Note 1. Significant Accounting Policies**1.A. Basis of Presentation**

These financial statements have been prepared to report the financial position and results of operations of the Military Retirement Fund (MRF), as required by the *Chief Financial Officers (CFO) Act of 1990*, expanded by the *Government Management Reform Act of 1994*, and other appropriate legislation. These financial statements have been prepared from the books and records of MRF in accordance with the *Department of Defense (DoD) Financial Management Regulation*; the Office of Management and Budget (OMB) Circular A-136, *Financial Reporting Requirements*; and, to the extent possible, generally accepted accounting principles (GAAP). Effective 4th Quarter, fiscal year (FY) 2006, DoD no longer publishes consolidating/combined financial statements. The accompanying financial statements account for all resources for which the MRF is responsible.

1.B. Mission of the Reporting Entity

The mission of MRF is to accumulate funds in order to finance, on an actuarially sound basis, the liabilities of DoD military retirement and survivor benefit programs. The MRF provides retirement benefits after a military career, survivor benefits for eligible survivors of deceased retirees, and a special compensation program for certain disabled retirees.

1.C. Appropriations and Funds

The Defense Authorization Act of 1984, Public Law 98-94 authorized MRF and provided a permanent indefinite appropriation. This type of appropriation provides budget authority of an unspecified amount of money that is available as a result of previously enacted legislation and which does not require new legislation for the current year. The MRF is a pension program for the payment of pensions to retired military personnel and annuities to their survivors. The DoD Retirement Board of Actuaries determines the amount of the contributions made to MRF. The DoD contribution is a percentage of basic pay. The U.S. Treasury makes an annual contribution at the beginning of the year which consists of two parts: an unfunded amortization payment and a normal cost amount for the concurrent receipt provisions for certain disabled retirees. Excess funds from the contributions are invested and accrued interest revenue is used to cover future liabilities of MRF.

The MRF is a non-revolving trust fund. Trust Funds contain receipts and expenditures of funds held in trust by the government for use in carrying out specific purposes or programs in accordance with the terms of the donor, trust agreement, or statute.

All appropriations and funds received by MRF are considered earmarked funds. Earmarked funds are financed by specifically identified revenues; required by statute to be used for designated activities, benefits, or purposes; and remain available over time. Earmarked Funds also have a requirement to account for and report on the receipt, use, and retention of revenues and other financing sources that distinguish them from general revenues.

1.D. Basis of Accounting

Although MRF has earned an unqualified opinion on its financial statements, the financial system did not meet all of the requirements for full accrual accounting. The MRF financial system and processes were designed and implemented before the issuance of GAAP for federal agencies and, therefore, do not collect and record financial information on the full accrual basis as required by GAAP. This legacy system was designed to record information on a proprietary basis. The MRF and Defense Finance and Accounting Service (DFAS) have established manual controls to work around these system issues. For example, the accounting office establishes the budgetary account balances from information contained in the proprietary accounts.

The DoD has undertaken efforts to determine the actions required to bring its financial and nonfinancial feeder systems and processes into compliance with GAAP. One such action is the current revision of its accounting systems to record transactions based on the U.S. Standard General Ledger (USSGL). Until the MRF's financial system and processes are updated to collect and report financial information as required by GAAP, MRF's data will be based on proprietary transactions and adjustments for known accruals of major items such as accounts receivable and payroll payables.

In addition, DoD identifies program costs based upon the major appropriation groups provided by the Congress. Current processes and systems do not capture and report accumulated costs for major programs based upon the performance measures as required by the *Government Performance and Results Act*. The DoD is in the process of reviewing available data and attempting to develop a cost reporting methodology that balances the need for cost information required by the Statement of Federal Financial Accounting Standards (SFFAS) No. 4, *Managerial Cost Accounting Concepts and Standards for the Federal Government*, with the need to keep the financial statements from being overly voluminous.

1.E. Revenues and Other Financing Sources

Financing sources for MRF are provided primarily through monthly Military Service contributions as a percentage of basic pay, annual unfunded amortization and concurrent receipt accrual payments from the U.S. Treasury, and interest earned on investments.

1.F. Recognition of Expenses

For financial reporting purposes, DoD policy requires the recognition of operating expenses in the period incurred. However, because MRF's financial system was not designed to collect and record financial information on the full accrual accounting basis, accrual adjustments are made for major items such as accounts receivable and payroll payables.

1.G. Accounting for Intragovernmental Activities

Preparation of reliable financial statements requires the elimination of transactions occurring among entities within DoD or between two or more federal agencies. Seller entities within DoD provide summary seller-side balances for revenue, accounts

receivable, and unearned revenue to the buyer-side internal DoD accounting offices. In most cases, the buyer-side records are adjusted to agree with DoD seller-side balances. IntraDoD intragovernmental balances are then eliminated. The MRF is able to reconcile its records and no adjustments are needed.

The U.S. Treasury Financial Management Service is responsible for eliminating transactions between DoD and other federal agencies. The U.S. Treasury Financial Manual, Part 2 - Chapter 4700, *Agency Reporting Requirements for the Financial Report of the United States Government*, and U.S. Treasury's *Federal Intragovernmental Transactions Accounting Policy Guide*, provide guidance for reporting and reconciling intragovernmental balances.

The MRF is able to reconcile balances pertaining to investments in federal securities. The DoD's proportionate share of public debt and related expenses of the Federal Government is not included. The Federal Government does not apportion debt and its related costs to federal agencies. The DoD's financial statements, therefore, do not report any portion of the public debt or interest thereon, nor do the statements report the source of public financing whether from issuance of debt or tax revenues.

1.H. Transactions with Foreign Governments and International Organizations

N/A

1.I. Funds with the U.S. Treasury

The U.S. Treasury allows MRF to be fully invested. Therefore, the Fund Balance With Treasury (FBWT) may be zero at various times during the fiscal year including the end of a quarter or a fiscal year.

The MRF's monetary financial resources are maintained in U.S. Treasury accounts. The disbursing offices of DFAS, the Military Services, and other Federal Governmental financial service centers process the majority of MRF's cash collections, disbursements, and adjustments worldwide. Each disbursing station prepares monthly reports that provide information to the U.S. Treasury on check issues, electronic fund transfers, interagency transfers, and deposits.

In addition, DFAS sites submit reports to U.S. Treasury, by appropriation, on interagency transfers, collections received, and disbursements issued. The U.S. Treasury records this information to the applicable FBWT account. Differences between MRF's recorded balance in FBWT and Treasury's FBWT accounts sometimes result and are subsequently reconciled.

1.J. Foreign Currency

N/A

1.K. Accounts Receivable

As presented in the Balance Sheet, accounts receivable includes accounts, claims, and refunds receivable from other federal entities or from the public. The MRF calculates allowances for uncollectible accounts due from the public using the General Reserve

Method. Under this method, a reserve is based on the age of debts and bad debt experience.

1.L. Direct Loans and Loan Guarantees

N/A

1.M. Inventories and Related Property

N/A

1.N. Investments

The MRF reports investments in U.S. Treasury securities at cost, net of amortized premiums or discounts (book value). Premiums or discounts amortize into interest income over the term of the investment using the effective interest rate method. The MRF's intent is to hold investments to maturity, unless they are needed to finance claims or otherwise sustain operations. Consequently, a provision is not made for unrealized gains or losses on these securities.

The MRF invests in two types of nonmarketable securities. The two types are par value and market-based intragovernmental securities. The Bureau of Public Debt issues nonmarketable par value intragovernmental securities. Nonmarketable, market-based intragovernmental securities mimic marketable securities but are not traded publicly.

The MRF receives interest on the value of its nonmarketable, market-based securities from U.S. Treasury on a semi-annual basis for U.S. Treasury bonds and notes.

1.O. General Property, Plant and Equipment

N/A

1.P. Advances and Prepayments

It is DoD policy to record payments in advance of the receipt of goods and services as advances or prepayments and report the advances as an asset on the Balance Sheet, and to recognize the expense and/or proper asset classification when they receive the related goods and services.

1.Q. Leases

N/A

1.R. Other Assets

N/A

1.S. Contingencies and Other Liabilities

The SFFAS No. 5, *Accounting for Liabilities of the Federal Government*, as amended by SFFAS No. 12, *Recognition of Contingent Liabilities Arising from Litigation*, defines a contingency as an existing condition, situation, or set of circumstances that involves an uncertainty as to possible gain or loss. The MRF recognizes contingent liabilities when past events or exchange transactions occur, a future loss is probable, and the loss amount can be reasonably estimated.

Financial statement reporting is limited to disclosure when conditions for liability recognition do not exist but there is at least a reasonable possibility of incurring a loss or additional losses. Examples of loss contingencies include the collectibility of accounts receivable, pending or threatened litigation, and possible claims and assessments.

The MRF reports death payment contingencies that result from DoD's responsibility to cover retiree benefits not paid by the Department of Veterans Affairs during the month of death. Note 15 provides material disclosures.

1.T. Accrued Leave

N/A

1.U. Net Position

Net position consists of cumulative results of operations. Cumulative results of operations represent the net difference, since inception of an activity, between expenses and losses and financing sources (including appropriations, revenue, and gains). Beginning with FY 1998, the cumulative results also include donations and transfers in and out of assets without reimbursement.

1.V. Treaties for Use of Foreign Bases

N/A

1.W. Comparative Data

N/A

1.X. Unexpended Obligations

The MRF recognizes annuity benefits expense and liability as earned or accrued. Therefore, there are no unexpended obligations or undelivered orders.

1.Y. Undistributed Disbursements and Collection

All disbursements for MRF are made by DFAS Cleveland Retired Pay Operations. DFAS Cleveland reports these disbursements to U.S. Treasury. The contributions to MRF are made by the Military Services and U.S. Treasury and are processed by the Trust Fund Accounting Division (TFAD) and reported by TFAD to U.S. Treasury. The TFAD records these transactions in the Trust Fund Accounting System (TFAS) and reconciles to U.S. Treasury each month end. All transactions reported to U.S. Treasury are included in TFAS. Therefore, MRF has no undistributed disbursements and collections.

Note 2.	Nonentity Assets
----------------	-------------------------

As of June 30	2007	2006
1. Intragovernmental Assets		
A. Fund Balance with Treasury	\$ 0.00	\$ 0.00
B. Accounts Receivable	0.00	0.00
C. Total Intragovernmental Assets	\$ 0.00	\$ 0.00
2. Nonfederal Assets		
A. Cash and Other Monetary Assets	\$ 0.00	\$ 0.00
B. Accounts Receivable	745,090.55	1,099,860.20

D. Total Nonfederal Assets	\$ 745,090.55	\$ 1,099,860.20
3. Total Nonentity Assets	\$ 745,090.55	\$ 1,099,860.20
4. Total Entity Assets	\$ 222,878,439,346.06	\$ 212,348,759,126.67
5. Total Assets	\$ 222,879,184,436.61	\$ 212,349,858,986.87

Information Related to Nonentity Assets

The Military Retirement Fund (MRF) categorizes its asset accounts used to prepare the statement as either entity or nonentity assets. Entity assets consist of resources that MRF has the authority to use or when management is legally obligated to use funds to meet entity obligations. Nonentity assets are assets that an entity holds but are not available for use in the operations of the entity.

Nonfederal Assets, Accounts Receivable, are considered nonentity assets because they represent the amounts of interest, penalties, and administrative charges that are due to the MRF on behalf of the U.S. Treasury. Once collected, these amounts are transferred to the U.S. Treasury's receipt accounts.

Note 3.	Fund Balance with Treasury

5. Total	\$ 46,444,378.38	\$ 18,900,292.63

Information Related to Status of Fund Balance with Treasury

The Status of Fund Balance with Treasury consists of both unobligated and obligated balances. These balances reflect the budgetary authority remaining for disbursements against current or future obligations. In addition, the Status of Fund Balance with Treasury includes various accounts that affect either budgetary reporting or the Fund Balance with Treasury (FBWT), but not both.

Unobligated Balance represents the cumulative amount of budgetary authority that has not been set aside to cover outstanding obligations. Certain unobligated balances are restricted for future use and are not apportioned for current use. These unobligated balances, which are segregated to show the available and unavailable amounts, are related to trust fund accounts which are restricted by the public laws that established the funds. These balances become available subsequently without appropriations actions. The investment accounting staff members record the funds and invest the trust fund receipts with the U.S. Treasury, Bureau of Public Debt. These investments are redeemed as funds are needed.

Obligated Balance not yet Disbursed represents funds that have been obligated for goods that have not been received or services that have not been performed, and goods and services that have been delivered/received but not yet paid. The Military Retirement Fund (MRF) balance represents benefits payable on July 1, 2007.

Nonbudgetary FBWT includes entity and nonentity FBWT accounts which do not have budgetary authority, such as unavailable receipt accounts or clearing accounts.

Non FBWT Budgetary Accounts include budgetary accounts that do not affect FBWT, such as contract authority, borrowing authority and investment accounts. This category reduces the Status of Fund Balance with Treasury. The MRF balance represents investment accounts.

The Federal Government does not set aside assets to pay future benefits or other expenditures associated with earmarked funds. The cash receipts collected from the public for an earmarked fund are deposited in the U.S. Treasury, which uses the cash for general Government purposes. The U.S. Treasury issues securities to the Military Retirement Fund (MRF) as evidence of its receipts. The U.S. Treasury securities are an asset to MRF and a liability to the U.S. Treasury. Because MRF and the U.S. Treasury are both parts of the Federal Government, these assets and liabilities offset each other from the standpoint of the Federal Government as a whole. For this reason, they do not represent an asset or a liability in the Federal Government wide financial statements. The U.S. Treasury securities provide MRF with authority to draw upon the U.S. Treasury to make future benefit payments or other expenditures. When MRF requires redemption of these securities to make expenditures, the Federal Government finances those expenditures out of accumulated cash balances by raising taxes or other receipts, by borrowing from the public, repaying less debt, or by curtailing other expenditures. This is the same way that the Federal Government finances all other expenditures.

Information Related to Investments and Related Interest

The following table displays the cost of the U.S. Treasury Securities.

	FY 2007 COST <u>(in thousands)</u>	FY 2006 COST <u>(in thousands)</u>
Bills	0.0	0.0
Notes	55,013,263.0	52,049,272.0
Bonds	27,958,981.0	41,153,267.0

Overnights	<u>8,621,527.0</u>	<u>8,085,121.0</u>
Total Cost	\$226,791,000.0	\$217,456,959.0

The MRF purchases and redeems nonmarketable, market-based securities. The Department of Defense Investment Board determines the strategy for the type of securities purchased by the MRF. This strategy was not changed at the September 2006 board meeting.

The MRF securities can include U.S. Treasury bills, notes, bonds, inflation-protected securities, and overnight certificates. The U.S. Treasury bills are short-term securities with maturities of 1 year or less and are purchased at a discount. The U.S. Treasury notes have maturities of at least 1 year, but not more than 10 years, and are purchased at either a discount or premium. The U.S. Treasury bonds are long-term securities with maturity terms of 10 years or more and are purchased at either a discount or premium. The U.S. Treasury Inflation-Protected Securities (TIPS) provide protection against inflation. The TIPS principal increases with inflation and decreases with deflation, as measured by the Consumer Price Index. When a TIPS matures, the U.S. Treasury pays the adjusted principal or original principal, whichever is greater. The above cost figures include the TIPS inflation compensation adjustment of \$14.9 billion for FY 2007 and \$10.6 billion for FY 2006. Overnight securities are short-term securities purchased at face value that mature the next business day and earn interest at the daily Federal Reserve repurchase agreement rate.

Information Related to the Aged Accounts Receivable

The table above displays the nondelinquent and delinquent amounts that retirees and survivors owe to the Military Retirement Fund (MRF) because of improper payments. The MRF delinquent receivables over 30 days as of June 30, 2007, are maintained in the Defense Debt Management System (DDMS) at Defense Finance and Accounting Service (DFAS), Denver.

The last two columns of the accounts receivable aging schedule represent the 4th Quarter, FY 2006, ending balances, rather than the ending balances as of 3rd Quarter, FY 2006. Therefore, the prior year accounts receivable balance on the aging schedule will neither agree with the prior year balance on the Balance Sheet nor agree with the prior year balance in the first schedule in this note.

In compliance with the *Debt Collection Improvement Act of 1996*, all individual out-of-service debts referred to the DFAS-Project Officer (PO) for collection assistance are established in DDMS and processed through all required debt collection actions.

DDMS's collection procedures involve the following actions: when the debt is 2 to 62 days old, demand letters are generated; on the 92nd day, the debt is referred to the U.S. Treasury Offset Program. DDMS generates electronic files to refer these debts to U.S. Treasury in accordance with the *Debt Collection Improvement Act of 1996*. When the debt reaches 122 to 681 days, the debt is referred to private collection agencies prior to the debt being written off. After 682 days the debt is reported as currently not collectible.

Information Related to Other Liabilities

Intragovernmental Other Liabilities represent a custodial liability. This liability is an obligation for the interest, penalties, and administrative charges which are deposited to the U.S. Treasury's receipt account upon collection.

Nonfederal Other Liabilities represent estimated death payment contingent liabilities. The Department of Defense (DoD) is responsible for paying entitlements to the exact date of death, but the Department of Veterans Affairs (DVA) entitlements end in the month preceding death. The contingency amount becomes payable by DoD to cover the retiree benefits not paid by the DVA during the month of death.

Note 16.	Commitments and Contingencies
-----------------	--------------------------------------

Information Related to Commitments and Contingencies

The Military Retirement Fund (MRF) may be a party in various administrative proceedings and legal actions. We are not aware of any contingent liabilities for legal actions.

The MRF has an estimated contingent liability of \$196.7 million that is measurable and probable and, therefore, has been recorded in the accounting records. Refer to Note 15, Other Liabilities, for additional details and disclosures. The MRF is not aware of any other contingent liabilities.

Information Related to Military Retirement and Other Federal Employment Benefits

In FY 1984, Public Law (PL) 98-94 established the Military Retirement Fund (MRF) for the payment of annuities and pensions to retired military personnel and their survivors. The Military Retirement System is a single-employer, defined benefit plan. Administrative costs of MRF are not ascertainable. Projected revenues into MRF come from three sources: interest earnings on MRF assets, monthly Department of Defense (DoD) contributions, and annual contributions from U.S. Treasury. The monthly DoD contributions are determined as the percentage of basic pay approved by the DoD Retirement Board of Actuaries (hereafter referred to as “the Board”).

The contribution from U.S. Treasury is paid into MRF at the beginning of each fiscal year and represents the amortization of the unfunded liability for service performed prior

to October 1, 1984, as well as the amortization of actuarial gains and losses that have arisen since then. Starting October 1, 2004, PL 108-136 requires U.S. Treasury to contribute the normal cost amount for the concurrent receipt provisions under Sections 1413, 1413a, and 1414 in addition to the unfunded liability amortization payment. The Board determines U.S. Treasury's contribution, and the Secretary of Defense directs the Secretary of Treasury to make the payment.

Actuarial Cost Method Used: Aggregate entry-age normal method. As dictated by law, the Military Retirement System is funded using the aggregate entry-age normal method. This is a method whereby projected retirement costs are spread over the projected future salaries of a cohort at the point of entry.

Market Value of Investments in Market-based and Marketable Securities: \$211.5 billion

The Board sets the long-term economic assumptions for each valuation. The long-term assumptions for the FY 2006 valuation were 6.0% interest, 3.0% Consumer Price Index, and 3.75% salary increase. The interest rate represents the long-term Fund yield. Other assumptions used to calculate the actuarial liabilities, such as mortality and retirement rates, were based on actual experience. Because of reporting deadlines, the current year actuarial present value of projected plan benefits is rolled forward from the prior year valuation results as reported in DoD Office of Actuary Valuation of the Military Retirement System. Accepted actuarial methods are used for this roll-forward process, which is applied annually. In calculating the FY 2006 roll-forward amount, the following assumptions were used:

	<u>Inflation</u>	<u>Salary</u>	<u>Interest</u>
Fiscal Year 2006	4.1 % (actual)	3.1 % (actual)	6.0 %
Fiscal Year 2007	3.0 % (estimated)	2.7 % (estimated)	6.0 %
Long-Term	3.0 %	3.75 %	6.0 %

Contributions to MRF are calculated so as to maintain the fund on an actuarially sound basis. An actuarially sound basis means that there will be sufficient funds to make all benefit payments to eligible recipients each year, and that MRF balance is projected to eventually equal the actuarial liability, i.e., all unfunded liabilities are covered. In order to accomplish this process, normal costs are calculated to fully fund the current year projected liability for active duty members and reservists. In addition, amortization payments are calculated to fund liabilities that were present at plan inception (initial unfunded) and any emerging actuarial gains or losses.

The initial unfunded liability of the program is being amortized over a 50-year period. This initial unfunded liability is projected to be fully amortized by 2034. All subsequent gains and losses experienced by the system are amortized over a 30-year period. As mandated by Chapter 74 of Title 10, United States Code, the Board must approve methods and assumptions used to (1) compute actuarial costs and liabilities, (2) amortize the initial unfunded liability, and (3) amortize all actuarial gains and losses. The Board is a Federal Advisory Committee appointed by the President.

The net pension expense for the change in the actuarial accrued liability from September 30, 2005, to September 30, 2006 (which, as previously mentioned, is the same as the change from 3rd Quarter, FY 2006, to 3rd Quarter, FY 2007) is developed in Table 1 below:

Table 1: Change in Actuarial Liability

(\$ In Thousands, rounded to nearest 100 million)	<u>FY 2006</u>	<u>FY 2005</u>
A. Beginning of Year Accrued Liability	\$892,100,000	\$834,600,000
B. Normal Cost Liability	15,500,000	14,900,000
C. Plan Amendment Liability	100,000	25,800,000
D. Assumption Change Liability	35,400,000	4,900,000
E. Benefit Outlays	(40,500,000)	(38,700,000)
F. Interest on Pension Liability	55,000,000	51,400,000
G. Actuarial Loss (Gain)	<u>6,100,000</u>	<u>(800,000)</u>
H. End-of-Year Accrued Liability (A+B+C+D+E+F+G)	<u>\$963,700,000</u>	<u>\$892,100,000</u>
I. Net Change in Actuarial Liabilities (B+C+D+E+F+G)	<u>\$71,600,000</u>	<u>\$57,500,000</u>

Each year the accrued liability is expected to increase with the normal cost, decrease with benefit outlays, and increase with the interest cost. In the absence of (1) actuarial gains and losses, (2) plan benefit changes, and (3) assumption changes, an increase of \$30.0 billion in the accrued liability was expected during FY 2006.

The September 30, 2006, accrued liability includes changes due to (1) assumptions, (2) benefit changes, and (3) experience. The new assumptions include a change in the interest rate (from 6.25% to 6.00%), updated Temporary Disability retiree rates, a refined set of survivor pay factors, an update to the percentage of Redux members electing the Career Status Bonus, and a refinement in the way the savings due to the phase-in of Concurrent Receipt benefits is calculated. The net effect of these new assumptions is an increase in the September 30, 2006, accrued liability of \$35.4 billion, shown on the Change in MRF Actuarial Liability, Line D (\$32.8 billion of this increase is due to the new interest assumption).

The changes in retirement benefits for FY 2006 include an accelerated phase-in schedule of Concurrent Receipt benefits for certain retirees in the FY 2006 National Defense Authorization Act (NDAA), and a 1-year Survivor Benefit Plan (SBP) open enrollment period beginning October 1, 2005, in the FY 2005 NDAA. The accelerated phase-in schedule of Concurrent Receipt benefits for certain retirees results in an increase in the September 30, 2006, accrued liability of \$46.3 million, and the increase in the accrued liability due to SBP open season as of September 30, 2006, is \$71.5 million. The total of these benefit changes is \$100.0 million (rounded), shown on Line C of Table 1, above.

The increase in accrued liability due to the net experience loss of \$6.1 billion, shown on the Change in MRF Actuarial Liability, Line G, reflects the new population on which the September 30, 2005, roll-forward is based, as well as other economic experience being different from that assumed.

Subsequent Event

The FY 2007 NDAA (PL 109-364) included a number of provisions impacting MRF including (1) revisions to the basic pay rates for the uniformed services, effective April 1, 2007; and (2) increases to the limit on base pay for retired pay computations for retirees with over 30 years creditable service, retiring after December 31, 2006, by eliminating the 75% limit on base pay.

The Office of the Actuary estimated that the effect of the benefit changes from the FY 2007 NDAA would be to increase the actuarial liability by approximately \$4.6 billion as of September 30, 2006. This increase is not reflected in the actuarial liability in the accompanying balance sheet as of June 30, 2007. The estimate of the change in actuarial liability due to benefit changes in the FY 2007 NDAA will be updated and reflected in the September 30, 2007, financial statements.

Treasury Contributions

The October 1 contribution from U.S. Treasury, which is determined in accordance with methodology set by the Board of Actuaries, increased \$3.0 billion (from \$25.5 billion in FY 2006 to \$28.5 billion in FY 2007). The main reasons for the change include an expected increase of \$0.9 billion inherent in the Board's unfunded liability amortization methodology and additional increases of \$2.0 billion in the unfunded liability payment due to actuarial experience and assumption changes.

Military Services Contributions

The contributions from the Military Services are the product of basic pay and Normal Cost Percentages (NCPs) determined in accordance with methodology set by the Board of Actuaries. Basic pay generally increases each year, and on January 1, 2006, there was a 3.1% across-the-board basic pay increase. On January 1, 2007 there was a 2.2% across-the-board basic pay increase. The NCPs for FY 2006 were set by the Board in its November 2004 letter, amending those set in the August 2004 public meeting: 26.5% (full-time) and 16.7% (part-time). The NCPs for FY 2007 were set by the Board in its August 2005 public meeting: 26.5% (full-time) and 17.5% (part-time).

Note 18.**General Disclosures Related to the Statement of Net Cost****Intragovernmental Costs and Exchange Revenue**

As of June 30

	2007	2006
1. Intragovernmental Costs	\$ 0.00	\$ 0.00
2. Public Costs	32,574,218,590.24	30,792,745,754.50
3. Total Costs	\$ 32,574,218,590.24	\$ 30,792,745,754.50
4. Intragovernmental Earned Revenue	\$ (46,873,573,321.19)	\$ (45,205,207,085.56)
5. Public Earned Revenue	0.00	0.00
6. Total Earned Revenue	\$ (46,873,573,321.19)	\$ (45,205,207,085.56)
7. Net Cost of Operations	\$ (14,299,354,730.95)	\$ (14,412,461,331.06)

Information Related to the Statement of Net Cost

Public costs and revenues are exchange transactions made between the reporting entity and a nonfederal entity. Intragovernmental costs and revenue are related to transactions made between two reporting entities within the Federal Government.

The Statement of Net Cost (SNC) is unique because its principles are driven on understanding the net cost of programs that the Federal Government supports through appropriations or other means. The SNC provides gross and net cost information that can be related to the amount of output for a given program administered by a responsible reporting entity.

Note 19.	Disclosures Related to the Statement of Changes in Net Position

E. IntraEntity	0.00	0.00	0.00	0.00
F. Total Imputed Financing	\$ 0.00	\$ 0.00	\$ 0.00	\$ 0.00

Information Related to the Statement of Changes in Net Position

There was a difference of \$50.8 billion between Appropriations Received on the Statement of Changes in Net Position (SCNP) and Appropriations Received on the Statement of Budgetary Resources. This difference is due to additional resources included in the Appropriations Received line on the Statement of Budgetary Resources. Refer to Note 20, Disclosures Related to the Statement of Budgetary Resources, for additional details.

The eliminations column on the SCNP will reflect zero dollars. In the SCNP, all offsetting balances (i.e., transfers in and out, revenues and expenses) for activity within the Department of Defense between earmarked and other (non earmarked) funds are reported on the same lines. This results in an eliminations column, which appears to contain no balances. In reality, the column contains all appropriate elimination entries, but all net to zero within each respective line.

Note 20.	Disclosures Related to the Statement of Budgetary Resources
-----------------	--

As of June 30	2007	2006
1. Net Amount of Budgetary Resources Obligated for Undelivered Orders at the End of the Period	\$ 0.00	\$ 0.00
2. Available Borrowing and Contract Authority at the End of the Period	0.00	0.00

Information Related to the Statement of Budgetary Resources

Office of Management and Budget Circular No. A-136, *Financial Reporting Requirements* specifically requires disclosure of the amount of direct and reimbursable obligations incurred against certain apportionment categories. The Military Retirement Fund (MRF) reported \$32.6 billion in obligations that are exempt from apportionment.

Intraentity transactions have not been eliminated because the statements are presented as combined and combining.

Public Law 98-94, *The Defense Authorization Act of 1984*, established MRF with a permanent indefinite appropriation.

The MRF's unobligated balances of budget authority represent the portion of trust fund receipts collected in the current fiscal year (1) that exceed the amount needed to pay benefits or other valid obligations and (2) that exceed the receipts temporarily precluded from obligation by law. The receipts, however, are assets of the MRF and are available for obligation as needed in the future.

There was a difference of \$50.8 billion between Appropriations Received on the Statement of Changes in Net Position (SCNP) and Appropriations Received on the Statement of Budgetary Resources. Non-revolving trust funds receipts, immediately available for obligation, are reported as exchange revenue and included in the cost of operations on the SCNP. The MRF current receipts total \$47.6 billion and the remaining \$3.2 billion represents anticipated amounts. The anticipated amount is the difference between the President's budget, which includes projected interest revenue, and actual receipts including actual interest revenue. The MRF uses the President's budget until such time as receipts exceed the budget amount or the end of the fiscal year, whichever occurs first.

Note 21.	Disclosures Related to the Statement of Financing
-----------------	--

Information Related to the Statement of Financing

The following Statement of Financing lines are presented as combined instead of consolidated due to intraagency budgetary transactions not being eliminated: obligations incurred; obligations net of offsetting collections and recoveries; less: offsetting receipts; and net obligations.

Components of Net Cost of Operations That Will Require or Generate Resources in Future Periods report unfunded expenses that were incurred during FY 2007. The cumulative total of unfunded expenses from all fiscal years is reported as “Liabilities Not Covered by Budgetary Resources” in Note 11. The Military Retirement Fund (MRF) has a difference of \$18.2 billion between the two lines. The MRF had no unfunded expenses in the current year. The amounts in Note 11 represent actuarial liabilities that eventually must be funded. As additional assets become available in MRF, the unfunded portion of the actuarial liability will decrease.

Components not Requiring or Generating Resources – Other represents the change in accounts receivable between the 1st Quarter, FY 2006, and 3rd Quarter, FY 2006, and between 1st Quarter, FY 2007, and 3rd Quarter, FY 2007. These amounts represent refunds receivable for erroneous payments to military retirees and their survivors. The refunds receivable are recorded as an offset to expenses.

Information Related to Earmarked Funds

The Military Retirement Fund (MRF) is a pension program established in fiscal year 1984 by Public Law 98-94 for the payment of annuities and pensions to retired military personnel and their survivors. The MRF receives its appropriations and funds as trust and earmarked funds. The MRF uses these appropriations and funds to execute its mission and report on resource usage.

Financing sources for MRF are provided primarily through (1) monthly Military Service contributions as a percentage of base pay; (2) annual payments from the U.S Treasury for the unfunded liability and for the concurrent receipt provisions for certain disabled retirees; and (3) interest earned on investments. The Department of Defense Retirement Board of Actuaries calculates the annual payments amounts and percentages. The financing sources are the result of intragovernmental flows. Excess funds from the contributions are invested. The investments and associated accrued interest revenue are used to cover future liabilities of MRF.
