAGE ASSETS, MULTI-USE HERITAGE ASSETS AND STEWARDSHIP LAND (2802)

2.1 Definitions (280201)

2.1.1. Heritage Assets. Heritage assets are PP&E that are unique for one or more of the following reasons:

2.1.1.1. Historical or natural significance;

2.1.1.2. Cultural, educational, or artistic (e.g., aesthetic) importance; or

2.1.1.3. Significant architectural characteristics.

Heritage assets consist of (1) collection-type heritage assets, such as objects gathered and maintained for exhibition, for example, museum collections, art collections, and library collections; and (2) non-collection-type heritage assets, such as memorials, monuments, and buildings. Cultural resources and historic properties, as defined in DoDI 4715.16, may be categorized as heritage assets for financial accounting purposes, if they have the attributes of heritage assets as described in this definition.

2.1.2. Multi-use Heritage Assets. Heritage assets may in some cases serve two purposes: (a) a heritage function and (b) a government operations function. In cases where a heritage asset serves two purposes, and the predominant use of the asset is in general government operations, the heritage asset should be considered, and classified as, a multi-use heritage asset (e.g., the main Treasury building used as an office building). Another example of a multi-use heritage asset is the Pentagon, which has been listed on the National Register of Historic Places and also is used as an office building. Heritage assets having an incidental (i.e., not significant or predominant) use in government operations are not considered and are not classified as multi-use heritage assets; they are simply heritage assets. Cultural resources and historic properties, as defined in DoDI 4715.16, may be categorized as multi-use heritage assets for financial accounting purposes, if they have the attributes of multi-use heritage assets as described in this definition.

2.1.3. PP&E: PP&E consists of tangible assets, including land, that meet the following criteria – (i) they have estimated useful lives of two years or more; (ii) they are not intended for sale in the ordinary course of operations; and, (iii) they have been acquired or constructed with the intention of being used, or being available for use by the entity.

2.1.4. Stewardship Land. Stewardship land includes land and land rights owned by the Federal Government but not acquired for or in connection with the acquisition or construction of real property facilities. Examples of stewardship land include public land withdrawn for military purposes such as buffer zones and land used for forests, wildlife or grazing.

2.1.5. Materiality. Materiality, as defined by the SFFAS 1, is the degree to which an item's omission or misstatement in a financial statement makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the inclusion or correction of the item. Since the value of heritage assets and stewardship land are expensed when acquired, the focus for considering their materiality should be based on the DoD required accountability for the asset.

2.2 Relevant USSGL Accounts (280202)

2.2.1. Land and Land Rights (USSGL 171100). The amount of identifiable cost of land and land rights of unlimited duration acquired for or in connection with general property, plant and equipment used in general operations and permanent improvements. Stewardship land (national park or forest and land in public domain), materials beneath or above the surface, and Outer Continental Shelf resources are excluded. Under SFFAS 50, entities can elect to expense land and land rights. If this election is made, there would not be an amount for land and land rights recorded in this USSGL account.

2.2.2. Construction-in-Progress (USSGL 172000). The Construction-in-Progress (CIP) account is used to accumulate the costs of new construction of general PP&E (except for internal use software) and capital improvements while the asset is under construction. CIP accounts include all costs (i.e., direct labor, direct material, supervision, inspection and overhead) incurred in construction. Upon completion, these costs will be transferred to the appropriate general PP&E account.

2.2.3. Buildings, Improvements, and Renovations (USSGL 173000). The Buildings, Improvements, and Renovations account is used to record the cost, fair value or appraised value of DoD-owned buildings acquired and building improvements which are used in providing DoD services or goods. This account also includes the cost of renovation, improvement or restoration of multi-use heritage assets classified as buildings after transfer from the CIP account.

2.2.4. Accumulated Depreciation on Buildings, Improvements, and Renovations (USSGL 173900). The Accumulated Depreciation on Buildings, Improvements, and Renovations account is used to record the amount of accumulated depreciation charged to expense for assets and improvements recorded in the USSGL 173000 account.

2.2.5. Other Structures and Facilities (USSGL 174000). The Other Structures and Facilities account is used to record the cost, fair value or appraised value of DoD-owned structures and linear structures and structures and linear structure improvements which are used in providing DoD services or goods. This account also includes the cost of renovation, improvement or restoration of multi-use heritage assets classified as structures or linear structures after transfer from the CIP account.

2.2.6. Accumulated Depreciation on Other Structures and Facilities (USSGL 174900). The Accumulated Depreciation on Other Structures and Facilities account is used to record the amount of accumulated depreciation charged to expense for assets and improvements recorded in the USSGL 174000 account.

2.2.7. Equipment (USSGL 175000). The Equipment account is used to record the capitalized cost of tangible equipment items of a durable nature that are used by DoD in providing goods and services.

2.2.8. Accumulated Depreciation on Equipment (USSGL 175900). The Accumulated Depreciation on Equipment account is used to record the amount of accumulated depreciation charged to expense for assets recorded in the USSGL 175000 account.

2.2.9. General Property, Plant and Equipment Permanently Removed but Not Yet Disposed (USSGL 199500). The General Property, Plant, and Equipment Permanently Removed but Not Yet Disposed account is used to record the value of general PP&E assets which have been permanently removed from service. Upon permanent removal from service, general PP&E assets must be recorded at their expected net realizable value (NRV) and must cease to be depreciated. See paragraph [280210.B.3](#) for guidance on reporting general PP&E assets which have been permanently removed from service.

2.2.10. Depreciation, Amortization and Depletion (USSGL 671000). The expense recognized by the process of allocating costs of an asset (tangible or intangible) over the period of time benefited or the asset's useful life is recorded in this account.

2.3 Heritage Assets (280203)

2.3.1. As described in subparagraph [280201.A](#), heritage assets are PP&E that are unique for one or more of the following reasons:

2.3.1.1. Historical or natural significance;

2.3.1.2. Cultural, educational, or artistic (e.g., aesthetic) importance; or

2.3.1.3. Significant architectural characteristics.

2.3.2. Heritage assets are generally expected to be preserved indefinitely.

2.3.3. The cost or value should not serve as a precursor when deciding if an asset should be classified as a heritage asset. DoD Components should refer to [cultural resources and collections policies](#), published registers, and consult with DoD subject matter experts (i.e., the DoD cultural resources or museum staffs), when making this assessment. Designation of a PP&E asset (including such assets as museum, library and art collections) as a heritage asset can be done at any time in its life-cycle, based on application of evaluation criteria by qualified staff. Historic significance may be identified if a property/asset meets at least one of the following criteria adapted from the National Register of Historic Places as determined by the relevant DoD Component with concurrence by the relevant State Historic Preservation Officer, or as determined by the guidelines of the National Register of Historic Places in the Code of Federal Regulations, Title 36, Part 60, Section 60.4:

2.3.3.1. Association with historic events or activities that have made a significant contribution to the broad patterns of our history (e.g., battles, development of military technology, prehistoric cultural patterns);

2.3.3.2. Association with [the lives of significant historic](#) persons (e.g., important military leaders, political leaders, inventors);

2.3.3.3. Distinctive design or physical characteristics [of a type, period, or method of construction](#) (e.g., work of a master architect, landscape architect, planner, or engineer; work representative of a particular approach to military design or a particular type or style of architecture or engineering; a formative example of standardized planned military housing); or

2.3.3.4. Potential to provide important information about prehistory or history (e.g., an archeological site on a military installation).

2.3.4. [As contrasted with multi-use heritage assets \(see subparagraph 280201.B\), heritage assets are not used predominantly in general government operations.](#)

2.4 Stewardship Land (280204)

2.4.1. Land and land rights owned by the Federal Government but not acquired for, or in connection with [the acquisition or construction of real property facilities](#), is stewardship land.

2.4.2. “Acquired for or in connection with” is defined as including land [or land rights](#) acquired with the intent to construct general PP&E and land [or land rights](#) acquired in combination with general PP&E.

2.4.3. Land is defined as the solid part of the surface of the earth. Excluded from the definition are natural resources (e.g., depletable resources, such as mineral deposits and petroleum, renewable resources such as timber and the outer continental shelf resources) related to land.

2.4.4. Land and land rights owned by DoD or a DoD Component, but not acquired for or in connection with [real property facilities must](#) be reported as stewardship land.

2.4.5. Land and land rights owned by DoD or a DoD Component, and acquired for or in connection with [real property facilities must](#) be accounted for and reported as general PP&E [and expensed under SFFAS 50, if elected.](#)

2.4.6. Land rights are interests and privileges held by DoD or a DoD Component, in land owned by others, such as leaseholds, easements, water and water power rights, diversion rights, submersion rights, rights-of-way, mineral rights, and other like interests in land.

2.4.7. [Some heritage assets will meet the definitions of, and be considered and reported as, both heritage assets and stewardship land. Such reporting would not be considered duplication as the type of information reported on the physical unit would be different for each category of stewardship asset \(i.e., heritage assets and stewardship land.\)](#)

2.5 Acquisition/[Valuation](#) (280205)

2.5.1. [Heritage Assets and Stewardship Land](#)

2.5.1.1. The cost of acquiring heritage assets and stewardship land are expensed in the period incurred. [The cost must include all costs incurred to bring the asset to a form and location suitable for its intended use.](#)

2.5.1.2. Maintenance or renovation contracts, historical maintenance records or a history of payment of invoices, minutes of meetings, historical data bases, surveys of land records, a history of past/historical practices (e.g., establishing defacto ownership), or other relevant sources of information may provide acceptable alternative evidence of government ownership of heritage assets and stewardship land.

2.5.2. Multi-use Heritage Assets

2.5.2.1. [Recorded Cost](#). When acquiring a [multi-use heritage asset](#), which is a subset of general PP&E, the recorded cost must be recognized in accordance with [paragraph 280206](#). The recorded cost of [multi-use heritage assets](#) is the basis for computing depreciation (if applicable). The method of acquisition determines the cost recorded for multi-use heritage assets, which are part of general PP&E, as described in subparagraph [280205.B.6](#). The recorded cost must include all amounts paid to bring the asset to its form and location suitable for its intended use, including the costs of any embedded items and/or integral software plus ancillary costs. This subparagraph defines and prescribes the use of acquisition cost, net book value, fair value, ancillary costs, and recorded cost when recording the cost of newly acquired [multi-use heritage asset items](#).

2.5.2.2. [Acquisition Cost](#). For the purposes of this chapter, acquisition cost refers to the original purchase, construction, or development cost; net of (less) any purchase discounts. Purchase discounts lost and late payment interest expenses [must](#) not be included as a cost of the asset; rather, such costs [must](#) be recognized as operating expenses.

2.5.2.3. [Net Book Value](#). Net Book value is the recorded cost of a general PP&E asset, less its accumulated depreciation.

2.5.2.4. [Fair Value](#). Fair value is the amount at which an asset or liability could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

2.5.2.5. [Ancillary Costs](#). Ancillary costs are included in the recorded cost in addition to the acquisition cost of the asset. These costs are identifiable and necessary to bring the asset to its form and location suitable for its intended use including other direct and indirect costs. Examples include:

2.5.2.5.1. Government-furnished property installed in end items (e.g., engines installed in aircraft);

2.5.2.5.2. An appropriate share of the cost of government-furnished materials used in the production of end items;

2.5.2.5.3. Transportation charges to the point of initial use;

2.5.2.5.4. Handling and storage costs;

2.5.2.5.5. Labor and other direct or indirect production costs (for assets produced or constructed);

2.5.2.5.6. Engineering, architectural, and other outside services for designs, plans, specifications, and surveys;

2.5.2.5.7. Acquisition and preparation costs of buildings and other facilities;

2.5.2.5.8. An appropriate share of the cost of the equipment and facilities used in construction work;

2.5.2.5.9. Fixed equipment and related installation costs required for activities in a building or facility;

2.5.2.5.10. Direct costs of inspection, supervision, and administration of construction contracts and construction work;

2.5.2.5.11. Allowable direct cost of maintaining the Program Management Office, if material;

2.5.2.5.12. Legal and recording fees and damage claims;

2.5.2.5.13. Fair value of facilities and equipment donated to the DoD;

2.5.2.5.14. Material amounts of interest paid directly to providers of goods or services related to the acquisition or construction (not including late payment interest penalties); and

2.5.2.5.15. A prorated share of nonrecurring cost associated with the development and production of the property.

2.5.2.6. The method of acquisition determines the cost recorded for multi-use heritage assets, which are a part of general PP&E.

2.5.2.6.1. Purchased General PP&E. The cost to be recorded for assets acquired by purchase from a third party (private, commercial, or government) is its purchase contract cost plus applicable ancillary costs. Examples of ancillary costs are included in the listing

in subparagraph 280205.B.5. For purposes of this guidance, purchase includes procurements by cash, check, or installment or progress payments on contracts.

2.5.2.6.2. Constructed General PP&E. The cost to be recorded for constructed items is the sum of all the costs incurred to bring the item(s) to a form and condition suitable for their intended use. These include costs incurred after project design authorization for actual construction such as labor, materials, and overhead costs. Note that preliminary planning costs accumulated prior to design authorization must be expensed and not be captured as part of the recorded cost of constructed items.

2.5.2.6.3. Donated General PP&E. The cost to be recorded for general PP&E acquired through donation, execution of a will, or judicial process excluding forfeiture must be its estimated fair value (except for land expensed under SFFAS 50, if elected) at the time acquired by the DoD.

2.5.2.6.4. Exchanged General PP&E. The cost to be recorded for general PP&E acquired through exchange between the DoD and a nonfederal entity is the fair value of the consideration surrendered at the time of exchange. If the fair value of the general PP&E acquired is more readily determinable than that of the consideration surrendered, the cost will be the fair value of the general PP&E acquired. If neither fair value can be determined, the cost of the general PP&E acquired will be the cost recorded for the consideration surrendered, net of any accumulated depreciation. Any difference between the net recorded amount of the consideration surrendered and the cost of the general PP&E acquired must be recognized as a gain or loss. In the event that cash consideration is included in the exchange, the cost of general PP&E acquired will be increased by the amount of cash consideration surrendered or decreased by the amount of cash consideration received. If the DoD Component enters into an exchange in which the fair value of the general PP&E acquired is less than that of the consideration surrendered, the general PP&E acquired will be recognized at the amount of the consideration surrendered, as described previously and subsequently reduced to its fair value. A loss must be recognized in an amount equal to the difference between the amount of the consideration surrendered for the general PP&E acquired and its fair value. This guidance on exchanges applies only to exchanges between a DoD Component and a nonfederal entity. Exchanges between a DoD Component and another DoD Component or federal agency must be accounted for as a transfer.

2.5.2.6.5. Capital Leases. The recorded cost of general PP&E acquired under a capital lease is the present value of the rental and other minimum lease payments during the lease term, excluding that portion of the payments representing executory cost (e.g., insurance, maintenance and taxes) to be paid by the lessor. The present value is the value of future cash flows (e.g., lease payments) discounted to the present at a certain interest rate (such as the reporting entity's cost of capital), assuming compound interest. However, if the amount so determined exceeds the fair value of the leased property at the inception of the lease, the amount recorded will be the fair value. If the portion of minimum lease payments representing executory cost is not determinable from the lease provisions, the amount should be estimated.

2.5.2.6.6. Seized and Forfeited General PP&E. The cost recorded for general PP&E items acquired through seizure or forfeiture is its fair value, less an allowance for any liens or claims from a third party.

2.5.2.6.7. Vested and Seized Property During Times of War. See Volume 12, Chapter 29 for discussion of vested and seized property during times of war.

2.5.2.6.8. Transferred General PP&E. The cost recorded for general PP&E transferred from another DoD Component or federal agency is the cost recorded on the transferring entity's books for the general PP&E, and its accumulated depreciation. If the receiving DoD Component cannot reasonably ascertain those amounts, the cost of the asset will be its fair value at the time of transfer.

2.5.2.6.9. General PP&E Acquired by Trade-In. The cost to be recorded for general PP&E acquired when trading in another PP&E asset is the sum of the net book value of the asset(s) traded plus (minus) any cash paid (received) or liabilities assumed (relinquished) for the new asset. The net book value is the recorded cost of a general PP&E asset, less its accumulated depreciation.

2.6 Recognition and Measurement (280206)

All heritage assets, multi-use heritage assets, and stewardship land acquired by DoD Components must be recognized for accountability (in accordance with DoDI 4165.14, DoDI 4165.70, and DoDI 5000.64) and financial reporting purposes. Recognition requires the proper accounting treatment (expense or capitalization with depreciation) and the reporting of capitalized amounts and applicable accumulated depreciation and expensed amounts on the appropriate DoD Component's financial statements.

2.6.1. Heritage Assets

2.6.1.1. The cost of acquiring, improving, restoring or renovating heritage assets, other than multi-use heritage assets, should be recognized as a cost on the Statement of Net Cost for the period in which the cost is incurred. The cost should include all costs incurred to bring the asset to its current condition and location. The DoD Components will include heritage assets in its financial statement note disclosures only if it has both ownership and control of the asset and is also responsible for maintenance or sustainment of the asset. If no one DoD Component meets all the criteria, then the DoD Component that has control over the heritage asset must report the heritage asset in its financial statement note disclosures (see paragraph 280305, Reporting Requirements).

2.6.1.2. Except for assets classified as multi-use heritage assets, no amounts for heritage assets acquired through donation or devise (a will or clause of a will disposing of property) should be recognized in the cost of heritage assets.

2.6.1.3. Transfers of heritage assets, except for multi-use heritage assets, from one DoD Component to another or to another Federal agency do not affect the net cost of operations or net position of either entity. In some cases, assets included in general PP&E may be transferred to a DoD Component for use as heritage assets. In this instance, the transferring DoD Component should recognize a transfer-out of capitalized assets and the receiving DoD Component recognizes a transfer-in to facilitate reconciliation and a corresponding cost on the Statement of Net Cost.

2.6.2. Multi-use Heritage Assets

2.6.2.1. The costs of acquisition, improvement, or restoration of multi-use heritage assets should be capitalized as general PP&E and depreciated if the costs equals or exceeds the DoD capitalization threshold. Such multi-use heritage assets should be depreciated over their estimated useful life.

2.6.2.2. The capitalization threshold for general PP&E assets is:

2.6.2.2.1. \$1 million for the Department of Air Force and the Department of Navy general funds General Equipment;

2.6.2.2.2. \$1 million for the National Security Agency (NSA) and the Office of the Director of National Intelligence (ODNI) general PP&E; and

2.6.2.2.3. \$250,000 for real property (other than NSA and ODNI), and all other General Equipment assets for all other general funds and WCFs.

2.6.2.3. Assets classified as multi-use heritage assets and acquired through donation or devise should be recognized as general PP&E at the fair value of the assets at the time received and the amount should also be recognized as non-exchange revenues as defined in FASAB SFFAS 7, Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting.

2.6.2.4. Transfers of multi-use heritage assets from one Federal entity to another (including those between DoD Components or between a DoD Component and another Federal entity) should be recognized by the receiving entity as a transfer-in and as an additional financing source and the transferring entity should recognize a transfer-out. The value recorded should be the transferring entity's net book value of the multi-use heritage asset. If the receiving entity has not been provided the net book value, the multi-use heritage asset should be recorded at its estimated fair value.

2.6.3. Stewardship Land

2.6.3.1. Land classified as stewardship land must be reported as basic information within the financial statements of the DoD Component responsible for such land (see paragraph 280305, Reporting Requirements). The cost of the acquisition of stewardship land should be recognized as an expense on the Statement of Net Cost for the period in which the cost is incurred.

The cost should include all costs to prepare stewardship land for its intended use (e.g., grading the land). In such cases, land may be acquired along with existing facilities. The following treatments should apply:

2.6.3.1.1. To determine whether the facility itself would be deemed a heritage asset, the DoD Component should consult with Component cultural resources staff about whether the acquisition cost of the facility should be treated as the cost of stewardship land, heritage asset, or both;

2.6.3.1.2. The cost in its entirety should be treated as an acquisition of stewardship land, if the facility is to be used in operations (e.g., as general PP&E), and

2.6.3.1.2.1. The value of the facility is insignificant; or

2.6.3.1.2.2. Its acquisition is merely a byproduct of the acquisition of the land.

2.6.3.1.3. Facilities of significant value that have an operating use (e.g., a constructed hotel or employee housing block) should be treated as general PP&E by identifying the cost attributable to general PP&E and segregating it from the cost of stewardship land acquired.

2.6.3.2. No amounts for stewardship land acquired through donation or devise should be recognized as an expense in the Statement of Net Cost.

2.6.3.3. Transfers of stewardship land from one DoD Component to another or to another Federal agency, do not affect the net cost of operations or net position of either entity. In some cases, land included in general PP&E may be transferred to a DoD Component for use as stewardship land. In this instance, the transferring DoD Component should recognize a transfer-out for the amount it has capitalized in its financial accounting records (if land was not expensed under SFFAS 50) for the asset and the receiving DoD Component recognizes a transfer-in to facilitate reconciliation.

2.7 Improvements/Enhancements (280207)

2.7.1. Heritage Assets. The cost of improvement or renovation of heritage assets should be recognized on the Statement of Net Cost for the period in which the cost is incurred.

2.7.2. Multi-use Heritage Assets

2.7.2.1. Capital improvements to multi-use heritage assets must be capitalized when (1) the improvement increases the asset's useful life by two or more years, or increases its capacity or size, and (2) the cost of the improvement equals or exceeds the capitalization threshold (see subparagraph 280206.B.2). If capital improvements do not meet these two criteria they should be expensed. Funding source is not a factor in determining whether an improvement will be capitalized. If the capital improvement increases the underlying asset's useful life by two years or more, the DoD Component must capitalize and depreciate the improvement with the original asset

over the revised estimated useful life. Costs of capital improvements that do not extend the useful life of an existing real property asset but enlarge or improve its capacity and have a useful life of two years or more must be capitalized and depreciated over the lesser of the estimated useful life of the improvement or the remaining economic estimated useful life of the underlying asset. Note that the economic life of the multi-use heritage asset may be different than the original estimated accounting useful life. The economic life reflects the remaining period of utility for the multi-use heritage asset.

2.7.2.2. The cost of improvements to more than one multi-use heritage asset as identified by a unique identifier when performed under a single contract or work order, and that cannot be specifically identified by asset, should be capitalized only if the allocated cost per multi-use heritage asset equals or exceeds the capitalization threshold. When more than one improvement is made to a single asset and the improvements are part of one overall effort to increase the asset's capability, size, and/or useful life, the sum of the costs of the improvements must be capitalized, if the summed costs equal or exceed the capitalization threshold. This is required even when the improvements are funded separately. Once a determination has been made that the aggregate costs of the improvements will be capitalized, each improvement should be capitalized and depreciated upon being placed in service.

2.7.2.3. Maintenance and repair costs are not considered capital improvements, regardless of whether the cost equals or exceeds the capitalization threshold. In SFFAS 42, the FASAB defines maintenance and repairs as activities directed toward keeping fixed assets in an acceptable condition. Maintenance and repair activities include preventative maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain assets. Maintenance and repair activities also include cyclic work done to prevent damage that would be more costly to restore than to prevent (e.g., painting).

2.7.2.4. Although maintenance and repairs are generally expensed in the period incurred, certain replacements of parts, systems, or components may or may not be an improvement for accounting purposes. Crucial to the determination of whether a replacement must be recognized as a repair or an improvement is the intent behind the replacement. Repair by replacement occurs when parts, systems, or components have failed, are in the incipient stages of failing, or are no longer performing the functions for which they were designated. Replacements falling into this category must be expensed. If the replacement was undertaken to expand the capacity or extend the useful life of an item that was in good working order, then the replacement must be recognized as an improvement. A roof or a heating and air conditioning system that is replaced due to the failing of the existing asset should be classified as a repair and should be expensed, even if the replacement incorporated a better quality and longer life shingle or a more efficient heating and air conditioning unit. Repair by replacement does not include rebuilding entire structures within the same physical area (footprint).

2.7.2.5. Capital Improvements at or over the capitalization threshold in effect at the time the capital improvements are completed, will be recorded and depreciated by the DoD Component acquiring the capital improvement irrespective of whether they are the Primary Economic Beneficiary responsible for sustainment requirements of the property containing the capital improvement. A WCF activity of a DoD Component using a capital improvement in

property that does not pay/reimburse the acquirer of the capital improvements for property use, will record an imputed cost in their financial statements for the value of the depreciation expense of the capital improvements from which they benefit. The requirement to impute costs is not applicable to DoD Component General Funds except for inter-entity costs for personnel benefits and Treasury Judgment Fund settlements. A DoD Component using space in a multi-use heritage asset that reports capital improvements for that asset and subsequently ceases use of the asset will transfer the book value of those capital improvements (acquisition value and accumulated depreciation) along with supporting documentation to the DoD Component responsible for reporting the multi-use heritage asset in its financial statements at the time they no longer are using the asset.

2.8 Depreciation (280208)

2.8.1. Heritage Assets. The cost of acquisition, improvement, or renovation of heritage assets should be recognized as an expense on the Statement of Net Cost for the period in which the cost is incurred. These costs are not capitalized and not subsequently depreciated. The cost should include all costs incurred during the period to bring the item to its current condition.

2.8.2. Stewardship Land. The cost of acquiring stewardship land is expensed in the period incurred. These costs are not capitalized and subsequently depreciated.

2.8.3. Multi-Use Heritage Assets. The recorded cost of capitalized multi-use heritage assets must be depreciated in accordance with the general PP&E guidance as described in 280208.C.1 through C.7. Such capitalized amounts, as well as associated amounts of accumulated depreciation and depreciation expense, must be reflected in DoD financial statements.

2.8.3.1. Depreciation is the systematic and rational allocation of the recorded cost of an asset, less its estimated salvage or residual value, over its estimated useful life. Estimates of useful life for general PP&E assets must consider factors such as usage, physical wear and tear and technological change.

2.8.3.2. The salvage value, also known as the residual or scrap value, is the amount that would be expected to be obtained from selling an asset at the end of its useful life, but only when such proceeds (from recycle, resale, or salvage) are permitted to be retained and used by the DoD Component. Typically, personal property will not have a salvage value. DoD real property does not have a salvage value. If the asset is to be traded in on a new asset, the salvage value is the expected trade-in value.

2.8.3.3. The depreciable basis of an asset is the recorded cost reduced by the asset's salvage value, if the asset has a salvage value.

2.8.3.4. For purposes of computing depreciation on DoD general PP&E assets, specific useful lives are prescribed. Table 28-1 and Table 28-2 provide guidance on the useful lives to be used for DoD multi-use heritage assets that are real property or general equipment. Heritage assets and stewardship land are not capitalized and depreciated.

3.8.3.4.1. DoD policy permits the use of only the straight-line method of depreciation.

3.8.3.4.2. If a DoD Component determines that a newly acquired general PP&E asset with a cost equal to or greater than the applicable DoD capitalization threshold which has a useful life of at least two years, but less than five years, the Component may elect to depreciate the asset over a useful life that more accurately reflects its useful life (two to four years, as appropriate). The DoD Component making this election must document the basis for that decision.

Table 28-1. DoD Useful Lives for General Equipment (Including Multi-Use Heritage Assets)

Categories	Sub-Categories	Useful Life
GENERAL EQUIPMENT ASSETS (EXCLUDING WEAPON SYSTEMS)		
General Purpose Vehicles		
	Heavy-duty Trucks and Buses	5
ADP Systems and Hardware		
	Computers and Peripherals	5
Communication and Medical Equipment		
	High Tech Medical Equipment	5
	Radio and Television Broadcasting Equipment	5
All Other Equipment and Machinery		
	All Other Equipment and Machinery	10
	Equipment used in Research, Development, Test, and Evaluation (RDT&E)	5
Vessels		
	Tugs	20
	Barges	20
	Similar Water Transportation Equipment	20
Generation Equipment		
	Steam Generation Equipment (12.5K pounds per hour or more)	20
	Electric Generation Equipment (500 Kilowatt or more)	20
Capital Improvements *		
GENERAL EQUIPMENT WEAPON SYSTEMS		
Ground Systems		
	Armored/Assault Vehicle	15
	Cargo Vehicle	15
	Tracked Vehicle	20
Fixed Wing Aircraft		
	Combat Fixed Wing	20
	Cargo Fixed Wing	25
	Utility Fixed Wing	20
Rotary Wing		
	Combat Rotary Wing	25
	Cargo Rotary Wing	25
	Utility Rotary Wing	30
Ships		
	Combat Ship	35
	Cargo Ship	40
	Aircraft Carrier	50
Submarines		
	Submarine	33
Unmanned Aerial Vehicle Systems (UAVS)		
	UAVS	15
Combat Support Systems		
	Combat Support System	15
	Missile Defense System	20
*See Capital Improvements/Enhancements in paragraph 280207.		

Table 28-2. DoD Useful Lives for Real Property (Including Multi-Use Heritage Assets)

Real Property Classification	Real Property Useful Lives	Capital Improvements (if useful life is not provided by an engineering estimate)(i)
Buildings	45 years	20 years
Structures	35 years	15 years
Linear Structures	40 years	20 years
(i) Engineering estimates are of particular importance when evaluating full restoration or conversion.		

2.8.3.5. The event that triggers the calculation of depreciation is the date of receipt shown on the asset receiving document **in cases where no installation is required**; the date installed (if required); or the date the asset is available for use, also known as the acceptance date, (regardless of whether it is actually used). The actual commencement of depreciation **should** be based on the Month Available for Service Method. Under this method, the month the asset was **accepted, installed, or available for use as applicable**, is the month used to commence the calculation of depreciation expense for the first year.

2.8.3.6. If an asset remains in use longer than its estimated useful life, it **must** be retained in the accountable property system of record, as well as the accounting records, and reflect both its recorded cost and accumulated depreciation until disposition of the asset.

2.8.3.7. WCF activities are required to depreciate general PP&E assets in accordance with the guidance in this chapter without regard to whether such assets are procured through a WCF activity's Capital Purchase/Investment Program budget or whether depreciation for such assets is included in rates charged to customers. The recognition of general PP&E assets and the depreciation of such assets by WCF activities therefore may be different for financial statement reporting purposes than the depreciation amounts used for WCF rate development and budget presentation. All general PP&E depreciation of WCF activities **must** be recognized as an expense on the Statement of Net Cost, included in accumulated depreciation amounts on the Balance Sheet, and reported in the "Defense Working Capital Fund Accounting Report [Accounting Report (Monthly) 1307] (AR (M) 1307)." Depreciation recorded on general PP&E that was not acquired nor will be replaced through use of Defense WCF resources **must** be classified as non-recoverable for rate setting purposes and reported appropriately on the AR (M)1307. Defense WCF rates charged to customers are based on guidance in Volume 2B and Volume 11B.

2.9 Impairment (280209)

2.9.1. **Description.** SFFAS 44 defines impairment as a significant and permanent decline in the service utility of general PP&E or expected service utility of CIP that results from events or changes in circumstances that are not considered normal and ordinary. The guidance in this paragraph is applicable to multi-use heritage assets only. Due to the nature of heritage assets and stewardship land and the fact that they are expensed when acquired, impairment is not calculated

for these assets. Heritage assets are expected to be preserved indefinitely. Multi-use heritage assets are subject to impairment guidance for general PP&E as described in SFFAS 44.

2.9.1.1. See subparagraph **280209.B.2** for a discussion of determining the significance and permanence of a service utility decline.

2.9.1.2. The service utility of general PP&E is the usable capacity that, at acquisition, was expected to be used to provide service. The current usable capacity of general PP&E may be less than its original usable capacity due to the normal or expected decline in useful life or to impairing events or changes in circumstances, such as physical damage, obsolescence, enactment or approval of laws or regulations or other changes in environmental or economic factors, or changes in the manner or duration of use.

2.9.1.3. Normal and ordinary events or circumstances are those that fall within the expected useful life of the general PP&E such as standard maintenance and repair requirements. Events or circumstances that are not considered normal are those that, at the time the general PP&E was acquired, the event or change in circumstance would not have been expected to occur during the useful life of the general PP&E or, if expected, was not sufficiently predictable to be considered in estimating the general PP&E's useful life.

2.9.2. Identification of Potential Impairment Loss. The determination of whether general PP&E remaining in use is impaired is a two-step process, which includes (1) identifying potential impairment indicators and (2) testing for impairment.

2.9.2.1. Step 1 - Identify Indicators of Potential Impairment. Indicators of potential impairment can be identified and brought to DoD Component's attention in a variety of ways, such as procedures related to deferred maintenance and repair (DM&R). Although DoD Components are not required to establish additional or separate procedures beyond those that may already exist, they should evaluate existing processes and internal controls to determine if they are sufficient to reasonably assure the identification of potential impairment indicators and implement appropriate additional processes and internal controls if necessary. Once identified, indicators are not conclusive evidence that a measurable or reportable impairment exists; DoD Components should carefully consider the surrounding circumstances to determine whether a test of potential impairment is necessary given the circumstances. Some common indicators of potential impairment include:

2.9.2.1.1. Evidence of physical damage;

2.9.2.1.2. Enactment or approval of laws or regulations which limit or restrict general PP&E usage;

2.9.2.1.3. Changes in environmental or economic factors;

2.9.2.1.4. Technological changes or evidence of obsolescence (however, if obsolete general PP&E continues to be used, the service utility expected at acquisition may not be diminished);

2.9.2.1.5. Changes in the manner or duration of use of general PP&E;

2.9.2.1.6. Construction stoppage or contract termination; and

2.9.2.1.7. General PP&E idled or unserviceable for excessively long periods.

2.9.2.2. Step 2 - Impairment Test. Identified general PP&E should be tested for impairment by determining whether these two factors are present: (i) the magnitude of the decline in service utility is significant and (ii) the decline in service utility is expected to be permanent.

2.9.2.2.1. Significant declines in service utility are those that cause costs (including operational and maintenance costs) to be disproportionate to the new expected service utility. The determination of whether or not an item is significant is a matter of professional judgment and is distinct from materiality considerations. Such judgments may be based on the relative costs of providing the service before and after the decline, the percentage decline in service utility, or other considerations.

2.9.2.2.2. The decline in service utility is considered permanent when the DoD Component has no reasonable expectation that the lost service utility will be replaced or restored; that is, the DoD Component expects that the general PP&E will remain in service so that its remaining service utility will be utilized. In contrast, a reasonable expectation that the lost service utility will be replaced or restored may exist when the DoD Component has: (i) specific plans to replace or restore the lost service utility of the general PP&E, (ii) committed or obligated funding for remediation efforts, or (iii) a history of remediating lost service utility in similar cases or for similar general PP&E.

2.9.2.3. For construction work in process, the testing of impairment in subparagraph 280209.B.2 should be performed over the period of expected future service utility rather than current service utility.

2.9.3. Determining the Appropriate Measurement Approach. Impairment losses on general PP&E that will continue to be used by the entity should be estimated using a measurement approach that reasonably estimates the portion of net book value associated with the diminished service utility of the general PP&E. A measurement method would not be considered appropriate if it would result in an unreasonable net book value associated with the remaining service utility of the general PP&E. Conversely, a reasonable measurement method may result in no impairment loss being recorded. Regardless of the method used, recognition of impairment loss should be limited to the asset's net book value at the time of impairment. Widely recognized methods for measuring impairment include the following. Note that the restoration approach should generally be used for multi-use heritage assets.

2.9.3.1. Replacement Approach. Impairment of general PP&E with physical damage generally may be measured using a replacement approach. This approach uses the estimated cost to replace the lost service utility of the general PP&E at today's standards (i.e., at current market prices and in compliance with current statutory, regulatory, or industry

standards) to identify the portion of the historical cost of general PP&E that should be written-off due to impairment. It may be appropriate to apply the ratio of estimated cost to replace the diminished service utility over total estimated cost to replace the general PP&E, to the net book value of general PP&E to determine the impairment amount.

2.9.3.2. Restoration Approach. Impairment of multi-use heritage assets with physical damage should generally be measured by using a restoration approach. This approach uses the estimated cost to restore the diminished service utility of the general PP&E to identify the portion of the historical cost of the general PP&E that should be written-off. This approach does not include any amounts attributable to improvements and additions to meet today's standards. The estimated restoration cost can be converted to historical cost by restating (i.e., deflating) the estimated restoration cost using an appropriate cost index. Alternatively, it may be appropriate to apply the ratio of estimated restoration cost to restore the diminished service utility over total estimated restoration cost to the net book value of the general PP&E to determine the impairment amount.

2.9.3.3. Service Unit Approach. Impairment of general PP&E that are affected by enactment or approval of laws or regulations or other changes in environmental/economical factors or are subject to technological changes or obsolescence generally may be measured using a service unit approach. This approach compares the service units provided by the general PP&E before and after the impairment to isolate the historical cost of the service utility that cannot be used due to the impairment to determine the impairment amount.

2.9.3.4. Deflated Depreciated Current Cost Approach. Impairment of general PP&E that are subject to a change in manner or duration of use generally may be measured using a deflated depreciated current cost approach. Under this approach, a current cost for a general PP&E to replace the current level of service is estimated. This estimated current cost is then depreciated to reflect the fact that the general PP&E is not new, and is then subsequently deflated to convert it to historical cost dollars. A potential impairment loss results if the net book value of the general PP&E exceeds the estimated historical cost of the current service utility (i.e., deflated depreciated current cost).

2.9.3.5. Cash Flow Approach. Recognizes an impairment loss only if the net book value (i) is not recoverable and (ii) exceeds the higher of its NRV or value-in-use estimate.

2.9.3.5.1. The net book value of general PP&E is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the general PP&E.

2.9.3.5.2. NRV is the estimated amount that can be recovered from selling, or any other method of disposing, of an item less estimated costs of completion, holding, and disposal. SSFAC 7 describes value-in-use as the benefit to be obtained by an entity from the continuing use of an asset and from its disposal at the end of its useful life. Value-in-use can be measured at the present value of future cash flows that an entity expects to derive from an asset, including cash flows from use of the asset and eventual disposal.

2.9.3.5.3. If the net book value is not recoverable, the impairment loss is the amount by which the net book value of the general PP&E exceeds the higher of NRV or value-in-use estimate. No impairment loss exists if the net book value is less than the higher of the general PP&E's NRV or value-in-use estimate.

2.9.3.6. Lower of Net Book Value or Higher of NRV or Value-in-Use Approach. General PP&E impaired from either construction stoppages or contract terminations, which are expected to provide service, should be reported at their recoverable amount; the lower of (i) the general PP&E's net book value or (ii) the higher of its NRV or value-in-use estimate. Impaired general PP&E, which are not expected to provide service, should be accounted for in accordance with SFFAS 6.

2.9.4. Recognizing and Reporting Impairment Losses. The loss from impairment, if any, should be recognized and reported in the Statement of Net Cost in the period in which the DoD Component concludes that the impairment is both (1) a significant decline in service utility and (2) expected to be permanent. Such losses may be included in program costs or costs not assigned to programs. A general description of the general PP&E for which an impairment loss is recognized, the nature (e.g., damage or obsolescence) and amount of the impairment and the financial statement classification of the impairment loss must be disclosed in the notes to the financial statements in the period the impairment loss is recognized.

2.9.5. Recoveries. The impairment loss should be reported net of any associated recovery when the recovery and loss occur in the same fiscal year. Recoveries reported in subsequent fiscal years should be reported as revenue or other financing source as appropriate. The amount and financial statement classification of recoveries should be disclosed in the notes to the financial statements.

2.9.6. Remediating Previously Reported Impairments. The costs incurred to replace or restore the lost service utility of impaired general PP&E remaining in use must be accounted for in accordance with applicable standards (i.e., recognized according to the nature of the costs incurred and the appropriate capitalization threshold).

2.9.7. Diminished Service Utility Without Recognized Impairment Loss. If the future service utility has been adversely affected but the impairment test determines that a loss does not need to be recognized, a change to the estimates used in depreciation calculations (such as estimated useful life and salvage value) should be considered and adjusted as appropriate.

2.10 Removal/Disposal (280210)

2.10.1. Heritage Assets and Stewardship Land. Heritage assets and stewardship land can be removed from service or otherwise disposed. For example, stewardship land can be granted to the DoD Component by the Department of Interior (DOI) for a definite period with the expectation the land will be returned at the end of the period. In this example, the stewardship land is considered to be removed from service when it is returned to DOI.

2.10.2. Multi-Use Heritage Assets

2.10.2.1. In TR 14, the FASAB defines removal from service as an event that terminates the use of a general PP&E asset. Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or identification as excess to mission needs. Removals from service should be considered other than permanent unless (1) the asset's use is terminated and (2) there is documented evidence of the DoD Component's decision to permanently remove the asset from service. If only one of the two business events has occurred, permanent removal from service has not occurred (i.e., the removal is considered other than permanent).

2.10.2.2. If an asset's normal use is terminated (i.e., it no longer provides service in the operations of the entity) but the DoD Component has not yet decided to permanently remove the asset from service, the removal from service must be accounted for as other than permanent. Other than permanent removal from service is evidenced by activities such as continuing low-level maintenance to sustain the asset in a recoverable status or until reutilization efforts are exhausted. For example, assets that have been removed from service and sent to a depot for temporary storage with the intent to use the assets again in the future and other assets taken out of service on a temporary basis are considered other than permanently removed from service. There is no change in the reported value for assets that have been other than permanently removed from service and the assets must continue to be depreciated.

2.10.2.3. If (i) an asset's use is terminated and (ii) the DoD Component has documented its decision to permanently remove the asset from service, the removal from service must be accounted for as permanent. Permanent removal from service is evident from the DoD Component's documented decision to dispose of an asset by selling, scrapping, recycling, donating, or demolishing the asset. The recorded cost as well as the accumulated depreciation of an asset permanently removed from service must be removed from the accounts in which they are reported, and the asset must be recorded at its NRV in General PP&E Permanently Removed but Not Yet Disposed (USSGL Account 199500). USSGL Account 199500 is defined in the Treasury Financial Manual Chart of Accounts as "the NRV of general PP&E that is permanently removed from service but not yet disposed and is reclassified in accordance with FASAB TR 14, paragraphs 10 and 12." NRV is the estimated amount that can be recovered from disposing of the asset less estimated costs of completion, holding, and disposal. Any difference between the net book value of the asset and its expected NRV should be recognized as a gain or loss. The expected NRV should be evaluated at the end of each fiscal year and any change in NRV should be recognized as a gain or loss. Assets permanently removed from service are no longer depreciated.

2.10.2.4. When an asset is disposed of (e.g., by selling, scrapping, recycling, donating, or demolishing the asset) the asset must be written-off from the financial records and statements and the difference between any disposal proceeds and the asset's net book value must be recognized as a gain or loss. The disposal start date is the calendar date of a recognizable obligation to complete the disposal action. For demolitions, this represents the demolition contract's start date. For transfers to a non-DoD entity and sales, this represents the date on which the instrument is endorsed or operation is ceased, whichever comes later. For natural disasters, this represents the actual date of the incident if the asset is a complete loss.

3.0 ADDITIONAL CONSIDERATIONS (2803)

3.1 Use of Canceled Treasury Account Symbol (280301)

3.1.1. Heritage assets and stewardship land are not reported in the Department of Treasury's Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS).

3.1.2. Multi-use heritage assets are required to be reported in GTAS, a data collection system that has replaced the reporting functionalities of Federal Agencies Centralized Trial-Balance System I and II, Intragovernmental Fiduciary Confirmation System and Intragovernmental Reporting and Analysis System as the primary means for DoD Components to report their trial balance data to the Department of Treasury. Capitalized assets are required to be reported and remain in GTAS after the original purchasing Treasury Account Symbol (TAS) has expired and been canceled. If a capitalized asset has not been moved to a cancelled ("C") TAS as described in [280301.B.1](#); GTAS will provide a "C" TAS on the GTAS Super Master Account File (SMAF) for each fund family represented on the SMAF. The system generated "C" TAS will have three components: the three-digit agency identifier, availability type "C", and a four-digit main account.

3.1.2.1. All DoD Components must use the "C" availability type TAS to report capitalized assets. Assets may be moved to a "C" TAS at any time from the purchase date to the date the original purchasing fund cancels. (Refer to the [TFM, Part 2, Chapter 4700](#) for additional information.)

3.1.2.2. To transfer an asset to a "C" TAS:

3.1.2.2.1. Use USSGL account transaction E510 to transfer-out the asset from the purchasing fund account.

3.1.2.2.2. Use USSGL account transaction E606 to transfer-in the asset into the appropriate "C" TAS.

3.2 Supporting Documentation (280302)

3.2.1. Entries to record financial transactions in accounting system general ledger accounts and/or the Accountable Property System of Record (APSR) and/or other systems, as well as information to be included in financial statement note disclosures, must be supported by source documents that reflect all transactions affecting the DoD Component's stewardship investment in the PP&E.

3.2.1.1. All acquisitions, whether by purchase, transfer from other agencies, donation, or other means, must be supported as of the date the DoD Component accepts the heritage assets, multi-use heritage assets and/or stewardship land. The documents listed in Table 28-3, where applicable, must be readily available to support the changes in asset value or physical attributes as a result of new acquisition or capital improvement. Agencies should maintain historical files evidencing ownership of heritage assets, multi-use heritage assets and

stewardship land; and for some types of heritage assets, records and documentation pertaining to the asset's historical significance are required to be maintained pursuant to U.S.C. and DoD policy (e.g., 54 U.S.C. § 306131 and DoDI 4715.16). However, when original property records or other documentation (e.g., deeds, tax assessments, insurance records) for heritage assets and stewardship land do not exist, a methodology must be employed in order to develop alternative documentation to support management's assertions of Federal ownership.

3.2.1.2. As discussed in SFFAS 29 paragraphs 86 through 88 and in TR-9, since the historical records for items acquired long ago may not have been retained, other reasonable approaches and methods must be developed by the program offices to support the existence and completeness of heritage assets and stewardship land. When definitive documentation for stewardship land and/or heritage assets is not available, management must identify and use alternative methods for supporting management's assertions for these assets. For assessing land, for example, these methods could mirror the areas used to determine major categories for Note disclosure in the financial statements, such as the number of areas of recreational use, geographic management areas, and federal water projects of fish hatcheries. Heritage assets also have many of the same documentation issues since antiquities laws and preservation acts did not go into effect prior to artifacts having been collected and preserved. Many of these assets may reside in federal and nonfederal repositories. However, records and detailed listings from these periods generally do not exist.

3.2.1.3. All disposals or retirements must have sufficient supporting documentation as of the date the PP&E leaves the custody of the DoD Component to provide an adequate audit trail for the disposal of the asset. The execution of certain disposal events will generate financial or administrative accountability transactions. These documents, where applicable, must be readily available to support disposals:

3.2.1.3.1. "Declaration of excess" document;

3.2.1.3.2. Approval documentation (to include disposal of land);

3.2.1.3.3. Original acquisition documents;

3.2.1.3.4. Legal instruments (such as a deed or contract) to indicate legal obligation to dispose of an asset, if applicable;

3.2.1.3.5. Document showing the disposal start date and disposal end date;

3.2.1.3.6. Receipt documentation; and

3.2.1.3.7. Transfer documents for transferred assets.

3.2.2. In their internal accounting policies and procedures, the DoD Components should document the identification, categorization, and method used to physically quantify the assets to ensure the consistent reporting for all similar heritage assets and stewardship land. As described in paragraph 280206, the cost of acquiring heritage assets and stewardship land should be

recognized as a cost on the Statement of Net Cost for the period in which the cost is incurred. In addition, financial statement note disclosure for the physical quantities of heritage assets and stewardship land are required. As further described in paragraph 280206, the cost to acquire a multi-use heritage asset that meets the capitalization threshold and has a useful life of two years or more is capitalized and depreciated over the asset's estimated useful life.

3.2.3. Heritage assets should be quantified in terms of physical units (unit of measure) to facilitate the required financial statement note reporting. The appropriate level of aggregation and physical units of measure for each major category should be meaningful and determined by the preparer based on the entity's mission, types of heritage assets, and how the entity manages the assets. For each major category of heritage asset, the following should be documented:

3.2.3.1. The number of physical units by major category. The major categories should be classified by collection- or non-collection-type heritage assets for which the entity is the steward as of the end of the reporting period;

3.2.3.2. The number of physical units by major category that were acquired and the number of physical units by major category that were withdrawn during the reporting period; and

3.2.3.3. A description of the major methods of acquisition and withdrawal of heritage assets during the reporting period. This should include disclosure of the number of physical units (by major category) of transfers of heritage assets between federal entities and the number of physical units (by major category) of heritage assets acquired through donation or devise, if material. In addition, the fair value of heritage assets acquired through donation or devise during the reporting period should be disclosed, if known and material.

3.2.4. Stewardship land should be quantified in terms of physical units (acres). The appropriate level of aggregation and physical units (acres) of measure for each major category (e.g., Land Predominate Use Code) of stewardship land use should be meaningful and determined by the preparer based on the entity's mission, types of stewardship land use, and how the entity manages the assets. For each major category of stewardship land, the following should be documented:

3.2.4.1. The number of physical units (acres) by major category of stewardship land use for which the entity is the steward as of the end of the reporting period;

3.2.4.2. The number of physical units (acres) by major category of stewardship land use that were acquired and the number of physical units (acres) by major category of stewardship land use that were withdrawn during the reporting period; and

3.2.4.3. A description of the major methods of acquisition and withdrawal of stewardship land during the reporting period. This should include disclosure of physical units (acres) (by major category of stewardship land use) of transfers of stewardship land between federal entities and the number of physical units (acres) (by major category of stewardship land use) of stewardship land acquired through donation or devise, if material. In addition, the fair value

of stewardship land acquired through donation or devise during the reporting period should be disclosed, if known and material.

Table 28-3. Examples of Supporting Documentation for Heritage Assets, Multi-Use Heritage Assets and Stewardship Land Acquisition

Note: These examples are not all inclusive for all circumstances.

Evidence	Examples
Unique Identification	Assignment of unique identifier
Project Approval	Such as, but not limited to a Work Order
Obligation on Behalf of the Government	Such as, but not limited to: <ol style="list-style-type: none"> For contracts, contract modifications, or change orders: <ol style="list-style-type: none"> Statement of Work; Dollar Amount of Contract; Location; Source of Funds; Parties to the Contract; and Signature Page [Signature of All Parties]. Documentation of troop labor hours; Approved Work Order.
Payment Submitted	Such as, but not limited to: <ol style="list-style-type: none"> Approved last invoice reflecting the total amount submitted for payment and received to date; Evidence of in-house construction costs, including labor; Indirect Costs incurred internally by the gaining activity that relate to the new acquisition or capital improvement.
Acceptance	Such as, but not limited to: <ol style="list-style-type: none"> DoD (DD) Form 250, Material Inspection and Receiving Report; General Services Administration (GSA Form 1334), Request for Transfer of Excess Real and Related Personal Property; DD Form 1354, Transfer and Acceptance of DoD Real Property (Interim or final), with associated source documentation retained by the responsible party; Executed acquisition document and appraisal results for the donated assets; Signed judgment documents for condemnations; Deed; Signed lease for leased property; Letter of withdrawal for property withdrawn from public domain; Executed Occupancy Agreement; Executed Reversionary Document; Transfer letter and documents for transferred assets; and DD Form 1131, Cash Collection voucher.
Project Closeout	Such as, but not limited to a Final DD Form 1354 with associated source documentation retained by the responsible party.

3.2.5. Sufficient documentation must:

3.2.5.1. Indicate the physical quantity, location, and unit cost of the [multi-use heritage assets](#). The [APSR](#) must be designed to be of maximum assistance in making procurement and utilization decisions, including decisions related to identifying [general PP&E](#) that may be available for reuse, transfer to other DoD Components, or made available for disposal in accordance with current DoD regulations and other regulatory requirements.

3.2.5.2. Enable periodic, independent verification of the accuracy of the accounting and [APSR](#) through periodic physical counts/inventories (existence and completeness, i.e., “book to floor and floor to book”). Such periodic inventories also [must](#) include reconciling the [APSR](#) and/or [other](#) systems with the general ledger accounts and physical [counts for multi-use heritage assets, heritage assets and stewardship land](#). Personal hand receipt self-validations are not acceptable for meeting the independent verification of physical inventory requirements. See [DoDI 4165.14 for real property and DoDI 5000.64 for personal property](#).

3.2.5.3. Identify and classify [multi-use heritage assets](#) that [were](#) capitalized, recorded in the [APSR and](#) accounting system, and reported in the financial statements.

3.2.5.4. Be based on the same documents, to ensure that entries to the [financial accounting/reporting](#) and [APSR](#) are the same. This will ensure that the [APSR is](#) integrated and subsidiary to the [financial](#) accounting system, and that such records can be reconciled with the accounting system [for multi-use heritage assets, heritage assets and stewardship land](#).

3.2.5.5. Include all [multi-use heritage assets, heritage assets and stewardship land](#) possessed by [DoD](#) (to include property held by others) and [multi-use heritage assets, heritage assets and stewardship land](#) of others held by [DoD](#) through seizure, forfeiture, loss, or abandonment.

3.2.5.6. Provide information to identify and account for improvements to [multi-use heritage asset](#).

3.3 Physical Inventories of [Heritage Assets, Multi-use Heritage Assets and Stewardship Land](#) (280303)

DoD Components must perform periodic physical inventories of [heritage assets and multi-use heritage assets in accordance with DoDI 5000.64 and DoDI 4165.14](#). Periodic physical inventories of [stewardship land must be performed in accordance with DoDI 4165.14](#).

3.4 [DM&R](#) (280304)

3.4.1. [Description](#)

3.4.1.1. In [SFFAS 42](#), the [FASAB](#) defines [DM&R](#) as maintenance and repairs that [were](#) not performed when [they](#) should have been or [were](#) scheduled to be and [which are](#) put off or delayed to a future period.

3.4.1.2. For purposes of this policy, maintenance and repairs are activities directed toward keeping general PP&E assets in an acceptable condition. Maintenance and repairs include preventive maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain the asset.

3.4.1.3. Maintenance and repairs exclude activities aimed at expanding the useful life, capacity or capability of an asset or otherwise upgrading it to serve needs different from, or significantly greater than, its current use.

3.4.2. Measurement

3.4.2.1. Amounts for DM&R may be measured using condition assessment surveys, life-cycle cost forecasts, or other methods that are similar to the condition assessment survey or life-cycle costing methods.

3.4.2.1.1. Condition assessment surveys are periodic physical inspections of assets to determine their current condition and estimated cost to correct any deficiencies. DoD Components should assess the condition of heritage assets as a function of their day-to-day operations and document condition through periodic assertion/assessment statements provided by their field office managers. Components also need to evaluate the cost and benefits of doing condition assessment surveys. Such things as cycling the assessments on a rotating basis, the frequency of assessments (i.e., every three or five years) and the criteria and methodology used for making such assessments need to be considered. SFFAS 42 rescinded the requirement to report condition information for heritage assets and stewardship land. See DoDI 4165.70 and DoDI 4715.16 for additional guidance.

3.4.2.1.2. Life-cycle costing is an acquisition or procurement technique, which considers operating, maintenance, and other costs in addition to the acquisition cost of assets. Since it results in forecasts of maintenance and repairs expense, these forecasts may serve as a basis against which to compare actual maintenance and repairs expense to arrive at an estimate of DM&R.

3.4.2.2. DoD Components should determine what condition standards are acceptable and which DM&R measurement methods to apply. Once determined, condition standards and measurement methods must be consistently applied unless the DoD Component determines that changes are necessary. Changes deemed necessary by the DoD Component must be accompanied by an explanation documenting the rationale for the change(s) and any related impact the change(s) will have on the DM&R estimates.

3.4.2.3. DM&R must be measured for capitalized and non-capitalized PP&E, and fully depreciated general PP&E. In addition, DM&R must be measured for inactive and/or excess general PP&E to the extent that it is required to maintain the general PP&E in acceptable condition (e.g., to comply with existing laws and regulations or to preserve value pending disposal) and, DM&R must measure funded maintenance and repairs that have been delayed for a future period as well as unfunded maintenance and repairs.

3.4.3. RSI

SFFAS 42 eliminated the requirement to report condition information and optional reporting of low-high DM&R estimates and critical and non-critical DM&R in the Required Supplementary Information (RSI) of the Agency Financial Report. However, DoD Components must report material amounts of DM&R as RSI to the financial statements (see Volume 6B, Chapter 12). At a minimum, the following information must be presented as RSI for all PP&E:

3.4.3.1. Estimates of the beginning and ending balances of DM&R for each major category of PP&E (i.e., heritage assets and multi-use heritage assets);

3.4.3.2. A summary of the DoD Component's maintenance and repairs policies and a brief description of how they are applied (e.g., method of measuring DM&R);

3.4.3.3. Policies for ranking and prioritizing maintenance and repair activities;

3.4.3.4. Factors the DoD Component considers in determining acceptable condition standards;

3.4.3.5. Whether DM&R relates solely to capitalized general PP&E and non-capitalized heritage assets or also to amounts relating to non-capitalized or fully depreciated general PP&E;

3.4.3.6. Capitalized general PP&E, and non-capitalized heritage assets for which the DoD Component does not measure and/or report DM&R and the rationale for the exclusion; and

3.4.3.7. If applicable, explanation of any significant changes to DM&R amounts from the prior year and the policies and factors subject to the reporting requirements established in subparagraphs 280304.C.2 through 280304.C.6.

3.5 Reporting Requirements (280305)

3.5.1. SFFAS 29 reclassifies the reporting of all heritage assets and stewardship land from Required Supplemental Stewardship Information to basic information in the financial statements, except for DM&R which must be reported as RSI (see subparagraph 280304.C). The standard requires that entities reference a note on the balance sheet that discloses information about heritage assets and stewardship land, but does not require the reporting of acquisition cost.

3.5.2. DoD Components with heritage assets and stewardship land should reference a note on the balance sheet that discloses information about the heritage assets and stewardship land, but no asset dollar amount should be shown. Instead the minimum reporting requirements for note disclosure include a description of major categories, physical unit information for the end of the reporting period, physical units added or withdrawn during the period, and a description of the methods of acquisition and withdrawal. The DoD Components should also include in the disclosures, the entity stewardship policies and an explanation of how heritage assets and

stewardship land relate to the mission of the entity. See Volume 6B, Chapter 10, Note 10 for the specific reporting requirements. Supporting documentation requirements for financial statement disclosures is described in paragraph 280302, Supporting Documentation.

3.5.3. Multi-use heritage assets require additional descriptive information in the heritage asset note disclosure as set forth in SFFAS 29, paragraph 25, with cross references directing the reader from the balance sheet to the note disclosure. Multi-use heritage assets are to be reported in both the principal financial statements (in dollars) as general PP&E and in the heritage asset note disclosure (in physical units). This reporting and note disclosure would not be considered duplicative as each category is considered unique for this reporting purpose.

3.6 Environmental Liabilities/Cleanup Costs (280306)

The accounting policy for environmental liabilities/cleanup costs pertaining to heritage assets, multi-use heritage assets and stewardship land is contained in Chapter 13.

CHAPTER 1

PURPOSE, ORGANIZATION, AND DUTIES

1.0 GENERAL

1.1 Purpose

The purpose of this volume is to establish disbursing requirements, principles, standards, responsibilities, and pecuniary liability standards for disbursing officers (DOs), certifying officers (COs), and other accountable officials throughout the DoD. If new legislation conflicts with Volume 5, the highest-level guidance governs.

1.2 Authoritative Guidance

This volume is issued by authority of [*DoD Instruction \(DoDI\) 7000.14*](#), DoD Financial Management Policy; implements the [*Treasury Financial Manual \(TFM\) Volume I*](#); and establishes policies for disbursing throughout the DoD. It applies to the Secretary of Defense (SecDef), Military Departments, Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, Combatant Commands, DoD Inspector General, Defense Agencies, and DoD Field Activities (collectively known as DoD Components).

1.3 Recommended Changes and Requests for Deviation or Exception

Recommended changes and exceptions to policy must be sent through appropriate channels to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C))/Chief Financial Officer (CFO). Coordinate requests for deviations from or exceptions to Volume 5 with Accounting and Finance Policy, Strategy, Policy and Requirements (SPR) Directorate, Defense Finance and Accounting Service (DFAS) Indianapolis (DFAS-ZPTA/IN), 8899 East 56th Street, Indianapolis, IN 46249-0050, dfas-in.disbursingpolicy@mail.mil.

1.4 Use of Volume 5

1.4.1. Volume 5 cites specific U.S. Department of the Treasury (Treasury) accounts (e.g., **F3880) where the asterisks ** represent the appropriate DoD Component designator, (i.e., 17 for Navy and Marine Corps, 21 for Army, 57 for Air Force, or 97 for Defense).

1.4.2. Volume 5 prescribes the use of specific forms (see the DoD [\(DD\) Forms Management Program](#) website). DoD Components using systems and producing their own forms in lieu of those prescribed that were in operation at the time of Volume 5's initial issuance (December 16, 1993) may continue using these systems and forms until DoD implements a single standard disbursing system. A DoD Component electing to use a computer-generated version of a prescribed DD Form must use an exact replica of that form or submit a request for exception in accordance with [DoD 7750.08](#), DoD Forms Management Program Procedures, to the address in paragraph 1.3.

1.4.3. Refer to the Definitions chapter for terms used herein.

2.0 ORGANIZATION

2.1 DFAS

[DoD Directive 5118.05](#) established DFAS under the authority vested in the SecDef by Title 10, United States Code (U.S.C.), section 113, ([10 U.S.C. § 113](#)). DFAS is under the direction, authority, and control of the OUSD(C)/CFO. The DFAS Director is the principal DoD executive for finance and accounting requirements, procedures, functions, and the performance of the duties identified in the directive.

2.2 Disbursing Policy

DFAS-ZPTA/IN is under the direction, authority, and control of the Director, SPR. This division:

2.2.1. Develops and promulgates standard DoD disbursing policy and cash management guidance;

2.2.2. Responds to all inquiries pertaining to disbursing policy and cash management within DoD;

2.2.3. Initiates, changes, and implements DoD disbursing policy and cash management guidance according to Treasury regulations;

2.2.4. Acts as the point of contact for all non-criminal investigating officers in relation to loss of funds investigations; and

2.2.5. Performs technical reviews of relief-of-liability cases for DoD Components and activities, including the quarterly minor loss reports.

2.3 DoD Disbursing Offices and Officers

DoD Component Heads, through command channels, ensure that DOs in their commands follow [this](#) volume. Commanders monitor disbursing operations, requiring DOs and Deputy DOs (DDOs) under their purview to adhere to Volume 5. DOs, in turn, direct disbursing operations accordingly (see Chapter 2, paragraph [2.1](#)).

2.4 COs, Departmental Accountable Officials (DAOs), and Payment Review Officials

Commanders ensure that [COs](#), DAOs, and payment review officials in their commands follow Chapter 5, section [3.5](#).

3.0 ACCOUNTABILITY AND RESPONSIBILITY

3.1 [Liability](#)

Accountable individuals have personal and pecuniary liability for their acts involving the expenditure and receipt of public funds (see Chapter 5, section [7.0](#) and Chapter 6, section [3.0](#)).

3.2 Knowledge of Laws Governing Disbursements

Accountable individuals whose duties pertain to the disbursement of public funds must be knowledgeable of and adhere to applicable laws.

3.3 Accountable Officials

Accountable individual, accountable official and accountable officer are used synonymously throughout Volume 5. The term “accountable official” is used in [31 U.S.C. § 3527](#) to refer to the class of officers or employees of an agency who are pecuniarily liable for repayment of losses or deficiencies of public money, vouchers, checks, securities, or records. Such officials are appointed using a [DD Form 577](#), Appointment/Termination Record - Authorized Signature. Only officers and employees of an agency are eligible for appointment as accountable officials (see Chapter 2, section [3.0](#)).

3.3.1. Disbursing Officials. These include DOs, DDOs, and subordinate disbursing agents, paying agents, cashiers, change fund custodians, collection agents, and imprest fund cashiers. Under [31 U.S.C. § 3321\(c\)\(2\)](#), the SecDef is required to designate personnel of the agency as disbursing officials to disburse public money available for expenditure by the agency (see Chapter 2, paragraph [1.1](#)).

3.3.2. COs. Under [31 U.S.C. § 3325\(a\)\(1\)](#), “a disbursing official in the executive branch of the United States Government shall disburse money only as provided by a voucher certified by the head of the executive agency concerned, or an officer or employee of the executive agency having written authorization from the head of the agency to certify vouchers.” Thus, a DoD agency cannot disburse a payment unless it is certified by a properly appointed CO. These statutory “COs” must be officers or employees of the Federal agency concerned, and are “accountable” because unless granted relief they are pecuniarily liable under [31 U.S.C. § 3528\(a\)](#) for any payments they erroneously certified. Appointment as a CO is a precondition to enforcement of pecuniary liability under [31 U.S.C. § 3528\(a\)](#) (see Chapter 5, paragraph 4.1).

3.3.3. DAOs

3.3.3.1. In certifying payments, DoD’s statutory COs often are required to rely on information and data provided by agency systems and by other personnel. For this reason, Congress authorized DoD to impose potential pecuniary liability to an additional class of agency officers and employees: those who are formally appointed as a DAO under [10 U.S.C. § 2773a](#). The SecDef may designate any DoD civilian employee or member of the U.S armed forces under the Secretary’s jurisdiction as a DAO. In the performance of their duties, DAOs are responsible for providing COs with information, data, or services that are directly relied upon by the CO in the certification of vouchers for payment. Title 10 U.S.C. § 2773a does not, however, statutorily mandate that the DoD organizations appoint DAOs to perform such activities; instead, appointment of DAOs to perform any particular function or class of functions is an option available to management for inclusion in management’s internal controls program (see paragraph 3.5).

3.3.3.2. When considering whether to require that only persons appointed as DAOs perform duties that generate the information, data, or services relied upon by COs, agency managers, and appointing authorities take into account considerations that include mission requirements and functions under their responsibility, the availability of resources, the sufficiency of other internal controls, and whether or not a governing policy or directive mandates performance of some function only by a properly appointed DAO (see Chapter 5, paragraph 3.5).

3.3.3.3. Foreign National Personnel. A foreign national employee is an individual who is employed by or performing work for U.S. forces outside the United States, its territories, and possessions in a system of employment established in accordance with the [DoDI 1400.25-V1231](#) or a predecessor authority. Under the direct hire arrangement, the legal employer of the foreign national assumes responsibility for all administrative and management functions related to foreign national employment. Under the indirect hire arrangement, the host government serves as the legal employer of U.S. forces’ foreign nationals. Although the host government is the official legal employer of the foreign national personnel, it grants operational control to U.S. forces for the day-to-day management of such personnel (see DoDI 1400.25-V1231).

3.3.3.3.1. In deciding whether to appoint foreign nationals in overseas areas as COs and DAOs, organizations should take into account whether enforcement of pecuniary liability of such individuals to the United States is precluded as a legal or practical matter by status of forces agreements, other international agreements, or local laws. If enforcement is not precluded by such agreements or local laws, foreign national direct hire employees are eligible for appointment both as COs and DAOs because the agency is the legal employer and such individuals qualify as officers or employees of the United States. If not constrained by such agreements or by local law, the DoD has the ability to enforce pecuniary liability against these employees because it has statutory authority to withhold amounts from their pay accounts.

3.3.3.3.2. Foreign national indirect hire employees cannot be appointed as COs or DAOs because the United States cannot enforce pecuniary liability by unilaterally setting off indebtedness against their pay accounts and because the agency is not the legal employer. However, this regulation does not prohibit organizations from assigning indirect hire employees to duties that DAOs otherwise would perform, nor does it mandate that organizations appoint DAOs to provide the information or data, or to perform services relied upon by COs to certify payment vouchers. Organizations operating in overseas areas may permit or assign foreign national indirect hire employees to perform such operational duties without appointing them as DAOs if adequate internal controls are in place to support voucher certification.

3.3.3.4. Contractors and Contractor Support Personnel. Do not appoint contractors and contractor support personnel as DAOs or COs.

3.4 Accountable Officials and Inherently Governmental Functions

The Federal Activities Inventory Reform (FAIR) Act of 1998 ([*Public Law 105-270*](#)), as implemented by the Office of Management and Budget (OMB) ([*31 U.S.C. § 501*](#)) provides that, "the making of value judgments in making decisions for the Federal Government, including judgments relating to monetary transactions and entitlements" is an inherently governmental function, i.e., "a function that is so intimately related to the public interest as to require performance by Federal Government employees." For further information regarding inherently governmental functions, see the [*OMB's Office of Federal Procurement Policy Letter 11-01*](#), Performance of Inherently Governmental and Critical Functions, which provides a single definition of an inherently governmental function built around the well-established statutory definition in the FAIR Act, as well as establishes criteria for identifying of critical functions and for ensuring sufficient levels of internal agency oversight and management of functions closely associated with inherently governmental functions.

3.5 Management Internal Controls

Management internal controls are specific policies, procedures, and/or activities an organization establishes and implements to manage risk. They are the methods by which an organization governs its activities to accomplish its mission, and are required by [OMB Circular A-123](#), Management's Responsibility for Internal Control, which implements [31 U.S.C. § 3512\(c\)\(1\)](#). Consistent with the guidelines in this paragraph, DOs implement these controls to eliminate opportunities to conceal errors or irregularities and assign work so that no one individual controls multiple phases of a transaction. Inspections and audits of disbursing offices must include a review of management internal controls to determine their adequacy, compliance, and effectiveness.

3.5.1. Standards of Internal Control. Management determines applicability of these standards at the operational level.

3.5.1.1. Control Environment. Management and employees establish and maintain an environment throughout the organization that sets a positive and supportive attitude toward internal control and conscientious management.

3.5.1.2. Risk Assessment. Provide for an assessment of the risks the organization faces from both external and internal sources.

3.5.1.3. Control Activities. Internal control activities ensure the implementation of management's directives, and should be effective and efficient in achieving an organization's control objectives.

3.5.1.4. Information and Communications. Record and communicate information to management and others within an organization that needs it, in a specific form and inside a time frame that enables them to carry out their internal control and other responsibilities.

3.5.1.5. Monitoring. Assess the quality of performance over time and ensure the findings of audits and other reviews are promptly resolved.

3.5.2. Separation of Duties. Separation of duties precludes errors or attempts at fraud or embezzlement from going undetected. Internal controls generally require a four-way separation of the contracting, receiving, voucher certification, and disbursing functions. Assign key duties such as certification of fund availability; contracting (obligating the Government); authorizing, approving, and recording transactions; issuing or receiving assets; certifying and making payments; preparing and signing checks; and reviewing or auditing payments to different individuals to minimize the risk of loss to the Government to the greatest extent possible.

3.5.2.1. Do not assign DOs duties that create potential conflicts of interest (see Chapter 2, paragraph 3.5).

3.5.2.2. Separation of duties is not always practical or possible due to time constraints, [work force](#) shortages, or the use of electronic systems. Commanders and DOs must be aware of situations where valid, long-standing separation of duties cannot be achieved, recognize that internal controls have been weakened as a result, and make every effort to mitigate the risks. For example, payments and collections through the Intra-governmental Payment and Collection system can occur outside the disbursing work center without weakening internal controls because the payee is always another Federal agency and recovery of an improper payment is assured, or financial systems which allow for adjustments to the data outside of the normal application include appropriate controls and audit trails for those adjustments. Other situations may require closer scrutiny. Report all situations of inability to separate appropriate responsibilities to the DO's commander, with a request for a waiver and recommendations to mitigate the risks.

3.5.3. Electronic and Digital Signatures

3.5.3.1. [Signatures](#). Personnel may use electronic and digital signatures to receive, accept, and certify financial documents processed through automated information systems.

3.5.3.2. Requirements. [15 U.S.C. § 7001](#) and [15 U.S.C. § 7021](#) require that either of these media used by a person to sign (e.g., certify) any type of financial document be:

3.5.3.2.1. Unique to that person;

3.5.3.2.2. Under that person's sole control or custody;

3.5.3.2.3. Linked to the data signed throughout their processing so that if any of the data are changed, the electronic or digital signature is invalidated; and

3.5.3.2.4. Capable of being verified by the paying DO.

3.5.3.3. Digital Signature. A digital signature is an electronic signature (see [DoDI 8520.02](#), Public Key Infrastructure (PKI) and Public Key Enabling). Digital signature technology encrypts data; detects changes to digitally signed documents; and enables "authentication" of digital messages, assuring the recipient of a digital message of both the identity of the sender and the integrity of the message.

3.5.3.3.1. Digital signatures and certificates authenticate identity, control access through authorized user levels and PKI certificates or passwords, and provide an encryption capability for information in transit or at rest.

3.5.3.3.2. Secure digital signatures cannot be rejected. Except in a case of a compromise of system security resulting in a forged electronic signature, the signer of a document cannot later deny the validity of the signature, claiming it was forged. The recipient of a digitally signed message has the capability to verify both the document's author and that the document was not altered either intentionally or accidentally after signature.

3.6 Prohibited Payments

Personnel involved in the payment certification and disbursement processes must preclude payments to ineligible recipients. Many tools to aid in this effort are available, among them the [*Specially Designated Nationals List*](#) maintained by Treasury's Office of Foreign Assets Control. This is a list of individuals and entities covered by Executive Order 13224, Blocking Property and Prohibiting Transactions with Persons Who Commit, Threaten to Commit, or Support Terrorism. Do not initiate, certify, or make payments or draw checks or warrants payable to individuals or organizations on this list (see also [*1 TFM 4A-2030*](#)).

4.0 PUNITIVE PROVISIONS

4.1 Misuse of Public Funds

[*Title 18 U.S.C. § 641*](#) governs crimes of embezzlement and theft. Individuals charged with safekeeping of public funds must handle those funds with utmost care. The loan, exchange for other funds, conversion of funds for one's own use or that of another, or deposit of public funds except as authorized by law, may subject the individual entrusted with the funds to criminal sanctions.

4.2 Conspiracy to Defraud the Government

Any person entering into an agreement or conspiracy to defraud the U.S. by obtaining or aiding in obtaining the payment or allowance of any false, fictitious, or fraudulent claim is subject to fine, imprisonment, or both as prescribed by [*18 U.S.C. § 286*](#).

CHAPTER 2

DISBURSING OFFICES, OFFICERS, AND AGENTS

1.0 GENERAL

1.1 Overview

Title 31, United States Code (U.S.C.), section 3321(c) (2) ([31 U.S.C. § 3321\(c\)\(2\)](#)) allows the Secretary of Defense to designate personnel of DoD as disbursing officials to disburse public money available for expenditure. In order to disburse money, an activity must send a request to establish a disbursing office. When establishing disbursing offices and associated appointments of accountable positions, DoD Components must be cognizant of internal control guidelines provided in Chapter 1, paragraph 3.5.

1.2 Purpose

This chapter addresses policy on DoD's establishment of a disbursing office. A disbursing office is considered necessary for the efficient functioning of an operating activity. This chapter also addresses the appointment of the Disbursing Officer (DO) and other agents appointed to receive and maintain the custody of public funds.

1.3 Authoritative Guidance

Official funds will be received and disbursed by order or on the authority of the commanding officer, except when directed by a superior in the chain of command or when sanctioned by the Comptroller General of the United States. Under [31 U.S.C. § 3325](#) DoD DOs are authorized to disburse public funds on receipt of vouchers properly certified.

2.0 POLICY

2.1 Request for Establishment of a Disbursing Office

2.1.1. An activity requesting to establish a disbursing office at a new activity, or an activity receiving disbursing services from an external source, sends a memorandum through its chain of command. Each level of command endorses the request to indicate concurrence and provides any additional information required by the approving official. The chain of command forwards the memorandum to the Defense Finance and Accounting Service, Indianapolis (DFAS-IN), ATTN: Enterprise Solutions and Standards, Disbursing (DFAS-IN/JJFKDC), 8899 East 56th Street, Indianapolis, IN 46249-0500. The request must include:

2.1.1.1. A statement justifying why an office is required and why the disbursing operation cannot be conducted by an existing disbursing activity;

2.1.1.2. Anticipated workload: number of military and civilian personnel to be supported, and commercial vendor services vouchers to be settled;

2.1.1.3. Proposed date of establishment;

2.1.1.4. Name and location of the nearest Federal Reserve Bank (FRB) or branch, and its distance from the proposed disbursing office. If there is no FRB or branch within a reasonable distance, include the name and location of the nearest designated depository, if any, and its distance from the proposed office;

2.1.1.5. An estimation of U.S. Department of the Treasury (Treasury) checks needed for the first year of operation (see Chapter 7, [paragraph 3.1](#));

2.1.1.6. Name, social security number, and rank or grade of the proposed DO, if known;

2.1.1.7. An estimation of monthly cash requirements (see Chapter 3, [paragraph 2.3](#)); and

2.1.1.8. Information on plans to implement an automated disbursing system.

2.1.2. The memorandum also addresses the appointment of the DO and agents to regularly receive and maintain custody of public funds. The DO may appoint any officer, enlisted member, or civilian employee [they](#) consider satisfactory as an agent.

2.2 Disbursing Station Symbol Number (DSSN)

2.2.1. DSSN. The DFAS-IN/JJFKDC obtains the DSSN from the Treasury's Bureau of Fiscal Service (Fiscal Service). DSSNs are permanent, and are either open or closed. Open DSSNs are open for an indefinite period. Some open DSSNs may be inactive, and may be either:

2.2.1.1. Contingency, available for use in a military contingency operation;

2.2.1.2. Temporarily deactivated for a specific reason, (e.g., a ship undergoing extensive overhaul for a period of several months may arrange for disbursing service from a shore-based disbursing office or activity); or

2.2.1.3. In settlement pending closure (see section 10.0).

2.2.2. Change in Designation or Location. Coordinate proposed changes in the designation or location (mailing address) of an operating DSSN, to include tactical deployment, with DFAS-IN/JJFKDC, who will advise Fiscal Service.

2.2.3. Use of DSSN. The DSSN must appear on all payments, collection vouchers, and Treasury and limited depository account (LDA) checks processed by the disbursing activity.

2.3 Employer Identification Number (EIN)

The DO, who disburses taxable funds, should ensure payments received by entitlements' activities have secured an EIN to report taxable income or income and withholdings.

2.4 Reporting Activation of a Disbursing Office

The DO activating a disbursing office notifies Fiscal Service, Check Reconciliation Branch, through DFAS-IN/JJFKDC by memorandum immediately upon commencement of disbursing operations. Include in the memorandum: the name of the disbursing activity, DSSN assigned, DO's name, rank or grade, the opening date of the account, and the first and last serial number of all blank Treasury checks on hand in each check range. Send a copy of the memorandum to the supporting DFAS site.

3.0 APPOINTING DOs, DEPUTY DOs (DDOs), AND OTHER ACCOUNTABLE OFFICIALS

3.1 Persons Authorized to Have Custody of Public Funds

To ensure proper security and accounting for public funds, assign responsibility to a limited number of authorized persons to receive, maintain custody, and disburse or otherwise dispose of public funds.

3.2 Accountable Officials

Accountable Officials are officers or employees of an agency who are or who may be found to be pecuniarily liable for repayment of losses or deficiencies of public money, vouchers, checks, securities, or records (see Chapter 1, section 3.0).

3.3 Appointments

Use the DoD [\(DD\) Form 577](#), Appointment/Termination Record-Authorized Signature, to appoint accountable officials. This form does not allow multiple appointments simultaneously. It is the only document required to support this type of appointment. Send a copy of the DD 577 and the required original specimen signature as specified in subparagraph 4.4.1 to DFAS-IN/JJFKDC to be maintained in the DO's files.

3.4 Exceptions

3.4.1. An individual who occasionally receives public funds does not need to be appointed formally as an accountable official. Funds may be received at times, at locations, and under circumstances that preclude any advance arrangement for their receipt. At some activities, collections are so infrequent that it is impractical to have a formal designation in effect. Funds received by persons other than those formally designated must promptly send funds received to their servicing disbursing office or to another person formally designated to receive them.

3.4.2. The DO at DFAS sites may hold [appointments to](#) more than one DSSN, and may serve concurrently as a DDO to other DFAS DOs. Each DDO appointed by a DFAS DO may serve under one or more of the DSSNs assigned to the appointing DO and may also serve more than one DFAS DO concurrently. DOs and DDOs at DFAS sites holding multiple DSSN appointments complete a separate DD 577 for each applicable DSSN.

3.4.3. The DO and DDOs aboard Navy vessels may serve concurrently in other accountable positions, (e.g., ship's stores officer, food service officer) when the ship's manpower authorization does not provide Supply Corps officers for each accountable function (see Chapter 1, subparagraph 3.5.2).

3.4.4. When directed by appropriate authority, DOs, DDOs, and their agents may accept, safeguard, account [for](#), and dispose of personal funds and valuables received for safekeeping. Where personnel resources are limited, persons serving as DOs or other accountable officials may also serve as safekeeping custodians at the commander's discretion (see Chapter 16, paragraph 1.1).

3.5 Restrictions

Except as specifically authorized, do not assign DOs additional duties of order approving authority, certifying officer, custodian of any fund, or other conflict-of-interest assignment.

3.6 Terminations

Terminate appointments using Section IV of the appointing DD 577.

4.0 DOs

4.1 Eligibility

To be eligible for appointment as a DO, an individual must be a U.S. citizen and have previous experience as a DO or have completed (or agreed to complete) specific DO training as defined by the appointing authority.

4.2 Appointment

The commander, director, or other equivalent appoints a DO using a DD 577 (see paragraph 3.3).

4.3 Terminations

Terminate appointments using Section IV of the appointing DD 577.

4.4 Submission of DD 577 and Fiscal Service (FS) Form 3023, Specimen Signatures

4.4.1. Official Signature. Before commencing disbursing operations, a DO and all appointed DDOs determine which of their given names and/or initials will comprise their official signatures, and use them on all checks, vouchers, correspondence, and official documents pertaining to the DoD, Government Accountability Office (GAO), and Treasury. Send [the](#) DD 577 and FS 3023 to DFAS-IN/JJFKDC, having used permanent dark blue, blue-black, or black fade-resistant ink that is not readily soluble in water.

4.4.2. Official Signatures to Other Depositories. If checks will be drawn on a depository other than the Treasury, send the DO's official signature (as well as those of DDOs authorized to sign depository checks) to the depository. An officer whose signature is known to the depository must certify the forms.

4.4.3. Change of Official Signature. A DO or DDO may change [their](#) official signature by submitting a new FS 3023 to DFAS-IN/JJFKDC.

4.4.4. Furnishing Additional Signatures When Transferred to a New Station. The DFAS-IN/JJFKDC files specimen signatures under each DSSN used and furnishes them to different banks upon request for use in cashing and processing checks, and may request that a DO or DDO furnish an additional FS 3023. Since an individual's signature may change over time, DFAS-IN/JJFKDC may request additional signatures if needed.

4.5 Commencement of Disbursing Duty

Immediately upon commencement of disbursing duties, a DO activating a new disbursing office, reactivating a disbursing office, or relieving another DO, prepares a memorandum that includes: name of the disbursing activity; DSSN assigned; DO's name, rank or grade; opening date of the account; and the beginning and ending serial numbers of all blank Treasury checks on hand in each check range. If applicable, also include the relieved DO's name and rank or grade. Keep the original memorandum in the disbursing office and sends copies to DFAS-IN/JJFKDC and the supporting DFAS site.

4.6 Transfer of Disbursing Duty

4.6.1. Joint Actions by the Outgoing and Incoming DOs. The outgoing and incoming DOs establish the date to transfer accountability, subject to command approval. Since accountability is reported daily by a full Central Accounting Reporting System ([CARS](#)) daily reporter, a transfer of disbursing duty is not required to occur on the last day of the month, as required for CARS non-daily reporters. In a daily reporting environment, the Standard Form [\(SF\) 1219](#), Statement of Accountability, is no longer required to be submitted to the Treasury (see Chapter 15, section 6.0). When the transfer occurs, the outgoing and incoming DOs:

4.6.1.1. Verify cash on hand;

4.6.1.2. Verify all documents that support the SF 1219, as assets;

4.6.1.3. Verify and prepare a letter of transfer for all blank Treasury checks. Both DOs sign the letter. The incoming DO reports all checks issued by the outgoing DO that were not reported to the Treasury before the transfer of accountability. The incoming DO also resubmits any rejected entries. Include the numbers of the blank checks the incoming DO receives in the commencement of disbursing duties memorandum. The first check in the series must be the next sequential number after the last check listed on the outgoing DO's last check issue report. The last check receipted should be the same as the last check number previously ordered and received by the outgoing DO. Research any checks missing or out of sequence and void them if necessary;

4.6.1.4. Verify stored value card stock (see Chapter 10, subparagraph 2.12.1);

4.6.1.5. Verify postal money orders on hand;

4.6.1.6. Verify safekeeping deposits (see Chapter 16, paragraph 4.2);

4.6.1.7. Prepare a memorandum of relief for submission to the commander if required by local regulations;

4.6.1.8. Verify and transfer all documentation supporting balances in clearing accounts **F3880 (Unavailable Check Cancellations and Overpayments (Suspense)), **F3875 (Budget Clearing Account (Suspense)), and **F3885 (Undistributed Intra-governmental Payments). The Treasury Financial Manual (TFM), Volume 1, Part 4, Chapter 7000 ([*ITFM 4-7000*](#)) and [*ITFM 2-1500*](#), require these accounts be cleared to proper appropriations or funds as expeditiously as possible. To clear account **F3880, the outgoing DO presents a detailed list of individual subsidiary transactions, supporting documentation, and current status. Documented evidence includes certification that the DO or designated DDO personally reviewed the balances in the account within the last month (see Chapter 7, subparagraph 11.9.5); and

4.6.1.9. Validate unreconciled differences (e.g., check issue and deposit discrepancies, Intra-governmental Payment and Collection system differences). In addition, ensure that the outgoing DO's accountability, the balance amount on the [*DD 2657*](#), Daily Statement of Accountability, is reconciled with the DO Cash Treasury Account Symbol (TAS) on the daily CARS Account Statement. If the outgoing DO cannot provide documentation supporting the unreconciled items, they process the discrepancies as losses (see Chapter 6, section 4.0) or overages (see Chapter 6, section 8.0) of funds.

4.6.2. Actions by Outgoing DO. Upon relief from disbursing duty:

4.6.2.1. Terminate all DDO, agent, and cashier appointments and clear all related [*DD 1081\(s\)*](#), Statement of Agent Officer's Account;

4.6.2.2. Transfer all cash, negotiable instruments, money accounts, books, property, vouchers, and other retained records to the incoming DO;

4.6.2.3. Prepare and submit a final SF 1219. The incoming DO signs and marks it as "FINAL";

4.6.2.4. Prepare and submit a final SF 1179, Month End Check Issue Summary. The incoming DO signs and marks it as "FINAL";

4.6.2.5. Send a copy of the incoming DO's commencement of disbursing duty memorandum, including copies of all the letters of transfer of total accountability with the final SF 1219 to the DFAS site where financial reports are submitted;

4.6.2.6. Prepare and send a memorandum to the supporting DFAS site and DFAS-IN/JJFKDC advising of the date and check number of the last check issued;

4.6.2.7. Verify the destruction of signature plates or digitized signature medium being withdrawn from service (not to be used again). Follow the guidance in Chapter 7, subparagraph 5.2.6. When the medium has been destroyed, send a copy of the certificate of destruction to DFAS-IN/JJFKDC; and

4.6.2.8. Transfer custody of the check-signing machine to the incoming DO, if applicable.

4.6.3. Actions by the Incoming DO. The incoming DO ensures that all actions listed in this section are accomplished, documented, and verified before signing for the accountability. The actions listed are to be taken by an incoming DO before reporting to the new disbursing office or activity.

4.6.3.1. Upon commencement to disbursing duty:

4.6.3.1.1. Send the FS 3023 and memorandum to DFAS-IN/JJFKDC and the DFAS site that receives the DO's financial reports. If signatures have been furnished previously as a DO or DDO, submission of the FS 3023 is not required unless specifically requested or a change of official signature is desired. If the outgoing DO has an LDA with check stock, send specimen signatures to the LDA;

4.6.3.1.2. Contact the disbursing office or activity to determine if a check-signing machine is in use. Obtain all necessary information about the machine (make, model and number of media required);

4.6.3.1.2.1. If the incoming DO has never had a signature medium, provide three official signature specimens in addition to those required by paragraph 4.4, and request the required medium be ordered and received before the actual transfer date.

4.6.3.1.2.2. If a signature medium cannot be received or obtained before the actual date of transfer, the incoming DO may request DFAS-IN/JJFKDC to authorize the use of the outgoing DO's until a new one arrives, to allow continued efficient operations of the disbursing office. The incoming DO is accountable and pecuniarily liable for payments made on or after the date of the transfer of accountability.

4.6.3.1.3. Appoint at least one DDO and send the DD 577 and FS 3023 to DFAS-IN/JJFKDC. Appoint agents, cashiers, and other accountable officials as necessary;

4.6.3.1.4. Verify the adequacy of the safekeeping facilities for funds, blank checks, stored value cards, and other accountable documents. If the facilities are inadequate, report the deficiencies to the commander and request that proper facilities be provided (see Chapter 3, section 3.0);

4.6.3.1.5. Change all safe combinations;

4.6.3.1.6. Review cash on hand requirements. If the current cash holding authority is valid, the incoming DO may retain it until the normal resubmission date. Otherwise, the incoming DO submits a new cash holding authority request as soon as possible after assuming the account (see Chapter 3, paragraph 2.3); and

4.6.3.1.7. Notify all serviced activities, agencies, commercial concerns, and necessary stakeholders of the account holder change.

5.0 DDOs

5.1 Eligibility

An officer, enlisted member, or civilian employee acceptable to the DO and who is a U.S. citizen may be appointed as a DDO.

5.2 Appointment

DOs appoint their DDOs using the DD 577 (see paragraph 3.3).

5.3 Terminations

A DO may terminate a DDO's appointment at any time by completing Section IV of the appointing DD 577. When a DO is relieved from disbursing duties, they revoke the appointments of all DDOs. In all cases, send a copy of the DD 577 to DFAS-IN/JJFKDC. If another individual will succeed a DDO, send a copy of the appointing DD 577 and FS 3023 for the new DDO, with the copy of the notice of revocation to DFAS-IN/JJFKDC. If a DDO appointment is terminated for cause, include the reason for termination when sending the appropriate DD 577 to DFAS-IN/JJFKDC.

6.0 CHANGE IN THE STATUS OF DOs OR DDOs

6.1 Authorized Absence of DOs and DDOs

During an authorized absence, the DO remains accountable for the account unless or until it is officially transferred. Accountability does not need to be transferred unless, in the DO's judgment, not doing so would impair proper supervision. The DO must maintain an adequate system of controls to avoid errors and ensure the implementation and effectiveness of those controls. For relief of liability to be considered, the DO must show clearly what the procedures were and how they were implemented during the absence (e.g., records must show that any loss incurred was not the result of bad faith or lack of reasonable care).

6.2 Death, Disability, or Removal of a DO

6.2.1. Death, Disability, or Removal of a DO. When a DO dies, becomes disabled, or is removed from disbursing duty for cause (including unauthorized absence), a DDO under [10 U.S.C. § 2773](#), may continue to disburse under the accounts of the DO through the last day of the second month after the month of death, disability, or removal. If there is more than one DDO, the commander, DFAS Director, or designee, as appropriate, designates one DDO to disburse in the DO's name.

6.2.2. Responsibility of the Commander or DFAS Director. The commander, DFAS Director, or designee:

6.2.2.1. Seizes and seals all disbursing spaces, keys, property, and safe(s) to ensure the security of the funds, property, and spaces involved;

6.2.2.2. Appoints a board of at least three disinterested but qualified persons to inventory the vouchers, funds, and property on hand (see subparagraph 6.2.3);

6.2.2.3. Appoints based on the disbursing needs of the activity:

6.2.2.3.1. A custodian of the disbursing office's vouchers, funds, and property (see subparagraph 6.2.4); or

6.2.2.3.2. A qualified person (normally a DDO) to take charge of the DO's vouchers, funds, and property involved and perform as acting DO until regular relief reports (or is appointed), or until the last day of the second month following the date of death, disability, or removal (see subparagraph 6.2.5); and

6.2.2.4. Notifies the supporting DFAS site of all actions taken and provides an information copy to DFAS-IN/JJFKDC.

6.2.3. Responsibility of the Inventory Board. The appointed board, as prescribed in subparagraph 6.2.2.2, inventories all public funds, including advances to deputies, agents and cashiers; vouchers evidencing receipt, transfer, or disbursement of funds; safekeeping deposits; stored value cards, if applicable; and property of the DO in the presence of the immediate custodians and the appointed custodian, acting DO, or incoming DO. In addition, the appointed board must verify the departed DO's accountability balance on the DD 2657 is reconciled with the DO Cash TAS on the daily CARS Account Statement. If there is no documentation supporting the unreconciled items, the incoming DO processes the discrepancies as losses (Chapter 6, section 4.0) or overages (Chapter 6, section 8.0) of funds.

6.2.3.1. The board verifies all official records to determine that the cash on hand agrees with the records, verifies that all checks and stored value cards issued in the current accounting period have been properly accounted for, and inventories blank checks to determine if any are missing.

6.2.3.2. If the board discovers a shortage or deficiency, the commander takes the actions prescribed for losses of funds or deficiencies in the DO's account as prescribed in Chapter 6, section 4.0.

6.2.3.3. All members of the board prepare and certify an original and four copies of the inventory as true and accurate. The board turns over all public funds and property certified on the inventory to the appointed custodian, acting DO, or incoming DO. The incoming DO retains a copy of the inventory report, provides the original to the commander, and a certified/notarized copy to each member of the board.

6.2.4. Responsibility of the Custodian. The custodian, on receipt of the original inventory, assumes custody of the public funds, and property held by the former DO. No transactions other than collections may be conducted. When the disabled DO returns, or a new, permanent DO reports, the custodian and the DO inventory and transfer all vouchers, funds, and property as prescribed in the relief procedures.

6.2.5. Responsibility of the Acting DO

6.2.5.1. The DDO appointed to serve as the acting DO performs and is accountable for all official duties that would have been required of the DO, to include submitting financial reports for the DO as of the date of death, disability, or unauthorized absence. Include only those vouchers actually paid by the former DO in the reports. The DDO submits the reports in the name of the former DO.

6.2.5.2. Include in the reports: information on the date of death, disability, or unauthorized absence; and the fact that transactions included were made by the former DO. Include vouchers for which checks have been drawn but not delivered in the first reports covering transactions made by the DDO. Submit subsequent financial reports at the normally prescribed times in the name of the former DO, signed by the DDO, and include only transactions made by the DDO under authority of subparagraph 6.2.5.1. Do not merge the financial reports of transactions performed by an acting DO with those of the officer for whom **they were** appointed, or with those submitted by the regular relief after the disbursing duties are assumed.

6.2.5.3. The DDO signs all checks drawn in the manner normally used when the DDO signs checks. If the volume of checks warrants, the acting DO may use the former DO's signature plates. The acting DO is accountable and pecuniarily liable for all payments and official acts subsequent to the death, disability, or unauthorized absence of the DO.

6.2.6. Responsibility of the Incoming DO. If the commander appoints an individual as DO to relieve the deceased, disabled, or removed DO, the incoming DO is responsible for performing all actions required in subparagraph 6.2.3, and for rendering financial reports in his or her own name.

6.2.7. Administration of the Accounts of a Deceased, Disabled, or Removed DO. The commander should strive to protect the rights of a deceased, disabled, or removed DO, as well as the custodian, acting DO, or incoming DO so that, for any differences discovered during settlement of the accounts, responsibility may be assigned to the appropriate individual. The acting or incoming DO completes the vouchers, closes the accounts, maintains custody of records, and renders the final reports of the outgoing DO. Further, the individual signs documents prepared in connection with the administration and settlement of the accounts of the outgoing DO as follows:

(Name of Disbursing Officer)

By _____
Acting (appointed per 10 U.S.C. § 2773)

The commander of an exonerated DO restored to duty, following arrest, suspension, or other disability, directs a second inventory to be taken by the restored DO and the custodian, acting DO, or incoming DO. The guidance in subparagraph 4.6.1 regarding the transfer of accountability from an outgoing to an incoming DO applies.

6.2.8. DDO at Branch Disbursing Office. Upon the death, disability, unauthorized absence, arrest, or other emergency absence of a DDO at a branch disbursing office, the local commander advises the DO as expeditiously as possible. Depending upon the circumstances, the DO requests the local commander to appoint a board to inventory the accountability and property of the DDO and appoint a suitable person to take custody of the accountability and property until the DO can take an inventory. If practical, the DO takes an inventory of the accountability and property in the presence of a competent witness.

7.0 OTHER AGENTS OF DOs

7.1 Agents

Officers, enlisted members, or civilian employees satisfactory to both the appointing officer and DO may be appointed as agents, (e.g., disbursing agents (DA), cashiers, paying agents (PA), collection agents, change fund custodians, imprest fund cashiers). No agent may be appointed or used over protest of the accountable DO, serve concurrently in any other accountable position, or be charged with the handling or custody of any other funds (see paragraph 3.5).

7.1.1. DOs' agents are pecuniarily liable under accountable official laws for losses of public funds in their possession. When appointing agents, appointing authorities should carefully consider appointing non-U.S. citizens as accountable officials. In some instances, foreign nationals and other non-U.S. citizens may be precluded from being held pecuniarily liable for losses of funds (see Chapter 1, subparagraph 3.3.3.3).

7.1.2. From a security standpoint, do not allow an excessive number of individuals access to public funds.

7.1.3. After an individual ceases to serve in an appointed position, the DO maintains appointing documents for a retention period following the guidance in Chapter 15, section 8.0. Appointments as agents of DOs are effective only while the DO continues to serve as DO of that disbursing activity.

7.1.4. The appointing officer terminates appointments when appropriate (e.g., when the DO is relieved, when the agent ceases to perform the duties for which appointed, or for cause (see subparagraph 4.6.2.1), using Section IV of the original appointing DD 577.

7.2 Disbursing Agents

7.2.1. Duties and Responsibilities. A DA is a DO's agent who is not a DDO. A DA's responsibilities can include all duties, assignments, and functions of a DDO except the authority to sign Treasury checks.

7.2.2. Establishing Positions. The appropriate major command or Defense Agency establishes DA positions in writing.

7.2.3. Appointments. The DO appoints DAs following paragraph 3.3, which includes the appointee's acknowledgement. The DO sends the original copy to the DA, a copy to the office where the duties are performed, and retains a copy on file.

7.3 Cashiers

7.3.1. Selection Criteria. An officer, enlisted member, or a civilian employee with working knowledge of the cash functions and operations, and acceptable to the DO, may be appointed as a cashier. The DO should also obtain a credit report, if access to a credit reporting service is available, charging the associated costs to the Operations and Maintenance funds available to the activity. Safeguard credit reports against unauthorized access.

7.3.2. Duties and Responsibilities. Cashiers disburse, collect, and account for cash; and perform other duties as required concerning the receipt, custody, safeguarding, and preparation of checks. A cashier may prepare DO accountability reports, but the DO, DDO, or DA must personally validate them.

7.3.3. Appointments. The DO appoints cashiers following paragraph 3.3, which includes the appointee's acknowledgement. The DO sends the original copy to the cashier, a copy to the office where the duties are performed, and retains a copy on file.

7.3.4. Restrictions. A cashier may not:

7.3.4.1. Sign checks;

7.3.4.2. Accept checks drawn (and endorsed to the cashier) in the name of the DO, DDO, or DA to procure and disburse cash for any purpose;

7.3.4.3. Prepare billing documents and accept collections for the same items. This restriction also applies to a DA performing cashier duties;

7.3.4.4. Prepare vouchers that they will later pay; and

7.3.4.5. Prepare vouchers on days when they perform cashier functions.

7.4 PA

7.4.1. Appointments. Commanders appoint PAs only when adequate payment, check cashing, or currency conversion services are not otherwise available (see paragraph 3.3). Appointments are for a specific transaction or time period. Do not appoint PAs solely as a convenience when a DO, DDO, DA, or cashier can make the required transactions. In unusual situations (e.g., payments or currency conversions must be made at remote locations where use of checks is not feasible), the DO may request a remote location commander appoint a PA to make the necessary payments for and in the name of the DO from cash advanced for that purpose.

7.4.2. Restrictions. PAs may not act as certifying officers (see Chapter 5, section 3.4) or purchasing officers. Escort officers serving as PAs for expenses related to official travel may likewise not be purchasing officers. See Chapter 1, subparagraph 3.5.2 for guidance on separation of duties and Chapter 5, subparagraph 3.1.2 for guidance applicable to micro-purchases in contingency operations.

7.5 Collection Agents

7.5.1. Establishing Positions. Commanders may establish collection agent positions to receive funds derived from functions such as hospitalization fees and other charges at medical facilities (e.g., communication charges, rentals and other charges at housing developments, fees for research or reproduction of records, safekeeping deposits where the safekeeping function is not performed by the DO, and similar functions when appropriate).

7.5.2. Appointments. The commander appoints collection agents following paragraph 3.3. Unless revoked by the appointing authority, collection agent appointments remain in effect through succeeding appointing authorities.

7.6 Change Fund Custodians

7.6.1. Duties and Responsibilities. A change fund custodian receives a change fund from the parent DO, safeguards it, is pecuniarily liable for any loss, and makes change for sales transactions. The commander provides a detailed description of duties to be performed.

7.6.2. Establishing Positions. The sales activity commander (e.g., commissary, hospital) establishes the position.

7.6.3. Appointments. The activity commander or designee appoints a change fund custodian following paragraph 3.3 in coordination with the parent DO.

7.7 Imprest Fund Cashiers

The activity commander appoints an imprest fund cashier following paragraph 3.3 to make authorized cash payments for materials and non-personal services, maintain custody of funds, and file periodic vouchers to account for and replenish the imprest fund. An imprest fund cashier may be an officer, enlisted person, or civilian employee who is not responsible for originating, approving, or processing imprest fund requirements. An imprest fund cashier (or alternate) may not have access to or control of more than one fund. The commander keeps the appointing document and approval for establishment of the imprest fund in a permanent file, and furnishes two copies of these documents to the cashier and one copy each to the DO and installation or activity contracting office (see section 9.0).

7.8 Alternate Agents

7.8.1. Agents. When required, one or more alternate agents may be designated to serve only during the absence of an appointed primary agent. Alternate agents for DDOs are not permitted. The official authorized to appoint the primary agent also appoints alternates following paragraph 3.3. When serving in place of the primary agent, the alternate agent is subject to all regulations applicable to the primary. Alternate agents may not merge funds received with those of the primary agent, and must also maintain separate records from those of the primary agent to establish the amount for which each is responsible. Alternate agents may not conduct operations involving the handling of public funds concurrently with the primary.

7.8.2. Alternate Imprest Fund Cashier. Under paragraph 3.3, a commander may appoint an alternate imprest fund cashier to provide service during a principal's absence. Appointment requirements for principal cashiers apply to alternate cashiers. Upon return of the principal, the alternate returns paid receipts, subvouchers, and residual cash to the DO.

7.8.2.1. Planned Absences. In planned absences of the principal cashier and with the appointing official's written authorization, the principal may advance cash to the alternate in any amount up to the limit of the fund, using a DD 1081 for the advance.

7.8.2.2. Unforeseen Absence. In the unforeseen absence of the principal cashier, the DO may advance funds to the alternate in the normal manner; these funds are in addition to the amount advanced to the principal under the established fund, but may not exceed the authorized amount of the fund.

7.9 Death, Disability, or Unauthorized Absence of Agents

In the event of the death, disability, or unauthorized absence of an agent, the appropriate commander follows paragraph 6.2 for deputies at branch offices, but appoints relieving agents following procedures applicable to the position involved. In the case of an imprest fund cashier, the relieving imprest fund cashier prepares the final voucher.

8.0 DEACTIVATING OR CLOSING A DSSN

8.1 Deactivation

8.1.1. DSSN Temporary Closure. To eliminate the necessity of submitting monthly financial and checking account reports during the period of inactivity, the DO deposits all currency, coin, and negotiable instruments; closes the LDA and, if applicable, properly disposes of all undeliverable checks; submits the memorandum required for closure of disbursing offices with additional information that the account is closed temporarily; and retains blank Treasury check stock for use when the disbursing operation is reactivated (see Chapter 7, section 3.7 for inventory and storage requirements). A DO preparing an office for closure ensures that the DO's accountability balance on the DD 2657 and the DO Cash TAS in CARS are reconciled (Agency Location Code settlement). The DO may reopen that same DSSN at any time by submitting the report of commencement of disbursing operations. Note: A DO may not close a DSSN temporarily if any cash or documents representing cash are on hand. Any assets on hand, including deficiencies such as dishonored checks or losses of funds, require monthly submission of an SF 1219.

8.1.2. Designation of a Settlement Office. The supporting DFAS site designates another disbursing office as the settlement office to handle uncleared transactions for the closed office.

8.1.3. Notification of Deactivation Pending Closure. The DO will:

8.1.3.1. Notify all affected activities, agencies, commercial concerns (including LDAs when applicable), and individuals of the disbursing office deactivation date and the name and location of the settlement office to which all accounts will be transferred;

8.1.3.2. Notify Fiscal Service by memorandum through DFAS-IN/JJFKDC that the disbursing office is being deactivated pending closure. Include the DSSN, date of deactivation, the office to which the accounts and records have been/will be forwarded for settlement, and the last check number of each check range issued by the DSSN. Also, include the date and check number of the last check signed in each check range by each DDO where separate check series are assigned to DDOs at branch offices. Send a copy of the memorandum to the supporting DFAS site. Once a disbursing office is reported to Fiscal Service as being in a settlement status, it may not be reopened or transferred to another location without Fiscal Service approval. Once the settlement office has met all requirements in section 8.0, pertaining to closing the disbursing office, Treasury will close the DSSN permanently;

8.1.3.3. Notify commanders and request termination of appointment for all agents they appointed;

8.1.3.4. Issue terminations of appointments to all DDOs, agents, and cashiers (see paragraph 3.6);

8.1.3.5. Notify commanders and request termination of the DO's and agents' authorities to hold cash at personal risk; and

8.1.3.6. Clear all outstanding agent advances (e.g., imprest fund cashier and change fund custodians).

8.2 Deposits

Deposit all currency, coin, negotiable instruments, and LDA balances to the credit of the Treasury (see Chapter 11, section 8.0).

8.3 Deposits Fund Account Balances

Transfer deposit fund account balances that could not be cleared to the designated settlement office. Send a detailed list of the persons owed or funds to be reimbursed with any documents or backup information with the SF 1081, Voucher and Schedule of Withdrawals and Credits, to the settlement office. The SF 1081 is the basis for adjusting the general ledger for the amounts transferred.

8.4 Undeliverable Checks

Cancel all undeliverable checks and return checks forwarded by other DOs as undeliverable to the forwarding DOs for cancellation (see Chapter 7, paragraph 10.3).

8.5 Blank Treasury Check Stock

Dispose of remaining blank check stock in accordance with Chapter 7. Report destroyed checks on the SF 1179 as “voids” (zero-dollar value issues).

8.6 Stored Value Cards

Stored Value Card stock must be treated like blank check stock (see paragraph 8.5).

8.7 SF 1219

Prepare and submit an SF 1219 (marked “FINAL”) covering the period from the first day of the accounting period through the close of the last business day (see Chapter 15, section 6.0).

8.8 SF 1179

Prepare and submit an SF 1179 (marked “FINAL”) covering the period from the first day of the accounting period through the close of the last business day. Include all checks issued during the period as well as the blank check stock destroyed and reported as “voids”.

8.9 Equipment

Notify the supporting DFAS site of the availability of useable office equipment. The supporting DFAS site advises other DOs of the equipment available and facilitates transfers between disbursing offices, if requested. If no other disbursing office needs the equipment, the DO turns over the equipment to the supporting property disposal office. See Chapter 7, subparagraph 5.2.6 for disposition of signature media.

8.10 Discrepancies

A DO preparing an office for closure ensures that no discrepancies exist in their accountability. The supporting DFAS site reviews all accounts transferred to settlement offices and may order collection action against a relieved DO who submits a disbursing account to a settlement office with unresolved deficiencies in the accountability (e.g., dishonored personal checks, unconfirmed deposits, check issue records and reports, physical losses of funds, and unresolved open debit items in **F3875, **F3880, and **F3885 clearing accounts).

8.11 Closure

Only the Treasury may close a DSSN. Follow the policies within section 8.0 to pursue closing a disbursing office permanently. Once a disbursing office has been closed, it may be used only for settlement purposes. If the disbursing office is to be reopened, the DO must request and receive approval for reactivation from the Fiscal Service through DFAS-IN/JJFKDC. The Fiscal Service also must approve a new check range.

9.0 IMPREST FUNDS

9.1 Overview

Imprest funds are generally not authorized for DoD activities. Exceptions are allowed for contingency and classified operations. Submit specific requests for exception in accordance with Chapter 1, paragraph 1.3. Include adequate justification and demonstrate that the use of a government purchase card, third party draft, purchase card convenience check, government travel card, or other reasonable alternatives are not feasible for the specific situation. Agencies granted the authority to disburse imprest funds must classify imprest fund transactions using established and appropriate TAS/Business Event Type Code ([TAS/BETC](#)). DOs advancing or receiving funds from an imprest fund cashier will treat the transactions similar to advancing other accountable agents. The [Shared Accounting Module](#) website provides [Enterprise Reference Data](#) for the TAS/BETCs. In lieu of imprest funds, use the government purchase card for micro-purchases of supplies and/or services and the government travel card for travel payments formerly made from the imprest funds. If an imprest fund is authorized, the DO and the imprest fund cashier keep a copy of the signed authorization to establish and maintain the fund. Detailed regulations concerning establishing, using, and accounting for imprest funds, including the responsibilities of designated imprest fund cashiers and alternates are in:

9.1.1. [I TFM 4A-30165](#);

9.1.2. GAO Policy and Procedures Manual for Guidance of Federal Agencies, [Title 7, Fiscal Guidance, Chapter 6](#); and

9.1.3. The Federal Acquisition Regulation Part 13, [subpart 13.305](#).

9.2 Safeguarding Imprest Funds

Safeguard cash and disbursement documents at all times (e.g., safes, locked cash drawers) as prescribed in Chapter 3, section 3.0. The imprest fund cashier should maintain an organizationally and physically convenient location on the installation or activity to make payments to vendors or carriers. Do not commingle imprest funds with other cash funds (e.g., disbursing funds, change funds, or cash receipts for other funds). The imprest fund cashiers must be able to account for the full amount of funds being held at any given time. The responsible imprest fund cashier is accountable to the advancing DO for receipts or subvouchers supporting temporarily unreimbursed expenditures from any imprest fund, together with the cash on hand, in support of the total amount of the fund, and is subject to review by the DO at any time.

10.0 SETTLEMENT OF DO ACCOUNTS

10.1 Overview

The responsibility to clear outstanding items in the accounts of a DO relieved from disbursing duty is normally assigned to a designated settlement office (see subparagraph 8.1.2). The DO of the designated settlement office (referred to as the settlement officer), follows this guidance to resolve discrepancies in a relieved DO's accountability. All correspondence and vouchers initiated by the settlement officer should show the name and DSSN of the accountable officer, date and number of the voucher or account, and be signed "By (name of settlement officer), Settlement Officer for (name and DSSN of accountable officer)."

Normally, the settlement officer is also responsible for other residual disbursing functions, (e.g., issuance of stop payment requests, required records research pursuant to claims against the government, and clearing of all suspense accounts).

10.1.1. Deficiencies. In all instances, the relieved DO is responsible for resolving deficiencies before relief, if possible. If a deficiency exists in the account of a relieved DO and it appears that no action was taken to remove it from the accountability and no relief request is pending, the settlement officer should initiate collection action against the accountable DO.

10.1.2. Non-tactical Disbursing Stations. At non-tactical disbursing stations, settlement duties are normally the responsibility of the relieving DO. When one of these stations is closed, the supporting DFAS site designates another non-tactical disbursing station within the site's area to assume the closed station's disbursing operations and perform the settlement function.

10.1.3. Tactical Disbursing Stations. For naval vessels and tactical units, the servicing DFAS site performs the duties of settlement officer for relieved DOs whether or not the disbursing function of the naval vessel or unit is closed.

10.2 Responsibility of Relieved Officers

Despite the appointment of a settlement officer, the relieved DO is responsible for accounting for all funds expended while performing disbursing duties. Transfer of disbursing records under the authority of section 10.0 only relieves the DO of the paperwork incident to settlement of the account. Accountability for illegal, incorrect, or improper payments that cannot be adjusted despite the diligence of the settlement officer remains with the DO. The relieved DO should keep the settlement officer informed of his or her current mailing address at all times. The relieved officer should also answer inquiries related to settlement of outstanding items and furnish any advice or suggestions, which may be of assistance in the prompt and complete clearance thereof.

10.3 Settlement Officer Functions

The settlement officer is the incumbent DO. Subparagraphs 10.3.1 – 10.3.5 apply only to non-tactical DOs (within and outside the continental United States) performing settlement functions for previous DOs of the same disbursing activity and DSSN to which the DO performing the settlement functions is assigned. In addition to accounting for and taking settlement action on deficiencies which occurred during the incumbency of a former DO that were unresolved on the date of relief, the settlement officer may be required to establish or increase deficiencies in the account of a former DO. Most of the transactions processed to establish, increase, reduce, or remove deficiencies in the account of the former DO will be similar to the routine transactions of a DO.

10.3.1. Transactions. The transactions described in the following subparagraphs are the most common types of transactions that will be encountered. On some occasions, the servicing DFAS site may direct accomplishment of specific transactions and will provide detailed instructions for those transactions.

10.3.1.1. Settlement History. In order to have a complete history of the settlement process, the settlement officer will maintain a record of actions taken to clear deficiencies in separate settlement folders for each former DO. The settlement folders should be available for the next relieving DO.

10.3.1.2. Check Overdraft Receivables. Recording, reporting and clearing a check overdraft deficiency are prescribed in Chapter 7, section 8.0 and [ITFM 4-6045.70](#).

10.3.1.3. Losses of Funds. Losses of funds in the account of a former DO that were unresolved on the date of relief are recorded and reported until resolved.

10.3.1.4. Other Accountability. Other accountability items are unresolved deficiencies in the account of a former DO which cannot be classified as check issue overdrafts or losses of funds. These items are reported until resolved. Overpayments caused by the negotiation of both the original and recertified check are prescribed in Chapter 7, paragraph 11.13.

10.3.1.5. Removal of a Deficiency. The settlement officer can request removal of the deficiency on behalf of the former DO. The servicing DFAS site can provide specific instructions for removal of an accountability by correction of an erroneous collection voucher. Instructions pertaining to a relief of liability item are provided in Chapter 6, section 6.0.

10.3.1.6. Negotiable Instruments. Deposit negotiable instruments received to offset a deficiency in a former DO's account under the same guidelines as for other negotiable instruments. Document the deposit on an Optional Form [\(OF\) 1017-G](#), Journal Voucher.

10.3.2. Settlement Officer is Not Incumbent DO. This subparagraph applies only to DOs designated to settle the accounts of DOs of tactical units or naval vessels relieved from disbursing duty and the accounts of former DOs of closed disbursing stations. Settlement officers perform settlement functions for a DSSN other than the one to which assigned as a DO. Transactions to the account of the former DO will be similar to routine transactions of a DO.

10.3.2.1. Relieved DO. Any transaction affecting the accountability of a relieved DO, including the initial establishment of the settlement account, requires submission of monthly financial reports by the settlement officer for the relieved DO. The financial reports are submitted to the servicing DFAS site in the same manner as other financial reports.

10.3.2.2. Settlement Folders. In order to have a complete history of the settlement process, the settlement officer will maintain a record of actions taken to clear deficiencies in separate settlement folders for each former DO. The settlement folders should be available to the next relieving DO as a part of the relief process.

10.3.2.3. Initial Establishment of the Settlement Account. Upon receipt of the final SF 1219 of the relieved DO, the settlement officer reviews it to determine if any deficiencies existed on the date of relief. In the case of a closed disbursing station where the DO is transferred without a relief, the settlement officer establishes the settlement account by preparation of the necessary files to resolve the deficiencies. In the case of naval vessels and tactical units, if there is a deficiency in the account of the relieved DO, the settlement officer establishes the settlement account as of the month following the receipt of the relieved DO's final SF 1219 by preparing a supplemental SF 1219. The designated settlement officer must:

10.3.2.3.1. Compute the actual accountability of the relieving DO on the date of relief by subtracting the amount established in the settlement account from the amount reported on the relieved DO's final SF 1219; and

10.3.2.3.2. Notify the relieving DO of the naval vessel or tactical unit that the settlement account is established and direct the DO to record the dollar value of the deficiency on the next SF 1219. The relieving DO attaches a copy of the message to the SF 1219 to support the transfer of accountability.

10.3.2.4. Recording Increases to a Settlement Account. After the date of relief, it may become necessary to record a deficiency into the account of a relieved DO.

10.3.3. Removal of Deficiencies. Removal of deficiencies from the accounts of former DOs can be accomplished by collection from the responsible individual, correction of erroneous documents, or relief of liability.

10.3.3.1. If the deficiency is recovered by collection from the responsible individual, the settlement officer document the collection on an OF 1017-G.

10.3.3.2. If the deficiency is removed by correction of erroneous documents, the corrected documents are reported on the supplemental SF 1219 prepared for the month in which the transaction is processed.

10.3.3.3. If a deficiency is removed by relief of liability, the Loss of Funds Adjudication Team, DFAS/ZPTA-IN team will provide a memorandum with a complete fund site to be charged for the transaction.

10.3.4. Preparation of Disbursement and Collection Vouchers. Normally, the preparation and processing of vouchers to settle the accounts of former DOs will not affect the disbursing account of the settlement officer. The settlement officer maintains a separate series of locally assigned voucher numbers (e.g., COOO1 for collections and DOOO1 for disbursements) for use in settlement transactions. Collection and disbursement voucher numbers (assigned to vouchers prepared to process settlement transactions) should not be taken from the voucher number logs of the DO at the settlement activity. In addition, the settlement officer does not maintain the DD 2657 for the former DO.

10.3.5. Financial Reports. The settlement officer submits financial reports for a former DO every month until the former DO's accountability is cleared. Normally, the documents required to be submitted are: a supplemental SF 1219; appropriate copies of deposit ticket or debit voucher; and any supporting disbursement or collection vouchers prepared. The general requirements in Chapter 15, section 7.0 pertain to preparation and submission of financial reports. In addition to the normal distribution requirements, one additional copy of each document is forwarded to the servicing DFAS site. In all cases, each document should clearly identify the name and DSSN of the former DO and the name and address of the settlement officer preparing the reports. Documents requiring a signature are signed "By (name of settlement officer), settlement officer for (name and DSSN of accountable officer)."

10.4 Settlement Procedures for Naval Vessels

10.4.1. Naval Vessels. Even though the DO assigned to naval vessels does not perform settlement functions, certain actions are required to be performed to assist the designated settlement officer. The incumbent DO follows the actions prescribed in section 10.0 for each of the transactions described which are received after the date of relief and which affect the accountability of the relieved DO.

10.4.2. Debit Voucher. Debit vouchers issued by a general depositary or the Treasury for dishonored personal checks, forged Treasury checks, or dual negotiation of both the original and recertified Treasury checks, are not recorded in the current DO's accountability unless the accounts of the DO who is accountable for the deficiency are subject to the 90-day retention period described in Chapter 15, paragraph 8.4 or the person who draws the check or endorser of the dishonored check is locally available for collection action. If neither of the foregoing conditions applies, the current DO forwards the debit voucher and copies of all related documents by email to the servicing DFAS site with a cover letter indicating that the accountability should be recorded against the previous DO's account. If follow-up action previously initiated by the relieved officer results in recovery of funds, the relieving officer forwards the funds in the form of an exchange-for-cash Treasury check to the servicing DFAS site.

10.4.3. Unconfirmed Deposits. For unconfirmed deposits that are later confirmed by follow-up action after the date of relief, forward the confirmed copy of the deposit ticket by email to the servicing DFAS site with a cover letter indicating that the accountability should be recorded against the previous DO's account for processing.

10.4.4. Financial Management Service (FMS) Form 5206. If an FMS 5206 is received during the 90-day retention period subsequent to relief, reproduce a copy of the applicable check issue record and disbursement voucher from the relieved DO's retained records and attach to the form. Send the documents by email to the servicing DFAS site with a cover letter indicating that the accountability should be recorded against the previous DO's account for processing. If one is received after the former DO's records have been sent to the DFAS site as prescribed in Chapter 15, paragraph 8.4, send the document with a cover letter to the servicing DFAS site for processing.

10.4.5. Daily Advice of Status (DAS). Upon receipt of a DAS from the Treasury indicating the original and recertified check issued by the previous DO were both negotiated and previous credit given by the Treasury or the canceled original check is being reversed, the current DO should take the same actions as prescribed in subparagraph 10.4.2 for debit vouchers.

CHAPTER 3

OBTAINING AND SAFEGUARDING PUBLIC FUNDS

1.0 GENERAL

1.1 Overview

The U.S. Department of the Treasury (Treasury) holds funds appropriated by the Congress subject to disbursement by disbursing officers (DOs) of the United States. When necessary to disburse in cash, upon approval of the commander or other authority, DOs may obtain and maintain cash on hand at their personal risk (a cash holding authority (CHA)) for official disbursements and accommodation exchanges (see paragraph 2.1). The DO's official monthly accountability is recorded and reported on the Standard Form (SF) 1219, Statement of Accountability or an electronic equivalent to account for all public funds. DoD DOs must safeguard all items identified as public funds that they receive, and [periodically](#) account for [them](#) to the Treasury (see Chapter 15, paragraph 1.3). DOs outside the United States may maintain official checking accounts, known as limited depositary accounts (LDAs), in foreign currency with banks approved by the Treasury (see Chapter 14, section 2.0).

1.2 Purpose

The purpose of this chapter is to provide DoD DOs' responsibilities to obtain and safeguard cash, negotiable instruments, and other items that comprise public funds.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3302 ([31 U.S.C. § 3302](#)) authorizes DOs to have custody of public funds for disbursement purposes and requires them to safeguard the funds.

2.0 CASH OPERATIONS

2.1 Cash Held at Personal Risk

Funds that qualify as cash held at personal risk include U.S. and foreign currency and coin, imprest funds, change funds, cash with agents (e.g., paying agent (PA)), and cash on deposit in an LDA. DOs use cash to make miscellaneous cash payments, make change, conduct accommodation exchanges, and make other specifically authorized transactions.

2.2 Approving Authorities

A commander, director, equivalent civilian head, or designee has the authority to approve CHAs for DOs, Deputy DOs (DDOs), agents, and cashiers within their commands. The Defense Finance and Accounting Service (DFAS) Director or designee approves requests for DFAS DOs. DFAS DDOs, agents, and cashiers outside of the main DFAS disbursing office may hold cash at personal risk, with the amount to be held subject to the approval of the parent DO and the local

activity commander based on [their](#) responsibility to safeguard public funds (see section 3.0). Keep cash on hand at the minimum amount necessary to meet normal requirements. Approving authorities review each request to ensure that good cash management procedures are in effect.

2.3 Determining Cash Requirements

2.3.1. [Considerations](#). DOs should consider daily cash collections of all DDOs, agents, cashiers, and other custodians of public funds over a representative period of time and average the results to determine cash requirements. If daily cash collections exceed disbursement and accommodation needs, no additional computation is necessary. If collections do not exceed disbursements, use the following table to compute the cash requirements according to the time to obtain funds from the source, weekly cash transaction volume, and the maximum amount authorized.

LEVELS OF AUTHORIZED CASH HOLDINGS		
If the source of funds is	and weekly requirements are:	hold cash to operate for:
Reasonably close (not more than 24 hours required to obtain cash)	\$500 or less	4 weeks
	Over \$500 but less than \$5,000	2 weeks
	\$5,000 but less than \$100,000	1 week
	\$100,000 and over	3 days
Not reasonably close (24-48 hours required to obtain cash)	\$2,500 or less	4 weeks
	Over \$2,500 but less than \$50,000	2 weeks
	\$50,000 and over	1 week
Remote (more than 48 hours required to)	\$50,000 or less	4 weeks
	Over \$50,000	2 weeks

To preclude temporary increases due to extreme currency fluctuations, the portion of the DO's request to hold foreign currency at personal risk may be stated in foreign currency units. See Figure 3-1 for a suggested procedure for computing average daily cash requirements. Consider the following types of disbursements:

2.3.1.1. Routine cash payments;

2.3.1.2. Emergency cash payments;

2.3.1.3. Cash travel advances for non-cardholder temporary duty and permanent change of station travelers;

2.3.1.4. Foreign currency requirements for accommodation exchanges;

2.3.1.5. Personal check cashing transactions (see Chapter 4, section 3.0);

2.3.1.6. Cash transactions of remote DDOs, cashiers, and agents; and

2.3.1.7. Cash requirements for managing foreign government contributions (burden sharing funds).

2.3.2. Special Circumstances. When special circumstances require DOs to increase their CHA beyond the amounts discussed in subparagraph 2.3.1 (e.g., operational contingencies), describe the circumstances and duration of the expected need for increased cash in the request for approval to increase cash held at personal risk. If the circumstances are more than temporary (over 30 days) or expected to become permanent, the DO re-computes their CHA and submits a new request based on the anticipated services.

2.3.3. Cash Collections. DOs and their agents may hold cash collections for operating requirements within their CHA. Immediately deposit cash collections that increase cash on hand above the authorized limit (see Chapter 11, section 8.0).

2.4 Requests for Approval

2.4.1. A DO requests a CHA from the approving authority cited in paragraph 2.2. Do not include scheduled payday cash requirements (e.g., the amount required to cash payday paychecks) in a request. The approving authority ensures that the requested amount follows the guidance in paragraph 2.3 and that management controls exist to ensure the conduct of routine reviews of cash requirements. Submit requests semiannually, allowing enough time for CHA authority to become effective on October 1 and April 1 of each year. Also, submit a request whenever a review of cash requirements results in a major change. Include in the written request:

2.4.1.1. The name, title, and duty station of the accountable requestor;

2.4.1.2. A description of the transactions requiring the use of cash;

2.4.1.3. A statement that adequate facilities are available to safeguard the cash (see section 3.0); and

2.4.1.4. A breakdown of cash by accountable position.

2.4.2. A CHA request includes the amount to be held personally by the DO and the DO's DDOs, agents, cashiers, and other custodians of public funds, but not amounts to be held by authorized imprest fund cashiers and change fund custodians which receive separate approval. The approving authority approves all requests by an endorsement and returns them to the DO for retention. To preclude compromise of classified information, CHA requests for emergency and extraordinary expense funds may omit security items (e.g., duty station, description of payments, facility location, or other details), but keep this information on file for review by cleared personnel.

2.5 Obtaining Cash for Disbursing Purposes

Funds that qualify as cash held at personal risk, also known as DO's cash, include U.S. and foreign currency and coin, imprest funds, change funds, cash with agents (e.g., PA), negotiable checks (not check stock), and cash on deposit in an LDA. The Central Accounting Reporting System ([CARS](#)) DO cash Treasury Account Symbol ([TAS](#)) (see paragraph 2.6) balance amount should never exceed the approved cash holding authority amount or the balance amount of the day's ending cash on hand.

2.5.1. Available Procurement Methods

2.5.1.1. Exchange-for-Cash Checks. DOs may draw exchange-for-cash checks (see Chapter 7, section 7.0) payable to the DO or DDO who procures the cash. The DO or DDO endorses the check to the name of another DO or DDO, or the name of the financial institution. DOs may obtain cash from other DOs, a Federal Reserve Bank (FRB) or branch, or any commercial bank willing to provide the service, to include overseas Military Banking Facilities (MBFs). If a DO or DDO is unable to go to the bank to take possession of the funds due to excessive workload or location, he or she may arrange for the FRB or financial institution to ship the funds by registered mail or armored car. The local commander approves and funds this type of delivery.

2.5.1.2. U.S. Treasury Check/Electronic Funds Transfer (EFT) Exchange-for-Cash. DOs or DDOs may procure cash (U.S. dollars (USDs) or foreign currency) for authorized disbursements and accommodation transactions overseas using EFT. Coordinate with an authorized MBF or local LDA for an account to receive the transfer as an Automated Clearing House or International Treasury Services ([ITS.gov](#)) transaction, and determine the exchange rate on the date of crediting to the DO's account. DOs must cite the DO Cash TAS associated with their Service on the Optional Form ([OF 1017-G](#)), Journal Voucher, as stated in Chapter 7 when issuing a U.S. Treasury check or EFT-for-cash. These transactions are reported to the Payment Information Repository ([PIR](#)), which will feed the CARS daily account statement showing an increase to DO cash. Note—an issued U.S. Treasury check-for-cash is considered cash from a reporting standpoint regardless if negotiated.

2.5.1.3. Transfers Between DOs. DoD DOs may transfer funds among themselves following the same exchange-for-cash procedures used to procure cash. They may also accomplish these transfers utilizing the DoD ([DD Form 2657](#)), Daily Statement of Accountability, and Standard Form (SF)1219, Statement of Accountability, but must coordinate to ensure they report this amount in the same reporting period (see Chapter 15, sections 5.0 and 6.0). For DOs on Treasury's daily reporting, transfers must be reported by both DOs via two Classification Transactions and Accountability (CTA) transactions to reflect a decrease to the DO [providing](#) the funds and an increase to the DO receiving the funds.

2.5.2. Notification to the Treasury. The Treasury Financial Manual, Volume I, Part 4A, Chapter 4000 ([ITFM 4A-4000](#)) identifies Treasury's requirement to maintain and update its operating cash balance (e.g., the government's cash flow). DOs must therefore provide the Treasury with advance notice of their cash requirements and other related information. For additional guidance on disbursement forecasting, see Chapter 9, section 3.0.

2.5.3. Cash Held for Operating Requirements. DOs that maintain physical cash associated with a [DD 1131](#), Cash Collection Voucher, must cite the appropriate Standard Line of Accounting, which will include the TAS/Business Event Type Code (TAS/BETC), for the collection transaction. Multiple collection vouchers may be consolidated under one transaction reported to Treasury at the end of day **only if** they fall under the same program TAS/BETC and Agency Location Codes. DOs must ensure that any consolidated transactions have an audit trail that can be validated at the individual transaction level. These transactions are reported to the CTA, which will feed the CARS daily account statement showing an increase to the DO cash TAS and an increase to the TAS on the collection voucher. This will increase DO accountability to reflect the entire amount of cash collected in as being retained for operating requirements.

2.5.4. Protection of Currency in Transit

2.5.4.1. Notification to Commander. A DO or another accountable official, either leaving the disbursing activity or arriving to pick up \$10,000 and above, notifies the commander and the security police through the command or other duty officer. The DO must provide the time of departure, destination, estimated time of return, amount, and the source or disposition of the funds, as appropriate, for entry in the ship or station log.

2.5.4.2. Transporting Cash. The commander of the installation requesting cash is responsible **for securing** that cash at all times. **Deciding** to have an armed escort, **the number of escorts, and** the type of transportation to be used is a command responsibility. The commander should consider such things as the amount of cash, distance and terrain, and type of transportation and local security forces available.

2.5.4.3. Liability. An accountable official (DO, DDO, agent, cashier, or other custodian of public funds) who has signed for the cash is pecuniarily liable for it, pending its return to the DO. An accountable official who feels that the command has not provided adequate security may refuse to disburse such funds and return them to the DO.

2.5.5. Verification of Money. The accountable official verifies all cash received before acceptance. Verify unsealed money by actual count before acceptance or immediately upon receipt of shipment. The DO or DDO, at their own risk, may bundle-count sealed new money bricks presented with the FRB's packaging intact. When opening a bundle, verify it immediately upon opening with individuals present to witness both the breaking of the seal and the count. The accountable official must report discrepancies immediately by issuing a claim to Treasury via the bank that provided the money. Identify the bundle or brick in question and include a signed statement from the witnesses. For a disapproved claim, follow the request for relief of liability procedures in Chapter 6, section 6.0. Verify and accept cash shipped to the accountable official in front of witnesses immediately upon receipt following these procedures, depending upon how the money is packaged.

2.5.6. Expenses. Charge bank fees and shipping costs incurred when procuring U.S. or foreign currency to the disbursing activity's operating fund account.

2.5.7. Accounting for Premiums on Sales of Public Moneys or Securities. Under [31 U.S.C. § 3341](#), a DO of the U.S. Government may sell government warrants, checks, drafts, or obligations not the property of the official at a premium, or dispose of the proceeds of the warrant, check, draft, or obligation, only if the official deposits the premium and the proceeds in the Treasury or with a depository for the credit of the government. Credit General Fund Accounts XX 3220, General Fund Proprietary Receipts, Not Otherwise Classified, All Other, for the USD equivalent (USDE).

2.5.8. Registered Mail Shipments. Send an exchange-for-cash check to an FRB or MBF by registered mail. Keep a copy of the check and report it on line 6.7, as Cash in Transit, (see Chapter 15, section 6.0) on the SF 1219 until the cash is received. When a DO is aware that the FRB or MBF has shipped the cash and has not received that cash within a reasonable period, contact the shipper to request the shipment be traced (see paragraph 5.5). This is the least preferred method to obtain cash. Use it only after determining that all other procurement methods are not feasible.

2.5.9. Obtaining Cash by Transfer From Officer Relieved. DOs may obtain cash funds by transfer from another DO without the issuance of an exchange-for-cash check only upon the relief of a DO and only from the DO being relieved (see Chapter 2, paragraph 4.6).

2.6 TAS for DO Cash

A TAS is established for each DoD Component to document the balance of DO cash held outside of the Treasury. The Treasury and the Office of Management and Budget determined that this fund group presents a reporting model consistent with the [Statement of Federal Financial Accounting Standards 31](#) for unique activities for other Federal Program Agencies to record non-fiduciary, non-budgetary activities with Government (Federal) sources or Funds. DOs operating in a CARS daily reporting environment must classify each cash transaction with the DO Cash TAS. Cash funds obtained via a U.S. Treasury check or EFT are classified through PIR. Operating cash reductions and accommodation exchange transactions are reported through Collections Information Repository ([CIR](#)). Cash disbursements,

cash collections, and cash transfers between DOs not deposited and/or maintained in the DO's accountability are reported through CTA. The TAS for DO cash does not impact the current DO reporting environment as referenced in Chapter 15. DFAS Accounting sites utilize monthly SF 1219 data to report the DO Cash to the proper TAS. The TASs for DO cash are:

- 2.6.1. 017 X 6950 DO Cash, Department of Navy;
- 2.6.2. 021 X 6951 DO Cash, Department of Army;
- 2.6.3. 057 X 6952 DO Cash, Department of Air Force;
- 2.6.4. 097 X 6953 DO Cash, Defense Agencies; and
- 2.6.5. 096 X 6954 DO Cash, Corps of Engineers, Civil.

2.7 Reconciling Disbursing Officer Cash

DOs must reconcile daily all transactions reported on the DD 2657 and DO Cash TAS reflected on the CARS daily account statement. Funds obtained for disbursing purposes are reported through and reconciled with PIR (Chapter 11, paragraph 10.4). Cash deposited and accommodation transactions are reported through and reconciled with CIR (Chapter 11, paragraphs 11.3 and 11.4). Cash disbursements, cash collections, and cash transfers between DOs not deposited and/or maintained in the DO's accountability are reported through and reconciled with CTA. To facilitate the reconciliation of cash transactions, DOs must maintain a log of all cash transactions, annotating the DO Cash TAS associated with each transaction. The log of cash transactions must include:

- 2.7.1. The [DD 2659](#), Voucher Control Log; and
- 2.7.2. The detailed deposit activity report; or
- 2.7.3. A system generated report from the disbursing system.

3.0 SAFEGUARDING CASH AND RELATED DOCUMENTS

3.1 Expectations

The commanders' and DOs' responsibilities to safeguard cash and other assets, related instruments, and supporting documents are described in paragraph 3.2. All accountable officials are responsible for safeguarding public funds. DOs should minimize the number of accountable officials required to store public funds. Use the most secure container, vault, or safe available to safeguard, in order of priority, currency, undelivered checks, negotiable instruments, paid vouchers, blank U.S. Treasury and LDA checks (see Chapter 7, paragraph 3.7), signature media, valuables (see Chapter 16, section 3.0), and other records. The command security program must consider the maximum amount of each of these items that would normally be on hand at any time. Store classified material separately from public funds and documents.

3.2 Responsibilities

3.2.1. The Commander. The responsibilities of the Commander include:

3.2.1.1. Approves a DO's request to hold cash at personal risk, and is responsible for ensuring unannounced quarterly verification of cash and other assets in the disbursing office (see Appendix A);

3.2.1.2. Provides every individual entrusted with public funds with a vault, safe, or other adequate secure facility (e.g., a strong box) for the exclusive use of the assigned individual. If it is not possible to provide separate safes, furnish separate locked compartments in a safe or separate strongboxes stored in a safe or vault. Always store public funds separately from other funds;

3.2.1.3. Develops a security program and publishes it in a command instruction or notice. The security program must provide adequate protection for the maximum amount of public funds and related documents and instruments on hand at any given time;

3.2.1.4. Ensures personnel protection is included in the overall disbursing security program. This includes the requirements for periodic review of the adequacy of the security measures in place and for testing the security equipment for proper operation on a semiannual basis;

3.2.1.5. Provides armed guards for the escort of public funds to and from the disbursing office. When necessary, acquires an armored car service using locally-available mission funds (see subparagraph 2.5.4); and

3.2.1.6. Provides fire protection of government facilities and funds.

3.2.2. DOs.

3.2.2.1. DOs safeguard all public funds they collect or otherwise have in their custody or control, and they are accountable and subject to pecuniary liability for their loss. DOs are prohibited from lending, using, depositing, or exchanging public funds in their possession for other funds except as specifically allowed by law. DOs secure public funds until ordered by proper authority to transfer or disburse them. When DOs receive orders for transfer or payment, they execute transactions and perform all other duties as imposed by law or regulations in conformity to the law. In case of disaster, DOs should secure and preserve the accounts of all personnel, public money, and other papers and property in order of their importance as circumstances permit (see section 8.0).

3.2.2.2. DOs, DDOs, agents, cashiers, custodians, or alternates with custody of public funds assign each person a separate secured container. Although all appointed or assigned accountable officials are liable for any loss of public funds in their custody, the DO holds overall responsibility and is subject to pecuniary liability, jointly or severally, for any losses associated with these personnel. Therefore, DOs ensure that all DDOs, agents, cashiers, imprest fund cashiers, and other custodians of public funds are fully aware of their responsibilities to properly handle and protect public funds. The DO or designee personally inspects office security, keeping a record of each inspection, at least semiannually to ensure that:

3.2.2.2.1. Vaults and safes are not accessible to unauthorized persons (e.g., limit access to vaults using vault day gates to which only authorized personnel have the keys);

3.2.2.2.2. Cash **exceeding** the amount required and authorized for official purposes is deposited promptly;

3.2.2.2.3. Windows and doors are limited and barred and/or locked at all times after business hours;

3.2.2.2.4. Access to the working area is marked conspicuously with “AUTHORIZED PERSONNEL ONLY.” Conduct transactions from a cage, room, or counter enclosure, constructed to provide a physical barrier to normal traffic with minimal interference from other activities and personnel of the office;

3.2.2.2.5. Security devices for the check signing machines, digitized signature media, meters, and plates are in the custody of the DO or authorized DDOs at all times;

3.2.2.2.6. Internal office procedures are established and implemented to provide adequate controls on all undelivered and returned checks. Assign responsibility of checks, which includes receipt, holding, and final distribution, in writing;

3.2.2.2.7. The commander is aware of any security shortfalls or breaches, and any request for adequate safeguarding facilities previously denied. Inform the supporting DFAS site of unresolved facility issues that relate to the ability to safeguard public funds;

3.2.2.2.8. All DDOs, agents, cashiers, and custodians receive written and oral instructions regarding the proper care and handling of cash and other accountable documents. The DO should keep an affidavit from each accountable individual attesting to receipt of such instructions;

3.2.2.2.9. All cash, blank Treasury and LDA checks, and related items are kept in a vault, safe, or security container that meets minimum security standards prescribed in section 3.0;

3.2.2.2.10. All safes and security containers aboard ships and on installations that are on rollers or weigh less than 750 pounds are stored in a vault or secured in such a way as to prevent movement;

3.2.2.2.11. A vault, safe, or security container visible to the exterior of the office is illuminated;

3.2.2.2.12. The combinations of all vaults, safes, and security containers are changed at least once every 6 months and upon relief, transfer, separation, or discharge of the accountable official. The accountable official is prohibited from sharing the combination or key with anyone and places the combination of each safe and duplicate key of each strong box in separate sealed, signed, and dated envelopes such that an unauthorized opening can be detected. The DO keeps the sealed envelopes of all accountable officials in [their](#) safe or vault and delivers the combination and/or keys to their safe or vault to the commander, security officer, or another designated official for retention. Authorized personnel access the sealed combinations only in an emergency requiring the opening of the safe or vault;

3.2.2.2.13. A record of combination changes, dated and signed by the accountable official, is kept inside each vault, safe, or container;

3.2.2.2.14. To limit the possibility of the combination being observed, the dial to the vault, safe, or container is concealed by a shield made of suitable material;

3.2.2.2.15. The name and phone number of the accountable official is posted on the inside of the vault, safe, or container. DOs may use an [SF 701](#), Activity Security Checklist, or an [SF 702](#), Security Container Check Sheet, as appropriate, to assist in the control and proper safeguarding of public funds stored in vaults, safes, and/or containers. If the forms are not available, post a unique container number along with a “24 hour” duty phone number on the outside of the vault, safe, or container allowing the duty personnel to contact the accountable official;

3.2.2.2.16. Keys to the workspace or disbursing office are strictly controlled. Keep a record that identifies who has keys and when they were issued and surrendered; and

3.2.2.2.17. All security equipment is tested at least every 6 months for proper operation. Keep a record of the tests maintained.

3.3 Intrusion Detection Systems (IDS)

3.3.1. [Background](#). IDS are vital to any system that provides in-depth protection for a secure area. The DoD supports a policy on the use of IDS for resource protection purposes. [Commanders](#), in the exercise of [their](#) responsibility to provide security, consider components of the DoD Joint-Services Interior IDS. In special cases, components of the base and installation security system, generally used for security applications, may also be available for resource protection requirements.

3.3.2. Alarms. Consider using alarms to deter entry to the general disbursing area or actual storage container. There are three levels of alarm protection: penetration, motion, and point detection. A minimum of two levels of detection capability provides the best in-depth protection. Post conspicuous warnings of the existence of alarms and publicize the existence of alarms to gain the full benefit of psychological deterrence.

3.3.3. Maintenance. Maintain and regularly test a system maintenance program to ensure the alarm system operates properly. Protect against bypassing the alarm system consistent with DoD requirements.

3.3.4. Alarm Monitor Responsibilities. Train monitors to understand, operate, and monitor the alarm system so they may work closely with the security police and unit personnel, and act as a liaison in this special role.

3.4 Storage Containers

3.4.1. Categories

3.4.1.1. Vaults and Safes

3.4.1.1.1. Vaults. When possible, provide a disbursing office a built-in, fire-resistant vault with at least a three-position, dial-type combination lock; with the door and vault being able to resist a fire for a minimum period of two hours. Store all safes containing funds and when possible, the instruments and documents cited in subparagraph 3.4.2, in the vault. Follow the requirements of the DoD Physical Security Equipment Guide, UG-2045-SHR, when constructing new vaults, doors, and intrusion devices.

3.4.1.1.2. Safes. When vaults are not available, DOs, DDOs, agents, cashiers, and other custodians of public funds use combination three-tumbler lock, tool-resistant safes available at General Services Administration (GSA) Global Supply or GSA Federal Supply Schedules (FSS) to store public funds. If such a safe is not available, use a field safe secured properly to an immovable object. Post a guard in an unsecured building at the direction of the commander. Store irreplaceable checks, bonds, or other perishable records in combination three-position, dial-type, insulated, and built-in fire-resistant money cabinets/safes. For temporary storage, Class 5 file cabinets with three-position, dial-type, and built-in combination locks can be used to protect against forced entry. File cabinets with steel lock bars or without forced entry protection are not adequate.

3.4.1.2. Security Containers. Class 1 and Class 5 cabinets provide the greatest protection against forced entry. GSA approved security containers have the following Federal specifications:

Type	Specifications
Class 1 or Class 2 Cabinet	AA-F-357 (GSA-FSS)
Class 4 or Class 5 Cabinet	AA-F-358 (GSA-FSS)
Class 5 or Class 6 Map and Plan File	AA-F-363 (GSA-FSS)
Class 6 Drawer File	AA-F-358 (GSA-FSS)

3.4.1.3. Burglary Resistant Safes. The intent of burglary resistant safes is to prevent forced entry. The numerical value cited represents the time in minutes that the safe will resist forced entry. These safes provide a greater degree of protection than GSA rated security containers. Commercial burglary resistant safes are certified by Underwriters Laboratories according to the following classifications:

Type	Classification
Tool-Resistant Safe (TL)	TL-15 or TL-30
Torch and Tool-Resistant Safe (TRTL)	TRTL-30 or TRTL-60

3.4.2. Requirements

3.4.2.1. Currency, Negotiable Instruments, and Paid Vouchers. DoD Component security and resource protection programs ensure compliance with the following minimum requirements for storing currency, negotiable instruments, and paid vouchers. Previously approved storage containers currently in use may continue to be used. The Naval Sea Systems Command may designate specific containers for use on Navy ships.

3.4.2.1.1. Under \$7,500. Commanders establish these requirements. Any security container or burglary resistant safe listed in subparagraph 3.4.1.1.2 is acceptable.

3.4.2.1.2. \$7,500 - \$50,000. Use a security container with a Class 1 or Class 5 rating, or a burglary resistant safe with at least an Underwriters Laboratories classification of TL-15 and having a Group 1R combination lock.

3.4.2.1.3. \$50,000 or More. Use a burglary resistant safe or vault with at least an Underwriters Laboratories classification of a TL-30 and having a Group 1R combination lock.

3.4.2.2. Other Items. Blank checks, signature media, and personal valuables held for safekeeping (see Chapter 16, subparagraph 1.1.1) are not part of a DO's accountability. Store them in a security container with at least a Class 1 or Class 5 rating or a burglary resistant safe separate from the one used to store the items listed in subparagraph 3.4.2.1.

4.0 ADVANCING CASH TO AGENTS

4.1 Deputy Disbursing Officers (DDOs), Agents, and Cashiers

4.1.1. Authority. DOs advance cash for official use to their DDOs, agents, and cashiers on a [DD 1081](#), Statement of Agent Officer's Account, whether by cash disbursement; or by EFT; or by exchange-for-cash checks, with instructions to negotiate the checks only as funds are needed. The DO reports un-negotiated checks as funds with agents; DDOs, agents, or cashiers report them as "Cash on Hand." On a monthly basis, the DO reports funds in the custody of DDOs, agents, and cashiers in the main disbursing office and outside the disbursing office on the SF 1219 (see Chapter 15, section 6.0).

4.1.1.1. Advance Cash From the Vault. The DO Cash TAS is not impacted when funds from the vault are advanced to an agent. The funds were previously reported to the DO Cash TAS prior to the advance taking place.

4.1.1.2. Advance With a U.S. Treasury Check or EFT. The DO Cash TAS will increase when funds are advanced to an agent utilizing either a U.S. Treasury check or EFT and are reported to the PIR, which will feed the CARS daily account statement.

4.1.2. Amount Limits. Under normal conditions, do not advance an amount of cash to a DDO, agent, or cashier that exceeds [the](#) CHA. There are occasions where cash may be entrusted to DDOs, agents, or cashiers in other amounts when required to maintain efficient operations (e.g., during the authorized absence of the DO and on paydays). The total amount held by the DO, DDOs, agents, and cashiers may not exceed the DO's CHA.

4.1.3. Custody. Each DDO, agent, or cashier stores entrusted cash in a safe or adequate container assigned for [their](#) exclusive use as specified in section 3.0. Only the assigned DDO, agent, or cashier may know the combination of the safe or container. If the commander deems it necessary to gain access to the safe or container, open it and verify the contents.

4.1.4. Balancing. DDOs, agents, and cashiers entrusted with official funds must balance the cash in their custody daily using [the](#) DD 2665, Daily Agent Accountability Summary, as the permanent record of balancing (see Chapter 15, subparagraph 2.1.2). The DO ensures that each DDO, agent, or cashier is aware of the frequency for balancing and submitting the DD 1081 and uses it as a summary of cash transactions and receipt for cash and vouchers on hand. Each DO submits a DD 1081 no less frequently than monthly. A DDO, agent, or cashier who will be absent for more than 5 workdays returns all funds and accountable documents to the DO with properly executed DD 2665s and DD 1081s before departure, reporting any shortage or overage immediately (see Chapter 6, section 4.0).

4.1.5. Collections and Disbursements

4.1.5.1. DDOs, Agents, and Cashiers in the Main Disbursing Office. DDOs, agents, and cashiers account for all negotiable instruments, collection and disbursement vouchers, and other accountable documents on a DD 2665 and turn them in daily to the DO under the cover of a DD 1081. They must retain currency collected over and above the currency disbursed when authorized by the DO if the total funds held are within the limitations specified in paragraph 2.3. The DD 1081 also serves as a receipt for the funds that remain in the DDO's, agent's, or cashier's custody. When additional funds are required due to disbursements greater than collections or other authorized transactions, the DO may replenish the funds in the net amount of acceptable vouchers and negotiable instruments delivered with the DD 2665s and DD 1081s. The DO prepares a DD 1081 for the amount of funds advanced (see Chapter 15, section 4.0).

4.1.5.2. DDOs, Agents, and Cashiers at Branch Disbursing Offices. When DDOs, agents, and cashiers are serving in branch offices where reporting transactions in person is impractical, the DO may authorize transmittal of the transactions by electronic or regular mail, or messenger. Account for these transactions on a DD 2665 under the cover of a DD 1081. The DDO, agent, or cashier signs the original and duplicate of the DD 1081 and sends it with the DD 2665 and substantiating vouchers, negotiable instruments, and documents to the DO. After examining and accepting the DD 1081, the DO acknowledges receipt on the duplicate copy of the form and returns it to the DDO, agent, or cashier. The DO may replenish funds following subparagraph 4.1.1.

4.1.5.3. DDOs, Agents, and Cashiers Under Other Commands. DDOs, agents, or cashiers not under the same command as the DO must deposit negotiable instruments whenever possible (e.g., an investigative service or support center, intelligence command, U.S. Defense Attaché Office). If a deposit is \$5,000 or more, mail or present the deposit to the nearest FRB or its branch. Transmit deposit tickets, collection and disbursement vouchers, and other accountable documents electronically, or send them by mail or messenger to the DO. Account for the transactions on a DD 2665 with a cover DD 1081, preparing the latter following Chapter 15, sections 3.0 and 4.0. The DO may determine that the volume of transactions is small enough to allow submission of a single DD 1081 monthly.

4.1.6. Records. Identify transactions made by other than the DO by the name of the DDO, agent, or cashier. The DO determines the method to be used. Identify negotiable instruments cashed by someone other than the DO following Chapter 4, subparagraph 2.4.3.

4.2 Cash to Paying Agents (PAs)

DOs furnish PAs written instructions to ensure they observe pertinent disbursing procedures including safeguarding funds; identifying payees and obtaining their signatures; requiring vouchers, documents, and certifications; and returning of funds and vouchers.

4.2.1. Funds Advancement. Complete a DD 1081 to document the cash entrusted to PAs authorized to make payments, currency conversions, or check cashing transactions. The DO must establish and implement controls to preclude advancing amounts in excess of requirements for the assigned mission or other anticipated valid requirements. PAs may not commingle cash advanced to them with any other funds nor advance it to any other person.

4.2.2. Funds Return. Agents returning paid vouchers and deposit tickets results in a reduction of DO accountability, which also results in a reduction in the balance of the DO Cash TAS. Returns of residual cash to the DO will not impact the DO Cash TAS since the funds were previously classified under the DO Cash TAS.

4.2.3. Advanced Cash. Normally, PAs may not retain advanced cash overnight, but must promptly return the paid vouchers, negotiable instruments, and residual cash to the DO with a properly completed DD 1081 (see Chapter 15, section 4.0). When circumstances require a PA to retain cash overnight, follow the custody requirements in subparagraph 4.1.3 and return the paid vouchers, negotiable instruments, and residual cash as soon as possible after making the authorized payments, normally within 24 hours. The DO must notify the PA's commanders when the PA fails to make a prompt return, or if a loss of funds or vouchers occurs.

4.3 Agents of Friendly Foreign Nations

4.3.1. Authority

4.3.1.1. Basic Agreement. DoD DOs may advance cash to DOs, cashiers, or other members of a friendly foreign nation's armed force to disburse pay and allowances to their members if the President has made an agreement with the foreign country pursuant to [10 U.S.C. § 2396\(b\)\(2\)](#). An advance may also be used to allow that armed force to purchase necessary supplies and services under a basic intergovernmental agreement negotiated in accordance with [DoD Instruction 5530.03](#), International Agreements, to include coordination with the Combatant Commander involved, the U.S. Ambassador or Chief of Diplomatic Mission, the DoD General Counsel, and the governments of the friendly foreign nation and the United States.

4.3.1.2. Supplemental Agreement. A supplemental agreement establishes:

4.3.1.2.1. The type of personal identification required for a DO or individual member when drawing an advance of funds;

4.3.1.2.2. The maximum amount that may be advanced to an individual;

4.3.1.2.3. Protection for the lender nation against loss from fluctuating exchange rates;

4.3.1.2.4. The address of the respective settlement offices to which the lender nation DO forwards receipts for fund advances with requests for reimbursement;

4.3.1.2.5. Procedures for local settlement when feasible or, if not feasible, between the signatory nation's representatives in Washington, DC, or another designated location;

4.3.1.2.6. That settlement may be in cash or by check, and in the type of currency used to make the advance. Make settlement in the lender nation's medium of exchange (when possible); and

4.3.1.2.7. Other provisions local conditions may require.

4.3.2. Conditions. A DO advances cash only against the signed receipt of the individual member of the armed force receiving the advance for the following purposes and under the following conditions:

4.3.2.1. To a DO of an armed force of a friendly foreign nation wanting to provide pay and allowances for troops or purchase necessary supplies and services. The DO must present proper personal identification and the unit must be serving in an area where personnel temporarily are unable to obtain funds from their own nation; or

4.3.2.2. To individual armed force members of a friendly foreign nation in need of funds, serving in an area temporarily separated from their units and the DO of that force is not available to make payments. These individuals must be identifiable as members of an armed force of a friendly foreign nation with which an intergovernmental agreement for advances exists.

4.3.3. Documentation. The receipt must include the name, rank, service number, title, organization, and country of the individual receiving the advance; purpose for which the advance is needed; type and amount of currency to be advanced; prevailing rate of exchange to one USD at the time the advance is made, if applicable; and name, rank, organization, and address of the DO making the advance.

4.3.4. DoD Rewards Program to Assist in Combating Terrorism

4.3.4.1. Authority. Payment of rewards to assist in combating terrorism is authorized by [10 U.S.C. § 127b](#) (also see Volume 12, Chapter 17, paragraph 1.2). When payment of these rewards by U.S. personnel is not practical, DOs may advance cash to agents of friendly foreign nations' armed forces to make the payments. The international agreement and authorities in subparagraph 4.3.1.1 do not apply.

4.3.4.2. Controls. Agents of friendly foreign nations appointed under Chapter 2, section 7.0 are agents of the DOs who advance cash to them. Commanders and DOs have the same oversight and internal control responsibilities regarding these agents as they do for U.S. PAs. DOs may advance cash to properly appointed PAs only in amounts required to pay specific approved reward payments to identified payees.

4.4 Change Funds

4.4.1. Authorization. When the operation of a clothing sales store, government laundry, or other appropriated fund activity engaged in selling property or services requires cash for making change, the activity's officer in charge requests that the commander establish a change fund. After approval, the commander or designee appoints a change fund custodian. The appointing document specifies the amount of cash to be advanced by the DO or DO's agent, who issues written instructions to the custodian when advancing the change fund covering the custodian's responsibilities for safeguarding the cash and their pecuniary liability for losses. The DO or agent providing disbursing service to the installation or activity where the sales activity is located provides the authorized change fund advance and records the advance in [their](#) accountability as cash in the custody of government cashiers.

4.4.2. Fund Limit. A change fund may not exceed \$250 for each cash register operated in an activity. When a cash register has more than one drawer, each drawer may be considered as a register. The commander may authorize additional amounts consistent with good cash management principles. Upon approval of the commander, authorized collecting agents may also be change fund custodians to facilitate making change.

4.4.3. Fund Increases. A commander may authorize an additional \$50 for each cash register, and an amount not to exceed \$500 for each accountable medical services' change fund custodian. For extended operations (e.g., Sunday operations), a commander may approve an additional amount up to \$50 per cash register when there is limited or no banking support.

4.4.4. Documentation. The DO or agent prepares a DD 1081. The change fund custodian signs and returns the original to the DO or agent for the amount of funds advanced. The change fund custodian returns all cash to the DO or agent upon termination of their appointment and prepares a DD 1081 to document the return. The DO or agent acknowledges receipt of the cash by signature on the duplicate copy of the DD 1081 and returns it to the custodian. A DO or agent may recall a change fund when it is necessary to verify the DO's or agent's cash. On completion of such verification, the DO or agent re-advances the funds to the change fund custodian. Also, unannounced inspections, including cash counts of change funds, are required at least quarterly by the cash verification team.

4.4.5. Change Fund Irregularities. The custodian follows Chapter 6, Table 6-1 and informs the officer who advanced the funds immediately of any fund irregularity (e.g., shortage or overage).

4.5 Imprest Fund Cashiers

Imprest funds are authorized only as an exception to this volume. See Chapter 2, section 9.0.

5.0 SHIPMENT OF PUBLIC FUNDS

5.1 Authority and Methods

5.1.1. Authority. Shipment of valuables is authorized by the Government Losses in Shipment Act ([40 U.S.C. Chapter 173](#)). Shipments are insured under this authority; do not purchase supplementary insurance.

5.1.2. Authorized Purposes. A DO is authorized to ship public funds to deposit into an official checking account; deliver funds to another DO as an exchange-for-cash transaction; ship damaged or mutilated currency (see subparagraph 5.7.2); and obtain funds from a bank or another DO by exchange of a check-for-cash.

5.1.3. Methods of Shipment. Ship public funds in a manner that provides the greatest possible protection against risk of loss, destruction, or damage to the funds:

5.1.3.1. Public funds may be shipped by registered mail or courier, office messenger, government conveyance, railway express, contract armored car service, or as cargo via Air Mobility Command (AMC) signature security service, depending upon availability of means of transit. The normal methods are registered mail and AMC cargo;

5.1.3.2. Shipment by registered or certified mail is preferred in the case of checks, drafts, and money orders. Shipment by courier is preferred in the case of currency and coin;

5.1.3.3. Do not use certified mail to ship currency and coin. Use shipment by government conveyance or railway express only in the case of currency or coin of excessive weight or bulk; and

5.1.3.4. Transfers between DOs afloat using airlift (helicopter) or high-line is also authorized during underway replenishment at sea; attach a buoy or other reliable floatation device to the container to aid in recovery that may be required.

5.1.4. Record of Shipment. In addition to accounting documents required in the case of transfers and deposits of public funds, and to provide the record required by Treasury regulations, describe each shipment of funds in detail on a DD 165, Shipment of Funds.

5.2 Shipment of Funds

5.2.1. [DD 165](#). Use a DD 165 to ship coin or currency, regardless of the amount. This form is not required for shipments for deposit to the Treasury or to a bank if the shipment consists only of checks and money orders, and the record of instruments deposited required by Chapter 11, section 8.0 is otherwise maintained. In addition to the retained copy of the DD 165, the shipping DO keeps the registry or other carriers' receipts and any other documents incident to the shipment until assured that the shipment has been completed and no claims actions will be initiated.

5.2.2. Distribution of DD 165

5.2.2.1. Include the original and duplicate with the shipment.

5.2.2.2. Send a copy by mail directly to the consignee as a notice of shipment when the amount equals or exceeds \$10,000.

5.2.2.3. The shipping officer keeps a copy. This copy bears the DO's and verifying witnesses' original signatures to substantiate any claim for loss in shipment.

5.2.3. Shipment by Registered Mail or as Cargo via AMC. When shipment is by registered mail or as cargo via AMC, show the registry number and the date the shipment was delivered to the post office or terminal on all copies of the DD 165. Whenever feasible, limit single shipments to \$250,000. Package registered mail and AMC shipments to prevent breakage in transit. For registered mail shipments, the appropriate postal official signs the shipping officer's copy in the space beneath the block "Delivery Date and Time." Advice as to adequate packaging is available from military post offices.

5.2.4. Shipment by Courier. When shipment is by courier or office messenger, the shipping DO encloses the funds in a securely sealed envelope, moneybag, or other suitable container bearing the name and address of the consignee. Any Armed Forces member on active duty, DoD civilian employee, or individual serving as a courier for the Department of State may serve as courier for delivery of funds represented by currency, checks, drafts, or money orders. The courier takes all practicable precautions to protect the shipment. The courier signs the copy of the DD 165 retained by the shipping officer in the space beneath the block "Delivery Date and Time" as a receipt for the shipment.

5.2.5. Shipment by Office Messenger. When shipment is through a message center, an authorized message center official enters the registry number in the "Delivery Date and Time" space on the shipping officer's retained copy of the DD 165. Upon receipt of the shipment, the consignee, after verifying the contents of the shipment, signs the original DD 165 in the last signature block and returns it to the shipper as a receipt. The consignee also signs a copy of the DD 165 in the space beneath "Delivery Date and Time," gives it to the courier as a receipt for the shipment, annotates the advance copy providing notice of shipment to indicate the date of receipt, and keeps it with retained records. If the services of an office messenger are used, the messenger also signs the consignee's retained copy in the block for "Delivery Date and Time."

5.2.6. Shipment by Government Conveyance. When the shipment is of such weight or bulk as to make other methods of shipment impracticable, government conveyance may be used. The DO makes necessary arrangements for the shipment and receives the bill of lading for delivery with the shipment. In all cases, the DO is the shipper and the consignee is responsible for the receipt of the funds. The DO is responsible for direct delivery to the carrier and obtaining a receipt on a copy of the bill of lading.

5.2.7. Shipments by Armored Car Service

5.2.7.1. Authority. Shipment of funds by commercial armored car service is authorized when it is cost effective and offers the greatest protection against loss. Charge the cost to the operations and maintenance or working capital funds available to the DO.

5.2.7.2. Obtaining Funds From Banks. Since FRBs comply with Treasury regulations in making shipments of money, funds may be obtained by sending them an exchange-for-cash check with instructions for delivery of the funds in the desired denomination to an armored car carrier. When funds are obtained from a bank other than an FRB, the DO accepts the funds at the bank and turns them over to the armored car carrier for transport.

5.3 Action by Consignee

5.3.1. Consignee. On receipt of a copy of a DD 165 as notice of shipment, the consignee is the intended recipient or authorized official designated by the activity receiving shipment and is responsible for arrangements to receive the shipment. On receipt, the consignee ensures that the shipment is opened and inspected by one or more responsible employees. The consignee signs the original DD 165 and returns it to the shipping officer as a receipt. If a courier made the shipment, the consignee signs and returns a copy of the DD 165 to the courier as an acknowledgment of receipt of the shipment.

5.3.2. Funds for Deposit. When the shipment represents funds for deposit, the consignee completes the deposit ticket and returns the required copies to the DO. The consignee immediately advises the shipping officer of any difference between the amount and quantity listed on the copy of the DD 165 and in the actual shipment at the time of opening. If the shipment fails to arrive in due course, the consignee immediately notifies the shipping officer, the post office, or office of other carrier through which delivery was arranged. The consignee also immediately notifies the shipping officer of any damage to the shipment. All findings of the consignee in such cases are a matter of record subject to inspection in connection with any necessary investigation.

5.4 Action by Consignor

The consignor (shipper) takes prompt action to trace a shipment of funds for which a signed DD 165 is not received within a reasonable time. The consignor initiates telephone or message contact with the consignee to ensure compliance with paragraph 5.3.

5.5 Losses in Shipment

Accountability for public funds rests with the consignor until the consignee has received and verified all cash listed on the DD 165. If funds shipped as prescribed are lost, destroyed, or damaged, the shipping officer sends an immediate written report to the Bureau of Public Debt (BPD), Division of Financial Management, Department of the Treasury, Room 201, PO Box 1328, Parkersburg, WV 26106-1328. The shipping officer also notifies the agent in charge of the nearest U.S. Secret Service (USSS) office, the appropriate investigative service, the local post office, or local office of the carrier service used to place a tracer on the shipment, and takes such other action

as may be necessary to facilitate recovery. The shipping officer sends a copy of the report to the consignee and DFAS Indianapolis, ATTN: (DFAS-ZPTC/IN), 8899 E. 56th Street, Indianapolis, IN 46249-0500 or email to dfas.indianapolis-in.zpf.mbx.disbursingdebtmanagementpolicy@mail.mil. If the loss, destruction, or damage is \$10,000 or more, or delay in reporting might delay the government's recovering the shipment, the shipping officer sends the report with written confirmation that includes the:

5.5.1. Date of shipment;

5.5.2. Amount and type(s) of the valuables lost, destroyed, or damaged;

5.5.3. Name and address of the consignee;

5.5.4. Method of transportation, name of the carrier, and location of the carrier's office from which shipment was made;

5.5.5. Registry or other receipt number; and

5.5.6. Cause of the loss, destruction, or damage, if known.

5.6 Recovery Action

5.6.1. Accountability. Recovery action is the responsibility of the officer accountable for the lost or damaged shipment. When an exchange-for-cash check has been issued, this responsibility and accountability rests with the shipping bank or DO (consignor). Accountability for the check remains with the check-issuing DO (consignee), who reports the amount on the SF 1219 as funds in transit. The consignee determines the shipping officer's actions and monitors the subsequent investigative process.

5.6.2. Cash Lost in Transit. For cash lost in transit to a depository, accountability rests with the shipping DO, who takes the reporting and recovery actions required following Chapter 6, section 4.0. The shipping DO records the loss of funds on [Line 7.3](#), Losses of Funds, on the SF 1219. If the DO is reassigned before recovery can be affected, the relieving DO does not take responsibility for the loss, but records it on [Line 9.3](#), Losses of Funds, on the SF 1219. The relieving officer also ensures that necessary claims are properly filed, and that the proceeds from the claims are properly applied against the loss.

5.6.3. Checks and Money Orders. The DO acts to recover the amount of lost negotiable instruments following Chapter 11, subparagraph [8.3.8](#). If this recoups the full amount of a lost deposit, do not file the claims described in subparagraphs 5.6.4 or 5.6.5. If it does not result in full recovery, the DO may request relief of liability for the unrecovered portion, supported by copies of all correspondence pertaining to the unsuccessful recovery action (see Chapter 6, section [6.0](#)).

5.6.4. Claim for \$100 or Less Against U.S. Postal Service (USPS). USPS liability in the case of lost cash shipped by registered mail is generally limited to shipments of \$100 or less, and only the consignor (mailer) may file a claim for a lost shipment. The consignor may file a claim for damage or partial loss using Postal Service (PS) Form 1000, Domestic or International Claim. The accountable DO obtains a copy of the form as a means of tracing the shipment; such a filing does not constitute a claim. If a DO files a claim online at the USPS website, the PS 1000 is not required.

5.6.5. Claim in Excess of \$100 Against the Treasury. The DO sends claims for the value of lost currency shipments exceeding \$100 to Secretary of the Treasury through the supporting DFAS site. The DO ensures:

5.6.5.1. The proof of claim includes satisfactory proof of loss, destruction, or damage. The claim must include the original DD 165, which will be returned after adjustment of the claim. The DO ensures that all applicable blocks on the form are complete and the form is signed or the BPD will not process the claim. The consignor (shipping officer) submits a statement concerning the loss, destruction, or damage to the shipment or any part thereof.

5.6.5.2. If the consignee receives a shipment with contents not intact, the statement describes the circumstances relating to the condition in which the shipment was received and the manner of inspection and verification of its contents. The claim must also include affidavits covering the loss, destruction, or damage to the shipment from the consignee and the carrier, as well as statements and recommendations of the investigating officers.

5.6.5.3. In the case of lost shipments for which an exchange-for-cash check was issued to an FRB or another DO, the check-issuing DO requests that the shipping officer provide copies of all documentation. All necessary and reasonable steps to recover the lost, destroyed, or damaged shipment must continue after filing the claim. DOs ensure that all recoveries and refunds received following favorable consideration of the claim are turned over to the Treasury. See [Title 31, Code of Federal Regulations \(CFR\), part 361](#) for claims under the Government Losses in Shipment Act.

5.6.6. Restitution and Relief. The BPD grants claims for relief for lost, damaged, or destroyed shipments only if the shipping officer strictly followed prescribed procedures. If a claim is denied, the accountable DO may either make restitution of the missing funds or submit a request for relief of liability following Chapter 6, section 6.0. The request will be adjudicated according to Chapter 6, section 7.0 and U.S. laws and regulations applicable to accountable official liability. If a claim is approved, the BPD sends a refund via the Intra-governmental Payment and Collection (IPAC) system. The DO must provide an agency location code before transmission. If no IPAC capability exists, contact the supporting DFAS site.

5.7 Unfit U.S. Currency and Coin

5.7.1. Responsibility for Cancellation and Destruction. Under [12 U.S.C. § 413](#), the Secretary of the Treasury is responsible for the cancellation and destruction of U.S. currency unfit for circulation. The Secretary has, under [31 U.S.C. § 321\(b\)\(2\)](#), delegated these responsibilities to the Treasurer of the United States, who subsequently re-delegated them to the Director of the Bureau of Engraving and Printing (BEP). There are no further re-delegations.

5.7.2. Mutilated Currency

5.7.2.1. At least three disinterested persons must inventory damaged or mutilated U.S. currency or fragments thereof recovered from inadvertent wartime destruction or peacetime catastrophes affecting DoD property and personnel (e.g., aircraft crashes, ship sinking, building explosions, chemical spills). These persons normally can determine the value of the currency, but if they cannot, the DO sends a [BEP Form 5283, Request for Examination of Mutilated Currency for Possible Redemption](#), and the currency to the BEP for determination of value. [Form and shipping instructions are available on the BEP web page](#). Insure the shipment and request a return receipt.

5.7.2.2. Package the unfit currency as follows:

5.7.2.2.1. Regardless of the condition of the currency, do not disturb the fragments more than necessary.

5.7.2.2.2. If the currency is brittle, pack it carefully in suitable cushioning material, and box it as found, without disturbing the fragments any more than necessary.

5.7.2.2.3. When possible, leave mutilated currency that was in a purse, box, or other container as is to prevent either further deterioration or loss of the fragments.

5.7.2.2.4. If it is necessary to remove the fragments from the container, send the container with the currency and any other contents found.

5.7.2.2.5. If the money was flat when mutilated, do not roll or fold it.

5.7.2.2.6. If the money was in a roll when mutilated, do not attempt to unroll or straighten it.

5.7.2.2.7. Carefully remove coins or any other metal that may be mixed with the currency. Do not send coins or other metal in the same package with mutilated currency, as it may further damage the currency.

5.7.2.2.8. Send properly packaged currency to [the](#) BEP by registered mail (see subparagraph 5.7.2.1) [with](#) return receipt requested. Because the BEP issues written confirmation for cases that it expects to take longer than eight weeks to process, DOs should include a specific request to receive a written confirmation. A DO not receiving confirmation during this time initiates follow-up procedures with the BEP by email at mcdstatus@bep.gov or [by](#) telephone at (866) 575-2361.

5.7.3. Mutilated Coins. U.S. coins that are bent, broken, not whole, or fused and melted together are "mutilated." For additional information on mutilated coins, see the guidance under, [31 CFR 100, Subpart C](#). Refer questions on the disposition of mutilated or contaminated coins to the U.S. Mint's Office at (800) 872-6468, or contact DFAS-ZPTA/IN.

5.7.4. Worn Coins. Any FRB or branch will redeem at face value U.S. coins that are worn or reduced in weight by natural abrasion, yet are readily and clearly recognizable and machine countable.

5.7.5. Contaminated Currency

5.7.5.1. Contaminated currency is that which has been damaged by or exposed to contaminants or poses a health hazard or safety risk and cannot be processed under normal operating procedures. This does not apply to currency that has been exposed to a bio-terrorist agent (either biological or chemical). Contamination may result in currency emitting offensive odors and displaying mold-like conditions, and may be caused by the following:

5.7.5.1.1. Prolonged exposure to water or other liquids;

5.7.5.1.2. Exposure to blood, urine, other bodily fluids, or feces, including removal from any body cavity, corpse, or animal;

5.7.5.1.3. Exposure to sewage;

5.7.5.1.4. Exposure to any foreign substance or chemical, including dye-packs, which may pose a health hazard or safety risk; or

5.7.5.1.5. Mold or mildew.

5.7.5.2. The DO contacts the BEP by email at mcdstatus@bep.gov [or by telephone](#) at (866) 575-2361 to arrange an on-site BEP review or to obtain disposition instructions.

6.0 WEAPONS-FOR-CASH PROGRAM

6.1 Authorization

The weapons-for-cash program requires Secretary of Defense authorization. The senior operational commander provides funding authorization for weapons procurement. The total amount advanced to PAs under this program may not exceed this authorization. Before providing additional funds, the commander must adjust the authorization.

6.2 PAs

Use PAs to ensure successful operation of the program (see Chapter 2, paragraph 7.4). The DO advances cash following paragraph 4.2 in the currency of the country involved, referring to Chapter 13, section 3.0 for guidance on obtaining the required foreign currency.

6.3 Weapons Purchases

Proper accounting is required for each disbursement. Use a [SF 44](#), Purchase Order-Invoice-Voucher, or other available chain-of-custody type receipt. Each seller's receipt must include the seller's name and (if possible) identification number, weapon description and serial number, and amount disbursed. The PA ensures the seller's signature appears on the receipt. Prepare the original and three copies of the disbursement document (seller's receipt). Provide the original and one copy to the DO, attach one copy to the weapon (for inventory control), and give one copy to the seller.

6.4 Clearing or Replenishing the PA's Account

A PA prepares a DD 1081 for the total amount of all disbursement document vouchers turned in, which includes the original and one copy of each document (receipt), any residual cash advanced from the DO or designated representative, and a copy of the approval to establish a weapons-for-cash program. If replenishment of a PA's account is necessary, the PA prepares the DD 1081 as prescribed and submits it to the supporting DO who replenishes the PA's account for the approved amount shown on the DD 1081, subject to paragraph 4.2.

7.0 COUNTERFEIT OR ALTERED U.S. CURRENCY

7.1 Detected Before Acceptance

A DO confiscates U.S. currency presented for exchange or payment of an obligation to the United States that he or she determines is either counterfeit or altered, gives a receipt indicating the type, denomination, and amount of the confiscated currency to the person presenting it, and obtains information from that individual regarding the currency's source. The DO delivers the currency, by letter of transmittal with all available information, to either a representative of the appropriate investigative service (if available) or the nearest military security agency, obtaining a receipt in either case. Since such currency is suspect, no entries in the DO's accounts are required.

7.2 Detected After Acceptance

7.2.1. Reimbursement Obtained. Upon discovering counterfeit currency, the DO requests reimbursement from the source from which received and follows paragraph 7.1. No loss to the DO accrues, and no entries in the DO's accounts are required.

7.2.2. Reimbursement Not Obtained. If the source of counterfeit currency is unknown, or is known but reimbursement is not obtained, the DO delivers the currency, with a detailed report of all known circumstances, to either a representative of the appropriate investigative service (if available), or the nearest military security agency, obtaining a receipt in either case. Send the currency receipt with a signed copy of the DO's report by memorandum stating the reason why reimbursement was not obtained through the DO's commander to DFAS-ZPTC/IN, and report it on the SF 1219 as a physical loss of funds.

7.3 Detected [After](#) Depositing with Bank

When a bank operating a Treasury General Account (TGA) notifies a DO that the currency deposited by the DO is suspected to be counterfeit, the DO reimburses the TGA for that currency and obtains a receipt with the currency's description, stating that the currency is suspected to be counterfeit and has been withdrawn from circulation. The TGA surrenders any suspected counterfeit currency to the USSS and provides depositors with a photocopy of Secret Service Form 1604, Counterfeit Note Report, or any other documentation. The DO contacts the USSS to ascertain if the surrendered currency is counterfeit and must ensure that the TGA processes a deposit ticket for the amount of surrendered currency that the USSS determines is not counterfeit and credit the amount of the deposit ticket to the appropriation that funded the loss. Report the amount the USSS determines as counterfeit on the SF 1219 as a physical loss of funds.

7.4 Miscellaneous Cases

Send a description of any unusual counterfeit currency situation not specifically covered in section 7.0 to DFAS-ZPTA/IN for disposition instructions.

8.0 EMERGENCY DISPOSITION

8.1 Contingency Plans

DoD Component heads must develop and maintain contingency plans and standby procedures to dispose of cash and other assets under emergency conditions. These plans should address emergency conditions, emergency destruction, sudden destruction, and accounting for cash and other assets destroyed. They must include internal controls to minimize the potential risks of fraud, waste, and abuse. Emergency operations include, but are not limited to, combat and peacekeeping operations, humanitarian assistance efforts, noncombatant evacuation operations, disaster relief efforts, and disposal of contaminated cash.

8.2 Policy

8.2.1. Emergency Conditions. Under conditions that may require the evacuation, disposal, or destruction of cash and other assets, commanders execute their contingency plans. DOs or their designees will have to evacuate cash and other assets under these conditions (e.g., in anticipation of enemy action) to a designated safe haven (e.g., secured vaults or safes).

8.2.1.1. Cash and Other Assets. Upon initial notification of a threat that may require the destruction of cash and other assets, the DO, DDO, or other designee should determine cash requirements, recall or purchase excess cash, and evacuate it and other assets held at personal risk to a designated safe haven. If the DO, DDO, or commander determines that capture of these assets is possible, secure them in a manner that will minimize the risk of capture or destroy them following subparagraph 8.2.2.

8.2.1.2. Combustible Materials. If capture of funds is inevitable, burn paper currency, checks, and other burnable documents completely to ashes. If this is not possible, use chemical decomposition, shredding, or pulping. The alternative methods must render the items non-negotiable by completely destroying their original character and appearance.

8.2.1.3. Solid Substances. Dispose of coins and other valuable non-burnable items by scattering in deep bodies of water or physically destroying when possible. When no suitable bodies of water are present, discretely bury these items in the ground. Coins may also be fused or mutilated to make them unrecognizable. Fragment and scatter bars, ingots, and other units of precious or valuable substances, making their recovery impossible or at least uneconomical.

8.2.2. Emergency Destruction

8.2.2.1. Preparation

8.2.2.1.1. DOs and Their Agents. If time permits, the DO/DDO prepares the following forms or documents for the various disbursing media identified.

8.2.2.1.1.1. U.S. Currency. The DO/DDO prepares an original and three copies of a DoD [\(DD\) Form 2669](#), Destruction Schedule for Currency, for all U.S. currency to be destroyed, noting the reason in the space provided. For full or partial packages of new currency, note the beginning and ending serial numbers of each denomination. Destruction must be witnessed by three persons who are either U.S. commissioned or noncommissioned officers, or U.S. Government civilian employees who are U.S. citizens. The DO/DDO may serve as the third witness if one of the other two witnesses is senior in rank to the DO/DDO. Witnesses must enter their name, rank or grade, and signature in the spaces provided. A DO/DDO serving as a witness completes block 5 and the applicable section of block 8. Indicate the method of destruction in the space provided for the witnesses' certifications.

8.2.2.1.1.2. U.S. Coin. The DO/DDO prepares a DD 2669 for U.S. coin to be destroyed, including the same type of information required for U.S. currency, but listing the denominations and value of each denomination to be destroyed. The DO/DDO will cross out the preprinted denominations of paper currency and enter the coin denominations. Also, cross out “currency” and write “U.S. coin” immediately above it in both the DO’s/DDO’s and witnesses’ certification blocks (see subparagraph 8.2.2.1.1.1).

8.2.2.1.1.3. Check Stock. The DO/DDO prepares a listing (original and three copies) of the U.S. Treasury and LDA check stock to be destroyed, indicating the range (from and through) of check numbers for each series of checks maintained. See subparagraph 8.2.2.1.1.1 for destruction guidance.

8.2.2.1.1.4. Foreign Currency and Coin. The DO/DDO prepares a DD 2669 for foreign cash to be destroyed. Modify the appropriate areas of the form to identify the different denominations, prepare separate forms for currency and coins, and separate forms for public funds and those held for safekeeping (see subparagraph 8.2.2.1.1.1).

8.2.2.1.1.5. Signature Media. See subparagraph 8.2.1.3.

8.2.2.1.2. Nonappropriated Fund (NAF) Custodians and MBF and Other DoD-Sponsored Activity Managers. These activities may periodically exchange cash that exceeds day-to-day requirements for a U.S. Treasury check to reduce currency susceptible to loss.

8.2.2.1.2.1. U.S. Cash. When ordered by the commander, these activities deliver their U.S. cash to the nearest DoD DO/DDO in exchange for a U.S. Treasury check. The DO is then accountable for the cash. If an exchange cannot be made, the activity custodians or managers prepare a destruction schedule similar to the DD 2669 and, after verification, burn the currency to ashes in the presence of at least one activity representative and two U.S. commissioned or noncommissioned officers or U.S. Government civilian employees (see subparagraph 8.2.2.1.1.1).

8.2.2.1.2.2. Foreign Cash. If necessary to destroy foreign cash, the appropriate authority (e.g., NAF custodian, MBF, or other activity manager) transports it to the nearest DoD DO/DDO and exchanges it for a receipt stating that the foreign currency is being accepted for safekeeping and that neither the DO/DDO nor the U.S. Government is accountable for loss or destruction as a result of the existing emergency (see Chapter 16, section 2.0). A DO/DDO, having accepted the currency and coin, needing to use it to meet operational requirements, issues a U.S. Treasury exchange-for-cash check to the appropriate authority for the USDE of the foreign funds purchased. If destruction becomes necessary and time permits, the DO/DDO prepares a DD 2669. When an exchange cannot be made, the appropriate authority prepares a destruction schedule similar to the DD 2669 and after verification, burns the currency to ashes. See subparagraph 8.2.2.1.1.4 to dispose of foreign coin.

8.2.2.2. Precedence. DOs/DDOs in areas of elevated tension should anticipate the possibility of emergency destruction and maintain procedures to rapidly inventory and destroy their cash and other assets. If there is not enough time to destroy all funds held by the DO/DDO, prioritize the destruction as follows:

8.2.2.2.1. U.S. and foreign cash, and negotiable instruments carried as cash in the DO's accounts;

8.2.2.2.2. Blank U.S. Treasury checks;

8.2.2.2.3. Blank LDA checks;

8.2.2.2.4. Currency, negotiable instruments, and other valuables held for safekeeping;

8.2.2.2.5. Coins; and

8.2.2.2.6. Other valuables (e.g., signature media).

8.2.3. Sudden Destruction. When currency and coins are destroyed by explosion, fire, sinking of a vessel, or aircraft accident, the accountable DO prepares a written statement identifying the circumstances under which the destruction occurred and sends it with a request for relief of liability to DFAS-ZPTC/IN. If the DO does not survive the disaster that destroyed the funds, the officer designated to settle the account acts on the DO's behalf by reconstructing the accountability of the DO and initiating the appropriate requests for relief.

8.2.4. Accounting for Destroyed Cash and Other Assets. DOs account for destroyed currency, coin, and negotiable instruments that were held as public funds by entering on the DD 2657 and the SF 1219 and attaching copies of the supporting DD 2669 to both forms.

9.0 SAFEKEEPING U.S. SAVINGS BONDS

See Volume 7A, Chapter 43, paragraph 2.4.

y. Average USD Required based on Replenishment (x*v)	78,480
z. USD CHA (w+y)	\$108,480
aa. Total CHA (m+z)	\$180,005

Figure 3-1. Suggested Average Daily Cash Requirement (Continued)

Notes:

¹Maintain LDAs with checkbook balances as close to zero as possible by forecasting payment requirements in enough time to order currency to correspond with the payment due date. See Chapter 14.

²Value based on Monthly Worksheet Calculations.

³A higher CHA will be required if collections exceed disbursements. It is generally not cost effective to reconvert currency that may be required for disbursements in the near term.

⁴When recurring variance in demand occurs due to events such as paydays, compute a separate CHA for these periods and exclude it from normal non-peak calculations.

⁵Contingency requirements generally reflect emergency cash needs for operational missions or due to large fluctuations in demand that cannot be forecast in advance. Static requirements reflect subordinate agents, imprest funds, or contractual arrangements such as debit card pool accounts or MBF contingency cash. Validate agent requirements based on usage and frequency of returns/replenishment.

⁶See also subparagraph 2.3.1.

CHAPTER 4

ACCOMMODATION EXCHANGE

1.0 GENERAL

1.1 Overview

If adequate banking facilities are not available to provide personal check cashing and other accommodation exchange services, DoD Disbursing Officers (DOs) may provide these services within the guidance of this chapter.

1.2 Purpose

The purpose of this chapter is to provide policy on check cashing and other accommodation exchange services. This includes exchange of cash for negotiable instruments (including personal check cashing), eligibility for check cashing services, internal controls, accountability, and removal of deficiencies.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3342 ([31 U.S.C. § 3342](#)) allows DOs to provide check cashing and accommodation exchange services when authorized by the appropriate commander (i.e., a theater commander, base or installation commander, commanding officer or officer-in-charge, director of a supporting Defense Finance and Accounting Service (DFAS) site, or equivalent civilian head in the DO's chain of command) for eligible individuals (see paragraph 2.3).

2.0 EXCHANGE OF CASH FOR NEGOTIABLE INSTRUMENTS

2.1 Policy

2.1.1. In the United States, a commander may request the Director, DFAS or designee to authorize a DO to cash negotiable instruments. Submit requests, with justification, to DFAS, Enterprise Solutions and Standards, Disbursing (DFAS-JJFKCB/IN), 8899 E. 56th Street, Indianapolis, IN 46249-0050.

2.1.2. In overseas areas and for ships afloat, a commander may authorize the DO to cash negotiable instruments. The command must have a written check cashing policy approved by the theater commander or designee identifying the services to be offered and identifying the personnel eligible to receive them. The policy must provide that the DO may deny check cashing privileges to anyone based on the non-availability of cash or personnel resources. Resources must be available to provide these services without impacting levels of other financial services (e.g., primary disbursing and related functions).

2.2 Negotiable Instruments

A DO may cash U.S. Treasury checks, money orders, traveler's checks, third-party checks, state and local government checks, credit card checks, business checks, and personal checks payable in U.S. dollars for eligible payees. These instruments may be processed through the Over-the-Counter Channel Application (OTCnet) (see Chapter 11, paragraph 8.1). The DO accountability is not affected until the checks are reported in Treasury's OTCnet. Ensure that the appropriate DO Cash Treasury Account Symbol (TAS) is utilized along with the appropriate Business Event Type Code (BETC) when depositing accommodation exchange transactions.

2.3 Eligibility

Personnel permanently assigned to units in the area served by the DO are eligible for check cashing services. These include:

2.3.1. Members of the U.S. Armed Forces;

2.3.2. Civilian employees of the U.S. Government who are U.S. citizens;

2.3.3. A veteran hospitalized or living in an institution operated by an agency;

2.3.4. Contractors and their employees engaged in U.S. Government projects if the contractor is a U.S. firm and the employee is a U.S. citizen:

2.3.4.1. The company's on-site representative must furnish the DO with a list of employees authorized to cash personal checks and enter into a written agreement. The agreement must stipulate that the DO will suspend check cashing privileges for that company's employees if the DO receives a dishonored check written by a company employee and the DO cannot collect for the dishonored check; and

2.3.4.2. The DO will notify the company representative when a dishonored check is received from one of its employees and suspend check cashing services for all the company's employees. The suspension remains in effect until the DO collects on the dishonored check. The check cashing agreement is permanently terminated if the DO is unable to collect the dishonored check within 30 calendar days from the notification to the company representative;

2.3.5. U.S. citizens who are employees of authorized nongovernment agencies operating with U.S. Government agencies, (e.g., the American Red Cross);

2.3.6. Dependents of the personnel named in subparagraphs 2.3.1 and 2.3.2, as defined in 31 U.S.C. § 3342(b)(3)(A)-(B) and the Definitions Chapter.

2.3.6.1. At a U.S. installation at which adequate banking facilities are not available, and

2.3.6.2. Holding proper identification and powers of attorney and who possess valid DoD identification cards; or

2.3.6.3. Ordered to safe haven posts due to emergency evacuation (see Chapter 13, paragraph 3.3 for accommodation restrictions), and

2.3.6.4. In the case of negotiation of negotiable instruments, if the dependent's sponsor (as defined in the Definitions Chapter) authorizes, in writing, the presentation of negotiable instruments to the DO for negotiation.

2.3.7. Third-country national civilian employees under contract to the U.S. Government as contractors or subcontractors employed by U.S. firms engaged in U.S. Government projects in foreign countries with U.S. Treasury checks or U.S. dollar checks issued by the contractors;

2.3.8. A Federal credit union operating on U.S. military installations in a foreign country but only if that country does not permit contractor operated military banking facilities (MBF) to operate on installations;

2.3.9. Personnel on temporary duty/temporary additional duty (TDY/TAD) when approved by a DO's commander. These personnel must provide the DO a copy of their TDY/TAD orders and any other items of identification the DO may require;

2.3.10. An authorized agent, authorized by a properly executed power of attorney, for personal checks drawn on the account of a member; personal checks drawn on joint accounts to which the member is a party; and other checks drawn in favor of the member. The agent must present valid identification [during](#) all transactions. Restrictions that apply to benefiting members also apply to their agents under the terms of the executed DoD (DD) [Form 2761](#), Personal Check Cashing Agreement, which serves as a power of attorney; or

[*2.3.11. A member of the military forces of an allied or coalition nation who is participating in a combined operation, combined exercise, or combined humanitarian or peacekeeping mission with the Armed Forces of the United States, only if](#)

[2.3.11.1. Such disbursing official action for members of the military forces of that nation is approved by the senior United States military commander assigned to that operation, exercise, or mission; and](#)

[2.3.11.2. That nation has guaranteed payment for any deficiency resulting from such disbursing official action.](#)

2.4 Internal Controls

Commanders and other individuals in the chain of command are responsible for implementing and maintaining internal controls that preclude the fraudulent issuance and cashing of negotiable instruments. At a minimum:

2.4.1. All instruments are endorsed, “Pay to the Order of the Disbursing Officer, (name of ship, station, activity, unit, disbursing station symbol number, or the DFAS site);”

2.4.2. The payee(s) sign or endorse each instrument in the presence of the DO, a Deputy DO (DDO), the DO’s authorized agent, or a cashier;

2.4.3. The identity of the DDO, DO’s agent, or cashier cashing the instrument must be clearly identifiable on that instrument, and the person cashing the instrument may be held pecuniarily liable if the instrument is altered or forged. The DO may also be held pecuniarily liable if the instrument becomes nonnegotiable and their identity is not apparent; and

2.4.4. The person cashing a negotiable instrument must properly verify the identity of the person(s) presenting the instrument. Record the payee(s) or endorser(s) identification (e.g., legible name, social security number (SSN), phone number, and identification card number and duty station (if applicable)) on the negotiable instrument. This allows recovery to be made if the instrument is dishonored. A DO may institute an alternate to annotating this information on a check by the use of the DD 2761. Use of the DD 2761 would alleviate concerns of identity theft such as the SSN. Attach a photocopy of the negotiated check to the DD 2761 and file for records retention.

3.0 CASHING PERSONAL CHECKS

3.1 Check Cashing

3.1.1. All authorized military and appropriated fund civilian personnel who request check cashing privileges must consent in writing to immediate collection against their pay for the total of any dishonored check. Dishonored checks are not delinquent debts. There is no authority for the DO to assess a service charge (penalty), but recover any insufficient fund charges assessed on the DO by financial institutions. Depending on the circumstances, the DO has two options:

3.1.1.1. Option 1. DD 2761:

3.1.1.1.1. The DO uses this form if the individual’s payroll office is unknown or when cashing a check for a civilian employee or an authorized agent of a civilian employee or military member.

3.1.1.1.2. The term “authorized agent,” as used on this form, pertains to an individual, usually a dependent, authorized by a power of attorney to cash personal checks on behalf of a member or civilian employee as prescribed in this chapter.

3.1.1.1.3. Proper use of this form precludes the need for a separate power of attorney on behalf of the individual requesting check cashing service. The member or employee appoints an agent by providing a name(s) in the block titled “Authorized Agent,” and signs the form. The person cashing the check must verify the agent’s signature against a valid form of identification when the check is presented.

3.1.1.2. Option 2. Authorized Statement: A statement stamped on the front of the personal check may be used only for military members and civilian appropriated fund employees.

3.1.1.2.1. If the individual's payroll office is known, the DO may order a rubber stamp in small type to be placed on the front of the check along the top margin or above the bank's name and address (see Figure 4-1). The stamp must state:

"I consent to immediate collection from my pay the amount of this check plus bank charges, if this check is dishonored (individual's initials)."

3.1.1.2.2. The DO (or authorized agent) stamps this statement on the front of the check in the presence of the individual and ensures the individual places his or her initials at the end of the statement to validate immediate collection from the individual's pay account if the check is later dishonored.

3.1.1.2.3. If the stamp is used, record adequate payee identification (verified against a valid identification card) on the negotiable instrument to facilitate recovery if the instrument is dishonored (see section 4.0).

3.1.2. The following items are the responsibilities of DO and their authorized agents when pay account collection for dishonored personal checks becomes necessary.

3.1.2.1. When a military member is in the same DoD Component and the DO maintains the member's account:

3.1.2.1.1. Immediate deduction from the pay account is authorized for the face value of the dishonored check(s) plus any charges assessed against the DO by a financial institution for their processing.

3.1.2.1.2. DO may not use partial payments as a means of resolving a dishonored check.

3.1.2.2. When a military member is from a different Military Service or from the same component and paragraph 3.2 does not apply (e.g., retirees, members on transfer orders, on TDY/TAD, or in any other transitory status):

3.1.2.2.1. When using the DD 2761, the DO makes copies of the form (front and back), certifies on the back that the individual consented to voluntary collection, and sends it to the appropriate component payroll office (see Table 4-1) to affect the pay account deduction and make restitution to the negotiating DO. The payroll office annotates the back of the DD 2761 specifying the action taken for each dishonored check listed:

3.1.2.2.2. When a rubber stamp is used on the face of a check, the DO prepares a DD 139, Pay Adjustment Authorization, by component as follows:

3.1.2.2.2.1. Attach a listing showing each military member's name, DoD Component, SSN, unit or duty station, and check amount(s), along with copies of the check(s) (front and back). If the depository adds a fee to the amount of the dishonored check, include a copy of the debit voucher to substantiate its inclusion in the total amount of the deduction. Send all required documents to the appropriate payroll office at the mailing address in Table 4-1 to accomplish pay account deduction.

3.1.2.2.2.2. Certify that the military members consented to voluntary collection by typing the following certification statement on the DD 139 in the block titled "Explanation and/or Reason for Adjustment."

"I certify that these collections are the result of dishonored personal checks cashed by the cited individuals for the amounts stated. Each individual has consented, in writing, that in consideration for cashing the individual's personal check(s), the amount of any check returned unpaid, plus any charges assessed against the DO by a financial institution, for any reason may be collected from the individual's pay."

3.1.2.3. For dishonored personal checks from authorized appropriated fund civilian employees:

3.1.2.3.1. Immediate pay account deductions are authorized for the face value of dishonored checks plus any charges assessed against the DO by financial institutions.

3.1.2.3.2. The DO prepares a [DD 2481](#), Request for Recovery of Debt Due the United States by Salary Offset, attaching copies of the front and back of the check(s), and a copy of the DD 2761, if applicable. If the depository adds a fee to the amount of the dishonored check, attach a copy of the debit voucher to substantiate its inclusion in the amount of the pay account deduction. Send all documents to the appropriate payroll office (see Table 4-1).

3.1.2.4. When a check is returned for a contract employee, the DO must immediately seek reimbursement from the company employee, as indicated in the employee's company agreement.

3.1.3. When collection action becomes necessary and the payroll office receives a DD 139 or DD 2761 from the DO, the payroll office:

3.1.3.1. Processes the account deduction using normal payroll procedures;

3.1.3.2. When possible, includes a statement similar to, "Consensual collection action for a dishonored check" in the remarks column of the leave and earnings statement; and

3.1.3.3. Annotates, after collection of the debt, the DD 139 or DD 2761 with the action taken for the dishonored check(s) and returns the document together with a certified casual payment voucher. This voucher must be charged to the service member's pay account for the amount of the dishonored check to support the DO's issuance of an exchange-for-cash check payable to the disbursing office holding the dishonored check, to support the Standard Form (SF) 1219, Statement of Accountability.

3.1.4. If a military member or DoD civilian employee is separated or has resigned and cannot be located to make restitution, the DO follows section 5.0.

3.1.5. Writing checks in advance of the availability of funds (floating a check) is illegal. Deny check cashing privileges to individuals who abuse it by writing checks against insufficient funds.

3.1.6. Retain check cashing documents as follows:

3.1.6.1. The DO keeps the original signed DD 2761 for all personal checks honored. See Volume 1, Chapter 9, section 2.0 for records retention policy.

3.1.6.2. For all dishonored checks, keep the original DD 2761 with the dishonored check file until resolved. If the consent statement is stamped on the front of the check and the check is dishonored, the DO, deputies, agents, or cashiers make copies of the front and back (if applicable) of the check. Keep a copy of the check along with a copy of the agreement if the individual is a contractor until the matter is resolved.

3.2 Limitations

3.2.1. Commanders establish maximum amounts for cashing personal checks by authorized personnel and/or their agents. In overseas areas where personnel of two or more Services are operating, the senior commander ensures the existence of a uniform policy to provide check cashing privileges within sound financial management practices. The policy and applicable limits are based on the circumstances of the local economy and cost-of-living. The supporting DO should publish deviations from established command maximum limits for each exception.

3.2.2. The DO provides a copy of an authorization to exceed the established limit when requesting removal of deficiencies involving uncollectible insufficient fund checks and associated charges that may be assessed by financial institutions for personal checks they have cashed (see section 4.0). Personal checks being cashed must be drawn in multiples of 5 dollars unless local conditions make that increment impractical. U.S. Treasury checks or checks issued by banks, or other similar financial institutions may be cashed without regard to a dollar amount.

3.2.3. Checks must be drawn on U.S. financial institutions, overseas branches of U.S. banks or credit unions, or overseas MBFs operated under U.S. Government contract. Checks must also be payable in U.S. dollars through U.S. banks or credit unions, to include banks located in the Commonwealth of Puerto Rico, U.S. Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands. The DO establishes the days and hours during which check cashing service is available and makes appropriate notification of any changes.

3.2.4. Paragraph 2.3 governs suspension of check cashing privileges for contractors and their employees engaged in U.S. Government projects who have written dishonored checks.

3.3 Exceptions

A DO of a naval vessel may cash personal checks for crew members when the vessel is in a U.S. port and adequate check cashing facilities are neither available nor adequate for nonresidents of the area. A non-tactical disbursing activity in the United States may provide check cashing service when a unit, squadron, or detachment without a DO or disbursing capability is performing TDY/TAD away from its permanent station or homeport where adequate check cashing facilities are not available. This authority applies when units, squadrons, or detachments are engaged in training or exercises that preclude use of available check cashing facilities. For situations not described in section 2.0, a commander may request the Director, DFAS or designee [to](#) authorize check cashing services. Submit the request following subparagraph 2.1.1.

4.0 ACCOUNTABILITY FOR DISHONORED CHECKS

4.1 Checks Accepted From External Activities

DOs who accept checks from external activities for the sale or transfer of something of value (e.g., property disposal sales, clothing sales, commissary sales, ships stores, housing offices, or similar activities) which a depositary later returns unpaid on a debit voucher must record the debit voucher on the [DD 2657](#), Daily Statement of Accountability, as a reduction of deposits, prepare a reverse collection voucher as a reduction of reimbursements, and send one copy of the collection voucher and one copy of the dishonored check to the collection activity concerned. All dishonored checks are returned by the Treasury on a debit voucher and automatically classified back to the TAS annotated on the OTCnet deposit ticket. Collection activities are responsible to pursue collection action in accordance with their regulations and Volume 16, Chapter 2. Since these checks were collected into an appropriation and subsequently reversed, there is no deficiency in the DO's accountability.

4.2 Checks Accepted to Satisfy an Obligation (Debt) Due the United States

Checks accepted from external activities or to satisfy an obligation (debt) due the United States will not impact the DO Cash TAS and will be classified under a program TAS. DOs who accept checks to satisfy a debt to the United States (e.g., overpayment of travel allowances) which later are returned unpaid by a depository must follow paragraph 4.1. The activity responsible for originating the charge (e.g., military pay, travel pay, or similar entitlement area) reestablishes the debt based on the dishonored check and the reverse collection voucher and pursues collection action in accordance with their regulations and Volume 16, Chapter 2. A DO who is the collecting officer for these types of dishonored checks initiates collection action following Volume 16, Chapter 2. Since these checks were collected into an appropriation and subsequently reversed, there is no deficiency in the DO's accountability.

4.3 Checks Received as Accommodation Exchange Transactions

Checks accepted in check cashing transactions authorized by 31 U.S.C. § 3342 which are later returned unpaid by a depository on a debit voucher must be recorded on the DD 2657 as decreases to deposits and increases to dishonored checks receivable. Dishonored checks related to accommodation exchange transactions will impact the DO Cash TAS and stay on the DO accountability until recouped or when the uncollectible receivable is processed for removal from accountability as provided in the Chapter 6, subparagraph 4.2.1.1. Unlike the checks discussed in paragraphs 4.1 and 4.2 consider these as erroneous payments because public funds have been disbursed. DOs pursue collection of these checks following section 3.0 and Volume 16, Chapter 2, section 2.0. If the checks become uncollectible, the DO reports the losses and requests removal of the deficiencies through the [Loss of Funds Team](#), [DFAS Accounting and Finance Policy Division](#), [DFAS Indianapolis \(DFAS-ZPTA\)](#), [Location 220V](#), 8899 E. 56th Street, Indianapolis, IN 46249 (see section 5.0).

5.0 REMOVAL OF DEFICIENCIES

5.1 Request for Removal

5.1.1. Upon notification that a check has been dishonored, start collection action immediately and pursue it through recovery. If the DO has followed the check cashing policy and collection requirements in section 3.0 and Volume 16, Chapter 2, section 2.0, removal of deficiencies normally is authorized under 31 U.S.C. § 3342. If the debtor is no longer employed, in the military service, or is an inactive reservist, and all attempts to collect have been exhausted, the DO sends a written request for removal of the deficiency to [DFAS-ZPTA](#) (see Figure 4-2) through their command channels. The request must include:

5.1.1.1. The original or a copy of the front and back of the uncollectible check;

5.1.1.2. A copy of the related debit voucher;

5.1.1.3. Copies of the documents presented in section 3.0, to include the latest available information regarding the debtor's location;

5.1.1.4. A copy of the command's check cashing policy;

5.1.1.5. A copy of the one-time authority to exceed the command's normal check amount, if applicable; and

5.1.1.6. A copy of the request for the DFAS payroll site to pursue collection action against the delinquent debtor.

5.1.2. If the DO has followed the check cashing policy and collection requirements in section 3.0 and Volume 16, Chapter 2, section 2.0, removal of deficiencies normally is authorized under 31 U.S.C. § 3342. If DFAS-ZPTA approves removal of the deficiency, it sends the requesting DO a memorandum authorizing a charge to [Treasury Account Symbol \(account\) ***6763, Gains and Deficiencies on Exchange Transactions](#). The removal of deficiency transaction will impact the DO Cash TAS. Process the removal of deficiency with a Classification Transactions and Accountability transaction citing account ***6763 and BETC and the appropriate DO Cash TAS/BETC. The DO sends a copy of the memorandum to the activity to which it submits financial reports. DFAS-ZPTA advises the Debt and Claims Management Office to continue attempts to recover the debt and, if successful, credit the appropriation charged when the deficiency is removed as a result of successful debt recovery processes. If DFAS-ZPTA does not authorize removal of the deficiency, the deficiency cannot be charged to [account ***6763](#), and the DO can either repay the loss or request relief of liability as prescribed in Chapter 6, section 6.0.

5.2 Lost Dishonored Check

If a dishonored check held in the disbursing office is lost, consider it a physical loss of funds (see Chapter 6, section 4.0).

5.3 Forgeries and Other Unusual Cases

If a forged check is processed and paid, a loss of funds investigation is required (see Chapter 6, section 4.0). If the investigation is unable to identify the forger, or if recovery from this person cannot be accomplished, the DO, DDO, agent, or cashier who cashed the forged instrument will be liable for the loss but may be eligible for relief of liability (see Chapter 6, section 6.0). As such, the DO, DDO, agent, or cashier may submit a request for relief of liability to DFAS-ZPTA for the improper payment. The request should include a copy of the investigation results, all related documents, and a description of the procedures used to preclude forgery.

6.0 REDEEMING SAVINGS BONDS IN OVERSEAS AREAS

6.1 General

MBFs are authorized to redeem savings bonds in overseas areas. Where none are available, DOs may request this authorization through their chain of command. This is the only situation where

DOs may redeem savings bonds. Disbursing offices with current authority to redeem savings bonds may continue this service providing no changes in area support by a local MBF has occurred.

6.2 Cashing Bonds

6.2.1. Authorized DOs. The DO authorized to redeem savings bonds must use the [savings bond calculator](#) found at the [Treasury Direct](#) website. Series EE and I Bonds issued after February 2003 must be at least 12 months old based on the date of issue before the DO may redeem them.

6.2.2. Redeemed Bonds. Return redeemed bonds on a separate deposit ticket following instructions provided by the servicing Federal Reserve Bank.

6.2.3. Discrepancies. Upon discovery that an amount was paid different from that authorized by the applicable redemption table, report the variance on the DD 2657, and either pay the amount of underpayment (using an SF 1034, Public Voucher for Purchases and Services Other Than Personal), or attempt to recover the overpayment from the payee. If the collection of the overpayment is made, prepare an [Optional Form 1017-G](#), Journal Voucher, to document the collection and record the transaction as a decrease and an increase to cash. If the collection is not made, process the shortage as a physical loss of funds as prescribed in Chapter 6, section 4.0.

6.2.4. Internal Revenue Service (IRS) Form 1099-INT, Statement for Recipients of Interest Income. The DO issues an [IRS 1099-INT](#), Interest Income, to recipients of \$10 or more in interest paid on redeemed savings bonds. This form includes the amount of interest paid, name, address, Taxpayer Identification Number (usually the bondholder's SSN), name of the person paid, and other information needed by the IRS. DOs are prohibited from cashing bonds for individuals who refuse to furnish their SSN. Since individuals redeeming bonds may change their address without notification by calendar year-end, DOs should furnish the form to the recipient at the time of the transaction.

Figure 4-2. Sample of a Request for Removal of Deficiency Due to Dishonored Checks

(Letterhead Block)

Date

MEMORANDUM FOR: RELIEF OF LIABILITY SECTION, DISBURSING POLICY
DIVISION, DFAS INDIANAPOLIS (DFAS-ZPFA/IN), 8899 E.
56TH STREET, INDIANAPOLIS, IN 46249-0500

SUBJECT: Request for Removal of Deficiency

I request removal of deficiency under the provisions of Department of Defense Financial Management Regulation, Volume 5, Chapter 4, paragraph 5.1, for the following dishonored checks accepted as accommodation exchange transactions. This deficiency is carried on the accountability of disbursing station symbol number XXXX under the account holder Captain XXXXXXXX.

<u>NAME</u>	<u>SSN</u>	<u>CHECK #</u>	<u>DATE</u>	<u>AMOUNT</u>
Irwin XXXXXXX	xxx-xx-xxxx	185	July 15, 2017	\$150.00
James XXXXX	xxx-xx-xxxx	422	July 28, 2017	\$150.00
		TOTAL		\$300.00

This office has exhausted all means of collection. These individuals are no longer employed in an active duty, reserve, or civilian capacity for the U.S. Government. Members have been notified of their debt and have not responded to the collection letter. Attached are the dishonored check(s), copy of applicable debit voucher(s), copy of the applicable check cashing policy, and the documentation supporting attempted collections.

If you have any questions, please contact Mr. John Doe, at DSN ###-#####, phone (###) ###-#####, or by email: John.Doe.civ@mail.mil.

CHAPTER 5

**CERTIFYING OFFICERS, DEPARTMENTAL
ACCOUNTABLE OFFICIALS, AND REVIEW OFFICIALS**

1.0 GENERAL

1.1 Overview

The DoD recognizes the difficulty of any single official exercising direct personal control over all aspects of each business transaction. Therefore, DoD relies on automated systems and accountable officials (AO) to ensure accountability of government funds including the accuracy, propriety, and legality of every payment.

1.1.1. An AO is a member of the U.S. Armed Forces or DoD civilian employee to whom public funds are entrusted or who participates in the process of certifying vouchers for payment in connection with the performance of government business. AO include disbursing officers (DOs), deputy disbursing officers (DDOs), disbursing agents, cashiers, imprest fund cashiers, change fund custodians, paying and collection agents, certifying officers (COs), and departmental (DAO).

1.1.2. This chapter addresses COs and DAOs. COs are AO designated to attest to the correctness of statements, facts, accounts, and amounts appearing on a voucher, or other documents. DAOs are AO that provide information, data, or services that COs rely on to certify vouchers.

1.2 Purpose

This chapter addresses the selection, appointment, responsibilities, and qualifications for COs; certification of vouchers for payment; DAOs; random review of disbursement vouchers; and pecuniary liability.

1.3 Authoritative Guidance

1.3.1. COs. Under Title 31, United States Code (U.S.C.), section 3325(a)(1) and (b), ([31 U.S.C. § 3325\(a\)\(1\) and \(b\)](#)), a DoD disbursing official may disburse money only as provided by a voucher certified by the Secretary of Defense (SecDef), an officer or employee of the DoD, or member of the U.S. Armed Forces having written authorization from the SecDef to certify vouchers.

1.3.2. DAOs. Under [10 U.S.C. § 2773a](#), the SecDef may designate any DoD civilian employee or member of the U.S. Armed Forces under the Secretary's jurisdiction as a DAO. In the performance of their duties, DAOs are responsible for providing COs with information, data, or services that are directly relied upon by the CO in the certification of vouchers for payment.

2.0 POLICY

2.1 Authority to Appoint

The [DoD Directive 5118.03](#) delegates authority to appoint COs under 31 U.S.C. § 3325(a)(1) and (b), and DAOs under 10 U.S.C. § 2773a to the Under Secretary of Defense (Comptroller) (USD(C)). This volume re-delegates that authority to DoD Component Heads, who may further re-delegate that authority. See Chapter 2, [section 3.0](#) for policy on who may be appointed to positions of accountability to the U.S.

2.1.1. Based on the separation of duties principles cited in Chapter 1, subparagraph 3.5.2, DOs, their deputies, and agents may neither be appointed as, nor appoint COs for payments they will eventually make. See subparagraph 3.1.2 for conditions that may require deviation from normal separation of duties requirements.

2.1.1.1. DOs and DDOs may certify cover vouchers supported by properly certified sub-vouchers; see Chapter 9, paragraph 4.9.

2.1.1.2. Where a DO supervises separate computation and disbursing functions, persons in the computation section may be COs. In limited situations (e.g., afloat units, noncombatant evacuations, contingency operations, training exercises), disbursing office personnel may be appointed as COs. Make these appointments through command channels, excluding the DO, and describe the circumstances in Item 7 of the appointing DoD [\(DD\) Form 577](#), Appointment/Termination Record-Authorized Signature.

2.1.2. DoD personnel who may be appointed to certify vouchers for payment include, but are not limited to, commanders, deputy commanders, resource managers and other key funds control personnel, travel authorizing officials, purchase card and centrally billed account (CBA) approving officials, and other personnel in equivalent positions. For example, a traveler's supervisor could be a travel authorizing official and a CO. See paragraph 3.4 for CO requirements and section 4.0 for policy on appointments.

2.1.3. The same person may not serve as both a DAO and CO for the same types of payments.

2.2 Certification of Funds Availability vs. Certification of a Payment Voucher

2.2.1. Certification of Funds Availability. As key funds control personnel, resource managers must certify funds availability before goods and/or services are ordered based on funding authorizations that allow incurrence of obligations for which the U.S. Government will make a payment at some future date (see paragraph 3.3). This does not create pecuniary liability consequences under either [31 U.S.C. § 3527](#) or [31 U.S.C. § 3528](#) (see also paragraph 7.1), but may have Antideficiency Act implications (see Volume 14, Chapter 2).

2.2.2. Certification of a Voucher for Payment. This is an attestation by a properly appointed and trained CO that a voucher is correct and proper for payment. Such a certification normally occurs before payment, but may occur simultaneously with receipt of and payment for goods and/or services, particularly in tactical situations. Only persons properly appointed on a DD 577 may make these certifications; see sections 4.0 and 5.0.

3.0 RESPONSIBILITIES

3.1 Appointing Authorities

DoD Component Heads or their designees:

3.1.1. May appoint COs and DAOs, other than themselves, and terminate appointments when required (see paragraph 4.1);

3.1.2. Oversee the appointees and their execution of the duties described in paragraphs 3.4 and 3.5. In cases involving micro-purchases in support of contingency operations, to balance mission accomplishment with acceptable risk and cost benefit, it may be necessary to deviate from normal separation of duties and internal control principles required by Chapter 1, paragraph 3.5 and [Chapter 1](#), subparagraph 3.5.2, and the policy in subparagraph 2.1.3. Deviations are at the discretion of the commander, who must be aware of the increased possibility of the risk of errors, theft, and fraud that may result from the merging of payment certification responsibilities with other functions. Because such mergers may compromise internal controls, commanders must make every effort to mitigate these risks. Post-payment reviews, rotation of duties, reviews of financial data, and reports by management or external resources are tools available to mitigate these risks. The micro-purchase threshold is defined by the [*Federal Acquisition Regulation Subpart 2.101*](#); and

3.1.3. Implement controls to effect timely appointment terminations.

3.2 Supervisors

Supervisors ensure that subordinate COs and DAOs are trained in their responsibilities, including initial training and refresher training annually (see subparagraphs [3.4.1.2](#) and [3.5.2](#)); periodically review their performance to ensure compliance with established regulations, policies, and procedures, including local standard operating procedures; review appointments annually for validity and current status; and make appropriate recommendations for change to appointing authorities.

3.3 Key Fund Control Personnel

Resource managers or other key fund **control** personnel maintaining a system of funds control are responsible for certifying funds availability, and assignment of proper funding citations on commitment and obligating documents. Key fund control personnel should coordinate with requiring officials, such as program managers, contracting officers, and engineers, to verify that requests comply with funding statutes applicable to the assignment of funding on a commitment or obligation document and that the structure of the obligating document will support that capital and expensed items are listed on different line items. This coordination should include ensuring delivery of supplies and/or the period of performance for service aligns with the lifecycle of the associated funds such that the obligation meets the bona fide need rules as described in Volume 3, Chapter 8, subparagraph 3.4.1. A certification of funds availability is not a certification for payment (see paragraph 2.2 and Volume 14, Chapter 2).

3.4 COs

3.4.1. Qualifications. COs:

3.4.1.1. Must have knowledge of the subject matter, background, or experience in the preparation of a voucher for payment; appropriations and other funds and accounting classifications; and the payment process (e.g., location of designated paying and accounting offices). See paragraph 2.2;

3.4.1.2. Must complete an approved “Certifying Officer Legislation” training course applicable to their mission area prior to their appointment and refresher training annually and provide proof of completion to their supervisor. Evidence of having completed this training is required prior to performing as a CO. On-the-job training is not acceptable.

3.4.2. Responsibilities. COs must ensure that the automated and manual processes supporting their voucher certifications reasonably satisfy the requirements listed under Treasury Financial Manual (TFM), Volume 1, Part 4A, Chapter 2000 ([***ITFM 4A-2000***](#)), as well as:

3.4.2.1. Check the accuracy of facts stated on a voucher and in supporting documents and records, and may rely on data received from reliable automated systems that have been certified as compliant with the Federal Financial Management Improvement Act of 1996 (FFMIA) (see Volume 1, Chapter 3);

3.4.2.2. Verify the accuracy of computation of a voucher before certification;

3.4.2.3. Determine the legality of a proposed payment from the appropriation or fund cited on the voucher (see Chapter 1, paragraph 3.6 for policy on prohibited payments);

3.4.2.4. Ensure there is a legal obligation to pay (e.g., a contract);

3.4.2.5. Ensure the payee has fulfilled the prerequisites to payment (e.g., an invoice, receiving report, approved travel claim);

3.4.2.6. Ensure the payment is legal under the appropriation or fund involved (e.g., the correct appropriation and fiscal year);

3.4.2.7. Seek advance decisions on questionable vouchers; see Chapter 12, section 3.0;

3.4.2.8. Repay a payment:

3.4.2.8.1. Determined to be erroneous (e.g., illegal, improper, or incorrect) due to an inaccurate or misleading certification;

3.4.2.8.2. Prohibited by law; or

3.4.2.8.3. Not a legal obligation of the fund or appropriation cited; unless the payment is recovered by collection or offset from the payee or another source, (e.g., collected from a DAO or relief is granted under subsections (b) or (c) of 31 U.S.C. § 3528; also see Chapter 6, subparagraph 6.4.3);

3.4.2.9. Respond timely to a reviewing official's questionable-payment inquiry; and

3.4.2.10. Include the payee's Tax Identification Number (for businesses) or Social Security Number (for individuals).

3.4.3. Pecuniary Liability. See subparagraph 7.1.2.

3.4.4. DoD Employees Serving as Treasury COs. The guidance in this section applies to DoD employees appointed as Treasury COs and are delegated the authority to certify the disbursement of funds, as well as scheduling and classifying domestic and international payments that the Bureau of the Fiscal Service disburses, as authorized by the Treasury Disbursing Office. For more information on the Treasury Disbursing Office, see Chapter 9, section 6.0.

3.4.4.1. Treasury COs

COs that certify Treasury-disbursed payments must be appointed utilizing the Bureau of the Fiscal Service Form 210CO, Designation for Certifying Officer, and not the DD 577, unless also serving as a COs for DoD disbursed payments by a Non-Treasury Disbursement Offices (NTDO). Treasury appointed COs designations are valid for a period of one year from the effective date, unless revoked earlier. See [*1 TFM 4A-3000*](#) for all requirements and forms for scheduling payments disbursed by the Bureau of the Fiscal Service.

3.4.4.2. Treasury CO's Pecuniary Liability

All (AO)s are subject to the pecuniary liability standard under 31 U.S.C. [§ 3527 and 3528](#) (see Chapter 6, paragraph 1.3). Treasury COs are pecuniarily liable when there is a fiscal irregularity based on the “presumption of negligence,” regardless if the payment was disbursed by the Treasury or an NTDO. See Chapter 6, sections 6.0 and 7.0 for policy concerning relief of liability of (AO)s.

3.5 DAOs

3.5.1. DAOs are responsible in the performance of their duties to provide COs with information, data, or services to support the payment certification process. They have unique mission area responsibilities that require supervisors and appointing officials to not only decide if DAO appointments are required, but also define clearly each DAO's functions. Appointment of DAOs is not mandatory; examples of persons whose duties could be considered as appropriate to support their being appointed as DAOs include, but are not limited to, receiving officials, contracting officers, personnel who make payment eligibility determinations, time and attendance personnel, and travel approving officials. Consider personnel in the following areas for appointment as DAOs:

3.5.1.1. Purchase Card Program. Approving officials may be appointed as COs with the additional responsibilities outlined in subparagraph 3.4.2. Other personnel involved with the purchase card program may be appointed as DAOs (see Volume 10, Chapter 23).

3.5.1.2. Contract and Vendor Pay. See Volume 10.

3.5.1.3. CBA. See [DoD Instruction 5154.31, Volume 4](#) or [Government Travel Charge Card Regulations, paragraph 040903](#).

3.5.1.4. Personnel Programs. Personnel officers ensure accurate and timely input of personnel data supporting payments.

3.5.1.4.1. Military Pay. See Volume 7A.

3.5.1.4.2. Civilian Pay. See Volume 8.

3.5.1.4.3. Travel. See Volume 9.

3.5.2. DAOs must complete approved training applicable to their mission areas within two weeks of their appointment, refresher training annually, and provide a copy of their training completion certificate to their supervisor. Evidence of having completed this training is required prior to performing as a DAO. See subparagraph 2.1.1 for appointment eligibility, and subparagraph 7.1.3 for pecuniary liability implications.

3.6 Automated Information System (AIS) Administrators

In addition to other responsibilities, AIS administrators operate and maintain automated system(s) that support the entitlement, certifying, and disbursing processes so that these system(s) operate in accordance with prescribed functional requirements so that the integrity of the data is maintained and unauthorized access is prevented. They must also ensure that the systems they administer are certified as compliant with the FFMIA; see Volume 1, Chapter 3.

4.0 DD 577

4.1 Appointment and Termination

Appointing authorities (see paragraph 3.1) appoint and terminate the appointments of COs and DAOs using a DD 577, identifying as necessary the types of payments to be certified (e.g., vendor pay, purchase card, CBAs, travel, transportation, military and civilian pay) and, if appropriate, the entitlement system(s) involved. Avoid the term “various” and similar generalities when identifying types of vouchers to be certified. If desired, include the reviewing official’s organization on the appointment. The effective date of an Appointee Acknowledgment (Item 15 or 16a - Digital) may not be earlier than the date of the Appointing Authority (Item 12).

4.1.1. Include the appointee’s DoD Identification Number (employee number for direct-hire, non-U.S. citizen outside the U.S.), name, organization, and position. Limit the access to any personally identifiable information to only those who require it in the performance of their duties and are following the Privacy Act of 1974 ([5 U.S.C. § 552a](#)).

4.1.2. When appointing employees outside the U.S. who are precluded by local law, treaty, or status of forces agreement from being held pecuniarily liable to the U.S. (see Chapter 1, subparagraph 3.3.3.3), make an appropriate comment in Item 7.

4.1.3. Appointees acknowledge their appointment in Section III; they may not re-delegate their appointed authority.

4.1.4. Appointments remain in force until terminated by an appointee’s reassignment or for cause. An appointing authority’s reassignment does not affect existing appointments.

4.1.5. COs who certify vouchers electronically, (e.g., Defense Travel System), must submit the DD 577 electronically, satisfying the requirements in Chapter 1, subparagraph 3.5.3.

4.1.6. COs who certify manual vouchers or submit manual certifications of electronic payments must submit original, manually signed DD 577s (see subparagraph 4.2.1.1) or supplemental documents to support electronic DD 577 submissions.

4.1.7. These forms cannot be amended. Pen-and-ink changes are not authorized. Any change (e.g., to alter the types of vouchers to be certified) requires termination of the existing and preparation of a new appointment.

4.1.8. Terminate appointments using Section IV and submit the DD 577 to all recipients who received copies of the original appointment.

4.2 Distribution

4.2.1. CO Appointments. Ensure the training required by subparagraph 3.4.1.2 is complete before submission.

4.2.1.1. Payments Certified to Defense Finance and Accounting Service (DFAS) DOs. Send the form to the DFAS Indianapolis (DFAS-IN) DO (secure email: dfas.indianapolis-in.jfd.mbx.dfas-incddd577@mail.mil) following that office's guidance. Forms sent as attachments must be copies of original DD 577s, not "copies of copies."

4.2.1.2. Government-wide Purchase Card (GPC). DoD components that follow the guidance in the [GPC Policy Guidebook](#) for CO appointments/termination are not required to follow the submission guidance in subparagraph 4.2.1.1 for payments that are electronically certified. COs who certify manual vouchers must continue to follow the guidance outlined in subparagraph 4.1.6.

4.2.1.3. Payments Certified to non-DFAS DOs. Send the form following the paying DO's instructions.

4.2.1.4. Immediate Payment. Fax or email a signed copy of the form to the appropriate DO. Follow up with a normal submission.

4.2.2. DAO Appointments. Appointing authorities ensure completion of the training required by subparagraph 3.5.2, keep the signed original DD 577s, and send copies to the offices that certify vouchers. Offices and organizations that rely on DAOs must establish and implement mechanisms for identifying and facilitating communication with them.

4.2.3. Appointment Terminations. See subparagraph 4.1.8.

4.3 Retention Requirements

Keep DD 577 copies after appointment termination for a retention period following the guidance in Volume 1, Chapter 9; except for transactions affecting Foreign Military Sales, use a retention period following the guidance in Volume 15, Chapter 6.

5.0 CERTIFICATION

5.1 Voucher Certification

All payments from appropriated funds must be certified (excludes intra-governmental); see the [Government Accountability Office \(GAO\), Policy and Procedures Manual](#), section 6.5. COs review payment vouchers before certification and submission to DOs for payment to ensure the information on the vouchers agrees with all supporting documentation. See Chapter 9, paragraph 4.3 for voucher certification requirements and Volume 1, Chapter 9 for records retention policy.

5.2 Effect of Certification

COs certify to, not “for” or “on behalf of,” DOs or their agents that vouchers are correct and proper for payment from the appropriation(s) or other funds cited on them or on supporting vouchers, and that the proposed payments are legal, proper, and correct (see subparagraph 3.4.2). They may certify either individual vouchers or a file of several vouchers; see paragraph 5.3. Manual certifications require the CO’s signature and type or printed name, date, and dollar amount. See Chapter 1, subparagraph 3.5.3 for electronic signature requirements. Submit manually certified vouchers to the disbursing office by mail or fax.

5.3 Certification of a File of Payments (Batch Certification)

Batch certification attests that a file contains a specified number of payments that total a specific dollar amount equal to the total of vouchers contained in the file and that each voucher in the file has been certified as correct and proper for payment. Pecuniary liability attaches to the original CO for each payment. The person that certifies the file is pecuniarily liable for vouchers in that file not previously individually certified. Once a file is input, a DO processes each payment separately.

5.4 Successive Certification

More than one CO may be involved with a given payment; this is known as “successive certification.” When this occurs, the successive CO(s)’ actions do not diminish the responsibility of the officer who certified the original voucher. If the officer who certifies an additional related voucher differs from the one who certified the original, the first CO is pecuniarily liable for the correctness of the original voucher and the successive CO is pecuniarily liable only for the additional voucher(s). If a voucher is certified and then changed (e.g., to take a discount, add interest penalties), the CO certifying the legality, propriety, and correctness of the changes is pecuniarily liable for only the payments based on those changes.

5.5 Foreign Military Sales Transactions

See Volume 15, Chapter 3.

5.6 Altering a Certified Voucher

Altering a certified voucher invalidates the certification. A DO who determines that a certified payment voucher is improper must return it for correction and a new certification. However, post-payment printing and scanning of paid vouchers that were properly certified electronically do not invalidate the original certifications.

5.7 Certification and Accounting Data Translation

The translation of accounting data for a certified voucher is acceptable as long as the correct appropriation or funds involved aligns with the appropriation or funds cited on the legal obligation to make the payment (e.g., contract). The translation process must be auditable and deemed reliable to where the certified line of accounting can be mapped to the translated line of accounting. See Volume 1, Chapter 4, paragraph 2.7 for additional information regarding data translation. DOs and COs may rely on data received from reliable automated systems that have been certified as compliant with the FFMIA (see Volume 1, Chapter 3).

6.0 RANDOM REVIEW OF DISBURSEMENT VOUCHERS

6.1 Payment Review Officials

Payment review officials are not subject to pecuniary liability since they are not in accountable positions. State their responsibilities in their position descriptions and performance standards or appoint them by means other than a DD 577.

6.2 Examination Requirements

6.2.1. [Statistical Sampling](#).

6.2.1.1. Title 7, of the GAO Manual, which implements [31 U.S.C. § 3521\(b\)\(1\)](#), requires pre-payment examination of payments over \$2,500. For payments of \$2,500 or less, statistical sampling procedures may be implemented in lieu of examining all payments (see paragraph 6.3). Various publications provide guidance on statistical sampling methods, pre-payment, and post-payment reviews. These include the report GAO/Accounting and Information Management Division 21.3.2, May 2000, [Streamlining the Payment Process While Maintaining Effective Internal Control](#), the Office of Management and Budget (OMB) Circular No. A-123 (A-123), Management's Responsibility for [Enterprise Risk Management and Internal Control](#), and Appendix C to OMB A-123, [Requirements for Effective Estimation and Remediation of Improper Payments](#). GAO reports and publications provide examples of statistical sampling applications in the pre-payment and post-payment phases, but no single procedure is appropriate for every type of disbursing system.

6.2.1.2. The appropriateness of these reviews depends largely on the extent of automation of the system that computes and processes payments. Fully automated systems that can perform reviews of all records through extensive edit checks and balances before payment is made, replaces the need for manual invoice process and examination procedures.

6.2.2. Pre-Payment Reviews

6.2.2.1. Pre-payment reviews may occur any time before payment and are subject to management's judgment of the most appropriate stage in the voucher-preparation process for their conduct. These reviews ensure that vouchers are substantiated by documentation for lawful and proper payment. Under manual processing systems, they include verification of accuracy of computation. These requirements include ensuring that:

6.2.2.1.1. Payments are allowed by law and regulation;

6.2.2.1.2. Payments are authorized and approved for payment;

6.2.2.1.3. Requests for payment are supported by basic documents;

6.2.2.1.4. Payee identification is correct;

6.2.2.1.5. Manual calculations are correct, and data are input correctly to automated computation systems;

6.2.2.1.6. Proper accounting classifications are charged (e.g., supported by a proper obligating document);

6.2.2.1.7. Funds are available to support disbursements;

6.2.2.1.8. Any required special certificates or receipts are attached to the disbursement documents; and

6.2.2.1.9. Duplicate payments are prevented through proper manual or automated edits and checks.

6.2.2.2. Pre-payment review officials who determine that proposed or actual certified payments are of questionable legality, propriety, or correctness must send inquiries to the COs challenging the decision to certify these payments and keep files of these inquiries or those received from other sources. Inquires must be resolved within 30 days.

6.2.3. Post-Payment Reviews. See Volume 4, Chapter 14.

6.3 Statistical Sampling Plans

6.3.1. DoD Components may use statistical sampling plans for vouchers not exceeding \$2,500. Agencies must establish their own dollar limitations within that maximum based on cost/benefit analysis of their voucher examining operations. If a CO uses an approved pre-payment statistical sampling procedure and reviews only those vouchers selected in the sample as a basis for certification, he or she identifies the vouchers selected for review. If a DoD Component determines that an alternate voucher examining plan is required, it sends a written request through the Director, DFAS to the USD(C) for approval under subparagraph 6.3.3. The request must identify the reason for the alternate plan to include a description of the plan, alternate procedures for statistical sampling, and a business case that indicates savings without jeopardizing the Government's interest.

6.3.2. Sampling plans must be statistically valid and adhere to technical guidelines in professional texts and publications (both Federal and non-Federal) on the subject. Include in the sampling plans the purpose, scope, frequency of the review, a definition of the population from which the sample will be selected, the sample size and element selection method, procedures to analyze results of the sampled records, and methods to document and report the results of the sample review. Sampling plans require review and approval (or in most cases, original preparation) by qualified statisticians before submission for final approval. Review and update them periodically to ensure they reflect the most recent occurrence rate trends and allow for population estimates within predetermined sampling probability and precision levels.

6.3.3. The Director, DFAS or designee approves statistical sampling plans for payment vouchers processed by DFAS and ensures implementation of these plans at locations for which DFAS is responsible. The USD(C) approves statistical sampling plans for other DoD Components whose officials ensure implementation of these plans.

7.0 PECUNIARY LIABILITY

7.1 Presumption of Negligence

COs and DOs, but not DAOs, are pecuniarily liable automatically when there is a fiscal irregularity based on the "presumption of negligence" under 31 U.S.C. § 3527. A fiscal irregularity is either a physical loss of cash, vouchers, negotiable instruments, or supporting documents, or an erroneous (e.g., illegal, improper, or incorrect) payment. Physical losses generally apply only to DOs and their agents. Under [28 U.S.C. § 2512](#), DOs must prove that they were neither negligent nor the proximate cause of the irregularity to gain relief of liability. See Chapter 6, sections 6.0 and 7.0 for policy concerning relief and liability of accountable officers.

7.1.1. DOs. Under 31 U.S.C. § 3325, DOs are pecuniarily liable for payments not in accordance with the vouchers certified to them for payment, and for errors in their accounts. DOs who make payments in accordance with certifications of properly appointed COs may be relieved of their liability.

7.1.2. COs. Under 31 U.S.C. § 3528, COs are pecuniarily liable for payments resulting from improper certifications.

7.1.3. DAOs. DAOs are not subject to the presumption of negligence, but may be held pecuniarily liable under 10 U.S.C. § 2773a(c) for illegal, improper or incorrect payments resulting from information, data, or services they negligently provide to COs; and upon which the COs relied to certify payment vouchers. Any pecuniary liability of DAOs for losses to the U.S. resulting from illegal, improper, or incorrect payments may be either individual or joint and several with that of other officers or employees of the U.S. or members of the uniformed services who are also pecuniarily liable for those losses.

7.2 Erroneous Payments Under Random Sampling Procedures

Under [31 U.S.C. § 3521\(c\)](#), COs and DOs who pursue diligent collection action are not pecuniarily liable for payments on vouchers in a population of vouchers subject to sampling but not reviewed. See Chapter 6, [section 5.0](#), in the case of a fraudulent or suspected fraudulent payment.

VOLUME 5, CHAPTER 6: “PHYSICAL LOSSES OF FUNDS, ERRONEOUS PAYMENTS, AND OVERAGES”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [***bold, italic, blue, and underlined font***](#).

The previous version dated [February 2023](#) is archived.

CHAPTER 6

PHYSICAL LOSSES OF FUNDS, ERRONEOUS PAYMENTS, AND OVERAGES

1.0 GENERAL

1.1 Overview

An accountable official is a member of the U.S. Armed Forces or a DoD civilian employee who is responsible for or has custody of government funds. Accountable officials include those defined in Chapter 5, section 3.0 as certifying officers and departmental accountable officials (DAO); and in Chapter 2 as disbursing officers (DOs), deputy DOs (DDOs), cashiers, imprest fund cashiers, change fund custodians, paying agents, and collection agents. Accountable officials are personally liable for the physical loss or improper payment of the funds for which they are accountable, unless granted relief. The decision by the Secretary of Defense to grant or deny relief is binding. The Secretary of Defense has delegated authority to the Director of the Defense Finance and Accounting Service (DFAS) to make the required determinations to grant or deny relief on all requests for relief of liability. The Director of DFAS has re-delegated this authority to the Director of Strategy, Policy and Requirements (DFAS-ZP).

1.2 Purpose

This chapter provides guidance for the accountability, investigation, request [for relief of liability](#), and funding for removal of physical losses. The chapter also provides guidance on granting or denying relief of liability, and an overview on overages of public funds. Additionally, the chapter provides the definition of physical losses, and the criteria for minor and major losses. Lastly, the chapter defines and provides examples of erroneous payments (illegal, incorrect, and improper), to include the discovery, investigation, loss of funds (LoF) process, and settlement of erroneous payments.

1.3 Authoritative Guidance

All accountable officials are subject to the pecuniary liability standard under Title 31 of the United States Code (U.S.C.). Except for the DAO, the basic legal liability of an accountable official arises automatically by virtue of the loss, regardless of fault or negligence on the official's part. Relief is a separate process that considers the lack of fault or negligence by the accountable official to the extent authorized by the following:

1.3.1. Title 31, U.S.C., section 3527 ([31 U.S.C. § 3527](#)), which provides general authority to relieve accountable officials and agents from liability due to physical losses;

1.3.2. [Title 31 U.S.C. § 3528](#), which provides general authority to relieve certifying officials from liability due to erroneous payments; and/or

1.3.3. [Title 10 U.S.C. § 2773a](#), which provides general authority to establish pecuniary liability for DAOs.

2.0 DEFINITIONS

2.1 Physical LoF

A physical LoF can be minor or major. A minor loss is a physical loss of less than \$750 and without evidence of theft or fraud within the disbursing office. A major loss must meet at least one of the following criteria:

2.1.1. Equal to or greater than \$750;

2.1.2. Any LoF resulting from theft, regardless of the dollar amount; or

2.1.3. Any loss, regardless of the dollar amount, where there is evidence of fraud within the disbursing office (i.e. embezzlement or fraudulent acts by disbursing personnel, whether acting alone or in collusion with others). See Table 6-1 for examples of physical LoF.

2.2 Erroneous Payments

2.2.1. Erroneous payments include:

2.2.1.1. Any payment that should not have been made or that was made and results in an incorrect overpayment under statutory, contractual, administrative, or other legally applicable requirements; or

2.2.1.2. Any payment to an ineligible recipient or service, duplicate payment, payments for services not received, and any payment that does not account for credit for applicable discounts.

NOTE: This definition applies to accountable official liability. Improper payments under the [Improper Payments Information Act](#) differ in that they include both underpayments and overpayments. See Volume 4, Chapter 14, [section 2.0](#).

2.2.2. Examples of erroneous payments that require an investigation include:

2.2.2.1. Any payment in which the debt is delinquent for 180 days, or the loss cannot be fully recovered within the 2-year period from the time the erroneous payment was made, such as:

2.2.2.1.1. Overpayment to a payee;

2.2.2.1.2. Payment to the wrong payee;

2.2.2.1.3. Overdrafts of issued U.S. [Department of Treasury \(Treasury\)](#) check; or

2.2.2.1.4. Negotiation of original and replacement Treasury checks;

2.2.2.2. Any payment based on fraudulent, forged, or altered documents prepared or presented by officials who were not under the direct cognizance or control of the DO; or

2.2.2.3. Payment in violation of a regulation.

2.2.3. Examples of erroneous payments that do not require an investigation include:

2.2.3.1. An erroneous payment that is not delinquent for 180 days, and can be recovered within the 2-year period from the time the erroneous payment was made;

2.2.3.2. An erroneous payment that is collectible through offset of military pay, civilian pay, retired pay, or contract debt;

2.2.3.3. A valid payment made in accordance with appropriate documentation, which through no fault of the certifying officer, becomes an overpayment, e.g.:

2.2.3.3.1. A member paid a reenlistment bonus and does not complete terms of the contract;

2.2.3.3.2. A deceased retiree who is overpaid because death notification was not provided; or

2.2.3.3.3. An overpayment on a travel advance;

2.2.3.4. A payment made based on documentation from an individual and certified to be true and correct (e.g., a payment made to the wrong bank account because the individual provided incorrect information); or

2.2.3.5. Any payment made based on vouchers not examined under an approved statistical sampling plan.

3.0 DISCOVERY OF PHYSICAL LOSS OR ERRONEOUS PAYMENT

Any person who believes that an official entrusted with public funds is misusing those funds, or who suspects an occurrence of a fraudulent erroneous payment, must notify the Commander having jurisdiction over the alleged offender within 24 hours of discovery. A physical LoF does not initially impact the DO's Cash Treasury Account Symbol (TAS). The LoF is maintained as part of the DO's accountability and does not affect that balance until recovery, recoupment, or relief of liability is granted. Sections 4.0 and 5.0 provide guidance on the responsibilities and actions required to process physical losses and erroneous payments. See Figures 6-1 and 6-2 for overviews of processing physical LoF and erroneous payments, respectively.

4.0 PHYSICAL LOSSES

4.1 Responsibilities

4.1.1. DO. Upon notification of a possible loss, the DO must:

4.1.1.1. Verify that all transactions on the DoD [\(DD\) Form 2657](#), Daily Statement of Accountability, and [DD 2665](#), Daily Agent Accountability Summary, posted correctly;

4.1.1.2. Verify the accuracy of all totals from the date of the last balancing of the DD 2657 and the DD 2665 for each DDO, agent, or cashier;

4.1.1.3. Verify by actual count that the total of all cash and documents held as cash by the DO and all DDOs, agents, and cashiers [agree](#) with the amount shown as on hand on the DD 2657 and DD 2665;

4.1.1.4. Report the loss in writing to the Commander if the loss is not resolved within 24 hours of discovery and is a major physical loss as defined in paragraph 2.1; and

4.1.1.5. Request the Commander to direct an immediate audit of all disbursing assets by a Cash Verification Team, as prescribed in Appendix A, to confirm that a loss has occurred.

4.1.2. Commander. Upon notification of a possible loss, the Commander must request the Cash Verification Team conduct an audit of the DO's account. If the discrepancy is not resolved and qualifies as a major [LoF](#) as described in paragraph 2.1, report the loss to the DFAS [LoF](#) Team within 24 hours. Send the report via email to the Disbursing Policy mailbox at dfas.indianapolis-in.zpf.mbx.disbursingdebtmanagementpolicy@mail.mil, or by mail to the [LoF](#) Team, DFAS Accounting and Finance Policy Division, DFAS Indianapolis (DFAS-ZPTC), Location 220V, 8899 E. 56th Street, Indianapolis, IN 46249. When the Commander is in command of the DDO, agent, or cashier, a copy of the report must be provided to the DO. The report must include:

4.1.2.1. The specific type of loss (physical loss, erroneous payment, or fraudulent payment);

4.1.2.2. All known circumstances surrounding the alleged [LoF](#);

4.1.2.3. The authorized amount of the imprest fund ([if the loss occurred in the imprest fund](#));

4.1.2.4. The date the irregularity occurred and/or was discovered;

4.1.2.5. The dollar amount of the loss;

4.1.2.6. The identity of the accountable official(s) by name, rank/grade, and accountable position (such as DO, DDO, agent, or cashier);

4.1.2.7. The date of the investigation or when it will convene;

4.1.2.8. The contact information of the Investigating Officer (IO); including name, email address, and [telephone number](#);

4.1.2.9. The completion date of the investigation or, if applicable, the estimated completion date; and

4.1.2.10. The status of any recovery action in progress or contemplated.

4.2 Accounting for Physical [LoF](#)

4.2.1. Recording a Physical [LoF](#)

4.2.1.1. Record All Physical Losses. All physical losses, major or minor, discovered in the DO's account, including those incurred by deputies, agents, cashiers, imprest fund cashiers, and change fund custodians, must be recorded on the DD 2657 by using an Optional Form [\(OF\) 1017-G, Journal Voucher](#) to document the repositioning or movement of money from one line to another. For example, if a cash count reveals U.S. currency on hand is short \$100, prepare an OF 1017-G to document the loss. Continue to show all losses on the DD 2657 and the [Standard Form \(SF\) 1219, Statement of Accountability](#), until the loss is recovered, recouped, or until relief of liability is granted.

NOTE: Foreign currency loss must be converted and recorded in U.S. Dollar equivalent ([USDE](#)) using the exchange rate at the time that the loss occurred.

4.2.1.2. Cumulative Record of Physical Losses

4.2.1.2.1. Support the loss entered on the DD 2657 by annotating it on the [DD 2667, Subsidiary Accountability Record](#). If more than one physical loss occurs during a single business day, use a separate line on the same form to account for each loss individually.

4.2.1.2.2. Complete the DD 2667.

4.2.1.2.3. Maintain separate DD 2667s for different DOs.

4.2.1.2.4. Maintain the DD 2667 on file as a subsidiary record supporting the DD 2657.

4.2.1.2.5. Forward the DD 2667 to [the LoF Team](#) within 5 calendar days after the end of each month. Send by email to the Disbursing Policy mailbox at dfas.indianapolis-in.zpf.mbx.disbursingdebtmanagementpolicy@mail.mil or by mail to [the LoF Team, DFAS Accounting and Finance Policy Division, DFAS Indianapolis \(DFAS-ZPTC\), Location 220V, 8899 E. 56th Street, Indianapolis, IN 46249.](#)

4.2.1.3. Agent Losses. Physical losses of funds incurred by DDOs, disbursing agents, cashiers, paying agents, collection agents, imprest fund cashiers, or change fund custodians are physical losses within the official agent's accountability documents. It is important to notify the DO of all physical losses as soon as possible. The DO then must reduce the DD 2657 for that particular agent. The DO must also record the loss on the cumulative DD 2667.

4.2.1.4. Change Fund or Imprest Fund Loss. The DO must record the amount of the loss on the DD 2667 and DD 2657.

4.2.1.5. Counterfeit Currency Loss. The DO must record the amount of the loss on the DD 2667 and DD 2657.

4.3 Investigation

An investigation is required for all physical [LoF unless the loss is recouped, recovered, or paid back](#).

4.3.1. Purpose of Investigation. The purpose of the investigation is to review and document all facts leading up to and connecting with the loss, to include the:

4.3.1.1. Amount, date, time, and place of the loss;

4.3.1.2. Identification of accountable officials and others involved (name and rank);

4.3.1.3. Authenticity of documentary evidence and oral testimony;

4.3.1.4. Functional capacity of the accountable official incurring the loss and the physical location of this official, such as disbursing office and/or functional area;

4.3.1.5. Cause of loss; and

4.3.1.6. Adequacy of internal controls in place and effectively implemented.

4.3.2. Type of Loss. The type of loss determines the type of investigation required.

4.3.2.1. Minor Physical Losses

4.3.2.1.1. \$300 or Less (No Fraud). The DO or DDO (if the DO is not co-located with the DDO) will conduct the investigation and complete the written investigatory report. If the loss is attributable to the DO, the primary DDO will conduct the investigation along with the written investigatory report. Under no circumstances will the official incurring the loss prepare their own written investigatory report. In all cases, the written investigatory report must be completed and submitted to [the DFAS LoF Team](#) within 30 days from discovery of the loss.

4.3.2.1.2. Over \$300 (No Fraud). The Commander must appoint an IO to conduct the investigation and complete the written investigatory report. The appointed official must be someone other than the DO or disbursing office personnel (e.g., a member of the Cash Verification Team). Furthermore, the appointed IO must have knowledge of disbursing office operations, especially knowledge of the required internal controls, pertinent laws, and applicable directives. In all cases, the written investigatory report must be completed and submitted [through the Commander to the DFAS LoF Team](#) within 30 days from discovery of the loss.

4.3.2.2. Major Physical Losses. An IO must be appointed to conduct a formal investigation when there is a major physical loss.

4.3.2.2.1. Appointment Authority. The following individuals have the authority to appoint an IO:

4.3.2.2.1.1. The Commander of the DO who incurred the loss;

4.3.2.2.1.2. For DFAS sites, the Director of the DO who incurred the loss;

4.3.2.2.1.3. When the accountable official and the DO are not in the same location, the Commander over the accountable official will appoint the IO. For example, the Commander of a disbursing agent located in Afghanistan would appoint an IO when the agent incurs a loss [if](#) the DO is located in Indianapolis; or

4.3.2.2.1.4. When the Commander is not authorized to convene an investigation, the Commander must request an investigation through the chain of command.

4.3.2.2.2. Appointment/Order of IO. The Commander must provide a copy of the official appointment notification to [the DFAS LoF Team](#) within 5 days of appointment. The Commander must include the following in the appointment order:

4.3.2.2.2.1. Name of the IO, telephone number, and email address;

4.3.2.2.2.2. Incident or occurrence that requires an investigation;

4.3.2.2.2.3. Citation of Volume 5, [Chapter 6](#) and any authorizing DoD Component regulation as the authority for the investigation;

4.3.2.2.2.4. The approximate time allowed for the investigation (the investigation must be completed and submitted to [the DFAS LoF Team](#) within 90 days from discovery of the loss); and

4.3.2.2.2.5. Instruction to include a copy of the appointment/order in the report of investigation (ROI) as an exhibit.

4.3.2.2.3. Individuals Authorized to be IO(s). Individuals authorized to be IO(s) include a commissioned officer (O-3 or above) or civilian employee who is senior in rank/grade to the person(s) under investigation and:

4.3.2.2.3.1. Does not have a vested interest in the outcome of the investigation;

4.3.2.2.3.2. Is not in the chain of command of the DO or accountable officials involved in the irregularity;

4.3.2.2.3.3. Is familiar with investigative techniques; and

4.3.2.2.3.4. Has knowledge of financial accounting controls and pertinent laws and directives. Only use Comptroller personnel when there is no feasible alternative to appoint an IO from another organizational element.

NOTE: The comptroller, staff judge advocate, or DFAS Office of General Counsel (DFAS-HG) must provide technical guidance to IOs who do not have extensive backgrounds in investigative or financial matters.

4.3.2.2.4. Guidance for IOs

4.3.2.2.4.1. Develop all information and documentation in connection with the loss so that higher authority may take proper action. This includes information regarding the procedures followed by all officials involved in the loss, as well as safeguards and controls instituted for the entire period in which the loss occurred.

4.3.2.2.4.2. Before interviewing the accountable official(s) for the first time, ensure that each official receives and reviews this chapter, [particularly the authoritative guidance in paragraph 1.3](#), and Chapter 5, section 7.0 regarding liabilities and responsibilities of accountable officials.

4.3.2.2.4.3. Obtain statements from [the](#) accountable official(s) and others involved with the loss. The IO may summarize or report the testimony verbatim. Whenever possible, ensure the witness reviews, attests, and signs the transcript or summary of testimony. If sworn testimony is not obtainable, the IO must submit a statement giving the substance of the interview and the reason for absence of attestation.

4.3.2.2.4.4. If the IO recommends denial of relief to the DO or any other accountable official(s) who are pecuniarily liable for the loss, provide a copy of the report to [those](#) officials.

4.3.2.2.4.5. Gather all records, documents, correspondence, photographs, and sworn affidavits relating to the loss. The IO may use evidence developed in investigations already conducted concerning the loss by other agencies (e.g., Federal Bureau of Investigation, U.S. Secret Service, or local authorities).

4.3.2.2.4.6. Make a determined effort to resolve or clarify all apparent discrepancies or contradictions in the evidence.

4.3.2.2.4.7. Report every 30 days on the status of the investigation. Send the report through the Commander to [the DFAS LoF Team](#).

4.3.2.2.4.8. When extraordinary circumstances require an extension to complete the ROI, the IO may request an extension from the Commander. The Commander must notify [the DFAS LoF Team](#) of any authorized extensions.

4.3.2.2.5. Preparation of the ROI. The ROI must include the following elements.

4.3.2.2.5.1. Facts: The IO must gather all the facts of the loss:

4.3.2.2.5.1.1. Identities of all accountable officials who are pecuniarily liable for the loss, the amount that each person is responsible for, and their involvement in the loss;

4.3.2.2.5.1.2. If any of the accountable officials involved in the loss are not physically located in the disbursing office, describe the structure of the chain of command of the activity in which the official was performing their disbursing functions. In addition, describe the financial services supplied by that official for the activity they serve;

4.3.2.2.5.1.3. Circumstances leading to and surrounding the loss, including the efforts undertaken to discover the cause of a loss that remains unexplained;

4.3.2.2.5.1.4. Description of the internal controls prescribed to prevent losses of the type experienced, and the steps taken to implement those controls;

4.3.2.2.5.1.5. Other relevant information that would aid in understanding how the loss occurred and in evaluating whether relief is appropriate for the accountable officials involved;

4.3.2.2.5.1.6. Documentary evidence (such as statements, transcripts, correspondence, affidavits, investigative reports completed by other agencies, records, and photographs) as exhibits to the ROI; and/or

4.3.2.2.5.1.7. Information regarding collection activity and any possible offset relating to the loss.

4.3.2.2.5.2. Findings. The IO must make the following findings:

4.3.2.2.5.2.1. Whether there was a loss to the U.S. Government and the amount of the loss;

4.3.2.2.5.2.2. Whether the loss occurred through the fault or negligence of the accountable official;

4.3.2.2.5.2.3. Whether negligence, fraud, or theft was the proximate cause of the loss by an individual other than the accountable official(s);

4.3.2.2.5.2.4. The name of the official(s) involved and when the loss occurred; and

4.3.2.2.5.2.5. Whether the accountable official(s) was carrying out official duties when the loss or deficiency occurred.

NOTE: The IO must make any other findings considered necessary and appropriate. It is essential that all findings, especially those indicated in subparagraph 4.3.2.2.5.2, have supporting documentation. When applicable, reference the tab or page number of the supporting documentation after each related finding.

4.3.2.2.5.3. Recommendations. Based on the information gathered, the IO must make a recommendation on:

4.3.2.2.5.3.1. Whether the accountable official(s) should be relieved of pecuniary liability for the loss (separate recommendations are required for each accountable official);

4.3.2.2.5.3.2. Whether other person(s) should be held pecuniarily liable for the loss, in whole or in part;

4.3.2.2.5.3.3. Whether any corrective action is needed to improve controls or procedures; and/or

4.3.2.2.5.3.4. Any other recommendations that are appropriate considering the existing facts, circumstances, and conditions of the case.

4.3.2.2.5.4. Submission of ROI

4.3.2.2.5.4.1. Timeframe. Unless granted an extension, the IO must submit the ROI through the Commander (who appointed the IO) to the DFAS LoF Team within 90 days after discovering the loss.

4.3.2.2.5.4.2. Commander's Actions. Upon receiving the ROI from the IO, the Commander must:

4.3.2.2.5.4.2.1. Immediately review the ROI for compliance with requirements as indicated in subparagraph 4.3.2.2.5;

4.3.2.2.5.4.2.2. Determine if the ROI is complete, and if not, return it to the IO explaining the discrepancies and request further documentation or information. Notify [the DFAS LoF Team](#) if the ROI cannot be completed and submitted within 90 days from discovery of the loss;

4.3.2.2.5.4.2.3. Consider all the facts, findings, and recommendations;

4.3.2.2.5.4.2.4. Make additional findings and recommendations pertinent to the investigation;

4.3.2.2.5.4.2.5. Determine if sufficient evidence exists to support a recommendation for relief from liability or recommend denial of relief referencing all evidence supporting the denial recommendation for each accountable official involved;

4.3.2.2.5.4.2.6. Forward a copy of the ROI and all attachments to [the DFAS LoF Team](#), unless the investigation is on hold for fraudulent or wrongful conduct (see note below subparagraph 4.3.2.2.5.4.2.10);

4.3.2.2.5.4.2.7. Forward a copy of the ROI to the Commander of the base, station, activity, ship, or unit where the accountable official(s) is located. For Army Financial Management Detachments, send a copy to the Financial Management Support Unit. It is the commander's discretion whether to use the ROI for disciplinary or administrative actions;

4.3.2.2.5.4.2.8. Keep a copy of the ROI;

4.3.2.2.5.4.2.9. Submit any documentation and/or information requested by [the DFAS LoF Team](#); and

4.3.2.2.5.4.2.10. Forward any documentation and/or information to [the DFAS LoF Team](#) that becomes available after the ROI has been forwarded.

NOTE: If there is evidence of fraudulent or wrongful conduct, and the matter is under investigation by authorized law enforcement personnel, the investigative entities may request the Commander to withhold the report until completion of their investigation. If so, the Commander must continue to follow-up on the status of their investigation and advise [the DFAS LoF Team](#) of the status every 30 days. It is acceptable to add copies of the investigative reports as exhibits before forwarding the report through the chain of command to DFAS.

4.3.3. [DFAS LoF Team \(DFAS-ZPTC\)](#):

4.3.3.1. Review the ROI upon receipt;

4.3.3.2. If the ROI lacks sufficient information, or in the absence of compliance with the provisions for the findings and recommendations, the DFAS LoF Team may return the report for further investigation and fulfillment of the provisions as indicated in subparagraph 4.3.2.2.5; and

4.3.3.3. Forward the final decision to the appropriate individuals, and in those cases where individual(s) are held liable, inform them of their right to submit a rebuttal.

4.4 Funding for Removal of Physical Losses

In all cases, the ideal method for resolving a loss is recovery of the loss from the beneficiary. For example, 1) recovery of missing cash from the finder, or 2) collection from the accountable official.

4.4.1. Appropriated funds must be made available to remove the deficiency from the DO's SF 1219 if the losses are not recovered. This includes instances when relief of liability has been denied and recoupment cannot be made from the accountable official or when relief of liability is granted to the accountable official.

4.4.1.1. DFAS Employee. If the accountable official responsible for the LoF was a DFAS employee or a military member assigned to DFAS when the loss occurred, DFAS must identify the necessary appropriation and funding to resolve the loss.

4.4.1.2. Other DoD Component Employees. If the accountable official responsible for the LoF was a military member or employee of another DoD Component when the loss occurred, that DoD Component must identify the necessary appropriation and funding to resolve the loss.

4.4.2. The DO must clear the LoF from the DD 2667 and DD 2657 (based on the instructions given by DFAS).

5.0 ERRONEOUS PAYMENTS (ILLEGAL, INCORRECT, AND IMPROPER)

5.1 Responsibilities

5.1.1. Fraudulent or Suspected Fraudulent Erroneous Payments

5.1.1.1. Commander. Upon notification of a fraudulent or suspected fraudulent erroneous payment, the commander must:

5.1.1.1.1. Notify the DFAS LoF Team within 24 hours of notification, through the chain of command, per subparagraph 4.1.2;

5.1.1.1.2. Appoint an IO to conduct a formal investigation. See subparagraph 4.3.2.2.2; and

5.1.1.1.3. Ensure the investigation is completed and forwarded to [the DFAS LoF Team](#) within 90 days from the appointment of the IO.

5.1.1.2. DO. Upon notification of a fraudulent or suspected fraudulent erroneous payment, the DO must:

5.1.1.2.1. Determine if the erroneous payment occurred due to fraudulent actions of accountable officials under the direct cognizance or control of the DO, and prepare a [DD Form 1131](#), Cash Collection Voucher, transferring the amount of the fraudulent payment back into the appropriation from which the payment disbursed. The collection transaction is reported to Treasury via the Classification Transactions and Accountability (CTA), which will feed the Central Accounting Reporting System daily account statement showing an increase to [the](#) DO Cash TAS and an increase to the program TAS on the collection voucher. In addition, increase [the](#) DD 2657 if the loss is a predecessor loss. Record the loss on the DD 2667 as prescribed in subparagraph 4.2.1.2 if the erroneous payment occurred due to fraudulent actions of accountable officials under the direct cognizance or control of the DO;

5.1.1.2.2. Determine if the erroneous payment occurred due to fraudulent actions [of](#) individuals who were not under the direct cognizance or control of the DO; the payment(s) must remain charged to the appropriation originally charged.

5.1.2. Erroneous Payments – No Fraud

5.1.2.1. Certifying Officer: Upon notification of an erroneous payment, the certifying officer must:

5.1.2.1.1. Review the erroneous payment voucher and the supporting documentation;

5.1.2.1.2. Ensure collection action is taken against the recipient of the payment, as prescribed in Volume 16. This may require submission of the debt to the DO or other responsible area; and

5.1.2.1.3. Notify the Commander if the recipient of the erroneous payment does not voluntarily repay the amount owed and:

5.1.2.1.3.1. The debt is delinquent for 180 days; or

5.1.2.1.3.2. The full amount of the loss is not recovered within the 2-year period, which is calculated from the time the erroneous payment was made.

5.1.2.2. DO's Responsibilities

5.1.2.2.1. The DO does not need to take any action if the erroneous payment was properly certified.

5.1.2.2.2. If the erroneous payment was not properly certified:

5.1.2.2.2.1. Report the loss to the Commander; and

5.1.2.2.2.2. Ensure collection action was taken against the recipient of the payment, as prescribed in Volume 16. This may require submission of the debt to another responsible area. If the erroneous payment is recouped from the recipient, collect the proceeds into the appropriation originally charged, unless the appropriation is canceled. If the appropriation is canceled, refer to Volume 4, Chapter 3, subparagraph 3.3.3 for disposition of the collection.

5.1.2.3. Commander: Upon notification of an erroneous payment, the commander must:

5.1.2.3.1. Determine whether a formal or an informal investigation is required;

5.1.2.3.2. Appoint an IO to conduct the appropriate investigation; and

5.1.2.3.3. Ensure the investigation is completed and submitted to [the DFAS LoF Team](#).

5.2 Investigation of Erroneous Payments

5.2.1. Formal Investigation Policy

5.2.1.1. Formal investigations are required when:

5.2.1.1.1. Fraud is suspected on the part of the payee, disbursing office personnel, certifying officer, or any other accountable official; or

5.2.1.1.2. The Commander determines it to be necessary.

NOTE: Formal investigations for erroneous payments must follow the guidance outlined in paragraph 4.3.

5.2.1.2. The investigation must be submitted to [the DFAS LoF Team](#) through the Commander who appointed the IO within 90 days from the appointment of the IO.

5.2.2. Informal Investigation Policy

5.2.2.1. The IO must prepare investigatory comments.

5.2.2.2. The investigation must be submitted to [the DFAS LoF Team](#) within 60 days from the Commander's notification of the erroneous payment.

5.3 Completion of Erroneous Payments Process

When feasible, all actions required to reach a determination of liability for a LoF due to an erroneous payment should be completed within 3 years after the date the SF 1219 is certified.

5.4 Settlement of Erroneous Payments

Generally, the DO will not carry an erroneous payment as a LoF on the SF 1219, since an appropriation was charged when the payment was disbursed. However, there are exceptions to this general rule. For example, an exception occurs when Treasury applies check-issue overdrafts against a disbursing station symbol number, or if an accountable official under the direct cognizance or control of the DO made a fraudulent payment.

5.4.1. If the erroneous payment is recovered from the recipient, the appropriation initially charged is credited the amount recouped or collected unless the appropriation is canceled. Refer to Volume 4, Chapter 3, subparagraph 3.3.3 for disposition of the collection of canceled appropriation.

5.4.2. If the erroneous payment cannot be recovered from the recipient and relief of liability has been denied, the loss must be collected from the DO, certifying officer, and/or accountable official(s) involved. Credit the proceeds from the collection to the appropriation originally charged unless the appropriation is canceled. For disposition of the collection of a canceled appropriation, refer to Volume 4, Chapter 3, subparagraph 3.3.3.

5.4.3. The amount of the erroneous payment must remain charged to the appropriation that the payment originated from when:

5.4.3.1. Relief of liability is granted; or

5.4.3.2. Recovery attempts from the recipient are unsuccessful.

5.4.4. If an adjustment to the appropriation account to which the payment was charged is necessary, the amount of the erroneous payment must be charged as stated in 31 U.S.C. § 3527(d)(1).

5.5 Document Retention

The following documents and information are retained to ensure proper response to audits conducted by the Government Accountability Office:

5.5.1. Detailed statement of facts of the case, including the type of irregularity, date, amount, names, and positions of the accountable official(s) involved;

5.5.2. Reference to pertinent supporting documents, such as pay records, contracts, and vouchers;

5.5.3. Description of how the irregularity occurred and how it affected the accountable official's account;

5.5.4. Adequate description of procedural deficiencies, if known, that caused the irregularity and the corrective action taken or to be taken; and/or

5.5.5. Information on any recoupment already made or being considered.

NOTE: See subparagraph 4.1.2 for contact information for [the DFAS LoF Team](#).

6.0 REQUEST FOR RELIEF

6.1 Request for Relief

Requests for relief must be in the form of a memorandum and submitted within 30 days after the investigation is completed. A copy of the IO's report must be included as an attachment to the request for relief. Erroneous payments paid through the Treasury Direct Disbursing process follow the same process as erroneous payments paid through a DoD disbursing office. Accountable officials must submit their request for relief as follows.

6.1.1. DOs. Submit the request for relief through the Commander or DFAS site director to [the DFAS LoF Team](#).

6.1.2. DOs Settling Accounts of Former DOs. Submit the request for relief on behalf of a former DO to [the DFAS LoF Team](#).

6.1.3. DDOs, Disbursing Agents, Cashiers, Certifiers. Submit requests for relief through the DO responsible for the account to [the DFAS LoF Team](#).

6.2 Evidence Required for Granting Relief

6.2.1. Burden of Proof. An accountable official is strictly liable for any erroneous payment or physical [LoF](#) placed in the official's care, subject to relief of liability. Accordingly, if the Government can establish that a loss has occurred, strict liability applies to the accountable official involved with the loss. The accountable official bears the burden of proving that it is more likely than not that the official:

6.2.1.1. Was not negligent; or

6.2.1.2. The official's fault or negligence [was](#) not the proximate cause of the loss.

6.2.2. Information Required. Generally, the findings of related court of inquiry, investigation, court-martial, or other proceedings (including endorsements) will provide the information required for the loss. When such information is not available, the following information must be supplied and considered in the request for relief and/or the forwarding endorsements. Failure to include all the information required could contribute to an unfavorable consideration of a request for relief. Include the following items:

6.2.2.1. The specific duty assignment of the accountable official when the loss occurred;

6.2.2.2. A statement showing when, how, and who discovered the loss;

6.2.2.3. A description of any actions taken to verify the loss and establish how the loss occurred;

6.2.2.4. A statement including the date of the last cash count and balancing prior to discovery of the loss;

6.2.2.5. A copy of the appropriate standard operating procedures in effect at the time the loss occurred. If no written procedures are available, provide a statement to explain the known and utilized procedures at the time the loss occurred;

6.2.2.6. A statement indicating pertinent regulations and instructions were followed or, if not followed, an explanation and justification for any omissions and deviations;

6.2.2.7. A statement regarding the official's past involvement in any prior losses, if applicable;

6.2.2.8. A statement indicating whether the loss was caused by theft or some other criminal act; and

6.2.2.9. A description of the manner in which the DO is carrying the loss in their account, and the identity of that DO.

6.2.3. Forwarding Endorsements. Each addressee in the requestor's chain of command (including the DO) must provide a forwarding endorsement that must include a specific opinion as to whether the loss occurred while the accountable official was in the line of duty and regarding fault or negligence. A specific recommendation regarding granting or denying relief is required, as a part of the forwarding endorsement.

6.3 Statutory Standards for Relief of a Physical Loss

The general authority to relieve accountable officials from liability is stipulated in 31 U.S.C. § 3527. Relief of liability may be granted when:

6.3.1. The Secretary of Defense determines that the official was carrying out official duties when the loss occurred;

6.3.2. The loss or deficiency was not the result of an illegal or incorrect payment; and

6.3.3. The loss or deficiency was not the result of fault or negligence by the official.

6.4 Statutory Standards for Relief of an Erroneous Payment

The general authority to relieve accountable officials from liability is stipulated in 31 U.S.C. § 3527(b)(1)(B), which incorporates by reference 31 U.S.C. § 3528(b)(1), as follows.

6.4.1. DO

6.4.1.1. The payment was not the result of bad faith or lack of reasonable care; and

6.4.1.2. The disbursing officials and the agency have made diligent collection efforts.

6.4.2. Certifying Officer

6.4.2.1. The certification was based on official records and the certifying officer did not know, and by reasonable diligence and inquiry could not have discovered, the correct information; or

6.4.2.2. The obligation was incurred in good faith, no law specifically prohibited the payment, the U.S. Government received value for the payment, and diligent collection efforts were made to recover the payment.

6.4.3. DAO. Pecuniary liability under this subsection will apply in the same manner and to the same extent as applies to an official accountable under 31 U.S.C., subtitle III.

7.0 DECISIONS ON LIABILITY

7.1 Relief Granted

If granted relief, [the DFAS LoF Team](#) will provide a memorandum with instructions [for removing](#) the deficiency or authority to leave the payment charged to the original appropriation.

7.2 Relief Denied

If denied relief, [the DFAS LoF Team](#) will advise the accountable official(s) of the decision and of their right to submit a rebuttal. The rebuttal must be submitted [to the DFAS LoF Team](#) within 30 days from the date of notification of the adverse determination. Based on the additional information received, [the team](#) will make a recommendation to the Director, [Strategy, Policy and Requirements](#), through the DFAS [Office of General Counsel](#), whether to affirm or reverse the previous decision.

7.2.1. If the decision is reversed, the accountable official(s) will be advised accordingly, and the DO will be provided instructions for removal of the [LoF](#) or authority to leave the payment charged to the original appropriation.

7.2.2. If the decision stands, the Commander and/or DO will be advised to take immediate collection action against the accountable official(s). Cash recouped from a loss and retained for future operating use does not impact the DO Cash TAS balance. Volume 16 provides guidance for completing collection of irregularities.\

8.0 OVERAGES OF PUBLIC FUNDS

8.1 Overview

Overages are funds held in an amount greater than the amount shown to be on hand by the daily accountability records of the DO.

8.2 Recording Overages of Funds

Do not offset an overage of funds against a physical LoF unless the relation between the two is obvious (e.g., foreign currency on hand is short and U.S. currency on hand is over by equal USDE amounts). Do not offset overages against shortages if the shortage and overage occur on different business days. An overage of funds must be collected into the DO's accountability and reported by CTA transactions to Treasury's Budget Clearing Account (Suspense), F3875, citing the collection Business Event Type Code (BETC) along with the DO Cash TAS/BETC. If the proper location of the overage cannot be determined, the overage must be transferred to Treasury's Forfeiture of Unclaimed Money and Property, R1060, utilizing a CTA transaction. Track overages by recording each occurrence on a separate DD 2667, maintained specifically for overages.

NOTE: The DD 2667 is a stand-alone document for tracking overages. Start a new DD 2667 for overages at the beginning of each quarter.

8.3 Preparation of the DD 2667 as a Record of Overages of Funds

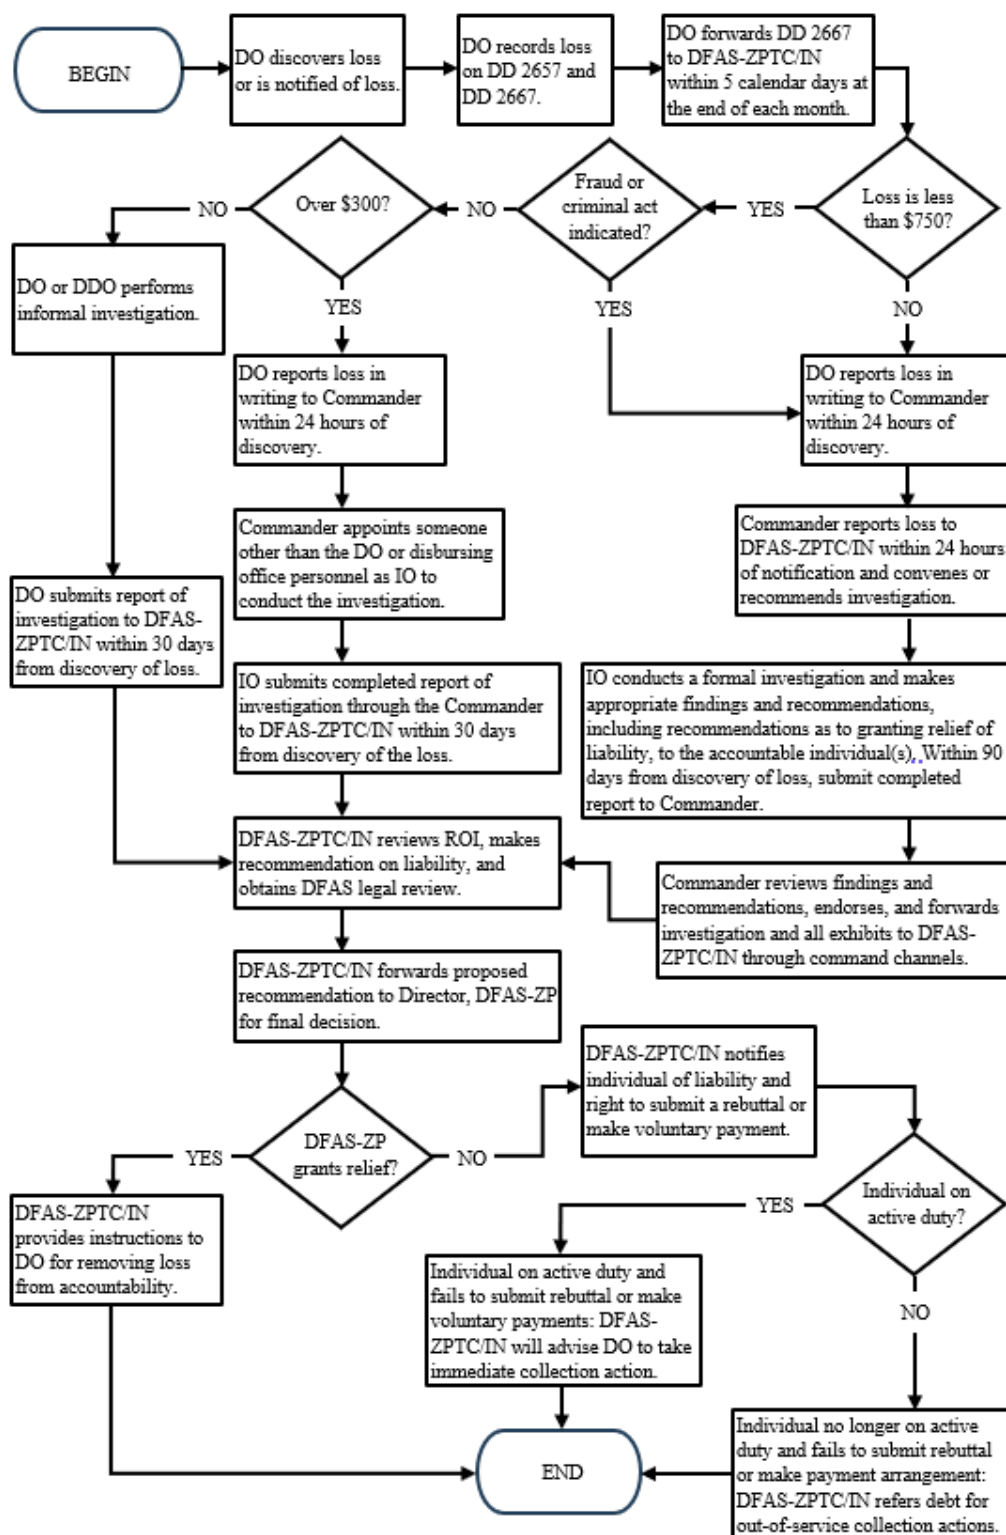

List each overage occurring each day on the DD 2667.

8.4 Reporting Overages of Funds

Overages of funds that are \$750 or more must be reported to the Commander. However, unless there is an indication of fraud or other criminal act, there is no requirement to report or investigate as in losses of funds. A copy of the DD 2667 must be retained with the original voucher transferring the funds to the R1060 account.

*Figure 6-1. Processing Physical Losses of Funds

PROCESSING LOSSES OF FUNDS DUE TO PHYSICAL LOSS

*Figure 6-2. Processing Erroneous Payments

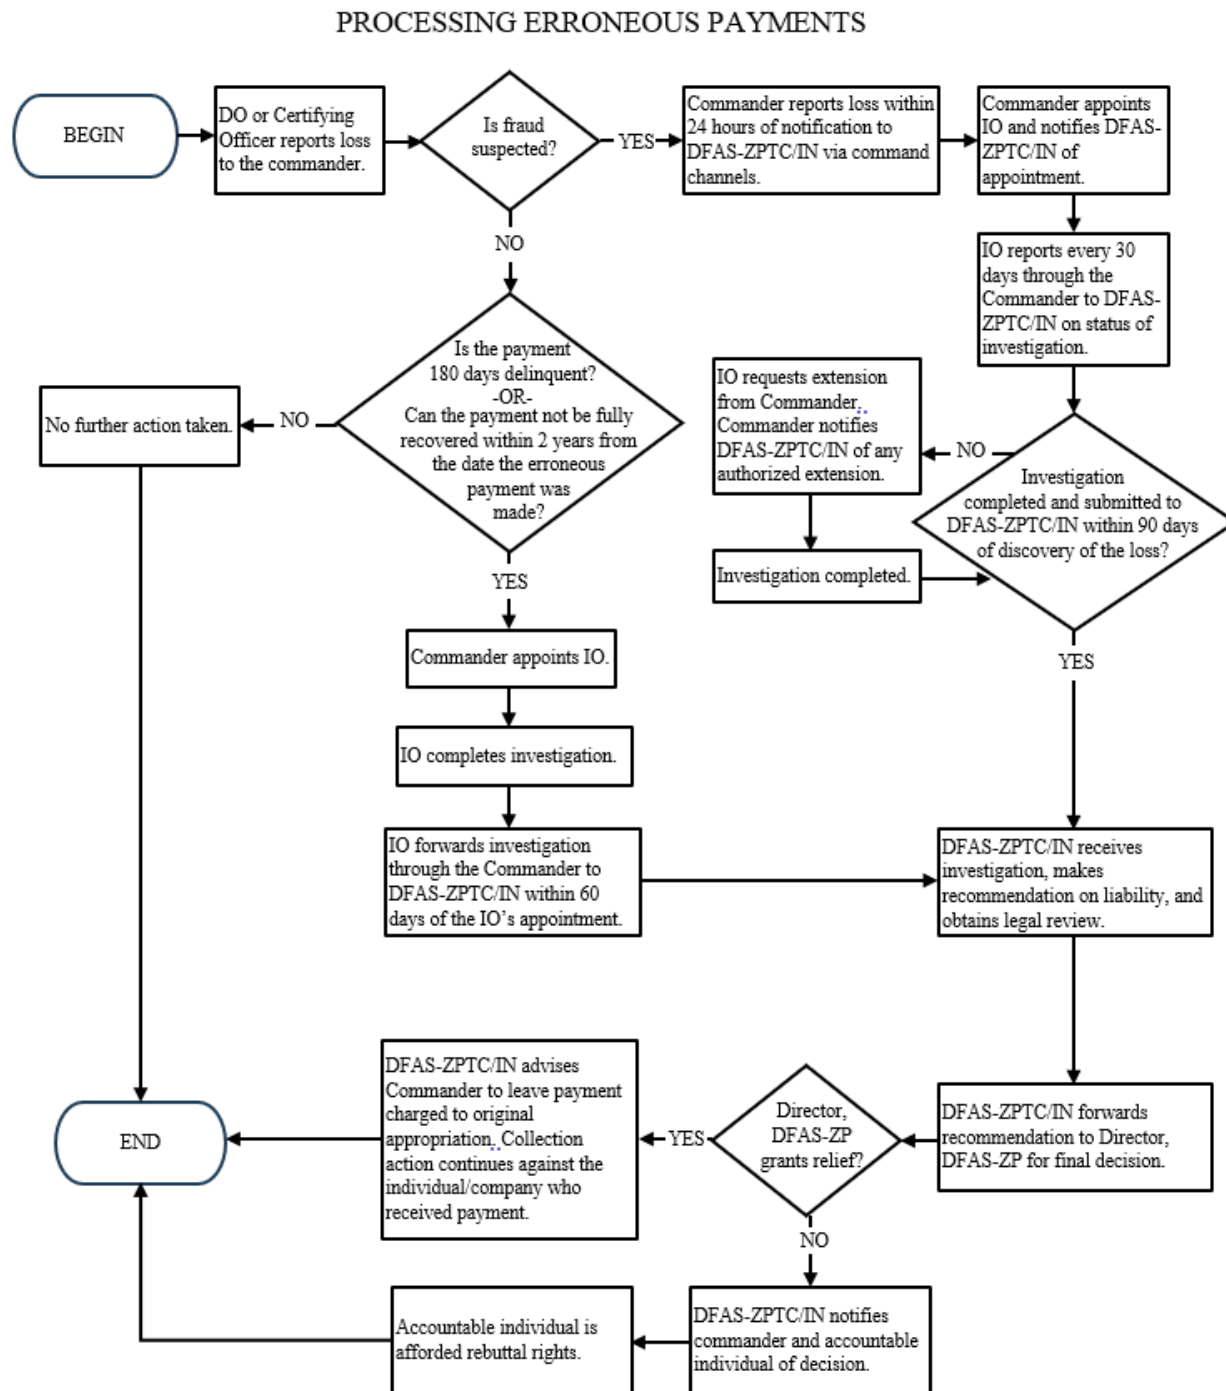

Table 6-1. Examples of Physical Losses of Funds

TYPES OF LOSSES	EXPLANATION
Public Funds	Loss of cash.
Limited Depositary Account (LDA)	A loss can occur when the LDA is unreconciled, reported incorrectly, or subjected to a fraudulent transaction.
Records	Loss of records such as debit vouchers or deposit tickets.
Original Vouchers	Copies of the original voucher and retained supporting documents may be stamped as a certified copy of the original voucher if the original voucher is lost. However, the absence of a signature acknowledging receipt of a cash payment may negate the validity of the certified copy. The same is true when a payee denies receipt of a cash payment and there is no original voucher with the payee's signature to provide proof of payment.
Documentation Supporting Debit Vouchers	A physical loss can occur if open debit items cannot be reconciled because of the loss of supporting documentation.
Shipment of Cash	Shipments of cash that are lost can result in the liability of the accountable official(s) if they failed to ship cash as prescribed in Chapter 3, section 5.0 .
Unexplained Losses	No explanation – money is missing.
Negotiable Instruments	A physical loss can result when a negotiable instrument and all copies held in the disbursing office are lost.
Bank Failure	DO's funds held in a bank; e.g., an LDA, and the bank closed because of failure.
Counterfeit Currency	Currency in the DO's possession determined to be counterfeit.
Change Fund	Cash shortage that is not whole from sales receipts.
Imprest Fund	Shortage of funds advanced to imprest fund cashier.
Fraud within Disbursing	A loss resulting from fraudulent actions of disbursing personnel acting alone or in collusion with others.
Robbery, Burglary	A LoF from a robbery/burglary.

*Table 6-2. Standardized Questions for Investigations

Question	Cashier Loss	Counterfeit Currency Loss	Agent Officer Loss	Fraud Loss	Imprest Fund Cashier and Change Fund Custodian Loss
Have the DO and other person potentially liable for the loss been afforded all the rights and privileges of parties in interest?	X	X	X	X	X
Has the IO obtained testimony from every person who has relevant information regarding the circumstances?	X	X	X	X	X
Has the IO thoroughly questioned each witness?	X	X	X	X	X
Are there inconsistencies among the testimonies of different witnesses?	X	X	X		X
Did the IO conduct a thorough investigation to discover the full extent of the loss?	X	X	X	X	X
Has the IO considered other investigations conducted regarding the loss? (NOTE: Do not consider lie detector test results.)	X		X	X	X
If fraud is involved, were the methods to defraud the U.S. Government clearly described?				X	
Is the cause of the loss clearly established?	X	X	X	X	X
Was a thorough search of the physical area made for missing cash or vouchers?	X		X		X
Did the IO review the transactions made during the day of the loss thoroughly, in an effort to determine the cause of the shortage?	X		X		X
Were any individuals contacted in an effort to determine if an overpayment had been made and could be recovered?	X		X		X
Were individuals who made collections contacted to determine if they found a compensating overage in their accounts?	X		X		X
Was all cash-on-hand counted to make sure there was no compensating overage?	X		X		X
What was the number of transactions handled by the cashier/agent during the period in which the loss occurred?	X		X		X
Did distracting influences exist or were working conditions poor?	X	X	X		X
Was the cashier/agent working under pressure because of the heavy volume of business?	X	X	X		X
Was the cashier/agent handling new currency that has a tendency to stick together?	X		X		X
Was the cashier/agent experienced or inexperienced?	X		X		X
What procedures and internal controls has the DO established to safeguard funds and preclude fraudulent activity?	X		X	X	X
What facilities were available to protect cash for which the cashier/agent was accountable, such as a cash drawer with key lock or a separate safe?	X		X		X
What procedures did the DO, deputy DO, and/or disbursing agent follow in making daily settlements with the cashier?	X				
Has the DO supplied instructions in detecting counterfeit money for those personnel in the office that handle money?		X			
What written SOPs has the DO supplied for guidance?	X	X	X		
Are the SOPs adequate?	X		X		
Did the accountable official follow the applicable procedures on the day of the loss?	X	X	X	X	X

Table 6-2. Standardized Questions for Investigations (Continued)

Question	Cashier Loss	Counterfeit Currency Loss	Agent Officer Loss	Fraud Loss	Imprest Fund Cashier and Change Fund Custodian Loss
Has the DO issued any oral instructions?	X	X	X		
Was the cashier's cage or safe accessible to persons other than the cashier/agent?	X		X		
Did theft occur?	X		X		X
Does the exhibit show the appointment of the official; i.e., cashier, DDO, agent?	X		X		X
Was the cashier/agent functioning under the direct cognizance/control of the DO?	X		X		
When, and by whom, was the receipt of counterfeit currency detected?		X			
Was an effort made to determine the source of the counterfeit note(s)?		X			
Does the volume of transactions handled by the cashier/agent preclude a careful inspection of every piece of currency?		X			
Do exhibits show the amount the DO entrusted to the cashier/agent, the signature of the cashier/agent in receipt of funds, the turn-in made by the cashier/agent, and the amount of the shortage or a statement of the cashier's/agent's account?	X		X		
If the loss involves funds in the hands of a cashier/agent, has the DO inspected and supervised the cashier/agent office, or arranged for such inspections?	X		X		
Under what functional capacity was the accountable individual acting with regards to the DO?				X	
What is the accountable official's immediate chain of command within the activity for which they provide disbursing services?				X	
Has all possible collection action been taken?				X	
In the case of military personnel, is collection action occurring in the field or by the supporting DFAS site in cases where personnel have been separated from the Service?				X	
In the case of civilian employees, has the individual involved authorized application of pay to offset the shortage?				X	
Have steps been taken to secure application of final pay to settle the indebtedness?				X	
If the amount of the indebtedness was determined, was a request made to Office of Personnel Management for offset against the Civil Service Retirement and Disability Fund?				X	

VOLUME 5, CHAPTER 7: “U.S. TREASURY CHECKS”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [***bold, italic, blue, and underlined font***](#).

The previous version dated [March 2023](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Updated hyperlinks and formatting to comply with current administrative instructions.	Revision
2.4	Deleted subparagraph 2.4.2 prohibiting waivers for vendor payments, per updates to the Treasury Financial Manual, Volume I, Part 4A, Chapter 2000, Section 2040.30b that became effective March 22, 2024, and renumbered the paragraph accordingly.	Deletion
3.1	Removed procedural content for ordering check stock and provided contact information for obtaining current check procurement options and procedures.	Revision
9.3	Moved check destruction content to new section 15.0.	Revision
15.0	Created a separate section for check destruction content and added contact information for destroying blank check stock.	Addition

CHAPTER 7

U.S. TREASURY CHECKS

1.0 GENERAL

1.1 Overview

Disbursing Officers (DOs) issue U.S. Department of the Treasury (Treasury) checks under applicable laws and regulations for military pay and allowances, civilian pay, settlement of travel claims, authorized advances to travelers and agents, exchanges-for-cash, and deposits-for-credit to the Treasury. Only multi-colored, standard size checks (7 3/8 inches in length and 3 1/4 inches in width) may be issued against the Treasury's account. Per the Treasury Financial Manual (TFM), Volume 1, Part 4A, Chapter 4000, Section 4045 ([ITFM 4A-4045](#)), Federal entities that issue Treasury checks will report daily through the Payment Information Repository (PIR) Standard Reporting Format. PIR files containing check payments go to both PIR and the Treasury Check Information System (TCIS). All Treasury check disbursements must have a valid Treasury Account Symbol/Business Event Type Code (TAS/BETC) reported through PIR, which will feed the Central Accounting Reporting System (CARS) daily account statement.

1.2 Purpose

This chapter provides basic principles and requirements for procurement of Treasury checks, check types and features, security, storage, and signature media to include machine specifications of check-signing machines. It also provides information on the issuance of Treasury checks, exchange-for-cash checks, check issue discrepancies, spoiled and voided checks, check cancellation, and the necessity for timely and accurate reporting to Treasury.

1.3 Authoritative Guidance

Treasury check usage is governed by Title 31, United States Code (U.S.C.), section 3321 ([31 U.S.C. § 3321](#)), Disbursing Authority in the Executive Branch; [31 U.S.C. § 3328](#), Paying Checks and Drafts; [31 U.S.C. § 3331](#), Substitute Checks; [31 U.S.C. § 3332](#), Required Direct Deposit; [31 U.S.C. § 3343](#), Check Forgery Insurance Fund (CFIF); [31 U.S.C. § 3702\(c\)](#), Authority to Settle Claims; and [31 U.S.C. § 3334](#), Cancellation and Proceeds Distribution of Treasury Checks.

2.0 POLICY

2.1 Drawing and Dating Checks

2.1.1. Drawing a Check. Inscribe checks drawn on the Treasury to the payee by name, or to a financial institution for credit to the account of the named payee, except for checks drawn as exchange-for-cash (see section 7.0). Never make a check payable to "Cash."

2.1.2. Dating and Mailing Checks. DOs must not issue checks in payment of salaries before completion of the service for which the payment is being made or before the scheduled payday, unless authorized (e.g., advance pay). A DoD Component is authorized to mail checks to payees before a military or civilian payday to ensure payments are available when due. When mailing a check before payday, do not date it before the date of the scheduled payday. Agencies using this method of pay delivery must have internal controls that alert the DO when a payee becomes ineligible for scheduled pay (e.g., unauthorized absence or separation) and ensure that pay intercept procedures can be initiated.

2.1.3. Legal Representatives

2.1.3.1. Legal Representative of Estate of Decedent. A check may be drawn to the order of a legal representative of the estate of a deceased person (e.g., “John K. Smith, Executor of the estate of James R. Jones”). Do not make a check payable “to the estate of” a decedent or to a deceased person.

2.1.3.2. Committee or Guardian. A check may be drawn to the order of a legally appointed committee, guardian, or other legal representative of a mentally incompetent payee when specifically authorized (see Volumes 7A, Chapter 33; 7B, Chapter 16; and 8, Chapter 10).

2.1.3.3. Power of Attorney. The payee of a check may authorize another person to receive a Treasury check by execution of a specific power of attorney that clearly states the holder is entitled to receive the check on the payee’s behalf. The person receiving the check signs his or her own name on the voucher followed by the words “Attorney-in-Fact for” and the name of the person granting the power of attorney. The DO verifies the identity of the holder and keeps a copy of the power of attorney. Process payments made to the holder of a power of attorney that require “secret” or “confidential identity” using a cover voucher insert. Transmit a copy of the original voucher and a copy of the power of attorney to the supporting Defense Finance and Accounting Services (DFAS) site for proper handling and storage.

2.1.4. Signing Blank Checks. Signing blank checks is prohibited.

2.2 Negotiability

Effective October 1, 1989, Treasury checks are negotiable for 1 year from their issue dates. Checks presented for payment that are not negotiable must be verified for validity and replaced, if appropriate (see section 12.0).

2.3 Evidence of Payment

The issuance and mailing of a check to a creditor of the United States does not, by itself, constitute payment of a debt. A debt is not discharged until a creditor has received the amount of the debt in money or its equivalent in law. An acknowledgement of receipt of the check is also not evidence of payment. The endorsed and negotiated check is the receipt to the government.

*2.4 Federal Nontax Payments

The [I TFM 4A-2040](#) requires that all Federal nontax payments be made by Electronic Funds Transfer (EFT) unless a waiver applies.

3.0 PROCUREMENT OF TREASURY CHECKS

*3.1 Check Sourcing

The DFAS Enterprise Solutions and Standards Directorate's Tax and Disbursing Division (DFAS-IN/JJFKCB) is the sole check sourcing agency for DoD activities. Contact DFAS-IN/JJFKCB for current check formats available, the procedure for obtaining check stock, and for advice on alternative payment methods.

DFAS-Indianapolis Center (DFAS-IN)
Enterprise Solutions and Standards Directorate
Tax and Disbursing Division (DFAS-IN/JJFKCB)
8899 E. 56th Street
Indianapolis, IN 46249-2700
Email: dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil

To ensure continuity of operations, DOs should not allow check stock to fall below a 6-month supply. Seek replenishment when the check stock reaches the 9-month level. The DO at a newly established disbursing station symbol number (DSSN) should request check stock at least 4 months before the planned commencement of disbursing operations.

3.2 Check Types

3.2.1. Regular Issue Checks. Regular issue checks are standard checks with preprinted DSSNs, serial numbers, and magnetic ink character recognition (MICR) encoding.

3.2.2. Unnumbered Checks. Unnumbered checks are regular issue checks controlled by preprinted inventory control numbers (ICNs) rather than preprinted DSSNs, serial numbers, or MICR encoding, and are for use only by DFAS sites. Under [I TFM 4-5045.15](#), systems that prepare these checks must have a post-print verification unit to read and verify certain critical data after the optical character reader-B (OCR-B) and MICR data are printed. These data elements are the OCR-B check symbol, serial number, dollar amount, and the entire MICR line. The system must internally calculate the check digits for the check symbol and serial number on the MICR line and verify correctness, compare the MICR data with the OCR-B data, and both the OCR-B and MICR data with the data from the input source. If any character fails to verify correctly, the check or checks must be rejected, marked "Void - Not Negotiable," and then reprinted.

3.2.3. Test Grid Checks. Test grid checks provide the format of the check by grid lines to test or align automated check writing and bursting equipment. They are printed for government-wide use. Ignore the date and dollar boxes since they are not preprinted on checks. Test grid checks are not for issuance.

3.2.4. Specimen Checks. Specimen checks are identical to unnumbered checks except that they are overprinted with the words “SPECIMEN CHECK – NOT NEGOTIABLE” in black ink in a type size of at least 18 points in the signature space, with an ICN Alpha prefix of “X” in the numbering sequence. Safeguard specimen checks the same as blank checks. In the absence of a specimen check, use a blank check marked “Void - Not Negotiable, No Check Issued Under this Number,” if available; otherwise, use a piece of paper or card of check size 7 3/8 inches in length and 3 1/4 inches in width.

3.2.5. Blank Check Formats. See [*ITFM 4-5030.20*](#).

3.3 Check Features

3.3.1. Pre-Encoded Magnetic Ink Characters. Certain information is encoded in MICR format along the bottom of the check. The MICR area extends across the entire length of the check from positions 14 to 54, 9/16 inches from the bottom edge of the check. The MICR line consists of a 9-digit check serial number in positions 23 through 31, a 9-digit routing transit number in positions 34 through 42, a 5-digit check symbol number in positions 49 through 53, and the appropriate MICR symbols citing preprinted symbol and serial numbers.

3.3.2. Check Serial Numbers. When all serial numbers of a DSSN have been used, Treasury’s Fiscal Service will assign a new DSSN for the next supply of checks. Accordingly, as serial numbers of checks issued approach 99,999,999, the DO should notify the National Payment Integrity and Resolution Center (NPIRC), through DFAS-IN/JJFKCB, to facilitate assigning a new DSSN before the next supply of blank checks is ordered. In this instance, the DO should allow 30 days in addition to the time normally required to print and deliver the checks for the proof to be changed.

3.3.3. Check Numbering. Initial orders for serially-numbered checks must specify the numbers begin with 00001000 and end in xxxxx999. Serial numbers on subsequent orders must follow in exact sequence. On check formats K and M, agencies may order additional printing and/or numbering on the check stub (see [*ITFM 4-5030.30*](#)).

3.4 Emergency Checks

Under emergencies only, disbursing offices may use their print systems to produce pre-numbered and MICR-encoded check stock for use by other disbursing offices within that federal entity. Disbursing offices must not use the emergency check stock system to avoid ordering checks through normal channels (see [*ITFM 4-5030.60*](#)).

3.5 Receipt of Treasury Checks

3.5.1. Receipt. Upon receipt of a check shipment, and based on a representative sample, the DO or designee verifies that all checks have been received, examines the accuracy of the printing, and verifies the check symbol/serial numbers in the upper right corner of the checks and in the MICR field. If shipment is by means other than registered first class mail, the vendor mails

an “Advice of Shipment” form with the shipment. After receipt and verification of the check order, sign the form, and send it to DFAS-IN/JJFKCB.

3.5.2. Warranty. The vendor provides a 120-day warranty on checks it produces, beginning with the day the checks are delivered to the user. The office that receives the checks is responsible to determine any obvious defects or missing checks before the warranty period expires. Otherwise, the vendor may not be liable for making replacements.

3.5.3. Defective Check Shipments

3.5.3.1. If checks are missing from the shipment, or check stock is in some other way defective and replacement is warranted, contact DFAS-IN/JJFKCB. If checks are damaged upon receipt, the DO should contact the trucking company; if checks were sent by registered mail, contact the U.S. Postal Service (USPS) to initiate a claim for damages.

3.5.3.2. If a check shipment is received that contains more than one check with the same check serial number, in addition to the notification to DFAS-IN/JJFKCB, the DO must destroy each check bearing a duplicate number. Since the remaining checks bearing these same serial numbers may be issued in the normal manner, do not report check serial numbers of the duplicate checks as zero dollar amounts in the check issue report. Mark the checks bearing the duplicate numbers “Void - Not Negotiable” and destroy them locally within 30 days, [following the guidance in section 15.0](#).

3.5.3.3. If checks are discovered missing in the receipt verification process, or at any time thereafter, notify both DFAS-IN/JJFKCB and the nearest DoD Component investigative service for referral and liaison with the U.S. Secret Service (USSS).

3.5.3.4. If checks are received that are intended for another disbursing office, immediately contact DFAS-IN/JJFKCB for instructions regarding the shipment.

3.6 Transfers Between DOs

Count checks transferred between DOs as a part of the relief from disbursing duty process by both the transferring and the receiving parties when they are not in the original packages (see Chapter 2, subparagraph 4.6.1.3).

3.7 Security, Storage, and Issuance of Blank Checks

3.7.1. Store blank Treasury checks in a secure container (see Chapter 3, paragraph 3.4). Keep them in the DO’s or deputy DO’s (DDO) safe or under lock and key. The DO or designee ensures that the condition of storage prevents any deterioration of the surface tint and design of the check, which are sensitive to moisture, light, and heat. The DO or designee may accept checks that bear printing of a satisfactory color and strength and, if subsequent deterioration occurs, obtain a replacement supply. Only one individual should be given primary responsibility for maintaining the check stock and related control records. Access by others should be limited to occasions when the designated custodian is absent.

3.7.2. The DO or designee maintains control of the check stock and is accountable for it at all times. In cases of joint custody, the DO or designee ensures that no break in accountability occurs, to provide for access to the check stock during periods of brief or unexpected absence of the single individual who exercises normal day-to-day responsibility for the check stock.

3.7.2.1. A DO or designee maintains a blank check control log for each series of checks used to maintain a perpetual inventory of checks on hand and control their release. The DO or designee must examine the blank check control log daily to ensure that all checks drawn and checks returned unused are accounted for and that no checks have been removed without authority.

3.7.2.2. Using the prescribed blank check control log:

3.7.2.2.1. The DO or designee issues blank checks to check writers from the check stock in blocks of appropriate size by serial numbers and monitors the return of blank, voided, or spoiled checks to the vault. The DO or designee also uses the control log to control issuance and return of checks between the DO and sites external to the disbursing office that prepare checks;

3.7.2.2.2. The DO or designee must obtain receipts for checks issued. The designee in charge of the working checks must keep a record of checks issued daily to each clerk, examine daily the record of checks drawn and returned unused by the clerks to account for checks issued, and ensure that no checks are removed without authority; and

3.7.2.2.3. The DO or designee must inventory the check stock not less than once every 90 days. Any open container must be inventoried by an individual count of the checks contained therein. Open all damaged cartons of checks, or those bearing evidence of tampering, and individually count the checks. Keep a record of the inventory on hand in the disbursing office and provide it to the cash verification team for attachment to the quarterly cash verification report (see Appendix A).

3.7.2.3. When blank checks are lost or stolen:

3.7.2.3.1. The DO or designee immediately notifies the Commander, the nearest office of the USSS by email or telephone, and Fiscal Service at telephone number (304) 480-7777. Confirm the notification with a letter to the Fiscal Service's Physical Security Branch, 6505 Belcrest Road, Suite 613, Hyattsville, MD 20782, with copies to the USSS, appropriate DoD Component investigative service, DFAS-IN/JJFKCB, and appropriate local banks. Include the DSSN, ICNs or serial numbers of the checks involved, a statement giving complete information concerning the loss or theft, and the date the loss was referred to the USSS for investigation; and

3.7.2.3.2. If the loss involves a range of consecutive serially-numbered checks, only the beginning and ending serial numbers of the range are required. Void all checks discovered to be missing, lost, or stolen before issuance, and report the circumstances following [I TFM 4-5040.20](#).

4.0 ISSUANCE OF TREASURY CHECKS

4.1 Check Preparation

4.1.1. Check Issue. Issue checks in strict numeric sequence within each series. The information essential to a check includes place and date of issue, DSSN, serial number, payee, amount, signature of drawer, designation of title, and other identifying information. Do not print legends such as “Salaries and Expenses” or “Drawn for Above Object” on the face of a check. Check explanations (e.g., exchange-for-cash or salary) and other special information unique to each disbursing activity may be entered at the bottom of the check to the left of the signature area. Keep extraneous data to a minimum. Spaces allotted on the printed check form for specific information are only for their intended purposes. Do not leave any spaces unfilled in a manner that would allow or facilitate alterations and additions that could lead to forgery or fraud.

4.1.2. Check Completion. A completed check must have an orderly appearance and good legibility for accurate reading in rapid handling. Avoid overprinting, intersecting, and crowding. No check may be issued for more than \$99,999,999.99. In instances when the total payment exceeds that amount, issue two or more checks that total the payment required. No deviation in the check writing procedures is permitted unless authority is first obtained from DFAS-IN/JJFKCB (see [*ITFM 4-5000*](#)).

4.2 Check Print Requirements

4.2.1. Data on Checks. Data printed or typewritten on checks will be permanent and not affected by erasure, smudging, moisture, handling, the passage of time, or by other methods that might intentionally or unintentionally be used to remove or alter the printing without affecting the check itself.

4.2.1.1. Impact printers may be used. Laser type printers where the toner fuses the print into the check may be used. Do not use laser type printers that only lay an image on the surface of the paper. Do not use correctable ribbons for manual preparation of checks, as they lack the permanence required to protect against undetectable alteration.

4.2.1.2. The physical characteristics and layout of the blank check determine the correct position of the date, amount, payee name, and DO's signature. Avoid deviations from the normal positioning of this information. To standardize printing and facilitate accuracy verification, inscribe words on checks in all capital letters. Omit punctuation except for commas used in addresses and to set off names of two or more payees.

4.2.2. Pay to the Order of. Inscribe the payee's name on a check to ensure positive identification.

4.2.2.1. To ensure correct endorsement, and for other reasons established by custom, the payee's surname should appear last; the correct order is first name, middle name or initial, and last name. Where the payee has an often used surname (e.g., “R T Jones” or “J G Smith”), the use of initials only, instead of the full given name, is inadequate to provide

positive identification of the rightful payee. An initial in lieu of a first name is permissible only in cases where the payee's legal given names consist of initials only. In this case, show the words "Initials Only" after the initials. In instances where the length of the surname would leave insufficient space for the full first name, or where the check writing system makes the use of a first name impractical, show other positive identifying data (e.g., the payee's address on the check).

4.2.2.2. When entering a payee's SSN on the check, inscribe it in a location where it will not be visible in the envelope window if the check is mailed. When checks are to be mailed, exercise care to assure that the full and complete address of the payee is entered on the checks or envelopes, including rural route numbers, box numbers, house numbers, zip codes, and any other information needed for correct delivery.

4.2.3. Date. Print the date on the upper right portion of the check, either above or below the check number. Check signers equipped with date bands may be used **if** the location of the stamped date does not interfere with preprinted data or other data to be printed or typed on the check.

4.2.4. Numeric Dollar Amount. Print the numeric dollar amount in the upper right quarter section of the check, above the signature of the DO and below the DSSN, in horizontal alignment with the name of the payee or the amount in the body. Completely fill the allotted area with the money amount, preceded by a dollar sign (e.g., \$****123.45). Leave no space unfilled that otherwise might be susceptible to use for fraudulent insertion. To reduce opportunities for amount alterations, use neither zeroes as fill-in characters preceding the money amount nor commas in the money amount.

4.2.5. Written Dollar Amount. Printing the amount in the body of a check in words offers greater protection against the alteration of amounts. If a disbursing activity determines that substantial savings in the cost of issuing checks would result or that space is limited, it may use figures only, without any spacing within the amount, in one of these formats: \$50and75cents, \$50and75/100, or \$50.75.

4.2.6. Other Special Information. Print special information (e.g., distribution code, computer or typewritten check serial number, or explanations for check issuance) at the bottom of the check to the left of the signature area. When checks are drawn for public vouchers or payroll payments, the DO, at his or her option, may insert the disbursing office voucher number or, if applicable, the bureau voucher number.

4.2.7. Drawer's Signature. Each check issued must bear either the DO's manual or approved facsimile signature, or the manual signature of a DDO. Manual signatures should generally agree with specimens previously submitted to DFAS-IN/JFKCB. Checks drawn by a DDO are signed below the printed, typed, or stamped title of the DO for whom he or she is acting, as follows:

Disbursing Officer

By _____, Deputy
(Deputy DO's Signature)

Use permanent dark blue, blue-black, or black ink for signatures on checks (whether manual or by facsimile signature). The ink should not be subject to fading and not readily soluble in water.

4.3 Erasures and Alterations

DOs must not release checks with erasures, alterations, overprinting, or imperfect figures or letters. Spoil or void such checks and issue replacements (see section 9.0).

4.4 Record of Checks Issued

Each DO must maintain a record of checks issued by their DSSN. The record must contain at least these data elements: payee, amount, DSSN, check serial number, and date of the check. Other information as to the purpose for which the check was issued, document number, voucher number, and local identification code or number is optional and subject to the discretion of the issuing DO. The record may be kept on paper or electronic medium designed for data processing use.

4.5 Supporting Documents

Attach documents and payroll vouchers used to support the record of checks issued to the original vouchers submitted to the supporting DFAS site. Do not transmit them to the Treasury with the check issue reports. Send requests for the Defense Check Reconciliation Module (DCRM) Users' Manual to [DFAS Corporate Systems \(DFAS/ZTE\)](mailto:dfas.dscc.zte.mbx.cco-dcrm@mail.mil) at dfas.dscc.zte.mbx.cco-dcrm@mail.mil. Include all the necessary data for Treasury's reporting purposes in the electronic flat file.

5.0 CHECK-SIGNING MACHINES

5.1 Machine Specifications

Select check-signing machines that meet Treasury regulations and standards (see [ITFM 4-5045.20](#)). Impact check signers using rubber signature dye, or approved laser check printers containing digitized signatures, may be used. The machines should have the following features:

5.1.1. A dating device capable of placing the date either immediately above or to the right of the words "UNITED STATES." It is preferable to have the signature and date imprinted in a single operation; if the check writing equipment also imprints the date, the check-signing machine does not need to have this capability;

5.1.2. A mechanism capable of processing paper checks. Offices issuing checks with detachable stubs ensure that the mechanism's feeding device can handle this type of check; and

5.1.3. A key-controlled DO signature feature or a removable computer chip containing the digitized signature for laser check printers with digitized facsimile signature capability. Keep the key and/or the chip controlling the signature capability in a locked safe or vault or under other equally effective safeguards when not in use.

5.2 Signature Media

5.2.1. Requisition

5.2.1.1. Request for Procurement. Upon receipt of the specimen signatures, the outgoing/relieved DO immediately prepares and forwards a request for procurement to DFAS-IN/JJFKCB for approval and forwarding to the DFAS/ZTE. DFAS-IN/JJFKCB ensures sequential numbering of the medium. The purchase order must include the statement:

“Signature plates for impact type check signers are rubber stamps containing the prescribed facsimile signature of the DO. Digitized signature media are normally Dual In-Line or Single In-Line Memory Module computer chips or computer diskettes containing the DO's signature that is loaded to the laser printer check-signing software.”

Also, include the following information:

5.2.1.1.1. The type, manufacturer's name, model, and serial number of the check-signing machine;

5.2.1.1.2. Whether the signature plate or digitized signature medium is for a machine currently in use;

5.2.1.1.3. If the plate or digitized signature medium is to be used on a new and undelivered machine, refer to the procurement papers for the machine including the manufacturer, type, and model; and

5.2.1.1.4. The plate number and the name of the DO.

5.2.1.2. Numbering. Treasury regulations require that the signature media of each DO be numbered in sequence in the lower left corner of the border beginning with the number one. Include on each order the next sequential number for the affected DO.

5.2.1.3. Multiple Media. Normally, a DO and authorized DDOs use only one signature medium. Multiple signature media may be obtained only upon approval of DFAS-IN/JJFKCB. Requests for additional media must include justification of the need for more than one medium. If the check-signing machine uses one set of two plates for signing, additional media may be obtained only upon approval of DFAS-IN/JJFKCB.

5.2.2. Format and Quality of Impression. DFAS-IN/JJFKCB will not accept facsimile signatures that do not meet required standards. Design facsimile signature media so that the frame or border which encloses the facsimile signature is a single wavy line that contains no identifying characteristics. Characterize the impression of the signature with sharp lines, a continuous and homogeneous deposit of ink, absence of filling, and absence of pronounced ribbon pattern.

5.2.3. Approval. Upon receipt of the signature media, the DO whose signature is reproduced runs 14 specimens of each facsimile signature, certifies two of the copies as true facsimiles, and mails all 14 copies to DFAS-IN/JJFKCB with a memorandum requesting approval of the facsimile to sign checks. The reply of approval authorizes use of the check-signing machine. If the specimens do not match, or the medium does not meet required standards, DFAS IN/JJFKCB advises DFAS-IN/ZTA and requests correction. Do not sign checks by facsimile signature before receipt of DFAS-IN/JJFKCB approval.

5.2.4. Custody. The DO establishes and implements controls necessary to prevent unauthorized use of signature media. Maintain custody receipts for all signature media held by authorized deputies, and a record of each run of checks through the check signer and reconcile this report with the report of checks issued. When not in use, keep signature media in an approved safe or vault. If the signature media are not removable from the check-signing machine, keep the keys to the machine in an approved safe or vault.

5.2.5. Use. Check signing by signature media should be performed by only the DO or designated DDOs. When considered necessary for efficient operation of the disbursing office, the DO may authorize (in writing) the holder of a specified position other than a DDO to perform this function. Do not appoint individuals as DDOs solely to sign checks by signature media.

5.2.6. Destruction

5.2.6.1. Signature Medium. If a signature medium is to be withdrawn from service (e.g., not to be used again or DO retiring from service) or is unserviceable, destroy it locally. This destruction must be by someone other than the DO and be witnessed by two individuals equal to or senior in rank to the DO.

5.2.6.1.1. Before destruction, the DO verifies the signature plate number or serial number of the digitized signature medium and witnesses the information on the certificate of destruction.

5.2.6.1.2. Identify name, title, and grade or rank of the DO; complete mailing address of the disbursing station; date and method of destruction; DSSN; typed name, title, and grade or rank of the witnesses; the DO's signature; and a statement as to whether or not the digitized signature medium had to be loaded to a printer or check signer software.

5.2.6.1.3. When a signature plate is destroyed, include in the certificate of destruction the specific plate number and an inked impression of the plate.

5.2.6.2. Digitized Medium. If a digitized medium containing the DO's signature is destroyed, and that signature had been loaded to a printer or check signer software, the DO verifies that the signature has been permanently removed from the printer or check signer software. This destruction must be by someone other than the DO and be witnessed by two individuals equal to or senior in rank to the DO. The DO signs the certificate of destruction only after the actual destruction of the signature medium. Immediately upon destruction, the certificate identifying the specific plate and date of destruction must be given to the DO and the federal entity official responsible for maintaining specimen signature files. Follow applicable federal and industry information technology regulatory requirements and standards when destroying an electronic file of a facsimile signature (see [ITFM 4-5025.20](#)).

6.0 PROMPT DELIVERY OF CHECKS

6.1 Delivery

Once prepared, deliver checks promptly to payees. The DoD requires participation in the direct deposit program for all newly enlisted, reenlisted, appointed (commissioned), or retired military personnel and all newly hired civilian personnel. Title 31, U.S.C. § 3332 requires that contractors be paid by EFT.

6.2 Safeguarding and Handling

6.2.1. Properly safeguard checks, handling them as few times and by as few people as practical.

6.2.2. Ensure proper custody, signing, and delivery of checks. If checks are handed to the payees, require that payees identify themselves. Utilize the payee identification process discussed in Chapter 9, paragraph 4.4.

6.2.3. Promptly return to the disbursing office checks not delivered within the time specified by the DO.

6.2.4. Keep checks in a safe, vault, or locked fireproof cabinet pending distribution or return to the DO.

6.2.5. Designate personnel engaged in pay delivery activities in writing and supervise them to help prevent any unauthorized, fraudulent, or other irregular activities.

6.3 Delivery by Mail

The normal method of check delivery is by mail through the USPS to payees' residential mailing addresses or post office boxes. At overseas activities, payees' organizational addresses are considered their residential mailing addresses; organizational addresses are otherwise not valid. When check delivery by mail is impractical, commanders or their designees may provide specific locations where payees may receive their checks. If checks are mailed to specific locations for

delivery, the DO appoints a person in writing at each location to deliver the checks as a designated third party (see paragraph 6.5).

6.4 Outside the Continental United States (OCONUS)

6.4.1. Restrictions. Under Title 31, Code of Federal Regulations (CFR), 211.1 ([31 CFR § 211.1](#)), the Secretary of the Treasury prohibits agencies from sending checks to the Republic of Cuba (except to the Naval Base, Guantanamo Bay) and the Democratic People's Republic of Korea (North Korea). DOs instead withhold payment and establish the liability on their books. Go to the Treasury's [Office of Foreign Assets Control](#) website for a complete listing of designated nationals and blocked persons.

6.4.2. Exceptions. The restrictions in subparagraph 6.4.1 do not apply to checks payable to foreign governments, issued to pay salaries or wages, or for goods or services purchased by the U.S. Government (see [31 CFR § 211.3](#)).

6.4.3. Claims for the Release of Withheld Checks or Proceeds. The agency originally responsible for authorizing the issuance of proceeds processes claims to release them (see [31 CFR § 211.2](#)). If an agency withholding payment receives a valid claim, it issues a check and decreases the related liability. If the proceeds of withheld checks were on deposit with the Fiscal Service before April 1976, and are still in deposit fund account 20X6048 (Proceeds of Withheld Foreign Checks), submit requests for payment with an appropriate recommendation to the U.S. Department of Treasury, Fiscal Service, Budget Reports Division, Governmentwide Accounting, 3201 Pennsy Drive, Building E, Landover, MD 20785. The telephone number is (202) 874-5202.

6.5 Delivery by Designated Third Parties

Personal delivery of multiple checks may be impractical for the DO, or it may not be expedient to mail them to addresses of record. Under such circumstances, and with the guidance for delivery of checks noted in paragraph 6.2, the DO may deliver or mail checks to a designated third party for distribution. A third party is any individual authorized to distribute a quantity or bulk shipment of checks to payees. A person who maintains pay accounts or prepares checks is not authorized to distribute checks.

6.5.1. Appointment/Termination of Designated Third Parties. A DO may appoint individuals to serve as third parties for bulk check delivery. A [Fiscal Service \(FS\) Form 210DA](#), Designation for Agent to Receive and Deliver Checks, is available for this purpose. A DO may appoint one or more alternates to prevent distribution delays in the absence of the designee. Alternates may also assist in check distribution when conditions warrant. The DO ensures revocation of appointments upon appointee transfer, when bulk delivery is no longer needed, or as other circumstances warrant. Appointments by memorandum must include:

6.5.1.1. The name and title of the appointee,

6.5.1.2. The name and location of the DO,

6.5.1.3. The applicable DSSN(s),

6.5.1.4. The date of the appointment, and

6.5.1.5. A description of the types of checks to be delivered.

6.5.2. Transporting Checks to Designated Third Parties. Package bulk shipments of prepared checks separately from other correspondence and send them by registered mail. Send bulk shipments for a unit or group of units to a third party for distribution or delivery to payees, or reship them to another third party for delivery where the military unit is located. Include the checks, transmittal letter, and documentation needed for the specific payments.

6.5.3. Release of Checks to Other Than Payee. Designated third parties may not release checks to anyone other than designated payees. When the payees are absent at the time of delivery, see subparagraph 6.5.5 for handling checks.

6.5.4. Judge Advocate or Investigative Agent Third Parties. When advance payments are issued for witnesses subpoenaed for trial, a representative from a DoD Component investigative agency, or a judge advocate charged with serving the subpoena, delivers the checks when the payees are absent at the time of delivery.

6.5.5. Third Party Disposition of Undelivered Checks. Unless otherwise directed, return checks for payees not present to the DO before the close of business that day. Inform payees who were absent to call the disbursing office to receive them. If locked fireproof file cabinets or safes are available, the DO may authorize the designated third party to hold undelivered checks for a specified short period. When payees are on extended periods of leave or absence, return their checks to the DO for disposition. Return checks found to be in error to the DO. The DO issues a new check to the payee after appropriate corrective action.

7.0 EXCHANGE-FOR-CASH CHECKS

7.1 Report

All exchange-for-cash checks must be reported through PIR citing the DO Cash TAS and the proper BETC code. Spoiled exchange-for-cash checks that have not been reported to Treasury are not impacted by daily reporting and must follow the guidance listed in paragraph 9.1. Spoiled checks that have been reported to Treasury must be resolved by one of the following methods.

7.1.1. Accommodations. Accommodation exchange-for-cash checks are allowed only when satisfactory banking facilities do not exist and are typically only OCONUS. In OCONUS areas and for ships afloat, the DO's commander may authorize **cashing** negotiable instruments (see Chapter 4, section 2.0). These checks may be prepared and issued by DOs for official purposes to a DDO, agent, or cashier as an advance of cash; to the USPS for remitting collections for the sale of postal money orders; or to the Western Union for remitting collections for personal messages of military personnel transmitted over DoD communications facilities to points inside the continental United States (CONUS).

7.1.2. Advance Cash. These checks are issued by the DO to advance cash to a DDO, agent, or cashier. Checks issued as advances must be endorsed to the order of the bank or other institution furnishing the cash, or when cashed by another DO, to that officer by title and activity rather than by name as, "Pay to the order of the Disbursing Officer (name of ship, station, activity, or unit)." Make checks issued to remit collections for the sale of postal money orders or personal messages payable to the DO, USPS, or Western Union, as appropriate.

7.1.3. Check Cancellation. See paragraph 10.5 for guidance on disposition of canceled available checks. Deposit exchange-for-cash checks in Over-the-Counter Channel Application (OTCnet) utilizing the DO Cash TAS.

7.1.4. Unavailable Check Cancellation (UCC). Exchange-for-cash checks that are lost, stolen, or destroyed should follow the guidance in paragraph 7.5. Enter a Standard Form (SF) [1184](#), UCC, utilizing the DCRM's UCC subsystem with stop reason code "D" (For stop reason codes, see [I TFM 4-7055.20c, Appendix 1](#)) and, upon receipt, process a Classification Transactions and Accountability (CTA) transaction reducing both the budget clearing account **F3880 (UCC and Overpayments, Suspense) and the DO cash account.

7.2 Preparation and Handling

Do not show the name of the remitter and identifying references to invoices on exchange-for-cash checks. DOs may draw these checks payable to themselves, a DDO, or an agent for purposes of obtaining operating cash. When authorized in writing by the DO, for purposes of obtaining operating cash, DDOs may draw these checks payable to themselves.

7.3 Cash Belonging to Deceased or Missing Persons

7.3.1. Died or Missing. Exchange cash found in the personal effects of a person who has died or is missing in action for a Treasury check. Make the Treasury check payable to the payee designated by the officer having custody of the personal effects. State the purpose for which the check is drawn as "Exchange-for-cash; personal effects of (name, rank or rate, file or service number)." Draw a separate check for safekeeping deposits of each person (see Chapter 16, paragraph 3.5).

7.3.2. Unknown Whereabouts. Collect cash found in the personal effects of a person whose whereabouts are unknown, including absentees and deserters, into a deposit fund account. Funds that have been held in a deposit fund for more than 1 year can be transferred to account 20X6133 (Payment of Unclaimed Moneys), or into account **R1060 (Forfeitures of Unclaimed Money and Property). Make a separate collection for safekeeping deposits of each person.

7.4 Exchange-for-Cash Checks Returned as Not Required

Do not cancel exchange-for-cash checks issued for advances to DDOs, agents, and/or cashiers and returned to the DO as “not required.” The payee’s endorsement on the check is not required. The DO endorses the check and deposits it as prescribed in Chapter 11, section 8.3. DOs cannot accept the return of exchange-for-cash checks from any payee other than a DDO, agent, or cashier. Other exchange-for-cash checks are issued to the purchaser and must be negotiated by the payee.

7.5 Exchange-for-Cash Checks Lost, Stolen, or Destroyed

7.5.1. When Issued to an Individual. When the payee of an exchange-for-cash check reports the check as lost, stolen, or destroyed, the DO follows section 11.0. For UCC, the DO may not issue a recertified payment to the payee before receipt of credit for the original check from the Treasury, since the original check was issued in exchange-for-cash as opposed to any entitlement chargeable to an appropriation.

7.5.2. When Issued as an Advance of Cash to a DDO, Agent, or Cashier. For lost, stolen, or destroyed exchange-for-cash checks that were issued to advance cash, the DDO, agent, or cashier remains accountable for the cash.

7.5.2.1. Accountability. The DDO, agent, or cashier accounts for the check as a loss of funds. A DO may replace the lost check with a recertified payment check (or a new advance of cash) if he or she considers it necessary due to operational requirements.

7.5.2.2. Offset Loss of Funds. After receiving credit for the lost check, the DO prepares an [SF 1080](#), Voucher for Transfers Between Appropriations or Funds, to transfer the credit from the **F3880 account to offset the loss of funds in the DO’s accountability (see Chapter 6). Give a copy of the SF 1080 to the DDO, agent, or cashier to document the Treasury’s cancellation of the lost check, use the credit to offset the loss of funds, and file a copy with the UCC documentation.

7.5.2.3. Negotiated Lost Check. If the lost check is subsequently negotiated after cancellation by the Treasury (in which case, the Treasury will reverse the previous credit), the DDO, agent, or cashier is accountable for the original lost check and must re-establish the loss of funds.

8.0 CHECK ISSUE DISCREPANCIES

8.1 Adjustment of Duplicate Checks

Treasury accepts only one issue/paid record for any given DSSN and check serial number and will issue a debit voucher to charge the disbursing office for a second check received for payment with the same DSSN and check serial number. Should a DO receive a debit voucher for a duplicate check to which the payee is entitled, request that NPIRC reverse the debit voucher for

the correct check serial number of the duplicate check. The DO must also provide a copy of the debit voucher to NPIRC (see [1 TFM 4-6040.10](#)).

8.2 SF 1219, Statement of Accountability Adjustments

8.2.1. Prior-Month Checks Issued. A common reason for a [SF 1219](#) adjustment made by the DO is a prior-month check issue adjustment. Do not report prior-month issue of checks as current-month checks issued, as this will cause check issue discrepancies for both issue months. An SF 1219 adjustment is necessary to realign the check issue reporting to the proper issue month of the checks.

8.2.2. Clear Check Issue Discrepancy. To clear check issue discrepancies resulting from erroneously reported prior-month checks issued, the DO prepares a journal voucher (JV) to decrease the overstated check issues and increase the check issues for the proper month. For audit trail purposes, reference the check numbers and issue dates of the prior-month checks being adjusted between months on the JV.

8.2.3. Request for Adjustment. If the DO's financial records reflect the correct check issued data for the proper month, and the error is limited to the Treasury's record of the SF 1219 check issue total identified in the check reconciliation process, the DO sends a request for adjustment to the NPIRC.

8.3 Erroneous Information Reported on the Financial Management Service (FMS) Form 5206, [Advice of Check Issue Discrepancy](#)

The DO reviews the FMS 5206, a copy of the check, disbursement voucher, and the check issue report data. If the DO determines the check was paid for an amount different from its original issue amount, the DO returns the FMS 5206 to the Treasury with a memorandum stating the reason for returning without action. Support the memorandum with copies of the documents used to determine that the FMS 5206 is in error. Generally, the situation described is indicative of a bank processing error or alteration of the check by the payee. In either event, the explanatory memorandum returned with the FMS 5206 is sufficiently clear to enable the Treasury to initiate reclamation action through the banking system.

8.4 Relief of Liability

Both underdrafts and overdrafts are illegal, incorrect, or improper payment irregularities in the DO's account. The DO has the authority and the means to correct underdrafts. Overdrafts frequently are not within the power of the DO to correct. If a check issue overdraft resulted in an overpayment of a payee, the overpayment amount is an erroneous payment debt. When the DO has attempted to contact the payee and failed, or when the payee has been notified and has neither the ability nor the inclination to make restitution, the DO transfers the debt to the supporting DFAS site for further collection action. To meet standards for relief of liability, transfer uncollectible overdrafts to the supporting DFAS site within 180 days. After the debt has been transferred, relief of liability for the illegal, incorrect, or improper payment may be requested (see Chapter 6).

9.0 SPOILED AND VOIDED CHECKS

9.1 Spoiled and Voided Checks

When a check is spoiled during the issue process, the DO must void the check. Spoiled checks are treated as voided checks. Void a check that is misprinted or mutilated during the issue process or is determined not to be a proper payment and has not been reported as a check issue with a dollar amount greater than zero. Report destroyed unused and lost or stolen blank checks as voids. Render checks voided by the DO non-negotiable by typing or stamping the words “Void - Not Negotiable. No Check Issued Under This Number.” If a DO cannot report the voided checks as required, it must email Fiscal Service at RRB.OSD-NPIRC-PM@fiscal.treasury.gov (see [ITFM 4-6030](#)).

9.1.1. A check reported to the Treasury as a valid check in a dollar amount greater than zero may not be voided under any circumstances. The DO stamps the check, “Not Negotiable - For Deposit Only. Credit of Agency Location Code #####.” The DO deposits the check using OTCnet, to credit the proceeds of the check to the appropriation from which it was issued and process the check as either an available or UCC, as appropriate, following section 10.0.

9.1.2. If the payment associated with the voided check is otherwise proper, replace it with the next available check in the series and in the same format used for the original voided check. Annotate on the original voucher, the copies of the voucher, and the check issue log to indicate the original check was voided and the number of the replacement check used for the payment.

9.2 Storage

The DO stores spoiled and voided checks in the vault or safe, segregated from other checks.

*9.3 Disposition

The DO destroys spoiled and voided checks locally as soon as possible, [following the destruction guidance in section 15.0](#).

10.0 AVAILABLE CHECK CANCELLATIONS

10.1 Competitive Equality Banking Act of 1987 (CEBA)

[CEBA](#) amended 31 U.S.C. § 3328 and created a new section 31 U.S.C. § 3334 that establishes time limits on the payability of Treasury checks. CEBA affects the time allowed for negotiating Treasury checks, initiating and processing claims, recovering monies from financial institutions, and requesting replacement check payments. The underlying obligations for which Treasury checks were issued are not affected. CEBA legislation does not impose the same payability restrictions on check payments made from limited depositary accounts. CEBA requires that Treasury checks be negotiated within 1 year of their issue dates. DOs may cancel checks within this 1-year period when the check is drawn under the DO's own DSSN, under the account of a predecessor DO of the same activity and DSSN, or under an account being settled by the DO.

A DO may not cancel a check over 1 year old. Checks may be canceled when the disbursing account is closed or current, or the proceeds of the check are for repayment to an appropriation or fund account, which is current or expired (see [ITFM 4-7030](#)).

10.2 Exceptions Include:

10.2.1. Checks recovered or returned to the possession of the DO after being submitted for a UCC are stamped with “Not Negotiable, Previously Treated as Canceled SF 1184 dated #####.” These Checks are retained for 90 days and then shredded. A DO receiving a returned check for an activity or DSSN no longer in operation stamps the check “Not Negotiable” and sends it to the successor or settlement DO;

10.2.2. Checks involving holder-in-due-course claims, see paragraph 13.2;

10.2.3. If substantial portions of mutilated checks are missing, see I TFM 4-7030; and

10.2.4. Checks that are at least 1 year from the date of issue (stale dated).

10.3 Undeliverable Checks

The DO keeps a record of undeliverable checks on the DoD [\(DD\) Form 2658](#), Returned and Undeliverable Check/Bond Record. An electronic system is acceptable to record undeliverable checks if it includes all the same information as on the DD 2658. The DO provides the information or a copy of the DD 2658 to agents, cashiers, and appropriate entitlement offices for their use. Do not remove undelivered checks from the safe or vault or allow deputies, agents, or cashiers to hold them except for immediate delivery to payees, or for cancellation and deposit.

10.3.1. Safekeeping. DOs keep undeliverable checks in a safe or vault, filing them in an order best suited for ready identification when claimed, or for mailing upon obtaining a proper address. At a minimum:

10.3.1.1. Open mail with returned Treasury checks in the presence of two people;

10.3.1.2. Limit access to the returned Treasury checks processing area; and

10.3.1.3. Secure the checks in a locked container if there is a delay between the time the checks are received and when they are defaced (see Chapter 3, paragraph 3.4).

10.3.2. Undeliverable Due to Death of the Payee

10.3.2.1. Deceased Military Members. The issuing DSSN cancels checks payable to deceased military members promptly and credits the value to the individual's pay account pending payment to a properly designated beneficiary.

10.3.2.2. Deceased Civilian Employee. See Volume 8, Chapter 10, section 5.0.

10.3.2.3. Other Payees. Deposit checks drawn to other deceased payees as undeliverable checks. Obtain an [SF 1055](#), Claim Against the United States for Amounts Due in the Case of a Deceased Creditor (see [19 CFR § 24.70](#)).

10.3.3. Checks Undelivered at Time of Relief. When a DO is relieved by another DO, or the DSSN is deactivated and disbursing for that activity is assumed by another activity due to consolidation, transfer of function, or other reason, the relieving DO or gaining activity assumes custody of and processes the undelivered checks. If the DO is transferred from disbursing duty without a relief, or the disbursing function is not assumed by another activity, process the undelivered checks as collections on an [SF 1098](#), Schedule of Canceled or Undelivered Checks, and deposit them whether or not the three-workday holding period has elapsed.

10.3.4. Special Actions on Canceled Checks Held by the Disbursing Office

10.3.4.1. Military Payrolls. When canceling a military pay and allowances check, the DO [ensures](#) the adjustment [is also processed on](#) the [member's](#) Master Military Pay Account.

10.3.4.2. Civilian Payrolls. When canceling a check in payment of civilian pay, the DO notifies the payroll office to make the appropriate payroll adjustment.

10.4 SF 1098

10.4.1. Check Credit. Credit a check that is undelivered within three workdays of receipt in the disbursing office to the appropriation originally charged using an SF 1098 prepared in triplicate.

10.4.2. Lack of Accounting Data. If the proper appropriation to be credited cannot be determined immediately, collect the amount of the check into account **F3875 (Budget Clearing Account, Suspense). Include on the SF 1098 all information available as to the identity and location of the payee of the check. Keep a copy of the documentation in a separate file to support each item in the suspense account. The DO acts aggressively to identify the proper appropriation and removes the item from the suspense account as soon as possible. If the proper appropriation remains unknown after 60 days, transfer the funds to Treasury's miscellaneous receipt account **R1060 on an [SF 1081](#), [Voucher and Schedule of Withdrawals and Credits](#).

10.5 Disposition of Canceled Available Checks

10.5.1. Canceled Checks. Process canceled check transactions authorized by this section in a manner similar to that for collections. Upon receipt of a check to be canceled, prepare an SF 1098 as the collection voucher and credit the appropriation originally charged for the payment. Show all lines of accounting charged and credited on the original disbursement voucher, assign a collection voucher (CV) number, and print the CV number and the date of collection on the back of the canceled check. Deposit the canceled checks for credit to the DSSN used by the DO canceling the checks. An endorsement stamp is required for canceled checks.

10.5.2. Defacing Returned Checks. Ensure that each canceled check is defaced by stamping the legend "Not Negotiable" in a color other than black (preferably red) and in prominent enough size to remove all possibility of negotiation.

10.5.3. Deposit Ticket. Deposit canceled checks on a deposit ticket separate from other negotiable instruments. DOs with OTCnet capability may deposit their canceled checks through this system.

10.5.4. Frequency of Deposits. Checks received for cancellation do not need to be deposited daily but must be canceled within three business days of receipt. These checks may be held in the DO's safe or vault pending preparation of a consolidated deposit ticket. In situations where check deposit volume is minimal, or where electronic deposits utilizing OTCnet are not available, send deposits to the [Federal Reserve Bank \(FRB\)](#) no later than the 25th of the month of receipt. Checks received after the 25th of the month may be retained and deposited the following month. All CONUS DOs deposit canceled Treasury checks with the nearest FRB. DOs in Alaska, Hawaii, and foreign countries deposit them with the general depository normally used for making deposits-for-credit to the Treasury's General Account. See Chapter 11, [paragraph 11.3](#) for deposit reconciliation requirements.

10.6 Claims for the Proceeds of Canceled Available Checks

When a claim is received for the proceeds of a canceled available check, and all or a portion of the amount is due to the claimant, the disbursing office that collected and deposited the original undeliverable check pays the claim on payroll or other vouchers prepared, processed, and certified the same as a current payment. This does not preclude an undeliverable military paycheck from being canceled by the issuing DO so that the member may be paid at a new duty station. Use an [SF 1034](#), Public Voucher for Purchases and Services Other than Personal, to make these payments and charge them to the accounting data credited on an SF 1098, referencing the original undeliverable check by serial number, amount, DSSN, month, year, and account in which the undeliverable check was collected. Pay claims received for items transferred to the **R1060 account from the 20X1807 (Refund of Moneys Erroneously Received and Covered) account.

11.0 UCC

11.1 Unavailable Checks

Cancel unavailable Treasury checks less than 12 months old as lost, stolen, mutilated, not received by the payee, and also cancel when the DO determines that the payee is not entitled to the proceeds of the check. To file a non-receipt claim against a Treasury check, the DO must submit a UCC online through TCIS or via file transmission (see [1 TFM 4-7045.10](#)). Checks canceled are credited by the Treasury to account **F3880 through the Intra-governmental Payment and Collection (IPAC) system. Utilize a CTA transaction to move the funds out of account **F3880 to the proper program TAS, deposit fund account, or DO Cash TAS along with the proper adjustment BETC code. Such situations include death of the payee before the check issue date, non-receipt of a recertified payment by the payee when the original check has been received and cashed, and receipt of a cash payment and a check payment for the same entitlement.

11.1.1. Payees have 1 year from the date of issue of the check to file a claim of non-receipt with the issuing disbursing office, which then submits an SF 1184 to the Treasury within 13 months of the issue date. The Treasury has 18 months from the date a check is paid to reclaim monies from the financial institution if the payee files a claim of forgery or unauthorized endorsement.

11.1.2. Checks unavailable to the payee and/or the DO, and for which entitlement to the payment exists, may be replaced by a new check called a recertified payment check. Such a payment bears a new check serial number and is vouchered, certified, and recorded as a new disbursement. The DO must control, cross-reference, and track original and recertified payments indefinitely or until both have been paid, recovered and destroyed, or canceled.

11.2 DD Form 2662, Recertified Payment Register

Maintain the [DD 2662](#) to provide the necessary cross-reference and control over UCCs. An electronic log is acceptable if it contains the same information as the form (see Volume 1, Chapter 9, section 2.0 for records retention).

11.3 SF 1184

11.3.1. Cancellation Form. The SF 1184 is required for all cancellations. Bulk losses of original checks require the preparation of an SF 1184 for each check.

11.3.1.1. Use this form to stop payment, obtain photocopies, or check the payment status of unavailable Treasury checks. Input stop reason codes to designate the desired action. Although this form attempts to stop payment on a check, there is no true stop payment action. The payee may still negotiate the check, and the DO is responsible to recoup the money.

11.3.1.2. If a check is presented for payment after Treasury has given the DO a credit to the **F3880 account, Treasury will reverse the credit and provide the DO the documentation, including a photocopy of the paid check. The DO must then research and take the appropriate corrective action, including collection efforts when dual negotiation has occurred. See subparagraph 11.3.2 for guidance on preparing and submitting an SF 1184, and paragraph 11.9 for guidance on handling the credits and reversals of credit in the **F3880 account.

11.3.2. Processing. Use DCRM's UCC subsystem to enter SF 1184s and transfer them to the Treasury biweekly. Contact the supporting DFAS site for questions on the SF 1184.

11.4 Claims of Non-receipt, Destruction, Loss, or Theft

11.4.1. Payee Request for Claim

11.4.1.1. Treasury will deny a claim of non-receipt, destruction, loss, or theft of a Treasury check issued on or after October 1, 1989, unless it is presented by the payee to the issuing disbursing office within 1 year from the date of issue.

11.4.1.2. The disbursing office will document the claim on an SF 1184 and submit through the supporting DFAS office so the Treasury receives it within 13 months of the check issue date. If Treasury denies a cancellation credit, it issues a Daily Advice of Status (DAS) with one of the status codes in [***ITFM 4-7045.20c, Appendix 6***](#). The DO advises the payee of the check status.

11.4.1.3. Fiscal Service forwards a FS [***Form 3858***](#), Claims Document, to the DO for completion by the payee/claimant. If the check has been negotiated, the payee examines the check copy; if the payee/claimant denies negotiating the check, he/she must complete and sign the FS [***Form 1133***](#), Claim Against the United States for the Proceeds of a Government Check.

11.4.2. DO's Action. The DO sends the FS 1133, the FS 3858, the photocopy of the check, and any other supporting documentation for the claim to Treasury for processing. If the payee files an FS 1133 to claim forgery or unauthorized endorsement against the check, a recertified payment is not authorized before receipt of a Claims Disposition Notice (CDN), from the Treasury (see subparagraph 11.12.4).

11.5 DD Form 2660, Statement of Claimant Requesting Replacement Check

11.5.1. Payee Request

11.5.1.1. A payee who reports the loss, theft, mutilation, or non-receipt of a Treasury check submits a written statement to the DO. The DD 2660 is the preferred form for the required statement, but a DO may accept a signed letter from the payee in lieu of the DD 2660, provided the letter contains the required information and the certification statement found on the DD 2660.

11.5.1.2. A payee who submits a statement in lieu of the DD 2660 must include the payee's name, SSN, and address; member's name and SSN if different from the payee; type of payment entitlement; whether the check was received, and if so, whether it was lost, stolen, destroyed, or mutilated; whether the check was endorsed by the payee or had a limited endorsement such as "for deposit only;" circumstances surrounding the loss, theft, destruction, or mutilation if the check was received; and the signed statement of certification of the payee. The statement must contain the signed certification statement exactly as cited above blocks 12-15 on the DD 2660. Failure to include this statement could hinder collection efforts if a dual negotiation occurs. Also, if the payee is the one that negotiated both checks, the statement could also be used to establish fraudulent intent.

11.5.2. DO's Action

11.5.2.1. Upon receipt of the signed statement, the issuing DO or settlement officer completes the information required to identify the check (e.g., issue date, check number, amount, and voucher number). Before entering an SF 1184, the DO must verify the check has not been returned as undeliverable.

11.5.2.2. If the check was re-mailed at a later date, the DO notifies the payee of the later mailing date and allows two weeks' delivery time before processing the claim of non-receipt. If the check has not been returned and enough time has passed to allow for mail delivery, the DO uses the information on the DD 2660 to enter an SF 1184 for the unavailable check. Do not submit an SF 1184 involving non-receipt of future dated checks, such as those issued for pay and allowance entitlements, before the date of payment.

11.5.2.3. Do not enter an SF 1184 involving non-receipt until the third working day after the check payment date.

11.5.2.4. The DO sends a copy of the claimant's DD 2660, or other written statement, and a copy of the SF 1184 documentation to the appropriate entitlement area, which must certify that the entitlement for payment still exists before the DO may issue a recertified payment.

11.6 DAS

11.6.1. File. With the exception of the transmittal documents, Treasury returns a DAS on every SF 1184 received. An essential control technique is for DOs to keep a complete file of submitted SF 1184s. Periodic review of the file will show, either by copy of the DAS or by copy of the agency receipt of batch transmittals, the Treasury received and processed all submissions. Follow up incomplete file items within 30 days through the supporting DFAS site by telephone and, if necessary, by submitting a second SF 1184 (see [1 TFM 4-7045.20](#)).

11.6.2. Canceled Check Status. Once Treasury has issued a DAS with a status indicating "check canceled; crediting agency," future requests to cancel or obtain photocopies of the canceled check will receive a response, "outstanding check was canceled; agency credited." A photocopy of the check will not be available until the check is presented for payment through the banking

system. Therefore, once a disbursing office has received a DAS with a status code of “Outstanding,” no additional SF 1184s may be submitted for that check number. If the original check is ever presented through the banking system for payment, the DO will receive notification that the Treasury has reversed the credit to the **F3880 account. Treasury will then provide a photocopy of the original check and the claim forms FS 1133 and FS 3858.

11.7 Payments, Accounting Claims, and Enhanced Reconciliation System

11.7.1. TCIS. Treasury’s TCIS is available to obtain digital check images and view check status online. TCIS has payment data and digital images of checks from 7 years ago to the present. Digital check images are in real time and available only for paid checks.

11.7.2. Inquiries. The inquiries on the payments and claims option in TCIS allows inquiries on the status of a single payment or multiple payments at the same time. TCIS is available for use Monday through Friday from 6 a.m. to 12 a.m. (midnight), Eastern Time. No software purchase is required to access this system. See TCIS website under Equipment Requirements for system requirements. To request access to TCIS, contact the Treasury’s Support Center at (855) 838-0743 or TCIS_TSC@stls.frb.org.

11.8 Authorization to Issue Recertified Payments

11.8.1. Recertified Payment. Treasury has delegated authority to DOs to replace checks originally issued by them to include checks lost, stolen, or destroyed both in transit, and after receipt, by applicable payees (see [31 CFR 245](#) and [31 CFR 248](#)). DOs may also issue a recertified payment when the SF 1184 is prepared, based on the facts available. Subject to the restrictions in the following paragraphs, DOs may issue recertified payments as replacements for original checks any time commencing with the submission of the SF 1184. The circumstances associated with each unavailable check govern this timing.

11.8.2. Limitations

11.8.2.1. Do not issue a recertified payment check if:

11.8.2.1.1. The payee of the original check is not entitled to the proceeds;

11.8.2.1.2. The payee died before the original check issue date;

11.8.2.1.3. Insufficient mail time has lapsed from the date the original check was mailed or re-mailed to allow for its delivery and possible return;

11.8.2.1.4. The payee has an outstanding obligation which the payment can offset; or

11.8.2.1.5. The original check is more than 12 months old.

11.8.2.2. Consider all circumstances of situations involving high-dollar-value unavailable checks, payees involved in adverse actions that could result in early discharge or termination, or nonpermanent employees with no vested retirement benefits or sustained work history before issuing a recertified payment. Also, consider the payee's ability to repay in cases of double negotiation and the possibility of offsetting a double negotiation against money, other than salary, due to the payee. For deactivated and closed DSSNs:

11.8.2.2.1. The designated settlement office normally issues these payments. In some situations, (e.g., consolidation), the DO supporting the activity that assumed the disbursing and accounting responsibility for the deactivated or closed office may issue a recertified payment for the deactivated or closed office; and

11.8.2.2.2. Except as prescribed in section 9.0, issue recertified payments only as a disbursement from the appropriation charged for the original check or, if that appropriation is no longer available, a current appropriation available for the same general purpose, subject to limitations on its use.

11.8.3. Issue Before Receipt of Check Status. Delays in issuing checks may affect military and civilian employees' personal financial affairs, DoD relations with private business, and other intangible benefits. Immediate issuance of replacement checks may thus be appropriate. DOs may use stop reason code "A" on the SF 1184 to support immediate check issuance to replace undelivered, lost, stolen, mutilated, or destroyed original checks issued under their DSSN if less than 31 days have elapsed since the check issue date. Limit this service to:

11.8.3.1. Military and civilian personnel for payment of pay and allowances;

11.8.3.2. Banks, credit unions, and other financial institutions unless the DO decides that obtaining the Treasury status is in the government's interest before issuing a replacement;

11.8.3.3. Agencies of the U.S. Government;

11.8.3.4. Foreign governments (If doubt exists as to the status of a foreign payee, treat the payment as a foreign business transaction and issue a recertified payment only after receipt of the Treasury status as prescribed in subparagraph 11.9.4); and

11.8.3.5. Any blanket check regardless of amount.

11.8.4. Issue After Receipt of Check Status. Submit UCCs using stop reason code "D" or "G," and issue a recertified payment only after the Treasury reports the check status as outstanding for:

11.8.4.1. Foreign businesses and contractors where the check payment is made to addresses or financial institutions OCONUS;

11.8.4.2. Payees who have previously negotiated both the original check and the replacement check issued to replace it;

11.8.4.3. Payees who have received more than three replacement check payments in the past six months or more than four in a 12-month period;

11.8.4.4. Payees who report non-receipt of a recertified payment;

11.8.4.5. Payees requesting replacement of an original check more than 30 days old; or

11.8.4.6. Payees other than a deputy, agent, or cashier requesting replacement of an exchange-for-cash check.

11.8.5. Issue When Check Status is Paid. Do not issue a recertified payment check when the DAS from the Treasury indicates the check status is paid (see paragraph 11.13).

11.9 Accounting for Recertified Payments

11.9.1. Accounting. Treasury provides credits for canceled unavailable checks and charges resulting from negotiation of previously canceled unavailable checks through budget clearing account **F3880. This account is restricted to unavailable check transactions; do not use it for any other purpose. It is available to hold credit or chargeback amounts only pending identification of the appropriation or fund charged for the original check issuance. Do not charge the **F3880 account directly for any payment, but transfer amounts in this account to the original appropriation as expeditiously as possible. Do not allow transactions in this account to become stale or unidentifiable, as an unidentifiable balance may result in a DO loss of funds and an associated pecuniary liability.

11.9.1.1. Credits Resulting From Submission of SF 1184s. If an unavailable check is outstanding, Treasury will issue a DAS indicating that the check is outstanding and that it will credit the agency with the proceeds. The Treasury will cancel the check and credit the funds derived from the cancellation to the **F3880 account. DFAS-CL and DFAS-IN receive cancellation credits electronically from Treasury daily or as needed. A hardcopy of the SF 1081 follows the electronic submission. Treasury sends these canceled check proceeds to DFAS-CL and DFAS-IN through CARS and the IPAC system. This will reflect any identifying information provided in the original check issue data submission as detail in the credit transmission.

11.9.1.2. Reversals of Cancellation Credits. If a canceled unavailable check is negotiated by a financial institution after cancellation by Treasury, Treasury will reverse the cancellation credit. The IPAC bill and detail data are available to the DO in real time on the IPAC website for current-month transactions. The detail data remains available to the DO on the IPAC website up to 15 months after the credits and charges are transferred. The detail data must equal the total dollar amount of the IPAC bill. The IPAC bill is the DO's documentary evidence that Fiscal Service provided the credits or charges. Credits and charges are listed separately and are not commingled in the same IPAC bill document or IPAC bill data file (see [1 TFM 4-7050.60](#)).

11.9.2. Agency Reporting of Fiscal Service Transfers to the **F3880 Account. Treasury transfers to the **F3880 account via IPAC. By the end of each month, DOs must reconcile their CARS activity by TAS/BETC to their internal accounting system of record and reclassify any transactions to the correct TAS/BETC in the CARS CTA Statement, if necessary. After reporting a credit or charge to the **F3880 account on its internal accounting records, the DO must prepare a JV to clear the credit or charge from the **F3880 account. The funds are returned to the appropriation or fund account identified by the DO. Any credit or charge processed after Treasury Receivable Accounting and Collection System closes on the last business day of the month is accounted for in the subsequent accounting month.

11.9.3. Distribution. Under 31 U.S.C. § 3334(a)(2), return canceled check proceeds to the appropriation(s) charged when the check(s) were originally issued, and treat the canceled check(s) as account(s) payable. Within 15 days of receipt, DFAS-IN and DFAS-CL send the check cancellation and credit detail information to the disbursing office (except as noted in subparagraph 11.10.2) that issued the check(s) and to the disbursing offices' supporting accounting offices. Any reversal of previous cancellation credits issued by Treasury should also be sent in the same manner to the applicable disbursing and accounting offices.

11.9.3.1. DFAS-CL and DFAS-IN send the check credit information, including the details applicable to the disbursing accounts that DFAS-CO manages, to DFAS-CO. DFAS-CL processes or distributes cancellation credit information for Marine Corps disbursing offices.

11.9.3.2. The net dollar amount entered by the Fiscal Service for the **F3880 account is reported on the CARS Account Statement. The ALC 20180009 is listed as the reporting entity. Statement of transaction reporting to clear **F3880 accounts are also shown on the CARS Account Statement with the DO's ALC shown as the reporting entity. The **F3880 reports are cumulative, and only the latest are accessible.

11.9.4. Accounting Office. When the accounting office receives canceled check credits, it transfers them from **F3880 to the original appropriations charged when the payments were made and establishes accounts payable. If a DO replaces an unavailable check before receiving credit from Treasury, the accounting office establishes an accounts receivable in the appropriation or fund charged for the original check, removes the receivable upon receipt of the credit, and transfers the reversal of a previous credit from **F3880 to the original appropriation.

11.9.5. Review of **F3880 Balances. The DO reviews the **F3880 account monthly to ensure necessary actions are taken to clear these transactions. Each time the DO's account is transferred, the incoming DO validates balances in this account (see Chapter 2, subparagraph 4.6.1.8). If the departing DO cannot provide the incumbent DO with documentation supporting the **F3880 items, the departing DO processes the unsupported items as losses of funds under Chapter 6.

11.9.6. Research. Upon receipt of a DAS indicating cancellation credit or reversal information from the supporting DFAS site, the DO initiates research on the check issue data submitted to Treasury to ensure the accuracy of the detailed information (e.g., the DSSN, check serial number, date of issue, and issue amount provided in the cancellation credit or reversal),

which must agree with the original check issue data reported to Treasury. Research any discrepancy in this data to determine its cause and correct it. In the case of a reversal, the DO determines if a dual negotiation occurred by verifying the status of the replacement check. The DO submits an SF 1184 on the replacement check using stop reason code “F” for non-entitlement.

11.9.6.1. If the check for the recertified payment is outstanding, the DO receives a credit to offset the charge for the reversal previously received. If the check has been paid, the DO receives a photocopy of the paid check, a claim form, and a claims document. If both the original and recertified payment checks have been negotiated, the DO begins collection action as outlined in paragraph 11.13. The disbursing office must also notify the appropriate entitlement or subject matter area (e.g., military pay, civilian pay, travel pay, or commercial accounts payable) that Treasury has returned a credit to the activity because the check was not negotiated or has reversed a credit previously received and provided a copy of the DAS.

11.9.6.2. The DO requests the accounting department re-obligate funds to cover the issuance of a recertified payment. Once assured that funds are re-obligated and available, the DO may issue a recertified payment check citing the original appropriation. If the original appropriation is closed, use a current year appropriation for the same or similar purpose.

11.9.6.3. When Treasury provides a reclamation credit, the DO requests the accounting department re-obligate funds to cover the issuance of a recertified payment.

11.9.7. Entitlement to Payment. When notified that an unavailable check has been canceled, the credit has been received, and a recertified payment has been requested, the appropriate entitlement or subject matter area determines if the liability for payment of the underlying obligation is valid before preparing a recertified payment, which is prohibited if the entitlement to payment no longer exists.

11.9.8. Recertified Payments. All recertified payments (including immediate replacements (stop reason code “A”)) must be vouchered, certified by a certifying officer, and charged to the appropriation or fund charged for the original payment. Making a recertified payment under the first two provisions listed in this paragraph requires the establishment of an accounts receivable, supported by a copy of the SF 1184 and/or the DAS, in the appropriation or fund for the amount due on cancellation of the original check. Recertified payments may be made when the disbursing office submits the SF 1184, or at any time in the claims cycle that is:

11.9.8.1. Before the status of the original check is known, when less than 31 days have elapsed from the date of the original check (see paragraph 11.8);

11.9.8.2. After the disbursing office has been advised by the DAS code that the original is outstanding and credit will be provided; or

11.9.8.3. After the credit has been received from Treasury.

11.10 Preparation and Disposition of Replacement Checks

11.10.1. Replacement Checks. Prepare and distribute replacement checks in the same manner as regular checks as described in section 4.0. If a payee claims non-receipt, loss, or destruction of a replacement check, the UCC procedures in section 4.0 also apply to the replacement check.

11.10.2. Returned and Recovered Replacement Checks. When a replacement check is returned by the payee after the original check it replaced has been found and negotiated by the payee, cancel the replacement check on an SF 1098 and credit the proceeds to the appropriation charged when it was issued. Deposit the check with the nearest FRB or branch on a deposit ticket as prescribed in paragraph 10.4. Transfer the chargeback to the **F3880 account from Treasury for the negotiated original check to the appropriation charged when the original check was issued.

11.11 CFIF

11.11.1. Claim Against the CFIF. The CFIF is a revolving fund established under 31 U.S.C. § 3343 to settle payee/claimant claims of non-receipt when an original check has been fraudulently negotiated. Only Fiscal Service may adjudicate claims of forgery against Treasury checks. A claim against the CFIF is governed by the 1-year statute of limitations provided in the CEBA (see subparagraph 12.1.2). Therefore, a claim of forgery must be presented within 1 year from the date the check was issued, otherwise the claim on the check is barred and the payee is not entitled to payment from the CFIF. The DO must submit an SF 1184 on the check within 13 months from the check issue date.

11.11.2. Statutory 1-Year Limit. The statutory 1-year limit on the claim against the CFIF does not affect the underlying obligation of the government for the payment. If the Treasury determines a check endorsement was forged and the payee's claim meets the statutory requirements, Treasury will institute reclamation procedures to recover the proceeds of the forged check through the banking system.

11.12 Check Forgery Claims

11.12.1. Forgery Claims. When Treasury determines that an original check was negotiated and paid by the Fiscal Service on a forged or unauthorized endorsement, a payee may have a valid claim against the CFIF (see paragraph 11.11). The NPIRC is the approval authority for settlement checks issued to replace checks paid over forged endorsements. Fiscal Service does not charge the CFIF for losses resulting from negotiation of checks issued to deceased payees or to payees who were not entitled to the payment. The address is: Department of the Treasury, Bureau of the Fiscal Service, NPIRC, Customer Service Branch, PO Box 515, Philadelphia, PA 19105-0515. Fiscal Service issues settlement checks out of the CFIF if it determines that the payee or special endorsee has established that:

11.12.1.1. The payee or special endorsee presented a timely claim of non-receipt, (e.g., filed a claim within 1 year after the date of check issue);

11.12.1.2. The original check was lost or stolen due to no fault of the payee or special endorsee;

11.12.1.3. The original check was negotiated and paid by Fiscal Service on a forged or unauthorized endorsement of the payee's or special endorsee's name; and

11.12.1.4. The payee or special endorsee has not participated in any part of the proceeds of the negotiation or payment of the original check.

11.12.2. DO's Action. A payee reports the loss, theft, or non-receipt of a Treasury check, and follows paragraph 11.5. A DO whose research determines that the check was negotiated requests a digital image of the check. For checks issued on or after the date of October 1, 1997, obtain a digital check image using TCIS. For checks issued before the date of October 1, 1997, DOs must determine the check status (see paragraph 11.3).

11.12.3. Payee/Claimant's Action. When the check status is "Paid," Treasury provides a photocopy of the original check, FS 1133, and FS 3858. If after examining the check copy, a payee/claimant denies having negotiated the check, the payee/claimant completes and signs the FS 1133 and returns it along with the check copy to Fiscal Service. The FS 1133s and FS 3858s are a combined set of four pages. The FS 1133 is for the payee's declarations and information concerning the unavailable check, and the FS 3858 is the claim reference document that contains the necessary information for the NPIRC to identify the check. Attach a copy of the FS 3858 to any correspondence with Treasury concerning the unavailable check.

11.12.4. Fiscal Service Action. Upon receipt of the FS 1133, the NPIRC reviews the claim form. If the FS 1133 is not complete, it is return to the payee/claimant with a letter advising the corrections needed. If the payee/claimant admits negotiating the check or does not return the FS 1133, take no further action. Consider an FS 1133 complete when all questions are answered and all required signatures are present. If a payee/claimant signs by mark, the mark must be witnessed in the space provided. If the FS 1133 is complete, the NPIRC advises the DO of the status of the claim using a CDN and begins the adjudication process. If the NPIRC determines that the payee/claimant was not involved in the negotiation of the check and did not participate in the proceeds from the check, it settles the claim by initiating a request to issue a check to the payee/claimant or transfer the funds to the DO.

11.12.5. Appeal Process. If the NPIRC denies a claim, a payee/claimant may appeal in writing to the NPIRC. The appeal must be postmarked no later than 60 days after the date of the denial letter. The appeal must include a copy of the denial letter, a signed statement, and any additional information or documentation for further investigation. The appeal must also include the check and symbol number identified in the denial letter.

11.13 Collections of Double Negotiations

11.13.1. Collections. A double negotiation occurs when an original check and its replacement have both been reported as paid by Treasury. The loss occurs on negotiation of the replacement check; the order in which the checks are cashed is irrelevant. A double negotiation is

an illegal or improper payment for purposes of pecuniary liability. The DO initiates collection action to recover illegal or improper payments made by his/her office. If the payee separates from government service, the DO is still responsible to pursue collection action. Normally, collections for illegal or improper payments are one-time cash refunds or lump-sum collections by salary offset and do not warrant installment liquidation. Limit installment repayments to cases of extreme personal hardship.

11.13.2. Collection Action

11.13.2.1. When Treasury notifies a DO that it has reversed a credit to the **F3880 account from a previous cancellation, the DO researches the situation to ascertain if a double negotiation has occurred by determining the payment status of the replacement check. Once a Treasury response confirms a double negotiation, the DO immediately begins collection action. Afford the payee due process rights of collection specified in Volume 16, Chapter 2, sections 4.0 and 5.0 in each case. The most effective means of achieving expeditious recovery is to present the payee a photocopy of the paid original and replacement check and a copy of the claimant's signed statement acknowledging he/she was not entitled to both payments. Due process rights of collection include the opportunity for the payee to contest the validity of the debt. In cases of double negotiation, the payee's right to complete an FS 1133 provides this opportunity.

11.13.2.2. If the payee asserts that one of the checks was negotiated over a forged endorsement, delay collection until the NPIRC adjudicates the payee's forgery claim. If the NPIRC determines the check was forged, the payee does not owe the debt. If the NPIRC denies the payee's claim, the full amount of the check is due and subject to immediate collection. If the payee fails to provide the properly completed FS 1133 within the period allowed to present documentation as to why the debt is not owed, he/she is deemed to have acknowledged the debt and the DO takes immediate collection action. In either situation, complete collection action within 90 days of the receipt of the DAS from Treasury indicating the canceled unavailable original check has been paid, or within 90 days of receipt of the CDN from Fiscal Service indicating the payee's claim of forgery is denied.

11.13.2.3. The DO documents all attempts to collect illegal or improper payments. If all reasonable steps have been taken to collect and the illegal or improper payment becomes uncollectible within the 90-day time limit, the DO transfers the debt to the appropriate office designated to pursue collection of uncollectible debts. See Volume 16, Chapter 2 for debt collection processes. Although the debt is transferred to another office for further collection action, the DO remains pecuniarily liable for the illegal or improper payment until the debt has been collected or relief has been granted; see subparagraph 11.13.1.

11.13.3. Determination of Fraud. Double negotiations could indicate fraudulent intent or misrepresentation. A DO suspecting this reports the situation utilizing guidance in Chapter 6, section 5.0 for possible investigative and/or disciplinary action. Pursue collection action as specified in Volume 16, Chapter 2, paragraph 13.1.

11.14 Relief of Liability for Uncollectible Illegal or Improper Payments

A DO may request relief of liability under [31 U.S.C. § 3527](#) (see Chapter 6, section 6.0).

11.15 Separation of Duties

The payment recertification process is subject to the same management controls as other routine disbursements. The same individual may not authorize, process, and review recertified payment transactions; see Chapter 1, subparagraph 3.5.2.

11.15.1. The minimum acceptable separation of duties consists of preparation of the SF 1184 by one individual, review and approval of the DD 2660 and SF 1184 by the DO or a DDO; preparation and certification of a disbursement voucher by an individual in the appropriate entitlement area, review and approval of the voucher with supporting documentation by a first line supervisor (other than the DO or DDO authorizing the transaction), and authorization of the disbursement by the DO or a DDO.

11.15.2. When the disbursement voucher is prepared in disbursing because of limitations imposed by automated disbursing system processes, or the combination of entitlement and disbursing functions into one unit (as is the case at small activities and most tactical units), the DO ensures that the duties of preparing the SF 1184, preparing the disbursement voucher, reviewing the transaction and supporting documents, and preparing the check are performed by different individuals.

12.0 TREASURY CHECKS CANCELED UNDER LIMITED PAYABILITY

12.1 Limited Payability

Treasury automatically cancels checks issued on or after October 1, 1989, [and](#) not negotiated by a financial institution within 12 months of the date of issue. This cancellation occurs in the 14th month after the date of the check.

12.1.1. Pre-CEBA. Before CEBA's effective date, 31 U.S.C. § 3328(a) allowed a Treasury check to be paid (negotiated) any time, and 31 U.S.C. § 3328(c) provided that the limitation on claims against the Government in [31 U.S.C. § 3702](#) (Barring Act) did not apply to an unpaid (not negotiated) Treasury check. Under the latter, the administrative statute of limitations allows consideration of claims to those filed within 6 years after they arise. The following examples illustrate these principles.

12.1.1.1. In December 1978, an individual submitted a \$1,000 claim for lump-sum leave to DFAS. In January 1979, DFAS issued a Treasury check to the claimant, who did not negotiate the check until 1986. In this example, the underlying obligation is \$1,000 or the amount due to satisfy the claim for lump-sum leave. Since the claim for payment was submitted in 1978, the provisions of the Barring Act were suspended (or tolled), meaning a claim was filed within the required 6-year period. Once the Treasury check was issued (1979), the individual also became entitled to a separate claim on that check, which, in 1979, was payable in perpetuity

(31 U.S.C. § 3328(a)). Thus, before CEBA, the individual's right to obtain a replacement check based on the claim to the original unnegotiated Treasury check masked the effect of the Barring Act on the underlying obligation.

12.1.1.2. Modifying the example in subparagraph 12.1.1.1 shows the effect of the Barring Act on the underlying obligation. In addition to the earlier facts, assume further that the individual discovered that he had failed to claim all that was due in December 1978 and that the agency, in fact, owed him another \$250. He may obtain payment for the additional amount of the underlying obligation only if he submits a new claim for the additional amount to the agency within the six-year period following the accrual of the original claim, December 1978. If in 1986, however, the individual, in addition to negotiating the check, submitted a claim for the additional \$250, the claim for the additional amount would have been barred since more than 6 years had lapsed from the accrual of the original claim.

12.1.2. CEBA

12.1.2.1. Obligation Underlying. The CEBA does not affect the obligation underlying the check. The CEBA left the two causes of action separate, one on the underlying obligation and one on the Treasury check.

12.1.2.1.1. The CEBA imposed a statutory limitation on the period during which a Treasury check may be paid and on any claim on account of a Treasury check. It requires the negotiation of a Treasury check within 1 year of its issuance date and states that any claim on account of that check is barred, unless the agency which issued the check receives a claim within 1 year of its issue date. After this period, a request for payment based on the check is barred.

12.1.2.1.2. The payee may still be entitled to payment based on the underlying obligation subject to the six-year statute of limitations in the Barring Act. Accordingly, after the 6-year period following the accrual of the claim, a check may be issued only if the claimant has tolled the Barring Act by making a timely claim on the underlying obligation. CEBA applies to the example in subparagraph 12.1.1.2. If the individual submitted the claim in December 1989 and the check was issued January 1, 1990, a claim on the check expired 1 year after the date of issue, December 31, 1990. Thus, the individual had to complete his claim on the Treasury check before the 1-year period expired in order to obtain a replacement check.

12.1.2.1.3. The CEBA also sets an 18-month statutory time limit from the date a check is negotiated to accomplish bank reclamation. If the statutory requirements for the claim are met and the proceeds of the check cannot be recovered from the banking system through bank reclamation procedures, Treasury issues the settlement check and charges the payment to the CFIF.

12.1.2.2. Underlying Obligation. The lack of availability of a replacement check does not affect a claim on the underlying obligation.

12.1.2.2.1. As an example, because a claim for payment was submitted timely (December 1989), the period of limitation as prescribed in the Barring Act was tolled, and

a check may be issued even if more than 6 years has passed. Conversely, if a timely claim on the underlying obligation had not been received, the claim on the underlying obligation is barred and an agency may not issue a check. Therefore, a claimant who submitted a valid claim to toll the statute of limitations on the underlying obligation may obtain a replacement check even if more than 6 years have passed since the claim accrued or the check was issued.

12.1.2.2.2. Tolling the Barring Act on the underlying obligation does not permit payment in perpetuity. Entitlement to payment is not unlimited; any appropriate defense remains available to the government. If a claimant waits an inordinate period of time to request payment on the underlying obligation of a Treasury check under CEBA, then Doctrine of Laches (a legal term based on neglect or omission to do what one should, thus warranting presumption that one has abandoned right or claim; (e.g., if a payee neglects or fails to file a timely request), the payer can presume that the payee has abandoned the claim) may apply. Further, Treasury records show only if a check has not been presented to it for payment, not whether it was presented to and paid by an intermediary bank.

12.2 Treasury Check Payability

Treasury canceled all Treasury checks issued before October 1, 1989. Those issued on or after that date bear the legend "Void After 1-Year." Treasury will decline payment of checks not negotiated to a financial institution within 1-year from their issue dates. Financial institutions will advise a payee to contact the check-issuing agency if a check is no longer negotiable. Stamp checks returned to the disbursing office as no longer payable (negotiable) "Void - Not Negotiable" and shred them after confirming receipt of the limited payability cancellation credit. Treasury checks issued before October 1, 1989, have already been mass canceled; shred them without confirmation of receipt of a limited payability cancellation credit.

12.3 Treasury Check Claimability

Any claim on a Treasury check is barred unless it is presented to the agency that issued the check within 1 year after its issue date. Since CEBA established a 1-year statute of limitations for claims against Treasury checks, DOs must reject all claims against Treasury checks not received before the expiration of the 12-month period of negotiability of the checks as time barred. DOs should notify claimants that claims of nonpayment of the underlying obligations of the government must be filed with the appropriate entitlement office (e.g., contracting officer for vendors or commercial payees, military pay office, civilian pay office, or travel office). Under 31 U.S.C. § 3702(e), the Secretary of Defense may waive this time limitation on these canceled checks for claims under \$25,000.

12.4 Limited Payability Check Cancellation

12.4.1. Outstanding Checks. During the 14th month after the date of issue, Treasury will identify and cancel all checks that have not been negotiated within 12 months from their issue dates. When check issues are not reported timely and are submitted after the limited payability processing period, Treasury will cancel those that are outstanding at the end of the month in which

the check issued data is submitted, and credit funds derived from these cancellations to the **F3880 account.

12.4.2. Canceled Check Listing. DFAS-CL and DFAS-IN will receive limited payability cancellation credits monthly from Treasury with an SF 1081 and a listing of checks canceled. Where possible, Treasury will send the proceeds of these canceled checks through the CARS and IPAC systems; the transmission will include any detailed identifying information provided in the original check issue data submission. DFAS-CL and DFAS-IN will forward check credit information including the details applicable to DFAS-CO disbursing accounts to DFAS-CO. DFAS-CL will process or distribute applicable cancellation credit information for Marine Corps disbursing offices.

12.5 Reversals of Limited Payability Cancellation Credits

In some cases, checks will be negotiated to financial institutions within 1 year from the date of issue, but processing in the Federal Reserve System will prevent the payment from being applied to TCIS before limited payability cancellation has occurred. In these instances, Treasury will reverse the cancellation credit previously provided to the DO by an IPAC transaction and must provide a copy of the paid item to the DO. Reversal transactions are separate from the monthly cancellation credits.

12.6 Accounting for Limited Payability Cancellation Credits or Reversals

12.6.1. DFAS-IN, DFAS-CL, and DFAS-CO. Under 31 U.S.C. § 3334(a) (2), return the proceeds from canceled checks to the appropriation from which they were paid originally and treat them as accounts payable. Within 15 days of receipt, send the check cancellation and credit detail information to both the disbursing office that issued the check and the supporting accounting office. Any Treasury reversal of previous cancellation credits also should be forwarded to the applicable disbursing and accounting offices.

12.6.2. Accounting Adjustments. Transfer limited payability credits or credit reversals promptly from the **F3880 account to the appropriation charged when the check was issued. For exchange-for-cash checks, post the credits or reversals to Treasury's deposit fund account 20X6133. The accounting office should establish an account payable for each credit or an accounts receivable for each reversal. Account for returned canceled check credits as current liabilities, as the amounts are subject to payment on request upon establishment of a valid claim to the funds. The DO must base entries to these new accounts on the transactions recording the return of canceled check credits to an appropriations account, and reductions for replacement payments to the payee or transfers to miscellaneous receipts upon expiration of the statute of limitations.

12.6.3. Research. Upon receipt of the detailed limited payability cancellation credit or reversal information from DFAS-IN, DFAS-CL, and DFAS-CO, the DO initiates research on the check issue data submitted to ensure that the detailed information provided is accurate, (e.g., the DSSN, check serial number, date of issue, and issue amount provided in the cancellation credit or reversal), all of which must agree with the original check issue data reported when the check was issued. Determine the cause of any discrepancy and correct it.

12.6.3.1. The DO also researches disbursing records to determine if a claim of loss, theft, or non-receipt has been filed on the canceled check, to include a determination of whether the check was previously replaced by recertified or other type of payment. The disbursing office also should notify the appropriate entitlement area (e.g., military pay, civilian pay, travel pay, or commercial accounts payable) that Treasury has returned the credit to the activity because the check was not negotiated within the prescribed period.

12.6.3.2. Upon the request of an entitlement area, DOs should accomplish the verifications described in paragraph 10.5 and advise the entitlement area whether the original Treasury check was canceled, negotiated, or previously replaced.

12.7 Claims of Nonpayment of the Underlying Obligation

See paragraphs 12.1 on limited payability and 12.3 for treasury check claimability.

12.7.1. Claim of Individual Payees

12.7.1.1. Uniformed Service Members. Submit claims for nonpayment of uniformed Service members' (active duty, reserve, retired, and annuitant) pay, allowances, travel, transportation, unused leave, and survivor benefits to the appropriate payroll office. Submit claims by transportation carriers involving amounts collected from them, for loss or damage incurred to property incident to shipment at government expense, to the appropriate payroll office. A determination will be made of the entitlement and verification that a timely submission of the claim was made on the underlying obligation.

12.7.1.1.1. Treasury checks issued in payment of obligations relating to uniformed Service members' pay and allowance entitlements ordinarily are not issued in response to claims. A payee will not normally present a claim before issuance of the original check, thereby tolling the Barring Act. It may be necessary for the entitlement area to consider the extent to which the Barring Act was tolled during periods of active duty performed by the claimant. Include in the package the original check or facsimile and the original documentation from the claimant. When the claim of a member of the Armed Forces accrues during war or within 5 years before war begins, the claim must be received within 5 years after peace is established or within 6 years after the claim accrues.

12.7.1.1.2. If the payee submitted a timely claim and has not been paid, send the claim through the appropriate Component's Assistant Secretary for Financial Management to the General Counsel of the DoD requesting a waiver of the statute of limitations on the claim. If the General Counsel determines that the claimant is entitled to payment of a claim, and if a payment voucher is prepared and sent with supporting documentation to the disbursing office, the DO determines if a replacement check should be issued.

12.7.1.2. Civilian Pay. Claims of nonpayment of Federal civilian employees' compensation, wages, and leave earned by civilian employees of the U.S. Government must be submitted to the appropriate civilian payroll office for determination of entitlement and that a timely claim on the underlying obligation was submitted. Treasury checks issued in payment of

obligations relating to Federal civilian employees' pay entitlements ordinarily are not issued in response to claims. If it is determined that the payee has submitted a timely claim and that the payee has not been paid, the entitlement office certifies the claim and sends it to the appropriate disbursing office for payment.

12.7.1.3. Civilian Travel Pay. Claims of nonpayment of Federal civilian employees' expenses incurred for official travel and transportation, and for relocation expenses incident to transfers of official duty station, must be submitted to the appropriate travel office for determination of entitlement and that a timely claim on the underlying obligation was submitted. Treasury checks issued in payment of obligations for travel pay entitlements ordinarily are issued for claims presented in the form of travel vouchers by claimants. Unlike military and civilian pay cases, the Barring Act's limitation in travel payment cases usually will have been tolled before issuance of the original check when the claimant submitted the travel voucher. If the payee submitted a timely claim and has not been paid, the entitlement office certifies the claim and sends it to the appropriate disbursing office for payment.

12.7.1.4. Residual Claim Categories. Treasury checks are issued to payees to satisfy miscellaneous government obligations. Legal claims under [28 U.S.C. § 1346\(b\)](#) and [28 U.S.C. §§ 2671-2680](#), should be asserted by claimant-payees to the entitlement area within the Military Department with tort claim settlement authority over the claim.

12.7.1.4.1. Similarly, claims for losses incurred incident to government service may be cognizable under [31 U.S.C. § 3721](#) and should be asserted by claimants to entitlement areas with claim settlement authority, such as the Military Department's judge advocate general. Treasury checks for payment of these types of obligations are issued to settle claims asserted by the claimants.

12.7.1.4.2. Unlike military and civilian pay cases, the Barring Act's statute of limitations in residual claim cases usually will have been tolled before issuance of the original check when the claimant submitted the claim. If it is determined that the payee has submitted a timely claim and has not been paid, the entitlement office certifies the claim to the appropriate disbursing office for payment.

12.7.2. Claims of Commercial Payees. Claims of commercial payees are from vendors, contractors, and individuals under contract for miscellaneous services. Claimants or authorized agents submit these claims to the contracting officer, who determines if the claimant is entitled to payment and then sends the claim with supporting documentation to the disbursing office for payment.

12.7.3. Upon receipt of a claim approved by the designated settlement authority, a certified payment voucher from the appropriate entitlement area, and the proper supporting documentation, the issuing DO or the officer assigned to settle accounts for the issuing DO issues a replacement check.

13.0 HOLDER-IN-DUE-COURSE

13.1 Holder-in-Due-Course

A holder-in-due-course claim occurs when a non-banking institution negotiates a Treasury check and the check is lost or stolen before being presented for cash or deposit at a financial institution. Submit holder-in-due-course claims in writing to Fiscal Service for processing.

13.2 Holder-in-Due-Course Claims

Upon receipt of a holder-in-due-course claim, Fiscal Service determines the status of the check. If the check has been negotiated, Fiscal Service returns the claim with a copy of the check advising the holder that the check has been paid and that no further action will occur. If the check has not been negotiated, Fiscal Service provides the holder with an indemnity letter to complete (see Figure 7-1). Once Fiscal Service receives the requested information, and the check is still outstanding, it issues a settlement check to the holder.

13.3 Lost-in-Transit Check

Lost-in-transit items are Treasury checks that have been negotiated and subsequently lost by a financial institution or lost or stolen between the financial institutions and/or the financial institutions and the FRB.

13.3.1. The FRB Atlanta, Government Check Adjustment Department handles these items if the Treasury checks are less than 1-year old.

13.3.2. If a DO or Fiscal Service receives a request to reissue a check that has not been canceled and is less than 1-year old, they must return the request to the financial institution advising it to submit the request to FRB Atlanta, Government Check Adjustment Department.

14.0 CHECK ISSUE REPORTING

14.1 Issue Report

Disbursing offices must report detailed check issue transmittals in a Level 8 format to the Treasury for update to TCIS with check issue detail. The DoD uses DCRM for direct submission of the check issue detail to the Treasury.

14.1.1. DCRM sends the check issue files via Connect Direct, an encrypted electronic host-to-host file transfer process. Enter the check issue detail data files into the DCRM database, which generates a daily electronic file to transfer the detailed check issue data to the Treasury. The DFAS administers DCRM, which tracks the status of all checks on hand and provides inquiry capabilities and reports to reflect issuance discrepancies and acceptance or rejection conditions of reporting.

14.1.2. DOs who do not have direct access to DCRM submit their check issue data to their supporting DFAS site, following that site's guidance for upload into DCRM. Submit the Level 8 check issue data in the most secure method possible, (e.g., an encrypted file). DFAS-CL and DFAS-IN have electronic mailboxes for these submissions or other check issue concerns: dfas.cleveland-oh.zte.mbx.ccl-mb-checkissues@mail.mil for DFAS-CL and dfas.dscc.zte.mbx.cco-dcrm@mail.mil for DFAS-IN. Send requests for the DCRM Users' Manual to the latter address.

14.2 Submission Requirements

14.2.1. Report detailed check issue data in sequential groups of checks, called transmittals, which uniquely identify the DSSN, accounting month and year, and check series. Submit a new transmittal each time a break in check numbers occurs, or when the issue month changes. DOs reporting check issues for multiple DSSNs submit separate transmittals for each DSSN. A submission of detailed check issue data may consist of one or more transmittals. DCRM reports check issue detail in blocks by DSSN, check series, and issue Julian date format (YYDDD) to the Treasury.

14.2.2. If a check series will not be reported sequentially due to the splitting of a check series range between different locations, uses, or DDOs, the DO reports the split check series range to the DCRM manager at (614) 701-2109, so an adjustment can be made to record the split check series range in DCRM. If check series range splits are not noted, DCRM creates unnecessary management notices about missing and unaccounted checks on its reports. Reporting avoids the additional workload entailed in reviewing and validating these notices.

14.2.3. Submit all check issue transmittals to the Treasury no later than the close of business at the end of the week in which the issue dates occur and at month end. DOs who submit their check issue transmittals through their supporting DFAS site ensure their supporting DFAS site receives their check issue data at least weekly and at month end.

14.2.4. Failure to report check issue data timely increases the possibility for loss caused by banking system errors, check alterations, and counterfeits. If a loss from an altered or counterfeit check occurs because of delinquent check issue reporting, the DO may be held liable for the loss. If the checks issued data are not reported in TCIS, the Treasury will not recognize the check as issued and will not process any actions, such as claims or limited payability cancellation credits, against the check. Also, the Treasury cannot complete a final reconciliation and clearance of a DO's account until all check issue data is received. If the DO is habitually delinquent for 60 days or more, the Treasury may suspend the processing of further print orders for blank Treasury check stock until all delinquent check issue reporting has been accepted into TCIS.

14.3 DO Responsibility for Quality of Data Submitted

The disbursing office is responsible for ensuring the check issue data submitted to the Treasury is accurate. DOs notify their supporting DFAS site immediately after finding an error. DCRM transmits the accepted files to the Treasury each business day but does not change the data. Once TCIS accepts an erroneous check issue transmittal, the file cannot be deleted. Correct all

errors before the file transfer process. If an erroneous data file has been sent to DCRM, but has not been forwarded to the Treasury, place the whole data file containing the erroneous check information in either a “replace” or “suspended” status. Contact your local DCRM manager or supporting DFAS site immediately to change the file from the accepted status in DCRM. In addition, the DO:

14.3.1. Ensures all check issue data submitted to the supporting DFAS site for processing agree with check issue totals on the [DD 2657, Daily Statement of Accountability](#), and the SF 1219;

14.3.2. Submits corrected transmittal(s) within 10 workdays of notification of a rejected transmittal within a file transfer;

14.3.3. Recreates the previously rejected check issue data for a period up to 180 calendar days after submission or replacement of rejected data, if needed; and

14.3.4. Contacts the DCRM manager for further details on how to put an erroneous check file into either a replace or suspended status. To request or make corrections after a TCIS acceptance, follow [section 8.0](#).

14.4 Voided Checks

14.4.1. Report voided checks as zero dollar amounts in the proper sequence with those of other checks issued in the same check range. If a DO reports the check issue detail to the Treasury by sending it to another disbursing office for conversion to data files and/or uploads to DCRM, that DO ensures the voided checks are reported and clearly marked. Stamp or mark the hardcopy check issue listing to indicate that a check is voided and the dollar amount is zero. Do not obliterate the serial number of the voided check from the check listing. If a voided check has not been dated, report a date for the check to facilitate the check issue reporting. DOs submitting their own check issue data to the Treasury ensure inclusion of serial numbers and dates of the voided checks in the transmission with zero dollar values.

14.4.2. A DO who erroneously reported a voided check with a dollar value greater than zero (and the check is under 1 year old) initiates corrective action as soon as the error is discovered without waiting to receive the FMS 5206 and sends Treasury a written request to adjust the check issue detail in TCIS.

14.4.3. If the issue date of the erroneously reported check is over 1 year old, the voided check cannot be adjusted in TCIS; Treasury will issue a limited payability credit for it. Upon receipt of the credit in the **F3880 account, the DO reports the check as a check issue on the monthly SF 1219 and debits the **F3880 account to clear the limited payability credit.

*15.0 DESTROYING CHECKS

15.1 Blank Check Stock

DOs must not destroy unwanted or excess blank check stock that is otherwise still usable without first contacting DFAS-IN/JJFKCB.

15.2 Destruction Methods

Destroy checks by either burning or shredding. If destroyed by burning, they must be burned completely. If destroyed by shredding, the fragments may be no larger than 1/8 inch wide and 3½ inches long. Treasury requires the use of a crosscut shredder. The burning method of destruction may only be used, subject to environmental regulations, when a disbursing office does not have shredding equipment. In either event, prepare a certificate of destruction (see Figure 7-2).

15.3 Verification

The DO and at least one witness examine the checks to verify they are the actual checks to be destroyed, verify the check numbers and DSSN with information on the certificate of destruction, and sign the certificate only after witnessing their actual destruction.

15.4 Certificate of Destruction

The DO must notify the Fiscal Service of the destruction of blank check stock by emailing the certificate to RRB.OSD-NPIRC-PM@fiscal.treasury.gov. Keep a copy in the DO's blank check inventory control records (see ***ITFM 4-5040.50b***).

Figure 7-1. Sample Affidavit and Indemnity Agreement for Lost Treasury Check

AFFIDAVIT AND INDEMNITY AGREEMENT FOR LOST U.S. TREASURY CHECK

I, _____, [hereinafter (“indemnitor”)] the undersigned, being of sound mind and over the age of 21, capable of making this affidavit and indemnity agreement, duly sworn, state that the indemnitor is the lawful owner of the U.S. Treasury Check Number _____, Symbol _____, Payable to _____, issued by the U.S. Department of the Treasury for the sum of \$ _____. Indemnitor further states that:

1. it/he/she is not in possession of the check now;
2. it/he/she was entitled to enforce the check when the loss of possession occurred;
3. the loss of possession was not the result of a transfer by it/him/her;
4. the loss of possession was not the result of a lawful seizure; and
5. it/he/she cannot reasonably obtain possession of the check because the check was destroyed, the check’s whereabouts cannot be determined, or the check is in the wrongful possession of an unknown person or person that cannot be found or is not amenable to service of process.

NOW, THEREFORE, in consideration of payment of said check to indemnitor of the sum of \$ _____, indemnitor promises to indemnify, defend, and protect the U.S. Treasury from any loss or harm occasioned or sustained by the U.S. Treasury of account of payment of the above described check to indemnitor. THIS AGREEMENT SHALL BE INTERPRETED ACCORDING TO FEDERAL COMMON LAW, INCLUDING APPLICABLE U.S. TREASURY REGULATIONS.

CHAPTER 8

COLLECTIONS

1.0 GENERAL

1.1 Overview

Collections are transactions that increase a Disbursing Officer's (DO) accountability, but do not apply to the acquisition of United States and foreign currencies through the purchase with dollars or accommodation exchange transactions. They may also result from transfers of funds from one appropriation or fund to another by voucher deduction or a "no check drawn" transaction using a Standard Form [\(SF\) 1080](#), Voucher for Transfers Between Appropriations and/or Funds; an [SF 1081](#), Voucher and Schedule of Withdrawals and Credits; or by the U.S. Department of the Treasury's (Treasury) [Intra-governmental Payment and Collection \(IPAC\) System](#). A collection voucher may be a combination of a payment and a collection by voucher deduction, e.g., a civilian payroll voucher where federal and state taxes are deducted. Vouchers must be retained in accordance with Volume 1, Chapter 9, [section 2.0](#) which provides record retention requirements with emphasis on supporting audit readiness and contingency operations.

1.2 Purpose

This chapter addresses the legality and propriety of collection transactions and substantiating vouchers.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3302(c) [\(31 U.S.C. § 3302\(c\)\)](#) requires DoD DOs to deposit public money not being held for current expenditure in the Treasury or with a depository designated by the Secretary of the Treasury.

2.0 TYPES OF COLLECTIONS

2.1 Receipts

Receipts are collections into a Treasury miscellaneous receipt or other legally authorized account or fund. DOs collect them into their accountability using a DoD [\(DD\) Form 1131](#), Cash Collection Voucher. They are recognizable by the absence of a fiscal/program year in the accounting classification. Disbursing from a receipt account is not authorized. "Adjusting out" an over collection requires processing a collection voucher as a negative receipt.

2.2 Reimbursements

Reimbursements are amounts earned and collected for property sold or services furnished to U.S. Government agencies or to the public, amounts collected from outside sources for payments made in error, overpayments, or adjustments for previous amounts disbursed. They are recognizable by the presence of an accounts receivable sales code within the accounting classification and shown as positive amounts on the DD 1131. A “negative reimbursement” occurs when a reimbursement is over collected and requires a return of funds to the remitter and is vouchered as a bracketed (negative) amount on a DD 1131.

2.3 Refunds

Refunds are recoveries of payments collected into a DO’s accountability as positive amounts on a DD 1131 using the same accounting classification as the one on the original disbursement voucher. Refunds may also occur as offsets shown as (bracketed) amounts on disbursement vouchers. They are reductions in disbursements rather than collections. Report refunds, documented on collection vouchers, on the [DD 2657](#), Daily Statement of Accountability separately from those occurring as negative disbursements, which are reported simply as net of disbursements. Do not report refunds separately on the [SF 1219](#), Statement of Accountability but include them in the calculation of net disbursements.

3.0 COLLECTION TRANSACTIONS

3.1 Collections

Collections are transactions that increase a DO’s accountability, but do not apply to the acquisition of U.S. and foreign currencies through the purchase with dollars or accommodation exchange transactions. All collection vouchers reported in the DoD business systems must meet standard line of accounting requirements. Document collections received by DOs on the appropriate collection forms and verify and record them in the accounting records. Funds received that are not creditable to appropriations (e.g., recoveries of losses of funds, or dishonored checks) are not “collections” because they do not change a DO’s accountability.

3.1.1. Voucher Supported Collections

3.1.1.1. Voucher supported collections create credits to appropriations, receipt or deposit fund accounts and involve:

3.1.1.1.1. Direct receipts (e.g., cash, checks, money orders, and electronic deposits);

3.1.1.1.2. Deductions on payment vouchers to cover indebtedness to the U.S. Government;

3.1.1.1.3. Other deductions on payment vouchers (e.g., deductions for federal taxes); or

3.1.1.1.4. Transfers between appropriations or funds, corrections of charges against appropriations, funds, or credits to appropriations or funds. Use an SF 1080 or SF 1081. Voucher supported collections may also occur in Treasury's IPAC System (see Chapter 11, section 4.0). In some instances, (e.g., collections from dining facilities), only one collection voucher number for the entire accounting period (e.g., month) may be assigned. In this case, prepare the formal collection voucher on the last business day of that period. DOs may record daily receipts of this nature on the DD 2657 to Other Transactions, and U.S. Currency/Coinage on Hand.

3.1.1.2. Separate negotiable instruments (checks or money orders) received as collections from accompanying accounting documents at the initial stage of processing and deposit them (see Chapter 11, subparagraph 8.3.2.1). If the identification of the appropriation account is not known at the point of origin (at time of deposit), credit either F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for IPAC, as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 - 8.10.3 for additional information. Upon determining the proper accounting classification, use an SF 1081 to charge the appropriate budget clearing account or deposit fund and credit the proper appropriation or fund. Do not issue checks for these transfers.

3.1.2. Collection Classification Transactions. Voucher supported collections create credits to appropriations, receipt or deposit fund accounts and are received on a DD 1131, recorded in the accounting records, and reported to Treasury through [Collections Information Repository \(CIR\)](#) citing the proper [Treasury Account Symbol \(TAS\)](#), [Business Event Type Code \(BETC\)](#) combination. Unvouchered collections occur when cash or negotiable instruments are received and not credit to an appropriation or fund or not supported with a formal collection voucher (e.g., dishonored checks cashed, losses of funds, and some check issue overdraft discrepancies). Document unvouchered collections on the [Optional Form \(OF\) 1017-G](#), [Journal Voucher](#) and utilize a [Classification Transactions and Accountability \(CTA\)](#) transaction to credit and debit the proper program TAS.

3.1.3. Cash Collections Deposited the Same Day. If the full cash amount associated with a DD 1131 is deposited the same day and are reflected in the DO accountability, the DO Cash TAS is not impacted. DOs must utilize [Over-the-Counter Channel Application \(OTCnet\)](#), citing the BETC and TAS associated with the collection voucher on the deposit ticket. Deposits in OTCnet are reported through CIR, which will feed the [Central Accounting Reporting System \(CARS\)](#) daily account statement showing an increase to the TAS associated with the collection voucher.

3.1.4. Collections Not Deposited the Same Day. Any portion of the cash associated with a DD 1131 that is not deposited the same day and is collected into the DO's accountability must be reported as a CTA transaction. This will feed the CARS daily account statement, showing an increase to the DO Cash TAS and an increase to the program TAS on the collection voucher. Multiple collection vouchers may be consolidated under one transaction reported to Treasury if they fall under the same TAS/BETC and agency location codes. DOs must ensure that any transactions that are consolidated have an audit trail that can be validated at the individual transaction level.

3.2 Method of Remittance

Accept cash, checks, or other recognized forms of credit instruments payable on demand. Examples include certified or uncertified personal checks, corporate checks, bank drafts, Treasury checks with issue dates less than 1 year old, postal money orders, money orders issued by banks or other financial establishments, credit union share drafts, and warrants payable on demand. Draw these negotiable instruments in favor of a DO's official capacity (i.e., position title, not name). Visa and MasterCard credit cards and debit cards are acceptable when presented for payment at locations participating in the Card Acquiring Service (see Chapter 11, section 3.0).

3.2.1. Commissary Sales Collections. Commanders may authorize commissary officers to accept Treasury checks from authorized patrons to pay for sales when available banks and other facilities are unable to furnish check cashing services but cannot authorize or require DOs or their agents to advance additional change funds to commissary officers to cash Treasury checks they receive. Commissaries may use the cash they receive for this purpose.

3.2.2. Remittance by Mail. DOs establish procedures to control receipt and processing of checks and other negotiable instruments received by mail. An individual that is independent of the collection function must receive these remittances and must not be the same individual who maintains the accounts receivable records. DOs must establish controls using the DD 2658, Returned and Undeliverable Check/Bond Record, or another effective method to maintain a record of transmittal of the instruments between functional areas.

3.3 Collections by Remote Cashiers

DOs acknowledge collections made by remote cashiers only upon receipt of certification of the actual monetary amounts.

3.4 Performance and Bid Bonds (Storage and Safekeeping)

The Federal Acquisition Regulation, Subpart 28.2, prescribes acceptance of only cash, certificates of deposit, or irrevocable letters of credit (ILC). Only ILCs issued by federally-insured financial institutions, in the name of the contracting agencies that identify the agency and solicitations or contract numbers for which ILCs are presented are acceptable.

3.4.1. Negotiable Instruments. DOs receiving remittances (e.g., checks, bank drafts, and money orders) as deposits for performance or bid bonds deposit them immediately in deposit fund account X6501 to be held pending settlement with the contractor.

3.4.2. U.S. Bonds Deposited in Lieu of a Surety. Under Title 31, Code of Federal Regulations, part 225 ([31 CFR part 225](#)), contractors may deposit certain U.S. bonds with contracting officers instead of furnishing corporate individual sureties on performance and payment bonds. DOs may not accept these bonds (whether electronic or hardcopy) for other than temporary safekeeping (e.g., overnight or over a weekend). DOs may provide space in a safe or vault for temporary safekeeping by placing the bonds and related documentation in a sealed package indicating custodianship and giving the contracting officer a receipt for the package (see Chapter 3, section 3.0). The contracting officer is responsible for transferring the bonds to the Federal Reserve Bank (FRB).

3.5 Negotiable Instruments

3.5.1. Checks. Remitters **must** make checks and other negotiable instruments payable to the **order of the specific** organization **maintaining the account to be credited and not to the Treasury**. However, if a check is made payable to the Treasury, the check must be accepted and processed immediately. Do not accept checks payable to a DO or **employees of the federal government, whether by checks or through electronic means**.

3.5.2. For Deposit to the Credit of the Treasury. Deposit the negotiable instruments in an FRB or branch or an approved general depository for credit to the Treasury. Instruments drawn payable to the remitter are acceptable as inscribed if the remitter endorses them as explained in Chapter 11, [subparagraph 8.3.6.3.1](#). For endorsements on negotiable instruments see Chapter 11, subparagraph 8.3.6. Post inscription instructions in strategic locations at cashier cages, commissaries, and other locations receiving these instruments.

3.5.3. For Deposit in a Limited Depository. Keep limited depository accounts in the name of the activity to which the DO is assigned (see Chapter 14, section 2.0). Instruct the remitter not to inscribe instruments payable to the DO by activity name.

4.0 ISSUANCE OF RECEIPTS FOR COLLECTIONS

4.1 Turning in Funds

4.1.1. Indirect Collections. Individuals other than DOs, DDOs, cashiers, or agents receiving funds belonging to the United States (including those to be held in trust) promptly turn over such funds to their supporting DO or deposit them in an authorized general depository. These individuals may work within commissary, property disposal, personnel, and other offices authorized to receive funds due the United States. They are responsible for safekeeping funds in their possession pending deposit or turn-in. Collecting officers number documents sequentially by fiscal year. The DO, DDO, or agent receiving the funds signs and returns two copies of each DD 1131 (other than the original) to the collecting officer, distributing additional copies as required.

4.1.2. Direct Collections. A DO, DDO, agent, or cashier receiving a collection directly from a remitter prepares a collection voucher for the amount collected. The supporting Defense Finance and Accounting Service (DFAS) site determines the number of copies to give the remitter. Only issue receipts for payment of bills received by mail in the disbursing office if the remitter requests it. Furnish receipts only for amounts received and verified by actual count. DOs, DDOs, or agents are prohibited from using “subject verification” to issue receipts, giving receipts “in blank,” or accepting receipts “in blank.”

4.1.3. Receipt Acknowledgement. Where an automated system is used, cashiers may sign receipts in their own name; otherwise, DOs, DDOs, or agents must personally sign the receipts. Signatures are not required for collection vouchers electronically validated by an approved public key infrastructure method. Before signing, the cashier or collecting official ensures that remittances are authorized collections in the correct amounts. The person accepting the remittance should not be the same person updating the accounts receivable record.

4.2 Collections by Deductions From Vouchers

If requested, give payees receipts for collections made by voucher deduction. This includes other divisions or activities that may require notices of collection.

4.3 Collections by Agent Officers

4.3.1. Collections. Agents of appointing DOs may sign receipts for funds.

4.3.2. Proceeds of Sales. When funds are deposited with agents, they complete receipts on the original and three copies of the DD 1131 as agents of their DO and submit the original and two signed copies of the DD 1131, together with supporting documents, with their financial reports to the DO. Return one signed copy to the appropriate collecting official as receipt for the funds. The format for the receipt is:

Richard Roe, Lt Col, (Component)

By: _____
Name and Type of Agent

5.0 RECORDING AND CONTROLLING COLLECTIONS

5.1 Pending Payment File

The affected functional area maintains a pending payment file and associated copy of the uncollected billing document(s) unless the supporting DFAS site directs otherwise. Send the original and duplicate copy of the documents to the customer from whom reimbursement is expected (see paragraph 2.2). Arrange the files in the order most convenient to the person maintaining the file, reconciling it quarterly to the accounts receivable subsidiary ledgers.

5.2 Collection of Accounts Receivable

5.2.1. Payment of Bills. When payment is physically presented to a cashier, the cashier annotates a copy of the bill as “Paid” and initials it. If the cashier is presented the original bill, he/she stamps or notes it “Paid” with date of payment, initials, and returns it to the remitter. Attach paid copies of bills to the DD 1131 and forward them to the affected functional area daily for recording. For automated billings, the responsible functional area prepares the DD 1131 (cash payments) or an SF 1080 (payroll deductions) as part of the automated collection posting process.

5.2.2. Clearance of Component Bills. An individual being transferred from the Component notifies the appropriate functional area and billing office to ensure settlement of all unpaid telephone bills, utilities, and similar liabilities. The responsible functional area ensures the collection of pending bills, makes any required adjustments on a new bill, marks the old bill “Void,” attaches it to the paid copy of the new bill, and completes the clearance form.

5.3 Collections for Other Agencies

5.3.1. Identifiable Collections. Issue a receipt for an identifiable collection applicable to an account maintained by another fiscal station if requested or required and process the collection as a transaction for others. Include the complete identity of the remitter, account, fiscal station, and appropriate fiscal data on the DD 1131.

5.3.2. Unidentifiable Collections. Do not process a collection for another fiscal station for which the accounting classification is not immediately identifiable as a transaction for others. Deposit the collection into F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for IPAC, as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 [thru](#) 8.10 for additional information. Upon determining the correct accounting classification, process an SF 1080 as a transaction for others to clear the suspense account.

5.4 Overages

Process an overage in a DO’s account as a collection to F3875 no later than the business day after the overage occurs. Resolve overages no later than the fifth business day after the end of each quarter or, upon the DO’s relief from disbursing duty, no later than the fifth business day following the date of relief. Consider collections and returns from agents when determining the source of the overage. When reasons for overages are explained, and there is reasonable assurance that no claim will be made against them, credit it directly to the Treasury’s receipt account R1060, Forfeiture of Unclaimed Money and Property.

5.5 Collection Voucher Control Log

Maintain a daily [DD 2659](#), Voucher Control Log, for collection vouchers the disbursing office receives or prepares. The DO determines the functional areas and assigns individuals to maintain this form. Assign each functional area and/or branch disbursing office a separate series of voucher numbers. Include the collection voucher number, identification of the remitter (name of remitting individual or organization), amount, and instrument of remittance (e.g., check, cash, traveler's check, electronic funds transfer (EFT), or a no pay adjustment). Annotate a check/EFT trace number in column d "OTHER."

5.6 Collections Overpaid or Underpaid by \$1.00 or Less

When a remitter overpays an amount due totaling \$1.00 or less, collect the overpayment into receipt account 1099 (Fines, Penalties, and Forfeitures, [Not Otherwise Classified](#)). Refund it only if requested by the remitter. Also, if a payee underpays an amount due that totals \$1.00 or less, prepare an SF 1080 charging the DoD Component's Operations and Maintenance account and credit the applicable appropriation (or receivable) for the underpayment. Do not pursue collection action for underpayments totaling \$1.00 or less.

5.7 Collections Made at Agencies Not Having a Disbursing Office

Agencies not co-located with or supported by a disbursing office that receive collections must:

5.7.1. Collection Control Log. Use a log to control the collections from the time of receipt until they are transmitted to the disbursing office. At a minimum, show the date of receipt, remitter, check or money order number, collection voucher number, amount of collection, and the date transmitted to the disbursing office.

5.7.2. Collection Voucher. Prepare a collection voucher the same day the DoD Component receives the collection.

5.7.3. Safeguarding the Collection. Safeguard the collection and supporting documents (see Chapter 3, section 3.0).

6.0 DOCUMENTING AND PROCESSING COLLECTIONS

6.1 Verification of Funds Received

6.1.1. Verification. Functional areas ensure that collections are proper, vouchers have complete and accurate data, and required copies are available. A disbursing office detecting an improperly prepared voucher returns it to the functional area for correction.

6.1.2. Funds Deposited by Collecting Officers. When a collecting officer deposits collections directly to a general depositary, the disbursing office processes them in the DO's account upon receipt of the collection voucher (or receipts for collection). The deposit ticket and supporting collection vouchers are the basis for verification of receipt of the funds. If the collecting officer does not provide a confirmed copy of the deposit ticket, advise him/her to furnish it upon receipt.

6.1.3. Purpose of Collection. Include the purpose of a collection (e.g., contract lease, applicable regulation, schedule, cost list, or other document that authorizes the collection) on, or as an attachment to, a collection voucher. If a sales contract is involved, cite the contract in the reference information. If the purpose of a collection cannot be determined, account for it in F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for IPAC, as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 [thru](#) 8.10 for additional information.

6.1.3.1. Transfer to account 20X6133, Payment of Unclaimed Moneys, amounts of \$25 or more that have been held for more than 1 year, are authorized to be refundable, but cannot be refunded because the individual's location is unknown.

6.1.3.2. Transfer to R1060 unclaimed amounts of less than \$25 or amounts of \$25 or more that have been held for more than 1 year for which the rightful owner can be neither identified nor located.

6.1.4. Numbering Collection Vouchers. Assign collection voucher numbers consecutively starting at the beginning of each fiscal year based on numbering instructions provided by the DFAS site that receives the financial reports.

6.1.5. Legibility of Copies. DOs ensure the legibility of all copies of vouchers prepared for distribution.

6.1.6. Routing Original Collection Vouchers. The disbursing division of each disbursing office sends original collection vouchers to the supporting DFAS site.

6.2 Signature on Collection Vouchers

6.2.1. Responsibility. The DOs, DDOs, or agent officers sign original collection vouchers in permanent, non-erasable ink; this duty may not be delegated or reassigned. Officers using cash control machines or mechanized equipment to validate vouchers are exempt from this requirement (except when a DD 1131 is processed for further action by a disbursing office not collocated with the processing disbursing office) so long as the machines and control of them meet minimum security and audit requirements. The DO or DDO controls the keys for these machines. Digital signatures may also be used following the guidance in Chapter 1, subparagraph 3.5.3.

6.2.2. Internal Controls. The DO implements controls to ensure that all funds received by the cashier are accounted for properly. The DO or DDO holds copies of the vouchers bearing the cashier's initials. In making daily settlement with the cashier at the end of the business day, these copies determine if the amounts of the collections the cashier reported were proper. The receiving officer's signature is required where applicable (see subparagraph 4.1.3). The DO or certifying officer, as applicable, signs transfer, cancellation, or adjustment vouchers (SF 1081) and an [SF 1098](#), Schedule of Canceled or Undelivered Checks. If the same voucher is both a disbursement and collection, the disbursement is the original subject to the signature requirements in paragraph 6.2; the collection is a copy and does not require a signature.

6.3 Preparation of Documents Used to Transmit Funds

6.3.1. Responsibility. An officer depositing or transmitting funds to a disbursing office prepares the forms listed in subparagraphs 6.4.1 and 6.4.4). Except for collections arising from over-the-counter sales (e.g., commissaries), include the name of the remitter, the specific authority for the collection, and information sufficient for the DO to identify the collection and determine that the correct amount is cited on each collection document. The officer preparing the form also furnishes the complete accounting classification as prescribed; fiscal code, including the [Disbursing Station Symbol Number](#) of the station maintaining the appropriation cited; and the country code when the collection is made in an overseas area.

6.3.2. Preparation and Distribution. Prepare each collection voucher in duplicate, with additional copies as required.

6.4 Collection Documents

6.4.1. DD 1131. Use this when governing directives do not otherwise prescribe other forms. It may serve as a cover voucher for other receipt forms.

6.4.2. SF 1098. Use this form to collect the proceeds of an available canceled Treasury check (see Chapter 7, paragraph 10.4).

6.4.3. SF 1080. Use this form to transfer amounts between appropriations and/or funds.

6.4.4. SF 1081. Similar to the SF 1080, this form also transfers amounts between appropriations or funds and may be used for corrections of charges and credits.

6.4.5. [DD 139](#), Pay Adjustment Authorization. Use this form for salary offset collections.

CHAPTER 9

DISBURSEMENTS

1.0 GENERAL

1.1 Overview

1.1.1. Disbursement. A disbursement is a payment to an individual or organization for goods furnished or services rendered. It may also be a transfer of funds from one appropriation or fund to another by a “no check drawn” transaction using a [Standard Form \(SF\) 1080](#), Voucher for Transfers Between Appropriations and/or Funds; [SF 1081](#), Voucher and Schedule of Withdrawals and Credits; or by the U.S. Department of the Treasury's (Treasury) Intra-governmental Payment and Collection (IPAC) System. See Volume 10, Chapter 10, paragraph 2.3 for detailed guidance regarding disbursement vouchers for intragovernmental reimbursement and transfer transactions. A negative disbursement is a refund.

1.1.2. Disbursement Voucher. A disbursement voucher may be a combination of a payment and collection by voucher deduction (e.g., a civilian payroll voucher where deductions for federal tax, U.S. savings bonds, and civil service retirement are credited to the appropriate accounts), and the net pay is disbursed to the payee. All disbursements must be supported by disbursement vouchers (e.g., SF 1080; SF 1081; [SF 44](#), U.S. Government Purchase Order-Invoice-Voucher; or [SF 1034](#), Public Voucher for Purchases and Services Other Than Personal).

1.1.2.1. Disbursement Voucher Certification. A disbursement voucher for payment made to a non-federal entity that creates pecuniary liability as described in either 31 United States Code (U.S.C.) § 3527 ([31 U.S.C. § 3527](#)) or [31 U.S.C. § 3528](#) must be certified by an appointed Certifying Officer [with Certifying Officer Legislation \(COL\) training completed](#), per [31 U.S.C. § 3325\(a\)\(1\) and \(b\)](#) (see Chapter 5, [paragraph 1.3](#)). A disbursement voucher that transfers funds from one appropriation or fund to another, transfers funds between appropriations, transfers funds for payment(s) that are entirely within the Federal government, or is not in support or execution of a subsequent payment transaction, does not require a Certifying Officer with COL certification.

1.1.2.2. Electronic Funds Transfer (EFT) and U.S. Treasury Check. Report EFT (includes International Treasury Services for payments in foreign currencies) and U.S. Treasury check disbursements to [Payment Information Repository](#) citing the proper Treasury Account Symbol (TAS)/ Business Event Type Code (BETC).

1.1.2.3. No Check/Voucher for Transfer. Report [a no check/voucher for transfer by](#) utilizing a Classification Transactions and Accountability (CTA) [transaction](#), citing the proper two-sided [credit and debit entries with](#) the proper TAS/BETC.

1.1.2.4. Cash and Limited Depositary Accounts (LDA) Checks. Report cash and LDA check disbursements [by](#) utilizing a CTA transaction citing the Disbursing Officers (DOs)

Cash TAS/BETC and the program TAS/BETC listed on the disbursement voucher. Multiple disbursement vouchers may be consolidated under one transaction reported to Treasury [if](#) they fall under the same TAS/BETC and Agency Location Code (ALC). DOs must ensure that any transactions that are consolidated have an audit trail that can be validated at the individual transaction level.

1.1.2.5. Disbursement of Foreign Military Sales. [Foreign Military Sales](#) funds require the request and receipt of expenditure authority before certification of a voucher for payment (see Volume 15, Chapter 4, section 9.0). [Volume 15](#), Chapter 15, section 6.0 provides record retention requirements with emphasis on supporting audit readiness and contingency operations.

1.1.3. Interagency Disbursing Support. The Enterprise Solutions and Standards, Disbursing Division of the Defense Finance and Accounting Service (DFAS) provides the DoD's policy for interagency disbursing support and IPAC. DoD's disbursing offices and their servicing accounting office coordinate with other U.S. Government agencies on establishing IPAC Trading Partner Agreements (see Chapter 11, paragraph 4.3). The DFAS email address is: dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil.

1.2 Purpose

This chapter addresses the legality and propriety of payment transactions, substantiating vouchers, payment of compensation, advances, payment to third parties, equitable claims, and certified disbursement vouchers. It also addresses disbursement forecasting, processing of disbursement vouchers, disbursements from deposit fund and budget clearing accounts, and payment in support of advance payment pool agreements.

1.3 Authoritative Guidance

DoD authorizes DOs under ([31 U.S.C. § 3321\(c\)\(2\)](#)) to disburse public funds on receipt of vouchers certified by an appointed certifying officer (see 31 U.S.C. § 3325 and Chapter 5, paragraph [1.3](#)).

2.0 POLICY

2.1 Legality and Propriety

2.1.1. Sanction of Law. Examine payment transactions for legality, propriety, limitations, and time frames under the statutes governing the various classes of expenditures and for validity under general provisions of law.

2.1.2. Decisions and Responsible Offices. A DO may request an advance decision on the propriety of any [prospective](#) payment according to the procedure outlined in each section's standard operating procedure (see Chapter 12, section 3.0). DOs are not pecuniarily liable for payments they make based on advance decisions.

2.2 Substantiating Vouchers

2.2.1. Written Record of Transaction. Unless otherwise mandated by law, each transaction by an officer, agent, or employee of the U.S. Government that requires payment of money from the Treasury or payment by a DO or agent of the U.S. Government requires a written or approved electronically signed document or series of documents that includes a complete record of the transaction.

2.2.2. Electronic Transactions. The Federal Reserve Banks (FRBs) are Treasury's fiscal agents. Each disbursing office processing disbursements maintains a detailed written agreement with the supporting FRB. The DO must implement internal controls to confirm that the FRB receives EFT payment files successfully.

2.2.3. Additional Evidence. A DO is not required to make payment merely on the submission of formal evidence. If the facts do not justify payment, a reasonable explanation or the submission of further evidence is required.

2.3 Payment of Expenses

Using public funds to pay the expenses of a commission, council, board, or other similar body is prohibited by [31 U.S.C. § 1346](#) unless the creation of the body has been specifically authorized by law.

2.4 Advances, Prepayments, and/or Overpayments

A DO generally may not make advance payments, prepayments, or overpayments of public monies, but [31 U.S.C. § 3324](#); Volumes 5, 7A, 8, 9, and 10; and the [Joint Travel Regulations](#) allow limited advances and prepayments.

2.5 Payments to Third Parties

2.5.1. Restriction. Unless specifically authorized by law, monies the government owes to an individual are not subject to attachment, garnishment, or other legal processes. Do not certify or make payment to a third party even if the payee requests it. This restriction applies to all funds, including those held in trust by the DoD.

2.5.2. Levy and Distrain for Delinquent Taxes. Salaries and wages of officers and employees of the U.S. Government, including members of the Armed Forces, are subject to levy and distraint (the ability to force or compel satisfaction of an obligation by means of seizure) for delinquent federal taxes in accordance with [26 U.S.C. § 6331](#).

2.5.3. Payments to Bankruptcy Trustees. A civilian employee or military member may file an appropriate bankruptcy petition under [11 U.S.C. § 109](#). During the bankruptcy proceedings, the bankruptcy court may order the individual's pay to be sent to the bankruptcy trustee. Such payments are proper, and DOs incur no additional liability as a result. See Volume 8, Chapter 8, section 5.0 for civilian employees and Volume 7A, Chapter 50 for military members.

2.5.4. Successor in Interest. DOs may make payments due to contractors, court appointed trustees, receivers, or other legal representatives (see Volume 10, Chapter 3, section 5.0).

2.5.5. Assignment of Claims. A contractor [may transfer their](#) right to be paid by the government for contract performance to a bank, trust company, or other financing institution, as security for a loan made to the contractor. See Volume 10, Chapter 3, section 4.0; the Federal Acquisition Regulation (FAR), [part 32.8](#); and the Defense [Federal Acquisition Regulation Supplement \(DFARS\)](#), [subpart 232.8](#), for more information regarding the [requirements and responsibilities](#) for assignment of claims.

2.5.6. Authorized Withholdings and Allotments of Pay. Deductions from military and civilian payrolls for specific purposes (e.g., retirement, taxes, health benefits, group life insurance, allotments, and voluntary payments for child support or alimony) are supported by statutory authority under [5 U.S.C. § 5525](#).

2.5.7. Payments to Financial Organizations for Credit to Persons' Accounts. Under [31 U.S.C. § 3332](#), Federal wage, salary, and retirement payments must be made by EFT to financial organizations for credit to payees' accounts (e.g., Merchants National Bank, Cr: John Doe, Account Number: 346-839, Taylor, MI 04180) (see also Volume 7A, Appendix C; Volume 8, Chapter 1, section 3.0; and Volume 9, Chapter 8, paragraph 2.2).

2.5.8. Garnishment of Pay for Child Support, Alimony, and Commercial Debts. Salaries and wages of military members and civilian employees may be garnished for child support and alimony ([42 U.S.C. § 659](#)), and for commercial debts (non-child or spousal support) ([5 U.S.C. § 5520a](#)).

2.5.9. Withholding of Contract Payments. Make payment to the Department of Labor for amounts owed by contractors to employees under a contract. See Title 29, Code of Federal Regulations (CFR), part 4.187 ([29 CFR 4.187](#)) and [29 CFR 5.9](#).

2.6 Equitable Claims

Claims not founded on contracts, either expressed or implied, but on merely equitable or moral grounds are permitted only after direct authorization by Congress.

2.7 Insurance Fee

The government is self-insured (or bonded). Neither a DO nor any of the DO's agents may insure public funds or property.

2.8 Municipal Services

Absent specific statutory authority, a DO may not pay for municipal services (e.g., police and fire protection) if those services are required to be furnished to private citizens at no cost (see Volume 10, Chapter 12, paragraph 3.15).

2.9 Questionable Payments

See Chapter 12 for alternatives available in connection with questionable payments.

2.10 Certified Disbursement Vouchers

2.10.1. Authority. DoD authorizes DOs under (31 U.S.C. § 3321(c)(2)) to disburse public funds on receipt of vouchers certified by an appointed certifying officer. When the disbursement voucher is certified by someone independent of the disbursing process, the DO has the discretion to make the payment.

2.10.1.1. Certified Vouchers. Certified vouchers must contain complete and accurate data. Contents of these vouchers and supporting documents may vary slightly depending on the type of disbursement and form used. Write signatures and other information that become integral parts of original vouchers in permanent, non-erasable ink. Handwritten information must be legible. Approved electronic signatures are acceptable (see Chapter 1, subparagraph 3.5.3).

2.10.1.2. Voucher Corrections. Return certified vouchers requiring correction to the functional area. Disbursing office personnel may not make these corrections. Corrected vouchers require recertification before disbursement.

2.10.1.3. Travel Vouchers. Accept a legible copy of a signed travel voucher and its supporting documents received in lieu of the original for processing and payment as if it were the original. This includes travel vouchers and supporting documents received by facsimile transmission or scanned images forwarded via email.

2.10.2. Essential Data. Certified disbursement vouchers must contain the following minimum essential data:

2.10.2.1. Voucher Heading and Date. This includes the complete name and mailing address of the paying disbursing office, the date the voucher is prepared, the disbursing office voucher number, and the disbursing station symbol number (DSSN) in the “Paid By” (or “Brief”) block (see Table 9-1).

2.10.2.2. Accounting Classification

2.10.2.2.1. The Treasury Financial Manual (TFM), Volume I, Part 4A, Chapter 2000, section 2070 ([*I TFM 4A-2075*](#)) requires that a voucher certified as correct and proper for payment include an accounting classification against which the disbursement will be charged. Code each charge to an appropriation or fund with a complete accounting classification, and country code when applicable. List the information on a continuation form if the space available is insufficient.

2.10.2.2.2. The type of payment or the supporting DFAS site dictates acceptable continuation forms. Do not show titles of appropriations or deposit fund accounts. Entering extraneous information (e.g., voucher collection data) may result in the inclusion of erroneous information in accounting records and reports. A certified disbursement voucher may cite more than one appropriation, deposit fund account, or subsidiary account (group two or more subsidiary accounts of the same appropriation by that appropriation).

2.10.2.2.3. On foreign currency disbursements, show the total amount of the foreign currency disbursement; disbursing office personnel enter the conversion rate and U.S. dollar equivalent (USDE) on vouchers certified for payment in foreign currency.

2.10.2.3. Amount to Be Disbursed. Cite the total amount of the disbursement on the voucher in conjunction with the related accounting classification. Any alteration invalidates the certification (see Chapter 5, paragraph 5.6).

2.10.2.4. Method of Disbursement. Show the method of disbursement in the space provided on the certified disbursement voucher. In order of preference, the methods are:

2.10.2.4.1. EFT (includes [International Treasury Services \(ITS.gov\)](https://www.its.gov) for payments in foreign currencies),

2.10.2.4.2. No check/voucher for transfer,

2.10.2.4.3. Treasury check,

2.10.2.4.4. Limited Depositary Check, and

2.10.2.4.5. Cash (only if specifically authorized by the payee's commander when it is determined that no other alternatives exist due to operational conditions).

2.10.2.5. Payee. List only the individual or organization entitled to the proceeds of the payment on the voucher. Under [10 U.S.C. § 2785](https://www.uscourts.gov/10-USC-2785), a DO may not change the remittance address. Also, under 31 U.S.C. § 3325(d), certified vouchers must contain the payee's taxpayer identification number (TIN), a unique nine-digit identifier assigned to all individuals by the Social Security Administration and to businesses by the Internal Revenue Service. See Volume 10, Chapter 8, paragraph 2.7 for the requirement of a TIN on a certified payment voucher.

2.10.3. Payment on Forged or Fraudulent Vouchers or Pay Receipts. A DO is pecuniarily liable for payments based on forged or fraudulent vouchers. A DO, Deputy DO (DDO), agent, or cashier making such a payment may request relief of liability for such payments (see Chapter 6, section 6.0).

2.10.4. Voucher Storage. Follow Chapter 3, section 3.0 to safeguard original paid vouchers.

3.0 DISBURSEMENT FORECASTING

3.1 Daily Disbursement Forecasting

Treasury's Bureau of the Fiscal Service (Fiscal Service) manages the government's daily cash position and disbursements affecting this position. DOs must therefore [follow any current Fiscal Service guidance for reporting](#) their anticipated aggregate level of planned disbursements for each disbursing method (e.g., wire, Automated Clearing House (ACH), check). [Forecasting is also discussed in *ITFM 4A-4025*](#).

3.2 Large Dollar Disbursements

The [ITFM 6-8530](#) requires DOs to report, in advance, deposits and disbursements totaling \$50 million or more. The deposits and disbursements reports include single transactions, multiple transactions of a common nature, or repetitive transactions. For deposits and disbursements between \$50 million and \$500 million, DOs are required to submit the report a minimum of 2 business days in advance of the settlement date. For deposits and disbursements of \$500 million or more, DOs are required to submit the report a minimum of 5 business days in advance of the settlement date. If specific deposit or disbursement information is not final, agencies must inform Fiscal Service daily as soon as possible, but no later than 7:30 a.m. eastern time on the transaction settlement date, of the approximate amount and approximate deposit or disbursement date.

4.0 DISBURSEMENT VOUCHERS

4.1 Numbering Disbursement Vouchers

Assign disbursing voucher numbers consecutively starting at the beginning of each fiscal year based on guidance from the supporting DFAS site to which financial reports are submitted. Identify voucher numbers with the disbursing office, not the DO.

4.2 [DoD](#) (DD) Form 2659, Voucher Control Log

Keep a [DD 2659](#), Voucher Control Log, daily for disbursement vouchers received or prepared in the disbursing office. Include in the log the disbursement voucher number, name of the payee, amount, form of payment (e.g., EFT, check, cash), and check/EFT trace number under "other." This log summarizes daily disbursement and collection transactions and ensures the entering of all vouchers in the accountability records. It functions as a cross check against the [DD 2657](#), Daily Statement of Accountability, and [DD 2665](#), Daily Agent Accountability Summary, to summarize disbursement and collection transactions; enables comparison of vouchers paid by check to total checks written, and of vouchers paid by cash to cashier paid vouchers; associates returned and undeliverable checks with applicable vouchers; and transmits vouchers showing voucher numbers used, unused, or voided.

4.3 Certification of Vouchers

4.3.1. The applicable entitlement areas (i.e., military, civilian, travel, and vendor pay) ensure that all payments are proper, prepare the correct number of copies, and ensure that all vouchers contain complete and accurate data.

4.3.2. Certifying officers examine payment vouchers before certification to ensure that the information on vouchers agrees with all supporting documentation (see Chapter 5, section 5.0).

4.3.3. DOs must have access to the [DD 577](#), Appointment/Termination Record – Authorized Signature, to verify that vouchers submitted to DOs for payment have been certified by persons authorized to certify vouchers, and disburse money only on vouchers certified by authorized certifying officers. A disbursing office detecting an improperly prepared voucher must return it to the functional area for correction and recertification.

4.4 Release of Cash

An individual entitled to a payment (the payee) must receive the cash and sign the voucher. All cash payments require receipts. Do not prepare duplicate receipts. DOs or their agents making cash payments must positively identify the payee using the photograph on the payee's DoD Common Access Card. Other acceptable forms of identification include a driver's license and other identification normally acceptable in the banking community to cash checks or bonds. The responsibility for payee identification may not be delegated. In cases of cash payment, the exchange of currency and the receipt for it must be simultaneous. Requiring receipts in advance of actual cash payments is prohibited.

4.5 Cash Payment Vouchers

The responsible entitlement areas send or deliver these vouchers to the cashier area. Payees may hand carry vouchers when the distance between the entitlement area and cashier area makes this impractical, provided the total amount of the voucher is inscribed in words on the bottom of the voucher (e.g., "sixty dollars and twenty cents"). Space words or enter lines in a manner to preclude alteration by inserting additional words, particularly at the beginning of writing (e.g., prevent insertion of "one hundred" immediately preceding "sixty dollars and twenty cents").

4.5.1. Cashier Responsibilities. If the voucher deduction block is used on a payment voucher, the cashier must verify that it contains an appropriation and the total to be paid is net of any deductions. After verification of these items, the cashier must initial the original voucher to identify who made the payment.

4.5.2. Payee Signature. Cashiers must obtain the payee's signature in the space provided, or in the case of multiple payments, on the sub-voucher or supporting documentation. The payee signs for receipt of cash using permanent, non-erasable ink. Facsimile signatures and signatures in pencil are unacceptable. When signatures of payees are on a sub-voucher or supporting documentation, annotate the "payee signature block" on the cover voucher with the words, "See

attached.” Positively identify payees before making payments. Compare the signature obtained on vouchers to signatures on identification cards or other acceptable forms of identification. The form of the signature must be the same as the payee as shown on the voucher. In the signature block, the payee must sign the first name, with additional initials, if any, followed by the surname, except as explained in the following subparagraphs.

4.5.2.1. Unable to Write. A payee unable to write may indicate receipt of payment by signing an “X.” A disinterested party, whose address must be on the form, must witness the form. If the payee is physically unable to write and asks someone to sign in his or her presence, the signature requires verification by a disinterested witness and is regarded as a signing by the payee. File a physician's note addressing the payee's inability to sign with the original disbursement voucher.

4.5.2.2. Mental Disability. Do not pay a mentally disabled payee who cannot comprehend a signature except in the presence of an appointed legal guardian. File certified copies of court papers appointing a legal guardian with the original disbursement voucher. The legal guardian signs the name of the payee, followed by his or her own signature as legal guardian. Refer to the first disbursement voucher by DO voucher number and date paid on future payments to substantiate the legal guardianship. If the payee is in an asylum, file the superintendent's certificate that the payee was alive at the time payment was due with each disbursement voucher.

4.5.3. Voucher Validation. Validate the voucher by completing the “Paid By” (or “Brief”) block with the paying office location, DSSN, and business date of payment, using a typewriter, automated system, or rubber stamp. Do not show the geographical location if the disbursing office has a classified address (see Table 9-1).

4.6 Check Disbursement Vouchers, Manual Voucher Processing

Responsible entitlement areas send manual check disbursement vouchers to the check issuing area for check preparation. The check issuing area enters the check number on the voucher in the space provided. Do not enter check numbers on duplicate copies of vouchers except for payroll and group travel vouchers. When payment is by check on an SF 1034, follow subparagraphs 4.6.1. – 4.6.5. A receipt is not necessary for payments drawn by the DO except when required by law or contract.

4.6.1. Checks Drawn on the Treasury. For payments by check drawn on the Treasury, enter the check number in the block near the bottom of the form titled “Check Number on Account of U.S. Treasury.”

4.6.2. Checks Drawn on LDAs. For payments by checks drawn on LDAs, enter the check number and the name of the LDA bank on which drawn in the block near the bottom of the form titled “Check Number On (Name of bank).” If it is a “no check drawn” voucher, state “no check drawn.”

4.6.3. Check Usage. Make checks payable to the payee stated on the disbursement voucher. Number disbursing vouchers sequentially with the lowest check number used to pay the lowest numbered disbursement voucher or the first name on a payroll. Maintaining an unbroken sequence of check numbers facilitates check issue auditing and reporting. Consolidate multiple payments to the same payee on the same day and pay them with one check. DOs must ensure that inscribed checks duplicate the voucher information. A DO may perform this review either before or after signing the checks. The DO ensures the completion of appropriate records to provide control over check writing. Automated systems producing disbursement vouchers must contain edit and validation controls to ensure the exact information appearing on the vouchers is passed to the check printer.

4.6.4. Paid By. See subparagraph 4.5.3.

4.6.5. Automated Disbursement Vouchers. The entry of check numbers on automated disbursement vouchers is not required so long as the voucher processing system maintains complete audit trails between disbursement vouchers and hard copy records.

4.7 Check Disbursements Overpaid or Underpaid

Do not collect an overpayment to a payee. Prepare an SF 1080 to charge the DoD Component Operation and Maintenance account and credit the appropriation originally charged for the payment. Similarly, do not issue a supplemental payment when a payee is underpaid unless the payee requests the payment.

4.8 Transmittal of Vouchers and Recording

4.8.1. DDOs, agents, and cashiers must include payment vouchers on the DD 2665 as prescribed in Chapter 15, subparagraph 2.1.2, and settle with the DO at the end of each business day.

4.8.2. For midday returns of cash on hand or an additional advance of funds, use a [DD 1081](#), Statement of Agent Officer's Account (see Chapter 15, section 4.0).

4.8.3. Entitlement areas send transfer, correction, and other disbursement vouchers not for payment by cashiers directly to the accountability area.

4.8.4. Return voucher copies to the entitlement area (i.e., military, civilian, travel, and vendor pay).

4.9 Certification Restrictions

The disbursing office supervisor may not routinely certify vouchers for payment, but may certify cover vouchers supported with properly certified sub-vouchers. In these cases, the approving official of the supporting documentation may not be the cover voucher certifier. If an emergency exists and the deputy, who is also a supervisor of the disbursing office, must certify a voucher for payment not supported with certified sub-vouchers, the DO or another DDO dates and

signs the voucher that includes a statement similar to: “Payment approved by Lieutenant John Doe, Disbursing Officer” (see Chapter 5, section 5.0). To ensure adequate internal control, neither the supervisor of the disbursing office nor other disbursing office personnel should be able to input data into the computerized accounting system.

4.10 Documentation Supporting Delivery of Payments

Documentation that supports delivery of payments includes a copy of the payment voucher, annotated copies of invoices, or other available media that provide information on payments delivered to payees as prescribed by functional area directives. This information may be in any form (e.g., printed, electronic) but may be subject to contractual requirements.

4.11 Deferred Vouchers

Deferred vouchers are paid vouchers not recorded in an accounting system, and are usually vouchers paid by an agent that must be returned for correction. They may also be vouchers paid by an agent but not yet examined by a DO. Deferred vouchers do not impact the DO Cash TAS until the voucher is processed. Responsible entitlement areas must act promptly to clear them. Keep a chronological record of actions taken, showing the date when clearance is expected. DOs or their DDOs review those actions weekly to ensure the correction of irregularities causing deferment without delay.

4.12 Classified Payments

4.12.1. Protecting Information. A DO making payments classified for security purposes prepares a covering disbursement voucher. These may not contain information that requires a security classification. On the original and all copies show only the name and address of the payee, amount, date of payment, complete accounting data, voucher number, check number, DO's name, DSSN, and disbursing office payment data in the “Paid By” (or “Brief”) block. Payments under classified contracts should include instructions requiring the supplier to limit information on invoices so that supplies or services are identifiable only by reference to the contract. The DO (for collateral classified programs) or the voucher preparing office (for special access programs) allows access to classified documents to only those persons requiring access for the performance of their official duties.

4.12.2. Preparation. Personnel who process classified documents must possess a security clearance level equal to or higher than the documents they process. DOs or voucher preparing offices must assign duties (e.g., preparation of vouchers) so that only a minimum number of persons require access to classified information. Mark and store classified documents following prescribed security regulations. Do not attach classified essential supporting documents, invoices, or certificates to the original disbursement voucher, but identify them by the name of the DO, voucher number, DSSN, and the period of the account. Retain them at the paying disbursing office (for collateral classified programs) or the voucher preparing office (for special access programs) with other classified material. Include one of the following statements on the portion of the voucher for the description of the articles or services purchased:

4.12.2.1. For Collateral Classified Programs. “The documents supporting this voucher are located at the payment site with other classified material in accordance with (cite the applicable security regulation).”

4.12.2.2. For Special Access Programs. “The documents supporting this voucher are located at the voucher preparing office with other classified material in accordance with (cite the applicable security regulation).”

4.12.3. Declassification. Refer to appropriate security regulations for declassifying and downgrading, and to report classification abuses and improper classifications.

4.12.4. Distribution. Distribute the original and required copies of the covering disbursement voucher in the normal manner. Do not attach the classified supporting documents.

4.13 Payments from Contingency Funds

Use a [DD 281](#), Voucher for Emergency or Extraordinary Expense Expenditures, to make payments from contingency funds.

4.13.1. Prepare the form to allow it to be unclassified. Classify supporting documents based on their content. A covering disbursement voucher is not required as described in subparagraph 4.12.

4.13.2. Transmittal of Vouchers and Recording. See paragraph 4.8.

4.14 Hand Carrying Disbursement Vouchers

4.14.1. Vouchers Prepared Outside the Disbursing Office. Send payment vouchers prepared outside the disbursing office to the disbursing office so that the payee does not have access to them.

4.14.2. Vouchers Prepared Within the Disbursing Office. The responsible functional area sends or delivers these vouchers to the cashier area. Where distance between the functional area and cashier section makes this impractical, see paragraph 4.5.

4.15 Distribution of Paid Vouchers

The disbursing office sends the original and necessary copies of paid vouchers to the appropriate DFAS site (see Chapter 15, paragraph 8.1 for proper record retention).

4.16 EFT Payments

4.16.1. Debit Vouchers. EFT payments are sent to the FRB on debit vouchers showing the date payment is due. The DO must implement internal controls to confirm that the FRB receives the payment files successfully and on schedule, and retain the memorandum copy of the debit voucher. DOs that transmit payment files electronically use the FRB's summary of ACH activity report in lieu of the debit voucher. In either case, the FRB issues a confirmation debit voucher to the DO. For an EFT transaction, record the debit voucher as a negative deposit with the payroll, travel, or vendor payment recorded as a gross disbursement.

4.16.2. Returns. When a financial institution returns one or more EFT/ACH payments to a paying office, the DO prepares and processes a collection voucher to account for the returned funds, crediting them to the appropriation from which they were originally disbursed. EFT returns will be submitted back to the originating ALC crediting the TAS from which they were originally disbursed. Record the collection on the DD 2657 with an offsetting transaction to account for the deposit ticket from the FRB in processing the returned payment. The DO notifies the appropriate entitlement area of the returned payment by providing a copy of the collection voucher and any rejection information received (e.g., the reject code). See Treasury's Green Book, Chapter 4, for a detailed listing of payment rejection codes. The entitlement area tracks, monitors, and researches the cause of the return and provides a recertified voucher to initiate an appropriate EFT/ACH payment within 5 business days.

4.16.3. Reclamations. DFAS Cleveland (DFAS-CL) DO, when notified of the death of a military retiree or an annuitant, contacts the decedent's bank requesting the return of all payments made since the retiree's or annuitant's death. The DFAS-CL DO has three years from the date of the Financial Management Service (FMS) Form 133, Notice of Reclamation, to submit FMS 135, ACH Reclaims. For additional information, see Treasury's Green Book, Chapter 5, for detailed instructions.

4.17 Retention of Records

See Volume 1, Chapter 9.

5.0 DEPOSIT FUND AND BUDGET CLEARING ACCOUNTS

5.1 Disposition of Funds in Deposit Fund Accounts

5.1.1. Method of Disposition. Applicable functional areas dispose of collections received for deposit fund accounts using one of the following methods:

5.1.1.1. Payment to Other Individuals or Organizations. Use an SF 1034;

5.1.1.2. Refund to the Remitter. Use an SF 1034; or

5.1.1.3. Withdrawal for Application to an Appropriation, Receipt Account, or Other Deposit Fund Account. Use an SF 1081 for the disbursement and collection, and submit it as substantiation for either or both. The SF 1081 cannot be used for check or cash payment.

5.1.2. Vouchering. Only one deposit fund account may be charged on a single voucher. Submit charges to accounts F0109, Federal Tax Withheld from Payments to Nonresident Aliens; and F3875, Budget Clearing Account (Suspense), on separate vouchers.

5.1.3. Civilian Pay Deductions. When preparing an SF 1081 for adjustment of deductions from civilian pay, show deposit fund account symbols and amounts for withheld taxes and U.S. savings bonds on the same SF 1081 containing the necessary information.

5.1.4. Withdrawals Involving Foreign Currency. To repay foreign currency deposits at USDEs different from those at which they were deposited, see Chapter 13.

5.2 F3875, Budget Clearing Account (Suspense)

5.2.1. Transfer of Funds. Upon determining the proper disposition of funds in this account, transfer the amount on an SF 1080 or 1081 to the proper account. Explain the charges on the SF 1080 or SF 1081. See [1 TFM 2-5135](#) for guidance on the use of F3875. Use this account to hold unidentifiable collections temporarily for no more than 60 days, or use other business processes approved by the Fiscal Service. Payment is prohibited from the F3875 suspense accounts.

5.2.2. Transferring Funds Out of Clearing Accounts (Suspense). Utilize a CTA transaction to move the (cash) funds out of the clearing account to the proper program TAS, deposit fund account, or DO Cash TAS along with the proper adjustment BETCs. Utilize an SF 1080 or SF 1081 to document the charges and report the transactions within internal DoD systems.

5.2.3. Disbursements Representing Funds Received for Other Government Agencies. Send an IPAC payment or check payable to the Treasury and a copy of the disbursement voucher to the official of the agency requesting collection.

5.2.3.1. Checks Payable to the U.S. Postal Service. If the collection is for credit to a U.S. Postal Service appropriation or receipt account citing departmental prefix “18,” send the check and a copy of disbursement voucher to the Manager, Finance Branch, Eagan Information Systems/Accounting Service Centers, U.S. Postal Service, 2825 Lone Oak Pkwy, Eagan, MN 55121-9600.

5.2.3.2. Checks Payable to Other Government Agencies. For a collection for another government agency, send the check to the agency with a source and reason for collection.

5.2.4. Transactions Rejected by the Accounting System. Accounting Offices notify the DO and request the documentation needed to process the transaction successfully. DOs send the requested documentation to the accounting office within 30 days.

5.2.4.1. Supporting Documentation Maintained Locally. The DO sends the requested documentation to the accounting office immediately.

5.2.4.2. Supporting Documentation Maintained at a Remote Site

5.2.4.2.1. The DO notifies the entitlement area of the rejected transaction immediately by telephone or email.

5.2.4.2.2. If the requested information is not received within five working days of the initial request, send a formal, written request to the functional area, referencing the original request.

5.2.4.2.3. If no response is received within five working days of the second request, send a copy of the request memorandum, with a cover letter, to the site director or commander, as appropriate.

5.3 Overages

5.3.1. Disbursement Action. For an overage that should not have been accounted for as a collection, the responsible functional area prepares an SF 1034 payable to “Adjustments” to reverse the erroneous collection and permit proper accounting for the funds. Do not issue a check or a cash payment for this voucher.

5.3.2. Adjustments. If an amount was recorded in error as a collection to one of the following accounting classification other than F3875; F3885, Undistributed Intra-governmental Payments; X6500, Advances Without Orders from Nonfederal sources; X6501, Small Escrow Amounts, or X6276, Other Federal Payroll Withholding, Allotments (e.g., a collection from a sales official), the responsible entitlement area initiates the adjustment by preparing an SF 1081 charging one of the cited accounts and crediting the proper appropriation or fund.

5.3.3. Removal. If every reasonable effort to discover the proper disposition of the funds is unsuccessful, prepare an SF 1081 to remove the amount from the affected deposit fund account, and credit R1060, Forfeitures of Unclaimed Money and Property.

6.0 TREASURY DISBURSING OFFICE (TDO)

The TDO initiative allows Treasury to become the Federal service provider performing payment and collection functions on behalf of DoD. The program also allows an agency to send and receive financial transactions directly to Treasury systems. The TDO program provides services to facilitate various disbursement and collections including contract, vendor pay, individual reimbursement, and miscellaneous pay (e.g., utility bills, credit cards). The TDO program is also a centralized post-pay actions that works in concert with customers, partners, and stakeholders to provide customized payment solutions that are expeditious while ensuring invoices or claims are valid against the government. Once fully transitioned from the legacy disbursing systems to TDO, DoD will continue to function as a non-Treasury disbursing office and provide services related to collections, advance payments, cash disbursements, agent payment and returns, accommodation exchange, contingency (e.g., combat zone, afloat, and military in support of disaster relief), and emergency disbursing transactions under 31 U.S.C. § 3321(c)(2). For additional information on the TDO initiative, see [I TFM 4A-3000](#) for scheduling payments disbursed by the Fiscal Service.

*7.0 PAYMENTS IN SUPPORT OF ADVANCE PAYMENT POOL AGREEMENTS

Advance payment pool agreements may be established under the authority of [FAR 32.408](#) and [DFARS 232.470](#), and are a means of financing the performance of more than one contract held by a single contractor. Cash advanced to a contractor must be reported on the DD 2657 and be reflected on the DO Cash TAS until the money is returned or disbursed. Follow Volume 10, Chapter 10, paragraph 5.4 for processing advance payments.

CHAPTER 10

SMART CARDS FOR FINANCIAL APPLICATIONS

1.0 GENERAL

1.1 Overview

The DoD utilizes several Smart Card applications to conduct financial transactions in [several](#) settings. Smart Cards:

1.1.2. Include [Stored Value Cards](#) (SVC), debit cards, and combination cards (hybrids that contain both SVC and debit card features);

1.1.3. Store or provide access to “electronic funds” and a more secure method of handling funds; and

1.1.4. Alleviate the need to carry cash and provide electronic payment to vendors for items purchased or services rendered.

1.2 Purpose

This chapter provides:

1.2.1. Guidance for requesting approval to begin a Smart Card pilot program or to move from pilot to full roll-out, except when provided under the General Services Administration (GSA) SmartPay Contract; and

1.2.2. High-level disbursing guidance for SVCs, combination cards, and debit cards.

1.2.2.1. [SVCs](#)

1.2.2.1.1. The basic trainee SVC program (known as EZpay) is used as an advance of pay to basic trainees of the United States Army, Air Force, Navy, and Marine Corps.

1.2.2.1.2. The SVC used for U.S. deployed forces, known as EagleCash, is used for electronic financial transactions in overseas contingency locations.

1.2.2.2. [Debit Cards](#). Debit cards are used as an alternate device for payments made by DoD agencies.

1.3 Authoritative Guidance

In accordance with [Title 31, Code of Federal Regulations, part 208](#), Electronic Funds Transfer (EFT) is mandatory within the DoD, unless a waiver has been granted. Per [the U.S. Department of Treasury \(Treasury\)](#), Treasury Financial Manual (TFM), Volume I, Part 4A, Chapter 3000 ([I TFM 4A-3000](#)), SVCs and debit cards are available mechanisms for working towards compliance with the EFT requirement.

2.0 POLICY ON SMART CARD UTILIZATION

2.1 Overview

The policy and guidance set forth in this chapter is in accordance with [I TFM 4-9000](#). Treasury guidance supersedes any conflicting information provided in this chapter. The Defense Finance and Accounting Service (DFAS) is assigned management and oversight responsibility for the functional aspects and the use of financial Smart Cards within the DoD, except for GSA SmartPay products. Written approval from DFAS is required for all pilot and full rollout Smart Card usage (e.g., stored value or debit) that employ either single purpose or multifunctional applications (combined financial/non-financial applications).

2.2 Smart Card Program Approval

2.2.1. [New Program](#). If a DoD agency seeks to establish a new Smart Card program, the agency must submit a request for approval to the [DFAS - Indianapolis Center \(DFAS-IN\)](#), Enterprise Solutions and Standards, Disbursing (DFAS-IN/JJFKCD), 8899 East 56th Street, Indianapolis, IN 46249-2700. Email: dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil. Separate requests are required for each financial application.

2.2.2. [Program Magnitude](#). Requests for approval must indicate whether the program is a pilot effort or a full rollout program.

2.2.2.1. [Pilot Programs](#). Pilot programs are temporary and must be in operation for no less than 90 days and not to exceed 180 days. Pilots should be used to test card programs prior to full rollout.

2.2.2.2. [Full RollOut Programs](#). Full rollout programs are non-temporary and must be in operation longer than 180 days. Full rollout of a card program should follow a pilot.

2.2.3. [Smart Card Application Package](#). Requests for approval must be submitted as an application package to DFAS-IN/JJFKCD. The application package must be completed before approval of any pilot or full rollout of a card program. Include the following items in the application package:

2.2.3.1. [Memorandum](#). The agency headquarters, or designated representative, should request approval of the pilot or full rollout program via memorandum. It should be addressed to DFAS, Enterprise Solutions and Standards;

2.2.3.2. Application. All pilot and full rollout programs are required to submit a completed DoD Financial Smart Card Application;

2.2.3.3. Concept of Operations (CONOPS). The CONOPS document should contain guidance on the use of the Smart Card program by the agency;

2.2.3.4. Coordination. The package must contain copies of coordination documentation, including the agency or component leadership's and servicing Disbursing Officer's (DO) endorsement of memoranda;

2.2.3.5. Project Manager Documentation. A copy of the letter designating the agency Smart Card project manager must be submitted with each package. See paragraph 2.4 for information on project managers; and

2.2.3.6. Analysis for Full Rollout. If the request is to move from a pilot Smart Card program to a full rollout, include an analysis showing:

2.2.3.6.1. Any savings realized from the pilot program;

2.2.3.6.2. How the pilot program is an improvement over the pre-pilot environment; and

2.2.3.6.3. The results of relevant performance measures used during the pilot and proposed for the full rollout.

2.3 Memorandum of Understanding (MOU)

The Treasury, Bureau of the Fiscal Service (Fiscal Service) and the agency implementing the program must establish a MOU prior to the implementation of a new Smart Card program (see subparagraph 2.2.1). The MOU describes the terms of the agency's Smart Card program and the respective responsibilities of the agency and Fiscal Service for operation of the program. In addition, the MOU specifies the type of program and Smart Card(s) implemented by the agency, the agency's funding schedule, and the fees and costs to be paid by the agency and Fiscal Service.

2.4 Agency Smart Card Project Manager

2.4.1. Designation. The agency must designate a Smart Card project manager and alternate in writing before implementing a Smart Card program.

2.4.2. Responsibilities. The agency must specifically identify the tasks for which the Smart Card project manager is responsible. The Smart Card project manager must manage the Smart Card program and the activities described in this chapter in accordance with the MOU between the Fiscal Service and the agency, the Smart Card standard operating procedures (SOPs) and other instructional documents, and program-specific policies and procedures developed by the agency in consultation with Fiscal Service. The specific duties of the project manager include:

2.4.2.1. Acting as the agency's liaison among Fiscal Service, the agency, and other interested stakeholders;

2.4.2.2. Provides full support for the Smart Card program within the agency;

2.4.2.3. Develops and obtains agency approval for the CONOPS, Smart Card application, and other related plans for the implementation of the agency's Smart Card program;

2.4.2.4. Secures agency funding approvals necessary for the Smart Card program;

2.4.2.5. Coordinates the agency's implementation of the Smart Card program to include obtaining and maintaining the Security Assessment and Authorization, the Authority to Operate or similar approval, and the SVC program to access the agency's computer networks so that the SVC can be deployed and operate as designed;

2.4.2.6. Oversees and obtains agency approvals for changes to the program;

2.4.2.7. Transfers sufficient funds to Treasury's financial or fiscal agent to ensure full funding for the agency's obligations with respect to outstanding Smart Cards;

2.4.2.8. Maintains accurate, up-to-date lists of accountable officers (AO(s)); and

2.4.2.9. Complies with other Smart Card program policies and procedures as described in the MOU, SOPs, and other Smart Card instructional documents.

2.5 Smart Card AO(s)

2.5.1. Designation. The agency must designate one or more Smart Card AOs. If the agency Smart Card AO is already appointed as a DO, Deputy DO (DDO), or Disbursing Agent and the responsibilities of the card program are covered by the current appointment, no additional documentation is necessary for appointment. However, if these requirements are not met, then the agency must provide a Letter of Appointment or appointment by DoD (DD) Form 577, Appointment/Termination Record - Authorized Signature, assigning an individual or individuals as the Smart Card AOs. The Letter of Appointment will list the individual's responsibilities. An additional letter will be required when the individual no longer serves as the Smart Card AO. In addition to this documentation, the AOs must fill out the Fiscal Service (FS) Form 2888, Application Form for U.S. Department of the Treasury Accountable Official - Merchant Stored Value Card (SVC), when directed by the agency Smart Card project manager.

2.5.2. **Responsibilities.** The agency must specifically identify the tasks for which the Smart Card AOs are responsible. The agency should segregate the duties appropriately in accordance with the agency's policies and procedures. As applicable and appropriate, AOs are responsible for the duties and responsibilities of a certifying officer or a DO, depending upon the designation of the AO per Title 31, United States Code (U.S.C.), sections 3322 ([31 U.S.C. § 3322](#)), [31 U.S.C. § 3325](#), and [31 U.S.C. § 3528](#), and other applicable laws. The Smart Card AOs must manage the Smart Card program and the activities described in this chapter in accordance with the MOU between Fiscal Service and the agency, the Smart Card SOPs and other instructional documents, and program-specific policies and procedures developed by the agency in consultation with Fiscal Service. The specific duties of the AOs may include:

2.5.2.1. Issuing Smart Cards and Personal Identification Numbers (PINs) to cardholders while following all enrollment processes;

2.5.2.2. Accounting for outstanding Smart Cards and the funds associated with each Smart Card, to the extent the Smart Cards and funds are within the control of the agency;

2.5.2.3. Providing instructions to Treasury's financial or fiscal agent as to the proper allocation of funds among the Smart Cards that are issued, by account number and, where feasible, cardholder name;

2.5.2.4. Maintaining accurate, up-to-date inventories of Smart Card program hardware and equipment, including point-of-sale (POS) terminals, laptops, kiosks, Smart Cards, and other items associated with the Smart Card program that are delivered to agency locations;

2.5.2.5. Safeguarding Smart Cards as sensitive items, to the extent the Smart Cards are within the control of the agency (the agency is accountable for Smart Cards issued by the agency at issuance locations); and

2.5.2.6. Along with the agency's Smart Card project manager, comping with other Smart Card program policies and procedures as described in the MOU, SOPs, and other instructional documents.

2.6 SOPs

This chapter contains higher-level policy and disbursing accountability requirements for the use of various card programs that have been approved. DoD Agencies, responsible for programs listed within this chapter, are required to develop and maintain detailed SOPs that comply with all current applicable regulations and cover all aspects of their card program for daily operations and/or contingencies.

2.7 Loss of Funds

The DO is accountable for physical loss of funds and for overage of Smart Card funds. If a loss or overage occur, the DO or designated representative should follow the guidance prescribed in Chapter 6, section 4.0.

2.8 Smart Card Ordering

Smart Cards are ordered through the applicable point of contact for the program (Fiscal Service or Fiscal Service's financial agent/fiscal agent) and delivered to the appropriate site. The point of contact and designated agency representative(s) must establish procedures to determine card usage and a secure method of card delivery.

2.9 Security and Storage

Smart Card stock must be treated like blank check stock. Storage and security requirements for blank check stock are prescribed in Chapter 7, paragraph 3.7.

2.10 Lost or Damaged Cards and Replacements

If a Smart Card is reported lost, damaged, or malfunctioning, follow procedures laid out in the applicable MOU and SOPs. For all stored value and combination cards reported lost, stolen, damaged, or malfunctioning, a locally produced list should be created for audit purposes. For the U.S. Debit Card, contact Fiscal Service's financial agent.

2.11 Theft, Fraud, Waste, and Abuse

Agencies participating in a Smart Card program must:

2.11.1. Include a process for reporting and educating Smart Card cardholders on how to promptly report any loss, theft, fraudulent, and unauthorized use of Smart Cards, PINs, passwords, or other security breach or malfunction involving the Smart Card program to Treasury or Treasury's financial or fiscal agent, and to the agency Smart Card Project Manager;

2.11.2. Aggressively investigate and prosecute (or assist in investigations, and prosecutions of) end-user theft, fraud, unauthorized use, or improper use of the Smart Card service that occur in agencies' areas of operation, and assist in obtaining restitution for the party suffering the loss;

2.11.3. Ensure that appropriate anti-money laundering controls and procedures are in place, to document the flow of monies onto or off a Smart Card; and

2.11.4. When a funds pool is used to fund an SVC; compensate the SVC funds pool for losses that result from theft, fraud, unauthorized use or other improper use of SVC equipment or resources for which agencies are responsible; unless the funds pool has been reimbursed from other sources, or the Treasury determines that such compensation is unnecessary or does not serve the SVC program's best interests.

2.12 Audit Requirements

2.12.1. [Inventory](#). An initial inventory must be completed and recorded upon receipt of Smart Cards from the Fiscal Service or other designated representatives. After the Smart Cards are inventoried, a signed receipt must be provided to the issuing representative for their records. The DO or designated representative will complete an SVC inventory log when releasing Smart Card stock to authorized personnel and to monitor returns of all unused Smart Cards. The DO or designated representative must maintain a copy of the signed receipt for his or her records.

2.12.2. [Monthly Inventory](#). At least once every calendar month, the DO or designated representative must inventory all Smart Cards secured in the vault. Any open container must be inventoried by individual count and by unique sequential numbers of the cards. All damaged containers, or those bearing evidence of having been tampered with, must be opened, and all cards must be individually counted and unique sequential numbers verified. A detailed record of the inventory, to include total cards on hand and unique sequential numbers by card type, must be retained in the disbursing office. At least once during each calendar quarter, the agency's cash verification team must conduct an unannounced verification of any Smart Card stock (e.g., U.S. Debit Cards, EagleCash, EZpay) to include cards received, issued, returned, and on hand. A copy of the inventory must be given to the agency's cash verification team as an attachment to their quarterly cash verification report.

3.0 EZPAY STORED VALUE CARD

3.1 Overview

The EZpay SVC program utilizes a Smart Card with an embedded computer chip, which can be loaded in various denominations that can be configured to meet each installation's specific financial needs, that provides an electronic payment method for advance of pay to trainees of the U.S. Army, Air Force, Navy, and Marine Corps. The EZpay SVC is a substitute for coin and currency transactions and is issued to alleviate cash or check payments to trainees during training. The card is designed to provide basic trainees with access to their initial advance pay, a more secure method of money handling, and electronic payments to vendors for essential items needed during the first few weeks of training (e.g., haircuts, stationery, stamps, and toiletries). Personnel involved with administering the EZpay program are encouraged to access Fiscal Service's [EZpay](#) website. This website provides an overview of EZpay and includes items such as: getting started, frequently asked questions, acceptance sites, SVC facts, and the EZpay User's Guide. EZpay SVC transactions do not impact the DO Cash Treasury Account Symbol (TAS) and are reported to Treasury through Payment Information Repository (PIR) citing the proper TAS/ Business Event Type Code (BETC). Residual values on expired/cancelled cards will follow the EFT return reporting process.

3.2 Card Issuance

The DO or designated representative must maintain a vault inventory and issuance log for EZpay SVC stock received. This log must be used to maintain an inventory of card stock on hand and to control the release of cards to the issuing section or individual. When EZpay SVCs are issued, the DO or designated representative must examine the log to ensure that all cards issued and cards returned unused, if any, are accounted for and that cards are not removed without authority. The SVC inventory log must contain the date of inventory, beginning card unique sequential number, ending card unique sequential number, number of cards returned, number of cards issued for the day, number of cards remaining in inventory, and the signature of the DO or designated representative.

3.3 Activation and Accountability

Detailed procedures for activation of EZpay SVCs must be included in the agency's SOP for issuance. Once an EZpay SVC is activated, the DO or designated representative must ensure that the card number is indicated on the payroll document for tracking purposes and ensure the amount is reflected as an increase in the DO's accountability for that day's business. A payment in an amount equal to the total value of all EZpay SVCs activated that day will be forwarded to the Treasury's fiscal agent, which is the financial institution making restitution to the vendors for card usage. The payment will be in the form of an EFT. The fiscal agent will complete the required settlement action with vendors who accept the EZpay SVC. The total dollar value of the EZpay SVCs activated for that day, **except for** replacement cards issued, will always match the total of the daily payroll document.

3.4 Residual Value on Expired/Cancelled Cards

Unclaimed balances on an SVC at expiration are identified as residual funds and, if possible, are returned to the cardholder systematically by Fiscal Service's designated financial or fiscal agent. If systematic return is not possible, the agency and Fiscal Service initiate good faith efforts to locate and return residual funds greater than \$10.00 to the authorized SVC cardholder. **When** systematic or good faith returns **are** not possible, residual funds greater than one year old are transferred to the Treasury trust fund receipt account "Unclaimed Moneys of Individuals Whose Whereabouts are Unknown" ([31 U.S.C. § 1322](#)) to be claimed with supporting documentation by contacting Fiscal Service. See [I TFM 6-3000](#) for additional guidance on residual funds.

4.0 EAGLECASH STORED VALUE CARD

4.1 Overview

The EagleCash SVC is a reloadable plastic card embedded with a computer chip that stores “electronic funds” in its memory. The card is issued to deployed service members, DoD civilians, and contractors. The card is used as a substitute for coins and currency transactions at concessions and for services at military installations overseas during contingency operations (e.g., barber and beauty shops, food court, post office, and Base Exchange). The card can be reloaded and continually used throughout the tour of duty. The cards are issued by a Finance Office (inside or outside the continental United States) and may be funded through a local pay, cash, personal check, or the EagleCash Kiosk. For more information, visit Fiscal Service’s [EagleCash](#) website. This website provides an overview of EagleCash and includes items such as: getting started, [frequently asked](#) questions, acceptance sites, SVC facts, the EagleCash User’s Guide, and the Kiosk User’s Guide.

4.2 Card Issuance

The DO or designated representative will issue all cards used in this program. EagleCash cards with a zero-dollar value may be issued to individuals who are authorized to receive check-cashing services as prescribed in Chapter 4, paragraph 3.1. The name of the individual, appropriate identification number, length of deployment, and bank account information are all collected during the issuance process. EagleCash cards can be issued at the deployed location or in advance of deployment by the Finance Office.

4.3 Activation

4.3.1. EagleCash Kiosk. When an EagleCash card is issued, it may be loaded with funds drawn by personal check, cash, or local pay. Additionally, a self-service card-processing device called the EagleCash Kiosk may be deployed in the field for the purpose of loading, unloading, and transferring funds to the EagleCash card.

4.3.2. Application Process. Before a cardholder uses a kiosk, he or she is required to complete the [FS 2887](#), Application Form for U.S. Department of the Treasury Stored Value Card (SVC) Program. Completion of the FS 2887 gives the Treasury’s fiscal agent access to move money from the cardholder’s financial institution to the EagleCash card.

4.3.3. PIN. Bank information (bank routing number, account number, and type of account) is captured electronically or manually and embedded in the computer chip. A PIN is assigned at the chip level for use with the kiosk or at a Finance Office. The completed and signed FS 2887 must be forwarded to the Treasury’s designated fiscal agent who is authorized to initiate debit and credit entries to the individual’s financial institution. The FS 2887 will allow the cardholder to transfer funds between his or her financial institution and the EagleCash account. The DO must retain a copy of all completed enrollment forms.

4.4 Accountability

The accounting for entries of EagleCash must be recorded on the appropriate lines of the [DD 2657](#), Daily Statement of Accountability. On each business day, using the EagleCash laptop, DOs, DDOs, Finance Officers, or their designated representatives collect all new account transactions and create a compressed “zipped” file. Email the file to the EagleCash Customer Service Center at eagle@frb.org, transmit it online, or deposit it at another agency-designated location.

4.5 Residual Value on Expired/Cancelled Cards

If a cardholder departs the area before cashing out their EagleCash card, the Fiscal Agent must deposit the funds to the cardholder’s account on file after the card expires. A credit must be forwarded to the cardholder’s bank account via an Automated Clearing House (ACH) credit using information provided by the cardholder when signing up for EagleCash. If systematic return is not possible, the agency and Fiscal Service initiate good faith efforts to locate and return residual funds greater than \$10.00 to the authorized SVC cardholder. When systematic or good faith returns are not possible, residual funds greater than one year old are transferred to the Treasury trust fund receipt account “Unclaimed Moneys of Individuals Whose Whereabouts are Unknown” (see 31 U.S.C. § 1322) to be claimed with supporting documentation by contacting Fiscal Service. See I TFM 6-3000 for additional guidance on residual funds.

5.0 DAILY REPORTING REQUIREMENTS FOR STORED VALUE CARD

Daily reporting requirements for the EagleCash and EZpay Cash card programs are the same. The following scenarios impact the DO Cash TAS and must be properly reported to the Treasury.

5.1 SVC Sales or Load/Chip to Cash

Issued cards may be funded by personal check, cash, split pay, or transfer of funds from the cardholder’s home financial institution. Funding through split pay and the cardholder’s home financial institution does not impact the DO’s accountability/DO Cash TAS. Funding by personal check or cash increases the DO’s accountability/DO Cash TAS.

5.1.1. Personal Check. Submit a debit voucher citing the DO Cash TAS and applicable BETC to the Federal Reserve Bank (FRB) via DoD business system processes. The FRB will transmit the transactions to Treasury via [Over-the-Counter Channel Application](#) / [Collection Information Repository](#) (OTCnet/CIR) reflecting the proper TAS and BETC. Deposit the personal check citing the DO Cash TAS.

5.1.2. Cash. Submit a debit voucher citing the DO Cash TAS and applicable BETC to the FRB via designated system processes. The FRB will transmit the transactions to Treasury via OTCnet/CIR reflecting the proper TAS and BETC.

5.2 SVC Sales or Sale/Cash to Chip

Prior to departing a deployed environment, ship, or being separated from active duty, a cardholder may transfer any remaining value to their home financial institution or request a cash-out from the DO paid in cash or by U.S. Treasury check. The transfer of value to a home financial institution does not impact the DO's accountability/DO Cash TAS. Additionally, vendors utilizing a POS terminal may request a cash-out for the dollar value equal to transactions on their POS terminal. Cash-out transactions decrease the DO's accountability/DO Cash TAS.

5.2.1. U.S. Treasury Check. Submit a deposit ticket citing the DO Cash TAS and applicable BETC to the FRB via designated DoD business system processes. The FRB will transmit the transactions to Treasury via OTCnet/CIR reflecting the proper TAS and BETC. Report the U.S. Treasury check to PIR citing the DO Cash TAS.

5.2.2. Cash. Submit a deposit ticket citing the DO Cash TAS and applicable BETC to the FRB via designated DoD business system processes. The FRB will transmit the transactions to Treasury via OTCnet/CIR reflecting the proper TAS and BETC.

6.0 U.S. DEBIT CARD PROGRAM (USDC)

The USDC program provides Federal agencies with the ability to deliver Federal payments through debit cards, as an alternative to checks, drafts, cash, and other non-electronic mechanisms. The cardholder may use the USDC to access authorized Federal payments at Automated Teller Machines, POS terminals, bank tellers, and other locations where access is permitted. If the USDC is MasterCard or Visa branded, the cardholder may use the USDC anywhere the applicable brand is accepted. For more information, visit [Fiscal Service's USDC](#) website and the [USDC Program](#) website.

6.1 Program Administration

The USDC program is administered by the Fiscal Service, with the assistance of Fiscal Service's designated financial agent. The USDC is a flexible payment mechanism used to deliver miscellaneous or nonrecurring payments to individuals, or to allow government employees or military personnel access to cash during their official duties.

6.2 Card Funds Access

After implementation of the USDC program, the agency disburses payments to a card account and the funds are accessed via a debit card issued to a Federal payment recipient. Cards may be funded through a Card Funding Account (CFA) owned by the agency and held by the financial agent, through EFT via the ACH network, or by utilizing the Automated Standard Application for Payments system to authorize the financial agent to draw down agency funds. Funds held in a CFA must be reflected in the DO Cash TAS. DOs establish funds in a CFA through an EFT for Cash and record the funds on the DD 2657. Disbursements out of the CFA must be reported as cash disbursements.

7.0 DIRECT EXPRESS

Direct Express Debit MasterCard is a prepaid debit card offered to Federal benefit recipients who wish to receive their benefits electronically. The debit card offers the convenience and security of using electronic transactions to spend and access money rather than using cash for purchases. Recipients do not need to have a bank account to sign up for the card. The Direct Express Debit MasterCard is available only to individual Federal benefit recipients. For more information, visit [*Direct Express*](#) Debit MasterCard website.

VOLUME 5, CHAPTER 11: “ELECTRONIC COMMERCE AND DEPOSIT OF PUBLIC FUNDS”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [***bold, italic, blue, and underlined font***](#).

The previous version dated [August 2022](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Updated hyperlinks and formatting to comply with current administrative instructions.	Revision
4.7, 10.3	Removed procedural content and renumbered subparagraphs accordingly.	Deletion
4.4, 12.0	Added guidance for cancelling year appropriation transactions from the Yearend Cutoff for Cancelling Year Appropriations Policy Memo (FPM23-04).	Addition

CHAPTER 11

ELECTRONIC COMMERCE AND DEPOSIT OF PUBLIC FUNDS

1.0 GENERAL

1.1 Overview

Government entities disburse funds to and collect funds from individuals, businesses, and other government entities via cash, negotiable instruments, and a variety of electronic mechanisms.

1.2 Purpose

This chapter provides information and guidance on several electronic disbursement and collection mechanisms that are U.S. Department of Treasury (the Treasury) programs and services.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3322 ([31 U.S.C. § 3322](#)) and [31 U.S.C. § 3302](#) authorizes disbursing officers (DO) to deposit public funds and draw public funds from the Treasury or a depository only as necessary to make payments. Additional statutes, regulations, and other guidance are referenced under each section of this chapter.

2.0 ELECTRONIC FUNDS TRANSFER (EFT)

2.1 Overview

In accordance with [31 U.S.C. § 3332](#), EFT is mandatory within the DoD. Exceptions to this mandate are provided in the [Treasury Financial Manual \(TFM\), Part 4A, Chapter 2000 \(I TFM 4A-2000\)](#).

2.2 Electronic File Transmission

Payment or payroll files must [transmit](#) to the Federal Reserve Bank (FRB) by electronic file transmission.

2.3 Contractor Pay Applicability

Refer to Volume 10, Chapter 3, paragraph 4.8.

2.4 Official Authorization List (OAL) for the FRB

2.4.1. Overview. The OAL identifies all individuals who are authorized to transact business and provide instructions to the FRB on behalf of a disbursing office.

2.4.2. OAL Documentation. The OAL authorization letter, form, and instructions are located on the [FRB Services - Account Services Forms](#) web page. The disbursing offices must complete the form, notarize it, complete the [Certificate of Resolutions Authorizing an Institution to Open and Maintain Accounts and Use Services \(BR\) form](#), and forward the documents to Treasury's Bureau of the Fiscal Service, 401 14th Street SW - 409D, Washington, DC 20227 (treasuryOAL@fiscal.treasury.gov).

2.4.3. OAL Change Process. Each DO must validate their respective contact form for their office at least annually. If changes are required, follow the process in the FRB Service guidance located on the FRB Services web page in [Table S.4](#) (Sending Point and Service Provider Contact form). Once completed, send a copy to Defense Finance and Accounting Service (DFAS), Enterprise Solutions and Standards, Disbursing (DFAS-IN/JJFKCD), 8899 East 56th Street, Indianapolis, IN 46249-2700 (dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil) and submit the original to the Fiscal Service, who will sign and forward to the FRB.

3.0 CARD ACQUIRING SERVICE (CAS)

3.1 Overview

The CAS is a government-wide network that allows federal agencies to receive credit and some debit card payments (e.g., Visa, MasterCard, American Express, Discover credit cards, and some debit cards) due the Federal Government. These credit or debit cards can be used to collect payments from the general public and from Government entities for a variety of reasons, including, but not limited to sales of materials, services, fees, fines, debts, customs duties, and taxes. Fiscal Service designated one financial agent to process credit and debit card collections and to provide uniform nationwide credit and debit card services for federal agencies. Credit and debit cards may be used for collections received over-the-counter, by mail, by phone, or over the Internet. If an agency wants to accept payments through the Internet, the agency should work with [Pay.gov](#) in addition to setting up a CAS account. For more information about Pay.gov, see section 7.0. Information pertaining to the CAS is available on Fiscal Service's [\(CAS\)](#) website.

3.2 Card Processing Rules and Regulations

Activities participating in the CAS must comply with the [ITFM 5-7000](#) when processing credit and debit card transactions. In order to establish a processing relationship, activities must complete and submit the Card Acquiring Service Application (CASA) to Fiscal Service for approval. Prior to submission, activities must coordinate with their servicing DO.

3.3 Transaction Dollar-Value Limit

3.3.1. Maximum Limit. Effective June 1, 2015, agencies must limit their credit card collections to ensure an individual payment transaction does not exceed \$24,999.99. There should be no purchases using the credit card in excess of \$24,999.99. [Effective October 1, 2022, the threshold for intra-governmental card collections is further decreased so that those individual transactions may not exceed \\$10,000.00.](#) An attempt to bypass these limits will result in a rejected transaction at the point of collection. Agencies will ensure controls are in place to prevent splitting

a purchase into smaller transactions. The payment–collection process will be stopped if the maximum limit for a collection is attempted. This information can be found at [ITFM 5-7055](#).

3.3.2. Government Purchase Card Transactions. The \$10,000.00 limit in subparagraph 3.3.1 also applies to intra-governmental transactions using the government purchase card when the agency accepting the card uses Treasury’s CAS. Individual credit card transactions exceeding the maximum limit cannot be split into two or more transactions over one or multiple days. If the agency’s cash flow includes individual credit card transactions greater than the maximum limit, the agency should use another electronic collection alternative for those transactions. Available electronic alternatives include Automated Clearing House (ACH), which is the primary system for EFT, and Fedwire, which is a gross settlement funds transfer system operated by the FRB.

3.3.3. Minimum Limit. Agencies may not establish minimum transaction amounts as a condition of honoring a credit or debit card. [Only the Treasury may establish minimum limits and will do so only under special](#) circumstances.

3.3.4. Purchase Card Payments. Requirements [are](#) in Volume 10, Chapter 23.

3.4 Processing Transactions

All activities must settle (balance or reconcile) on a daily basis, regardless of the amount accumulated that day. Activities will pay the assessed non-qualifying interchange fee when they fail to settle electronically every day. The network bank will inform the activity of its particular cutoff times for deposits. In an electronic environment, settlement transactions should take place through an Electronic Data Capture/Point of Sale at various times during the day (or once at the close of business) in order to meet the cutoff time for deposits.

3.5 Reports and Reconciliation

Based on the report requirements established in the participation agreement with the network bank, reports of the merchant's credit and debit card activity will be made available electronically by the network bank to the participating DoD activity (merchant). The summary will detail dates of deposits, dollar amounts of deposits, number of transactions processed, adjustment charges, and chargebacks. This report must be used to reconcile any differences which may occur between the report and entries into the accounting system. The report must also be reconciled with the DoD [\(DD\) Form 1131](#), Cash Collection Voucher, submitted to the DO or Deputy DO, and the deposit information posted in the Collection Information Repository (CIR).

3.6 Internal Controls

Internal control procedures must be established by each participating DoD activity to ensure that credit and debit card transaction documentation, to support all DD 1131s submitted to the DO, is properly safeguarded. Documentation must be available for use by the DO’s quarterly cash verification board, the collection agent audit board, and for other audit purposes.

4.0 INTRA-GOVERNMENTAL PAYMENT AND COLLECTION (IPAC) SYSTEM

4.1 Overview

4.1.1. This section covers general information on the IPAC system. General requirements and technical specifications are fully prescribed by the Treasury on the [Intra-Governmental Payment and Collection \(IPAC\)](#) website (see Volume 10, Chapter 10, section 2.0).

4.1.2. The IPAC system is used for buyer-seller (e.g., reimbursable) transactions between federal agencies because it accomplishes the following:

4.1.2.1. Facilitates timely posting of collections to reduce receivable balances;

4.1.2.2. Eliminates the paper flow between agencies;

4.1.2.3. Eliminates the use of Treasury checks between agencies;

4.1.2.4. Improves cash management; and

4.1.2.5. Establishes the Treasury as the collection agency.

4.2 IPAC

The IPAC system's primary purpose is to provide an automated standardized interagency funds expenditure transfer mechanism for Federal Program Agencies (FPAs). It facilitates intra-governmental Federal e-commerce by transferring funds, with related descriptive data, from one FPA to another on a real-time basis. The IPAC system enables FPAs to exchange accounting information and to transfer funds between FPAs involved in buyer-seller relationships. It establishes standardized interagency payment, collection, and adjustment procedures through an internet-based application. The IPAC system also includes a module for [transmitting](#) Retirement Insurance Transfer System transactions to the Office of Personnel Management (also see the IPAC website).

4.3 Originating the IPAC Transactions

4.3.1. Buy-Sell Agreement. Per [1 TFM 2-4700, Appendix 8](#), Buy-Sell Agreements are required between agency location codes (ALCs) in order to help facilitate the payment/collection process. The Buy-Sell Agreement contains agreed upon terms between the ALCs that help ensure necessary transaction information is provided so that both sides will be able to reconcile their transactions (also see the IPAC website).

4.3.2. Government Invoicing Initiative. In a daily reporting environment, agencies are required to use Treasury's government invoicing (G-Invoicing) system (formerly named the Invoice Processing Platform). G-Invoicing is used to negotiate, broker, and electronically store the General Terms and Conditions between buyers and sellers for all inter- and intra-governmental reimbursable transactions as appropriate system capabilities become available. Additional information on G-Invoicing is addressed in Volume 11A, Chapter 2, [subparagraph 3.1.3](#).

4.3.3. Initiating the Order

4.3.3.1. The customer agency must include its ALC on all requisitions or order forms forwarded to the billing agency. This code identifies the customer agency to be billed for services or supplies. The billing agency will provide the customer agency with appropriate instructions for transmitting this information. [Also](#), the customer agency [should](#) include sufficient descriptive information on the requisition or order form, which the billing agency will place in the description section of the bill. This will enable the customer agency to [later](#) match the bill with the originating requisition [in](#) the customer's computer system. The primary match will be on the originating document number. [By design](#), the IPAC system [is not](#) dependent on appropriation data as criteria to match an existing obligation since the Treasury transfers funds at the ALC level.

4.3.3.2. After fulfilling the customer agency's requisition/order, the originating agency (based on whether it is a payment or collection transaction) must input the appropriate data in all the IPAC required data fields. Also, it must input the customer agency's special requirements and any descriptive information, supplied with the requisition/order, in the appropriate fields of the IPAC transaction.

4.3.4. Initiating the IPAC Transaction

4.3.4.1. If [the billing agency initiates](#) a collection transaction, the transaction provides essential invoice information and immediately charges the funds to the 8-digit customer ALC. Within DoD, the 8-digit ALC is the 4-digit Disbursing Station Symbol Number (DSSN) preceded by four zeros. Upon fulfilling the customer agency's order or requisition for services purchased or supplies shipped, immediate payment is accomplished by the billing agency crediting its own ALC and charging the customer agency's ALC. A payment transaction initiated by the customer agency ([e.g.](#), disbursement) [credits](#) funds of the billing ALC when a hardcopy invoice is received. A payment transaction [can also](#) transfer payroll deduction type payments ([e.g.](#), Internal Revenue Service or Veterans Education Assistance Program).

4.3.4.2. Transactions can be input manually into the on-line system or created automatically by accounting or disbursing systems for bulk data transfer or host-to-host transmissions. The IPAC system automatically will issue an IPAC Document Reference Number that is the equivalent of a U.S. Treasury check number and will ensure that no two transactions have the same number.

4.3.4.3. Bulk files are queued for processing [immediately upon receipt](#) into the IPAC system; on-line transactions transmit in "real-time." Whether an on-line or bulk data transfer transaction, the transaction originator must include a point of contact and telephone

number to ensure the receiving agency can accurately determine who to contact if there is a need for adjustment.

4.3.4.4. A collection or disbursement voucher (e.g., DD 1131, [Standard Form \(SF\) 1080](#), Voucher for Transfers Between Appropriations and/or Funds, or [SF 1034](#), Public Voucher for Purchases and Services Other than Personal) must be prepared for each bill or payment entered in the system and processed through the DO in the same manner as other vouchers, except that no check or cash payment is sent or received.

4.3.5. [Required Data Elements for Initiating IPAC Transactions](#). There are mandatory fields in the IPAC system for specific IPAC transactions. [The Treasury requires](#) these data elements [and they](#) vary by transaction type. The mandatory fields can be found at the IPAC website.

4.3.6. [Other Required Information](#). There are three additional required data elements for DoD IPAC transactions, in addition to the Treasury required information. When initiating a payment or collection in IPAC, the sender Business Event Type Code (BETC), receiver BETC, and the receiver Treasury Account Symbol (TAS) are required for every transaction. Also, an ALC can require specific and/or descriptive data necessary for their ALC to process the transaction completely. This specific information should be in the Buy-Sell Agreement that was agreed upon by the participating ALCs. See [I TFM 2-5135](#) for guidance for the TAS/BETC reporting of accounts F3500, Collections and/or Payments Default, and 3502, IPAC Default. Agencies must correctly reclassify, in the Classification Transactions and Accountability, all system defaulted transactions to a valid receipt or expenditure TAS by the third business day following the close of the accounting month.

*4.4 Processing Cycle

The IPAC system is available through the last day of each month to enter bills or transfers for that month. However, unless a different cutoff date and time [is](#) in the Buy-Sell Agreements, agencies will not process any new transactions the last five business days of the month to avoid month-end accounting problems. [Also, when revising](#) Trading Partner Agreements (TPA) to incorporate the new five workday cutoff, [agencies](#) must utilize Fiscal Service Forms 7600A and 7600B as the Department continues to migrate towards G-Invoicing. I TFM 2-4700, [Appendix 8](#) states G-Invoicing was available for government-wide use with G-Invoicing Release 2.1, which allowed users to begin brokering General Terms and Conditions (GT&Cs) within the system. Each DoD reporting entity must apply the GT&Cs for intragovernmental transaction account reconciliation, derived from I TFM 2-4700, to all transactions with internal DoD trading partners currently using G-Invoicing for GT&Cs. [Cancelling year transactions must also conform to the fiscal year \(FY\) cutoff requirement in section 12.0.](#)

4.5 Recording IPAC Transactions

4.5.1. Under the Central Accounting Reporting System (CARS) initiative, partial and “Full” CARS reporters will no longer report IPAC transactions to the Treasury monthly, since they provide the information daily.

4.5.2. Reconciliation. An [organization](#) can print out its [ALC's](#) activity from the IPAC system [to help ensure all transactions are accounted for](#) (see the IPAC website).

4.5.3. Reporting of Unprocessed Transactions

4.5.3.1. Unidentified transactions between federal agencies, including IPAC transactions, will be debited or credited to account F3885 (Undistributed Intra-governmental Payments). The Treasury identified a 3-digit limit, F3885.007, specifically for the IPAC system. All new transactions that remain unclassified at month-end will be recorded in F3885.007 (see [I TFM 2-5135](#)).

4.5.3.2. The detailed transactions and the reconciliation to the Treasury will remain in the existing tool used for recording and clearing unprocessed IPAC transactions.

4.5.4. Receipt and Acceptance Internal Controls. DoD financial reporting entities should include IPAC in intra-governmental transactions and must develop and implement internal controls to ensure that receipt and acceptance is properly documented. [Entities](#) must [make this documentation](#) available within the timeframe prescribed by an auditor when requested during audits.

4.6 Adjustments

Both the billing and customer agencies should recognize that the system cannot tolerate uncontrolled charges or adjustments. The adjustment function should not be used to adjust charges that originated under other billing systems. The charge should also not be considered erroneous simply because the customer agency receives the paid billing statement before supplies are received. If the receiving agency subsequently finds that the transaction was erroneous, the adjustment should [occur](#) at that time. However, the receiving agency [has only](#) 90 days from the creation date of the transaction to process the adjustment. The sending agency also has the ability to make an adjustment to an erroneous transaction prior to or [within 90 days](#) after its submission to the receiving agency.

4.6.1. There are some situations that warrant an immediate adjustment to a transaction. Some acceptable reasons for an immediate adjustment are:

4.6.1.1. [Billing the wrong ALC](#) for the transaction;

4.6.1.2. Funds cited do not belong to the billed ALC;

4.6.1.3. Appropriation cited has expired;

4.6.1.4. Transaction exceeds authorized funding;

4.6.1.5. Duplicate transaction; or

4.6.1.6. Noncompliance with required data elements set forth in a TPA.

Anytime a transaction appears to be erroneous, there needs to be sufficient reason to adjust it back. If you can take ownership of a transaction (e.g., a valid billing that belongs to your ALC), [do not reject it](#) without sufficient research and notification. Communication between trading partners is key to resolving erroneous transactions.

4.6.2. [Contact the](#) agency representative who created the original transaction. If the transaction is erroneous, the receiving agency will access the IPAC on-line system and make the menu selection for IPAC adjustments. The IPAC system will guide the user with prompts [and](#) contains edits to ensure that the original transaction [matches to the adjustment transaction](#). Once the data is entered correctly, the system will issue an IPAC Adjustment Voucher Number unique to each transaction. Adjustments are considered a new transaction for reporting purposes and included in the net totals for the month in which the adjustment is accepted in the IPAC system.

4.6.3. In cases where the originating agency (e.g., the ALC that created the transaction) later concludes that the adjustment (or a portion thereof) was improper, it must communicate this to the receiving agency, preferably by email or via telephone. When [the parties have reached an agreement](#), a second IPAC transaction will be prepared for the proper amount.

*4.7 Restrictions

The Treasury reserves the right to make any adjustments centrally in CARS and to remove any agency from the IPAC system in those instances when the agency fails to comply with the rules and regulations set forth by the Treasury. For additional information see the IPAC website.

5.0 TREASURY LOCKBOX NETWORK

The Treasury Lockbox Network is comprised of financial agents that provide lockbox and remittance service to the Treasury on behalf of federal agencies. The financial agents are strategically located to minimize mail, processing, and collection float. Lockbox processing was adopted as a means of accelerating deposits to the Treasury's General Account at the FRB of New York. The Treasury ([ITFM 5-4600](#)) has prescribed guidance on lockbox service.

6.0 CREDIT GATEWAY

6.1 Overview

The Credit Gateway is a collection program for Fedwire and ACH credit transactions. For more information about Credit Gateway, see paragraph 6.2 for the hyperlink to Fiscal Service's Credit Gateway.

6.2 Implementation

Activities who want to use the Credit Gateway must complete the new account setup form and email it to Fiscal Service. Fiscal Service will coordinate with the financial agent to assign an account number. Upon notification that the account number is active, the activity can provide the

account number to customers and receive payments. Activities interested in creating a Credit Gateway account should review the Fiscal Service's [Credit Gateway Get Started](#) web page.

6.3 Credit Gateway Process

6.3.1. The activity advises the customer of the obligation due the Government, either by invoice, bill, letter, or other means. The agency also supplies the customer with the appropriate information to include in the transaction.

6.3.2. When the customer sends the payment through their financial institution, the FRB receives the transaction and credits the Treasury's account.

6.3.3. Transaction information [transmits](#) to the Treasury via the CIR. The transaction information includes both detailed and summary deposit information. The activity can download the information from CIR.

6.3.3.1. Fedwire Reporting. CIR will report deposit information for Fedwires in near real-time.

6.3.3.2. ACH Credit Reporting. CIR will report future-dated and settled ACH credit entries.

7.0 PAY.GOV

7.1 Overview

[Fiscal Service developed Pay.gov](#) to meet a commitment of processing collections electronically using internet technologies. Pay.gov satisfies agencies' and consumers' demands for electronic alternatives by providing the ability to electronically complete forms, make payments, and submit queries 24 hours a day. Pay.gov is a secure, government-wide collection portal and provides a suite of services allowing agencies to obtain and process collections in an efficient and timely manner.

7.2 Services

The Pay.gov application is comprised of four services: billing/notification, forms, reporting, and collections.

7.3 Collections Service

The Pay.gov collections service has credit and debit card transaction and ACH debit transaction processing options. Activities that want to accept credit and debit cards through Pay.gov must apply for an internet merchant account with the Fiscal Service CAS. Pay.gov accepts several payment options:

7.3.1. One-time Payments. The customer submits a one-time payment to the activity.

7.3.2. Recurring Payments. The customer sets the payment details and establishes a specific interval of time between each payment. Payments continue until all payments have been made or the payments have been canceled.

7.3.3. Deferred Payments. The customer can enter and schedule a payment up to 30 days in advance. Customers performing a credit or debit card transaction cannot use this option.

7.3.4. Preauthorized ACH Debits. The customer can authorize the activity to submit payment information, on their behalf, for regular, recurring ACH debits. The customer must provide advanced, written authorization. The activity submits the payment information to Pay.gov.

7.4 Implementation

7.4.1. Prior to implementing Pay.gov, activities must obtain the approval of the servicing DO.

7.4.2. Activities considering use of Pay.gov are directed to Fiscal Service's [Pay.gov Getting Started](#) web page. Guides and technical information can be found at the [Pay.gov Agency Documentation](#) web page.

7.4.3. DFAS established a Pay.gov team to provide assistance with new or changing Pay.gov activities. The DFAS Pay.gov team serves as a focal point for communicating with Treasury and can review, approve, and authorize all Pay.gov initiatives. Contact the DFAS Pay.gov team at dfas.indianapolis-in.ztd.mbx.pay-gov@mail.mil.

8.0 DEPOSITS OF FUNDS

Under 31 U.S.C. § 3302, custodians of money (e.g., DOs) holding cash or negotiable instruments in excess of either current requirements or the amount authorized to be held at personal risk, whichever is less, must **make a prompt deposit** in an authorized depository of the Treasury for credit to the Treasurer of the United States. This does not apply to instruments to be returned to remitters in the form received (e.g., deposits of unsuccessful bidders for the sale of government property). **Process all** physically received, negotiable instrument deposit transactions through the [Over-the-Counter Channel Application \(OTCnet\)](#) and cite a valid TAS and BETC at the time of the deposit.

8.0.1. Same Day Deposit. Cash collected and deposited prior to the end of the business day does not impact the DO Cash TAS. Deposited funds must cite the appropriate TAS/BETC that appears on the DD 1131.

8.0.2. Deposit Operating Cash No Longer Needed. Cash that is reflected on the [DD 2657, Daily Statement of Accountability](#) (on the ending accountability and deposited lines), must cite the DO Cash TAS/BETC at the time of the deposit.

8.1 OTCnet

8.1.1. Overview. OTCnet is a web application that lets federal agencies manage and report all check and cash deposits in one place. OTCnet automates the over-the-counter deposit process, captures detailed accounting information, and makes the classification of Treasury collections easier. It allows agency users to report receipts through a secure web-based application rather than by using paper-based credit vouchers. There are “off-line” check capture capabilities for activities operating in locations with intermittent or unavailable bandwidth and communication. For more information about OTCnet, see Fiscal Service’s [OTCnet web page](#).

8.1.2. OTCnet Requirement. [Process](#) all physically received, negotiable instrument deposit transactions through OTCnet. [Agencies](#) unable to use OTCnet for deposits of negotiable instruments due to contingency operations must establish depository arrangements with US Bank’s Mail-In Treasury General Account (MITGA) through the FRB of St. Louis. This includes the deposit of commercial checks and U.S. Treasury checks. For more information on MITGA, see [subparagraph 8.3.1.2](#).

8.1.3. Deposit of Cash and Negotiable Instruments. When using the OTCnet Deposit Reporting function, the depositing agency may combine cash and negotiable instruments into one deposit.

8.1.4. Required Information in Block 6. At a minimum, Block 6 of the OTCnet deposit ticket must identify the depositing entity’s name and location, the deposit preparer’s name, email address, and the deposit preparer’s phone number. The extent of additional information required in Block 6 is at the discretion of the DO.

8.1.5. Handling of Scanned Negotiable Instruments. After scanning items in OTCnet, [retain](#) the scanned negotiable instruments until [verifying](#) that they reside within OTCnet and a good image is on file. This verification must take place within 14 calendar days. [Scanned items](#) that are awaiting approval must be secured in an approved manner (see Chapter 3, section 3.0). Once verified, [destroy](#) the negotiable instruments.

8.2 Depositories

8.2.1. General Depositories. [III TFM 2-1000](#) describes general depositories as commercial banks or other financial institutions designated specifically and authorized by the Treasury to maintain a demand account in its name to accept deposits to the TGA. These depositories are designated only where they are needed to receive deposits of public funds for credit to the TGA or to furnish cash to DOs for official disbursements. Making deposits to a TGA eliminates processing floats. If more than one bank has been authorized at a base, station, installation, or command, the local commander must give equal recognition when recommending designation of authorized financial institutions as TGA depositories. After Treasury approval, the commander should reasonably distribute official financial transactions among the approved depositories. [Only](#) deposit public funds in a financial institution that [is](#) approved as a general depository, except as shown in subparagraph 8.2.4, and [only](#) mail deposits to a TGA [when given](#) specific Treasury authorization to do so.

8.2.2. Requests to Deposit With or Change General Depositary. DOs formally request authorization to deposit collections with a general depositary, or change from one authorized depositary to another, following guidance provided in the [ITFM 5-2000](#). This requirement also includes those instances when on-base banks or credit union offices undergo changes such as acquisitions or mergers. Send the completed request, no later than 35 calendar days prior to desired deposit start date, to the DoD Banking and Credit Union Office via email to dfas.dscc.jjf.mbx.dod-financial-institutions-tga@mail.mil for review, coordination, and submission to the FRB of St. Louis.

8.2.3. Need for General Depositary Ceases to Exist. The DO advises DFAS-JJF/CO of the date on which the need for a general depositary ceases to exist, and the reason therefore.

8.2.4. Limited Depositaries. Limited depositaries are designated only to receive deposits made by or on behalf of DOs for credit to their official non-symbol checking accounts maintained with such depositaries. Limited depositaries are not authorized to accept deposits for credit to the Treasury. For additional information on limited depositary accounts, see Chapter 14.

8.3 Deposit Requirements

8.3.1. Frequency. Deposit all funds received for credit to the Treasury's account promptly.

8.3.1.1. Agencies must deposit receipts totaling \$5,000 or more on the same business day received prior to depositary cutoff time. Make deposits as late as possible prior to the specified cutoff time to maximize daily deposit amounts. Collections totaling less than \$5,000 may be accumulated and deposited when the total reaches \$5,000. However, make deposits by Thursday of each week, regardless of the amount accumulated. For additional information, review the [ITFM 5-2065](#).

8.3.1.2. Send mailed deposits to US Bank's MITGA, rather than to the FRB. The MITGA will receive deposits of commercial checks, U.S. Treasury checks, and at the direction of the DO, cash. Before mailing deposits, the DO must establish depositary arrangements with US Bank's MITGA through the FRB of St. Louis. Once approved, establish the MITGA within OTCnet, and use OTCnet in conjunction with the MITGA. When using the MITGA during contingencies (when OTCnet is not available), the DO will contact the FRB of St. Louis to obtain permission to mail in a deposit. Once approved, the requestor receives a special form to complete and mail with the deposit. The former SF 215 (manually prepared deposit ticket) cannot be used.

8.3.1.3. For Navy vessels at sea, when daily mail service is not available, receipts consisting only of personal checks, money orders, and other negotiable instrument(s) may accumulate up to \$5,000 before they must be deposited, provided that a deposit of all receipts on hand is made at least once each week. The DO prepares the deposits for mailing via registered mail and delivers them to the military post office onboard. The DO may not hold negotiable instruments to be deposited pending arrival at the next scheduled port of call. Regardless of the total amount, the time interval since the last deposit, and the type of checks and negotiable

instruments on hand, DOs on board naval vessels make a deposit on the last regular business day before leaving port and on the first regular business day after returning to port for any at sea period in excess of 1 week.

8.3.2. U.S. Dollar Deposits

8.3.2.1. Negotiable Instruments. Deposit negotiable instruments (e.g., personal checks, traveler's checks, cash, and money orders) payable in U.S. dollars for credit to the Treasury's account at an approved general depository. DOs may deposit Treasury Checks at Military Banking Facilities overseas.

8.3.2.2. Checks Drawn on Foreign Banks in U.S. Dollars Payable Through a Bank in the United States. Checks drawn on foreign banks in U.S. dollars, payable through a bank in the United States, must have an American Bankers Association (ABA) routing and transit number (RTN) printed on the item and a magnetic ink character recognition encoded with a U.S. bank's ABA RTN at the bottom left side of the check. Group these checks on a single deposit ticket and deposit them as described in subparagraph 8.3.2.1.

8.3.2.3. Manner of Deposit

8.3.2.3.1. In conjunction with OTCnet, deposit cash, checks, drafts, or money orders in person with an authorized TGA. If a deposit of cash in person is impracticable at an authorized TGA, the next most preferred method is by armored car. The least preferred method of depositing cash is by registered mail to the MITGA. Since the delivery confirmation may require an additional fee to request a copy of the signature record with return receipt, the DO must ensure that funding is available. Charge costs for a cashier's check or money order to operations and maintenance or working capital funds available to the DO. If cash must be mailed, then the cash must either be double wrapped or placed in an inner and outer container. Deposit damaged or mutilated currency in accordance with Chapter 3, paragraph 5.7.

8.3.2.3.2. Agent officers or any authorized collection officer may make deposits on behalf of the DO when an approved designated depository is available. These individuals will use OTCnet for deposits.

8.3.2.3.3. When an approved designated depository is not available, agent officers or any authorized collecting officers may send cash to the DO by conversion to postal money order, bank money order, or cashier's check. Pay the fee for purchase of the cashier's check or postal/bank money order in cash at the time of purchase and attach the receipt to the DD 1131. Deduct the cost of the cashier's check or postal/bank money order from the total amount collected. Show in the body of the DD 1131 the total amount collected, the fee for the cashier's check or postal/bank money order, the net collection, the bank, and the date of the money order.

8.3.3. Foreign Currency Deposit. See Chapter 13, subparagraphs 6.2.4 and 6.2.5.

8.3.4. Reporting Large Deposits. To permit Fiscal Service to manage the government's cash position at each FRB, large deposits must be reported in advance of the transaction settlement date ([ITFM 6-8500](#)). IPAC transactions are exempt from this reporting requirement.

8.3.5. Sorting and Listing of Instruments. Include with each completed deposit ticket an adding machine tape or other listing, unless other arrangements have been made with the depository. Sort all currency by denomination, face and top up, and deposit it in full packages (100 notes) of each denomination: \$1, \$2, \$5, \$10, \$20, \$50, and \$100. Prepare partial packages for each denomination not containing 100 notes. Secure each package (full or partial) with a currency strap bearing no printed denomination. DOs may obtain these straps from commercial suppliers. Legibly show the total dollar amount and DSSN on each package of currency on each strap. Roll coins whenever possible. Include with each completed deposit ticket an adding machine tape or other listing reflecting, by denomination, the total of currency and coin [that comprise the deposit](#).

8.3.6. Endorsement of Negotiable Instruments

8.3.6.1. Area for Endorsements. [Endorsement of negotiable](#) instruments must [occur](#) on the back in the 1 1/2 inch space along the "trailing edge." When viewing the face (front) of a check, the trailing edge is the left hand edge. Normally, endorsements consist of the name of the payee and other identifying information required by the activity cashing the check. When the DO is preparing checks made payable to DoD, a DoD Component, another government agency, or the DO for deposit, the endorsement stamp required by subparagraph 8.3.6.3 appears in this space.

8.3.6.2. Multiple Endorsements. When multiple endorsements occur (or the space is used by a qualified endorsement such as for checks endorsed over to the DO by the payee) and the DO's endorsement requires space beyond the first 1 1/2 inches from the trailing edge, the DO uses the assigned space for subsequent endorsers (the back of the check in the upper right hand corner, no more than 3 inches from the right hand edge (leading edge) of the check). Do not refuse a check when the area assigned for the bank of first endorsement has been used. Such checks are acceptable but may not be processed by the banking system in the prescribed time frames under the Expedited Funds Availability Act ([12 U.S.C. § Chapter 41](#)), which could hamper collection action. Blue or black ink is preferable for endorsements.

8.3.6.3. Endorsement Requirements. Activities [may use](#) stamps containing additional information [if](#) the endorsement fits within the 1 1/2 inch space assigned for payee endorsers.

8.3.6.3.1. Negotiable Instruments Deposited [With a General Depository](#). When using the Deposit Reporting function of OTCnet, all negotiable instruments in payment of an obligation due the United States, regardless of the payee to which drawn, must be endorsed on the back of the instrument in the 1 1/2 inch space along the trailing edge. Insert the component's name (e.g., Army, Navy, or DFAS) first and then insert the 4-digit disbursing activity's DSSN in the blank following "DSSN." These may be entered manually, mechanically, or be included as a

part of the stamp itself. Enter, either manually or mechanically, the date of the deposit in the blank following “Date” to correspond with the bank’s business day. See subparagraph 8.3.1.

8.3.6.3.2. Conditional Endorsements. Do not accept checks with conditional endorsements, e.g., “Payment in Full.” Return these checks to the drawers and advise them that the DoD cannot legally accept conditional endorsements.

8.3.6.3.3. When Scanning Negotiable Instruments. If a depositing location is using the Check Capture function of OTCnet (e.g., check image scanning), there is no requirement for endorsing the negotiable instruments being scanned. The only time that a signature would be required is when scanning a Third-Party check. Acceptance of Third-Party checks is not recommended.

8.3.7. Record of Negotiable Instruments Deposited. DOs keep a complete record of negotiable instruments mailed or presented to depositaries. This should consist of scanned or photocopied images of both sides of the instruments. If scanning or photocopying is not possible, prepare a typed or written list containing the source of the instrument, name of the financial institution on which drawn, type of instrument, serial number, payee, maker, endorser (name of person from whom received when other than drawer), date drawn, and amount. Copies of collection vouchers or other documents that show the same data are acceptable as the record of instruments. If an item is lost in banking channels, the DO must be held pecuniary liable if the maker of the instrument cannot be identified in order to contact that person for a replacement. Therefore, keep photocopied, scanned, or prepared lists of instruments deposited in active files until receipt of the deposit is confirmed in CIR.

8.3.8. Lost Negotiable Instruments. When a negotiable instrument is lost, whether before or after deposit, the DO adjusts the affected accounts and immediately requests that the maker of the instrument stop payment and replace it with a new check or other form of payment. DOs must inform members of their legal obligation for the check and offer them another opportunity to replace the check. If the military member refuses, the DO may, as with any other debt, pursue involuntary collection action against the military member’s pay.

8.3.9. Disposition of Funds on Transfer or Reassignment Without Relief. A DO that is transferred or reassigned without being relieved by another DO deposits all funds prior to the transfer or reassignment occurring. This includes all funds held by deputies, agents, and/or cashiers, including imprest funds and change funds. Report each deposit made during the period including the final deposit.

8.4 Deposit Transactions

8.4.1. Distribution and Disposition. Send a copy of the deposit ticket to the depositary with the funds and/or negotiable instruments being deposited. The DO retains a copy to assure that all deposits are in fact confirmed. The DO follows up on unconfirmed deposits as required by paragraph 11.4. In instances where a deposit is not confirmed in the same month as mailed,

refer to Chapter 15, section 7.0. The supporting DFAS site may also require the DO to submit a copy in support of the reported deposit activity for that month.

8.4.2. Accounting for Deposits. After netting out all debit vouchers (except those used for EFT for the current business day), enter the total of all the deposits for the business day (including deposit tickets in OTCnet) on line 4.2A of the DD 2657. At the end of the accounting period (month), use a record of each deposit ticket (and debit voucher, including those for EFT) applicable to only the current accounting period to prepare the detailed deposit activity report to support the [SF 1219](#). The total of the detailed deposit activity report must agree with the total reported on line 4.2 on the face of the SF 1219 and with the total reported in Column 5, Section II, Part B, on the reverse of the SF 1219.

8.4.3. Debit Vouchers in Relation to Deposits

8.4.3.1. General. When a check is returned unpaid to the depository with which the check was originally deposited, the depository may process a debit voucher to charge the depositing DSSN. The depository may also prepare a debit voucher charging the depositing DSSN for a check lost after deposit. Debit vouchers may also be issued by depositories and by the Treasury to establish other valid charges against a DO's account, e.g., exchange fees and other collection charges assessed in connection with foreign instruments deposited. The DO immediately records all debit vouchers received on the DD 2657. Include the debit vouchers in the SF 1219 for the month in which received.

8.4.3.2. Action by the DO

8.4.3.2.1. Non-tactical Disbursing Activities. For debit vouchers received in connection with returned unpaid checks, see Chapter 4, section 4.0 for guidance on processing dishonored checks. For debit vouchers received in connection with checks lost after deposit, the DO follows subparagraph 8.3.8. Process new checks received pursuant to action taken by the DO as a new deposit. Process charges for handling foreign checks as prescribed in Chapter 13, paragraph 4.0.

8.4.3.2.2. Tactical Disbursing Activities. DOs must comply with debit vouchers received from a depository whenever any one of the following conditions exist: the deposit (which included the lost or dishonored check) was made during the incumbency of the current DO; the deposit (which included the lost or dishonored check) was made during the incumbency of a DO whose account is being subjected to the 90 day local retention period; or the maker or endorser of the lost or dishonored check is locally available for collection action. If none of the foregoing conditions apply, then the current DO forwards the debit voucher, by cover letter, to the activity designated to settle the former DO's account. Also, send either the original dishonored check as returned by the depository or, in the case of lost checks, a copy of the relevant abstract from the listing of instruments deposited. Include in the cover letter the most recent information concerning the present location and status of the maker or endorser of the check in question. Send a copy of the cover letter to the issuing depository.

8.4.3.3. Distribution. The DO sends a copy to support the monthly financial reports and retains a copy with their retained financial records.

8.4.3.4. Accounting. Account for debit vouchers as negative deposits. As noted in subparagraph 8.4.2, net all debit vouchers (except those used for EFT) in the current business day against all deposits for that business day, and record the total on line 4.2A of the DD 2657. Record EFT debit vouchers on line 4.2B. At the end of the accounting period (month), use the records of each debit voucher (including EFT debit vouchers) and each deposit ticket applicable to only the current accounting period to prepare the detailed deposit activity report to support Section II, Part B of the SF 1219. The total of the detailed deposit activity report must agree with the total reported on line 4.2 on the face of the SF 1219 and with the total reported in Column (5), Section II, Part B, on the reverse of the SF 1219.

9.0 INTERNATIONAL TREASURY SERVICES (ITS.GOV)

[ITS.gov](https://its.gov) is the Treasury's comprehensive international payment and collection system. It is the preferred payment method for foreign currency transactions. DOs are encouraged to use ITS.gov to the maximum extent possible wherever the infrastructure will support its use. Prior to using ITS.gov, a Memorandum of Understanding between the activity and the Fiscal Service is required. Activities interested in using ITS.gov should contact Fiscal Service. For ITS.gov contact information, see Fiscal Service's website. See Chapter 13 for guidance on foreign currency payments.

10.0 PAYMENT INFORMATION REPOSITORY (PIR)

10.1 Overview

PIR is a web-based, centralized repository of payment related data. PIR increases the transparency of government payments and provides agencies with the ability to view summary and/or detail payment information as well as data analysis. PIR has replaced CASHLINK II for payment voucher information. For more information, see Fiscal Service's [PIR web page](#). Agencies that use the online application within CARS for interagency billings and payments for goods and services will no longer receive a statement of difference report (formerly known as the Financial Management Service (FMS) Form 6652) and are no longer required to follow the guidance related to the FMS 6652.

10.2 Standard Reporting Format (SRF)

The SRF is an input file specification that defines data elements and business rules [required](#) for reporting payment and associated [TAS/BETC](#) information to PIR. When fully implemented, DoD agencies will [have](#) to use the SRF to submit detailed payment and accounting data to PIR. For more information on the format specification, see Fiscal Service's [SRF web page](#). Agencies must submit the PIR/SRF one day after the date of payment. Agencies that do not submit the SRF within one day following the date of payment by 6:00 p.m. (Eastern Time) will default in CARS to the default TAS/BETC for payment transactions. Date of payment is further defined as:

10.2.1. Check Payments. The issue date of the check (date inscribed on the check).

10.2.2. ACH Payments. The settlement of the ACH transaction found in the acknowledgement received from the FRB's ACH.

10.2.3. Wire and [ITS.gov](https://www.its.gov) Payments. The value date specified in the payment request.

*10.3 Reconciliation of EFT Transactions

10.3.1. Confirm PIR. EFT payment transactions are recorded using debit vouchers. DOs must reconcile their EFT payment data (e.g., EFT debit vouchers) with PIR. If the purpose of an EFT transaction cannot be determined at the point of origin (time of transaction), credit either F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for Intra-Governmental Payment and Collection (IPAC), as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 - 8.10.3 for additional information.

10.3.2. Discrepancy - Over or Understated Debit Vouchers

10.3.2.1. A difference occurs when a debit voucher amount is overstated or understated.

10.3.2.1.1. An overstated debit voucher exists when the amount entered exceeds the value of the check or EFT payments it covers.

10.3.2.1.2. An understated debit voucher exists when the amount entered is less than the value of the check or EFT payments it covers.

11.0 CIR

11.1 Overview

[CIR](#) is a web-based, centralized repository of detailed deposit and collection transaction data from all of the Treasury's collection systems and settlement mechanisms. CIR provides the ability for agencies to view summary and/or detail level data, extract and analyze data in various scenarios, and produce flexible, standardized reports based on agencies' needs. CIR has replaced CASHLINK II for deposit reconciliation.

11.2 Requirement

DOs must confirm deposits using CIR. For guidance on deposit reconciliation, see paragraphs 11.3 and 11.4.

11.3 Deposit Reconciliation – General

11.3.1. DOs or their designee(s) must reconcile DoD financial system data daily with CARS and maintain either a manual or a mechanized subsidiary record of all debit voucher differences. If the purpose of a deposit cannot be determined at the point of origin (time of transaction), credit either F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for Intra-Governmental Payment and Collection (IPAC), as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 - 8.10.3 for additional information.

11.3.2. CARS reporters must ensure that there are no existing uncleared statements of differences prior to becoming a “Full” CARS daily reporter. Agencies that use the online application within CARS for interagency billings and payments for goods and services will no longer receive a statement of difference report (formerly known as the Financial Management Service (FMS) Form 6652) and are no longer required to follow the guidance related to the FMS 6652. The Treasury compares the value of deposits and debit vouchers reported by DOs’ activity reports to the value of deposits and debit vouchers reported through CIR.

11.3.3. Consider all differences that have not been reconciled within 60 days of the transaction, and that have been validated as meeting the criteria of an actual physical loss of funds, as a loss or overage of funds with the associated pecuniary liability as prescribed in Chapter 6. Do not consider timing differences and/or reporting errors as a loss of funds, but the DFAS site must pursue aggressive action to clear the differences with appropriate offsetting transactions, via departmental level, Treasury, and/or agency within 60 days of the offsetting transaction.

11.3.4. DOs must strictly adhere to the preparation requirements for the deposit tickets and debit vouchers as described in paragraph 8.4. It is also imperative that DOs report promptly and properly all deposit tickets and debit vouchers.

11.3.5. Once deposit tickets are released to a depository, the documents cannot be recalled, corrected, or resubmitted. In addition, the Treasury prescribes specific instructions to all approved depositories regarding adjustments of errors discovered subsequent to the day of deposit. DOs must take aggressive action to reconcile and/or clear all differences as rapidly as possible after notification by the Treasury that a difference exists.

11.3.6. To maintain control, the DO or the DO’s designee(s) monitor deposit activity daily using CIR and maintain either a manual or mechanized subsidiary record of all deposit differences. The DO or the DO’s designee(s) review the record of differences at least weekly to ensure these differences are clear. Retain the evidentiary documentation supporting the review process for a retention period following the guidance in Chapter 15, paragraph 8.2. These records need not be certified. Also, each time there is a change of DOs, the incoming DO validates the unresolved differences. If the departing DO cannot provide the incumbent DO with documentation supporting the unresolved items, the departing DO processes the unsupported items as a loss or overage of funds (see Chapter 6, section 4.0).

11.4 Deposit Reconciliation – Discrepancies

11.4.1. Over or Understated Deposit Tickets

11.4.1.1. A difference occurs when a deposit ticket amount is overstated or understated.

11.4.1.1.1. An overstated deposit ticket exists when the amount entered exceeds the amount of cash or negotiable instruments submitted with it.

11.4.1.1.2. An understated deposit ticket exists when the amount entered is less than the amount of cash or negotiable instruments submitted with it.

11.4.1.2. Treasury regulations for depositories do not permit changing the amount on a deposit ticket or debit voucher. They require the depository to confirm a deposit as presented and immediately issue either a debit voucher for the amount of the overage or an additional deposit ticket for the amount of the shortage. In either situation, the DO should discover an overage of funds for an overstated deposit or a loss of funds for an understated deposit upon the first balancing after the deposit was presented or mailed to the depository and recorded on the DD 2657. Treasury regulations also require the depository to confirm a debit voucher as presented and immediately issue a deposit ticket for the amount of the overage or an additional debit voucher for the amount of the shortage. In either of these situations, the DO should discover an overage of funds for an overstated debit voucher or a loss of funds for an understated debit voucher upon the first balancing after the debit voucher was presented or mailed to the depository and recorded on the DD 2657.

11.4.1.3. Daily monitoring of deposit activity using CIR enables early detection of these differences. Upon receipt of a copy of an adjusting deposit ticket or debit voucher, the DO records the document on the DD 2657. If actions required by Chapter 6, section 8.0 occurred to record the overage or shortage of funds upon discovery, receipt of the adjusting deposit ticket or debit voucher from the depository enables a more rapid settlement of the discrepancy in the DO's accountability. If an overage or shortage of funds is discovered after receipt of the adjusting deposit ticket or debit voucher, and recording the document creates an overage or shortage, then the DO processes the overage or shortage as prescribed in Chapter 6, paragraph 8.2.

11.4.2. Deposits Not Reported by Depositories. Deposit tickets reported by DOs but not by the depository do not appear in CIR. Daily monitoring of CIR alerts the DO to possible deposit differences, when a deposit does not appear in the system after a reasonable period of time, based on whether the deposit was presented to the depository in person or by mail.

11.4.2.1. If the depository does not confirm the deposit within a reasonable period of time for deposits presented by mail, the DO initiates follow-up action with the depository to determine the status of the deposit. A reasonable period of time would be the normal mailing time from the date mailed to the depository until the date the deposit is confirmed, based on past

experience. Tactical DOs consider unit movement schedules and locations when the deposit was mailed. In any event, initiate follow-up action within 30 days from the date of mailing a deposit.

11.4.2.2. Include with a follow-up request to a depository, a copy of the applicable deposit ticket and a description or copies of the instruments included in the deposit. The depository provides confirmation information to the DO in response to the follow-up request. If the depository acknowledges receipt of the deposit but refuses to report the transaction to the Treasury, the DO provides written notification, with copies of all correspondence and documents involved, to DFAS-JJF/CO, which will then pursue resolution of the issue through the Treasury and provide the DO written instructions on additional actions to take.

11.4.2.3. If the follow-up action does not result in confirmation of the deposit or the depository notifies the DO that the deposit was never received, the DO will reverse the deposit transaction in the current month's business. The DO prepares and processes an Optional Form 1017-G, Journal Voucher (JV), to document the reversal. Record the JV on the DD 2657, line 4.2A as a negative deposit and on line 7.3 as a loss of funds and include it on the corresponding lines of the SF 1219 at the end of the month. Describe the deposit reversal in Section II, Part B, Column (3) of the SF 1219, and indicate the month and year the deposit was initially reported to the Treasury. Show the amount of the reversed deposit as negative or bracketed. Reverse the deposit in the current month's detailed deposit activity report, using the actual deposit number, month, and year of the deposit (as initially reported to the Treasury). Show the amount as negative or bracketed.

11.4.2.4. The actions in subparagraph 11.4.2.3 will remove the deposit from the detailed deposit activity report and record the deposit as a loss of funds. Attach a copy of the follow-up memorandum to the depository, and the depository's response, as supporting documents to the JV. Report and process the resulting loss of funds as prescribed in Chapter 6, section 3.0. If there were negotiable instruments in the lost deposit, follow subparagraph 8.3.8 for those instruments.

11.4.3 Debit Vouchers Not Reported by DOs

11.4.3.1. Debit vouchers are generally prepared only by depositories as adjustments to erroneous amounts on deposit tickets and debit vouchers to return dishonored negotiable instruments, or to adjust deposit tickets for counterfeit currency. All debit vouchers prepared by depositories are reported automatically to the Treasury. Unless the DSSN appearing on the debit voucher is not the DSSN of the DO receiving the document, the DO records the debit voucher upon receipt and includes it in the detailed deposit activity report. This requirement applies regardless of whether the debit voucher is deemed erroneous, or the reason given for the charge needs further clarification.

11.4.3.2. Daily monitoring of CIR alerts the DO that a depository has issued a debit voucher. The DO must confirm the information in CIR and include the debit voucher on DD 2657 and detailed deposit activity report during the month of receipt. The DO reports the debit voucher using the month and year of issue (as reported by the depository in CIR), not the

current month and year in which the debit voucher is being recorded and reported. Section II, Part B, Column (3) of the SF 1219 must indicate the actual month and year of the debit voucher as reported by the depository. [Also include the](#) debit voucher in the detailed deposit activity report and using the actual month and year the debit voucher was issued (as reported by the depository).

11.4.3.3. In some instances, debit vouchers for electronic payments through the Federal Reserve System are prepared by the paying DO and submitted to the depository with the payment file. Include these debit vouchers on the DD 2657, SF 1219, and detailed deposit activity report for the month of payment. Failure to include a debit voucher electronic payment transaction on the DD 2657, SF 1219, or the detailed deposit activity report will create an out-of-balance condition on the DD 2657 and SF 1219, unless the DO also failed to record the disbursement. For example, if a DO processes and includes a disbursement voucher on DD 2657 and SF 1219, prepares and submits a debit voucher to the depository with the electronic payment file, but does not include the debit voucher on the DD 2657, SF 1219, and detailed deposit activity report, then the DD 2657 and SF 1219 will not balance. Proper balancing procedures preclude this situation.

11.4.3.4. If the transaction occurred near the end of the month, and the DO cannot process and report the transaction in the transaction month, then a deposit difference will occur. To correct this difference, the DO must obtain the transaction documentation and process both the payment and the debit voucher on the DD 2657, SF 1219, and detailed deposit activity report during the current month. The DO must ensure the reporting of debit vouchers using the [actual](#) month and year [of](#) the payment (as reported by the depository in CIR), not the month and year in which the debit voucher is being reported. Include the debit voucher in the detailed deposit activity report and report it using the actual month and year the debit voucher was reported by the depository.

11.4.4. Debit Voucher Not Reported by Depositories. Debit vouchers reported by the DO but not by the depository will cause a difference to the depositories. The most frequent cause of this difference occurs when a depository receives a debit voucher and payment file for payment by EFT, but rather than processing and reporting the debit voucher given by the DO, prepares a new debit voucher and reports it to the Treasury. The depository provides the DO with the copies of the debit voucher it prepared and reported.

11.4.4.1. Daily monitoring of CIR alerts the DO that the depository has issued a new debit voucher. DOs using depositories that routinely process debit vouchers in this manner should contact the depository in writing. The DO should request an explanation for the actions and that the depository processes the debit vouchers given by the DO with the payment files. If the depository refuses to process the debit vouchers given by the DO, the DO must then provide written notification with copies of all correspondence and documents to DFAS-JJF/CO, which will pursue resolution of the issue through the Treasury and provide the DO written instructions on any additional actions to [take](#).

11.4.4.2. To prevent this type of difference from occurring, the DO reports the debit voucher transaction on the detailed deposit activity report as reported by the depository. If the DO receives the copy of the debit voucher prepared by the depository before the end of the month in which the transaction occurred, [the DO will report](#) the debit voucher prepared by the

depository [only](#). The DO keeps the copy of the [prepared](#) debit voucher [along](#) with the copy of the debit voucher the depository prepared. If the depository routinely continues to prepare new debit vouchers, include these with the written notification.

11.4.4.3. To clear this type of difference, the DO must reverse the DO's debit voucher transaction from the current month's detailed deposit activity report and reenter the debit voucher transaction the depository reported, using the actual debit voucher number, month, and year as initially reported to the Treasury. Enter the debit voucher prepared and reported by the depository exactly as reported by the depository. Also, describe the debit voucher reversal in Section II, Part B, Column (3) of the SF 1219, and indicate the month and year the debit voucher was initially reported to the Treasury. Also, describe the debit voucher prepared and reported by the depository in Section II, Part B, Column (3) of the SF 1219, and indicate the month and year the debit voucher was reported by the depository. Since these actions net to a zero, they should not impact the DO's pecuniary liability.

*12.0 CLOSED/CANCELLED ACCOUNTS

[On September 30 of the fifth FY after the period of availability for an obligation of a fixed appropriation account ends, the account must be closed and any remaining balance \(whether obligated or unobligated\) in the account must be cancelled and thereafter is not available for obligation or expenditure for any purpose, unless exempt by a provision of an appropriation law. Collections authorized or required to be credited to an appropriation account, but not received before closing of the account, must be deposited in the Treasury as miscellaneous receipts in accordance with \[31 U.S.C. § 1552\\(a\\)\]\(#\). All cancelling year transactions, e.g., transactions to be paid from an appropriation that is cancelling at the end of the current FY, must be submitted to DFAS no later than September 15 each year \(or the business day prior when September 15 occurs on a weekend\).](#)

CHAPTER 12

QUESTIONABLE AND FRAUDULENT CLAIMS

1.0 GENERAL

1.1 Overview

This chapter establishes policy for processing questionable and fraudulent claims presented for certification or payment that a Certifying Officer (CO) or Disbursing Officer (DO) believes to be illegal or improper. Determination of potentially fraudulent claims is the responsibility of the CO and/or DO. The CO and/or DO must research claims and base their determinations on the criteria in this chapter and the legal opinions of the supporting Staff Judge Advocates (SJA) or other legal counsel. A fraudulent claim is any intentional deception designed to unlawfully deprive the United States of something of value or to secure from the United States a benefit, privilege, allowance, or consideration to which a claimant is not entitled. This chapter also discusses a CO's, DO's, and/or head of an agency's right to request an advance decision from the appropriate authority.

1.2 Purpose

This chapter addresses the determinations of fraud, advance decisions on the propriety of any prospective payment from an authorized official, and actions required when a suspected fraudulent claim is presented for payment or upon discovery that a fraudulent claim has been paid.

1.3 Authoritative Guidance

1.3.1. Under Title 31, United States Code ([U.S.C.](#)), section 3529 ([31 U.S.C. § 3529](#)), a CO, DO, or head of an agency may request an advance decision on the propriety of any prospective payment from an authorized official (see Table 12-1). This authority does not cover the rendering of legal decisions pertaining to payments already made or for hypothetical cases.

1.3.2. See [31 U.S.C. § 3702](#) for the authority on settling claims against the United States.

2.0 DETERMINATIONS OF FRAUD

2.1 Discrepancies

Inaccuracy on a claim is not proof of intent to defraud the government. When minor discrepancies exist because of clerical or computation errors, misunderstanding of procedure, or failure to properly document, the intent to deceive is less likely, thus decreasing the probability of a finding of fraud without evidence. The claimant's supervisor should discuss these errors with the claimant and require that the claimant correct them.

2.2 Claims

A claimant must complete a claim accurately to ensure proper payment. A claim may be unauthorized for payment, but not considered fraudulent. This may occur if a claim is prohibited by law, or is otherwise not authorized, and lacks willful intent by the claimant. A CO or DO may refer these claims to the appropriate authority for an advance decision (see Table 12-1). Additionally, a claim is not necessarily fraudulent if it is not prepared according to the requirements of regulations (e.g., the [*Joint Travel Regulations*](#), Uniformed Service Members and DoD Civilian Employees). It may be due to claimant error, misinformation, or lack of knowledge.

3.0 ADVANCE DECISIONS

3.1 Application for Decision

The submitter of an application states the facts and evidence to support the reason(s) for the request and upon which to base the decision. An application must generally include a specific claim or voucher. Applications are sent through the Office of General Counsel (OGC) of the DoD Component or the Defense Finance and Accounting Service (DFAS) to the DoD Deputy General Counsel (Fiscal) (DoD DGC(F)) for determination. The affected Component or DFAS OGC must attach a legal memorandum that discusses the legality of the proposed payment under the circumstances. The responsible activity, DFAS site, or appropriate OGC may return cases involving entitlement questions that have been clearly decided authoritatively, with a determination that no advance decision is necessary. A submitter may resubmit such a determination through the responsible activity for reconsideration.

3.2 Decisions Rendered

An advance decision is conclusive for the specific payment involved on the question presented. Although an advance decision is conclusive for the specific payment reviewed, COs should use the principles cited in the decision when making future entitlement decisions.

4.0 FALSE, FICTITIOUS, OR FRAUDULENT CLAIMS

4.1 Fraudulent Claim Presented for Payment

If there is reason to suspect that a claim presented for certification or payment contains fraudulent information, the CO must request their commander or comparable authorized civilian to initiate an investigation into the suspected fraud. A DO that suspects that a certified voucher is fraudulent must return it to the CO. The requirement to request an investigation applies regardless of the dollar value. Once the investigation and legal review by the supporting SJA or other legal counsel are complete, the investigating officer (IO) gives a copy of the completed report of investigation (ROI) to the CO and DO. See Chapter 6, subparagraph 4.3.2.2.5 for ROI guidance.

4.1.1. If the ROI does not support a finding of fraud, the CO may certify the voucher for payment of all amounts to which the claimant is entitled. The CO documents the reasons for the determination and maintains documentation for the CO's records.

4.1.2. If the ROI confirms that some items of the claim are fraudulent, the claimant may submit a new claim for the items that the ROI identified as not fraudulent to the CO. A claimant who protests the determination of fraud and insists on payment of the entire claim may submit a new claim for the items denied because of fraud. The CO processes the reclamation for the items disallowed as prescribed in paragraph 4.3.

4.2 Fraudulent Claim Paid

A CO or DO who suspects that a claim was paid based on fraudulent information or documents, must review the retained copy of the claim to determine if it contains false information.

4.2.1. A CO or DO who suspects that a paid claim is fraudulent must inform his or her commander or comparable authorized civilian, who then initiates an investigation of the suspected fraud regardless of the dollar value involved. See Chapter 6, subparagraph 4.3.2.2.5 for ROI guidance. Following the investigation, the supporting SJA or OGC reviews the investigation for legal sufficiency. The IO then gives the CO and DO each a copy of the final ROI.

4.2.2. Upon learning of an improper payment based on suspected fraud, the CO or DO sends an ROI to the supporting DFAS site through their commander or comparable authorized civilian equivalent. Include in the ROI a basic statement of the irregularity, the date, amount, and identification of the individual(s) involved. Upon completion of the final recovery, investigative, or other negative action, the CO or DO advises the supporting DFAS site.

4.2.3. If the CO determines that some or all of the items of a paid claim are fraudulent, the CO may not certify any of the items for repayment. The CO or DO includes in the report:

4.2.3.1. The applicable contract or travel order number,

4.2.3.2. The voucher number,

4.2.3.3. The date of payment,

4.2.3.4. The appropriation charged,

4.2.3.5. A description of the supporting documentation,

4.2.3.6. A description of how the fraud was committed,

4.2.3.7. A description of procedural deficiencies in the disbursing office,

4.2.3.8. The action taken to correct the deficiencies, and

4.2.3.9. The amounts recovered or scheduled for repayment from the recipient of the fraudulent payment.

4.2.4. Losses resulting from fraudulent acts are improper payments (except losses within the disbursing office). The DO leaves them charged to the appropriations cited on the payment vouchers (see Chapter 6, subparagraph 5.1.1.2). Any losses, regardless of the dollar amount, where there is evidence of fraud within the disbursing office (for example, embezzlement or fraudulent acts by disbursing personnel) are physical losses (see Chapter 6, subparagraph 2.1.3).

4.3 Reclamation of Items Disallowed or Recovered Due to Fraud

4.3.1. The CO sends reclamations for items disallowed or recouped due to fraud through the appropriate office in his/her chain of command to the DoD DGC(F) (see Table 12-1). For a claim denied in its entirety, submit the original claim. Send the completed claim with a cover letter or memorandum from the CO stating why the claim is fraudulent, with the statement: "I have not certified and will not certify this claim for payment unless authorized by competent authority." Include the original and two copies of all supporting documents and the orders with all endorsements for a travel claim, and a copy of the paid voucher for the items free of fraud.

4.3.2. A CO may not certify a reclamation claim for any or all of an amount recovered by the government due to an illegal or improper payment of any voucher item obtained by fraud or misrepresentation processed under paragraph 4.3.

4.3.2.1. Civilian Employees. The CO or DO must send paid fraudulent claims to the appropriate pay office and local OGC or SJA for referral to the Defense Criminal Investigative Service or military criminal investigative organization. Recover payments based on substantiated claims of fraud by direct repayment from the employee through salary offset or by other procedures in Volume 16, Chapter 2, paragraph 3.1. The CO or DO may take no further action on the paid fraudulent claim until OGC or SJA gives the CO or DO specific processing and disposition instructions.

4.3.2.2. Military Members. Under [37 U.S.C. § 1007\(c\)](#) and the guidance in this chapter, the CO or DO collects debts owed by military members. When a debtor requests reconsideration of a fraud determination, the creditor organization submits evidence or statements from the debtor to the local SJA to review.

CHAPTER 13**FOREIGN DISBURSING OPERATIONS****1.0 GENERAL****1.1 Overview**

1.1.1. In areas where the use of U.S. currency is prohibited or where diplomatic or financial considerations make its use inadvisable, the senior commander consults with other U.S. military commanders and the U.S. Department of State (DoS) representatives in the area to determine the local government's foreign currency control regulations. The commander issues instructions that conform to DoS procedures and local government foreign currency control regulations. Disbursing Officers (DOs) must follow disbursing guidance set forth in Chapter 9, section 2.0 concerning voucher certification and substantiation prior to executing payment transactions, including advances, equitable claims, and payments to third parties.

1.1.2. The same policies governing domestic disbursements also are applicable to foreign currency disbursements. Except in areas where U.S. diplomatic or financial relations make the use of the U.S. dollar (USD) inadvisable, U.S. currency or Treasury checks are the only media of exchange for:

1.1.2.1. Basic salaries, special and incentive pay, and allowances (e.g., subsistence and housing) in USDs for U.S. military personnel stationed overseas;

1.1.2.2. Salaries and differentials to similarly situated U.S. citizen civilian personnel in fulfillment of U.S. contractual or statutory obligations in USDs;

1.1.2.3. Per diem;

1.1.2.4. Travel expenses; and

1.1.2.5. Purchases from appropriated and nonappropriated fund activities located in the foreign currency area.

1.1.3. A disbursement voucher may constitute a payment voucher and a collection voucher for transactions involving setoff or deduction to recover an amount owed by the payee, with a net amount due disbursed to the payee. All disbursements must be supported by formal disbursement vouchers (see Chapter 9, section 4.0). Requirements established in Volume 1, Chapter 9, Financial Records Retention, apply to contingency operations.

1.1.4. [International Treasury Services](#) (ITS.gov) is the preferred method to issue foreign currency payments electronically and to issue international USD wire transfer payments. ITS.gov is the comprehensive international payment and collection system for the U.S. Department of Treasury (Treasury).

1.2 Purpose

This chapter addresses disbursing policy that includes exchange of USDs for foreign currency, foreign exchange transactions, currency rate of exchange, use of foreign currency for transportation, disposition of foreign currency and negotiable instruments, records and reports, and contingency operations in foreign territories.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3302 ([31 U.S.C. § 3302](#)) authorizes DOs to have custody of public funds for disbursement purposes and requires them to safeguard the funds. This chapter addresses disbursing policy in the context of foreign disbursing and cash management operations prescribed in the Treasury Financial Manual (TFM), Volume 1, Part 2, Chapter 3200 ([1 TFM 2-3200](#)) and [1 TFM 5-6000](#).

2.0 EXCHANGE OF U.S. DOLLARS FOR FOREIGN CURRENCY

2.1 Guidelines

When it is not practical to use ITS.gov or if the DO does not have a limited depository account (LDA) in the currency to be paid, the DO may need to acquire foreign currency. An appointed DO may obtain foreign currency for official purposes such as making payments to U.S. Government creditors and exchanging foreign currency or other negotiable instruments for which the DO is accountable. Foreign currency obtained may be held as currency or in an LDA (see Chapter 14, section 1.0). DOs may obtain foreign currency using sources identified in paragraph 2.2 and from sources authorized by the government of the country concerned. The process by which one currency is exchanged for another is foreign exchange. When DOs exchange USDs for foreign currency, the following guidelines apply to exchanges:

2.1.1. The “spot rate” is the rate of exchange to purchase foreign currency (normally the purchase of foreign currency for delivery within two business days);

2.1.2. Exchange at the time the foreign currency is needed for immediate funding requirements. DOs should ensure that payment is made for foreign currency purchases on the value date;

2.1.3. Speculation in foreign currency is prohibited;

2.1.4. Any change in program costs resulting from the use of foreign currency in international financial arrangements is the responsibility of the involved U.S. or foreign program agencies;

2.1.5. Foreign currency may not be purchased by forward contracts directly from foreign governments, private firms, or individuals at a negotiated rate without prior Treasury authorization. Submit such requests for authorization through the Defense Finance and Accounting Service (DFAS), Disbursing Policy (DFAS-ZPTA), 8899 East 56th Street, Indianapolis, IN 46249-0500 (dfas-in.disbursingpolicy@mail.mil);

2.1.6. Limit DO foreign currency holdings in a safe, vault, or an LDA to no more than seven business days requirement, unless an increase has been authorized by the Treasury (see Chapter 14, subparagraph 3.10.2.2). This includes foreign currency held by all authorized deputies, agents, and cashiers within the disbursing office and at remote locations. Limiting foreign currency holdings may minimize deficiencies due to rate devaluations and avoid premature drawdown from the Treasury;

2.1.7. Acquire foreign coins only to fill specific needs or when received as a change incident to an official cash payment in foreign funds. Coins present problems due to weight, storage, transportation, and disposition; and

2.1.8. Prepare foreign currency reports following section 7.0.

2.2 U.S. Government Sources

Procurement of foreign currency from U.S. Government or commercial sources requires a certificate or statement showing the amount purchased, the rate of exchange, the amount of USDs paid, the date, and the source/seller. Include the certificate or statement with the monthly financial reports. DOs may use ITS.gov to acquire foreign currency via electronic funds transfer. Each exchange voucher must be submitted in support of the accounts of the disbursing office and attached to monthly Standard Form (SF) 1219, Statement of Accountability. A DO may also obtain foreign currency from the following sources:

2.2.1. U.S. Government Sources. Other U.S. Government sources include DoD DOs, U.S. DOs (USDOS), cashiers at American Embassies, or the Federal Reserve Bank of New York (FRBNY). Normally, the DO draws a U.S. Treasury exchange-for-cash check (see Chapter 3, subparagraph 2.5.1.1) and endorses it to the order of the officer furnishing the foreign exchange. When foreign currency is purchased from a USDO or an American Embassy cashier, the check may be issued to the American Embassy. When foreign currency is purchased from the FRBNY, the DO makes appropriate shipping arrangements; and

2.2.2. DoD Military Banking Facility (MBF). When possible, DOs can purchase foreign currency from a MBF (includes funds for LDAs) using a U.S. Treasury exchange-for-cash check (see Chapter 3, subparagraph 2.5.1.1).

2.3 Currency Custody Accounts

Absent ready-access to the Federal Reserve System, the DO can request approval from the Treasury to establish currency custody LDAs with the government's contractor-operated MBF.

The DO must settle daily with the MBF. The currency custody LDA assures the availability of U.S. currency to support the dollar economy created by U.S. Armed Forces stationed overseas. Report the balance held in custody accounts on the Custody or Contingency Cash of the DoD [DD Form 2657](#), Daily Statement of Accountability, reflected in the DO Cash Treasury Account Symbol (TAS), and the SF 1219.

2.4 Purchase From Individuals and Collections From Foreign Vendors

Subject to the provisions outlined in subparagraph 3.3.4, DOs may purchase foreign currency from individuals. DOs may also receive foreign currency either as refunds from foreign vendors or in payment for sale of excess foreign property in accordance with the DoD Manual ([DoDM](#), [4160.21-VI](#)). Foreign currency sales receipts from post offices, exchanges, commissaries, and other nonappropriated fund activities are not collections by the disbursing office, but may be acquired by purchase only to the extent necessary to acquire foreign exchange for the LDA.

3.0 FOREIGN EXCHANGE TRANSACTIONS

3.1 International and Foreign Exchange

International and foreign exchange includes policy on the use of U.S. Government funds in international programs and on foreign exchange and interest costs to the Treasury. These include transactions with foreign countries and international organizations involved with bilateral or multilateral programs (e.g., procurement, research, co-development, co-production, grants, or other transactions) that require the:

3.1.1. Outlay of USDs or foreign currencies;

3.1.2. Inflow of funds from foreign countries; and/or

3.1.3. Exchange of USDs and foreign currencies.

3.2 Policies for Financial Transactions

3.2.1. In addition to the foreign exchange guidelines provided in paragraph 2.1, the following general policies apply to financial transactions.

3.2.1.1. Withdraw dollars from the Treasury on behalf of any program management organization only as needed. Base withdrawal on the recipient organization's funding requirements to carry out the project.

3.2.1.2. Negotiate to provide for dollar outlays as close as possible to their need for current program expenditure to support international programs requiring U.S. funding.

3.2.1.3. Obtain the U.S. Government share of funding required to support a program by appropriation, with no part of this funding derived from interest earned on U.S. contributions. DoD Components are responsible to ensure that any interest earned is deposited promptly to the Treasury General Fund Receipt Account 3220 (General Fund Proprietary Receipts, Not Otherwise Classified, All Other).

3.2.1.4. Consider the fiscal needs and funding policy issues or concerns of each participating country or international organization, provided that U.S. Government cash management policies are not compromised.

3.2.1.5. Arrange to accommodate the financial policies of each participating country or organization to the maximum extent feasible. Except for arrangements entered into for the sole purpose of implementing U.S. international monetary policy, retain USDs in the Treasury until actually required for immediate disbursement, to minimize interest cost on the public debt.

3.2.1.6. Act on requests from a foreign country or international organization for the temporary deposit and safekeeping of USDs in trust in a Treasury account based on their own merit. Base the decision on the reason for the request, the specific financial arrangements proposed, and the relevant U.S. Government political and general financial considerations. All requests must include a recommendation from the local commander and be submitted to the DFAS-ZPTA/IN (dfas-in.disbursingpolicy@mail.mil).

3.2.1.7. DoD Components may not invest funds on behalf of a foreign country or international organization when receipt of such funds serves as a basis for creating contract obligation authority for the DoD Component or other U.S. Government department or agency.

3.2.1.8. Ensure that application of these general policies in negotiations with foreign countries and international organizations are not compromised by DoD Component administrative practices.

3.2.1.9. Process requests for exceptions in accordance with Chapter 1, paragraph 1.3.

3.2.2. Specific Policies. See Volume 12, Chapter 9 for financial policies related to international agreements.

3.3 Accommodation Exchange Services

3.3.1. Definition. Accommodation exchange services are the exchange of U.S. Treasury checks or other USD instruments for USDs (e.g., check cashing), the exchange of USDs or dollar instruments for foreign currency or, where permitted, the exchange of foreign currency for USD instruments. See Chapter 4, sections 2.0 and 3.0 for accommodation exchange services to include limitation, personnel eligibility, and the required internal controls for exchanging cash for negotiable instruments.

3.3.2. Authorization

3.3.2.1. Commanders may approve and implement accommodation exchange services only after determining that:

3.3.2.1.1. Contract MBFs, other on-base financial institutions, exchanges, commissaries, or U.S. Postal facilities cannot fulfill the needs of DoD personnel;

3.3.2.1.2. The DO or agent has an immediate need for the foreign currency repurchased; or

3.3.2.1.3. Resources are available to provide these services without impacting levels of other financial services (e.g., primary disbursing and related functions).

3.3.2.2. When satisfactory local banking facilities are not available to conduct accommodation transactions; and after the establishment of written check cashing policy approved by the commander, DOs may use official funds to:

3.3.2.2.1. Disburse foreign currency for checks, drafts, bills of exchange, and other instruments payable in USDs; and

3.3.2.2.2. Cash foreign currency checks drawn by accountable officers of the U.S. on non-symbol checking accounts for the same currency in which drawn, when the currency is needed by the officer for official purposes.

3.3.3. Sale of Foreign Currency to Individuals. MBFs normally make accommodation exchanges of foreign currency at installations served under the DoD MBF contract. In countries served by these MBFs, DOs providing accommodation exchange services obtain needed foreign currency from the MBF and make those exchanges at the accommodation rate. DoD personnel may not receive accommodation exchange service from USDOs or Treasury DOs in areas where those services are provided by DoD DOs. DoD personnel assigned or attached to U.S. embassy duty may use available embassy cashier services. DOs, agents, and cashiers making these accommodation exchanges maintain the [DD Form 2664](#), Currency Exchange Record, Record of Individual Exchange Transactions, daily to ensure implementation of the requirements in section 7.0.

3.3.4. Purchase of Foreign Currency From Individuals. By policy, DOs are prohibited from purchasing foreign currency from individuals in areas served by MBFs under DoD contract. In areas not served by contract MBFs, DOs may purchase foreign currency or instruments payable in foreign currency in exchange for USDs or dollar instruments before their departure on home leave or completion of their foreign assignment. When purchasing foreign currency or instruments payable in foreign currency for USDs or dollar instruments, DOs must comply with the following:

3.3.4.1. If the amount of foreign currency presented does not exceed the sum of the individual's salary and allowances for two biweekly pay periods, it may be purchased without requiring documentation of any kind from the departing individual;

3.3.4.2. If the amount of foreign currency presented exceeds the amount authorized in subparagraph 3.3.4.1, the requestor must submit a written application to the commander for approval of the purchase. The application must include a statement describing the source of the currency and a statement affirming that none of the currency was acquired in violation of local regulations or exchange control laws of the country concerned; and

3.3.4.3. The purchase of the foreign currency with USDs must consider the DO's immediate foreign currency disbursing requirements (see section 2.0). A DO may suspend making accommodation exchanges for such time and to such extent necessary to carry out [their](#) other responsibilities;

3.3.4.4. Purchase the foreign currency at the prevailing market rate; and

3.3.4.5. Keep a DD 2664 daily to reflect the amount and source of purchased funds.

3.3.5. Safe Haven Posts. The appropriate commander establishes foreign currency accommodation exchange services for dependents of DoD personnel at safe haven areas to which they were ordered by competent authority in the event of emergency evacuation. These services must be consistent with the amount of exchanges authorized for dependents of U.S. personnel employed by other U.S. Government agencies.

4.0 CURRENCY RATE OF EXCHANGE

4.1 Prevailing Rate of Exchange

4.1.1. Definition. The prevailing rate of exchange is the most favorable rate legally available to the U.S. Government for acquisition of foreign currency for official disbursement and accommodation exchange transactions. If the currency of any one country is obtained from more than one of the sources provided in paragraph 2.2, maintain separate accountability for exchange rate adjustments.

4.1.2. Rate of Exchange. Unless otherwise authorized by the Treasury, carry all foreign currency, including amounts held in LDAs, at the prevailing rate of exchange. Foreign currency acquired without purchase includes burdensharing contributions made in host nation currency and held in accounts authorized by [10 U.S.C. § 2350j](#). Compute disbursements for official expenditures or accommodation exchange transactions to avoid gains or deficiencies due to fluctuations in rates of exchange to the extent possible. If there is no rate of exchange established by agreement between the U.S. Government and the foreign country or where no MBF is available, conduct foreign currency transactions at the prevailing rate using the rate of exchange of the currency on hand as determined by the method outlined in paragraph 4.2.

4.1.3. Non-Government Sources. When purchasing from sources other than the U.S. Government, DOs should acquire foreign exchange at the best rate available (e.g., fixed or non-fixed legal rate) in which the exchange is being expended. Follow DoS regulations or the currency control laws of the country where the currency will be used. Draw Treasury checks to

obtain foreign exchange from commercial sources in favor of the DO and endorse them to the order of the banking institution or commercial enterprise providing the funds.

4.1.3.1. Fixed Legal Rate. The best fixed legal rate to the U.S. Government, depending upon the circumstances in each country, may be any officially established buying rate for dollars, including diplomatic rates or special rates established by agreement with the authorities of the country. When this type of fixed legal rate prevails, agencies should purchase foreign exchange at the best applicable rates to the particular transaction. They may affect purchases at fixed legal rates without the formality of obtaining bids, but the purchases should be evidenced by a statement over the signature of the seller setting forth the pertinent data relative to the purchase. This data includes the date, amount of purchase, and exchange rate. The DO should retain the statement as a supporting document with the SF 1219 (see Chapter 15, section 8.0).

4.1.3.2. Non-Fixed Legal Rate. When rates legally applicable to the particular transaction are not fixed, or when such rates are fixed but the use of other rates is also legal for the particular transactions, DOs should purchase foreign exchange at the best obtainable rate. When foreign exchange can be purchased at a non-fixed legal rate, DOs should solicit bids from not less than three sources if available.

4.1.3.2.1. When a DO obtains foreign currency from a commercial source in a country where the rate of exchange is not established by agreement between the U.S. and the foreign country, use DD Form 2668, Request for Bid (Purchase/Sale), in duplicate to obtain written bids from at least three legally authorized sources, when available.

4.1.3.2.2. When practical, solicit bids from sources outside the country of the currency involved. Accept the bid providing the most beneficial exchange rate to the U.S. Government. The DO includes a copy of the certified and accepted bid as a supporting document with the financial reports and keeps a copy of it to substantiate the place of purchase if some of the currency is eventually sold through commercial channels. The DO should retain documentation stating the most beneficial bid, accepted and certified, with the SF 1219.

4.2 Recomputed Rate of Exchange

The DO will need to recompute the operating rate of exchange if the rate of exchange of the newly acquired foreign currency differs from that of the DO's current balance. The DO then disburses from their account using the recomputed rate of exchange.

4.2.1. Determining the New Rate of Exchange. Determine the new rate of exchange by adding the USD equivalent (USDE) value of the foreign currency on hand before the new acquisition to the USDE value of the additional foreign currency purchased and divide the total into the new total of foreign currency units on hand; round the result to five decimal places. Do not adjust the rate until new foreign currency units are acquired.

4.2.2. Certificate of Change. The DO, or Deputy DO (DDO), prepares a certificate of change similar to the example in Figure 13-1, and submits the certificate with the next SF 1219. When possible, determine the value of foreign currency on hand (including LDAs) at the beginning of the business day. If recomputation of the rate of exchange for foreign currency on hand is required during a business day, enter the voucher number of the last disbursement or collection voucher processed under the old rate of exchange on the certificate of revaluation. If there were no vouchers processed during the current business day, so state.

4.2.3. Adjustments Due to Rounding. Due to the rounding on individual disbursements and collection transactions, a difference in the USD value of foreign currency on hand may occur and cause a minor gain or deficiency. The balance of foreign currency divided by the current rate of exchange (carried to five decimal places) equals the exact USD value of foreign currency on hand. To account for minor gains or deficiencies, the DO adjusts the USD value of foreign currency on hand as part of the daily balancing process. For example, the following reflects transactions occurring on January 3, 20XX:

<u>FOREIGN UNITS</u>	<u>USD VALUE</u>	<u>RATE OF EXCHANGE</u>
107,275,503 (Balance)	\$ 854,512.60	125.53999
<u>751,883,562</u> (Purchased)	<u>6,000,000.00</u>	125.31393
859,159,065 (Balance)	\$6,854,512.60	125.34211
- <u>9,396,641</u> (Disbursed)	<u>74,967.95</u>	125.34211
849,762,424	\$6,779,544.65	125.34211

Actual USD Value: 849,762,424 (# of foreign units) divided by the recomputed rate of exchange (125.34211) = \$6,779,544.59. The results indicate a minor deficiency of \$.06 (\$6,779,544.65 less \$6,779,544.59) due to rounding of individual vouchers.

4.2.4. New Rate of Exchange. When computing a new rate of exchange to purchase additional foreign currency, the number of foreign units divided by the rate of exchange may not always accurately reflect the USD value. The rate of exchange for newly acquired foreign currency often differs from that of the balance on hand before the purchase.

4.2.4.1. Gains and Deficiencies Due to Rounding. Credit gains or charge deficiencies due to rounding to account 6763 (Gains and Deficiencies on Exchange Transactions) using [DD Form 1131](#), Cash Collection Voucher, or [SF 1034](#), Public Voucher for Purchases and Services Other Than Personal, as appropriate. Attach a Certificate of Adjustment as prescribed in subparagraph 4.2.4.2, to the voucher to support the transaction.

4.2.4.2. Certificate of Adjustment. The DO or DDO prepares and signs a Certificate of Adjustment Due to Rounding (see Figure 13-2) when a minor gain or deficiency results.

4.2.5. Foreign Currency Revaluation. Any change in the prevailing rate of exchange causes a gain or deficiency by revaluation since there is a change in the USD value of the foreign currency, except when using the method outlined in subparagraph 4.2.4.1. Whenever possible, revalue the foreign currency on hand (including LDAs) at the beginning of the business day on

which a rate change occurs. Determine the new USD value by dividing the total foreign currency on hand (including LDAs) by the new exchange rate, and whether a gain or deficiency by revaluation has occurred by comparing the USD value at the old rate to the USD value at the new rate. Because DOs carry foreign currency held in the disbursing account at the USD value, adjust that value by the amount of the gain or deficiency (loss) by recording the gain or deficiency by revaluation as a collection or disbursement transaction in the DO's account.

4.2.6. Gains and Deficiencies by Revaluation. Gains and deficiencies may occur due to rounding or revaluation. Except when using the method outlined in subparagraph 4.2.4.1, credit foreign currency gains utilizing a DD 1131 and charge foreign currency deficiencies utilizing a SF 1034. Gains and deficiencies are reported through Classification Transactions and Accountability citing an increase or decrease to account 6763, and the DO Cash TAS along with the proper Business Event Type Codes. Calculate gain/deficiency values for each currency individually by DO/DDO/agent/cashier to keep personal accountability accurate. DOs may consolidate the "net" change for all currencies on a single DD 1131 or SF 1034, as appropriate.

4.2.7. Balance-of-Payments. Code all credits and charges to account 6763 as USD transactions. Use account 6763 only for gains and deficiencies due to foreign currency revaluations. Account 6763 is not related to and has no relationship with the Foreign Currency Fluctuations, Defense (FCFD) or the Foreign Currency Fluctuations, Construction, Defense (FCFCD) accounts used for differences between budgeted foreign currency rates at which obligations are recorded and the rates at which they are liquidated. Reflect the FCFD and FCFCD portions of foreign currency disbursements separately on disbursement vouchers as charges to the appropriate foreign currency centrally-managed allotment account set up for that purpose.

4.2.8. Gains or Deficiencies on Security Deposits Due to Foreign Currency Fluctuation

4.2.8.1. Policy

4.2.8.1.1. Service members stationed in overseas areas are authorized advanced overseas housing allowance for security deposits to obtain leased housing. As authorized by the [Defense Travel Management Office](#), the supporting DO pays the necessary amount in the appropriate local currency and charges the appropriate military pay appropriation for the USDE. The preferred method for paying advanced housing allowance is a LDA check in the local currency of the area involved.

4.2.8.1.2. For disbursing offices that do not maintain an LDA in the required currency, the member presents a copy of the lease agreement containing the amount of foreign currency needed to initiate the lease contract. The disbursing office contacts the local MBF to determine the foreign currency exchange rate on the date the advance is to be paid and computes the USD amount. The appropriate military pay entitlement office prepares and certifies the appropriate voucher for payment of the advance in USD, and charges the appropriate military pay appropriation. The service member converts the payment to local currency at the MBF.

4.2.8.1.3. The supporting finance office maintains a tracking system, either by input into the master military pay account (MMPA) or by manual methods, showing the amount of the advance paid in local currency, the USDE, and the exchange rate on the date of payment.

4.2.8.2. Lease Termination

4.2.8.2.1. At lease termination, service members return the total amount of the deposit in local currency to the supporting disbursing office in exchange for a receipt. The supporting disbursing office credits the USDE based on the rate of exchange in effect on the date of the return to the appropriation charged when the deposit was advanced; compares that rate of exchange with the rate in effect on the date of the advance; and posts any gain or deficiency (loss) due to currency fluctuation as a charge or credit, as appropriate, to the current military pay appropriation.

4.2.8.2.2. If the security deposit was paid in USD, the service member takes the full value of the security deposit in foreign currency to the MBF, converts it to U.S. currency, obtains a receipt indicating the exchange rate, and turns in the U.S. currency and receipt to the disbursing office. The disbursing office prepares a collection voucher for credit to the appropriate military pay appropriation, indicates return of the security deposit, verifies with the MMPA or local record whether a gain or deficiency has occurred for the current exchange rate, and prepares the appropriate voucher to credit or debit the gain or deficiency to the appropriate military pay appropriation. Ensure that the member does not experience any gain or deficiency due to foreign currency fluctuations.

4.3 Obtaining Weekly Foreign Currency Exchange Rates

The [Federal Reserve Bank](#) provides weekly foreign currency exchange rates at their website.

5.0 USE OF FOREIGN CURRENCIES FOR TRANSPORTATION

5.1 Transportation Payment

To the maximum extent possible, use U.S. owned foreign currencies for transportation when certified air carriers are available and will accept such currencies in payment for U.S. Government-financed, commercial, foreign air transportation of persons or property. Review [DoD Directive 4500.09E](#), Transportation and Traffic Management, for guidance on the use of these air carriers and determination of their availability. In issuing and exchanging Government Transportation Requests (GTRs), Government Bills of Lading (GBLs), transportation warrants, or other procurement documents, state clearly "PAYMENT IN (foreign currency)" on the form. Otherwise, the carrier may demand payment in USDs.

5.2 Transportation Billing

DOs should ensure to include in the “BILL TO” portion of the GTR, GBL, transportation warrant, or other procurement document:

5.2.1. Name of the requesting agency;

5.2.2. Address to be billed; and

5.2.3. Instruction on payment in foreign currency.

6.0 DISPOSITION OF FOREIGN CURRENCY AND NEGOTIABLE INSTRUMENTS

6.1 Payments to Authorized Personnel

DOs may use foreign currency for payments to foreign personnel and vendors. For miscellaneous advance payments, see Volume 10, Chapter 4, paragraph 4.8.

6.2 Disposition of Excess Foreign Funds

When possible, transfer foreign currency excess to other DoD DOs, USDOs, U.S. Embassies, or accountable officers in a particular locality with immediate disbursing needs. When the collection of foreign currency causes a noninterest bearing LDA to exceed immediate disbursing requirements, see Chapter 14, subparagraph 3.10.2.2.

6.2.1. Sale to Another DoD Disbursing Office

6.2.1.1. Sort checks, drafts, and money orders payable in foreign currency by the geographical location of the institutions on which they were drawn and send them by registered mail or courier to a DoD DO located in the country of the monetary unit involved. Send them with a completed DD Form 165, Shipment of Funds, and a letter of transmittal addressed to “DO (activity of addressee)” (see Chapter 3, section 5.0). Include a request for a U.S. Treasury exchange-for-cash check with the letter of transmittal. Identify the country, type, amount, exchange rate, and USD value of the instruments on the DD 165. Endorse the instruments "Pay to the order of ‘*Disbursing Officer, Activity of Addressee*’, (Signature of sender)." When there is no DoD DO in the country involved, deposit the instruments in accordance with the I TFM 5-6000.

6.2.1.2. Send other than local currencies, and currencies not required for official purposes to a DoD DO that needs them, or to a DO located in the country where the currency is legal tender. Exchange the foreign currency for U.S. currency or a U.S. Treasury exchange-for-cash check. When using registered mail or courier, include a completed DD 165 and letter of transmittal requesting a U.S. Treasury exchange-for-cash check. Include the country, type, amount, exchange rate, and USD value of the foreign currency on the DD 165. Do not send foreign coins for exchange except under unusual circumstances and with the prior concurrence of the intended recipient.

6.2.1.3. Use the prevailing rate of exchange on the date of the seller's transmittal and the prevailing rate on the date of receipt for the buyer. Since the prevailing rate is the holding rate for the receiving office, there will be no gain or deficiency in the receiving office's accounts. The selling office accounts for any gain or deficiency due to exchange rate fluctuations when it receives the U.S. Treasury exchange-for-cash check.

6.2.2. Sale to an MBF. A DO may sell excess foreign currency to an MBF whenever the currency cannot be sold to another DoD DO. The selling DO uses the MBF "buy rate" as the rate of exchange on the date it sends the currency to the MBF, and accounts for any gain or deficiency due to exchange rate fluctuations when it receives the USD from the MBF.

6.2.3. Sale Through Commercial Channels. If foreign currency cannot be sold, a DO may sell it through commercial channels. If the rate of exchange has been established by agreement between the U.S. and the foreign country, sell or otherwise dispose of foreign currency for U.S. currency or USD checks at the established rate of exchange.

6.2.3.1. For this type of sale, the bank or other entity to which the foreign currency is sold provides a statement showing the amount of USD supplied, rate of exchange, amount of foreign currency received, date, and name and address of the bank or other entity. The recipient's representative signs the statement and the DO includes it with the financial reports. A DO may also conduct foreign currency sale transactions with a bank or entity approved by the Treasury (e.g., an MBF) to establish LDAs in the currency purchased (see Chapter 14, section 3.0).

6.2.3.2. When the rate of exchange is not established by agreement between the U.S. and the foreign country, or if there is not a bank or entity approved by the Treasury to establish LDAs, use a DD 2668 to request at least three bids from reputable banking institutions or dealers in foreign exchange, if available. Sell the foreign currency to the bidder submitting the most beneficial bid as certified by a commissioned officer other than the DO; the DO accepts it and includes it with the financial reports to support gains or deficiencies in foreign currency transactions.

6.2.4. Deposits to the Credit of the Treasury. If disposition is not possible through a DoD DO or an MBF, follow guidance in the [I TFM 5-6000](#) for deposits of foreign currency and checks drawn on foreign banks.

6.2.5. Deposits. Pending receipt of the confirmed copy of the deposit ticket, record the deposit in Cash in Transit of the DD 2657 at the USD value of the funds when the deposit was mailed. If the confirmed copy of the deposit ticket is not received before the end of the month of mailing, report the item on line 6.7 of the SF 1219. The depositary enters the net USD proceeds in Block 4 of the deposit ticket and distributes the copies as for any regular deposit.

6.2.5.1. Upon receipt of the confirmed deposit ticket, the DO enters the confirmed amount in Deposits Presented or Mailed to Bank on the DD 2657. Account for any difference in the amount of the confirmed deposit ticket and the amount at which carried by the DO on [Cash in Transit](#) (as distinguished from exchange fees and collection charges) as either a gain or deficiency by exchange transaction as prescribed in section 3.0.

6.2.5.2. Do not report deposits of foreign negotiable instruments under the “Gross Accountability” section until receipt of the confirmed copy of the deposit ticket because the USD value to be reported as deposited is not known to the DO until then.

6.3 Dishonored Foreign Checks, Drafts, and Money Orders

Dishonored foreign instruments received by DoD DOs are subject to the regular debt collection procedures. DOs must request removal of dishonored item deficiencies for instruments received that become uncollectible (see Chapter 4, section 5.1).

6.4 Mutilated or Unfit Foreign Currency

DOs should take every possible precaution to prevent acceptance of mutilated foreign currency as a collection, payment, or an exchange transaction. If a DO is holding mutilated foreign currency, the DO must contact local banks or fiscal authorities to arrange for the exchange of mutilated or unfit currency for fit currency.

6.5 Counterfeit or Altered Foreign Currency

DOs should take every possible precaution to prevent acceptance of counterfeit currency as a collection. If the collection is counterfeit, see section 2030.50 in [I TFM 5-2000](#). If no agreement exists with the foreign government, then ship the currency to the appropriate investigative agency or nearest military security agency. Obtain a receipt for the currency, and account for it in the DO’s records in the same manner prescribed in Chapter 3, section 7.0 for counterfeit U.S. currency. A DO considered at fault in acquiring counterfeit foreign currency is accountable for the value of the currency. Submit a request for relief of liability pursuant to the process outlined in Chapter 6, section 6.0. This is the same process that is used for accountability for receipt of counterfeit U.S. currency.

7.0 RECORDS AND REPORTS

7.1 Treatment of Transactions

Treat transactions involving foreign currency as cash transactions and follow the same principles and guidelines established for controlling U.S. currency. DOs, DDOs, agents, and cashiers who engage in foreign currency transactions (e.g., collections, disbursements, and accommodation exchanges) must document them on the [DD Form 2663](#), Foreign Currency Control Record. This form shows current balances of foreign currency on hand (all foreign currency held by cashiers, in the vault, or by other agents of the DO) and in LDAs, as well as the detailed transactions that increase or decrease these balances.

7.2 DD Form 2663, Foreign Currency Control Record

Maintain separate DD 2663s for each type of foreign currency used (e.g., Kuwaiti Dinar, Euro, and Japanese Yen). Also maintain a separate DD 2663 for accommodation exchange foreign currency carried at an exchange rate different from that used for disbursements. DOs may maintain separate DD 2663s for foreign currency on hand and in LDAs.

7.3 Foreign Currency Reports

7.3.1. DO. Include with the foreign currency reports a cover sheet with the following headings: Country of Currency; Monetary Unit; Number of Units Purchased; Total Dollar Outlay; and Memorandum-Dollar Outlay for Accommodation Exchanges. Reports are due within 15 calendar days after the close of each quarter to the supporting DFAS site. Reports may be combined and submitted as one report.

7.3.1.1. Cumulative Report of Foreign Currency Purchased With USD From Sources Outside the U.S. Government. This report is cumulative for the fiscal year. Include the amounts acquired through accommodation exchange transactions as well as purchases from banks and other dealers in currency exchange.

7.3.1.2. Report of the Balance of Foreign Currency Held Under Dollar Accountability. This report is due by the end of each quarter to the same DFAS site as the cumulative report. It may be combined with the cumulative report.

7.3.1.3. Report of Foreign Exchange Received by DOs and Credited Immediately to Miscellaneous Receipt Accounts of the Treasury. This report is a cumulative report of outside purchases and quarterly report of balances of foreign currency on hand. These funds are received for such things as fees and services and are immediately purchased by DOs with appropriated funds for their operating needs. Exclude repayments to appropriations.

7.3.2. Consolidated Quarterly Reports of DOs. DFAS sites will consolidate the DOs quarterly reports and forward them to DFAS, Departmental Reporting Directorate, Treasury Division, Reporting Operations Branch, Column 334Z-1, 8899 E. 56th Street, Indianapolis, IN 46249, in time to be delivered to the Treasury 45 calendar days after the close of each quarter.

7.3.3. SF 1219. Report foreign currency balances held in USDE on the SF 1219 including those in LDAs.

8.0 CONTINGENCY OPERATIONS IN FOREIGN TERRITORIES

Information pertaining to Contingency Operations in Foreign Territories can be found in Volume 12, Chapter 29, "Administering, Using, and Accounting for Seized and/or Vested Funds and Property During Contingency Operations."

CHAPTER 14

LIMITED DEPOSITARY CHECKING ACCOUNTS

1.0 GENERAL

1.1 Overview

If the [U.S.](#) Department of the Treasury's (Treasury) International Treasury Services (ITS.gov) will not support mission requirements, DoD disbursing officers (DOs) may maintain official limited depositary accounts (LDAs) for check or electronic funds transfer (EFT) payments in foreign currencies with banks designated by the Treasury as "Depositaries of Public Moneys of the United States." LDAs are considered cash and investments held outside treasury funds and must be reflected in the DO Cash Treasury Account Symbol. LDA transactions follow the same reporting process to the Payment Information Repository (obtaining funds) and the Classification Transactions and Accountability (cash disbursement and collections) as U.S. dollar transactions. LDA transactions are recorded on the DoD [\(DD\) 2657](#), Daily Statement of Accountability and the Standard Form (SF) 1219, Statement of Accountability.

1.2 Purpose

This chapter provides policy on the establishment and maintenance of LDAs by DoD DOs.

1.3 Authoritative Guidance

Treasury is authorized by Title 31, United States Code (U.S.C.), section 3303, ([31 U.S.C. § 3303](#)), to select financial institutions to maintain U.S. Government operated accounts based on obtaining the most beneficial banking arrangement available to transact business. Preference should be given to American financial institutions unless a local bank's arrangement is more advantageous to the United States. See implementing guidance in Title 31, Code of Federal Regulations (CFR), sections 202.1, ([31 CFR § 202.1](#)), [31 CFR § 281.6](#), and [31 CFR § 281.7](#).

2.0 SOLICITATION

2.1 Overview

2.1.1. New LDAs. A DO (or designated deputy DO (DDO)) confers with the local U.S. Embassy or Consulate for assistance to determine which banks meet the criteria to maintain an account. When anticipating the establishment of a new LDA, a DO solicits all American-owned and leading local financial institutions in the area to determine which would offer the most beneficial arrangement. The solicitation process must be competitive to allow all banks to submit written information on identical questionnaires or requests for banking proposals. To determine the most beneficial arrangement, a DO considers, in descending order of importance, (1) standard operating services minimally required, (2) customary local banking practices (e.g., telex cost or armored car service), and (3) other special services that may be necessary in a particular country or circumstance (e.g., payment of interest on the account, waiver of miscellaneous charges). The required services must include:

- 2.1.1.1. Capability to honor payments to payees in outlying areas;
- 2.1.1.2. Processing of checks and, if possible, EFTs and deposits;
- 2.1.1.3. Provision of a daily or a monthly bank statement as needed; and
- 2.1.1.4. Acceptance of the DO's funding procedures.

2.1.2. LDA Banks. DOs ensure that banks are valid, reflect a high level of American ownership, are financially secure, are dependable, and are reliable financial institutions to avoid losses and ensure the protection of U.S. Government funds. Unsolicited proposals from financial institutions to operate an existing LDA may be received any time, and the LDA is open to all interested financial institutions.

2.2 Requesting an LDA

A DO, upon selecting a reliable financial institution with beneficial banking arrangements, sends a request for approval and designation of an LDA to the Enterprise Solutions and Standards (ESS) Disbursing, Defense Finance and Accounting Service (DFAS), ESS Disbursing, Indianapolis (DFAS-JJFKCD/IN), 8899 E. 56th Street, Column 301S, Indianapolis, IN 46249 (dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil). ESS Disbursing will review and send the request to the Treasury's Bureau of the Fiscal Service before the account is established.

2.2.1. Requests for U.S. dollar (USD) accounts must include documentation indicating that the DO requested and received a commitment to pledge collateral from the bank suggested for selection. If the bank agrees to pledge collateral, the DO may request a USD operating account; otherwise, the DO may request only a USD zero-balance account.

2.2.1.1. A request for an LDA should include the:

2.2.1.2. Disbursing station symbol number (DSSN);

2.2.1.3. Justification for the account, to include the reason(s) why ITS.gov will not support mission requirements;

2.2.1.4. Location;

2.2.1.5. Name of the currency;

2.2.1.6. Criteria for determining the preferred bank and reasons for recommending its selection (e.g., results of the competitive process);

2.2.1.7. Name of proposed bank;

2.2.1.8. Bank address;

2.2.1.9. Name and title of bank official and telephone number(s);

2.2.1.10. Percentage of ownership by a U.S. bank;

2.2.1.11. Name of the correspondent bank (if any) in the United States, the account number, and a point of contact (e.g., name, title, and telephone number); and

2.2.1.12. Business need or statutory authority for any balance that may exceed the 5-to-7 business day supply requirement. Note: Approved LDA requests that include requirements for balances to exceed the 5-to-7 business day supply will require a waiver from Treasury as stated in subparagraph 3.10.2.2.

3.0 ESTABLISHING AND MAINTAINING AN LDA

3.1 Establishment

Once Treasury approves a request, establish the LDA in the name of the assigned DO, DDO, or another agent the DO designates. Limit the authority to sign checks drawn on the LDA to the DO and other appointed DDOs or agents. A DO who transacts business in multiple foreign currencies, must establish and maintain a separate LDA for each currency.

3.2 Letter of Authorization

The commander certifies by letter, the name and rank of the DO assigned to the activity, stating that the DO is authorized to maintain an LDA with official funds of the United States in the name of the activity. If the custodian of the LDA is a DDO or another agent of the DO, the commander's letter identifies that DDO or agent and:

3.2.1. Certifies that the account is subject to checks issued by the DO, other appointed DDOs or agents, and their successors in the office;

3.2.2. Includes signature specimens of the DOs and authorized DDOs and agents, and a certification that the signatures are those of the personnel authorized to transact business with the limited depositary (LD); and

3.2.3. Requests the bank acknowledge acceptance by endorsement of the letter, in triplicate. The bank should retain the original letter and return two copies to the activity.

3.3 Blank LD Checks

3.3.1. Procurement. LD checks are not available through the Treasury check contract. Order checks from the bank maintaining the LDA, charging their procurement cost to the disbursing activity's operating funds.

3.3.2. Print Order Requirements. Obtain LD checks in continuous form format for mechanized systems. The checks must be overprinted to provide the serial number of the check, name of the activity, any limited-payable notices as may apply in the foreign nation, and information necessary for security and accounting for check issues.

3.3.3. Security. Control and safeguard blank LD checks in the same manner as prescribed for Treasury checks in Chapter 7, paragraph 3.7. If LD checks are lost or stolen, the DO immediately notifies the LD of the serial numbers of those checks, places stop-payments against them, and submits copies of the stop-payment requests with the next original LD reports.

3.3.4. Relief of DO. Transfer unused LD checks to the relieving officer, with no change in serial numbers, for their use.

3.3.5. LDA No Longer Required. When an LDA is no longer required or when a disbursing office is deactivated, void all unused blank LD checks and destroy them (see Chapter 7, paragraphs 9.1 and 9.3).

3.4 Preparation of LD Checks

3.4.1. Production of Checks. Prepare LD checks using automated check writing equipment, if available, or a typewriter, if necessary.

3.4.2. Record of Check Issues. DOs maintain a record of all LD checks issued. The record includes payee names, voucher numbers, amounts (in the currency of the check), check serial numbers, check dates, and activity name under which the account is established. Other information as to the purpose for which checks are issued and local identification codes is optional at the issuing DO's discretion. The record may be on paper, electronic, or in media designed for data processing use. Keep a separate record for each LDA. Include records of check issues with retained disbursing records.

3.5 Disbursement Vouchers

When a payment is made with an LD check, enter the notation "LD Check No. X," on the disbursement voucher. Although a receipt is not generally required for a check payment, local laws may prohibit LD checks drawn outside the United States from being returned to the drawer. In these cases, show evidence of receipt of the payment on the voucher on which an LD check payment appears in one of the following two ways:

3.5.1. Signature on Original Voucher. Submit the original voucher as a part of the financial reports for the month of payment; or

3.5.2. Periodic Statements From Depositary. Periodic statements from the LD listing the paid checks by number and amount, certified by an officer of the bank and the DO, are satisfactory evidence of payment. The certificate of the bank should say, "I certify that the above is a true and correct list of all checks paid by this bank and charged to the account shown in the heading during the period covered by this statement, and that the originals of the checks are on file in this bank

and will be held for X years.” The DO certifies to the reconciliation of the bank statement with the disbursing records.

3.6 Delivery of Checks

Before mailing any LD checks outside the country in which the LD is located, the DO verifies that such action is not prohibited by the Status of Forces Agreements or the banking laws of the countries involved (see Chapter 7, paragraph 6.4).

3.7 Irregularity After Delivery of Checks

When an irregularity occurs after check delivery and the check is still outstanding, stop payment of the check. Provide a complete report of the facts with the request for stoppage. If the irregularity is discovered after payment of the check, the DO notifies the depositary of the irregularity.

3.8 Interest on Deposits

In some cases, LDs pay interest on LDAs. When possible, the DO obtains interest on the LDA. The DO canvasses the market to obtain the highest interest rate legally available consistent with disbursing requirements and monitors the interest-bearing accounts to ensure the interest is paid timely following agreements between the DO and the banks. When notified that interest has been credited to the account, the DO prepares a [\(DD\) Form 1131](#), Cash Collection Voucher, crediting 3220 (General Fund Proprietary Receipts, Not Otherwise Classified, All Other) for the U.S. dollar equivalent (USDE) of the interest and records the transaction as both a collection and an increase.

3.9 Account Balances

Keep daily LDA balances as near zero as possible, maintaining them solely to support disbursing requirements. Draw LDA checks against new deposits only after receipt of confirmation of the deposits from the LD. If foreign currency collections cause a non-interest bearing LDA to exceed a 5-to-7 business day supply and all attempts to sell the currencies to other DOs are exhausted, the DO sells the foreign currency for USDs for deposit to a bank designated as a Treasury General Depositary or requests a waiver per subparagraph 3.10.2.2. LDAs approved to hold funds beyond the 5-to-7 business day supply do not require a reduction of the account balance, but they must comply with any stipulations cited in the LDA request approval (see subparagraph 2.2.1.12). Do not use LDA balances (or the forfeiture of potential interest earnings on the account) to subsidize banking services otherwise funded through the appropriation process.

3.10 Review of LDA

3.10.1. Commanders' Review. Commanders require review of DO's maintained LDAs to ensure compliance with this chapter. The cash verification team (see Appendix A) performs this unannounced review quarterly, upon transfer of accountability to a successor DO, before departure

of the outgoing DO from the command, upon deactivation of the LDA, or upon a change in the designated settlement office.

3.10.2. DOs' Review. DOs review LDAs on a continuing basis to ensure:

3.10.2.1. Maintenance of minimum account balances necessary to meet immediate disbursement needs (checks issued and in process);

3.10.2.2. Balances do not exceed immediate needs (typically a 5-to-7 business day supply). Transfer the excess funds beyond the immediate need to other DoD DOs, State Department U.S. DOs, or a U.S. Embassy; withdraw and deposit the funds with Treasury; or receive Treasury approval to exceed the 5-to-7 business day supply. Waivers to exceed the 5-to-7 business day supply must be requested from Treasury (see Treasury Financial Manual (TFM), Volume I, Part 4a, Chapter 3000, section 30140.20 ([I 4A-30140.20](#))). Contact DFAS-JJFKCD/IN at the email address listed in paragraph 2.2 to obtain procedural guidance for waiver requests;

3.10.2.3. The terms negotiated with the depository are favorable to the U.S. Government including interest on the account at the highest possible rate;

3.10.2.4. At least every three years for each account, the DO determines if it may be cost effective to solicit competitive proposals from all American-owned and leading local financial institutions in the area to secure the most beneficial banking agreement; and

3.10.2.5. There are no significant events that affect the designated bank (e.g., bank closure). Immediately notify Treasury's Over-the-Counter Revenue Collection Division through DFAS-JJFKCD/IN at the email address listed in paragraph 2.2 upon learning of a significant event that affects the designated bank.

3.11 Burdensharing and Overseas Relocation Contributions by Foreign Allies

See Volume 12, Chapter 24 for the overall policy and responsibilities for acceptance, receipt, use, and reporting of burdensharing and relocation monetary contributions to the DoD. DOs must include any burdensharing and relocation monetary contributions held in an LDA in the semiannual cash holding authority requests (see Chapter 3, paragraph 2.4). In addition, DOs must include any burdensharing and relocation monetary contributions held in an LDA in their ending accountability on the DD 2657 and in the DO Cash Treasury Account Symbol. Burdensharing and monetary contributions held in an LDA in excess of the 5-to-7 business day supply must be approved with the original LDA request (see subparagraph 2.2) or will require an approved waiver from Treasury (see subparagraph 3.10.2.2).

4.0 VOIDED AND SPOILED LD CHECKS

4.1 [Disposition of LD Checks](#)

Treat original LD checks that are not to be issued as voided or spoiled. Void LD checks with writing errors (e.g., wrong name or amount). In addition, void checks physically damaged

during preparation, or where the applicable entitlement area has withdrawn the voucher. Mark these checks conspicuously to prevent their negotiation, either in error or through fraud. Prepare separate listings of voided and spoiled checks monthly and attach them to the SF 1149, Statement of Designated Depositary Account.

4.2 Voided Checks

The functional area authorizing the payment of a voucher may request a check to be void. The DO bases their decision on the payee's non-entitlement to payment, or an error in the way the check was drawn. Do not report voided checks as issued in the DO's check report. Upon determination to void a check, render the check non-negotiable. Do not store voided checks in the safe or vault of the DO or any deputies or agents. Prepare a listing of voided checks, entitled "Voided Checks," showing the accounting month, the name of the LD, and the LDA number at the end of each month. Send the voided checks listing and the originals of all voided checks with the monthly SF 1149.

4.3 Spoiled Checks

A DO issuing a check determines when to report a check as spoiled, basing the decision on the physical appearance of the check (e.g., mutilated, torn, not whole, smudged, unreadable); or upon discovering an error in the preparation of the check, (e.g., voucher is correct, but the check data does not match).

4.3.1. Preparation of Check Listing. Prepare a separate listing of spoiled checks, entitled "Spoiled Checks," in check-number sequence at the end of each month, showing the accounting month, name of the LD, and LDA number. Send the listing and the original spoiled checks with the monthly SF 1149.

4.3.2. Spoiled Check Replacement. Replace a spoiled check with the next available serially numbered check. Enter the same information that appeared on the original check except for the check serial number and the check issue date. Render the original check non-negotiable.

5.0 TRANSFERRING PROCEEDS OF LD CHECKS

5.1 [Uncurrent LD Check](#)

An uncurrent LD check is a check that has not been negotiated through the LD one fiscal year after the fiscal year in which the check was issued, except where local laws [mandate](#) the negotiable period [be](#) shorter. The amount of [these](#) checks must be transferred to [the](#) Treasury or credited to the original appropriation. The transfer of LDA check proceeds may be due to undeliverable checks or checks due to payees that are deceased or incapacitated.

5.2 Uncurrent Check Transfers

The DO who issued the original check, a successor DO, or a settlement officer designated by the supporting DFAS site transfers proceeds of uncurrent checks to [the](#) Treasury each October.

5.2.1. Open LDAs

5.2.1.1. Preparation of Check Listing. Prepare an original and four copies of check listing for each LDA, with the DO's name, location and the LD's name and location [on the](#) header. Include the uncurrent LD checks in ascending numerical order on each listing, showing each check's issue date, check number, name of the payee, check amount in the check's currency, and the USDE of the check when it was issued (as shown on the payment voucher). Show the total amount of foreign currency units and the total USDE of all checks on the listing. Transfer the total USDE when the checks were issued to Treasury account, 20X6045 (Proceeds and Payment of Certain Unpaid Checks).

5.2.1.2. Stop-Payment Notice to the LD. The DO immediately gives a copy of the uncurrent check listing to the LD, requests that it place stop-payments on all checks, and instructs the LD to advise all payees presenting checks shown on the listing to submit the checks to the disbursing office for transmittal to and settlement by the Department of the Treasury, Bureau of the Fiscal Service, Attn: [Fiscal Accounting](#), [Budget Reporting](#) Branch, 3201 Pennsy Drive, Building E, Landover, MD 20785.

5.2.1.3. Method of Transfer. The DO prepares an Optional Form [\(OF\) 1017-G](#), Journal Voucher (JV), to document the purchase of foreign currency represented by the outstanding checks, and completes the purchase by issuing a Treasury check payable to the Department of Treasury for the USDE shown on the check listing. Include a complete explanation of the transaction on the JV, giving the date, check serial number, and DSSN of the activity issuing the Treasury check. The JV supports the increase in the LDA checkbook balance. Report the transaction on the SF 1149. Attach a copy of the JV to the uncurrent check listing and send it with the Treasury check to the Treasury (see subparagraph 5.2.1.2 for address). Contact DFAS-JJFKCD/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.

5.2.2. Closed LDAs. When outstanding (unpaid) checks become uncurrent in a closed LDA, transfer the USDE to Treasury account 20X6045. The DO having jurisdiction over the closed account arranges with the LD for the necessary transfer of funds from the closed LDA to the DO's current LDA. After the LD completes the transfer to the current account, the DO follows subparagraph 5.2.1. If the closed account belonged to a predecessor DO or is part of the settlement account for a closed disbursing station, prepare an additional copy of the uncurrent check listing to file with the retained records of the closed disbursing station's records; include a reference to the disbursing office accomplishing the transfer and the date of transfer on this copy. Notify Treasury of the closure through DFAS-JJFKCD/IN at the email address in paragraph 2.2.

5.3 Transferring Proceeds of Undeliverable Checks

This paragraph relates to the proceeds of undeliverable LD checks still due the payee or the payee's estate. Cancel LD checks returned as undeliverable and are not due the payee or payee's estate (see section 6.0).

5.3.1. Time Limit for Holding Undeliverable Checks. Hold undeliverable LD checks only until determination that the DO cannot deliver them with the information available, but not longer than 60 days from the date of issue.

5.3.2. Record of Undeliverable Checks. Undeliverable LD checks are recorded on a [DD 2658](#), Returned and Undeliverable Check/Bond Record. Include a complete description of the checks, the disbursing voucher numbers, dates the checks were returned, disposition of the checks, disbursing official authorizing the disposition, and disposition dates. The DO, DDO, or a third person having the DO's written authorization approves disposition of undelivered checks.

5.3.3. Safekeeping of Undeliverable Checks. Protect undeliverable LDA checks held in the disbursing office the same as cash. File them in an order best suited for ease of retrieval and identification.

5.3.4. Disposition of the Proceeds of Undeliverable Checks Drawn on Open Accounts. Credit the proceeds of undeliverable LDA checks (current as to date of issue) drawn on an open LDA to the appropriation or fund charged for the original disbursement. Use the rate of exchange that was in effect on the date of issue, as shown by the payment voucher, and establish a payable to allow for future settlement. Schedule undeliverable LDA checks on an [SF 1098](#), Schedule of Canceled or Undelivered Checks, showing the check number, month and year of issue, name of payee, amount (USDE on the date of issue), DSSN, and the appropriation or fund to be credited, and process the SF 1098 as a cash collection. To maintain the DO's accountability, increase the DD 2657 and SF 1219 by the USD amount on the SF 1098, and increase the LDA checkbook balance by the total amount of foreign currency units of the listed checks.

5.3.5. Disposition of the Proceeds of Undeliverable Checks Drawn on Closed Accounts. If the LDA on which the undeliverable checks were drawn is closed, the successor DO or settlement officer notifies the LD that the checks are canceled. Transfer the proceeds of the check to the successor DO's LDA or by a check payable to the DO (by title). Once the proceeds are transferred to the open account, the DO follows subparagraph 5.3.4 for undeliverable checks drawn. When the LD provides the proceeds by check, the DO processes a DD 1131 to credit the appropriation or fund charged when the checks were issued, and does not prepare an SF 1098. Prepare the DD 1131 at the rate of exchange in effect when the checks were issued, as shown by the related payment vouchers. Account for any difference in the USD value by comparing the current rate of exchange and the rate when the checks are collected as a gain or loss by exchange (see Chapter 13, section 4.0).

5.4 LD Checks Due Deceased or Incapacitated Payees

5.4.1. Checks Current as to Date of Issue. Process non-negotiated LD checks returned to the disbursing office in connection with a claim for the proceeds which are still due a deceased or incapacitated payee but still current as to date of issue under subparagraphs 5.3.4 and 5.3.5.

5.4.2. Checks Uncurrent as to Date of Issue. Handle non-negotiated LD checks, uncurrent as to date of issue and returned to the disbursing office in connection with a claim for the proceeds that still are due a deceased or incapacitated payee.

5.5 Claims for the Proceeds of Undeliverable Checks

5.5.1. Claims for Settlement by the DO. Support claims for the proceeds of undeliverable checks credited to the appropriation or fund originally charged using an [SF 1034](#), Public Voucher for Purchases and Services Other Than Personal. Cite a reference to the original undeliverable check showing its serial number, amount, and DSSN on each voucher.

5.5.2. Claims for Settlement by the DoD. When there is any question of law or fact, send claims for the proceeds of undeliverable checks to DoD, Office of the General Counsel (OGC), 1600 Defense Pentagon, Washington, DC 20301-1600.

6.0 CANCELING LD CHECKS

6.1 [Cancel LDA Checks](#)

Cancel LDA checks when their proceeds are not due to payees or their estates but are for credit to an appropriation or fund account. The procedure to cancel these checks depends on whether the account on which the check was written is open or closed, whether the check is current or uncurrent, and whether the check is available or unavailable to the DO maintaining the LDA. Contact DFAS-JJFKCD/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.

6.2 Checks Not Due a Payee or Payee's Estate

If a payee or payee's estate is not entitled to a check, the functional area that submitted the certified payment is the only office that may request the DO to cancel that check. Except as provided in this paragraph, use an SF 1098 to list and report all such checks canceled. In all cases where practicable, the functional area authorizing the original payment prepares the SF 1098.

6.2.1. Checks Current as to Issue Date. The DO cancels LD checks not due a payee as quickly as possible and credits the USDE of the foreign currency amount of the checks at the rate of exchange in effect on the dates the checks were issued (as shown on the payment vouchers) to the original appropriation or fund charged for the payments.

7.0 REPLACING MISSING, MUTILATED, AND FORGED LD CHECKS

7.1 [Replacing LD Checks](#)

A DO, upon receipt of a claim for a check that is reported as not received, lost, stolen, destroyed, mutilated, forged, or defaced, determines the status of the check from the LD or from retained records whether the check is outstanding. The DO issues a replacement check in accordance with this chapter when checks are reported as outstanding and unpaid before the end of the fiscal year following the fiscal year a check was issued, and such issuance does not involve a question of law or fact.

*7.2 Issuing Replacement Checks

The payee or other claimant notifies the DO in writing (with signature) when a check has been lost, stolen, mutilated, or destroyed, and requests payment on the check be stopped. The notification must provide all information available on the check. [The federal agency must attempt to obtain a replacement without an Agreement of Indemnity. When a replacement cannot be obtained without an Agreement of Indemnity, the federal agency should request an Agreement of Indemnity from Fiscal Service, a specific list of documents that must be provided as part of a request for indemnification is in ITFM 5-5035.20.](#)

7.3 Issuing Settlement Checks

This guidance for claims on paid checks applies to all LDAs. The payee immediately notifies the DO in writing (with signature) when a check has been paid on a forged endorsement, providing all available information on the identification of the forged check. The payee completes the Financial Management Service [\(FMS\) Form 1133](#), Claim Against the United States for the Proceeds of a Government Check, and returns it to the DO issuing the original check within 90 days of the date on the FMS 1133.

7.4 Recovery of Original Check

If the original LD check is recovered before issuance of a replacement check, suspend the replacement check action and request that the LD remove the stop-payment against the original check, which the payee may then negotiate. If the replacement check has been released, render the original check non-negotiable.

7.5 Referral to DoD Office of General Counsel

7.5.1. Entitlement or Legal Representation. Send cases involving questions on a payee's or owner's entitlement to a substitute or settlement check, and cases where no legal representative has been appointed by the court for payees or owners who are deceased or incapacitated, through command legal channels to the DoD OGC. Include an assessment or determination from the appropriate entitlement area concerning the underlying obligation. Before referring a case, see section 6.0.

7.5.2. Question of Law or Fact. Send cases involving any question of law or fact through command legal channels for settlement action.

7.5.3. Checks Outstanding More Than One Full Fiscal Year. Send cases involving checks outstanding more than one fiscal year after the fiscal year in which they were issued through command legal channels for settlement. Include in these cases an undertaking of indemnity for the proceeds of a lost, stolen, destroyed, mutilated, or defaced LD check; the check in question, when available, or any identifiable portions thereof; and any other supporting documentation.

7.6 Files

The DO retains approved claims and supporting documents or copies of claims where the originals have been transferred to the supporting DFAS site, as part of the retained records.

8.0 ADJUSTMENT OF CHECK-ISSUE DISCREPANCIES

Internal, Government Accountability Office, other agency audits, or DO-initiated control measures disclose LD check-issue discrepancies. These LDA differences are chargeable to DOs. The DO makes adjustments and records them immediately upon discovery. This guidance does not apply to voided, spoiled, or canceled LDA checks, which are addressed in sections 4.0 and 5.0. These discrepancies occur when the LD pays a check in an amount different from the disbursement voucher and the record of checks issued; the disbursing office draws a check to the wrong payee; the disbursing office issues a check in an amount different from that shown on the disbursement voucher; the disbursing office voids, spoils, or cancels a valid check in error while simultaneously issuing a check that was the subject of an action to void, spoil, or cancel; or the payee advises of a possible overpayment or underpayment. Contact DFAS-JJFKCD/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.

9.0 LDA TRANSACTION DOCUMENTATION

DOs implement controls to assure the drawing of LD checks in strict conformance to certified disbursement vouchers. LDAs are a part of the DO's accountability for public funds. The DO must maintain complete and accurate records, and make them available for audit to ensure the integrity of the LDAs. Treat a loss resulting from a bank failure as a physical loss; see Chapter 6, paragraph 2.0. Contact DFAS-JJFKCD/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.

10.0 TRANSFERRING AND CLOSING AN LDA

LDAs closed or transferred require reconciliation. The DO's agent serving as the LDA custodian contacts the LD and requests a current statement of the account and, if available, all the paid LD checks since the last regular statement before attempting to reconcile an LDA. Reconcile the account by preparing an SF 1149. Contact DFAS-JJFKCD/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.

CHAPTER 15

DISBURSING OFFICER ACCOUNTABILITY REPORTS

1.0 GENERAL

1.1 Overview

1.1.1. Financial Reports. All disbursing officers (DOs) are accountable to the U.S. Department of the Treasury (Treasury) for the cash and cash equivalent items (including receivables) in their possession. DOs are required to submit financial reports to support the DoD accountability to the U.S. Government for all public funds collected and disbursed. These reports are the basis for official audits and settlement of accounts by the U.S. Government Accountability Office and provide information to maintain administrative accounting controls.

1.1.2. Accountability Reports. DOs maintain their daily accountability on the DoD [\(DD\) Form 2657](#), Daily Statement of Accountability. The DO's official monthly accountability is recorded and reported on the Standard Form [\(SF\) 1219](#), Statement of Accountability. DOs report disbursement and collection transactions on both the DD 2657 and the SF 1219, with collections reported as net of disbursements on the SF 1219. Every DO must keep detailed records of all transactions. These records must be available for examination by authorized representatives. Daily reporting does not affect the use and distribution of the DD 2657; SF 1219; [DD 2665](#), Daily Agent Accountability Summary; and [DD 1081](#), Statement of Agent Officer's Account. DOs must continue to submit financial reports to supporting Defense Finance and Accounting Service (DFAS) sites based on each site's instructions.

1.2 Purpose

This chapter provides the policy, guidelines, and forms to record daily and monthly accountability for cash items (and receivables) in the DO's possession. In addition, it provides requirements for submission and distribution of financial reports and retention of disbursing office records and defines the accounting period.

1.3 Authoritative Guidance

Under [Title 31, United States Code, section 3513](#), the Secretary of the Treasury prepares reports required to inform the President, Congress, and the public on the financial operations of the U.S. Government. The head of each executive agency must provide the Secretary of Treasury reports and information relating to the agency's financial conditions and operations. See Treasury Financial Manual [\(TFM\), Volume I, Part 2, Chapter 4700](#).

2.0 POLICY

2.1 Balancing of Accounts

2.1.1. DOs. DOs keep documents representing cash in their vault or safe and account for them daily on the DD 2657 and monthly on the SF 1219. The DD 2657 represents the permanent written record of the DOs daily balance of cash in their possession. When accounts are inspected, DOs must present the DD 2657 to the inspectors for examination.

2.1.2. Deputies, Cashiers, and Disbursing Agents. Deputy DOs (DDOs), cashiers, and disbursing agents perform most DO cash transactions. The DO or primary DDO balances all DDOs, cashiers, disbursing agents, paying agents, and collections agents daily, using the DD 2665. The DD 2665 represents the report of their accountability to the DO, and preparation of this form is based on a physical count of all cash and negotiable instruments in their possession.

2.2 Deputies, Cashiers, and Disbursing Agents at Remote Locations

DDOs, cashiers, and disbursing agents who are geographically distant from the DO (e.g., DO in Indiana and agent in Afghanistan) are still required to record transactions by preparing a DD 2665; however, they need not submit the DD 2665 to the DO on a daily basis. DOs will establish the timing of agent turn-ins for their operations. Agent turn-ins must include all DD 2665s, supporting documentation (e.g., collection vouchers, disbursement vouchers, and deposit tickets), and DD 1081.

2.3 Navy Vessels

DOs aboard Navy vessels balance their cash using the DD 2657. The DDOs, cashiers, and disbursing agents must use DD 2665 to balance at least weekly, immediately before and after each payday, the last day of each month, and anytime the DO suspects that an irregularity has occurred. When workload and staffing conditions allow, DOs aboard Navy vessels should balance cash accounts for all DDOs, cashiers, and disbursing agents daily.

3.0 DAILY AGENT ACCOUNTABILITY SUMMARY (DD 2665)

The DD 2665 is a stand-alone document that provides a complete picture of a DDO's, cashier's, or disbursing agent's accountability transactions from day to day. Each DDO, cashier, and disbursing agent prepares a DD 2665 for each day during which he/she transacts business. It must summarize that day's business and record the transactions in U.S. dollar values. Paying agents appointed to work with contracting for contingency operations need to prepare a DD 2665 on the day they turn-in all their business to the DO. To the extent possible, avoid performing a turn-in during the middle of a business day. If a turn-in is required in the middle of the day, prepare a DD 2665 up to and including the turn-in period, and then prepare another DD 2665 for the portion of the business day after the turn-in.

4.0 STATEMENT OF AGENT OFFICER'S ACCOUNT (DD 1081)

4.1 Overview

Agent officers (DOs, cashiers, and disbursing agents) prepare a DD 1081, as a summary of cash transactions and receipt for cash and vouchers on hand (between DOs and their agent officers). This form is prepared when a DO is advancing funds to an agent and is also used to summarize cash transactions for the period covered by the turn-in. When the agent officers settle their account, the DO or principal DDO verifies the DD 1081, signs the original and a copy of the form, keeps the original form and supporting documents, and returns the signed copy of the form to the agent officer. The DO or principal DDO must perform a physical count of cash at the time of the turn-in or settlement. The agent officer keeps the signed copy as a record of the opening cash balance for the next period of duty and for record purposes if the account is balanced to zero.

4.2 Electronic Submission of DD 1081s in Contingency Locations

Subject to the approval of the parent DO, paying agents in remote operational contingency locations may transmit electronically scanned or facsimile copies of the DD 1081 to the parent disbursing office. A paying agent is solely responsible to ensure that all documentation is legible and that:

4.2.1. The scanned or facsimile copies were produced from original documents and cannot be altered;

4.2.2. The copies are retained until the applicable retention period expires; and

4.2.3. Access to the images is limited to authorized personnel.

In cases of paying agents transmitting documents electronically, the DO must verify the electronic submissions are in fact from the paying agent. Further, the DO is responsible to ensure that adequate internal controls are implemented to prevent the posting of duplicate items when receiving electronic and original documents from the operational contingency location. The DO must also provide for the confirmation and acceptance of digitally signed documents, and the return of the accepted DD 1081 to the agent.

5.0 DAILY STATEMENT OF ACCOUNTABILITY (DD 2657)

The DD 2657 summarizes the total disbursements and collections made during the business day by the DO and all DDOs, cashiers, and disbursing agents. Section I of the DD 2657 reflects the total DO accountability to the Treasury at the end of each business day. If disbursing operations were to cease, the total amount listed in Section I for the last operational business day would be the amount that the Treasury would seek to recover from the DO.

6.0 STATEMENT OF ACCOUNTABILITY (SF 1219)

In a daily reporting environment, the SF 1219 is no longer required to be submitted to the Treasury. However, DOs may continue to complete and submit the SF 1219 at month's end to DFAS for reporting requirements based on each site's instructions. The SF 1219 will continue to be utilized to reconcile deposits, collections, disbursements, and cash balances with Treasury on a monthly basis. In a daily reporting environment, there is still the requirement to balance to the Treasury monthly account statement, which summarizes the financial activities of federal agencies. DoD currently has established processes for creating and reconciling the SF 1219 monthly. From an accounting perspective, there is no warrant or apportionment for DO cash and no formal funds control system documentation that legally places responsibility on the DO for the cash. Additionally, the SF 1219 is a recognized means of establishing responsibility for a specific and verified balance at a point in time. It aligns with accounting reporting cycles (the Governmentwide Treasury Account Symbol Adjusted Trial Balance System bulk file submission), which transmits the end of month balance in the DO Cash account(s) and must match the sum of the SF 1219s for each Service to facilitate reconciliation with the general ledger reporting.

7.0 FINANCIAL REPORTS

7.1 Overview

7.1.1. Accounting Period. DOs submit financial reports to DFAS on a calendar month basis, except for months during which accountability begins or ends on other than the first or last day of a month.

7.1.1.1. For a new disbursing office, the accounting period begins on the first day official business is transacted. When one DO relieves another, the accounting period for the relieved officer ends on the date of relief. The accounting period for the relieving officer normally begins on the next calendar day. Whenever possible, relief of a DO should occur on the last day of a month to preclude the need to submit an additional set of financial reports for that month.

7.1.1.2. An accounting period may not extend beyond the end of a calendar month. Exceptions to the calendar month accounting period may occur when a DO is relieved from disbursing duty before the last day of a month or commences disbursing duty on other than the first day of a month. The first day of the accounting period coincides with the date of commencement of disbursing duty notification forwarded under Chapter 2, subparagraph 4.6.2.5. For any month during which accountability ends because of a Disbursing Station Symbol Number closing, the DO must submit the financial reports from the first day of the month through the date of closing.

7.1.2. Adjustments. DOs are allowed to submit supplemental reports to Treasury to adjust prior period reporting, make corrections to the original reporting, or report additional current month transactions.

7.1.3. Submission of DO's Financial Reports. DOs submit financial reports to the supporting DFAS site based on each site's instructions.

7.2 Requirement for Submission of the Subsidiary Accountability Record (DD 2667)

When a DDO, cashier, disbursing agent, paying agent, collection agent, or imprest fund cashier has a physical loss of funds, forward the [DD 2667](#), to DFAS-ZPTC/IN within five calendar days after the end of each month (see Chapter 6, subparagraph 4.2.1.3.).

8.0 DISBURSING OFFICE RECORDS

8.1 DFAS Record Retention

The supporting DFAS site examines all financial reports and sends them to the nearest federal records center for retention based on record retention requirements and storage availability at the DFAS site.

8.2 DoD Record Retention

8.2.1. Volume 1, Chapter 9, section 2.0 provides records retention requirements applicable to financial records. The retention requirements for federal entities are further defined in the National Archives and Records Administration ([NARA](#)) [General Records Schedule](#). The DoD has also developed supplementary guidance in [DoD Instruction 5015.02](#), DoD Records Management Program.

8.2.2. DOs must apply the most stringent record retention requirements to support accounting records of initial entries and support records such as checks, electronic fund transfers, invoices, and maintain them until all outstanding issues are resolved. Before disposal of contingency operations documents, DOs must contact their legal counsel for document retention in excess of the NARA and DoD guidance for financial records. Records must be available and accessible to all authorized users. Additionally, a DO or designated settlement official must keep records to complete the reconciliation of payment or collection discrepancies until resolved.

8.3 Other Records

8.3.1. Original Disbursing Office Records. Original disbursing office records include, but are not limited to:

8.3.1.1. Disbursement and collection vouchers including supporting documents (e.g., invoices, receiving reports, purchase orders or contracts, and lodging receipts);

8.3.1.2. [DD 2659](#), Voucher Control Logs;

8.3.1.3. DD 2657;

8.3.1.4. SF 1219;

8.3.1.5. DD 2665;

8.3.1.6. Check issue records and reports;

8.3.1.7. Limited Depositary Account records and reports;

8.3.1.8. Deposits of negotiable instruments;

8.3.1.9. Deposit tickets and debit vouchers;

8.3.1.10. Appointments and revocations of accountable individuals;

8.3.1.11. Payroll deposit transactions to individual service members' local pay accounts that are accessed via shipboard cash dispensers (automated teller machines);

8.3.1.12. Any other document record, log, or electronic file that supports disbursing transactions that affects the accountability of the DO or other accountable individual; and

8.3.1.13. Local check cashing policies and agreements.

8.3.2. Other Records Retention. The requirement for retaining original records applies to any record a DO receives that accompanies payment or collection transactions or supports financial reports. The requirement applies to both paper and electronic records kept as original supporting documents at both the functional and disbursing offices. Certifying officials send electronic payment files to only the DO and keep supporting documentation in accordance with the guidance referenced in paragraph 8.2. For Foreign Military Sales document record retention, see Volume 15, Chapter 6.

8.3.2.1. Hardcopy and electronic records storage controls must be [put into](#) place by the disbursing office to ensure that only authorized personnel have access to any paper documents and electronic images.

8.3.2.2. Duplicate copies of disbursement and collection vouchers and associated supporting documents may be retained as necessary at the DO's discretion.

8.3.3. Unclassified Records. Individual records may be unclassified, but sometimes when information is aggregated, the security classification ([and storage requirement](#)) may change. [In accordance with Department of Defense Instruction 5200.48, Controlled Unclassified Information \(CUI\)](#), unclassified records do not require special security or storage controls and may be stored in open files or cabinets. Store these records with controls that readily identify:

8.3.3.1. Records that have been removed from the files;

8.3.3.2. The name of the individual(s) who removed the records;

8.3.3.3. The date the records were removed;

8.3.3.4. The name of the individual(s) who returned the records;

8.3.3.5. The date the records were returned; and

8.3.3.6. Other information needed to contact the responsible individual(s), (e.g., organization, address, telephone number, and email address to ensure that records are returned timely).

8.4 Transfer and Disposition of Retained Disbursing Office Records

8.4.1. Nontactical Disbursing Offices. Transfer all disbursing office records to the incoming (relieving) DO as a part of the relief process described in Chapter 2, paragraph 4.6. When a disbursing office is deactivated, package and mail all disbursing office records to the office designated to settle the accounts.

8.4.2. Tactical Units and Naval Vessels

8.4.2.1. Detachment With Relief. When a DO of a tactical unit or naval vessel is relieved from disbursing duty, the incoming DO keeps the outgoing DO's disbursing records for 90 days from the date of relief. After the 90-day period, the incoming DO packages the disbursing records and sends them to the supporting DFAS site or alternate site designated by DFAS for retention until the expiration of the required retention period. For deployed units, the 90-day period begins after the unit or vessel returns to homeport.

8.4.2.2. Detachment Without Relief. When a DO of a tactical unit or naval vessel is relieved from disbursing duty due to deactivation of the disbursing office or when a vessel or unit is decommissioned from service, the DO must package and send all disbursing office records to the supporting DFAS site or alternate site designated for retention.

8.4.2.3. Shipment of Retained Documents. To facilitate shipment of retained records, DOs of tactical units and naval vessels file retained records in these categories:

8.4.2.3.1. Public vouchers other than payroll vouchers;

8.4.2.3.2. Payroll vouchers with supporting documents;

8.4.2.3.3. Collection vouchers and supporting documentation;

8.4.2.3.4. Checking account records, to include records of checks drawn. These records include Month End Check Issue Summary (SF 1179); Report 251, Advice of Check Issue Discrepancy (Fiscal Service Form 5206) (see [ITFM 4-6040.10](#)), with related correspondence; and [Optional Form 1017-G](#), Journal Voucher, with related correspondence;

8.4.2.3.5. DD 2657;

Chapter 14);

8.4.2.3.6. SF 1149, Statement of Designated Depository Account (see

8.4.2.3.7. SF 1219;

8.4.2.3.8. Instruments deposited;

8.4.2.3.9. [SF 1184](#), Unavailable Check Cancellation;

8.4.2.3.10. Debit Vouchers;

8.4.2.3.11. Certificate of revaluation of foreign currency;

8.4.2.3.12. Quarterly reports on the status of suspense accounts; and

8.4.2.3.13. Other miscellaneous retained disbursing documents.

VOLUME 5, CHAPTER 16: “SAFEKEEPING FUNDS AND VALUABLES FOR INDIVIDUALS AND MORALE, WELFARE, AND RECREATION ACTIVITIES”**SUMMARY OF MAJOR CHANGES**

CHAPTER 16

**SAFEKEEPING FUNDS AND VALUABLES FOR INDIVIDUALS
AND MORALE, WELFARE, AND RECREATION ACTIVITIES**

1.0 GENERAL

1.1 Overview

DoD disbursing officers (DOs), deputy DOs (DDOs), and agents may accept cash and checks from individuals and morale, welfare, and recreation (MWR) activities for which safe custody otherwise would not be available. When a DO, DDO, or agent is unavailable, or when it is impractical for one of them to accept and account for safekeeping deposits, a commander may appoint and terminate any military member or DoD civilian employee as a safekeeping custodian to accept and account for safekeeping deposits using a separate DoD [\(DD\) Form 577](#), Appointment/Termination Record – Authorized Signature (see Chapter 2, section 3.0).

1.1.1. Safekeeping of Deposits. Keep safekeeping deposits in a secured safe and establish appropriate procedures to maintain accountability. Consider funds accepted for safekeeping as funds held in trust for which the United States is accountable, but are not within the DO's financial accountability to be reported to the U.S. Department of the Treasury (Treasury) on the Standard Form (SF) 1219, Statement of Accountability.

1.1.2. Restrictions. Deposits and withdrawals are subject to local command regulations that establish necessary and proper restrictions as to the time, place, and frequency of deposits and withdrawals, and the types of objects classified as valuables. Impose controls to prohibit interruption of the activity's priority fiscal operations (e.g., special and regular payroll activities). Safekeeping services should not be abused by the deposit of objects that are not usually afforded additional protection. Limit deposited valuables to funds; negotiable instruments including bonds, credit cards, travelers' checks, and checkbooks; and objects classified as jewelry having an intrinsic value requiring additional protection. Items such as wallets, snapshots, keys, or items lacking any intrinsic value are prohibited.

1.1.3. Responsibility for Deposits

1.1.3.1. Custodians. Commanders appoint custodians to be responsible for the proper handling of and accounting for safekeeping deposits (see paragraph 3.1). Appointments must state the specific duties authorized to be performed by the custodian. Pecuniary liability does not attach to safekeeping deposits as they are not public funds. Section 2.0 applies to the safekeeping of nonappropriated funds (NAF) for MWR activities. Note that losses of NAF are not recorded on the DO's SF 1219. If a loss occurs, notify the depositor of their right to submit a claim for reimbursement of the loss under applicable DoD Component regulations. Submission of a claim need not be deferred to await findings of any investigation initiated to determine responsibility for the loss.

1.1.3.2. Assistant Custodians. When the volume or nature of safekeeping deposit transactions warrants, the custodian may formally appoint an assistant custodian for initial receipt and temporary custody of safekeeping deposits pending their delivery to the designated custodian. Provide separate safekeeping facilities for the assistant custodian. Cover all custody transfers between the custodian and assistant custodian with receipt. An assistant custodian is responsible for proper accounting and handling, including receipt and delivery of safekeeping deposits to a permanent custodian. Process losses under subparagraph 1.1.3.1.

1.1.4. Deposit of Postal Funds. Receive and handle safekeeping deposits of postal funds under the [Military Postal Service, DoD Instruction 4525.09](#), identifying these as postage stamp fund or postal money order fund, as applicable, on the safekeeping deposit receipt.

1.1.5. Deposit of Funds Under Emergency Conditions. Follow paragraph 2.2 to receive and handle safekeeping deposits of funds by military banking facilities, NAF custodians, and other DoD sponsored activities. Identify on the safekeeping deposit receipt the deposit, depositing agency, and the custodian making the deposit.

1.2 Purpose

This chapter provides DoD's policy for appointed custodians and assistants to receive and safeguard cash and other valuables belonging to individuals or MWR activities.

1.3 Authoritative Guidance

[Title 31, United States Code, section 3302](#) authorizes DOs to have custody of public funds for disbursement purposes and requires them to safeguard the funds.

2.0 SAFEKEEPING OF NONAPPROPRIATED FUNDS FOR MWR ACTIVITIES

2.1 Accounting for Separate Funds

Place each safekeeping deposit in a separate, sealed envelope following subparagraph 2.2.1, except as provided in paragraph 2.2. Process withdrawals in accordance with the procedures provided in subparagraph 2.2.2.

2.2 Accounting for Collocated Funds

Custodians may collocate funds when the volume of safekeeping deposits warrants, and it is desirable to accommodate more than one deposit or withdrawal transaction in (non-individual) safekeeping deposit accounts at non-tactical activities. Place the deposits in a separate container identified as safekeeping funds to prevent commingling with official funds. At activities other than Navy ships, if the total value of collocated safekeeping funds on hand is large, a bank checking account may be established (see paragraph 2.3).

2.2.1. Deposits

2.2.1.1. Receipt for Deposit. Use a DD 2674, Record and Receipt of Deposits and Withdrawals of Safekeeping Funds, for each deposit and assign a consecutive series of deposit numbers beginning with the number “1” preceded by the letter “D.” Assign each depositor a depositor’s account number using a consecutive series of numbers beginning with the number “1.” The information on the DD 2674 should identify the depositor, depositor’s account number, date of deposit, and the amount deposited. The custodian gives the signed original DD 2674 to the depositor and retains a copy.

2.2.1.2. Individual Ledger Sheets. For each depositor, the custodian keeps a separate ledger control sheet, the heading of which includes the following: depositor’s account number, name, location of the depositing MWR activity, and signature of the MWR activity representative making the deposit. The custodian enters the amount of each deposit in the debit column of the ledger sheet, the total amount on deposit in the balance column, the date of each deposit, and deposit receipt number.

2.2.1.3. Cash-On-Hand Ledger Control Sheet. In addition to the individual ledger sheets described in subparagraph 2.2.1.2, the custodian also keeps a cash-on-hand ledger control sheet entering the amount of each deposit in the debit column and the total amount on deposit by all depositors in the balance column. If preferred, a daily summary posting may be made to the ledger control sheet showing inclusive deposit numbers. The balance of the ledger control sheet must agree with the combined balances of the individual depositors’ ledger sheets.

2.2.2. Withdrawals. The depositor presents the original deposit receipt(s) to the custodian when requesting a full or partial withdrawal of the funds on deposit. The custodian confirms the depositor’s account balance and obtains a signature in the applicable section of the retained copy of the DD 2674 verifying it against the signature on the deposit record and/or the individual ledger sheet before releasing the funds requested. If the request is for a full withdrawal, the custodian voids the original DD 2674 in the presence of the depositor. A depositor may make up to three partial withdrawals of a safekeeping deposit. If the deposit is not withdrawn in full after two requests, the custodian voids the original DD 2674 and issues a new DD 2674 for the new deposit amount. The custodian enters the withdrawal as a credit in the depositor’s individual ledger sheet and the custodian’s ledger control sheet. In lieu of individual entries, the custodian may post a daily summary showing inclusive withdrawal numbers on the ledger control sheet.

2.2.2.1. Currency Withdrawals. Return the identical currency that was presented by the depositor when the deposit is withdrawn (e.g., a deposit made in Japanese Yen cannot be withdrawn in U.S. dollars).

2.2.2.2. Check Withdrawals. Enter the check number on the withdrawal request. See subparagraph 2.3.1 for more information regarding checks for the deposit of safekeeping funds.

2.3 Bank Accounts

2.3.1. Checking Account. Custodians of commingled safekeeping funds, with command approval, may establish and maintain a checking account in a local bank or credit union (insured by either the Federal Deposit Insurance Corporation or the National Credit Union Share Insurance Fund, as appropriate) for the deposit of safekeeping funds if the amount available for deposit is large enough to preclude the payment of service charges or other fees. The financial institution collateralizes funds in excess of the insured limits in accordance with Title 31, Code of Federal Regulations, Part 202. Establish the account in the name of the disbursing activity, the safekeeping fund, and the custodian (e.g., “U.S. Naval Activity, Boston, MA, Safekeeping Deposit Fund, Lieutenant J. A. Hancock, SC, U.S. Navy, Custodian”). Loans or investments from safekeeping deposit funds are prohibited.

2.3.2. Check Records. All checks must be serially pre-numbered. A complete record of all checks drawn, deposits made to the safekeeping checking account, and a running account balance must be maintained in the checkbook. Reconcile statements from the financial institution immediately upon receipt and file them with the bank ledger control sheet. Mark spoiled checks as “VOID” and file them in sequence.

2.3.3. Deposits to Safekeeping Fund Bank Account. Deposit checks, money orders, and cash received for safekeeping to the authorized account, except for cash required to be kept on hand to meet safekeeping withdrawal requirements. Checks and money orders may be accepted for deposit, subject to collection. Withdrawals are not authorized until sufficient time has elapsed for the checks and money orders to clear through the banking system.

2.3.4. Disbursements From Safekeeping Fund Bank Account. Draw checks for withdrawals of safekeeping funds on the safekeeping deposit fund account whenever practical. Checks may be drawn on the safekeeping fund account only for payment to a depositor for withdrawal, an authorized transfer of a depositor’s account to another activity, replenishment of cash-on-hand (through an exchange-for-cash check) needed to meet safekeeping withdrawal requirements, or transfer of unclaimed monies.

2.3.5. Cancellation of Checks. Checks drawn on the safekeeping deposit fund account must bear the following stamped endorsement on the reverse side: “This check is not valid unless presented for payment within 12 months from its date of issue.” If a check is canceled, the custodian confirms the stop payment action with the financial institution and credits the depositor’s safekeeping account for the amount of the canceled check. An effort should be made to locate the depositor and make the payment.

2.3.6. Account Closure. If the depositor cannot be located, close the account by drawing a check payable to the Treasury for deposit. For amounts less than \$25, the custodian prepares a DD 1131, Cash Collection Voucher, and credits account 1060, Forfeitures of Unclaimed Money and Property. For amounts of \$25 or more, the custodian credits account 20X6133, Payment of Unclaimed Moneys (T), Treasury. Ensure the deposit utilizes the Treasury Account Symbol that matches the DD 1131 along with the Business Event Type Code for collateral. Include all information available as to the identity and location of the depositor on the collection voucher.

The custodian presents the check and DD 1131 to the DO for collection. Send any claim subsequently received for the funds to the supporting Defense Finance and Accounting Service site for processing, with a copy of the related DD 1131.

2.3.7. Bank Ledger Control Sheet. In addition to the cash-on-hand ledger control sheet, the custodian keeps a separate ledger control sheet for cash-in-bank. When cash, checks, or money orders are deposited in the bank, the custodian debits the cash-in-bank ledger control sheet and credits the cash-on-hand ledger control sheet. Post exchange-for-cash checks as credits to the bank ledger control sheet and debits to the cash-on-hand ledger control sheet. Post withdrawals by check as credits to the bank ledger control sheet and debits to the individual ledger sheet. The sum of the cash-in-bank and cash-on-hand ledger control sheets must agree with the combined balances of the individual depositors' ledger sheets.

3.0 SAFEKEEPING OF PERSONAL FUNDS AND VALUABLES OF INDIVIDUALS

3.1 Deposits

The custodian records all deposits on a DD 2674. Use a series of consecutive numbers beginning with the number "1" for assignment to safekeeping deposits. Assign each deposit, at the time it is made, the next number in the series. The custodian enters in the appropriate spaces of the DD 2674 the deposit number, date of deposit, description of the deposit (if money, describe the amount in figures and words), and the signature and rank of the custodian (or assistant custodian) receiving the deposit. The depositor must enter their social security number (SSN), signature, and rank or rate in the spaces provided. The custodian gives the signed original of the DD 2674 to the depositor and retains a copy.

3.2 Withdrawals

A depositor wishing to withdraw a deposit presents the original DD 2674 to the custodian, who verifies the depositor's signature and determines that the serial number, date, and description correspond with the data appearing on the retained copy of the form. The depositor acknowledges receipt of the deposit by entering their signature and the date of withdrawal in the space provided on the retained copy of the DD 2674. The custodian destroys the original DD 2674 in the presence of the depositor. If the receipt has been lost, the deposit may be returned to the depositor only after the custodian is satisfied as to the identity of the depositor and the depositor's entitlement to the deposit. The entries on the DD 2674 constitute the official record of the deposit. The entire deposit must be withdrawn at the time of withdrawal. Partial withdrawals are not authorized, but a new deposit in a new amount is authorized subject to any restrictions prohibiting unreasonable repeated deposits.

3.3 Withdrawal of Funds or Valuables Subsequent to Transfer of Depositor

If a depositor is transferred before withdrawing safekeeping deposits, the custodian delivers the depositor's cash balance to the DO in exchange for a Treasury check payable to the depositor. Send the check and the depositor's valuables (if any) with a letter of transmittal to the commander of the activity where the depositor was transferred to for delivery to the depositor.

Include in the transmittal letter all available details about the depositor and request acknowledgement of receipt. Insert data regarding the transfer on the file copy of the DD 2674.

3.4 Deposit and Withdrawal of Funds by Incapacitated Persons

To process deposits and withdrawals of funds and valuables, an officer or any other person designated by the commander must accompany an incapacitated person to witness and sign each transaction. Deliver receipts for safekeeping deposits to the commander.

3.5 Deposits of Deceased or Missing Persons

The custodian delivers cash on deposit to the DO in exchange for a Treasury check payable to the payee designated by the officer (or inventory board) appointed by the commander to take custody of the depositor's personal effects. The Treasury check is drawn as "Exchange-for-Cash, Safekeeping Deposit No. _____, name, rank or rate, SSN." Deliver the check and any depositor valuables to the appointed officer (or inventory board) for disposition following applicable DoD Component regulations. Obtain a receipt for the check and any valuables transferred under these instructions. Enclose a retained copy of the DD 2674 with a notation describing the disposition, and destroy the receipt portion of the DD 2674, if available.

4.0 BALANCING AND VERIFICATION OF SAFEKEEPING DEPOSITS

4.1 Balancing

The safekeeping custodian balances all safekeeping deposits on the last day of each month. The cash-on-hand and any safekeeping fund bank account balance must equal the total of the amounts credited in all the active depositors' accounts as shown on the retained copies of the DD 2674s, or the individual ledger sheets and ledger control sheet. The custodian certifies that balancing was accomplished on the ledger control sheet.

4.2 Verification

4.2.1. [Verification](#). At unannounced intervals, at least once during each calendar quarter, a cash verification team appointed by the commander verifies safekeeping deposits in the presence of the custodian (see Appendix A "Quarterly Verification of Cash and Other Assets"). Include the results of the verification in the report of verification to the commander.

4.2.2. [Separate Deposits](#). Separate deposits should be confirmed by verifying the contents of each envelope against the retained copies of the DD 2674s.

4.2.3. [Collocated Funds](#). The custodial office verifies collocated funds by counting the cash held for safekeeping and comparing it with the total of the individual depositors' ledgers and with the balance shown on the ledger control sheet. At activities maintaining a safekeeping deposit fund checking account, examine the latest statement from the financial institution and verify the amount on deposit in the checking account. The verifying officers should certify the last entry on the ledger control sheet.

4.2.4. Reporting a Shortage or Overage. By accepting custody of safekeeping funds, the United States is accountable for them and assumes a trust responsibility for their care and safekeeping, even though it has no beneficial interest in them. The custodian must promptly report any shortage or overage of safekeeping deposits to the commander who takes actions similar to those prescribed in Chapter 6, section 4.0 for a shortage or overage of public funds.

4.3 Transfer of Safekeeping Deposits Upon Relief of Custodian

In preparation for being relieved of custodial duties, the outgoing custodian must balance safekeeping deposits, prepare a duplicate list of all active deposits, and give the list and all active deposits to the relieving custodian, who must then verify all deposits and receipts. The DD 2674 and any other records of commingled deposits must be transferred to the relieving custodian. If a checking account is maintained, it must be reconciled and transferred to the relieving custodian. The outgoing custodian must arrange with the financial institution to transfer the checking account to the relieving custodian.

APPENDIX A

QUARTERLY VERIFICATION OF CASH AND OTHER ASSETS

1.0 GENERAL

1.1 Overview

Chapter 3, subparagraph 3.2.1.1, requires that a cash verification team (CVT) conduct an unannounced verification of the cash and other assets under the accountability of the disbursing officer (DO) at least once during each calendar quarter. The CVT ensures the DO and all subordinate DDOs; cashiers; disbursing, paying, and collection agents; imprest fund cashiers; and change fund custodians are given neither formal nor informal advance notification of the intent to conduct the verification. Verification scheduling should be random to ensure it does not predictably fall during a particular period each quarter. Generally, it is not practical to verify cash on days involving unusually high volumes of disbursing transactions. The commander may omit a second quarterly cash verification if an audit of the DO's cash and assets has been conducted as a part of a transfer of accountability, or if other official audits verifying the accountability were conducted during the same quarter. The CVT must prepare a written statement for the commander's signature specifying the circumstances for omitting a cash verification.

1.2 Purpose

This appendix provides the requirements for appointing the CVT and a checklist for conducting a surprise verification of the cash and other assets under the accountability of the DO.

1.3 Authoritative Guidance

[Title 31, United States Code, section 3302](#) authorizes DOs to have custody of public funds for disbursement purposes and requires them to safeguard the funds.

2.0 CVT

*2.1 Approving Authorities

A commander, director, equivalent civilian head, or designee who has approved Cash Holding Authority (CHA) in accordance with Chapter 3, Paragraph 2.2 is also the appointing authority for a CVT. A commander approves CHA for the DO, and the DO approves CHA for subordinate DDOs, agents, and cashiers, with the total cash held by the DO and subordinates not exceeding the parent DO's CHA. DFAS DOs approve CHA for subordinate DDOs, agents, and cashiers, and when those individuals are located outside of the main DFAS disbursing office, the local activity commander must also approve the CHA amount requested based on having responsibility for safeguarding funds. In those cases, it is the local activity commander who appoints the CVT. For imprest and change funds, especially those held at installations or activities other than the installation or activity of the DO, the commander who authorized the establishment of the fund and appointed the imprest fund cashier or change fund custodian appoints the CVT.

*2.2 Appointing the CVT

The appointing authority shall appoint all team members in writing. Each team shall consist of at least two qualified personnel, except for small or remote locations where a one-person team is authorized. Small or remote locations may also consider appointing members from serviced or associated commands. Members of the CVT must be impartial in the operations and not in the DO's chain of command. It is in the best interest of a command to use the most competent personnel available. If possible, at least one member should be equal or senior in rank to the accountable official. Appoint qualified persons with appropriate security clearances to verify emergency and extraordinary expense funds.

2.3 Checklist

Use this checklist as a guide for the cash verification and to assist in preparing the official report of verification. The senior member of the verification team, in consultation with the DO, determines which checklist items pertain to the DO's operations and operating environment, and explains any deviations or omissions from the checklist in the official report.

2.3.1. The senior member of the CVT notifies the DO's immediate supervisor upon arrival to conduct the surprise verification of cash and other assets. The CVT presents a copy of the appointment memo, and with the presence of the DO or a deputy, assumes control over all cash and other assets in the DO's accountability. If access is refused, the senior member of the verification team immediately notifies the commander.

2.3.2. Secure all accessible vaults, safes, security containers, and cash drawers housing cash or other assets holding DO cash accountability. Inventory the cash and other assets by actual count in the presence of the person accountable for their safekeeping.

2.3.3. Require the DO to prepare a [DoD \(DD\) Form 2657](#), Daily Statement of Accountability, for that day's close of business and validate amounts reported for items due the U.S. Government that are included in the balance. It is also required that the custodian of public funds prepares a DD 2665, Daily Agent Accountability Summary.

2.3.4. No custodian of public funds may conduct further business until the CVT has completed the count of that custodian's funds. Normally, the duty cashier's funds are verified first to minimize the impact on disbursing operations. Compare amounts of cash held at personal risk by the DO and their agents to the authorization to hold such cash as indicated by the approved CHA (see Chapter 3, section 2.0).

2.3.5. If the commander determines that it is not practical to inventory the funds in the possession of some of the DO's agents because of inaccessibility or geographic separation, the CVT verifies the amounts shown on custody receipts either by telephone with the accountable person, examination of the permanent file of cash verifications and certification held by the disbursing office, or any other means available to complete the verification. The verification team notes actions taken and describes any limits to the verification in the report.

2.3.6. Commence the actual count of currency and other assets in the presence of the accountable individual.

2.3.6.1. Cash

2.3.6.1.1. Count all currency and coin;

2.3.6.1.2. Count all items representing cash, including exchange-for-cash checks;

2.3.6.1.3. Count all negotiable instruments representing cash held by the DO awaiting deposit; and

2.3.6.1.4. Verify that cash and receipts held by agents in the disbursing office equal the receipts signed by those agents and held by the DO.

2.3.6.2. Other Assets

2.3.6.2.1. Review and total all receipts for cash held by agents of the DO located outside the disbursing office;

2.3.6.2.2. Review and total deposit transactions via Over-the-Counter Channel Application and confirm deposit transactions utilizing the Collections Information Repository (see Chapter 11, section 11.0);

2.3.6.2.3. Review the debit voucher and associated dishonored checks; require the DO to initiate collection action;

2.3.6.2.4. Review exchange-for-cash checks in transit (see Chapter 7, section 7.0);

2.3.6.2.5. Review Financial Management Service Form 5206, Advice of Check Issue Discrepancy, representing overdrafts and underdrafts (see Chapter 7, section 8.3);

2.3.6.2.6. Review actions on previously reported losses of funds;

2.3.6.2.7. Verify bank statements and balances of foreign currency held in limited depository checking accounts (see Chapter 14, paragraphs 3.9 and 3.10); and

2.3.6.2.8. Verify the amount of foreign currency by actual count against the subsidiary records and the foreign currency reports.

2.3.7. Immediately after verifying the DO's cash accountability, the CVT verifies all safekeeping deposits and the postal stamp funds (if applicable) with procedures provided in Chapter 16, paragraph 4.2.

2.3.8. The CVT verifies the imprest and change funds at least once each quarter. This may be simplified by appointing an individual rather than a team. Accomplish these verifications by totaling all receipts and counting all cash to prove the total shown on the cash receipt held by the DO. Investigate any receipts for cash advanced by the imprest fund cashier more than five days old if not redeemed before the report is issued, and document on the cash verification report. Change fund custodians must certify in writing that their funds are present at the time of the cash verification. Change fund verification consists of verifying that the cash drawer contains the amount shown on the change fund documentation, after adjusting for any sales proceeds or receipts on the day of verification. Verifications of both imprest fund cashiers and change fund custodians ensure that none of the funds includes personal checks from the cashier/custodian, any of their supervisors, or the individual charged with accountability for the funds (see Chapter 2, paragraphs 7.6 and 7.7).

2.3.9. Review all vouchers supporting gains and deficiencies on foreign currency transactions (see Chapter 13, paragraph 4.2).

2.3.10. Review the DO's compliance with the provisions for cashing personal checks and the collection of dishonored checks (see Chapter 4, section 3.0).

2.3.11. Ensure that checks representing collections are properly identified and supported by collection vouchers so that dishonored personal checks received as collections may be charged back to the receiving activity and not held as losses due to accommodation exchanges made by the DO (see Chapter 4, section 4.0).

2.3.12. Review previous cash verification reports to ensure that repeat deficiencies being reported in the current cash verification report are noted as significant and advise the commander of the action necessary to remedy the deficiencies of the DO.

2.3.13. Review maintenance of the DD 2658, Returned and Undeliverable Check/Bond Record, or automated system if used, to ensure that no undelivered checks are missing, none exceeds the time limit to be held, and all are properly safeguarded (see Chapter 7, paragraph 10.3).

2.3.14. Verify all undeposited checks in relation to the prescribed frequency and timeliness of deposits (see Chapter 11, subparagraph 8.3.1.1).

2.3.15. Examine undeposited checks to ensure that they are negotiable instruments the DO is authorized to exchange for cash and that checks received as collections are maintained separately from those checks received in accommodation exchange transactions.

2.3.16. Verify that the DO deposits receipts daily. If daily deposits of less than \$5,000 are impractical, verify that receipts are accumulated until the total reaches \$5,000 and then deposited. Also, verify that deposits are made by Thursday of each week, regardless of the amount accumulated (see Chapter 11, subparagraph 8.3.1.1).

2.3.17. Compare military payroll vouchers and money lists with related pay accounts to ensure payments are posted to the member's account.

2.3.18. Review the cash held at personal risk is commensurate with needs and in compliance with the authorized CHA (see Chapter 3, section 2.0).

2.3.19. Verify safekeeping deposits, postal funds, postage stamp stock, and postal money order stock (see Chapter 16, paragraph 4.2).

2.3.20. Inventory and verify the safekeeping of all smart cards (see Chapter 10, paragraphs 2.9 and 2.12).

2.3.21. Inventory all blank checks (both working and bulk stock), and examine all voided and spoiled checks pending local destruction to ensure they are properly defaced and stored in authorized containers. Where roll stock of blank checks is used, conduct the inventory by recording the ending number from the reels rather than unrolling the reel, which could destroy the stock.

2.3.22. Finalization

2.3.22.1. Verify totals from the reviews with the amounts reported on the DD 2657.

2.3.22.2. Advise the DO of any discrepancies or deficiencies noted.

2.3.22.3. Notify the DO's immediate superior and the commander of any deficiencies and advise them that a written report will be prepared.

2.3.22.4. Sign and certify the results of the cash verification on the DD 2657 or a paper attached to the DD 2657. Results must be signed by all members of the CVT.

2.3.22.5. Insert the following statement on (or attach to) the DD 2657 and ensure it is signed by the senior member of the CVT.

"On (date) at (time), the undersigned verified by actual cash count in the amount of \$ (amount), together with all documents supporting collections and disbursements, which (is/is not) in agreement with this daily statement of accountability."

Signature and Rank of Verifying Official

2.3.22.6. Distribute the cash verification report as directed in paragraph 2.4.

2.4 Report of Verification

The CVT reports all findings in writing to the appointing official immediately upon completion of verification of both official funds and safekeeping deposits. If the appointing official is not the DO's commander, address the report jointly to the appointing official and the DO's commander so both receive an original of the verification report. Where safekeeping of personal funds and valuables is authorized, and the designated safekeeping custodian is not the DO, send a copy of the report to the safekeeping custodian. The senior member of the CVT maintains a copy of the report as a permanent part of the CVT's records. Include the following in the report:

2.4.1. The date the verification was conducted;

2.4.2. The date of the preceding verification;

2.4.3. Statement as to whether or not the DO complies with the safekeeping requirements (see Chapter 3, section 3.0);

2.4.4. The identity of each person holding cash under the DO's cash accountability that was not verified by actual count, the amount of cash each held, and the method of contact made with each custodian. If such contact was made, include a statement as to whether or not the verified cash accountability of the DO agrees with the DD 2657 cash and other asset totals;

2.4.5. A list of undeposited checks containing a description of those not handled;

2.4.6. A statement as to whether or not the DO is taking timely action to clear debit vouchers, check issue discrepancies, check issue reporting gaps, duplicate payments, forgery recoveries through the banks, and reissue of limited payability check cancellations; and

2.4.7. A statement as to whether or not safekeeping deposits amounts verified agreed with safekeeping deposit records.

DEFINITIONS

1.0 General

The following list defines general terms of significance or importance in financial accounting policies for the Federal Government or the DoD that are discussed in various chapters of this volume. These definitions are provided for general information; it is by no means an exhaustive list of all financial management terms, and it does not define terms when standard dictionary definitions apply. Authoritative guidance with more detailed explanations or nuances may be found in specific chapters. These definitions apply throughout this volume.

2.0 List of Definitions

Accommodation Exchange

The exchange of U.S. Treasury checks or other U.S. dollar instruments for U.S. dollars (i.e., check cashing) for the convenience of authorized personnel, the exchange of U.S. dollars or dollar instruments for foreign currency for the convenience of authorized personnel or, where permitted, the exchange of foreign currencies for U.S. dollars or dollar instruments.

Account Statement

The Account Statement Module is an online query driven component that provides a daily refreshed view of a Federal Program Agency's (FPA) Fund Balance with Treasury (FBWT). The Account Statement provides FPAs with a central source for retrieving a near real-time picture of their account balances.

Accountable Officials

Accountable individual, accountable official and accountable officer are used synonymously throughout Volume 5. The term "accountable official" is used in Title 31, United States Code, section 3527 ([31 U.S.C. § 3527](#)) to refer to the class of officers or employees of an agency who are pecuniarily liable for repayment of losses or deficiencies of public money, vouchers, checks, securities, or records. Such officials are appointed using a DoD (DD) Form 577, Appointment/Termination Record - Authorized Signature. Only officers and employees of an agency are eligible for appointment as accountable officials. Accountable Officials include Certifying Officers (CO), Disbursing Officers (DO), Deputy Disbursing Officers (DDO), Disbursing Agents (DA), cashiers, Departmental Accountable Officials (DAO), and similar employees who are accountable for government funds.

Accounts Receivable Office

The Accounts Receivable Office, normally located at a Defense Finance and Accounting Service site, records and reports accounts receivable and may be responsible for debt management and collection.

Agency Location Code (ALC)

A numeric symbol identifying the agency accounting and/or reporting office. A [three](#)-digit Regional Finance Center, [four](#)-digit Non-Treasury Disbursing Officer (NTDO), or [eight](#)-digit Treasury Disbursing Office identifier assigned by the [U.S. Department of Treasury](#), Bureau of the Fiscal Service (FS). An [eight](#)-digit ALC's first two digits identify the department or agency, the third and fourth identify the particular bureau within the department, and the remaining four identify the particular agency account within that bureau. DoD Disbursing Station Symbol Numbers (DSSNs) are NTDOs whose ALCs begin with four zeros and include the DSSN (e.g., 00001234).

Approving Official

A person responsible for one or more Government Purchase Card (GPC) holders or for approving travel vouchers using the Defense Travel System ([DTS](#)).

Automated Information Systems (AIS) Administrator

A person who programs, schedules, or operates computerized programs, and maintains one or more AIS.

Automated Teller Machine (ATM)

An electronic machine that dispenses cash and may perform other functions such as, funds transfers among a customer's various accounts and acceptance of deposits. Equipment generally is activated by a plastic card in combination with a personal identification number. Typically, when the cardholder's account is with a financial institution other than the one operating the ATM, its use results in the assessment of a fee from the ATM network (e.g., Armed Forces Financial Network, Cirrus, or Plus) that processes the transaction.

Basic Agreement

An intergovernmental instrument negotiated with the government of a friendly nation that states in general terms the policies of [DoD Instruction 5530.03](#), and authorizes the implementation of those provisions by mutual consent.

Business Event Type Code (BETC)

A code consisting of up to eight characters. The code is used in combination with the Treasury Account Symbol (TAS) to determine the transaction effect on the FBWT. The code indicates the type of activity being reported (e.g., disbursements, collections).

Canceled Treasury Check

The process whereby an issued Treasury check that has not been presented for payment is put in a paid status in the Treasury's Check Processing and Reconciliation System (CP&R).

Canceled Treasury Check Types

a. Canceled available check: A check in the possession of a DO and either canceled due to non-entitlement, or because it is mutilated or otherwise undeliverable.

b. Canceled unavailable check: A properly vouchered and issued check not held by a DO or payee (not received by payee, i.e., lost, stolen, or destroyed).

c. Mass-canceled check: A check issued before October 1, 1989 automatically canceled by the Treasury if not cashed by October 1, 1990.

d. Limited-payability canceled check: A check issued on or after October 1, 1989 automatically canceled by the Treasury if not cashed within 12 months from its date of issue.

Card Acquiring Service

The government's means of collecting debts via credit or debit card transactions, and whose objective is to increase electronic collections received by the government and process them in an efficient, timely and cost-effective manner.

Cardholder

A person an agency designates to be issued a GPC and/or government travel card.

Cash Holding Authority (CHA)

The authority to obtain and maintain cash on hand (upon approval of commander or other authority) at their personal risk. DDO, agents, and cashiers outside of the main disbursing office may hold cash at personal risk, with the amount to be held subject to the approval of the parent DO or local activity commander.

Cash and Investments Held Outside of Treasury (CIHO)

Funds (i.e., U.S. and foreign currency and coin) under the custodial responsibility of federal government agencies and/or their employees, officers, or agents which includes imprest funds, change funds, cash with agents (e.g., Paying Agent), and cash on deposit in a Limited Depositary Account (LDA).

Cashier

A military member or DoD civilian employee appointed by a DO to perform duties involving the handling of cash. The recruitment, screening, and selection of persons for these positions should be accomplished with primary regard to the sensitive nature of the position.

Central Accounting Reporting System (CARS)

The central accounting system of record for the FS. CARS is utilized for Treasury-level accounting and reporting for all federal agencies.

a. CARS Daily Reporter: Federal agency that submits the TAS/BETC reporting classification of each payment or collection daily to CARS via the Payment Information Repository (PIR) or Collection Information Repository (CIR). DoD DOs report cash disbursements and U.S. and foreign currency collections held for future operational needs via the Classification Transaction and Accountability (CTA) system.

b. CARS Non-Daily Reporter: Federal agency that reports disbursements and collections through monthly reporting on the Standard Form (SF) 1220, Statement of Transactions According to Appropriations, Funds and Receipt Accounts, and SF 1219, Statement of Accountability.

Certification

The act of attesting to the legality, propriety, and accuracy of a voucher for payment. See [31 U.S.C. § 3528](#).

Certifying Officer (CO)

An individual designated to attest to the correctness of statements, facts, accounts, and amounts appearing on a voucher, or other documents. A CO is pecuniarily liable for payments in accordance with 31 U.S.C. § 3528.

Change Fund Custodian

A person who operates from an appropriated fund sales activity (e.g., dining hall, hospital, commissary), is responsible for safeguarding the cash provided, and may be held pecuniarily liable for any loss in the change fund.

Check Issue Discrepancy

Occurs when the issue amount reported by the disbursing office differs from the amount for which the check was issued as evidenced by the printed amount on the check when presented for payment.

a. Check Issue Overdraft: Occurs when the amount printed on either a Treasury or limited depositary (LD) check and paid by the Treasury or LD, as applicable, is greater than the issue amount of that check reported by a DO on the check issue report, or when the amount printed on a check and paid by the Treasury or LD is greater than the amount due shown on the payment voucher.

b. Check Issue Underdraft: Occurs when the amount printed on either a Treasury or LD check and paid by the Treasury or LD bank, as applicable, is less than the issue amount of that check as reported by a DO on the check issue report, or when the amount printed on a check and paid by the Treasury or LD bank is less than the amount due shown on the payment voucher.

Civilian Pay

Addresses entitlements to DoD civilian employees and is also a functional area within the payment process.

Classification Transactions and Accountability (CTA)

A system used by FPAs to report their monthly accounting activity to the FS.

Coalition Forces

Temporary alliances of nations or factions for a specific purpose (e.g., those engaged internationally in times of conflict or war).

Coin

Metallic specie representing either U.S. dollars and foreign currency fractional units or multiples thereof.

Collection Agent

An individual appointed by a local commander to perform duties relating to the collection of official funds, including funds held as safekeeping deposits, at a point other than a disbursing office. Performs duties under the general supervision of, and as prescribed by, the appointing officer. Should not be involved with billing or accounting for funds received, and may not be appointed from among disbursing office personnel. Responsibility for duties and functions should be segregated between receipt of funds, recordkeeping, determination of the amount owed, and making demands on the debtor to minimize opportunities for unauthorized, fraudulent, or otherwise irregular acts.

Collections Information Repository (CIR)

Formerly the Transaction Reporting System (TRS). A collections reporting tool, supplying the latest information on deposits and details of collection transactions to federal agencies. It allows financial transaction information from all collections systems and settlement mechanisms to be exchanged in a single system.

Commander/Director

A person assigned as a combatant commander, base or installation commander, commanding officer, officer-in-charge, director of a defense activity, U.S. Property and Fiscal Officer (National Guard), or equivalent civilian head.

Continental United States

The 48 contiguous states and the District of Columbia.

Contingency Operation

A military operation designated by the Secretary of Defense (SecDef) in which members of the U.S. Armed Forces are or may become involved in military actions, operations, or hostilities against an enemy of the United States or an opposing military force; or results in the call, order to, or retention of, active duty of members of the Uniformed Services under [10 U.S.C. § 688](#), [10 U.S.C. § 12301\(a\)](#), [10 U.S.C. § 12302](#), [10 U.S.C. § 12304](#), and [10 U.S.C. § 12306](#), or any other law during a war or a national emergency declared by the President or the Congress. Includes, but is not limited to, a combat, peacekeeping, or noncombatant evacuation operation, or humanitarian assistance or disaster relief effort.

Contract Pay

The entitlement process to pay contractors.

Contractor

Any person, organization, or business concern engaged in a profession, trade, or business, and may also be a not-for-profit entity operating as a contractor, including state and local governments and foreign entities, but excluding federal entities and foreign governments, doing business under a contract with an element of the U.S. Government.

Credit Card Collections

A government-wide network under Treasury's Pay.gov program enabling federal agencies to accept collections by credit card over the internet for offered products and services.

Credit Gateway

A deposit program that the FS uses for the receipt of federal agency Fedwire and Automated Clearing House (ACH) credit transactions. A component of the FS's Collections and Cash Management Modernization initiative, a multi-year effort to simplify and modernize collections and cash management programs.

Currency

Paper money in the form of U.S. dollars and foreign banknotes.

Currency Custody Account

An arrangement approved by the Treasury allowing safety stocks of U.S. currency held as a 100% cash reserve on the books of overseas military central funding officers physically held in the government's contractor-operated Military Banking Facility (MBF), with daily settlement between the MBF operator and central funding officer. Absent ready access to the Federal Reserve System, assures the availability of U.S. currency to support the dollar economy exported to support U.S. Armed Forces stationed overseas.

Defense Check Reconciliation Module ([DCRM](#))

A check register that records the issuance of DoD manual checks. It includes Check Issue and Unavailable Check Cancellation subsystems.

*[Dependent](#)

See [37 U.S.C. § 401](#).

The term "dependent", with respect to a member of a uniformed service, means the following persons:

- a. Spouse;
- b. Unmarried child under the age of 21, including an adopted child or a stepchild, but not after the divorce of the member from the stepchild's natural parent;
- c. An unmarried illegitimate child under the age of 21, provided the parentage on the part of the member is established by a birth certificate with the Service Members' name cited, by court order, or by a signed affidavit of parentage (signed and sworn by a notary) from the Service Member;
- d. An unmarried child under the age of 21 who has been placed in the member's home by a local, state, or foreign government placement agency, or a government-approved adoption agency as a part of a normal adoption process provided the member produces a document from such agency establishing the fact of relationship and the effective date of relationship;
- e. An unmarried child who is at least 21 years of age, but under 23 years of age, who is enrolled in a full-time course of study at an educational institution approved by the Secretary concerned, when the member demonstrates in a statement listing the child's income and expenses that the child is in fact dependent on the member for over one-half of the child's support;

f. An unmarried child, 21 years of age or older, who is incapable of self-support because of a mental or physical incapacity and who is in fact dependent upon the member for more than one-half of the incapacitated child's support;

g. A parent, including a stepparent, parent by adoption, or any person who has stood in loco parentis at any time for a continuous period of at least five years before the member's 21st birthday, or a parent, a stepparent, or adopted parent of the member's spouse, any of whose dependency on the member has been determined in accordance with the rules and regulations established by the Secretary concerned; and

h. An unmarried person who has been placed in the Service Member's legal custody as a result of a court of competent jurisdiction in the United States, Puerto Rico, or a possession of the United States for a period of at least 12 months.

1. The person must be under 21 years of age or at least 21 years of age, but under 23 and be enrolled in a full-time course of study at an institution of higher learning approved by the Secretary concerned, or must not be capable of self-support because of a mental or physical incapacity that occurred while the person was a dependent of the Service Member or former Service Member before age 21 or 23;

2. The person must be dependent upon the member for over one-half of the person's support;

3. The person must reside with the member unless separated by the necessity of military service or to receive institutional care as a result of disability, incapacitation, or other circumstances as prescribed in the regulations of the Secretary concerned; and

4. The person may not be a dependent of any member under any other part of this definition.

Deputy Disbursing Officer (DDO)

A person appointed as a deputy to a DO to act in the name of and for that DO to perform any and all acts relating to the receipt, disbursement, custody, and accounting for public funds. The appointing DO may restrict the acts a deputy is authorized to perform. DDOs must be U.S. citizens.

Disbursing

The paying of public funds to entities to whom the Government is indebted; the collection and deposit of monies; the safeguarding of public funds; and the documenting, recording, and the reporting of these transactions.

Disbursing Agent (DA)

An agent of a DO, not appointed as a DDO, who generally operates a permanently-located disbursing office that is often geographically separated from the disbursing office.

Disbursing Office

An activity or the organizational unit of an activity whose principal function consists of the disbursement, collection, and reporting of public funds. Includes both tactical and non-tactical disbursing activities. Each has a DO and at least one DDO under the DO's direct control. Disbursing offices within DoD formerly were referred to as Finance and Accounting Offices, Accounting and Finance Offices, and Finance Offices.

Disbursing Officer (DO)

An officer or employee of a Federal Department or Agency designated to disburse money and render accounts according to laws and regulations governing the disbursement of public money (see [31 U.S.C. § 3321](#)). The term DO within Volume 5, unless otherwise stated (e.g., Treasury DO, U.S. DO (USDO)), is specific to DoD DOs. DoD DOs are considered NTDOs in Treasury terms.

Disbursing Station Symbol Number (DSSN)

A four-digit number assigned to each disbursing office by the Treasury. In addition, an identification number that indicates the authority to receive and disburse public funds and issue checks on behalf of the Treasury. See "Agency Location Code (ALC)."

Doctrine of Laches

A legal term based upon neglect or omission to do what one should do in a reasonable amount of time so as not to prejudice the adverse party. The defense can be used against an untimely claim to establish a presumption of abandonment of a right or claim (e.g., if a payee neglects or fails to file a timely request) the payer can presume that the payee has abandoned the claim.

DoD Activity

A ship, camp, post, station, base, activity, unit, installation, or facility operating within the DoD.

DoD Personnel

All DoD Active and Reserve Component military personnel, military retired members, DoD civilian employees (including foreign national direct hire and indirect hire, as well as non-appropriated fund employees), contractors and host nation support personnel.

Duplicate Check

A check issued by a DSSN with the same serial number as a previously issued check.

Electronic Commerce

A range of financial functions performed using data communication techniques.

Electronic Signature

An electronic sound, symbol, or process, attached to or logically associated with a contract or other record and executed or adopted by a person with the intent to sign the record. See [15 U.S.C. § 7006\(5\)](#).

Emergency Condition

Any situation resulting from war, armed aggression, or other hostilities against U.S. personnel or interests; and sudden, extensive natural or manmade disasters.

Employee

A civilian paid from appropriated (or non-appropriated, if applicable) funds.

Erroneous Payment

A fiscal irregularity resulting from routine or non-routine processed payments that are not in strict conformity with laws and regulations, including but not limited to, an overpayment to a payee; two or more payments to a payee for the same entitlement (i.e., a duplicate payment); a payment to the wrong payee; a Treasury check issue overdraft (in some cases); a shortage caused by negotiation of both an original and a substitute Treasury check; payment based on fraudulent, forged, or altered documents; or a payment made in violation of law or regulation.

Exchange-for-Cash Check

A check issued by a DO to obtain cash funds for disbursements or in exchange-for-cash for official or accommodation purposes.

Facsimile Signature

An impression of a signature made by a rubber stamp and authenticated by the initials of the **CO** or the designated individual. May also be a metal plate or electronic digitized facsimile signature medium.

Federal Program Agency (FPA)

A department, instrumentality, office, commission, board, service, or other establishment of the U.S. Government.

Federal Reserve Bank (FRB)

The central bank of the United States, divided into 12 Federal district banks. Created by the Federal Reserve Act of 1913 to provide the nation with a safe, flexible and stable monetary and financial system.

Financial Services

Commonly associated with financial institutions in the United States, such as electronic banking (e.g., ATMs and personal computing banking); in-store banking; checking, share and savings accounts; funds transfers; sales of official checks, money orders, and travelers checks; loan services; safe deposit boxes; trust services; sale and redemption of U.S. Savings Bonds, and acceptance of utility payments; and any other services provided by financial institutions.

Fiscal Irregularity

Any action (or lack thereof), event, practice, or circumstance (or lack thereof) that causes an out-of-balance condition in the financial accountability of a DO, deputy, agent, and cashier entrusted with public funds. Includes irregularities resulting from physical losses of funds or erroneous payments.

Foreign Exchange

Identifies the conversion (exchange) of foreign currencies (i.e., the legal monetary unit of a foreign nation), and negotiable instruments, such as travelers checks, money orders, and bank drafts payable in such monetary units.

Foreign National Personnel

A foreign national employee is an individual who is employed by or performing work for U.S. forces outside the United States, its territories, and possessions in a system of employment. Under the direct hire arrangement, the legal employer of the foreign national assumes responsibility for all administrative and management functions related to foreign national employment. Under the indirect hire arrangement, the host government serves as the legal employer of U.S. forces foreign nationals.

Fraudulent Claim

Any claim against the government involving the presentation of false information, or misrepresentation on the part of a claimant or any other party having an interest in a claim.

Functional Area

A specialized entitlement area (also known as a subject matter area) not under the direct cognizance/control of the DO. Functional areas are responsible for specific types of transactions, e.g., accounts control, travel, military pay, commercial sales, and civilian pay. Functional areas are not considered part of the disbursing office.

Fund Balance with Treasury (FBWT)

An asset account that shows the available budget spending authority of federal agencies. Collections and disbursements increase or decrease the balance in the account.

G-Invoicing

G-Invoicing offers an online portal to support the exchange of information in Intragovernmental Transactions activity by federal trading partners. G-Invoicing will serve as an agreement broker (the mechanism by which agencies arrange and negotiate information electronically) and a data exchange platform.

General Depositary

A financial institution designated by the Treasury to accept deposits of cash and checks from specifically authorized DOs.

Governmentwide Accounting (GWA) and Reporting Modernization

A project addressing the central accounting and reporting functions and processes associated with budget execution, accountability, and cash/other asset management. Includes the collection and dissemination of financial management and accounting information from and to federal program agencies. Also includes the business processes in the FS that are related to ledger accounting for each appropriation, fund, and receipt account's FBWT, General Ledger accounting for the cash and monetary assets of the Government, and the preparation of the Monthly Treasury Statement and the U.S. Government Combined Statement and Appendix. This project improves timeliness and accuracy to support financial analysis and decision-making.

Holder-in-Due-Course

A person, financial institution, or business other than the original payee who in good faith takes possession of a check through endorsement. A claim to payment by a holder-in-due-course will be honored, even if the original payee is not due or entitled to the check.

Host Nation

A nation supported by the forces and/or supplies of allied nations; and/or coalition partners located on, operating in, or transiting through its territory.

Imprest Fund

A cash fund of a fixed amount established by an advance of funds, with or without charge to an appropriation, from a DO to a duly appointed cashier, for disbursement as needed in making cash payments for relatively small purchases.

Imprest Fund Cashier

An individual appointed by the local commander to make authorized cash payments for materials or services. An imprest fund cashier is required to maintain custody of public funds and to file periodic vouchers to account for and replenish the imprest fund. Disbursing personnel are not eligible for appointment as imprest fund cashiers.

International Treasury Services (ITS)

Treasury's comprehensive international payment and collection system, and the preferred payment method for foreign currency transactions.

Intra-governmental Payment and Collection (IPAC) System

A Treasury automated system used for the payment and collection of intra-governmental billing services and supplies.

a. IPAC Adjustment: A reversal of a transaction by the receiving agency up to but not to exceed the amount of the original transaction reported in the accounting month in which they are processed in IPAC. Receiving agencies cannot reject IPAC transactions that have been processed by the Treasury.

b. IPAC Billing Agency: The agency originating a collection or receiving a payment transaction. In the Treasury's Disbursing and Adjustment menu screens, the billing ALC represents the originator of the transaction.

c. IPAC Corrections: Refers to erroneous reporting on the SF 1219. The error can be caused by amounts being over or understated or by the failure of an agency to record the transaction in the proper month of accountability.

d. IPAC Customer Agency: Originates a payment or receives a collection transaction. In the Treasury's Disbursing menu screen, the customer ALC represents the agency receiving the transaction. In the Treasury's Adjustment menu screen, the Billing ALC of Original Bill field represents the agency receiving the adjustment transaction.

Limited Depositary (LD)

A U.S. or foreign commercial bank designated by the Treasury to receive deposits from DOs for credit to their official LD checking accounts.

Limited Depositary Account (LDA)

A LDA is a checking account, generally in a foreign currency, maintained in an LD by a DO, DDO, or another agent specifically designated by the DO, in his or her own name.

Lockbox Service

A collection and processing service provided by a financial institution to accelerate cash flow to Treasury's General Account.

Member

A person appointed, enlisted, or conscripted into a Uniformed Service or a person retired from active duty (including those receiving retainer pay) or a reserve component.

Micro-purchase Threshold

See the [*Federal Acquisition Regulation, Subpart 2.101.*](#)

Military Banking Facility (MBF)

A banking office normally located on an overseas DoD installation and operated by a financial institution the Secretary of the Treasury specifically has authorized under its designation as a "Depository and Financial Agent of the U.S. Government" to provide certain banking services at the installation.

Military Pay

An entitlement and pay process for military members. Also refers to a functional pay area. Examples:

a. Armed Forces Americas (AA): Central and South America, e.g., Army Post Office (APO) and Fleet Post Office (FPO) Miami are now APO and FPO AA, respectively.

b. Armed Forces Europe (AE): Canada, Europe, Africa, and the Middle East, e.g., APO and FPO New York are now APO and FPO AE, respectively.

c. Armed Forces Pacific (AP): Pacific area, e.g., APO and FPO San Francisco, and APO and FPO Seattle are now APO and FPO AP, respectively.

National Bank

An association approved and chartered by the Comptroller of the Currency to operate a banking business.

Negligence

The failure to act as a reasonably prudent person would act under similar facts, conditions, and circumstances.

Non-tactical Disbursing Activity

Any disbursing activity permanently assigned to an installation and not subject to mobilization or deployment.

Officer or Military Officer

A commissioned or warrant officer (appointed officer) of the Uniformed Services.

Official Authorization List

Identifies all individuals who are authorized to transact business and provide instructions to the FRB on behalf of a Component.

On-base

Refers to physical presence on a domestic or overseas DoD installation.

Original Signature

A signature is in permanent dark blue, blue-black, or black ink. For electronic and digital signatures, see Chapter 1, [subparagraph 3.5.3](#).

Outstanding Check

A check that Treasury's CP&R system shows as issued but not paid.

Over-the-Counter Channel Application (OTCnet)

A web-based application that integrates Check Capture and Deposit Reporting functionalities in one system. Created from two legacy systems, Paper Check Conversion Over-the-Counter and Treasury General Account (TGA) Deposit Reporting Network, the [Over-the-Counter Channel Application \(OTCnet\)](#) application design accommodates check capture and deposit reporting using electronic collection mechanisms instead of paper based processing. The OTCnet application check capture activities are primarily performed online; however, there is an offline check capture capability for agencies operating in locations where internet connectivity and bandwidth are intermittent or unavailable.

Overage of Funds

An amount greater than the amount shown to be on hand by the daily accountability records.

Overseas

A military installation (or community) located outside the United States, the District of Columbia, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, the Commonwealth of Puerto Rico, or the U.S. Virgin Islands.

Paid Status

Identifies a Treasury check presented to the Treasury for payment through the banking system, or reported as void (zero value issue), or canceled.

Pay (Salary)

Includes basic, special, incentive, retired or retainer pay; consultant's fees; and any other authorized pay and allowances.

Pay.gov

A program developed to meet the commitment to process collections electronically using internet technologies. Satisfies agencies and consumers demands for electronic alternatives by providing the ability to complete forms, make payments, and submit queries 24 hours a day electronically.

Pay Period

Normally biweekly for civilians working for federal agencies, may be monthly or twice monthly for active duty military personnel, monthly for retirees, or periodically based on completion of active or inactive duty for training for Reserve Component personnel.

Payability

The length of time during which a Treasury check is negotiable. Also relates to “claimability,” the length of time a payee may present a claim of non-receipt, loss, or theft of a Treasury check to a government agency. Claims are valid on underlying obligations until expiration of the statute of limitations, normally six years. If a payee’s right to entitlement has expired, the claim is denied, but under [31 U.S.C. § 3702](#), the SecDef may waive this for claims not exceeding \$25,000.

Paying Agent (PA)

PAs qualifications and responsibilities are;

- a. A military member or DoD civilian employee appointed by a commander to act as an agent of a DO to make specific payments, currency conversions, or check cashing transactions from cash the DO temporarily advances to the agent;
- b. An individual whose regular duties do not involve disbursing functions and who is not organizationally located in the disbursing office;
- c. Appointed to the position of PA as an additional duty, is under the exclusive supervision of the DO in all matters concerning custody and disposition of cash advanced, and complies with all instructions and regulations pertaining to their PA duties issued by the DO;
- d. Makes payments or currency conversions for and in the name of the DO to whom the PA is appointed; and
- e. Holds the advanced cash at personal risk, and must account for them to the DO immediately upon completion of the transaction(s) for which advanced.

Payment Information Repository (PIR)

A centralized information repository for federal payment-related data to improve and increase the transparency of government payments and streamline the reporting of accounting classification information from NTDOs, e.g., DoD DOs.

Payment Review Official

A person who conducts pre-payment and post-payment reviews (not an inherently-governmental function), issues and controls inquiries regarding possible financial irregularities, but is not subject to pecuniary liability because of not being in an accountable position.

Pecuniary Liability

Personal financial liability for fiscal irregularities of accountable officials, as an incentive to guard against errors and theft by others, as well as, protect the government against errors and dishonesty by the officers themselves.

Physical Loss of Funds

A physical loss of funds includes:

- a. A loss of U.S. Government cash by theft, embezzlement, unexplained disappearance, or cash handling errors;

- b. A loss of paid vouchers and/or negotiable instruments from a disbursing office;
- c. A loss of an official deposit in route from a disbursing office to a depository or after confirmation by a depository;
- d. Any payment based on fraudulent, forged, or altered documents prepared or presented by individuals, both accountable and non-accountable disbursing personnel, who work in the disbursing office;
- e. A loss or theft of cash from an imprest fund;
- f. A failure to obtain (or loss of) official receipts and/or documents representing cash;
- g. A loss or destruction by fire, accident, or natural disaster;
- h. Unidentifiable DO suspense account charges; or
- i. Losses associated with counterfeit currency transactions.

Presumption of Negligence

Title 31 U.S.C. § 3527, is the basis for automatically holding a [CO](#) or DO pecuniarily liable for a fiscal irregularity. The presumption of negligence established by law does not apply to [DAO](#).

Prevailing Rate of Exchange

The most favorable rate legally available to the U.S. Government for acquisition of foreign currencies for its official expenditures and accommodation exchange transactions.

Public Funds

Cash, paid vouchers, or cash collected by a disbursing official for goods or services subject to the control or regulation of the United States or any of its officers, agents, or employees.

Receipt, Appropriation (Expenditure), and Fund Accounts

See [Treasury Financial Manual, Volume 1, Part 2, Section 1520](#) for complete account descriptions.

Receiving Official

A military member or DoD civilian employee authorized to substantiate the receipt, inspection, and acceptance of goods and/or services.

Recertified Payment

A replacement payment by Treasury check with a check serial number different from that of the original check. The replacement Treasury check may be issued after the presentation and review of required documentation to replace any lost, stolen, or destroyed original check (except for holder-in-due-course situations), regardless of the disbursement purpose (e.g., pay, travel, or vendor payment).

Relief from Liability

Pursuant to 31 U.S.C. § 3527, an action taken by an individual with appropriate legal authority to relieve DOs, certifying officers, or other accountable officials of pecuniary liability for a fiscal irregularity.

Replacement Check

A check issued to replace a check that is for a proper payment but has been classified as void, not been reported to the Treasury as a valid check issue, or is not cashable due to misprint or mutilation during the issue process.

Retiree

A military person retired from active duty or a Reserve Component, including those receiving retainer pay.

Review Official

A military member or DoD civilian employee appointed in writing to conduct pre-payment and post-payment reviews, to initiate and control inquiries, and to initiate investigations of possible fiscal irregularities.

Salary Offset

A deduction from a current pay account to liquidate a debt. May be from basic, special, incentive, retired, and/or retainer pay; or in the case of an individual not entitled to basic pay, other authorized pay.

Seized Funds

Cash confiscated by coalition forces during military operations and governed by the laws and usages of war. Normally captured foreign currency is delivered promptly into the custody of the State Department's USDO supporting the particular country involved. Any DoD DO acquiring captured foreign currency safeguards and delivers it to the USDO as soon as possible, but does not collect them into his or her accountability.

Settlement Office

A disbursing office designated to clear outstanding transactions and/or deficiencies from the accounts of predecessor DOs. The DO assigned to the settlement office is referred to as a settlement officer.

Shared Accounting Module (SAM)

An FS application that carries out the process of validating or deriving the appropriate TAS and BETC combinations to assist GWA in classifying financial transactions as they occur.

Smart Cards

Includes: Stored Value Cards (SVC), debit cards and combination cards (hybrids that contain both SVC and debit card features). These cards store or provide access to “electronic money” and provide a more secure method of handling funds, alleviate the need to carry cash and provide electronic payment to vendors for items purchased or services rendered.

Spoiled Check

A check that has been reported to the Treasury as a valid issue, has been returned by the payee as not cashable due to mutilation or defect, represented a valid payment to the payee, and is less than one year old.

*Sponsor

See 20 U.S.C. § 932.

A person who is

- a. a member of the Armed Forces serving on active duty, or
- b. a full-time civilian officer or employee of the DoD and a citizen or national of the United States; and
- c. who is authorized to transport dependents to or from an overseas area at Government expense and is provided an allowance for living quarters in that area.

Standard Financial Information Structure (SFIS)

The SFIS is a comprehensive data structure that supports requirements for budgeting, financial accounting, cost/performance, interoperability, and external reporting needs across the DoD enterprise. It is a common business language that enables budgeting, performance-based management, and the generation of financial statements. SFIS standardizes financial reporting across DoD and allows revenues and expenses to be reported by programs that align with major goals, rather than basing reporting primarily on appropriation categories. It also enables

decision-makers to efficiently compare programs and their associated activities and costs across DoD and provides a basis for common valuation of DoD programs, assets, and liabilities. SFIS compliance is required for all target accounting systems and target financial business feeder systems (Volume 1, Chapter 4).

Standard Line of Accounting (SLOA)

The DoD SLOA is a subset of the SFIS data standard elements. The SLOA is comprised of the minimum SFIS data elements that must be exchanged for business events that have an accounting impact at any point from the initial commitment to the final posting in the appropriate general ledger. This includes commitments, obligations, expenditures, and disbursements. All collection and disbursement vouchers reported in the DoD business systems must meet SLOA requirements. The SLOA accommodates Treasury reporting requirements for daily cash reporting (Volume 1, Chapter 4).

Standard Reporting Format (SRF)

SRF is a Fiscal Service defined input file specification defining the data elements and validation rules that all NTDOs use to report issued payments and associated TAS/BETC information. Payment and accounting data are submitted to the [PIR](#) reporting tool using SRF.

Stored Value Card (SVC)

A smart card application capable of storing electronic monetary value on the card's embedded computer chip. The SVC is used to conduct financial transactions in a number of DoD settings. These include: EagleCash, Navy Cash, Marine Cash, Ezpay, Debit cards, combination cards, and others.

Supplemental Agreement

Statement of local operating procedures formulated and used by the commanders of the Armed Forces of two friendly foreign nations, whose governments have signed a basic agreement, as contemplated under DoD [Instruction 5530.03](#). Use these procedures in territories of mutual concern to provide each other with emergency financial support, under the policies of the basic agreement. Supplemental agreements may be entered into by commanders of unified or separate Armed Forces, as considered appropriate.

Suspense/Budget Clearing Accounts

A disbursement transaction that has been reported to the Treasury [and](#) has not been identified to a specific fund holder or is placed in a suspense account while research efforts are underway. Budget Clearing Account (suspense), F3875, temporarily credits unclassified transactions from the public when there is a reasonable presumption that the amounts belong to the agency.

Tactical Disbursing Activity

Any tactical unit (including Navy ships) authorized to provide disbursing services under an assigned DSSN and is subject to movement from one location to another. Some of these activities provide disbursing services on a full-time basis (e.g., Navy ships); others perform them only while deployed (or mobilized). When not deployed, the DSSNs are held in reserve, in an inactive status, for use on short notice as required.

Tolled

To suspend or stop temporarily, e.g., an event that suspends the running of time related to a statute of limitations.

Transaction Reporting System (TRS)

See Collections Information Repository (CIR).

Travel Authorizing Official

An individual designated in writing by organizational title having authority to issue travel orders, sign/approve travelers' claims, verify that all transactions made were necessary expenses, and were accomplished in accordance with the [Joint Travel Regulations](#).

Travel Order

A document authorizing official government travel.

Traveler

A military member, DoD civilian employee, or invitational traveler traveling in an official capacity.

Treasury Account Symbol (TAS)

An identification code assigned by the Department of the Treasury. The TAS represents individual appropriation, receipt, and other fund accounts for agencies and bureaus.

Treasury Check Information System (TCIS)

A system that records and reconciles the worldwide issuance and payment of Treasury checks. It also allows end users to query the Payments, Claims & Enhanced Reconciliation system for claim status on ACH payments.

Treasury General Account (TGA)

A demand account titled TGA in a designated commercial bank specifically authorized by the Treasury Department to maintain that account in the name of the Treasury for the purpose of accepting deposits. A non-U.S. bank located overseas (an International TGA) may also be authorized to perform this function.

Undeliverable Check

A check not delivered to the payee within 60 days after the month of issue.

Valuables

Any articles or representations of value in which the United States has any interest, or in connection with which it has any obligation or responsibility.

Vendor

See “Contractor.”

Vendor Pay

The process of computing the amount due a contractor or vendor for all contract/purchase orders, except those administered by the Defense Contract Management Agency, or a functional pay area.

Voided Check

A check pre-numbered with a serial number, invalidated for any reason before issuance by a DO, and reported with a zero dollar value.

Voucher

A document certified by a [CO](#) to a DO (under [31 U.S.C. § 3325](#)) to make a payment.

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [***bold, italic, blue, and underlined font***](#).

The previous version dated [June 2019](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
2.4 (020204)	Added a consolidated “Supporting Documentation” paragraph to remove duplication throughout the chapter.	Addition
2.8.2.1.1. (020208.B.1.a).	This revision incorporates relevant information from the Deputy Chief Financial Officer (DCFO) policy memorandum, “Mandatory Use of Root Cause Indicator Code (FPM 20-04),” dated April 18, 2020. The procedural level information from the memorandum remains available on the DCFO Financial Management Policy and Reporting web page under the “Dual Purpose Policy Memos & Other Information” section.	Revision
2.9 (020209)	Added a “System-Generated JVs” section to provide guidance for systems-generated journal voucher (JV) adjustments.	Addition
2.10.3.2. (020210.C.2.)	Added guidance for out of balance JV adjustments.	Addition

CHAPTER 2

FINANCIAL REPORTS, ROLES AND RESPONSIBILITIES

1.0 GENERAL (0201)

1.1 Purpose (020101)

This chapter defines the roles and responsibilities in the preparation and issuance of financial reports for Department of Defense (DoD) Components. DoD Components and the Defense Finance and Accounting Service (DFAS) are responsible for the proper and consistent preparation of financial reports at the DoD Component departmental, intermediate, and installation level. In some instances, DoD Components prepare their own financial reports without accounting support from DFAS. Ultimately, each DoD Component is responsible for the accuracy and completeness of financial information in the reports that present the financial effects of its operations.

1.1.1. The policies within this chapter apply to all DoD Components and includes those entities whose departmental, intermediate, and installation level financial reports are prepared by DFAS, DoD Components and organizations operating Enterprise Resource Planning (ERP) systems under an approved agreement with DFAS, certain DoD Components which prepare their own financial reports (e.g., the U.S. Army Corps of Engineers), and organizations required to perform their own accounting due to security considerations.

1.1.2. In those instances in which DFAS does not have financial report preparation responsibility, the reporting entity **must** fulfill the responsibilities assigned in this chapter at both the DFAS and DoD Component level. The requirements for the audited or interim financial statements addressed in the Office of Management and Budget [*\(OMB\) Circular A-136*](#), “Financial Reporting Requirements” **are contained in** Volume 6B, “Form and Content of the Department of Defense Audited Financial Statements.”

1.2 Authoritative Guidance (020102)

This chapter prescribes the roles, responsibilities, and authoritative guidance for preparation and issuance of financial reports for DoD Components in accordance with the reporting responsibilities and internal control provisions identified in:

1.2.1. [Government Accountability Office \(GAO\) “Federal Information System Controls Audit Manual” \(*FISCAM*\)](#);

1.2.2. [GAO *Financial Audit Manual* \(FAM\)](#);

1.2.3. [OMB Circular A-123](#), “Management's Responsibility for Enterprise Risk Management and Internal Control;”

1.2.4. [OMB Circular A-136](#), “Financial Reporting Requirements;”

1.2.5. Office of the Under Secretary of Defense (Comptroller) (OUSD(C))/Chief Financial Officer (CFO) [“DoD Financial Statement Audit Guide;”](#) and

1.2.6. OUSD(C)/CFO [“DoD Internal Control Over Financial Reporting Guide.”](#)

2.0 RESPONSIBILITIES (0202)

2.1 Stewardship and General Responsibilities (020201)

The U.S. Congress provides resources to finance the programs, missions, and functions of DoD and its Components. Financial reports are a tool to display the status and uses of those resources at a point in time. DoD Components and DFAS as their service provider have responsibilities to ensure that financial information is accurate and timely in order for managers to make sound decisions and exercise proper stewardship over these resources. Refer to the “DoD Internal Control Over Financial Reporting Guide” for additional information on roles and responsibilities for internal controls over financial reporting.

2.2 Internal Controls (020202)

2.2.1. DoD Components. DoD Components must create and maintain internal controls to ensure that data input in DoD Component-controlled systems, or provided to DFAS to be recorded in the accounting systems and subsequently used in financial reports, are accurate, complete, supportable, and input timely into the finance and accounting systems. Refer to the “DoD Internal Control Over Financial Reporting Guide” for additional internal controls applicable to DoD Components.

2.2.1.1. DoD Components **must** maintain **and** create controls to ensure actual or potential Antideficiency Act violations are reported, reviewed, and investigated in accordance with Volume 14, Chapter 2.

2.2.1.2. DoD Components **must** perform and document periodic reviews of system functionality to ensure controls are in place to verify the authorization of recorded transactions and compliance with the FISCAM framework.

2.2.1.3. DoD Components **must** comply with internal control policies contained in [DoD Instruction \(DoDI\) 8510.01](#), “Risk Management Framework (RFM);” Volume 1, Chapter 3; and the “DoD Internal Control Over Financial Reporting Guide.”

2.2.2. **DFAS**. DFAS **must** maintain or create controls to ensure that data provided by each DoD Component is recorded accurately and processed timely for financial reporting. Refer to the “DoD Internal Control Over Financial Reporting Guide” for additional internal controls applicable to DFAS reporting.

2.2.2.1. DFAS **must** maintain or create controls to ensure actual or potential Antideficiency Act violations are reported to DoD Components for their review and investigation in accordance with Volume 14, Chapter 2.

2.2.2.2. DFAS **must** perform and document periodic reviews of DFAS system functionality to ensure controls are in place to verify the authorization of recorded transactions and compliance with the FISCAM framework.

2.2.2.3. DFAS **must** maintain feeder files used in financial reporting from accounting systems of record (component-controlled), in accordance with records retention guidance contained in Volume 1, Chapter 9.

2.2.2.4. DFAS **must** maintain supporting documentation for corrections made to DoD Component submissions in intermediate edit systems as part of the audit trail for the reporting period. DFAS **must** maintain records to support adjustments to DoD Component submissions and assign transactions that fail to pass edits to DFAS or the DoD Component for research and correction.

2.2.2.5. DFAS **must** provide any adjustments made to DoD Component submissions so they can be recorded by the DoD Component in the accounting systems of record, if not already recorded in the accounting systems of record in the current or subsequent period, before the beginning of the next reporting cycle. DFAS and the DoD Component must make every effort to resolve any discrepancies prior to the end of the reporting period. DFAS and the DoD Components must track unresolved discrepancies for research and correction as soon as possible after the end of the reporting period.

2.2.2.6. DFAS **must** comply with internal control policies contained in DoDI 8510.01; Volume 1, Chapter 3; and the “DoD Internal Control Over Financial Reporting Guide.”

2.3 Audit Trails (020203)

2.3.1. DoD Components. DoD Components **must** maintain audit trails in sufficient detail, including the rationale, justification, and approvals to permit tracing of transactions and balances from their sources to their transmission to DFAS. Audit trails are necessary to demonstrate the accuracy, completeness, and timeliness of the transaction. In addition, audit trails provide documentary support for all data generated by the DoD Component and submitted to DFAS for recording in the accounting systems and use in financial reports.

2.3.2. DFAS. DFAS **must** clearly document processes and internal controls and maintain a complete and documented audit trail to support the reports it prepares. The organization that translates the information into an electronic mode **must** retain supporting documents or images of the supporting documents. DFAS **must** establish documented business rules and internal controls to ensure feeder file data is received, processed, and compiled in departmental reporting system output files.

2.3.2.1. DFAS **must** sufficiently document adjustments to DoD Component submissions to assist approving officials and others, such as auditors, in understanding the reason for preparing the adjustment, and to support the validity of adjustments prepared during the reporting period.

2.3.2.2. DFAS **must** ensure documentation is readily available as part of the audit trail for the reporting period. The documentation must be readily available for assisting auditors, and those involved in financial statement preparation, to understand how feeder file records are processed.

***2.4 Supporting Documentation (020204)**

2.4.1. DoD Components and DFAS as their service provider must maintain supporting documentation that will support DoD's accounting cycle. The DoD accounting cycle encompasses the processing and recording of all financial transactions in the proper period and includes the proper presentation on the financial statements and closing of the accounts.

2.4.2. DoD Components and DFAS as their service provider must also have the ability to display the rationale and justification for the adjustment, the dollar amount of errors or conditions related to the transactions or records proposed for adjustment, the date of adjustment, and the name and position of the individual(s) approving the adjustment. The documentation must be readily available in one or a combination of the following media: hardcopy, systemically stored electronic records, or electronic files maintained in an external system or location.

2.4.3. Proper documentation in hard copy, electronic form, or a combination of both is necessary to support all **journal voucher (JV)** entries. JV documentation **must** include reporting elements deemed critical to assess the accuracy and completeness of financial information, applicable criteria to support the rationale for preparing the adjustment, Treasury Account Symbols or entity codes impacted, and the calculation of the dollar amount of the adjustment. Maintain clear documentation of the JV preparer, reviewer (if used), and approver(s) with the JV documentation. Attach supporting documentation to a copy of the JV. In some cases, it may not be practical to attach all of the documentation to the JV because of the large number of detailed transactions summarized on it. In those cases, attach specific and detailed information summarizing the content and identifying the location of the supporting documentation to the JV.

2.5 Reconciliation (020205)

2.5.1. Many financial balances (e.g., general ledger (GL) proprietary and budgetary accounts, such as assets, liabilities, commitments, and undelivered orders) require supporting subsidiary records to validate the amount of the financial balance. Reconcile subsidiary records to financial balances in accordance with the policies, requirements, and frequencies prescribed in [this paragraph](#).

2.5.1.1. DoD Components **must** maintain the supporting records for many financial balances. An individual authorized by each DoD Component **must** periodically validate the accuracy of such subsidiary records against applicable physical assets or other appropriate confirmations of the source documents. DoD Components perform periodic physical inventories in accordance with [DoDI 5000.64](#), "Accountability and Management of DoD Equipment and Other Accountable Property," for tangible equipment, and [DoDI 4165.14](#), "Real Property Inventory (RPI) and Forecasting," for real property. Validations must be documented, signed, and dated by the individual authorized by the DoD Component.

2.5.1.1.1. Various regulations require periodic counting, or another physical verification in the case of equipment, inventories, supplies and materials, and real property, depending upon the nature of the asset. Refer to the GAO FAM Volume 1, Section 260, “Identify Risk Factors,” for controls related to the completeness and accuracy of inventory records.

2.5.1.1.2. Periodic validation and/or reconciliation is required in the case of commitments, obligations, accounts receivable, and accounts payable. These validations **must** include the review of the documentary evidence that initiated the financial transaction to ensure the integrity of source data. For additional information, see Volume 3, Chapter 8.

2.5.1.2. **DoD Components** must document and provide changes in the source data to DFAS for proper recording. The reconciliation of source data with reported balances is a joint responsibility of DFAS and the DoD Component.

2.5.1.3. **DFAS** **must** establish procedures to ensure that all GL balances, and other associated financial balances, are validated and/or reconciled with supporting records, including source data, in accordance with DoD policy. See Volume 3, Chapter 8.

2.5.1.3.1. DFAS **must** establish and maintain supporting subsidiary detail transactions that are traceable and reconcile to reported financial statement balances. DoD Components **must** participate in the reconciliation process for these subsidiary records when the source documents, or transactions that require research to complete the reconciliation, are retained by the DoD Component.

2.5.1.3.2. When the DoD Component maintains accounting system and trial balance subsidiary records, DFAS **must** establish a reconciliation schedule, mutually agreed to by the DoD Component, and subject to approval by OUSD(C), to reconcile the subsidiary records with the financial balance. The reconciliation of such supporting records with the financial balance is a joint responsibility of DFAS and the DoD Component.

2.5.1.4. DFAS **must** investigate unreconciled differences and document adjustments required to balance the GL amount and the amount of the subsidiary records with the rationale, justification, and approvals.

2.5.1.5. DFAS **must** perform reconciliations on a monthly basis, at a minimum, to determine the cause of differences and take appropriate corrective actions to ensure the accuracy and integrity of the accounting system and monthly reports when unreconcilable differences between the GL and the subsidiary records exceed \$1 million. Continue to perform monthly reconciliations until the **irreconcilable** difference is less than \$1 million.

2.5.1.6. DFAS **must** reconcile changes in source data, made by the DoD Component, with reported balances. The reconciliation of source data with reported balances is a joint responsibility of DFAS and the DoD Component.

2.6 Reporting Schedules (020206)

2.6.1. DFAS **must** establish procedures requiring joint development of report preparation schedules with DoD Components according to the timeframes established by the U.S. Department of the Treasury (Treasury), Bureau of the Fiscal Service, Governmentwide Treasury Account Symbol (**GTAS**). DFAS and the DoD Components **must** work to resolve issues identified in the report preparation process according to the GTAS schedule.

2.6.2. Reporting schedules for reports provided to external recipients **must** include the opportunity to present a draft of the report to the DoD Component for review and approval prior to release to the recipients.

2.7 Draft Reports (020207)

2.7.1. DoD Components. DoD Components **must** review DFAS reports to assess the accuracy of the financial information reported. The review **must** identify errors, omissions, and significant diversions from budgeted or planned amounts and levels of activity. The DoD Component **must**:

2.7.1.1. Research and propose adjustments to correct abnormal balances. A GL balance is abnormal when the reported balance does not comply with the normal debit or credit balance established in the DoD Standard Reporting Chart of Accounts. DoD Components **must** maintain supporting documentation **in accordance with paragraph 020204** for requested adjustments to financial reports and provide the support to DFAS;

2.7.1.2. Research any unusual trends and comparisons with the prior year and/or prior period amounts to determine whether corrective action is required;

2.7.1.3. Ensure that the amounts in the financial reports are consistent and reconcilable with the same financial data included in management reports prepared by the DoD Component;

2.7.1.4. Not change draft reports provided by DFAS or release the reports to external recipients. For errors or omissions identified in a draft report, submit a request to DFAS to revise the report and include changes in the final report; and

2.7.1.5. Validate reports created within their ERP systems. DoD Components **must** perform quality reviews to confirm that:

2.7.1.5.1. Amounts on the report are mathematically correct;

2.7.1.5.2. Internal relationships of amounts included in a report that are interdependent are correct;

2.7.1.5.3. Abnormal account balances, such as negative balances or unusual amounts, are researched and resolved, if possible. If unresolved, include comprehensive explanations identifying root causes and the timeline for resolution; and

2.7.1.5.4. Unusual trends and comparison with the prior year and/or prior year amounts are identified, researched, and explained.

2.7.2. DFAS. DFAS **must** validate reports to ensure reported amounts agree with the official accounting records prior to release to DoD Components for review and approval or release to external recipients. DFAS **must** perform quality reviews to confirm that:

2.7.2.1. Amounts on the report are mathematically correct;

2.7.2.2. Internal relationships of amounts included in a report that are interdependent are correct;

2.7.2.3. Abnormal account balances, such as negative balances or unusual amounts, are researched and resolved, if possible. If unresolved, include comprehensive explanations identifying root causes and the timeline for resolution;

2.7.2.4. Reported amounts for the same data elements for the same report period are consistent across all similar financial reports; and

2.7.2.5. Unusual trends and comparisons with the prior year and/or prior period amounts are identified and called to the attention of the DoD Component.

2.7.3. OUSD(C). Refer DoD Component-proposed changes to the draft reports, with which DFAS does not concur, to the OUSD(C) Directorate with oversight responsibility for the subject matter, for adjudication before the end of the current reporting cycle. The DoD Component, or DFAS, may submit requests for adjudication through their reporting chain of command to OUSD(C).

2.8 Journal Voucher Adjustments (020208)

2.8.1. Journal Vouchers (JVs) are all adjustments recorded in system transaction registers and the GL identifying summary-level adjustments to the GL. **Accounting systems generally consist of two forms of JV adjustments, manual JVs and system-generated JVs.** JVs are required for several reasons, including instances when subsidiary records do not reconcile with the financial balances, transactions need correction, and adjustments are required to align obligations, accruals, or expenses with the liquidation amounts for receipts, acceptances, and/or disbursements. JVs do not include transactions and processes used to record detail amounts in subsidiary ledgers as standard business transactions.

2.8.2. Either DFAS as the service provider or the DoD Components may identify the need to make adjustments. Both DFAS and DoD Components **must** support adjustments with sufficiently detailed documentation to provide an audit trail to the source transaction(s) that require the adjustments. (See paragraph 020204.)

2.8.2.1. DoD Components. When, during the applicable reporting period, a DoD Component identifies an adjustment pertaining to information included in a monthly, quarterly, semiannual, or annual report, the adjustment will be included as part of the financial information used to produce final report balances.

* 2.8.2.1.1. DoD Components must utilize the Root Cause Indicator Codes (RCIC) when recording manual accounting adjustments in the Defense Departmental Reporting System-Budgetary (DDRS-B) and Defense Departmental Reporting System-Audited Financial Statements (DDRS-AFS). The RCIC is required to record and monitor the root causes for recording accounting adjustments. Capturing the RCIC will be used to develop action plans to address the root cause requiring the accounting adjustment and then monitor the effectiveness of those action plans.

2.8.2.2. DFAS. When DFAS identifies a required adjustment to the official accounting records of a DoD Component, it will refer the proposed adjustment to the DoD Component who **must** review and approve the adjustment. DFAS must document proposed adjustments to DoD Component submissions and provide supporting documentation. DoD Components must respond with approval or disapproval for proposed adjustments within reporting cutoff dates for the relevant period. The following paragraphs provide the exceptions to this policy.

2.8.2.2.1. When DFAS makes an adjustment of less than \$1 billion to correct errors made by DFAS in the preparation of a report, (e.g., calculation errors and similar mistakes), they may be corrected by DFAS without prior referral to the affected DoD Component. Examples of corrections that may be made by DFAS without referral to a DoD Component are:

2.8.2.2.1.1. Adjustments to correct systems processing deficiencies;

2.8.2.2.1.2. Adjustments to correct an error made by DFAS in processing a transaction or a previous adjustment;

2.8.2.2.1.3. Adjustments to correct a financial balance to equal the sum of subsidiary records; and

2.8.2.2.1.4. Adjustments to align funding, obligation, accrual, or expense amounts with the liquidation amount for receipts, acceptances, and/or disbursements when the applicable supporting information requires such adjustments.

2.8.2.2.2. DFAS **must** notify DoD Components at least once each month of the reports impacted, total amounts, types, and categories of reasons for adjustments made without prior referral to the DoD Component under circumstances specified in the preceding paragraph and provide corrected reports if applicable. DFAS **must** keep adequate records of all such notifications; and DFAS and the DoD Component **must** work together to record adjustments made by DFAS in the accounting systems of record before the beginning of the next reporting cycle.

2.8.3. Appropriate Uses of JVs. JVs have the following primary uses within DoD.

2.8.3.1. Correcting Entries. Correcting entry JVs adjust for errors identified during the reports review process. This entry includes specific amounts, accounts, and/or transactions related to the required correction. If possible, the JV supporting documentation will note the required steps in the process to prevent the need for similar adjustments in future periods.

2.8.3.1.1. In some cases, correcting entries are required to adjust for errors on previously prepared JVs. In those instances, correcting entries will both reverse the effect of incorrect entries and record the correct amount.

2.8.3.1.2. In some cases, both entries can be made with one JV and a single set of supporting documentation. Regardless of whether a single JV or multiple JVs are prepared, the correcting JV **must** include a copy of the original JV, documentation supporting the correct amount, and a narrative explanation regarding how it is known that the original entry is incorrect and why the correcting entry is accurate/more accurate.

2.8.3.2. Source Entries. Source entry JVs record those accounting entries that, due to system limitations or timing differences, have not been otherwise recorded. By nature, source entry JVs are usually summarized at the entity level by GL account. The source entry accounting transaction **must** be supported by documentation for the summarized amounts and identify the location of the transaction level supporting detail. Source entry JVs, generally, are used for month-end closing, year-end processing and closing purposes, and also may include postings of information provided through data calls, such as those required to record values for property, plant, and equipment recognition.

2.8.3.3. Summarized Entries. Both correcting and source entry JVs will normally be summarized amounts for which documentation is required. In these situations, the summarized accounting entry represents the amount to record the effect of the detailed transactions. In all such cases, the summarized accounting entry will include documentation of the effect of the detailed transactions and identify the location of the transaction level supporting detail.

2.8.3.4. Subcategories. Further separate correcting and source entry JVs into the following subcategories:

2.8.3.4.1. Audit Recommended JVs. When auditors recommend a JV adjustment, the proper authoritative source **must** perform an analysis of the recommendation using the auditors' work papers and other relevant information to determine if the recommended adjustments are valid. Any decision resulting in a determination that a JV should, or should not,

be prepared **must** document why the adjustment is, or is not, required; indicate how the duly authorized official determined that the audit recommendation should be, or should not be, followed; and identify the audit recommendation serving as the basis for the actions taken.

2.8.3.4.2. DoD Component Requested JVs. When a DoD Component requests an adjustment that complies with the JV definition in [subparagraph 020208.A](#), a JV **must** be prepared. In addition, the JV **must** document why the adjustment is required, indicate how the duly authorized official determined that the entries included on the JV are correct, and identify the DoD Component's request serving as the basis for the adjustment. The DoD Component's JV request to DFAS **must** include supporting records and related analysis. A request for a JV entry that is not properly authorized or supported by accurate or proper documentation will be returned to the JV requestor with an indication of what additional information is required to process it, along with any applicable authoritative guidance.

2.8.3.4.3. Edits and Validations. Reporting entities record JVs modifying report submissions to comply with edits and validations designed to improve the accuracy of financial reporting. The Treasury Financial Manual, United States Standard General Ledger ([USSGL](#)), contains a listing of Governmentwide Treasury Account Symbol Adjusted Trial Balance System validations and edits. (See Section VII.)

*2.9 System-Generated JVs (020209)

2.9.1. For the purposes of this chapter, system-generated JVs are all automated and controlled entries included in system transaction registers identifying summary-level adjustments to the GL. Examples of system-generated entries include system-performed period-end closing entries, consolidations, and entries to bring GL accounts into balance at specified periods of times during the financial reporting process. System-generated JVs do not include the automation of JVs previously recorded manually.

2.9.2. DFAS utilizes eight types of recurring system-generated JVs in DDRS-B. These adjustments are approved by the Components for DFAS to process to ensure financial records are compliant with generally accepted accounting principles. Supporting documentation for system-generated JVs must be in accordance with paragraph [020204](#). The eight recurring system-generated JV types are:

2.9.2.1. Army Legacy. Adjustments processed in the first accounting period of each fiscal year to ensure prior year unobligated balances from Army legacy accounting systems, Standard Finance System (STANFINS), Standard Operations and Maintenance Army Research and Development System (SOMARDS), and Civil Engineers Financial Management System (CEFMS) are not overstated/understated in DDRS-B.

2.9.2.2. Extended Appropriation. Adjustments processed in the first accounting period of each fiscal year to execute the transfer of obligated/unobligated Shipbuilding and Conversion, Navy (SCN) appropriation balances from the expiring to the extended period of availability. Only SCN balances are in scope for the Extended Appropriation JVs.

2.9.2.3. Flowback. Adjustments to ensure that the impacts of select adjustments processed directly in DDRS-AFS are also reflected in DDRS-B.

2.9.2.4. Funding. Adjustments to guard against the misstatement of funding and ensure the funding amounts reflected in DDRS-B agree to the OMB apportionments recorded in the Program Budget and Accounting System and the Program Budget Information System.

2.9.2.5. Pre-close Cancelling Appropriation. Adjustments processed in the last accounting period of each fiscal year to facilitate the process of cancelling appropriations that have reached the end of their fifth expired year.

2.9.2.6. Reapportionment. Adjustments to facilitate the process of reinstating unapportioned authority which closed during the previous fiscal year's closing process.

2.9.2.7. Reversal. Adjustments posted in the first accounting period of each fiscal year to reverse manual, year-end, Permanent with Reversal or Permanent with Reversal Recurring JVs and Permanent with Reversal Feeder Trial Balance Adjustments.

2.9.2.8. Undistributed. Adjustments to support the monthly requirement that final appropriation-level disbursements and collections reported in DDRS-B agree to the balances reported by Treasury.

2.9.3. DFAS must create and maintain standardized narratives for recurring system-generated JVs to identify and provide a description of the predefined business rules used to execute the adjustments. In addition, DFAS must maintain evidence of review and approval of the predefined business rules executed in DDRS-B.

2.9.4. Other non-recurring system-generated JVs are recorded based on certain System Change Requests (SCRs), which are proposals to modify information in DDRS-B such as revising programming logic and coding changes. Not all SCRs result in system-generated JVs. In the event a non-recurring system-generated JV is required, the supporting documentation must be supplied and maintained by the requestor of the SCR. DDRS Program Management Office must retain supporting documentation for all non-recurring system-generated JVs to include, at a minimum, user stories, testing documentation, and the impact of the system-generated JV.

2.10 JV Preparation (020210)

2.10.1. General. Proper preparation of and adequate support for JVs is important to ensure they accurately record accounting, financial, or other GL-related events and that documentation for a detailed audit trail exists. Unadjusted GL account balances represent the listing of GL account balances at the end of the reporting period, before period-end adjusting JVs are recorded. In various level financial reporting systems, the unadjusted GL balances reported are summaries of transaction data used to record specific homogeneous types of transactions and balances that aggregate to specific classifications on the financial statements. Use JVs to process monthly, quarterly, and annual adjustments to unadjusted GL account balances in the field and higher-level accounting and reporting systems.

2.10.1.1. All summary-level entries included in system transaction registers identifying adjustments to the GL are considered JVs for the purposes of this chapter and must be adequately documented to support the validity of the transactions. In accounting systems of record, manual adjustments to the GL are considered JVs. Transactions and processes used to record detail amounts in subsidiary ledgers are not considered JVs.

2.10.1.2. Proper preparation of, and adequate support for, JVs is the responsibility of DFAS and the DoD Components. Memorandum-style entries to the GL, affecting neither Treasury-level reporting nor subordinate records, are not considered JVs for the purposes of this chapter.

2.10.2. Internal Controls. OMB Circular A-123 identifies operational internal controls to ensure JVs are recorded properly. These controls must be in place for all transactions included in system transaction registers identifying summary-level adjustments to the GL. These controls do not apply to transaction input or processes establishing detail amounts recorded in subsidiary ledgers.

2.10.2.1. JVs may be prepared at the installation (execution) or departmental (reporting) level and must be:

2.10.2.1.1. Systematically tracked and reflected in a JV log. Reporting entities must implement controls to ensure JVs are tracked and readily available for audit;

2.10.2.1.2. Categorized by each of the applicable categories listed in subparagraph 020210.D;

2.10.2.1.3. Reviewed and validated to ensure the transaction utilizes the correct accounts and posts correctly;

2.10.2.1.4. Documented to support the validity and the amount of the JV transaction. The documentation requirement applies to all transactions included in system transaction registers identifying summary-level adjustments to the GL;

2.10.2.1.5. Authorized, approved, and documented at the appropriate level of management or designee. The organizational level within accounting centers, accounting stations, finance offices, and other accounting locations approving JVs will vary by the dollar amount of the voucher as shown in Table 2-1. The dollar amount for each JV is the sum of the absolute value of the debit side entries on that voucher;

2.10.2.1.5.1. The approving officials listed in Table 2-1 provide a framework for approving JVs based on identified thresholds. Reporting entities may adapt the approving officials identified based on the entity's organizational structure. Within each of the listed thresholds, other approval thresholds with lower dollar values than those specified in Table 2-1 may be established to accommodate the organizational level of those preparing the JV. In addition, unless other DoD Component approval thresholds with lower dollar values are

established in memorandums of understanding between DFAS and a DoD Component, all JVs over \$1 billion **must** be coordinated with the affected DoD Component.

2.10.2.1.5.2. Approving officials may delegate their authority in writing to lower-level supervisors or other duly authorized officials with sufficient knowledge of the accounting matters addressed by the JV. The delegation does not relieve approving officials of their responsibilities as outlined in this chapter. See additional guidance in subparagraph **020210.B.2**;

Table 2-1. JV Approval Thresholds

Threshold	Dollar Amount	Approving Official Supporting the Reporting Entity
1	Under \$100 Million	Branch Chief
2	\$100-\$500 Million	Supervisor of Branch Chief
3	Over \$500 Million-\$1 Billion	Director for Accounting or Finance
4	Over \$1 Billion	Site Director

2.10.2.1.6. Processed under procedures that ensure the separation of duties for preparing, approving, recording or posting, and validating to the maximum extent possible. The preparer and approver cannot be the same person;

2.10.2.1.7. Annotated with the name, title, and office symbol of currently authorized preparers, reviewers (if used), and approvers. In an electronic environment, the name, title, and office symbol may be represented by user identification;

2.10.2.1.8. Maintained and readily available in hard copy, electronic form, or a combination if there is a manual approval of an automated system JV. All manual JVs must be documented, approved by the appropriate level, readily available, and in compliance with published guidance. Manual JVs include the automation of JVs previously recorded manually; and

2.10.2.1.9. Retained in accordance with records retention guidance contained in Volume 1, Chapter 9.

2.10.2.2. Maintain adequate managerial internal controls at each level of management, as directed in OMB Circular A-123, to ensure there is proper oversight of JV preparation. As a minimum, such managerial internal controls require the following:

2.10.2.2.1. Within 10 workdays after the accounting centers' issuance of quarterly financial statements for the first through third quarters, approving officials, at the levels of authority designated in Table 2-1, must perform and document a high-level integrity review of all JVs for which they delegated approval authority. Integrity reviewers are required to review each delegated JV for compliance with the terms of the delegation but are not required to review all documentation supporting the JV. A fourth quarter review must take place prior to submission of the Agency Financial Report to OMB (no later than November 15). If the approving official,

at the levels of authority designated in Table 2-1, is unavailable to perform the integrity review, an individual having the appropriate accounting knowledge and expertise, and who was not a delegated approver, can perform the integrity review on behalf of the approving official. [The approving official must appoint this individual in writing.](#)

2.10.2.2.2. Within 30 calendar days of the issuance of the financial statements, whether quarterly or annually, the DFAS Director for Accounting (or designee) must perform a quarterly quality and compliance review after submission of the quarterly and annual reports to OUSD(C). Conduct the review on a random sample of all [manual](#) JVs to determine if JVs are correctly prepared and processed, adequately described and supported, and approved at the proper managerial level within the limitations set forth in subparagraph [020210.B.1.e.1](#). The Director of Accounting (or designee) may substitute monthly reviews in place of the quarterly review. The review must be conducted by an entity outside the immediate office that created the JV. The entity conducting the review must have sufficient auditing expertise to perform the review and must sign, date, and retain documentation to support the completed review.

2.10.2.2.2.1. [DFAS must](#) conduct the review in accordance with the GAO FAM Volume 1, Section 450, “Perform Sampling Control Tests.” The FAM provides guidance pertaining to acceptable sample sizes and error rates for typical internal control samples. The FAM Figure 450.1, “Sample Sizes and Acceptable Numbers of Deviations,” includes tables to compute the acceptable number of deviations for testing controls. Within DoD, compute the acceptable number of deviations using a 90 percent confidence level and a 5 percent tolerable error rate. When the tolerable error rate is exceeded, review current JV procedures for possible revision to ensure compliance;

2.10.2.2.2.2. [DFAS must](#) identify and correct errors and notify the affected DoD Component as necessary. Identify root causes and implement corrective actions as appropriate. If errors materially impacted the financial statements, evaluate the need to restate/reissue the financial statements;

2.10.2.2.3. The internal review office must conduct an assessment of the organization's JV processing procedures, in accordance with OMB Circular A-123, to ascertain if JVs are properly prepared and supported. Volume 1, Chapter 3, discusses the necessity and importance of independent reviews.

2.10.2.2.4. DoD Components must perform a compliance review of JVs within their accounting systems to ascertain if the JVs are correctly prepared and processed, adequately described, supported, and approved at the proper managerial level at least on a quarterly basis.

2.10.3. Critical Elements. Critical elements are items that, if reported incorrectly for financial reporting purposes, would have a direct effect on the amounts presented on the financial statements. Reporting fields deemed critical must be populated in order to provide sufficient information for the approving official and others, such as auditors, to understand the reason for preparing the JV, determine if it is proper and accurate, and identify whether the JV entries are supported or unsupported by subsidiary records. This paragraph outlines critical elements for most

JV categories and applies to JVs recorded in all systems. Additional items may be deemed critical depending on the category of adjustment being made. JVs **must** include items listed in [paragraph 020204](#).

2.10.3.1. Correct Appropriation/Accounting Data. JVs **must** contain accurate financial information in order to populate the required input fields for entry into the accounting/financial reporting systems.

* 2.10.3.2. Balanced Adjustments. JV debits and credits **must** equal and reflect correct dollar amounts. **Out of balance JV adjustments are not permitted.**

2.10.3.3. Approvals. JVs **must** contain required approvals according to the thresholds outlined in subparagraph [020210.B.1.e](#).

2.10.3.4. Documentation. JVs **must** include adequate documentation, with cross-referencing to other documentation (hard copy or electronic form), to support the validity and amount of the transaction. Attach supporting documentation to the JV as described in paragraph [020204](#).

2.10.3.5. USSGL. JVs **must** contain valid GL accounts to record the adjustments. Approved DoD postings transactions are available at the DoD USSGL Transaction Library.

2.10.4. JV Categories. Regardless of the method of documentation used for the JVs, the dollar amount(s) on the JVs must be clearly and readily identifiable within the supporting documentation for the categories in subparagraphs [020210.D.1-11](#). Both manual and system-generated JVs require the use of JV categories.

2.10.4.1. Category A - Reversing Entries for Prior Reporting Period. **Category A must be used when reversing JVs from a prior accounting period.**

2.10.4.2. Category B - Data Call Entry. **Category B must be used when recording JVs for summarized source data not included in the GL trial balance.** To the maximum extent possible, reporting entities will eliminate data call JVs in the DDRS and record properly supported JVs closer to the underlying source transaction. This practice enhances accuracy and accountability, reduces errors, and places JV ownership with the organization responsible for the underlying transaction. Examples of data call entries include property, plant and equipment; operating materials and supplies; environmental liabilities; contingent liabilities; and employee benefit data.

2.10.4.3. Category C - Balancing Entries for Eliminations. **Category C must be used** when the duly authorized official has determined that entries are necessary to balance buyer side data with seller side data. Refer to Volume 6B, Chapter 13 for guidance on eliminations.

2.10.4.4. Category D - Recognition of Undistributed Disbursements and Collections. Category D must be used when recording undistributed disbursements and collections JVs representing the difference between the amount of disbursements and collections reported to Treasury and the amount recorded by the operating level activities.

2.10.4.5. Category E - Reconciliation of Trial Balance and Budget Execution Reports. [Category E must be used when reconciling](#) trial balances or other source data reported by field accounting sites and/or accounting stations to the DoD Component's budget execution reports. Consider trial balances or other source data correct and only adjust to budget execution data in instances where budget execution data is determined to be more accurate, i.e., Tie Point reconciliation of budgetary and proprietary accounts.

2.10.4.6. Category F - Supply Management Inventory. [Category F must be used when](#) supply management activities adjust from the standard price to approximate historical cost.

2.10.4.7. Category G - Reclassification of Accounts. [Category G must be used when correcting erroneous USSGL accounts attributes and to adjust incorrect posting logic, aligning with the](#) DoD Standard Reporting Chart of Accounts and Standard Financial Information Structure.

2.10.4.8. Category H - Identified Errors and Reasonableness Checks. Category H must be used when correcting errors identified by an authorized official or auditor.

2.10.4.9. Category I - Adjustment to Balance Reports Internally. [Category I must be used when an](#) authorized official has determined that a reconciliation of data supporting two different reports is not possible.

2.10.4.10. Category J - Other Accruals. Category J must be used when recording accrual JVs. Accruals involve the following types of business transactions:

2.10.4.10.1. Expenses, losses, and liabilities that have been incurred but are not yet recorded in the accounts,

2.10.4.10.2. [Revenues and assets that have been earned but are not yet recorded in the accounts, and](#)

2.10.4.10.3. [Laws or Regulations specific requirements](#)

2.10.4.11. Category M - Data Collection Module (DCM). [Category M must be used when utilizing DDRS DCM JV functionality to record data call amounts from DCM.](#)

2.11 Release of Reports (020211)

2.11.1. DoD Components. DoD Components [must](#) approve draft annual reports and return those reports to DFAS for appropriate revision, validation, and distribution as final reports. The DoD Components [must](#) not release any reports, including monthly recurring reports, such as budget

execution reports, to any organization external to the DoD Components. Only DFAS may release such reports. Volume 6B, Chapter 2 contains the requirements for the audited and interim financial statements.

2.11.2. DFAS. DFAS must validate all final reports using the official accounting records prior to release to their intended recipients. The release of reports occurs only after final validation that corrections and adjustments have been made and that the report agrees with the official accounting records.

2.12 Certifications (020212)

2.12.1. DoD Component/Reporting Entity. A reporting entity is an organization represented by the financial information in a financial statement or report and may be a DoD Component or a subordinate command/organization. For example, a reporting entity may include an individual command or activity, such as a shipyard or a supply depot, or it could encompass a number of activities within a business area, such as all shipyards or aircraft depot maintenance activities in a Military Department. A reporting entity can also be at a DoD Component level.

2.12.1.1. The reporting entity, rather than DFAS, is responsible for annual certifications required in the implementation of Title 31, United States Code, section 1501(a). See Chapter 4, “Appropriations and Fund Status Reports,” for additional information related to year-end reporting.

2.12.1.2. Reporting entities having working capital funds are responsible for signing the Accounting Report (Monthly) (AR(M)) 1307, Defense Working Capital Fund Accounting Report addressed in Chapter 15.

2.12.2. DFAS. DFAS's role in processing financial data, and in preparation of financial reports for DoD Components, includes certain responsibilities. Accordingly, DFAS will provide the following to the DoD Component:

2.12.2.1. Assurances and certifications, when requested, to the reporting entity regarding the quality of accounting and report preparation services performed for the DoD Component;

2.12.2.2. Signed monthly, quarterly, and semiannual reports on behalf of the DoD Component following review and approval by the DoD Component. An exception is the AR(M) 1307, which the DoD Component is required to sign. Volume 6B, Chapter 2 contains the requirements for the audited and interim financial statements; and

2.12.2.3. A certification provided by the chief of the applicable reports section confirming accuracy of the balances reported on the AR(M) 1307.

**VOLUME 6A, CHAPTER 3: “REPORTING OF OUTLAYS, RECEIPTS, AND

CHAPTER 3

REPORTING OF OUTLAYS, RECEIPTS, AND ADJUSTED TRIAL BALANCES

1.0 GENERAL

1.1 Overview

[Department of Defense](#) (DoD) entities submit monthly outlay and receipt information via the Central Accounting Reporting System ([CARS](#)). The data in CARS interfaces with trial balance data submitted through the Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) to produce the financial reports. DoD entities are responsible for reconciling information between CARS and GTAS to ensure financial reports contain accurate information and provide an audit trail for the reporting period presented. The DoD Financial Management Regulation Glossary identifies DoD Components included as a part of DoD reporting.

1.2 Purpose

This chapter prescribes guidance for reporting outlays, receipts, and adjusted trial balances (ATBs) to the U.S. Department of the Treasury (Treasury). The policies included in this chapter apply to DoD entities authorized to prepare and submit consolidated monthly reports of outlays and receipts, and the [DoD](#) entities authorized to prepare and submit consolidated annual financial statements, to the Treasury, Bureau of the Fiscal Service (Fiscal Service).

*1.3 Authoritative Guidance

1.3.1. The Treasury Financial Manual (TFM), Volume I, Part 2, Chapter [5100](#) ([ITFM 2-5100](#)) applies to all Federal Agencies and U.S. Disbursing Officers (DO) that report collections and disbursements to the Treasury and Fiscal Service, and requires a monthly detailed reporting of disbursements and collections (outlays/receipts).

1.3.2. [ITFM 2-4700](#) prescribes how agencies provide data for the Financial Report of the United States Government ([FR](#)).

2.0 CARS REPORTING

2.1 CARS

CARS handles Treasury-level accounting and reporting for all federal agencies and is the system of record for Fiscal Service. CARS captures and records Treasury Account Symbol (TAS) information for payments, deposits, and intragovernmental transactions and provides agencies a daily status of their Fund Balance with Treasury (FBWT). All agencies must use the [CARS Modules](#) and submit the CARS TAS/Business Event Type Code ([BETC](#)) reporting classification for each payment, deposit, and intragovernmental transaction. The [CARS Glossary](#) identifies and defines the reporting processes and data elements used by CARS reporters.

2.2 CARS Reporting

2.2.1. CARS Daily Reporters. “CARS Daily Reporters” submit the TAS/BETC reporting classification for each payment or collection daily to CARS via the Payment Information Repository ([PIR](#)) or Collections Information Repository ([CIR](#)), respectively. DoD DOs report cash disbursements via the Classification, Transactions, and Accountability system.

2.2.1.1. PIR. The PIR serves as a repository for all Government payment data and supports Government transparency initiatives by improving the way Fiscal Service collects, analyzes, and reports on payment-related data. Reporting entities submit payment and accounting data to the PIR using the [Standard Reporting Format](#).

2.2.1.2. CIR. Reporting entities use the CIR to obtain detailed and summary-level information on collections and deposits received.

2.2.2. CARS Non-Daily Reporters. Agencies not classified as “CARS Daily Reporters” must report disbursements and collections through monthly reporting on the Standard Form (SF) 224, “Statement of Transactions;” SF 1219, “Statement of Accountability;” or SF 1220, “Statement of Transactions According to Appropriations, Funds, and Receipt Accounts,” in accordance with [I TFM 4A-4000](#). Entities that receive disbursing support from Fiscal Service ([regarding](#) the operations of designated Defense Agencies) must report using the SF 224. I TFM 2-3300 contains reporting policies for the SF 224.

2.3 Special Reporting

2.3.1. Government Securities. Refer to [I TFM 2-4300](#) for guidance on reporting the purchase and sale of U.S. Government securities, including the purchase of unrealized discount on investments. Report U.S. Government securities, purchased as an investment by a trust fund, as a disbursement at par value and the sale of securities at par value as a receipt. See the Fiscal Service BETC listing for approved TAS/BETC combinations used to report the purchase and sale of U.S. Government securities.

2.3.2. Borrowing Authority. Borrowing authority is statutory authority to incur obligations and make payments for specified purposes out of borrowed money. It must be established as needed by the acquisition of property subject to a mortgage and withdrawn upon payment of the mortgage principal. When the buyer assumes the mortgage, the borrowing authority is disestablished. See the Fiscal Service BETC listing for approved TAS/BETC combinations used to report mortgage transactions.

2.3.2.1. A DoD Component becomes the mortgagor when it acquires property subject to a previous mortgage under the DoD Homeowners Assistance Program, or when it borrows money to finance, or issues a mortgage instead of immediate payment, for new construction under the DoD Family Housing Program. See [Volume 3, Chapter 15](#) for additional guidance on borrowing authority.

2.3.2.2. Report the total acquisition cost of the property, including mortgages payable included in the sale of non-guaranteed Government agency securities, as a disbursement to liquidate the entire related obligation. Report the amount of the mortgage assumed, which is included in the sale of non-guaranteed Government agency securities, as a reimbursement.

2.3.2.3. Report payments to the mortgagee in two parts: Payments on principal, which are associated with the redemption of non-guaranteed Government agency securities, as disbursements, and the associated interest payments.

2.3.2.4. Report the sale of property subject to a previous mortgage assumed by the buyer as a reimbursement for the total sales price. Report only the portion of this balance that relates to the redemption of non-guaranteed Government agency securities. Report the amount of the existing mortgage assumed by the buyer, related to the redemption of non-guaranteed Government agency securities, as a disbursement.

2.3.3. Cash. [1 TFM 2-3400](#) contains guidance on reporting cash held outside of the U.S. Treasury. See [Volume 4, Chapter 2](#) and [Volume 5](#) for additional information on establishing financial control over fund balances with the U.S. Treasury and cash resources that are not part of the [FBWT](#).

2.4 Monthly Reporting Process

2.4.1. Fiscal Service coordinates with reporting entities to ensure appropriate submission and reporting procedures are in place to accomplish the monthly reporting requirements. Reporting entities compile expenditure accounting information from their reporting activities and electronically submit a monthly consolidated report to Fiscal Service in accordance with due dates established by Fiscal Service. Due dates are consistent with the requirements of the Office of the Under Secretary of Defense (Comptroller) Program/Budget, Program and Financial Control Directorate.

2.4.2. Fiscal Service uses outlay and receipt information submitted by reporting entities to produce the Monthly Treasury Statement ([MTS](#)), which summarizes the financial activities of the Federal Government and conforms to the Budget of the U.S. Government. MTS data includes information provided by federal entities, DOs, and Federal Reserve Banks. It presents a summary of receipts and outlays, surplus or deficit, and means of financing on a modified cash basis.

2.5 Reconciliation of Monthly Information

2.5.1. [DoD](#) Components must incorporate controls into their processes to ensure amounts reported daily or monthly to Treasury reconcile to collections and disbursements processed through the disbursing systems and reflect amounts reported in the accounting systems. Treasury reporting includes SF 224 submissions by reporting entities. See [Volume 1, Chapter 3](#) for information on providing accurate, reliable, and timely financial management information to achieve compliance with the Federal Financial Management Improvement Act. Refer to subparagraph 3.4 for additional information on GTAS edits and validations.

2.5.2. **DoD** Components must perform timely reconciliations and implement effective and efficient reconciliation processes. Effective reconciliations serve as a detection control for identifying unauthorized and unrecorded transactions at the entities and Treasury. Volume 4, Chapter 2 prescribes DoD policy for reporting and reconciling transactions affecting an entity's **FBWT**. Effective reconciliations are also important in preventing entity disbursements from exceeding appropriated amounts and providing an accurate measurement of the status of available resources.

2.6 Supplemental Reporting

A supplemental report may be submitted to Fiscal Service to adjust previously submitted data. Under special circumstances, Fiscal Service may request a supplemental report from the reporting entity. The totals reported on the supplemental reports will be consistent with the summarized net disbursements submitted by the reporting entities.

3.0 GTAS REPORTING

3.1 GTAS

Fiscal Service administers and maintains GTAS to facilitate preparation and consolidation of the FR. Within GTAS, reporting entities submit both proprietary and budgetary data simultaneously in the **Bulk File Format**. Systemic edits validate data across both budgetary and proprietary reporting, including the Governmentwide Accounting System **Account Statement**. Reporting entities reconcile GTAS data with amounts reported in CARS to verify the accuracy of reported balances.

3.2 GTAS Reporting

3.2.1. The GTAS data submitted by agencies are United States Standard General Ledger (USSGL)-based trial balances used to populate the Statement of Budgetary Resources (SBR); the **SF 133**, Report on Budget Execution and Budgetary Resources; and the prior-year column of the Program and Financing Schedule of the Budget. Agencies must ensure that the budgetary information used to prepare the SBR is consistent with the budgetary information reported to GTAS during the fourth quarter reporting window. Reporting entities submit GTAS data according to the annual Fiscal Service **Reporting Window Schedule**. The **GTAS Glossary** identifies and defines the reporting processes and data elements used by GTAS reporters.

3.2.2. Agencies must ensure the data in their Agency Financial Reports is exactly the same as the data reported in GTAS and the Defense Departmental Reporting System-Audited Financial Statements as of the GTAS close date.

3.2.3. GTAS establishes the default [Canceled \(“C”\) TAS](#) used to report canceled proprietary payables, receivables, and assets. Report expired obligated and unobligated balances as canceled on the final, September 30, SF 133 before closing a Treasury Appropriation Fund Symbol (TAFS). While budgetary USSGL balances are not required to be reported to Treasury and the Office of Management and Budget (OMB) after a TAFS is canceled, Section 130 of [OMB Circular A-11](#), “Preparation, Submission, and Execution of the Budget,” requires a tracking process monitoring obligations pertaining to canceled appropriations in order to prevent overpayment.

3.2.4. The [DoD Financial Reporting Guidance](#) (Common Access Card enabled) provides DoD processes for reporting GTAS information, in addition to the quarterly and year-end schedules.

3.3 FR

The FR provides a comprehensive view of the Federal Government’s financial position and condition, its revenues and costs, assets and liabilities, and other obligations and commitments. The FR includes consolidated financial statements and related disclosures, as well as reports on stewardship responsibilities. I TFM 2-4700 and [OMB Circular A-136](#), “Financial Reporting Requirements,” describe how agencies provide data for the FR using GTAS.

3.4 Submission and Verification of Data

3.4.1. Reporting. DoD entities must:

3.4.1.1. Comply with Fiscal Service (GTAS) reporting policies for the reconciliation and confirmation of balances,

3.4.1.2. Ensure submitted data is timely and reliable; and

3.4.1.3. Verify that due dates are met according to I TFM 2-4700, DoD Financial Reporting Guidance, and this chapter, for both significant entities and other entities.

3.4.2. Significant Entities. I TFM 2-4700 provides a list of significant entities. Other Entities include all other executive branch agencies. All entities (significant and other) submit pre-closing GTAS ATB data and complete FR Notes and other FR data for fiscal year reporting. Significant entities will:

3.4.2.1. Submit audited financial statements in the Agency Financial Report or the Performance and Accountability Report;

3.4.2.2. Submit GTAS ATBs and provide an interim and year-end variance analysis to OMB;

3.4.2.3. Provide Fiscal Service with an electronic copy of the interim unaudited financial statements (the third-quarter financial statements), notes, required supplementary information, required supplementary stewardship information, and other information, if the information is not available in [Connect.gov](#);

3.4.2.4. Comply with intragovernmental policies;

3.4.2.5. Review (with their auditors) the fifth quarter Scorecard to determine if a prior-year journal voucher was processed. If a prior-year journal voucher was processed, the significant entity must identify the reason for the journal voucher as well as how to prevent the adjustment in the current year; and

3.4.2.6. Provide Chief Financial Officer Representations for Federal intragovernmental activity and balances.

3.4.3. Edits and Validations. Reporting entities must comply with established GTAS edits and validations used to verify the integrity of data submissions. [Section VII](#) of the USSGL contains a listing of edits and validations used in GTAS. In addition to Treasury-level tie-point type edits incorporated in GTAS; reporters will perform more-detailed component-level tie-point reconciliations before submitting finalized data through GTAS.

3.4.4. Standard Financial Information Structure (SFIS). [SFIS](#) is a comprehensive data structure that supports GTAS reporting, as well as requirements for budgeting, financial accounting, cost/performance, and external reporting needs across DoD. Entities must use the SFIS reporting elements as prescribed in the SFIS data structure.

3.5 I TFM 2-4700 Reporting Requirements

3.5.1. Intragovernmental Requirements. DoD entities comply with Fiscal Service policy for the reconciliation and confirmation of intragovernmental balances. [Volume 6B, Chapter 13](#) contains policy for accounting and reconciling intragovernmental balances.

3.5.2. ATB Requirements. Federal entities must prepare and submit pre-closing GTAS ATBs at the TAS level using USSGL accounts and attributes. Table 3-1 contains a list of DoD entities required to submit ATBs. Fiscal Service collects ATB data to aid in its analytical processes. The GTAS ATBs must include USSGL accounts with the required attributes, while USSGL account balances must reflect the pre-closing adjusting entries needed to produce financial statements. Significant entities and other entities use the same USSGL data on the GTAS ATBs used to prepare the current fiscal year audited entity consolidated financial statements due to OMB.

3.6 Digital Accountability and Transparency Act

3.6.1. The Digital Accountability and Transparency Act ([*DATA Act*](#)) requires Federal agencies to report financial and payment information according to data standards established by Treasury and OMB. The purpose of the DATA Act is to make Federal spending data more accessible, searchable, and reliable while also serving as a tool for better oversight, data-centric decision-making, and innovation both inside and outside of government.

3.6.2. To help agencies comply with the DATA Act, OMB and Treasury created the [*DATA Quality Playbook*](#) identifying key steps that, if followed together, assist agencies in leveraging existing capabilities with DATA Act implementation. Accurate financial reporting through GTAS enables reporting entities to submit USSGL accounts and SFIS data elements required to comply with the DATA Act.

*Table 3-1. DoD Consolidation Entities Required to Submit ATBs

DoD Consolidation Entity (Source: Current OMB Bulletin, “Audit Requirements for Federal Financial Statements”)	Treasury Index (TI)	Budget Functional Classification	Responsible Office for GTAS Submission to the Fiscal Service

CHAPTER 4

APPROPRIATION AND FUND STATUS REPORTS

1.0 GENERAL

1.1 Purpose

This chapter prescribes the reporting requirements and policy to follow when preparing appropriation and fund status reports at the departmental level. These reports identify, for the Defense Finance and Accounting Service (DFAS) and its customers, the status of accounting transactions on a monthly, quarterly, and annual basis. This chapter does not prescribe the reporting requirements of the intermediate command and installation levels. The provisions apply to all Department of Defense (DoD) Components and cover fund types included in Section 79 of Office of Management and Budget (OMB) Circular [A-11](#), Preparation, Submission, and Execution of the Budget.

1.2 Authoritative Guidance

1.2.1. The reports defined by this chapter fulfill the requirements in Title 31, United States Code (U.S.C.), [section 1512\(d\)](#) that the President review [apportionments or reapportionments requested](#) by executive agencies at least four times a year. The policy in this chapter also fulfills the requirement in 31 U.S.C. § [1554\(b\)](#) to report unliquidated obligations, unobligated balances, canceled balances, and adjustments made to appropriation accounts during the fiscal year (FY).

1.2.2. The chapter supplements reporting policies required by OMB Circular A-11, which provides an overview of the budget process and instructions on budget execution, including guidance on the apportionment and reapportionment process.

2.0 REPORTING

2.1 Report Formats

The report formats for the appropriation and fund status-type reports are identified within the respective paragraphs. Figures 1 and 2 contain sample fund status reports.

2.2 Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS).

2.2.1. The Department of the Treasury (Treasury), Bureau of the Fiscal Service ([Fiscal Service](#)), administers and maintains [GTAS](#) to facilitate the preparation and consolidation of the [Financial Report of the U.S. Government](#). Reporting Agencies [upload](#) both proprietary and budgetary data to GTAS in the [Bulk File Format](#). Refer to Chapter 3 for DoD policy related to the submission of financial data using GTAS.

2.2.2. [Consolidation](#) entities are required to submit requests for new Treasury symbols to be used in GTAS reporting to the Office of the Under Secretary of Defense (Comptroller),

Program/Budget (P/B), Program and Financial Control (P&FC) Directorate ([an organization within P/B](#)), along with justification that cites the specific authorizing legislation. P&FC will review requests and coordinate with OMB and the Treasury to establish new accounts when authorized.

2.3 Standard Financial Information Structure (SFIS)

Appropriation and fund status reporting utilizes the data structure and reporting elements outlined in [SFIS](#). SFIS is a comprehensive data structure that supports requirements for budgeting, financial accounting, cost/performance, and external reporting needs across DoD. See Volume 1, Chapter 4, for additional information on SFIS reporting.

3.0 YEAR-END REPORTING

3.1 Purpose

This section contains instructions for reporting unexpended appropriation and fund balances required by [Treasury Financial Manual, Volume I, Part 2, Chapter 4700](#). [Unexpended appropriations include the amount of unobligated appropriations and undelivered orders outstanding for Congressional appropriations provided to the Department.](#)

3.2 Scope

This section pertains to all DoD [consolidation](#) entities [uploading](#) unexpended balances of appropriation accounts to Fiscal Service through GTAS.

3.3 Reporting

[Consolidation](#) entities utilize GTAS and the Fiscal Service Year-End Module to report unexpended balances of appropriation accounts. Fund holders are responsible for verifying the accuracy of reported balances and providing final confirmation of amounts reported in GTAS to DFAS Accounting Standards and Reporting, Budget Execution Analysis via signed documentation for electronic certification.

4.0 REPORT ON BUDGET EXECUTION AND BUDGETARY RESOURCES (STANDARD FORM (SF) 133).

4.1 Purpose

This section contains instructions for implementing OMB Circular A-11 for the monthly SF 133, Report on Budget Execution and Budgetary Resources. The SF 133 shows the status of budgetary resources and [details how funds are obligated and spent](#). The report is intended for use, with other available information, in reviewing apportionments and the U.S. Government's budgetary programs, in managing the rate of incurring obligations and outlays, and as a basis for initiating requests for reapportionments and transfers. See Section 130.1 of OMB A-11 for additional uses of SF 133 data.

4.2 Scope

4.2.1. Applicability. The requirements of this section apply to all DoD Components.

4.2.2. Basic Report. Prepare an SF 133 for each unexpired (current) or expired Treasury Appropriation Fund Symbol (TAFS) of the types identified in OMB Circular A-11, Section 130.2(a). Unless exempted by OMB, submit SF 133 information for each open TAFS. Subparagraph 4.2.3 contains a list of current exemptions.

4.2.3. Exemptions. Unless required by OMB, do not submit SF 133s for deposit fund accounts, receipt accounts, clearing accounts, suspense accounts, and closed TAFS (TAFS with canceled balances).

4.3 Frequency and Distribution

4.3.1. Fiscal Service. The Fiscal Service receives monthly budget execution information via GTAS according to the Fiscal Service Reporting Window Schedule. Fiscal Service prepares the monthly SF 133 for OMB based upon the GTAS United States Standard General Ledger (USSGL) information and attributes forwarded by DoD.

4.3.2. Consolidation Entities. Volume 6B identifies DoD consolidation entities and addresses the form and content of DoD audited financial statements.

* 4.3.3. Reports on Allocation and Appropriation Transfer Accounts

4.3.3.1. Allocation (Transfer To) Account. For allocation transfers made from a parent account to allocation accounts, submit an SF 133 containing the activity for each allocation account.

4.3.3.2. Parent (Transfer From) Account. The parent agency may choose to gather information from all agencies that have allocation accounts and enter the information into GTAS or require each agency with an allocation account to enter information into GTAS and provide a copy to the parent agency. See OMB Circular A-11 for additional information on allocation/parent reporting.

4.3.4. Submission Schedule

4.3.4.1. Submit reports by the departmental level consolidation entities as of the end of each month, excluding reports on allocation and transfer appropriation accounts. Submit regular reports in accordance with due dates established by DFAS and consistent with the timeframes established by the Fiscal Service Reporting Window Schedule.

4.3.4.2. Submit reports on allocation and transfer appropriation accounts to the parent agency in accordance with the schedule prescribed by that agency and consistent with the timeframe provided in OMB Circular A-11.

4.4 Preparation

4.4.1. The SF 133 is divided into four sections: Budgetary Resources; Status of Budgetary Resources; Change in Obligated Balance; and Budget Authority and Outlays, Net. Report cumulative amounts from the beginning of the FY to the end of the period reported and include all footnotes at the end of the report. Forward any information used to supplement or clarify the submitted reports directly to OMB. See OMB Circular A-11, Appendix F, “Format of SF 132, SF 133, Schedule P, and SBR” for the format and line item descriptions for each line item on the SF 133.

4.4.2. Section 130 of OMB Circular A-11 contains exhibits of sample SF 133 reports.

4.4.3. Volume 1, Chapter 7 [prescribes the Department of Defense \(DoD\) Standard Chart of Accounts \(SCOA\) requirements that are based on United States Standard General Ledger \(USSGL\) general requirements](#). The SCOA prescribes the mandatory general ledger accounts for all DoD accounting systems and all budgetary and proprietary transactions. The Fiscal Service provides crosswalks from the SF 133 to the USSGL in Section V of the current FY’s version of the USSGL.

4.4.4. OMB Circular [A-136](#), Financial Reporting Requirements, contains information on reconciling SF 133 information with the Statement of Budgetary Resources (SBR).

4.5 The Expired Phase: Budget Execution Reporting.

Report obligated and unobligated balances on the SF 133 for each expired TAFS that has not been canceled. Section 130 of OMB Circular A-11 contains instructions for budget execution reporting on expired TAFS that have not been canceled, as well as instructions for reporting upward and downward adjustments to expired TAFS.

4.6 The Expired Phase: Obligation Adjustments for Contract Changes.

4.6.1. Upward adjustments to obligations in expired appropriation accounts, caused by contract changes that exceed certain thresholds, are subject to additional reporting and approval requirements. A contract change represents an order relating to an existing contract under which a contractor is required to perform additional work. A contract change does not include adjustments related to an escalation clause.

4.6.2. Section 130 of OMB Circular A-11 specifies the thresholds, reporting requirements, and approval requirements for contract changes.

4.6.3. The USD(C), as the Secretary of Defense’s designee, fulfills the duties and responsibilities designated to “the agency head” in this section of OMB Circular A-11.

4.7 The Expired Phase: Alternatives for Payment of Old Obligations

4.7.1. The length of the expired phase of a TAFS may only be changed by law. When

DoD requires payment of obligations beyond the normal 5-year expired phase (such as the Navy Shipbuilding and Conversion appropriation), the Assistant Secretary of the Military Department Financial Management and Comptroller (FM&C) submits proposed changes to appropriation language for the budget year through OUSD(C)(P/B) to OMB for approval.

4.7.2. Request this authority only when historical outlay data indicates the payment of old balances from unexpired funds regularly exceeds the 1 percent limitation or when such payments would severely affect the current program.

4.7.3. Report such authority to the Treasury to prevent premature automatic cancelation of the account. Without this authority, DoD must seek reappropriation of canceled balances and defer payment until the appropriation is available, or pay from current appropriations, as described in Volume 3, Chapter 10.

4.8 SF 133 and the SBR

The compilation of an agency's SF 133s must agree with the agency's SBR. OMB Circular A-11 identifies the few differences between the SF 133 and SBR.

4.9 Consistency of Amounts Reported

Amounts reported in the fourth quarter SF 133 must be consistent with information reported to Treasury as part of the year-end closing procedures and based on actual accounting information pursuant to [31 U.S.C. § 3512](#). Actuals submitted to OMB for inclusion in the President's annual budget, which is submitted to the Congress, will agree with those submitted to Treasury and reported on the fourth quarter SF 133.

5.0 REPORT ON REIMBURSEMENTS AND REFUNDS (ACCOUNTING REPORT (MONTHLY) (AR(M)) 725)

5.1 Purpose

The AR(M) 725 identifies supplemental budget execution data with respect to reimbursements and refunds, in terms of their sources and the FY programs being executed. The AR(M) 725 identifies reimbursable activity during the reporting period and includes refunds of prior year orders from direct appropriations.

5.2 Scope

5.2.1. The provisions of this section apply to all DoD Components.

5.2.2. Reports are required electronically for the following:

5.2.2.1. All current appropriations or other fund accounts for military or civil functions of DoD are reported on the SF 133.

5.2.2.2. All expired appropriations or other fund accounts.

5.2.2.3. Trust fund accounts if reimbursements or refunds are from non-Federal sources.

5.2.2.4. Trust revolving fund accounts if the reimbursements or refunds are from U.S. Government accounts; and

5.2.2.5. Allocation and transfer accounts for DoD Components from appropriations made to the Office of the Secretary of Defense (Treasury Index (TI) Code 97).

5.2.3. Unless specifically requested in writing by the OUSD(C), reports are not required for the following:

5.2.3.1. Trust fund accounts, except those in subparagraph 5.2.2.3;

5.2.3.2. Trust revolving fund accounts, except those in subparagraph 5.2.2.4;

5.2.3.3. Deposit fund accounts.

5.2.3.4. Other Defense, civil programs; and

5.2.3.5. Security assistance appropriation accounts.

5.3 Report Format AR(M) 725

Prepare the AR(M) 725 in accordance with the guidance provided in paragraph 5.5. The current format is reflected in Figure 1.

5.4 Frequency and Distribution

5.4.1. Consolidation entities with reimbursable activity electronically submit monthly reports in accordance with due dates established by DFAS and consistent with the timeframes established by OUSD(C). Submit the report at the same time as the AR(M) 1002, Appropriation Status by Fiscal Year Program and Subaccounts.

5.4.2. Include the AR(M) 725 with the SF 133.

5.5 Preparation

5.5.1. Basis of Reporting. Amounts reported will agree with corresponding general ledger balances for reimbursement and refund USSGL accounts as defined in the DoD Standard Reporting Chart of Accounts.

5.5.2. Unit of Entries. Round reported amounts to the nearest thousand.

5.5.3. Description (Column A). This column identifies whether the transaction is from a “Federal” or “Non-Federal” source.

5.5.4. Reimbursements Receivable (Column B). Enter the number of receivables brought forward from the prior year. The total of this column must agree with column I of the year-end AR(M) 725 report from the prior year.

5.5.5. Unfilled Customer Orders Without Advance (Column C). Enter the number of unfilled orders brought forward from the prior year. The total of this column must agree with column J of the year-end AR(M) 725 report from the prior year.

5.5.6. Total Anticipated Reimbursements (Column D). Enter reimbursements expected to be earned during the current FY, subject to OMB apportionment, other authorized reimbursements, and/or other income for which current year obligational authority is automatically established based on orders received.

5.5.7. Earned Reimbursements and Refunds (Column E). This column represents the amount recognized when a performing organization renders actual or constructive performance on a reimbursable order. Generally, reimbursements must recover the cost elements outlined in Volume 11A, Chapter 3 and Volume 11B, Chapter 3.

5.5.7.1. The SFIS reporting structure identifies approved USSGL transactions and data elements used to record transactions between buyers and sellers. This column also includes refunds of prior-year orders from direct appropriations. Refunds are the repayments of excess payments and are related to previous obligations incurred and outlays made against the appropriation. Process refunds received to the appropriation or fund account charged with the original obligations.

5.5.7.2. OMB Circular A-11 provides guidance for processing refunds in both current and prior years.

5.5.8. Changes in Unfilled Customer Orders (Column F). This column represents the net change in unfilled customer orders during the period. The balance in this column increases with new customer orders and decreases with earned customer orders.

5.5.9. Anticipated Orders for Rest of Year (Column G). For transactions with the public, this column represents estimated collections, including advances expected to be received and reimbursements expected to be earned. In transactions between U.S. Government entities, this balance represents orders expected to be received, but have not been accepted.

5.5.10. Reimbursements and Refunds Collected (Column H). This column includes collections received on a reimbursable basis for goods and services provided and refunds of prior-year orders from direct appropriations.

5.5.11. Reimbursements Receivable (Column I). This column represents the balance of outstanding collections, for goods and services provided on a reimbursable basis, at the end of the reporting period.

5.5.12. Unfilled Customer Orders Without Advance (Column J). This column represents

the balance of unfilled customer orders, at the end of the reporting period, for goods and services without an advance. This line applies only to transactions between U.S. Government entities and those entities with approved exceptions.

6.0 APPROPRIATION STATUS BY FISCAL YEAR PROGRAM AND SUBACCOUNTS (AR(M) 1002)

6.1 Purpose

This section prescribes the preparation and submission of reports on the application and status of appropriation and other fund accounts. The reports present budget execution data with respect to obligational authority in terms of the FY programs executed at budgetary subdivisions not found on SF 133. Program value, obligation, unobligated balance, unexpended balance, and expenditure balance data integrity, by line item, [must be maintained](#) throughout an account's unexpired and expired availability periods. Expired account adjustments, which move resources between Budget Line Items (BLI), must reflect the appropriate change to that line item's program value amount, obligations, unobligated balance, unexpended balance, and expenditure data on the AR(M) 1002.

6.2 Scope

6.2.1. The provisions of this section apply to all DoD Components.

6.2.2. Reports are required for all general and special fund appropriations for military and civil functions of the Department that are reported on the SF 133, except those accounts specifically exempted in subparagraph [6.2.3](#).

6.2.3. Reports are not required for the following unless specifically requested in writing by the OUSD(C):

6.2.3.1. Revolving funds that do not have direct appropriation funds available, except for accounts 97 X 4555, 4090, 4965, and 0833.

6.2.3.2. Receipt accounts, clearing accounts, suspense accounts, deposit funds, and trust funds, except for 97 X 8097, 8098, and 8335.

6.2.3.3. Civil funds of the U.S. Army Corps of Engineers and the U.S. Soldiers' and Airmen's Home; and

6.2.3.4. Transfer appropriation accounts.

6.3 Report Format

Prepare the AR(M) 1002 in accordance with the guidance provided in paragraph 6.5. Report 1002 data in accordance with the Business Enterprise Architecture included in SFIS. The AR(M) 1002 format includes budget and fiscal account classifications required to align with

information included in annual DoD budget requests, as illustrated in the [President's Budget Exhibits M-1, O-1, P-1, R-1, and C-1](#). See the "[SFIS Matrix](#)" for business rules and examples of acceptable budgetary values. The [Defense Departmental Reporting System-Budgetary](#) contains the official report mapping for the AR(M) 1002. Figure 2 contains the current report format for the AR(M) 1002.

6.4 Frequency and Distribution

6.4.1. Electronically submit monthly reports in accordance with the due dates established by DFAS, and consistent with the timeframes established by OUSD(C).

6.4.2. Arrange the reports in the same order as the SF 133s they support.

6.5 Preparation

6.5.1. Units of Entry. Round all amounts to the nearest thousand and no attempt needs to be made to adjust the rounded figures so they add to column totals. Rounded amounts **must not** exceed the actual amounts by more than $\pm \$2,000$.

6.5.2. Direct Programs

6.5.2.1. Military Personnel

6.5.2.1.1. General. Report at least two classification levels for distinct sets of TI Codes 17 (Navy), 21 (Army), and 57 (Air Force); FY program; and Treasury account number (Main Account Code).

6.5.2.1.2. Level One. Budget Activity (BA) equals the M-1 (Military Personnel Programs) BA. Use the set of distinct M-1 BA records to present the BA stub entries.

6.5.2.1.3. Level Two. Budget Sub-activity (BSA) equals the M-1 BSA and is the M-1 line-item detail and lowest classification level. Use the set of distinct M-1 BSA records to present the BSA stub entries. Present the BSA stub entries under their respective BA.

6.5.2.1.4. Level Three (Optional). BLI equals the President's Budget Exhibit PB-30J, Summary of Entitlements by Sub-activity, and is the lowest classification level. Use the same set of distinct entitlement stub entries on the AR(M) 1002 displayed in Budget Exhibit PB-30J. Present the BLI stub entries under their respective BA and BSA.

6.5.2.2. Operation and Maintenance (O&M)

6.5.2.2.1. Report the three classification levels for distinct sets of TI Codes 17, 21, and 57; FY program; and Main Account Code.

6.5.2.2.1.1. Level One. BA equals the O-1 (O&M Programs) BA. Use the set of distinct O-1 BA records to present the BA stub entries.

6.5.2.2.1.2. Level Two. BSA equals the O-1 Budget Activity Group (BAG). Use the set of distinct O-1 BAG records to present the BSA stub entries. Present the BSA stub entries under their respective BA.

6.5.2.2.1.3. Level Three. BLI equals the O-1 Sub-activity Group (SAG) and is the O-1 line-item detail and lowest classification level. Use the set of distinct O-1 SAG line items to present the BLI stub entries. Present the BLI stub entries under their respective BA and BSA.

6.5.2.2.2. Report five classification levels for distinct sets of TI Code 97, FY program, and Main Account Code as prescribed by [DFAS Manual 7097.01](#).

6.5.2.2.2.1. Level One. BA equals the O-1 BA. Use the set of distinct O-1 BA records to present the BA stub entries.

6.5.2.2.2.2. Level Two. Defense Level Organization (DLO) equals the O-1 Defense Agencies. Use the set of distinct O-1 Defense Agencies to present the DLO stub entries. Present the DLO stub entries under their respective BA. The DFAS Manual 7097.01 Budget Project Codes appropriation chapters identify the valid Defense Agencies. Within each chapter is a list of valid limitations where the first two digits of the limitation identify the Defense Agency allotment holder.

6.5.2.2.2.3. Level Three. BSA equals the O-1 BAG. Use the set of distinct O-1 BAG records to present the BSA stub entries. Present the BSA stub entries under their respective DLO.

6.5.2.2.2.4. Level Four. BLI equals the O-1 SAG and is the O-1 line-item detail and lowest classification level. Use the set of distinct O-1 SAG line items to present the BLI stub entries. Present the BLI stub entries under their respective BSA.

6.5.2.2.2.5. Level Five. Budget Allotment Line-Item Identifier (BALI) is a sub-set of BLIs and refers to sub-BLI codes used in original allotment and sub-allotment funding authorization documents. Present the BALI stub entries under their respective BLI.

6.5.2.3. Procurement

6.5.2.3.1. Report the three classification levels for distinct sets of TI Code 17, 21, and 57; FY program; and Main Account Code.

6.5.2.3.1.1. Level One. BA equals the P-1 (Procurement Programs) BA and BA Title. Use the set of distinct P-1 BA records to present the BA stub entries. A subtotal at the BA level is required for Procurement Accounts.

6.5.2.3.1.2. Level Two. BSA equals the P-1 BSA and BSA Title. Use the set of distinct P-1 BSA records to present the BSA stub entries. Present the BSA stub

entries under their respective BA. A subtotal at the BSA level is not required for Procurement Accounts.

6.5.2.3.1.3. Level Three. BLI equals the P-1 Line Item and Line-Item Title and is the P-1 line-item detail and lowest classification level. Use the set of distinct P-1 line-item records to present the BLI stub entries. Present the BLI stub entries under their respective BA and BSA.

6.5.2.3.2. Report five classification levels for distinct sets of TI Code 97, FY program, and Main Account Code as prescribed by DFAS Manual 7097.01.

6.5.2.3.2.1. Level One. BA equals the P-1 BA and BA Title. Use the set of distinct P-1 BA records to present the BA stub entries.

6.5.2.3.2.2. Level Two. DLO equals the P-1 Organizational Title. Use the set of distinct P-1 Defense Agencies to present the DLO stub entries.

6.5.2.3.2.3. Level Three. BSA equals the P-1 BSA and BSA Title. Use the set of distinct P-1 BSA records to present the BSA stub entries under their respective DLO. A subtotal at the BSA level is not required for Procurement Accounts.

6.5.2.3.2.4. Level Four. BLI equals the P-1 Line Item and Line-Item Title and is the P-1 line-item detail and the lowest classification level. The DFAS Manual 7097.01 Budget Project Codes appropriation chapters identify a valid list of line items/budget projects. Use the set of distinct P-1 line-item records to present the BLI stub entries. Present the BLI stub entries under their respective BSA.

6.5.2.3.2.5. Level Five. BALI is a sub-set of BLIs and refers to sub-BLI codes used in [the](#) original allotment and sub-allotment funding authorization documents. Present the BALI stub entries under their respective BLI.

6.5.2.4. Research, Development, Test, and Evaluation (RDT&E)

6.5.2.4.1. Report at least two classification levels for distinct sets of TI Code 17, 21, and 57; FY program; and Main Account Code.

6.5.2.4.1.1. Level One. BA equals the R-1 (RDT&E Programs) BA and BA Title. Use the set of distinct R-1 BA records to present the BA stub entries.

6.5.2.4.1.2. Level Two. BLI equals the R-1 Program Element (PE) and PE Title and is the R-1 line-item detail and the lowest classification level. Use the set of distinct PE records to present the BLI stub entries under their respective BA.

6.5.2.4.2. Report five classification levels for distinct sets of TI Code 97, FY program, and Main Account Code as prescribed by DFAS Manual 7097.01.

6.5.2.4.2.1. Level One. BA equals the R-1 BA and BA Title. Use the set of distinct R-1 BA records to present the BA stub entries.

6.5.2.4.2.2. Level Two. DLO equals the R-1 Organizational Title. Use the set of distinct R-1 Defense Agencies to present the DLO stub entries.

6.5.2.4.2.3. Level Three. BSA equals the R-1 BSA and BSA Title. Use the set of distinct R-1 BSA records to present the BSA stub entries. Present the BSA stub entries under their respective DLO.

6.5.2.4.2.4. Level Four. BLI equals the R-1 Line Item and Line-Item Title and is the R-1 line-item detail and the lowest classification level. The DFAS Manual 7097.01 Budget Project Codes appropriation chapters identify a valid list of BAs/PEs. Use the set of distinct R-1 line-item records to present the BLI stub entries. Present the BLI stub entries under their respective BSA.

6.5.2.4.2.5. Level Five. BALI is a sub-set of BLIs and refers to sub-BLI codes used in the original allotment and sub-allotment funding authorization documents. Present the BALI stub entries under their respective BLI.

6.5.2.5. Military Construction and Family Housing

6.5.2.5.1. Report the three classification levels for distinct sets of TI Code 17, 21, and 57; FY program; and Main Account Code. For TI Code 97, report the three classification levels by the Defense Agency as prescribed by the DFAS Manual 7097.01.

6.5.2.5.1.1. Level One. BA equals the C-1 (Construction Programs) BA and BA Title. Use the set of distinct C-1 BA and BA Title records to present the BA stub entries.

6.5.2.5.1.2. Level Two. BSA equals the C-1 Location, Location Title, and State-Country. Use the distinct sets of C-1 Location, Location Title, and State-Country record combinations to report the set of locations. Present the location stub entries under their respective BA.

6.5.2.5.1.3. Level Three. BLI equals the C-1 Project and Project Title. Use the distinct set of C-1 Project and Project Title record combinations to report C-1 line items. Present the C-1 line items under their respective location and BA and BSA.

6.5.2.5.2. Report five classification levels for distinct sets of TI Code 97, FY program, and Main Account Code as prescribed by DFAS Manual 7097.01.

6.5.2.5.2.1. Level One. BA equals the C-1 BA and BA Title. Use the set of distinct C-1 BA records to present the BA stub entries.

6.5.2.5.2.2. Level Two. DLO equals the C-1 Organizational Title. Use the set of distinct C-1 Defense Agencies to present the DLO stub entries.

6.5.2.5.2.3. Level Three. BSA equals the C-1 BSA and BSA Title. Use the set of distinct C-1 BSA records to present the BSA stub entries. Present the BSA stub entries under their respective DLO.

6.5.2.5.2.4. Level Four. BLI equals the C-1 Line Item and Line-Item Title and is the C-1 line-item detail and the lowest classification level. The DFAS Manual 7097.01 Budget Project Codes appropriation chapters identify a valid list of BAs/PEs. Use the set of distinct C-1 line-item records to present the BLI stub entries. Present the BLI stub entries under their respective BSA.

6.5.2.5.2.5. Level Five. BALI is a sub-set of BLIs and refers to sub-BLI codes used in [the](#) original allotment and sub-allotment funding authorization documents. Present the BALI stub entries under their respective BLI.

6.5.2.5.3. Report one classification level for distinct sets of TI Code 17, 21, 57, and 97; FY program; Military Construction BA of Minor Construction or Planning and Design; and Family Housing Construction BA of Construction Improvements or Planning and Design. The line-item classification equals the C-1 BA and BA Title. Use the set of distinct C-1 BA records to present the BA stub entries. For TI Code 97, report the BA by [the](#) Defense Agency.

6.5.2.5.4. Report one classification level for distinct sets of TI Code 17, 21, 57, and 97; FY program; and Main Account Code for Family Housing O&M or DoD Family Housing Improvement Fund (FHIF). The line-item classification equals the C-1 BA and BA Title. Use the set of distinct C-1 BA records to present the BA stub entries.

6.5.2.5.5. For Base Realignment and Closure (BRAC), follow the report classification levels prescribed by the DFAS Manual 7097.01 Budget Project Codes appropriation chapter guidance for BRAC Accounts. Report the BA of Major Construction information by location and title and report all other BAs at the BA lump-sum level by FY and Service Component or Defense Agency.

6.5.2.5.6. For the FHIF (97 X 0834), [once project funds have been transferred from Family Housing Construction to the FHIF](#), follow the guidance in subparagraph 6.5.2.5.1.

6.5.2.6. Trust and Special Funds

6.5.2.6.1. Report one classification level for each trust or special fund.

6.5.2.6.2. The line item classification equals the BA as found in the President's budget exhibits, DoD Military Programs, or Other Defense – Civil Programs, as appropriate.

6.5.3. Reimbursable Programs

6.5.3.1. Report all reimbursable program data separately from direct program data. A subtotal for the direct program will be followed by a one-line reimbursable program, followed by a “Grand Total”, which is the sum of the direct and the reimbursable programs.

6.5.3.2. For all the appropriation functional titles, report reimbursable program data at the lump-sum level for distinct sets of TI Code 17, 21, and 57; FY program; and Main Account Code.

6.5.3.3. For TI Code 97:

6.5.3.3.1. Main Account Codes for BRAC and Procurement accounts report reimbursable program data at the lump-sum level by FY program and Defense Agency; and

6.5.3.3.2. All other Main Account Codes report reimbursable program data at the lump-sum level by FY program.

6.6 Column Descriptions

The composition and amounts in each column are detailed in subparagraphs [6.6.1](#) - [6.6.4](#).

6.6.1. No-year accounts

6.6.1.1. No-year accounts follow the same guidance as other accounts but are individually reported by [the](#) FY account. No-year accounts are tracked and reported by the FY in which the funds were appropriated. The FY in which the funds were appropriated is also known as the SFIS Program Year.

6.6.1.2. The period of availability (POA) start year for no-year accounts reflects the year money was appropriated; the POA end year reflects XXXX. For example, the POA for no-year money appropriated in FY 2019 would be reflected as 2019/XXXX on the AR(M) 1002. Continue to report these funds separately until the account is closed.

6.6.2. General

6.6.2.1. Budget Activity (Column A). [Appropriate](#) values for the report stub entries are the program codes contained in the publicly published President’s Budget. The nomenclature is equal to the line items found in the President’s Budget Exhibits M-1, O-1, R-1, P-1, C-1; Family Housing and BRAC Programs; DoD Military Programs; and Other Defense – Civil Program documents. Arrange the separate FY appropriation accounts of an appropriation title in consecutive order, starting with the most current FY or multiple-year account. Arrange the FY programs within a multiple program year account in consecutive order, starting with the most current FY program. Subtotals are required for each level contained in the report.

6.6.2.2. Base for Reprogramming (Column B). The balance in this column matches the enacted amounts as published in the Department of Defense (DD) Form 1414, Base for Reprogramming Actions for most appropriation types. Once established, the dollar values in the column will not change and will continue to be reported for the life cycle of the account (until the account closes). The exceptions to this are the Trust and Special Funds. Column B will match the current year authority for these funds. Volume 3, Chapter 6, contains an example of the DD 1414.

6.6.3. Cumulative Columns

6.6.3.1. Approved Program (Column C). The balance in this column shows the approved program for the FY-to-date. Column C includes the distribution of the effect of approved reprogramming actions on DD Form 1415-1, Reprogramming Action - Prior Approval, and/or DD 1415-3, Reprogramming Action - Internal; supplemental appropriations; and rescissions. The amounts in this column will change to reflect congressionally approved changes to the program. This column reflects the cumulative program-to-date and will continue to be reported for the life cycle of the account (until the account closes). Guidance for reprogramming is contained in Volume 3, Chapters 6 and 7. Volume 3, Chapter 6, contains an example of the DD 1415-1 and DD 1415-3. The exceptions to this are the Trust and Special Funds. Column B will match the current year authority for these funds.

6.6.3.2. Revised Program (Column D). The balance in this column shows the effect of below threshold reprogramming (BTR) actions initiated by a DoD Component that occur during execution.

6.6.3.2.1. Note that the grand total for column C and column D will be the same. The difference between the two columns is that column D incorporates BTRs and column C does not. BTR actions provide DoD Components with the discretionary flexibility to realign funding within prescribed limits. BTR actions are minor actions not otherwise requiring congressional approval that may be accomplished within the DoD Components and are measured cumulatively over the entire obligation availability of the appropriation. The grand totals for column C and column D will be the same; however, differences will exist below the grand total level if BTRs have been recorded which realigned previous funding levels.

6.6.3.2.2. The exceptions to this are the Trust and Special Funds. Column B will match the current year authority for these funds, which reports either current year authority or apportionment amount as appropriate.

6.6.3.3. Cumulative Obligations (Column E). Enter the number of obligations occurring from the inception of the program to the end of the reporting period. Obligation transactions will include both obligations incurred and adjustments of prior-year obligations. The exceptions to this are the Trust and Special Funds, which report current year obligations plus unpaid obligations from the prior year.

6.6.3.4. Cumulative Unobligated Balance (Column F). The balance shown in this column represents the difference between columns D and E.

6.6.3.5. Cumulative Expenditures (Column G). Enter the distribution of the gross disbursements (net of refunds) from the inception of the program to the end of the reporting period. Within an FY program, enter the difference between amounts distributed by subaccount and total disbursements identifiable to that FY program on the “Undistributed Disbursement” line. Enter disbursements not immediately distributable by FY program, or by subaccount in accounts without FY program subdivisions, on the “Undistributed Disbursement” line immediately before the total line for the appropriation account. For expired year accounts, unless specifically exempted by the OUSD(C), report the direct and reimbursable programs at the same level of detail as they were reported as unexpired accounts. The total of column G plus the total of column H must equal column D.

6.6.3.6. Cumulative Unexpended Balance (Column H). Enter the distribution of the unexpended balance from the inception of the program to the end of the reporting period. Column H will equal the difference between columns D and G.

6.6.3.7. Commitments (Column I). The use of column I is optional for operating appropriations. Enter the number of outstanding commitments recorded, by subaccount. The entry in this column may properly exceed the amount of the unobligated balance in column F if a program reduction was approved in anticipation of a cancelation or downward adjustment of commitments outstanding. If there was no approved program reduction, then an excess of commitments outstanding over the total unobligated balance indicates the program was implemented above the approved amount.

6.6.4. Current FY Columns

6.6.4.1. Amount Obligated in Current FY (Column J). Enter the number of obligations occurring from the beginning of the current FY to the end of the reporting period. Obligation transactions include both obligations incurred and adjustments of prior year obligations.

6.6.4.2. Amount Expended in Current FY (Column K). Enter the distribution of the gross disbursements (net of refunds) for the period from the beginning of the current FY to the end of the reporting period. Within an FY program, enter the difference between amounts distributed by subaccounts and total disbursements identifiable to that FY program on the line “Undistributed Disbursement”. Enter disbursements not immediately distributable by FY program, or by subaccount in accounts without FY program subdivisions, on the line “Undistributed Disbursement” immediately before the total line for the appropriation account. For expired year accounts, unless specifically exempted by the OUSD(C), report the direct and reimbursable programs at the same level of detail as they were reported as unexpired accounts.

6.7 Reconciliation of AR(M) 1002 With the DD 1414; DD 1416, Report of Programs; and Other Reports Submitted to Congress

6.7.1. Reconciliations

6.7.1.1. Perform the DD 1414 and DD 1416 reconciliations described in [6.7.2-3](#) only for appropriation authority amounts.

6.7.1.2. Spending authority from offsetting collections, contract authority, and borrowing authority do not apply to these reconciliations.

6.7.2. Military Personnel and O&M Accounts

6.7.2.1. The DD 1414 is prepared annually directly after the DoD Appropriations Act is passed. The Base for Reprogramming column (normally the last column on the DD 1414 report) amounts must reconcile with the amounts in the AR(M) 1002 column B at the BA level. See Volume 3, Chapter 6 for additional information on the reprogramming of DoD-appropriated funds and related reports.

6.7.2.2. The Selected Reserve Personnel by Reserve Component Report is prepared in accordance with the yearly appropriations acts.

6.7.3. RDT&E and Procurement Accounts

6.7.3.1. The Base for Reprogramming column amounts must reconcile with the amounts in the AR(M) 1002 column B at the P-1/R-1/BLI line-item level.

6.7.3.2. The DD 1416 is prepared quarterly upon receipt of enactment of the DoD Appropriations Act. The net amount reported on the DD 1416 must be reconciled with column D of the AR(M) 1002 by P-1/R-1/BLI. The OUSD(C) will provide guidance for reporting under continuing resolutions.

6.7.4. Military Construction Accounts

6.7.4.1. The [DD 1391](#), Military Construction Project Data supports each project proposed for inclusion in the Military Construction Program. This includes new authorization projects in the program or projects using emergency or contingency authorization.

6.7.4.2. Volume 2B, Chapter 6 contains a copy of the form and instructions for preparation.

6.8 Special Instructions for Selected Accounts

6.8.1. Obligation Limitation for Annual Accounts. Each year, Title VIII, “General Provisions,” of the DoD Appropriations Act requires a certification that not more than 20 percent of the appropriations in that act, which are limited for obligation during the current FY, will be obligated during the last 2 months of the FY. The exception to this policy is the Reserve Components record obligations for support of active-duty training or the Reserve Officers Training Corps’ records obligations for summer camp training.

6.8.2. Certification. Each year, DoD Components must provide one of the following certifications, depending upon the level of obligations incurred, on the July AR(M) 1002 for those annual appropriations to which the limitation applies:

6.8.2.1. In determining direct obligational authority, the number of transfers in or out within the applicable DoD Appropriations Act will be considered. This certification usually is referred to as the “80/20” criterion. If obligations are 80 percent or more of direct authority, the certification will be as follows:

“I hereby certify that direct obligations have been incurred equal to or in excess of 80 percent of the funds subject to the congressional limitation on year-end spending.”

6.8.2.2. If obligations are less than 80 percent, then the certification will be as follows:

“I hereby certify that action has been taken to assure that not more than 20 percent of the funds subject to the congressional limitation on year-end spending remains available for obligation during the remainder of the FY.”

7.0 REPORTING OBLIGATION AND OUTLAY DATA

7.1 Purpose

7.1.1. Consolidation entities will report obligation and outlay planning and execution data to OUSD(C)(P/B) P&FC for monitoring the planned monthly execution of approved DoD programs.

7.1.2. OUSD(C) updates requirements for planning data on an annual basis. Specific report formats are updated on a yearly basis by memorandum to the Assistant Secretaries of the Military Departments’ FM&C.

7.1.3. OUSD(C) updates requirements for execution data on an annual basis. Specific report formats are updated on a yearly basis by memorandum to DFAS.

7.1.4. Report on the SF 133 monthly totals for obligation and outlay execution data. These reports, provided monthly by DFAS to OUSD(C) and the Military Departments, must be consistent with data reported to the Treasury via GTAS. These reports must be available to DoD consolidation entities.

7.2 Scope

Planning and execution data for obligations and outlays applies to DoD Components with respect to obligations incurred for all military functions; including obligations incurred in connection with related allocation and transfer appropriation accounts. This includes all DoD Military accounts as well as related receipt accounts.

CHAPTER 7

FOREIGN CURRENCY REPORTS

1.0 GENERAL

1.1 Purpose

This chapter establishes reporting requirements for tracking all transactions that increase or decrease the foreign currency fluctuation (FCF) accounts. FCF, Defense (FCF, D) and FCF, Construction, Defense (FCF, C, D) appropriations were established by Congress to reduce the adverse impact of FCF losses on the Department of Defense (DoD) operating budget.

1.2 Authoritative Guidance

The DoD Appropriation Act of 1979, [Public Law 95-457](#), initially established the FCF program to maintain the budgeted level of operations and eliminate substantial gains or losses caused by FCF rates that vary substantially from those used in preparation of budget submissions. Public Law 95-457 has been codified under Title 10, United States Code, section 2779 ([10 U.S.C. § 2779](#)). Additional authoritative guidance is referenced throughout the chapter.

2.0 PROGRAM MANAGEMENT

The provisions of this chapter apply to all DoD Components unless a specific written exception has been granted by the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)).

*2.1 Definitions

2.1.1. FCF Account. An FCF account [allows](#) service components to manage realized gains and losses in direct programs due to fluctuation in foreign exchange rates. Funding is normally provided as a budgetary line item as part of a component's annual funding authorization. The service components maintain FCF accounts at various budgetary levels.

2.1.2. Centrally Managed Allotment (CMA). A CMA is used by DoD to manage budgetary authority provided by the FCF accounts. Funding transfers from the FCF account line within the appropriation to cover realized losses are contingent on funds availability in the CMA. [When](#) FCF budget authority [is](#) insufficient, component level operating funds [are required](#) to cover any realized losses. Net gains due to currency fluctuation are returned by the component operating appropriations through the FCF account line for reallocation and distribution by the CMA in subsequent years based on approved FCF budget authority (see subparagraph 3.2.4.). CMAs are managed at the DoD level.

2.1.3. Budget Rate. Budget rates are OUSD(C) published foreign currency exchange rates for use during the formulation, preparation, and submission of DoD's operating budgets. These published budget rates will also be used as the basis for recording budgetary obligations that are

associated with approved overseas programs into the accounting systems of DoD. Do not use internal or unapproved exchange rates on official accounting or disbursing records.

2.1.4. Foreign Currency Liquidated Obligations. Foreign currency liquidated obligations are paid obligations liquidated in the accounting system at the budget rate of the foreign currency cited within the obligating document. These liquidated obligations represent a key component of the monthly reporting process and are required to compute the realized variance.

2.1.5. Realized Variance. A realized variance is the calculated difference between obligations recorded at the budget rate and liquidated at the foreign currency exchange rate in effect at the time of payment. When the budget rate used in recording the original obligation is less than the current exchange rate, transfer the realized variance (loss) from the applicable FCF account if funds are available. When the budget rate used in recording the original obligation is more than the current foreign currency exchange rate, transfer the realized variance (gain) into the applicable FCF account.

2.1.6. Foreign Currency Unliquidated Obligations. Foreign currency unliquidated obligations are unpaid obligations recorded in the accounting system at the budget rate of the foreign currency cited within the obligating document. These unpaid obligations represent a key component of the monthly reporting process and are required to compute the accrued variance. At time of disbursement, foreign currency unliquidated obligations in excess of the outlay amount must be adjusted to the actual outlay amount and net gains transferred to the applicable FCF Account.

2.1.7. Accrued Variance. An accrued variance is the difference between the value of unliquidated obligations recorded at the budget rate and the value of those same unliquidated obligations calculated at the current foreign currency exchange rate. The computed accrued variance provides DoD decision makers a monthly estimate of the net gains or losses that would be realized if payment had to be made as of the report date.

2.2 FCF, D

Congress authorized the FCF, D appropriation (Department of the Treasury Account Symbol (TAS) 97X0801) to manage foreign currency net gains and losses in the DoD Operation and Maintenance (O&M) and Military Personnel (MILPERS) appropriations. As net gains from O&M and MILPERS are realized by de-obligation of the unneeded portion of the direct program, transfer the gains to FCF, D. Funds held in FCF, D will be transferred to O&M and MILPERS to cover net losses. Charge net gains or losses from foreign currency exchange rate fluctuation funded by FCF, D to the same FY as the underlying obligation. In areas participating in the FCF program, the occurrence of a gain or loss on an FCF transaction is an expected, normal component of an obligation; therefore, treat as an ordinary event. Record the gain or loss on an FCF transaction using current United States Standard General Ledger (USSGL) accounts for Other Gains (USSGL account 719000) and Other Losses (USSGL account 729000).

2.2.1. 10 U.S.C. § 2779(a) allows previously transferred FCF, D funds to be transferred back to the FCF, D appropriation so long as the transfer is made no later than the end of the second FY after the FY that the appropriation to which the funds were originally transferred is available for obligation. This is allowed only if the funds are not needed to finance increased obligations due to fluctuation in currency exchange rates because of subsequent favorable fluctuation in currency exchange rates or because other funds are, or become, available to finance these cost increases.

2.2.2. 10 U.S.C. § 2779(d) states any transfer made pursuant to the authority provided in this subsection must be limited such that the balance in the appropriation FCF, D does not exceed \$970 million at the time of the unobligated balance transfer.

2.3 FCF, C, D

In FY 1987, Congress enacted the current authority for an FCF appropriation to protect DoD Military Construction, Family Housing, and North Atlantic Treaty Organization (NATO) infrastructure programs from substantial gains or losses resulting from foreign currency fluctuation. The title of this appropriation is FCF, C, D TAS 97X0803.

2.3.1. The FCF, C, D [appropriation](#) was initially capitalized by transferring unobligated balances from the family housing and military construction appropriations. Pursuant to authority conferred by recurring annual Military Construction Appropriations Act general provisions, unobligated balances from family housing and military construction appropriation accounts may be transferred into FCF, C, D during the 5-year period after the appropriations expire for original obligation purposes. As FCF gains are realized by de-obligation of the unneeded portion of the direct program, transfer the gains to FCF, C, D. [Funds held in FCF, C, D will be transferred to family housing and military construction to cover net losses.](#) Charge net gains or losses from foreign currency exchange rate fluctuation funded by FCF, C, D to the same FY as the underlying obligation. In areas participating in the FCF program, the occurrence of a gain or loss on an FCF transaction is an expected, normal component of an obligation; [therefore](#), treat as an ordinary event. Record the gain or loss on an FCF transaction using current USSGL accounts for Other Gains (USSGL account 719000) and Other Losses (USSGL account 729000).

2.3.2. OUSD(C) [must](#) approve all amounts transferred from this appropriation to other appropriations available for construction.

2.4 Standards

2.4.1. The FCF, D and FCF, C, D appropriations are not available to finance cost increases resulting from changes in the scope of programs, inflation increases, or other such changes, nor to finance Prompt Payment Act interest payments. Other important provisions of the FCF appropriations relate to obligation/expenditure limitations and financial accounting requirements related to foreign currency exchange fluctuation.

2.4.1.1. Authorizations or limitations now or hereafter contained within appropriations or other provisions of law limiting the amounts that may be obligated or expended

will be increased to the extent necessary to reflect fluctuation in foreign currency exchange rates from those used in preparing the applicable budget submission.

2.4.1.2. Contracts or other obligations entered into that are payable in foreign currencies may be recorded as obligations based on currency exchange rates used in preparing budget submissions, as amended by Congress, and adjustments to reflect fluctuation in such rates will be recorded as disbursements are made.

2.4.2. Funds transferred from the FCF appropriation [CMAs](#) will be available for funding [accounts](#) established [within](#) the applicable O&M, construction, family housing, or NATO infrastructure appropriations to cover losses or account for gains in direct programs due to fluctuation in foreign exchange rates. Base these transfers on need, funds available to cover such losses DoD-wide, and other budgetary considerations. Consequently, such losses may not be fully funded.

2.4.3. The DoD Components will record foreign currency obligations at the installation level in dollars, at the budgeted rate, or at the congressionally established budget exchange rate for direct program of affected appropriations as reflected in applicable committee reports or the appropriate appropriation acts.

2.4.3.1. OUSD(C) will provide these rates to the DoD Components.

2.4.3.2. Foreign currency obligations are those obligations that are either payable in specified foreign currency or payable in dollars, the amount of which is determined by the rate of exchange.

2.4.3.3. When payment is made, charge the variance between the budget rate and the current rate directly to the applicable FCF account. If the transaction results in a gain, credit the FCF account in the amount de-obligated from the original FCF, C, D obligation. For example, a military construction project was included in the FY 2017 President's Budget (PB). Funds for the project were obligated in FY 2018 using FY 2017 funds, and all the project expenditures disbursed in FY 2019. In this example, record the obligations in the accounting system using the FY 2017 budget rates. There would be no effect on the military construction FCF account prior to FY 2019 since no disbursements were made until FY 2019. The foreign currency reports in each of those years, however, would identify accrued variances, i.e., the differences between the project obligations carried at the FY 2017 budget rate and the project obligations valued at the current exchange rate. Use this accrued variance to identify the projected disbursement requirements of the component FCF account. The realized foreign currency variance would be recorded against the military construction FCF account for FY 2017 at the time of the actual disbursements.

2.4.4. The Defense Finance and Accounting Service (DFAS) Service Component central accounting activities will determine the total foreign currency unliquidated obligations at the budget exchange rate provided by OUSD(C) for each appropriation, and identify and accumulate both favorable and unfavorable variances. The supporting activity will also determine the "accrued variance" at the end of each month based on the difference between unliquidated

obligations at the budget rate and unliquidated obligations at the current rate, using the exchange rate on the last day of the month. The accrued variance will never be obligated in the official accounting documents.

2.4.5. Each DoD Component holding an FCF account is responsible to establish internal controls and carefully monitor funds availability at all times, as Antideficiency Act provisions apply to each FCF account. Establish controls to reserve sufficient funds within the appropriation's availability to finance projected disbursement requirements for the FCF account. For family housing and construction, a 6-month requirement is recommended. Should FCF account funding availability drop below that level, take immediate action to avoid over-obligation. Such action will include providing additional funds from current accounts and, if necessary, advising all disbursing officers to cease payments from the FCF account without prior certification until funding is obtained. Do not take any action that presumes relief through a transfer of funds from the FCF appropriations because of the limited capital available in these accounts.

2.4.6. OUSD(C) publishes a [monthly report](#) of specific currencies in the FCF program and associated exchange rates. OUSD(C) may add and [remove](#) currencies as conditions warrant. The [OUSD\(C\) Financial Management Reports](#) site provides [FCF](#) reports that contain the list of currencies, the applicable budget rate, and the current period adjusting rate.

3.0 REPORTING REQUIREMENTS

3.1 Appropriation Transfers

OUSD(C) manages the FCF, D and FCF, C, D appropriations and instructs the DFAS Departmental Reporting Directorate-Indianapolis on the amount of the funds to transfer to and from the applicable appropriations. DFAS-Indianapolis transfers the designated amounts by means of a Standard Form 1151, Nonexpenditure Transfer Authorization.

3.2 General Reporting Guidance

3.2.1. Other than calculating the monthly accrued variance described in subparagraph 2.4.4., no further adjustment to the original obligation is necessary until disbursement is made or until the appropriation is closed.

3.2.2. FCF requirements described in this chapter do not apply to reimbursable programs. The performing activity will continue to accept reimbursable orders, incur obligations, and bill for reimbursement at the current foreign currency exchange rate using the requirements found in Volume 11A, Chapter 1. However, when the performing activity and the benefiting activity are DoD organizations, the performing activity will notify the benefiting activity of the amounts obligated that [require payment](#) in foreign currency. The benefiting activity will record that portion of its obligation for direct programs at the budget rate in the manner prescribed in subparagraph 2.4.3. Record the realized variance determined at the time of the disbursement in the respective FCF account of the benefiting activity.

3.2.3. Do not adjust normal operating budgets or other funding documents issued for the affected appropriations by DoD Components for foreign currency exchange rate fluctuation.

3.2.4. Prior to closing the financial records at year-end, each component holding an FCF account will review the status of that account. Transfer net gains in an FCF account to the applicable FCF appropriation. Components will also determine the portion of the losses that the FCF account can absorb and transfer to the FCF appropriation any remaining balances that are not required.

3.2.5. FCF requirements described in this chapter do not apply to Gains and Deficiencies on Exchange Transactions, Army (TAS 21 6763 and TAS 021 6763); Gains and Deficiencies on Exchange Transactions, Navy (TAS 17 6763 and TAS 017 6763); Gains and Deficiencies on Exchange Transactions, Air Force (TAS 57 6763 and TAS 057 6763); and Gains and Deficiencies on Exchange Transactions, Treasury (TAS 20 6763 and TAS 020 6763). Volume 5, Chapter 4 provides guidance regarding deficiencies. See Volume 5, Chapter 13 for guidance regarding gains and losses by revaluation.

3.2.6. FCF requirements described in this chapter do not apply to Burdensharing funds received from other countries. See Volume 12, Chapter 24 for guidance regarding Burdensharing funds.

3.3 Report Error Correction

Service components and OUSD (Personnel & Readiness) (OUSD(P&R)) Military Compensation Policy are responsible for ensuring the completeness and accuracy of monthly report submissions to DFAS Departmental Reporting Directorate-Indianapolis. DFAS forwards the consolidated reports to the Office of the Deputy Comptroller (Program/Budget) (ODC(P/B)), OUSD(C), which also conducts a review of submitted reports for completeness and accuracy. ODC(P/B), OUSD(C) will notify the applicable data submitter if data correction is required. The applicable data submitter is responsible for data correction and resubmission through DFAS Departmental Reporting Directorate-Indianapolis to ODC(P/B), OUSD(C).

4.0 REPORTING FORMATS

4.1 Department of Defense Comptroller (Monthly) (DD-COMP (M)) 1506 – Foreign Currency Fluctuations, Defense Report (O&M)

4.1.1. DFAS Departmental Reporting Directorate-Indianapolis is responsible for submitting the consolidated monthly report to the ODC(P/B), OUSD(C).

4.1.2. The DFAS Service Component central accounting activities, DoD Education Activity (DoDEA), Defense Security Cooperation Agency, Defense Health Agency (DHA), and Defense Media Activity will provide a monthly report to DFAS Departmental Reporting Directorate-Indianapolis using the format in Figure 7-1.

4.1.2.1. Submit the report in accordance with due dates established by DFAS-Indianapolis and consistent with the requirements of OUSD(C).

4.1.2.2. The report will include the following:

4.1.2.2.1. Column 1 – Currency/Submitter. Alphabetically list the specified country. Include the official currency (monetary unit) next to each country.

4.1.2.2.2. Column 2 – Unliquidated Obligations. Enter the dollar amount of foreign currency unliquidated obligations at the budget rate. Derive this amount by taking the obligations incurred at the budget rate less the disbursements at the budget rate.

4.1.2.2.3. Column 3 – Accrued Variances. Enter the accrued variances for the unliquidated obligations shown in column 2. This amount may change from month to month as the current foreign currency exchange rate changes and/or as the amount of unliquidated obligations changes.

4.1.2.2.4. Column 4 – Liquidated Obligations. Enter the dollar amount of foreign currency obligations liquidated in the accounting system at the budget rate of the foreign currency cited within the obligating document.

4.1.2.2.5. Column 5 – Realized Variances. Enter the actual dollar amount of the variance resulting from liquidated obligations to date. This amount represents the variance (difference) between obligations at the budget rate and amounts actually disbursed.

4.1.2.2.6. Column 6 – Obligations Incurred. Enter the dollar amount of total foreign currency obligations incurred to date at the budget rate. Compute this amount from actual accounting data of obligations incurred at the budget rate. It will not be a derived number.

4.1.2.2.7. Column 7 – Planned Overseas Program. The planned overseas program for execution at the budget rate should agree with the current year (CY) column of the Exhibit PB-18 (Foreign Currency Exchange Data). Volume 2B, Chapter 19 contains the format for Exhibit PB-18, which is required to support the PB request for the budget year. Explain any increases or decreases to the planned overseas program during the execution of the CY by country in the monthly report.

4.1.2.3. The report will also include footnotes showing:

4.1.2.3.1. The total funding provided to the FCF account by source including:

4.1.2.3.1.1. Transfers from the FCF, D appropriation;

4.1.2.3.1.2. Transfers from the component's O&M availability; and

4.1.2.3.1.3. Total FCF account funding;

4.1.2.3.2. The anticipated gains or losses for the remainder of the FY. Estimate the anticipated gains or losses on projected disbursements to the end of the year by computing the variance that would occur if the current foreign currency exchange rates were to remain in effect during the remainder of the year;

4.1.2.3.3. Transfers to FCF, D due to favorable realized variances;

4.1.2.3.4. Projected liquidations (budget rate) for the FY. Estimate the obligations (budget rate) that will be disbursed during the FY; and

4.1.2.3.5. An explanation of deviations from planned overseas program by country. This is required when substantial variances from the “obligations incurred” column exist. This explanation can occur any time prior to the canceling of funds.

4.2 FCF, D Report (MILPERS)

4.2.1. Foreign currency rate variances increase or decrease the value of allowances paid to service members. To maintain the value of that portion of allowances members receive to purchase foreign currency, adjust allowances to offset increases or decreases in foreign currency rates. For purposes of FCF, D transfers, the calculated effect on MILPERS disbursements that result from changes in foreign currency rates (foreign currency variance) is the difference in dollars required for the allowance at budget exchange rates and the current allowance rates. However, FCF, D transfers are approved only for Cost-of-Living Allowances (COLA) and Overseas Housing Allowances (OHA).

4.2.2. DFAS Departmental Reporting Directorate-Indianapolis is responsible for submitting this consolidated monthly report to the ODC(P/B), OUSD(C).

4.2.3. The process for identifying the foreign currency impact on COLA and OHA is as follows:

4.2.3.1. Identify total expenditures by the Military Departments for COLA and OHA by officer and enlisted for the country currencies included in the FCF, D account.

4.2.3.2. OUSD(P&R) Military Compensation Policy will report to the DFAS Service Component central accounting activities the appropriate COLA and OHA index based on current exchange rates. For FCF, D, OUSD(P&R) Military Compensation Policy will also report COLA and OHA indices based on the budget exchange rates.

4.2.3.3. DFAS Service Component central accounting activities will access affected personnel pay accounts and identify the COLA and OHA disbursements, by officer and enlisted, according to designated location codes.

4.2.3.4. DFAS Service Component central accounting activities will calculate the foreign currency impact by estimating the differences between budget exchange rates and current exchange rates applied to the total expenditures for COLA and OHA.

4.2.3.5. Consolidate foreign currency amounts and identify the remaining expenditures for the end-of-month recorded disbursements.

4.2.4. The COLA foreign currency report format structure is:

4.2.4.1. Service,

4.2.4.2. Country (FCF, D country),

4.2.4.3. Budget Rate,

4.2.4.4. COLA Rate,

4.2.4.5. COLA Code,

4.2.4.6. COLA Code Change Indicator,

4.2.4.7. Budget Index,

4.2.4.8. Allowance Index,

4.2.4.9. COLA Factor,

4.2.4.10. Actual COLA Enlisted Disbursement,

4.2.4.11. Budgeted COLA Enlisted Amount MILPERS Appropriation,

4.2.4.12. COLA Realized Variance Enlisted,

4.2.4.13. Actual COLA Officer Disbursement,

4.2.4.14. Budgeted COLA Officer Amount MILPERS Appropriation,

4.2.4.15. COLA Realized Variance Officer,

4.2.4.16. Actual COLA Officer/Enlisted Disbursement Total,

4.2.4.17. Budgeted COLA Officer/Enlisted Amount MILPERS Appropriation
Total, and

4.2.4.18. COLA Realized Variance Officer/Enlisted Total.

4.2.5. The OHA foreign currency report format structure is:

4.2.5.1. Service,

4.2.5.2. Country (FCF, D country),

4.2.5.3. Budget Rate,

4.2.5.4. OHA Rate,

4.2.5.5. OHA Factor,

4.2.5.6. Actual OHA Enlisted Disbursement,

4.2.5.7. Budgeted OHA Enlisted Amount MILPERS Appropriation,

4.2.5.8. OHA Realized Variance Enlisted,

4.2.5.9. Actual OHA Officer Disbursement,

4.2.5.10. Budgeted OHA Officer Amount MILPERS Appropriation,

4.2.5.11. OHA Realized Variance Officer,

4.2.5.12. Actual OHA Officer/Enlisted Disbursement Total,

4.2.5.13. Budgeted OHA Officer/Enlisted Amount MILPERS Appropriation
Total, and

4.2.5.14. OHA Realized Variance Officer/Enlisted Total.

4.2.6. Report the following information by OUSD(P&R) Military Compensation Policy and use it to prepare the monthly COLA and OHA foreign currency execution reports:

4.2.6.1. Column A – Country. This column lists the budget countries subject to FCF, D requirements.

4.2.6.2. Column B – Budget Rate. This column identifies the FY budget exchange rates as set by OUSD(C).

4.2.6.3. Column C – COLA Rate. This column identifies the current market exchange rate upon which both COLA and OHA are set (allowance rate).

4.2.6.4. Column D – COLA Code. For countries with multiple COLAs, many locations are linked and receive the same index. This code identifies linked locations for COLA purposes.

4.2.6.5. Column E – COLA Code Change Identifier. This column identifies whether a change has been made this period to the COLA Code.

4.2.6.6. Column F – Budget Index. This column represents the COLA index based on budget rate.

4.2.6.7. Column G – Allowance Index. This column represents the COLA index based on allowance rate.

4.2.6.8. Column H – COLA Factor. This column represents the multiplication factor for COLA disbursements based on budget and allowance indices.

4.2.6.9. Column I – OHA Factor. Compute the balance for this column by taking the budget rate minus the OHA rate divided by OHA rate.

4.3 DD-COMP (M) 1761 – Foreign Currency Fluctuation, Construction, Defense Report

4.3.1. DFAS Departmental Reporting Directorate-Indianapolis is responsible for submitting this consolidated monthly report to ODC(P/B), OUSD(C).

4.3.2. The DFAS Service Component central accounting activities, DoDEA, DHA, Defense Logistics Agency, and U.S. Special Operations Command will provide a monthly report to the DFAS Departmental Reporting Directorate-Indianapolis using the format in Figure 7-2.

4.3.2.1. Submit the reports in accordance with due dates established by DFAS-Indianapolis and consistent with the requirements of OUSD(C).

4.3.2.2. The report will include the following:

4.3.2.2.1. Column 1 – Country. Alphabetically list the specified country.

4.3.2.2.2. Column 2 – Monetary Unit. Enter the monetary unit of the country.

4.3.2.2.3. Column 3 – Foreign Currency Unliquidated Obligations. Enter the dollar amount of unliquidated obligations at the budget rate. Report unliquidated obligations by FY.

4.3.2.2.4. Column 4 – Accrued Variance. Enter the accrued variance for the unliquidated obligations in column 4. This amount may change from month to month as the current foreign currency exchange rate changes. Report accrued variances by FY.

4.3.2.2.5. Column 5 – Foreign Currency Liquidated Obligations. Enter the dollar amount of total obligations liquidated for the report month at the budget rate.

4.3.2.2.6. Column 6 – Realized Variance. Enter the actual dollar amount of the variance resulting from liquidated obligations for the month. This amount represents the variance (difference) between obligations at the budget rate and the amount actually disbursed. Charge all realized variances against the applicable FCF accounts for construction, military family housing operations and maintenance, and military family housing construction.

4.3.2.2.7. Column 7 – FCF Account Projected 6-Month Disbursements.

Enter the projected 6-month disbursements from the FCF accounts based on historical outlay data, contract requirements, and payment schedules.

4.3.2.3. The report will also include footnotes showing:

4.3.2.3.1. The anticipated gains or losses for the rest of the FY (estimate this figure by computing the variance that would occur if the present currency exchange rates were to remain unchanged during the remainder of the FY); and

4.3.2.3.2. The total amount of funding transferred to the FCF accounts from the FCF, C, D appropriation.

CHAPTER 9

**ACCOUNTING AND REPORTING FOR OPERATION AND MAINTENANCE
OF THE FAMILY HOUSING PROGRAM**

1.0 GENERAL

1.1 Overview

This chapter provides accounting support for Family Housing Operation and Maintenance (O&M) requirements and prescribes an accounting structure that accumulates Family Housing O&M costs consistent with guidance set forth in Volume 2B, Chapter 6, [“Military Construction/Family Housing Appropriations.”](#) Congress established the Family Housing O&M appropriation to separate the funding of Family Housing O&M from other O&M programs. Charge all obligations incurred for O&M to support the military Family Housing Program to the Family Housing O&M appropriation.

1.2 Purpose

The purpose of the account structure is to provide uniform procedures for consistently identifying, accumulating, and reporting family housing program costs. Methods for computing costs for the Family Housing Program [must be](#) as uniform as practicable among the Department of Defense (DoD) Components. Such uniformity is essential to permit intra-DoD and inter-DoD Component program, budget, and cost comparison, irrespective of the management service, the agency, or the accounting system used at the installation. Cost identification and computation methods specified herein [must](#) minimize the accounting effort and detail required to compute costs. Costs for operating and maintaining family housing facilities must be identified as prescribed in this chapter and are the basis for reports referenced herein.

1.3 Authoritative Guidance

The Family Housing Program encompasses Military Family Housing, as defined and authorized by the provisions of [Title 10, United States Code \(U.S.C.\), Chapter 169](#), and includes all DoD Component family housing in the Defense Family Housing Property Account, leases of real property utilized by DoD Components for family housing, and associated family housing support services programs. The policies prescribed throughout this chapter, pertaining to the accounting, and reporting for O&M costs of the Family Housing Program, are based upon 10 U.S.C., Chapter 169 and the laws and regulations cited herein.

2.0 SCOPE

This policy applies to all DoD Components that support military family housing under the Family Housing Program. Military Departments' Housing Privatization support costs associated with the Military Housing Privatization Initiative ([MHPI](#)) Program, such as assessments/studies; portfolio, program, and asset management; construction oversight; consultant fees; and other administrative costs, including Civilian manpower for oversight, are funded by the Family Housing

O&M appropriation and fall within the parameters of this policy. The Office of the Under Secretary of Defense for [Acquisition and Sustainment \(OUSD\(A&S\)\)](#) and Defense Finance and Accounting Service (DFAS) MHPI Program administrative support costs are separately budgeted, accounted for, and reported in the Defense-wide Family Housing Improvement Fund (FHIF) and Military Unaccompanied Housing Improvement Fund (MUHIF) Program accounts.

3.0 ACCOUNT STRUCTURE AND CONTENT

*3.1 [Standard General Ledger Accounts](#)

The standard general ledger accounts used to report DoD MHPI entries are provided in the Transaction Library and Standard Reporting Chart of Accounts available on the Office of the Deputy Chief Financial Officer Standard Financial Information Structure ([SFIS](#)) web page.

3.2 Accounts Used for Accumulating Costs

A series of accounts have been established and maintained for accumulating Family Housing O&M costs incurred and reimbursements earned through the Family Housing Program. Compute and identify costs and reimbursements to the accounts in accordance with the guidance herein. Use the accumulated costs and reimbursements in the accounts to support budget exhibits and budget execution reports.

3.3 Required Summary and Subordinate Accounts

The following is a list of required summary and subordinate accounts.

3.3.1. Operations Account

3.3.1.1. Management Account. This account accumulates costs of management, administrative, and support-type services at the installation level involving:

3.3.1.1.1. Administration costs for installation military housing offices, including personnel, supplies, equipment, and utilities pertaining to the functions of a family housing office. These costs also include administrative support services provided in supply, comptroller, maintenance, and other installation offices when the costs for such services are attributable to family housing;

3.3.1.1.2. Costs for administering and providing housing referral services and assistance in locating and inspecting privately-owned family housing for DoD personnel;

3.3.1.1.3. Costs for requirements surveys and preliminary studies, including Family Housing Requirements and Market Analyses in accordance with 10 U.S.C. § 2837, condition assessments, survey requirements for construction plans, and concept development. This account also includes community liaison and planning for improvement and rental guarantee projects and inspection; and

3.3.1.1.4. Other identifiable management costs that directly support the Family Housing Program.

3.3.1.2. Services Account. This account accumulates costs for authorized services for Government-owned family housing units. For privatized housing, the developers are financially responsible for the reimbursement or payment of services provided.

3.3.1.2.1. Refuse Collection and Disposal. These services include collecting garbage, trash, ashes, debris, and refuse disposal for family housing, such as the O&M of incinerators, sanitary fills, and regulated dumps. These services also include the acquisition, maintenance, and repair of garbage and trash containers, and the operation of can-washing facilities.

3.3.1.2.2. Fire Protection. This service includes costs for protection and fire prevention efforts for family housing facilities.

3.3.1.2.3. Police Protection. This service includes the costs for law enforcement, traffic control, and protection of family housing facilities.

3.3.1.2.4. Entomological Services. These services include the costs of all control measures against fungi, insects, and rodents within family housing dwellings, facilities, and areas.

3.3.1.2.5. Custodial Services. These services include the costs of janitorial and custodial services performed in common service areas and the cost of elevator operation in family housing facilities.

3.3.1.2.6. Snow Removal. This service includes the costs of removing, hauling, and disposing of snow; ice alleviation; and erection, maintenance, repairs, and removal of snow fences for family housing areas.

3.3.1.2.7. Street Cleaning. This service includes the costs of cleaning streets comprised of sweeping, flushing, and picking up litter.

3.3.1.2.8. Municipal Type Services. These services include costs of miscellaneous municipal-type services not identifiable to other listed accounts.

3.3.1.2.9. Other Services. The costs of all other authorized services for family housing fall into this category.

3.3.1.3. Furnishings Account. This account accumulates costs for initial acquisition, maintenance, repair, and replacement of furnishings, furniture, movable household equipment, and authorized miscellaneous items. This account also includes costs of controlling, handling, record keeping, and moving of Government-owned furnishings into and out of family housing dwelling units; charges for connecting and disconnecting equipment; and handling costs incident to storage. Also included are furnishings for Special Command Positions and Senior Leadership as prescribed in [DoD Manual 4165.63](#), "DoD Housing Management."

3.3.1.4. Miscellaneous Account. This account accumulates costs of operational items that do not fall into management, services, or furnishings accounts. This account includes:

3.3.1.4.1. Lease, rents, and permit payments for housing and trailer spaces leased by the Government from private sources or provided by the Federal Housing Administration ([FHA](#)) or the U.S. Department of Veterans Affairs ([VA](#));

3.3.1.4.2. Reimbursement costs for dwellings provided by municipal, or foreign governments, or by Federal agencies other than the FHA or VA. This includes payments from the Military Departments to the U.S. Coast Guard for family housing provided to their military personnel;

3.3.1.4.3. German land taxes paid to the Federal Republic of Germany under the North Atlantic Treaty Organization Status of Forces Agreement for local taxes on land and improvements of family housing property;

3.3.1.4.4. Fire insurance charges paid to the Federal Republic of Germany to cover fire damage to family housing dwelling units;

3.3.1.4.5. United Kingdom accommodation charges paid in accordance with the country-to-country agreement for housing provided to U.S. Forces; and

3.3.1.4.6. Other miscellaneous operations costs not covered elsewhere.

3.3.2. Utility Account. This is a summary account for accumulating costs for utilities consumed in family housing, including electricity, water, sewage, natural gas, fuel oil, or other heating fuels. This account excludes the costs of maintenance and repair of utility systems identified to the family housing property covered under the Maintenance Account. Exclude other costs reported as “Services” from the utility operations account.

3.3.3. Maintenance Account

3.3.3.1. Dwellings Account. This account accumulates costs of maintenance and repair, including all interior utilities and installed equipment, of all family housing buildings in real property category codes 711, 712, and 714, as defined in the [DoD Real Property Categorization](#) System, which is established by [DoD Instruction 4165.03](#), “DoD Real Property Categorization.” Typically, accumulating costs for this account involves:

3.3.3.1.1. Service calls for minor work, including emergency and temporary repairs normally not in excess of 16 work hours;

3.3.3.1.2. Routine maintenance for occupancy work and other maintenance usually scheduled annually or more frequently;

3.3.3.1.3. Repairs and replacements for rehabilitation and replacement of major components and installed equipment;

3.3.3.1.4. Interior and exterior painting and the necessary preparation; and

3.3.3.1.5. Contract cleaning between occupancy, where authorized.

3.3.3.2. Exterior Utilities Account. This account accumulates costs of maintenance and repair of electric, gas, water, sewage, and other utility distribution, collection, or service systems assigned to family housing. Street and area lighting systems are included in exterior utilities beginning at a point 5 feet from the house line and ending at a point where the utility system joins a common-use main or terminates.

3.3.3.3. Other Real Property Account. This account accumulates costs for maintenance other than to dwellings and exterior utilities, including:

3.3.3.3.1. Maintenance, care, and repair of improved and unimproved grounds, storm sewerage, and drainage structures; and costs of acquisition, maintenance, and repair of Government-owned minor equipment, such as hand-operated lawnmowers used for grounds maintenance by occupants;

3.3.3.3.2. Maintenance and repair of paved or stabilized streets, roads, walks, and driveways; utility, service, and parking areas, as well as curbs, gutters, signs, and other road appurtenances; and

3.3.3.3.3. Maintenance and repair of facilities other than dwellings, such as fences when the facility is dedicated to housing, athletic and recreation facilities, community buildings, service facilities, and the costs of maintenance of trailer sites including outlets.

3.3.3.4. Alterations and Additions Account. This account accumulates costs for incidental additions, expansions, extensions, and alterations to existing real property. These costs include payments made to military personnel for telephone reconnection charges when maintenance or repair work necessitates Government-directed, nonpermanent change-of-station moves, and charges resulting from improvement or repair projects funded in part from the family housing construction account.

3.3.4. Leasing Account

3.3.4.1. Lease Cost – Foreign Account. This account accumulates costs for charges and other payments specified in the lease agreement for housing in foreign countries under [10 U.S.C. § 2828](#).

3.3.4.2. Lease Cost – Foreign Account Government Rental Guarantee Program (GRGP). This account accumulates costs for charges and other payments specified in the lease agreement for housing in foreign GRGPs (e.g., Europe under the Army GRGP programs).

3.3.4.3. Lease Cost – Domestic Account. This account accumulates costs for charges and other payments specified in the lease agreement for housing in the United States, including U.S. possessions and territories, as specified in 10 U.S.C. § 2828.

3.3.4.4. Lease Cost – Section 2834 Account. This account accumulates costs for charges and other payments for [10 U.S.C. § 2834](#) participation in Department of State Housing pools. Reimbursements to the Department of State for foreign affairs administrative support costs are also included.

3.3.4.5. Lease Cost – Section 2835 Account. This account accumulates costs for charges and other payments specified in the lease agreement for [10 U.S.C. § 2835](#) housing contracts for the lease of facilities on or near military installations, essentially a build-to-lease guarantee to a local property developer.

3.3.4.6. Rental Guarantee – Section 2836 Account. This account accumulates costs accounted for under rental guarantees for a minimal occupancy rate or rental income for [10 U.S.C. § 2836](#) housing. This program allows the DoD Components to enter into lease agreements guaranteeing that tenants occupy rental housing on or near installations.

3.3.4.7. Other O&M Cost. This series of accounts accumulate costs for maintenance, utilities, and contracted services not provided by the lessor for foreign, GRGP, domestic, and 10 U.S.C. § 2835 and § 2836 housing. They include initial make-ready costs, costs of Government-owned furnishings, any pro rata share of the costs of installation services, and administrative costs, such as assignment, travel, and inspection by installation personnel.

3.3.5. Mortgage Insurance Premiums Account. This is a summary account for accumulating the costs for service members' mortgage insurance premium payments pursuant to [12 U.S.C. § 1701](#), also referred to as the "National Housing Act." See Volume 2B, Chapter 6, for more guidance.

3.3.6. Foreign Currency Fluctuations Account. This is a summary account for accumulating the gains or losses arising from foreign currency exchange rate fluctuations in accordance with the requirements in Chapter 7, ["Foreign Currency Reports"](#).

3.3.7. Reimbursements Account. This is a summary account for accumulating reimbursements collected during the current fiscal year for Family Housing O&M rental and service charges billed to occupants and for proceeds from handling or disposing of excess housing property. Identify reimbursements for Foreign Military Sales (FMS)-funded and Non-FMS-funded accounts separately.

3.3.7.1. FMS-Funded Account. This account accumulates all reimbursements from FMS-funded activities or sources. Identify the amounts within the account as to the nature of the reimbursements, for example, recovery of the costs of operations, utility operation, maintenance of real property facilities, or proceeds from property handling or disposal.

3.3.7.2. Non-FMS-Funded Account. This account accumulates reimbursements from other than FMS-funded activities or sources. Identify the amounts within the account as to the nature of the reimbursements, for example, recovery of the costs of operations, utility operation, maintenance of real property facilities, or proceeds from property handling or disposal.

3.3.8. Housing Privatization Support Account. Use this account for accumulating costs the Government incurs in direct support of the MHPI program with the exception of the costs included as part of the privatization project. These costs are associated with the support of the MHPI program and specifically for:

3.3.8.1. Site assessment costs, including environmental baseline assessments, environmental assessments, environmental impact statements, and any efforts required by the Government prior to privatization for environmental mitigation, site surveys, or real estate costs;

3.3.8.2. Project costs, including project feasibility studies, concept development, consultant fees, solicitation, procurement, contracting, execution, transition, construction management, post-award management and monitoring, and portfolio management; and

3.3.8.3. Administrative costs, including civilian pay, travel, training, supplies, equipment, and services provided by a Defense agency in support of the privatization program.

4.0 COST IDENTIFICATION PROCEDURES

4.1 Obligations Incurred

The DoD Components must identify the obligations incurred, both in-house and by contract, to operate and maintain family housing programs.

4.2 Identifiable and Measurable Costs

Charge costs to the applicable family housing account to the extent they are reasonably identifiable and measurable to the housing program. This practice does not prevent the use of engineered standards or estimates in charging utilities when metering devices are not used.

4.3 Obligations for Administrative Costs

Limit obligations incurred for administrative support and supervision efforts to those incurred at the installation level and do not include those incurred at echelons of command above the installation. An exception is made when amounts for administrative support and supervision are included in charges assessed by a field office of a construction agent.

4.4 Criteria for Support Costs

4.4.1. Assign other efforts, goods, or services provided to family housing programs to appropriate family housing accounts based on relative workload, benefit, or other measurements.

4.4.2. Use the following general criteria in assigning support costs to the Family Housing Program:

4.4.2.1. When the support provided is predominantly personnel-intensive, costs must be allocated based on a pro rata basis of workload or actual costs, whenever possible. This

would include collateral duty management assignments involving command or policy determinations related to personnel, financial management, legal, procurement, or similar areas;

4.4.2.2. When the support provided has a mix of personnel, equipment, materials, or supplies, allocate costs based on workload (e.g., printing or reproduction services or computer support involving a mix of resources) or actual costs, whenever possible. Use the proportion of workload for the Family Housing Program to the total workload to compute the portion of the total costs identified to the Family Housing Program; and

4.4.2.3. When the support provided predominantly involves specific goods or services (e.g., electricity, gas, water, or sewer), allocate costs based on the relative amount consumed or quantity used or actual costs, whenever possible.

4.5 General or Flag Officers' Costs

When a set of quarters is intended for or occupied by officers of General or Flag rank, identify the costs accumulated for the O&M of each set of quarters within the accounts specified in this chapter and report in accordance with the requirements prescribed by the OUSD(A&S).

4.6 Costs Identified to the Family Housing Program

When identifying Family Housing O&M costs to the program, the general premise is to assign all applicable costs. When an incidental level of effort, supplies, or services are provided on a nonrecurring basis, costs need not be identified to the program if they are insignificant, and it is not cost effective to measure and assign the costs. As a general rule, cost identification is necessary when the support is more than incidental.

4.7 Installation Managers Responsibility

Installation management officials, such as the installation commander, public works officer, housing director, or comptroller, are responsible for identifying the O&M costs for the Family Housing Program, whether funded by Family Housing O&M or other appropriations. Installation managers must periodically review manning standards, workload and consumption methods, and other factors used to identify efforts in support of the program. When variances occur in efforts, workload, or other resources consumed, reset the basis of allocating such costs to the program. Management must also review charges to the accounts specified herein to ensure that none have been inadvertently omitted or erroneously included.

5.0 COST ELEMENTS AND COMPUTATION OF CHARGES

5.1 Full Absorption Basis

5.1.1. Charge costs to the program in proportion to the actual efforts used, goods consumed, or services received by the Family Housing Program. Fully charge dedicated efforts or responsibilities for the program. For example, charge total costs for full-time management and staff to the Family Housing Program. Compute and expense all costs of providing program support

to the program on a full absorption basis, i.e., full cost for dedicated support and pro rata cost for other support.

5.1.2. Apply the normal business fund overhead rates to family housing support for Defense Working Capital Fund (DWCF) real property maintenance activities, which have a primary mission of facility maintenance.

5.1.3. Apply the applicable rate to direct work or service in support of family housing for other funded real property maintenance activities with established shop or productive expense rates.

5.2 Labor Costs

Compute the labor effort of military or civilian personnel assigned and identified to family housing for pay and benefits using a labor distribution system, if available, or the guidance in Volume 11A, Chapter 1, "[General Reimbursement Policy](#)." Review and validate personnel efforts annually to support charges to family housing. Accumulate and classify military labor as an unfunded cost within the account structure since the cost is not a reimbursable charge to the program.

5.3 Material and Supplies Costs

Compute costs for material and supplies based upon the relative or actual amount consumed, or the quantity used. Compute material and supplies at acquisition price if directly (locally) purchased or at standard inventory price if issued through the supply system.

5.4 Costs of Services

Compute and charge, upon receipt, services provided by Government forces or contractors, such as refuse collection and disposal, entomological, and custodial activities. Family housing must bear the full cost of these services when it is the sole customer. Charge a partial cost to family housing when the family housing portion of such services is readily separable and distinct. When the service operation is too intertwined or complex to enable ready identification of proper family housing costs, charge costs to family housing based on the proportionate amount of service received on a unit-of-service basis, such as the number of refuse pickups or square feet of floor area receiving custodial service.

5.5 Utility Costs

Compute utility costs based on consumption. All DWCF-funded activities providing utilities must compute the charges consistent with their normal procedures. All other activities must compute the charge to family housing at the rate the utility is purchased from the supplier. If not metered, then base consumption on documented engineering estimates.

5.6 Equipment Usage Costs

Compute equipment usage costs for rented property at the lease or rental rate. Limit cost computation in the case of Government-owned equipment to the expenses of operating and maintaining the equipment and charges for the operator's time when provided by other than family housing. Do not compute acquisition costs or periodic depreciation charges.

5.7 Unfunded Costs

Treat military labor and headquarters costs, included in construction agent administrative support and supervision effort above the installation level, as unfunded costs in computing Family Housing O&M costs.

6.0 REIMBURSEMENTS

6.1 FMS-Funded and Non-FMS-Funded Accounts

Use FMS-funded and non-FMS-funded accounts to accumulate reimbursements for charges initially financed by the Family Housing O&M appropriation for the Family Housing Program or proceeds from handling or disposing of family housing property. Record all reimbursements in the family housing reimbursement accounts.

6.2 Reimbursements

Ordinarily, reimbursements are for rental and service charges paid by occupants or users of family housing facilities. Some collections are refunds that include the costs of repairing damages and replacement of items to family housing facilities.

6.3 Reimbursements for Recovery of Expenses

Reimbursements involve the recovery of expenses for handling and disposing of excess family housing property as well as the proceeds from sales of such property. Collections are used for various purposes, such as defraying O&M expenses or the payment of debt. Volume 2B, Chapter 6 provides policy guidance governing such collections, use, and reporting.

7.0 INTERNAL CONTROL

Management must develop and implement internal control techniques to ensure effective control over and accountability for the resources charged to this program and for the full and prompt receipt of all proceeds from reimbursements for rents, service charges, and disposal or handling of excess family housing property.

8.0 REPORTING

8.1 Responsibility of DoD Components

The DoD Components responsible for operating and maintaining family housing facilities are required to prepare the reports described in this chapter. Administrators of Housing programs under MHPI are required to prepare these reports for the FHIF and MUHIF program accounts. The FHIF and MUHIF Financing accounts, however, require only the Standard Form (SF) 133, Report on Budget Execution and Budgetary Resources.

8.2 Reports

8.2.1. Data derived from the uniform account structure identified in this chapter must be used when preparing and submitting the following reports.

8.2.2. Appropriation Status by Fiscal Year Program and Subaccounts Report (Accounting Report (Monthly) 1002). The DoD Components must prepare and distribute the report in accordance with the guidance contained in Chapter 4, *“Appropriations and Fund Status Reports.”*

8.2.3. SF 133. The DoD Components must prepare and distribute the monthly report for the annual portion of the Family Housing O&M category of the family housing appropriation in accordance with the guidance prescribed in Chapter 4.

8.3 Military Departments/DFAS and Intermediate/Installation-Level Report Requirements

Reporting requirements for family housing reports at the center/service and intermediate/installation-level are addressed in manuals and instructions published by the individual Services or DFAS central accounting activities.

CHAPTER 13

INTERNATIONAL BALANCE OF PAYMENTS
REPORTING AND ESTIMATING

1.0 GENERAL

Department of Defense (DoD) Components are required to report expenditures and receipts that affect the U.S. International Balance of Payments (IBOP). The IBOP report provides information required by the Department of Commerce and the Department of the Treasury (Treasury) for control of IBOP financial transactions.

1.1 Purpose

This chapter establishes the policies and requirements for the accounting and reporting of DoD international transactions related to U.S. balance of payments data, including grants and credits extended to foreign countries.

1.2 Authoritative Guidance

Authoritative guidance for this chapter is derived from Office of Management and Budget (OMB) Statistical Directive 19: “Reports of the [Department of Commerce](#) on International Transactions” (Directive 19). Directive 19 established the IBOP transaction reporting requirements to the Department of Commerce. Reported information is used by the United States in managing balance of trade with foreign nations.

2.0 REPORTING OVERVIEW

2.1 Applicability and Scope

2.1.1. These requirements apply to the OSD, the Military Departments (Army, Navy, Air Force, Marine Corps), Defense Agencies (including the Military Postal Service [Agency](#) (MPSA) and nonappropriated fund activities), and DoD Field Activities (hereafter referred to collectively as “DoD Components”). DoD Components are responsible for reporting transactions affecting the IBOP. Each Defense Finance and Accounting Service (DFAS) main site (Indianapolis, Columbus, and Cleveland) is responsible for consolidating the data for the DoD Components and submitting a final report to the Department of Commerce. While DFAS reports a majority of the IBOP data, the Department of Commerce may identify specific information to be reported directly by select DoD components.

2.1.2. The requirements cover all transactions that relate to the IBOP report, including specified data on DoD assets and liabilities abroad and foreign currency transactions, DoD international investments, Foreign Military Sales, transfers of property and services abroad, and foreign grants and credits. This chapter’s requirements apply to all transactions, regardless of payment method (e.g., U.S. dollars, foreign currency, and purchase card) accounted for in any of the following:

2.1.2.1. Expenditures from or reimbursements to U.S. dollar appropriation and fund accounts (general and special funds, public enterprise funds, deposit funds, and trust fund accounts for military and civilian functions);

2.1.2.2. Transfer appropriation accounts including Foreign Military Sales;

2.1.2.3. General fund receipt accounts established by the Treasury for collection of miscellaneous receipts for which the DoD has billing and collecting responsibility;

2.1.2.4. Expenditures or receipts of foreign currencies charged or credited to other than U.S. dollar appropriation and fund accounts (such as DoD Foreign Currency (Foreign Transaction (FT) accounts));

2.1.2.5. Receipts or donations of commodities or services;

2.1.2.6. Transfers under special drawdown authority of the President, Excess Defense Articles (EDA) program, or international treaties;

2.1.2.7. Nonappropriated fund activities, such as commissaries, post exchanges, and officers' clubs; and

2.1.2.8. All MPSA transactions, such as meters (including Postage Validation Imprinters Sales), stamps, and money orders.

2.2 Report Formats and Rules

The report formats and edit and validation rules for submission are provided in Tables 13-1 through 13-4. Sample formats are shown in Tables 13-5 through 13-7.

2.3 Definitions

2.3.1. Abroad. The term abroad includes all foreign countries and the Panama Canal Commission, but excludes the United States, its possessions, Puerto Rico, Guam, and the U.S. Virgin Islands.

2.3.2. Accommodation Sales. Accommodation sales represent the sale of foreign currencies for dollars to U.S. personnel for their personal use in a foreign country.

2.3.3. Collections. Collections are receipts in currencies (both foreign and U.S.), checks, or other negotiable instruments and net of repayments.

2.3.4. Constructive Delivery. Constructive delivery is the delivery of materiel to a carrier for transportation to the consignee; the delivery of materiel to the customer or the designated forwarder at point of production, testing, or storage; delivery at dockside, at airports, or to a U.S. post office for shipment to the consignee. Completed shipping documents or listings of delivery to the U.S. Post Office provide evidence of delivery.

2.3.5. Contract. A contract is any type of agreement or order for procurement of materiel, supplies, and services of any amount including purchase orders, delivery orders, service orders, and similar authorizations.

2.3.6. Delivery. Delivery is the performance of services for the customer or requisitioner; the constructive delivery of materiel as defined in subparagraph 2.3.4; or collections for services, transportation, and materiel when they are normally recorded in the billing and collection cycle immediately following performance.

2.3.7. Foreign Military Sales. Foreign military sales represent the sale of materiel, supplies, equipment, services, and any other support for cash or credit by a DoD Component to a foreign government or international organization as authorized by the Arms Export Control Act (AECA) of 1976, as amended.

2.3.8. Foreign Resident. The term foreign resident is comprised of the government of a foreign country and all its agencies and subdivisions, corporations, and any individuals residing in a foreign country, except for those defined as follows.

2.3.8.1. Consider a corporation a resident of the country in which it is incorporated. Count a subsidiary as a separate corporation and as a resident in the country where it is incorporated. Business offices and branches of U.S. corporations are residents of the countries where they are located. A corporation operating in a foreign country without a subsidiary or foreign business office or branch is a resident of the country in which it is incorporated. A business representative, however, such as the ticket office of a U.S. transportation company or a sales agent, is not considered a foreign business office.

2.3.8.2. An individual, including a retired U.S. citizen, is a resident of the country in which he or she resides, and not the country of his or her citizenship.

2.3.8.3. An international organization with multi-governmental members is not considered a resident of any particular country.

2.3.9. Gross Pay Foreign Nationals. The term gross pay foreign nationals is the amount paid to or on behalf of a foreign national citizen or organization, including U.S. contributions to the foreign government, and fees charged by a foreign government under contracts for indirect hire.

2.3.10. Guaranty Financing. Guaranty financing includes items associated with the guaranty of private credit by the U.S. Government under the AECA of 1976, as amended.

2.3.11. Interest. The term interest includes interest collected on military assistance or foreign military long-term credit, interest collected by finance and accounting officers for short-term deposits made in financial institutions that share in interest remitted to a DoD Component under Guaranty Financing arrangements, and interest on advances to foreign residents.

2.3.12. Joint Weapons Production and Exchange Agreements. Joint weapons production and exchange agreements includes both production of military end items by a foreign country or resident with participation by a DoD Component through payment of cash, or the provision in kind of materiel, assemblies, components, or services, and a joint sharing of the end items as determined by the agreement. This includes co-production, cost sharing, exchange agreements, joint production, North Atlantic Treaty Organization (NATO) consortiums, and others as authorized by the AECA of 1976, as amended.

2.3.13. Military Assistance Grant Aid. Military assistance grant aid is the provision of any type of assistance in the form of materiel, supplies, equipment, facilities, training, transportation and services, or otherwise by a DoD Component to a foreign government or international organization. The AECA of 1976 and the Foreign Assistance Act (FAA) of 1961 authorize such assistance. These provisions include Foreign Military Financing (FMF), International Military Education and Training (IMET), the Military-to-Military Contact Program, Special Drawdown Authority, the EDA Program, and Building Partnership Capacity (BPC) programs.

2.3.14. MPSA. The MPSA is the single DoD point of contact with the U.S. Postal Service (USPS). An agreement between the DoD and the USPS establishes the MPSA as an extension of the USPS abroad and in the continental United States, as applicable.

2.3.15. Net Pay. Net pay is the part of gross pay that is given, mailed, or electronically transferred directly to the individual by cash, check, or electronic transfers. This can include paychecks mailed or transferred by a disbursing officer (DO) to any bank or financial institution for credit to the individual account of U.S. personnel stationed abroad. Net pay includes allotment checks for U.S. personnel stationed abroad or in the United States (for dependent support, personal accounts) mailed to a foreign address (including Army Post Offices), Fleet Post Offices (FPOs), and Diplomatic Post Offices (for foreign addressees), but excludes allotment checks mailed to a U.S. address.

2.3.16. Net Pay U.S. Personnel. The term net pay U.S. personnel includes earned entitlements (pay and allowances) for U.S. military forces, allowances to enlisted personnel for subsistence, and amounts earned or otherwise payable to U.S. civilian employees. Net pay excludes U.S. contributions (e.g., life insurance, retirement, health benefits, and social security), but includes amounts that may be withheld from personnel for these items or that are allotted to designated individuals or institutions.

2.3.17. Other Assistance Grant Aid. The DoD outlays from appropriations or sections of appropriations that specifically support U.S. foreign assistance (as authorized under the FAA as amended and other legislation) are IBOP assistance grant aid. These DoD outlays represent the value of goods and services delivered to foreign individuals, governments, or international organizations under specific U.S. foreign assistance programs that include, but are not limited to: Overseas Humanitarian, Disaster, and Civic Aid, Defense (97X0819); Cooperative Threat Reduction Account, Defense (97X0134); Drug Interdiction and Counter-Drug Activities, Defense (in-country support only of 97X0105); and Overseas Costs for Contingency Operations under section 607 of the FAA (reimbursed by special supplement appropriations).

2.3.18. Payment. The term payment includes payment in currencies (both foreign and U.S.), checks, or other negotiable instruments, after net of all refunds.

2.3.19. Personnel Afloat. The term personnel afloat includes U.S. personnel whose duty station is aboard ship.

2.3.20. Progress Payments. Progress payments are payments made by a DoD Component to a contractor or other supplier on contractual procurement of goods or services as work progresses for delivery on a foreign military sale.

2.3.21. Real Property Transfer. Real property transfers are items associated with the conveyance of military real property by a Military Department to a foreign resident or international organization.

2.3.22. Returns to the United States. Returns to the United States are the portion of payments to contractors or suppliers that is remitted to the United States, or spent or held in the United States, as the result of procurement of U.S. end products, U.S. services, and transportation on U.S. flag carriers for supply, service, or construction contracts. For rules applicable to the identification and reporting of returns to the United States, see the Defense Federal Acquisition Regulation Supplement ([DFARS](#)), section 225.1103(1) and the clause at 252.225-7005.

2.3.23. U.S. Personnel. U.S. personnel includes U.S. military forces (active duty and Reserve Components, but excludes retired military personnel) and U.S. civilian employees (civil service, nonappropriated fund, and individual contract hire).

2.4 Frequency and Distribution

The IBOP report must be prepared, at a minimum, quarterly and is due to the Department of Commerce no later than 45 calendar days following the end of the quarter. The report may be prepared and submitted monthly if desired based upon system capability. DFAS Operations Directorates will provide specific due dates to their respective DFAS Sites.

2.5 Policy

It is DoD policy to operate overseas activities efficiently and effectively, and to reduce the balance of payments impact of these activities, when such reduction is consistent with U.S. national security goals and objectives. To support this policy, the Department maintains a mechanism to manage and control DoD transactions that enter the IBOP. This system provides for:

2.5.1. DoD-wide accounting for and reporting of IBOP transactions;

2.5.2. Evaluation and explanation of DoD IBOP transactions;

2.5.3. Use of uniform criteria, definitions, and requirements to report IBOP transactions;
and

2.5.4. Integration of IBOP management and the overall system of management within the Department.

2.6 Responsibilities

2.6.1. Heads of the DoD Components, must:

2.6.1.1. Develop procedures for implementing the reporting requirements;

2.6.1.2. Ensure reports and required data are submitted on time and are complete and accurate; and

2.6.1.3. Identify, for the Department of Commerce, the office responsible for submitting required data and points of contact within respective organizations that can both provide supplemental information on specific IBOP transactions and resolve problems associated with collecting and processing data.

2.6.2. The DFAS Site Directors must:

2.6.2.1. Administer and monitor, as necessary, the reporting requirements for their field reporting offices;

2.6.2.2. Ensure the requirements prescribed are uniformly implemented;

2.6.2.3. Work with other DFAS Sites to provide technical assistance on collecting required data and preparing reports. Each DFAS Site acts as the focal point for the assigned reporting organizations (sites) in providing technical assistance; and

2.6.2.4. Ensure reports are submitted directly to the Bureau of Economic Analysis, U.S. Department of Commerce, and include all data required by Directive 19.

2.7 Reporting Guidelines

2.7.1. Finance and Accounting Data

2.7.1.1. Installation-Level Procedures. The DoD Components and supporting DFAS Sites must accumulate the data on payments and collections made by their respective disbursing activities as an integral part of installation-level requirements. The IBOP reports must include all collection and disbursement data for the period covered by the report.

2.7.1.2. Nonappropriated Funds and MPSA. Accumulate data on nonappropriated funds and MPSA accounts and include them in the quarterly reports.

2.7.2. Codes on Vouchers

2.7.2.1. Codes. Code all payment and collection vouchers processed overseas with the appropriate foreign country or international organization code, as prescribed in Table 13-8 and on the [Central Intelligence Agency \(CIA\)](#) website (see Geopolitical Entities, Names and Codes (GENC) Standard), prior to time of payment or collection. Vouchers processed overseas not entering the IBOP must be coded with the “U.S.” country code.

2.7.2.2. Country Codes. Input country codes on vouchers processed in the United States only for those transactions entering the IBOP. A current list of country codes is available on the GENC Standard (formerly “Federal Information Processing Standards (FIPS) Publication (PUB) 10-4”). Country codes must not be confused with Defense Security Cooperation Agency (DSCA) customer codes. The two codes are not interchangeable.

2.7.3. Coded Authorizations. To ensure that payment vouchers are coded properly to indicate category, procurement of U.S. end products, transportation or services, and country or international organization, authorizations such as purchase orders, delivery orders, and contracts that result in expenditures entering the IBOP must be coded at the time of preparation whenever possible. Enter these same codes on the payment vouchers. When the authorization covers procurements of U.S. end products, transportation, or services, enter the percentage or amounts applicable to each procurement return category. Enter codes on all authorizations for the following types of transactions.

2.7.3.1. Construction and Other Service Contracts, Including Contracts for Scientific and Technical Knowledge to Be Performed Abroad. In all cases where the contract, delivery order, or other procurement document is issued to a U.S. resident, appropriate codes that identify returns to the United States must be included in the accounting classification.

2.7.3.2. Contracts for Procurement of Materiel, Supplies, and Equipment Abroad. When the terms of the contract require the use of U.S. end products, appropriate codes that identify returns to the United States must be included in the accounting classification on all contracts or other procurement documents issued to U.S. residents.

2.7.4. New or Discontinued Appropriations. Each DFAS Site is responsible for modifying their associated tables to reflect new or discontinued accounts that affect IBOP. The Treasury’s [Federal Account Symbols and Titles \(FAST\) Book](#) lists receipt, appropriation, and other fund account symbols and titles assigned by the Department. The FAST Book lists accounts separately that were created or discontinued since the previous revision.

2.7.5. Transaction Review. Review IBOP transactions prior to submission for accuracy to ensure the final report is complete and includes all of the required data elements for submission to the Department of Commerce. The DoD Components, accounting activities, and other reporting entities in the United States and at overseas locations must ensure that reported IBOP transactions are consistent with total transactions reported on the Standard Form (SF) 1220, Statement of Transactions According to Appropriations, Funds, and Receipt Accounts, and supporting SF 1219, Statement of Accountability, including FT accounts.

2.7.6. Cross-Disbursing. Under cross-disbursing requirements, the appropriate disbursing office must provide data on payment and receipt transactions to the DoD Component assigned reporting responsibility. Under these procedures, reports must include all of the data necessary for the DoD Component to report balance of payment expenditures and receipts for its accounts in accordance with the requirements of this chapter. The data must include all supplementary information that is necessary to identify returns to the United States as stated in subparagraph 2.8.2.1.3. The DoD Component having management control of the funds must include these transactions in its IBOP report. Subparagraph 2.7.14.4 identifies cross-disbursing reporting requirements for each Military Department.

2.7.7. Appropriation Reimbursements. Enter appropriation reimbursements from foreign entities on the appropriate Collections lines in the Accounting Report (AR)-1, as shown in Table 13-5. Enter collections from U.S. personnel abroad in the appropriate “Less Receipts from U.S. Personnel” lines (i.e., “Payments”).

2.7.8. Delivery Data. As outlined in DSCA 5105.38-M, Security Assistance Management Manual ([SAMM](#)), data regarding Foreign Military Sale deliveries (Chapter 7), FMF grant aid deliveries (Chapter 9), IMET Program (Chapter 10), transfers under Special Drawdown Authority and the EDA program (Chapter 11), Military-to-Military Contact Program (Chapter 11), BPC deliveries (Chapter 15), and transfers of real property (Chapter 15) must be prepared by the appropriate agencies.

2.7.9. Loans of Property. For any defense item loaned to a foreign government, central offices in each DoD Component must maintain a record as outlined in the SAMM, Chapter 11.

2.7.10. Advances to Foreign Residents or Countries. Report advances made to foreign residents or countries by a DoD Component as payments on the same lines in AR-1, as shown in Table 13-5, for future contract payments. Use Line Item 190000 of AR-1 to report interest collections for advances.

2.7.11. Other Foreign Aid under FAA. Report data on DoD outlays resulting from serving as the executive agent for other U.S. foreign assistance programs (as authorized by the FAA) as IBOP Other Assistance Grant Aid by the appropriate DoD Component assigned the responsibility for those programs. Such assistance includes, but is not limited to, the following programs: Overseas Humanitarian, Disaster, and Civic Aid Defense; Cooperative Threat Reduction Account, Defense; Drug Interdiction and Counter-Drug Activities, Defense (In-Country Support only); and Overseas Costs for Contingency Operations under section 607 of the FAA.

2.7.12. Records Retention. Maintain records reflecting balance of payments transactions at each DFAS Site consolidation point for 2 years following the end of the reporting period.

2.7.13. Foreign Currencies

2.7.13.1. Report data on foreign currencies in dollar equivalents.

2.7.13.2. The DSCA must report expenditures and collections for all FT accounts under its control, including those for which the DSCA has financial management responsibility in connection with Foreign Military Sales currencies, as well as those provided under joint weapons production and exchange agreements.

2.7.13.3. Use the respective reporting system utilized by each DoD Component to provide data on accommodation sales to individuals by military DOs.

2.7.13.4. Banking facilities on U.S. Government installations abroad must report on accommodation sales of foreign currencies made to U.S. personnel.

2.7.14. Submission of Reports

2.7.14.1. Prepare reports of performance and transactions, using the current automated technology, entering the IBOP by DoD Components as outlined in the detailed instructions provided in Tables 13-1 through 13-4. Sample formats are shown in Tables 13-5 through 13-7.

2.7.14.2. Submit ARs to the Department of Commerce through DFAS as follows:

2.7.14.2.1. Department of the Army – ARs-1 and 2;

2.7.14.2.2. Department of the Navy (including U.S. Marine Corps) – ARs-1 and 2;

2.7.14.2.3. Department of the Air Force – ARs-1 and 2;

2.7.14.2.4. MPSA - AR-3; and

2.7.14.2.5. All other Defense Agencies, such as the DSCA and Defense Intelligence Agency - AR-1.

2.7.14.3. The DSCA must report all Foreign Military Sales and BPC delivery data.

2.7.14.4. Submit cross-disbursing data submitted by the DoD Component as follows.

2.7.14.4.1. Forward IBOP transactions between the Air Force and the Army no later than 32 calendar days following the end of the quarter to their corresponding offices. Each Service will send its IBOP files to the other Services.

2.7.14.4.2. Forward vouchers and control listings of IBOP transactions of the Navy for the Army and the Air Force, the Army for the Air Force and the Navy, and the Air Force for the Navy and the Army to the designated accounting and finance offices quarterly.

2.7.14.4.3. Forward electronic transmissions of Army, Navy, Air Force, and Marine Corps IBOP transactions for the Defense Agencies and OSD no later than 45 calendar days following the end of the quarter to the Department of Commerce.

2.7.14.4.4. Report salary payments to U.S. personnel as the net amount paid to individuals, excluding all deductions, such as amounts withheld for taxes, contributions, allotments, or savings bonds.

2.7.14.5. Complete the headings on each report as indicated in Tables 13-5 through 13-7. Round dollar amounts to the nearest \$1,000. Round amounts from \$1 to \$499 downward; amounts from \$500 to \$999 are rounded upward.

2.7.14.6. The Treasury Financial Manual (TFM), Volume 1, Part 2, Chapter 4500 [1 TFM 2-4500](#) contains requirements for reporting foreign grants, loans, credits, and contingent liabilities.

2.8 Criteria for Determining and Identifying IBOP Transactions

2.8.1. Introduction. In establishing a basis for reporting IBOP transactions, assume that purchases of materiel and services are equal to related disbursements, since payments by DoD Components normally are made within the month following receipt of the materiel and services. Similarly, report DoD outlays from appropriations supporting various U.S. foreign assistance programs to signify the delivery of that assistance to foreign entities. It is necessary, however, to report Foreign Military Sales on a delivery basis. State collections separately to reflect the changes in financial status. Accounting reports prescribed by this chapter reflect these reporting concepts. Table 13-9 contains a glossary of automated data processing (ADP) terms.

2.8.2. Transactions Entering the IBOP. The following transactions enter the DoD IBOP for reporting purposes.

2.8.2.1. Payments

2.8.2.1.1. Inclusion of all payments is required, including advance and progress payments by DOs (whether located abroad or in the United States, its territories and possessions, or Puerto Rico) from their accounts and all payments from the accounts of nonappropriated funds and the MPSA to:

2.8.2.1.1.1. Foreign residents, including all amounts deposited in foreign or U.S. banks to their credit (e.g., a deposit to the account of a foreign entity maintained in a U.S. bank). Foreign residents include foreign governments, corporations, contractors, and individuals;

2.8.2.1.1.2. U.S. personnel stationed, or employed, or who live abroad, or on ships homeported abroad, for pay disbursed or mailed abroad when on temporary duty (TDY) abroad and per diem for TDY abroad;

2.8.2.1.1.3. International organizations, including all amounts deposited to their credit in foreign or U.S. banks;

2.8.2.1.1.4. U.S. corporations for materiel, supplies (excluding petroleum products), and equipment, title to which is acquired by the U.S. Government abroad as evidenced by an accomplished materiel inspection and receiving report;

2.8.2.1.1.5. U.S. contractors for construction or services performed abroad, except for travel and transportation as described in subparagraph 2.8.4.2.7; and

2.8.2.1.1.6. U.S. and foreign corporations for petroleum products that will be identified to the country shown as the product source as described in subparagraph 2.8.4.2.8.2.

2.8.2.1.2. Inclusion of foreign currency payments is required, including counterpart foreign currency payments by a foreign government held by the foreign government for U.S. uses under special arrangements such as Euros disbursed by the Spanish Government for constructing and maintaining U.S. facilities.

2.8.2.1.3. Included are all Returns to the United States resulting from contracts or other procurement documents for procurement of supplies and services for use outside the United States. Also included are all Returns to the United States from contracts for construction, maintenance, and repair of real property facilities that require U.S. end products, or that specify certain services be performed in the U.S. Additionally, U.S. contractors performing construction and service contracts overseas may acquire, on their own initiative, certain U.S. end products, services, or transportation on U.S. flag carriers in fulfillment of construction or service contracts. Identify and report the amount of such procurements of U.S. end products, services, and transportation on U.S. flag carriers in AR-1, as shown in Table 13-5. The following rules apply only to contractors who are U.S. residents.

2.8.2.1.3.1. The amounts remitted by a supplier to the United States for procurement of U.S. end products and the amounts paid by the supplier to a U.S. transportation company for transportation of goods on U.S. flag carriers must be identified and reported as reductions to procurement payments.

2.8.2.1.3.2. Identify and report the following amounts as reductions to contractual service payments:

2.8.2.1.3.2.1. The amount of U.S. end products procured from the United States by the contractor for incorporation in the project (whether required by the terms of the contract or voluntarily procured from the United States without contractual requirements);

2.8.2.1.3.2.2. The amount remitted to or retained in the United States by the contractor for services performed in the United States and for profit, overhead, amortization costs, employee tax withholdings, and other indirect expenses, including that portion of the salaries of contractor personnel remitted to or retained in the United States; and

2.8.2.1.3.2.3. The amount paid to transportation companies in the United States by the contractor for transportation provided on U.S. flag carriers.

2.8.2.1.3.3. Reporting requirements and requirements for contracts exceeding the simplified acquisition threshold are set forth in DFARS 225.1103(1) and the clause at 252.225-7005.

2.8.2.1.3.4. The amounts reported as returns under subparagraph 2.8.2.1.3 must exclude:

2.8.2.1.3.4.1. Payments by the contractor to a DoD Component for supplies or services such as utilities and telephone services; and

2.8.2.1.3.4.2. Returns to the United States by foreign residents who use U.S. end products or services to fulfill DoD contracts.

2.8.2.2. Collections

2.8.2.2.1. Report all collections by DOs credited to their accounts or to Treasury accounts (for which the Department has billing and collection responsibility) and all receipts in nonappropriated funds and the MPSA from the following:

2.8.2.2.1.1. Foreign residents;

2.8.2.2.1.2. U.S. personnel who are stationed, employed, residing, or traveling abroad, or on ships homeported abroad (for reporting purposes, however, these collections are treated as a reduction to pay of personnel);

2.8.2.2.1.3. International Organizations;

2.8.2.2.1.4. U.S. contractors in connection with their performance of contracts with the U.S. Government or private firms abroad; and

2.8.2.2.1.5. Foreign governments or other foreign entities for goods and services sold for delivery or use under the Foreign Military Sales program, other sales programs, and the Defense Logistics Agency Disposition Services.

2.8.2.2.2. Report all collections of foreign currency contributed by foreign governments for the support of U.S. Military Assistance Advisory Groups (MAAGs) and Missions.

2.8.2.2.3. Do not deposit FMF receipts into the U.S. Treasury. The FMF receipts are recorded in successor account 11*1082 (Foreign Military Financing Program, Funds Appropriated to the President), via a Treasury [SF 133](#), Report on Budget Execution and Budgetary Resources, allocation by the Department of State in the year received, and finally apportioned in the same year on an SF 132, OMB Apportionment And Reapportionment Schedule as found in [OMB Circular A-11](#), “Preparation, Submission, and Execution of the Budget,” Appendix F.

2.8.2.3. Deliveries

2.8.2.3.1. All deliveries of materiel, supplies, equipment, and services to foreign countries and international organizations must be reported to include the following:

2.8.2.3.1.1. Foreign Military Sales deliveries outlined in the AECA of 1976, as amended;

2.8.2.3.1.2. Sales by property disposal officers as represented by collections;

2.8.2.3.1.3. Loans and leases of aircraft, vessels, and other equipment to foreign entities;

2.8.2.3.1.4. Transfers of real property and deliveries of materiel and services under logistical support agreements and otherwise; and

2.8.2.3.1.5. Deliveries of goods and services for foreign assistance reimbursed by the Agency for International Development (AID), Department of State, or from Funds Appropriated to the President.

2.8.2.3.2. This chapter requires that delivery data pertaining to Military Assistance Grant Aid be reported.

2.8.2.4. Special Transactions

2.8.2.4.1. Transfers. Transfers from Deposit Account 6500 (Advances Without Orders from Non-Federal Sources) and Clearing Account 3875 (Budget Clearing Account (suspense)) to other accounts must be included when recorded as a collection in deposit fund accounts or in applicable receipt (including miscellaneous receipt), appropriation, or other fund accounts. For example, a bid deposit of a successful purchaser of surplus, excess, foreign excess, scrap, or salvage will be recorded in IBOP at the time transferred to account 3845 (Proceeds of Sales, Personal Property). Treat returns of deposits to depositors as IBOP transactions. Exclude amounts initially recorded in these suspense accounts from IBOP reporting requirements.

2.8.2.4.2. Settlements. Treat offsetting settlements between DoD accounts made in place of payments to, and collections from, a foreign government as IBOP transactions as if the transaction had been carried out with the foreign government.

2.8.2.4.3. Outlays. Report DoD outlays in support of Other Assistance Grant Aid.

2.8.3. Transactions Not Entering the IBOP. The following transactions do not enter the DoD reporting of IBOP:

2.8.3.1. Payments to and receipts from any DoD or other U.S. Government agency or activity, including any DoD nonappropriated fund or postal service activity, except special transactions noted in subparagraph 2.8.2.4;

2.8.3.2. All transfers between the DoD or other U.S. Government accounts, except those from Deposit Account 6500 and Clearing Account 3875, as noted in subparagraph 2.8.2.4.1;

2.8.3.3. Payments to foreign residents for goods produced in the United States if title is transferred within the United States. Include payments to the foreign resident when title is transferred to the United States if the goods were originally delivered to the foreign resident under the Foreign Military Sales program; and

2.8.3.4. Payments to foreign residents for goods produced abroad and imported into the United States when title is transferred to the U.S. Government after the goods are imported. Consider goods imported when they clear the U.S. Customs Service.

2.8.4. Identification of Transactions to Country or International Organizations

2.8.4.1. General. Identify transactions, except those relating to international organizations designated in [SAMM Table C4.T2B](#), generally to the country of residence of the payee or remitter, rather than the location of the DO. Identify transactions with international organizations not listed in SAMM Table C4.T2B to the country to which payment is sent or from which payment is received. In cases where country of residence cannot be determined, identify transactions as follows.

2.8.4.1.1. Cash. Code payments or collections by cash to the country in which disbursed or collected.

2.8.4.1.2. Check. Code payments or collections by check to the country to which check is sent or from which check is received.

2.8.4.1.3. Electronic. Code payments or collections by electronic transfer to the country to which transfer is sent or from which transfer is received.

2.8.4.2. Payments. Identify payments to the designated international organization or country of residence of the payee. More specifically, identify payments as follows.

2.8.4.2.1. Government-to-Government Payments. Identify all government-to-government payments to the country of the foreign government involved.

2.8.4.2.2. Foreign Corporations. Identify payments to foreign corporations and individuals to the country of residence.

2.8.4.2.3. U.S. Personnel Payments

2.8.4.2.3.1. U.S. Personnel Ashore. Code net pay to the foreign country to which payment is made or the check is addressed.

2.8.4.2.3.2. U.S. Personnel Afloat (Homeported Abroad). Code net pay to the foreign country to which payment is made or the check is addressed.

2.8.4.2.3.3. U.S. Personnel Afloat (U.S. Homeported). Code net pay as a U.S. payment. A statistical determination will be made, by country, of the expenditures ashore by these individuals.

2.8.4.2.3.4. Allotments of Pay. Allotments to individual persons will be identified to the country to which addressed. Identify all other allotments to the country of residence of the allottee.

2.8.4.2.3.5. Contributions. Identify U.S. Government and service member contributions (Federal Insurance Contributions Act, retirement, and health benefits) to the United States.

2.8.4.2.4. Retired and Survivors Pay. Identify the amount of the payment to the foreign country to which the check is mailed or payment is electronically transferred.

2.8.4.2.5. Foreign Nationals

2.8.4.2.5.1. Direct Hire of Foreign Nationals. Identify net pay to the foreign country, which employs the individual. In addition, identify the payment of all U.S. Government contributions, and the payments of all amounts withheld from the employee's pay, at the time of payment, to the country addressed.

2.8.4.2.5.2. Indirect Hire of Foreign Nationals. Identify payments under contracts for indirect hire of foreign nationals, including retirement accruals or separation allowances when paid, to the country addressed.

2.8.4.2.5.3. Foreign Nationals Aboard Ships. Identify net pay to the country in which the individual maintains his or her "home of record." In addition, the payment of all U.S. Government contributions and payments of all amounts withheld from the employee's pay must be identified, at the time of payment, to the country to which addressed.

2.8.4.2.6. Construction and Services Performed Abroad Other Than Travel and Transportation. Identify payments for construction or services performed abroad to the country in which construction or service is performed, regardless of where the check is mailed.

2.8.4.2.7. Travel and Transportation

2.8.4.2.7.1. Transportation. Code payments for transportation of persons or things (trip requests, bills of lading, warrants, or cash) paid to a transportation company to the country of residence of the transportation company.

2.8.4.2.7.2. Travel Allowances. Code payments for per diem allowances, relocation allowances, and other incidental travel expenses, including transportation expenses or mileage allowances paid to individuals, according to the following guidance.

2.8.4.2.7.2.1. For permanent change of station (PCS), code to the country in which the greater part of the allowances was earned or expenses incurred. Code relocation allowances to the country to which the individual's family moves.

2.8.4.2.7.2.2. For TDY, code to the country in which the TDY was performed, except TDY performed aboard ship that must be coded to the United States. Where TDY is performed in several countries and it is not feasible to identify the per diem to each country, code the payment to the country in which the greater part of the allowances was earned.

2.8.4.2.8. Materiel, Supplies, and Equipment

2.8.4.2.8.1. Payments to a U.S. corporation for materiel, supplies (excluding petroleum products), and equipment acquired by a DoD Component abroad must be coded to the country where it is delivered or accepted by the DoD Component. Code payments to foreign contractors (excluding petroleum products) to the country of residence of the payee.

2.8.4.2.8.2. Identify payments to a U.S. or foreign corporation for petroleum products according to the following guidance.

2.8.4.2.8.2.1. Code the payment to the country shown as the product source in the “product source” clause of the contract under which the payment is made. If a region (e.g., the Caribbean or Persian Gulf) is shown rather than a country, code the payment to the country shown in section 9 of the [DoD Form 250-1](#), Tanker/Barge-Material Inspection and Receiving Report. If the product source cannot be established, it will be coded to the country where acquired by the DoD Component.

2.8.4.2.8.2.2. When the product source for petroleum is the United States, and the petroleum has been transported by the Military Sealift Command, or transported by commercial vessels directly to a DoD Component abroad, code the payment to the United States. If the petroleum is not consigned directly to a DoD Component, code the payment to the country where it is delivered and code the amount of the petroleum product and the transportation furnished by U.S. flag carriers as a return to the United States.

2.8.4.2.8.2.3. Code petroleum services, other than ocean transportation, to the country in which the service is performed.

2.8.4.2.9. NATO Infrastructure. In processing NATO Infrastructure and International Military Headquarters Payments for NATO infrastructure, refer to Enclosure 2 of [DoD Directive 2010.5](#), “The NATO Security Investment Program,” for eligible project types. Code such payments to the country or to the appropriate NATO command that is the recipient of the payment. Code payments to international military headquarters, including those located in the United States.

2.8.4.3. Deliveries and Collections

2.8.4.3.1. Materiel or Services. Code deliveries of materiel or services to the country or international organization to which the collection for that delivery must be identified. Code collections to the countries making payments. Code collections from international organizations to the international organization making payment.

2.8.4.3.2. Recipient Country. Code delivery transactions involving Military Assistance Grant Aid and reimbursement from AID, Department of State, or Funds Appropriated to the President to the recipient country or international organization.

2.8.4.4. Special Transactions

2.8.4.4.1. Balance of Payment Transactions. Transactions for Guam, Puerto Rico, the Commonwealth of the Northern Marianas, and the U.S. Virgin Islands must not be included in any summary totals of balance of payments transactions since transactions involving these areas do not enter the United States balance of payments. If a special report is requested for these areas, then apply country codes as appropriate.

2.8.4.4.2. Guantanamo Bay. Code transactions at Guantanamo Bay, other than pay of foreign nationals, as U.S. transactions not entering the IBOP. However, treat the pay of foreign nationals employed at Guantanamo Bay as IBOP transactions and code to their country of residence.

2.9 Entries for DoD Transactions Entering the IBOP – AR-1

2.9.1. Purpose. This format prescribes line items, columnar data, and line item identification (ID) codes used for reporting IBOP transactions in AR-1. This submission provides for summarizing DoD IBOP transactions under appropriation and category groupings.

2.9.2. General

2.9.2.1. Separate AR-1. Prepare a separate AR-1 for each foreign country and international organization listed in the GENC Standard and SAMM Table C4.T2B, as applicable, and for each foreign area grouping shown in Table 13-8. In addition, submit a separate AR-1 (a sample format of AR-1 is shown in Table 13-5; change “Quarter” to “Month” if reporting monthly) for Guam, Puerto Rico, the Commonwealth of the Northern Marianas, and the U.S. Virgin Islands. However, these transactions, and those for other U.S. possessions, must not be included in the subtotals for foreign area groupings or worldwide totals.

2.9.2.2. DoD Component. Each DoD Component must submit AR-1 electronically. Data on the electronic transfer submissions must carry the line item numbers for AR-1 precisely as shown in Table 13-10.

2.9.2.3. Assemble Reports. Documentation for countries without transaction data is not required when assembling supporting documentation for IBOP reporting.

2.9.2.4. Report Data. Report data for each line item entry listed in Table 13-10. To facilitate summarizing data, each line item entry must be identified by the same line ID Code shown in Table 13-10. Line items for which no amount is reported for the current quarter or cumulative columns must not be shown on the report.

2.9.2.5. Reporting Responsibilities. Data reported for all lines for transactions involving the FMF, Foreign Military Sales Program, BPC Program, IMET, Drawdowns, EDAs, and Military-to-Military Contact Programs are established under the SAMM, Chapter 1.

2.9.2.6. Dollar Collections. Report as dollar collections all collections of foreign currency not obtained by purchase with U.S. dollars, used for authorized expenditure purposes rather than deposited to Treasury FT accounts.

2.9.2.7. Trust Fund Expenditures. Treat refunds to foreign governments for Foreign Military Sales as trust fund expenditures. In the DoD balance of payment presentations, net such refunds against receipts rather than treated as expenditures on AR-1.

2.9.3. Line Entries - Descriptions and Codes. Line item ID codes, line item captions, and descriptions for AR-1 are shown in Table 13-10.

2.10 Entries for DoD Transactions Entering the IBOP – AR-2

2.10.1. Purpose. This format prescribes line items, columnar data, and line ID codes for reporting IBOP transactions in AR-2, i.e., financial data relating to DoD nonappropriated fund activities abroad. Use these data to develop amounts available for spending abroad by U.S. personnel.

2.10.2. General

2.10.2.1. Nonappropriated Fund Activities. Each reporting activity must include all nonappropriated fund activities under its command jurisdiction. When one activity serves more than one command in a given area, make local arrangements to have the data submitted through only one command, thus avoiding duplications (e.g., the Army and Air Force Exchange Service). Nonappropriated fund activities aboard ship must include only receipt and payment transactions abroad, which are included with activities ashore and enter the IBOP.

2.10.2.2. Submit Separate Reports. The reporting activities must submit separate reports for the following:

2.10.2.2.1. Exchange Service Operations, and

2.10.2.2.2. Other Nonappropriated Fund Activities.

2.10.2.3. Payments and Receipts. These reports must include only payments and receipts affecting nonappropriated funds. Exclude payments and receipts from appropriated funds used in operating a nonappropriated fund activity.

2.10.2.4. Reported Quarter. Amounts shown in the report must cover the reported quarter. Change “Quarter” to “Month” if reporting monthly.

2.10.2.5. Schedules. Submit separate schedules for the Navy and Marine Corps.

2.10.3. Line Entries - Descriptions and Codes. Line ID codes, line item captions, and descriptions for AR-2 are shown in Table 13-11.

2.11 Entries for DoD Transactions Entering the IBOP - AR-3

2.11.1. Purpose. This format prescribes line items, columnar data, and line ID codes used for reporting IBOP transactions in AR-3, i.e., financial data relating to military postal services to individuals. Use these data to develop the amounts available for spending abroad by U.S. personnel.

2.11.2. General

2.11.2.1. MPSA. Submit one report to cover all MPSA operations, excluding FPO operations aboard ship.

2.11.2.2. Payments and Receipts. Exclude from the report payments and receipts of appropriated funds used for operating expenses of MPSA facilities.

2.11.2.3. Agencies and Activities. Exclude sales to or receipts from federal agencies and activities and DoD-sponsored nonappropriated fund activities.

2.11.2.4. Reported Quarter. The amounts shown in the report must cover the reported quarter only and will be noncumulative. Change “Quarter” to “Month” if reporting monthly.

2.11.3. Line Entries – Description and Codes. Line ID codes, line item captions, and descriptions for AR-3 are shown in Table 13-12.

3.0 INTERMEDIATE/INSTALLATION-LEVEL REPORTING REQUIREMENTS

Each DFAS site develops and monitors the reporting requirements, at the intermediate or installation level, for its IBOP reporting. Consistently apply reporting formats for the intermediate or installation levels in accordance with the requirements outlined in paragraphs [2.1](#) through [2.11](#).

Table 13-1. Edit and Validation Rules for Submitting IBOP Data to the Department of Commerce

The following includes the record edit and validation rules that apply to all transaction data records submitted on IBOP transactions.		
<u>Data Record Position(s)</u>	<u>Description of Item</u>	<u>Rules</u>
1	Coded Report No.	Must be 1, 2, or 3
2	Coded Report No.	Must be blank except for Accounting Report 2
3-4	Fiscal Year (FY)	Must be numeric
5	Quarter of FY	Must be 1, 2, 3, or 4
6	Dept. Code	Must be an alpha character shown in Table 13-13
7-8	Country or Organizational Code	Position 7 must be alpha. Position 8 must be alpha/numeric (A/N). Cannot be blank (GENC Standard and SAMM Table C4.T2B).
9-14	Line ID No.	May be alpha, numeric, or A/N
15-21	\$ Amount this Qtr. ("Month" if reporting monthly.)	Must be numeric
22-25	Main Account	Must be numeric
26-29	Blank	Must be blank
30	Reserved	Must be blank
31	Data Originator	Blank except for AR-1
32-80	Blank	Must be blank

Table 13-8. Geographical Areas, Countries, and International Organizations to be Used in Preparing IBOP Accounting Reports

This table lists the countries and geographical areas to be shown in the IBOP reports. Alternatively, each country having an IBOP transaction (not only those shown in this enclosure) may be listed alphabetically followed by the area totals (A through E) and the “Grand Total.”

A. Western European Countries and International Organizations

1. Austria
2. Belgium/Luxembourg
3. Bosnia/Herzegovina
4. Croatia
5. Denmark (include Greenland)
6. France
7. Germany (Unified)
8. Greece (includes Crete)
9. Iceland
10. Italy (includes Sicily)
11. Netherlands
12. Norway
13. Portugal
14. Spain
15. Switzerland
16. Turkey
17. United Kingdom
18. Other Western European Countries and International Organizations

Total Western Europe

B. Japan

C. Canada

(continued on following page)

Table 13-9. Glossary of ADP Terms

<u>Term</u>	<u>Definition</u>
Accounting Reports	The series of reports specifically referenced in this chapter.
0	The representation of numeric zero unless it is otherwise specified.
Zero Fill Unused High Order Positions	Fill assigned field spaces to the left of the most significant numeric digit in ALL \$ Amount fields. May also be expressed as “Right Justify.”
BLANK	Shown on record formats to indicate a blank space in a record.
FY	Fiscal Year (FY)
PY	Prior FY
CY	Current FY. If the current FY is FY 2017, the PY is FY 2016, and the CY is FY 2017.
Line ID No.	As used in this Regulation, a special six (6) digit alpha/numeric code used ONLY for IBOP reporting to identify an exact line item in a report.
QTR	Numeric quarter of the FY. Must be 1, 2, 3, or 4.

Table 13-10. Line Item Captions and Descriptions Accounting Report 1

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
	A. Payments
	1. Pay, U.S. Personnel - This includes payments to U.S. personnel for “net pay” as defined in subparagraph 2.3.16, PCS and TDY travel expenses, dislocation allowances for which the individual is reimbursed, and claims paid to U.S. personnel. Enter payments on the line indicating the appropriation cited in the voucher. Use other lines under this heading to record adjustments to payments to U.S. personnel to arrive at the amount of pay available for spending on the local economy.
01A000	a. Military Personnel, Reserve Personnel, and National Guard Personnel (Including afloat personnel homeported abroad)
01A020	b. Printing and Reproduction, Civilian Personnel
01B000	c. Operation and Maintenance (O&M), Civilian Personnel
01C000	d. Military Construction, Civilian Personnel
01D000	e. Family Housing Construction, Civilian Personnel
01E000	f. Military Assistance Appropriations and Funds, Civilian Personnel
01F000	g. Other Appropriations and Funds, Civilian Personnel
	h. Total Net Pay, U.S. Personnel - Enter the sum of lines A.1.a. through A.1.g.
	i. Travel Payments to U.S. Personnel Stationed Abroad (See subparagraph 2.8.4.2.7)
01H010	(1) Travel Payments to Military Personnel, Reserve Personnel, and National Guard Personnel Stationed Abroad
01H020	(2) Total Subsistence and Per Diem
01H030	(3) Travel Payments to Other U.S. Personnel Stationed Abroad.
	(4) Total Travel Payments to U.S. Personnel Stationed Abroad - Enter the sum of lines A.1.i.(1) through A.1.i.(3).
01I000	j. Travel Payments to U.S. Personnel Stationed in the United States.
	k. Expenditures by U.S. Personnel at Foreign Non-Duty Locations
01J010	(1) Expenditures Ashore by U.S. Personnel Afloat with Homeports in the United States. Report the amounts as determined by current personnel surveys and other statistical methods. The basis used by the reporting DoD Component for developing data for each country will be provided annually to Department of Commerce upon request.
01J020	(2) Reserved

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
01J030	(3) Expenditures by U.S. Personnel on Rest and Recuperation (R&R) Leave - Report the amounts spent by U.S. Personnel while on R&R at locations outside the country in which they are assigned. Positive entries (+) will be used for countries where the individual is on R&R, and negative entries (-) will be used to reflect the adjustment to the "Pay Available for Spending" in the country in which the individual is stationed.
01K000	l. Deposits (Savings)
01L000	m. Claims, Defense Personnel - (Excluding death gratuities)
	n. Nonappropriated Fund Transactions
01M010	(1) Exchange Service Money Orders - Enter the total amount of money order sales and fees.
01M020	(2) Other Nonappropriated Funds - Enter the net increase (-) or decrease (+) in column (10) of AR-2. (Table 13-6)
	(3) Total Nonappropriated Fund Transactions - Enter the sum of lines A.1.n.(1) and A.1.n.(2).
01N000	o. MPSA Transactions - Enter the net increase (-) or decrease (+) in column 7 of AR-3 (Table 13-7) (reported only by Defense Postal Service).
	p. Less Receipts from U.S. Personnel (-)
01O010	(1) Commissary Store Sales to Individuals - (Excluding collections from nonappropriated funds)
01O020	(2) Other Sales to Individuals - This includes laundry, dry-cleaning, and family housing management funds, sales of meals to individuals and dependents, clothing store sales, and sales of gasoline coupons.
	(3) Total Receipts from U.S. Personnel - Enter the sum of lines A.1.p.(1) and A.1.p.(2).
	q. Civilian Pay & Benefits
01Q000	(1) Full-Time Civilian Pay & Benefits
01Q010	(2) Other Civilian Pay & Benefits
01Q020	(3) Insurance Claims, Indemnities, and Refunds
	(4) Total Civilian Pay & Benefits - Enter the sum of lines A.1.q.(1) through A.1.q.(3).
	r. Total Pay Available for Spending - Enter the sum of line A.1.h., line A.1.i.(4), line A.1.j., lines A.1.k.(1) thru A.1.k.(3), line A.1.l., line A.1.m., line A.1.n.(3), line A.1.o., less line A.1.p.(3), plus line A.1.q.(4).
	2. Direct Hire Foreign Nationals - This includes the total gross pay of foreign nationals from appropriations and funds as defined in subparagraph 2.3.9.

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
02A000	a. O&M, Direct Hire Foreign Nationals
02B000	b. Military Assistance Appropriations and Funds, Direct Hire Foreign Nationals
02C000	c. Military Construction Appropriations and Family Housing, Direct Hire Foreign Nationals
02D000	d. Other Appropriations and Funds, Direct Hire Foreign Nationals
	e. Total Direct Hire Foreign Nationals - Enter the sum of lines A.2.a. through A.2.d.
	3. Indirect Hire Foreign Nationals - This includes the total gross pay of indirect hire of foreign nationals from appropriations and funds as defined in subparagraph 2.8.4.2.5.2.
03A000	a. O&M, Indirect Hire Foreign Nationals
03B000	b. Military Assistance Appropriations and Funds, Indirect Hire Foreign Nationals.
03C000	c. Military Construction Appropriations and Family Housing, Indirect Hire Foreign Nationals.
03D000	d. Other Appropriations and Funds, Indirect Hire Foreign Nationals
	e. Total Indirect Hire Foreign Nationals - Enter the sum of lines A.3.a. through A.3.d.
	4. Materials, Supplies, and Equipment - This includes total payments for material identified to object classes 26 and 31 from appropriations and funds and the amount of returns to the United States. This excludes military construction and major procurement.
	a. Subsistence
04A010	(1) Military Personnel
04A020	(2) Stock Funds
	(3) Subtotal - Enter the sum of lines A.4.a.(1) and A.4.a.(2).
	(4) Less Returns to United States (-)
04A04A	(a) U.S. End Products
04A04B	(b) U.S. Services
04A04C	(c) U.S. Transportation
	(d) Total Returns - Enter the sum of lines A.4.a.(4)(a) through A.4.a.(4)(c).
	(5) Total Subsistence - Enter the net of lines A.4.a.(3) and A.4.a.(4)(d).
	b. POL - (Petroleum, oil, and lubricants) (Including product transportation, storage and handling)

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
04B010	(1) O&M, POL
04B020	(2) Stock Funds, POL
04B030	(3) Industrial Funds and Other, POL
	(4) Subtotal - Enter the sum of lines A.4.b.(1) through A.4.b.(3).
	(5) Less Returns to United States (-)
04B05A	(a) U.S. End Products
04B05B	(b) U.S. Services
04B05C	(c) U.S. Transportation
	(d) Total Returns - Enter the sum of lines A.4.b.(5)(a) through A.4.b.(5)(c).
	(6) Total POL – Enter the net of line A.4.b.(4) and A.4.b.(5)(d).
	c. Offshore Procurement
04C010	(1) Procurement – Aircraft
04C020	(2) Procurement – Missiles
04C030	(3) Procurement – Ships
04C040	(4) Procurement – Combat Vehicles
04C050	(5) Procurement – Tactical & Support Vehicles
04C060	(6) Procurement – Weapons
04C070	(7) Procurement – Ammunition
04C080	(8) Procurement – Communication Equipment
04C090	(9) Procurement – Other Support Equipment
04C100	(10) Procurement – Supplies
	(11) Subtotal – Enter the sum of lines A.4.c.(1) through A.4.c.(10)
	(12) Less: Returns to United States (-)
04C12A	(a) U.S. End Products
04C12B	(b) U.S. Services
04C12C	(c) U.S. Transportation
	(d) Total Returns - Enter the sum of lines A.4.c.(12)(a) through A.4.c.(12)(c).
	(13) Total Offshore Procurement – Enter the net of lines A.4.c.(11) and A.4.c.(12)(d).
	d. Other Materials, Supplies, and Equipment
04D010	(1) O&M, Other Materials, Supplies, and Equipment
04D020	(2) Research, Development, Test, and Evaluation (RDT&E)
04D030	(3) Military Assistance Appropriations and Funds, Procurement other than Offshore Procurement from line A.4.c.(13)
04D040	(4) Stock Funds, Other Materials, Supplies, and Equipment

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
04D050	(5) Other Appropriation and Funds - (Excluding Military Construction Material and Major Procurement)
	(6) Subtotal – Enter the sum of lines A.4.d.(1) through A.4.d.(5)
	(7) Less: Returns to United States (-)
04D07A	(a) U.S. End Products
04D07B	(b) U.S. Services
04D07C	(c) U.S. Transportation
	(d) Total Returns - Enter the sum of lines A.4.d.(7)(a) through A.4.d.(7)(c).
	(8) Total Other Materials, Supplies, and Equipment - Enter the net of lines A.4.d.(6) and A.4.d.(7).d.
	e. Total Materials, Supplies, and Equipment - Enter the sum of lines A.4.a.(5), A.4.b.(6), A.4.c.(13), and A.4.d.(8).
	5. Major Procurement - Report all procurement charged to Major Procurement Appropriations under the following categories, including transportation and services (A.5.a. through A.5.e.).
05A000	a. Aircraft and Related Equipment and Spares
05B000	b. Missiles and Related Equipment and Spares
05C000	c. Shipbuilding and Related Equipment and Spares
05D000	d. Ground Electronics and Related Equipment and Spares
05E000	e. Other - Major Procurement
	f. Subtotal – Enter the sum of lines A.5.a. through A.5.e.
	g. Less: Returns to United States (-)
05G010	(1) U.S. End Products
05G020	(2) U.S. Services
05G030	(3) U.S. Transportation
	(4) Total Returns - Enter the sum of lines A.5.g.(1) through A.5.g.(3).
	h. Total Major Procurement - Enter the net of lines A.5.f. and A.5.g.(4).
	6. Construction - Report payments to foreign contractors and U.S. contractors for foreign construction projects charged to the appropriations listed and payments for construction material charged to the Military Construction and Family Housing Appropriations. Include all payments for services charged to Military Construction and Family Housing Construction Appropriations.
	a. Foreign Contractors
06A010	(1) Military Construction

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
06A020	(2) Family Housing, Defense Construction
06A030	(3) Military Assistance Appropriations and Funds, Construction, Foreign Contractors
06A040	(4) Counterpart Foreign Currency Payments
	(5) Subtotal – Enter the sum of lines A.6.a.(1) through A.6.a.(4).
	(6) Less: Returns to the United States (-)
06A06A	(a) U.S. End Products
06A06B	(b) U.S. Services
06A06C	(c) U.S. Transportation
	(d) Total Returns - Enter the sum of lines A.6.a.(6)(a) through A.6.a.(6)(c).
	(7) Total Construction Foreign Contractors - Enter the net of lines A.6.a.(5) and A.6.a.(6)(d).
	b. U.S. Contractors
06B010	(1) Military Construction
06B020	(2) Family Housing, Defense Construction
06B030	(3) Military Assistance Appropriations and Funds, Construction, U.S. Contractors
06B040	(4) Counterpart Foreign Currency Payments
	(5) Subtotal - Enter the sum of lines A.6.b.(1) through A.6.b.(4).
	(6) Less: Returns to United States
06B06A	(a) U.S. End Products
06B06B	(b) U.S. Services
06B06C	(c) U.S. Transportation
	(d) Total Returns - Enter the sum of lines A.6.b.(6)(a) through A.6.b.(6)(c).
	(7) Net Payments to U.S. Contractors for Construction - Enter the net of lines A.6.b.(5) and A.6.b.(6)(d).
	c. Construction Material - This includes the procurement of material, supplies, and equipment acquired for foreign construction projects. Report government-furnished material provided to contractors, procured abroad with construction funds when the material is purchased.
06C010	(1) Military Construction
06C020	(2) Family Housing, Defense Construction Categories
	(3) Subtotal - Enter the sum of lines A.6.c.(1) and A.6.c.(2).
	(4) Less: Returns to United States (-)
06C04A	(a) U.S. End Products
06C04B	(b) U.S. Service
06C04C	(c) U.S. Transportation

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
	(d) Total Returns - Enter the sum of lines A.6.c.(4)(a) through A.6.c.(4)(c).
	(5) Net Payments for Construction Material – Enter the net of lines A.6.c.(3) and A.6.c.(4)(d).
	d. NATO Infrastructure
06D000	(1) Foreign Military Sales – Land and Structures
06D010	(2) NATO Infrastructure
06D020	(3) NATO Air Defense Ground Environment
	(4) Total NATO Infrastructure - Enter the sum of lines A.6.d.(1) through A.6.d.(3).
	e. Total Construction - Enter the sum of lines A.6.a.(7), A.6.b.(7), A.6.c.(5), and A.6.d.(4).
	7. Transportation - Report payments to foreign carriers for transportation of individuals or transportation of household goods and materiel, including those furnished on U.S. Government bills of lading, travel requests, and similar documents charged to the following appropriations and funds, excluding amounts reported under POL and subsistence stock funds.
07A000	a. Military Personnel, Reserve Personnel, and National Guard Personnel
07B000	b. O&M, Transportation
07C000	c. Military Assistance Appropriations and Funds, Transportation
07D000	d. Other Appropriations and Funds, Transportation
	e. Subtotal – Enter the sum of lines A.7.a. through A.7.d.
	f. Less: Returns to United States (-)
07F010	(1) U.S. End Products
07F020	(2) U.S. Services
07F030	(3) U.S. Transportation
	(4) Total Returns – Enter the sum of lines A.7.f.(1) through A.7.f.(3).
	g. Total Transportation - Enter the net of lines A.7.e. and A.7.f.(4).
	8. Services - Report payments for services performed overseas, including real property maintenance, repair, and minor construction (Object classes 23, 24, and 25, excluding indirect hire, foreign nationals) from the following appropriations and funds.
	a. Foreign Contractors
	(1) O&M
08A01A	(a) Rents, Communications, and Utilities

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

08A01B	(b) Contract Maintenance of Equipment and Related Payments
08A01C	(c) Real Property Maintenance, Repair, and Minor Construction
08A01D	(d) Other O&M
	(e) Total Services, Foreign Contractors, O&M - Enter the sum of lines A.8.a.(1)(a) through A.8.a.(1)(d).
08A020	(2) RDT&E
08A030	(3) Military Assistance Appropriations and Funds, Services, Foreign Contractors
08A040	(4) Other Appropriations and Funds, Services, Foreign Contractors
	(5) Subtotal – Enter the sum of lines A.8.a.(1)(e) and A.8.a.(2) through A.8.a.(4).
	(6) Less: Returns to United States (-)
08A06A	(a) U.S. End Products
08A06B	(b) U.S. Services
08A06C	(c) U.S. Transportation
	(d) Total Returns – Enter the sum of lines A.8.a.(6)(a) through A.8.a.(6)(c).
	(7) Total Payments to Foreign Contractors for Services - Enter the net of lines A.8.a.(5) and A.8.a.(6)(d).
	b. U.S. Contractors
	(1) O&M
08B01A	(a) Real Property Maintenance, Repair, and Minor Construction
08B01B	(b) Other O&M
	(c) Total Services, U.S. Contractors, O & M - Enter the sum of lines A.8.b.(1)(a) and A.8.b.(1)(b).
08B020	(2) RDT&E
08B030	(3) Military Assistance Appropriations and Funds, Services, U.S. Contractors
08B040	(4) Other Appropriations and Funds, Services, U.S. Contractors
	(5) Subtotal - Enter the sum of lines A.8.b.(1)(c) and A.8.b.(2) through A.8.b.(4).
	(6) Less: Returns to United States (-)
08B06A	(a) U.S. End Products
08B06B	(b) U.S. Services
08B06C	(c) U.S. Transportation
	(d) Total Returns - Enter the sum of lines A.8.b.(6)(a) through A.8.b.(6)(c).
	(7) Net Payments to U.S. Contractors for Services - Enter the net of lines A.8.b.(5) and A.8.b.(6)(d).

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
	c. Net Payments to U.S. and Foreign Contractors for Services - Enter the sum of lines A.8.a.(7) and A.8.b.(7).
	9. Grants to Foreign Entities - Report cash grants paid from the following appropriations and funds. Exclude grants under Military Assistance Grant Aid authorized by the Arms Export Control Act (AECA) of 1976, as amended.
09A000	a. RDT&E
09B000	b. Reserved
09C000	c. Other Appropriations and Funds
	d. Total Grants to Foreign Entities - Enter the sum of lines A.9.a. through A.9.c.
	10. Other Payments - Report all other payments made abroad, not elsewhere classified.
10A000	a. O&M
10A020	b. O&M, Army
	c. Military Assistance Appropriations and Funds
10B010	(1) International Military Headquarters (Project R 1)
10B020	(2) Other Military Assistance Appropriations and Funds
	(3) Subtotal - Enter the sum of lines A.10.c.(1) and A.10.c.(2).
10B040	(4) Weapons Production Program - (Project R 5 0)
10B050	(5) Research and Development - (Projects P 1 0 and P 2 0)
	(6) Total Other Payments, Military Assistance - Enter the sum of lines A.10.c.(3), A.10.c.(4) and A.10.c.(5).
10C000	d. Retired Pay, Defense - Report payments to retired personnel living abroad.
10D000	e. Other Claims - Report claims, including death gratuities, other than personnel claims (Code 01L000).
10E000	f. Counterpart Foreign Currency Payments
10F000	g. Other Appropriations and Funds
	h. Subtotal - Enter the sum of lines A.10.a., A.10.b., A.10.c.(6), and A.10.d. through A.10.g.
	i. Less: Returns to United States (-)
10H010	(1) U.S. End Products
10H020	(2) U.S. Services
10H030	(3) U.S. Transportation
	(4) Total Returns - Enter the sum of lines A.10.i.(1) through A.10.i.(3).

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
	j. Total Other Payments - Enter the net of lines A.10.h. and A.10.i.(4).
110000	11. FT Accounts - Enter all payments from FT accounts for which management responsibility has been delegated to the DoD. The amounts reported on this line must be consistent with the total of all FT accounts reported on the Statement of Transactions and Accountability for the same period.
	12. Summary
	a. Total Payments - Enter the sum of lines A.1.r., A.2.e., A.3.e., A.4.e., A.5.h., A.6.e., A.7.g., A.8.c., A.9.d., A.10.j. and A.11.
12B000	b. Reserved
12C000	c. Reserved
12D000	d. Less: Payments Reimbursable from AID, Department of State, or Funds Appropriated to the President - Enter the amount as a negative (-).
12E000	e. Less: Fines, Penalties, and Forfeitures
12F000	f. Less: Interest & Dividends
	g. Total Net Payments - Enter the net of line A.12.a. and lines A.12.b. through A.12.f.
	B. Collections
	13. Collections for DoD Cash Sales
13A000	a. Foreign Military Sales Trust Fund, Account 8242 - (Excludes reimbursements for prior expenditures from Account 8242)
13B000	b. Less: Refunds to the account of foreign governments from Foreign Military Sales Account 8242 - Enter the amount as a negative (-).
13C000	c. Military Assistance Appropriations, Accounts 11X1080, 11X1081, 11X1088, and 11X4116
13D000	d. Other Sales Accounts
13E000	e. Other Collections for DoD Cash Sales
	f. Total Collections for DoD Cash Sales - Enter the sum of lines B.13.a. through B.13.e.
140000	14. Advances from Foreign Countries on Sale Agreements - This line applies only to sales under long-term credits where an advance has been received this period. It does not apply to cash sales.

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
	15. Repayment of Loans - Enter repayments of principal on Foreign Military Sales loans and Other DoD Loans.
15A000	a. Collection of Principal Miscellaneous Receipt Account Treasury Account 2968
15B000	b. Liquidation of Foreign Military Sales Trust Fund Account
15C000	c. Collections for Guaranty Reserve Fund 11X4121
15D000	d. Reserved
15E000	e. Reserved
15F000	f. Ryukyu Islands Power System
	g. Total Repayment of Loans - Enter the sums of lines B.15.a. through B.15.f.
	16. Joint Weapons Production and Exchange Agreements - Enter collections resulting from transactions under this program.
16A000	a. Reserved
16B000	b. Other
	c. Total Collections for Joint Weapons Production and Exchange Agreements - Enter the sum of lines B.16.a. and B.16.b.
170000	17. Contributed Currencies - Report currencies contributed by foreign governments that reimburse the U.S. Government for operating costs of MAAGs and Missions. See Volume 12, Chapter 24: "Burdensharing and Overseas Relocation Contributions By Foreign Allies."
180000	18. Collections for Sales by Property Disposal Officers - Report collections and reimbursements for all sales of surplus, excess, foreign excess, scrap, salvage, timber and lumber products, sold overseas, including the bid deposits of successful bidders recorded in: Accounts from Sales of Personal Property pursuant to exchange/sales requirements and industrial fund accounts. Exclude bid deposits recorded in Deposit Account 6500, Clearing Account 3875, and collections made directly into account 8242.
	19. Collections of Interest - Report the interest collected from foreign debtors on direct long-term credits, including fees and premiums on guaranteed loans, and other interest such as that collected on deposits in foreign banks and on advances.
190000	a. Interest Received from Loans & Financing Accounts

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
19A000	b. Miscellaneous Receipt Accounts - (Other than those shown in B.19.a., B.19.c., B.19.f., and B.19.g.)
19B000	c. Foreign Military Credit Sales, Account 1468
19C000	d. Foreign Military Sales Account 8242
19D000	e. FT accounts
19E000	f. Ryukyu Islands Power System Loan
19F000	g. Interest on Advances
	h. Total Collections of Interest - Enter the sum of lines B.19.a. through B.19.g.
200000	20. Collections for Deliveries of DoD Materiel and Services Billed Locally to Foreign Residents - Report collections for all logistical support or sales abroad at the amount billed and collected locally to foreign residents. Includes sales of foreign non-excess personal property and all services rendered.
210000	21. Collections for Deliveries Billed Centrally for Logistical Support - Report the amount of collections for all materiel and services billed centrally for logistical support furnished by a DoD Component to a foreign resident or international organization. Reported collections on this line are separate and apart from collections reported on line B.13. and will encompass all other arrangements for support of foreign country or international organization forces by the DoD Component.
220000	22. Collections for Loans and Leases of Aircraft, Vessels, and Other Equipment - Enter all reimbursements received for loan or lease of aircraft and vessels. Exclude collections for such transfers under Foreign Military Sales and Military Assistance Grant Aid - Enter all reimbursements received for loan or lease of aircraft and vessels. Exclude collections for such transfers under Foreign Military Sales and Military Assistance Grant Aid.
230000	23. Reserved
240000	24. Barter/Sales of Surplus Agricultural Products - Enter only in the worldwide summary report the amount paid to the Commodity Credit Corporation (CCC) representing barter sales of surplus agricultural products pursuant to a barter contract.
	25. Total Collections - Enter the sum of lines B.13.f., B.14., B.15.g., B.16.c., B.17., B.18., B.19.h., and B.20. through 24.

Table 13-10. Line Item Captions and Descriptions Accounting Report 1 (Continued)

LINE ITEM ID CODES	LINE ITEM CAPTIONS AND DESCRIPTIONS ACCOUNTING REPORT 1
	C. Deliveries - Delivery data for the following categories will be prepared by appropriate agencies pursuant to the SAMM. Level of detail for each category and method of reporting will be established by agreement between the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) and the appropriate agency and will be implemented by the effective date of this Instruction.
260000	26. Reserved
270000	27. DoD Deliveries – Foreign Military Sales and Building Partner Capacity - Deliveries of materiel and services relative to direct sales authorized by the AECA of 1976, as amended, as indicated by the generic codes in Chapter 4 and Chapter 9 of the SAMM.
280000	28. Deliveries under Joint Weapons Production and Exchange Agreements - The value of components or services provided by the U.S. Government under weapons production programs and delivered to countries outside the United States by the categories stated in Chapter 11 of the SAMM.
	29. Interest - Do not report delivery data for interest.
	30. Deliveries by Property Disposal Officers - Do not report deliveries by Property Disposal Officers.
	31. Contributed Currencies - Do not report delivery data for contributed currencies.
	32. Deliveries of DoD Materiel and Services Billed Locally to Foreign Entities - Do not report deliveries of DoD materiel and services billed locally to foreign entities.
	33. Deliveries Billed Centrally for Logistical Support - Do not report deliveries billed centrally for logistical support.
	34. Transfers Without Reimbursement, Military Assistance Program (Grant Aid) - Transfers to foreign countries and international organizations as Military Assistance Grant Aid relative to the FAA of 1961, as amended, as indicated by the generic codes in Chapter 11 of the SAMM.
34A000	a. Special Drawdown Authority
34B000	b. EDA Program

34C000	c. Under International Treaties and Agreements
	35. Loans and Leases of Aircraft, Vessels, and Other Equipment - This includes the value at unit inventory prices as carried on the books of the DoD Component at centrally controlled management offices of equipment loaned or leased to foreign governments. It excludes transfers under Foreign Military Sales and Military Assistance Grant Aid.
35A000	a. Original Deliveries
35B000	b. Less: Returns of Aircraft, Vessels, and Other Equipment (-)
35C000	c. Net Loans and Leases of Aircraft, Vessels, and Other Equipment Enter the net of lines C.35.a. and C.35.b.
360000	36. Transfers of Real Property - This includes the transfer of land, buildings, utilities, and improvements, excluding leases, by a DoD Component to a foreign government or international organization, at the amount carried on the real property records. Refer to DoD Instruction 4165.14 , "Real Property Inventory and Forecasting."
370000	37. Joint Weapons Production and Exchange Agreements - This includes the value of end products furnished to the United States under joint weapons production and exchange agreements.
380000	38. Deliveries under Reimbursement from the AID, Department of State, or Funds Appropriated to the President - This includes the value of end items furnished to foreign governments.
	39. Outlays from Appropriations, Other Assistance Grant Aid - Include outlays from appropriations in support of other U.S. foreign assistance.
39A	a. Overseas Humanitarian, Disaster, and Civic Aid Defense (97 0819)
39A000	(1) Overseas Humanitarian, Disaster, and Civic Activities 97 0819 (Gross Appropriation Amount).

CHAPTER 14**DEPOT MAINTENANCE REPORTING****1.0 GENERAL (1401)****1.1 Purpose (140101)**

The DoD maintains a core depot-level maintenance and repair capability in support of mission-essential weapon systems and other military equipment needed to directly support operational requirements and enable the armed forces to execute the strategic and contingency plans prepared by the Chairman of the Joint Chiefs of Staff. This chapter prescribes Depot Maintenance Cost System (DMCS) requirements that are necessary to provide a comprehensive accounting of DoD depot maintenance workloads. The DoD Components must satisfy these requirements with regard to reporting the accomplishment and status of DoD depot maintenance workloads in:

- 1.1.1. DoD depot maintenance facilities;
- 1.1.2. Private-sector facilities;
- 1.1.3. Other DoD and Federal Government facilities; and
- 1.1.4. State, local, and foreign government facilities.

1.2 Authoritative Guidance (140102)

These requirements apply to DoD depot maintenance workloads the Components identify pursuant to Title 10, United States Code, [section 2466](#), under which DoD reports to the Congress the respective depot maintenance workload levels in the public and private sectors.

2.0 COST DATA REQUIREMENTS (1402)**2.1 Scope (140201)**

These requirements apply to all depot maintenance workloads, regardless of DoD funding source, e.g., Defense Working Capital Fund (DWCF), Research and Development, Procurement, General Purpose Forces, Special Operations Forces, Operation and Maintenance, or other appropriations; or non-DoD funding source, such as work done for private-sector customers or other federal, state, local, and foreign governments. Additional guidance is provided in:

- 2.1.1. Addendum 1 – DoD Major Depot Maintenance Activities;
- 2.1.2. Addendum 2 – Reporting Activity Identifying Codes;
- 2.1.3. Addendum 3 – DMCS Input File;

2.1.4. Addendum 4 – Work Breakdown Structure Codes; and

2.1.5. Addendum 5 – Work Performance Category (WPC) Codes.

2.2 Cost Data Collection (140202)

The uniform recording, accumulation, and reporting of costs incurred in depot maintenance operations is required to document the use of DoD resources and to assist management in the measurement of productivity and efficiency, development and use of performance measurement and cost standards, and identification of areas in need of increased management emphasis. In addition, the data will assist in the assessment of total DoD maintenance capability, duplication of capacity, and opportunities for areas of interservice support of maintenance workloads.

2.3 Managerial Use of Cost Data (140203)

Management requires depot maintenance information to assist in:

2.3.1. Developing inputs to meet Departmental and Congressionally-mandated requirements;

2.3.2. Comparing repair costs with replacement costs;

2.3.3. Overseeing the utilization of depot maintenance resources;

2.3.4. Evaluating budgets for customers and providers of depot maintenance;

2.3.5. Comparing cost trends among organic DoD depots and between organic and contract (private-sector) sources;

2.3.6. Formulating managerial direction and guidance for depot maintenance programs;

2.3.7. Evaluating depot maintenance activities for efficient use of resources;

2.3.8. Estimating depot maintenance requirements;

2.3.9. Monitoring DoD Component compliance with various Congressionally-mandated reporting requirements;

2.3.10. Examining the behavior of cost drivers over time; and

2.3.11. Identifying and evaluating total ownership costs.

2.4 Cost Definition (140204)

To ensure that all workloads are accounted for and reported in DMCS, regardless of funding source, reporting requirements have been stratified to facilitate reporting of total DoD costs, both funded and unfunded, for organic and contract depot maintenance. For DMCS reporting purposes:

2.4.1. Funded costs are those charged to the operating funds of the performing activity or the activity reporting contract depot maintenance. Funded costs are defined from the perspective of the activity performing the work or, in the case of contract maintenance, from the perspective of the program manager or administrator responsible for reporting contract costs. Costs incurred by a DWCF, or direct-funded organic activity in performance of reimbursable orders, are categorized as funded, as these costs are charged to the operating account of the performing activity. Funded costs at DoD organic activities normally include items such as payroll, operating materials, supplies, and services; and

2.4.2. Unfunded costs are costs financed by a DoD appropriation, activity, or entity other than that of the performing activity, or the reporting activity in the case of contract depot maintenance. In other words, financial responsibility resides with an entity other than the DMCS reporting unit. Material, such as a modification kit or other Government-furnished material financed by a procurement appropriation not available to the performing activity, is an unfunded cost. For a direct-funded activity, depreciation of plant and equipment financed by procurement appropriations, and facilities maintenance financed by a regional command, are examples of unfunded costs.

3.0 REPORTING REQUIREMENTS (1403)

*3.1 General Reporting Requirements (140301)

The DMCS reporting requirements contained in this chapter, including any subsequent data and format revisions, are the responsibility of the Deputy Assistant Secretary of Defense for Materiel Readiness (DASD (MR)), Office of the Under Secretary of Defense (OUSD) (Acquisition & Sustainment). The DASD (MR) must provide the data revisions and report format changes to the OUSD Comptroller (OUSD (C)), Financial Management Policy and Reporting (FMPR), for publication in subsequent revisions of this chapter. The senior official with responsibility for logistics in each DoD Component is responsible for timely reporting. The Assistant Secretary responsible for financial management in the Military Departments (or equivalent in other DoD Components) is responsible for providing complete and accurate financial data to the report preparer in sufficient time for report submission.

3.2 Applicability of Reporting Requirements (140302)

The depot maintenance cost report required by this chapter applies to all Military Services and other DoD activities that accomplish depot maintenance workloads or have depot maintenance workloads accomplished by contract. This includes all work performed by DoD depot maintenance activities, as well as all DoD depot-level maintenance accomplished by other Government activities and contractors.

3.2.1. Performing and Reporting Activities

3.2.1.1. Addendum 1 identifies the major DoD depots, shipyards, and other depot maintenance activities that historically have performed depot maintenance workloads. Report work performed at major depot maintenance activities listed in that addendum as specified in subparagraph **140401.B.1**. Report work performed by DoD activities not listed in Addendum 1 in accordance with subparagraph **140401.B.2**. Report all other work (i.e., that performed by contractors; other Federal Government activities; and state, local, and foreign governments) as stipulated in subparagraph **140401.B.3** by the program administering offices designated by the official in each DoD Component responsible for reporting DMCS data.

3.2.1.2. Addendum 2 is a list of reporting activity identifying codes. Activities performing depot maintenance not listed in Addendum 2, that are required to report, will request an appropriate identifying code from DASD (MR) or its designated agent.

3.2.2. Cost Reporting By DoD Performing Activities. Report records from DoD performing activities must reflect total costs incurred, including the cost of any subsidiary ordering from other Government activities or contracting with commercial firms incident to accomplishing workloads. The report accommodates separate reporting of direct labor hours, and costs of contract labor used to augment the workforce, when the hours and associated costs are obtainable from local cost accounting data.

3.2.3. Cost Reporting By Other Activities. Report records for DoD depot-level maintenance performed by contractors and DoD activities not listed on Addendum 1 must include all costs to DoD incurred in performing the work. These reports must:

3.2.3.1. Exclude intermediate-level, organizational-level, and other non-depot-level maintenance services (unless those maintenance services are an integral part of a depot-level task or contract);

3.2.3.2. Include the depot-level maintenance portion of Contractor Logistics Support (CLS), Interim Contractor Support (ICS), Performance-Based Logistics (PBL), and similar contracts. Report the direct costs of the depot maintenance performed, as well as associated overhead and other costs attributable to the depot-level maintenance portion of the contracts;

3.2.3.3. Include the cost of Government-furnished material and Government-furnished services consumed in producing a product or service, even though financed or provided by a source other than the primary reporting office or entity; and

3.2.3.4. Provide all appropriate categorization codes, including Item Identification, Weapon or Support System Code (WSSC), Work Breakdown Structure, WPC, and the average number of Shop Flow Days.

3.3 Work Performance Categories (140303)

Addendum 5 contains the WPC codes that identify the nature of work performed. In cases where there may be overlap between WPCs, report costs in the highest level of repair. For example, if manufacture is required to complete an overhaul because critical parts are not available, report costs as overhaul.

3.4 DMCS Data Submission Process (140304)

3.4.1. Frequency and Timing of Submittal. Annual DMCS data submissions must be provided to DASD (MR), or its designated agent, no later than December 31 following the end of the fiscal year. Reporting requirement symbol AP-MP(A)1397 is assigned to this reporting requirement. Paragraph 140301 lists the parties responsible for data submission.

3.4.2. Accompanying Documents

3.4.2.1. With each data submission to the DASD (MR), include a transmittal memorandum that includes a brief discussion of any anomalies in the data, significant changes from previous submissions, or other pertinent information to aid in processing the data. The transmittal memorandum for the report must identify a point of contact within the submitting activity for issues and questions related to the reported data.

3.4.2.2. Within 90 days after the initial submission due date, submit a brief narrative analysis (three to five pages) explaining trends in the data to the DASD (MR). The focus of the narrative analysis must be on the factors driving year-to-year changes in cost and direct labor hours. These factors include changes in workload; changes in contract support (both in level of effort and in price); changes in the prices paid for labor, material, and other resources; and, when applicable, significant changes in organic maintenance processes and financial policies. Express the impact of the factors in quantitative terms (for example, an average 3.2 percent material price change or a 2.1 percent improvement in direct labor productivity).

3.4.3. Quality Control and Editing of Data Prior to Submission. The AP-MP(A)1397 report serves as a principal database in support of DASD (MR) weapon systems depot maintenance cost and production analyses and external reporting, as well as the principal joint-service database on depot maintenance production operations. The DASD (MR) provides a data editing and submission file creation tool in the form of a relational database application. This tool, which provides Component-specific and general edits, facilitates accuracy and consistency of data submitted by the individual Components. The use of this tool is a required element of the submission process. Provide appropriate personnel within each reporting activity with training in tool usage. In addition, the DASD (MR) will provide each Component with tool updates on an annual basis prior to the end of the fiscal year.

3.4.4. Data Input to the Data Editing Tool. The format and content of DMCS data input to the Data Editing Tool must be in accordance with Addendum 3. The individual Military Services and the DASD (MR), or its designated agent, may agree upon alternative formatting of data.

3.4.5. Form and Method of DMCS Data Submissions. Annual AP-MP(A)1397 data must be submitted to DASD (MR), or to its designated agent, using the DMCS Data Editing Tool described in subparagraph 140304.D. The tool containing the data and associated documentation may be compressed and submitted in a variety of ways, for example, compact disk, file transfer protocol, email, or other medium agreed upon by the DASD (MR), or its designated agent, and the reporting activity.

3.4.6. DoD-Level Review Process. The review and update of annual AP-MP(A)1397 submissions must be accomplished as follows:

3.4.6.1. Within 15 days of receipt of each Component submission, the DASD (MR), or its designated agent, must perform an edit of the data and provide each reporting activity or Component data consolidation point with preliminary versions of summary tables and the applicable section of the “DoD Depot Data Highlights Report.” Review any data discrepancies, at this time, with the individual reporting activities or consolidation points;

3.4.6.2. Within an additional 30 days, the Component must review and make appropriate updates or provide explanations to support the data as initially submitted;

3.4.6.3. Within 30 days following receipt of all revised Component data, the DASD (MR), or its designated agent, must prepare and publish the final versions of summary tables and the “DoD Depot Data Highlights Report.” At that time, a final fiscal year database must be established as a historical file for subsequent analysis by the Office of the Secretary of Defense, the Components, and other authorized activities; and

3.4.6.4. Within an additional 15 days, the Components must submit the narrative analyses described in subparagraph 140304.B.2.

3.4.7. Retention of Submitted Data by Reporting Facilities. Reporting activities must retain submission files for a minimum of 5 years.

3.5 DMCS Data Maintenance Requirements (140305)

The Components must ensure that cost and production reporting systems retain the capability to provide an audit trail back to individual job order cost records, or other data sources, when needed to support DMCS report records.

3.6 Report Record Data Requirements (140306)

A report record is required for each type of maintenance work (Field 14) performed for each different weapon system, or item identification number, as indicated by different data entries in Addendum 3. Consolidate data for similar job orders if the item repaired, services performed, and other report record fields are consistent. All fields in Addendum 3 are mandatory except for those identified as “Not Used.” “Not Used” fields may be employed by reporting activities for internal use or left blank. Where quantitative data are required, such as costs and man-hours, enter “0” (zero) if there are no data associated with the fields. Null mandatory fields are not acceptable.

3.6.1. The DASD (MR), or its designated agent, must maintain lookup tables of pertinent data elements and codes for use by the Military Departments in compiling the DMCS report. These tables will include Weapon or Support System Codes, Performing Activity Identification Codes, Reporting Activity Identification Codes, WPC Codes, Item Identification Codes and Nomenclature, Work Breakdown Structure Codes, and Customer Codes. Components will review the codes annually and notify the DASD (MR), or the designated representative, of any needed additions or deletions. Do not change codes at any other time, except by agreement between the DASD (MR), or its designated agent, and the individual Components.

3.6.2. [The Defense Finance and Accounting Service \(DFAS\)](#) must work with the Components to ensure that DFAS financial systems (if used at depot level) retain the capability to provide cost detail to satisfy the reporting requirements of this chapter. Preparation of the DMCS report is the responsibility of the DoD Component performing the work or managing the contract.

3.6.3. Each depot maintenance reporting activity must implement quality assurance procedures to be applied to each DMCS record as it is created and populated. Such procedures must include validity checks to prevent errors, such as identifying an F/A-18A aircraft as a submarine or a High Mobility Multipurpose Wheeled Vehicle (HMMWV) as a tank. Each reporting activity that consolidates DMCS organic and contract records must also implement quality control procedures for all its performing facilities. Prior to data submission, reporting facilities must use the DMCS Data Editing Tool, or similar application, to validate the records.

3.7 Report Record Type (140307)

The data submission report must consist of two types of report records. For both types, the costs reported must be cumulative from inception.

3.7.1. The first record type is cumulative costs for financially completed work. Identify all reported transaction records with a “C” in Field 51 for financially completed customer orders. The reported amount for work completed by contractors must equal the total cost (funded and unfunded) incurred.

3.7.2. The second record type is cumulative costs for not financially complete work. Report these costs in order to form a complete picture of the work accomplished at each activity performing depot maintenance. Identify report records for financial work that is incomplete with

a “W” in Field 51. When reporting contract costs (Field 36), enter the sum of the contract costs accumulated since inception of the contract that are attributable to the work accomplished.

3.8 Report Record Corrections (140308)

Once an annual DMCS report cycle is completed and the results published, the data should remain unchanged. Therefore, it is important to incorporate corrections and adjustments in the original report records. Exceptions must be for corrections or adjustments that materially change a total for an entire performing facility. If significant corrections to prior year data become necessary, contact the DASD (MR), or its designated agent, to coordinate processing the changes.

4.0 REPORTING CATEGORIES AND DATA REQUIREMENTS (1404)

4.1 Workload Reporting Activities (140401)

4.1.1. Depot maintenance is performed at DoD depots, at private-sector commercial contractor facilities, and at other DoD activities, such as intermediate maintenance facilities (IMF), arsenals, ordnance stations, or public works centers. The DoD depot maintenance activities that are funded by DWCF are required to follow the formal job order accounting requirements specified in Volume 11B, Chapter 13. Other DoD activities performing depot maintenance workloads may use other cost finding procedures to satisfy the reporting requirements specified in Section 1403.

4.1.2. All activities performing depot maintenance will report workload identification data, as required, in Fields 1-16. Cost and production data reporting requirements (Fields 17-54) vary, depending upon the category of activity performing the work. Reporting categories and data requirements must be as follows:

4.1.2.1. DoD Major Depot Maintenance Activities. Addendum 1 lists the major depot maintenance activities under the headings: Army Depots, Naval Shipyards, Fleet Readiness Centers, Marine Corps Depots, and Air Force Depots. Funded and unfunded DoD costs for these activities are reported in Fields 17 through 35, with an owner/operator code (Field 7) of “1.” The cost of work suballocated, in part, by a depot to another DoD facility or commercial firm must be reported as an “other direct-funded cost” (Field 30). These major maintenance activities must report all work accomplished by the activity;

4.1.2.2. DoD Activities Not Listed in Addendum 1. The program manager or DoD entity (as determined by each Component’s DMCS reporting official) responsible for program oversight must report funded and unfunded DoD costs for these activities in Fields 17 through 35, with an owner/operator code (Field 7) of “2.” If the cost finding procedures of the reporting facility are not sufficiently robust to adequately identify the detailed costs required in Fields 17 through 35, a waiver must be requested from DASD (MR) to permit reporting costs in Fields 36, 37, and 41; and

4.1.2.3. Non-DoD Facilities. Work performed at commercially-owned/commercially-operated (COCO) facilities; Government-owned/contractor-operated (GOCO) facilities; non-DoD Government activities; and state, local, and foreign government facilities must

be reported by the DoD activity initiating the order (e.g., systems program offices, program managers, major commands, major subordinate commands, Fleet Forces Command, the Naval Inventory Control Points, and other activities that use DoD funds, regardless of source, to obtain depot maintenance from non-DoD entities). Reporting activities must ensure that data submissions for depot maintenance performed at non-DoD activities are complete and accurate and that report records reflect an owner/operator code of “3” in Field 7, non-DoD entity costs in Field 36, and Government-furnished materials and services costs in Fields 37 and 41. Government-furnished materials and services include goods and services funded or provided by a sponsor or contract other than administered by the primary reporting entity.

4.2 Primary Workload Reporting Data Fields (140402)

The DMCS reports from all activities must identify the item worked on, the WPC, and work breakdown structure classification to the extent economically feasible.

5.0 SPECIAL REPORTS (1405)

Any one-time or additional reports required must be as prescribed by the OUSD (C), [FMPR](#) or the DASD (MR).

ADDENDUM 1 - DoD Major Depot Maintenance Activities

ADDENDUM 1
DoD MAJOR DEPOT MAINTENANCE ACTIVITIES
 (Activities That Report With a “1” in Field 7 see Addendum 3)

DEPARTMENT OF THE ARMYArmy DepotsLocation

Anniston Army Depot	Anniston, Alabama
Corpus Christi Army Depot	Corpus Christi, Texas
Letterkenny Army Depot	Chambersburg, Pennsylvania
Red River Army Depot	Texarkana, Texas
Tobyhanna Army Depot	Tobyhanna, Pennsylvania

ADDENDUM 3 – DMCS Input File (continued)

ADDENDUM 3SECTION BEXPLANATION OF ENTRIES REQUIRED FOR DMCS REPORTING

1. Field 1—Not Used
2. Field 2—Not Used
3. Field 3—Fiscal Year. Enter the two terminal digits of the current fiscal year being reported.
4. Field 4—Reporting Component. In position 10, enter A (Army), F (Air Force), M (Marine Corps), N (Navy), or S (Defense Logistics Agency) to designate the DoD Component providing the report.
5. Field 5—Performing Activity Identifying Code
 - a. Organic Activity Identifying Code. If the activity is Government-operated (Code 1 or 2 in Field 7), then enter the identifying code in positions 11 through 15 for the activity identified in Addendum 2.
 - b. Contractor CAGE or Identifying Code. If the maintenance is contractor-performed (Code 3 in Field 7), then enter the contract activity's CAGE code or other unique, approved 5-digit identifier as specified by the Defense Logistics Information Service (DLIS). Start in position 11 and leave positions 16 through 24 blank. Request a CAGE code if one has not been established for a contractor.
6. Field 6—Not Used
7. Field 7—Owner and/or Operator Code. Enter one of the following to indicate the type of activity performing the maintenance.

Code 1—DoD Major Depot Maintenance Activities (DoD Component organic maintenance activities listed in Addendum 1). When Code 1 is entered in Field 7, report costs in Fields 17 through 35. Fields 36, 37, and 41 must be zero filled.

Code 2—Other DoD Facilities (DoD Component in-house maintenance activities not listed in Addendum 1). When Code 2 is entered in Field 7, report costs in Fields 17 through 35. Fields 36, 37 and 41 must be zero filled.

Code 3—COCO, GOCO, and other non-DoD entities (other Federal Government activities; state, local, and foreign governments). When Code 3 is entered, report costs in Fields 36, 37, and 41. Fields 17 through 28 and 30 through 35 must be zero filled.

ADDENDUM 3 – DMCS Input File (continued)

8. Field 8—Reporting Activity Identifying Code. A code identifying the reporting activity, including activities contracting for depot maintenance work with commercial contractors. Enter the reporting activity's identifying code as specified in Addendum 2. Depot maintenance activities performing in-house work for all other DoD activities, including other depot maintenance activities, must report their work by using their own identifying code in this field.
9. Field 9—Item Identification Code. A code to identify the specific item on which depot maintenance was or is being performed. Do not use punctuation or special characters such as dashes, slashes, or blank spaces between characters. Start in position 32 and enter left justified up to 13 characters; zero fill unused positions. Sample entries for this field are as follows:
- a. If the item is an aerospace vehicle (aircraft, guided missile, rocket, or probe), then show the mission-design series according to [DoD Directive 4120.15](#), "Designating and Naming Military Aerospace Vehicles," and listed in [DoD 4120.15-L](#), "Model Designation of Military Aerospace Vehicles."

ITEMS	POSITIONS												
	32	33	34	35	36	37	38	39	40	41	42	43	44
Basic (Standard) Mission Aircraft	F	1	6	C	Ø	Ø	Ø	Ø	Ø	Ø	Ø	Ø	Ø
Modified (Special) Mission Aircraft	M	H	5	3	E	Ø	Ø	Ø	Ø	Ø	Ø	Ø	Ø
Special Test (Permanent) Aircraft	N	K	C	1	3	5	E	Ø	Ø	Ø	Ø	Ø	Ø
Basic (Standard) Missile	U	G	M	1	3	3	A	Ø	Ø	Ø	Ø	Ø	Ø
Basic (Standard) Rocket	R	U	R	5	A	Ø	Ø	Ø	Ø	Ø	Ø	Ø	Ø
Basic (Standard) Probe	P	W	N	1	2	A	Ø	Ø	Ø	Ø	Ø	Ø	Ø

NOTE: Ø is numeric; O is alphabetic.

- b. If the item is an aerospace vehicle propulsion engine, equipment or aeronautical support equipment, or photographic item, then show the type designation according to Military Handbook 1812, "Type Designation, Assignment, and Method for Obtaining."

ADDENDUM 3 – DMCS Input File (continued)

ITEMS	POSITIONS												
	32	33	34	35	36	37	38	39	40	41	42	43	44
Turbofan Engine	F	1	1	8	G	E	1	Ø	Ø	A	Ø	Ø	Ø
Turboshaft, Turboprop Engine	T	F	3	4	G	E	1	Ø	Ø	B	Ø	Ø	Ø
Solid Propellant Rocket Motor	S	R	1	1	Ø	A	D	1	A	Ø	Ø	Ø	Ø
Manufacturer's Model Engine	C	F	M	5	6	2	A	2	Ø	Ø	Ø	Ø	Ø
Reconnaissance Camera	K	A	7	A	Ø	Ø	Ø	Ø	Ø	Ø	Ø	Ø	Ø
Crash/Fire Truck	A	S	3	2	P	2	6	Ø	Ø	Ø	Ø	Ø	Ø
Chemical Alarm Unit	A	E	2	3	D	3	Ø	Ø	Ø	Ø	Ø	Ø	Ø

NOTE: Ø is numeric; O is alphabetic.

- c. If the item is a vessel, then show ship type and hull number in the first eight positions and zero fill the remaining five positions.
 - d. If ammunition rework or renovation is performed by a depot-level maintenance activity, then total cost must be recorded by work breakdown structure code H3 (Field 13) only, and this field must be zero filled.
 - e. If items “a” through “d” for Field 9 do not apply, and the job order is for repair of items with the same national stock number (NSN) identification, then enter that NSN, such as 6730001161618, in positions 32 through 44.
 - f. If items “a” through “e” for Field 9 do not apply, enter the letters or numbers used for the identification of the job order. The first 4 digits should identify the Federal Supply Class and, of the remaining nine positions, one must be alphabetic. Zero fill when WPC (Field 14) is “Other Work (T).”
10. Field 10—Item Nomenclature. A 20-digit field describing the specific item on which maintenance was performed, or the support service that was performed. Use common abbreviations if more than 20 positions would otherwise be required. Start in position 45 and leave blank unused positions to the right (left justify).
- a. For aircraft and missiles, use popular names, if assigned, such as Patriot, Cobra, Phoenix, Falcon, Minuteman, and Harrier. If a popular name has not been assigned or is unknown, then use the basic mission of the aircraft or missile, such as Fighter Aircraft, Trainer Aircraft, Cargo Trans Aircraft, Util Helicopter, or Surface Attack Missile. DoD 4120.15-L, “Model Designation of Military Aerospace Vehicles,” includes a current complete listing.

ADDENDUM 3 – DMCS Input File (continued)

- b. For aircraft and rocket engines, use the name of the engine type. Examples are Turbofan Engine, and Rocket Motor.
 - c. For vessels, use the name of the ship. An example is the U.S. Ship (USS) Georgia.
 - d. For conventional ammunition, use “Ammunition.”
 - e. For items with an NSN, use the standard description maintained by DLIS in the Federal Logistics Information System (FLIS).
 - f. For all other items, use the noun and modifiers that adequately describe the item.
11. Field 11—Not Used
12. Field 12—Weapon or Support System Code. A code identifying a specific weapon or support system. Use code 997 if an item cannot be identified to a specific weapon or support system, but can be identified in Field 13 to a major commodity group (such as aircraft, and missiles) and to a category (such as fighters and bombers) within the major commodity group. Use code 998 if identification is possible only to the major commodity group and not to a category. Use code 999 if identification cannot be made to a major commodity group and the Work Breakdown Structure Code L11 is used in Field 13.
13. Field 13—Work Breakdown Structure Code. A code to identify the specific type of weapon or support system to which the item described by the Item Identification Code (Field 9) and Item Nomenclature (Field 10) applies. Use the Work Breakdown Structure Code established in Addendum 4 to this chapter. Use code L11 if the item, service, or investment cannot be identified with a specifically listed Work Breakdown Structure Code and Code 999 is used in Field 12.
14. Field 14—WPC. A code to categorize the type of maintenance work performed on the item identified in Field 9 or the type of maintenance service provided. Use the Codes in Addendum 5. Subcategorize basic alpha codes with a numerical designation by each Component as required for internal management and analysis, budget review, and justification. If the report record is “N” (Technical Assistance) or “T” (Other Work), then Fields 45 and 50 must be zero.
15. Field 15—Customer Code. A code identifying the DoD Program and Department or Agency billed for the maintenance cost (that is, “Sales code”). In Position 85, enter A (Army), N(Navy), F (Air Force), M (Marine Corps), or D (Defense Agency) to designate a DoD customer. Enter Y for other Federal agencies or a Z for all non-Federal customers. Leave position 86 blank.
16. Field 16—Not Used

ADDENDUM 3 – DMCS Input File (continued)

Fields 17–42—Labor Hour and Cost Data. The direct labor hours and summary elements of reported costs are set forth in Addendum 3. The various elements of cost are explained in detail in the basic chapter. Some clarifying notations are included for certain fields. In addition:

- a. “Funded” and “Unfunded” costs are defined in paragraph 140204.
- b. Entries in direct labor hour’s fields must be the actual hours expended rather than standard (or “earned”) hours.

17. Field 17—Direct Civilian Labor—Funded Costs

18. Field 18—Direct Civilian Labor—Funded Hours

19. Field 19—Contract Labor Augmentation of Direct Workforce—Funded Costs. Funded costs for direct labor performed by contract personnel who augment the organic workforce, working side by side with Government personnel, and whose time is recorded in the local time and attendance system. This excludes contract personnel working at a Government depot under a contract for delivery of a specific product such as painting an aircraft for a fixed price per aircraft. Also excluded are contract personnel performing indirect or overhead support functions.

20. Field 20—Contract Labor Augmentation of Direct Workforce—Funded Hours. Funded hours for direct labor performed by contract personnel who augment the organic workforce, working side by side with Government personnel, and whose time is recorded in the local time and attendance system. This excludes contract personnel working at a Government depot under a contract for delivery of a specific product, such as painting an aircraft for a fixed price per aircraft. Also excluded are contract personnel performing indirect or overhead support functions.

21. Field 21—Direct Military Labor—Funded Costs. Since the majority of military personnel at depot maintenance activities are there for reasons other than business requirements, their cost is to be reported based upon civilian equivalent rates that are provided by the DoD Comptroller. These are the rates reflected in DWCF activity budgets.

22. Field 22—Direct Military Labor—Funded Hours

23. Field 23—Direct Military Labor—Unfunded Costs. The labor cost for military personnel not funded by the performing activity. The cost calculation is based upon civilian equivalent rates that are provided by the DoD Comptroller. This Field includes military personnel at a direct-funded activity or military personnel temporarily working under the supervision of a DWCF activity.

ADDENDUM 3 – DMCS Input File (continued)

24. Field 24—Direct Military Labor—Unfunded Hours. The labor hours for military personnel not funded by the performing activity. This Field includes military personnel at a direct-funded activity or military personnel temporarily working under the supervision of a DWCF activity.
25. Field 25—Direct Material—Funded Costs
26. Field 26—Direct Material—Unfunded Costs. Includes material provided at no cost to the performing activity.
27. Field 27—Direct Civilian Labor—Unfunded Costs. The civilian labor cost for Government (Civil Service) employees not funded by the performing activity. This Field excludes contractor personnel used for workforce augmentation.
28. Field 28—Direct Civilian Labor—Unfunded Hours. The civilian labor hours for Government (Civil Service) employees not funded by the performing activity. This Field excludes contractor personnel used for workforce augmentation.
29. Field 29—Not Used
30. Field 30—Other Direct—Funded Costs. For example, contracted services.
31. Field 31—Other Direct—Unfunded Costs. For example, customer provided services.
32. Field 32—Operations Overhead—Funded Costs
33. Field 33—Operations Overhead—Unfunded Costs. For example, military personnel cost for indirect effort.
34. Field 34—General and Administrative—Funded Costs
35. Field 35—General and Administrative—Unfunded Costs

ADDENDUM 3 – DMCS Input File (continued)

36. Field 36—Contract and/or Other Maintenance Activity—Funded and Unfunded Costs.
When code 3 is entered in Field 7, this field must be the total cost of the contract. Report Government-furnished material or services consumed in the production of contract maintenance in Field 37 or Field 41 as applicable. When code 1 or 2 is entered in Field 7, this field must be zero filled.
37. Field 37—Government-Furnished Material—Funded and Unfunded Costs
38. Field 38—Not Used
39. Field 39—Not Used
40. Field 40—Not Used
41. Field 41—Government-Furnished Services—Funded and Unfunded Costs
42. Field 42—Not Used
43. Field 43—Not Used
44. Field 44—Not Used
45. Field 45—Total Production Quantity
 - a. If Field 51 is a “C,” then enter the total quantity of items for which work was completed and reported by this transaction record (including contractor-performed work reported with a “3” in Field 7). This field must be zero filled for WPCs “N” and “T.”
 - b. If Field 51 is a “W,” then enter the total quantity of items covered by job orders that are not yet financially complete at the end of the period covered by the report record. This field must be zero filled for WPCs “N” and “T.”

ADDENDUM 3 – DMCS Input File (continued)

46. Field 46—Report Data Record Identifier. A unique DoD Component alpha and/or numeric code used to identify each individual report transaction record. Use the field to permit the unique identification of each report record. For DoD organic activities, it is recommended that the job order number, or similar production control number, be entered. In all cases, the numbering scheme should:
- Uniquely identify each job order, consolidation of similar job orders, or similar production control number;
 - Support queries into the source of data appearing in DMCS report records; and
 - Support year-to-year tracking by job order number (or similar production control number).
47. Field 47—Not Used
48. Field 48—Not Used
49. Field 49—Not Used
50. Field 50—Shop Flow Days
- If Field 51 is a “C,” then report the average number of days that the items being reported were in process; that is, from the date an item is physically inducted to the date the item is completed, passed its final inspection, and is ready for delivery to the customer. The field may be left blank for contractor-performed work or for work performed at another depot maintenance activity if the number of days in process cannot be determined. Make reasonable efforts to provide accurate data for all applicable records submitted.
 - If Field 51 is a “W,” then report the average number of days that each item was in process; that is, since the date of physical induction.
51. Field 51—Work Status Code. A single-digit alpha code that indicates if the transaction being reported has been financially completed, or is still in process at the time of the report.
- Enter a “C” if the reported transaction is financially complete.
 - Enter a “W” if the transaction being reported is not financially complete as of the report date.

ADDENDUM 5 - Work Performance Category (WPC) Codes

ADDENDUM 5
WPC CODES
(Codes To Be Used in Field 14 [of](#) Addendum 3)

Code A—Overhaul. Returning an unserviceable item of equipment to serviceable condition by restoring most or all internal tolerances to “like new” specification. Overhaul is synonymous with “rework” and “rebuild.”

Code B—Progressive Maintenance. A predetermined amount of work that represents a partial overhaul under a program that permits the complete overhaul by means of two or more scheduled work efforts in the maintenance process. Progressive maintenance is synonymous with “cycle maintenance,” “restricted availability,” “preventive servicing,” “recondition,” and “phased” or “incremental maintenance.”

Code C—Conversion. The alteration of the basic characteristics of an item to such an extent as to change its mission, performance, or capability.

Code D—Activation. The process of returning an item from preservation, storage, or inactive status to an active, serviceable status by means of removal from storage and containers, stripping, inspection, servicing, testing, repair, replacement of components, assemblies, or subassemblies as required.

Code E—Inactivation. The servicing and preservation of an item prior to placement in storage or an inactive status.

Code F—Renovation. The proof and test, evaluation, inspection, and rework of ammunition or ordnance items as required for retaining their desired capability.

Code G—Analytical Inspection. The disassembly, inspection, data gathering, and engineering analysis of an equipment item to compare actual wear characteristics and failure patterns with predicted values. Data collected during analytical inspection is used to validate the adequacy of maintenance planning and execution. Analytical rework is synonymous with the “age exploration analysis” phase of reliability-centered maintenance.

Code H—Modification. A physical change made to weapon systems or equipment such that one or more measurable characteristic is altered. Modifications are often made to improve equipment performance, but may also be designed to increase reliability, improve supportability, or enhance safety. Synonymous with “upgrade.”

Code I—Repair. Returning an unserviceable item of equipment to serviceable condition by restoring failed structures or components to acceptable standards. “Acceptable” may mean “restore to ‘like new’ specification,” or it may be less stringent, depending upon the demands of the equipment user.

ADDENDUM 5 - Work Performance Category (WPC) Codes (continued)

Code J—Inspection. The examination of an item to reveal information about its physical condition. Inspection results are typically compared with specifications, standards, or the results of other inspections to determine whether the item under inspection is acceptable for use. Inspections are also an important part of engineering investigations that seek to establish cause-and-effect relationships between observed characteristics and external influences.

Code K—Manufacture. The fabrication of a component or end item from raw materials or components. Can include engineering, design, test, and production. Does not include manufacturing that takes place as a part of the normal repair or overhaul processes.

Code L—Reclamation. The authorized processing of end items, assemblies, or subassemblies to obtain parts or components retained in operating materials and supplies prior to taking disposal action on the end item, assembly, or subassembly. Includes demilitarization actions on items prior to disposal when the demilitarization is incidental to the reclamation.

Code M—Storage. The inspection, preservation, periodic re-preservation, and maintenance in storage status of weapons, subsystems, and components in the supply system.

Code N—Technical Assistance. The use of qualified depot maintenance personnel to provide technical information, instructions, or guidance, or to perform specific work requiring special skills for operational activities or other maintenance organizations. Includes all demilitarization other than that incidental to reclamation when reporting is required.

Codes O, P, Q, R, and S—Not Used

Code T—Other Work. Used to complete the reporting of all maintenance workforce costs incurred. Any costs incurred at a depot maintenance activity funded by the Working Capital Fund that do not meet the criteria for reporting under the other WPCs must be reported in this category. This includes any maintenance support costs funded by a DWCF activity. Maintenance support includes centralized programming and planning support, technical and engineering services, preparation of maintenance publications and engineering data, and technical and administrative training.

Code U – Software Maintenance. Those software activities carried out following initial operating capability to include all events that maintain operational capability, correct faults, improve performance, and adapt the software to environmental changes or new requirements. Software maintenance must be reported regardless of location or funding source. For software or related hardware modifications/upgrades, includes the labor associated with the application of the modification.

Code V—Calibration. The comparison of a measurement system or device of unknown accuracy to a system or device of known and greater accuracy. The system or device of greater accuracy is a measurement standard.

ADDENDUM 5 - Work Performance Category (WPC) Codes (continued)

Code W—CLS, ICS, PBL, and Similar Contracts. The CLS, ICS, PBL, and similar contracts provide commercial support for weapon systems and equipment that do not have an organic support base established. Contractors provide total logistics support, including depot maintenance for the equipment, end item, and components. Only those maintenance functions that would be classified as depot-level, if the equipment were maintained organically, will be included.

Codes X, Y, and Z—Not Used

**VOLUME 6A, CHAPTER 15: “DEFENSE WORKING CAPITAL FUND
ACCOUNTING REPORT [ACCOUNTING REPORT (MONTHLY) 1307]”**

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [bold, italic, blue, and underlined font](#).

The previous version dated [October 2011](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Reformatted chapter for clarity and updated hyperlinks in accordance with current administrative guidance.	Revision
All	Revised Treasury Financial Management Service (FMS) references with the new title. On October 7, 2012, the FMS and the Bureau of the Public Debt merged to become the Bureau of the Fiscal Service (Fiscal Service).	Revision
All	Revised listing of United States Standard General Ledger account codes used in Defense Working Capital Fund (DWCF) reporting to align with the Fiscal Service six-digit format.	Revision
All	Incorporated requirements for the Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS).	Revision
All	Revised naming conventions, section headings, and line descriptions used in DWCF financial reporting to better align with DWCF reporting structure.	Revision
All	Deleted information redundant to that provided in the DoD Standard Chart of Accounts.	Deletion
1.2 (150102)	Included clarifying language on the reporting requirements for working capital funds mandated within Title 10, United States Code, section 2208.	Addition
2.1.3. (150201.C)	Added information on the Standard Financial Information Structure used for financial reporting.	Addition
2.1.4. (150201.D)	Clarified the purpose of the DWCF Accounting Report [Accounting Report (Monthly) 1307] (AR(M) 1307) and added a hyperlink to the DoD United States Standard General Ledger Transaction Library.	Revision

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
150201.D (deleted)	Deleted paragraph due to outdated language.	Deletion
2.1.5. (150201.E)	Clarified the relationship between the DWCF AR(M) 1307 and the Standard Form 133, Report on Budget Execution and Budgetary Resources, and provided a source reference for use in verifying the integrity of reported data.	Revision
150201.F (deleted)	Incorporated paragraph into 150202.B.3 for improved alignment of information.	Revision
2.2.2.3. (150202.B.3)	Clarified report descriptions and requirements for the seven parts of the Statement of Operations.	Revision
150202.C (deleted)	Deleted paragraph as being redundant to paragraph 150202.A.	Deletion
2.3.4. (150203.D)	Clarified guidance on allocation and adjustment to transaction amounts.	Revision
2.3.9. (150203.I)	Clarified report format and submission requirements under GTAS.	Revision
3.3.10. (150303.J)	Updated description of cash on hand and other monetary assets to align with the guidance contained in Office of Management and Budget (OMB) Circular A-136, "Financial Reporting Requirements," dated June 28, 2019.	Revision
3.3.17. (150303.Q)	Clarified language on the DoD inventory valuation method.	Revision
3.3.22. (150303.V)	Clarified the process used to report DWCF work-in-process balances.	Revision
3.3.24.2. (150303.X.2)	Updated reporting instructions for real property balances as explained in Volume 4, Chapter 24.	Revision
3.3.35. (150303.AI)	Updated description of liabilities covered by budgetary resources to align with the guidance contained in OMB Circular A-136, dated June 28, 2019.	Revision
4.3.26. (150403.Z)	Clarified guidance for transfers between Working Capital Funds and the "Foreign Currency Fluctuations, Defense" and "Operation and Maintenance" appropriations, as outlined in Section 8008 of Public Law 113-6.	Revision
7.3.1., 7.3.11. (150703.A, 150703.K)	Revised inventory and related property reporting requirements used in the DWCF to align with current DoD policy.	Revision
7.3.19. (150703.S)	Updated descriptions and requirements for reporting losses or gains realized on disposal of inventory.	Revision
10.3 (151003), Form 15-8	Revised the reporting requirements contained in Part VI, "Capital Program," of the Statement of Operations.	Revision

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
11.4, (151104), Form 15-9	Updated the reporting format for Part VII, “Inventory Management Report - Supply Management Activity,” of the Statement of Operations to distinguish inventory valuation methodologies.	Revision
Table 15-1	Updated table with current DWCF financial reporting activities.	Revision

CHAPTER 15

DEFENSE WORKING CAPITAL FUND ACCOUNTING REPORT
[ACCOUNTING REPORT (MONTHLY) 1307]

1.0 GENERAL (1501)

1.1 Purpose (150101)

This chapter [prescribes](#) the reporting requirements and [policies to follow when preparing](#) the Defense Working Capital Fund (DWCF) Accounting Report [Accounting Report (Monthly) 1307] (AR(M) 1307) [and is applicable to all DoD Working Capital Funds](#).

*1.2 Authoritative Guidance (150102)

The chapter addresses the basic internal reporting requirements identified in Title 10, United States Code, [section 2208](#) (10 U.S.C. § 2208), which requires the Secretary of Defense, with respect to the working capital funds of each Defense Agency, and the Secretary of each military department, with respect to the working capital funds of the military department, to provide for separate accounting, reporting, and auditing of funds and activities managed through the working capital funds.

2.0 REPORTING (1502)

2.1 Report Content (150201)

2.1.1. The DWCF AR(M) 1307 consists of three principal [internal accounting](#) statements.

2.1.1.1. [Statement of Financial Position](#). [The Statement of Financial Position](#) discloses the reporting entity's assets, liabilities, and net position.

2.1.1.2. [Statement of Cash Flow](#). [The Statement of Cash Flow](#) discloses the reporting entity's [cash flows from operations, adjustments, and appropriations](#) and cash transfers with an explanation of the changes in cash [or cash equivalents](#) for the reporting period.

2.1.1.3. [Statement of Operations](#). [The Statement of Operations](#) discloses the results of the reporting entity's operations for the reporting period, including changes in the entity's net position from the end of the prior reporting period.

2.1.2. Volume 1, Chapter 2 contains the [Federal Accounting Standards Advisory Board](#) hierarchy of accounting [principles and standards used to prepare](#) the DWCF AR(M) 1307.

* 2.1.3. Volume 1, Chapter 4 contains guidance on the [Standard Financial Information Structure](#) that supports requirements for budgeting, financial accounting, cost/performance, and external reporting needs across the DoD.

* 2.1.4. The DWCF AR(M) 1307 is the official internal management report document for financial accounting and is a source document for the annual financial statements. The United States Standard General Ledger (USSGL), on which the report is based, is updated at least annually and posted by the Bureau of the Fiscal Service (Fiscal Service). The DoD Standard Chart of Accounts provides normal account balance information. The DoD USSGL Transaction Library provides detailed general ledger transactions and posting business rules for accounting standardization that supports the preparation of financial statements.

* 2.1.5. The AR(M) 1307 is prepared based on the activity's proprietary trial balances. An exception is the inclusion of obligation data in some items in Part VI, "Capital Program," and Part VII, "Inventory Management Report - Supply Management Activity," of the Statement of Operations.

2.1.5.1. The AR(M) 1307 provides accounting and inventory data for financial reporting and identifies the proprietary position of DWCF activities. The AR(M) 1307 complements information provided in the Standard Form (SF) 133, Report on Budget Execution and Budgetary Resources, which is prepared by using the activity's budgetary trial balances. Although the AR(M) 1307 and SF 133 run independently of one another, they should reconcile at the summary level. Refer to Volume 3, Chapter 19 for additional guidance.

2.1.5.2. Use standard reconciliations, such as budgetary to proprietary relationships described in Volume 1, Chapter 7, to verify the integrity of reported data.

2.2 Reporting Requirement (150202)

2.2.1. Applicability. Table 15-1 contains a listing of DWCF financial reporting activities. Within Table 15-1, an asterisk (*) symbol indicates the lowest level for which individual AR(M) 1307 reports are required. DWCF activities may generate the AR(M) 1307 at different levels in order to manage their business effectively. Table 15-1 identifies the levels for which consolidated AR(M) 1307 reports are required with a pound (#) symbol. Each DoD Component DWCF activity must produce consolidated reports.

2.2.2. Report Formats. Use the financial report formats provided in Forms 15-1 through 15-8 to prepare reports. Reports produced by Automated Data Processing (ADP) equipment may be substituted for the formats illustrated. Submit the following reports:

2.2.2.1. Statement of Financial Position;

2.2.2.2. Statement of Cash Flow; and

* 2.2.2.3. Statement of Operations;

2.2.2.3.1. Part I - Statement of Operations identifies the cumulative year-to-date Net Operating Results (NOR) and the Recoverable NOR. Recoverable NOR is the amount that can be recovered in the activity's rates;

2.2.2.3.2. Part II - Changes in Net Position identifies the arithmetic difference between the total assets and total liabilities recognized on a component entity's balance sheet;

2.2.2.3.3. Part III - Cost of Goods Sold identifies the value of inventory sold or services provided. It does not provide a value for total obligations incurred;

2.2.2.3.4. Part IV - Expenses identifies detailed expense information by category. Not all expenses represent claims against budgetary resources;

2.2.2.3.5. Part V - Recoverable Operating Results reconciles NOR to the operating results that may be used for rate-setting purposes;

2.2.2.3.6. Part VI - Capital Program identifies the approved program, obligations, disbursements, and collections for the Capital Program by fiscal year (FY); and

2.2.2.3.7. Part VII - Inventory Management Report - Supply Management Activity reports inventory management data for the Supply Management and Commissary Resale DWCF activities.

2.2.3. Frequency of Reports. Unless otherwise specified by the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), prepare and submit the AR(M) 1307 reports monthly. Submit regular reports in accordance with due dates established by the Defense Finance and Accounting Service (DFAS) and consistent with the requirements of OUSD(C).

2.2.4. Distribution.

2.2.4.1. Consolidated DoD Component and DWCF Activity Reports. Submit a copy of consolidated DWCF activity reports to the:

2.2.4.1.1. Director for Operations, Office of the Deputy Comptroller (Program/Budget (P/B)), OUSD(C);

2.2.4.1.2. Offices of the Assistant Secretary of the Army, Navy, and Air Force (Financial Management and Comptroller); the Defense Commissary Agency (DeCA) Comptroller; and Comptrollers of Other Defense Activities (e.g. the Defense Logistics Agency (DLA) Comptroller); and

2.2.4.1.3. Management Command responsible for the oversight of the DWCF activity, if requested by a DoD Component.

2.2.4.2. Activity Level Reports. Submit a copy of DWCF activity level reports to the:

2.2.4.2.1. Offices of the Assistant Secretary of the Army, Navy, and Air Force (Financial Management and Comptroller); the DeCA Comptroller; and Comptrollers of Other Defense Activities if requested by a DoD Component;

2.2.4.2.2. Management Command responsible for the oversight of the DWCF activity, if requested by a DoD Component; and

2.2.4.2.3. DWCF activity, disclosing any adjustments made to the financial data submitted by that activity.

2.3 Detailed Instructions (150203)

2.3.1. The instructions to the AR(M) 1307 identify the specific data, and appropriate source of that data, for amounts entered into each line of each report.

2.3.2. Report amounts in thousands of dollars (\$000) for all parts of the report and related footnotes (i.e., \$1,000 = \$1; \$10,000 = \$10; and \$100,000 = \$100).

2.3.3. Include footnotes with each report for lines requiring identification of the nature of specific extraordinary amounts or abnormal balances.

* 2.3.4. Allocate or assign adjustments for amounts otherwise accounted for or reported at the DoD Component level to the applicable DWCF activities. Similarly, allocate or assign adjustments for amounts otherwise submitted for or reported at the DWCF activity level to the applicable individual activities. DFAS will make such allocations in accordance with the direction received from the DoD Components. Where reasonable, allocate all such adjustments to individual activities. Show adjustments made at the DWCF activity level separately as a DWCF activity adjustment. Recognize adjustments at the DWCF activity level (DWCF activity adjustment) until the transactions can be allocated to the individual activities. All DWCF activity adjustments must be zero at year-end. Enter adjustments allocated to the individual activity level into the activity's installation level accounting records. Record the adjustments in accordance with the guidance contained in Chapter 2.

2.3.5. Do not retroactively implement policies that could have a significant adverse impact on the accuracy and integrity of financial reports without a clear offsetting benefit, or unless directed by an external authority such as Congress.

2.3.6. Base the report submissions on current FY data. All references to "year" apply to FY.

2.3.7. Entities are only required to report lines on the AR(M) 1307 in which there is current activity or activity from a prior period.

2.3.8. Use the USSGL accounts cited as general guidance to populate each line. DoD requires the use of the DoD Standard Reporting Chart of Accounts in all accounting systems for all appropriations and funds. Detailed account mapping is included in the Defense Departmental Reporting System (DDRS). Volume 1, Chapter 7 prescribes the requirements of the USSGL.

* 2.3.9. Base the report submissions on the bulk file format and attributes outlined in the Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS). The GTAS format includes both budgetary and proprietary USSGL accounts, however, the AR(M) 1307 is based upon proprietary USSGL accounts with few exceptions.

3.0 FORMAT OF THE STATEMENT OF FINANCIAL POSITION (1503) (FORM 15-1)

Form 15-1: Statement of Financial Position

DEFENSE WORKING CAPITAL FUND STATEMENT OF FINANCIAL POSITION (DoD COMPONENT/DWCF ACTIVITY) MONTH ENDING _____, 20XX (\$ in thousands)

15. Total Liabilities and Net Position			XXX

3.1 General (150301)

The Statement of Financial Position, [Form 15-1](#), discloses the reporting entity's assets, liabilities, and net position.

3.2 Heading (150302)

Complete the heading of the form to indicate: the reporting DoD Component, the reporting DWCF activity, the reporting period (month), and the calendar year.

3.3 Line Item Instructions (150303)

Instructions for the content of each line item are as follows:

3.3.1. Section Heading – ASSETS. The “Assets” section identifies items owned by the Federal Government which have probable (more likely than not) economic benefits that can be obtained or controlled by a Federal Government entity. Fiduciary activities that fall under the guidance of Statement of Federal Financial Accounting Standards ([SFFAS](#)) [31](#), “Accounting for Fiduciary Activities,” are not part of the net position.

3.3.2. Line 1 – Fund Balance with Treasury. Report the aggregate amount of the entity's accounts with the Department of the Treasury (Treasury) for which the entity has the authority to make expenditures and pay liabilities. Establish accounts to identify disbursements and collections applicable to the operating and capital programs to comply with [10 U.S.C. § 2208](#), which requires DoD to establish a capital asset subaccount. Report the balance by the specified applicable categories.

3.3.3. Line 1.a – Funds Collected – Operating Program. Report the portion of the balance of the following account as it relates to funds collected for the operating program during the current FY:

101000 Fund Balance with Treasury (Funds Collected – Operating Program)

3.3.4. Line 1.b – Funds Collected - Capital Program. Report the portion of the balance of the following account as it relates to funds collected for the capital program during the current FY. Base the amount of collections allocated from the operating program to the capital program on the activity's DWCF-funded depreciation expenses and capital surcharge. In all cases, at the end of the FY, the amount collected must be sufficient to ensure the ending Fund Balance with Treasury-Capital Program is not negative. See [Volume 11B, Chapter 3](#) for additional guidance on transfers of budget authority. Line 1.b will agree with the collections reported in Column 11, “Collections - This Fiscal Year,” of Part VI, “Capital Program,” of the Statement of Operations.

101000 Fund Balance with Treasury (Funds Collected – Capital Program)

3.3.5. Line 1.c – Funds Disbursed - Operating Program. Report the portion of the balance of the following account as it relates to funds disbursed for the operating program during the current FY:

101000 Fund Balance with Treasury (Funds Disbursed – Operating Program)

3.3.6. Line 1.d – Funds Disbursed – Capital Program. Report the portion of the balance of the following account as it relates to funds disbursed for the capital program this FY. Line 1.d will agree with the disbursements reported in Column 8, “Disbursements - This Fiscal Year,” of Part VI, “Capital Program,” of the Statement of Operations.

101000 Fund Balance with Treasury (Funds Disbursed – Capital Program)

3.3.7. Line 1.e – Funds Transferred In (Out). Report the portion of the balance of the following account as it relates to funds transferred in or out during the current FY:

101000 Fund Balance with Treasury (Current Year Transfers)

3.3.8. Line 1.f – Funds with Treasury – Operating Program. Report the portion of the balance of the following accounts as they relate to funds held by the Treasury for the operating program. Report the beginning FY balance of the operating program account, which is the net of prior year funds collected and disbursed related to operating programs.

101000 Fund Balance with Treasury (Funds with Treasury – Operating Program)

109000 Fund Balance with Treasury While Awaiting a Warrant (If applicable, under a continuing resolution authority)

3.3.9. Line 1.g – Funds with Treasury – Capital Program. Report the portion of the balance of the following account as it relates to funds held by the Treasury for the capital program. Report the beginning FY balance of the capital program account, which is the net of prior year funds collected and disbursed related to capital programs.

101000 Fund Balance with Treasury (Funds with Treasury – Capital Program)

* 3.3.10. Line 2 – Cash on Hand and Other Monetary Assets. Cash on hand and other monetary assets consists of: (a) coins, paper currency, and readily negotiable instruments, such as money orders, checks, and bank drafts on hand or in transit for deposit; (b) amounts on demand deposit with banks or other financial institutions including nonconfirmed collections and disbursements; (c) investments held outside of Treasury; and (d) foreign currencies, which, for accounting purposes, will be translated into U.S. dollars at the exchange rate on the financial statement date. Report the balance of the following accounts:

111000 Undeposited Collections

113000	Funds Held Outside of Treasury – Budgetary
119000	Other Cash
119500	Other Monetary Assets
120000	Foreign Currency

3.3.11. Line 3 – Accounts Receivable, Net. Accounts receivable are amounts due from others when the right to receive funds accrues [as a result of](#) performance of services, delivery of goods, or court-ordered assessments. [Line 3](#) is a summary line for Lines 3.a, “Accounts Receivable, Intragovernmental,” through 3.d, “Accounts Receivable, Non-Federal, Undistributed.”

3.3.12. Line 3.a – Accounts Receivable, Intragovernmental. Report the [portion of the balance of](#) the following accounts [due](#) from other Federal Agencies:

131000	Accounts Receivable (except as reported on Line 3.b)
131900	Allowance for Loss on Accounts Receivable
134000	Interest Receivable – Not Otherwise Classified
136000	Penalties and Fines Receivable – Not Otherwise Classified
137000	Administrative Fees Receivable – Not Otherwise Classified

3.3.13. Line 3.b – Accounts Receivable, Intragovernmental, Undistributed. Report [the portion of the balance of](#) the following account [as it relates](#) to accounts receivable from other Federal Agencies recorded for undistributed collections. Undistributed collections represent the difference between the amount of collections reported to DFAS by the Treasury finance network and the amount of collections recorded by operating level activities.

131000	Accounts Receivable (except as reported on Line 3.a)
--------	--

3.3.14. Line 3.c – Accounts Receivable, Non-Federal. Report the [portion of the balance of](#) the following accounts [as they](#) relate to accounts receivable from [non-federal](#) agencies [and entities](#):

131000	Accounts Receivable (except as reported on Line 3.d)
131900	Allowance for Loss on Accounts Receivable
134000	Interest Receivable – Not Otherwise Classified
134700	Allowance for Loss on Interest Receivable – Not Otherwise Classified
136000	Penalties and Fines Receivable – Not Otherwise Classified
136700	Allowance for Loss on Penalties and Fines Receivable – Not Otherwise Classified
137000	Administrative Fees Receivable – Not Otherwise Classified
137700	Allowance for Loss on Administrative Fees Receivable – Not Otherwise Classified

3.3.15. Line 3.d – Accounts Receivable, Non-Federal, Undistributed. Report the [portion of the balance of](#) the following account [as it relates to](#) undistributed accounts receivable [balances](#)

from non-federal agencies and entities. Undistributed collections represent the difference between the amount of collections reported to DFAS by the Treasury finance network and the amount of collections recorded by operating level activities.

131000 Accounts Receivable (except as reported on Line 3.c)

3.3.16. Line 4 – Advances Paid and Prepayments. The amount reported on this line will agree with the amount reported on Line 5, “Advances and Prepayments,” of the “Supplemental Budget Execution Information Report,” which is available in the Budgetary module of DDRS. This report provides additional reporting line items to amounts reported on the SF 133. Report the balance of the following account:

141000 Advances and Prepayments

* 3.3.17. Line 5 – Inventories, Net. Inventory is tangible personal property that is: (a) held for sale; (b) in the process of production for sale; (c) consumed in the production of goods for sale or in the provision of services for a fee; (d) held for repair; or (e) excess, obsolete, and unserviceable.

3.3.17.1. SFFAS 3, “Accounting for Inventory and Related Property,” sets the accounting principles under which Federal entities account for and report inventory and related property balances.

3.3.17.2. Although Moving Average Cost (MAC) is the official DoD inventory valuation method, the Latest Acquisition Cost (LAC) valuation method is available to DeCA only. See Volume 4, Chapter 4 for additional guidance on inventory and related property. Line 5 is a summary line for Lines 5.a, “Inventory Items,” and 5.b, “Allowance for Gains (or Losses) on Inventories.”

3.3.18. Line 5.a – Inventory Items. Line 5.a is a summary line for Lines 5.a.(1), “Latest Acquisition Cost (LAC),” and 5.a.(2), “Moving Average Cost (MAC).”

3.3.19. Line 5.a.(1) – Latest Acquisition Cost (LAC). The amount reported on this line will equal Line 2.i, “Minus: Ending Inventory – LAC,” of Part III, “Cost of Goods Sold,” of the Statement of Operations. Report the amount of inventory maintained at LAC in the following accounts:

152100	Inventory Purchased for Resale
152200	Inventory Held in Reserve for Future Sale
152300	Inventory Held for Repair
152400	Inventory – Excess, Obsolete, and Unserviceable
152500	Inventory – Raw Materials
152700	Inventory – Finished Goods

3.3.20. Line 5.a.(2) – Moving Average Cost (MAC). Report the amount of inventory maintained at MAC in the following accounts:

152100	Inventory Purchased for Resale
152200	Inventory Held in Reserve for Future Sale
152300	Inventory Held for Repair
152400	Inventory – Excess, Obsolete, and Unserviceable
152500	Inventory – Raw Materials
152700	Inventory – Finished Goods

3.3.21. Line 5.b – Allowance for Gains (or Losses) on Inventories. Report the portion of the balance in the following account as it relates to the estimated cost to repair damage, and to gains (or losses), on inventories. Report a credit balance as a negative amount (deduct) and debit balance as a positive amount (add).

152900	Inventory – Allowance
--------	-----------------------

* 3.3.22. Line 6 – Work-in-Process. DWCF work-in-process is the amount of direct, indirect, and general and administrative costs assigned or otherwise properly allocated to a final cost objective (generally, a job order), or the amount of incremental billings for Supply Management manufactured inventory. Prior to completion of final cost objects, either in their entirety or as discrete elements, allocate all costs to work-in-process.

3.3.22.1. When recognizing revenue on a percentage-of-completion basis, record the portion of work-in-process associated with the recognized revenue as cost of goods sold. Line 6 applies to DWCF activities that accumulate costs to a final cost objective (generally, a job order), such as those within the Depot Maintenance, Research and Development (R&D), and Base Support DWCF activities. Line 6 will agree with the amount reported on Line 1.g, “Minus: Ending Work-In-Process,” of Part III, “Cost of Goods Sold,” of the Statement of Operations.

3.3.22.2. Non-supply reporting entities are to bill for work-in-process balances before the reporting cycle closes, and therefore, work-in-process is expected to be zero for these activities on the AR(M) 1307. The work-in-process for supply accounts represent progress payments incurred for manufactured items. Provide explanations in the footnotes when non-supply work-in-process is not zero. Timely billing helps ensure resources are available to cover DWCF costs. See Volume 4, Chapter 16 and SFFAS 7, “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting,” for additional guidance relating to revenue recognition. Report the portion of the balance in the following accounts as they relate to work-in-process:

152600	Inventory – Work-in-Process
152900	Inventory – Allowance

3.3.23. Line 7 – Operating Materials and Supplies, Net. Operating materials and supplies are asset accounts consisting of tangible personal property expensed when consumed in the course of normal operations. See Volume 4, Chapter 4 for guidance related to capitalizing or expensing operating materials and supplies balances. Line 7 can be applicable to any DWCF activity. Report the balance of the following accounts:

151100	Operating Materials and Supplies Held for Use
151200	Operating Materials and Supplies Held in Reserve for Future Use
151300	Operating Materials and Supplies – Excess, Obsolete, and Unserviceable
151400	Operating Materials and Supplies – Held for Repair
151600	Operating Materials and Supplies – In Development
151900	Operating Materials and Supplies – Allowance

3.3.24. Line 8 – Property, Plant, and Equipment, Net. Property, plant, and equipment (PP&E) are tangible assets that: (1) have an estimated useful life of two or more years; (2) are not intended for sale in the ordinary course of business; and (3) are intended to be used or available for use by the entity.

3.3.24.1. SFFAS 6, “Accounting for Property, Plant, and Equipment,” outlines accounting standards for Federally owned PP&E. Line 8 is the cost basis, net of depreciation, of the activity’s real and personal property, i.e., land, structures and facilities, construction-in-progress, purchased and self-developed software, equipment, and related improvements that have been capitalized.

* 3.3.24.2. Report DoD real property as follows:

3.3.24.2.1. Construction-In-Progress. The funding entity accumulates and reports construction-in-progress for real property (including improvements) in the construction-in-progress accounts until the asset or improvement is placed in service. When the asset or improvement is placed in service, the funding entity removes the construction-in-progress balance and recognizes the asset. The funding entity then transfers the asset or improvement to the host entity, if the host entity is different than the funding entity.

3.3.24.2.2. In-Service Assets. Report real property on the financial statements of the Military Department or Washington Headquarters Services on whose installation a real property asset is located. A Military Department working capital fund can report real property on its financial statements if it has jurisdiction over an installation.

3.3.24.2.3. Land. Reporting responsibilities for land follow the same rules as other real property. However, reporting entities without an unmodified audit opinion value existing land at zero dollars and expense future land acquisitions.

3.3.24.2.4. Capitalized Improvements. The funding entity accumulates and reports the costs of capitalized improvements until the improvement to an asset is placed in service, at which time it will be transferred to the entity responsible for reporting the real property base

asset. Only Military Departments and Washington Headquarters Services have financial reporting responsibility for real property and completed improvements. See Volume 4, Chapter 24 for additional information. Line 8 is a summary line for Lines 8.a, “Structures, Facilities and Leasehold Improvements, Net,” through 8.g, “Other Property, Net.”

3.3.25. Line 8.a – Structures, Facilities and Leasehold Improvements, Net. Report the balance of the following accounts:

171200	Improvements to Land
171900	Accumulated Depreciation on Improvements to Land
173000	Buildings, Improvements, and Renovations
173900	Accumulated Depreciation on Buildings, Improvements, and Renovations
174000	Other Structures and Facilities
174900	Accumulated Depreciation on Other Structures and Facilities
182000	Leasehold Improvements
182900	Accumulated Amortization on Leasehold Improvements

3.3.26. Line 8.b – Construction-in-Progress. Report the balance of the following account:

172000	Construction-in-Progress
--------	--------------------------

3.3.27. Line 8.c – Equipment, Net. Report the balance of the following accounts:

175000	Equipment
175900	Accumulated Depreciation on Equipment

3.3.28. Line 8.d – ADP Software, Net. Report the balance of the following accounts:

183000	Internal-Use Software
183900	Accumulated Amortization on Internal-Use Software

3.3.29. Line 8.e – Software Development in Progress. Report the balance of the following account:

183200	Internal-Use Software in Development
--------	--------------------------------------

3.3.30. Line 8.f – Assets Under Capital Lease, Net. Report the balance of the following accounts:

181000	Assets Under Capital Lease
181900	Accumulated Depreciation on Assets Under Capital Lease

3.3.31. Line 8.g – Other Property, Net. Report the balance of the following accounts:

184000	Other Natural Resources
184900	Allowance for Depletion
189000	Other General Property, Plant, and Equipment
189900	Accumulated Depreciation on Other Property, Plant, and Equipment

3.3.32. Line 9 – Other Assets, Net. Report the balance of the following accounts:

135000	Loans Receivable - Not Otherwise Defined
159100	Other Related Property
159900	Other Related Property – Allowance
199000	Other Assets
199500	General Property, Plant, and Equipment Permanently Removed but Not Yet Disposed

3.3.33. Line 10 – Total Assets. **Line 10 is a summary line for Lines 1, “Fund Balance with Treasury,” through 9, “Other Assets, Net.”**

3.3.34. Section Heading – LIABILITIES. The “Liabilities” section identifies obligations of the Federal Government to provide assets or services to another entity at a determinable date, when a specified event occurs, or on demand.

* 3.3.35. Line 11 – Liabilities Covered by Budgetary Resources. Report liabilities covered by available budgetary resources **on this line.** Budgetary resources are required to cover all obligations whether considered a liability or not.

3.3.35.1. Available budgetary resources include: (1) new budget authority; (2) unobligated balances of budgetary resources at the beginning of the year or net transfers of prior year balances during the year; (3) spending authority from offsetting collections (credited to an appropriation or fund account); and (4) recoveries of unexpired budget authority through downward adjustments of prior year obligations.

3.3.35.2. Consider liabilities covered by budgetary resources if they are to be funded by permanent indefinite appropriations, which have been enacted and signed into law and are available for use as of the reporting date. The Office of Management and Budget (OMB) may apportion the resources without further action by the Congress or without a contingency first having to be met. Line 11 is a summary line for Lines 11.a, “Accounts Payable, Net,” through 11.h, “Other Liabilities.”

3.3.36. Line 11.a – Accounts Payable, Net. Report the amounts owed by a DWCF activity for goods and services from, progress in contract performance made by, and rents due to DoD and other Federal and non-federal entities. See Volume 10, Chapter 10 and the Federal Acquisition Regulation (FAR) [part 32](#), “Contract Financing,” for additional guidance relating to contract financing payments. Line 11.a is a summary line for Lines 11.a.(1), “Accounts Payable, Intragovernmental,” through 11.a.(4), “Accounts Payable, Non-Federal, Undistributed.”

3.3.37. Line 11.a.(1) – Accounts Payable, Intragovernmental. Report the portion of the balance of the following accounts as they relate to accounts payables owed to Federal entities:

211000	Accounts Payable (except as reported on Line 11.a.(2))
212000	Disbursements in Transit
214000	Accrued Interest Payable – Not Otherwise Classified

3.3.38. Line 11.a.(2) – Accounts Payable, Intragovernmental, Undistributed. Report the amount of accounts payable in the following account that is owed to Federal entities recorded for undistributed disbursements. Undistributed disbursements represent the difference between the amount of disbursements reported by DFAS to the Treasury finance network and the amount of disbursements recorded by operating level activities.

211000	Accounts Payable (except as reported on Line 11.a.(1))
--------	--

3.3.39. Line 11.a.(3) – Accounts Payable, Non-Federal. Report the portion of the balance of the following accounts as they relate to accounts payable owed to non-federal entities:

211000	Accounts Payable (except as reported on Line 11.a.(4))
212000	Disbursements in Transit
213000	Contract Holdbacks
214000	Accrued Interest Payable – Not Otherwise Classified

3.3.40. Line 11.a.(4) – Accounts Payable, Non-Federal, Undistributed. Report the amount of accounts payable in the following account that is owed to non-federal entities recorded for undistributed disbursements. Undistributed disbursements represent the difference between the amount of disbursements reported to DFAS by the Treasury finance network and the amount of disbursements recorded by operating level activities.

211000	Accounts Payable (except as reported on Line 11.a.(3))
--------	--

3.3.41. Line 11.b – Accrued Payroll and Benefits. Report the amount of payroll and benefits payable. Line 11.b is a summary line for Lines 11.b.(1), “Salaries and Wages,” through 11.b.(3), “Severance Pay, Separation Allowance, and Other Payroll Liabilities.”

3.3.42. Line 11.b.(1) – Salaries and Wages. Report the portion of the balance of the following accounts as [they](#) relate to salaries and wages:

221000	Accrued Funded Payroll and Leave
221100	Withholdings Payable
221300	Employer Contributions and Payroll Taxes Payable

3.3.43. Line 11.b.(2) – Accrued Annual Leave. DWCF activities [must](#) fully fund annual leave in their rates. The balance [reported on this line](#) represents the value of employee annual leave not yet taken. [This amount is exclusive of the amount reported on Line 11.b.\(1\).](#) Report the portion of [the balance of](#) the following account [as it relates to](#) accrued annual leave:

221000	Accrued Funded Payroll and Leave
--------	----------------------------------

3.3.44. Line 11.b.(3) – Severance Pay, Separation Allowance, and Other Payroll Liabilities. Report the portion of the balance of the following account as it relates to severance pay, separation allowances, and other payroll liabilities:

221500	Other Post-Employment Benefits Due and Payable
--------	--

3.3.45. Line 11.c – Progress Billings. [The amount reported represents billings received in advance of performance for which revenue has not been earned.](#) Report the portion of the balance of the following account as it relates to progress billings:

231000	Liability for Advances and Prepayments
--------	--

3.3.46. Line 11.d – Advances and Prepayments from Others. The amount reported [will](#) agree with Line 6, “Unearned Revenue,” of the “Supplemental Report on Budget Execution.” Report the value of advances and prepayments received for goods not yet delivered or services not yet performed in the following account:

231000	Liability for Advances and Prepayments
--------	--

3.3.47. Line 11.e – Debt. [Line 11.e](#) represents the amount of borrowings from the Treasury, the Federal Financial Bank, or other Federal Agencies. Report the [portion of](#) the balance of the following accounts as they relate to debt:

214000	Accrued Interest Payable – Not Otherwise Classified (except as reported on Line 11.f)
214200	Accrued Interest Payable – Debt
252000	Principal Payable to the Federal Financing Bank
259000	Other Debt

3.3.48. Line 11.f – Interest Payable. Report the portion of the balance of the following account as it relates to interest payable (other than debt interest). Exclude amounts already listed on Line 11.e, “Debt.”

214000	Accrued Interest Payable – Not Otherwise Classified (except as reported on Line 11.e)
--------	---

3.3.49. Line 11.g – Lease Liabilities. Line 11.g represents the portion of liability for capital leases covered by budgetary authority. Fully fund the capital leases and lease-purchases in the first year of the lease in accordance with OMB Circular A-11, [Appendix B](#), “Budgetary Treatment of Lease-Purchases and Leases of Capital Assets.” Report the balance of the following account:

294000	Capital Lease Liability
--------	-------------------------

3.3.50. Line 11.h – Other Liabilities. Line 11.h represents liabilities not recognized in other specific categories. Include the total amount due Federal entities for other liabilities covered by budgetary authority not included on other lines. Report the portion of the balance of the following accounts as they relate to transactions with other Federal and non-federal entities:

213000	Contract Holdbacks
219000	Other Liabilities With Related Budgetary Obligations
231000	Liability for Advances and Prepayments
232000	Other Deferred Revenue
240000	Liability for Nonfiduciary Deposit Funds and Undeposited Collections
265000	Actuarial FECA Liability
292000	Contingent Liabilities
298500	Liability for Non-Entity Assets Not Reported on the Statement of Custodial Activity

3.3.51. Line 12 – Liabilities Not Covered by Budgetary Resources. Liabilities not covered by available budgetary resources result from the receipt of goods or services, or the occurrence of other eligible events, for which revenues or other sources of funds necessary to pay the liabilities have not been made available through Congressional appropriations or current earnings of the reporting entity. Notwithstanding an expectation that the appropriations will be made, whether they, in fact, will be made is at the discretion of the Congress. Report the portion of the balance of the following accounts for which an available budgetary resource does not exist:

214000	Accrued Interest Payable – Not Otherwise Classified
216000	Entitlement Benefits Due and Payable
219000	Other Liabilities With Related Budgetary Obligations
222500	Unfunded FECA Liability
232000	Other Deferred Revenue
252000	Principal Payable to the Federal Financing Bank
259000	Other Debt

265000	Actuarial FECA Liability
292000	Contingent Liabilities
294000	Capital Lease Liability
296000	Accounts Payable from Canceled Appropriations
299000	Other Liabilities Without Related Budgetary Obligations
299500	Estimated Cleanup Cost Liability-OAEL Active Installations Non-BRAC- Environmental Corrective Actions

3.3.52. Line 13 – Total Liabilities. Line 13 is a summary line for Lines 11, “Liabilities Covered by Budgetary Resources,” and 12, “Liabilities Not Covered by Budgetary Resources.”

3.3.53. Section Heading – NET POSITION. The “Net Position” section presents the arithmetic difference between the total assets and total liabilities recognized in the Federal Government's or a component entity's balance sheet. Net position may be positive (assets greater than liabilities) or negative (assets less than liabilities).

3.3.54. Line 14 – Net Position. Line 14 is a summary line for Lines 14.a, “Unexpended Appropriations,” through 14.c, “Invested Capital.”

3.3.55. Line 14.a – Unexpended Appropriations. Line 14.a is equal to Line 1.A.(3), “Equals: Unexpended Appropriations – End of Period,” of Part II, “Changes in Net Position,” of the Statement of Operations. Normally, DWCF activities will not have unexpended appropriations as they are expended upon receipt to provide budgetary authority. (Supply activities that receive appropriations for War Reserve Materiel may not expend upon receipt. Also, a DWCF may have unexpended appropriations for Emergency Disaster Relief.)

3.3.56. Line 14.b – Accumulated Operating Results (AOR). Line 14.b is equal to Line 1.B.(3), “Total AOR End of Period,” of Part II, “Changes in Net Position,” of the Statement of Operations.

3.3.57. Line 14.c – Invested Capital. Line 14.c is equal to Line 1.D.(4), “Equals: Invested Capital – End of Period,” of Part II, “Changes in Net Position,” of the Statement of Operations.

3.3.58. Line 15 – Total Liabilities and Net Position. Report the total of Lines 13, “Total Liabilities,” and 14, “Net Position.” Line 15 will equal Line 10, “Total Assets,” from the Statement of Financial Position.

4.0 FORMAT OF THE STATEMENT OF CASH FLOW (1504) (FORM 15-2)

Form 15-2: Statement of Cash Flow

DEFENSE WORKING CAPITAL FUND STATEMENT OF CASH FLOW (DoD COMPONENT/DWCF ACTIVITY) MONTH ENDING _____, 20XX (\$ in thousands)

SUPPLEMENTAL DISCLOSURE OF CASH FLOW INFORMATION:

22. Total Interest Paid		XXX
-------------------------	--	-----

4.1 General (150401)

The Statement of Cash Flow, [Form 15-2](#), discloses the [reporting entity's gross](#) cash receipts and disbursements with an explanation of the changes in cash or cash equivalents for the reporting period.

4.2 Heading (150402)

Complete the heading of the form to indicate: the reporting DoD Component, the reporting DWCF activity, the reporting period (month), and the calendar year.

4.3 Line Item Instructions (150403)

Instructions for the content of each line item are as follows:

4.3.1. Section Heading - CASH FLOWS FROM OPERATIONS. The “Cash Flows From Operations” section presents the cash flows generated by an entity's operations.

4.3.2. Line 1 – Net Operating Results (NOR) (Part I, Line 11). Line 1 is equal to Line 11, “Net Operating Results (NOR),” of Part I, “Statement of Operations,” of the Statement of Operations.

4.3.3. Section Heading - OPERATING ADJUSTMENTS. The “Operating Adjustments” section identifies increases and decreases in items impacting an entity's ending Fund Balance with Treasury.

4.3.4. Line 2 – Appropriated Capital Used (-). The amount of appropriated funds expended is a negative adjustment to the cash flow from operations. Report the balance of the following account:

570000 Expended Appropriations

4.3.5. Line 3 – Decrease (Increase) in [Accounts](#) Receivable. Report the balance of the preceding September 30, Statement of Financial Position, Line 3, “Accounts Receivable, Net,” minus the current balance reported on Line 3 of the Statement of Financial Position.

4.3.6. Line 4 – Decrease (Increase) in Advances and Prepayments. Report the balance of the preceding September 30, Statement of Financial Position, Line 4, “Advances [Paid](#) and Prepayments,” minus the current balance reported on Line 4 of the Statement of Financial Position.

4.3.7. Line 5 – Decrease (Increase) in Inventories. Line 5 is a summary line for Lines 5.a, “Inventory,” through 5.c, “Operating Materials and Supplies, Net.” Report the net decrease (increase) of the [three](#) sub-categories of inventory [reported](#) on Lines 5.a through 5.c.

4.3.8. Line 5.a – Inventory. Report the balance of the preceding September 30, Statement of Financial Position, Line 5.a, “Inventory Items,” minus the current balance reported on Line 5.a of the Statement of Financial Position.

4.3.9. Line 5.b – Work-in-Process. Report the balance of the preceding September 30, Statement of Financial Position, Line 6, “Work-in-Process,” minus the current balance reported on Line 6 of the Statement of Financial Position.

4.3.10. Line 5.c – Operating Materials and Supplies, Net. Report the balance of the preceding September 30, Statement of Financial Position, Line 7, “Operating Materials and Supplies, Net,” minus the current balance reported on Line 7 of the Statement of Financial Position.

4.3.11. Line 6 – Decrease (Increase) in Other Assets. Report the balance of the preceding September 30, Statement of Financial Position, Line 9, “Other Assets, Net,” minus the current balance reported on Line 9 of the Statement of Financial Position.

4.3.12. Line 7 – Increase (Decrease) in Accounts Payable. Report the balance of the preceding September 30, Statement of Financial Position, Line 11.a, “Accounts Payable, Net,” minus the current balance reported on Line 11.a of the Statement of Financial Position.

4.3.13. Line 8 – Increase (Decrease) in Accrued Payroll and Benefits. Report the balance of the preceding September 30, Statement of Financial Position, Line 11.b, “Accrued Payroll and Benefits,” minus the current balance reported on Line 11.b of the Statement of Financial Position.

4.3.14. Line 9 – Increase (Decrease) in Liabilities. Report the current year change in the following accounts:

213000	Contract Holdbacks
214000	Accrued Interest Payable – Not Otherwise Classified
216000	Entitlement Benefits Due and Payable
219000	Other Liabilities With Related Budgetary Obligations
222500	Unfunded FECA Liability
231000	Liability for Advances and Prepayments
232000	Other Deferred Revenue
240000	Liability for Nonfiduciary Deposit Funds and Undeposited Collections
252000	Principal Payable to the Federal Financing Bank
259000	Other Debt
265000	Actuarial FECA Liability
292000	Contingent Liabilities
294000	Capital Lease Liability
296000	Accounts Payable From Canceled Appropriations
298500	Liability for Non-Entity Assets Not Reported on the Statement of Custodial Activity
299000	Other Liabilities Without Related Budgetary Obligations
299500	Estimated Cleanup Cost Liability

4.3.15. Line 10 – Depreciation and Amortization. The depreciation and amortization for the period are not paid in cash and, therefore, require a positive adjustment to net cash flow from operations. Report the portion of the balance of the following account as it relates to items funded by the DWCF activity:

671000	Depreciation, Amortization, and Depletion
--------	---

4.3.16. Line 11 – Other Adjustments. Line 11 is a summary line for Lines 11.a, “Prior Period Adjustments,” through 11.c, “Other.”

4.3.17. Line 11.a – Prior Period Adjustments. Report the portion of the balance of the following accounts as they relate to prior period adjustments. Enter prior period adjustments for the period that are not cash related transactions.

740000	Prior-Period Adjustments Due to Corrections of Errors
740100	Prior-Period Adjustments Due to Changes in Accounting Principles
740500	Prior-Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year

4.3.18. Line 11.b – Non-Cash Transfers. Report the balance of the following accounts. Enter transfers in and transfers out for the period that are not cash related transactions.

572000	Financing Sources Transferred In Without Reimbursement
573000	Financing Sources Transferred Out Without Reimbursement

4.3.19. Line 11.c – Other. Report the balance of the following account:

579000	Other Financing Sources
--------	-------------------------

4.3.20. Line 12 – Total Operating Adjustments. Line 12 is a summary line for Lines 2, “Appropriated Capital Used (-),” through 11, “Other Adjustments.”

4.3.21. Line 13 – NOR Plus or Minus Operating Adjustments. Report the sum of Lines 1, “Net Operating Results (NOR),” and 12, “Total Operating Adjustments.”

4.3.22. Section Heading – CAPITAL ADJUSTMENTS. The “Capital Adjustments” section adjusts cash flow for the impact of acquiring and disposing of PP&E and other assets used in the production of goods and services. Most sales within the DWCF are recorded as revenue and included in Line 1, “Net Operating Results (NOR).” However, if an incoming cash flow is not a result of revenue, identify that cash flow within this section as either a result of a sale of PP&E or another cause. See Volume 4 for additional information relating to PP&E.

4.3.23. Line 14 – (Increase) Decrease of Property, Plant, and Equipment, Net. Report the balance of the preceding September 30, Statement of Financial Position, Line 8, “Property, Plant, and Equipment, Net,” minus the current balance reported on Line 8 of the Statement of Financial Position.

4.3.24. Section Heading – APPROPRIATIONS AND CASH TRANSFERS. The “Appropriations and Cash Transfers” section identifies the impact on cash flow from resources obtained in the form of appropriations from the Congress, or by transferring from or to other reporting entities. Appropriations may be distributed to the individual activity level. If appropriations are not distributed, report by the DWCF level holding those balances or allocate by that DWCF level, for reporting purposes, to the appropriate activity or activities.

4.3.25. Line 15 – Appropriations (Current Warrants). Report the portion of the balance of the following accounts as they relate to transfers in and transfers out of appropriations (current warrants). Report the amount of appropriations received, net of rescissions, for the current FY in the following accounts:

310100	Unexpended Appropriations – Appropriations Received
310200	Unexpended Appropriations – Transfers–In
310300	Unexpended Appropriations – Transfers–Out
310500	Unexpended Appropriations – Prior Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year
310600	Unexpended Appropriations – Adjustments
310700	Unexpended Appropriations – Used
310800	Unexpended Appropriations – Prior–Period Adjustments Due to Corrections of Errors
310900	Unexpended Appropriations – Prior–Period Adjustments Due to Changes in Accounting Principles

* **4.3.26. Line 16 – Transfers of Cash.** Report the net amount of cash transferred to and from all Federal sources, except the Fiscal Service. Line 16 is a summary line for Lines 16.a, “Transfers In,” and 16.b, “Transfers Out.” Transfers of cash reported on Lines 16.a and 16.b may include transfers between Working Capital Funds and the “Foreign Currency Fluctuations, Defense” and “Operation and Maintenance” appropriations as outlined in Section 8008 of Public Law 113-6.

4.3.27. Line 16.a – Transfers In. Report the amount of cash transferred from all Federal sources, except the Fiscal Service. The amount reported on this line will agree with the amount reported on Line 1.D.(2).b, “Plus: Transfers In of Cash,” of Part II, “Changes in Net Position,” of the Statement of Operations. Report cash transfers in from other Federal sources as an increase. Report only those amounts related solely to transferred-in cash balances. Do not report a transfer of cash from work performed (reimbursable sales) on this line.

575500	Nonexpenditure Financing Sources – Transfers–In
--------	---

4.3.28. Line 16.b – Transfers Out. Report the amounts of cash transferred to all Federal sources, except the **Fiscal Service**. The amount reported on this line will be the opposite of the amount reported on Line 1.D.(2).c, “Minus: Transfers Out of Cash,” of Part II, “Changes in Net Position,” of the Statement of Operations. Report cash transfers out to other Federal sources as a reduction. Report only those amounts related solely to transferred-out cash balances. Do not report a transfer of cash from work performed (reimbursable sales) on this line.

576500 Nonexpenditure Financing Sources – Transfers–Out

4.3.29. Line 17 – Total Appropriations and Cash Transfers. Line 17 is a summary line for Lines 15, “Appropriations (Current Warrants),” and 16, “Transfers of Cash.”

4.3.30. Line 18 – Repayments on Loans from the Treasury and the Federal Financing Bank. Report the amounts disbursed to liquidate loans from the **Fiscal Service**, the Federal Financing Bank, or other Federal Agencies. Line 18 applies only to the Military Sealift Command (MSC).

252000 Principal Payable to the Federal Financing Bank

4.3.31. Line 19 – Net Change in Cash For Accounting Period. Line 19 is a summary line for Lines 13, “NOR Plus or Minus Operating Adjustments;” 14, “(Increase) Decrease of Property, Plant, and Equipment, Net;” 17, “Total Appropriations and Cash Transfers;” and 18, “Repayments on Loans from the Treasury and the Federal Financing Bank.”

4.3.32. Line 20 – Fund Balance, Beginning. Report the balance of the preceding September 30, Statement of Cash Flows, Line 21, “Fund Balance, Ending.” The amount will not change during the FY.

4.3.33. Line 21 – Fund Balance, Ending. Line 21 is a summary line for Lines 19, “Net Change in Cash For Accounting Period,” and 20, “Fund Balance, Beginning.” The amount reported on this line will equal the sum of Lines 1, “Fund Balance with Treasury,” and 2, “Cash on Hand and Other Monetary Assets,” of the Statement of Financial Position.

4.3.34. Section Heading – SUPPLEMENTAL DISCLOSURE OF CASH FLOW INFORMATION. The “Supplemental Disclosure of Cash Flow Information” section presents additional information related to the Statement of Cash Flow.

4.3.35. Line 22 – Total Interest Paid. Report the current year change in the following accounts:

214000	Accrued Interest Payable – Not Otherwise Classified
214100	Accrued Interest Payable – Loans
214200	Accrued Interest Payable – Debt
633000	Other Interest Expenses

5.0 FORMAT OF THE STATEMENT OF OPERATIONS: PART I – STATEMENT OF OPERATIONS (1505) (FORM 15-3)

Form 15-3: Statement of Operations, Part I – Statement of Operations

DEFENSE WORKING CAPITAL FUND STATEMENT OF OPERATIONS: PART I – STATEMENT OF OPERATIONS (DoD COMPONENT/DWCF ACTIVITY) MONTH ENDING _____, 20XX (\$ in thousands)		
REVENUES AND FINANCING SOURCES:		
1. Appropriated Capital Used	\$	XXX
2. Revenue from Sales of Goods and Services		XXX
a. Gross Revenue from Sales	\$	XXX
b. Minus: Credits Allowed on Sales		XXX
3. Other Revenue and Financing Sources		XXX
4. Total Revenue and Financing Sources		XXX
EXPENSES:		
5. Program or Operating Expenses (Supply and Service Activities)		XXX
6. Cost of Goods and Services Sold		XXX
7. Other Losses		XXX
8. Total Expenses		XXX
NET OPERATING RESULTS:		
9. Revenue Less Cost Incurred Before Extraordinary Items		XXX
10. Plus (Minus) Extraordinary Items		XXX
11. Net Operating Results (NOR)		XXX
NET OPERATING RESULTS FOR RATE PURPOSES:		
12. Plus (Minus) Deferred Operating Results and Depreciation (Part V)		XXX
13. Recoverable Net Operating Results		XXX

5.1 General (150501)

Part I – Statement of Operations, Form 15-3, identifies the cumulative year-to-date NOR and the Recoverable NOR.

5.2 Heading (150502)

Complete the heading of the form to indicate: the reporting DoD Component, the reporting DWCF activity, the reporting period (month), and the calendar year.

5.3 Line Item Instructions (150503)

Instructions for the content of each line item are as follows:

5.3.1. Section Heading – REVENUES AND FINANCING SOURCES. The “Revenues and Financing Sources” section presents inflows of or other increases in assets, decreases in liabilities, or a combination of both resulting in an increase in the government's net position during the reporting period.

5.3.2. Line 1 – Appropriated Capital Used. Appropriations, primarily for War Reserve Material and Commissary Operations, may be provided directly to the DWCF. Use USSGL account 570000, “Expended Appropriations,” to record an amount equal to accrued expenses (versus outlays) of appropriated funds provided directly to the Fund. The purpose of the account is to match current period expenses to the appropriated funds used to finance those expenses. Record amounts in account 570000 equal to the amount of program expenses but do not include any expenses applicable to revenue accounts other than account 570000. In other words, record expenses incurred against an appropriation made directly available to the DWCF separately from expenses incurred against ordinary DWCF reimbursable financing. Report the balance of the following account:

570000	Expended Appropriations
--------	-------------------------

5.3.3. Line 2 – Revenue from Sales of Goods and Services. Line 2 is a summary line for Lines 2.a, “Gross Revenue from Sales,” and 2.b, “Minus: Credits Allowed on Sales.”

5.3.4. Line 2.a – Gross Revenue from Sales. Report the balances in the following accounts:

510000	Revenue From Goods Sold
520000	Revenue From Services Provided

5.3.5. Line 2.b – Minus: Credits Allowed on Sales. Reporting activities within the Supply Management Activity will report the dollar amount of credits allowed on amounts due (accounts receivable) from sales or Depot Level Repairable (DLR) exchanges. Report the balances in the following accounts:

510900	Contra Revenue for Goods Sold
520900	Contra Revenue <u>from</u> Services Provided

5.3.6. Line 3 – Other Revenue and Financing Sources. Include the total amount of revenues and financing sources not reported on Lines 1, “Appropriated Capital Used,” or 2, “Revenue from Sales of Goods and Services.” Do not include revenues reported on this line in customer rates. Include cash donations. Identify the nature of each miscellaneous gain in the footnotes. Do not include other gains related to inventory on this line. Report other gains related to inventory on Line K.4, “Net Other Inventory (Gains) Losses” of Part IV, “Expenses,” of the Statement of Operations. Report the portion of the balance of the following accounts as they relate to Other Revenues and Financing Sources:

531000	Interest Revenue – Other
531900	Contra Revenue for Interest Revenue – Other
532000	Penalties and Fines Revenue
532900	Contra Revenue for Administrative Fees
560000	Donated Revenue – Financial Resources
560900	Contra Revenue for Donations – Financial Resources
561000	Donated Revenue – Nonfinancial Resources
561900	Contra Donated Revenue – Nonfinancial Resources
575500	Nonexpenditure Financing Sources – Transfers–In – Other
576500	Nonexpenditure Financing Sources – Transfers–Out – Other
577500	Nonbudgetary Financing Sources Transferred In
578000	Imputed Financing Sources
579000	Other Financing Sources
590000	Other Revenue
590900	Contra Revenue for Other Revenue
599300	Offset to Non–Entity Collections – Statement of Changes in Net Position
599400	Offset to Non–Entity Accrued Collections – Statement of Changes in Net Position
711000	Gains on Disposition of Assets
719000	Other Gains

5.3.7. Line 4 – Total Revenue and Financing Sources. Line 4 is a summary line for Lines 1, “Appropriated Capital Used,” through 3, “Other Revenue and Financing Sources.” Revenue will equal net sales plus any other reimbursable revenue and financing source.

5.3.8. Section Heading – EXPENSES. The “Expenses” section presents outflows of or other decreases in assets, increases in liabilities, or a combination of both resulting in a decrease in the government's net position during the reporting period.

5.3.9. Line 5 – Program or Operating Expenses (Supply and Service Activities). Line 5 is a summary of expenses for the current period. Report the sum of Lines A, “Personnel Services and Benefits–Civilian,” through J, “Bad Debts,” of Part IV, “Expenses,” of the Statement of Operations. Subtract Line 1.f, “Plus: Operating Expenses,” of Part III, “Cost of Goods Sold,” of the Statement of Operations for Supply and Service Activities.

5.3.10. Line 6 – Cost of Goods and Services Sold. Report the sum of Lines 1.i, “Equals: Cost of Goods and Services Sold,” and 2.o, “Equals: Cost of Goods Sold from Inventory,” of Part III, “Cost of Goods Sold,” of the Statement of Operations for Service and DWCF activities.

5.3.11. Line 7 – Other Losses. Report the sum of Line K, “Other Losses and Gains,” of Part IV, “Expenses,” of the Statement of Operations.

5.3.12. Line 8 – Total Expenses. Report the sum of Lines 5, “Program or Operating Expenses (Supply and Service Activities),” through 7, “Other Losses.”

5.3.13. Section Heading – NET OPERATING RESULTS. The “Net Operating Results” section identifies the reporting line items used to calculate the NOR for the reporting period.

5.3.14. Line 9 – Revenue Less Cost Incurred Before Extraordinary Items. Report the sum of Line 4, “Total Revenue and Financing Sources,” minus Line 8, “Total Expenses.”

5.3.15. Line 10 – Plus (Minus) Extraordinary Items. Extraordinary items are both unusual in nature and infrequent in occurrence. Identify the nature of each extraordinary gain or loss in a footnote. Report the balance of the following account:

730000 Extraordinary Items

5.3.16. Line 11 – Net Operating Results (NOR). Line 11 is a summary line for Lines 9, “Revenue Less Cost Incurred Before Extraordinary Items” and 10, “Plus (Minus) Extraordinary Items.”

5.3.17. Section Heading – NET OPERATING RESULTS FOR RATE PURPOSES. The “Net Operating Results for Rate Purposes” section identifies the reporting line items used to calculate the NOR used for rate purposes for the reporting period.

5.3.18. Line 12 – Plus (Minus) Deferred Operating Results and Depreciation (Part V). Report the sum of Lines 2, “Deferred Operating Results (Gains/Losses) Net,” and 3, “Depreciation, Non-DWCF Acquired PP&E,” of Part V, “Recoverable Operating Results,” of the Statement of Operations. Include the total deferred operating results and depreciation on non-DWCF acquired PP&E. See Volume 4, Chapters 24 through 28 for additional guidance relating to recognition of depreciation in the financial statements.

5.3.19. Line 13 – Recoverable Net Operating Results. Line 13 is a summary line for Lines 11, “Net Operating Results (NOR),” and 12, “Plus (Minus) Deferred Operating Results and Depreciation (Part V).”

6.0 FORMAT OF THE STATEMENT OF OPERATIONS: PART II – CHANGES IN NET POSITION (1506) (FORM 15-4)

Form 15-4: Statement of Operations, Part II – Changes in Net Position

DEFENSE WORKING CAPITAL FUND			
STATEMENT OF OPERATIONS: PART II-CHANGES IN NET POSITION			
(DoD COMPONENT/DWCF ACTIVITY)			
MONTH ENDING _____, 20XX

b. Plus: Transfers In of Liabilities	XXX
c. Minus: Transfers Out of Liabilities	XXX
d. Equals: Liabilities Assumed – End of Period	XXX
(4) Equals: Invested Capital – End of Period	\$ XXX
2. Net Position – End of Period	XXX

6.1 General (150601)

Part II - Changes in Net Position, Form 15-4, identifies the arithmetic difference between the total assets and total liabilities recognized on a component entity's balance sheet.

6.2 Heading (150602)

Complete the heading of the form to indicate: the reporting DoD Component, the reporting DWCF activity, the reporting period (month), and the calendar year.

6.3 Line Item Instructions (150603)

Instructions for the content of each line item are as follows:

6.3.1. Section Heading – CHANGES IN NET POSITION. The “Changes in Net Position” section identifies the reporting line items used to report the change in net position during the reporting period.

6.3.2. Section Heading – UNEXPENDED APPROPRIATIONS. The “Unexpended Appropriations” section identifies appropriations that have not yet been used to acquire goods and services or provide benefits.

6.3.3. Line 1.A.(1) – Appropriations Available – Beginning of Year. Report the balance of Line 1.A.(3), “Equals: Unexpended Appropriations – End of Period,” from the preceding September 30, Statement of Operations, Part II, “Changes in Net Position.” The amount reported will not change during the FY. Report the balance of the following account:

310000	Unexpended Appropriations - Cumulative
--------	--

6.3.4. Line 1.A.(2) – Plus or Minus: Changes in Appropriation Balance. Line 1.A.(2) represents the difference between the beginning FY balance and the balance as of the end of the reporting period. Report the balance of the following accounts:

310100	Unexpended Appropriations – Appropriations Received
310200	Unexpended Appropriations – Transfers–In
310300	Unexpended Appropriations – Transfers–Out
310500	Unexpended Appropriations – Prior Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year
310600	Unexpended Appropriations – Adjustments
310700	Unexpended Appropriations – Used
310800	Unexpended Appropriations – Prior–Period Adjustments Due to Corrections of Errors
310900	Unexpended Appropriations – Prior–Period Adjustments Due to Changes in Accounting Principles

6.3.5. Line 1.A.(3) – Equals: Unexpended Appropriations – End of Period. Line 1.A.(3) is a summary line for Lines 1.A.(1), “Appropriations Available – Beginning of Year,” and 1.A.(2), “Plus or Minus: Changes in Appropriation Balance.” The amount reported on this line will agree with Line 14.a, “Unexpended Appropriations,” of the Statement of Financial Position.

6.3.6. Section Heading – ACCUMULATED OPERATING RESULTS (AOR). The “Accumulated Operating Results” section reflects the cumulative summation of NOR.

6.3.7. Section Heading – RECOVERABLE AOR. The “Recoverable AOR” section identifies the reporting line items used to calculate the ending balance of recoverable AOR for the reporting period.

6.3.8. Line 1.B.(1).a – AOR Beginning of Year (Unadjusted). Report the balance of Line 1.B.(1).e, “Equals: Recoverable AOR End of Period,” from the preceding September 30, Statement of Operations, Part II, “Changes in Net Position.” The amount will not change during the FY. See Volume 2B, Chapter 9 for additional guidance on cost recovery. Report the amount of recoverable AOR contained in the following account:

331000	Cumulative Results of Operations
--------	----------------------------------

6.3.9. Line 1.B.(1).b – Plus or Minus: Prior Period Adjustments. Report the portion of the balance in the following accounts related to prior period adjustments to recoverable AOR. Report a credit balance as a plus and a debit balance as a negative.

740000	Prior-Period Adjustments Due to Corrections of Errors
740100	Prior-Period Adjustments Due to Changes in Accounting Principles
740500	Prior-Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year

6.3.10. Line 1.B.(1).c – Equals: AOR Beginning of Year (Adjusted). Line 1.B.(1).c is a summary line for Lines 1.B.(1).a, “AOR Beginning of Year (Unadjusted),” and 1.B.(1).b, “Plus or Minus: Prior Period Adjustments.”

6.3.11. Line 1.B.(1).d – Plus or Minus: Net Operating Results. Report the balance of Line 13, “Recoverable Net Operating Results,” of Part I, “Statement of Operations,” of the Statement of Operations.

6.3.12. Line 1.B.(1).e – Equals: Recoverable AOR End of Period. Line 1.B.(1).e is a summary line for Lines 1.B.(1).c, “Equals: AOR Beginning of Year (Adjusted),” and 1.B.(1).d, “Plus or Minus: Net Operating Results.”

6.3.13. Section Heading – DEFERRED AOR. The “Deferred AOR” section identifies the reporting line items used to calculate the ending balance of deferred AOR for the reporting period.

6.3.14. Line 1.B.(2).a – AOR Beginning of Year (Unadjusted). Report the balance of Line 1.B.(2).e, “Equals: Deferred AOR End of Period,” from the preceding September 30, Statement of Operations, Part II, “Changes in Net Position.” The amount will not change during the FY. See Volume 2B, Chapter 9 for additional guidance on cost recovery. Report the amount of deferred AOR contained in the following account:

331000	Cumulative Results of Operations
--------	----------------------------------

6.3.15. Line 1.B.(2).b – Plus or Minus: Prior Period Adjustments. Report the portion of the balance in the following accounts related to prior period adjustments to deferred AOR. Report a credit balance as a plus and a debit balance as a negative.

740000	Prior-Period Adjustments Due to Corrections of Errors
740100	Prior-Period Adjustments Due to Changes in Accounting Principles
740500	Prior-Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year

6.3.16. Line 1.B.(2).c – Equals: AOR Beginning of Year (Adjusted). Line 1.B.(2).c is a summary line for Lines 1.B.(2).a, “AOR Beginning of Year (Unadjusted),” and 1.B.(2).b, “Plus or Minus: Prior Period Adjustments.”

6.3.17. Line 1.B.(2).d – Plus or Minus: Net Operating Results. The amount reported on this line will be the opposite of the amount shown on Line 2, “Deferred Operating Results (Gains/Losses) Net,” of Part V, “Recoverable Operating Results,” of the Statement of Operations.

6.3.18. Line 1.B.(2).e – Equals: Deferred AOR End of Period. Line 1.B.(2).e is a summary line for Lines 1.B.(2).c, “Equals: AOR Beginning of Year (Adjusted),” and 1.B.(2).d, “Plus or Minus: Net Operating Results.”

6.3.19. Line 1.B.(3) – Total AOR End of Period. Line 1.B.(3) is a summary line for Lines 1.B.(1).e, “Equals: Recoverable AOR End of Period,” and 1.B.(2).e, “Equals: Deferred AOR End of Period.”

6.3.20. Line 1.C – Operational Equity Position – End of Period. Line 1.C is a summary line for Lines 1.A.(3), “Equals: Unexpended Appropriations – End of Period,” and 1.B.(3), “Total AOR End of Period.”

6.3.21. Section Heading – INVESTED CAPITAL. The “Invested Capital” section identifies the reporting line items used to calculate the ending balance of invested capital for the reporting period.

6.3.22. Section Heading – ASSETS CAPITALIZED. The “Assets Capitalized” section identifies the reporting line items used to calculate the ending balance of capitalized assets for the reporting period.

6.3.23. Line 1.D.(1).a – Assets Capitalized – Beginning of Period. Report the **balance** of Line 1.D.(1).e, “**Equals: Assets Capitalized – End of Period,**” from the preceding September 30, **Statement of Operations, Part II, “Changes in Net Position.”** The amount will not change during the **FY**. Report the amount related to the asset capitalization program contained in the following account:

331000 Cumulative Results of Operations

6.3.24. Line 1.D.(1).b – Plus: Transfers In of Property. Report the value of non-cash capital assets **transferred in** without reimbursement. Report the portion **of the balance** in the following account **as it relates** to non-cash capital transfers:

572000 Financing Sources Transferred In Without Reimbursement

6.3.25. Line 1.D.(1).c – Minus: Transfers Out of Property. Report the value of non-cash capital assets transferred out without reimbursement. Report the **portion of the balance** in the following account **as it relates** to non-cash capital transfers:

573000 Financing Sources Transferred Out Without Reimbursement

6.3.26. Line 1.D.(1).d – Minus: Depreciation, Non-DWCF Acquired PP&E. Report the amount of depreciation expense recorded for non-DWCF acquired PP&E from Line I, “**Depreciation – Non-DWCF Acquired PP&E,**” of Part IV, “**Expenses,**” of the **Statement of Operations,** plus **any** gains and losses **from the following accounts** related to the asset in question:

719000 Other Gains
729000 Other Losses

6.3.27. Line 1.D.(1).e – Equals: Assets Capitalized – End of Period. **Line 1.D.(1).e is a summary line for Lines 1.D.(1).a, “Assets Capitalized – Beginning of Period,” through 1.D.(1).d, “Minus: Depreciation, Non-DWCF Acquired PP&E.”**

6.3.28. Section Heading – FUND (CASH) ASSETS. The “**Fund (Cash) Assets**” section identifies the reporting line items used to calculate the ending balance of fund (cash) assets for the reporting period.

6.3.29. Line 1.D.(2).a – Fund (Cash) Assets – Beginning of Period. Report the **balance** of Line 1.D.(2).d, “**Equals: Fund (Cash) Assets – End of Period,**” from the preceding September 30, **Statement of Operations, Part II, “Changes in Net Position.”** The amount will not change during the **FY**. Report the **portion of the balance** in the following account **as it relates** to asset capitalization:

331000 Cumulative Results of Operations

6.3.30. Line 1.D.(2).b – Plus: Transfers In of Cash. Report the [amount of financing sources of a reporting entity representing cash transferred in](#) without reimbursement. Report the [portion of the balance](#) in the following account [as it relates](#) to transfers in of cash:

575500 Nonexpenditure Financing Sources – Transfers–In

6.3.31. Line 1.D.(2).c – Minus: Transfers Out of Cash. Report the [amount of financing sources of a reporting entity representing](#) cash transferred out without reimbursement. Report the [portion of the balance](#) in the following accounts [as they](#) relate to transfers out of cash:

576500 Nonexpenditure Financing Sources – Transfers–Out

6.3.32. Line 1.D.(2).d – Equals: Fund (Cash) Assets – End of Period. [Line 1.D.\(2\).d is a summary line for Lines 1.D.\(2\).a, “Fund \(Cash\) Assets – Beginning of Period,” through 1.D.\(2\).c, “Minus: Transfers Out of Cash.”](#)

6.3.33. Section Heading – LIABILITIES ASSUMED. The [“Liabilities Assumed”](#) section identifies the reporting line items used to calculate the ending balance of liabilities assumed for the reporting period.

6.3.34. Line 1.D.(3).a – Liabilities Assumed – Beginning of Period. Report the [balance](#) of Line 1.D.(3).d, [“Equals: Liabilities Assumed – End of Period,”](#) from the preceding September 30, [Statement of Operations, Part II, “Changes in Net Position.”](#) The amount will not change during the FY. Report the [portion of the balance](#) in the following account [as it relates](#) to liabilities assumed:

331000 Cumulative Results of Operations

6.3.35. Line 1.D.(3).b – Plus: Transfers In of Liabilities. Report the [portion of the balance](#) in the following account [as it relates to the](#) value of liabilities transferred in:

572000 Financing Sources Transferred In Without Reimbursement

6.3.36. Line 1.D.(3).c – Minus: Transfers Out of Liabilities. Report the [portion of the balance](#) in the following account [as it relates to the](#) value of liabilities transferred out:

573000 Financing Sources Transferred Out Without Reimbursement

6.3.37. Line 1.D.(3).d – Equals: Liabilities Assumed – End of Period. [Line 1.D.\(3\).d is a summary line for Lines 1.D.\(3\).a, “Liabilities Assumed – Beginning of Period,” through 1.D.\(3\).c, “Minus: Transfers Out of Liabilities.”](#)

6.3.38. Line 1.D.(4) – Equals: Invested Capital – End of Period. [Line 1.D.\(4\) is a summary line for Lines 1.D.\(1\).e, “Equals: Assets Capitalized – End of Period;” 1.D.\(2\).d, “Equals: Fund \(Cash\) Assets – End of Period;” and 1.D.\(3\).d, “Equals: Liabilities Assumed - End of Period.”](#)

6.3.39. Line 2 – Net Position – End of Period. Line 2 is a summary line for Lines 1.C, “Operational Equity Position – End of Period,” and 1.D.(4), “Equals: Invested Capital – End of Period.”

7.0 FORMAT OF THE STATEMENT OF OPERATIONS: PART III - COST OF GOODS SOLD (1507) (FORM 15-5)

Form 15-5: Statement of Operations, Part III – Cost of Goods Sold

DEFENSE WORKING CAPITAL FUND STATEMENT OF OPERATIONS: PART III-COST OF GOODS SOLD (DoD COMPONENT/DWCF ACTIVITY) MONTH ENDING _____, 20XX (\$ in thousands)			
1. COST OF GOODS AND SERVICES SOLD:			
a.	Beginning Work-in-Process	\$	XXX
b.	Plus/Minus: Prior Period Adjustments to Work-in-Process		XXX
c.	Equals: Adjusted Beginning Work-in-Process		XXX
d.	Minus: Transfers Out of Work-in-Process		XXX
e.	Plus: Transfers In of Work-in-Process		XXX
f.	Plus: Operating Expenses		XXX
g.	Minus: Ending Work-in-Process		XXX
h.	Minus: Work for Activity Retention		XXX
i.	Equals: Cost of Goods and Services Sold	\$	XXX
2. COST OF GOODS SOLD FROM INVENTORY:			
a.	Beginning Inventory-LAC		XXX
b.	Plus/Minus: Prior Period Adjustments to LAC Inventory		XXX
c.	Equals: Adjusted Beginning Inventory-LAC		XXX
d.	Minus: Beginning Allowance for Unrealized Holding Gains (Losses)		XXX
e.	Plus: Purchases at Cost		XXX
f.	Plus: Customer Returns-Credit Given		XXX
g.	Plus: DLR Exchange Credits		XXX
h.	Minus: Inventory Losses (Gains) Realized		XXX
i.	Minus: Ending Inventory-LAC		XXX
j.	Plus: Ending Allowance for Unrealized Holding Gains (Losses)		XXX
k.	Minus: Transfers Out of Inventory at LAC		XXX
l.	Plus: Transfers In of Inventory at LAC		XXX
m.	Equals: Cost of Goods Sold at LAC		XXX
n.	Plus: Cost of Goods Sold at MAC		XXX
o.	Equals: Cost of Goods Sold from Inventory		XXX

7.1 General (150701)

Part III - Cost of Goods Sold, [Form 15-5](#), reflects all costs, including gains and losses, applicable to the production of goods and services sold to customers during the reporting period. The total of [Line 1.i](#), “Equals: Cost of Goods and Services Sold,” and [2.o](#), “Equals: Cost of Goods Sold from Inventory,” must agree with the amount shown on [Line 6](#), “Cost of Goods and Services Sold,” of Part I, “Statement of Operations,” of the [Statement of Operations](#).

7.2 Heading (150702)

Complete the heading of the form to indicate: the reporting DoD Component, the reporting DWCF activity, the reporting period (month), and the calendar year.

7.3 Line Item Instructions (150703)

Instructions for the content of each line item are as follows:

* 7.3.1. [Section Heading – COST OF GOODS AND SERVICES SOLD](#). The “Cost of Goods and Services Sold” section applies to DWCF activities that accumulate costs to a final cost objective (generally, a job order). Report any operating expenses for service business activities on [Line 6](#), “Cost of Goods and Services Sold,” of Part I, “Statement of Operations,” of the [Statement of Operations](#).

7.3.2. [Line 1.a – Beginning Work-in-Process](#). Report the balance of [Line 1.g](#), “Minus: Ending Work-in-Process,” from the [preceding September 30, Statement of Operations, Part III, “Cost of Goods Sold.”](#) The amount will not change during the FY. Report the portion of the balance in the following accounts related to work-in-process:

152600	Inventory – Work-in-Process
152900	Inventory – Allowance

7.3.3. [Line 1.b – Plus/Minus: Prior Period Adjustments to Work-in-Process](#). Report the current year change for Inventory Work-in-Process related to a prior period adjustment included in the following accounts:

740000	Prior-Period Adjustments Due to Corrections of Errors
740100	Prior-Period Adjustments Due to Changes in Accounting Principles
740500	Prior-Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year

7.3.4. [Line 1.c – Equals: Adjusted Beginning Work-in-Process](#). [Line 1.c](#) is a summary line for [Lines 1.a](#), “Beginning Work-in-Process,” and [1.b](#), “Plus/Minus: Prior Period Adjustments to Work-in-Process.”

7.3.5. Line 1.d – Minus: Transfers Out of Work-in-Process. Report the [portion of the balance](#) in the following account [as it relates to](#) work-in-process transferred out to another activity without reimbursement:

573000 Financing Sources Transferred Out Without Reimbursement

7.3.6. Line 1.e – Plus: Transfers In of Work-in-Process. Report the [portion of the balance](#) in the following account [as it relates to](#) work-in-process transferred in from another activity without reimbursement:

572000 Financing Sources Transferred In Without Reimbursement

7.3.7. Line 1.f – Plus: Operating Expenses. [Report](#) the total of Lines A, “Personnel Services and Benefits–Civilian,” through I, “Depreciation – Non-DWCF Acquired PP&E,” of Part IV, “Expenses,” of the Statement of Operations for those activities that use LAC inventory method.

7.3.8. Line 1.g – Minus: Ending Work-in-Process. [Report the portion](#) of the balance in the following accounts [as of the end of the current reporting period](#):

152600 Inventory – Work-in-Process
152900 Inventory – Allowance

7.3.9. Line 1.h – Minus: Work for Activity Retention. Report the value of assets developed or manufactured for use and retention by the performing DWCF activity. [Report the portion of the balance of](#) the following account [as it relates to assets retained by a business activity](#):

650000 Cost of Goods Sold

7.3.10. Line 1.i – Equals: Cost of Goods and Services Sold. [Line 1.i is a summary line for Lines 1.c, “Equals: Adjusted Beginning Work-in-Process,” through 1.h, “Minus: Work for Activity Retention.”](#)

* 7.3.11. Section Heading – COST OF GOODS SOLD FROM INVENTORY. [Report in the “Cost of Goods Sold from Inventory” section only the costs for Supply Management and Commissary Resale DWCF activities. Supply activities must record any incremental amount billed for manufactured inventory as work-in-process on Line 1. The Supply Activity will adjust the inventory work-in-process account as appropriate based on the subsequent progress bills received.](#)

7.3.11.1. Refer to the DoD USSGL Transaction Library for detailed debit and credit transactions related to the recording and transfer out of work-in-process inventory accounts to the appropriate Inventory Held for Sale account(s). Once the Supply Activity receives the completed manufactured end item(s), they will transfer the corresponding value in the inventory work-in-process account to the appropriate inventory account. Accounting transactions related to this policy need to comply with the DoD Standard Chart of Accounts and the DoD USSGL Transaction Library.

7.3.11.2. SFFAS 3 sets the accounting principles for Federal Government entities to follow when accounting for and reporting inventory and related property. Volume 4, Chapter 4 provides instructions for DoD Components recording inventory at its last invoice price. Volume 4, Chapter 4 also provides the application of inventory-related accounts and provides clarification for the reporting requirements contained in section 2, “Cost of Goods Sold from Inventory,” of Part III, “Cost of Goods Sold,” of the Statement of Operations.

7.3.12. Line 2.a – Beginning Inventory – LAC. Report the balance of Line 2.i, “Minus: Ending Inventory – LAC,” from the preceding September 30, Statement of Operations, Part III, “Cost of Goods Sold.” The LAC valuation method is available to DeCA and is not approved for use by other DoD Components. The amount reported will not change during the FY.

152100	Inventory Purchased for Resale
152200	Inventory Held in Reserve for Future Sale
152300	Inventory Held for Repair
152400	Inventory – Excess, Obsolete, and Unserviceable
152500	Inventory – Raw Materials
152700	Inventory – Finished Goods

7.3.13. Line 2.b – Plus/Minus: Prior Period Adjustments to LAC Inventory. Report the current year change for inventory reported at LAC related to prior period adjustments included in the following accounts:

740000	Prior-Period Adjustments Due to Corrections of Errors
740100	Prior-Period Adjustments Due to Changes in Accounting Principles
740500	Prior-Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year

7.3.14. Line 2.c – Equals: Adjusted Beginning Inventory-LAC. Line 2.c is a summary line for Lines 2.a, “Beginning Inventory – LAC,” and 2.b, “Plus/Minus: Prior Period Adjustments to LAC Inventory.”

7.3.15. Line 2.d – Minus: Beginning Allowance for Unrealized Holding Gains (Losses). Report the balance of Line 2.j, “Plus: Ending Allowance for Unrealized Holding Gains (Losses),” from the preceding September 30, Statement of Operations, Part III, “Cost of Goods Sold.” The amount will not change during the FY. Recognize holding gains (or losses) in the valuation of inventory. Holding gains (or losses) may be unrealized or realized. “Unrealized” refers to any

gain (or loss) associated with inventory still held by the entity. “Realization” of the holding gain (or loss) occurs when an item of inventory is sold or otherwise leaves the Supply Management stocking point.

7.3.16. Line 2.e – Plus: Purchases at Cost. Report the portion of the balance in the following account as it relates to amounts paid or payable for all inventory purchases during the reporting period:

152900 Inventory – Allowance

7.3.17. Line 2.f – Plus: Customer Returns–Credit Given. Report the portion of the balance in the following account as it relates to amounts of credit given on materiel returns:

152900 Inventory – Allowance

7.3.18. Line 2.g – Plus: DLR Exchange Credits. Report the portion of the balance in the following account as it relates to amounts of credits given on DLR exchanges:

152900 Inventory – Allowance

* 7.3.19. Line 2.h – Minus: Inventory Losses (Gains) Realized. The realization of most inventory gains (and losses) are recognized through reduction of the unrealized holding gains (and losses) accounts as a result of sales; that is, those gains (and losses) are realized when inventory items are sold and recognized in the cost of goods sold.

7.3.19.1. However, increases (or decreases) in inventory occurring because of disposal and events other than sales also result in an adjustment (increase or decrease) of the unrealized holding gains (or losses) accounts. As those inventory increases (or decreases) are not the result of sales, they should not affect the cost of goods sold. (Immaterial losses are charged to cost of goods sold.)

7.3.19.2. Therefore, remove the value of those gains (or losses) from the cost of goods sold and report on Line K.4, “Net Other Inventory (Gains) Losses,” of Part IV “Expenses,” of the Statement of Operations. Report the portion of the balance of the following accounts related to (gains) losses on inventory identified in the following breakdown:

7.3.19.2.1. Non-Recoverable Gains or Losses on Disposal of Excess Inventory, Supply Management:

711000	Gains on Disposition of Assets – Other
719000	Other Gains
721000	Losses on Disposition of Assets – Other
729000	Other Losses

7.3.19.2.2. Other Inventory Losses, Non-Supply Management:

729000 Other Losses

7.3.20. Line 2.i – Minus: Ending Inventory–LAC. Report the end of period inventory value of the following accounts:

152100	Inventory Purchased for Resale
152200	Inventory Held in Reserve for Future Sale
152300	Inventory Held for Repair
152400	Inventory – Excess, Obsolete, and Unserviceable
152500	Inventory – Raw Materials
152700	Inventory – Finished Goods

7.3.21. Line 2.j – Plus: Ending Allowance for Unrealized Holding Gains (Losses). Report the portion of the balance in the following account as it relates to allowance for unrealized holding gains (losses):

152900 Inventory – Allowance

7.3.22. Line 2.k – Minus: Transfers Out of Inventory at LAC. Report the portion of the balance in the following account as it relates to inventory maintained at LAC transferred out of the activity:

573000 Financing Sources Transferred Out Without Reimbursement

7.3.23. Line 2.l – Plus: Transfers In of Inventory at LAC. Report the portion of the balance in the following account as it relates to inventory maintained at LAC transferred into the activity:

572000 Financing Sources Transferred In Without Reimbursement

7.3.24. Line 2.m – Equals: Cost of Goods Sold at LAC. Line 2.m is a summary line for Lines 2.c, “Equals: Adjusted Beginning Inventory–LAC,” through Line 2.l, “Plus: Transfers In of Inventory at LAC.”

7.3.25. Line 2.n – Plus: Cost of Goods Sold at MAC. Report the portion of the balance of the following account reported from activities maintaining inventory at MAC value:

650000 Cost of Goods Sold

7.3.26. Line 2.o – Equals: Cost of Goods Sold from Inventory. Line 2.o is a summary line for Lines 2.m, “Equals: Cost of Goods Sold at LAC,” and 2.n, “Plus: Cost of Goods Sold at MAC.”

8.0 FORMAT OF THE STATEMENT OF OPERATIONS: PART IV - EXPENSES (1508)

8.1 General (150801)

Part IV - Expenses, [Form 15-6](#), reflects all expenses incurred during the reporting period. The total of Lines A, “[Personnel Services and Benefits-Civilian](#),” through I, “[Depreciation-Non-DWCF Acquired PP&E](#),” will agree, except for rounding, with the amount shown on Line 5, “Program or Operating Expenses (Supply and Service Activities),” of Part I, “[Statement of Operations](#),” for Supply and Service Activities. For all other activities, [Lines A through I will equal Line 1.f, “Plus: Operating Expenses,” of Part III, “Cost of Goods Sold,” of the Statement of Operations.](#)

8.2 Heading (150802)

Complete the heading of the form to indicate: the reporting DoD Component, the reporting DWCF activity, the reporting period (month), and the calendar year.

8.3 Line Item Instructions (150803)

Instructions for the content of each line item are as follows:

8.3.1. [Line A – Personnel Services and Benefits–Civilian](#). [Line A is a summary line for Lines A.1, “Personnel Compensation,” through A.4, “Benefits for Former Personnel.”](#) Report the amount of expense related to personnel services and benefits.

8.3.2. [Line A.1 – Personnel Compensation](#). Report the [portion of the balance](#) of the following accounts related to personnel compensation:

610000 Operating Expenses/Program Costs

8.3.3. [Line A.2 – Annual Leave](#). Report the [portion of the balance](#) of the following accounts related to annual leave:

610000 Operating Expenses/Program Costs

8.3.4. [Line A.3 – Personnel Benefits](#). Report the [portion of the balance](#) of the following accounts related to personnel benefits:

610000 Operating Expenses/Program Costs
 640000 Benefits Expense
 680000 [Future Funded Expenses](#)
 685000 Employer Contributions to Employee Benefit Programs [Not](#)
 Requiring Current–Year Budget Authority (Unobligated)
 760000 Changes in Actuarial Liability

8.3.5. Line A.4 – Benefits for Former Personnel. Report the portion of the balance of the following accounts related to benefits for former personnel:

610000	Operating Expenses/Program Costs
640000	Benefits Expense

8.3.6. Line B – Travel and Transportation. Line B is a summary line for Lines B.1, “Travel and Transportation of People,” and B.2, “Transportation of Things.” Report the amount of expense related to travel and transportation.

8.3.7. Line B.1 – Travel and Transportation of People. Report the portion of the balance of the following account related to travel and transportation of persons:

610000	Operating Expenses/Program Costs
--------	----------------------------------

8.3.8. Line B.2 –Transportation of Things. Report the portion of the balance of the following account related to travel and transportation of things:

610000	Operating Expenses/Program Costs
--------	----------------------------------

8.3.9. Line C – Rents, Communications, and Utilities. Line C is a summary line for Lines C.1, “Rents, Communications, and Utilities,” and C.2, “Printing and Reproduction.” Report the amount of expense related to rents, communications, utilities, and printing and reproduction.

8.3.10. Line C.1 – Rents, Communications, and Utilities. Report the portion of the balance of the following account related to rents, communications, and utilities:

610000	Operating Expenses/Program Costs
--------	----------------------------------

8.3.11. Line C.2 – Printing and Reproduction. Report the portion of the balance of the following account related to printing and reproduction:

610000	Operating Expenses/Program Costs
--------	----------------------------------

8.3.12. Line D – Contractual Services. Line D is a summary line for Lines D.1, “Military Personnel Services,” and D.2, “Purchased Services.” Report the amount of expense related to military personnel services and other contractual services.

8.3.13. Line D.1 – Military Personnel Services. Report the portion of the balance of the following account related to military personnel services:

610000	Operating Expenses/Program Costs
--------	----------------------------------

8.3.14. Line D.2 – Purchased Services. Report the portion of the balance of the following account related to purchased services:

610000 Operating Expenses/Program Costs

8.3.15. Line E – Supplies, Materials, and Other Non-Capitalized Assets. Line E is a summary line for Lines E.1, “Supplies and Materials,” and E.2, “Equipment.” Report the amount of expense related to supplies, materials, and other non-capitalized assets.

8.3.16. Line E.1 – Supplies and Materials. Report the portion of the balance of the following account related to supplies and materials:

610000 Operating Expenses/Program Costs

8.3.17. Line E.2 – Equipment. Report the portion of the balance of the following account related to equipment (not capitalized):

610000 Operating Expenses/Program Costs

8.3.18. Line F – Grants and Fixed Charges. Line F is a summary line for Lines F.1, “Grants and Contributions,” through F.3, “Other Interest Expenses.” Report the amount of expense related to grants, subsidies, contributions, insurance claims and indemnifications, and other interest expenses.

8.3.19. Line F.1 – Grants and Contributions. Report the portion of the balance of the following account related to grants and contributions:

610000 Operating Expenses/Program Costs

8.3.20. Line F.2 – Insurance Claims and Indemnifications. Report the portion of the balance of the following account related to insurance claims and indemnifications:

610000 Operating Expenses/Program Costs

8.3.21. Line F.3 – Other Interest Expenses. Report the portion of the balances of the following accounts related to interest expenses not captured in other lines:

631000 Interest Expense on Borrowings from Bureau of the Fiscal Service
or Federal Financing Bank
633000 Other Interest Expenses

8.3.22. Line G – Other Expenses. Report amounts **not captured in** other elements of expense. Identify the type of expense **on** this line.

610000	Operating Expenses/Program Costs
615000	Expensed Asset
619900	Adjustment to Subsidy Expense
660000	Applied Overhead
661000	Cost Capitalization Offset
673000	Imputed Costs
679000	Other Expenses Not Requiring Budgetary Resources
680000	Future Funded Expenses
685000	Employer Contributions to Employee Benefit Programs Not Requiring Current–Year Budget Authority (Unobligated)
690000	Nonproduction Costs

8.3.23. Line H – Depreciation. **Line H is a summary line for** Lines H.1, “Depreciation of Equipment,” through H.3, “Amortization of Leasehold Improvements and Other Intangible Assets.” **Report the** depreciation recouped to the operating budget of the activity.

8.3.24. Line H.1 – Depreciation of Equipment. **Report the portion of the balance** of the following account related to depreciation of equipment:

671000	Depreciation, Amortization, and Depletion
--------	---

8.3.25. Line H.2 – Depreciation of Real Property. **Report the amount of the following** account related to depreciation of real property:

671000	Depreciation, Amortization, and Depletion
--------	---

8.3.26. Line H.3 – Amortization of Leasehold Improvements and Other Intangible Assets. **Report the portion of the balance of the** following account related to amortization of leasehold improvements and other intangible assets:

671000	Depreciation, Amortization, and Depletion
--------	---

8.3.27. Line I – Depreciation – Non-DWCF Acquired PP&E. **Line I is a summary line for** Lines I.1, “Non-Recoverable Depreciation of Equipment,” through I.2, “Non-Recoverable Amortization.” **Report the amount of depreciation on PP&E** acquired by the activity with funds other than DWCF Revolving Funds.

8.3.28. Line I.1 – Non-Recoverable Depreciation of Equipment. **Report the portion of the balance** of the following account related to depreciation of equipment acquired by the activity with funds other than DWCF Revolving Funds:

671000	Depreciation, Amortization, and Depletion
--------	---

8.3.29. Line I.2 – Non-Recoverable Amortization. Report the portion of the balance of the following account related to amortization of leasehold improvements and other intangible assets acquired by the activity with funds other than DWCF Revolving Funds:

671000 Depreciation, Amortization, and Depletion

8.3.30. Line J – Bad Debts. Report the balance in the following account:

672000 Bad Debt Expense

8.3.31. Line K – Other Losses and Gains. Line K is a summary line for Lines K.1, “Losses on Disposition of Assets,” through K.5, “Other Miscellaneous (Gains) Losses.” Report gains or losses not captured elsewhere.

8.3.32. Line K.1 – Losses on Disposition of Assets. Report the portion of the balance of the following account related to losses on disposition of assets identified for the following categories: Non-Supply Management Activities; Non-Recoverable Disposal of Equipment/Capital Assets, Non-Federal; Non-Recoverable Base Realignment and Closure (BRAC) Cost, Non-Federal; and Other Expense-Non-Supply Management, Non-Federal.

721000 Losses on Disposition of Assets – Other

8.3.33. Line K.2 – Net (Gains) Losses on Inventory Shrinkage/Deterioration. Report the portion of the balance of the following accounts related to (gains) losses on inventory shrinkage/deterioration as reported by Non-Supply Management activities:

719000 Other Gains
729000 Other Losses

8.3.34. Line K.3 – Net (Gains) Losses on Inventory Excess/Obsolescence/ Spoilage. Report the portion of the balance of the following accounts related to (gains) losses on inventory excess, obsolescence, and spoilage as reported by Non-Supply Management activities:

719000 Other Gains
729000 Other Losses

8.3.35. Line K.4 – Net Other Inventory (Gains) Losses. Report the portion of the balance of the following accounts related to (gains) losses on inventory identified in the following breakdown:

8.3.35.1. Non-Recoverable Gains or Losses on Disposal of Excess Inventory, Supply Management:

711000	Gains on Disposition of Assets – Other
719000	Other Gains
721000	Losses on Disposition of Assets – Other
729000	Other Losses

8.3.35.2. Other Inventory Gains or Losses, Non-Supply Management:

719000	Other Gains
729000	Other Losses

8.3.36. Line K.5 – Other Miscellaneous (Gains) Losses. Report the portion of the balance of the following accounts related to (gains) losses not specifically identified to another sub-category of Other Losses. Only include other (gains) losses related to inventory on this line. Report other (gains) losses not related to inventory on Line 3, “Other Revenue and Financing Sources,” of Part I, “Statement of Operations,” of the Statement of Operations.

719000	Other Gains
729000	Other Losses

8.3.37. For Information Only. Report other miscellaneous information not defined.

8.3.38. Expended Appropriation. Report the amount of appropriations used during the FY for goods and services received or benefits provided.

570000	Expended Appropriations
--------	-------------------------

8.3.39. Direct Labor Hours – Regular. Report the amount of year-to-date non-overtime direct labor hours for Industrial activities.

8.3.40. Direct Labor Hours – Overtime. Report the amount of year-to-date overtime direct labor hours for Industrial activities.

8.3.41. Direct Labor Hours – Total. Report the sum of “Direct Labor Hours – Regular” and “Direct Labor Hours – Overtime.”

9.0 FORMAT OF THE STATEMENT OF OPERATIONS: PART V - RECOVERABLE OPERATING RESULTS (1509) (FORM 15-7)

Form 15-7: Statement of Operations, Part V – Recoverable Operating Results

DEFENSE WORKING CAPITAL FUND			
STATEMENT OF OPERATIONS: PART V-RECOVERABLE OPERATING RESULTS			
(DoD COMPONENT/DWCF ACTIVITY)			
MONTH ENDING _____, 20XX			
(\$ in thousands)			
1. Net Operating Results (NOR)		\$	XXX
2. Deferred Operating Results (Gains/Losses) Net			XXX
a. Net (Gains) Losses on Disposal of Excess Inventory (+/-)	\$	XXX	
b. Disposal of Equipment/Capital Assets (-)		XXX	
c. Non-Reimbursable Base Closure (BRAC) Costs (+/-)		XXX	
d. Capital Asset Surcharge (-)		XXX	
e. Cash Surcharge		XXX	
f. Inventory Replenishment		XXX	
g. Other Approved Gains and Losses (must be footnoted)		XXX	
3. Depreciation, Non-DWCF Acquired PP&E			XXX
4. Net Recoverable Operating Results from Current Year Operations			XXX

9.1 General (150901)

Part V - Recoverable Operating Results, [Form 15-7](#), discloses differences, if any, between NOR reported on Part I, “Statement of Operations,” of the [Statement of Operations](#) and the operating results [that may be](#) used in the budget formulation of stabilized billing rates. As a matter of policy, any amounts that a DoD Component requests [to include in or](#) exclude from its DWCF rates, whether identified in the [OUSD\(C\)](#) guidance as permissible or requested by the DoD Component, must be adequately documented and quantified. Further, all such amounts must be [explicitly](#) approved by [OUSD\(C\)](#) [prior to being included in or](#) excluded from [the](#) report.

9.2 Heading (150902)

Complete the heading of the form to indicate: the reporting DoD Component, the reporting DWCF activity, the reporting period (month), and the calendar year.

9.3 Line Item Instructions (150903)

Instructions for the content of each line item are as follows:

9.3.1. Line 1 – Net Operating Results (NOR). Enter the amount reported on Line 11, “Net Operating Results (NOR),” of Part I, “Statement of Operations,” of the [Statement of Operations](#).

9.3.2. Line 2 – Deferred Operating Results (Gains/Losses) Net

9.3.2.1. Data reported on this line, and its sub-lines, unless otherwise specified, are restricted to specific exclusions approved by [OUSD\(C\)\(P/B\)](#).

9.3.2.2. These exclusions include amounts determined to be adjustments for the difference between the historical and [LAC](#) inventory valuations. Attribute this difference to the value of inventory reflected in the [cost of goods sold](#) at historical cost versus the value of inventory at [LAC](#). [The LAC valuation method is available to DeCA and is not approved for use by other DoD Components. Use](#) this difference on the [AR\(M\)](#) 1307 to adjust the NOR to Net Recoverable Operating Results based on replacement costs that preserve the Working Capital Funds ability to replenish stock.

9.3.2.3. [Line 2 is a summary line for Lines 2.a, “Net \(Gains\) Losses on Disposal of Excess Inventory \(+/-\),” through 2.g, “Other Approved Gains and Losses \(must be footnoted\).”](#) The activity, management command of the reporting [DWCF activity](#), or the DoD Component departmental level [will provide](#), or approve, amounts reported on monthly activity reports.

9.3.3. Line 2.a – Net (Gains) Losses on Disposal of Excess Inventory (+/-). Line 2.a applies only to Supply Management **Activities**. Report **gains (or losses, if applicable)** on potential excess/actual inventory for which **OUSD(C)(P/B)** has approved an exclusion. Report the **portion of the balance** in the following accounts **related to net (gains) losses** on the disposal of excess inventory:

711000	Gains on Disposition of Assets – Other
719000	Other Gains
721000	Losses on Disposition of Assets – Other
729000	Other Losses

9.3.4. Line 2.b – Disposal of Equipment/Capital Assets (-). Report losses (or gains, if applicable) realized upon the disposal of excess equipment and other capital assets when **OUSD(C)(P/B)** has approved the exclusion. Do not report losses (or gains) on excess equipment and other capital assets **due to BRAC** on this line. **Report the losses (or gains) on excess equipment and other capital assets due to BRAC** on Line 2.c, “Non-Reimbursable Base Closure (BRAC) Costs.” Report the amount of losses (or gains) related to the disposal of equipment and capital assets in the following accounts:

711000	Gains on Disposition of Assets – Other
721000	Losses on Disposition of Assets – Other

9.3.5. Line 2.c – Non-Reimbursable Base Closure (BRAC) Costs (+/-). Report losses (or gains, if applicable) in excess of reimbursement **that are a result from a base closure** when **OUSD(C)(P/B)** has approved the exclusion. Report the amount of losses (or gains) related to BRAC costs in the following accounts:

711000	Gains on Disposition of Assets – Other
719000	Other Gains
721000	Losses on Disposition of Assets – Other
729000	Other Losses

9.3.6. Line 2.d – Capital Asset Surcharge (-). **Adjust** capital asset surcharge amounts, positive or negative, included in revenue **in order to** avoid either the return of an apparent gain (or loss) in the development of the subsequent year rate structure. **Leave** this line blank when there is no capital surcharge revenue.

9.3.6.1. **Include** a capital asset surcharge in customer rates only if approved by **OUSD(C)(P/B)**. A capital asset surcharge might be approved when the amount of depreciation expense of existing capital assets included in stabilized rates is either less (or greater) than the budgeted Capital Program.

9.3.6.2. As the capital asset surcharge does not have an offsetting expense, in isolation from other transactions, it **is expected** to result in a gain (or loss) to **NOR**. Deduct the gain (or loss) from **NOR** to prevent its return or charge to customers in subsequent years through **adjusted** rates. Capital asset surcharge amounts may be reported without prior approval of

OUSD(C)(P/B). Report the amount of revenue related to capital asset surcharges in the following accounts:

510000	Revenue From Goods Sold
520000	Revenue From Services Provided

9.3.7. Line 2.e – Cash Surcharge. Similar to capital asset surcharges, activities may include a cash surcharge in their rates. Report the amount of revenue related to cash surcharges in the following accounts:

510000	Revenue From Goods Sold
520000	Revenue From Services Provided

9.3.8. Line 2.f – Inventory Replenishment. Report the difference between the historical cost and LAC for inventory valuation. Report the amount of revenue related to inventory replenishment in the following accounts:

510000	Revenue From Goods Sold
719000	Other Gains
729000	Other Losses

9.3.9. Line 2.g – Other Approved Gains and Losses (must be footnoted). Report the approved gains (or losses) in the following accounts. Exclude amounts already listed in Lines 2.a, “Net (Gains) Losses on Disposal of Excess Inventory,” through 2.f, “Inventory Replenishment.”

510000	Revenue From Goods Sold
520000	Revenue From Services Provided
570000	Expended Appropriations
671000	Depreciation, Amortization, and Depletion
685000	Employer Contributions to Employee Benefit Programs Not Requiring Current Year Budget Authority (Unobligated)-FECA Civilian Personnel Benefits
711000	Gains on Disposition of Assets – Other
719000	Other Gains
721000	Losses on Disposition of Assets – Other
729000	Other Losses
760000	Changes in Actuarial Liability

9.3.10. Line 3 – Depreciation, Non-DWCF Acquired PP&E. Report the amount of depreciation from non-DWCF acquired PP&E identified as an asset capitalized on Line 1.D.(1).d, “Minus: Depreciation, Non-DWCF Acquired PP&E,” of Part II, “Changes in Net Position,” of the Statement of Operations. Report the amount on Line I, “Depreciation - Non-DWCF Acquired PP&E,” of Part IV, “Expenses,” of the Statement of Operations, minus any gains and losses. See Volume 4, Chapters 24 through 28 for additional guidance relating to the recovery of depreciation.

9.3.11. Line 4 – Net Recoverable Operating Results from Current Year Operations. Line 4 is a summary line for Lines 1, “NET OPERATING RESULTS (NOR),” through 3, “Depreciation, Non-DWCF Acquired PP&E.”

9.4 Year-End Procedures (150904)

9.4.1. At FY end, close the NOR to Cumulative Results of Operations. Since part of that amount may be a non-recoverable deferred amount and an amount related to depreciation for non-DWCF acquired PP&E, identify those amounts separately in financial records with attributes.

9.4.2. The amount reported on Line 2, “Deferred Operating Results (Gains/Losses) Net,” will be the opposite of Line 1.B.(2).d, “Plus or Minus: Net Operating Results,” of Part II, “Changes in Net Position,” of the Statement of Operations during the FY and closed to deferred Cumulative Results of Operations during the year-end close process.

9.4.3. Report the amount from Line 3, “Depreciation, Non-DWCF Acquired PP&E,” on Line 1.D.(1).d, “Minus: Depreciation, Non-DWCF Acquired PP&E,” of Part II, “Changes in Net Position,” of the Statement of Operations during the FY. Close this amount to Line 1.D.(1).a, “Assets Capitalized – Beginning of Period,” of Part II during the year-end close process.

9.4.4. Report the amount from Line 4, “Net Recoverable Operating Results from Current Year Operations,” on Line 1.B.(1).d, “Plus or Minus: Net Operating Results,” of Part II during the FY. Close this amount to Cumulative Results of Operations – Recoverable during the year-end close process.

10.0 FORMAT OF THE STATEMENT OF OPERATIONS: PART VI – CAPITAL PROGRAM (1510) (FORM 15-8)

*Form 15-8: Statement of Operations, Part VI – Capital Program

DEFENSE WORKING CAPITAL FUND STATEMENT OF OPERATIONS: PART VI-CAPITAL PROGRAM (DoD COMPONENT/BUSINESS AREA/ACTIVITY) MONTH ENDING _____, 20XX (\$ in thousands)

10.1 General (151001)

10.1.1. Part VI - Capital Program, [Form 15-8](#), reflects the [approved](#) program, obligations, [disbursements](#), and [collections](#) for each [FY](#) of the program. A capital asset for this report must meet the Working Capital Fund Investment Threshold for the program year reported and have a useful life of 2 years or greater.

10.1.2. For reporting [purposes](#), define the reporting period as the year-to-date amounts, i.e., amounts reported since the end of the prior [FY](#) to the end of the reporting month shown in the heading. [Report balances for each program year in Part VI until the program's obligations, disbursements, and collections equal.](#)

10.2 Heading (151002)

Complete the heading of the form to indicate: the reporting DoD Component, the reporting DWCF activity, the reporting period (month), and the calendar year.

*10.3 Columnar Instructions (151003)

The contents of the columns [will](#) be as follows:

10.3.1. Program Year (Column 1). Separate [FY](#) program identification is required. Identify all prior [FYs](#) separately until the obligations, [disbursements](#), and [collections equal](#). Arrange the [FY](#) programs in consecutive order, starting with the least current [FY](#) program.

10.3.2. Approved Program – Original Program (Column 2). The original program amount will be capital authority approved for the reporting [FY](#) on the initial Annual Operating Budget (AOB) for the [FY](#). [Report the](#) carryover from prior [FYs](#) as part of the initial program for that year. The amount reported [will](#) not change in subsequent years. Show the changes in the Capital Program amount in Column 3, “[Approved Program – Program Adjustments](#).”

10.3.3. Approved Program – Program Adjustments (Column 3). [Report](#) adjustments (generally, deductions) to the initial approved Capital Program amounts in this column. Disclose adjustments to the initial approved program amounts in the AOBs for a subsequent program year. The amount reported in this column may change annually as of the beginning of a [FY](#) but [will](#) not change during a [FY](#) except at year-end. At [year-end](#), the amount reported in this column will change to allow the value of Column 4, “[Approved Program – Current Program](#),” to equal Column 7, “[Obligations – Total](#).”

10.3.4. Approved Program – Current Program (Column 4). [Column 4 is a summary column for Columns 2, “Approved Program – Original Program,” and 3, “Approved Program-Program Adjustments.”](#) These amounts [are](#) subject to the provisions of 31 U.S.C. [§1517\(a\)](#).

10.3.5. Obligations – This Fiscal Year (Column 5). Amounts included in this column [will](#) be the total amount of obligations incurred in the current [FY](#).

10.3.6. Obligations – Prior Fiscal Year(s) (Column 6). Amounts included in this column will be the cumulative amount of Column 7, “Obligations – Total,” as of the end of the prior FY. The amount reported will not change during the reporting FY.

10.3.7. Obligations – Total (Column 7). Column 7 is the sum of Column 5, “Obligations – This Fiscal Year,” and Column 6, “Obligations – Prior Fiscal Year(s).” The amount reported in Column 4, “Approved Program – Current Program,” must be greater than or equal to Column 7, “Obligations – Total.”

10.3.8. Disbursements – This Fiscal Year (Column 8). Amounts included in this column will be the total amount of disbursements incurred in the current FY. The amount must agree with Line 1.d, “Funds Disbursed – Capital Program,” of the Statement of Financial Position.

10.3.9. Disbursements – Prior Fiscal Year(s) (Column 9). Amounts included in this column will be the cumulative amount of Column 10, “Disbursements – Total,” as of the end of the prior FY. The amount reported will not change during the reporting FY.

10.3.10. Disbursements – Total (Column 10). Column 10 is a summary column for Columns 8, “Disbursements – This Fiscal Year,” and 9, “Disbursements – Prior Fiscal Year(s).” The amount reported in Column 7, “Obligations – Total,” must be greater than or equal to Column 10, “Disbursements – Total.”

10.3.11. Collections – This Fiscal Year (Column 11). Amounts included in this column will be the total amount of collections reported in the current FY. The amount must agree with Line 1.b, “Funds Collected – Capital Program,” of the Statement of Financial Position.

10.3.12. Collections – Prior Fiscal Year(s) (Column 12). Amounts included in this column will be the cumulative amount of Column 13, “Collections – Total,” as of the end of the prior FY. The amount reported will not change during the reporting FY.

10.3.13. Collections – Total (Column 13). Column 13 is a summary column for Columns 11, “Collections – This Fiscal Year,” and 12, “Collections – Prior Fiscal Year(s).”

11.1 General (151101)

Part VII - Inventory Management Report – Supply Management [Activity](#), [Form 15-9](#), compares fiscal data from the Supply Management [Activity](#) general ledger with the approved operating program for the purpose of monitoring execution of the current year budget. The report applies solely to Supply Management [Activities](#) for the reporting of inventory-related transactions.

11.2 Heading (151102)

Complete the heading of the form to indicate: the reporting DoD Component, the reporting DWCF activity, the reporting period (month), and the calendar year.

11.3 General Reporting Requirements (151103)

Each DoD Component [will](#) submit an Inventory Management Report for each Supply Management [Activity](#) division on forms consistent with the example provided. [Footnotes should be included as an addendum to Form 15-9.](#)

*11.4 [Line Item Instructions](#) (151104)

11.4.1. Line A – Customer Orders Accepted – Cumulative. Enter the total amount of customer orders received for the [FY](#) to date. Report the [current](#) year change [in](#) the following accounts:

422100	Unfilled Customer Orders Without Advance
422200	Unfilled Customer Orders With Advance
425100	Reimbursements and Other Income Earned – Receivable
425200	Reimbursements and Other Income Earned – Collected
425300	Prior-Year Unfilled Customer Orders With Advance – Refunds Paid
426600	Other Actual Business-Type Collections From Non-Federal Sources

11.4.2. Line B – Gross Reimbursable Sales of Property, Inventory, & Services – Cumulative. Enter the total sales for the [FY](#) to date. The amount reported [on this line will](#) equal Line 2.a, “Gross Revenue from Sales,” of Part I, “Statement of Operations,” of the [Statement of Operations](#). Report the balance of the following accounts:

510000	Revenue From Goods Sold
520000	Revenue From Services Provided

11.4.3. Line C – Unfilled Customer Orders. Enter the amount of requisitions or orders outstanding from customers. Report the balance of the following accounts:

422100	Unfilled Customer Orders Without Advance
422200	Unfilled Customer Orders With Advance

11.4.4. Line D – Customer Returns – Credits Granted – Cumulative. Enter the amount of credit granted to customers for material returns for the FY to date. The amount reported will equal Line 2.b, “Minus: Credits Allowed on Sales,” of Part I, “Statement of Operations,” of the Statement of Operations. Report the amount of credit granted to customers for material returns in the following accounts:

510900	Contra Revenue for Goods Sold
520900	Contra Revenue from Services Provided

11.4.5. Line E – Net Reimbursable Sales – Cumulative. Enter the net sales for this FY to date. Line E is the net sum of Line B, “Gross Reimbursable Sales of Property, Inventory, & Services – Cumulative,” less Line D, “Customer Returns – Credits Granted – Cumulative.” The amount reported will equal Line 2, “Revenue from Sales of Goods and Services,” of Part I, “Statement of Operations,” of the Statement of Operations.

11.4.6. Line F – Purchases at Cost (LAC) – Cumulative. Enter the amount of purchases at cost for this FY to date. The LAC valuation method is available to DeCA and is not approved for use by other DoD Components. The amount reported will equal Line 2.e, “Plus: Purchases at Cost,” of Part III, “Cost of Goods Sold,” of the Statement of Operations. Report the portion of the following general ledger account:

152900	Inventory – Allowance (Purchased at Cost)
--------	---

11.4.7. Line G – Obligations – Cumulative. Enter the total obligations incurred this FY to date. Line G is a summary line for Lines H, “Obligations – Reimbursable,” through J, “Obligations – Mobilization – Cumulative.”

11.4.8. Line H – Obligations – Reimbursable. Enter the amount of operating obligations incurred this FY to date. Do not include obligations reported on Lines I, “Obligations – Augmentation – Cumulative,” and J, “Obligations – Mobilization – Cumulative.” Report the current year net change in the following accounts:

480100	Undelivered Orders – Obligations, Unpaid
480200	Undelivered Orders – Obligations, Prepaid/Advanced
487100	Downward Adjustments of Prior-Year Unpaid Undelivered Orders – Obligations, Recoveries
488100	Upward Adjustments of Prior-Year Undelivered Orders – Obligations, Unpaid
488200	Upward Adjustments of Prior-Year Undelivered Orders – Obligations, Prepaid/Advanced
490100	Delivered Orders – Obligations, Unpaid
490200	Delivered Orders – Obligations, Paid
497100	Downward Adjustments of Prior-Year Unpaid Delivered Orders – Obligations, Recoveries
497200	Downward Adjustments of Prior-Year Paid Delivered Orders – Obligations, Refunds Collected

498100	Upward Adjustments of Prior-Year Delivered Orders – Obligations, Unpaid
498200	Upward Adjustments of Prior-Year Delivered Orders – Obligations, Paid

11.4.9. Line I – Obligations – Augmentation – Cumulative. Enter the amount of obligations incurred this FY to date for inventory augmentation, initial issue. Volume 2B, Chapter 9 defines purposes for inventory augmentation. Do not include obligations reported on Lines H, “Obligations – Reimbursable,” and J, “Obligations – Mobilization – Cumulative.” Report the current year net change in the following accounts:

480100	Undelivered Orders – Obligations, Unpaid
480200	Undelivered Orders – Obligations, Prepaid/Advanced
483200	Undelivered Orders – Obligations Transferred, Prepaid/Advanced
487100	Downward Adjustments of Prior-Year Unpaid Undelivered Orders – Obligations, Recoveries
487200	Downward Adjustments of Prior-Year Prepaid/Advanced Undelivered Orders – Obligations, Refunds Collected
488100	Upward Adjustments of Prior-Year Undelivered Orders – Obligations, Unpaid
488200	Upward Adjustments of Prior-Year Undelivered Orders – Obligations, Prepaid/Advanced
490100	Delivered Orders – Obligations, Unpaid
490200	Delivered Orders – Obligations, Paid
498100	Upward Adjustments of Prior-Year Delivered Orders – Obligations, Unpaid
498200	Upward Adjustments of Prior-Year Delivered Orders – Obligations, Paid

11.4.10. Line J – Obligations – Mobilization – Cumulative. Enter the amount of obligations incurred this FY to date for war reserve purposes. Volume 2B, Chapter 9 defines purposes for war reserves. Do not include obligations reported on Lines H, “Obligations – Reimbursable,” and I, “Obligations – Augmentation – Cumulative.” Report the current year net change in the following accounts:

480100	Undelivered Orders – Obligations, Unpaid
480200	Undelivered Orders – Obligations, Prepaid/Advanced
483200	Undelivered Orders – Obligations Transferred, Prepaid/Advanced
487100	Downward Adjustments of Prior-Year Unpaid Undelivered Orders – Obligations, Recoveries
487200	Downward Adjustments of Prior-Year Prepaid/Advanced Undelivered Orders – Obligations, Refunds Collected
488100	Upward Adjustments of Prior-Year Undelivered Orders – Obligations, Unpaid
488200	Upward Adjustments of Prior-Year Undelivered Orders – Obligations, Prepaid/Advanced

490100	Delivered Orders – Obligations, Unpaid
490200	Delivered Orders – Obligations, Paid
498100	Upward Adjustments of Prior–Year Delivered Orders – Obligations, Unpaid
498200	Upward Adjustments of Prior–Year Delivered Orders – Obligations, Paid

11.4.11. Line K – Outstanding Commitments. Enter the amount of commitments outstanding that have not resulted in obligations. Report the balance of the following account:

470000	Commitments – Programs Subject to Apportionment
--------	---

11.4.12. Line L – Inventories – Stock On Hand (LAC). Enter the total amount of inventories on hand at the end of the reporting period after adjustment to LAC. Exclude inventories reported on Line N, “Other Inventories (LAC),” and on Line P, “Inventories in Transit (LAC).” Report the balance of the following accounts after adjustment to the estimated cost:

152100	Inventory Purchased for Resale
152200	Inventory Held in Reserve for Future Sale
152300	Inventory Held for Repair
152400	Inventory – Excess, Obsolete, and Unserviceable
152900	Inventory – Allowance

11.4.13. Line M – Inventories – Stock On Hand (MAC). Enter the total amount of inventories on hand at the end of the reporting period reported at MAC. Exclude inventories reported on Line O, “Other Inventories (MAC),” and on Line Q, “Inventories in Transit (MAC).” Report the balance of the following accounts:

152100	Inventory Purchased for Resale
152200	Inventory Held in Reserve for Future Sale
152300	Inventory Held for Repair
152400	Inventory – Excess, Obsolete, and Unserviceable
152900	Inventory - Allowance

11.4.14. Line N – Other Inventories (LAC). Enter the total amount of other inventories after adjustment to LAC. Exclude inventories reported on Line L, “Inventories – Stock On Hand (LAC),” and on Line P, “Inventories in Transit (LAC).” Report the balance of the following accounts consisting of work-in-process, on loan to others for use, and with agents:

152500	Inventory – Raw Materials
152600	Inventory – Work-in-Process
152700	Inventory – Finished Goods
152900	Inventory – Allowance

11.4.15. Line O – Other Inventories (MAC). Enter the total amount of other inventories reported at MAC. Exclude inventories reported on Line M, “Inventories – Stock On Hand (MAC),” and on Line Q, “Inventories in Transit (MAC).” Report the balance of the following accounts consisting of work-in-process, on loan to others for use, and with agents:

152500	Inventory – Raw Materials
152600	Inventory – Work-in-Process
152700	Inventory – Finished Goods
152900	Inventory – Allowance

11.4.16. Line P – Inventories in Transit (LAC). Enter the amount of material in transit after adjustment to LAC. Exclude inventories reported on Line L, “Inventories – Stock On Hand (LAC),” and on Line N, “Other Inventories (LAC).” Report the portion of the balance of the following accounts identified as being in transit:

152100	Inventory Purchased for Resale
152300	Inventory Held for Repair
152500	Inventory – Raw Materials
152700	Inventory – Finished Goods

11.4.17. Line Q – Inventories in Transit (MAC). Enter the amount of material in transit reported at MAC. Exclude inventories reported on Line M, “Inventories – Stock On Hand (MAC),” and on Line O, “Other Inventories (MAC).” Report the portion of the balance of the following accounts identified as being in transit:

152100	Inventory Purchased for Resale
152300	Inventory Held for Repair
152500	Inventory – Raw Materials
152700	Inventory – Finished Goods

11.4.18. Line R – Total Inventories (LAC). Line R is a summary line for Line L, “Inventories – Stock on Hand (LAC);” Line N, “Other Inventories (LAC);” and Line P, “Inventories in Transit (LAC).”

11.4.19. Line S – Total Inventories (MAC). Line S is a summary line for Line M, “Inventories – Stock on Hand (MAC);” Line O, “Other Inventories (MAC);” and Line Q, “Inventories in Transit (MAC).”

11.4.20. Line T – Customer Returns Without Credit – Cumulative. Enter the amount of returns from customers without credit. The amount reported will equal the net of the total amount of returns from customers less Line D, “Customer Returns – Credits Granted – Cumulative.” Report the portion of the balance of the following accounts for customer returns without credit:

152900	Inventory – Allowance
719000	Other Gains

11.4.21. Line U – Transfers to Reutilization and Market – Cumulative. Enter the net amount transferred to the Defense Reutilization & Marketing Service for the FY to date. Report the portion of the balance of the following account for transfers to reutilization and marketing offices:

721000 Losses on Disposition of Assets – Other

11.4.22. Line V – Material Returns to Suppliers – Cumulative. Enter the total amount of returns to non-federal suppliers and contractors.

11.4.23. Line W – Undelivered Orders. Enter the total amount of undelivered orders outstanding. Report the balance of the following accounts:

480100 Undelivered Orders – Obligations, Unpaid
 480200 Undelivered Orders – Obligations, Prepaid/Advanced
 483200 Undelivered Orders – Obligations Transferred, Prepaid/Advanced
 487100 Downward Adjustments of Prior-Year Unpaid Undelivered
 Orders – Obligations, Recoveries
 487200 Downward Adjustments of Prior-Year Prepaid/Advanced
 Undelivered Orders – Obligations, Refunds Collected
 488100 Upward Adjustments of Prior-Year Undelivered
 Orders – Obligations, Unpaid
 488200 Upward Adjustments of Prior-Year Undelivered
 Orders – Obligations, Prepaid/Advanced

11.4.24. Line X – Fund Balance with Treasury. Enter the total amount of Fund Balance with Treasury. The amount reported will equal the total of Lines 1.f, “Funds with Treasury – Operating Program,” and 1.g, “Funds with Treasury – Capital Program,” of the Statement of Financial Position. Report the balance of the following accounts:

101000 Fund Balance with Treasury
 109000 Fund Balance with Treasury While Awaiting a Warrant

11.4.25. Line Y – Funds Collected – Cumulative. Enter the portion of the balance of the following account as it relates to funds collected during the current FY. The amount reported will equal the total of Lines 1.a, “Funds Collected – Operating Program,” and 1.b, “Funds Collected – Capital Program,” of the Statement of Financial Position.

101000 Fund Balance with Treasury

11.4.26. Line Z – Funds Disbursed – Cumulative. Enter the portion of the balance of the following account as it relates to funds disbursed during the current FY. The amount reported will equal the total of Lines 1.c, “Funds Disbursed – Operating Program,” and 1.d, “Funds Disbursed – Capital Program,” of the Statement of Financial Position.

101000 Fund Balance with Treasury

11.4.27. Line AA – Accounts Receivable – Intragovernmental. Enter the amount of receivables outstanding due from other Federal Governmental entities. Report the portion of the balance of the following accounts as they relate to accounts receivable from other Federal Agencies. The amount reported will equal the total of Lines 3.a, “Accounts Receivable, Intragovernmental,” and 3.b, “Accounts Receivable, Intragovernmental, Undistributed,” of the Statement of Financial Position.

131000	Accounts Receivable
131900	Allowance for Loss on Accounts Receivable
134000	Interest Receivable – Not Otherwise Classified
136000	Penalties and Fines Receivable – Not Otherwise Classified
137000	Administrative Fees Receivable – Not Otherwise Classified

11.4.28. Line AB – Accounts Receivable – Non-Federal. Enter the amount of receivables outstanding due from non-federal entities. Report the portion of the balance of the following accounts as they relate to accounts receivable from non-federal agencies and entities. The amount reported will equal the total of Lines 3.c, “Accounts Receivable, Non-Federal,” and 3.d, “Accounts Receivable, Non-Federal, Undistributed,” of the Statement of Financial Position.

131000	Accounts Receivable
131900	Allowance for Loss on Accounts Receivable
134000	Interest Receivable – Not Otherwise Classified
134700	Allowance for Loss on Interest Receivable – Not Otherwise Classified
136000	Penalties and Fines Receivable – Not Otherwise Classified
136700	Allowance for Loss on Penalties and Fines Receivable – Not Otherwise Classified
137000	Administrative Fees Receivable – Not Otherwise Classified
137700	Allowance for Loss on Administrative Fees Receivable – Not Otherwise Classified

11.4.29. Line AC – Accounts Payable. Enter the total amount of accounts payable outstanding for goods and services from, progress in contract performance made by, and rents due to DoD and other Federal and non-federal entities. See Volume 10, Chapter 10 and the FAR part 32 for additional guidance relating to contract financing payments. Report the balance of the following accounts. The amount reported will equal Line 11.a, “Accounts Payable, Net,” of the Statement of Financial Position.

211000	Accounts Payable
212000	Disbursements in Transit
214000	Accrued Interest Payable – Not Otherwise Classified

11.4.30. Footnotes. Include in a footnote the estimated balance of Line X, “Fund Balance with Treasury,” that is the result of appropriations. [Organize the data](#) by type of appropriation, i.e., inventory augmentation or War Reserves and the estimated amount from operations. Include in a footnote the amounts of Lines L, “Inventories – Stock on Hand (LAC),” and M, “Inventories – Stock on Hand (MAC),” at standard price.

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by **blue** font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

The previous version dated **July 2021** is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Administrative updates in accordance with Department of Defense (DoD) Financial Management Regulation (FMR) Revision Standard Operating Procedures.	Revision
4.0	Added the definition of DoD consolidation entities.	Addition
4.1	Revised paragraph to clarify language on the required Office of Management and Budget (OMB) consolidation entities. Removed duplicate language regarding financial statement requirement that is described in paragraph 1.1 and section 2.0.	Revision
4.2	Added description of the Senate Select Committee on Intelligence (SSCI) and removed list of SSCI entities.	Addition
4.3	Moved the Other Defense Activities (ODAs) subparagraph under the Non-OMB Consolidation Entities paragraph.	Revision
7.0 (Deleted previous 5.2 through 5.9)	Added section 7.0 to direct readers to the contents of the financial statement sections and preparation instructions described in other FMR chapters. Deleted subparagraphs to remove redundant information.	Addition/ Deletion
Throughout	Updated the term “reporting entity/entities” for “consolidation entity/entities” where applicable.	Revision

CHAPTER 1

INTRODUCTION TO THE FORM AND CONTENT OF THE FINANCIAL STATEMENTS

1.0 GENERAL

1.1 Overview

Under the provisions of [Title 31, United States Code, section 3515](#) (31 U.S.C. §3515), the Department of Defense (DoD or the “Department”) is required to have annual audited financial statements covering all accounts and associated activities of the Department. As implemented by the Office of Management and Budget (OMB), the Department is required to prepare both Agency-wide annual audited financial statements and separate financial statements for reporting entities as defined in Federal Accounting Standards Advisory Board, Statement of Federal Financial Accounting Standards ([SFFAS](#)) 47, “Reporting Entity.” The financial statements are expected to provide information to DoD program managers, Congress, and the public; thereby facilitating both effective allocation of resources and assessment of management performance and stewardship. The objective is to produce financial statements that will be used to improve the management of the Department. Additionally, consistent with the objectives of the Statements of Federal Financial Accounting Concepts and SFFASs, the Department continues to work toward the integration of budget and financial information in order to provide for more effective program management at all levels.

1.2 Purpose

[This chapter presents](#) the form and content of quarterly and annual financial statements prepared within the DoD and [provides](#) a framework for the DoD Components while allowing flexibility to [provide](#) useful information to decision makers. This guidance applies to all DoD [consolidation](#) entities identified in section 4.0. [This chapter](#) identifies the level at which functions or funds should be reported on a consolidated basis, prescribes the specific authoritative guidance on financial statement format and disclosures, and provides other instructions necessary for the preparation of annual audited financial statements and quarterly unaudited financial statements. When recording accounting transactions, follow the accounting standards hierarchy found in Volume 1, Chapter 2.

1.3 Authoritative Guidance

[The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:](#)

1.3.1. [OMB Circular A-136](#), “Financial Reporting Requirements;”

1.3.2. 31 U.S.C. § 3515, “Financial statements of agencies;”

1.3.3. [DoD Financial Statements Audit Guide](#); and

1.3.4. Defense Finance and Accounting Service [\(DFAS\) Financial Reporting Guidance](#).

2.0 BACKGROUND

Federal agencies traditionally prepared financial reports to monitor and control the obligation and expenditure of budgetary resources. With the enactment of [Public Law 101-576](#), “Chief Financial Officers Act of 1990” (CFO Act), and [Public Law 103-356](#), “Government Management Reform Act of 1994”, the Congress called for the production of audited financial statements. The statements must fully disclose a federal entity’s financial position, results of operations, and provide information on the effective allocation of resources which Congress, Agency managers, the public, and others can assess management performance and stewardship. Accordingly, OMB in consultation with the CFO Council, the Council of the Inspectors General on Integrity and Efficiency, and other interested parties developed the formats and instructions for financial statements described in this volume. The annual audited financial statements must be organized as shown in Table 1-1.

3.0 REQUIRED REPORTING DATES

Authoritative guidance requires the preparation of annual audited financial statements for the period ending on September 30 of each fiscal year and the quarterly unaudited financial statements for periods ending December 31, March 31, and June 30 of each fiscal year. [The Department](#) must submit unaudited interim financial statements to OMB 21 business days after the end of the third quarter of the fiscal year and Notes to the Financial Statements 45 business days after the end of the third quarter of the fiscal year. Annual audited financial statements are due to OMB, the Treasury, the Government Accountability Office, and the Congress in accordance with OMB Circular A-136.

*4.0 [DOD CONSOLIDATION ENTITIES](#)

The DoD Agency-wide financial statements provide the financial status of the entire Department. [DoD consolidation entities represent entities that are consolidated in the DoD Agency-wide financial statements, including the following:](#)

*4.1 [OMB Required Consolidation Entities](#)

[4.1.1. Tier 1](#) Component entities are required by OMB to prepare stand-alone audited financial statements and quarterly unaudited financial statements.

[4.1.2. These Components are listed in Appendix B of OMB’s annual bulletin, “Audit Requirements for Federal Financial Statements.”](#)

*4.2 [Senate Select Committee on Intelligence \(SSCI\) Consolidation Entities](#)

[4.2.1. The SSCI conducts various reviews of intelligence programs or events for entities involved in the intelligence community, ranging from routine and continuing study \(the conduct of covert action programs and intelligence operations\) to formal inquiries.](#)

4.2.2. SSCI consolidation entities must submit annual audited and unaudited quarterly financial statements to the SSCI to reveal their annual intelligence efforts.

*4.3 Non-OMB Consolidation Entities

The non-OMB consolidation entities represent all others not identified in paragraphs 4.1 and 4.2. These entities are not required to produce stand-alone audited financial statements and quarterly unaudited financial statements per OMB Circular A-136. The management-approved “DoD Consolidation Entities and Disclosure Entities” list is located on the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), Office of the Deputy Chief Financial Officer, Financial Improvement and Audit Remediation (FIAR) Directorate website (DoD Common Access Card required) under the “Policies, Publications, & Guidance” heading. The FIAR Directorate is responsible for updating this list annually.

4.3.1. DoD Designated Audit Entities. DoD has designated certain consolidation entities to adhere to the same audit remediation efforts as congressionally mandated OMB consolidation entities. These consolidation entities must perform all audit remediation efforts in accordance with the FIAR guidance and must undergo annual stand-alone financial statement audits.

4.3.2. Other Defense Activities (ODAs). The ODAs are entities of the Department that are reported in the consolidating/combining statements, which comprise the DoD Agency-wide annual audited financial statements and quarterly unaudited financial statements. Tier 2 includes Components undergoing a stand-alone audit. Tiers 3 and 4 include Components not under a stand-alone audit.

4.3.3. Other Material Defense Agencies and Remaining Entities. Other material Defense Agencies are consolidation entities that must undergo annual examinations or other independent validations of their financial statement balances. Remaining entities include organizations and funds not material to the DoD consolidated financial statements. Remaining entities must perform audit remediation efforts to improve their internal controls and will be included in the DoD consolidated financial statement audit.

4.3.3.1. To support the preparation of the Agency-wide financial statements, other material Defense Agencies and remaining entities must submit trial balances and corresponding adjustments within Defense Departmental Reporting System (DDRS) – Audited Financial Statements, DDRS-Budgetary, and DDRS – Data Collection Module. Additionally, these entities are required to provide information as outlined by the quarterly Agency-wide reporting schedules and guidance.

4.3.3.2. To ensure continued improvement to financial reporting in accordance with Department objectives, other material Defense Agencies and remaining entities must continue value-added financial improvement efforts including evaluation and improvements to internal controls over financial reporting. Reasonableness reviews of financial statements for other material Defense Agencies and remaining entities during non-reporting periods may result in questions for explanation or future corrective action or both. The OUSD(C) delegated financial statement review of the entity’s financial information and OUSD(C) oversight of these

[consolidation](#) entities to the respective Component's Comptroller or senior financial manager. However, designated DFAS Financial Reporting staff will remain available to assist in responding to issues or inquiries.

4.3.3.3. Based on the FIAR strategy, cost mitigation requirements, and expected progression towards full assertion of auditability, each other material Defense Agency and remaining entity will determine their internal reporting and audit requirements, as deemed necessary for continued improvement of financial data and achievement of audit objectives. Entities currently receiving an unmodified audit opinion should consider the cost versus value of the audit in determining requirements and objectives.

4.4 Pass-Through Accounts

Pass-through accounts are included in the consolidated financial statements. While financial transactions flow through such accounts to or from other entities, these accounts do not ultimately own that activity. Most pass-through account balances are eliminated within the DoD-wide consolidating statements, or with Treasury. The exception are account balances affecting the Statement of Budgetary Resources, which is presented on a combined basis. The pass-through accounts [are](#) identified on the DoD [Consolidation Entities and Disclosure](#) Entities list referenced [in](#) paragraph 4.3.

5.0 DISCLOSURE ENTITIES

Disclosure entities are those non-DoD entities required to be disclosed in the footnotes to the consolidated financial statements but are not included in the primary financial statements of the Department. The disclosure entities [are](#) identified on the DoD [Consolidation Entities and Disclosure](#) Entities list referenced [in](#) paragraph 4.3.

6.0 AUDIT COMPLIANCE

6.1. OUSD(C) Audit Requirements

6.1.1. OMB [required consolidation](#) entities and non-OMB [consolidation](#) entities are required to comply with the FIAR requirements and other guidance issued by the OUSD(C).

6.1.2. Each Component, after completing their assertion of auditability, and with the advice of the DoD Office of the Inspector General (OIG), must establish an audit committee to oversee its financial audit.

6.1.2.1. The purpose of the audit committee is to establish audit requirements, identify contract deliverables, monitor the execution of the contract, and identify and assist with resolution of obstacles to an unmodified audit opinion.

6.1.2.2. Once DoD Component [consolidation](#) entities are deemed auditable, the audit committee's focus should be on ensuring a forum exists to address ongoing accounting and auditing issues.

6.1.2.3. Audit committees for OMB required consolidation entities identified in paragraph 4.1 must include a representative of DoD OIG.

6.2. OMB Audit Requirements

Audits of Federal financial statements are conducted in accordance with the requirements found in the annually updated OMB Bulletin, “Audit Requirements for Federal Financial Statements.” These provisions apply to audits of financial statements of executive departments, agencies, government corporations, and certain components of these agencies. The Bulletin reflects changes that apply as a result of other revised OMB guidance, including OMB Circular A-136.

*7.0 CONTENT OF ANNUAL AUDITED AND QUARTERLY UNAUDITED FINANCIAL STATEMENTS

7.0.1. The annual audited financial statements of the OMB required consolidation entities identified in paragraph 4.1 must be comprised of four major sections. Non-OMB consolidation entities not identified elsewhere in this chapter are to follow the requirements outlined in paragraph 4.3.

7.0.2. The quarterly unaudited financial statements required for third and fourth quarters must be comprised of the principal statements and notes to the principal statements and, if applicable, supporting consolidating and/or combining statements. Although the first and second quarter principal statements must be prepared, the preparation of accompanying notes for the first and second quarter is not required. A more detailed outline appears in Table 1-1.

7.0.3. The four required major sections and the sequence of their presentation are as follows:

7.0.3.1. Agency Head Transmittal Letter (Guidance for required information in the Agency Head Transmittal Letter is provided in Chapter 3);

7.0.3.2. Management’s Discussion and Analysis (MD&A) (Guidance for preparation of MD&A is provided in Chapter 3);

7.0.3.3. Financial Section; and

7.0.3.4. Other Information (Guidance for preparation of Other Information is provided in Chapter 3).

7.0.4. The accompanying subsections of the Financial Section are as follows:

7.0.4.1. CFO Message;

7.0.4.2. Audit Report;

7.0.4.3. Principal Statements; (Instructions for the preparation of the Principal Statements are contained in Chapters 4, 5, 6, and 7);

7.0.4.3.1. Balance Sheet (Consolidated);

7.0.4.3.2. Statement of Net Cost (Consolidated);

7.0.4.3.3. Statement of Changes in Net Position (Consolidated); and

7.0.4.3.4. Statement of Budgetary Resources (Combined)

7.0.4.4. Notes to the Principal Statements (Instructions for the preparation of the required notes are contained in Chapter 10); and

7.0.4.5. Required Supplementary Information (RSI) (Specific guidance for reporting RSI is contained in Chapter 12).

VOLUME 6B, CHAPTER 2: “GENERAL INSTRUCTIONS FOR THE FINANCIAL STATEMENTS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by [blue](#) font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [***bold, italic, blue, and underlined font***](#).

The previous version dated [September 2018](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Reformatted chapter and updated hyperlinks to comply with current administrative instructions.	Revision
All	Clarified language throughout the chapter to improve readability.	Revision
1.2 (020102)	Clarified overall responsibility for management and preparation of financial statements, and explained that annual updates to Office of Management and Budget (OMB) Circular A-136, dated June 28, 2019, are on the OMB website.	Revision
3.1.1. (020301.A), 3.1.3. (020301.C)	Clarified requirements related to other departmental reporting and analyses activity.	Revision
3.2.2. (020302.B)	Clarified submission requirements for the final Agency Financial Report (AFR).	Revision
5.2.3. (020502.C)	Updated language regarding Management Schedules of Information.	Revision
5.3 (020503)	Included additional sources of guidance for preparation of the Legal Representation Letter (LRL).	Revision
5.5 (020505)	Updated language explaining requirement of Inspector General to make notification of “no changes” or “changes” due to a change in the likelihood of a loss, or the amount of a loss, after the effective date of the final LRL but before the date of the audit report on the Financial Report of the U.S. Government, per OMB Circular A-136, dated June 28, 2019.	Revision

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
6.3 (020603)	Clarified that total figures disclosed in the supporting notes and other schedules must conform to the amounts presented in the body of the financial statements, per OMB Circular A-136, dated June 28, 2019.	Revision
6.5 (020605)	Updated variance analysis threshold standard, per OMB Circular A-136, dated June 28, 2019.	Revision
6.10 (020610)	Deleted final sentence about discretion of Components to prepare consolidating or combining financial statements and include them as part of their AFR, per OMB Circular A-136, dated June 28, 2019.	Deletion
6.16 (020616)	Deleted reference to Government-wide Financial Report System since it is no longer used.	Deletion
6.16.1. (020616.A)	Clarified guidance for the draft/working versions and final version of the Financial Section of the AFR.	Revision

CHAPTER 2

GENERAL INSTRUCTIONS FOR THE FINANCIAL STATEMENTS

1.0 GENERAL (0201)

1.1 Purpose (020101)

This chapter identifies the general requirements for preparation and submission of financial statements and the required disclosures, as required by the Office of Management and Budget (OMB) and other departmental guidance. It establishes the roles and responsibilities of departmental and agency financial managers, and provides specific instructions for preparation of the Management Representation Letter (MRL) and the Legal Representation Letter (LRL).

*1.2 Authoritative Guidance (020102)

Guidance on the content and submission of the financial statements is defined in the OMB [Circular A-136](#), “Financial Reporting Requirements,” and Bulletin [19-03](#), “Audit Requirements for [Federal Financial Statements](#).” Applicable accounting principles are contained in the Statements of Federal Financial Accounting Standards ([SFFAS](#)) and Statements of Federal Financial Accounting Concepts ([SFFAC](#)). The DoD Financial Statement Audit [Guide](#) details the roles and responsibilities of reporting entities and service providers, as well as the processes they must follow, to achieve audit readiness. The Department’s financial reporting entities and related information are identified in Chapter 1. [Volume 1, Chapter 1 explains the authority granted to the Under Secretary of Defense \(Comptroller\) \(USD\(C\)\) for management and preparation of DoD financial statements. Annual updates to Circular A-136 are on the \[OMB\]\(#\) website.](#)

2.0 RESPONSIBILITIES (0202)

2.1 Responsibility for Preparation of the Financial Statements (020201)

The primary responsibility for the financial statements rests with the reporting entity’s management. Responsibility for preparation of the principal statements and notes, however, may be shared with the accounting organization responsible for maintaining the financial records of the reporting entity. Additional information for the responsible accounting activities who prepare the required supporting statements, and the responsible officials for those statements, can be found in the Defense Finance and Accounting Service (DFAS) Financial Reporting [Guidance](#). The responsible official must ensure that: (1) known business processes/systems that could materially impact the financial statements are communicated; (2) all necessary data that originates in nonfinancial processes and systems (e.g., inventory and property data) is provided; (3) [consolidating/combining](#) statements are reviewed and analyzed; and (4) feedback is provided to the entity's supporting accounting organization as required or upon request.

2.2 Reporting of Foreign Military Sales and Other Security Assistance (020202)

The Defense Security Cooperation Agency administers certain Foreign Military Sales (FMS) and other security assistance programs on behalf of the Executive Office of the President (EOP). While FMS activity is primarily reported separately from DoD activity, OMB has approved the following provisions regarding the specific information on the financial activity of FMS programs that is to be included in the DoD financial statements.

2.2.1. Revenue and expense amounts pertaining to FMS goods or services provided from the stocks of the DoD Components on a reimbursable basis must be reported in the financial statements of the applicable selling DoD Component and in the DoD Agency-wide consolidated statements.

2.2.2. Principal statements for the following EOP accounts are to be prepared by DFAS and reported separately from the DoD Agency-wide financial statements: 11*1081, 11*1082, 11*1085, 11*4116, 11X4121, 11X4122, 11X4174, and 11X8242. Descriptions of these accounts are contained in Volume 15, Chapter 1.

3.0 REPORTING SCHEDULES AND QUALITY CONTROL REVIEWS (0203)

3.1 Interim Financial Reporting (020301)

* 3.1.1. Interim financial reporting requirements are detailed in the OMB Circular A-136 and in the DFAS Financial Reporting Guidance. All DoD financial reporting entities are required to support the DFAS and USD(C) preparation and analysis of the Department's quarterly Agency-wide financial statements that must be submitted to OMB 21 business days after the end of the third quarter of the fiscal year (FY). The OMB-designated reportable entities are required to submit their interim unaudited Balance Sheet, Statement of Net Cost (SNC), and Statement of Changes in Net Position (SCNP) to OMB 21 business days after the end of the third quarter of the FY. More detailed reporting and timing requirements are contained in the DFAS Financial Reporting Guidance. Agencies are required to use the [MAX](#) Federal Community to submit their interim financial statements electronically to OMB.

3.1.2. The DoD Agency-wide submission for the interim quarter and for the fiscal year end must include an analysis of any material differences. The analysis must only be on the material differences between the interim quarter and the same quarter from the prior year. It must be noted in the analysis if a financial statement does not have material differences between comparative periods. The analysis must include management's explanation of material differences in types or amounts of assets, liabilities, costs, and revenues.

* 3.1.3. [USD\(C\)](#) and DFAS may require the OMB reportable entities to prepare and submit full note disclosures, variance analyses, and [the](#) Statement of Budgetary Resources (SBR) to Standard Form [\(SF\) 133](#), "Report on Budget Execution and Budgetary Resources," reconciliations as part of other departmental reporting and analyses activity to support the Agency-wide submission due to OMB after the interim quarter and at fiscal year-end. Specific requirements and timelines are detailed in the DFAS Financial Reporting Guidance.

3.1.4. Additionally, the DoD Financial Statement Audit Guide establishes other financial reporting requirements to assist in achieving full auditability. These financial reporting requirements and timelines are detailed within the Guide.

3.15. Chapter 10 requires the disclosure of all abnormal balances appearing on the individual note schedules or financial statement lines. These disclosures are reported in the accompanying notes to the financial statements in the third and fourth quarters of each FY. In support of the DFAS preparation and submittal of the Agency-wide interim reports, all Components must investigate abnormal balances and correct them if required by the DFAS Financial Reporting Guidance. Further, all Components must explain material, abnormal proprietary and budgetary United States Standard General Ledger ([USSGL](#)) account balances of \$500,000 or greater on the summary program-level trial balance within the Defense Departmental Reporting System–Audited Financial Statement (DDRS-AFS). They must also explain any abnormal balance that appears on the statements or note schedule, regardless of amount. Refer to the DFAS Financial Reporting Guidance for detailed disclosure requirements.

3.2 Annual Financial Statements (020302)

3.2.1. In accordance with OMB Circular A-136, the Department is required to submit a draft of the Agency Financial Report (AFR) to OMB's Office of Federal Financial Management, and the appropriate OMB Resource Management Office, 10 business days before issuing the final AFR. This draft must include all sections of the Agency-wide AFR, as identified in Chapter 1, except the audit report if it is not available at that time. If the audit report is not available when the draft AFR is submitted to OMB, then a draft audit report, or a summary of the audit results including the type of opinion anticipated and names and descriptions of material weaknesses and significant deficiencies, is to be provided to OMB as soon as it is available. Agencies are required to use the MAX Federal Community to submit their draft AFRs electronically to OMB.

* 3.2.2. Each of the reporting entities identified in Chapter 1 is required to submit audited financial statements [in accordance with](#) the detailed financial statement reporting [schedule](#) contained in the DFAS Financial Reporting Guidance. The final AFR must be posted to the reporting entity's public website the same day the report is submitted to OMB, the Government Accountability Office (GAO), the U.S. Department of the Treasury (Treasury), and the Congress. Agencies must submit their final reports to OMB using the MAX Federal Community and to the Treasury and GAO using the contact information provided in Appendix B of OMB Circular A-136. [Additionally, reporting entities must also submit their final reports to the USD\(C\).](#)

3.3 Quality Control Reviews of Financial Statements and Notes (020303)

Each Component, along with their supporting accounting organization, must review [its](#) financial statements and notes to ensure the completeness of financial information provided by both the accounting activity and the various Component functional organizations.

3.4 Key Financial Statements Preparation Due Dates (020304)

The development and publication of the financial statements requires coordinated actions by entity management, the supporting accounting organization, and the audit community. Additional information regarding the key financial statement preparation milestones is in the financial statement reporting schedule in the DFAS Financial Reporting Guidance.

4.0 MANAGEMENT REPRESENTATION LETTERS (0204)

4.1 Preparation and Submission (020401)

4.1.1. Auditors require the responsible senior manager to prepare and submit an MRL, for each reporting entity audited, prior to the conclusion of an audit. The MRL must be signed by those members of management with overall responsibility for financial and operating matters. Members of management are those that the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management generally include the head of the agency, the Chief Financial Officer, and any others deemed responsible for matters presented in the MRL.

4.1.2. During the audit, management makes many representations to the auditor, both oral and written, in response to specific inquiries and through the submission of the financial statements. In the MRL, the senior responsible manager confirms the representations explicitly or implicitly given to the auditor, states and documents the continuing appropriateness of such representations, and reduces the possibility of misunderstanding concerning the matters that are the subject of the representations. Representations by management generally relate to: (1) the financial statements; (2) completeness of the information; (3) recognition, measurement, and disclosure; and (4) subsequent events. Specifically, the management function must represent that the financial statements do, or do not, present fairly the financial position of the reporting entity in accordance with federal generally accepted accounting principles.

4.2 Management Representations (020402)

Management representations must include all representations that are required by generally accepted auditing standards and OMB Bulletin [19-03](#). General representations must, however, be modified to be consistent with findings reported by the auditor. In accordance with OMB Circular A-136, Section V.5, management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. MRLs are due to the office performing the entity's audit prior to the conclusion of the audit. The schedules for the draft and final letters are contained in the DFAS Financial Reporting Guidance. [The](#) USD(C) is responsible for submitting the final MRL to OMB.

4.3 Materiality (020403)

As required by OMB Circular A-136, Section V.5, the MRL must include a representation regarding the materiality of unrecorded financial statement adjustments aggregated by the auditors.

A list of any uncorrected misstatements (in Excel format), including those audit adjustments waived by the Component level, must be attached to the MRL.

4.4 Representation of Budgetary Data (020404)

Management is required to include a representation that addresses the consistency of budgetary data reported on the SBR, and the budgetary data submitted through the Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS), to prepare the year-end SF 133s. Management may consider using the following sample representation: “The information presented on the Department’s SBR is reconcilable to the information submitted on the Department’s year-end SF 133s. This information will be used as input for the FY 20xx actual column of the Program and Financing Schedules reported in the FY 20xx Budget of the U.S. Government. Such information is supported by the related financial records and related data.”

4.5 Signature Levels of Representation Letters (020405)

Signature levels for MRLs are as follows and may be handwritten or electronic.

4.5.1. The Secretary or Under Secretary of the Military Department concerned must sign an MRL in support of the audited financial statements for a Military Department’s General Fund and Working Capital Fund.

4.5.2. The Director or Deputy Director of the Defense Agency concerned must sign an MRL in support of the audited financial statements for a Defense Agency.

4.5.3. The fund manager of the trust, or revolving fund concerned, must sign an MRL in support of financial statements for a trust or revolving fund managed by the Office of the Secretary of Defense or Defense Agency.

4.5.4. The head of other reporting entities not described in subparagraphs 020405.A through 020405.C, but listed in Chapter 1 and pursuing a full financial audit and producing stand-alone financial statements, must sign an MRL in support of their audited financial statements.

4.5.5. The Secretary of Defense or Deputy Secretary of Defense, and the USD(C), must sign the final MRL for the DoD Agency-wide financial statements.

4.6 Referrals to Office of the Deputy Chief Financial Officer (020406)

Auditor requests for MRLs below levels cited in paragraph 020405 must be referred to the USD(C), Office of the Deputy Chief Financial Officer (ODCFO).

4.7 Date of Management Representation Letter (020407)

Generally, the date of an MRL must be the date the auditor issues the audit report on the entity’s financial statements. Coordinating the two dates is essential. The due dates for the MRLs are specified in the financial statement reporting schedule in the DFAS Financial Reporting

Guidance. Management must not provide auditors with pre-signed, undated letters or with predated letters. If auditors need an advance copy of the intended management letter, then auditors must include that requirement when submitting the initial request for the MRL. Active cooperation and interaction between auditors and management is expected so that the MRL reaches the auditors on the due date. Refer to the DFAS Financial Reporting Guidance for additional requirements and timelines in support of the DoD Agency-wide financial statement submittal.

5.0 LEGAL REPRESENTATION LETTERS (0205)

5.1 Inquiries of Legal Counsel (020501)

According to OMB Bulletin [19-03](#), the auditor will request entity management to send a letter of inquiry to those lawyers with whom management consulted concerning litigation, claims, and assessments. Refer to the GAO [Financial Audit Manual](#), Section 1002B, Example Legal Letter Request, and subsequent revisions, for an illustrative letter of inquiry from entity management to legal counsel. Management must document in a schedule how the information contained in the legal counsel's response(s) was considered in preparing the financial statements. In accordance with OMB Circular A-136, Section V.4, LRLs and management's schedules are required for the audits of entity financial statements and the special-purpose financial statements used to compile the Financial Report (FR) of the U.S. Government.

5.2 Obtain Legal Representations (020502)

5.2.1. To assist the auditor in completing the review of legal matters in a timely manner, the auditor may ask management to request that legal counsel submit an interim LRL so that a preliminary evaluation of the significance of material legal matters can be made. It is the responsibility of the senior financial management official of the entity being audited to request interim or final LRLs from their General Counsel (GC). Judge Advocates General must not be requested to furnish LRLs. The LRLs requested from the GC of the Military Departments must include the request that the GC report matters involving both military and civilian counsel.

5.2.2. Requests for an LRL pertaining to the Agency-wide financial statements, and to any defense-wide account audited separately, such as the Military Retirement Fund, must be sent to the DoD GC. Copies of any letters prepared by the GC of the Military Departments and DoD Components must be provided to the DoD GC, Attention: Deputy General Counsel (Fiscal) (DGC(F)) and to the DoD Inspector General (IG), or other independent auditors performing the audit. In letters provided to the GC, DoD must report only cases at or above the materiality threshold established for that year's Agency-wide financial statement audit.

* 5.2.3. Management Schedules of Information (MSIs) must be reported directly to the [USD\(C\)](#). The U.S. Army Corps of Engineers (USACE) must also prepare an LRL for Treasury Index 96 civil funds. The USACE LRL, and supporting MSIs, must be submitted to the [USD\(C\)](#). Each year, the DGC(F) must advise the counsels preparing the LRLs of the mandatory times for submission of them as specified in the financial statement reporting schedule within the DFAS Financial Reporting Guidance. The DGC(F) must also advise them of the applicable Agency-wide materiality threshold for that year's Agency-wide financial statement.

*5.3 Preparation of Legal Representation Letters (020503)

When preparing the LRLs, the GC **must consider** the guidance found in [Treasury Financial Manual 2-4700](#), [section 4705.60a](#), and [OMB Bulletin 19-03](#). Report cases and claims using the legal representation format and guidance on the U.S. Department of Justice ([DOJ](#)) website under the “Selected Documents & Forms.” In addition to reporting the status of pending contingent liabilities, the interim LRLs must also include the cases reported in the previous year’s legal representations that are no longer pending. **For additional policy regarding contingent liabilities, see Volume 4, Chapter 12 and applicable Policy Memoranda related to Volume 4, Chapter 12.** The final representation letter must be limited to new information (i.e., cases that arise subsequent to the interim letter or changes in the status of cases that were reported in the interim letter). The final letter must not repeat information from the interim letter that has not changed. Any subsequent changes in cases that arise after the final representation letter, but before the end of the audit fieldwork on the financial statements, must be communicated to the auditor. The required summaries of the legal letters must be submitted to the cognizant audit agency for the reporting entity, to the entity’s supporting accounting activity, and to the ODCFO.

5.4 Determination of Legal Cases (020504)

Management must make an assessment as to whether pending, threatened litigation or unasserted claims must be reported or disclosed in the financial statements. This determination extends to cases in which legal counsel has classified the likelihood of loss as “unknown.” The name and telephone number of the individual who is able to answer questions regarding the presentation of legal claims and assessments in the financial statements must also be provided. The required summaries of the legal letters must be submitted to the cognizant audit agency for the reporting entity, the entity’s supporting accounting activity, and the ODCFO. DoD due dates for the interim and updated legal letters, and the associated summaries, are reflected in the financial statement reporting schedule in the DFAS Financial Reporting Guidance.

*5.5 Summary of Legal Representation Letters (020505)

Rather than having the cognizant auditors submit copies of the interim and updated LRLs, along with the summaries of the information contained in these responses for each reporting entity, the GAO has agreed to use the single summary of the various LRLs prepared for submission with the Agency-wide statements. The IG and ODCFO must make the required submission to the OMB, the Treasury, the DOJ, and the GAO per the due dates in the financial statement reporting schedule contained in the DFAS Financial Reporting Guidance. **The agency IG must also provide notification to the OMB, Treasury, the DOJ, and the GAO whether there were “no changes” or “changes” due to subsequent events that resulted in a change in the likelihood of a loss, or the amount of a loss, or both, after the effective date of the final LRL, but before the date of the audit report on the FR.**

6.0 GENERAL PREPARATION INSTRUCTIONS (0206)

6.1 Generally Accepted Accounting Principles (020601)

The principal statements and notes embody the generally accepted accounting principles contained in the SFFAS and SFFAC. The SFFAS and SFFAC are incorporated into accounting policy and guidance contained in this Regulation. Preparers of financial statements seeking additional guidance must follow the hierarchy contained in Volume 1, Chapter 2.

6.2 United States Standard General Ledger (020602)

Preparers of financial statements and notes must crosswalk their unique general ledger accounts to the USSGL chart of accounts, and at a lower level of detail to include Treasury's Bureau of the Fiscal Service (Fiscal Service) GTAS attributes, [*Standard Financial*](#) Information Structure elements, DoD's trading partner information, and other DoD-required attributes to prepare the financial statements and note schedules. DDRS-AFS must [utilize](#) the USSGL, GTAS attributes, and other DoD required attributes, to populate financial statements and related note schedules. Additional information regarding the input and timelines for importing information into DDRS-AFS is in the quarterly DFAS Financial Reporting Guidance.

*6.3 Agreement Between Totals in Statements and Notes (020603)

DoD Components/reporting entities preparing quarterly interim and fiscal year-end financial statements, and related supporting notes and other schedules, must ensure the total figures [disclosed in the supporting notes and other schedules conform to](#) the amounts presented in the body of the financial statements. The chosen rounding level must be maintained consistently throughout the principal statements and notes. In addition, rounded totals must agree between the principal statements as applicable (e.g., ending balances from the SCNP equal the Total Net Position line on the Balance Sheet). Individual line items must sum to the totals (this may require adjusting the individual detail line items for differences created by the rounding process rather than adjusting column totals).

6.4 Comparative Data (020604)

Comparative financial statements are required. Data presented in the fiscal year-end prior year column must be identical with the amounts reported on the financial statements of the prior year. Information for the current and preceding years must be presented, regardless of the type of audit opinion rendered by the auditor. The notes must contain the information that is necessary for full disclosure of both years. Refer to Chapter 10 for additional policy regarding the notes required for the financial statements.

*6.5 Variance Analysis/Fluctuations (020605)

A comprehensive financial statement variance analysis report is prepared each quarter solely for the Agency-wide financial statements, addressing material fluctuations between comparative periods on report lines of the Balance Sheet, SNC, and selected lines of the SCNP,

SBR, and supporting note schedules. Only Components materially contributing to the Agency-wide variances must explain significant variances when requested by DFAS Financial Reporting. A significant variance is a fluctuation from the same quarter in the prior year to the current year that exceeds \$1 billion and 10 percent of the prior year amount, or a lower threshold defined by management. The detailed explanations for the significant variances must provide concise answers to the following questions pertaining to the comparative periods.

6.5.1. What is the dollar amount of the fluctuation?

6.5.2. Which activity caused the fluctuation?

6.5.3. What business event caused the fluctuation?

6.5.4. Why did the fluctuation occur?

6.5.5. When, during the last four quarters, did the primary business event occur causing the fluctuation? Responding to this question helps identify which disclosures are likely to be in effect for the current fiscal year end.

6.6 Statement Consolidation (020606)

User judgment must be exercised to determine if it is appropriate to exclude some statement line items, notes, and lines or columns in notes from the final published statements, if those lines do not apply to the reporting entity. In order to ensure consistent and accurate aggregation of amounts from suborganizations, however, such lines must not be excluded prior to the submission of the final published version. Due to the short timeframes available for statement consolidation at the agency level, preparers are not authorized to combine lines for which the referenced account balances are immaterial.

6.7 Disclose Material Balances (020607)

Do not designate in the notes as “other” any discrete balances of a material amount. Material balances must be separately disclosed and designated by name. Material is defined for this purpose as any component of a line item that represents 10 percent or more of the value of the line in the principal statement.

6.8 Notes to the Financial Statements (020608)

The note numbering sequence contained in Chapter 10 must be maintained in all versions of the notes in order to ensure consistent and accurate aggregation to the DoD Agency-wide level. For notes that are not applicable to the reporting entity, indicate the note is not applicable after the note number and title. Entities must retain this determination of nonapplicability in the working versions of the notes to document to outside auditors that an overt decision was made regarding the note disclosure applicability. The notes identified as nonapplicable will be excluded in preparation of the final statements. If additional notes are necessary to provide other required disclosures, then number them as explained in Chapter 10. Refer to Chapter 10 for more detailed

guidance on the preparation, presentation, and numbering of notes to the principal financial statements.

6.9 Consistency in Reporting (020609)

Accounting policies and procedures must be applied consistently throughout the financial statements. Ensure amounts are consistently reported throughout the financial statements, notes, supplemental information, and the Management's Discussion and Analysis (MD&A) section. Also ensure that schedules presented in the notes, in support of amounts presented on financial statements, have total figures that agree with the amounts presented in the financial statements. Financial information reported in multiple notes, or other sections, must be reported in a consistent manner. To the extent that information is not available for the accelerated reports, a reliable, alternative method of estimating amounts and balances must be developed and adequately disclosed.

6.10 Consolidated or Combined Statements (020610)

The Balance Sheet, SNC, and the SCNP principal statements must be prepared as consolidated statements, net of intra-entity transactions. The SBR must be prepared as a combined statement.

6.11 Rounding (020611)

DoD Agency-wide final published financial statements and notes must display dollars rounded to millions with one decimal point. All Component statements must display dollar amounts rounded to the nearest whole thousand on the final published principal statements and in the tables/schedules contained in the notes to the principal statements. Dollar amounts in note narratives must be reported with a maximum of three position integers and a single decimal value followed by an identifier, such as millions or billions (e.g., \$324.1 million; not \$324,100 thousand). To improve communication among preparers, reviewers, and auditors during the preparation process, and to avoid excessive workload associated with the resolution of rounding errors, all accounting activities must report amounts as dollars and cents on all draft/working versions of the principal statements and note schedules prior to submission by the reporting entity of the final audited financial statements.

6.12 Additional Information (020612)

Reporting entities that choose to present additional financial statements or information must include these in the "Other Information" section (see Chapter 3).

6.13 Organization of the Financial Statements (020613)

The financial statements of the reporting entities will be organized as outlined in Chapter 1, Table 1-1.

6.14 Requirements for Audited Financial Statements (020614)

Reporting entity managers are responsible for the preparation and printing of the final, complete annual audited version of their financial statements. These specific requirements are outlined in DFAS Financial Reporting Guidance.

6.15 Posting the Financial Statements (020615)

DoD's Agency-wide financial statements and the AFR are posted on the public website of the [USD\(C\)](#). Reporting entity managers must post their individual financial statements on their public website and provide the ODCFO with electronic links to these reports by the due date specified in the financial statement reporting schedule. The files must be prepared in the Portable Document Format (PDF) type. If the reporting entity includes a large number of digital images, then the PDF can be very slow for users to access on the website. In those cases, it is beneficial, and encouraged, to prepare separate files for each section of the financial report. For additional posting guidance, refer to OMB Circular A-136, Section I.5.

6.16 Responsibility for Sections of DoD Agency-wide Financial Statements (020616)

DFAS, the USD (Acquisition and Sustainment) (USD(A&S)), and the USD(C) have responsibility for various sections of DoD Agency-wide financial statements and for providing information to Fiscal Service for inclusion in the FR of the U.S. Government.

* 6.16.1. [The USD\(C\) and DFAS are](#) responsible for preparing the draft/working versions and final version of the Financial section of the AFR that includes the Agency-wide financial statements and notes, the Required Supplementary Information (RSI) section (except for the deferred maintenance and repairs information), and the Other Information section of the DoD Agency-wide financial statements. In addition, DFAS must ensure that the GTAS adjusted trial balances are transmitted to Fiscal Service for inclusion in the FR of the U.S. Government [with a notification to the USD\(C\)](#). Refer to Volume 6A, Chapter 3 for guidance on GTAS reporting.

6.16.2. [The](#) USD(A&S) is responsible for compiling the complete Required Supplementary Stewardship Information section and the deferred maintenance and repairs information for the RSI section of DoD's Agency-wide financial statements. [The](#) USD(A&S) must provide this information, electronically, to DFAS for inclusion in the working and final version of DoD Agency-wide financial reports per the due dates in the financial statement reporting schedule.

6.16.3. [The](#) USD(C) is responsible for preparing the Agency Head Transmittal Letter required by OMB Circular A-136, Section II.1.1 and the MD&A section of the Agency-wide financial statements, and for submitting the DoD Agency-wide financial statements to OMB and the Congress.

CHAPTER 3

AGENCY FINANCIAL REPORT SECTIONS

1.0 GENERAL

1.1 Purpose

This chapter prescribes requirements for Department of Defense (DoD) Tier 1 consolidation entities referenced in Chapter 1, section 4.1 that must prepare and submit an Agency Financial Report (AFR) to the OUSD(C). The AFR must include the Agency Head Transmittal Letter, Management's Discussion and Analysis (MD&A), Financial Section, and Other Information (OI). OUSD(C) prepares and submits the consolidated, Agency-wide AFR and a separate Annual Performance Report (APR). Subcomponents are not required to prepare an APR. If they decide to prepare an APR, subcomponents are not required to prepare OI, but may choose to do so using the format specified in this chapter.

1.2 Authoritative Guidance

The primary authoritative guidance for this chapter is Title 31, United States Code (U.S.C.), Section 3515, ([31 U.S.C. § 3515](#)) "Financial Statements of Agencies," Federal Accounting Standards Advisory Board's (FASAB's) Statement of Federal Financial Accounting Standard ([SFFAS](#)) [15](#), "Management's Discussion and Analysis," and Office of Management and Budget ([OMB](#)) [Circular A-136](#), "Financial Reporting Requirements."

Other guidance include FASAB's ([SFFAC](#)) [3](#), "Management's Discussion and Analysis," [SFFAC](#) [9](#), "Materiality: Amending Statement of Federal Financial Accounting Concepts (SFFAC) 1, Objectives of Federal Financial Reporting, and SFFAC 3, Management's Discussion and Analysis."

2.0 AGENCY HEAD TRANSMITTAL LETTER

An agency is required to include, toward the beginning of the report, a dated transmittal letter signed by the agency head. The date on the letter must match the due date prescribed in the OMB Circular A-136 to publish the AFR. The letter must include a brief message from the agency head containing an assessment of whether financial and performance data in the report are reliable and complete and, if not, describing any material inadequacies in the completeness and reliability of the data. The transmittal letter must also describe material internal control weaknesses and corrective actions the agency is taking to resolve these weaknesses. The transmittal letter may direct the reader to a more detailed section of the AFR instead of including the discussion in the transmittal letter.

3.0 MANAGEMENT'S DISCUSSION AND ANALYSIS

3.1 Purpose

To be useful, the MD&A should be concise, easy to read to a non-technical audience, and use visual references to present summary information. The MD&A should focus on the most important matters and provide a balanced analytical assessment of key program and financial performance. The MD&A should provide management's view of actual current performance and financial results, as well as expectations about the future. The MD&A should inform the reader, at a high level, of progress toward accomplishing the entity's mission and associated strategic goals. The discussion should deal with the most important matters that would likely affect the judgments and decisions of people who rely on the AFR as a key source of information. It should address most important matters that could:

3.1.1. Lead to significant actions or proposals by senior management;

3.1.2. Be significant to the managing, budgeting, and oversight functions of Congress and the Administration; or

3.1.3. Significantly affect the judgment of stakeholders about the efficiency and effectiveness of the entity.

3.2 Responsibility

Management is responsible for the content of the MD&A. Its preparation should be a joint effort of the financial management office, program offices, and offices responsible for performance reporting. Management has considerable discretion in preparing and presenting the MD&A, subject to the inclusion of the required content and the requirement that the information in the MD&A is not misleading to the reader. The MD&A provides management with a forum for communicating current and future insights about the entity, that increases the understandability of financial information, and also provides information about the entity, its operations, service levels, successes, and challenges. The preparer must develop and retain adequate documentation supporting the financial, statistical, and other information presented in the MD&A section.

3.3 Scope

The MD&A should be regarded as "required supplementary information" as that term is used in auditing standards and is an essential part of a complete general purpose federal financial report. The MD&A may include a brief overview or executive summary explaining the MD&A. An overview section gives the reader a useful summary of what is to come. Some agencies include an overview or executive summary in the "Mission and Organizational Structure" section of the MD&A. At a minimum, the MD&A should address the entity's:

3.3.1. Mission and organizational structure;

3.3.2. Performance goals, objectives, and results;

- 3.3.3. Analysis of financial statements and stewardship information;
- 3.3.4. Analysis of systems, controls, and legal compliance;
- 3.3.5. Forward-looking information; and
- 3.3.6. Any additional information required by A-136, such as emergency funding.

3.4 Mission and Organizational Structure

The MD&A should contain a brief description of the mission(s) of the entity and describe its related organizational structure, consistent with the entity's strategic plan. The MD&A should:

3.4.1. Name the consolidation entity in a clear manner that leaves no doubt as to whether the consolidation entity is an entire organization or an activity or group of activities within an organization;

3.4.2. Identify the commercial functions (includes buying and leasing of real estate, providing insurance, making loans and loan guarantees, and other credit programs and any activity involving the provision of a service or thing for which a fee, royalty, rent, or other charge is imposed by an agency for services and things of value it provides) and the revolving, trust, and other fund accounts covered by the financial statements;

3.4.3. State the mission and major goals of the consolidation entity, including reference to the entity's legislative mandate, if appropriate;

3.4.4. Identify the type and provide information on the numbers of individuals and/or groups served by or benefiting from the entity's major program(s);

3.4.5. Provide indicators of the size of the major program(s) (e.g., dollars expended, population served, and the numbers of military and civilian personnel employed in carrying out the major program(s)); and

3.4.6. Describe the manner in which the consolidation entity is organized to provide the major program(s), including information related to the geographic locations of the organization (e.g., numbers of local, district, state, and regional offices).

3.5 Performance Goals, Objectives, and Results

Pursuant to the Government Performance and Results Act (GPRA) Modernization Act of 2010 ([GPRAMA](#)), the APR is the primary document for comprehensive organizational performance reporting. The MD&A presentation should minimize duplicative reporting with the APR. Therefore, the discussion of performance goals, objectives, and results in the MD&A should include only a summary of non-financial performance information to provide context for the financial information presented.

The performance discussion should help the reader assess the relative efficiency and effectiveness of programs. The MD&A should:

3.5.1. Provide a concise assessment of the entity's overall progress toward major program goals, linking goals to cost categories or responsibility segments in the Statement of Net Cost or related notes, if possible;

3.5.2. Summarize overall (e.g., consolidation entity) performance in the context of historical trends;

3.5.3. Summarize the strategies and resources the entity used to achieve its goals;

3.5.4. Summarize any significant underlying factors that may have affected the reported performance, including factors that are substantially outside the entity's control, factors over which the entity has significant control, and any anticipated or unanticipated risks;

3.5.5. Summarize plans to improve performance; and

3.5.6. Summarize the procedures management has designed and followed to provide reasonable assurance that reported performance information is relevant and reliable.

3.6 Analysis of Financial Statements and Stewardship Information

The MD&A should help users understand the entity's financial position, financial condition, and results of operations conveyed in the principal financial statements. The MD&A should include comparisons of the current year to the prior year and should provide an analysis of the agency's overall financial position, financial condition, and results of operations to assist users in assessing whether the financial position has improved or deteriorated because of the year's activities. This section should also include a discussion of key financial-related measures emphasizing financial trends and assessing financial operations. Factors to consider in identifying major changes include likely public or congressional interest in the change, historical trends in the amount, and the relative size of the change. Additionally, the MD&A should give users the benefit of management's understanding of the following:

3.6.1. Major changes in types or amounts of assets, liabilities, costs, revenues, obligations, and outlays (explaining the underlying causes of the changes);

3.6.2. Relevance of particular balances and amounts shown in the principal financial statements, particularly if relevant to important financial management issues;

3.6.3. Entity's stewardship information; and

3.6.4. In addition, the following items may be useful to include in the financial statement analysis:

3.6.4.1. Explanations for variances exceeding ten percent and are material to the agency;

3.6.4.2. Significant issues qualitative in nature and relating to financial management; and

3.6.4.3. Overall financial condition and financial management issues occurring since the previous reporting period that impact the agency's current financial status.

3.7 Analysis of Systems, Controls, and Legal Compliance

3.7.1. Agencies are required to provide assurances to the status and effectiveness of the internal controls and financial management systems that support the preparation of the financial statements. Management should provide its assurances related to the Federal Managers' Financial Integrity Act of 1982 ([FMFIA](#)) and its compliance determination required by the Federal Financial Management Improvement Act of 1996 ([FFMIA](#)) in a separate section entitled "Management Assurances." The FMFIA assurance statement should:

3.7.1.1. Provide management's assessment of the effectiveness of the organization's internal controls to support effective and efficient programmatic operations, reliable financial reporting and compliance with applicable laws and regulations, and whether the financial management systems conform to relevant financial systems requirements;

3.7.1.2. Provide a separate assessment of the effectiveness of the internal controls over financial reporting as a subset of the overall FMFIA assurance statement; and

3.7.1.3. Include a summary of material weaknesses and non-compliance, a summary of assurance, and a summary of corrective actions to resolve the material weaknesses and non-compliance. Illustrative assurance statements and further guidance on corrective action plans can be found in OMB Circular A-123, "Management's Responsibility for Enterprise Risk Management and Internal Control."

3.7.2. Management should include its FFMIA compliance assessment in this section. Management is required to provide its assessment of the organization's financial management systems compliance with the federal financial management systems requirements standards promulgated by FASAB and the United States (U.S.) [Standard General Ledger](#) at the transaction level. Financial management systems include both financial and financially-related (or mixed) systems. Further guidance on the financial systems requirement can be found in OMB Circular [A-123, Appendix D](#), "Compliance with the Federal Financial Management Improvement Act of 1996."

3.7.2.1. Briefly discuss the agency's financial management systems strategy and how it will achieve the goals of improving financial and budget management agency-wide. Include an overview of the agency's current and future financial management systems framework and a synopsis of critical projects currently underway or planned to achieve the target framework, per OMB [M-19-16](#), "Centralized Mission Support Capabilities for the Federal Government;"

OMB [M-13-09](#), “Fiscal Year 2013 PortfolioStat Guidance: Strengthening Federal IT Portfolio Management,” and OMB Circular A-123, Appendix D.

3.7.2.2. For areas of FFMIA non-compliance, the agency must identify remediation activities that are planned and underway and include projected dates to achieve compliance.

3.7.3. Management should also review its FMFIA assurance statements and its FMFIA compliance determination for consistency with the findings specified in the annual financial statement audit report(s). The Office of the Inspector General (OIG) or auditor must compare material weaknesses disclosed during the audit with those material weaknesses reported in the agency’s FMFIA report and document any material weaknesses disclosed by audit that were not reported in the agency’s assurance statements. The financial audit responsibilities are established in the “Scope of the Audit” section of [OMB Bulletin 24-01](#), “Audit Requirements for Federal Financial Statements,” which is updated annually. If there is a conflict between this Chapter and the annual update to OMB Bulletin 24-01, auditors must follow guidance in the annual update. The reports may be different, but they should not be in direct conflict. When conflicting discrepancies exist, it is management’s responsibility to ensure that outstanding issues are reported appropriately. For material weaknesses related to an error requiring a restatement, if the agency asserted in its MD&A that it received an unmodified opinion on any previously issued financial statement, management should include a high-level discussion of the events that gave rise to the restatement, which should include the nature of the error.

3.8 Forward-looking Information

Forward-looking information includes information about the possible future effects of the most important existing performance and financial demands, events, conditions, and trends. Management should discuss important known and anticipated problems that need to be addressed and actions that have been planned or taken to address those problems. The actions that are needed, planned, and taken must be discussed within the sections listed in this paragraph or in a separate section of the MD&A.

3.9 Other Management Information, Initiatives, and Issues

Management has the discretion to include a summary in the MD&A of other information, initiatives, and issues it identifies.

3.10 Limitations of the Financial Statements

The MD&A should articulate the limitations of the principal financial statements. This section should state the following:

3.10.1. The principal financial statements are prepared to report the financial position, financial condition, and results of operations of the consolidation entity, pursuant to the requirements of [31 U.S.C. § 3515 \(b\)](#);

3.10.2. The statements are prepared from the books and records of the entity in accordance with Generally Accepted Accounting Principles and the formats prescribed by OMB. Reports used to monitor and control budgetary resources are prepared from the same books and records; and

3.10.3. The statements should be read with the realization that they are for a Component of the U.S. Government.

4.0 FINANCIAL SECTION

The Financial Section of the AFR must contain the Auditor's Report, Financial Statements and Notes, and Required Supplementary Information. The financial statements are the responsibility of agency management. Although not a requirement, the consolidation entity may include a Chief Financial Officer letter summarizing planned time frames for major barriers to correct audit weaknesses and instances of non-compliance. The section should also discuss the process the entity followed in addressing previously reported audit weaknesses and instances of non-compliance. The guidance for the Financial Statements and Notes is in Chapters 4 through 10.

5.0 OTHER INFORMATION

The OI section of the AFR follows the Required Supplementary Information section of the statements and should contain the following, when appropriate and applicable:

5.1 Summary of Financial Statement Audit and Management Assurances

Executive agencies are required to prepare a Summary of Financial Statement Audit and a Summary of Management Assurances. OMB Circular A-136 requires executive agencies to include these summaries as OI or to explain how and why DoD uses an alternative method for reporting the information. The agency should list each material weakness using a unique, short, and easily understood name. These names should be kept constant, so that a weakness reported in FMFIA sections or by the auditor has the same name. To the extent possible, weakness names should also be kept constant from year to year. Significant deficiencies are not required to be reported. Refer to OMB Circular A-136 for additional guidance regarding format and content of the summary report.

5.2 Revenue Foregone

5.3 Tax Burden, Tax Gap, and Tax Expenditures

5.4 Management and Performance Challenges

OMB Circular A-136 states the Performance Accountability Report (PAR) or AFR must include a statement prepared by an executive agency's OIG summarizing what the OIG considers the most serious management and performance challenges facing an executive agency and briefly assessing the executive agency's progress in addressing those challenges. This statement must be

provided to the executive agency head at least 30 days before the AFR due date. The executive agency head may comment on, but not modify, the OIG statement. The executive agency head may append comments to the OIG's statement. Additional guidance is available in OMB Circular A-136, OI section.

5.5 Payment Integrity Information Act Reporting

The Act requires agencies to identify and review all programs and activities that may be susceptible to significant improper payments based on guidance from the OMB. Guidance for reporting improper payments is contained in Volume 4, Chapter 14 and OMB Circular A-136.

5.6 Other Agency-specific Statutorily Required Reports

Any reports required by statutes, not addressed in OMB Circular A-136 that pertain to financial or performance management, may be included in the AFR or PAR after consultation with OMB and Congress. The head of the agency must determine if inclusion of an agency-specific report will make the reported information more useful to decision makers. Consultation with Congress includes the Committee on Homeland Security and Governmental Affairs of the Senate, the Committee on Oversight and Reform of the House of Representatives, and any other committee of Congress having jurisdiction over the report being proposed for consolidation.

5.7 Civil Monetary Penalty Adjustment for Inflation

Under the [*Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015*](#), agencies must make annual inflation adjustments to civil monetary penalties and report on the adjustments in their AFR or PAR. Agencies are encouraged to include the illustrative table below and referenced in OMB Circular A-136.

Statutory Authority	Penalty Name & Description	Year Enacted	Latest year of adjustment (via statute or regulation)	Current Penalty (Dollar Amount or Range)	Bureau Name	Location for Penalty Update Details
XX U.S.C. XXX; XX CFR XXX.XXX [Insert statutory and regulatory citations.]	XYZ Act: Violation of [Specify statutory requirements that are subject to penalty.]		2022	Minimum: \$X Maximum: \$X		[Insert Federal Register citation(s) and hyperlink(s).]

5.8 Biennial Review of User Fees

Under [31 U.S.C. § 902](#), Chief Financial Officers are required to review on a biennial basis fees, royalties, rents and other charges imposed by the agency for services and things of value it provides and to make recommendations on revising those charges. The results of this review may be included in the AFR or PAR. See [OMB Circular A-25](#), User Charges, for more information.

5.9 Grant Programs

To promote the efficient administration of grants programs, significant consolidation entities with Federal grants programs must submit a brief high-level summary of expired, but not closed, Federal grants and cooperative agreements (awards), including:

5.9.1. A summary table (as shown below) of the total number of awards and balances for which closeout has not yet occurred, but for which the period of performance has elapsed by two years or more prior to September 30, 2022 (i.e., on or before September 30, 2020).

CATEGORY	2-3 Years	4-5 Years	More than 5 Years
Number of Grants/Cooperative Agreements with Zero Dollar Balances			
Number of Grants/Cooperative Agreements with Undisbursed Balances			
Total Amount of Undisbursed Balances			

5.9.2. A brief narrative of the progress made over the past year compared to the previous year's report, challenges preventing closeout of awards reported, and actions to be taken to close awards reported.

5.10 Agency Audit Resolution Reports

Entities required to produce reports from the Agency Head under [5 U.S.C.](#), Appendix 3, section 5(b) may include such reports in the AFR as provided by the Reports Consolidation Act ([31 U.S.C. § 3516](#)). Such entities are encouraged to do so if the AFR is the usual method for publishing the reports.

In addition, entities that provide a separate report to Congress under 5 U.S.C., Appendix 3, section 5(b) may include a summary of agency audit resolution in the AFR or PAR (either in the MD&A or as Other Information).

VOLUME 6B, CHAPTER 4: “BALANCE SHEET”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

CHAPTER 4

BALANCE SHEET

1.0 GENERAL

1.1 Overview

The Balance Sheet is a statement of financial position required to be completed by Department of Defense (DoD) [consolidation](#) entities identified in Chapter 1. It is a principal financial statement that presents comparative fiscal year data (i.e., current and preceding), as of a specific time. Moreover, it reports amounts owned or managed by [consolidation](#) entities (assets), amounts owed by the entities (liabilities), and amounts [that](#) comprise the difference (net position). Notes to the Balance Sheet are required to clarify or provide additional, more detailed information on the individual asset, liability, and net position line items reported on the face of the Balance Sheet.

*1.2 Purpose

This chapter presents the form and content of the DoD Balance Sheet. It identifies general requirements for each asset, liability, and net position reported on the Balance Sheet. For detailed accounting policy, see the individual asset and liability chapters published in Volume 4. [Refer to Chapter 10 for required footnote disclosures to the financial statements.](#) For detailed information regarding schedules/timelines and/or specific notes, see the [DoD Financial Reporting Guidance](#) and Chapter 10. [Additionally, the Standard Financial Information Structure](#) supports requirements for budgeting, financial accounting, cost/performance, and external reporting needs

*1.3 Authoritative Guidance

The financial management policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.1. Office of Management and Budget [\(OMB\) Circular A-136](#), “Financial Reporting Requirements;” and

1.3.2. The U.S. Department of the Treasury (Treasury) [USSGL](#), a supplement of the Treasury Financial Manual

*2.0 BALANCE SHEET FORMAT

2.1 General Information

The Balance Sheet should present summary information necessary to make the statement most useful to readers. Where substantial detail is required to properly explain specific line items,

present the detail in the notes. See OMB Circular A-136 and Chapter 10 for additional instructions regarding the preparation and presentation of notes for each specific line item on the Balance Sheet. Individual statement crosswalks are prepared using the Treasury USSGL. The crosswalk for each line of the Balance Sheet is incorporated into the Defense Departmental Reporting System (DDRS) Audited Financial Statements ([AFS](#)) and can be accessed with proper authorization by selecting “Query” from the main DDRS AFS menu, then selecting the option “Referential Data” and option “Report Map.”

2.2 Format for the Draft Version of the Balance Sheet

The Balance Sheet will be prepared in accordance with the format presented in OMB Circular A-136. The draft versions of all statements and notes must include line numbers as shown in OMB Circular A-136. All amounts are in dollars and cents in the draft versions of the statements and notes in order to facilitate communication among the preparers, reviewers, and auditors during the financial statement preparation process. This process minimizes the additional time and workload required to round and reconcile dollar amounts.

2.3 Materiality Amounts

Separate reporting of items on the Balance Sheet is appropriate if the amounts are material to the Balance Sheet. Material is defined as any item (asset or liability) that represents more than 10 percent of the value of total assets or total liabilities. If an item is determined to be material, DoD [consolidation](#) entities may report the item separately on the face of the Balance Sheet.

2.4 Format for the Final Published Balance Sheet

The final ([year-end](#)) DoD-wide consolidated Balance Sheet and notes will display dollars rounded to millions with one decimal point. All DoD [consolidation](#) entity Balance Sheets and notes must display dollar amounts rounded to the nearest whole thousand. Dollar amounts in note narratives must be reported with a maximum of three position integers and a single decimal value followed by an identifier, such as millions or billions (e.g., \$340.1 million). Foreign currency account balances reported on the Balance Sheet must be translated into U.S. dollars at exchange rates determined by the Treasury and which are effective at the financial reporting date. Additionally, the Balance Sheet will use pre-closing balances for all amounts

3.0 GENERAL INSTRUCTIONS FOR PREPARATION OF THE BALANCE SHEET

3.1 General Instructions for the Assets Section

* 3.1.1. [Assets](#). Assets are items owned by the federal government that have probable (more likely than not) economic benefits that can be obtained or controlled by a Federal Government entity (see Volume 4, Chapter 1). The Balance Sheet must include both entity assets and nonentity assets, described further in [SFFAS I](#), “Accounting for Selected Assets and Liabilities.” (Note: Clearing and suspense accounts are [considered](#) entity assets).

3.1.2. Disclosure of Entity and Nonentity Assets. The Balance Sheet combines entity and nonentity assets. For example, entity intragovernmental accounts receivable and nonentity intragovernmental accounts receivable are combined and reported as a single intragovernmental accounts receivable line item on the Balance Sheet. However, DoD [consolidation](#) entities must separately disclose nonentity assets in notes to the financial statements.

3.1.3. Intragovernmental Assets. Intragovernmental assets arise from transactions within or between federal entities and represent claims by a DoD [consolidation](#) entity against other federal entities. DoD [consolidation](#) entities must report intragovernmental assets separately from nonfederal assets on the Balance Sheet. Nonfederal [entities include](#) domestic and foreign persons and organizations outside the U.S. Federal Government. DoD [consolidation](#) entities must classify Foreign Military Sales Trust Fund assets (accounts receivable) as intragovernmental. DoD [consolidation](#) entities should review the Treasury Financial Manual, Volume 1, Part 2, Chapter 4700, Appendix 10, “[Intragovernmental Transaction \(IGT\) Guide](#),” for guidance on the accounting, reporting, and reconciliation of IGT activity with their federal trading partners.

* 3.1.4. Refer to OMB Circular A-136 for Line-Item Instructions for the Assets Section.

3.2 General Instructions for the Liabilities Section

3.2.1. Liability. A liability is a probable future outflow or other sacrifice of resources resulting from past transactions or events. Financial statements must recognize probable and measurable future outflows or other sacrifices of resources arising from:

3.2.1.1. Past exchange transactions;

3.2.1.2. Government-related events;

3.2.1.3. Government-acknowledged events; and

3.2.1.4. Nonexchange transactions that are unpaid amounts due as of the reporting date.

3.2.2. Liability Recognition.

3.2.2.1. [SFFAS 5](#), “Accounting for Liabilities of The Federal Government,” describes the general principles governing the recognition of a liability. The concept of liability includes not only those liabilities that routinely recur in normal operations and are due within a fiscal year (e.g., accounts payable, as outlined in SFFAS 1) but also contingent liabilities resulting from an existing condition that involves uncertainty as to possible loss.

3.2.2.2. DoD [consolidation](#) entities must recognize liabilities resulting from normal operations when they are incurred, regardless of whether they are covered by available budgetary resources. This requirement includes liabilities related to appropriations canceled under “M” account legislation included in [Title 31, United States Code, section 1552](#), “Procedure for Appropriation Accounts Available for Definite Periods.”

3.2.3. Liabilities Covered, Not Covered by, and Not Requiring Budgetary Resources. Liabilities covered by budgetary resources, liabilities not covered by budgetary resources, and liabilities not requiring budgetary resources are combined on the Balance Sheet. For example, intragovernmental accounts payable covered by budgetary resources and intragovernmental accounts payable not covered by budgetary resources are combined and reported as a single intragovernmental accounts payable line item on the Balance Sheet.

3.2.3.1. Liabilities Covered by Budgetary Resources

3.2.3.1.1. Liabilities Covered by Budgetary Resources are liabilities incurred [that](#) are covered by realized budgetary resources as of the Balance Sheet date. Budgetary resources encompass not only new budget authority but also other resources available to cover liabilities for specified purposes in a given year. [OMB Circular A-11](#) identifies amounts included as available budgetary resources.

3.2.3.1.2. Liabilities are considered covered by budgetary resources when they are funded by permanent indefinite appropriations, which have been enacted and signed into law and are available for use as of the Balance Sheet date. The resources must be apportioned by OMB without further action by Congress and without a contingency having to be met first. Custodial liabilities are covered by the assets that are collected and held for eventual transfer to other entities.

* 3.2.3.2. Liabilities Not Covered by Budgetary Resources. [This category is for liabilities not covered by budgetary resources that will require budgetary resources.](#)

3.2.3.3. Liabilities Not Requiring Budgetary Resources. This category is for liabilities that have not in the past required and will not in the future require the use of budgetary resources.

3.2.4. Current Liability. A current liability is an amount that is due to be paid within 12 months of the Balance Sheet date. Current liabilities must be disclosed separately from noncurrent liabilities in the notes to the financial statements.

3.2.5. Noncurrent Liability. A noncurrent liability is an amount that is due to be paid beyond 12 months of the Balance Sheet date and will be disclosed separately from current liabilities in the notes to the financial statements.

3.2.6. Contingent Liability. A contingent liability is a potential liability that may occur, depending on the outcome of an uncertain future event. Record a contingent liability if the contingency is probable and the amount of the liability can be reasonably estimated.

3.2.7. Intragovernmental Liabilities. Intragovernmental liabilities arise from transactions within or between federal entities. Intragovernmental liabilities are claims against a DoD [consolidation](#) entity by other federal entities. DoD [consolidation](#) entities must report intragovernmental liabilities separately from nonfederal liabilities, including government-

sponsored enterprises and the Federal Reserve System, on the Balance Sheet. Classify liabilities with the Foreign Military Sales Trust Fund as intragovernmental.

3.2.8. Interest Payable. Interest payable is a current liability used to report the amount of interest incurred, but not paid by DoD [consolidation](#) entities as of the date of the Balance Sheet. DoD [consolidation](#) entities must report interest payable as a component of the appropriate liability accounts. Interest payable to federal entities is an intragovernmental liability and must be accounted for separately from interest payable to nonfederal entities (or the public).

* 3.2.9. Refer to OMB Circular A-136 for Line-Item Instructions for the Liabilities Section.

3.3 General Instructions for the Net Position Section

3.3.1. Net Position is comprised of unexpended appropriations and cumulative results of operations, including those attributable to funds from dedicated collections. Funds from dedicated collections are financed by specifically identified revenues, provided to the government by non-federal sources, often supplemented by other financing sources, which remain available over time. These specifically identified revenues and other financing sources are required by statute to be used for designated activities, benefits, or purposes, and must be accounted for separately from the Government's general revenues. [SFFAS 27](#), "Identifying and Reporting Funds from Dedicated Collections," as amended by [SFFAS 43](#), "Funds from Dedicated Collections: Amending Statement of Federal Financial Standards 27, Identifying and Reporting Earmarked Funds," requires disclosure of all funds from dedicated collections for which the [consolidation](#) entity has program management responsibility. A crosswalk from the consolidated to combined net position amounts is included in the notes as a disclosure to the Balance Sheet.

* 3.3.2. Refer to OMB Circular A-136 for Line-Item Instructions for the Net Position Section.

VOLUME 6B, CHAPTER 5: “STATEMENT OF NET COST”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by **blue font**.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

The previous version dated **January 2020** is archived.

CHAPTER 5

STATEMENT OF NET COST

1.0 GENERAL

1.1 Overview

The Statement of Net Cost (SNC) is designed to show separately the components of the net cost of the [consolidating](#) entity's operations for the reporting period. The net cost of operations is the gross cost incurred by the entity less any exchange revenue earned from its activities.

1.2 Purpose

This chapter prescribes the policy for preparing the DoD SNC. Additionally, this chapter provides standard formats for the published and working versions of the SNC.

1.3 Authoritative Guidance

The concept of exchange revenue incorporated throughout this chapter is described in the Statement of Federal Financial Accounting Standards ([SFFAS](#)) 7, “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting;” Office of Management and Budget ([OMB](#)) [Circular A-136](#), “Financial Reporting Requirements,” and Treasury Financial Manual, Volume 1, Part 2, Chapter 4700, ([1 TFM 2-4700](#)) “Federal Entity Reporting Requirements for the Financial Report of the United States Government.” Annual updates to OMB Circular A-136 are on the [OMB](#) website.

*2.0 SNC PRESENTATION

According to OMB A-136, the SNC should present the net cost of operations by major programs. The federal entity should define the major program and the entity should group together the programs that are not deemed “major”.

2.1 Major Programs.

2.1.1. The DoD SNC [presents](#) major programs based on:

2.1.1.1. Metrics and outcomes described in the entity’s strategic and performance plans, as required by the Government Performance and Results Act of 1993 ([GPR](#)A), as amended by the GPR A Modernization Act of 2010 ([GPR](#)AMA);

2.1.1.2. Entity’s budget structure;

2.1.1.3. Guidance for defining and structuring responsibility segments presented in SFFAS 4; and

2.1.1.4. Requirements of the GPRAMA.

2.1.2. When data is available at the program element level, [consolidating](#) entities may provide information as a supplemental schedule in the note to the SNC or in “Other Information.” The SNC and related supporting schedules must show the net cost of operations for the entity as a whole and its sub-entities and program elements, as applicable. In the [consolidated](#) SNC, DoD identifies Components by the entities described in Chapter 1. The Components may further break out the [consolidated](#) SNC and provide any additional supporting schedules in the notes to the financial statements.

*2.2 Components of SNC

2.2.1. [Net Program Costs](#). Net program costs are the gross program costs incurred by the [consolidating](#) entity, plus losses (gains) from actuarial assumption changes for military retirement or other postemployment benefits, less any exchange program revenue earned from its activities. This amount represents the net cost of a sub-organization or entity funded by sources other than exchange revenues. The gross cost of a program consists of the full cost of the outputs produced by that program, as defined by [SFFAS 4](#), “Managerial Cost Accounting Standards and Concepts,” plus any nonproduction costs that are assignable to the program. Nonproduction costs are costs linked to events other than the production of goods and services. Refer to Chapter 10 for disclosure requirements in the notes to the financial statements.

2.2.2. [Imputed Costs](#). SFFAS 4 requires [consolidating](#) entities to measure and report the full costs of their outputs (products and services) in financial reports. Imputed costs and financing sources included in the SNC must be identifiable to a specific trading partner. The entity providing the goods or services has the responsibility to provide the receiving entity with information on the full cost of such goods or services through either billing or other advice. SFFAS 4 identifies inter-entity costs that are not fully reimbursed. See SFFAS 4 for additional information.

2.2.2.1. [Inter-Entity Imputed Costs](#). Inter-entity imputed costs represent costs that are paid in total or in part by entities external to DoD. Costs displayed on the SNC include certain imputed costs as directed by OMB. All federal agencies are required to report imputed costs for the gross program cost categories described in OMB Circular A-136 to ensure consistency in reporting across the Government. [SFFAS 55](#), “Amending Inter-entity Cost Provisions,” requires the recognition of significant inter-entity costs by business-type activities. Additional guidance on inter-entity costs is available in Federal Accounting Standards Advisory Board [Technical Release 19](#), “Rescission of Technical Release 8.” Disclose intragovernmental full costs and earned revenues, and public costs and earned revenues, in the notes to the financial statements.

2.2.2.2. [Intra-Entity Imputed Costs](#). Intra-entity imputed costs represent costs that are paid in total or in part by other entities within DoD. Costs displayed on the SNC include intra-entity imputed costs as required by [SFFAS 4](#). Imputed intra-entity cost is the unreimbursed portion of the full costs of goods and services received by the entity from a providing entity that is part of the same entity or larger entity (i.e. other bureaus, components, or responsibility segments within the entity or larger entity). An example of an intra-entity imputed cost would be a DoD tenant receiving rent-free business space from another DoD entity. Volume 4, Chapter 19 provides additional detail on intra-entity costs. DoD [consolidating](#) entities should report the following intra-entity imputed costs:

2.2.2.2.1. Imputed Costs for Military Pension Expense. DoD consolidating entities will recognize an imputed cost that is equal to the reported employer entity pension expense for the accounting period, as computed using factors provided by the OUSD (Personnel and Readiness) (P&R), less any accounting period contributions by the Military Departments to the Military Retirement Fund. Report administrative entity expenses only in the Military Retirement Fund audited financial statements.

2.2.2.2.2. Imputed Costs for Military Health Benefits. DoD consolidating entities will recognize imputed costs equal to the employer entity expense for the military health benefits that is attributable to the Military Department (as computed using factors provided by the OUSD(P&R)) for the accounting period. The administrative entity for the military health benefits is the OUSD(P&R). DoD consolidating entities should report the administrative entity's actual expenses only in the Medicare-Eligible Retiree Health Care Fund, Defense Health Agency, and Other Defense Organizations-General Funds financial statements.

2.2.2.2.3. DoD management, in accordance with the full cost provision of SFFAS 4, determines how intragovernmental costs incurred within DoD will be assigned, allocated, or imputed for purposes of accounting for the full cost of a program and its output(s). As a result, recognition of intra-entity imputed costs is not limited to specific cost categories as in the case of inter-entity imputed costs.

2.2.3. Gains or Losses. SFFAS 33, "Pensions, Other Retirement Benefits, and Other Postemployment Benefits: Reporting the Gains and Losses from Changes in Assumptions and Selecting Discount Rates and Valuation Dates," requires entities reporting gains and losses associated with changes in long-term assumptions for civilian and military employee pensions, other retirement benefits, other postemployment benefits, including veterans' compensation as a separate line item on the SNC.

*3.0 Line Item

The Department of the Treasury provides a United States Standard General Ledger crosswalk detailing the accounts and attributes included in each line item of the SNC. DFAS ensures the Defense Departmental Reporting System (DDRS), Audited Financial Statements is updated with all crosswalk changes made by the Department of the Treasury.

3.1 Program Costs.

This line includes the full costs of each program's outcome. It consists of both direct and indirect costs of the output and the costs of identifiable supporting services provided by other segments within the entity and by other consolidating entities. To the extent accounting systems and defined DoD business rules allow, the consolidating entity will accumulate and assign costs using the costing methodology stated in SFFAS 4. Program costs also include any nonproduction costs that can be assigned to the program but not to its outputs. Report costs related to the production of outputs separately from nonproduction costs that cannot be traced to the production of outputs. The costs of program outputs include costs of services provided by other entities even if the costs are fully reimbursed.

3.1.1. Recognize the cost of Stewardship Property, Plant, and Equipment as a cost in the SNC in the period it is incurred, report separately from other nonproduction costs, and disclose in the notes to the financial statements. Refer to OMB Circular A-136 for additional information. The entity that received the funds reports these costs and separately discloses them in the notes to the financial statements. Refer to Volume 4, Chapter 28, for additional information on “heritage assets, multi-use heritage assets, and stewardship land” and [SFFAS 29](#), “Heritage Assets and Stewardship Land.”

3.1.2. Gross Costs. This line contains costs that arise from the purchase of goods or services. [The Gross Costs should include elimination of the effects of intra-entity and inter-entity business transactions in the consolidating entity’s statements.](#)

3.1.3. Earned Revenue. This line contains exchange revenues that arise when a federal entity provides goods and services to the public or another government entity for a price. Report the full amount of exchange revenue on the SNC or supplementary schedule regardless of whether the entity is permitted to retain the revenue in whole or in part. Earned revenue [must](#) be deducted from the full cost of outputs or outcomes to determine their net cost unless it is not practical or reasonably possible to do so. [it is not practical or reasonable to do so, DoD must deduct earned revenue from the gross cost of programs to determine the net program costs or deduct earned revenue from the costs of sub-organizations to determine the sub-organizations’ net cost of operations.](#) Refer to OMB Circular A-136 for additional [guidance](#) for assigning earned revenue to outputs, outcomes, programs, or sub-organizations.

3.1.4. Losses/(Gains) from Actuarial Assumption Changes for Military Retirement Benefits. This line contains gains and losses from changes in long-term assumptions used to measure military retirement benefits (i.e., Military Retirement Fund and Medicare-Eligible Retiree Health Care Fund).

3.2 Net Cost of Operations.

This line is the gross cost incurred by the [consolidating](#) entity less any exchange revenue earned from its activities. This amount represents the net cost of a sub-organization or entity that must be financed by sources other than exchange revenues. [DoD must report the financing sources required to fund the “Net Cost of Operations” on the Statement of Changes in Net Position.](#)

VOLUME 6B, CHAPTER 6: “STATEMENT OF CHANGES IN NET POSITION”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

CHAPTER 6**STATEMENT OF CHANGES IN NET POSITION****1.0 GENERAL****1.1 Purpose**

This chapter prescribes the policy surrounding the preparation of the Department of Defense (DoD) Statement of Changes in Net Position (SCNP). It provides details for the formatting required for the SCNP and instructions for preparing the Unexpended Appropriations and Cumulative Results of Operations sections thereof.

1.2 Authoritative Guidance

The requirements of this chapter apply to Tier 1 reporting entities referenced in Chapter 1, section 4.0. The SCNP reports the change in net position during the reporting period. Guidance from Office of Management and Budget (OMB) [Circular A-136](#), “Financial Reporting Requirements,” and Treasury Financial Manual (TFM), Volume 1, Part 2, Chapter 4700 ([TFM 2-4700](#)), “Federal Entity Reporting Requirements for the Financial Report of the United States Government,” is incorporated throughout this chapter. Annual updates to OMB Circular A-136 are on the OMB website.

2.0 FORMAT FOR THE SCNP*2.1 General Information**

The SCNP reports the change in net position during the reporting period. The net position is affected by changes to its two components: Unexpended Appropriations and Cumulative Results of Operations. The SCNP format displays both components of net position separately to enable the user to understand better the nature of changes to net position as a whole. [Included in the Cumulative Results of Operations is a separate line item for non-exchange revenue, but since this revenue is not from business-like operations it will not impact the net cost of operations.](#)

2.2 Format for the SCNP

The SCNP will be prepared in accordance with the format presented in [OMB Circular A-136](#). The [draft](#) versions of all statements and notes must include line numbers as shown in [OMB Circular A-136](#). All amounts are in dollars and cents in the [draft](#) versions of the statements and notes in order to facilitate communication among the preparers, reviewers, and auditors during the financial statements preparation process. This process minimizes the additional time and workload required to round and reconcile dollar amounts.

2.3 Format for the Final Published SCNP

The final (year-end) published DoD principal statements including the SCNP, and notes to the principal statements display dollars rounded to millions with one decimal point. All Component statements, and notes to the statements, display dollar amounts rounded to the nearest thousand on the final published principal statements and in the tables/schedules contained in the notes to the principal statements. Dollar amounts in note narratives must be reported with a maximum of three position integers and a single decimal value followed by an identifier, such as millions or billions (e.g., \$340.1 million, not \$340,100 thousand). The line numbers shown in OMB Circular A-136 are for reference purposes only. Line number references are not included on the final published statements.

3.0 GENERAL INSTRUCTIONS FOR THE PREPARATION OF THE SCNP

*3.1 Preparation

The SCNP is prepared from information utilizing Department of the Treasury (Treasury) United States Standard General Ledger (USSGL) accounts and crosswalks. System users can access crosswalk information within the USSGL section of the [TFM](#) for current fiscal year reporting. The crosswalk for each line of the SCNP is included in the Defense Departmental Reporting System - Audited Financial Statements ([DDRS-AFS](#)). Authorized DDRS users may access the most current mapping of the SCNP by selecting “Query” from the main DDRS-AFS menu, then selecting “Referential Data,” and then “NP” under one of the “Report Map” options. The “Report Map Current” represents the current year's column mapping, while the “Report Map Comparative” is for the comparative year's column mapping. Both columns are necessary for the statement mapping. SCNP must be prepared in accordance with OMB Circular A-136. Refer to OMB Circular A-136 for reporting requirements and line-item instructions.

3.2 Dedicated Collections

3.2.1. Generally, funds from dedicated collections are financed by specifically identified revenues provided to the government by non-federal sources, often supplemented by other financing sources, which remain available over time. These specifically identified revenues and other financing sources are required by statute for designated benefits, activities, or purposes, and must be reported separately from the Federal government’s general revenues. The Statement of Federal Financial Accounting Standards ([SFFAS](#)) 43, “Funds from Dedicated Collections: Amending Statement of Federal Financial Accounting Standards 27, Identifying and Reporting Earmarked Funds,” contains the complete definition and criteria for dedicated collections. Report the portions of Cumulative Results of Operations and Unexpended Appropriations attributable to dedicated collections in Note 18, “Funds from Dedicated Collections,” of the notes to the financial statements.

3.2.2. Resources from “Funds from Dedicated Collections” derived from trust or special fund receipts are often commingled or mixed with resources from the General Fund of the U.S. Government. If the predominant source of a mixed fund is “Funds from Dedicated Collections,” the entire fund may be reported in the financial statements as “Funds from Dedicated Collections.”

Whether a mixed fund is reported as “Funds from Dedicated Collections” depends upon the predominant use of the fund and whether the fund as a whole meets the definition of “Funds from Dedicated Collections” in SFFAS 43.

*3.3 Prior Period Adjustments

A prior period adjustment is an adjustment to balances of a prior period due to a change in accounting principle or correction of a material error (or an aggregation of errors). Prior period adjustments for correction of material errors require [the](#) restatement of prior period balances, while adjustments for changes in accounting principles generally do not. Immaterial errors must be corrected in the period discovered, using the accounts that would have been posted had the transactions occurred in the current period. For additional guidance, refer to [SFFAS 21](#), “Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources,” and the [Prior-Period and Prior-Year Adjustment Scenarios](#).

3.3.1. Requests for Prior Period Adjustments. Prior period adjustments will be included in the quarterly financial statements in accordance with the guidance found in Section 405 of the DoD Financial Reporting Guidance, hereafter referred to as “[DoD FRG](#).” Components should not record prior period adjustments in USSGL accounts without prior [review](#) from [the](#) Defense Finance and Accounting Service (DFAS) Financial Reporting-Audited Financial Statements (FR-AFS) Directorate [and the Office of the Under Secretary of Defense \(Comptroller\) \(OUSD\(C\)\) Financial Management and Policy Reporting \(FMPR\) Directorate](#). Forward all requests for prior period adjustments to DFAS [FR-AFS Directorate](#), accompanied by prior period adjustment packages with required supporting documentation, as outlined in the DoD FRG.

3.3.2. Calculating Materiality. Calculate materiality separately at the DoD reporting entity level, and against a materiality base. If the misstatement involves assets, then the materiality base should be total assets. If the misstatement involves liabilities, then the materiality base should be total liabilities. If the misstatement involves expenses, then the materiality base should be total expenses. Calculate the materiality base net of intragovernmental balances. For DoD reporting entities, an error (or aggregate of errors) is material when it equals or exceeds one percent of the materiality base. See the DoD FRG for additional information.

3.3.3. Disclosure of Prior Period Adjustments. Prior period adjustments that require restatements are included in Note 28, “Restatements,” [which can be reported in any quarter during the year](#). Note disclosures to the principal financial statements are explained in Chapter 10. Disclosures include the nature of the errors and the effect on relevant balances in the current period. Financial statements of subsequent periods need not repeat the full disclosures but should disclose whether there are prior period adjustments not reflected in comparative balances. A note disclosure is required when management becomes aware of a potential misstatement due to material error(s) whether or not the exact amount is known or has been corrected at the time financial statements are prepared. Disclose the nature of a prior period adjustment as the result of a change in accounting principle in accordance with the guidance found in Chapter 10, Note 20, “Disclosures Related to the Statement of Changes in Net Position.”

3.3.4. Management's Responsibility and Notification of Auditors. Upon discovery that material errors escaped detection and were included in the published audited financial statements, management must assume responsibility for any false or misleading information in the financial statements, or omissions that render information or disclosures made in the financial statements misleading. As soon as possible after the detection of an error, management must notify their auditors and the primary users of their financial statements of the error and management's plans to correct it in the financial statements. Components with prior period adjustments will immediately notify the DFAS FR-AFS Directorate and OUSD(C) FMPR Directorate of the material error. The Office of the Secretary of Defense will make the formal notification to the Congress, OMB, Treasury, and the Government Accountability Office. The notification should include the cause of the error, an estimated dollar amount of the error, and whether a previously issued financial statement(s) will or may be restated. The general public can see the revised statements on the Office of the Under Secretary of Defense ([Comptroller](#)) website. The misstated financial statements will be removed from the website.

3.3.5. Auditor's Responsibility. If a "Subsequent Discovery of Facts" exists on the date of the auditor's report, the auditors will determine whether action is required to prevent future reliance on the published audit report. The auditors may determine if revised financial statements and a revised auditor's report are required. The auditors may decide to change the audit opinion if it is determined that subsequently discovered information is not reliable. Therefore, it is imperative management work with their auditor as soon as possible after the detection of an error and assist in any actions to resolve the audit finding.

VOLUME 6B, CHAPTER 7: “STATEMENT OF BUDGETARY RESOURCES”**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by [blue](#) font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [***bold, italic, blue, and underlined font***](#).

The previous version dated [May 2019](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Administrative updates in accordance with the Department of Defense Financial Management Regulation Revision Standard Operating Procedures.	Revision
2.0	Added clarifying language on the format for the Statement of Budgetary Resources (SBR).	Addition
3.2 (previous version)/ 3.0.8	Removed the SBR line-item instructions to streamline the chapter and referred the reader to access the current reporting requirements in Office of Management and Budget (OMB) Circular A-11 and Circular A-136.	Deletion/ Addition
Figure 7-1 & Figure 7-2 (previous version)	Deleted the respective figures used to report budget execution data on the SBR.	Deletion

CHAPTER 7

STATEMENT OF BUDGETARY RESOURCES

1.0 GENERAL

1.1 Purpose

This chapter prescribes the [preparation](#) policy for the Department of Defense (DoD) Statement of Budgetary Resources (SBR). It provides [formatting](#) details for various versions of the SBR and [preparation](#) instructions for the SBR subsections of Budgetary resources, Status of budgetary resources, and Outlays, net.

1.2 Authoritative Guidance

Guidance from Office of Management and Budget (OMB) Circular [A-11](#), “Preparation, Submission, and Execution of the Budget,” and OMB Circular [A-136](#), “Financial Reporting Requirements,” is incorporated throughout the chapter.

***2.0 FORMAT FOR THE SBR**2.1 Format for the [Draft](#) Version of the SBR

[Align](#) the SBR with the [Standard Form \(SF\) 133](#), Report on Budget Execution and Budgetary Resources, using the guidance published in Section 130 of OMB Circular A-11. Prepare the SBR at the DoD Component level and summarize the individual appropriation account level SF 133s. [Add a column for the Non-Budgetary Credit Financing Account](#) for the [draft](#) version of the combined SBR. See [OMB Circular A-136](#), [section II.3.5.4](#), “Illustrative Statement of Budgetary Resources,” for an example. [Minimize](#) the additional time and workload required to round and reconcile dollar by [stating](#) all amounts in dollars and cents in the [statement and notes](#) working versions.

2.1.1. [Distinguish](#) between budgetary and non-budgetary credit reform financing accounts and identify net outlays of specific distributed offsetting receipt values, [as required by](#) OMB Circular A-136. Reserve the SBR “Non-Budgetary Credit Reform Financing Account” for reporting United States Standard General Ledger (USSGL) account balances from the post-1991 direct loan financing and loan guarantee entries included in OMB Circular A-11, section 185.11. [OMB Circular A-11](#), section 185.11 includes data descriptions for schedules reporting financing and loan guarantee balances. The SBR, the [SF 133 budget execution](#), and the Budget of the U.S. Government [information must be reconciled](#) to ensure the integrity of the numbers presented.

2.1.2. [Submit](#) USSGL-based trial balances through the Governmentwide Treasury Account Symbol Adjusted Trial Balance System ([GTAS](#)) to produce the SF 133, the prior year (PY) column of the Program and Financing Schedule (Schedule P) of the Budget of the U.S. Government, and the SBR. The [DoD Financial Reporting Guidance](#) and OMB Circular A-136 provide instructions for reconciling SF 133 data submitted through GTAS to the SBR.

2.1.2.1. Use the Bureau of the Fiscal Service (Fiscal Service) “Treasury Financial Manual (*TFM*), *Federal Account Symbols and Titles (FAST) Book*” to identify receipt, appropriation, and other fund account symbols and titles assigned by the Department of the Treasury. The FAST Book includes non-budgetary financing and loan guarantee accounts.

2.1.2.2. Disclose non-budgetary financing and loan guarantee accounts as Other Information, Executive Office of the President Accounts. Refer to the FAST Book for a listing of non-budgetary financing and loan guarantee accounts.

2.2 Format for the Final Published SBR

Display dollars rounded to millions with one decimal point in the final (year-end) published DoD principal statements and notes. Display dollars rounded to the nearest thousand in the Component final (year-end) published principal statements and notes’ tables/schedules. Report dollar amounts in note narratives with a maximum of three position integers and a single decimal value followed by an identifier, such as millions or billions (e.g., \$340.1 million, not \$340,100 thousand). Use the line numbers on the draft versions of all statements for reference purposes only. Line number references are not included in the final published statements.

2.3 Note Disclosure

Explain material differences between amounts reported on the financial statements and budgetary reports in footnotes as described in Chapter 10. These material disclosures are consistent with the reconciliation requirements for the SBR, GTAS, and other budgetary reporting. The Component and auditor will discuss any material changes to budgetary information after the publication of the audited SBR to determine whether a restatement or note disclosure is necessary. Disclose material differences between comparable information contained in the SBR and the Budget of the U.S. Government at the Agency-wide level in footnotes as described in Chapter 10. See Section 405 of the DoD Financial Reporting Guidance for DoD materiality thresholds.

3.0 GENERAL INSTRUCTIONS FOR THE PREPARATION OF THE SBR

3.0.1. Reconcile information on the SBR with budget execution information reported on GTAS submissions and in the Budget of the U.S. Government. Prepare the SBR from the USSGL information based on Fiscal Service *USSGL* accounts and crosswalks. The Fiscal Service website contains USSGL information and crosswalks for the SBR. The Defense Departmental Reporting System Audited Financial Statements (*DDRS-AFS*) includes the crosswalk logic from the trial balance to each line of the SBR. Authorized users can access report crosswalks in DDRS-AFS by selecting “Query” and “Referential Data” from the main DDRS-AFS menu and selecting a report under one of the “Report Map” options. For DoD, the *DoD Standard Reporting Chart of Accounts* identifies and defines approved general ledger accounts in accordance with the Standard Financial Information Structure.

3.0.2. Due to timing differences, subsequent material or non-material changes may be made to budgetary information included in the Budget of the U.S. Government after the SBR has

been published. Make all subsequent changes in OMB's MAX A-11 Data Entry System and in GTAS during the September revision period.

3.0.3. The agencies and their auditors will discuss any material changes to budgetary information after the publication of the audited SBR to determine if restatement or note disclosure is necessary. At a minimum, disclose any material difference between comparable information contained in the SBR and the Budget of the U.S. Government in footnotes as described in Chapter 10.

3.0.4. Disaggregate budgetary information for each of the reporting entity's major budget accounts. Present the disaggregated budgetary information as Required Supplementary Information (RSI), as described in Chapter 12. Recognize and measure budgetary information in the SBR according to OMB Circular A-11 [Appendix F](#), "Format of SF 132, SF 133, Schedule P. [OMB Bulletin 24-01](#), "Audit Requirements for Federal Financial Statements," provides additional guidance by identifying the minimum requirements for audits of Federal financial statements.

3.0.5. OMB Circular A-136 requires a combined SBR (intragovernmental transactions are not eliminated), consistent with the aggregate of the account level information presented on GTAS submissions. Do not perform a line-by-line consolidation of this statement since it would require a line-by-line elimination of inter-entity balances. The statement distinguishes between budgetary and non-budgetary credit reform financing accounts and identifies distributed offsetting receipt values.

3.0.6. Divide the SBR into three general subsections: Budgetary resources; Status of budgetary resources; and Outlays, net.

3.0.6.1. Aggregate the SBR to reflect all activity of the reporting entity for the year covered by the financial statement. Present PY information so the reader may make appropriate comparisons with PYs.

3.0.6.2. Present separate columns for the current year (CY) and PY non-budgetary credit reform financing accounts in the SBR. The presentation allows for a clear distinction between budgetary and non-budgetary credit reform financing account information as required by OMB Circular A-136. Report all non-budgetary credit reform financing accounts separate from the budgetary totals in the Budget of the U.S. Government.

3.0.6.3. Include Line 4200 for distributed offsetting receipts on the SBR. Distributed offsetting receipts increase budget authority and reduce outlays at the Component level in the Budget of the U.S. Government but are not required on the SF 133. The SF-133 provides appropriation account-level information only. The SBR functions as a Component-wide report and includes values of distributed offsetting receipts to reconcile with the Fiscal Service Quarterly [Distributed Offsetting Receipts by Department Report](#) in the Central Accounting Reporting System ([CARS](#)). This report provides detailed information for transactions in the Statement of Transactions and the [Monthly Treasury Statement](#).

3.0.7. Monitor budget execution at the individual appropriation account level (SF 133) for DoD Component [consolidation](#) entities. Aggregate all budgetary information for the combined SBR principal statements. Disaggregate budgetary information for the reporting entity's combining statement by major budget account groups and present in the RSI section of the financial statements as identified in section 4.0. The major accounts and the aggregate of small budget accounts must equal, in total, the amounts reported on the face of the SBR.

* 3.0.8. [OMB Circular A-11, Appendix F](#) identifies the format and information reported on each line of the SBR. [OMB Circular A-136](#) provides line-item instructions for the types of data included in each section of the SBR.

4.0 DISAGGREGATED SBR

Prepare and report the Disaggregated SBR in the RSI section of the financial statements.

4.1 The DoD-wide Disaggregated SBR

Disaggregate the DoD-wide SBR into seven appropriation/fund groupings. Provide column headings and breakout by: Military Personnel; Procurement; Research, Development, Test and Evaluation (RDT&E); Family Housing and Military Construction; Military Retirement Benefits; Civil Works; and Operations, Readiness and Support.

4.2 Military Department GFs Disaggregated SBR

Disaggregate the Department of the Army GF, the Department of the Navy GF, and the Department of the Air Force GF SBR into five appropriation/fund groupings. Provide column headings and breakout by: Military Personnel; Procurement; RDT&E; Family Housing and Military Construction; and Operations, Readiness and Support.

4.3 Military Retirement Fund and U.S. Army Corps of Engineers (USACE) Disaggregated SBR

A disaggregated SBR for the Military Retirement Fund is not applicable. The USACE Civil Works may disaggregate as appropriate for the Treasury Index 96 accounts in the stand-alone USACE financial statements.

4.4 Medicare-Eligible Retiree Health Care Fund Disaggregated SBR

A disaggregated SBR for the Medicare-Eligible Retiree Health Care Fund is not applicable.

4.5 Working Capital Fund (WCF) Disaggregated SBR

Disaggregate the stand-alone Army WCF, Navy WCF, and Air Force WCF SBR by business activity.

4.6 All Other Defense Entities Disaggregated SBR

The stand-alone Other Defense Entities may disaggregate as appropriate for their entities.

VOLUME 6B, CHAPTER 10: “NOTES TO THE FINANCIAL STATEMENTS”*SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by [blue font](#).

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [bold, italic, blue, and underlined font](#).

The previous version dated [March 2020](#) is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Streamlined language to more closely follow Office of Management and Budget (OMB) Circular A-136, Financial Reporting Requirements, dated June 3, 2022.	Revision
All	Annotated Department of Defense (DoD) specific items for presentation purposes.	Revision
All	Removed desk guide instructions.	Revision
Policy Memo	The Deputy Chief Financial Officer policy memorandum, “Standardization of the Footnotes to the Financial Statements,” dated February 20, 2020 was incorporated into this chapter and cancelled.	Cancellation
4.2	Removed the table and streamlined for improved readability.	Revision
7.1	Added general summary information.	Addition
8.2	Added new requirements for Non-Federal investments.	Addition
9.1	Added new requirement to record loss allowance for intragovernmental receivables.	Addition
12.5	Added new requirement for the summary of General Property, Plant, and Equipment activity.	Addition
16.4	Added new requirement to report liability balance for unpaid insurance claims.	Addition
16.5	Added disclosures for insurance programs.	Addition
17.1	Added disclosures for environmental and disposal liabilities.	Addition
18.2	Added disclosures specific to DoD.	Addition
19.0	Added disclosures for Leases.	Addition
23.4	Added new Statement of Changes in Net Position disclosure.	Addition

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
30.0	Added disclosure specific to Agency-Wide for activities of the Security Assistance Accounts.	Addition
32.0	Added requirement for reporting on COVID-19 activity.	Addition
33.0	Added requirement for reporting subsequent events.	Addition

CHAPTER 10

NOTES TO THE FINANCIAL STATEMENTS

1.0 GENERAL

1.1 Purpose

This chapter prescribes the format, content, and [guidance](#) for the preparation and presentation of notes to the principal financial statements.

1.2 Authoritative Guidance

1.2.1. This chapter supplements the reporting requirements of Office of Management and Budget [\(OMB\) Circular A-136](#), “Financial Reporting Requirements.” Updates to OMB Circular A-136 are on the OMB website. OMB Circular A-136 authorizes agencies to modify illustrations, [with the exception of the Balance Sheet](#), in order to clarify amounts or remove information that does not apply or is uninformative. The chapter also describes responsibilities of the DoD Chief Financial Officer (CFO) as established by the CFO Act of 1990. The major DoD Components and reporting entities listed in Chapter 1 will prepare quarterly and fiscal year (FY)-end comparative financial statements and notes. [For account information, refer to the U.S. Standard General Ledger \(USSGL\), and the DoD USSGL Transaction Library, which is available on the Standard Financial Information Structure \(SFIS\) web page.](#)

1.2.2. The entities covered by this chapter are “reporting entities” and “component reporting entities” under Statement of Federal Financial Accounting Standards [\(SFFAS\) 47](#), “Reporting Entity.” Under SFFAS 47, inclusion in a reporting entity’s financial statements may take the form of consolidation or disclosure. Agencies should review SFFAS 47, and consult with the [Office of the Deputy CFO](#) if they have questions regarding which agencies to include in their Performance and Accountability Report or Agency Financial Report (AFR).

2.0 REPORTING

*2.1 Consistency and Agreement

The supporting schedules presented in the notes [must agree with](#) the amounts presented in the body of the financial statements, [where applicable](#). Maintain the consistency of the chosen presentation (i.e. “thousands” or “millions”) and rounding level throughout the financial statements and notes. Rounded totals must agree between the financial statements as applicable (e.g., Net Position line on the Statement of Changes in Net Position (SCNP) must equal the Total Net Position line on the Balance Sheet). Individual line items must sum to the totals, which may require adjusting the individual detail line items for differences created by the rounding process rather than adjusting column totals. The prior FY column must be consistent with the amounts published on the financial statements and notes in the prior FY; [unless, there was a restatement of the prior FY](#). Comparative financial information is presented on a one-year trailing period basis. For example, if presenting third quarter data, show comparative data from the third

quarter of the prior FY. It is preferred the Component footnote numbers and disclosures are identical to the Agency-Wide footnote numbers and disclosures.

2.2 Compliance with U.S. Generally Accepted Accounting Principles

Some of the underlying financial systems and operations that produce these statements were not designed to generate auditable financial statements in compliance with the form and content guidance. Because of such long-standing system deficiencies, many DoD organizations may not be fully compliant with U.S. Generally Accepted Accounting Principles (USGAAP) and OMB Circular A-136. DoD is developing long-term systems improvements that will correct these deficiencies and ensure compliance with USGAAP. Within the Federal Government, the Federal Accounting Standards Advisory Board ([FASAB](#)) “Handbook of Federal Accounting Standards and Other Pronouncements, as Amended” is an authoritative source for USGAAP and is available on the FASAB website under “Standards and Guidance.” In cases where individual line items of the financial statements are not obtainable, or a substitution is made from the requirements herein, explain the deficiencies, and the reason for the noncompliance, in the related note. In addition, identify departures from USGAAP in Note 1, “Significant Accounting Policies.”

2.3 Classifications

U.S. Department of the Treasury (Treasury) account symbols are the basis for reporting the Department's financial transactions. Treasury's Bureau of the Fiscal Service classifies receipt and expenditure accounts according to the Treasury Financial Manual (TFM) Federal Account Symbols and Titles, [The FAST Book](#), Supplement to Volume 1. For descriptions of fund groups, and how they are used, refer to Volume 12, Chapter 1.

3.0 GENERAL NOTE GUIDANCE

3.1 General

The objective of the notes to the financial statements is to provide additional disclosures to ensure that the financial statements are more informative and not misleading. Consider the audience when writing the note narratives. Users of the general-purpose financial reports, including internal users, tend to have different levels of knowledge about government operations, accounting, and finance. Prepare the notes to the financial statements such that individuals without a detailed knowledge of accounting principles and specific business practices can understand them. DoD's financial statements are provided to various internal users within DoD as well as external users such as OMB, Treasury, Congress, Government Accountability Office, and the general public.

3.2 Other Lines

Include a narrative for any line item titled “Other.” If the individual components of the “Other” line item represent 10 percent or more of the value of the line, disclose those components separately. If no amount sums to 10 percent or more of the “Other” line item, state that the amount is attributable to multiple items.

3.3 Abnormal Balances

OMB Reportable Components are required to explain all abnormal balances appearing on individual note schedules and financial statement lines. Current policy for reporting abnormal balance information is available on the [DFAS Financial Reporting Guidance](#) web page that contains the Annual and Quarterly Financial Statement Guidance.

3.4 Fiscal Year Presentation

Report the current FY and prior FY amounts separately; unless, otherwise annotated.

3.5 DFAS Financial Reporting Guidance

The [DFAS Annual and Quarterly](#) Financial Reporting Guidance provides additional information pertaining to the financial statement notes. Reporting entities must use authoritative guidance, such as USGAAP, FASAB, and OMB Circular A-136, in addition to the DFAS Financial Reporting Guidance, when preparing the notes to the financial statements.

4.0 NOTE 1. SIGNIFICANT ACCOUNTING POLICIES

4.1 General Information

Note 1 to the financial statements must describe the reporting entity and identify its major components if not fully described in the Management’s Discussion and Analysis. Also, summarize the accounting principles and the methods of applying those principles that management has concluded are the most appropriate for presenting the entity’s assets, liabilities, equity, net cost of operations, changes in net position, and budgetary resources. Do not duplicate details presented elsewhere as part of the notes to the financial statements. [It may be necessary to include more detailed discussion of an accounting policy in a specific note.](#)

4.1.1. In general, the disclosure encompasses important judgments as to the valuation, recognition, and allocation of assets, liabilities, expenses, revenues, and other financing sources. Include in Note 1 a description of changes in USGAAP that impact the financial statements and an explanation of concepts, such as Fund Balance with Treasury (FBWT) and funds from dedicated collections, unique to federal financial statements. [Reporting entities are encouraged to explain federal budgetary terms and concepts such as budgetary resources, appropriations, gross and net outlays, budgetary and non-budgetary, and distributed offsetting receipts.](#)

4.1.2. In addition, disclose any significant changes, from the prior FY, in the composition of the reporting entity or significant changes in the manner in which the reporting entity aggregates information for financial reporting purposes.

*4.2 Reporting

All DoD reporting entities must review financial processes, systems, and data and modify or expand the sample disclosure statements for a complete and accurate representation of each issue. The specific language shown in sample disclosure statements may not be applicable to all DoD Components. Do not include narratives that are not applicable.

4.2.1. Reporting Entity. Describe the reporting entity and identify its major components if not fully described in the Management's Discussion and Analysis. Also, describe any consolidated entities and disclosure entities in accordance with SFFAS 47, and explain that disclosure entities are not consolidated entities.

4.2.2. Mission of the Reporting Entity. For each reporting entity, enter a brief mission statement if not fully disclosed in the Management's Discussion and Analysis.

4.2.3. Basis of Presentation. Disclose how the financial statements are prepared and any limitation that prevents compliance with USGAAP. Include a disclosure that the financial statements have been prepared to report the financial position and results of operations as required by the CFO Act of 1990, expanded by the Government Management Reform Act of 1994, and other legislation.

4.2.4. Classified Information. To protect classified information, all reporting entities must prevent the disclosure of classified information. Only those entities recording the data report classified activity.

4.2.5. Basis of Accounting. Disclose significant changes in the composition of the reporting entity, or significant changes in the manner in which the reporting entity aggregates information for financial reporting purposes. Describe the accounting principles, and methods of applying those principles, that management has concluded are appropriate for presenting fairly the entity's assets, liabilities, net cost of operations, changes in net position, and budgetary resources. Describe changes in USGAAP affecting the financial statements and explain concepts such as FBWT and Funds from Dedicated Collections. Describe limitations that prevent compliance with full accrual accounting as required by USGAAP.

4.2.6. Accounting for Intragovernmental and Intergovernmental Activities. Describe the reporting entity's: (1) methodology for eliminating transactions among entities within DoD and between other federal agencies; (2) any limitation that prevents the elimination of the intragovernmental transactions; and (3) actions the reporting entity is taking to correct the problem(s). Disclose that DoD's proportionate share of public debt and related expenses, and interest cost of the Federal Government is not included.

4.2.7. Non-entity assets. Disclose relevant information related to amounts reported as entity and non-entity assets.

4.2.8. Fund Balance with Treasury. Include a disclosure statement to the following: “The Reporting Entity’s monetary resources are maintained in U.S. Treasury accounts.” Also, include any other information relevant to understanding Funds with the U.S. Treasury. Entities (Defense Agencies) with zero fund balance reported in their financial statements disclose: “Appropriations are suballocated to [Reporting Entities] by DoD. Differences between the U.S. Treasury and DoD balances are reconciled at the Department level.”

4.2.9. Cash and Other Monetary Assets. Include the following disclosures: (1) description of cash and foreign currency; (2) any restrictions on cash or foreign currency; (3) classification of these assets; and (4) procedures for handling exchange rate gains and losses.

4.2.10. Investments. Include the following disclosures: (1) the method for valuing investments; (2) the amortization method for premiums and discounts; (3) the provision for unrealized gains or losses; (4) a description of the types of securities purchased; (5) the information on investment in limited liability partnerships; and (6) information related to accrued interest on investments.

4.2.11. Accounts Receivable. Include the following disclosures: (1) categories of receivables included in the amount reported in accounts receivable on the Balance Sheet; and (2) allowance methods for uncollectible accounts due from the public. Pursuant to TFM Volume 1, Part 2, Chapter 4700, agencies must recognize any allowance for loss on intragovernmental accounts receivable.

4.2.12. Loans Receivable, Net and Loan Guarantee Liabilities. Disclose relevant information related to the loan programs and to which authority is granted in accordance with SFFAS 2, “Accounting for Direct Loans and Loan Guarantees,” and SFFAS 18, “Amendments to Accounting Standards for Direct Loans and Loan Guarantees in SFFAS 2”.

4.2.13. Inventory and Related Property. Include the following disclosures: (1) the method for valuing inventory and related property; (2) an approximation of the percent of resale inventory valued using the moving average cost (MAC) method and other methods; and (3) any limitations in valuing inventory in accordance with SFFAS 3, “Accounting for Inventory and Related Property,” or uncertainties about completeness and existence of reported values of inventory. Describe the held for sale; held in reserve for future sale; excess, obsolete, and unserviceable; held for repair; raw materials; and work-in-process categories. Also describe the Operating Material & Supplies (OM&S) held for use; held in reserve for future use; excess, obsolete, and unserviceable inventory; held for repair; and in development categories. DoD Components are responsible for identifying inventory (including inventory held as OM&S) that is excess, obsolete, and unserviceable. Upon identification of inventory as excess, obsolete, and unserviceable, the DoD Component adjusts the value of excess, obsolete, and unserviceable inventory to its net realizable value (NRV) as described in Volume 4, Chapter 4.

4.2.14. General Property, Plant, and Equipment. Include the following disclosures: (1) the method for valuing general equipment; (2) the capitalization threshold; (3) any limitations in valuing General Property, Plant, and Equipment (PP&E) in accordance with federal standards; and (4) the policy for reporting property provided to contractors.

4.2.15. Other Assets. Identify the majority of items reported as “Other Assets.” Describe contract financing payments and the circumstances under which the reporting entity uses them. See Volume 4, Chapter 5 for additional information related to contract financing payments.

4.2.16. Leases. Describe the conditions under which capital and operating leases would be recorded. Identify the method used to determine the value for capital leases. Describe how the discount rate for the present value calculation is determined. Disclose current year (CY) Federal and Non-Federal leases separately. Prior year (PY) lease amounts do not need to be disclosed separately.

4.2.17. Liabilities. Disclose relevant information related to amounts reported as liabilities.

4.2.18. Environmental and Disposal Liabilities. Describe environmental and other disposal liabilities. Identify the conditions in which they would be reported on the Balance Sheet as a liability, or condition where financial statement reporting is limited to a note disclosure. Describe the liabilities that arise from anticipated disposal costs.

4.2.19. Other Liabilities. Identify the majority of items reported as “Other Liabilities.” Describe such other liabilities as payroll liabilities and insurance programs or other liabilities applicable to the reporting entity.

4.2.20. Commitments and Contingencies. Disclose relevant information related to amounts reported as commitments and contingencies.

4.2.21. Federal Employee and Veteran Benefits Payable. Describe transactions involving Federal Employee and Veteran Benefits Payable. The Department applies SFFAS 33, “Pensions, Other Retirement Benefits, and Other Postemployment Benefits: Reporting the Gains and Losses from Changes in Assumptions and Selecting Discount Rates and Valuation Dates,” in selecting the discount rate and valuation date used in estimating actuarial liabilities.

4.2.22. Revenue and Other Financing Sources. Disclose the accounting policy for revenue recognition, the reporting entity’s pricing policy, and any limitation that may hinder revenue recognition in accordance with USGAAP. Also, provide policy information on: (1) other financing sources; and (2) non-monetary support provided by U.S. allies for common defense and mutual security, where applicable. Describe the accounting for funds from dedicated collections, as defined by SFFAS 43, “Funds from Dedicated Collections: Amending Statement of Federal Financial Accounting Standards 27, Identifying and Reporting Earmarked Funds.”

4.2.23. Recognition of Expenses. Disclose the accounting policy for recognizing operating expenses and any limitation that may hinder recognition in accordance with USGAAP. Also, define OM&S operating expenses, its recognition method, and any limitations.

4.2.24. Budgetary Resources. Provide explanations of budgetary terminology and concepts.

4.2.25. Treaties for Use of Foreign Bases. Describe the use, purchase, and limits on land, buildings, and other overseas facilities obtained through various international treaties and agreements.

4.2.26. Use of Estimates. Disclose the reporting entity's use of estimates, and that actual results could differ materially from the estimated amounts. Describe the methodology used to account for and recognize estimates.

4.2.27. Parent-Child Reporting. Disclose relevant information related to parent-child reporting.

4.2.28. Transactions with Foreign Governments and International Organizations. Describe the authority to sell defense articles and services to foreign countries and international organizations.

4.2.29. Fiduciary Activities. Disclose information concerning fiduciary activities in accordance with SFFAS 3I, "Accounting for Fiduciary Activities." Fiduciary activities are reported on the financial statement note schedules, and not recognized on the proprietary financial statements. Define the reporting entity's fiduciary activities. Disclose that fiduciary assets are not assets of the Federal Government and are not recognized on the Balance Sheet.

4.2.30. Tax Exempt Status. Disclose the federal government is exempt from all income taxes by any governing body whether it is a federal, state, commonwealth, or foreign government.

5.0 NOTE 2. NON-ENTITY ASSETS

Non-entity assets are assets held by an entity but are not available to the entity. Entity and non-entity assets are segregated on an entity's Balance Sheet.

5.1 General Information

Disclose Non-entity Assets consisting of the categories in accordance with OMB Circular A-136. Combine entity and non-entity assets, except for non-entity assets meeting the definition of fiduciary assets on the face of the Balance Sheet.

5.2 Reporting

5.2.1. Non-entity Assets. These are assets that are held by an entity (as manager or custodian), but are not available for the entity's own operational use. Within DoD, cash held by a disbursing officer (DO), as reflected on the Central Accounting Reporting System Account Statement for the relevant DO Cash Treasury Account Symbol, is an example of a non-entity asset.

5.2.2. Entity Assets. These are assets the reporting entity has authority to use. For example, an entity's assets may be used in entity operations (such as equipment), be sold or exchanged for other assets (such as inventory for cash), or be used to liquidate (pay) entity liabilities.

5.2.3. Other Information. Disclose in the narrative a description of each current FY non-entity asset focusing on the nature of the asset that causes it to be classified as Non-entity Assets.

6.0 NOTE 3. FUND BALANCE WITH TREASURY

6.1 General Information

6.1.1. Status of FBWT. The "Status of Fund Balance with Treasury" is the [entity's](#) total FBWT, as reflected in the entity's general ledger. Unobligated and obligated not yet disbursed balances presented in this section may not equal related amounts reported on the Combining Statement of Budgetary Resources (SBR). Do not include fiduciary activity on these lines. Refer to section 26.0 for the reporting of fiduciary activities. [The Total FBWT amount must equal the Total FBWT line on the Balance Sheet.](#)

6.1.2. Crosswalks. Base the mapping for the lines within this schedule on the USSGL crosswalks utilized in the Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) and the Year-end Transaction Module. For USSGL account information, refer to the Fiscal Service USSGL and DoD USSGL Transaction Library.

6.2 Reporting

6.2.1. Unobligated Balance. The cumulative amount of budgetary authority that has not been set aside to cover outstanding obligations. Classify unobligated balances as available or unavailable. In the 4th quarter of the FY, this balance must agree with the sum of available and unavailable unobligated ending balances reported in GTAS and the Year-end Transaction Module.

6.2.1.1. Available. The amount of unexpired, unobligated balance that has been apportioned or is not subject to apportionment. This amount is immediately available for new obligations.

6.2.1.2. Unavailable. The amount of unexpired, unobligated balance that has not been apportioned, deferred, withheld pending rescission, or other similar limits on resources usage. It also may include expired budgetary resources available only for obligation adjustments until the appropriation is cancelled.

6.2.2. Obligated Balance Not Yet Disbursed. [Funds](#) that have been obligated for goods that have not been received, services that have not been performed, and goods and services that have been delivered and received, but not paid. In the 4th quarter of the FY, this balance must agree with amounts reported in GTAS and the Year-end Transaction Module.

6.2.3. Nonbudgetary FBWT. Include entity and non-entity FBWT accounts, which represent adjustments that do not have budgetary authority. Examples of Nonbudgetary FBWT fund types are: Clearing Accounts; Deposit Funds; and Non-entity and Other accounts.

6.2.4. Explanation of Unobligated Unavailable Balances. Disclose and explain restrictions on unobligated balances. Also, disclose if there are no restrictions.

6.2.5. Other Information. Explain any discrepancies between FBWT as reflected in the entity's general ledger and the balance in Treasury accounts. Disclose any other information necessary for understanding the nature of the Fund Balance.

7.0 NOTE 4. CASH AND OTHER MONETARY ASSETS

*7.1 General Information

Disclose the nature and reasons for any restrictions on cash and other monetary assets. Note non-entity cash is always restricted cash.

7.2 Reporting

7.2.1. Cash. Cash consists of: coins, paper currency, and readily negotiable instruments, such as money orders, checks, and bank drafts on hand or in transit for deposit; amounts on demand deposit with banks or other financial institutions, including nonconfirmed collections and disbursements; investments held outside of Treasury; and foreign currencies, which will be converted into U.S. dollars at the exchange rate on the financial statement date. Cash available for reporting entity use includes petty cash, and cash held in revolving funds, not transferred into the General Fund of the Treasury.

7.2.2. Foreign Currency. The total U.S. dollar equivalent of nonpurchased foreign currencies held in foreign currency fund accounts.

7.2.3. Other Monetary Assets. Report other monetary assets not reported on other lines.

7.2.4. Other Information. Provide additional information needed to understand the nature of cash and other monetary assets. Disclose any restrictions on cash and the dollar amount. Refer to Volume 4, Chapter 2 and SFFAS 1, "Accounting for Selected Assets and Liabilities," paragraphs 27 and 30, and SFFAS 3, paragraphs 59 to 61 and 65 to 66 for information related to restricted cash. Components report entity assets and non-entity assets under an entity's custody or management in the financial statements, except for non-entity assets meeting definition of fiduciary assets, which are not recognized on the Balance Sheet, but disclosed in accordance with the provisions of SFFAS 31.

7.2.5. Disclose any restrictions on the use or conversion of foreign currencies. If there are no restrictions on cash or the use or conversion of foreign currencies, include a statement in the narrative disclosing that there are no restrictions. The Total Cash and Other Monetary Assets must equal the amount reported on the Balance Sheet.

8.0 NOTE 5. INVESTMENTS

8.1 General Information

8.1.1. Disclose the reporting entity's investments in federal securities. Investments in federal securities include market-based U.S. Treasury securities issued by Fiscal Service. Investments are normally reported on the Balance Sheet at their par value or acquisition cost, adjusted for the amortization of the premium or discount recorded at the time of acquisition. [The Total Intragovernmental and Non-Federal Investments must equal the amounts reported on the Balance Sheet.](#)

8.1.2. Net Investments are equal to Cost, plus Amortized (Premium)/Discount. Securities are normally recognized at amortized cost on the Balance Sheet. However, use market value for Balance Sheet purposes when: (a) there is intent to sell the securities before maturity; and (b) there is a reduction in value that is more than temporary, [in which case market value should be used \(except for pension and retirement plans\). Refer to SFFAS 1, paragraphs 68-73.](#) Other investments are comprised of investments of funds with developers of family housing [as related to the Military Housing Privatization Initiative.](#)

*8.2 Reporting

8.2.1. [Non-Marketable, Market-Based Intragovernmental Securities.](#) Non-marketable, market-based U.S. Treasury securities are not traded on any securities exchange, but mirror the prices of marketable securities with similar terms. All investments maintained by the Defense Finance and Accounting Service Trust Fund Accounting Office are non-marketable, market-based U.S. Treasury securities (e.g., DoD Education Benefits Fund and Military Retirement Fund). Refer to SFFAS 1 for required non-marketable, market-based U.S. Treasury security disclosures.

8.2.2. [Accrued Interest.](#) The amount of interest accrued on intragovernmental investment securities, but not received as of the date of the statements.

8.2.3. [Non-Federal Investments.](#) The Military Family Housing Revitalization Act of 1996 provides for the DoD Family Housing Improvement Fund. The legislation permits investment of funds into ventures with developers to provide family housing. For example, the ventures will be real estate ventures, rent differential payments, investment in limited partnerships, and investments in equity or debt instruments related to family housing. Additionally, provide a description of the accounting method used and the amount of cash and non-cash assets conveyed to the venture. [For non-federal investments, disclose in a table the fair value measurements hierarchy classification \(Levels 1, 2, 3, or Other\) by investments type: held-to-maturity, available-for-sale, or trading securities. Refer to OMB Circular A-136 for disclosure requirements.](#)

8.2.3.1. Level 1 reflects the unadjusted quoted prices in active markets for identical assets that the reporting entity can access at the measurement date.

8.2.3.2. Level 2 reflects inputs other than quoted prices in Level 1 that are directly or indirectly observable for the asset.

8.2.3.3. Level 3 reflects unobservable inputs for the asset.

8.2.3.4. Other reflects the investments that are measured at fair value using the net asset value per share of the investment and have not been categorized in the fair value hierarchy; for these amounts, provide a description of securities.

8.2.3.5. Reporting entities must also disclose a reconciliation of investment activity for non-Federal securities. Refer to OMB Circular A-136 for an illustration.

8.2.4. Other Information. Disclose any additional information relative to understanding the nature of reported investments, such as permanent impairments, and any securities that have been reclassified as securities available for sale or early redemption.

9.0 NOTE 6. ACCOUNTS RECEIVABLE, NET

*9.1 General Information

Present the gross receivables, the allowance for uncollectible accounts, and the net amount due. Disclose the method used to estimate the allowance. Pursuant to [SFFAS 1 and Technical Bulletin 2020-1, Loss Allowance for Intragovernmental Receivables](#), agencies are required to recognize any allowance for loss on intragovernmental accounts receivable. The amount represented in this note includes both entity and non-entity receivables. Do not include receivables related to direct or guaranteed loans. Report these amounts in Note 7, “[Loans Receivable, Net and Loan Guarantee Liabilities](#).”

9.2 Reporting

9.2.1. Intragovernmental Receivables. [Intragovernmental Accounts Receivable, Net](#) must equal the amount reported on the Balance Sheet.

9.2.2. Non-Federal Receivables (From the Public). Non-Federal encompasses domestic and foreign persons and organizations outside the U.S. Government. [Non-Federal Accounts Receivable, Net](#) must equal the amount reported on the Balance Sheet.

9.2.3. Criminal Restitution. Disclose criminal restitution balances [separately if the amount is material to the entity](#), including the gross amount of receivables related to criminal restitution orders monitored by the agency and the estimate of NRV determined to be collectible for criminal restitution orders monitored by the agency.

9.2.4. Other Information. Disclose the method used to estimate the allowance for uncollectible accounts and the net amount due. Disclose any other information needed to understand the nature of the accounts receivable.

10.0 NOTE 7. LOANS RECEIVABLE, NET AND LOAN GUARANTEE LIABILITIES

10.1 General Information

10.1.1. [Federal Credit Reform Act \(FCRA\) of 1990](#). The FCRA divides direct loans and loan guarantees into two groups: Pre-1992 and Post-1991. Pre-1992 means the direct loan obligations or loan guarantee commitments made prior to FY 1992 and the resulting direct loans or loan guarantees. Post-1991 means the direct loan obligations or loan guarantee commitments made after FY 1991 and the resulting direct loans or loan guarantees. Refer to [OMB Circular A-11](#), "Preparation, Submission, and Execution of the Budget," Part 5, Section 185 for definitions and explanations of terms and concepts. The reporting entity discloses direct loan obligations and loan guarantee commitments made after FY 1991. See [SFFAS 18](#) for policy on reporting subsidy reestimate and the technical/default reestimate. Refer to Volume 12, Chapter 4 for more detailed reporting guidance on the accounting standards for direct and guaranteed loans. Refer OMB Circular A-136 for illustrations.

10.1.1.1. [Loans Receivable, Net](#). Loans are reported at the net present value of the following projected cash flows: loan disbursements, repayments of principal, payments of interest, recoveries, proceeds of asset sales, and other payments over the life of the loan after adjusting for estimated defaults, prepayments, fees, penalties, and other recoveries.

10.1.1.2. [Loan Guarantee Liabilities](#). Report these liabilities at the net present value. The cost of the loan guarantee is the net present value of the following estimated projected cash flows: payments by DoD to cover defaults and delinquencies; interest subsidies, or other payments offset by payments to DoD including origination; and other fees, penalties, and recoveries.

10.1.2. [Pre-1992 Direct Loans and Loan Guarantees](#). Disclose whether Pre-1992 direct loans and loan guarantees are reported under the present value method, or are reported under the allowance for loss method. DoD has elected to report Pre-1992 direct loans and loan guarantees using the allowance for loss method. See SFFAS 2 for additional information on the present value and allowance methods.

10.1.2.1. [Note Format](#). Depending on the reporting method selected by management, agencies must choose the appropriated note format, which includes the net present value method or the allowance for loss method.

10.1.2.2. [Changing Reporting Methods](#). Changing from one method to the other is not permitted without the advance approval of OMB. If a reporting entity needs guidance related to Pre-1992 direct loans or loan guarantees, contact the Office of the Under Secretary of Defense (Comptroller), Office of the Deputy CFO. The reporting entity discloses that their loans receivable, net, or their value of assets related to direct loans, is not the same as the proceeds they would expect to receive from selling their loans.

10.1.3. Payments Made on Behalf of Borrowers. When the reporting entity has made payments on behalf of borrowers (which should be collected from the borrowers), the resulting receivables must be reported in the same column as loans receivable for either direct loans or defaulted guaranteed loans.

10.1.4. Direct Loan or Loan Guarantee Programs. The names of the direct loans and loan guarantee programs operated by the reporting entity. An example of a DoD direct loan program is the Military Housing Privatization Initiative (MHPI).

10.1.5. Other Information. Disclose events and changes in economic conditions, other risk factors, legislation, credit policies, and subsidy estimation methodologies and assumptions that: (a) have had a significant and measurable effect on subsidy rates, subsidy expense, and subsidy re-estimates; and (b) are events and changes in conditions that have occurred and are more likely than not to have a significant impact, but the effects of which are not measurable at the reporting date.

10.1.6. Reporting. Report loans [receivable](#) and loan guarantee [liabilities as presented in the OMB Circular A-136](#).

10.2 [Summary of Direct Loans and Loan Guarantees.](#)

Summarize the total amounts for loans receivable and loan guarantee liability reported in Note 7. The Total Loans Receivable, [Net](#) must agree with the amount reported on the Balance Sheet. The Total Loan Guarantee Liability must agree with the amount reported on the Balance Sheet.

10.3 [Direct Loans Obligated \(Post-1991\).](#)

Report the Loans Receivable Gross, the Interest Receivable, the estimated NRV of related Foreclosed Property, the Allowance for Subsidy Cost (Present Value), and the Value of Assets Related to Direct Loans, Net.

10.3.1. Total Direct Loans Receivable. The amount must agree with the amount reported on the Balance Sheet.

10.3.2. Other Information. [For](#) foreclosed property resulting from credit reform activities, refer to OMB Circular A-136 for required disclosures.

10.3.3. Additional Instructions for Foreclosed Property. Value foreclosed property associated with Post-1991 direct loans at the net present value of the projected cash flows. Refer to Section 86 of OMB Circular A-11 for policy related to reporting foreclosed property.

10.4 [Total Amount of Direct Loans Disbursed \(Post-1991\).](#)

Disclose the amount of direct loans disbursed for each program the reporting entity manages. [Currently](#), DoD has one direct loan program that disburses direct loans, the MHPI. Provide other information related to direct loans disbursed necessary to understand the nature of the loans.

10.5 [Subsidy Expense for New Direct Loan Programs by Component.](#)

10.5.1. [Subsidy Expense for New Direct Loans Disbursed – Current FY.](#) Report [the following amounts in separate columns](#): present value amount of the current FY's subsidy expense attributable to the interest rate differential between the interest rate charged to the borrowers and the discount rate used to calculate the present value of the direct loans and the subsidy costs, present value of the estimated delinquencies and defaults (net of recoveries) for the current FY, present value of the estimated fees and other collections (offsetting expense) for the current FY, present value of other cash flows for the current FY, including prepayments and proceeds of loan asset sales. Report the total [amount of the separate columns](#).

10.5.2. [Subsidy Expense for New Direct Loans Disbursed – Prior FY.](#) Report [the following amounts in separate columns](#): present value amount of the prior FY's subsidy expense attributable to the interest rate differential between the interest rate charged to the borrowers and the discount rate used to calculate the present value of the direct loans and the subsidy costs, present value of the estimated delinquencies and defaults (net of recoveries) for the prior FY, present value of the estimated fees and other collections (offsetting expense) for the prior FY, present value of other cash flows for the prior FY, including prepayments and proceeds of loan asset sales. Report the total [amount of the separate columns](#).

10.5.3. [Direct Loan Modifications and Re-estimates – Current FY.](#) Report [the following amounts in separate columns](#): subsidy cost of modifications of direct loans previously disbursed, subsidy cost for interest rate re-estimates which are due to a change in interest rates from the rate assumed in budget preparation and used in calculating the subsidy expense to the rates that are prevailing at the time the direct loan is disbursed, subsidy cost for technical re-estimates which are due to changes made in projected cash flows under the terms of direct loans after reevaluating all the risk factors as of the financial statement date, except for the effect of interest rate re-estimates.; Report the total [amount of the separate columns](#).

10.5.4. [Other Information.](#) Identify other information related to direct loan subsidy expense for Post-1991 direct programs. If modifications were made, explain the nature of the modifications, the discount rate used in calculating the expense, and the basis for recognizing a gain or loss related to the modifications. Also, if appropriate, disclose that the subsidy expense resulting from re-estimates that is included in the financial statements is not reported in the budget until the following year.

10.6 [Subsidy Rates for Direct Loans by Program and Component.](#)

Disclose the budget subsidy rates estimated for the cohorts of the current reporting year. Disclose the subsidy rate for the following components: interest differential costs; default costs

(net of recoveries); fees and other collections; and other costs. These estimated subsidy rates for direct loans are in the current FY's budget (["President's Budget"](#)).

10.6.1. [Budget Subsidy Rates for Direct Loans for the CY Cohorts](#). These rates must be consistent with rates published in the Direct Loans: Assumptions Underlying the FY Subsidy Estimates Table contained in the Federal Credit Supplement to the [Budget of the U.S. Government](#).

10.6.2. [Relevant Information for Comprehension](#). Subsidy rates pertain to the loan agreements contracted during the current FY. Do not apply these rates to the direct loans disbursed during the current reporting year to yield the subsidy expense. The subsidy expense for new loans disbursed in the current FY could result from disbursement of loans from both current and prior FY loan agreements. The subsidy expense reported in the current FY also includes modifications and re-estimates.

10.6.3. [Subsidy Rate Amount](#). Each subsidy rate is the dollar amount of the total subsidy or a subsidy component as a percentage of the direct loans obligated in the cohort year. Entities are encouraged to use trend data to display significant fluctuations in subsidy rates. Trend data, if used, includes an analysis to explain the underlying causes for the fluctuations.

10.7 [Schedule for Reconciling Subsidy Cost Allowance Balances \(Post-1991 Direct Loans\)](#).

10.7.1. [Reconciliation](#). Display the reconciliation between the beginning and ending balances of the subsidy cost allowance for outstanding direct loans reported in the reporting entity's Balance Sheet. The reconciliation is required for direct loans obligated on or after October 1, 1991, the effective date of the FCRA. Reporting entities are encouraged, but not required, to display reconciliations for direct loans obligated prior to October 1, 1991, in schedules separate from the direct loans obligated after September 30, 1991. [Refer to OMB Circular A-136 for illustration](#).

10.7.2. [Subsidy Expense](#). Report the components of subsidy expense for direct loans: Interest Rate Differential Costs; Default Costs (Net of Recoveries); Fees and Other Collections; and Other Subsidy Costs. Total the components of subsidy expense for direct loans.

10.7.3. [Adjustments](#). Report the adjustments [separately](#) for direct loans: Loan Modifications, Fees Received; Foreclosed Property Acquired; Loans Written Off; Subsidy Allowance Amortization; and Other Adjustments.

10.7.4. [Re-estimates](#). Report the Interest Rate Re-estimate and Technical/Default Re-estimate for direct loans. Total the re-estimates for direct loans [as reported in the Modification and Re-estimates table for the CY](#).

10.8 [Defaulted Guaranteed Loans from Post-1991 Guarantees.](#)

Report the defaulted loan guarantees for applicable credit reform programs. If the reporting entity does not have defaulted guaranteed loans, state “[There were no defaulted loan guarantees](#)” after the note number and title.

10.8.1. [Loan Guarantee Programs.](#) Report the: Defaulted Guaranteed Loans Receivable, Gross; Interest Receivable; the estimated value of related Foreclosed Property; the Allowance for Subsidy Cost (Present Value); and the Value of Assets Related to Defaulted Guaranteed Loans Receivable, Net.

10.8.2. [Other Information.](#) [For](#) foreclosed property resulting from credit reform activities, refer to OMB Circular A-136 for required disclosures.

10.8.3. [Additional Instructions for Foreclosed Property.](#) Value foreclosed property associated with Post-1991 direct and acquired defaulted guaranteed loans at the net present value of the projected cash flows associated with the property. At the time of foreclosure, foreclosed property may be recorded at the estimated NRV if the differences do not meet the materiality threshold identified in the [DFAS](#) Financial Reporting Guidance. A portion of the related allowance for subsidy account applies to the foreclosed property, but that amount need not be separately determined. Rather, subtract the allowance account from the sum of the credit program assets to determine the net present value of the assets.

10.9 [Guaranteed Loans Outstanding.](#)

10.9.1. [Guaranteed Loans Outstanding.](#) Present the outstanding amount of guaranteed loans for each loan guarantee program. For each guaranteed loan outstanding, report the face value of outstanding principal of guaranteed loans disbursed by a third party. In [an additional](#) column, report the guaranteed amount of the outstanding principal. Identify other information related to guaranteed loans outstanding necessary to understand the nature of the loan.

10.9.2. [New Guaranteed Loans Disbursed.](#) For each new guaranteed loan disbursed, report the face value of principal of guaranteed loans. [Separately](#), report the guaranteed amount of principal [within the same table](#). Identify other information related to new guaranteed loans disbursed necessary to understand the nature of the loan.

10.10 [Liability for Loan Guarantees.](#)

For each program with Post-FY 1991 loan guarantees, report the present value of the estimated net cash flows (outflows less inflows), to be paid by the entity because of the loan guarantees. Present the liabilities for loan guarantees for each loan guarantee program.

10.10.1. [Programs.](#) Report the present value of current and prior FY estimated net cash flows (outflows less inflows) to be paid because of loan guarantees.

10.10.2. Other Information. Identify other information necessary to understand the nature of the loan guarantee liability.

10.11 Subsidy Expense for Loan Guarantees by Program and Component.

Report the estimated cash flows (on a present value basis) for the various subsidy expense components of the loan guarantee programs. Refer to OMB Circular A-136 for illustrations.

10.11.1. Subsidy Expense for New Loan Guarantees – Current FY. Disclose the following amounts in separate columns: present value of the amount of the interest supplements, present value of the estimated payments for defaults on loan guarantees (net of recoveries), present value of the estimated fees and other collections (offsetting expense), present value of other cash flows. Report the total amount of the separate columns.

10.11.2. Subsidy Expense for New Loan Guarantees – Prior FY. Disclose the following amounts in separate: present value of the amount of the interest supplements, present value of the estimated payments for defaults on loan guarantees (net of recoveries), present value of the estimated fees and other collections (offsetting expense), present value of other cash flows. Report the total amount of the separate columns.

10.11.3. Modifications and Re-estimates – Current FY. Disclose the following amounts in separate columns: subsidy expense for modifications of loan guarantees in guaranteed loans previously disbursed by a third party (whether Pre-1992 or Post-1991), interest rate re-estimates, and technical re-estimates of the subsidy expense for loan guarantees, previously committed, by components. Report the total amount of the separate columns.

10.11.4. Total Loan Guarantee Subsidy Expense. Disclose CY and PY in separate columns. Present total subsidy expense for the loan guarantees, modifications, and re-estimates.

10.11.5. Other Information. Identify other relevant information for loan guarantee programs subsidy expenses. If modifications were made, explain the nature of the modifications, the discount rate used in calculating the expense, and the basis for recognizing a gain or loss related to the modifications. Also, if appropriate, disclose that the subsidy expense resulting from re-estimates that is included in the financial statements is not reported in the budget until the following year.

10.12 Subsidy Rates for Loan Guarantees by Program and Component.

Report information on the subsidy rates for loan guarantees. Disclose the estimated subsidy rates for the following components: Interest Supplement costs (; Default costs (net of recoveries); Fees and Other Collections; and Other costs. These estimated subsidy rates for loan guarantees are in the current FY's budget (President's Budget).

10.12.1. Subsidy Rates. Subsidy rates must be consistent with rates published in the Loan Guarantees: Assumptions Underlying the (FY) Subsidy Estimates table, contained in the Federal Credit Supplement to the Budget of the U.S. Government, which is a supporting document to the

budget. Refer to the Federal Credit Supplement to the Budget of the U.S. Government for current guidance pertaining to subsidy estimates for loan guarantees.

10.12.2. Subsidy Rate Amount. Each subsidy rate is the dollar amount of the total subsidy or a subsidy component as a percentage of the guaranteed loans obligated. Entities may use trend data to display significant fluctuations in subsidy rates. Such trend data, if used, includes an analysis to explain the underlying causes for the fluctuations.

10.12.3. Subsidy Rate Applicability. The subsidy rates disclosed pertain only to the current FY's cohorts. Do not apply these rates to the guarantees of loans disbursed during the current reporting year to yield the subsidy expense. The subsidy expense for new loan guarantees reported in the current FY could result from disbursements of loans from both current FY cohorts and prior FY(s) cohorts. The subsidy expense reported in the current FY also includes modifications and re-estimates.

10.13 Schedule for Reconciling Loan Guarantee Liability Balances (Post-1991 Loan Guarantees).

Display the reconciliation between the beginning and ending balances of the liability for outstanding loan guarantees reported in each entity's Balance Sheet based upon the following instructions. The reconciliation is required for loan guarantees committed on or after October 1, 1991, the effective date of the FCRA. Reporting entities are encouraged, but not required, to display reconciliations for loan guarantees committed prior to October 1, 1991, in schedules separate from the loan guarantees committed after September 30, 1991. [Refer to OMB Circular A-136 for required disclosures.](#)

10.14 Administrative Expense.

Report the portion of salaries and other administrative expenses that have been accounted for in support of the direct loan and loan guarantee programs.

10.15 Loans Receivable Roll forward.

Loans receivable and defaulted guarantee loans receivable must report a summary table that shows the change in net receivables. [Refer to OMB Circular A-136 for required disclosures.](#)

11.0 NOTE 8. INVENTORY AND RELATED PROPERTY, NET

11.1 General Information

Volume 4, Chapter 4 contains more complete information on inventory valuation methods. Valuation methods shown are those used by DoD, but may be specific to a particular organization or type of organization. [Information for the inventory disclosures are identified in SFFAS 3. Also, reference *SFFAS 48*, "Opening Balances for Inventory, Operating Materials and Supplies, and Stockpile Materials" for alternative inventory valuation methods for the establishment of opening balances.](#)

11.1.1. Inventory, Operating Materials and Supplies, and Stockpile Materials Opening Balances. SFFAS 48 allows a reporting entity, under specific conditions, to apply alternative methods in establishing opening balances for Inventory, OM&S, and Stockpile Materials. Deemed cost is an acceptable valuation method to establish opening balances of Inventory, OM&S, and Stockpile Materials.

11.1.2. Disclose the use of deemed cost in the first year the entity uses deemed cost to value assets for its opening balances and in any subsequent year those financial statements are presented for comparative purposes. The disclosure should describe the deemed cost methods used, and in the first year presented, the effect on relevant balances.

11.1.3. Account for inventory, OM&S, and Stockpile Materials after opening balances in accordance with SFFAS 3.

11.2 Inventory and Related Property, Net

Include the total amounts of Inventories and Related Property reported in Inventory, OM&S, and Stockpile Material in Note 8. The Total Inventory and Related Property, Net must agree with the amount reported on the Balance Sheet.

11.3 Inventory, Net

Inventory categories include: held for sale; held in reserve for future sale; held for repair; raw materials; work-in-process; and excess, obsolete, and unserviceable.

11.3.1. Valuation. Disclose the following for each category of inventory: the gross amount recorded in the inventory system; the revaluation allowance for holding gains (losses) on inventory, if any; the net book value of the inventory (gross inventory plus revaluation allowance; and the valuation method used). The revaluation allowance represents adjustments to the gross inventory, in accordance with the applicable valuation methodology.

11.3.2. Valuation Method. Enter the [code for the](#) valuation method: Latest Acquisition Cost adjusted for holding gains and losses; NRV; and MAC.

11.3.3. Held for Sale. Report inventory that is held for sale, which includes consumable spare and repair parts, and repairable items owned and managed by DoD. This inventory includes materiel held due to a managerial determination to retain these items to support military or national contingencies.

11.3.4. Held in Reserve for Future Sale. Report the cost or value of tangible personal property held in reserve for future sale including inventory held for future sale because it is not readily available or will be needed.

11.3.5. Held for Repair. Report inventory held for repair, which includes damaged inventory that requires repairs to make it suitable for sale. DoD often relies on weapon systems and machinery no longer in production and encourages the repair and rebuilding of certain items.

Report inventory identified as unserviceable, but not reviewed to determine its reparability, as held for repair. When an assessment has been conducted, and it has been determined that it is not economically feasible to repair the item, the item must be reported as excess, obsolete, and unserviceable.

11.3.6. Raw Materials. Report the raw material inventory [that is used as a component part of inventory](#).

11.3.7. Work-In-Process. Report inventory that is work-in-process, which includes costs related to the production or servicing of items, including direct material, direct labor, applied overhead, and other direct costs. This may also be used to accumulate the amount paid to a contractor under cost reimbursable contracts, including the amount withheld from payment to ensure performance, and the amount paid to other government plants for accrued costs of end items of material ordered but not delivered. Also, report work-in-process at depot maintenance activities.

11.3.8. Excess, Obsolete, and Unserviceable Inventory. Report inventory estimated to be potentially excess, obsolete, or beyond economic repair. Excess, obsolete, and unserviceable inventory must be valued at its expected NRV. Refer to Volume 4, Chapter 4 regarding the use of the NRV for excess inventory.

11.3.9. Total Inventory, Net. The [total](#) amount of [Inventory, Net must](#) equal the amount reported on the [Inventory, Net](#) line Note 8 (the summary note for Inventory and Related Property, Net).

11.3.10. Definitions of Inventory Gross Value, Revaluation Allowance, and Inventory, Net Columns. Inventory, Gross Value represents the standard value used for inventory transactions in the financial system. Revaluation Allowance represents the difference between standard inventory values and either historical cost or NRV. Inventory, Net is approximate historical cost or NRV. Valuation Method is the applicable valuation methodology used to arrive at the net inventory value.

11.3.11. Other Information (Related to Inventory). Disclose other information for the inventory component of the Inventory and Related Property line item on the reporting entity's Balance Sheet.

11.4 [Operating Material & Supplies, Net](#)

OM&S include spare and repair parts, ammunition, tactical missiles, aircraft configuration pods, and centrally managed aircraft engines. OM&S categories include held for use; held in reserve for future use; held for repair; in development; and excess, obsolete, and unserviceable.

11.4.1. Valuation. Disclose the following for each category of OM&S: gross amount reported in the inventory system; [revaluation](#) allowance for gains (losses) on OM&S, if any; net book value ([gross amount plus allowance for gains \(losses\)](#)); and valuation method used. The

revaluation allowance, represent the adjustment to the recorded value to arrive at the historical cost.

11.4.2. Held for Use. Report OM&S held for use balances which include all issuable materiel.

11.4.3. Held in Reserve for Future Use. Report OM&S held in reserve for future use balances representing the cost or value of tangible personal property, held in reserve because it is not readily available or because it will be needed.

11.4.4. Held for Repair. Report OM&S held for repair, which includes all economically repairable materiel. OM&S that has been identified as unserviceable, but not yet reviewed to determine its reparability, must be reported as held for repair. When an assessment has been conducted, and it has been determined that it is not economically feasible to repair the item, then the item must be reported as excess, obsolete, and unserviceable.

11.4.5. In Development. Report the cost incurred or value of tangible personal property, such as OM&S in development that will be consumed in normal operations upon completion of development.

11.4.6. Excess, Obsolete, and Unserviceable. Report OM&S estimated to be potentially excess, obsolete, or beyond economic repair. Value excess, obsolete, and unserviceable OM&S at their expected NRV. Refer to Volume 4, Chapter 4 regarding the use of the NRV for excess OM&S.

11.4.7. Total OM&S, Net. The total amount of OM&S, Net must equal the amount reported on the OM&S, Net line of Note 8 (the summary note for Inventory and Related Property, Net).

11.4.8. Valuation Method. Enter the code for the valuation method. Direct Method; Historical Cost; Replacement Price; Standard Price; NRV; and MAC

11.4.9. Other Information (Related to OM&S). Disclose other information for the OM&S component of the Inventory and Related Property line item on the entity's Balance Sheet.

11.5 Stockpile Material, Net

11.5.1. Stockpile Material. Report the amount of strategic and critical materials held due to statutory requirements for use in national defense, conservation, or national emergencies.

11.5.1.1. The stockpile material categories are "Held for Sale" and "Held in Reserve for Future Sale." Stockpile material is strategic and critical material, held due to statutory requirements, for use in national defense, conservation, or national emergencies. All material held by the National Defense Stockpile is classified as held in reserve for future sale until congressional action declares the material no longer required to be stockpiled, and available for sale on the open

market. When the authorization to offer material for sale is received, the material is reclassified to [held for sale](#).

11.5.1.2. Disposals cannot be made from the stockpile except for: (1) necessary upgrading, refining, or processing; (2) necessary rotation to prevent deterioration; (3) determination as excess with potential financial loss if retained; or (4) as authorized by law.

11.5.2. Valuation. For each category of Stockpile Material, disclose the amount reported in the logistics system allowance for gains (losses) on stockpile material, if any, and the net book value of stockpile material.

11.5.3. Valuation Method. Enter the [code for the](#) valuation method: MAC.

11.5.4. Total Stockpile Material. The total amount of Stockpile Material amount equal the amount reported on [Stockpile Material, Net](#) line of Note 8 (the summary note for Inventory and Related Property).

11.5.5. Other Information (Related to Stockpile Material). Disclose other information for the Stockpile Material component of the Inventory and Related Property, Net line item on the Balance Sheet.

12.0 NOTE 9. GENERAL PROPERTY, PLANT, AND EQUIPMENT, NET

12.1 [General Information](#)

12.1.1. General PP&E. Report General PP&E by major class. Recognition and measurement criteria for General PP&E are in [SFFAS 6](#), "Accounting for Property, Plant, and Equipment," as amended by [SFFAS 10](#), "Accounting for Internal Use Software;" [SFFAS 23](#), "Eliminating the Category National Defense Property, Plant, and Equipment;" [SFFAS 44](#), "Accounting for Impairment of General Property, Plant, and Equipment Remaining in Use;" and [SFFAS 50](#), "Establishing Opening Balances for General Property, Plant, and Equipment: Amending SFFAS 6, 10, and 23, and Rescinding SFFAS 35." [The Total General PP&E, Net must agree with the amounts on the reporting entity's Balance Sheet.](#)

12.1.2. Depreciation/Amortization Method. Report the depreciation or amortization method used: Straight Line (S/L) or not applicable. See Volume 4 for information on how to calculate depreciation using the S/L method.

12.1.3. Service Life. Report the range of service life by Major Asset Class based on DoD Standard Recovery Periods contained in Volume 4.

12.1.4. Acquisition Value. Report the acquisition costs or estimated values by Major Asset Class.

For assets under capital lease, report the lesser of the present value or the fair value of the asset. The present value will be calculated, using either the lessor's implicit rate or the U.S.

Treasury borrowing rate of the rental or other lease payments during the lease term, and will exclude that portion of the payments representing executory costs paid to the lessor. Include a cross-reference to Note 16, “Leases,” for additional information on capital leases.

12.1.5. Accumulated Depreciation/Amortization. Report the accumulated depreciation/amortization through the current reporting period, by Major Asset Class.

12.1.6. Net Book Value. Report the net book value of each Major Asset Class (acquisition cost less accumulated depreciation/amortization).

12.1.7. General PP&E in the Possession of Contractors. Report all property in the hands of contractors in accordance with Volume 4.

12.1.8. General PP&E Opening Balances. SFFAS 50 allows a reporting entity, under specific conditions, to apply alternative methods in establishing opening balances for General PP&E. DoD’s alternative methods include: using deemed cost to establish opening balances of General PP&E, selecting between deemed cost and prospective capitalization of internal use software, and allowing an exclusion of land and land rights from opening balances with disclosure and acreage information and expensing of future acquisitions.

12.1.8.1. Disclose the use of deemed costs in the first year the entity uses deemed costs to value assets for its opening balances and in any subsequent year those financial statements are presented for comparative purposes. The disclosure should describe the deemed cost methods used, and in the first year presented, the effect on relevant balances.

12.1.8.2. Account for general equipment and real property after opening balances in accordance with SFFAS 6.

12.1.9. Other Information. Disclose in the narrative sections of this note other relevant information for the General PP&E line item on the reporting entity’s Balance Sheet.

12.1.9.1. Adjustments. If adjustments are required to existing PP&E in the period the standards are implemented, in order to comply with the recognition and measurement criteria, record and disclose the adjustments by Major Asset Class in accordance with the standard.

12.1.9.2. General Disclosures Related to General PP&E. Disclose the required information pertaining to General PP&E, such as: (a) restrictions on the use or convertibility of General PP&E (e.g., outside the continental U.S. real property) or a statement disclosing there are no restrictions; (b) capitalization thresholds, including any changes in thresholds during the period; and (c) adjustments from changes in the accounting standards. If the acquisition cost is unknown for certain types or significant amounts of General PP&E, DoD Components must disclose the valuation method used to estimate the value reported. [Disclosures reported under Note 1 of Significant Accounting Policies must not be repeated in this note.](#)

12.2 Stewardship PP&E

Stewardship PP&E assets include Heritage Assets and Stewardship Land. Disclose, if applicable, the following:

12.2.1. If the cost of Heritage Assets and stewardship land transferred from other federal entities is not known, the receiving entity must disclose the number of physical units by major category. Do not recognize Heritage Assets and stewardship land acquired through donation or devise as a cost in calculating net cost, but disclose the fair value of the property. If the fair value is not known or reasonably estimable, disclose information related to the type and quantity of assets received.

12.2.2. Disclose any amounts expensed during the current period in the [Statement of Net Cost \(SNC\)](#) for the costs of acquiring, constructing, improving, reconstructing, or renovating Heritage Assets (other than Multi-Use Heritage Assets), and the cost of acquiring stewardship land and any costs to prepare a stewardship asset for its intended use. If the accounting system does not provide the necessary information to make the required disclosure for all or part of these expenses, the reporting entity must make the following disclosure to recognize the weakness and to disclose the portion of the expenses that are known. (If no portion of the expenses is known, include only the first sentence of the disclosure.)

12.2.3. Disclose that the reporting entity's accounting system does not capture information relative to Heritage Assets separately and distinctly from normal operations. Where it was able to separate the cost of acquiring, constructing, improving, reconstructing, or renovating Heritage Assets, the reporting entity identified the dollar amount for the FY.

12.3 Heritage Assets

Heritage Assets are items of historical, natural significance, cultural, educational, or artistic (e.g., aesthetic) importance, or items with significant architectural characteristics. Heritage Assets are expected to be preserved indefinitely. [SFFAS 29](#), "Heritage Assets and Stewardship Land," requires entities with Stewardship PP&E to reference a note on the Balance Sheet where required disclosures relative to these assets are contained. Rather than a separate note, DoD discloses Heritage Assets with the General PP&E note.

12.3.1. Reporting. Reporting entities will disclose the beginning counts, additions, deletions, and ending counts of their Heritage Assets, by category for the period presented. Disclose the quantity of Multi-Use Heritage Assets (i.e., Heritage Asset buildings used predominantly for government operations) in the schedule.

12.3.2. Categories. Report balances for Heritage Assets within the following categories.

12.3.2.1. Buildings and Structures. Building and Structures include buildings and structures listed on, or eligible for listing on, the National Register of Historic Places, including Multi-Use Heritage Assets. This category also includes National Historic Landmarks; buildings or structures that are contributing elements to districts listed on, or eligible for, the National Register of Historic Places or a National Historic Landmark District; and buildings and

structures designated eligible in the National Register of Historic Places for purposes of program alternatives.

12.3.2.2. Archeological Sites. Archeological Sites include sites identified, evaluated, and determined to be eligible for, or are listed on, the National Register of Historic Places.

12.3.2.3. Museum Collection Items. Museum Collection Items include items that are unique for one or more of the following reasons: historical or natural significance; cultural, educational, or artistic importance; or significant, technical, or architectural characteristics. Divide museum collection items into two subcategories: fine art and objects. Fine art includes paintings, sculptures, and other three dimensional art. Objects are current use, excess, obsolete, or condemned material; war trophies; personal property, such as uniforms, medals, or diaries; and military equipment.

12.3.3. Disclosures. Include the disclosures for Heritage Assets identified in OMB Circular A-136.

12.3.4. Year-End Reporting. Report deferred maintenance and repair information regarding Heritage Assets in Required Supplementary Information at year-end only.

12.4 Stewardship Land

Stewardship land is land and land rights owned by the Federal Government, but not acquired for or in connection with, items of General PP&E. “Acquired for or in connection with” is defined as including land acquired with the intent to construct General PP&E and land acquired in combination with General PP&E. Each DoD Component responsible for such land will report land classified as stewardship land. Without exception, classify all land provided to the Department from the public domain or at no cost as stewardship land, regardless of its use. SFFAS 29 requires entities with Stewardship PP&E to reference a note on the Balance Sheet where required disclosures relative to these assets are contained. Rather than a separate note, DoD discloses stewardship land within the General PP&E note.

12.4.1. Reporting. Reporting entities will disclose the beginning counts, additions, deletions, and ending counts of their stewardship land, by category. Report the facility numbers and category descriptions. DoD Instruction [\(DoDI\) 4165.14](#), “Real Property Inventory and Forecasting,” identifies the predominant categories authorized for use.

12.4.1.1. Government Owned Land (Facility Number 9110) and State Owned Land (Facility Number 9111) is land held in public trust and will be reported as stewardship land;

12.4.1.2. Withdrawn Public Land (Facility Number 9120) is land held in public trust and will be reported as stewardship land;

12.4.1.3. Licensed and Permitted Land (Facility Number 9130) are interests and privileges held by the entity in land owned by others and will be reported as [other](#) land;

12.4.1.4. Public Land (Facility Number 9140) is land held in public trust and will be reported as stewardship land;

12.4.1.5. Land Easement (Facility Number 9210) are interests and privileges held by the entity in land owned by others and will be reported as stewardship land;

12.4.1.6. In-leased Land (Facility Number 9220) are interests and privileges held by the entity in land owned by others and will be reported as stewardship land; and

12.4.1.7. Foreign Land (Facility Number 9230) are interests and privileges held by the entity in land in foreign countries and will be reported as stewardship land.

12.4.2. Disclosures. Include the disclosures for stewardship land identified in OMB Circular A-136.

*12.5 Summary of Activity

To support the Financial Report of the United States Governmental compilation process, present a summary of activity reconciliation. The following categories must be included in the reconciliation: Balance beginning of year, Capitalized acquisitions, Dispositions, Transfers in/out without reimbursement, Revaluations, Depreciation expense, Donations, Other, and Balance end of year. The General PP&E, Net end of year must agree with the amounts on the reporting entity's Balance Sheet.

13.0 NOTE 10. OTHER ASSETS

13.1 General Information

Report the amount of Other Assets not included elsewhere on the Balance Sheet. Other Assets also include General PP&E assets that are no longer operations, but have not yet been disposed of or removed from service.

13.2 Reporting

13.2.1. Intragovernmental Other Assets. Separately categorize the intragovernmental other assets.

13.2.1.1. Advances and Prepayments. Include advances and prepayments to other federal entities.

13.2.1.2. Other Assets. Include other assets categorized as federal.

13.2.1.3. Total Intragovernmental Other Assets. The total amount must match the amount reported on the Balance Sheet.

13.2.2. Other than Intragovernmental Assets. Separately categorize the non-federal other assets.

13.2.2.1. Outstanding Contract Financing Payments. Include contract financing payments, classified as advances, as defined in Volume 4, Chapter 5.

13.2.2.2. Advances and Prepayments. Include advances and prepayments categorized as non-federal.

13.2.2.3. Other Assets. Include other assets categorized as non-federal.

13.2.2.4. Subtotal. The subtotal amount includes the preceding lines. This subtotal is specific for DoD for presentation purposes.

13.2.2.5. Less: Outstanding Contract Financing Payments and Advances and Prepayments totaled and presented on the Balance Sheet as Advances and Prepayments. This line is specific to DoD for presentation purposes and to illustrate the reconciliation to the Balance Sheet.

13.2.2.6. Net Other than Intragovernmental. The net amount for non-federal other assets must match the amount reported on the Balance Sheet.

13.2.3. Information Related to Other Assets. Identify other relevant information for other assets reported on the Balance Sheet.

14.0 NOTE 11. LIABILITIES NOT COVERED BY BUDGETARY RESOURCES

14.1 General Information

Report the Liabilities Not Covered by Budgetary Resources, liabilities for which congressional action is needed before budgetary resources can be provided. The Total Liabilities must equal the amount reported on the reporting entity's Balance Sheet.

14.2 Reporting

14.2.1. Liabilities Not Covered by Budgetary Resources. Report the amounts of intragovernmental liabilities not covered by budgetary resources for Accounts Payable; Debt; and Other Liabilities. Report the sum of intragovernmental liabilities. Report the amounts of other than intragovernmental liabilities not covered by budgetary resources for Accounts Payable; Federal Employee and Veteran Benefits Payable; Environmental and Disposal Liabilities; and Other Liabilities.

14.2.3. Liabilities Covered by Budgetary Resources. Report the total amount of liabilities covered by budgetary resources. Budgetary resources include: (1) new budget authority; (2) spending authority from offsetting collections; (3) recoveries of unexpired budget authority through downward adjustments of prior FY obligations; and (4) unobligated balances of budgetary

resources at the beginning of the year or net transfers of prior FY balances during the year; and (5) permanent indefinite appropriations or borrowing authority, which have been enacted and signed into law as of the Balance Sheet date, provided that the resources may be apportioned by OMB without further action by the Congress or without a contingency first having to be met.

14.2.4. Liabilities Not Requiring Budgetary Resources. Report the total amount of liabilities not requiring budgetary resources. Amounts represent liabilities that have not been required in the past and will not require the use of budgetary resources in the future. Examples of liabilities [not requiring budgetary resources](#) include liabilities for clearing accounts, non-fiduciary deposit funds, custodial collections, and unearned revenue.

14.2.5. Information Related to Liabilities Not Covered by Budgetary Resources. Provide other information needed to understand the nature of liabilities not covered by budgetary resources. All entities reporting a balance on [Federal Employee and Veteran Benefits Payable](#) must disclose the nature that comprise various employee actuarial liabilities not due and payable during the current FY. Refer to Note 13, "[Federal Employee and Veteran Benefits Payable](#)," for additional disclosures.

15.0 NOTE 12. DEBT

15.1 [General Information](#)

Report the net amount of debt. Agency Debt (Intragovernmental) includes debt [issued under special financing authorities](#) (e.g. Federal Housing Administration debentures and Tennessee Valley Authority bonds), with agency debt held by Government agencies reported separately from agency debt held by the public. Total Debt must equal the amount reported on the entity's Balance Sheet.

15.2 Reporting

15.2.1. Other Debt. [Report the amount of debt owed to the U.S. Treasury, which includes direct loan and guaranteed loan financing account liabilities to the U.S. Treasury. Report the following in separate columns:](#) beginning balance of borrowings, the year's net borrowing, and the ending balance of borrowings.

15.2.2. Information Related to Debt. Provide other information needed to understand the nature of debt (e.g., write offs of debts owed to the U.S. Treasury or the Federal Financing Bank) which includes direct loans and guaranteed loans financing account liabilities disclosed in paragraph 10.1.

15.2.2.1. Disclose that the outstanding debt consists of interest and principal due to the U.S. Treasury and the Federal Financing Bank. State the specific purpose for which the reporting entity borrows funds.

15.2.2.2. Disclose that the reporting entity must pay the debt if borrowers (e.g. foreign country, ship leasing, or housing builder) default on the loan. For loan guarantees, the reporting entity must pay the amount of outstanding principal guaranteed.

16.0 NOTE 13. **FEDERAL EMPLOYEE AND VETERAN BENEFITS PAYABLE**

16.1 **General Information**

Present **Federal Employee and Veteran Benefits Payable** for the current and prior FY based on the following instructions. Report the information required in the note by the entity that administers the benefit(s), except “Federal Employees’ Compensation Act (FECA).” Include amounts owed to the Department of Labor for estimated actuarial liabilities for future workers’ compensation benefits.

16.1.1. **Pension and Health Benefits.** Report the pension and health benefit liabilities for Military Retirement Pensions, Military Pre Medicare-Eligible Retiree Health Benefits, and Military Medicare-Eligible Retiree Health Benefits.

16.1.1.1. **Liabilities.** Report the actuarial present value of projected benefits. For pensions, this would be the projected benefit obligation. Total Liabilities must agree with the amount reported on the Balance Sheet.

16.1.1.1.1. Military Retirement Pensions accumulates funds used to pay pensions and annuities to retired military personnel and their survivors. Military Retirement Pensions will report the actuarially determined present value of all future pensions earned to date, using the “aggregate entry age” normal cost method. This is a method whereby projected retirement costs are spread over the projected future salaries of a new entrant cohort. (Refer to Volume 4, Chapter 10 for further guidance.)

16.1.1.1.2. The Military Pre Medicare-Eligible Retiree Health Benefits will include beneficiaries of the Defense Health Program (DHP), retirees, their dependents, and survivors who are not yet Medicare-eligible. The DHP will report the actuarially determined present value of all retirement benefits earned to date, using the “aggregate entry age” normal cost method. This is a method whereby projected medical costs are spread over the projected future service of a cohort at the point of entry. (Refer to Volume 4, Chapter 10 for further guidance).

16.1.1.1.3. The Military Medical-Eligible Retiree Health Benefits pay for health care programs for Medicare-eligible Military and other Uniformed Service retirees and their Medicare-eligible dependents or survivors. Report the actuarial present value of projected benefits accrued to date, using the “aggregate entry age” normal cost method. This is a method whereby projected retiree medical plan costs are spread over the projected service of a new entrant cohort.

16.1.1.2. **Assets Available to Pay Benefits.** In a separate column, report the net assets, if any, available to pay benefits.

16.1.1.3. Unfunded Liabilities. In a separate column, report the actuarial liabilities not covered by budgetary resources, e.g., the actuarial present value of projected benefits less funded assets available to pay benefits. The Total Unfunded Liabilities must agree with Note 11, “Liabilities Not Covered by Budgetary Resources,” Line “Federal Employee and Veteran Benefits Payable.”

16.1.1.4. Unfunded Liabilities. Report the actuarial liabilities not covered by budgetary resources, e.g., the actuarial present value of projected benefits less funded assets available to pay benefits.

16.1.2. Other Benefits. Report other employment related actuarial liabilities (e.g., FECA, Voluntary Separation Incentive Programs, and DoD Education Benefits Fund.)

16.1.3. Federal Employee and Veteran Benefits Payable (presented separately on the Balance Sheet). This presentation is specific to DoD. The line is included to demonstrate the reconciliation to the Balance Sheet.

16.1.4. Other benefit-related payables included in the Intragovernmental Other Liabilities on the Balance Sheet. This presentation is specific to DoD. The line is included to demonstrate Intragovernmental Other Liabilities (Note 13) is included to the Balance Sheet.

16.1.5. Total Federal Employee and Veterans Benefits Payable. Enter the sum of the totals from Total Pension and Health Benefits and Total Other Benefits in the corresponding columns.

16.1.6. Other Information Pertaining to Federal Employee and Veteran Benefits Payable. Report the minimum disclosures related to pensions and other actuarial liabilities in accordance with SFFAS 5, “Accounting for Liabilities of the Federal Government,” and SFFAS 33.

16.1.6.1. Actuarial Cost Method Used. Provide a description of the actuarial cost method used to compute the projected plan benefit cost.

16.1.6.2. Assumptions. Disclose the actuarial, economic, and health care cost trend and discount rate assumptions used to calculate the liability. Refer to SFFAS 5 and SFFAS 33 for discount rate assumptions. Include the statement that the estimated actuarial liability is updated only at the end of each FY.

16.1.6.3. Expense Components. Disclose the individual components of expense for the period.

16.1.6.4. Fair Value of Investments. Disclose the fair value of investments in market-based and marketable securities.

16.1.6.5. Changes. Disclose the changes in actuarial liability since the previous calculation and provide a brief summary of the program(s) for which actuarial liabilities are computed.

16.2 Reconciliation of Beginning and Ending Liability Balances for Federal Employee and Veteran Benefits Payable

Provide a reconciliation of the changes in actuarial liabilities from beginning and ending balances. SFFAS 33 requires the display of the components of pension expense, as well as the gains and losses from changes in long-term assumptions used to estimate liabilities for federal employee pensions, other retirement benefits, and other post-employment benefits including a discount rate assumption.

16.3 Reporting

Report actuarial liability data related to normal cost liabilities, interest costs, plan amendment liabilities, actuarial (gains)/losses, and benefit outlays. Report actuarial liability data according to the following categories: Military Retirement Pensions, Military Pre Medicare-Eligible Retiree Health Benefits, Military Medicare-Eligible Retiree Health Benefits, and Other (Voluntary Separation Incentive Programs, and DoD Education Benefits Fund).

*16.4 Liability for Unpaid Insurance Claims

Report the changes in the liability balance for unpaid insurance claims, including incurred-but-not-reported.

*16.5 Insurance Programs

SFFAS 51, “Insurance Programs,” requires disclosure of insurance program information. Reporting entities must recognize revenues, expenses, and liabilities in accordance with categories identified in SFFAS 51.

17.0 NOTE 14. ENVIRONMENTAL AND DISPOSAL LIABILITIES

*17.1 General Information

Present environmental liabilities in accordance with OMB Circular A-136, corresponding policy guidance presented in Volume 4, Chapter 13, and instructions provided in this section. Include a reference to Note 17 if non-legal environment and disposal contingencies are disclosed in Note 17.

17.1.1. Environmental Liabilities. An environmental liability is a future outflow or expenditure of resources that exist as of the financial reporting date for environmental cleanup, closure, and/or disposal costs resulting from past transactions or events. A DoD environmental liability exists when: (1) contamination is present or likely to be present; (2) environmental cleanup, closure, and/or disposal is required by applicable federal, state, interstate, or local requirements or an authorized legal agreement such as a lease, contract, or international agreement; and (3) the operations that created the liability are DoD related. An environmental liability may also exist if

environmental contamination is not DoD related, but DoD enters into a binding agreement that formally accepts financial responsibility for cleanup, closure, and/or disposal.

17.1.1.1. Environmental liabilities cost estimates consider, on a current cost basis, the anticipated costs of the level of effort required for remediating environmental cleanup sites, in compliance with associated environmental legal and regulatory requirements, and estimated environmental costs associated with the future closure of operations, including closure and disposal of PP&E.

17.1.1.2. Base such cost estimates on the current technology available. The estimated liability may be a specific amount or a range of amounts. If some amount within the range is considered a better estimate than any other estimate, use that amount. If no amount within a range is considered a better estimate than the other estimates, use the minimum amount in the range, and disclose the range under the note narrative.

17.1.1.2.1. Base the amount reported on site level investigations and characterizations. Base any estimate produced on site-specific information and cost models validated in accordance with [DoDI 5000.61](#), “DoD Modeling and Simulation (M&S) Verification, Validation, and Accreditation (VV&A).”

17.1.1.2.2. As investigation at a specific site proceeds, the estimate is refined and reported as appropriate. If a site (Site “A”) is similar to another site (Site “B”) for which valid cost estimates have been derived (through site level investigation and characterization), the estimate for recognizing a liability for the site (Site “A”) could be based on the valid cost estimate for the similar site (Site “B”). Additionally, the estimated cost of a future study (if required) must be recognized. If there is no comparable site, then the remediation cost for the site (Site “A”) is not considered reasonably estimable at this time, but the anticipated cost of conducting a future study plus any other required costs must be recognized.

17.1.1.2.3. Disclose all methods used to estimate the costs (including the number of sites and costs estimates derived using data from similar sites) in a note narrative, as well as any elements that could not be estimated.

17.1.2. Non-Federal Environmental Liabilities. All environmental liabilities are non-federal liabilities.

17.1.2.1. Accrued Environmental Restoration Liabilities. Accrued Environmental Restoration (cleanup) Liabilities represent the cost to correct past environmental problems funded from the Environmental Restoration Accounts in accordance with [DoD Manual 4715.20](#), “Defense Environmental Restoration Program (DERP) Management,” and Volume 4, Chapter 13. Environmental restoration activities may be conducted at operating installations and Formerly Used Defense Sites (FUDS), and other than operational ranges. Site inventory and estimated cost data prepared for the [Defense Environmental Programs Annual Report to the Congress](#) is the baseline for environmental restoration (cleanup) liability measurement (e.g., the current cost to acquire the required services).

17.1.2.1.1. Active Installations-Installation Restoration Program (IRP) and Building Demolition and Debris Removal (BD/DR). Environmental liabilities associated with remedial actions eligible for funding under DoD Manual 4715.20. Report cleanup costs not eligible for DERP funding on [the Environmental Corrective Action line](#). These remedial actions may address:

17.1.2.1.1.1. Hazardous substances, pollutants, and contaminants as defined in the “Comprehensive Environmental Response, Compensation and Liability Act” ([CERCLA](#));

17.1.2.1.1.2. Hazardous waste or hazardous constituents addressed under the “Resource Conservation and Recovery Act” ([RCRA](#)) corrective action process or other federal or state statutes and regulations;

17.1.2.1.1.3. Military munitions (e.g., Unexploded Ordnance (UXO) or Waste Military Munitions (WMM)), chemical residues from military munitions, and munitions scrap at locations other than operational ranges associated with an active installation, when the environmental restoration activity is incidental to the IRP environmental restoration activity; or

17.1.2.1.1.4. BD/DR, which is the demolition and removal of unsafe buildings and structures at facilities or sites owned by, leased to, or otherwise possessed by the United States and under the jurisdiction of the Secretary of Defense. For additional information, refer to the [Management Guidance for the DERP](#) (Chapters 6 and 7) for program category definitions and funding eligibility criteria, respectively.

17.1.2.1.2. Active Installations-Military Munitions Response Program (MMRP). Environmental liabilities associated with the MMRP category defined as response actions (e.g., the identification, investigation, and removal actions, remedial actions, or a combination of removal and remedial actions) to address military munitions (e.g., UXO or WMM) or the chemical residues of munitions at locations other than operational ranges. The contamination may include munitions, chemical residues from military munitions and munitions scrap at ranges other than operational ranges associated with active installations that pose a threat to human health or the environment. Refer to the Management Guidance for the DERP (Chapters 6 and 7) for more details on the definition of the MMRP category and funding eligibility criteria, respectively.

17.1.2.1.3. Formerly Used Defense Sites - IRP and BD/DR. Properties that meet the FUDS eligibility criteria described in the Management Guidance for the DERP. Include only those projects that address DoD hazardous, toxicological, and radiological waste (HTRW) and containerized HTRW (e.g., storage tanks).

17.1.2.1.3.1. Include the environmental response actions related to hazardous substances (as defined in the CERCLA), pollutants or contaminants (as defined in the CERCLA), and DoD-unique materials. [Report liabilities associated with remediation of contamination from non-munitions activities.](#) The BD/DR program category is defined as the

demolition and removal of unsafe buildings and structures at facilities or sites that are or were owned by, leased to, or otherwise possessed by the United States and under the jurisdiction of the Secretary of Defense.

17.1.2.1.3.2. For additional detail, refer to the Management Guidance for the DERP (Chapters 6 and 7) for program category definitions and funding eligibility criteria, respectively.

17.1.2.1.4. Formerly Used Defense Sites - MMRP. Properties that meet the FUDS eligibility criteria described in the Management Guidance for the DERP. This represents the environmental liabilities associated with the identification, investigation, and removal or remedial actions (or a combination of removal and remedial actions) to address military munitions (e.g., UXO or WMM), chemical residues from military munitions, and munitions scrap for those sites that are FUDS eligible.

17.1.2.2. Other Accrued Environmental Liabilities – Non-Base Realignment and Closure (BRAC). Costs to remediate cleanup sites that are not eligible for funding under the DERP. Other accrued environmental liabilities also include environmental costs associated with the future closure of operations, including closure and disposal of PP&E.

17.1.2.2.1. Although hazardous waste cleanup and disposal activities are normally thought of as a cost of ongoing operations, associated activities remain a liability if not disposed of or cleaned up by the financial reporting date. Thus, environmental conditions that result from current operations and require immediate cleanup, e.g. an oil spill or routine hazardous waste disposal, are not considered environmental liabilities and will be recognized as a current operating expense, assuming the DoD Component completes the cleanup, closure, and disposal action in the current reporting period.

17.1.2.2.2. The following subparagraphs describe in more detail the categories of liabilities, as well as the applicable lines.

17.1.2.2.2.1. Environmental Corrective Action. Environmental liabilities associated with the cleanup sites not eligible for funding under the DERP, typically conducted under RCRA or other federal or state statutes and regulations. Include environmental liabilities associated with the identification, investigation, and removal and remedial actions to address the munitions discharge migrating off the military range or a formal decision to close the range occurs.

17.1.2.2.2.2. Environmental Closure Requirements. Environmental liability associated with the future closure/ decommissioning of facilities on an active installation that have environmental closure requirements. Examples include the future costs associated with closing a solid waste landfill, wastewater treatment plant, fuel storage tanks, or permit requirements associated with treatment, storage and disposal facilities, and open burn-open detonation sites.

17.1.2.2.2.3. Asbestos. Environmental liabilities associated with the removal, containment, and/or disposal of friable (immediate health threat) and non-friable (not an immediate health threat): (1) asbestos-containing materials from property, or (2) material and/or property that consists of asbestos-containing material at permanent or temporary closure or shutdown of associated PP&E on non-BRAC installations.

17.1.2.2.2.4. Non-Military Equipment. Environmental liabilities related to non-military equipment.

17.1.2.2.2.5. Other. Environmental liabilities not covered by the preceding lines.

17.1.2.3. Base Realignment and Closure Installations. The cost to address environmental cleanup at bases that are realigning or closing. These liabilities can be from past activities that are part of DERP or from activities not covered by DERP.

17.1.2.3.1. IRP. Environmental liabilities associated with remedial actions eligible for funding under the DERP. Report all BRAC cleanup costs not eligible for DERP funding on the Environmental Corrective Action/Closure Requirements line. These remedial actions may address:

17.1.2.3.1.1. Hazardous substances, pollutants, and contaminants as defined in the CERCLA;

17.1.2.3.1.2. Hazardous waste or hazardous constituents addressed under the RCRA corrective action process or other federal or state statutes and regulations; and

17.1.2.3.1.3. Military munitions (e.g., UXO or WMM), chemical residues from military munitions, and munitions scrap at BRAC installations, when the environmental restoration activity is incidental to the IRP environmental restoration activity.

17.1.2.3.2. MMRP. Environmental liabilities associated with the MMRP that are defined as response actions (e.g., the identification, investigation, and removal actions, remedial actions, or a combination of removal and remedial actions) to address military munitions (e.g., UXO or WMM) or the chemical residues of munitions at locations other than operational ranges. The contamination may include munitions, chemical residues from military munitions, and munitions scrap at BRAC Installations (e.g., MMRP that pose a threat to human health or the environment). Refer to the Management Guidance for the DERP for more details on the definition of the MMRP category and funding eligibility criteria, respectively.

17.1.2.3.3. Environmental Corrective Action/Closure Requirements. Environmental liabilities associated with cleanup sites not eligible for funding under the DERP, typically conducted under RCRA or other federal or state statutes and regulations. Also include the environmental liability associated with the future closure of facilities that have environmental closure requirements. Examples include the future costs associated with closing a solid waste

landfill, waste water treatment plant, fuel storage tanks, or permit requirements associated with treatment, storage and disposal facilities, and open burn-open detonation sites.

17.1.2.3.4. Asbestos. Environmental liabilities associated with the removal, containment, and disposal of friable (immediate health threat) and non-friable (not an immediate health threat). The environmental liability includes: (1) asbestos-containing materials from property, or (2) material and property that consist of asbestos-containing material at permanent or temporary closure or shutdown of associated PP&E on BRAC installations.

17.1.2.4. Environmental Disposal for General Equipment/Weapons Programs. Environmental disposal liabilities related to the final disposition of general equipment on non-BRAC installations. Report the environmental disposal liabilities by the following line items:

17.1.2.4.1. Nuclear Powered General Equipment/Spent Nuclear Fuel. Environmental disposal liabilities related to nuclear powered general equipment and used fuel.

17.1.2.4.2. Non-Nuclear Powered General Equipment. Environmental disposal liabilities related to the non-nuclear powered general equipment and used fuel.

17.1.2.4.3. Other Weapon Systems. Environmental liabilities not covered in the preceding lines.

17.1.2.5. Chemical Weapons Disposal Program. Environmental remediation and disposal liabilities related to chemical agents. Report the environmental and disposal liabilities by the following line items:

17.1.2.5.1. Chemical Demilitarization – Chemical Materials Agency. Liabilities associated with the disposal of chemical constituents of military munitions, including the chemical byproducts of detonation, deflagration, or other reactive processes. These constituents are unconsumed explosives (even in trace concentrations) from the detonation of military munitions, explosives released by the structural compromise of unfired WMM, and chemical agents released from chemical munitions.

17.1.2.5.2. Chemical Demilitarization – Assembled Chemical Weapons Alternatives. Liabilities associated with assembled chemical weapons alternatives. Assembled chemical weapons alternatives refer to weapons that contain a chemical agent in addition to explosives, propellant, and packaging materials. Examples include rockets, projectiles, and bombs.

17.1.3. Other Information Related to Environmental Liabilities. Provide the narrative disclosures as outlined; each section will have captions so the disclosures are readily segregated.

17.1.3.1. Applicable Laws and Regulations of Cleanup, Closure, and/or Disposal Requirements. DoD Components must address each of the applicable laws and regulations that are the source of their environmental liabilities. DoD is required to clean up contamination resulting from past waste disposal practices, leaks, spills, and other past activities, which have

created a public health or environmental risk. DoD does this in coordination with regulatory agencies, and if applicable, with other responsible parties. [Reference Volume 4, Chapter 13 for examples of relevant laws and regulations for consideration and discussion.](#)

17.1.3.1.1. The Department is also required to recognize closure and post-closure environmental costs for its General PP&E and environmental corrective action costs for current operations. Each of the Department's major reporting entities is responsible for tracking and reporting all required environmental information related to environmental restoration costs, other accrued environmental costs, environmental disposal costs of weapons systems, and environmental costs related to the BRAC actions.

17.1.3.2. Methods for Assigning Total Cleanup Costs to Current Operating Periods.

17.1.3.2.1. DoD Components must provide the method for assigning the estimated total cleanup, closure, and disposal costs to the current operating periods. DoD Components must not confuse this with how they budget for the liabilities. The Department policy is to comply with the accounting standards.

17.1.3.2.2. The Department uses engineering estimates and independently validated models to estimate environmental costs. The models are contained within the [applications such as](#) Remedial Action Cost Engineering Requirements System. The Department validates the models in accordance with DoDI 5000.61 and primarily uses the models to estimate the liabilities based on data received during a preliminary assessment and initial site investigation.

17.1.3.2.2.1. The Department primarily uses engineering estimates after obtaining extensive data during the remedial investigation/feasibility phase of the environmental project. Once the environmental cost estimates are complete, the Department complies with accounting standards to assign costs to current operating periods. The Department has already expensed the costs for cleanup associated with General PP&E placed into service prior to October 1, 1997 unless the costs are to be recovered through user charges. When recovering costs through user charges, the Department expenses the portion of the asset life that has passed since the General PP&E was placed into service and systematically recognizes the remaining cost over the life of the assets.

17.1.3.2.2.2. For General PP&E placed into service after September 30, 1997, the Department expenses the associated environmental costs systematically over the life of the asset. The Department expenses the full cost to cleanup contamination for stewardship PP&E at the time the asset is placed into service. The Department uses two methods for systematic recognition: physical capacity for operating landfills and life expectancy in years for all other assets.

17.1.3.3. Provide a Description of the Types of Environmental and Disposal Liabilities Identified. [Provide a general statement describing the types of their environmental and disposal liabilities.](#)

17.1.3.4. Nature and Possible Changes in Estimated Cleanup Costs. Identify any environmental liabilities that they know may change due to inflation, deflation, technology, plans, and/or pending changes to applicable laws and/or regulations. If no known changes are pending, DoD Components must state that they are not aware of any pending changes but the liabilities can change in the future due to changes in laws and regulations, changes in agreements with regulatory agencies, and advances in technology.

17.1.3.5. Provide a Description of the Level of Uncertainty Regarding the Accounting Estimates Used to Calculate the Reported Environmental Liabilities. Provide a detailed description of the uncertainties regarding estimates of significant situations (e.g., BRAC closures, environmental related disposals, ranges, chemical agents, and munitions). The disclosure includes a general statement followed with the specific details known about the uncertainties.

17.1.3.6. Unrecognized Costs. Provide the unrecognized portion of the estimated total cleanup, closure, or disposal costs associated with General PP&E. For General PP&E placed in service on or after October 1, 1997, DoD Components systematically recognize the liability over the useful life of the assets. The unrecognized portion of the total cleanup must equal the estimated total cleanup costs less the amount recognized on the financial statements. Refer to Volume 4, Chapter 13 for further information on General PP&E requiring systematic recognition of the environmental liability.

17.1.3.7. Asbestos-Related Cleanup Cost. Provide the recognized liability for friable and non-friable asbestos cleanup costs.

17.1.3.8. Other Disclosures. DoD Components provide any other information they believe material to the users of the financial statements.

17.2 Other Information

Non-legal contingent environmental and disposal liabilities should be included within the Environmental and Disposal Liabilities. Legal refers to those contingencies and contingent liabilities that are reported in the legal letter and/or management schedule whereas non-legal refers to those contingencies and contingent liabilities that are not included in the legal letter or management schedule.

18.0 NOTE 15. OTHER LIABILITIES

18.1 General Information

Present Other Liabilities are not included elsewhere on the Balance Sheet. For FY 2023, both funded and unfunded accrued employee annual leave will be reported in Federal Employee and Veterans Benefits Payable.

*18.2 Reporting

18.2.1. General Guidance on Other Liabilities

18.2.1.1. Other Liabilities include, but are not limited to, grants payable; insurance and guarantee program; advances [from others](#) and [deferred revenue](#); deposit fund amounts held in escrow; contingent liabilities; contract holdbacks; and resources payable to the U.S. Treasury and other accrued liabilities.

18.2.1.2. Report all contingent liabilities [within](#) Other Liabilities. The amount reported (recognized) on the Balance Sheet is the total amount of the estimated probable loss. Refer to OMB Circular A-136 for policy on recognizing contingent liabilities. Examples of claims or other contingencies include: (a) indemnity agreement reimbursements due to licensees or contractors for losses incurred in support of federal activities; (b) adjudicated claims against the Federal Government that are in the process of judicial proceedings; and (c) the unfunded portion of total liabilities to international institutions.

18.2.1.3. Current liabilities represent debt due for payment within 12 months or less of the Balance Sheet date. Noncurrent liabilities represent debt that is due for payment beyond 12 months from the Balance Sheet date.

18.2.2. Intragovernmental. Report all intragovernmental other liabilities. [Report current separately from the noncurrent portion of the liability. The following liabilities are to be reported within Intragovernmental Other Liabilities.](#)

18.2.2.1. Disbursing Officer Cash.

18.2.2.2. Liabilities for Non-Entity Assets.

18.2.2.3. Subtotal. Sum the preceding lines. This is specific to DoD for presentation purposes.

18.2.2.4. Other Liabilities reported on Note 13, Federal Employee and Veteran Benefits Payable. Present the Other benefits-related payables included in Intragovernmental Other Liabilities on the Balance Sheet from Note 13. This is specific to DoD for presentation purposes and to illustrate the reconciliation to the Balance Sheet and Note 13.

18.2.2.5. Total Intragovernmental. [The amounts](#) must equal the amount reported on the Balance Sheet.

18.2.3. Other than Intragovernmental. Report Other [than Intragovernmental](#). [Report current separately from the noncurrent portion of the liability. The following liabilities are to be reported within Other than Intragovernmental Liabilities.](#)

18.2.3.1. Accrued Funded Payroll and Benefits.

18.2.3.2. Deposit Funds and Suspense Accounts.

18.2.3.3. Non-environmental Disposal Liabilities. Breakout the categories used to report non-environmental disposal liabilities as follows: (a) Military Equipment (Non-nuclear); (b) Excess/Obsolete Structures; and (c) Conventional Munitions Disposal.

18.2.3.4. Contract Holdbacks.

18.2.3.5. Contingent Liabilities.

18.2.3.6. Other Liabilities without Related Budgetary Obligations. The amounts represent unfunded liabilities for which Congressional action is needed before budgetary resources can be provided.

18.2.3.7. Other Liabilities with Related Budgetary Obligations. The amounts of liabilities for which there is a related budgetary obligation.

18.2.3.8. Total Other than Intragovernmental Liabilities. The amounts must equal the amount reported on the Balance Sheet.

18.2.4. Advances from Others and Deferred Revenue. Report separately intragovernmental and other than intragovernmental amounts received for goods or services to be delivered or performed in the future and reflect amounts not yet earned.

18.2.5. Other Information Pertaining to Other Liabilities. Report other information relevant to other liabilities that is not in the categories.

*19.0 NOTE 16. LEASES

19.1 General Information

Entity as Lessee and Entity as Lessor are the two major categories of Leases. OMB Circular A-136 guidance for this note schedule reflect future payment disclosure requirements for five FYs and then all remaining payments due in later years (after five years). While this OMB Circular A-136 presentation is appropriate for end of year reporting, quarterly reporting requires an additional line for payments due in the remaining current FY and will result in the reporting of six FYs during quarters one through three, instead of the five FYs displayed in OMB Circular A-136. Reporting requirements for Leases is anticipated to significantly change for periods beginning after September 30, 2023 in accordance with SFFAS 54, *Leases: An Amendment of SFFAS 5, Accounting for Liabilities of the Federal Government and SFFAS 6, Accounting for Property, Plant, and Equipment*.

19.2 Entity as Lessee Assets Under Capital Lease

Report the Assets under Capital Lease by categories of land and buildings and machinery and equipment with the related accumulated amortization.

19.2.1. Entity as Lessee – Assets Under Capital Lease. By major category of asset, report the gross assets under capital lease and the total accumulated amortization. Sum the preceding lines.

19.2.2. Description of Lease Arrangements. Disclose any additional information related to assets under capital leases.

19.3 Entity as Lessee for Federal and Non-Federal Future Payments Due for Capital Leases

Present capital lease liabilities for the current and prior FY in accordance with the instructions provided. **Federal and Non-Federal leases must be presented separately.**

19.3.1. Future Payments Due. Report the future lease payments, by major category for all non-cancelable leases with terms longer than 1 year. Disclose CY federal and non-federal leases separately. **PY** lease amounts do not need to be disclosed separately.

19.3.2. Less: Imputed Interest. Report the imputed interest.

19.3.3. Less: Executory Costs. Report the executory costs.

19.3.4. Capital Lease Liabilities Covered by Budgetary Resources versus Not Covered by Budgetary Resources. Separately disclose the portions of the capital lease liability covered by budgetary resources and not covered by budgetary resources. (Refer to Appendix B of the OMB Circular A-11 for additional guidance, but notice a difference in terminology. The term “capital leases” as used in this volume includes “capital leases and lease purchases”).

19.3.5. FY Information. For quarterly reporting, report the payments remaining for the current FY (e.g., FY 2023) on **the first line**.

19.4 Entity as Lessee for Federal and Non-Federal Future Payments Due for Non-Cancelable Operating Leases

19.4.1. Description of Operating Lease Arrangements. Report information that would disclose the level of the reporting entity’s funding commitments, which include the following items in the disclosure: the major asset categories and associated lease terms; existence and terms of renewal options; escalation clauses; contingent rental restrictions imposed by lease agreements; deviations from the standard lease terms; and the lease period. Disclose CY federal and non-federal leases separately.

19.4.2. Future Payments Due for Non-Cancelable Operating Leases. Enter future lease payments, by major category, for all irrevocable leases with terms longer than one year.

19.5 Entity as Lessor for Federal and Non-Federal Future Projected Receipts for Capital Leases

Report the Capital Leases for future projected receipts as the lessor for federal and non-federal activities separately. Also, include a description of the lease arrangements.

19.6 Entity as Lessor for Federal and Non-Federal Future Projected Receipts for Non-Cancelable Operating Leases

Report the Non-Cancelable Operating Leases by category for future projected receipts as the lessor for federal and non-federal activities separately. Also, include a description of the lease arrangements.

20.0 NOTE 17. COMMITMENTS AND CONTINGENCIES

20.1 General Information

A loss contingency is an existing condition, situation, or set of circumstances involving uncertainty as to possible loss to an entity. The uncertainty should ultimately be resolved when one or more future events occur or fail to occur. The likelihood that the future event or events will result in the loss or the incurrence of a liability can range from probable to remote. SFFAS 5, as amended by [SFFAS 12](#), “Recognition of Contingent Liabilities Arising from Litigation: An Amendment of SFFAS 5, Accounting for Liabilities of the Federal Government,” contains the criteria for recognition and disclosure of contingent liabilities. It provides an exception to the contingent liability standard for recognizing loss contingencies on matters of pending or threatened litigation and unasserted claims. Refer to [TFM Volume 1, Part 2, Chapter 4745](#) for disclosures related to legal contingencies. Also, reference Chapter 2 and Volume 4, Chapter 12.

20.2 Disclosures

20.2.1. Disclosure versus Recognition of Contingent Liabilities. Disclose contingent liabilities that do not meet the criteria [provided in paragraph 20.2.2.](#) for recognition on the books of a reporting entity. Record the contingent liabilities that meet the recognition criteria on the books of the reporting entity and include the contingent liabilities on the applicable liability line(s) of the Balance Sheet (e.g., Environmental and Disposal Liabilities; and Other Liabilities) and in notes, as appropriate.

20.2.2. Criteria for Disclosure of a Contingent Liability. Disclose contingent liabilities if any of the conditions for liability recognition are not met and there is at least a reasonable possibility that a loss or an additional loss may have been incurred. Disclosure in this context refers to the reporting information in notes regarded as an integral part of the basic financial information.

20.2.3. Required Disclosures. Include contingent liabilities that meet the criteria for disclosure:

20.2.3.1. Each reporting entity reviews its financial processes, systems, and data and modifies or expands, as necessary. The disclosure statement is a complete and accurate representation of contingent liabilities. An example of the disclosure statement is: “The reporting entity is a party in various administrative proceedings and legal actions, and claims. The Balance Sheet includes an estimated liability for those legal actions where the management and [General](#)

Counsel consider adverse decisions “probable” and the amount of loss is measurable. In the event of an adverse judgment against the Government, some of the liabilities may be payable from the Judgment Fund. The reporting entity records Judgment Fund liabilities in Note 15, “Other Liabilities.” Refer to Note 15 for details.”

20.2.3.2. Disclose the nature of the contingency and an estimate of the possible liability, an estimate of the range of the possible liability, or a statement that such an estimate cannot be made. Amounts disclosed for litigation claims and assessments are fully supportable and must agree with the reporting entity’s legal representation letters and management schedule of information.

20.2.3.3. Disclose amounts for potential future financial obligations, such as contractual arrangements including fixed price contracts with escalation, price redetermination, or incentive clauses; contracts authorizing variations in quantities; and contracts where allowable interest may become payable based on contractor claims under the "Disputes" clause contained in contracts. Amounts disclosed represent future potential liabilities and do not include amounts already recognized as contingent liabilities in Note 15. Disclose the estimated range of loss, lower and upper ends.

20.2.3.4. In addition to the contingent liability disclosures required, OMB requires the following disclosures: (1) an estimate of obligations related to cancelled appropriations for which the reporting entity has a contractual commitment for payment, and (2) amounts for contractual arrangements that may require future financial obligations.

20.2.3.5. Disclose any other applicable contingencies, along with additional information to clarify the nature of the contingency. If a contingent liability has been recognized for all or part of the item(s), disclose it in Note 15, and do not include in Note 17.

20.2.3.6. For reporting entities that are unable to disclose contingencies related to specific contracts, disclose that the reporting entity “is a party in numerous individual contracts that contain clauses, such as price escalations, award fee payments, or dispute resolution, that may or may not result in the future outflow of budgetary resources.”

21.0 NOTE 18. FUNDS FROM DEDICATED COLLECTIONS

21.1 General Information

21.1.1. Funds from dedicated collections are financed by specifically identified revenues, provided to the government by non-federal sources, often supplemented by other financing sources, and which remain available over time. These specifically identified revenues and other financing sources are required by statute to be used for designated activities, benefits, or purposes, and must be accounted for separately from the Federal Government’s general revenues. Refer to OMB Circular A-136 for required criteria for recognizing funds from dedicated collections.

21.1.2. SFFAS 43 contains policy for reporting dedicated collections. SFFAS 43 clarifies that at least one source of funds must be external to the Federal Government for a fund to qualify

as a fund from dedicated collections. It explicitly excludes any fund established to account for pensions, other retirement benefits, other post-employment benefits or other benefits provided for federal employees (civilian and military).

21.1.3. If more than one component entity is responsible for carrying out the program financed with revenues and other financing sources that are dedicated collections, and the separate portions of the program can be clearly identified with a responsible component entity, then each component entity reports its portion in accordance with the requirements of SFFAS 43. If separate portions cannot be identified, the component entity with program management responsibility reports the fund. Refer to the [DFAS Financial Reporting Guidance](#) for required disclosures for each individually reported fund from dedicated collections, or portion thereof, for which a component entity has program management responsibility.

21.2 Reporting

21.2.1. The note schedule must [present the Balance Sheet, SNC, and SCNP](#) for current FY and prior FY. [The table must present separate columns for the Dedicated Collection Funds, Other Funds from Dedicated Collections, Total Funds from Dedicated Collections \(Combined\), Eliminations between Dedicated Collection Funds, and Total Funds from Dedicated Collections \(Consolidated\).](#) For the Balance Sheet, Federal and Non-Federal amounts must be disclosed separately and the line titles that are used for the principal financial statements must be used.

21.2.2. Report all eliminations between funds from dedicated collections and other funds within the reporting entity. If a Component entity reports a different portion of a fund from dedicated collections than it reported in prior FYs, it will not restate its prior FY financial statements, but disclose the change in the note. This applies if a DoD Component entity does not report a fund from dedicated collections, or a portion thereof, that it reported in the previous year.

22.0 NOTE 19. GENERAL DISCLOSURES RELATED TO THE STATEMENT OF NET COST

22.1 [General Information](#)

Disclose information related to the SNC. [If the SNC displays highly aggregated program information, disclose costs and revenue to support the SNC.](#)

22.1.1. Gross Cost. [Costs that arise from exchange transactions made with the public or another Government entity.](#) The effects of intra-entity business transactions are eliminated from reporting entity statements in order to prevent overstating costs. [Gross Cost must agree with the amount reported on the SNC.](#)

22.1.2. Earned Revenue. [Earned or exchange revenues that arise when an entity provides goods or services to the public or another Governmental entity for a price.](#) The effects of intra-entity business transactions are eliminated from reporting entity statements in order to prevent overstating revenue. [Earned Revenue must agree with the amount reported on the SNC.](#)

22.1.3. Losses/(Gains) from Actuarial Assumption Changes for Military Retirement Benefits. Losses and gains from actuarial assumption changes for military retirement benefits reported for Military Retirement Benefits; Operations, Readiness and Support; and on the Consolidated line.

22.1.4. Net Program Costs. Cost incurred (**Gross Cost**), less any exchange revenues earned, plus or minus the losses or gains from actuarial assumption changes for military retirement benefits. This amount **must** agree with the amount reported on the SNC, SCNP, and Reconciliation of Net Cost to Net Outlays.

22.1.5. General Disclosures

22.1.5.1. Disclose that public costs and revenues are exchange transactions made between the reporting entity and a non-federal entity. For public earned revenue, the buyer of the goods or services is a non-federal entity. For intragovernmental costs, the seller is a federal entity. If a federal entity purchases goods or services from another federal entity and sells them to the public, classify the exchange revenue as public, but classify the related costs as intragovernmental. The purpose of this classification is to enable the Federal Government to provide consolidated financial statements, and not to match public and intragovernmental revenue with costs incurred to produce public and intragovernmental revenue.

22.1.5.2. Reporting entities who are unable to track customer information at the transaction level must make additional disclosures. Disclose that many of the reporting entity's systems do not track intragovernmental transactions by customer at the transaction level. Expenses were adjusted by [cite methodology]: (1) reclassifying amounts between federal and non-federal expenses; or (2) accruing additional accounts payable and expenses. See Chapter 13 for additional information on intragovernmental reconciliations and eliminations.

22.2 Other Disclosures

22.2.1. Cost Disclosure Specific to General Funds. Disclose, if applicable, that the reporting entity does not meet specific accounting standards and that information presented is based on budgetary obligations, disbursements, and collection transactions, as well as nonfinancial feeder systems adjusted to record known accruals for major items such as payroll expenses, accounts payable, and environmental liabilities.

22.2.2. Cost Disclosure Specific to Working Capital Fund (WCF). Disclose, if applicable, that the reporting entity does not meet specific accounting standards. Each reporting entity reviews its financial processes, systems, and data and discloses, if applicable, that while the WCF generally records transactions on an accrual basis, the systems do not always capture actual costs in a timely manner. Information presented on this statement is primarily based on budgetary obligation, disbursement, or collection transactions, as well as information from nonfinancial feeder systems.

22.2.3. Inter-entity Costs. Refer to [SFFAS 55](#), "Amending Inter-entity Cost Provisions," for disclosure requirements related to inter-entity costs.

23.0 NOTE 20. DISCLOSURES RELATED TO THE STATEMENT OF CHANGES IN NET POSITION

23.1 General Information

Disclose information related to the SCNP. [The SCNP reports the change in net position during the reporting period, which results from changes in Unexpended Appropriations and Cumulative Results of Operations.](#)

23.2 Consolidating Net Position

[Present funds from dedicated collections on a consolidated basis.](#) [Summarize the elimination of intradepartmental activity between funds from dedicated collections and all other fund types to arrive at the consolidated totals presented on the Balance Sheet and the Financial Report of the U.S. Government. See Note 18, “Funds from Dedicated Collections,” for additional information on reporting dedicated collections balances.](#)

23.3 Reconciliation of [Appropriations](#) on the SBR to [Appropriation Received](#) on the SCNP

The Appropriations Received line item on the SCNP will not agree with the Appropriations line item on the SBR due to differences between proprietary and budgetary accounting concepts and reporting policies. [Present a table](#) identifying the differences and amounts needed to reconcile the two reports.

*23.4 Reporting

23.4.1. [Appropriations, SBR.](#) Include the appropriation amount as reported on the SBR.

23.4.2. [Permanent and Temporary Reductions.](#) Report items reported as [permanent and temporary](#) reductions to the appropriations balance reported on the SBR.

23.4.3. [Trust and Special Funds Receipts.](#) Report [Trust and Special Funds](#) not reported as reductions or additions to the appropriations received balance on the SCNP.

23.4.4. [Miscellaneous Items.](#) Report [miscellaneous items](#) not reported [in this section](#) as reductions or additions to the appropriations received balance on the SCNP.

23.4.5. [Total Reconciling Differences.](#) Report the Appropriations, SBR less the reporting categories in this section to arrive at the Appropriations Received, SCNP.

23.4.6. [Appropriation Received, SCNP.](#) Report the Appropriations Received from the SCNP.

23.4.7. [Other Information.](#) Discuss other information to help the user understand the SCNP.

24.0 NOTE 21. DISCLOSURES RELATED TO THE STATEMENT OF BUDGETARY RESOURCES

24.1 Net Adjustments to Unobligated Balance, Brought Forward, October 1

Disclose and explain material adjustments impacting the SBR unobligated beginning balance. If the adjustment represents a correction of a material error, and the earliest period presented is not the period in which the error occurred, and the cumulative effect is attributable to prior periods, report the cumulative effect as a prior period adjustment. If the period is presented on the financial statements, report the adjustment in the earliest affected period presented by correcting any individual amounts on the financial statements.

24.2 Terms of Borrowing Authority Used

Disclose repayment requirements, financing sources for repayment, and other terms of borrowing authority used.

24.3 Available Borrowing/Contract Authority, End of Period

Disclose the amount of borrowing and contract authority available at the end of the reporting period for the current and prior FY.

24.4 Undelivered Orders at the End of the Period

Disclose the amount of budgetary resources obligated for undelivered orders at the end of the period, separately disclosing federal and non-federal with the associated paid and unpaid amounts.

24.5 Legal Arrangements Affecting the Use of Unobligated Balances

Disclose information pertaining to legal arrangements affecting the use of unobligated balances of budget authority, such as time limits, purpose, and obligation limitations.

*24.6 Explanation of Differences between the SBR and the Budget of the U.S. Government

Disclose material differences between the SBR and the Budget of the U.S. Government. Reference OMB Circular A-136 for an illustrative schedule.

24.6.1. Explain the budgetary resources, new obligations, upward adjustments (total), and net outlay amounts from PY SBR and the actual amounts from “Detailed Budget Estimates by Agency” found in the Budget Appendix.

24.6.2. Explain the distributed offsetting receipts amount from the PY SBR and the actual amount from the “Federal Budget by Agency and Account” found in the Analytical Perspectives of the Budget.

24.6.3. Disclose that the Budget with the actual amounts for the CY will be available at a later date within the President's Budget.

24.7 Contributed Capital

Explain any capital infusion received during the reporting period including the amount, source, and reason for these additional funds.

24.8 Permanent Indefinite Appropriations

Disclose the existence, purpose, and availability of permanent indefinite appropriations.

25.0 NOTE 22. DISCLOSURES RELATED TO INCIDENTAL CUSTODIAL COLLECTIONS

Reporting entities collecting custodial revenues that are incidental to their primary mission may disclose the sources and amount of collections and the amounts distributed to others in the accompanying notes. Disclose information relating to the further understanding of incidental custodial collections.

26.0 NOTE 23. FIDUCIARY ACTIVITIES

26.1 Fiduciary Activities

Disclose the fiduciary assets, liabilities, and inflows/outflows of the reporting entity in accordance with SFFAS 31. Fiduciary activities collect the receipt for cash or other assets in which non-federal individuals or entities have an ownership interest that the Federal Government must uphold. Base the fiduciary relationship on statutory or other legal authority. Fiduciary activities are not recognized on the Balance Sheet, but they are required to be reported on schedules in the notes to the financial statements. Fiduciary activities may involve a variety of transactions including, but are not limited to, cash, investments, other assets, liabilities, inflows, and outflows.

26.2 Exclusions

SFFAS 31 excludes certain transactions from the reporting requirements for fiduciary activities, including but not limited to, unpaid payroll withholdings and garnishments, unearned revenue, operating revenues and expenses, and seized property, including seized monetary instruments. See SFFAS 31 for a list of exclusions.

26.3 Reporting

Reporting on fiduciary activities is required in two notes to the financial statements. Within Note 1, "Significant Accounting Policies," provide a statement that says, "Fiduciary assets are not assets of the Federal Government and are not recognized on the Balance Sheet." In Note 23, provide a description of the fiduciary relationship, such as the applicable legal authority, the

objectives of the fiduciary activity, and a general description of the beneficial owners or class of owners. Also, disclose fiduciary activities in the following schedules [by fiduciary funds](#).

26.3.1. Schedule of Fiduciary Activity. Disclose the beginning balance of net assets; the inflows/outflows from the fiduciary activities by category; the change in net assets; and the ending balance of net assets.

26.3.2. Schedule of Fiduciary Net Assets. Disclose the current and prior period ending balances of assets by category, liabilities by category, and a variance analysis addressing significant changes from the prior period.

26.3.3. Non-monetary Fiduciary Assets. Include a description of the composition of the assets, the method(s) of valuation, and changes (if any) from prior period accounting methods.

26.3.4. Non-Valued Fiduciary Assets. Include a description of non-valued fiduciary assets. These assets may include land held in trust. Component entities holding non-valued fiduciary assets disclose them in a Schedule of Changes in Non-Valued Fiduciary Assets.

27.0 NOTE 24. RECONCILIATION OF NET COST TO NET OUTLAYS

27.1 [General Information](#)

Preparers of financial statements perform a detailed reconciliation of net [outlays \(reported on the SBR\)](#) to net cost ([reported on the SNC](#)), identifying all applicable reconciling items. Preparers should refer the TFM [“Budget and Accrual Reconciliation Guidance”](#) for detailed guidance on preparing the reconciliation. Budgetary resources reported in this schedule are those resources reported on the SBR and defined in OMB Circular A-11. Other resources reported in this schedule are also reflected in the SCNP.

[For Unreconciled Differences](#) [report the difference between the Total Net Outlays \(SNC\) and Agencies, Outlays, Net \(SBR\)](#).

27.2 Reconciliation Objective

[SFFAS 7](#), “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting,” as amended by [SFFAS 53](#), “Budget and Accrual Reconciliation: Amending SFFAS 7, and 24, and Rescinding SFFAS 22,” requires a reconciliation identifying how the reporting entity budgetary resources outlayed during the period relate to the net cost of operations.

27.3 Budgetary to Proprietary Accounting Reconciling Differences

Because different accounting bases are used for budgetary and proprietary accounting, some transactions may appear in only one set of accounts due to legislative requirements or USGAAP (e.g., accrual of unfunded environmental and disposal liabilities that are recorded only in the proprietary records). Furthermore, not all obligations or offsetting collections may result in

expenses or exchange revenue (e.g., purchase of a building is capitalized on the Balance Sheet in the proprietary accounts, but obligated and outlaid in the budgetary accounts).

27.3.1. The reconciliation summarizes differences due solely to budgetary and proprietary accounting. Other differences encountered must be researched and corrected.

27.4 Narrative Disclosures

Report any information that provides a further understanding of the entity's note.

28.0 NOTE 25. PUBLIC-PRIVATE PARTNERSHIPS

28.1 General Information

[SFFAS 49](#), "Public-Private Partnerships: Disclosure Requirements," defines public-private partnerships as risk-sharing arrangements or transactions [with expected lives greater than five years](#) between public and private sector entities. ["Risk" refers to risk of financial losses beyond the types of costs anticipated in the normal course of the agreement, assuming the agreement is carried out over its expected life.](#)

28.2 Reporting

28.2.1. Entities involved in public-private partnerships, as defined by SFFAS 49, review the conclusive risk characteristics, and possibly the suggestive risk characteristics, to determine the required disclosures. See paragraphs 20 and 21 of SFFAS 49 for a listing of conclusive and suggestive risk characteristics.

28.2.2. SFFAS 49 exempts certain arrangements or transactions from public-private partnership disclosure requirements. See paragraph 15 of SFFAS 49 for a listing of exempt arrangements and transactions. Such exempt arrangements or transactions are subject to existing disclosure requirements in other SFFAS applicable to such arrangements or transactions.

[28.2.3. Refer to OMB Circular A-136 for additional disclosure requirements.](#)

29.0 NOTE 26. DISCLOSURE ENTITIES AND RELATED PARTIES

29.1 General Information

SFFAS 47 instructs preparers of the financial statements in determining what organizations should be included in the reporting entity's financial reports for accountability purposes. SFFAS 47 requires reporting entities to disclose certain information about disclosure entities and related parties.

29.2 Disclosure Entities

Preparers should consider both qualitative and quantitative materiality in determining the information presented regarding disclosure entities. Refer to [SFFAS 47](#) and OMB Circular A-136 for required disclosures.

29.3 Related Parties

Consider organizations related parties if an existing relationship, or one party to the existing relationship, has the ability to exercise significant influence over the other party's policy decisions. Only relationships that would be misleading to exclude information about such relationships warrant disclosure. Refer to [SFFAS 47](#) and OMB Circular A-136 for required disclosures.

*30.0 NOTE 27. SECURITY ASSISTANCE ACCOUNTS

30.1 General Information

This Note is specific to DoD Agency-Wide only. A hyperlink to the Security Assistance Accounts (SAA) AFR is included within the Note.

30.2 Reporting

Disclose in a narrative that DoD has a significant role, and works closely with the U.S. Department of State in the execution of the activities of the SAA, which is budgeted and reported in the [Title 22, Foreign Relations and Intercourse](#) under the purview of the Foreign Relations Committee in Congress. The SAA is a significant reporting entity, and in accordance with SFFAS 47, its stand-alone financial statements are consolidated directly into the U.S. Government-wide financial statements.

31.0 NOTE 28. RESTATEMENTS

31.1 General Information

Disclosure is required when management becomes aware of a potential misstatement due to a material error(s) whether or not the exact amount is known or has been corrected at the time financial statements are prepared. [If material misstatements are identified in the prior period financial statements, the entity must explain the material misstatements.](#)

31.2 Disclosures

31.2.1. Where amount of the misstatement is known, the disclosure must include the disclosures identified in [SFFAS 21](#), "Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources" and OMB Circular A-136.

31.2.2. Where management has become aware that a material error has occurred, but the exact amount is not known and/or financial statements have not yet been corrected, include the disclosures required by OMB Circular A-136.

*32.0 NOTE 29. COVID-19 ACTIVITY

32.1 General Information

Entities with a significant amount of budgetary activity associated with responding to COVID-19 must include a separate COVID-19 note. Refer to OMB Circular A-136 for additional disclosure requirements.

Separately disclose amounts from annual and permanent appropriations that were used for COVID, including, as appropriate, the types of budgetary information illustrated in OMB Circular A-136. COVID funds must be designated with the appropriate GTAS Disaster and Emergency Fund Code.

*33.0 NOTE 30. SUBSEQUENT EVENTS

Disclose any significant events or transactions that occurred after the date of the Balance Sheet but before the issuance of the entity's audited financial statements that have a material effect on the financial statements and, therefore, require adjustments to or disclosure in the statements. If such disclosure is made elsewhere in the notes, this note should include references to the applicable note(s).

34.0 NOTE 31. RECLASSIFICATION OF FINANCIAL STATEMENT LINE ITEMS FOR FINANCIAL REPORT COMPILATION PROCESS

34.1 General Information

Disclose information identifying how amounts reported on the AFR for the Balance Sheet, SNC, and SCNP are reclassified for compilation of the FR. [This Note is reported at the DoD Agency-Wide level only. DoD Components do not report this Note.](#)

34.2 Reporting

Agency financial statements reflect all agency financial transactions, including transactions with other Government agencies and transactions with the public. The FR includes only the Government's financial transactions with the public; and does not include intragovernmental transactions. [Refer to OMB Circular A-136 for disclosure requirements.](#)

CHAPTER 12

REQUIRED SUPPLEMENTARY INFORMATION

1.0 GENERAL

1.1 Purpose

This chapter provides the Department of Defense (DoD) policy and guidance for reporting Required Supplementary Information (RSI) to accompany the basic financial statements.

1.2 Authoritative Guidance

1.2.1. Statement of Federal Financial Accounting Standards [\(SFFAS\) 42](#), “Deferred Maintenance and Repairs: Amending Statements of Federal Financial Accounting Standards 6, 14, 29 and 32,” establishes the detailed reporting requirements for deferred maintenance and repairs (DM&R) in the RSI.

* 1.2.2. [SFFAS 59](#), “Accounting and Reporting of Government Land” establishes reporting requirements for government land in the RSI.

1.2.3. The Office of Management and Budget [\(OMB\) Circular A-136](#), “Financial Reporting Requirements,” provides overall agency and government-wide financial reporting guidance.

1.2.4. Volume 4, Chapters 24, 25, 26, and 28, provide the guidance for determining which DoD reporting entity is responsible for reporting real property on its financial statements.

*1.3 Format

1.3.1. For specific reporting formats and timing refer to Defense Finance and Accounting Service [\(DFAS\) Financial Reporting Guidance](#), under the sections titled, Annual and Quarterly Financial Statement Guidance, and 4th Quarter.

1.3.2. Information presented in the RSI must be presented on a comparative basis. [When the information is required for the first time, it need not be reported for the prior year.](#)

2.0 DEFERRED MAINTENANCE AND REPAIRS

2.1 Policy

DoD reporting entities are required to report material amounts of DM&R on General Property, Plant, and Equipment (General PP&E) as supplementary information to accompany their annual financial statements. The determination of whether an item is material depends on the degree to which omitting or misstating information about the item makes it probable that the judgment of a reasonable person relying on the information would have been changed or

influenced by the omission or the misstatement. General PP&E related accounting policy and definitions are contained in Volume 4.

2.2 Definition

As defined in SFFAS 42, DM&R are maintenance and repairs (M&R) not performed when required or scheduled and have been delayed for a future period. M&R are activities directed toward keeping fixed assets in an acceptable condition. M&R activities include preventive maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain the asset. M&R, as distinguished from capital improvements, exclude activities directed towards expanding the capacity of an asset or otherwise upgrading it to serve needs different from, or significantly greater than, its current use. The amounts reported must include both funded and unfunded DM&R, but need not be separately reported as such in the RSI.

2.3 Required Reporting

2.3.1. DM&R reporting must provide beginning and ending balances for the reporting period and narrative information related to the activities. Entities are required to present both qualitative and quantitative information.

2.3.2. In accordance with SFFAS 42, DoD reporting entities, at a minimum, are required to present the following information for all General PP&E regardless of measurement method chosen:

2.3.2.1. Describe M&R policies and how they are applied (i.e., method of measuring DM&R);

2.3.2.2. Discuss how M&R activities are ranked and prioritized among other activities;

2.3.2.3. Identify factors considered in determining acceptable condition standards;

2.3.2.4. State whether DM&R relates solely to capitalized General PP&E and stewardship PP&E or also to non-capitalized or fully depreciated General PP&E;

2.3.2.5. Identify PP&E for which management does not measure and/or report DM&R, and provide the rationale for the exclusion of other than non-capitalized or fully depreciated General PP&E;

2.3.2.6. Provide estimated beginning and ending DM&R balances for each major category of PP&E (i.e., General PP&E; heritage assets; and stewardship land), for which M&R has been deferred;

2.3.2.7. Explain significant changes by category (i.e., general PP&E, heritage assets, and stewardship land) from the prior year.

2.3.3. SFFAS 42 permits the following methods to measure DM&R:

2.3.3.1. Condition assessment surveys, which are periodic visual (i.e., physical) inspections of PP&E to determine their current condition and estimated cost to correct any deficiencies;

2.3.3.2. Life cycle cost forecasts, which are acquisition or procurement techniques that consider operating, maintenance, and other costs in addition to the acquisition cost of assets; or

2.3.3.3. Other methods similar to the condition assessment survey or life cycle cost forecast methods.

2.3.4. SFFAS 42 also requires that condition standards, related assessment methods, and reporting formats be consistently applied unless management determines that changes are necessary. [Changes must be accompanied by an explanation documenting the rationale for the change and any related impact on the DM&R estimates.](#)

3.0 DISAGGREGATED STATEMENT OF BUDGETARY RESOURCES

3.1 Format

DoD reporting entities must prepare and report the disaggregated Statement of Budgetary Resources (SBR) as RSI. The format of the disaggregated SBR must follow the format contained in Chapter 7. The major account groupings and the aggregate of smaller budget accounts must, in total, agree with the amounts reported on the face of the reporting entity's SBR. The DoD Agency-Wide SBR must be disaggregated into the following appropriation/fund account groupings: (1) Military Personnel; (2) Procurement; (3) Research, Development, Test, and Evaluation; (4) Family Housing and Military Construction; (5) Military Retirement Benefits; (6) Civil Works; and (7) Operations, Readiness, and Support. Refer to Chapter 7 for additional guidance and detail on the disaggregated SBRs for the various military departments, funds, and other Defense entities.

3.2 Presentation

DoD Agency-Wide disaggregated SBR is presented as two RSI schedules, Combining SBR Budgetary and Combining SBR Non-Budgetary Credit Reform Financing Account. Two presentations allow for easier readability and mapping to the schedule structure based on financial reporting data. The disaggregated SBR is presented separately for both the current year and comparative year.

[*4.0 GENERAL PLANT, PROPERTY, & EQUIPMENT, STEWARDSHIP LAND, AND PERMANENT LAND RIGHTS](#)

[4.1 Presentation](#)

In accordance with SFFAS 59, DoD reporting entities, at a minimum, are required to present the following information for all General PP&E, Stewardship Land, and Permanent Land Rights disclosures:

4.1.1. Description and its relationship to the entity's mission;

4.1.2. Description of the entity's policies for land. Policies for land are the goals and principles the entity established to guide its acquisition, maintenance, use, and disposal of land consistent with statutory requirements, prohibitions, and limitations governing the entity and the land;

4.1.3. Estimated acreage by predominant use category which includes land and permanent land rights;

4.1.4. Estimated acreage held for disposal or exchange;

4.1.5. Description of the different types of land rights acquired by the entity, whether such rights are permanent or temporary, and amounts paid during the year to maintain such rights; and

4.1.6. Two separate tables are required for General PP&E and Stewardship Land and must include estimated acreage by predominate use categories of Commercial, Conversation and Preservation, and Operational. Refer to OMB Circular A-136 for a table illustration.

VOLUME 6B, CHAPTER 13: “ADJUSTMENTS, ELIMINATIONS, AND RECONCILIATION REQUIREMENTS **FOR INTRAGOVERNMENTAL BALANCES”**

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by **blue font**.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

The previous version dated **October 2019** is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	Updated Office of Management and Budget Circular hyperlinks.	Revision
1.1	Added language to introduce the term “Federal Program Agencies” and streamline sentences.	Revision
2.0	Renamed section “Fundamental Requirement” (previously “Background”).	Revision
3.0	Renamed section “IGT Categories” (previously “Reciprocal Account Transactions”). Added description for each type of Intra-Governmental Transactions (IGT) Category.	Addition
4.0 (previous version)	Removed intragovernmental capitalized purchases. This information is now contained in Buy/Sell, paragraph 3.4.	Deletion
5.0	Consolidated Eliminations (previously subparagraph 5.4) and Elimination of Budgetary Accounts (previously section 6.0) under one Elimination sections, part of Fundamental Requirement Section (previously titled Background)	Revision
6.0	Added new section, highlighting trading partner accounting and communication responsibilities during the reporting period. Moved G-Invoicing (previously subparagraphs 5.1.1, and 5.4.1.1) and Memorandum of Understanding (previously subparagraph 5.4.1.2) to this section. Added phases of G-Invoicing, providing the key points of coordination during the G-invoicing trading process.	Addition
7.0	Consolidated reconciliation sections (previously paragraphs 2.2, 7.0, and 8.0).	Revision
7.2 7.4	Added Common Trading Partner Differences and Advana IGT Toolkit sub-sections to assist with reconciliations.	Addition

CHAPTER 13

**ADJUSTMENTS, ELIMINATIONS, AND RECONCILIATION REQUIREMENTS FOR
INTRAGOVERNMENTAL BALANCES**

1.0 GENERAL

*1.1 Overview

Intra-Governmental Transactions (IGT) or balances result from business activities conducted between two federal entities or Federal Program Agencies (FPAs). When these transactions occur, these federal entities are called trading partners. The accurate reporting of reciprocal balances, and proper elimination of reciprocal activity between trading partners, requires accurate documentation of accounting events. Imbalances occur when trading partners are unable to account for and reconcile differences among each other.

1.2 Purpose

This chapter provides general instructions for trading partner exchange of data, eliminating intragovernmental transactions from the Department of Defense (DoD) quarterly and annual financial statements, and providing elimination information to the Department of the Treasury (Treasury) for use in preparing the Governmentwide financial statements.

1.3 Authoritative Guidance

Volume 1, Part 2, Chapter 4700 of the Treasury Financial Manual (TFM), “Federal Entity Reporting Requirements for the Financial Report of the United States Government,” (TFM 2-4700) contains policy for the reporting requirements for the federal intragovernmental transactions process.

*2.0 FUNDAMENTAL REQUIREMENT

All DoD consolidation entities are required to report intragovernmental account balances in their financial statements, eliminate appropriate intra-DoD balances, and classify intragovernmental account balances by category and level. The category of transaction refers to the nature of the accounting event causing the transaction.

*3.0 IGT CATEGORIES

IGT categories represent a grouping of transactions processed in a similar manner related to a type of financial activity. IGTs consist of seven categories: Investments, Borrowings, Benefits, Buy/Sell, Transfers, Custodial, and General Fund transactions. Reciprocal categories are comprised of a set of financial statement line items (accounts) that are the reciprocal of each other. These categories assist in the elimination of federal activity at the Governmentwide. Additionally, these reciprocal categories facilitate the reconciliation of activities between federal entities.

3.1 Investments

Investments include intragovernmental securities. The Department invests primarily in non-marketable, market-based Treasury securities. The value of these securities fluctuates in tandem with the selling price of the equivalent marketable security. Securities are purchased with the intent to hold until maturity; thus, balances are not adjusted to market value. Investments are reciprocal of Borrowings. Table 13-1 shows the Investments and Borrowings reciprocal categories.

3.2 Borrowings

Borrowings involve the calculation and reporting of Borrowings from the Treasury through Fiscal Service or Federal Financing Bank. Balances calculated and reported by the lending entity and federal entities may include loans receivable/payable, capitalized interest receivable/payable, accrued interest receivable/payable, accrued interest revenue/expense, as well as gains and losses. Borrowings are reciprocal of Investments. Table 13-1 shows the Investments and Borrowings reciprocal categories.

Table 13-1 Investments and Borrowings Reciprocal Categories

Financial Statement	DoD	Treasury
Balance Sheet	Federal Investments	Federal Debt
Statement of Net Cost	Federal Securities Interest Revenue	Federal Securities Interest Expense

3.3 Benefits

Benefits include transactions in Benefit Program Contributions Receivable and Payables and Benefit Program Costs/Revenues. The Office of Personnel Management (OPM) and the Department of Labor (DOL) administer the employee benefits for the entities of the federal government. OPM administers retirement benefits, health benefits, and life insurance. DOL administers Federal Employees' Compensation Act (FECA) benefits and Federal Unemployment Tax Act (FUTA) benefits. Table 13-2 shows the Benefits reciprocal categories.

Table 13-2 Benefits Reciprocal Categories

Financial Statement	DoD	DOL and OPM
Balance Sheet	Benefit Contributions Payable	Benefit Contributions Receivable
Statement of Net Cost	Benefit Program Costs	Benefit Program Revenue

3.4 Buy/Sell

Buy/Sell transactions occur between federal entities where goods or services are purchased by one federal entity from another federal entity. This arrangement is typically accomplished through the issuance of a reimbursable agreement between the two federal entities. Table 13-3 shows the Buy/Sell reciprocal categories.

Table 13-3 Buy/Sell Reciprocal Categories

Financial Statement	Buyer	Seller
Balance Sheet	Accounts Payable	Accounts Receivable
Balance Sheet	Advances	Deferred Revenue
Statement of Net Cost	Expenses / Purchases	Revenue

3.5 Transfers

Transfers include non-exchange transactions that reduce resources (budgetary and proprietary) in one Treasury Account Symbol (TAS) and increase them in one or more other TAS by the total cumulative amount. Reciprocal categories include Transfer In (receiving entity) and Transfer Out (transferring entity) on the Statement of Changes in Net Position.

3.6 Custodial

Custodial transactions include collections by a collecting entity on behalf of a receiving entity. The federal entity that collects on behalf of another but is not entitled to retain the collections is referred to as the collecting entity or custodian. The federal entity on whose behalf the collecting entity is collecting is referred to as the receiving entity. This type of agreement is usually stipulated in legislation or is agreed upon by the federal entities involved. Reciprocal categories include Collections Transferred In (receiving entity) and Collections Transferred Out (collecting entity) on the Statement of Net Cost.

3.7 General Fund

General Fund transactions occur between a federal entity and the General Fund. Fund Balance with Treasury (FBWT) is a General Fund transaction. The Treasury records cash receipts and disbursements on the Department's behalf; funds are available only for the purposes for which they were appropriated. The Department's FBWT consists of general funds, revolving funds, trust funds, special funds, and other fund types. The reciprocal category is the Treasury's liability for FBWT.

4.0 LEVELS OF TRADING PARTNERS

There are three levels of intragovernmental trading partners for which intragovernmental transactions must be identified; **Level 1 - Transactions between non-DoD FPAs**, **Level 2 - Transactions between DoD FPAs**, and **Level 3 - Transactions within a DoD Component**.

4.1 Level 1 Non-DoD FPAs

Level 1 transactions are between DoD and Non-DoD FPAs, e.g., between the Department of the Air Force and the Department of Commerce. Identify Level 1 transaction balances by the Treasury Trading Partner codes and attributes attached to the **U.S. Standard General Ledger (USSGL)** accounts. DoD entities **must** document the procedures used to identify and verify the accuracy of their intragovernmental assets, liabilities, revenues, and expenses balances.

4.2 Level 2 DoD Consolidation Entities

Level 2 balances result from transactions between DoD consolidation entities (e.g., between the Department of the Army Working Capital Funds (WCF) and the Department of the Navy General Fund (GF)). Volume 6B, Chapter 1, contains information on DoD consolidation entities. Level 2 transactions are identified by trading partner codes and supplemental internal DoD codes, such as business partner numbers, trading partner federal/non-federal indicators, and other trading partner codes included in SFIS.

4.3 Level 3 within a DoD Component

Level 3 trading partners are within a DoD Component, i.e., Army WCF, Supply Management and Army WCF, Depot Maintenance, Other; and Department of the Navy GF, Operations and Maintenance and Department of the Navy GF, Research Development, Test, and Evaluation. There may be multiple sublevels of eliminations, with the elimination totals shown on the DoD Component's supporting consolidating statements. For example, the Navy GF Level 3 eliminations would be between: (A) Navy Military Personnel and Navy Procurement; (B) Navy Military Personnel trial balance AT17AA1_1453 and Navy Reserve Personnel trial balance AT17AA1_1405; and (C) internally within Navy Military Personnel trial balance AT17AA1_1453.

*5.0 ELIMINATIONS

5.1 Intragovernmental Account Balances

5.1.1. Eliminations, or eliminating intragovernmental account balances, represent the process where a federal entity having transactions with another federal entity ensures that the amounts on its trial balances for specific accounts correlate with those amounts in the reciprocal accounts of the federal entity with which business was conducted.

5.1.2. The purpose of eliminating intragovernmental account balances is to offset the effect of transactions between a DoD entity and other non-DoD FPAs, DoD consolidation entities, and organizations within a DoD consolidation entity in the DoD and Governmentwide financial statements with the exception of the Statement of Budgetary Resources.

5.2 Budgetary Accounts

5.2.1. Per Office of Management and Budget (OMB) Circular [A-136](#), "Financial Reporting Requirements," the Statement of Budgetary Resources is a combined statement where intragovernmental budgetary accounts are not eliminated.

5.2.2. Present budgetary information on a combined basis, with no elimination of budgetary accounts, consistent with information reported in the "Report on Budget Execution and Budgetary Resources" in accordance with OMB Circular [A-11](#), "Preparation, Submission, and Execution of the Budget."

*6.0 TRADING PARTNER RESPONSIBILITIES

In order to properly present the balances on the financial statements, trading partners must work together throughout the reporting period.

6.1 Accounting

6.1.1. Each USSGL account must be assigned the appropriate trading partner indicators defined in the **Standard Financial Information Structure (SFIS)**. See additional indicators for each USSGL account in Treasury's **USSGL Account Attribute Table**.

6.1.2. Trading partners must:

6.1.2.1. Record IGT transactions and accruals timely and identify supporting accounting methodologies.

6.1.2.2. Record Transfers-In and reciprocal Transfers-Out in the same accounting period.

6.1.2.3. Work with trading partners to determine transaction types, establish appropriate accounting data and confirm proper account postings and eliminations.

6.1.2.4. Reconcile transactions with partners on a routine basis as agreed upon [weekly, monthly, and/or quarterly].

6.1.2.5. Adjust balance in financial records as required prior to the period close, once differences are reconciled.

6.2 Trading Partner Communication

6.2.1. Trading partners must:

6.2.1.1. Provide timely, accurate data to partner agencies and/or accounting offices.

6.2.1.2. Confirm payments/collections and verify settlement of funds.

6.2.1.3. Verify reciprocal balances and reconcile balances to the authoritative source. If the balances do not agree, proactively work with trading partners to resolve reconciling items and adjudicate differences.

6.2.1.4. Provide documentation supporting billing, performance, transfers of, or receipt of funds, upon request. If documentation is not available, trading partners must work together to determine which partner must adjust its balance to match the supportable data.

6.2.1.5. Resolve disagreements or issues over accounting treatment and period for posting.

6.3 G-Invoicing

6.3.1. To assist FPAs with reconciling intragovernmental Buy/Sell transactions, the Fiscal Service mandated the use of G-Invoicing, which facilitates the exchange of intragovernmental transaction information between federal trading partners and serves as the interface by which FPAs submit and reconcile intragovernmental data.

6.3.2. G-Invoicing requires both trading partners to agree on key phases of the trading process:

6.3.2.1. General Terms & Conditions (GT&Cs) Phase. The GT&Cs represent a Buy/Sell agreement that defines the terms and conditions, scope, and responsibilities of trading partners during the exchange. The objective of this stage is for trading partners to concur on and document the details of the GT&C before performing any services or delivering any goods.

6.3.2.2. Order Phase. Orders serve as the fiscal obligation (funding) and identify the specific Buyer requirements for the expected delivery of products or services by the Seller. Funding information within the Order includes all required points of contact authorizing the Order for both trading partners.

6.3.2.3. Performance Transactions Phase. This phase revolves around the delivery and receipt of goods and/or services. Revenue from IGT Buy/Sell transactions is earned and recorded as goods are delivered and as services are performed. A corresponding expense is recognized in the period that an exchange occurs. Thus, both trading partners should exchange performance-related data with one another surrounding the delivery and acceptance of goods, along with the receipt and consumption of services.

6.3.2.4. Fund Settlement Phase. This phase includes the payment and collection activities as well as the closeout of the agreement. After the performance has been accomplished according to the terms documented in the agreement, funds are transferred between the trading partners. Within G-Invoicing, fund settlement occurs upon completion of the Performance Transaction. As the agreement approaches its end date, the Buyer and the Seller must monitor each Order included in the agreement. During closeout, the Seller identifies Orders that are approaching an end date and checks the status with the Buyer to confirm that they are ready for closeout. The Buyer reviews the Order status and performs procedures to close out and deobligate the Order if the Statutory Authority for the agreement mandates it. Additionally, the Seller determines if any third-party supporting contracts are open that need to be deobligated and closed.

6.3.3. G-Invoicing maintains a repository of intragovernmental transactions and internal controls to ensure the accuracy of transactions for buyers and sellers.

6.3.4. FPAs involved with intragovernmental reimbursable activities use G-Invoicing to originate and settle intragovernmental agreements, orders, and invoices. G-Invoicing adoption is

required by all FPAs, as mandated by the Secretary of the Treasury in accordance with 31 U.S.C. 3512(b) and 3513.

6.4 Memorandum of Understanding

6.4.1. Alternatively, DoD [consolidation](#) entities may establish a bilateral Memorandum of Understanding with each of their DoD trading partners not using G-Invoicing.

6.4.2. Such agreements, at a minimum, must identify the following:

6.4.2.1. The reconciliation timeframes (frequency);

6.4.2.2. Accrual processes (agreed upon methodologies);

6.4.2.3. Availability or exchange of detailed transactions and key supporting documentation;

6.4.2.4. Protocol to resolve differences between trading partners; and

6.4.2.5. Other processes requiring clarification.

*7.0 TRADING PARTNER RECONCILIATIONS

7.1 Reconciliation

7.1.1. OMB Circular A-136 requires [consolidation](#) entities to reconcile and resolve differences between intragovernmental balances and transactions. TFM 2-4700 includes guidance to facilitate the reconciliation of intragovernmental transactions.

7.1.2. DoD entities reconcile with their trading partners at the detail transaction level. Detail transactions provide support for reported balances requiring elimination with trading partners. The entity is ultimately responsible for the accuracy of its trading partner data; therefore, it is responsible for initiating actions to reconcile balances with its trading partners.

7.1.2.1. Review all information reported in any other external reports for consistency with the information included in the quarterly and annual audited financial statements.

7.1.2.2. Document identified differences including, but not limited to, the difference amount, USSGL accounts impacted, [the](#) rationale for the difference, and the status of communication with trading partners.

7.1.2.3. Prioritize trading partner material differences to reduce high-dollar variances. Agencies must work to reconcile and eliminate differences regardless of materiality.

7.1.3. DoD entities must document reconciliations and retain documentation in accordance with the National Archives and Records Administration Records Management Guidance and Regulations.

*7.2 Common Trading Partner Differences

Consolidation Entities should adopt procedures to prevent, as much as possible, the following common trading partner differences:

7.2.1. Current-year timing difference occurs when the reporting agency has reported activity in a different quarter than the trading partner reported the activity in the current year. Trading partners must identify the total amount of the difference and determine if an adjustment should be made.

7.2.2. Prior-year timing difference occurs when a reporting agency has reported activity in a prior fiscal year and the trading partner reported the activity in the current fiscal year. Trading partners must identify the total amount of the difference and determine if an adjustment should be made.

7.2.3. Accounting methodology difference occurs when trading partners use different accounting methods to account for activity. Trading partners must identify the method(s) of accounting used and the dollar amount of the difference caused by the differing methodologies.

7.2.4. Accrual methodology difference occurs when trading partners use different accrual methods to account for activity. Trading partners must identify the method(s) of accrual used and the dollar amount of the difference caused by the differing methodologies.

7.3 Governmentwide Treasury Account Symbol (GTAS) Adjusted Trial Balance

Each quarter, the Treasury populates detailed trading partner data in GTAS. GTAS provides comparisons of balances reported by all federal partners and facilitates intragovernmental consolidation and elimination required for Governmentwide reporting. As an output of the GTAS comparison, Treasury provides quarterly Intragovernmental Material Differences Reports by Treasury Index. Review these reports and explain differences to the Treasury in accordance with TFM 2-4700 and the DoD Financial Reporting Guidance. Treasury uses the Level 1 trading partner amounts reported in GTAS to compile the elimination entries necessary to prepare the Government-Wide Financial Report.

*7.4 The Advana IGT Toolkit

7.4.1. The Advana IGT toolkit supports interdepartmental trading partner reconciliations at the transaction level and can be used to validate completeness of entity-level IGT transactions recorded in the general ledger.

7.4.2. The Advana IGT Elimination application (part of the toolkit) provides users with a complete universe of buy/sell transactions consolidated from DoD financial systems. Use this application to:

7.4.2.1. Define the population by selecting criteria to define buyers and/or sellers.

7.4.2.2. Create On-Demand Applications (ODAGs) to reconcile the defined population and validate the selection against trading partner ledgers using IGT comparison logic.

7.4.2.3. Share reconciliation ODAGs with trading partners and teammates.

7.4.2.4. Compare Advana reconciliations with internal reports and key supporting documents to explain reconciling variances.

7.4.3. Advana users can access the IGT Toolkit under the (CAC enabled) [IGT Resources](#) link in the Advana Knowledge Base.

7.5 Disputes

7.5.1. DoD entities are expected to work with their respective non-DoD trading partners to reconcile and resolve intragovernmental differences. Working through the Defense Finance and Accounting Service, Enterprise Solutions and Standards, Financial Reporting-Audited Financial Statements Directorate, reciprocal accounts disputes with other FPAs will continue to follow the dispute resolution process identified in Appendix 6 of TFM 2-4700.

7.5.2. The Office of the Under Secretary of Defense, Comptroller (OUSDC) can assist with DoD dispute resolution between DoD consolidation entities. Submit requests for assistance no later than the 12th business day of the month following the end of the quarter. At fiscal year-end, final adjustments must be completed prior to the issuance of the [Agency Financial Report](#). For OUSDC support, contact the IGT mailbox at osd.pentagon.ousd-c.mbx.ousdc-igt@mail.mil. Entities must provide the following with the request:

7.5.2.1. Documentation demonstrating attempts to reconcile balances with trading partners at the senior executive or agency comptroller level; and

7.5.2.2. Documentation supporting balances the DoD consolidation entities are seeking to resolve with trading partners.

8.0 OTHER FEDERAL TRADING PARTNER REQUIREMENTS

8.1 Trading Partner Codes

DoD Consolidation entities submit trading partner code information to Treasury by GTAS Attributes. Use the trading partner codes, in conjunction with the USSGL account information, to identify required elimination entries.

8.2 Trading Partner Effect of Prior Period Adjustments

When it is determined that a prior period adjustment is necessary for a transaction involving another FPA, the accounting centers identify the trading partner and determine how the transaction was recorded. Additionally, the accounting centers must work with the trading partner to inform Treasury of the prior period adjustment. This will assist Treasury with eliminations on the Governmentwide financial statements.

8.3 Non-Federal Trading Partners

All accounting centers and DoD [consolidation](#) entities must identify trading partner information properly according to the federal/non-federal indicator attribute included in SFIS.

8.4 Foreign Military Sales Trust Fund Reporting

In general, DoD Components performing reimbursable activities on behalf of the Foreign Military Sales Trust Fund (11X8242) must recognize related accounts receivable and revenue as federal citing entity code 11X8242 as the Level 1 trading partner. Refer to the DoD Financial Reporting Guidance for additional reporting policy for the Foreign Military Sales Trust Fund.

CHAPTER 1

BASIC PAY

1.0 GENERAL

1.1 Purpose

This chapter prescribes the criteria for determining creditable service for military members; provides examples for computing valid creditable service; states periods of service that are not creditable for pay purposes; cites conditions for the payment of military pay entitlements; explains the computation of leave and conditions for leave accrual; and provides for situations where enlistments are not valid. Tables 1-1 through 1-15, outlining various conditions in which military pay is payable for all grades of military personnel, are at the end of this chapter. See Chapter 26 for entitlement to Basic Allowance for Housing (BAH), and Chapter 25, Table 25-1 or the [Basic Allowance for Subsistence \(BAS\)](#) table for payments.

1.2 Authoritative Guidance

The pay policies and requirements established by DoD in this chapter are derived primarily from, and prepared in accordance with, the United States Code (U.S.C.). Due to the subject matter in this chapter, the list of authoritative sources is extensive. The specific statutes, regulations, and other applicable guidance that govern each individual section are listed in a reference section at the end of the chapter.

2.0 CREDITABLE SERVICE

2.1 Service Which is Creditable

2.1.1. General

2.1.1.1. The several military pay and personnel systems use a variety of dates to determine various entitlements. Among them is the date that denotes how much service a member has for the purpose of determining longevity pay rates. The Army refers to this as the “pay entry basic date,” the Navy and Marine Corps refer to this as the “pay entry base date,” while the Air Force calls it the “pay date.” This chapter will refer to this data element as the “basic pay date,” which is defined as reflecting all service that is creditable towards longevity.

2.1.1.2. The member’s servicing personnel office is responsible for providing, when necessary, a statement of service that can include the basic pay date, total active federal military service date, total commissioned federal military service date, and a variety of other dates, depending on the nature of the individual member’s service. This Regulation details only the computation of the basic pay date, since Military Service personnel regulations control the computation of all other dates.

2.1.2. Computation of Creditable Service. For most members who enter and serve on active duty without a break in service, the basic pay date is the date the member enters active or inactive service. If, however, there is a break in service, the time between periods of service usually is not included. Also, there are statutory periods when service in a particular component may not be counted. Conversely, there are periods for which some members are given constructive service, even though they were not actually serving on active or inactive duty. Use subparagraphs 2.1.3 through 2.1.5 to compute the basic pay date when there has been a break in service of any kind or if there is a need to include constructive service.

2.1.3. Creditable Service Periods. Include active or inactive service in any of the following components without restriction:

2.1.3.1. Regular service in the Army, Air Force, Navy, Coast Guard, and Marine Corps;

2.1.3.2. Army, Naval, Marine Corps, Air Force, and Coast Guard Reserve;

2.1.3.3. Army of the United States (service without specification of a component);

2.1.3.4. Army National Guard;

2.1.3.5. Army National Guard of the United States;

2.1.3.6. National Guard;

2.1.3.7. National Guard of the United States;

2.1.3.8. Air Force of the United States (service without specification of a component);

2.1.3.9. Air National Guard;

2.1.3.10. Air National Guard of the United States;

2.1.3.11. Nurse Corps and Nurse Corps Reserve of the Public Health Service; or

2.1.3.12. Public Health Service and Reserve Corps of the Public Health Service.

2.1.4. Other Creditable Service (with restrictions noted in this subparagraph and in subparagraph 2.2.1). Include the following periods of service:

2.1.4.1. Officer, deck officer, or junior engineer service in the National Oceanic and Atmospheric Administration, including similar periods of service in the former Corps of the Environmental Science Services Administration and the U.S. Coast and Geodetic Survey;

2.1.4.2. Service on a Military Service retired list, temporary disability retired list, or honorary retired list of any Uniformed Service or service as a member of the Fleet Reserve or Fleet Marine Corps Reserve;

2.1.4.3. Any period of service during which a member is entitled to retired, retirement, or retainer pay from any Uniformed Service;

2.1.4.4. Service as a cadet or midshipman at a military academy is always creditable service for an enlisted member who is not commissioned. For a prior service member, he/she reverts back to his/her enlisted status to complete their enlistment contract. See Table 1-1 to determine whether such service is creditable for commissioned and warrant officers;

2.1.4.5. Credit the time when an enlisted member is retained after the expiration of term of service of an Armed Force for medical care or hospitalization for disease or injury incident to service. Do not credit such periods of service if the underlying medical condition requiring medical care or hospitalization was due to the member's misconduct;

2.1.4.6. Service otherwise creditable that is performed before a member reaches the statutory age for enlistment, unless the enlistment contract was voided or invalidated for fraud;

2.1.4.7. Active service performed as a temporary member of the U.S. Coast Guard Reserve;

2.1.4.8. Service terminated by desertion or dishonorable discharge unless the enlistment was fraudulent and was voided for that reason;

2.1.4.9. Periods of service when a member is detailed to and receiving pay and allowances from any other agency of the United States, even though accruing military pay, and allowances is suspended;

2.1.4.10. Service as a member of the Army, Navy, or Air Force Reserve Officers' Training Corps (ROTC), provided the member has concurrent Selected Reserve (drilling status) for duty performed on or after August 1, 1979. Also, see subparagraph 2.1.4.14;

2.1.4.11. Service as an officer, Army field clerk, flight officer, aviation midshipman, or enlisted member of a uniformed service;

2.1.4.12. Service as an enlisted member in a Reserve Component, including Ready Reserve service (inactive and active) under the Delayed Entry (Enlistment) Program (DEP), before beginning active duty or an initial period of Active Duty Training (ADT), provided the Reserve enlistment was entered into before January 1, 1985. As of January 1, 1985, the following restrictions went into effect as and when stated:

2.1.4.12.1. For enlistments in a Reserve Component under [Title 10, U.S.C., section 12103](#)(b) or (d), including enlistments under a DEP, that were entered

into between January 1, 1985, and November 28, 1989, the period served in the Reserve Component before beginning active duty or an initial period of ADT is not creditable; or

2.1.4.12.2. For enlistments entered into on or after November 29, 1989:

2.1.4.12.2.1. A period of enlisted service in a Reserve Component under 10 U.S.C. § 12103(b) or (d), including inactive service under a DEP, is creditable service only if the member performs Inactive Duty Training (IDT) before beginning active duty or an initial period of ADT; or

2.1.4.12.2.2. Service performed as an enlisted member in a Reserve Component under [10 U.S.C. § 513](#), other than a period of active duty, is not creditable service; or

2.1.4.13. Any period of service which was creditable under any federal statute in effect on January 10, 1962.

2.1.4.14. Prior provisions of law excluded the Simultaneous Membership Program from creditable service for commissioned officers, effective October 13, 1964. [Title 10 U.S.C. § 2106](#) amended these provisions to provide service credit retroactive to August 1, 1979. These amendments resulted in no increase in pay, retired pay, or retainer pay before the date of enactment, September 23, 1996. Service in the program for enlisted members who retain that status remains creditable under all provisions.

2.1.5. Constructive Service

2.1.5.1. Some medical and dental officers are entitled to extra credit for longevity purposes to reflect the time spent in medical or dental school. Medical and dental officers must meet one or more of the following criteria to be entitled to the constructive credit.

2.1.5.1.1. On or before September 15, 1981, the officer already had the constructive service credit, then the credit is not lost if there is a break in service either before or after that date. This [criterion](#) is applicable to Public Health Service officers.

2.1.5.1.2. On or before September 14, 1981, the individual was enrolled in either the Armed Forces Health Professions Scholarship Program (AFHPSP) or in the Doctor of Medicine (DOM) program at the Uniformed Services University of Health Sciences (USUHS), completed that program, and was appointed as a medical or dental officer.

2.1.5.1.3. On or before September 14, 1981, the individual was participating in a program that credited years of service and led to an appointment as an officer in the Army, Navy, Air Force, or Marine Corps.

2.1.5.2. Medical and dental officers, who meet the criteria in subparagraph 2.1.5.1, are entitled to 4 years of constructive service credit. Also, those medical officers who have completed a medical internship or its equivalent, or who entered military status while serving such an internship, are entitled to a fifth year of constructive service credit.

2.1.5.3. Where a member is entitled to service credit for a period covered by the constructive credit, reduce the constructive service credit by an amount equal to the actual service credit.

Example 1: An individual completed dental school on June 11, 1977, and accepted a commission as a dental officer on August 3, 1977. The member was credited with 4 years of constructive service and a basic pay date of August 3, 1973.

Example 2: An individual completed a medical internship on June 30, 1979, and accepted a commission as a medical officer on August 11, 1979. The member was credited with 5 years of constructive service and a basic pay date of August 11, 1974.

Example 3: An individual entered medical school in 1970 and accepted a commission on January 12, 1972. He graduated from medical school on June 10, 1974, and completed a civilian residency during the period from July 1, 1974, through June 30, 1975. Compute basic pay date as follows:

First, compute dual status period, which is the period of time between the date of commission and date of graduation:

	<u>YR</u>	<u>MO</u>	<u>DAY</u>
Graduated:	74	06	10
Commission Date:	<u>72</u>	<u>01</u>	<u>12</u>
Dual Status Period:	02	04	28+1 (inclusive day)

Then, compute constructive service credit, which is the 4 years constructive credit less the time already credited as commissioned service:

Maximum Constructive Service Credit:	03	11	30 (4 years)
Less Dual Status Time:	<u>02</u>	<u>04</u>	<u>29</u>
Constructive Credit:	01	07	01

The member's basic pay date was 1 year, 7 months, and 1 day before his commission date of January 12, 1972, or June 11, 1970.

Example 4: The scenario is the same as in the previous subparagraph, except the member accepted a commission on July 12, 1974, after starting the internship. The member was entitled to 5 years of constructive service credit instead of 4 years:

	<u>YR</u>	<u>MO</u>	<u>DAY</u>
Date Finished Internship:	75	06	30
Commission Date:	<u>74</u>	<u>07</u>	<u>12</u>
Dual Status Period:	00	11	18+1 (inclusive day)

Maximum Constructive			
Service Credit:	04	11	30 (5 years)
Less Dual Status Time:	<u>00</u>	<u>11</u>	<u>19</u>
Constructive Credit:	04	00	11

The member's basic pay date was 4 years, no months, and 11 days before his commission date, or July 1, 1970.

Example 5: An officer commissioned on November 19, 1962, entered dental school on September 9, 1970, and graduated on May 28, 1974. To compute constructive service credit:

First, compute dual status:

	<u>YR</u>	<u>MO</u>	<u>DAY</u>
Graduated:	74	05	28
Started School:	<u>70</u>	<u>09</u>	<u>09</u>
Dual Service:	03	08	19+1 (inclusive day)

Then, deduct the dual service from the 4-year constructive credit period to arrive at net constructive service credit:

	<u>YR</u>	<u>MO</u>	<u>DAY</u>
Maximum Constructive			
Service Credit:	03	11	30 (4 years)
Less Dual Service:	<u>03</u>	<u>08</u>	<u>20</u>
Constructive Credit:	00	03	10

Change the member's basic pay date to 3 months and 10 days before the previous one (November 19, 1962) to August 10, 1962.

2.2 Service Not Creditable

2.2.1. General. Do not use any service that is not listed as creditable service to compute a basic pay date. The following list includes a few types of service that are not creditable:

2.2.1.1. The time served in an enlistment that is terminated, voided, or invalidated as fraudulent;

2.2.1.2. The time served as a commissioned officer in the Philippine Army;

2.2.1.3. The period of time a member was on the Emergency Officers' Retired List;

2.2.1.4. The time an individual was a member of a state, home, or territorial guard;

2.2.1.5. The time an individual was a member of the inactive National Guard. This does not apply to an individual who was a member of the National Guard Reserve and the National Guard of the United States. Time during which the individual had dual status, enlisted or commissioned, in the inactive National Guard and the National Guard of the United States is creditable;

2.2.1.6. The time, subsequent to September 14, 1981, a member serves while enrolled in the AFHPSP and Financial Assistance Program (FAP), or while a DOM student at the USUHS. Use any service creditable on the date of the officer's entry into DOM USUHS to compute the officer's basic pay for longevity purposes while a USUHS student, not to exceed the maximum rate of O-1 pay (Table 1-7) or O-1E pay (Table 1-8), as applicable, or the rate of pay of the member's former pay grade, if greater, as outlined in subparagraph 3.3.1. For the most current pay rates, see the [Military Basic Pay](#) tables on DFAS.MIL;

2.2.1.7. The time served in a Reserve Component before beginning active duty or an initial period of ADT for enlistment in a Reserve Component under 10 U.S.C. § 12103(b) or (d) that was entered into between January 1, 1985, and November 28, 1989;

2.2.1.8. For enlistments entered into on or after November 29, 1989:

2.2.1.8.1. A period of enlisted service in a Reserve Component under 10 U.S.C. § 12103(b) or (d), including inactive service under a DEP, if the member does not perform IDT before beginning active duty or an initial period of ADT; or

2.2.1.8.2. Service performed as an enlisted member in a Reserve Component under 10 U.S.C. § 513, other than a period of active duty; or

2.2.1.9. For an officer, the time served while attending a military service academy including the U.S. Merchant Marine Academy.

NOTE: The midshipmen attending the U.S. Merchant Marine Academy sign contracts to join the enlisted Navy Reserve on the day they enter the Academy. Students who attend one of the six state Merchant Marine college programs and who receive a Naval ROTC scholarship are treated the same as any Naval ROTC cadet or midshipmen. Students who attend one of the [six](#) state Merchant Marine college programs and who join the Navy after graduation from one of the programs are treated as any other member who joins the Navy.

2.2.2. Effect of Lost Time Absence From Duty on Creditable Service

2.2.2.1. Prior to February 11, 1996, a commissioned or warrant officer was entitled to credit for every day in a commissioned or warrant status, without regard to an absence of any kind, whether authorized or unauthorized, and including confinement prior to and during trial. In addition, absence during which a member was serving on active duty as an enlisted member was creditable if the enlisted member also held a commission as a Reserve officer. After February 10, 1996, a commissioned or warrant officer may not count the following periods of absence for any purpose other than that of computing length of service for basic pay:

2.2.2.1.1. Desertion;

2.2.2.1.2. Absence from organization, station, or duty for more than 1 day without proper authority, as determined by proper authority;

2.2.2.1.3. Confinement by military or civilian authorities for more than 1 day in connection with a trial, whether before, during, or after the trial; or

2.2.2.1.4. The officer's inability for more than 1 day, as determined by competent authority, to perform assigned duties because of the officer's intemperate use of drugs or alcoholic liquor, or because of disease or injury resulting from the officer's misconduct.

2.2.2.2. See Table 1-2 to determine the creditability for absence while in an enlisted status.

2.3 Active Enlisted and/or Warrant Officer Service for Members in Basic Pay Grades O-1E, O-2E, or O-3E

2.3.1. Service Counted

2.3.1.1. General. Commissioned officers with over 4 years of prior active service as an enlisted member, warrant officer, or combined service in both grades are entitled to count such service for purposes of computing basic pay for longevity purposes. Such prior service includes all active service, in either the Regular or Reserve Component or both (i.e., ADT in enlisted or warrant officer status, annual Reserve training duty, and full-time National Guard duty). Service on active duty or ADT and IDT for at least 4 years and 1 day **satisfies** the over 4 years of service requirement under this section.

2.3.1.2. Creditable Prior Enlisted Service. Commissioned officers in pay grades O-1, O-2, or O-3 who are credited with over 4 years (i.e., at least 4 years and 1 day) of prior active service as an enlisted member are entitled to the special rate of basic pay for pay grade O-1E, O-2E, or O-3E.

2.3.1.3. Creditable Prior Warrant Officer Service. Commissioned officers in pay grades O-1, O-2, or O-3 who are credited with over 4 years (i.e., at least 4 years and 1 day) of prior active service as a warrant officer are entitled to the special rate of basic pay for pay grade O-1E, O-2E, or O-3E.

2.3.1.4. Creditable Combined Prior Service. Effective October 1, 1993, commissioned officers in pay grades O-1, O-2, or O-3 who are credited with over 4 years (i.e., at least 4 years and 1 day) of combined prior active service as an enlisted member and warrant officer are entitled to the special rate of basic pay for pay grade O-1E, O-2E, or O-3E.

2.3.1.5. Creditable Service for Certain Reserve Commissioned Officers. Effective January 1, 2002, commissioned officers in pay grades O-1, O-2, and O-3 who are paid from funds appropriated for Reserve personnel and credited with 1,460 points for retirement computed under

[10 U.S.C. § 12732](#)(a)(2) for service as a warrant officer and/or enlisted member, which requires a minimum of 50 points annually, are entitled to the special rate of basic pay for pay grade O-1E, O-2E, or O-3E.

2.3.1.6. Creditable Service for Certain Commissioned Officers. Effective November 24, 2003, the restriction that members must be paid from reserve appropriated funds to qualify for the special rate of basic pay for pay grades O-1E, O-2E, and O-3E based upon creditable service points is eliminated. Therefore, effective that date, commissioned officers in pay grades O-1 through O-3 with more than 1,460 points computed under 10 U.S.C. § 12732(a)(2) for service as a warrant officer and/or an enlisted member, which requires a minimum of 50 points annually, are entitled to the special rate of pay.

2.3.1.7. Leap Year. Reserve Component members who perform duty during a leap year earn a point for the extra day of duty in the month of February under 10 U.S.C. § 12732(a)(2). A leap year represents 1 year of service for basic pay purposes. Thus, the extra point does not qualify the member for having earned the equivalent of over 4 years of active service, and the member would not be eligible for the O-1E, O-2E, or O-3E rate of basic pay. The member would have to serve more than 4 years of active service to qualify for the special rate of basic pay.

2.3.1.8. Creditable Service While Graduate Students at USUHS. The Secretary of Defense [will](#) establish such selection procedures, service obligations, and other requirements as the Secretary considers appropriate for graduate students (other than DOM students) in a postdoctoral, postgraduate, or technological institute established pursuant to [10 U.S.C. § 2113](#)(e). The subparagraph 2.2.1.8 does not apply to graduate students.

2.3.2. Service Not Counted. In computing active service, do not count:

2.3.2.1. Active service in a dual status (temporary officer/permanent enlisted) in the Navy or Marine Corps;

2.3.2.2. Service as a National Guard technician; or

2.3.2.3. Except for periods of active duty service performed while a USUHS DOM student, time served as a DOM student at USUHS. See subparagraph 2.2.1.8 and applicable notes to Tables 1-7, 1-8, and the Basic Pay tables on DFAS.MIL.

2.4 Computation of Creditable Service

2.4.1. Computing a Basic Pay Date

2.4.1.1. All basic pay date computations start from the date of the member's most recent entry on duty without a break in service. Use the following dates:

2.4.1.1.1. For enlisted members, the date of enlistment, but see subparagraph 2.1.4.12 for service under a DEP;

2.4.1.1.2. For officers, the date of acceptance of a commission. The date of acceptance for officers graduating from a Military Service academy is the date of graduation; or

2.4.1.1.3. For officers entitled to count service as an acting assistant surgeon, intern, or hospital steward in the Public Health Service or the Public Health Marine Hospital Service, the date of acceptance of the appointment. Do not count service performed before that date.

2.4.1.2. After determining initial basic pay date, compute creditable service for all service prior to that date. Use the following to compute basic pay date. If the member had any periods of service during which there was lost time, do not use those periods here. Instead, compute according to subparagraph 2.4.1.3.

2.4.1.2.1. List beginning dates of service for each separate period of service, without changing any of them, and add them together.

2.4.1.2.2. List all ending dates. If the day is the 31st day of the month, change it to 30. If the day is February 28 in a non-leap year, change it to February 30 for computation purposes. If the day is February 29, change it to February 30 for computation purposes. Do not change February 28 of a leap year to February 30. Add all ending dates together.

2.4.1.2.3. Subtract the beginning day result from the ending day result.

2.4.1.2.4. For each non-continuous period of service, add 1 day to account for inclusive days. Explanation: Any period of service is at least one day. If, for example, the member had one day of service on January 17, 2016, the computation would look like this:

Example:	<u>YR</u>	<u>MO</u>	<u>DAY</u>
Ending Day:	16	01	17
Less Beginning Day:	<u>16</u>	<u>01</u>	<u>17</u>
	00	00	00

It is necessary to add 1 day for inclusive days to avoid this erroneous answer.

2.4.1.2.5. Convert to full years, months, and days. The result is years of service creditable for pay purposes.

Example: Member served as follows:

	From:	To:
Active Duty Army (Enlisted)	Jan 1, 93	Feb 29, 96
Army National Guard (Commissioned)	Jun 1, 96	May 26, 03
Air National Guard (Commissioned)	Aug 1, 05	Mar 31, 10
U.S. Air Force (Commissioned)	Apr 1, 10	Jun 4, 17

Beginning dates:

<u>YR</u>	<u>MO</u>	<u>DAY</u>
1993	01	01
1996	06	01
<u>2005</u>	<u>08</u>	<u>01</u>
5994	15	03

Ending Dates:

<u>YR</u>	<u>MO</u>	<u>DAY</u>
1996	02	30
2003	05	26
<u>2017</u>	<u>06</u>	<u>04</u>
6016	13	60

Convert February 29, 1996, to February 30, 1996, since 1996 was a leap year.

Convert March 31, 2010, to March 30, 2010, since the 31st day of a month does not count as an ending date, though it would count as a beginning date. The period from August 1, 2005, through June 4, 2017, is continuous, so it is all included in the third line of the computation.

Subtract total of beginning dates from the total of ending dates:

<u>YR</u>	<u>MO</u>	<u>DAY</u>	
6016	13	60	(total of ending dates)
6015	25	60	(borrowed 12 months from year column)
<u>5994</u>	<u>15</u>	<u>03</u>	
21	10	57	

Add 1 day for each of the 3 periods used in the computation. The result is 21 years, 10 months, and 60 days, which converts to exactly 22 years of creditable service.

2.4.1.3. Regarding computations involving lost time, if a member has lost time, compute the creditable service for the period served separately. Add the results to any creditable service computed separately under subparagraph 2.4.1.2.

2.4.1.3.1. When there is a period of lost time that has not been made good, compute the lost time on a 30-day month basis, but if the lost time begins on the 31st day of a month, include that day as a lost day. Compute as follows.

Determine the years, months, and days of lost time and deduct that amount from the total service during the period.

Example: A member enlisted for 4 years on July 18, 2012, but was absent without leave (AWOL) from February 10, 2015, through March 16, 2015. The member received a hardship discharge on August 10, 2015, without making up the lost time. The member reenlisted February 20, 2017. Compute creditable service and basic pay date as follows.

First compute the lost time.

	<u>YR</u>	<u>MO</u>	<u>DAY</u>
Ended AWOL:	15	03	16
Began AWOL:	<u>15</u>	<u>02</u>	<u>10</u>
Lost Time:	00	01	06+1 (inclusive day)

Then compute first period of service.

Discharged:	15	08	10
Entered Active Duty:	<u>-12</u>	<u>07</u>	<u>18</u>
Subtotal:	03	00	22+1 (inclusive day)
Deduct Lost Time:	<u>-00</u>	<u>01</u>	<u>07</u>
Creditable Service:	02	11	16

Subtract 2 years, 11 months, and 16 days from reenlistment date of February 20, 2017, to arrive at a new basic pay date of March 4, 2014.

2.4.1.3.2. A member who makes good the lost time does so on a day-to-day basis. When the member makes good [on](#) lost time and completes the enlistment or contract period, compute the period of lost time on both a 30-day month basis and a day-to-day basis and use the result that is most advantageous to the member. To illustrate, if a member is AWOL on March 30 through April 1, it would be 3 days on the day-to-day basis but only 2 days on a 30-day month basis. Compute creditable service as follows (and separately from periods of service which do not have lost time).

2.4.1.3.2.1. First step: Compute total lost time on both a 30-day basis and a day-to-day basis. Convert the day-to-day basis computation to years, months and days, and compare it to the computation on the 30-day basis. Discard the one which shows a higher total of days lost.

2.4.1.3.2.2. Second step: Compute the gross amount of service during the period by subtracting the entry date from the discharge date and adding 1 day for inclusive day.

2.4.1.3.2.3. Third step: Subtract the lost time from the result of the second step. If the result is at least as long as the enlistment contract, use that amount. If the result is less than the enlistment contract, increase it to equal the enlistment contract.

2.4.1.3.2.4. Fourth step: Add this creditable service to any other periods and use the total to figure the member's basic pay date.

Example 1: Assume the member in the example in subparagraph 2.4.1.3 had not received a hardship discharge; instead, he or she had completed the enlistment contract, including making good the lost time. He made up the 35 days of lost time computed on a day-to-day basis. The days served to make good the lost time were July 18-31, 2016 (14 days) and August 1-21, 2016 (21 days).

When the member reenlists on February 20, 2017, compute creditable service as follows:

<u>YR</u>	<u>MO</u>	<u>DAY</u>	
16	08	21	(ending date of the last period of service)
-12	07	18	(beginning date of the last period of service)
04	01	03	+1(inclusive day)

The result is 4 years, 1 month and 4 days before deducting lost time. Note that the lost time computed on a 30-day month basis was 37 days, but was only 35 days when computed on a day-to-day basis. Subtract the 35 days lost time from the period of service computed.

<u>YR</u>	<u>MO</u>	<u>DAY</u>	
04	01	04	
-00	01	05	
03	11	29	(total service)

The result is less than the enlistment contract of 4 years, but since the member completed the enlistment contract, he or she is entitled to credit for the entire 4 years. Set basic pay date at February 20, 2013, when the member reenlists on February 20, 2017.

Example 2: A member enlisted on July 18, 2012, for 4 years. She was AWOL from July 28, 2015, through September 3, 2015, which is 38 days on a day-to-day basis (July 28-31, 4 days; August 1-31, 31 days; and September 1-3, 3 days). She is discharged on August 24, 2016, after making good the 38 days of bad time by serving July 18-31 (14 days) and August 1-24 (24 days).

Step 1. When she reenlists on February 20, 2017, compute prior service as follows:

<u>YR</u>	<u>MO</u>	<u>DAY</u>	
16	08	24	(ending date of the last period of service)
-12	07	18	(beginning date of the last period of service)
04	01	06+1	(inclusive day)

The result is 4 years, 1 month and 7 days before deducting lost time.

Step 2. Lost time on a day-to-day basis was 38 days. Compute lost time on a 30-day month basis as:

July 28-31, 2015,	03 days
August 1-30, 2015,	30 days
September 1-3, 2015,	<u>03 days</u>
Total	36 days

Step 3. Following the rule set out in step 2, deduct the lost time in the manner most beneficial to the member.

<u>YR</u>	<u>MO</u>	<u>DAY</u>	
04	01	07	(service before deducting lost time)
-00	01	06	(lost time)
04	00	01	

Step 4. Set the basic pay date at February 19, 2013, when the member reenlists on February 20, 2017.

2.4.1.4. Regarding adjusting the basic pay date when a member has lost time, lost time does not change an officer's basic pay date (See paragraph 2.2.2). When an enlisted person returns to duty after a period of lost time, add the number of days lost time to the member's basic pay date to reflect the lost time."

Example: An enlisted member with no prior service enlisted on July 18, 2015. He was AWOL from February 10, 2017, through March 16, 2017. When the member returns to duty status, change his basic pay date as follows:

Compute lost time:

February 10-30	21 days
March 1-16	16 days
	37 days lost time

<u>YR</u>	<u>MO</u>	<u>DAY</u>	
15	07	18	(original basic pay date)
+00	01	07	
15	08	25	

The new basic pay date is August 25, 2015.

2.4.2. Procedure When Basic Pay Date Falls on February 29. When basic pay date falls on February 29, entitlement to longevity increases begins on March 1 in non-leap years and on February 29 in leap years.

3.0 COMPUTATION OF PAY

3.1 Basic Pay Entitlements

3.1.1. When Entitled to Basic Pay. The pay of Military Service members is prescribed by law. Current basic pay rates are contained in Tables 1-7, 1-8, 1-9, 1-10, and on the Basic Pay tables on DFAS.MIL. Members are entitled to receive pay according to their pay grades and years of service if they are:

3.1.1.1. On active duty in a pay status; and

3.1.1.2. Not prohibited by law from receiving such pay.

3.1.2. Employment of Members in Another Capacity

3.1.2.1. Employment Under the Government

3.1.2.1.1. Unless otherwise provided by law (such as during the period a member is on terminal leave pending retirement, separation, or release from active duty under honorable conditions), a member may not be employed in another capacity by the government and receive pay, other than the pay and allowances that accrue by reason of the military status. A member may be employed, however, on a voluntary basis during off-duty hours in connection with non-appropriated fund activities.

3.1.2.1.2. Under agreements such as that between the DoD and the Agency for International Development (AID) of the Department of State, military members may be detailed to agencies such as AID for certain types of service for specified periods. As provided in pertinent agreements, members that are detailed are entitled to the pay and allowances of employees of the agency (AID Foreign Service personnel, in the case of that agency) holding comparable positions. Such members are paid by the agency in which service is performed, not by the Military Service involved.

3.1.2.2. Acceptance or Holding Civil Office

3.1.2.2.1. An officer of an Armed Force on active duty may not be employed on civil functions if the civil duties separate the member from the parent organization or interfere with the performance of military duties. This applies to employment on civil works or internal improvements, by an incorporated company, or as acting paymaster or disbursing agent of the Bureau of Indian Affairs.

3.1.2.2.2. Unless otherwise provided by law, an officer of a Regular Component of the Army, Navy, Air Force, or Marine Corps may not hold a civil office by election or appointment under the United States, a territory, possession, or state. Acceptance of such position terminates the officer's appointment and any further entitlement to receive pay and allowances whether or not the officer continues to fulfill the duties as an officer subsequent to accepting the office.

3.1.2.3. Medical Officers. Medical officers on active duty who receive any compensation or stipend payments for services they perform as interns or resident physicians in private or public institutions (state, county, municipal, or privately owned hospitals) receive such payments for the benefit of the United States. Collect these payments from medical officers for deposit to the U.S. Treasury.

3.1.3. Formal Acceptance of Appointment by Officers

3.1.3.1. Pay and allowances generally accrue from the date of acceptance of appointment as an officer. The normal method of acceptance is taking the oath of office. Commencement of travel in compliance with an order is considered acceptance for pay purposes, but payment will not be made until formal signing of the oath of office. See Table 1-3 for specifics and for graduates of the academies.

3.1.3.2. An officer need not take the oath of office upon promotion if the service has been continuous since the last oath.

Note: See Table 1-4 for other situations regarding effective dates for promotions or restoration of grade.

3.1.4. Restriction Against Dual Payments

3.1.4.1. Except as prescribed in subparagraph 3.1.4.3, a Reserve member who is entitled to disability compensation or a pension from the Department of Veterans Affairs (VA) because of earlier military service, and who performs military duty for which the member is entitled to compensation, may elect to receive either of the following for the period of military duty:

3.1.4.1.1. Payments for the VA disability compensation or pension; or

3.1.4.1.2. If the member specifically waives those payments, the pay and allowances authorized by law for the duty the member is performing.

3.1.4.2. Except as prescribed in subparagraph 3.1.4.3, a Reserve member who is entitled to retired or retainer pay because of earlier military service, and who performs military duty for which the member is entitled to compensation, may elect to receive either of the following for the period of military duty:

3.1.4.2.1. Payments of the pay and allowance authorized by law for the duty the member is performing; or

3.1.4.2.2. If the member specifically waives those payments, the retired or retainer pay to which the member is entitled.

3.1.4.3. A Reserve member who is called to active duty for a period of more than 30 days in time of war or national emergency generally ceases to be entitled to payments based on earlier military service until the period of active duty ends and is entitled to the pay and allowances authorized by law for the duty the member is performing. However, where the payments based on earlier military service exceed the payments for the active duty, the member may receive the former payments instead.

3.1.5. Posthumous Promotions. Members may be promoted posthumously. The amount of bonus, gratuity, pay, or allowances is not changed by these promotions. This payment restriction does not apply to promotions of members while in a missing status where a determination by the Secretary of the Military Department concerned is subsequently made that the member died before the date of the promotion.

3.1.6. Corrections of Military Record. Members who are separated from active service, but later retroactively restored to active duty by administrative record correction action, become entitled to retroactive military pay and allowances for the period of restoration subject to the following: The purpose of such a record correction is to restore the member to the same position the member would have had if he or she had not been separated from military service, without awarding an unearned windfall. When settling such an account, the earnings received from civilian employment during the period of restoration to active duty must be deducted from the net balance of military pay and allowances otherwise due. Any amount of civilian earnings in excess of the net balance of retroactive military pay and allowances otherwise due will not be collected so as not to place the member in debt. Additionally, amounts paid to a member for military retired pay, separation pay, severance pay, and/or VA pension or compensation during what is now a period of active duty under a record correction must be taken into account when determining the amount of retroactive military pay and allowances due, if they have not otherwise been recouped or accounted for. To the extent authorized by law and regulation, amounts found due must be reduced by the amount of any existing indebtedness to the government arising from military service.

3.2 Computing Monthly Pay

3.2.1. Monthly Pay

3.2.1.1. Service of 30 Days or More. Compute monthly compensation as if each month had 30 days. When service begins on an intermediate day of the month, pay for the actual number of days served during that calendar month, but only through the 30th day of that month. If active military service begins on the 31st day of any month, compensation does not accrue for that day. Any person who enters active service during February and serves until the end of the month is entitled to pay for 1 month (30 days), less the prorated amount for the number of days expired before entry on duty. If the service ends before the last day of February, pay the member only for the actual number of days served.

3.2.1.2. Service of Less Than 30 Days. Members of the Uniformed Services entitled to receive compensation for continuous periods of less than 1 month are entitled to pay and allowances for each day of the period at the rate of 1/30 of the monthly amount of such pay and allowances. Include the 31st day of a calendar month in the computation. Members who are obligated to serve on active duty for 30 days or more, but who were released before performing such active duty for at least 30 days, are entitled to receive pay and allowances on a day-to-day basis.

3.2.2. Absence Without Pay

3.2.2.1. Deduct 1/30 of 1 month's pay for each day's absence in a non-pay status.

3.2.2.2. No pay is lost for unauthorized absence on the 31st day of a month, except when it is the first day of absence or when the member is paid for the day under subparagraph 3.2.1.2.

3.2.2.3. Absence in a non-pay status on the 28th of February in a non-leap year result in loss of pay for 3 days. If the member is absent only on the 28th day of February in a leap year, deduct the pay for 1 day for the 28th. If the absence occurs on the 29th of February, deduct pay for 2 days. When payment is made under subparagraph 3.2.1.2, on the basis of each day served, deduct only for the actual period of unauthorized absence.

3.2.3. Annual Salary. Annual salary is divided into 12 equal installments. One installment represents the pay for each calendar month. The daily rate is 1/30 of the monthly rate. The instructions in subparagraph 3.2.1 for monthly pay also apply to annual salary.

3.2.4. Basic Pay Rates. Tables 1-7 through 1-10 contain monthly rates of basic pay and are listed on the Basic Pay tables on DFAS.MIL.

3.3 Saved Pay and Allowances

3.3.1. Enlisted. An enlisted member who accepts an appointment as an officer will, following appointment, be paid the greater of:

3.3.1.1. The pay and allowances to which such member would be entitled if the member had remained in the last enlisted grade held before appointment as an officer and continued to receive increases in pay and allowances authorized for that grade; or

3.3.1.2. The pay and allowances to which the member thereafter becomes entitled as an officer.

3.3.2. Warrant Officers. A warrant officer who accepts an appointment as a commissioned officer will, following appointment, be paid the greater of:

3.3.2.1. The pay and allowances to which the member thereafter becomes entitled as a commissioned officer;

3.3.2.2. The pay and allowances to which such member would be entitled if the member had remained in the last warrant officer grade held before appointment as a commissioned officer and continued to receive increases in pay and allowances authorized for that grade; or

3.3.2.3. In the case of an officer who was formerly an enlisted member, the pay and allowances to which entitled, under subparagraph 3.3.1.1, before appointment as an officer.

3.3.3. Prior Service Medical Students. Members selected to participate as DOM students at the USUHS, or in the AFHPSP and FAP, who have prior active service, including members who have had a break in service, in a pay grade with years of service greater than the rate of second lieutenant or ensign, will be authorized saved pay for the basic pay rate of the former grade. The

former basic pay rate will be increased on January 1 of each year by the average percentage increase authorized for that year. The member will continue to receive the former pay rate until the date, occurring before or after graduation or participation in the program, that the member's actual grade and years of service basic pay rate exceeds the former grade rate. This saved pay provision applies only to basic pay. The member's other pay entitlements will be paid at the member's actual grade and years of service.

3.3.4. Restrictions

3.3.4.1. Except for prior service DOM students discussed in subparagraph 3.3.3, a member entitled to saved pay is not authorized the pay for one grade and an allowance for another grade.

3.3.4.2. The saved pay amount may be reduced when the member loses entitlement to specific items. However, these specific items will be included in saved pay if the member again qualifies for such items (See subparagraph 3.3.4.7.).

3.3.4.3. In the case of the Navy or Marine Corps, a member in a temporary appointment is not entitled to saved pay because of a permanent promotion.

3.3.4.4. BAH may be continued as an item of saved pay and will be paid whenever it is not forfeited because the member is assigned to government quarters.

3.3.4.5. For enlisted members, BAS is the alternative for subsistence in kind. Since officers are not authorized subsistence in kind, a member eligible for saved pay is entitled to the appropriate BAS rate (including the "when permitted to mess separately rate" even when subsistence in kind otherwise would be provided or made available) under the conditions prevailing for enlisted members at their permanent station. Credit BAS at the "when permitted to mess separately rate" at all times, except when the member would otherwise be entitled to a different rate (See Chapter 25, paragraph 2.2.).

3.3.4.6. For appointments accepted before January 6, 2006, special duty assignment pay, incentive pay for hazardous duty, special pay for diving duty, special pay for sea duty, and hardship duty pay may be retained as an item of saved pay only for as long as the member continues to perform the duty and would be eligible to receive payment had the member remained in the former status.

3.3.4.7. For appointments accepted on or after January 6, 2006, in determining the amount of pay and allowances of a grade formerly held by an officer who was an enlisted member and accepted an appointment as an officer, the following special and incentive pays may be considered only so long as the officer continues to perform the duty that creates the entitlement to, or eligibility for, that pay and would otherwise be eligible to receive that pay in the former grade:

3.3.4.7.1. Incentive pay for hazardous duty;

3.3.4.7.2. Submarine duty pay;

3.3.4.7.3. Special pay for diving duty;

3.3.4.7.4. Hardship duty pay;

3.3.4.7.5. Career sea pay;

3.3.4.7.6. Special pay for service as a member of a Weapons of Mass Destruction Civil Support Team;

3.3.4.7.7. Assignment incentive pay;

3.3.4.7.8. Special pay for duty subject to hostile fire or imminent danger;

3.3.4.7.9. Special pay or bonus for an extension of duty at a designated overseas location;

3.3.4.7.10. Foreign language proficiency bonus; and

3.3.4.7.11. Critical skill retention bonus.

3.3.4.8. The enlisted cash clothing allowances prescribed in Chapter 29 may not be included in the saved pay computation if the officer is entitled to the initial uniform allowance prescribed in Chapter 30, section 2.0.

3.3.4.9. Family Separation for Housing (FSH) may be continued as an item of saved pay under the same conditions as BAH (see subparagraph 3.3.4.4). If the member was entitled to FSH due to an enforced separation from the member's family at the time of appointment, the allowance may be included in the computation of saved pay until the entitlement ends. FSH may be reinstated for future periods if the member again qualifies for FSH due to an enforced separation from the family. Similarly, other items of overseas station allowance and/or special or incentive pay may be reinstated if a member again qualifies for them.

3.3.4.10. Effective January 6, 2006, the following special and incentive pays are dependent on a member being in an enlisted status and may not be considered in determining the amount of pay and allowances of a grade formerly held by an officer:

3.3.4.10.1. Special duty assignment pay;

3.3.4.10.2. Reenlistment bonus;

3.3.4.10.3. Enlistment bonus; and

3.3.4.10.4. Critical skill incentive pay (see Chapter 22, section 5.0).

3.3.5. Breaks in Service. A break in service (e.g., released from active duty or discharged) does not disqualify an officer for the saved pay and allowances entitlements of this section.

3.4 Increased Basic Pay During a Period of Service Essential to the Public Interest

3.4.1. Entitlement to Increased Basic Pay. This section applies only to enlisted members of the Regular Navy or Marine Corps, or Naval or Marine Corps Reserve, whose enlistments expire while serving on a naval vessel in foreign waters.

3.4.1.1. Retention in Service. Such members may be retained on active duty until the naval vessel returns to the Continental United States (CONUS) if the period of retention is determined “service essential to the public interests.” The senior officer present afloat makes this determination.

3.4.1.2. Pay and Allowances. During the period of retention, except in time of war, members are entitled to regular pay and allowances, plus a 25-percent increase in the basic pay, to which they were entitled on the day before the period of retention began.

3.4.2. Members Not Eligible for Increase

3.4.2.1. Enlisted members are not entitled to the increased basic pay if retained on active duty after the expiration of enlistment:

3.4.2.1.1. At shore stations;

3.4.2.1.2. On ships on duty in waters in or around possessions and territories of the United States;

3.4.2.1.3. On ships on duty in ports or waters within the sovereign jurisdiction of the United States;

3.4.2.1.4. Due to lack of transportation; or

3.4.2.1.5. Merely because it is desirable to continue their services, or some benefit may be derived there from.

3.4.2.2. A member of the Naval Reserve or Marine Corps Reserve is not entitled to the 25-percent increase while retained beyond the period of obligated service as distinguished from normal date of expiration of enlistment.

3.4.3. Restrictions in Use. Do not use the 25-percent increase in computing:

3.4.3.1. Cash settlement for unused leave on discharge;

3.4.3.2. Physical disability or temporary disability retired pay;

3.4.3.3. Disability severance pay; or

3.4.3.4. Reenlistment bonus.

3.4.4. Termination of Increase in Basic Pay. The 25-percent increase in basic pay continues through date of:

3.4.4.1. Discharge, if the member is discharged within 30 days after arrival in CONUS; or

3.4.4.2. Transfer to a hospital for treatment (See Table 1-5, rule 19 for the date of termination of normal pay and allowances.).

3.5 Allowable Travel Time for Reserve Members Called to or Released From Active Duty

3.5.1. Pay and Allowances Entitlement for Allowable Travel Time

3.5.1.1. Reserve members called to active duty are entitled to active duty pay and allowances for the time allowed for necessary travel from:

3.5.1.1.1. Home to a first duty station; or

3.5.1.1.2. Last duty station to home (except when released from active duty for retirement or dismissal, when discharged, or upon resignation).

3.5.1.2. Pay and allowances for allowable travel time is an earned entitlement. The payment for the return home may be made upon the member's release from such duty without regard to actual performance of the travel. If the member dies after payment, but before payment would otherwise be due, no part of the payment will be recovered by the United States.

3.5.2. Terms and Special Conditions

3.5.2.1. Allowable travel time is considered active duty for all purposes normally ascribed to active duty. The computation of allowable travel time, whether actual or constructive will:

3.5.2.1.1. For periods of active duty of 30 days or less, be based upon the rules contained in Table 1-6; or

3.5.2.1.2. For periods of active duty of more than 30 days, be based upon the rules and provisions in Chapter 57.

3.5.2.2. A member of a Reserve Component is entitled to active duty pay and allowances for allowable travel time, if any, when:

3.5.2.2.1. Ordered to perform ADT;

3.5.2.2.2. Performing authorized IDT immediately before or after ADT at or near the same site; or

3.5.2.2.3. Receiving orders that direct performance of necessary travel to and from the ADT site immediately before and after combined ADT/IDT. The travel date will be specified in the active duty orders. Full retirement point credit is earned for the period of IDT performed.

4.0 ABSENCE FROM DUTY, EFFECT ON PAY, AND ALLOWANCES

4.1 Authorized Leave

4.1.1. Authority. All Military Service members on active duty for 30 consecutive days or more are entitled to accrue leave under applicable Military Service leave regulations. While on authorized leave, they are entitled to full pay and allowances except as otherwise provided in Table 1-11.

4.1.2. Applicable Service Leave Regulations. Applicable Military Service leave regulations are:

4.1.2.1. Army - [Army Regulation 600-8-10](#);

4.1.2.2. Navy - [Military Personnel Manual 1050-010](#);

4.1.2.3. Air Force and Space Force - Department of the Air Force Instruction [36-3003](#); and

4.1.2.4. Marine Corps - [Marine Corps Order 1050.3J](#).

4.1.3. Pay and Allowances During Leave

4.1.3.1. Entitlement. See Table 1-11.

4.1.3.2. Full Pay and Allowances Defined. This term means (includes) the following:

4.1.3.2.1. Basic pay;

4.1.3.2.2. Special pays;

4.1.3.2.3. Incentive pay for hazardous duty;

4.1.3.2.4. BAS (enlisted leave rations);

4.1.3.2.5. BAH;

4.1.3.2.6. Personal money allowances;

4.1.3.2.7. Clothing maintenance allowances;

4.1.3.2.8. Family separation allowances; and

4.1.3.2.9. Station allowances (CONUS Cost of Living Allowance (See Chapter 67); and Overseas Cost of Living Allowance and Temporary Lodging Allowance (See Chapter 68).

4.1.4. Advance Leave Carryover or Change to Excess Leave (Effective November 14, 1986)

4.1.4.1. When Carryover Allowed. Members may elect to carry all or part of an advance leave balance over to a new term of service when discharged for the purpose of:

4.1.4.1.1. Reenlisting within 24 hours of discharge or extending an enlistment; or

4.1.4.1.2. Accepting an appointment as a warrant or commissioned officer of the Armed Forces. Carryover will not exceed the number of days or fraction of days the member will accrue in the new enlistment or term of service or 30 days, whichever is less.

Example 1: A member's current term of service ends April 30, 2015. The member reenlists for 6 years on March 1, 2015, and has a 5.0-day advance leave balance. The 5.0-day advance leave balance can be carried into the new term of service.

Example 2: A member's current term of service ends September 30, 2015. On May 1, 2015, the member agrees to serve a 12-month extension and has a 12.5-day advance leave balance that will be offset by leave accrual through September 30, 2015. Between May 1, 2015, and September 30, 2015, the member was charged for 30 days of leave. When the extension became operative (October 1, 2015), the member could elect to carry the 30.0-day advance leave balance into the new term of service (12-month extension).

4.1.4.2. Excess Leave. Advance leave becomes excess leave and requires collection of pay and allowances under the following conditions:

4.1.4.2.1. Discharge for the purpose of reenlisting, extending an enlistment, or accepting a warrant or commission, and advance leave exceeds 30 days;

4.1.4.2.2. Advance leave balance exceeds that which will accrue in the new enlistment or term of service (for example, enlistment or extension(s)), including when an agreement to extend is cancelled by the Military Service. If an agreement to extend is cancelled by the member for the purpose of immediate reenlistment, collect the advance under subparagraph 4.4.1.2.1, if applicable;

4.1.4.2.3. Relief from active duty;

4.1.4.2.4. Appointment as a cadet or midshipman at a Service academy;

4.1.4.2.5. Death; or

4.1.4.2.6. Return from a period of leave that was in excess of the number of days of leave and fractions thereof that the member will accrue before the normal expiration of current enlistment or term of active service. The term of an extension(s) will be considered when determining the normal expiration of current enlistment or term of active service. Extension(s) will be considered from the date the member agrees to the extension(s). Excess leave properly charged before the date a member extends a term of service (reenlistment, appointment or agrees to extend voluntarily or is involuntarily extended) will not be affected and under no circumstances will pay and allowances previously collected be refunded (See subparagraph 4.1.5 when it is known at the time leave is granted that the member will be in excess leave status).

Example 3: A member's current term of service ended on March 31, 2016. The member reenlisted for 6 years on January 1, 2015, and had a 35.5-day advance leave balance. The member carried 30.0 days of advance leave into the new term of service. The remaining 5.5-day advance leave balance changes to excess leave and requires immediate collection of pay and allowances. Subparagraph 4.1.5 applies.

Example 4: Same as example 2, except that the member took 34 days of leave between May 1, 2015, and September 30, 2015. Since a maximum of 30.0 days of advance leave could be carried into the new term of service (12-month extension), immediate collection of pay and allowances for the remaining 4.0 days was required when the leave was used. Subparagraph 4.1.5 applies.

4.1.4.3. Amount to be Collected. Compute collection under subparagraph 4.1.4.2 on the basis of pay and allowances received by the member during the period of leave involved.

4.1.5. Pay and Allowances During Excess Leave. Members on excess leave are not entitled to pay and allowances. Apply as follows.

4.1.5.1. When the complete period of leave is granted as excess leave, pay and allowance accrual will be stopped beginning with the first day of leave.

4.1.5.2. When a portion of the leave is granted as advance leave and a portion granted as excess leave, pay and allowance accrual will be stopped beginning with the first day of excess leave. Members in an excess leave status are considered to have a rate of pay.

4.1.6. Leave Pending Review of Certain Court-Martial Convictions. Under regulations prescribed by the Secretary of the Military Department concerned, members sentenced to unsuspended dismissal or unsuspended dishonorable or bad-conduct discharge by court-martial may be required to take leave pending review of their conviction as provided by the Uniform Code of Military Justice ([UCMJ Article 76a](#)).

4.1.6.1. Such leave will be charged against any accrued leave to the member's credit on the day before the day such leave begins unless the member elects to be paid for accrued leave under Chapter 35, subparagraph 2.1.2.

4.1.6.1.1. If the member does not elect to be paid for accrued leave or does not have sufficient accrued leave to cover the total period of leave required to be taken, the leave not covered by accrued leave will be charged as excess leave.

4.1.6.1.2. If the member elects to be paid for accrued leave, the entire period of leave will be charged as excess leave and pay, and allowances will not accrue for such period except under the provisions of subparagraph 4.1.6.2.

4.1.6.2. A member required to take leave under Article 76a, UCMJ, whose sentence by court-martial to dismissal or dishonorable or bad-conduct discharge is set aside or disapproved on appellate review, will accrue pay and allowances for the period of leave charged as excess leave (except for any day of accrued leave for which the member has been paid under subparagraph 4.1.6.1.2.), unless a rehearing or new trial is ordered and dismissal or dishonorable or bad-conduct discharge results from the rehearing or new trial and such dismissal or discharge is later executed.

4.1.6.2.1. Computation of Payment. The amount of gross pay and allowances accrued under this subparagraph will be reduced by the total gross income from wages, salaries, tips, other personal service income, unemployment compensation, and public assistance benefits from any government agency during the period the member is deemed to have accrued gross pay and allowances. The total gross income, however, cannot reduce the amount of gross pay and allowances to the extent that the member becomes indebted to the government.

4.1.6.2.1.1. Approved Sentence Does Not Include Reduction. Pay and allowances under this section will be paid in the pay grade held by the member on the day before the day on which the court-martial sentence was approved by the convening authority.

4.1.6.2.1.2. Approved Sentence Includes Reductions. If the pay grade of the member was reduced to a lower grade as a result of the court-martial sentence, and the reduction has not been set aside, disapproved, or otherwise vacated, pay and allowances accrued under this paragraph will be paid at the lower pay grade.

4.1.6.2.2. Time of Payment

4.1.6.2.2.1. Payment will be made within 60 days from the date of the order setting aside or disapproving the sentence by court-martial to a dismissal or a dishonorable or bad-conduct discharge if no rehearing or new trial has been ordered.

4.1.6.2.2.2. Payment will be made within 180 days from the date of the order setting aside or disapproving the sentence by court-martial to a dismissal or a dishonorable or bad-conduct discharge if a rehearing or new trial has been ordered, but charges have not been referred to a rehearing or new trial within 120 days from the date of that order.

4.1.6.2.2.3. If a rehearing or new trial has been ordered, and a dismissal or a dishonorable or bad-conduct discharge is not included in the result of the rehearing

or new trial, payment will be made within 60 days of the date of the announcement of the result of such rehearing or new trial.

4.1.6.2.2.4. If a rehearing or new trial has been ordered, and a dismissal for a dishonorable or bad-conduct discharge is included as the result of such rehearing or new trial, but such dismissal or discharge is not later executed, payment will be made within 60-days of the date of the order which set aside, disapproved, or otherwise vacated such dismissal or discharge.

4.1.6.2.2.5. If a member who is entitled to be paid under this section fails to provide sufficient information in a timely manner regarding his/her income when such information is requested under subparagraph 4.1.6.3, the periods of time prescribed in this paragraph will be extended until 30 days after the date on which the member provides the requested information.

4.1.6.3. In all cases where payment must be made under subparagraph 4.1.6.2, the member solely is responsible for providing the information as to all sources and amounts of income received by the member during periods of required appellate leave. Pay will be computed only on the basis of a written record.

4.1.6.3.1. For periods where the member was employed, information as to all sources and amounts of income should include, at a minimum, copies of all pertinent:

4.1.6.3.1.1. Federal income tax returns;

4.1.6.3.1.2. Employer statements of income earned from wages, salaries, tips; and

4.1.6.3.1.3. Documentation of other personal service income.

4.1.6.3.2. For periods where the member has been unemployed, the member must submit an affidavit or written evidence of lack of employment and, at a minimum, copies of all pertinent:

4.1.6.3.2.1. Documentation to verify the duration of unemployment compensation;

4.1.6.3.2.2. Public assistance benefits received from any government agency;

4.1.6.3.2.3. Federal income tax returns; and

4.1.6.3.2.4. Any other documentation required by the Service concerned.

NOTE: The burden of proving the existence of a valid claim against the United States is on the member asserting the claim. A member must prove by clear and convincing evidence on the written record that the U.S. DoD is liable under the law for the amount claimed.

4.2 Unauthorized Absence and Other Lost Time

4.2.1. Effect on Pay and Allowances. The types of unauthorized absences, and other lost time, and their effect on pay and allowances are shown in Table 1-12 (Compute forfeitures of pay and allowances as instructed in subparagraph 3.2.2).

4.2.2. Unauthorized Absence and Desertion

4.2.2.1. Determination by Court-Martial. A member found guilty of unauthorized absence by a court-martial, forfeits pay and allowances for the period of absence. An acquittal (or disapproval by the reviewing authority, in case of conviction) affects only the disciplinary aspects of the absence. It does not prevent an administrative determination that the member was AWOL.

4.2.2.2. Administrative Determination of Unauthorized Absence. When a member is in an unauthorized absence status, an administrative determination must be made as to whether the absence was unavoidable. Table 1-13 contains rules for determining whether the absence was unavoidable. If it is not excused as unavoidable, the member forfeits pay and allowances for the period of absence. This applies even though a court-martial finds the member not guilty of a charge of unauthorized absence, or when a finding of guilty has been disapproved by the reviewing authority.

4.2.2.3. Discharge for Desertion. A discharge for desertion is conclusive evidence of desertion for the purpose of forfeiture of pay, even in the absence of trial by court-martial.

4.2.2.4. Dropped From Rolls. A commissioned officer of the Army or Air Force, who is dropped from the rolls by the President for absence without authority for 3 months, forfeits all pay due or to become due. Pay and allowances due at the time the officer is dropped from the rolls, however, will be used to satisfy debts due the United States and its instrumentalities.

4.2.2.5. Disposition of Forfeitures as a Result of Desertion. When an enlisted member, warrant officer, or limited duty officer forfeits pay as a result of desertion, deposit the gross amount of such forfeited pay to the Armed Forces Retirement Home Trust Fund. Do not, however, deposit this pay beyond the expiration of term of enlistment for enlisted members.

4.2.3. Computing Periods of Unauthorized Absence. Unauthorized absence of 24 consecutive hours or less does not affect pay or allowances. This applies even though the absence involves parts of 2 days. When the period of unauthorized absence exceeds 24 consecutive hours, use Table 1-14 to determine the first and last day of the period of absence.

4.2.4. Absence in the Hands of Civil Authorities

4.2.4.1. General. Pay the member all pay and allowances earned through the day before the first day of unauthorized absence. If the member is delivered to civil authorities by military authorities, he or she is entitled to all pay and allowances earned through the day prior to the date of such delivery. For entitlement to pay and allowances during confinement, see Table 1-12, rules 4, 5, and 6.

* 4.2.4.2. Finding of Insanity. An administrative determination under the rules contained in Table 1-13 must be made as to whether the absence was unavoidable when a member is found not guilty by reason of insanity by a civil court and [committed under applicable Federal or State law](#) for an indefinite period of time. Table 1-12 contains rules for determining the effect of absences on pay and allowances.

4.2.4.3. Work Release Program. In some states and local jurisdictions, a person convicted and sentenced to a term of civil confinement may be released from the confinement facility to the cognizance of an employer during the normal workday. Work release, job rehabilitation, or employment retention programs of this type generally are conducted for the purpose of providing prisoners a means to continue support of their dependents and to demonstrate that they are capable of self-rehabilitation. When members are paroled to military authorities under a “work release” or similar program, they are entitled to pay and allowances for each day of full duty performed commensurate with their grade and military specialty.

4.2.5. Absence Due to Disease

4.2.5.1. When Pay Is Forfeited. See Table 1-12, rule 3.

4.2.5.2. When Pay Is Not Forfeited. Pay is not forfeited for absence from duty caused by:

4.2.5.2.1. An injury;

4.2.5.2.2. A disease, except under Table 1-12, rule 3;

4.2.5.2.3. Simple drunkenness, if not coupled with chronic alcoholism or intemperate use of habit-forming drugs; or

4.2.5.2.4. Venereal disease, whether or not due to misconduct.

4.2.5.3. Personal Expense Money. A member whose pay is forfeited under Table 1-12, rule 3 for more than 1 month is entitled to \$5 for personal expenses for each full month that he or she forfeits pay. This payment will be made even though the member is indebted to the United States. The term “full month” is the period from a date in 1 month through the preceding date in the following month. For example, July 3 through August 2 is 1 month.

4.2.6. Military Confinement. Pay and allowances accrue to a member in military confinement except when:

4.2.6.1. Confined by military authorities, for civil authorities. See Table 1-12, rules 6 and 8;

4.2.6.2. Pay and allowances are forfeited by court-martial sentence. See Chapter 48 and Table 1-12, rule 10; and

4.2.6.3. The term of enlistment expires. See subparagraph 4.2.7.

4.2.7. Term of Enlistment Expires

4.2.7.1. General. Pay and allowances accrue to a member upon return to a full-duty status. Full duty is attained when a member, not in confinement, is assigned useful and productive duties (as opposed to duties prescribed by regulations for confinement facilities) on a full-time basis which are not inconsistent with the grade, length of service, and military occupational specialty (MOS). While placement in the same MOS is not essential, the decision to place a member in that MOS or to assign the member available duties consistent with the grade and service rests with the appropriate military commander.

4.2.7.2. Absentee Returned to Military Control. An absentee who surrenders or is apprehended after a term of enlistment has expired is not entitled to pay and allowances until restored to a full-duty status for the purpose of making good the lost time. While held in retention, a member may be assigned duties as prescribed by regulations governing detained prisoners without being returned to full-duty status.

4.2.7.3. Enlistment Expires Before Trial. An enlisted member retained in the Military Service for the purpose of trial by court-martial is not entitled to pay for any period after the expiration of the enlistment unless acquitted or the charges are dismissed, or the member is retained in or restored to a full-duty status.

4.2.7.4. Confined Awaiting Trial by Court-Martial. If a member is confined awaiting court-martial trial when the enlistment expires, pay and allowances end on the date the enlistment expires. If the member is acquitted when tried, pay and allowances accrue until discharge.

4.2.7.5. Confined Serving Court-Martial Sentence. If a member is confined serving a court-martial sentence when the enlistment expires, pay and allowances end on the date the enlistment expires unless the sentence is completely overturned or set aside as specified in Chapter 48. Pay and allowances will not accrue again until the date the member is restored to a full-duty status.

4.2.7.6. Confined While in a Status of Being Held in the Service to Make Up Lost Time. If confined while in a status of being held in the Military Service to make up lost time, an enlisted member continues in a pay status, except to the extent that pay may be forfeited by

court-martial, the same as during the regular enlistment period. This pay status terminates if the member is in confinement on the date the normal term of service as extended to make up lost time would have expired, even if restored to duty at a later date.

4.2.7.7. Confinement Deferred or Prisoner Restored to Duty. A prisoner in a non-pay status is entitled to pay and allowances when service of sentence to confinement is deferred or the member is restored to a full-duty status. The date restored to duty is the date the member reported present for duty.

4.2.7.8. Absentee Confined Upon Return to Military Control. An enlisted member whose term of enlistment has expired while in a status of absence without leave or desertion is not entitled to pay and allowances upon return to military control while confined awaiting trial and disposition of the case if the conviction becomes final and the member has not been returned to a full-duty status. A member, however, who is returned to military control and restored to full duty for the purpose of making good the lost time before being confined to await trial, continues in a pay status except to the extent that pay may be forfeited by court-martial, the same as during the regular enlistment period. This pay status terminates if the member is in confinement on the date the normal term of service is extended to make up lost time would have expired, even if he or she is restored to duty at a later date.

4.2.7.9. Confined Under Sentence of Death. The pay and allowances of a member, serving in confinement under sentence of death and pending completion of the appellate review of the record of trial, do not accrue after the expiration of the enlistment.

4.2.7.10. Appellate Review of Court-Martial Sentence. A confined member who is pending appellate review of his or her court-martial sentence is not entitled to pay and allowances after the expiration of term of enlistment, unless the conviction is completely overturned or set aside.

4.2.8. Reserve Officer Absent From Duty. A Reserve officer whose term of active service expires while confined as a result of court-martial action continues to be entitled to pay and allowances, except when forfeited under an approved sentence of a court-martial or a period of service is terminated by proper orders.

5.0 PAYMENT IN CASES OF VOID, VOIDABLE, OR REJECTED ENLISTMENTS OR INDUCTIONS

5.1 Voidability of Contract

A fraudulent contract of enlistment or induction is not void but is voidable at the option of the government. When the government becomes aware of the fraud, it may void the contract or waive the objection and allow the contract to stand (See Table 1-15.).

5.2 Fraudulent Enlistments – Pay and Allowances

Members under investigation, or determined to be serving in fraudulent enlistments, are due pay and allowances for periods shown in Table 1-15.

5.3 Travel Payments

See [Joint Travel Regulation](#), Chapter 5, Paragraph 051007.

5.4 Disbursing Officer Entitled to Credit

A disbursing officer is entitled to credit for proper payments to a member who fraudulently enlisted if payments were made without the knowledge of the fraud and before the government rescinded the contract.

5.5 Failure to Discover Physical Condition of Enlistee or Inductee

Failure to discover that the physical condition of an enlistee or inductee was such as would warrant rejection for military service does not deprive member of right to pay and allowances or of the status of being entitled to basic pay (See Table 1-15.).

6.0 FINANCIAL INSTITUTION CHARGES

6.1 Reimbursement

Reimbursement of financial institution charges may be authorized. Authorized reimbursements are limited to overdraft charges or minimum balance, or average balance charges levied by the financial institution because of an administrative or mechanical error on the part of the government that causes pay to be deposited late or in an incorrect manner or amount.

6.2 Non – Reimbursement

Charges by financial institutions resulting from erroneous information provided by the member or the financial institution to a military pay office are not the liability of the government and will not be reimbursed.

6.3 Definitions

6.3.1. Financial Institutions. For the purpose of this section, a financial institution is defined as a bank, savings and loan association, or similar institution or a credit union chartered by the United States or a state.

6.3.2. Pay. For the purpose of this section, pay is defined as basic pay, allowances, bonuses, special and incentive pays.

7.0 MILITARY PAYDAYS

7.1 Payday

The payday is the first calendar day of the month after the month in which the entitlement was earned. This does not preclude one payment in midmonth for any element of compensation.

7.2 Exception

Except for payrolls otherwise payable on October 1, if the payday falls on a Saturday, Sunday, or federal legal holiday, payment is authorized on the preceding workday, but not more than 3 days before the scheduled payday. This exception applies to foreign holidays recognized abroad by U.S. Forces. It also applies to payments made to members upon separation from the Military Service through retirement or discharge when the last day of active duty falls on a Saturday, Sunday, or federal legal holiday.

7.3 Determination

For payrolls otherwise payable on October 1, the DoD Comptroller will determine if the payroll may be dated in September.

Table 1-1. Service as Cadet or Midshipman - Officers

R U L E	When a member currently serving as an officer has had service as a cadet or midshipman in	to which appointed	and member	then the period involved is
1	any of the military academies		held no concurrent enlisted and/or Reserve status	not creditable.
2	any of the military academies	after June 25, 1956	had an enlistment contract or period of obligated service that was not terminated	not creditable.
3	any of the military academies		concurrently retained a commission or warrant in the Army or Air Force Reserve	creditable.
4	any of the military academies	on or after January 1, 1953	concurrently retained a commission or warrant in the Naval Reserve	creditable.

Table 1-2. Absence from Duty in Enlisted Status

R U L E	When the absence is	and	then the period of absence is
1	authorized leave or authorized excess leave		creditable.
2	unauthorized absence of more than 1 day (24 consecutive hours) (including detention of Army or Air Force members by or for civil authorities)	is administratively excused as unavoidable	creditable.
3	unauthorized absence of more than 1 day (24 consecutive hours) (including detention of Army or Air Force members by or for civil authorities)	is not administratively excused as unavoidable	not creditable (note 1).
4	civil detention of a Navy or Marine Corps member	occurred before July 24, 1956, and the member was not acquitted or released without trial, and without making restitution	not creditable (note 1).
5	civil detention of a Navy or Marine Corps member	occurred on or after July 24, 1956, and the member was absent under sentence or awaiting (and during) trial which resulted in conviction (note 2)	not creditable (note 1).
6	inability to perform duty for more than 1 day (24 consecutive hours) because of intemperate use of alcohol or drugs, or disease or injury resulting from misconduct		not creditable (note 1).
7	desertion		not creditable (note 1).
8	because of confinement for more than 1 day (24 consecutive hours) while awaiting trial (if the trial results in conviction) or confinement as the result of a court-martial sentence (note 3)	the member was a member of the Army or Air Force	not creditable (note 1).
9	absence of a Navy or Marine Corps member because of confinement of more than 1 day (24 consecutive hours) while awaiting trial (if the trial results in conviction) or confinement as the result of a court-martial sentence	the confinement occurred on or after July 24, 1956 (note 3)	not creditable (note 1).
10	absence of a Navy or Marine Corps member because of confinement of more than 1 day (24 consecutive hours) while awaiting trial (if the trial results in conviction) or confinement as the result of a court-martial sentence	the confinement occurred before July 24, 1956	(note 4).

Table 1-2. Absence from Duty in Enlisted Status (Continued)

NOTES:

1. Prior to February 11, 1996, absence during which a member was serving on active duty as an enlisted member and was also a Reserve officer is creditable. After February 10, 1996, a commissioned or warrant officer may not count the periods of absence for any purpose other than for computing length of service for basic pay. Also, see subparagraph 2.2.2.
2. If the member is released without trial or acquitted, or if conviction is set aside on legal grounds (as distinguished from clemency), the period of absence is creditable. If the member is released upon agreement to make restitution, or is later convicted by court-martial on the same facts, the period of absence is not creditable.
3. The period spent in confinement is creditable when the member is acquitted, or the sentence is set aside or disapproved.
4. The period of absence is not creditable only if the confinement was under general court-martial sentence and/or while waiting (and during) trial which resulted in a sentence by a general court-martial to confinement and total loss of pay and allowances.

Table 1-3. When Active Duty Pay Begins

R U L E	When a person is	in the	and	then active duty pay and allowances	
				begin on:	are authorized for:
1	originally appointed as a permanent officer	Regular Army, Navy, Air Force, or Marine Corps (note 1)		the date of formal acceptance of appointment (see subparagraph 3.1.3).	
2	an enlisted member temporarily appointed to a warrant or commissioned officer grade	Navy or Marine Corps		the date of formal acceptance of appointment (see subparagraph 3.1.3).	
3	an enlisted member or warrant officer on active duty appointed to a commissioned officer grade under 10 U.S.C. § 12201	Reserve	continues on active duty in that commissioned officer grade	the date of formal acceptance of appointment (see subparagraph 3.1.3).	
4	enlisted, reenlisted, or inducted	Regular Army, Navy, Air Force, or Marine Corps		the date of enlistment, reenlistment, or induction.	
5	a service academy graduate commissioned as a second lieutenant or ensign	Regular Army or Air Force		the date of graduation (note 2).	
6	a service academy graduate commissioned as a second lieutenant or ensign	Regular Navy or Marine Corps		the date of formal acceptance of appointment.	
7	a reserve or retired member called or recalled to active duty	Regular Army, Navy, Air Force, or Marine Corps		the date member necessarily complies with active duty order (note 3).	

Table 1-3. When Active Duty Pay Begins (Continued)

R U L E	When a person is	in the	and	then active duty pay and allowances	
				begin on:	are authorized for:
8	a temporary officer (without component) called to active duty	Army or Air Force		the date member necessarily complies with active duty orders (note 3).	
9	a reserve or retired member ordered to active duty to take a physical examination incident to being ordered to active duty for more than 30 days	Regular Army, Navy, Air Force, or Marine Corps		the date member necessarily complies with active duty orders (note 3).	period of the examination, and allowable travel time in connection therewith (notes 3, 4, 5, and 6).
10	an Army National Guard or Air National Guard member called into federal service	Army or Air Force	the period of federal service is 30 days or less	the date on which the member, in person or by authorized telephonic or electronic means, contacts the member's unit.	
11	an Army National Guard or Air National Guard member called into federal service	Army or Air Force	the period of federal service is more than 30 days or an indefinite period	the date member necessarily complies with active duty orders (notes 3 and 7).	
12	a separated Service academy cadet required to serve a period of enlisted active duty	Regular Army, Navy, Air Force, or Marine Corps		the date following date of approval of cadet's separation from the academy.	

Table 1-3. When Active Duty Pay Begins (Continued)

NOTES:

1. Original appointments include officers appointed from warrant officer, enlisted member, or civilian status.
2. Pay accrues from date of graduation, even though appointment is issued and accepted at later date.
3. See paragraph 3.5 and Table 1-6 for allowable travel time to include in computation. Pay and allowances do not accrue if the member begins travel or reports earlier than the travel time necessary to comply with the active duty orders.
4. If member passes the physical examination, pay and allowances accrue for travel time to first duty station when later ordered to active duty for more than 30 days.
5. If the member fails the physical examination, pay and allowances accrue for period required for the examination and travel time to and from the examination.
6. If the member is ordered to active duty solely to take a physical examination, not incident to being ordered to active duty, active duty pay, and allowances do not accrue.
7. Pay status does not begin if the Army National Guard or Air National Guard member is unable to respond to the call to active duty because of illness or other reason.

Table 1-4. Increases in Pay on Promotion or Restoration of Grade

R U L E	When member is a(n)	and action is	in the	and	then effective date of increase in pay and allowances
1	officer	designation of special assignment under <u>10 U.S.C. § 601(a)</u>	Army, Air Force, or Marine Corps as General or Lt General; or Navy as Admiral or Vice Admiral		is the date officer assumes the designated duty (note 1).
2	Reserve officer not on the active duty list	promotion to grade above O-2	Navy or Marine Corps		is the date officer becomes eligible for promotion to the higher grade.
3	Reserve officer not on the active duty list	promotion to grade O-2	Navy or Marine Corps		is the date of rank.
4	officer	promotion to grade above O-1	Uniformed Services		is the effective date of the promotion.
5	Reserve officer on active duty (other than for training) (but not on the active duty list)	permanent promotion to a higher Reserve grade	Army or Air Force	officer is ordered to serve on active duty in the higher permanent Reserve grade	is the effective date of orders to serve on active duty in the higher permanent Reserve grade (note 2).
6	Reserve officer on active duty (other than for training) (but not on the active duty list)	permanent promotion to a higher Reserve grade	Army or Air Force	officer is serving on active duty and assigned to a position requiring a grade equal to or higher than the grade to which promoted	is the effective date of orders or letter announcing promotion (note 3).
7	Reserve officer on active duty (other than for training) (but not on the active duty list)	temporary promotion to a higher Reserve grade	Army or Air Force	officer is serving on active duty and assigned to a position requiring a grade equal to or higher than the grade to which promoted	is the effective date of orders announcing promotion; or date shown in special orders confirming verbal orders.
8	enlisted member	advancement in rank or rating	Navy	effective date is specified in the letter authorizing the advance	is the effective date as stated, or date of the letter, whichever is later (note 4).

Table 1-4. Increases in Pay on Promotion or Restoration of Grade (Continued)

R U L E	When member is a(n)	and action is	in the	and	then effective date of increase in pay and allowances
9	enlisted member	advancement in rank or rating	Navy	effective date is not stated in letter	is the date advance was actually affected, but not before date member's commander receives the authority (note 4).
10	enlisted member	advancement in rank or rating	Marine Corps	effective date is specified in the directive authorizing the advance	is the effective date as stated in the directive or date of the directive, whichever is later (note 4).
11	enlisted member	advancement in rank or rating	Marine Corps	promotion is not effected by directive	is the date certificate of appointment is signed by issuing authority (note 4).
12	enlisted member	appointment or promotion to a higher grade	Army or Air Force		1. is the date cited in orders, or date of orders, whichever is later (note 5); or 2. is the date of oral appointment or promotion, if later confirmed in writing (note 4).
13	enlisted member	restoration of former grade		reason for reduction was non-judicial punishment	may be retroactive to date of reduction.
14	enlisted member	restoration of former grade		reason for reduction was inefficiency	is the date of restoration orders.

Table 1-4. Increases in Pay on Promotion or Restoration of Grade (Continued)

NOTES:

1. If the officer's assignment is terminated because of:
 - a. Assignment to another position also designated a special assignment: the officer will continue to draw the pay rate of the terminated assignment through the day before assuming the new position.
 - b. Hospitalization: the officer will continue to draw the pay rate of the terminated assignment for the full period of hospitalization, but for not more than 180 days.
 - c. Retirement: the officer will continue to draw the pay rate of the terminated position through the day before retirement, but for not more than 90 days.
2. A retroactive amendment of active duty orders is authority to serve in the higher grade from date of the amendment only. Increased pay and allowances are authorized from that date. Such orders do not create entitlement to increased pay and allowances for the retroactive period.
3. A retroactive promotion date is to be used only for consideration of seniority and time in grade for future promotions. Such orders do not create entitlement to increased pay and allowances for the period between the eligibility date for promotion and the effective date of the promotion order or letter. The effective date of promotion for purposes of entitlement to increased pay and allowances must not be earlier than the date the officer is assigned to a position requiring a grade equal to or higher than the grade to which promoted.
4. An appointment, promotion, or advancement to a higher grade with an effective date beyond the expiration date of the current enlistment and which is contingent upon the member's extension of enlistment or reenlistment, entitles the member to increased pay and allowances from the effective date of extension or reenlistment, whichever is later. Payment for the higher rank or rating is not authorized for a period prior to date of current enlistment.
5. This restriction does not prevent payment to enlisted members for retroactive promotions or advancements that are made pursuant to [10 U.S.C. § 1552](#)(a)(2) (retroactive promotion or advancement without decision of the Board for Correction of Military Records), effective October 23, 1992.

Table 1-5. Termination or Reduction of Active Duty Pay and Allowances

R U L E	If member is in the	and status is an	and action is	and reason for retention is	then pay and allowances are authorized through date
1	Regular Army, Navy, Marine Corps, or Air Force	officer holding permanent appointment	resignation, discharge, or dismissal		1. shown as official date of separation in official notice; or 2. officer receives official notice, if no official date of separation is shown (note 1).
2	Regular Army, Navy, Marine Corps, or Air Force	officer holding temporary appointment or promotion	discharge or dismissal from permanent status		of termination of appointment.
3	Regular Army, Navy, Marine Corps, or Air Force	officer holding temporary appointment or promotion	resignation		of termination of appointment.
4	Regular Army, Navy, Marine Corps, or Air Force	officer holding temporary appointment or promotion	transfer to Fleet Reserve, or Fleet Marine Corps Reserve (note 2)		before date placed on the retired list.
5	Regular Army, Navy, Marine Corps, or Air Force	officer holding temporary appointment or promotion	involuntary retirement under Officer Personnel Act of 1947		before date placed on the retired list.
6	Regular Army, Navy, Marine Corps, or Air Force	officer holding temporary appointment or promotion	retirement on last day of month after month member completed 30 years of active service		before date placed on the retired list.
7	Regular Army, Navy, Marine Corps, or Air Force	officer holding temporary appointment or promotion	retirement, other than as shown in rules 5 and 6; includes physical disability retirement		before date placed on the retired list.
8	Regular Army, Navy, Marine Corps, or Air Force	officer holding temporary appointment or promotion	permanent appointment as an officer		before date of acceptance of permanent appointment.

Table 1-5. Termination or Reduction of Active Duty Pay and Allowances (Continued)

R U L E	If member is in the	and status is an	and action is	and reason for retention is	then pay and allowances are authorized through date
9	Regular Army, Navy, Marine Corps, or Air Force	officer holding temporary appointment or promotion	termination of appointment for any other reason		of termination of appointment.
10	Army, Navy, Marine Corps, or Air Force Reserve	officer or enlisted member	release from active duty		of allowable travel time after release (see Table 1-6).
11	Army, Navy, Marine Corps, or Air Force Reserve	officer or enlisted member	release from active duty for retirement		before date placed on retired list.
12	Army, Navy, Marine Corps, or Air Force Reserve	officer or enlisted member	discharge, dismissal, or a resignation		shown in official separation notice, or date member receives official notice of separation.
13	Army, Navy, Marine Corps, or Air Force	enlisted member	retirement (including physical disability retirement)		before date placed on retired list.
14	Army, Navy, Marine Corps, or Air Force	enlisted member	transfer to Fleet Reserve or Fleet Marine Corps Reserve		of transfer.
15	Army, Navy, Marine Corps, or Air Force	enlisted member	discharge		of discharge (note 3).
16	Army, Navy, Marine Corps, or Air Force	enlisted member	retention in service after expiration of term of service (note 4)	convenience of the government	of the period of retention.
17	Army, Navy, Marine Corps, or Air Force	enlisted member	retention in service after expiration of term of service (note 4)	to make good lost time	of the period of retention, if retained in full-duty status or if authorized to perform duty.

Table 1-5. Termination or Reduction of Active Duty Pay and Allowances (Continued)

R U L E	If member is in the	and status is an	and action is	and reason for retention is	then pay and allowances are authorized through date
18	Army, Navy, Marine Corps, or Air Force	enlisted member		probation after confinement	of the probation period, if duty is performed during such period.
19	Army, Navy, Marine Corps, or Air Force	enlisted member		medical care or hospitalization (with member's consent)	of release from medical care or hospitalization (note 5).
20	Army, Navy, Marine Corps, or Air Force	enlisted member		service is essential to public interest (see paragraph 3.4)	of discharge (note 6).
21	Army, Navy, Marine Corps, or Air Force	enlisted member		court-martial action	see subparagraph 4.2.7.
22	Army, Navy, Marine Corps, or Air Force	enlisted member	demotion (administrative)		before date of demotion orders at the higher rate; and at the reduced rate on and after date of demotion orders.
23	Army, Navy, Marine Corps, or Air Force	officer or enlisted member	death		of death.
24	Army, Navy, Marine Corps, or Air Force	officer or enlisted member	revoking a promotion (erroneous promotion through administrative error)		before date of discovery at the higher rate; at the reduced rate on or after date of discovery (note 7).
25	Army, Navy, Marine Corps, or Air Force	officer or enlisted member	retirement	late delivery of retirement orders	retirement orders are delivered, or member is notified that retirement orders were issued.

Table 1-5. Termination or Reduction of Active Duty Pay and Allowances (Continued)

NOTES:

1. Discharge orders do not relieve the government of its obligation to an officer. The officer must have received actual or constructive notice by the effective date, unless the officer willfully avoids notice of separation. If kept in Military Service without fault, in ignorance of an order of dismissal, the officer is entitled to all salaries and benefits of the office. If held in Military Service under orders after the date shown in separation orders, the officer is entitled to pay if there is nothing in the records showing non-entitlement.
2. A member who reverts from a temporary officer appointment to a permanent enlisted or warrant officer grade is entitled, if otherwise proper, to the active duty pay and allowances of the temporary officer grade through and including the date of reversion.
3. Includes discharge for underage enlistment. Does not include discharge for fraudulent contract of enlistment (See section 5.0.).
4. A member whose enlistment is extended involuntarily by law comes under rule 15, not rules 16-21.
5. If medical care or hospitalization was due to member's misconduct, pay and allowances terminate on date of expiration of term of Military Service.
6. See subparagraph 3.4.4 for date of termination of the 25 percent increase in basic pay.
7. An erroneous promotion is later voided by revoking promotion orders (certificates of appointment or other documents used by the Military Service concerned to administratively [effect](#) promotions) from the original effective date. Payment of the pay and allowances of the higher grade through the date prior to the date of discovery is contingent, in each case, upon an administrative determination of the commander, that service performed while serving in the higher grade may be regarded as service performed in a "de facto" status; that is, the member was promoted by competent authority and performed duties of the higher grade (See procedural regulations of the Military Service concerned).

Table 1-6. Allowable Travel Time – Travel Between Places Within the United States

R U L E	If order to active duty is for	and travel by (note 1)	then travel time allowed is	using (notes 3 and 4).
1	30 days or less	all transportation is reasonably available	computed on the basis of air transportation (not more than 1 day for travel between places within the CONUS) (note 2)	actual commercial air schedules and including the actual or estimated time to travel to and from air terminal(s) (but not more than 2 hours for each trip).
2	30 days or less	air transportation is not reasonably available for entire travel	computed as if actually performed by public surface transportation	actual schedules of fastest available mode.

NOTES:

1. When the air terminal is within 50 miles of the active duty station and direct or connecting flights are obtainable within 50 miles of the place from which ordered to active duty.
2. Additional time may be allowed when there is an actual delay in air travel. The delay must have been due to reasons beyond the control of the member, such as mechanical failure, adverse weather conditions, excess passenger load, cancelled flights, illness of other passengers, or other circumstances.
3. Travel is not expected to start or end between midnight and 0600.
4. Travel days will not exceed the computed travel time. In the computation of travel time, use existing commercial schedules to determine the latest departure time that would permit arrival at the duty station on the reporting date and hour. On release from active duty, use earliest schedule after release, which would permit arrival home by fastest available means, without regard to actual performance of travel. A member of a Reserve Component is entitled to active duty pay and allowances for allowable travel time per subparagraph 3.5.2 when member:
 - a. is ordered to perform ADT;
 - b. performs authorized IDT immediately before or after ADT at or near the same site; and
 - c. receives orders, which direct performance of necessary travel to and from the ADT site immediately before and after combined ADT/IDT. The travel date will be specified in the active duty orders. Full retirement point credit is earned for the period of IDT performed.

Table 1-7. Monthly Rates of Basic Pay – Commissioned Officers, Academy Cadets and Midshipmen and ROTC Members - Effective January 1, 2024 (Continued)

NOTES:

1. Basic pay rate for Academy Cadets/Midshipmen and ROTC members/applicants is [\\$1,339.50](#).
2. The amount of the maximum combat zone tax exclusion in effect for a qualifying month equals the sum of the basic pay for the senior enlisted member payable (Table 1-10, note 3) and the maximum amount of hostile fire or imminent danger pay (\$225) actually payable to the officer for the qualifying month.
3. For rank titles, see Volume 7A Comparable Grades.
4. Basic pay is limited to the rate of basic pay for level II of the Executive Schedule in effect during calendar year [2024](#), which is [\\$18,491.70](#) per month for officers at pay grades O-7 through O-10. This includes officers serving as:
 - a. Chairman or Vice Chairman of the Joint Chiefs of Staff;
 - b. Chief of Staff of the Army;
 - c. Chief of Naval Operations;
 - d. Chief of Staff of the Air Force;
 - e. Commandant of the Marine Corps;
 - f. Chief of Space Operations;
 - g. Commandant of the Coast Guard;
 - h. Chief of the National Guard Bureau; or
 - i. Commander of a unified or specified combatant command (as defined in [10 U.S.C. § 161\(c\)](#)).
5. Basic pay for pay grades O-6 and below is limited to the rate of basic pay for Level V of the Executive Schedule during calendar year [2024](#), which is [\\$15,000.00](#).
6. O-1, O-2, and O-3 rates do not apply to commissioned officers who have been credited with over 4 years (i.e., at least 4 years and 1 day) of active duty service as an enlisted member or as a warrant officer or as both an enlisted member and a warrant officer.
7. These rates or, when applicable, the O-1E rates in Table 1-8 apply during periods of active service while as a DOM student of the USUHS. Also see subparagraph 2.2.1.6.

Table 1-7A. Monthly Rates of Basic Pay – Commissioned Officers, Academy Cadets and Midshipmen and ROTC Members - Effective January 1, 2025 (Continued)

NOTES:

1. Basic pay rate for Academy Cadets/Midshipmen and ROTC members/applicants is [\\$1,399.80](#).
2. The amount of the maximum combat zone tax exclusion in effect for a qualifying month equals the sum of the basic pay for the senior enlisted member payable (Table 1-10A, note 3) and the maximum amount of hostile fire or imminent danger pay (\$225) actually payable to the officer for the qualifying month.
3. For rank titles, see Volume 7A Comparable Grades.
4. Basic pay is limited to the rate of basic pay for level II of the Executive Schedule in effect during calendar year [2025](#), which is [\\$18,808.20](#) per month for officers at pay grades O-7 through O-10. This includes officers serving as:
 - a. Chairman or Vice Chairman of the Joint Chiefs of Staff;
 - b. Chief of Staff of the Army;
 - c. Chief of Naval Operations;
 - d. Chief of Staff of the Air Force;
 - e. Commandant of the Marine Corps;
 - f. Chief of Space Operations;
 - g. Commandant of the Coast Guard;
 - h. Chief of the National Guard Bureau; or
 - i. Commander of a unified or specified combatant command (as defined in [10 U.S.C. § 161\(c\)](#)).
5. Basic pay for pay grades O-6 and below is limited to the rate of basic pay for Level V of the Executive Schedule during calendar year [2025](#), which is [\\$15,258.30](#).
6. O-1, O-2, and O-3 rates do not apply to commissioned officers who have been credited with over 4 years (i.e., at least 4 years and 1 day) of active duty service as an enlisted member or as a warrant officer or as both an enlisted member and a warrant officer.
7. These rates or, when applicable, the O-1E rates in Table 1-8 apply during periods of active service while as a DOM student of the USUHS. Also see subparagraph 2.2.1.6.

*Table 1-8. Monthly Rates of Basic Pay – Commissioned Officers Credited With Over 4 Years of Active Duty Enlisted and/or Warrant Officer Service - Effective January 1, 2024

For the most current rates, see Basic Pay table on DFAS.MIL.

NOTES:

1. The amount of the maximum combat zone tax exclusion in effect for a qualifying month equals the sum of the basic pay for the senior enlisted member (grade E-9) payable (Table 1-10, note 3) and the amount of hostile fire or imminent danger pay (\$225) actually payable to the officer for the qualifying month.
2. For rank titles, see Volume 7A Comparable Grades.
3. Creditable service to be taken into account for purposes of this table is active service as an enlisted member or as a warrant officer or as both an enlisted member and a warrant officer, in the case of a commissioned officer on active duty who is paid from funds appropriated for active-duty personnel; or a commissioned officer on active Guard and Reserve duty. Effective November 24, 2003, creditable service to be taken into account for purposes of this table in the case of a commissioned officer is service as an enlisted member or as a warrant officer, or as both an enlisted member and a warrant officer, for which more than 1,460 points have been credited to the officer for the purposes of 10 U.S.C. § 12732(a)(2).
4. These rates do not apply to DOM students of the USUHS who do not have over 4 years (i.e., at least 4 years and 1 day) of active duty service as an enlisted member or as a warrant officer or as both an enlisted member and a warrant officer. See the Basic Pay – Officers table for applicable rates. DOM USUHS students with over 4 years of prior enlisted and/or warrant officer service are entitled to the O-1E rate of basic pay in this table during such active duty periods. Also see subparagraphs 2.2.1.6.

*Table 1-8A. Monthly Rates of Basic Pay – Commissioned Officers Credited With Over 4 Years of Active Duty Enlisted and/or Warrant Officer Service - Effective January 1, 2025

For the most current rates, see Basic Pay table on DFAS.MIL.

Table 1-10. Monthly Rates of Basic Pay – Enlisted Members Effective January 1, 2024
(Continued)

NOTES:

1. For rank titles, see Volume 7A Comparable Grades.
2. Basic pay for senior enlisted member (grade E-9) is \$10,294.80 regardless of years of service while serving as:
 - a. Senior Enlisted Advisor of the Chairman, Joint Chiefs of Staff;
 - b. Sergeant Major of the Army;
