Chemical Biological Defense Program Overview

The threat posed by chemical, biological, radiological, and nuclear (CBRN) weapons is real and evolving. Sustained use of chemical weapons in the Middle East and the increasing threat of weapons of mass destruction (WMD) on the Korean Peninsula not only illustrate the reality of threats we face, but also undermine the norms that protect civilians and security forces from these weapons. While many of these threats remain within the arsenals of our state and non-state adversaries, the variety of threats is no longer a static list of restricted CBRN materials. The concurrent emergence of dual-use technologies and increased access to shared information are lowering the expertise required to harness these technologies for illicit purposes. Proliferation of technology, increased ease of access, challenges to detecting illicit activity, and our limited ability to anticipate how our adversaries might employ WMD all heighten the risk of unforeseen and unattributable attacks against the U.S. or its allies.

The sustained lethality of the Joint Force and its ability to continue the mission depends on the warfighter's ability to deter, prevent, protect, mitigate, respond to, and recover from CBRN weapons use and effects. The Chemical and Biological Defense Program (CBDP) supplies the materiel solutions to enable countering WMD (CWMD) missions ranging from combat operations to DoD support of domestic incident prevention and response as part of an integrated and layered defense. This 2019 budget request includes \$1.36 billion aligned to improve near-term readiness for the highest Department, Joint Service, and Combatant Command CWMD priorities across these mission spaces.

Strategic Overview

The CBDP strategic direction reflects current defense policy set by public law, national strategies, DoD Directives and Instructions, and senior leadership guidance. The CBDP mission is to enable the Warfighter to deter, prevent, protect, mitigate, respond, and recover from CBRN threats and effects as part of a layered, integrated defense. This mission aligns with the DoD Strategy for Countering Weapons of Mass Destruction (CWMD), which outlines the elements and enablers of the Department's approach for countering CWMD. CBDP executes its responsibility in support of the Department's strategic approach and provides capabilities supporting the three CWMD strategic lines of effort. These lines of effort are:

1) ***Prevent Acquisition*** focuses on ensuring that those not possessing WMD do not obtain them. One of the primary methods of increasing barriers to acquisition and proliferation of WMD will be through pathway defeat—activities focusing on the specific nodes and linkages in an adversary’s WMD pathway.

2) ***Contain and Reduce Threats*** focuses on reducing risks posed by extant WMD. The DoD will remain prepared to lead or support operations to locate, characterize, secure, exploit, and destroy WMD in a range of contingency environments and under varying security and political conditions.

3) ***Respond to Crises*** focuses on activities and operations to manage and resolve complex WMD crises. The DoD will assume that hostile non-state actors who acquire WMD or material of concern will plan to use them, and the Department will react accordingly. The DoD will be prepared to avoid or defeat WMD attacks and mitigate their immediate effects so as to allow effective operations to continue.

The CBDP supports these lines of effort through materiel and non-materiel capabilities that are interoperable within the Joint Forces and other DoD and United States Government partners countering WMD. The CBDP budget request reflects efforts to balance the dynamic tensions of budget, threat, and scientific development to provide a program that is agile and flexible so as to rapidly adapt to the evolving strategic landscape.

Strategic Objectives

This budget request supports the DoD Strategy for CWMD and advances the following CBDP strategic objectives:

- **Early Warning** - Develop advanced environmental surveillance and point-of-need diagnostic capabilities against CBRN threats, enabling the Warfighter to achieve information dominance in the CBRN domain and enabling rapid force protection decisions.
 - Biosurveillance – The CBDP is developing pre- and post-event capabilities to improve early warning and characterization of man-made and naturally occurring hazards in near real-time. Persistent surveillance will provide early indications and support effective consequence management of the emergence and re-emergence of infectious diseases, genetically engineered and synthetic biological agents, as well as chemical hazards.
 - Advanced Diagnostics – The CBDP resources a robust portfolio of CBR diagnostics that includes S&T, systems development, and procurement of point-of-need/point-of-care diagnostic equipment. Continuous assay development and procurement support fielded and developmental diagnostic and analytic platforms.

- Avoid, Prevent and Prepare for Surprise - Advancements in biology and chemistry as well as natural evolution can result in new CB agents and new threats the Warfighter must be prepared to counter. The CBDP identifies and studies such CB agents to scientifically characterize and validate the hazard they could pose to the Warfighter. The CBDP is committed to addressing surprise, both to avoid its occurrence and to rapidly mitigate its consequences. The enterprise aims to leverage cross-domain efforts, information, and assessments to manage surprise through scientific breakthrough, rapid fielding, and operational innovation. Focus areas include:
 - Non-Traditional Agents (NTA) – The CBDP is developing technologies that address existing and emerging NTAs to close multiple capability gaps and provide multi-layered and integrated defenses. Enhanced warning, protection, and countermeasures sustain combat power and enable more flexible consequence management.
 - Synthetic Biology – Rapid advances in biotechnology open a broad range of potential new challenges from genetically engineered organisms. Rapid characterization of new threats and development of countermeasures remain hallmarks of the CBDP portfolio.
- Integrated, Layered Defense - The CBDP invests strategically in a set of distinct and complementary capabilities to defend against CBRN threats. Collectively, CBDP solutions are comprehensive and address the spectrum and time evolution of CBRN events. These solutions enable the Joint Force to maintain freedom of action in a CBRN environment and enable mission accomplishment.
 - Medical Countermeasures – Development of advanced vaccines, therapeutic drugs, and diagnostic capabilities that provide safe and effective medical defense against validated biological threat agents (bacteria, toxins, and viruses), emerging infectious disease, and traditional and non-traditional chemical agents.
 - Personal Protective Equipment and Collective Protection – Advances in materials and systems engineering will enhance the protective properties against a broader array of threats while reducing operational challenges and logistical burdens. Modular and customizable solutions will be effective against a broad range of challenges in varied environments.

- Detectors and Sensors – The CDBP is developing the next generation of suitable, effective, and affordable broad-spectrum CB detection capabilities to address current and emerging CB hazards. Development efforts focus on increasing accuracy, range, and effectiveness and ensuring that detector and sensor data integrate seamlessly with relevant information systems.
- Hazard Mitigation – Efforts will address personnel decontamination, to include mass casualties and human remains, along with materiel decontamination, which includes sensitive equipment and aircraft. Novel decontamination approaches are focusing on broad applicability to chemicals or biologicals, while minimizing harm to individuals, equipment, and platforms.

FY19 Budget Request Highlights

- The FY 2019 Research, Development, Test and Evaluation (RDT&E) budget request of \$1,048 million (M) supports key efforts including:
 - \$286 million supporting RDT&E efforts advancing environmental (detectors) and medical surveillance capabilities providing enhanced situational awareness of traditional and non-traditional chemical threats as well as traditional and emerging biological threats.
 - \$256 million to continue support of research and development of medical countermeasures (MCMs) vaccines and therapeutics addressing high priority biological threats.
 - \$114 million to continue support of research and development of medical countermeasures focused on protecting and treating against traditional and non-traditional chemical agents.
 - \$97 million to support critical chemical and biological defense research, development, and test infrastructure and operations.
 - \$79 million supporting biosurveillance, warning & reporting, decision support, and modeling and simulation capabilities.
 - \$77 million supporting RDT&E for personnel/collective protection and hazard mitigation capabilities against traditional and non-traditional chemical threats as well as traditional and emerging biological threats.
 - \$66 million supporting basic research and threat agent sciences advancing fundamental knowledge and experimental research in the life and physical sciences.
 - \$37 million supporting concepts development, technology demonstrations, and experimentation capability demonstrations to demonstrate enhanced military operational capability for technologies and equipment.
- The FY 2019 Procurement budget request of \$311 million supports key efforts including:

- \$91 million to procure CBRN Dismounted Reconnaissance Sets, Kits, and Outfits (DR SKO) which allows warfighters to perform CBRN dismounted reconnaissance, surveillance, and site assessment of WMD suspect areas not accessible by traditional CBRN reconnaissance mounted platforms.
- \$72 million to procure modernized respiratory and ocular protection for ground and air forces.
- \$48 million to procure Common Analytical Laboratory Systems providing a modular, scalable and adaptable analytical capability for a variety of operating and environmental conditions.
- \$40 million to procure modernized Collective Protection capabilities (Joint Expeditionary Collective Protection and CB Protective Shelters).
- \$22 million to procure protective ensembles supporting enhanced protection for the Joint Force, to include special purpose units.

Summary

The proliferation of WMD is among the greatest challenges facing the United States, and countering WMD is a top priority of the U.S. National Security Strategy. Accordingly, the CBDP continues to focus on developing capabilities that enhance the flexibility to anticipate, identify, and quickly respond to the challenges. Current DoD efforts strengthen and expand capabilities to prevent, protect against, mitigate, respond to, and recover from CBRN threats and effects as part of an integrated, layered defense, as well as improve the Joint Force ability to find, track, interdict, and eliminate CBRN weapons or emerging threats. These efforts ensure that currently available technologies are produced, procured, and provided and that cutting-edge technologies are harnessed to provide improved capabilities in the future. This is achieved through developing operationally relevant capabilities for the Joint Force that are complementary and holistically reduce identified risks. The CBDP continues to enhance CBRN readiness to counter known and emerging threats and collaborates with interagency and international partners to increase the exchange of knowledge and coordination of CB defense-related activities. This budget request supports the CBDP as a Joint Force enabler fulfilling the needs of the warfighters to ensure that they are equipped to complete missions in CBRN environments now and in the future, preserving the security and freedom of our nation.

Description:

The Chemical Biological Situational Awareness (CB SA) Budget Line Item (BLIN) provides for situational awareness capabilities to the Joint Force through a portfolio that comprises efforts across contamination avoidance, special purpose units, homeland defense, diagnostics, and CB surveillance.

Specific situational awareness efforts provided include detection, warning and reporting, reconnaissance systems, field analytics systems, diagnostics equipment and special purpose unit equipment.

Efforts in the area of chemical, biological and radiological detection include; (1) Joint Chemical Agent Detector (JCAD) an automatic, lightweight man-portable, point-sampling, chemical warfare agent vapor detection/warning system which includes simultaneous and automatic detection by class (nerve, blister, and blood), identification and quantification of hazard levels, and data communication interface and the Improved (chemical agent) Point Detection System Life Cycle Replacement (IPDS-LR) provides automatic point detection, classification, and warning when there are chemical warfare vapors external to the ship; and IPDS is an Ion Mobility Spectroscopy (IMS) based chemical point detection system with algorithm library and embedded data processing that automatically detects and alarms to nerve and blister vapor at low concentrations and has the capability of rejecting common shipboard interferents; (2) the Next Generation Chemical Detector (NGCD) will be separated into distinct programs starting in FY19: Aerosol & Vapor Chemical Agent Detector (AVCAD) for vapor and aerosol monitoring (formerly NGCD 1), Proximate Chemical Agent Detector (PCAD) for location of liquid and solids on surfaces (formerly NGCD 2), Multi-Phase Chemical Agent Detector (MPCAD) for sampling of multiple phases of matter (formerly NGCD 3), and Wearable Chemical Agent Detector (WCAD) (formerly NGCD 4), and USSOCOM efforts. The systems will detect and identify non-traditional agents, chemical warfare agents (CWA), toxic industrial chemicals (TICs) in the air and on surfaces. The NGCD will provide improved NTA/CWA/TIC selectivity and sensitivity on multiple platforms as well as multiple environments. The sensors will improve detection, consequence management and reconnaissance, and weapons of mass destruction (WMD) interdiction capabilities.

Efforts in the warning, reporting and reconnaissance area include; (1) The Joint Personal Dosimeter - Individual (JPD-I) will provide a sensor to record and retrieve a Service member's radiation exposure from occupational to tactical levels (2) Joint Warning and Reporting Network (JWARN) provides a fully automated NBC detection and warning process throughout the battle space; (3) Software Support Activity (SSA) is a user development system providing enterprise-wide services and coordination to facilitate net-centric interoperability; (5) the Joint Effects Model (JEM) is DoD's only accredited model for predicting hazards associated with the release of contaminants into the environment; (6) Chemical, Biological, Radiological, and Nuclear (CBRN) Information Systems (CBRN IS) aligns Chemical Biological Defense (CBD) information technology in order to utilize a common software architecture, eliminate duplicative integration effort, produce interoperable system components, and minimize time-to-market of end user capability; (7) Joint Nuclear Biological and Chemical (NBC) Reconnaissance Systems (JNBCRS) provide field commanders with point and stand-off intelligence for real time field assessment of NBC hazards which includes support of the Stryker Nuclear Biological and Chemical Reconnaissance Vehicles (NBCRV); (8) CBRN Dismounted Reconnaissance Systems (CBRN DRS) provides mission critical dismounted reconnaissance capabilities for detection, presumptive identification, sample collection, marking and immediate reporting of CBRN hazards; (9) The Next Generation Diagnostic System (NGDS) program is a DoD effort to

Line Item MDAP/MAIS Code: N/A		
<p>develop and field common biological test equipment and diagnostic platform among all Military Services. A multi-incremental configuration, evolutionary development and fielding approach is proposed which will provide expanded capability for an early warning tool of health threats, early detection of health events, and overall situational awareness. NGDS will identify Biological Warfare (BW) agents and pathogens of operational concern (Increment 1); (9) the Global Biosurveillance Technology Initiatives (GBTI) will develop a globally-distributed, fully integrated and networked, state-of-the-art analytical capability for biological threats that will enable the compression of the discovery-to-decision timeframe and provide awareness and understanding of the baseline biological threat footprint; (10) the Critical Reagents Program (CRP) integrates and consolidates all DoD reagents/antibodies/DNA biological detection requirements. In FY18 funding and responsibilities for these requirements transitions from CRP to the Defense Biological Products Assurance Program (DBPAP); and (11) The Biosurveillance Portal (BSP) is a web-based enterprise environment that will facilitate collaboration, communication, and information sharing in support of the detection, management, and mitigation of manmade and naturally occurring biological events. BSP bridges the communication gaps in the Biosurveillance domain to provide a central access point for Biosurveillance information and situational awareness for DoD, interagency and allied partners supporting the early identification and response to biological events.</p> <p>Efforts in field analytics, homeland defense, and Defense Support to Civil Authorities (DSCA) Special Purpose Units (SPUs) include; (1) the Joint Handheld Bio-Agent Identifier (JHBI), which will provide handheld, bio-identification systems for the rapid identification of biowarfare agents in environmental samples at the point of contact or in far-forward settings. The JHBI systems, which will be fielded to Special Operations Forces, will provide the necessary bio-identification capability to replace older legacy systems while reducing the size and weight burden on the Warfighter; (2) the Common Analytical Laboratory System (CALS), which will be modular, scalable and adaptable to a variety of concept of operations (CONOPS) and environmental conditions. Currently, fielded systems have been designed independently by various agencies with the intent of meeting specific units requirements. As a result, multiple mobile lab configurations exist with differing sustainment tails and lacking in commonality. CALS will incorporate an open architecture that can accommodate quick installation or removal of equipment as mission requirements dictate. As well, it will provide the ability to rapidly develop a common operating picture allowing first responders and DoD officials to determine the appropriate course of action; and (3) Personal Protective Equipment (PPE) for the Chemical, Biological, Radiological, and Nuclear (CBRN) Response Enterprise (CRE). The CRE includes certain United States Northern Command (NORTHCOM), National Guard Bureau (NGB), and the Chemical Biological Incident Response Force (CBIRF), a unit in the United States Marine Corps (USMC), assigned a Homeland Defense Mission. These specialized units require Commercial Off The Shelf (COTS) equipment including PPE which has been tested and certified to meet National consensus standards such as; National Fire Protection Association (NFPA), Occupational Safety and Health Administration (OSHA), and National Institute of Occupational Safety and Health (NIOSH). The PPE fielded may include the suit ensemble, breathing protection such as Self-Contained Breathing Apparatus (SCBA) and Powered Air-Purifying Respirators (PAPR), boots, CBRN respirator filters, and other accessories which are required for certification.</p> <p>Biosurveillance (BSV) will support the Joint United States Forces Korea (USFK) Portal and Integrated Threat Recognition (JUPITR) Advanced Technology Demonstration (ATD) which will find, demonstrate, transition, and transfer the best operational concepts and technology solutions in support of a holistic approach to countering biological threats from laboratory to operational use. Depending on the maturity, outputs will focus on providing component, CONOPS, augmentation of existing identification capabilities and subsystem transition into programs of record (PORs) and/or integration into existing PORs. The JUPITR ATD will use a four leg approach to demonstrate equipment, information systems, and processed that address the capability gaps and provide risk reduction for follow-on acquisition efforts.</p>

Justification:

Situational Awareness is a primary objective of the Chemical Biological Defense Program. Operational forces have an immediate need to safely operate, survive, and sustain operations in an NBC agent threat environment. Contamination Avoidance is necessary to maintain operational efficiency and minimize the need to decontaminate vehicles, equipment, and areas. Advanced chemical defensive equipment is required to enhance US capability to detect and identify threat agents in the battle space and the homeland. Warning, reporting, and reconnaissance efforts will provide a tiered strategy for detection and warning comprised of complementary detection/identification systems to provide theater protection against a large area and point attacks. Additionally, efforts in this BLIN support Special Purpose Unit operations and the National Guard Bureau WMD-CSTs.

Remarks:

The Joint Handheld Bio-Agent Identifier (JHBI) program is a Joint Service Acquisition Category (ACAT) III program that addresses an existing United States Special Operations Command (USSOCOM) requirement for handheld, multiplexed, environmental, bio-agent identification. The JHBI program will provide handheld bio-collection preparation, and identification systems for the rapid and accurate identification of organisms at the point of contact for multiple mission types. Biome developed the "two3" system for Increment 1 and is improving that system to become the "three9" system for Increment 2. Both are highly multiplexed, smart phone-based, Polymerase Chain Reaction (PCR) identification systems. Epistem is developing the "Genedrive", a 9-plex PCR system; and Ibis developed the Mobile Analysis Platform (MAP) with integrated sample preparation for far-forward deployment. The proposed JHBI systems will be handheld, PCR-based, multiplexed devices for the analysis of powder or liquid environmental biological samples and will be supported by tools for quickly collecting and preparing raw biological samples for use on these identifiers. JHBI capabilities will provide Special Operations Forces with timely and accurate identification of 8 or more bio-agents at the point of need. Once the threshold capability is procured and fielded, additional capabilities will be developed to meet time-phases or objective requirements. These capabilities may include additional CBRN threat assays, integrated sample preparation capabilities, and supporting capabilities, as required. JHBI Increment1 is anticipated to serve as a supplemental capability to the Man-portable, multiplex, Polymerase Chain Reaction Bio-identifier known as BioFire RAZOR, with Increment 2 fielding the complete replacement of the RAZOR by FY20.

Justification: FY19 will procure the following JHBI hardware for USSOCOM; 762 MAPs assays, 1500 Genedrive assays, and 1500 three9 assays.

<p>The Joint Personal Dosimeter - Individual (JPD-I) will provide a sensor to record and retrieve a Service member's radiation exposure from occupational to tactical levels. This capability provides a Joint solution reducing life-cycle costs while also address lessons learned from Operation Tomodachi.</p> <p>Note: Responsibility for Passive Radiological Nuclear Protection capabilities is in transition from Nuclear Matters to Chem Bio Defense per OSD Memorandum. Army also plans to fund \$5.2M in FY19 Base and \$21M in FY 19 OCO toward this effort on Army item B92400. in addition, the Navy plans to leverage this Product Office's contract to procure JPD-I systems in FY20.</p> <p>Justification: FY19 Funds will provide for procurement, training and fielding of 14,918 JPD-I System to the Army.</p> <p>(t) indicates the presence of a P-5a</p>

Remarks:

The JCAD program employs an incremental acquisition strategy to develop a miniaturized, rugged, and portable point chemical agent detector that automatically and simultaneously detects, identifies and alerts in the presence of nerve, blister, and blood chemical warfare agents. The M4 JCAD replaced the M8A1 and the M22 Automatic Chemical Agent Alarms (ACAA/ACADA). The M4 JCAD entered full rate production in September 2008 and was procured through FY10. The M4A1 reduces operations and sustainment costs to the Warfighter and obtains many of the objective values in the JCAD Increment I Capability Production Document (CPD). Production of the M4A1 began April FY11. JCAD will be used for wheeled vehicles, stand alone, and individual Soldier applications. The M4A1 may also replace the Chemical Agent Monitor (CAM) and Improved Chemical Agent Monitor (ICAM) and other legacy systems currently used by the individual Services. These funds also support a Lifecycle Replacement (LR) for the Navy's Improved Point Detection System (IPDS). The Improved (chemical agent) Point Detection System Life Cycle Replacement (IPDS-LR)) provides automatic point detection, classification, and warning when there are chemical warfare vapors external to the ship. IPDS-LR is an Ion Mobility Spectrometer (IMS) based chemical point detection system with an algorithm library and embedded data processing that automatically detects and alarms to nerve and blister at low concentrations and has the capability of rejecting common shipboard interferents.

Justification: FY19 funding procures 291 JCADs and JCAD communication adapters and provides government engineering and field support.

Exhibit P-5, Cost Analysis: PB 2019 Chemical and Biological Defense Program		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 7001SA1000 / Chemical Biological Situational Awareness	Item Number / Title [DODIC]: G47101 / JOINT WARNING & REPORTING NETWORK (JWARN)
ID Code (A=Service Ready, B=Not Service Ready) : A		MDAP/MAIS Code:
<p>Remarks: The Joint Warning and Reporting Network (JWARN) provides the Joint Forces with a comprehensive Early Warning (EW) analysis and response capability to minimize the effects of hostile Chemical, Biological, Radiological, and Nuclear (CBRN) attacks, incidents and accidents. It provides the operational capability to employ CBRN warning technology which will collect, analyze, identify, locate, report, and disseminate CBRN warnings. JWARN will transition from a Command and Control (C2) platform specific implementation to a Web-based Service Oriented Architecture (SOA) meeting the DoD's evolution to a more comprehensive Common Operating Environment (COE). JWARN 2 will provide an expansion of sensors that will connect to JWARN, increased automation of message handling, improved false alarm filtering, integration of route-planning calculator, and interoperability with additional Command and Control (C2), medical information and evolving Bio-Surveillance systems. JWARN will be located in Command and Control Centers at the appropriate level and will be employed by CBRN defense specialists and other designated personnel to improve the efficiency of limited CBRN personnel assets. This employment will transfer data automatically from existing sensors and to and from the future sensors to provide commanders with the capability to support operational decision making in a CBRN environment. JWARN will integrate existing sensors into a sensor network or host C2 system, but will not provide the sensors that will be employed in the operating environment. JWARN will be compatible and integrated with Joint Services Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) Systems and will operate as a standalone capability in the next increment of development. Activities include: logistical elements, support equipment, manuals and training required to operate and support the system.</p> <p>Justification: FY19 supports JWARN 2 Total Package Fielding (TPF) and New Equipment Training (NET).</p>

Remarks:																			
Biosurveillance (BSV) will support the Joint United States Forces Korea (USFK) Portal and Integrated Threat Recognition (JUPITR) Advanced Technology Demonstration (ATD) which will find, demonstrate, transition, and transfer the best operational concepts and technology solutions in support of a holistic approach to countering biological threats from laboratory to operational use. Depending on the maturity, outputs will focus on providing component, CONOPS, augmentation of existing identification capabilities and subsystem transition into programs of record (PORs) and/or integration into existing PORs. The JUPITR ATD will use a four leg approach to demonstrate equipment, information systems, and processed that address the capability gaps and provide risk reduction for follow-on acquisition efforts. Current efforts purchase test items in support of Camp Humphreys Fielding.

Remarks:																					
The JPEO-CBD SSA is a user developmental support and service activity supporting all JPEO-CBD CBRND Systems by providing enterprise-wide services to facilitate net-centric interoperability of systems in acquisition for the Warfighter. The SSA provides the CBRND Warfighter with Joint Service solutions for Cybersecurity/Information Assurance (CS/IA), Integrated Architectures, Data Management/Modeling, Interoperability Certifications, Verification, Validation and Accreditation (VV&A) to support interoperable and integrated net-centric, service-oriented solutions for CBRND systems within the CBDP. The SSA emphasizes development of reference implementations to guide Government and industry system and software developers to ensure that their products meet common interoperability standards.																					
The latest technologies/products include the definition of a Common CBRN Sensor Integration Standard (CCSI) and the CBRN Data Model. These technologies are direct enablers for the development of CBRN integrated sensor networks and the dissemination of CBRN information across all users.																					
The SSA directly supports CBDP Biosurveillance initiatives in providing common service oriented architecture and framework for the collection and dissemination of Biosurveillance information.																					
Justification: FY19 funds SSA system fielding support to the CBDP community.

Exhibit P-5, Cost Analysis: PB 2019 Chemical and Biological Defense Program		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 7001SA1000 / Chemical Biological Situational Awareness	Item Number / Title [DODIC]: JC0208 / JOINT EFFECTS MODEL (JEM)
ID Code (A=Service Ready, B=Not Service Ready) : A		MDAP/MAIS Code:
<p>Remarks: The Joint Effects Model (JEM) is DoD's only accredited model for predicting hazards associated with the release of contaminants into the environment. JEM is being developed in separate increments. JEM 1 is a web-based software program. It is the only accredited DoD computer-based tactical and operational hazard prediction model capable of providing common representation of chemical, biological, radiological, nuclear (CBRN) and toxic industrial chemicals/toxic industrial material hazard areas and effects. It may be used in two variants: as a standalone system, or as a resident application on host command, control, communications, computers, and intelligence systems. JEM 2 is capable of modeling hazards in a variety of scenarios including: counter-force, passive defense, accident and/or incidents, high altitude releases, urban NBC environments, building interiors, and human performance degradation. Battle space commanders and first responders must have a CBRN hazard prediction capability in order to make decisions that will minimize risks of CBRN contamination and enable them to continue mission operations. JEM operates in an integrated fashion with operational and tactical Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) systems, and in a standalone mode. JEM 1 and 2 interface and communicate with the other programs such as JWARN, weather systems, intelligence systems, and various databases.</p> <p>Justification: FY19 supports JEM 2 Software & Installation, Total Package Fielding (TPF), New Equipment Training (NET), and Technical & Engineering Support. Note, JEM 2 is a software product, and there are no associated quantities.</p>

Remarks:																			
CBRN-IS aligns Chemical Biological Defense (CBD) information technologies in order to utilize a common software architecture, eliminate duplicative integration effort, produce interoperable system components, and minimize time-to-market of end user capability. CBD information technology is assembled from the inventory of available capability in place of the current paradigm where functionality only exists within the individual Joint Effects Model (JEM), Joint Warning and Report Network (JWARN), and Biosurveillance Portal (BSP) applications. CBRN-IS aligns with the Joint Information Environment (JIE), such as milCloud, in order to field the integrated capabilities. The JIE is the cornerstone of the DoD's future - providing a secure information framework for our national senior leaders and joint force commanders, command and control forces that deliver responsive, decisive actions from any device; anytime and anywhere.																			
Justification: FY19 supports Technical and Engineering Support. Costs associated with hosting CBRN-IS on milCloud in support of world-wide accessibility for warfighters.

Remarks:

The Joint Nuclear Biological and Chemical Reconnaissance Systems (JNBCRS), including the Stryker Nuclear Biological and Chemical Reconnaissance Vehicles (NBCRV), and NBC equipment suites provide field commanders with point and early warning intelligence for real time field assessment of NBC hazards. The NBC Equipment Suite consists of the Chemical and Biological Mass Spectrometer II (CBMS II), Joint Biological Point Detection System (JBPDS), Chemical Vapor Sampling System (CVSS), training aids, Devices and Simulation Systems (TADSS), the Sensor Processing Group and associated initial and pipeline spares. The NBC Equipment Suite performs the vital function of detecting, identifying, collecting, reporting, and marking NBC hazards and toxic industrial chemicals. Prior year funds were used for the Joint Service Light NBC Reconnaissance System in addition to NBC equipment suites for the Stryker NBCRV.

Remarks:

The CBRN Dismounted Reconnaissance Systems (CBRN DRS) consists of portable, Commercial-Off-The-Shelf and Government-Off-The-Shelf equipment which provides personnel protection from current and emerging CBRN hazards through detection, identification, sample collection, decontamination, marking, and hazard reporting for CBRN threats. The system supports Dismounted Reconnaissance, Surveillance, and CBRN Site Assessment missions which enables more detailed and near real-time CBRN information flow for the Warfighter. In addition the CBRN DRS consists of commercial and government off-the-shelf equipment which will enhance current Civil Support Team (CST) capability to address emerging threats in a domestic incident.

Note: FY18 Navy Configuration costs will be updated with a 1% inflation rate during FY19PB. Total Navy procurement for FY18 is 40 systems that will be completely delivered by November 2018. Army Configuration procurement will be changed to 52 systems that will be completely delivered by December 2018. All updates will be made once the FY18 budget is passed and the system unlocks. The FY18 contract to PBA was awarded in Dec 2017 instead of Jan 2018 and the contract award to FLIR has been delayed until Feb 2018. All production deliveries do not exceed 12 months.

Justification: FY19 funds procure 54 CBRN DRS for the Navy, 16 for the Army, and 65 for the Air Force, as well as, fielding, engineering, and logistics support.

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:																		
The NGDS is an acquisition family of systems to provide increments of capability over time across many echelons of the Combat Health Support System. The mission of the NGDS is to provide Chemical, Biological and Radiological (CBR) threat and infectious disease identification and U.S. Food and Drug Administration (FDA) cleared diagnostics to inform individual patient treatment as defined in the approved NGDS Capabilities Development Document (CDD) and CBR situational awareness and disease surveillance as defined in the Common Analytical Laboratory (CALs) CDD. NGDS 1 will significantly improve diagnostic capability for deployable combat health support units while also improving operational suitability and affordability by developing FDA cleared biological warfare agent (BWA) and infectious disease in vitro diagnostic (IVD) assays on existing commercial diagnostic device with a well established FDA regulatory history and pipeline of commercial non BWA infectious disease diagnostic tests. The NGDS 1 program received MS C approval for limited production and deployment in December 2016.																		
NGDS 2 will complement NGDS 1 by developing diagnostics for unmet biological pathogen and toxin threats, chemical and radiological exposures, and to provide capability to lower echelons of care. NGDS 2 will provide additional capability for diagnosis of CBR-induced diseases, suitable for use in far forward environments.

Remarks:																					
The Global Biosurveillance Technology Initiative (GBTI) will characterize laboratory networks and develop algorithms to identify key nodes having the greatest potential to compress the time between disease event initiation and the production of actionable data. In FY19, GBTI will close. The Targeted Acquisition of Reference Materials Augmenting Capabilities (TARMAC) will track projects of mutual interest, formerly under GBTI, with the Chemical Biological Defense Program. Under TARMAC, these projects will cover a variety of activities and will provide data and information used to facilitate the identification of unknown threats and the development of new countermeasures. Key node data generation will be augmented in direct support of existing programs of record.

Justification: FY19 funding is for the procurement of 25 reagents, assays, and supplies, as well as the bioinformatics software and hardware tools (GBTI Equipment Sets) vital in fully utilizing the whole genomic sequencing capability for GBTI stakeholders (Army and Navy Service labs) located in both CONUS and OCONUS locations.

Remarks:

In order to detect anthrax spores (antigen), a critical reagent (genomics material) may be needed for use in a detection platform. Multiple medical and nonmedical platforms require a continuous, quality supply of critical reagents for effective warning to significantly enhance force survivability. They are also required for rapid medical diagnosis to ensure appropriate treatment of exposed personnel. A common set of reagents for relevant platforms are required. The Defense Biological Products Assurance Program (DBPAP) will ensure the standardization, quality, and availability of reagents that are critical to the successful development, test, and operation of Biological Warfare (BW) detection systems and medical biological products. The DBPAP integrates and consolidates all Department of Defense (DoD) biological threat reagents/antibodies detection requirements from System Development and Demonstration (SDD) through production. The DBPAP will ensure the availability of high quality reagents and detection assays (Lateral Flow Immunoassays (LFI), Polymerase Chain Reaction (PCR), electrochemiluminescence (ECL)) throughout the life cycle of all systems managed to include: Biological Integrated Detection System

ID Code (A=Service Ready, B=Not Service Ready) :		MDAP/MAIS Code:
<p>(BIDS), Joint Biological Point Detection System (JBPDS), Joint Biological Agent and Identification Systems (JBAIDS), Joint Biological Tactical Detection System (JBTDs), Whole System Live Agent Testing (WSLAT), Joint Chemical Biological Radiological Water Monitor (JCBRAWM), Joint Portal Shield (JPS), Analytical Laboratory System (ALS), Common Analytical Laboratory Suite (CALS), National Guard Bureau (NGB) Civil Support Teams (CST), Pentagon Force Protection Agency (PFPA), Department of Homeland Security (DHS), US Department of Agriculture (USDA), Food and Drug Administration (FDA), National Institute of Allergy and Infectious Disease (NIAID), Federal Emergency Management Agency (FEMA), and US Capitol Police. The DBPAP also supports the Navy Forward Deployed Lab, the Area Medical Lab (AML), the Army 20th Support Command (Chemical, Biological, Nuclear and High Yield Explosives [CBRNE]), the Army Technical Escort Unit (TEU), the Marine Corps Chemical-Biological Incident Response Force (CBIRF), other counter-terrorist and special reconnaissance teams, and foreign countries. The DBPAP is also responsible for managing the production, storage and validation of Hand Held Immunochromatographic Assays (HHAs), PCR genomic assays, ECL immunoassays, antibodies, and select biological threat agents and genomic reference materials. The DBPAP's PCR assays have been used in the DoD's response effort to the Ebola epidemic in West Africa that began in early 2014. Deployed laboratories from US Army Medical Research Institute of Infectious Diseases (USAMRIID), the Naval Medical Research Center's (NMRC) Biological Defense Research Directorate's (BDRD) Mobile Labs and the 1st AML, as well as interagency partners such as the National Institutes of Health (NIH) National Institute of Allergies and Infectious Disease (NIAID), have all used DBPAP PCR assays to detect Ebola virus during their response missions in West Africa.</p> <p>Note: Antibodies, assays, and reference materials are ordered using outside source funding (DoD and other Government agencies). The CRP program has transitioned to the Defense Biological Products Assurance Program (DBPAP).</p> <p>Justification: FY19 funds support repository management (i.e. production, storage, distribution and quality assurance validation) of assays, antibodies, select biological threat agent and genomic reference materials.</p>

ID Code (A=Service Ready, B=Not Service Ready) : A		MDAP/MAIS Code:
<p>Remarks: The Biosurveillance Portal (BSP) is a web-based enterprise environment that will facilitate collaboration, communication, and information sharing in support of the detection, management, and mitigation of man-made and naturally occurring biological events. BSP bridges the communication gaps in the Biosurveillance domain to provide a central access point for Biosurveillance information and situational awareness for DoD, interagency and allied partners supporting the early identification and response to biological events.</p> <p>BSP provides an integrated suite of web-based components designed to support public health officers, environmental officers, clinicians, physicians, and CBRN personnel as they maintain their situational awareness of local, regional, and global biological threats to the force. BSP does not duplicate existing DoD capabilities, but rather leverages existing tools and technologies to provide users across multiple organizations and disciplines with a centralized "one-stop shop" for all of their Biosurveillance resources.</p> <p>Justification: FY19 funding provides for Total Package Fielding (TPF), New Equipment Training (NET), Technical Engineering support, and software installation and system host provider support.</p>

Exhibit P-5, Cost Analysis: PB 2019 Chemical and Biological Defense Program		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 7001SA1000 / Chemical Biological Situational Awareness	Item Number / Title [DODIC]: JS0005 / COMMON ANALYTICAL LABORATORY SYSTEM (CALS)
ID Code (A=Service Ready, B=Not Service Ready) : B		MDAP/MAIS Code:
<p>Remarks: The Common Analytical Laboratory System (CALS) capability will be modular, scalable and adaptable to a variety of concept of operations (CONOPS) and environmental conditions. Currently, fielded systems have been designed independently by various agencies with the intent of meeting a specific units requirements. As a result, multiple mobile lab configurations exist with differing sustainment tails and lacking in commonality. The system under development will incorporate an open architecture that can accommodate quick installation or removal of equipment as mission requirements dictate. As well, it will provide the ability to rapidly develop a common operating picture allowing first responders and DoD officials to determine the appropriate course of action. Currently, existing fielded systems are (3) configurations, the Field Confirmatory Analytical Capability Set (FC ACS), the Field Confirmatory Integrated System (FC IS), and the Theatre Validation Integrated System (TV IS). The analytical detection systems fielded will be designed to support the specific mission and CONOPS of the gaining unit and be able to detect and/or identify Chemical Warfare Agents (CWAs), Toxic Industrial Chemicals (TICs), Toxic Industrial Materials (TIMs), Biological Warfare Agents (BWAs), and radiological material in environmental samples.</p> <p>Note: Milestone C for the CALS ACS Variant took place in FY17. Due to a delay in the JE-RDAP Contract Award, the program procured long lead analytical components through GSA in FY17 for it's initial LRIP Systems. This award is followed by a JE RDAP Contract action that will complete and deliver the FY17, as well as, the FY18 LRIP Systems.</p> <p>Justification: FY19 PROC Funding procures (4) FC IS LRIP systems and (54) FC ACS systems, and includes Training Assets for Test Player Training (TPT) and New Equipment Training (NET), Consumables and warranty/CLS costs for all but the CST fielded systems, Program Management (PM) and Other Government Agencies (OGA's).</p> <p>RDT&E Code B Item: 0603884BP/Proj CM4; 0604384BP/Proj CM5; 0606384BP/Proj CM7</p> <p>CM4/CALS: RDT&E FY16 and Prior - 41.368M CM5/CALS: RDT&E FY16 and Prior - 95.951M; FY17 - 12.223M; FY18 - 21.411M; FY19 - 6.000M; FY20 - 11.200M</p> <p>DEVELOPMENT/TEST STATUS AND MAJOR MILESTONES</p> <p>CALS - Milestone C - (FC ACS) (May 2017 to Jul 2017) CALS - LRIP (FC ACS) (Apr 2018 to Sep 2018) CALS - Operation Test - (FC ACS) (Jan 2019 to Dec 2019) CALS - Full Rate Production - (FC ACS) (Jul 2019 to Sep 2022) CALS - Critical Design Review (FC IS) (May 2017 to Jun 2017) CALS - Developmental Test (FC IS) (Jan 2018 to Sep 2018) CALS - System Verification Review (FC IS) (Jan 2019 to Mar 2019) CALS - Functional Configuration Audit (FC IS) (Jan 2019 to Mar 2019) CALS - Log Demo (FC IS) (Jul 2018 to Nov 2018) CALS - Milestone C (FC IS): Apr 2019 CALS - LRIP (FC IS) (Jul 2019 to Sep 2019) CALS - Operational Test (FC IS) (Jan 2020 to Mar 2020) CALS - Full Rate Production (FC IS) (Aug 2020 to Sep 2022) CALS - Critical Design Review (TV IS): Jan 2018 CALS - Developmental Test (TV IS) (Jun 2018 to Feb 2019) CALS - Functional Configuration Audit (TV IS) (Jul 2019 to Aug 2019) CALS - Log Demo (TV IS) (Nov 2018 to Jan 2019) CALS - Milestone C (TV IS): Sep 2019</p>

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:

The Integrated Chemical Biological Radiological and Nuclear Response Enterprise (CBRNE) rapid response capability packages are required for the National Guard Bureau's (NGB) Special Purpose Units (SPU) Chemical Biological Equipment (CBE) Chemical Biological Radiological and Nuclear Response Enterprise (CRE) which consists of the CBRNE Enhanced Response Force Package (CERFP), the USAR Chemical Recon Platoons, Decon Platoons and Defense Support of Civil Authority CBRN Response Force (DCRF), and the 20th Support Command Nuclear Disablement (NDT) and CBRNE Teams. The purpose of this program is to address legacy requirements gaps/deficiencies for SPU-CBE's where they exist through the streamlined acquisition of commercial-off-the-shelf (COTS)/government-off-the-shelf (GOTS) capability upgrades that incorporate proven advancements in technology to satisfy mission performance standards. Chemical, Biological, Radiological, Nuclear (CBRN) and High-Yield Explosive (CBRNE) protection is required for CONUS/OCONUS DoD installation physical structures as well as military personnel and others within the perimeter of the military reservation.

Justification: FY19 Program procures 350 National Fire Protection Association (NFPA) Class Two Personal Protective Equipment (PPE) suits, 600 NFPA Class Three PPE suits, 2,192 HAZMAT Boots, and 2,542 Filter Canisters for the COTS PPE Stockpile efforts in support of United States Army North (ARNORTH) DCRF and Command and Control CBNRE Response Element (C2CRE) units.

Remarks:

The Special Purpose Units-Chemical Biological Equipment (SPU-CBE) program provides the integrated CBRNE rapid response force, which includes the Chemical Biological Incident Response Force (CBIRF), the capability packages that are required for the United States Northern Command to execute Department of Defense Support of Civil Authority (DSCA) missions. The purpose of this program is to address legacy requirements gaps/deficiencies for SPU-CBEs where they exist through the streamlined acquisition of commercial-off-the-shelf (COTS)/government-off-the-shelf (GOTS) capability upgrades that incorporate proven advancements in technology to satisfy mission performance standards. Chemical, Biological, Radiological, Nuclear (CBRN) and High-Yield Explosive (CBRNE) protection is required for CONUS/OCONUS DoD installation physical structures as well as military personnel and others within the perimeter of the military reservation.

Justification: FY19 program procures 28 National Fire Protection Association (NFPA) Class One Personal Protective Equipment (PPE) suits, 243 NFPA Class Two suits, 443 NFPA Class Three suits, 30 CBRN/HAZMAT boots and 1,733 Filter Canisters.

Description:

Specific protection efforts provided include protective masks, respiratory systems, protective clothing, collective protection on numerous platforms, and medical countermeasure pre-treatments and prophylaxes.

Individual protection efforts are focused on equipment that both improves current protection levels and reduces the physiological and logistical burden on the individual soldier, sailor, airman or marine. The goal is to procure equipment that will allow for the individual to operate in a contaminated Chemical and Biological (CB) environment with minimal degradation in his/her performance. Individual protection programs funded include; (1) the Joint Service Aircrew Mask (JSAM) system is a lightweight Chemical, Biological, Radiological and Nuclear (CBRN) protective mask consisting of mask, filter, blower, and accessories optimized to minimize impact on the wearer's performance, maximize its ability to interface with aircrew protective clothing, and provide improved field of view when compared to current protective masks; (2) the Joint Service General Purpose Mask (JSGPM) is a lightweight, protective Nuclear, Biological and Chemical (NBC) mask system. The JSGPM will provide above-the-neck, head/eye/respiratory protection against CB agents, radioactive particles, and Toxic Industrial Materials (TIMs); and (3) the Uniform Integrated Protection Ensemble (UIPE) is an individual CBRN protective system with the capability that enables selection of a tailored material solution based on the expected threat level for any given mission or platform; (4) the Joint Service Lightweight Integrated Suit Technology (JSLIST) is a state-of-the-art chemical protective ensemble that reduces heat stress, provides full compatibility with all interfacing equipment to promote commonality and standardization to maximize resources and eliminate redundancy among the Services.

Collective Protection (CP) provides life-sustaining and continued operational capabilities to the Warfighter and their equipment in support of military missions and operations as a seamless, integrated sub-system to all manner of platform, which utilizes state-of-the-art CBRN protective technologies. The CB Collective Protection systems will be smaller, lighter, less costly, and more easily supported logistically at the crew, unit, ship, and aircraft level. Collective protection platforms include shelters, vehicles, ships, aircraft, buildings, and hospitals. Collective protection programs funded include; (1) The Joint Expeditionary Collective Protection (JECPP) provides the joint expeditionary forces a CP capability which is lightweight, compact, modular, and affordable. The JECPP family of systems allows the application of CP to transportable soft-sided shelters, enclosed spaces of opportunity, and in remote austere locations as a standalone resource. JECPP will be capable of protecting personnel groups of varying size, unencumbered by individual protective equipment (IPE), from effects of CB agents, TIMs, radiological particles, heat, dust, and sand; and (2) mounted on a platform, the Chemical Biological Protective Shelter (CBPS) M8E1 provides a mobile, contamination free, environmentally controlled working area for medical, combat service, and combat service support personnel to obtain relief from the continuous need to wear CB protective clothing for 72 hours of operation.

Decontamination efforts facilitate the removal and detoxification of contaminants from materials without inflicting injury to personnel or damage to equipment or the environment. Procured items are environmentally friendly, reduce logistics burdens, and are effective against traditional and nontraditional agents on sensitive and non-sensitive equipment. Contamination control techniques have been developed which minimize the extent of contamination pickup and transfer and maximize the ability of units to remove contaminants both on-the-move and during dedicated decontamination operations.

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 Chemical and Biological Defense Program		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 03: Chemical/Biological Defense / BSA 1: CBDP		P-1 Line Item Number / Title: 8001PH1000 / CB Protection & Hazard Mitigation
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>Decontamination programs funded include; (1) The Decontamination Family of Systems (DFoS) General Purpose Decontaminant (GPD) will procure Traditional / Non-Traditional Agent (NTA) decontaminant(s) that will provide the Warfighter an increased capability to decontaminate/mitigate traditional agents / NTAs on personnel, equipment, vehicle interiors/exterior, terrain, and fixed facilities; (2) The DFoS Joint Service Equipment Wipe (JSEW) will procure chemical decontamination wipes, providing an increased capability to not only decontaminate non-sensitive but also sensitive equipment exposed to agents/contamination; (3) The DFoS Contamination Indicator Decontamination Assurance System (CIDAS) is a contamination indicator/decontamination assurance technology. It will consist of an indicator and an applicator, with three applicator configurations (small-scale, tactical large scale, and reusable large scale applicators) and three indicator formulations (nerve training, nerve and blister indicators). The indicator will be sprayed on tactical vehicles, aircraft, ships, crew-served weapons, and individual weapons that may have been exposed to traditional and non-traditional chemical contamination. DFoS CIDAS is a new capability for the Joint Forces that will reduce the logistics burden of decontamination by indicating presence and location of traditional (Nerve and Blister) and non-traditional chemical agents on militarily relevant surfaces pre- and post-decontamination; (4) Joint Biological Agent Decontamination System (JBADS) will provide the capability to conduct biological agent decontamination of the interior and exterior of aircraft and vehicle platforms; (5) the Contaminated Human Remains System (CHRS) program will procure systems with the capability to protect personnel handling and processing human remains contaminated with Chemical Biological Radiological (CBR) contamination for safe transport from OCONUS to CONUS. The CHRS program provides the warfighter the capability to safely handle, transport, and temporarily store or bury contaminated human remains in a theater of operations or in the United States.</p> <p>Medical Countermeasures (MCMs) include capabilities to protect the warfighter against CBR threats and mitigate illness, suffering, and death. MCMs will provide end-to-end countermeasures against emerging infectious diseases, genetically engineered threats, naturally occurring biological phenomena, novel chemical agents, and radiological threats. Program efforts include core medical efforts aimed at delivering pretreatments/prophylaxes and therapeutics to the warfighter. MCMs in development by the CBDP traditionally fall into one of two categories: 1) pretreatments/prophylaxes such as a plague vaccine and 2) post-exposure, pre/post-symptomatic therapeutics such as the Advance Anticonvulsant System. A family-of-systems approach for medical defense against threats is required to provide protection, to sustain performance in multiple environments, and to provide for self-aid/buddy-aid and medical treatment of CBR casualties. Fielding of prophylactic, pre-treatment, and therapeutic drugs and medical devices requires Food and Drug Administration (FDA) approval. Medical Countermeasure programs funded include; (1) the Advanced Anticonvulsant System (AAS) consists of the drug midazolam in an auto-injector to be used as treatment for nerve agent induced seizures and will be a replacement for the currently fielded Convulsant Antidote for Nerve Agent (CANA) auto-injector, which uses diazepam, and (2) Smallpox Vaccinia Immune Globulin Intravenous (VIGIV).</p>

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

Operational forces across the continuum of global, contingency, special operations/low intensity conflict, counternarcotics, and other high-risk missions have an immediate need to survive and sustain operations in a CB threat environment. Efforts in this BLIN provide protective equipment and medical countermeasures that supports protection prior to potential operations and mitigates the hazard if exposed.

Exhibit P-5, Cost Analysis: PB 2019 Chemical and Biological Defense Program		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 8001PH1000 / CB Protection & Hazard Mitigation	Item Number / Title [DODIC]: JI0002 / JS AIRCREW MASK (JSAM)
ID Code (A=Service Ready, B=Not Service Ready) : B		MDAP/MAIS Code:
<p>The Joint Service Aircrew Mask (JSAM) system is a lightweight Chemical, Biological, Radiological and Nuclear (CBRN) protective mask consisting of mask, filter, blower (except JSAM SA), and accessories incorporating state-of-the-art technology to protect U.S. Forces from anticipated threats. The JSAM systems will be developed to support multiple aircraft platforms which will integrate with aircraft subsystems: Aircrew Life Support Equipment (ALSE), seating, portable aircrew systems, restraint systems, Night Vision Goggles (NVGs), and communications systems. The mask is optimized to minimize impact on the wearer's performance, maximize its ability to interface with aircrew protective clothing, and provide improved field of view when compared to current protective masks.</p> <p>The JSAM Rotary Wing (RW) Mask will provide head, eye, respiratory, and CB protection and "don in flight" capability for general purpose, rotary wing aircrew in all four Services and the US Coast Guard. The JSAM for Tactical Aircraft (JSAM TA) will provide CB pressure breathing for altitude and anti-G protection. The JSAM for Strategic Aircraft (JSAM SA) will provide CB protection for aircrew positions that only need pressure breathing for altitude. Both the JSAM TA and JSAM SA will provide flame resistance, JSAM TA will provide demist/emergency demist.</p> <p>Justification: FY19 will procure 4,200 JSAM RW production masks, training, tooling, and initial spares. FY19 will procure 4,535 JSAM SA production masks, including initial spares, to be used for fielding to various United States Air Force (USAF), United States Navy (USN) and United States Army (USA) aircraft. JSAM SA will conduct New Equipment Training, procure spare parts and support equipment. FY19 will also procure 645 JSAM TA production masks including transit cases, initial spares/support equipment, and training to meet IOC for United States Marines (USMC).</p> <p>RDT&E Code B Item: 0604384BP/Proj IP5</p> <p>IP5/JSAM RW: RDT&E FY16 and Prior - 24.389M; FY17 - 1.393M; FY18 - 0.382M IP5/JSAM SA: RDT&E FY16 and Prior - 6.169M; FY17 - 4.747M; FY18 - 2.097M; FY19 - 2.105M; FY20 - 1.721M; FY21 - 1.338M; FY22 - 0.186M IP5/JSAM TA: RDT&E FY16 and Prior - 4.615M; FY17 - 5.557M; FY18 - 2.954M; FY19 - 2.329M</p> <p>DEVELOPMENT/TEST STATUS AND MAJOR MILESTONES</p> <p>JSAM RW - MS C/ Low Rate Initial Production Decision: Jan 2015 JSAM RW - USA/USAF Multi Service Operational Test and Evaluation (Feb 2015 to Apr 2015) JSAM RW - USN/USMC Multi Service Operational Test and Evaluation (Nov 2016 to Feb 2017) JSAM RW - USA/USAF Full Rate Production: Nov 2016 JSAM RW - USN/USMC Full Rate Production: Feb 2018 JSAM RW - USAF Initial Operability Capability: Sep 2018 JSAM RW - USA Initial Operational Capability: Sep 2018 JSAM RW - USAF Full Operational Capability: Oct 2018 JSAM RW - USN/USMC Initial Operational Capability: Oct 2018 JSAM RW - USA/USN/USMC Full Operational Capability: Sep 2024 JSAM SA - Developmental Testing (Mar 2014 to Jun 2016) JSAM SA - MS C / Low Rate Initial Production Decision: Oct 2016 JSAM SA - USAF/USN Operational Testing (Mar 2017 to Aug 2017) JSAM SA - Full Rate Production: Jan 2018 JSAM SA - USAF/USN Initial Operational Capability (Apr 2018 to Jul 2018) JSAM SA - USA Operational Testing (Apr 2018 to Jun 2018) JSAM SA - USA Initial Operational Capability: Apr 2019 JSAM SA - USAF/USN/USA/USMC Integration and Airworthiness Certification Testing (Jan 2017 to Dec 2021) JSAM TA - AP22P (A) Safe to Fly Certification (Dec 2014 to Dec 2018) JSAM TA - Integrated (Developmental/Operational) Testing (Dec 2015 to Sep 2018) JSAM TA - AP22P (A) ECP Integration (Dec 2015 to Dec 2018)</p>

<p>Remarks:</p> <p>The Joint Service General Purpose Mask (JSGPM) is a lightweight, protective Nuclear Biological Chemical (NBC) mask system. It incorporates state-of-the-art technology to protect the U.S. Joint Forces from anticipated threats. The JSGPM provides above-the-neck, head/eye/respiratory protection against Chemical and Biological (CB) agents, radioactive particles, and Toxic Industrial Materials (TIMs). The mask design is optimized to minimize impact on the wearer's performance, and to maximize its ability to interface with fielded and future Joint Service equipment and protective clothing. The JSGPM mask system replaces the M40/M42 series of masks for Army and Marine ground and combat vehicle operations and the MCU-2/P series for Air Force and Navy ground and shipboard applications. In addition, the JSGPM replaces the M45 mask in the Land Warrior program. This can significantly reduce the number of masks that will have to be logistically supported by the Department of Defense. The M50 is the ground/ship version of the JSGPM, the M51 is the combat vehicle crewman version of the JSGPM, and the M53 is the special operations version of the JSGPM.</p> <p>Justification: FY19 funds procure 3,683 JSGPM Ground/Ship (M53A1) masks, training, initial spares, and total package fielding to support Army requirements.</p> <p>(†) indicates the presence of a P-5a</p>

Remarks:

The Uniform Integrated Protection Ensemble (UIPE) is a Chemical, Biological, Radiological, Nuclear (CBRN) protective system offering the capability to select a tailored material solution based on the expected threat level commensurate with operational mission requirements. Where appropriate, a family of systems approach that meets the scope of UIPE individual protection capability needs will be utilized. The objective of UIPE is to fully integrate CBRN and toxic industrial material (TIM) protections into an ensemble, identical in fit and form to the combat uniform (including ancillary equipment, mask - helmet integration, and protective boots and gloves), thus negating the need for separate protective ensemble components. This integrated protection approach will result in increased warfighter operational performance in a CBRN environment. The UIPE program will develop, integrate, test, procure and field incremental capability solutions that are modular in function and offer improvements in form and fit over current systems; the program will explore trade-space in areas such as protection level, heat stress, durability, antimicrobial properties, flame resistance, launderability, self-detoxification, and protection time in order to provide capabilities that afford maximum utility to the warfighter. Where appropriate modeling and simulation tools will be used to lower UIPE program risks, reduce costs, and ensure a high confidence in selected technologies. UIPE is aimed specifically at providing enhanced individual protection capabilities to the warfighter through reduction of physiological and psychological effects associated with CBRN protective garment thermal burden, weight, and bulk. The UIPE program will consider modernization in order to ensure that the warfighter retains access to state of the art capability to support future operational mission requirements. The UIPE Increment 1 protective system offers the capability to select a tailored material solution based on the expected threat level commensurate with operational mission requirements. This ability to tailor the type and level of the protective system will result in optimized protection, thereby minimizing physiological and psychological burdens associated with the weight, bulk, thermal strain, and encumbrance of wearing CBRN protective equipment on the Warfighter and affording the lowest impact on the operational mission.

Justification: FY19 procures 14,275 UIPE Increment 1 garments to meet Joint Service CBRN equipment requirements. FY19 also provides production lot testing, ancillary equipment (socks, gloves, and neck dams), and engineering support.

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:																		
Joint Expeditionary Collective Protection (JECP) provides the Joint expeditionary forces a collective protection (CP) capability which is lightweight, compact, modular, and affordable. The JECP family of systems (FoS) include tent kits, structure kits, and standalone shelters that allow the application of CP to transportable soft-side shelters, enclosed spaces of opportunity, and remote austere locations as a standalone resource. JECP is capable of protecting personnel groups of varying size, unencumbered by individual protective equipment (IPE), from effects of chemical and biological (CB) agents, radiological (R) particles, toxic industrial materials (TIMs), heat, dust, and sand.																		
Tent kits consist of a CB protective liner, airlock system, and a CB filtration blower system. Tent Kit-1 interfaces with the US Navy's Base-X 303 and 305 general purpose tents and all organic Base-X equipment including the environmental control unit and power systems. Tent Kit-2 interfaces with the Air Force Small Shelter System (ASSS) general purpose tents and all organic ASSS equipment including the environmental control unit and power systems.																		
Structure kits may include a floorless CB protective liner or a CB protective liner with a floor, an airlock system, and a CB filtration blower system. Structure Kit-Improved (SK-I) is retrofitted to structures such as office buildings, warehouses, or hangars that provide coherent walls and roofing, ventilation systems, doors and windows, and power. Structure Kit-Unimproved (SK-UI)/Standalone Shelter System-Medium (SA-M) are retrofitted to structures such as huts, sheds or other rudimentary structures (SK-UI) that do not have any available electrical power, but provide environmental and other basic elemental protection. This configuration uses a passive CP system relying on natural airflow through protective panels.																		
Standalone large shelter (SA-L) is an all encompassing active CP shelter for multi-service use for up to 20 people. SA-L provides a general purpose tent system, CB protective liner, an airlock system, a CB filtration blower system, an environmental control unit and all necessary power and ancillary equipment.																		
Justification: FY19 procures 73 JECP systems in the following configurations: 21 tent kit 2s, and 52 standalone large shelters.

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:

The Services need a highly mobile, self-contained collective protection system which can provide a contamination free working area for Echelon I and II medical treatment facilities and other selected units. The Chemical and Biological Protective Shelter (CBPS) satisfies this need and replaces the M51 Chemical Protective Shelter. The system consists of a Collectively Protected (CP) shelter modularized and integrated into a service selected prime-mover. The system is completely self contained, self powered, mobile, and adaptable to a variety of missions. CBPS relieves medical, combat service, and combat service support personnel from wearing chemical and biological protective clothing. The system is capable of operating continuously for 72 hours providing a contamination free environmentally controlled working area.

Justification: FY19 procures 8 CBPS CB modules, and provides total package fielding, new equipment training, and engineering support.

(*) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:

The Decontamination Family of Systems (DFoS) - General Purpose Decontaminant (GPD) Program will provide thorough and operational decontamination capabilities for Hardened Military Equipment (HME), to include tactical vehicles, shipboard surfaces, crew-served weapons, and individual weapons, in hostile and non-hostile environments where it is reasonable to expect chemical, biological, radiological, and nuclear (CBRN) and Non-Traditional Agents (NTA) weapons will be employed or Toxic Industrial Materials (TIMs) may be encountered. The DFoS GPD will be employed within the integrated battle space as a means to decontaminate hazards posing threats to military personnel and operations including peacekeeping, stability and support, or consequence management operations. The DFoS GPD will be applied directly to the contaminated surface and be capable of reducing/neutralizing Chemical and Biological (CB) contamination to thorough levels within thirty (30) minutes of application. The DFoS GPD will be compatible with hardened materials consistent with those found on a Detailed Equipment Decontamination (DED) line. The DFoS GPD will be safe, suitable and compatible with HME and be operable in all operational environments that have been exposed to CB contamination.

The Decontamination Family of Systems (DFoS) - Joint Service Equipment Wipe (JSEW) Program will provide Warfighters with an immediate/operational decontamination capability for sensitive and non-sensitive equipment that has been exposed to chemical agents/contamination. There is currently no documented decontamination capability that is non-destructive to sensitive equipment. The DFoS JSEW will be applied directly to contaminated sensitive and non-sensitive equipment and will be capable of removing gross contamination and reducing contact hazard immediately without leaving a residue. The DFoS JSEW will provide the means to minimize or negate the vulnerability to and effects of chemical attacks for peacekeeping, stability and support or consequence management operations.

The Decontamination Family of Systems (DFoS) Contamination Indicator Decontamination Assurance System (CIDAS) Program will provide the Joint Forces with a new capability to reduce the logistics burden of decontamination by indicating presence and location of traditional (Nerve and Blister) and non-traditional chemical agents on militarily relevant surfaces pre- and post-decontamination. It will consist of an indicator and an applicator, for which there will be three applicator configurations (small scale, tactical large scale, and reusable large scale) and three indicator formulations (nerve training, nerve and blister). Post application, the DFoS CIDAS will not cause material degradation other than that which is allowable in service platforms' specifications to complete primary mission functions. DFoS CIDAS reusable large scale applicators must achieve an Operational Availability of 0.90, measured continuously during a thorough decontamination mission pulse in accordance with the DFoS CIDAS Army Operational Mode Summary / Mission Profile. The DFoS CIDAS indicator will not degrade Individual Protection Equipment (IPE), below minimum required IPE Chemical Warfare Agent protection performance, in less than 12 hours or according to IPE CWA protection time requirements whichever is less.

Remarks:																		
The JBADS will provide the capability to conduct biological agent decontamination of the interior and exterior of the C-130 aircraft. The JBADS is a capability set that will include a shelter to encapsulate an airframe, a decontamination delivery system (e.g. hot-humid air-blower, etc.), environmental control and monitoring system(s), and other ancillary components required to ensure efficacious biological agent decontamination. It will provide the capability to decontaminate biologically contaminated airframes to safe levels and allow more rapid return to service. Future capability may address biological decontamination of other airframes and vehicles.																		
Justification: FY19 Follow on activities supporting the First Article Build procured in FY18.

Remarks:																		
The Advanced Anticonvulsant System (AAS) will consist of the drug midazolam in an autoinjector for use in treating nerve agent induced seizures and will replace the currently fielded Convulsant Antidote for Nerve Agent (CANA) autoinjector, which uses diazepam. Procurement funds will support Initial Operational Capability (IOC) supporting the AAS phase-in/CANA phase-out plan along with transitioning the program to the Defense Logistics Agency (DLA) for sustainment. FDA approval anticipated 2QFY20 with IOC in FY20 and FOC in FY23.																		
Justification: Justification: FY19 funding supports procurement of 21,000 autoinjectors consisting of midazolam.

Remarks:																			
The biological vaccine procurement program is critical for national defense. These products directly support the Secretary of Defense program to maintain a DoD capability to acquire and stockpile adequate quantities of all Biological Warfare (BW) vaccines to protect the programmed force against validated BW agents. Items currently in the stockpile are the FDA licensed Anthrax Vaccine Adsorbed (AVA), Smallpox vaccine, and Vaccinia Immune Globulin Intravenous (VIGIV). Funding supports vaccine and licensed biologic production, quality assurance and control, equipment validation, process change management, documentation control, and all FDA license maintenance and post-approval commitments (Phase 4 clinical trials). The annual vaccination program for the Services is funded by the Defense Health Program.																			
Justification: FY19 funds provide support for VIGIV associated with emergency use product.

Remarks:																					
The Contaminated Human Remains System (CHRS) program will procure systems with the capability to protect personnel handling and processing human remains contaminated with Chemical Biological Radiological (CBR) contamination for safe transport from OCONUS to CONUS. The CHRS program provides the warfighter the capability to safely handle, transport, and temporarily store or inter contaminated human remains in a theater of operations or in the United States.

Remarks:																		
The Joint Service Lightweight Integrated Suit Technology (JSLIST) is a Joint Service chemical protective ensemble and production program. The protective clothing program integrates technological improvements in protective military garments, providing service members chemical/biological (CB) protection in all combat theaters. The JSLIST provides state-of-the-art chemical percutaneous protection as well as reduced heat stress, weight and bulk with increased durability and improved fit over fielded legacy systems. In addition, the JSLIST provides commonality and standardization by fielding the same suit to the Joint Forces. Senior Level Enterprise Review impacted the final POM18 position and resurrected the JSLIST budget line which now provides resources in FY18 through FY23. JSLISTs purchased in these years will provide capability to the Joint Services until UIPE Family of Systems is scheduled for production and begins fielding.

Description:												
<p>These funds provide for the purchase of the latest technologically advanced electronic information technology equipment to support DCAA's contract audit mission. In order to efficiently perform our audit reviews, it is essential that DCAA auditors be provided with equipment and software that are compatible with defense contractors' information technology systems, that provide access to the Agency's Management Information System and to the Internet for researching audit issues, and that provide the capability to securely electronically transmit and receive audit documents. In addition, up-to-date equipment is needed to satisfy the hardware/software/communication requirements for Information Assurance compliance as well as to interface with a variety of DoD standard systems such as: Defense Business Management System (DBMS), Defense Civilian Personnel Data System (DCPDS), Defense Civilian Pay System (DCPS), Defense Property Accountability System (DPAS), Defense Travel System (DTS), Program Budget and Accounting System (PBAS), and the Standard Procurement System (SPS). Procurement funds will be applied to the continued upgrading of DCAA's Integrated Information Network automation efforts.</p>												
FY 2017												
<p>DCAA Integrated Information Network. (\$7.809 million) In FY 2017, funding in the amount of \$700,000 is required to support the Agency's communication projects involving access to DoD standard systems and to the Internet and World Wide Web. Funding in the amount of \$816,000 is required for the replacement of local area network servers that have reached the end of their useful systems life and storage to meet DoD requirements. The components will replace those that are technologically obsolete and no longer capable of running current applications software or that are non-operational and the cost to repair exceeds the cost to replace. Funding in the amount of \$1,448,000 is required for the replacement of the software used by DCAA to aid in the creation and building of the audits DCAA produces. Funding in the amount of \$4,845,000 is required to address emergency warfighter readiness. Funds are required to address the needed infrastructure improvements for compute and data storage capability to improve DCAA network bandwidth and accommodate increased data traffic associated with consolidated servers and new audit software. The updated infrastructure replaces and consolidates over 250 remote servers into two locations. With the upgrades, multiple auditors and audit managers will have the capability to and directly access prior audit packages, work audits, perform real-time reviews, maintain audit oversight, and permit progress transparency, all simultaneously on the same audit. The collective result will provide the DCAA audit workforce with dependable, accessible and functional infrastructure required to perform their audit mission. Without this infrastructure audit software, DCAA will lose the opportunity gain impactful audit efficiencies that will keep our audit resources viable and better serve the Department.</p>												
FY 2018												
<p>DCAA Integrated Information Network. (\$1.475 million) In FY 2017, funding in the amount of \$700,000 is required to support the Agency's communication projects involving access to DoD standard systems and to the Internet and World Wide Web. Funding in the amount of \$775,000 is required for the replacement of local area network servers that have reached the end of their useful systems life and storage to meet</p>

DoD requirements. The components will replace those that are technologically obsolete and no longer capable of running current applications software or that are non-operational and the cost to repair exceeds the cost to replace.		
FY 2019 DCAA Integrated Information Network. (\$2.542 million) In FY 2019, funding in the amount of \$1,089,000 is required to continue the scheduled procurement of caseware licensing for the software used by DCAA to aid in the creation and building of the audits DCAA produces. Funding in the amount of \$1,453,000 is required to support the life-cycle replacement of technologically obsolete infrastructure.

Description:												
<p>The Major Equipment program primarily supports two main DCMA efforts: "Mechanization Of Contract Administration Services (MOCAS) Modernization" and the "IT and Service Management (ITSM) Platform". Included in the Major Equipment program is the procurement and replacement of passenger carrying vehicles to support the DCMA overseas field offices.</p> <p>DCMA's requirement to procure replacement passenger carrying vehicles supports DCMA's overseas contract management mission. Currently, DCMA maintains field offices in Germany, the Middle East, and the Pacific Rim requiring such vehicles. DCMA is continuing to pursue efforts to convert our overseas fleet from owned passenger carrying vehicles to long term commercial leases or leases with the General Services Administration (GSA) where available. GSA vehicle lease services are currently not available outside of Germany; therefore, DCMA continues to require passenger carrying vehicle procurement authority for locations outside of Germany.</p> <p>MOCAS is a hardware & software computing platform used by DCMA & DFAS to administer and pay contracts issued to Defense contractors. As an integrated contract administration and payment system, MOCAS is designed to provide DCMA and DFAS with the electronic information necessary to accomplish their mission of contract and payment administration. In order to implement the MOCAS technical architecture modernization, DCMA will procure the necessary servers, storage, software, networking, and hardware.</p> <p>The IT and Service Management (ITSM) Platform is used by both internal DCMA personnel and external DCMA customers to submit service center requests and receive feedback on provided Contingency Contract Administration Services. Survey and feedback data are used to initiate the appropriate corrective actions specifically where necessary upon receipt of negative surveys and/or in the event negative trends become apparent. The surveys within the module address areas such as: Pre-Award Acquisition Planning Support; Major Program Support; Engineering Support Services; Delivery and Schedule Management Support; Contract Management Support; Quality Assurance & Product Acceptance Support ; and, various miscellaneous support activities. It allows training team members to formally request the development of IT training and create training plans to address apparent inefficiencies or negative trends. It is comprised of both Commercial Off-the-Shelf (COTS) and Government Off-The-Shelf (GOTS) modules implemented through an IT Service Center Platform called ChangeGear.</p>												
Justification:												
<p>In FY 2019, the DCMA has a requirement to procure replacement passenger carrying vehicles (\$.050) in support of the DCMA's overseas contract administration operations conducted throughout the world. The DCMA is replacing aging owned passenger carrying vehicles overseas and continuing to convert fleet to long-term commercial leases where available. With the General Services Administration's (GSA) limited support of leasing vehicles outside of Germany, the DCMA will continue to require passenger carrying vehicles procurement authority. In FY 2019, The Major Equipment program also enables the DCMA</p>

<p>to continue procurement of servers, storage, software, networking, and hardware for implementing the modernized MOCAS Technical architecture (\$1.924). In FY 2019, (\$1.899) will be used for implementing the IT and Service Management (ITSM) Platform performance analytics, security operations, governance, and risk compliance capabilities within ServiceNow functionality.</p>

Description:

The Department of Defense Human Resources Activity (DHRA) is a consolidated Field Activity under the direction and control of the Under Secretary of Defense (Personnel and Readiness) (USD (P&R)) established for the collection and interaction of manpower and personnel data to support Department-wide tracking, analysis, research, studies, and a wide variety of reporting requirements. DHRA provides functional information management, civilian personnel policy support, and civilian personnel administrative services to DoD Components and activities. The scope of operations is necessarily broad and encompasses all aspects of data collection and utilization of Defense manpower and personnel data records to support DoD-wide analysis, studies, research, and reporting requirements. DHRA is the responsible organization within DoD for the interchange of automated manpower data with other government agencies.

In FY 2017, as a result of a Business Process and Systems Review, DHRA implemented a major reorganization impacting the DHRA procurement budget. The most significant aspect of this reorganization, from a procurement perspective, was the integration of the Enterprise Human Resources Information System (EHRIS) into the Defense Manpower Data Center's (DMDC) portfolio of information technology (IT) initiatives. Additionally, DHRA implemented a major reorganization of the DMDC programs to more accurately align budget program lines with the DHRA Information Technology (IT) data reported in the DHRA IT Budget. The Defense Eligibility and Enrollment System (DEERS); Data Governance/Data Acquisition & Decision Support (EDS); Real Time Automated Personnel Identification System (RAPIDS); Common Access Card (CAC); the Cyber Security program was integrated into the DEERS and RAPIDS programs, with CAC being retained as part of the RAPIDS program. Synchronized Pre-deployment and Operational Tracker (SPOT) was integrated into a Personnel Accountability (PA) program, which also includes Joint Personnel Accountability Reconciliation and Reporting (JPARR), and Noncombatant Evacuation Operations (NEO) Tracking System (NTS).

Enterprise Human Resources Information System (EHRIS) includes the Defense Civilian Personnel Data System (DCPDS), the Department's enterprise civilian human resources (HR) transactional system supporting 800,000 employees, representing approximately one-third of the federal government's civilian work force. Network and system operations span worldwide, with 24/7 operations that support 19 Regional Service Centers and over 300 Customer Support Units. The current focus of DCPDS is the expansion of these efficiencies through the consolidation of DCPDS operations to a single database and expansion of capabilities to support integrated benefits processing and data management supporting the Department's Force of the Future initiative.

Defense Eligibility and Enrollment System (DEERS) is DoD's only authoritative data repository of all manpower, personnel (military, civilian, selected contractors, retirees, and family members), benefit eligibility, and TRICARE enrollments worldwide. Provides and maintains medical and personnel readiness information on Uniformed Services members, DoD and Medicare eligibility status, Federal Service member's Group Life Insurance enrollment, the central repository for immunizations, and the single portal for DoD benefit information. The program maintains enrollment and eligibility verification data from existing DEERS client applications and interfacing systems, as well as the DoD Components and non-DoD information systems.

Exhibit P-40, Budget Line Item Justification: PB 2019 DoD Human Resources Activity		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 20: Major Equipment, DHRA		P-1 Line Item Number / Title: 500 / Personnel Administration
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0901220SE	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>RAPIDS is the infrastructure that supports the issuance of DoD and Uniformed Services identification cards and provides on-line updates to DEERS, thus providing an enterprise-wide credential for both physical and logical access to DoD facilities and networks. These DoD credentials use the DEERS database for authentication and personnel information. RAPIDS is also the primary source for adding family members to DEERS, and it provides the seven Uniformed Services the means to verify eligibility for specific benefits and entitlements.</p> <p>The PA program is comprised of several initiatives, including: Synchronized Pre-deployment and Operational Tracker Enterprise Suite (SPOT-ES), Joint Personnel Accountability Reconciliation and Reporting (JPARR), and Noncombatant Evacuation Operations (NEO) Tracking System (NTS). This family of systems represents end-to-end tracking, reconciliation and reporting of DoD personnel location and movements, to include military, DoD affiliated civilians, contractors, and U.S. citizens. This includes DoD travel, contracts, and contractor personnel tracking in support of contingencies, military readiness, reporting of locations at the unit and person level, accountability of DoD personnel during (and after) natural or man-made disasters, and accountability and visibility of noncombatant evacuees. SPOT is the DoD system of record for accountability and visibility of contracts and contractor personnel authorized to operate in a contingency operation. JPARR is a "public" SIPR only application that provides daily person-level location reporting. JPARR receives feeds for Service and Agency deployment systems, reconciles the data, and provides various reports at unit level detail. NTS is a certified and accredited DoD automated system that accounts for, and sustains visibility of noncombatant evacuees during a NEO.</p> <p>The EDS program is comprised of 4 initiatives: Data Governance, Data Acquisition and Decision Support (DA&DS), Fourth Estate Manpower Tracking Systems (FMTS), and Cyber. Data Governance includes Enterprise Data assets, data modeling and database standardization, data quality, and database architectures. Master Data Management oversight controls costs while providing timely and accurate information to the DoD decision makers. Data Acquisition and Decision Support (DA&DS) is a collection of critical data sources for the Department of Defense that are managed and updated in real time while enforcing data standardization and data quality. FMTS is the authoritative source for DoD 4th Estate manpower authorizations, identity management, authentication and enterprise email. Cyber is related directly to the development of the Enterprise Identity Attribute Service (EIAS)/Access Based Access Control technology in the classified environment to serve as an immediate deterrent to allow/deny access to classified information giving the DoD the ability to control and monitor pre-provisioned user access in a manner that cannot be repudiated (e.g., using CAC-enabled PKE Authentication).</p>

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										
<p>Justification:</p> <p>Project: EHRIS. FY 2019 investment enables continued Enterprise Human Resources Information Systems (EHRIS) consolidation, rationalization and modernization efforts. This includes the procurement of ORACLE EBS licenses, cyber security monitoring and testing tools, supporting talent management and payroll and their integration within the enterprise personnel data system solution, DCPDS. Consolidation of these efforts is critical as network maturation and emphasis on cyber-hardening activities as well as FIAR compliance continue to be the focal point against cyber warfare and for the ability to produce auditable financial statements. Rationalization and Modernization of legacy systems as well as standalone systems includes the Priority Placement Program and Reemployment Priority List and enhancing Talent Management and Competency Assessment Management.</p> <p>Project: DEERS. FY 2019 investment in DEERS will be used to procure the hardware and software necessary to consolidate data repositories and implement common access services. This enhancement greatly improves DMDC's insider threat posture and matures data cyber security capabilities while providing consistent and auditable application security infrastructure. In addition, FY 2019 investment will be used to procure infrastructure for MilConnect to expand secure self-service capabilities for DoD beneficiaries to increase our service members' ability to access the right data at the right time. Emphasis will be on enabling use of personal communication devices such as smart phones, tablets, and other mobile devices which play an ever-increasing role in the lives of DoD beneficiaries.</p> <p>Project: RAPIDS/CAC. FY 2019 investment in Automated Data Processing (ADP) equipment includes the acquisition of the DMDC RAPIDS/CAC infrastructure, allowing the replacement of out-dated and/or maintenance-intensive equipment in order to continue to ensure full functionality, system security, and HSPD-12 compliance of the RAPIDS/CAC system.</p> <p>Project: PA. FY 2019 investment in the NEO Tracking System (NTS) will be used to upgrade fielded NTS across the COCOMs and the National Guard as called for in Joint Requirements Oversight Council Memorandum (JROCM) 117-10 dated 29 JUL 2010. This centralized procurement of equipment will enable DMDC to track the systems in the field and provide support such as software upgrades, training and equipment tracking which are also responsibilities of DMDC called out in JROCM 117-10. Upgraded equipment will provide the COCOMs with more manageable and reliable systems.</p> <p>Other PA programs such as SPOT-ES will receive upgraded equipment that decreases the footprint and meets the requirement of reducing redundant IT services across the Department. SPOT-ES will also increase their global presence through improved guidance at the COCOMs and additional hardware will be required to support the use of JAMMS in the SPOT-ES program.</p>

<p>FY 2019 investment in the JPARR will allow for continued expansion. This investment will allow for the acquisition of hardware and software needed to include the U.S. Northern Command (NORTHCOM) and U.S. Southern Command (SOUTHCOM) into JPARR. USNORTHCOM and SOUTHCOM will be the fifth and sixth Combatant Commands supported by these reports. Investments will also be made to modernize the applications and improve reporting capabilities.</p> <p>Project: EDS. FY 2019 investment will be used to procure hardware, software, architecture, communications, and storage to extend and enhance the proven Person-event Data Environment (PDE) research and analysis capability to all of the Department of Defense. PDE is a cloud computing, self- service environment where researchers set up their approved studies, invite colleagues to participate, review 'like' analyses and use a common electronic Institutional Review Board (eIRB) to protect the exposure of individuals used in a study. Additionally, the use of the PDE is a proactive step to greatly reduce the risk to DoD of a potentially massive Personally Identifying Information (PII) data loss. Enhancing the PDE will provide an integrated solution which 1) reduces costs, 2) leverages self-service and collaboration, 3) encourages data sharing through a standard data catalog and streamlined business workflow, 4) protects data under the Privacy Act and Health Information Portability and Accountability Act, and 5) provides the security for unencumbered access.</p>

Description:

The Information Systems Security Program (ISSP) mission focuses on delivering Department of Defense (DoD) enterprise solutions to Combatant Commands, Services, and Defense-wide agencies to ensure critical mission execution in the face of cyber attacks. The ISSP ensures that, "the network, the computing centers, and core enterprise services will evolve to better support a joint information assurance model that has common enterprise-scale perimeter defenses and will support a broad range of sharing policies from completely unclassified to tightly-held within a classified community." The ISSP provides solutions to harden the network by: (1) reducing the exposed attack surface and gaps that potential adversaries can exploit to disrupt communications; (2) providing vital situational awareness to senior decision-makers and network defenders to enable attack detection and diagnosis; (3) supporting safe sharing of information with allies and mission partners; (4) publishing security guidelines and assessing compliance; (5) providing training to the DoD community; and (6) Implementing Software Defined Networking to enable network agility for faster response times to mission need and improved deterrence against cyber attacks.

Justification:

2017: (\$32.113) Continued to procure the necessary hardware for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will procure the following capabilities:

- Database Security Gateway Tool (DMZ) - (\$2.288) Eliminates the need for most DoD assets to directly connect with the public Internet and reduces the DODIN surface and exposure to attacks. Leverages DMZ technology refresh requirements to enable transition to commercial cloud providers. These cloud access points are a security gateway that protect the DODIN from possible attacks by way of external Cloud Service Provider traffic headed inbound for the DODIN.
- NIPRNet Internet Access Points (IAPs) formerly NIPRNet De-Militarized Zone (DMZ) - (\$18.105) Break and inspect software and hardware procurement; implemented a new certification authorization and evaluation process with certifications tied to the DoD root; installation, integration, test, maintenance and technology refresh for monitoring the unclassified domain at the Internet Access Points (IAPs), De-Militarized Zone (DMZ), web applications, and Enterprise Email Security Gateway (EEMSG).
- Defense Information Systems Network (DISN) Cyber Technology Refresh (\$0.035) Initiated procurement of HW/SW to support the cyber tech refresh of modernized web content filter equipment suites at specific Internet Access Points and security information event manager equipment enabling network defenders at the DISN perimeter and endpoints. Funding was reprioritized for break and inspect software and hardware procurement; installation, integration, test, maintenance and technology refresh for monitoring the unclassified domain at the Internet Access Points (IAPs), De-Militarized Zone (DMZ), web applications, and Enterprise Email Security Gateway (EEMSG).
- Cross Domain Enterprise Services (CDES) - (\$0.018) Continued to purchase and implement a multi-mission enterprise solution for file sharing and enterprise email between users and devices residing on different networks (e.g. – NIPRNet and SIPRNet). Funding was reprioritized for break and inspect software and hardware procurement; installation, integration, test, maintenance and technology refresh for monitoring the unclassified domain at the Internet Access Points (IAPs), De-Militarized Zone (DMZ), web applications, and Enterprise Email Security Gateway (EEMSG).
- Public Key Infrastructure (PKI) - (\$0.867) Tech refreshed current infrastructure including acquisition of replacement certificate authorities.
- Perimeter Zero-Day Network Defense (P-ZND/Sharkseer) - (\$4.300) Identifies malicious attachments and links in Enterprise Email Security Gateway (EEMSG) emails coming from the public internet to DoD users and enables improved detection, analysis, and mitigation. Procured HW/SW to support ZND detection and response capabilities for EEMSG emails to eliminate the need for most DoD assets to directly connect with the public Internet and reduces the DODIN surface and exposure to attacks.
- Big Data Platform - (\$6.500) The Big Data Platform (BDP) is the central, searchable, repository for network and computing data sets. The correlated information is used to validate threats, identity intrusions and measure effectiveness of blocks. It is Cyber Google for critical sensor data across the DODIN. Procured hardware supports the failover of a HOT Big Data Platform solution at an additional DECC location, providing COOP capabilities and 24x7 analytic support.

FY 2018: (\$24.805) Continue to procure the necessary HW/SW for reducing the attack surface of the DoD network, preventing exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will procure the following capabilities:

- Defense Information Systems Network (DISN) Cyber Technology Refresh (\$14.679) Will procure HW/SW to support the cyber tech refresh of modernized web content filter equipment suites at specific Internet Access Points and security information event manager equipment enabling network defenders at the DISN perimeter and endpoints.
- Database Security Gateway Tool (DMZ) (\$3.560) Will procure HW/SW to support the NIPRNet Federated Gateway capability at specific Internet Access Point (IAP) network locations, expanding boundary locations, and database firewall acquisitions.
- Enterprise Collaborative Operational Sensors (ECOS) (\$1.199) Will procure hardware to support tech refresh of the ECOS full packet capture capabilities at ten Internet Access Points (IAPs).

Line Item MDAP/MAIS Code: N/A		
<ul style="list-style-type: none">• Cross Domain Enterprise Services (CDES) (\$1.734) Purchase and implement a multi-mission enterprise solution for file sharing and enterprise email between users and devices residing on different networks. Will also procure hardware to support tech refresh of High Speed Guards for enterprise file transfer and enterprise email.• Public Key Infrastructure (PKI) (\$1.930) Will procure Non-Person Entity (NPE) hardware and software detection capabilities for encrypting and decrypting the associated user's identity within authorized DoD Networks.• Endpoint Security Modernization (\$1.212) Purchase and implement secure host baseline containment/visibility licenses to modernize high-end security on DoD Networks. This will provide the ability to restrict high-risk applications and investigate security incidents on DoD Networks.• Cyber Security Range (\$.491) Cyber Security Range is required to emulate NIPR and SIPR capabilities. Will procure HW/SW upgrades for the Cyber Security Range to emulate the new network infrastructure to aid in the training of our network operators to successfully train and prevent the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. <p>Explanation of Change from FY 2017 to FY 2018: The decrease of -\$7.308 between FY 2017 and FY 2018 is primarily attributable to the decrease one-time funding received in FY 2017 for Break and Inspect software and hardware procurement (-\$18.105), and one-time funding for P-ZND/Sharksheer (-\$4.300) and Big Data Platform (-\$6.500). This is partially offset by procurement of hardware to support tech refresh of sensor full packet capture capabilities at ten Internet Access Points (IAPs) (+\$1.199), procurement of HW/SW to support the DISN cyber tech refresh (+\$14.644), an increase for tech refresh of NIPRNet hardening HW at the NIPRNet/Internet Gateways (+\$1.272), acquisition of PKI certification authority based hardware (+\$1.063), additional enterprise high speed cross domain guards HW (+\$1.716), the purchase of secure licenses to modernize high-end security on DoD Networks (+\$1.212) and a funding increase to support the CNCI purchase of virtualized equipment (commodity HW, network and storage automation, switch ports, chassis, servers, etc.) to virtualize the DoD Cybersecurity Range (+\$0.491).</p> <p>FY 2019: (\$21.590) Continue to procure the necessary hardware for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will acquire the following capabilities:</p> <ul style="list-style-type: none">• Perimeter Defense - (\$13.028) Will procure HW/SW to tech refresh the suite of systems that serve as the defense layer between the commercial internet and NIPRNet. Specifically acquire outbound URL filtering and inbound spyware, malware, anti-virus and vulnerability filtering equipment; Splunk logging system; Procure equipment to support the NIPRNet Federated Gateway capability in OCONUS and firewall capability at specific IAP network locations; and tech refresh of the sensing appliance capabilities at IAPs.• Cyber Information Sharing Systems - (\$1.781) Will procure Tech refresh servers for security information manager coop environments that enable network defenders at the DISN perimeter and endpoints.• Cross Domain Enterprise Services (CDES) - (\$2.780) Will procure tech refresh the guard solutions the enterprise file sharing and email solution between users and devices residing on different networks.• Public Key Infrastructure (PKI) - (\$1.930) Will procure NPE hardware and software detection capabilities for encrypting and decrypting the associated user's identity within authorized DoD Networks.• Cyber Security Range - (\$2.071) Will procure HW/SW upgrades for the Cyber Security Range to emulate the new network infrastructure. <p>Explanation of Change from FY 2018 to FY 2019: The decrease of -\$3.215 between FY 2018 and FY 2019 is primarily due to the completion of the tech refresh of the rate limiting capability that enables throttle traffic load going into the DoDIN and Firewalls at the IAPs, offset by the purchase of equipment to upgrade the web application firewall to identify non-compliant application and servers and additional HW for enterprise high speed cross domain guards.</p> <p>Performance Metrics:</p> <p>1. Tech refresh 2 Cloud Access Points through FY 2018</p> <p>FY 2017 Planned 1 Suite Install / Actual 1 milcloud 1.0 Install FY 2018 Planned 1 Suite Install</p> <p>2. Maintain ECOS MAC III sensor availability to 98.6%; sensor recovery should be within 5 days of failure</p> <p>FY 2017 Planned 98.6% / Actual average: 99.5%, minimum: 96% FY 2018 Planned 30%</p>

Description:

Department of Defense (DoD) Teleport system is a satellite communications (SATCOM) gateway that links the deployed warfighter to the Department of Defense Information Network (DODIN). The Teleport program has fielded system capabilities incrementally using a multi-generational approach with Generation 1 and 2 Full Deployment authorized by DoD Chief Information Officer on February 18, 2011 and the DISA Component Acquisition Executive on June 7, 2012. Teleport Generation 3 consists of three phases; Phases 1 and 2 are in Production and Deployment while the Phase 3 is in Engineering & Manufacturing Development. Each Teleport investment increases the warfighter's ability to communicate with a world-wide, net-centric set of information capabilities, which is vital for the DoD to maintain a persistent presence among its adversaries.

Currently, the Teleport system operates as an upgrade of satellite communication capabilities at selected DoD satellite communications gateways. This system provides deployed warfighters with seamless worldwide multi-band SATCOM connectivity to the Defense Information System Network (DISN) Service Delivery Nodes and legacy tactical command, control, communications, computers, and intelligence systems. It also provides centralized integration capabilities, contingency capacity, and common interfaces to access the DISN.

Teleport's goal is to provide secure, seamless, interoperable, and economical upgrades to DoD SATCOM Gateways and meet the growing throughput requirements of the deployed warfighter.

The primary beneficiaries of the Teleport investment are the DoD Combatant Commanders, Military Departments, Defense Agencies, and the warfighter. Teleport Generation 3 is designed to meet the growing demands of the warfighter through the execution of the following phases:

Phase 1: Gateway Advanced Extremely High Frequency (AEHF) [Extended Data Rate (XDR)] terminals provides tactical users with a 350% bandwidth increase in survivable, anti-jam communications through all peacetime and combat operations by installing Navy Multiband Terminals (NMT) at select Teleport sites. In addition to enhanced throughput, the NMT maintains compatibility with legacy waveforms and current tactical terminals.

Phase 2: Gateway Wideband Global SATCOM (WGS) X/Ka-band terminals provides enhanced WGS X/Ka capability to warfighters worldwide by installing terminals from the Modernization of Enterprise Terminal (MET) program at Teleport and other gateway sites. This gateway enhancement allows Teleport to replace end of life (EOL) Defense Satellite Communications System (DSCS) terminals while remaining interoperable with tactical WGS X/Ka-band users. The MET enhancement provides a 300% Ka-band capacity increase and an 1100% X-band capacity increase to current enterprise terminal X/Ka capabilities. Additionally, it enables the Teleport system to maintain operational availability consistent with Generation 2 requirements and reduce the overall life-cycle cost of X/Ka capabilities across the DoD.

<p>Phase 3: Mobile User Objective System (MUOS) to Legacy ultra high frequency (UHF) systems interoperability will provide interoperability between MUOS users and Legacy UHF users by installing MUOS-to-Legacy UHF SATCOM Gateway Component (MLGC) suites of equipment at Teleport sites. MUOS is the next generation DoD UHF SATCOM system that will provide the warfighter with modern worldwide mobile communication services, utilizing the Wideband Code Division Multiple Access waveform for use in the military UHF SATCOM band. MLGC suites will provide critical continuity and interoperability as DoD tactical satellite users transition from legacy waveforms and radios to the Joint Tactical Radio System.</p> <p>Standardized Tactical Entry Point (STEP)</p> <p>The STEP investment is driven by Combatant Command (COCOM) operational requirements validated by the Joint Chiefs of Staff and is linked with Defense Information Systems Agency (DISA) core strategic goals. STEP capabilities directly support DoD's transformational initiatives and goals by: (1) enabling effective communications for the warfighter through early implementation of Net-Centric capability; (2) enhancing the capability and survivability of space systems and supporting infrastructure; and (3) continuing to develop joint interoperable Networks and Information Integration (NII) architecture.</p> <p>The STEP program is integral for SATCOM Gateway evolution and sustainment activities in support to the deployed forces. STEP sustains the network by replacing EOL Transmission Security (TRANSEC), Communication Security (COMSEC), switches, routers, and baseband equipment. Further, DISA is able to leverage the network and equipment at these sites to support world-wide operations for Expeditionary Forces and Overseas Contingency Operations. Additionally, the STEP program supports the COCOMs Command and Control (C2) and Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) SATCOM requirements. Finally, STEP resources support the converged Gateway Architecture to ensure the network is able to keep pace with the user community requirements and capabilities as they migrate and adopt emerging technology to accommodate their respective mission needs keeping synchronized and at pace with the evolving Teleport technology architecture.</p> <p>High Speed Terminal:</p> <p>The program is performing classified work. Classified details are not included in the submission due to the level of security classification and necessity of special security clearances. Detailed information for this program is submitted separately in classified Department of Defense exhibits.</p> <p>Enterprise SATCOM Gateway System:</p> <p>The SATCOM Gateway is an enterprise system that will adhere to the Joint Information Environment (JIE) architecture, and support all DoD satellite communications requirements, to include Strategic (Presidential, SECDEF, SECSTATE, Chairman Joint Chiefs of Staff, MDA) and Tactical (C/S/A) users over satellite trunks through the DoD Information Network (DODIN). The SATCOM Gateway program will begin fielding upgrades and leverage existing SATCOM systems, which include the DSCS terminals, the Teleport and STEP tactical system capabilities. Initial efforts will define a two phase approach, with the first phase (FY16-19) upgrading 12 facilities to a converged IP transport suites that supports the full range of Strategic and Tactical users; the second phase (FY16-23) will address the remaining 34 sites that support mainly Strategic user requirements. Each investment increases the Department's ability to communicate with a world-wide, net-centric set of information capabilities, which is vital for the DoD to maintain a persistent presence among its Strategic and coalition adversaries. This upgrade will standardize satellite communication capabilities at all DoD satellite communications gateways. This system provides Strategic National leaders and deployed warfighters with seamless worldwide multi-band SATCOM connectivity to the DISN Service Delivery Nodes, legacy tactical command, control, communications, computers, intelligence systems and transport to specific special user enclaves.</p> <p>Our Nation's Senior Leaders, Combatant Commanders, Military Departments, Defense Agencies, and other special users will all benefit from this SATCOM Gateway.</p>

<p>Justification:</p> <p>FY 2017: (\$23.316) DoD Teleport Technology Refresh/Technology Insertion: DoD Teleport replaced EOL equipment and field enhancement at Teleport SATCOM sites. Major efforts included fielding of Advanced Time Division Multiple Access (TDMA) Interface Processor (A-TIP) for additional sites and unclassified solutions for Generic Discovery Server (GDS). The program office used funding to support integration, maintenance, and security test activities for fielded enhancements.</p> <p>Generation 3: The DoD Teleport Program completed Generation 3 Phase 2, the Modernization Enterprise Terminal (MET) installation activities for one terminal each in the PACOM, NORTHCOM, and EUCOM AORs and continue installation activities for two additional terminals, one terminal each in the EUCOM and NORTHCOM AORs. The program implemented the Generation 3 Phase 3 subsystem in the PACOM AOR and continued installation of an additional subsystem in PACOM AOR.</p> <p>FY 2018: (\$22.634) DoD Teleport Technology Refresh/Technology Insertion: DoD Teleport will replace EOL equipment and field enhancement at Teleport SATCOM sites. Major efforts include fielding of Advanced Time Division Multiple Access (TDMA) Interface Processor (A-TIP) for additional sites and unclassified solutions for Generic Discovery Server (GDS). The program office will also use this funding to support integration, maintenance, and security test activities for fielded enhancements.</p> <p>Generation 3: Program will complete Generation 3 Phase 2 (Modernization Enterprise Terminal (MET)) installation activities for one terminal in each of NORTHCOM, EUCOM, and CENTCOM and continue installation activities for 1 additional terminal. Will implement the Generation 3 Phase 3 subsystem at locations in the EUCOM and NORTHCOM AORs.</p> <p>Explanation of change from FY 2017 to FY 2018: The decrease of -\$0.682 between FY 2017 and FY 2018 is primarily due to the completion of installation activities for five METs in FY 2017.</p> <p>FY 2019: (\$21.112) DoD Teleport Technology Refresh/Technology Insertion: DoD Teleport will replace EOL equipment and field enhancement at Teleport SATCOM sites. Major efforts include refresh of iDirect Hub line cards. The program office will also use this funding to support integration, maintenance, and security test activities for fielded enhancements.</p> <p>Explanation of change from FY 2018 to FY 2019: The decrease of -\$1.522 between FY 2018 and FY 2019 is primarily due to the completion of installation activities for all G3P3 MLGC production suites in FY18.</p> <p>Performance Metrics:</p> <p>Generation 1/2 Metric</p> <p>Percentage of Teleport and Gateway critical end of life/end of service issues mitigated.</p>

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 14 / Teleport
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303610K, 1203610K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Explanation of change from FY 2017 to FY 2018: The increase of +\$0.143 between FY 2017 and FY 2018 is due to the increase in contract costs to procure modem line cards.		
FY 2019: (\$1.388) Will continue technology enhancements to meet IP requirements at 4 DoD Gateways in support of the Enhanced SATCOM Gateway Architecture.		
Explanation of change from FY 2018 to FY 2019: The increase of +\$0.010 between FY 2018 and FY 2019 is due to the increase in contract costs to procure modem line cards.		
FY 2017 OCO: (\$9.900) Procured IP Modems for select SATCOM Gateways (Bahrain, Lago, Croughton, Landstuhl) to support IP mission surge.		
FY 2018 OCO: (\$1.979) Will provide technology enhancements to meet IP requirements and the implementation of IP routers at 1 DoD Gateways in support of the Enhanced SATCOM Gateway Architecture.		
Explanation of change from FY 2017 to FY 2018: The decrease of -\$7.921 due to partial elimination of IP router requirements at 1 DoD Gateway and the completion of the site prep at Kadena.		
FY 2019 OCO: (\$3.800) Will provide technology enhancements to meet IP requirements and the implementation of IP routers at 6 DoD Gateways.		
Explanation of change from FY 2018 to FY 2019: The increase of +\$1.821 is due to additional IP router requirements at 6 DoD Gateways.		
STEP Performance Metrics:		
Schedule, performance, and customer satisfaction measures are compiled as a real-time barometer to measure how well STEP is satisfying the needs of present customers, and to predict success in meeting future STEP objectives. The nature of this compiled data permits objective assessments and predictions on the quality and reliability of STEP support to its customers (e.g., availability and reliability of the STEP system). Availability: Probability that STEP resources are operable or usable to perform its designated or required function (ratio of time the system is functional). No more than 8 hours, 45 minutes, and 36 seconds of downtime or service interruptions per site per year. Reliability: Probability that STEP will accurately perform its specified task under stated environmental conditions (ability of the system to perform consistently to its design). Standard: No more than 8 hours, 45 minutes, and 36 seconds of system downtime or service interruptions per site per year.

<p>Description: Multinational Information Sharing (MNIS):</p> <p>MNIS is a portfolio of three coalition information sharing capabilities (Combined Enterprise Regional Information Exchange System (CENTRIXS), Pegasus, and the Combined Federated Battle Laboratory Network (CFBLNet) designed to enable and improve sharing of operational and intelligence among United States (US) forces and multinational partners. This program directly supports five combatant commands and is critical because US forces no longer fight and win independently but rely on close coordination and collaboration with allies and other mission partners. MNIS increases overall combat effectiveness by leveraging capabilities and information from all partners and reducing the possibility of fratricide.</p> <ul style="list-style-type: none"> • CENTRIXS consists of multiple, isolated Communities of Interest (COI) that support multinational efforts including Overseas Contingency Operations and counter-narcotics operations. Common Mission Network Transport (CMNT) provides the backbone that enables Network Operations (NETOPS) centers to manage individual networks more efficiently. CMNT provides a common transport for encrypted traffic to meet mission partner communication requirements and facilitate the movement of Virtual Private Network traffic between segments. This capability supports Department of Defense (DoD) Instruction 8110.1 guidance to integrate CENTRIXS and other operational networks into existing DoD general service communications infrastructure as a separate network servicing all DoD MNIS requirements. • Pegasus interconnects the National Command and Control (C2) systems of Australia, Canada, New Zealand, United Kingdom and the United States using Cross Domain Solutions to enable information sharing in facilitating situational awareness and strategic planning as well as operational execution. • CFBLNet provides a controlled Research, Development, Trials and Assessment coalition information sharing sandbox is used to evaluate new technologies and to develop tactics, techniques, and procedures that facilitate the transition of promising technologies and capabilities into operational multinational information sharing capability enhancements. <p>FY 2017: (\$0.623) Procured NSA encryptor hardware to support classified networks on two Service Delivery Node (SDN) locations.</p> <p>FY 2018: (\$0.708) Will perform technical refresh of NSA cryptographic equipment at two coalition node locations that support cryptographically isolated network data traffic for Coalition Allies and Mission Partners.</p>

Description: DISA provides a portfolio of services that includes legacy capabilities delivered by the Net-Centric Enterprise Services (NCES) Program supporting a resilient and flexible infrastructure that enables a collaborative environment for secure information sharing across the Department of Defense (DoD). These critical warfighter, Business, and Intelligence Mission Area services enable more than two million authorized DoD users to collaborate across the Combatant Commands (COCOMs)/Services/Joint Staff/Agency/Mission Partners using a suite of web-accessible services. The portfolio also includes the DoD Visitor service that transitioned from a Government developed service to a Commercial-Off-the-Shelf annual right-to-use licensed service operating on domain controllers throughout the DoD. This service allows personnel to "go anywhere within the DoD, login, and be productive". It includes the privilege management Authentication Gateway Services (AGS) and the DoD Enterprise Portal Service. The AGS is integrated with the Identity and Access Management services supporting brokered Public Key Infrastructure (PKI) authentication for DoD applications without a native PKI authentication capability. The DoD Enterprise Portal Service provides users with a flexible web-based hosting solution to create and manage mission, community, organization, and user focused sites. The individual suite of capabilities within the portfolio of services provides the user with the flexibility to couple the services in varying ways to support their mission needs. This flexibility provides unprecedented secure access to web and application content, critical imagery, intelligence and warfighter information from anywhere, at any time, on any DoD authorized device. The portfolio of enterprise services delivers tangible benefits to the Department by providing capabilities that are applied by the US Forces, Coalition forces, and Allied forces to support full spectrum joint and expeditionary campaign operations. These enabling benefits include the ability to: <ul style="list-style-type: none"> • Enhance collaborative decision-making processes • Improve information sharing and integrated situational awareness • Share and exchange knowledge and services between enterprise units and commands • Share and exchange information between previously unreachable and unconnected sources • Schedule and coordinate meetings with people across the DoD Components • "Go anywhere in the DoD, login, and be productive" • Create and manage mission, community, organization, and user-focused sites from global locations • Exchange knowledge to enable situational awareness, determine the effects desired, select a course of action, the forces to execute it, and accurately assess the effects of that action <p>The portfolio contains capabilities that are also key enablers to the Defense Information Systems Agency's (DISA) mission of providing a global net-centric enterprise infrastructure in direct support of joint Warfighter, National level leaders, and other mission and coalition partners across the full spectrum of operations.</p>

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 17 / Net Centric Enterprise Services (NCES)
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303170K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
FY 2017: (\$1.634) Procured the annual right-to-use license for DoD Visitor that is provided for use on domain controllers throughout the Department and supports the users ability to go anywhere within the DoD, login, and be productive on the Classified and Unclassified networks.		
FY 2018: (\$1.161) Will procure the annual right-to-use license for DoD Visitor that is provided for use on domain controllers throughout the Department and supports the users ability to go anywhere within the DoD, login, and be productive on the Classified and Unclassified networks.		
Explanation of Change from FY 2017 to FY 2018: The decrease of -\$0.473 between FY 2017 and FY 2018 is attributable to completing the transition to the COTS solution on the Classified and Unclassified Networks and projected reduction in license costs as the contract is recompeted.		
FY 2019: (\$1.017) Will procure the annual right-to-use license for DoD Visitor that is provided for use on domain controllers throughout the Department and supports the users ability to go anywhere within the DoD, login, and be productive on the Classified and Unclassified networks.		
Explanation of Change from FY 2018 to FY 2019: The decrease of -\$0.144 between FY 2018 and FY 2019 is attributable to projected changes in the cost of the Right-to-Use license contract.		
Performance Metrics: Usage - Transition all domain controllers using the DoD Visitor Government-Off-the-Shelf DoD Visitor software solution throughout the Department to the commercial solution, Pro-V, without impacting the users ability to go anywhere in the DoD, get access to the local network, and access services from their home station using a web browser.		
FY 2017 (Planned); FY2017 (Completed): Transition of DoD Visitor software on the Classified and Unclassified Networks.		
FY 2018 (Planned): Monitor the DoD Visitor team site for the identification of needed enhancements and the collection of those requirements by the contractor; ensure the enhancements are delivered on the 6-month schedule and that they meet the customer's requirements and cybersecurity expectations.		
FY 2019 (Estimated): Monitor the DoD Visitor team site for the identification of needed enhancements and the collection of those requirements by the contractor; ensure the enhancements are delivered on the 6-month schedule and that they meet the customer's requirements and cybersecurity expectations.		
FY 2019 (Estimated): Deployment of software enhancements for DoD Visitor - Target 2

Description:

Defense Information Systems Network (DISN) is the Department of Defense's (DoD's) consolidated worldwide telecommunications infrastructure that provides end-to-end information transport for DoD operations to the warfighters and the Combatant Commanders with a robust Command, Control, Communications, Computers and Intelligence information long-haul transport infrastructure. The DISN, seamlessly spanning full spectrum from terrestrial to space and strategic to tactical domains, provides the interoperable telecommunications connectivity and value-added services required to plan, implement, and support all operational missions, anytime, and anywhere pushing DISN services to the edge of the communications network. The DISN delivers an integrated platform consisting of DoD's core communications, computing, and information services as well as integrating terrestrial, wireless, and satellite communications into a network cloud that is survivable and dynamically scalable. Procurement funding primarily supports the Technology Refreshment (TR); Joint Worldwide Intelligence Communications System (JWICS); National Emergency Action Decision Network (NEADN)/Presidential and National Voice Conferencing (PNVC); the Enhanced Pentagon Capability (EPC)/Survivable Emergency Conferencing Network (SECN); DoD Mobility; and a significant satellite communications extension of the DISN. The procurement funding enables the DISN to remain technologically up-to date and capable by achieving the best possible balance between network performance and network cost through a process known as network optimization.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										
<p>Justification: FY 2017 (\$87.235)</p> <p>JWICS: (\$6.325) - Upgraded four JWICS node sites and decommissioned legacy Core equipment at five sites, as JWICS continued its migration to the optical transport infrastructure. Provided joint engineering and expansion efforts ensuring delivery of service to the edge locations through Joint Information Environment (JIE), and retired legacy TDM paths to maximize both operational and cost efficiencies.</p> <p>Tech Refresh: (\$71.864) - Performed optical transport upgrades throughout the DISN, in support the Next Generation Optical Network. Supported the transition to the Internet Protocol (IP) based network through replacement of legacy Provider Edge (PE) routers with the Multiprotocol Label Switching (MPLS) technology at the DISN node sites. Supported the SIPRNet Access migration, DISN Red Switch Network (DRSN) transport transition, as well as replacement of legacy Voice and Video equipment in support of the Unified Capabilities.</p> <p>EPC/SECN: (\$1.210) - Continued procurement of equipment to support modernization of non-SATCOM interswitch backbone connectivity for sites supporting EPC/SECN and PNVC, to include support of day to day system monitoring and telemetry, as well as conference management. Funding also supported purchases of equipment to maintain test lab equipment configurations to support testing and troubleshooting for system sustainment and performance.</p> <p>PNVC: (\$1.119) - Continued to field PNVC equipment suites (7 sites) and purchased depot spares to support baseband kit users.</p> <p>Intelligence, Surveillance, and Reconnaissance (ISR) Transport Services: (\$6.717) - Continued the installation of the KuSS multi-band hub at selected SATCOM based on selected prioritized list. Purchased and stored spares on-site to preclude delays in shipping and ensure high mission availability. Training, at the time of installation and prior to hub and terminal activation, was also provided.</p> <p>FY 2018 (\$126.345)</p> <p>JWICS: (\$7.150) - Will continue to support deployment of JWICS transport core-lite nodes worldwide to assure delivery of JWICS transport core services to JWICS edge users in multiple Areas Of Responsibility (AOR's) globally. Also will support retirement of legacy JWICS core capabilities at locations in Continental United States (CONUS), U.S. European Command (EUCOM) and U.S. Pacific Command (PACOM) AOR's as services migrate over to transport core. Includes the continuation of engineering efforts to ensure delivery of service to edge locations via JIE and retirement of legacy TDM paths to realize programmatic cost savings provided by Carrier Ethernet/Converged IP transport.</p>

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 18 / Defense Information System Network
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303126K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>Tech Refresh: (\$114.957) - Will continue to purchase and install end-of-life (EOL) replacement and upgrades throughout the DISN. The key projects include: Timing & Synchronization of the Packet based IP networks and OPTICAL/Transport Network (OTN) systems, Internet Access Point (IAP) Router Replacement, Next Generation Optical (formerly known as P/OTN Layer), Operations Support System (OSS) Refresh, Multi-Protocol Label Switching (MPLS), Domain Name System (DNS), Voice Internet Service Provider (ISP), Enterprise Classified VoIP (formerly known as Voice over Internet Protocol (VoIP) Enterprise Session Controllers), Warehouse Support (formerly known as Logistics Support), SIPRNet Access Migration (formerly known as COMSEC Refresh), Last-Promina Elimination (formerly known as TDM to IP Transition), DRSN Transport Transition, TRANSEC (formerly known as COMSEC Refresh), and Next Generation Access Transport (formerly Optical Refresh MSPP), SIPRNET Refresh (ESS, ACC Compliance) (formerly known as COMSEC Refresh), and Software Defined Networking (formerly Rapid Provisioning).</p> <p>EPC/SECN (\$1.307) - Procure additional equipment to complete SECN digitization, for Advanced Extremely High Frequency (AEHF) SATCOM interfaces implementation, and upgrades for EOL conferencing operator consoles. SECN Digitization is designed to improve voice quality and facilitate the transition from Military Strategic, Tactical & Relay (MILSTAR) to AEHF SATCOM by allowing the transition of SECN to PNVC-developed Baseband Interface Group (BIG) in advance of full PNVC implementation. The specialized operator consoles used to initiate and control the secure voice conference of EPC, SECN and eventually PNVC, are PC-based and require periodic hardware and software tech refresh. New conferencing operator consoles will be procured and installed at EPC/SECN sites.</p> <p>PNVC: (\$1.261) - Installation of PNVC equipment suites at the fixed sites continues according to a prioritized order. Spares of each equipment type will also be purchased to ensure the correct quantities maintain the fielded equipment. PNVC baseband suites and the required High altitude Electromagnetic Pulse (HEMP) hardened Base Band Kit (BBK) enclosures will be purchased for fourteen special users.</p> <p>ISR Transport Services: (\$1.670) - Purchase and stores spares on-site to preclude delays in shipping and ensure high mission availability.</p> <p>Explanation of Change from FY 2017 to FY 2018: The increase of +\$39.110 from FY 2017 to FY 2018 is due to the increase in Tech Refresh (+\$43.093) which supports the Department's continued effort to accelerate MPLS and Optical capabilities. The increase also includes refreshing end of life encryption devices and updating the DISN with Next Generation Transport capabilities. Also, an increase in EPC/ SECN (+\$0.097) and PNVC (+\$0.142) reflects additional requirements for audio conferencing equipment purchases to fully equip the configurations at EPC/SECN and PNVC sites and variations in unit prices. Additionally, the increase in JWICS (+\$0.825) is due to the procurement of additional network equipment including routers, switches, and encryption devices that will be installed at JWICS node locations. The increase is offset by a decrease in ISR (-\$5.047) due to the completion of installation activities for KuSS multi-band hubs at 2 SATCOM sites.</p> <p>FY 2019 (\$150.674)</p> <p>JWICS: (\$7.093) - Will continue to support deployment of JWICS transport core-lite nodes worldwide to assure delivery of JWICS transport core services to JWICS edge users in multiple Areas Of Responsibility (AOR's) globally. Also will support retirement of legacy JWICS core capabilities at locations in CONUS, EUCOM and PACOM AOR's as services migrate over to transport core. Includes the continuation of engineering efforts to ensure delivery of service to edge locations via JIE and retirement of legacy TDM paths to realize programmatic cost savings provided by Carrier Ethernet/Converged IP transport.</p> <p>Tech Refresh: (\$139.112) - Will continue to purchase and install EOL replacement and upgrades throughout the DISN. Convergence activities will continue at multiple layers eliminating the need for a one to one TR of all components but rather TR at service and capability layers. Investment goals include IP Optimization, Legacy technology elimination and DISN enhancements to ensure a survivable infrastructure. The key efforts include: Timing & Synchronization of the Packet based IP networks and OTN systems, IAP, Next Generation Optical (formerly known as P/OTN Layer), OSS Refresh, MPLS, Voice ISP, Warehouse Support (formerly known as Logistics Support), SIPRNet Access Migration (formerly known as COMSEC Refresh), TRANSEC (formerly known as COMSEC Refresh), and Next Generation Access Transport (formerly Optical Refresh MSPP), SIPRNET Refresh (ESS, ACC Compliance) (formerly known as COMSEC Refresh), Software Defined Networking (formerly Rapid Provisioning), COCOM Infrastructure Resiliency and DISN Service Delivery Node Resiliency.</p> <p>EPC/SECN (\$1.455) - Procure additional equipment to complete SECN digitization, for (AEHF) SATCOM interfaces implementation, and upgrades for EOL conferencing operator consoles. SECN Digitization is designed to improve voice quality and facilitate the transition from Military Strategic, Tactical & Relay (MILSTAR) to AEHF SATCOM by allowing the transition of SECN to PNVC-developed Baseband Interface Group (BIG) in advance of full PNVC implementation. The specialized operator consoles used to initiate and control the secure voice conference of EPC, SECN and eventually PNVC, are PC-based and require periodic hardware and software tech refresh. New conferencing operator consoles will be procured and installed at EPC/SECN sites.</p>

Line Item MDAP/MAIS Code: N/A		
<p>PNVC: (\$1.386) - Installation of PNVC equipment suites at the fixed sites continues according to a prioritized order. Spares of each equipment type will also be purchased to ensure the correct quantities maintain the fielded equipment. PNVC baseband suites and the required High altitude Electromagnetic Pulse (HEMP) hardened Base Band Kit (BBK) enclosures will be purchased for fourteen special users.</p> <p>ISR Transport Services: (\$1.628) - Continue the installation of the KuSS multi-band hub at selected SATCOM sites based on selected prioritized list. Spares will also be purchased and stored on-site to preclude delays in shipping and to ensure high mission availability. Training, at the time of installation and prior to hub and terminal activation, will also be provided.</p> <p>Explanation of Change from FY 2018 to FY 2019: The increase of +\$24.329 from FY 2018 to FY 2019 is due to the increase in Tech Refresh (+\$24.155) which supports the Department's continued effort to accelerate MPLS and Optical capabilities as well as enhancing resiliency at limited COCOM and DISN Service Delivery locations. The increase also includes refreshing end of life encryption devices and updating the DISN with Next Generation Transport capabilities. Also, an increase in EPC/SECN (+\$0.148) and PNVC (+\$0.125) reflects additional Secure Voice Conferencing Equipment purchases to support rotatable pool stock for logistics supportability. PNVC will procure additional Secure Voice Conferencing Equipment purchases to support final stages of PNVC fielding and testing. The increase is offset by decreases in JWICS (-\$0.057) due to a reduction of network equipment including routers, switches, and encryption devices that will be installed at JWICS node locations; and an ISR (-\$0.042) reduction attributed to reduced spare parts requirements for Mission Support System due to the completion of installation activities for KuSS multi-band hubs at 1 SATCOM Site.</p> <p>Performance Metrics: EPC/SECN:</p> <p>Switch Replacement</p> <p>FY 2017 0 Planned / 0 Completed FY 2018 0 Planned FY 2019 0 Planned</p> <p>Equipment upgrades</p> <p>FY 2017 5 Planned / 5 Completed FY 2018 52 Planned FY 2019 23 Planned</p> <p>PNVC:</p> <p>Equipment Purchases (sites)</p> <p>FY 2017 15 Planned / 15 Completed FY 2018 14 Planned FY 2019 18 Planned</p> <p>Sites Upgraded</p> <p>FY 2017 4 Planned / 4 Completed FY 2018 6 Planned FY 2019 3 Planned</p> <p>Networking TR (formerly known as TR/EOL Equipment Replacement):</p> <p>SIPR Access Migration (formerly Communications Security (COMSEC)) - Number of sites transitioned (FY 2017 and FY 2018); Percentage of customers transitioned of legacy SIPR (FY 2019, 1/3 each year at 33% for the 1st year)</p>

Description:

The White House Communication Agency (WHCA) provides assured voice, video, and data information services to the President of the United States (POTUS), Vice President of the United States (VPOTUS), White House Staff, National Security Staff (NSS), US Secret Service (USSS), and others as directed by the White House Military Office (WHMO). The WHMO also directs the WHCA to serve as the IT provider to the WHMO enterprise of customers, to include Presidential Airlift Group/Air Force One, Marine One, Camp David, White House Transportation Agency, White House Presidential Mess, White House Medical Unit, military aides, and others within WHMO. WHCA must balance the integration of innovative and customer-desired technologies with the ability to operate on-demand within any environment from normal to emergency conditions. WHCA will continue to provide command and control capabilities to the President and senior national leaders while integrating technology and innovation to transform the President's multiple communication capabilities and information sharing domains into one integrated, seamless environment of unified capabilities.

Along with supporting all POTUS/VPOTUS/First Lady of the United States (FLOTUS) travel both within the continental United States and overseas, WHCA maintains a physical communications infrastructure at the White House, the Naval Observatory, Camp David, Presidential and Vice Presidential Second Residences, and numerous classified facilities. WHCA operates and maintains a radio infrastructure in the National Capital Region, from Camp David to Quantico, providing network coverage for the USSS, Presidential Helicopter Squadron, and the Presidential Airlift Group.

Justification:

FY 2017: (\$35.977)

Broadcast: (\$2.842) Continued to evolve broadcast studio capabilities and strategies for unified communications, increased bandwidth, On-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Implemented Next Generation broadcast event production and support systems; continued to leverage smart tagging techniques for global access and search; modernized and automated the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use.

System of Systems: (\$6.185) Continued to evolve field smart, secure mobile, wireless devices and technologies to provide mobile users with next generation portable communication capabilities and platforms. Continued to conduct technology and engineering assessments with the intent of integrating best of breed COTS products to support the implementation of on-demand service delivery options for all mobile and airborne platforms.

System Assurance: (\$2.235) Refined defense solutions, personnel, techniques, and best practices to defend, detect, and mitigate cyber-based threats throughout the WHMO/WHCA infrastructure. Continued to replace end of life encryption equipment and software for existing operations of all voice, video, data and transport systems.

Network and Data: (\$7.976) Continued to apply a multi phased data cloud solution, incorporating DISA Enterprise Services where possible, that supports the Presidential Information Technology Community ((PITC) formerly PCI)) and mobile users during Presidential events. Continued to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; next generation network services, operations and management and support to mature WHCA mobile communications and computing. Provided storage, virtualization, and collaborative tools to WHMO/WHCA. Adopted DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency (P.A.C.E) communications requirements including Continuity of Operations (CONOPS), and Continuity of Government (COG).

Facilities and Infrastructure: (\$1.979) Continued to upgrade WHCA's telecommunications infrastructure to support multiple WHMO/WHCA facilities. Supported the WHMO/WHCA's consolidation of infrastructure and communications capabilities that will provide unified operations and seamless Situational Awareness (SA), Common Operational Picture (COP) and Command and Control (C2) capabilities. Continued to upgrade infrastructure for White House East Wing/West Wing renovations upon execution, Camp David Facilities, and other locations supporting on-the-move and trip site communication needs.

Transport: (\$6.465) Continued to leverage and acquire emerging network transport technologies to build out a Multiple Level Secure (MLS) backbone supporting secure unified communications and high speed assured transport; and evaluated DoD/DISA and commercial SATCOM service solutions (e.g., Wideband Global SATCOM, Mobile User Objective system (MUOS), and Iridium).

Voice and Video Teleconferencing: (\$7.000) Refined federated switchboard solution including WHCA's POTUS VoIP/VoSIP solution. Continued to migrate to an enterprise on-demand, MLS voice and video collaborative capability, and on-line virtual work space. Completed integration of Voice, Video, and Data information from multiple systems, multiple networks, and multiple WHMO/WHCA entities.

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 90 / White House Communication Agency
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303134K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Technology Insertion: (\$1.295) Continued to support associated communications and technology improvements that provide critical operational support capabilities to the POTUS, VPOTUS, Senior Staff and the DNLCC.		
FY 2018 (\$45.243). WHCA's Presidential Service Strategy 2022 (PSS 2022) updates WHCA's Presidential Communications Vision 2020 (PCV 2020) to reflect capability achievements made in mobility, cybersecurity, retirement of legacy technologies, and other modernization efforts to improve the White House's ability to develop and implement national level policy on a day to day basis and during crisis using the National Leadership Command Capability (NLCC) infrastructure. Efforts include strategic enterprise level initiatives required by the White House Director of Information Technology (D/WHIT) for unified services enabled by converging network and service infrastructures and business practices. For FY18, some of WHCA's portfolios have changed to better represent service capabilities, improve mission alignment, and identify traceability of initiatives to new modernization efforts advanced in WHCA's Presidential Service Strategy. WHCA's PSS 2022 is the central theme of WHCA's Strategic Plan and approach for transformational modernization and innovation to ensure POTUS and VPOTUS can communicate anywhere, anytime, by any means with anyone in the world. PSS 2022 is WHCA's means to achieve targeted architectures comprised of mobile IP solutions enabling unified capabilities and seamless services for information sharing and communications including: Presidential Travel Services Modernization; Senior Leader Communications, Command and Control; Mobility; Cyber Resilience; Network Infrastructure Convergence; Next Generation Networking; High Definition Broadcast Services; and, enterprise collaboration capabilities for personnel supporting Presidential events. WHCA strategically manages IT capabilities within five service portfolios: Senior Leader Communications, Enterprise IT, Broadcast and Audio Visual, Transport, and Deployable Services. The PSS is organized around these service portfolios to align WHCA's strategy, vision, and future capabilities with planned initiatives to ensure future success.		
Broadcast and Audio Visual Services: (\$5.330) Continues to evolve broadcast studio capabilities and strategies for unified communications, increased bandwidth, On-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Continue to implement Next Generation broadcast event production and support systems; continue to leverage smart tagging techniques for global access and search; modernize and automate the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use. Provide multimedia services and production products to government, news, and other organizations for recording events, providing historical records, and custom broadcast products and services of the POTUS, VPOTUS, and other leaders as designated. Services and focus areas within this portfolio are Audio Visual System Support, Broadcast Production, Presidential Broadcast Archive, and Multi-Media Production. Continues to embrace mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization will continue to fulfil capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.		
Transport Services: (\$6.530) Continue to leverage and acquire emerging network transport and SATCOM technologies to build out a Multiple Level Secure (MLS) backbone supporting secure unified communications and high speed assured transport; and evaluate DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Deploys the Presidential Transport Network (PTN) as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending PITC Enterprise IT services to customers. Adopt emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continue to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.		
Senior Leader Communications (Formerly Network and Data and partially Voice and Video Teleconferencing Portfolios (\$5.000)): (\$13.345) Continue to apply a multi phased data cloud solution, incorporating DISA Enterprise Services where possible, that supports the PITC and mobile users during Presidential events. Will continue to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Will provide storage, virtualization, and collaborative tools to WHMO/WHCA. Adopt DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency communications requirements including Continuity of Operations (CONOPS), and Continuity of Government (COG). Provide reliable, secure, and modern Senior Leader Communication capabilities that enable timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the National Leadership Command Capability (NLCC) infrastructure. Provide national level classified conferencing and continuity of support for the President whether in a permanent or temporary location, using ground transportation, or while aboard fixed-wing and rotary-wing aircraft. Leverages new commercial solutions for new or enhanced capabilities including Presidential Universal Mobile Access (PUMA) classified voice services (up to TS/SCI), Presidential Unified Motorcade Communications (PUMC) that will link key vehicles in the Motorcade into a mobile ad-hoc network, Voice Video, and Visualization, Virtual Personal Assistant, post Zero Day recovery, and next generation networking.		
Enterprise IT (EIT) (Formerly System Assurance, partially Voice and Video Teleconferencing (\$1.700), and Facilities and Infrastructure Portfolios): (\$11.497) Continues to refine defense solutions, personnel, techniques, and best practices to defend, detect, and mitigate cyber-based threats throughout the WHMO/WHCA infrastructure via a Presidential Digital Services Assurance (PDSA) "Zero Trust" that enable WHCA critical systems to defend against modern, large scale, remote attacks. Continue to replace end of life encryption equipment and software for existing operations of all voice, video, data and transport systems. Delivers reliable, secure, and modern digital services architecture and mobile information sharing environment that employs best-in-class security and innovative business applications. Continue to		

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 90 / White House Communication Agency
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303134K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>upgrade WHCA's telecommunications infrastructure to support multiple WHMO/WHCA facilities. Supports the WHMO/WHCA's consolidation of infrastructure and communications capabilities that will provide unified operations and seamless Situational Awareness (SA), Common Operational Picture (COP) and Command and Control (C2) capabilities. Implements IT Service Delivery best practices to meet or exceed service levels agreements; and, postures the PITC network to enable WHCA customers to serve effectively by frequently introducing new digital capabilities and anticipating future data and bandwidth demands.</p> <p>Deployable Services (Formerly System of Systems and Technology Insertion Portfolios): (\$8.541) Will continue to evolve field smart, secure mobile, wireless devices and technologies to provide mobile users with next generation portable communication capabilities and platforms. Continue to conduct technology and engineering assessments with the intent of integrating best of breed COTS products to support the implementation of on-demand service delivery options for all mobile and airborne platforms. Provide rapidly configurable travel systems and mobile vehicle capabilities for the White House, and others as directed. These capabilities mirror high end commercially available solutions that meet customers' requirements for security and high availability of services. Provide a modular system that manages the lifecycle of systems, equipment, and devices and tracks their deployment to mission locations and replenish equipment and service devices.</p> <p>Explanation of Change from FY 2017 to FY 2018: The increase of +\$9.266 from FY 2017 to FY 2018 is attributable to new capabilities required to fulfill two capability gaps, the Presidential Unified Motorcade Communications (PUMC) and the Presidential Digital Services Assurance (PDSA). The PUMC is an interconnected and interoperable motorcade with expanded capabilities and services that work coherently with each other. The PDSA requires upgrades to ensure mission services meet or exceed technical specifications, insider threat reduction and security mandates, as well as POTUS social media archival requirements throughout the White House Military Office (WHMO) IT enterprise for both the Senior Leader Communications, Enterprise IT, and Broadcast and Audio Visual Services portfolios.</p> <p>FY 2019 (\$94.610). WHCA's Presidential Service Strategy 2022 (PSS 2022) updates WHCA's Presidential Communications Vision 2020 (PCV 2020) to reflect capability achievements made in mobility, cybersecurity, retirement of legacy technologies, and other modernization efforts to improve the White House's ability to develop and implement national level policy on a day to day basis and during crisis using the NLCC infrastructure. For FY18, some of WHCA's portfolios have changed to better represent service capabilities, improve mission alignment, and identify traceability of initiatives to new modernization efforts advanced in WHCA's Presidential Service Strategy. WHCA's PSS 2022 is the central theme of WHCA's Strategic Plan and approach for transformational modernization and innovation to ensure POTUS and VPOTUS can communicate anywhere, anytime, by any means with anyone in the world. PSS 2022 is WHCA's means to achieve targeted architectures comprised of mobile IP solutions enabling unified capabilities and seamless services for information sharing and communications including: Presidential Travel Services Modernization; Senior Leader Communications, Command and Control; Mobility; Cyber Resilience; Network Infrastructure Convergence; Next Generation Networking; High Definition Broadcast Services; and, enterprise collaboration capabilities for personnel supporting Presidential events. WHCA strategically manages IT capabilities within five service portfolios: Senior Leader Communications, Enterprise IT, Broadcast and Audio Visual, Transport, and Deployable Services. The PSS is organized around these service portfolios to align WHCA's strategy, vision, and future capabilities with planned initiatives to ensure future success.</p> <p>Broadcast and Audio Visual Services: (\$5.437) Will continue to evolve broadcast studio capabilities and strategies for unified communications, increased bandwidth, On-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Will continue to implement Next Generation broadcast event production and support systems; continues to leverage smart tagging techniques for global access and search; modernize and automate the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use. Provides multimedia services and production products to government, news, and other organizations for recording events, providing historical records, and custom broadcast products and services of the POTUS, VPOTUS, and other leaders as designated. Services and focus areas within this portfolio are Audio Visual System Support, Broadcast Production, Presidential Broadcast Archive, and Multi-Media Production. Will continue to embrace mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization will continue to fulfil capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.</p> <p>Transport Services: (\$6.661) Will continue to leverage and acquire emerging network transport and SATCOM technologies to build out a MLS backbone supporting secure unified communications and high speed assured transport; and evaluates DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Deploys the PTN as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending PITC Enterprise IT services to customers. Adopts emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continues to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.</p> <p>Senior Leader Communications: (\$29.039) Will continue to apply a multi phased data cloud solution, incorporating DISA Enterprise Services where possible, that supports the PITC and mobile users during Presidential events. Continues to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Continue to provide storage,</p>

<p>virtualization, and collaborative tools to WHMO/WHCA. Continue to adopt DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency communications requirements including CONOPS, and COG. Provide reliable, secure, and modern Senior Leader Communication capabilities that enable timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the NLCC infrastructure. Provide national level classified conferencing and continuity of support for the President whether in a permanent or temporary location, using ground transportation, or while aboard fixed-wing and rotary-wing aircraft. Will continue leveraging new commercial solutions for new or enhanced capabilities including PUMC that will link key vehicles in the Motorcade into a mobile Voice Video, and Visualization, Virtual Personal Assistant, post Zero Day recovery, and next generation networking. Provide replacement of motorcade communication vehicles that provide 24/7 C2C communications to the POTUS when not on White House grounds (UHF SATCOM), VHF line of Sight to the Limo, and transport infrastructure for classified mobile devices for Senior Level POTUS officials and the Military Aid. Establishment of a Mobile Ad-Hoc Network (MANET) providing lightweight and robust mobile networking capabilities that can be deployed as a temporary service for the POTUS and VPOTUS within any forward deployed environment. MANET will include the use of emerging government solutions including PUMA, PITC Trip Kit, and Presidential Transport Network, employing service bonding and persistence technologies riding SATCOM, Government or Commercial services.</p> <p>Enterprise IT (EIT): (\$44.761) Will continue to refine defense solutions, personnel, techniques, and best practices to defend, detect, and mitigate cyber-based threats throughout the PITC infrastructure via a PDSA "Zero Trust" that enable WHCA critical systems to defend against modern, large scale, remote attacks. Will continue to replace end of life encryption equipment and software for existing operations of all voice, video, data and transport systems. Will deliver reliable, secure, and modern digital services architecture and mobile information sharing environment that employs best-in-class security and innovative business applications. Will continue to upgrade WHCA's telecommunications infrastructure to support multiple WHMO/WHCA facilities to include Camp David. Supports the WHMO/WHCA's consolidation of infrastructure and communications capabilities that will provide unified operations and seamless SA, COP and C2 capabilities. Implements IT Service Delivery best practices to meet or exceed service levels agreements; and, postures the PITC network to enable WHCA customers to serve effectively by frequently introducing new digital capabilities and anticipating future data and bandwidth demands. Transitions to Cloud Services providing a single, consolidated network service infrastructure for all members of the PITC including: Long-term storage; phased migration and synchronization capability for infrastructure, accounts, and software; High availability and gault tolerance within the same site and across data centers; and, service resilience and disaster recovery.</p> <p>Deployable Services: (\$8.712) Will continue to evolve field smart, secure mobile, wireless devices and technologies to provide mobile users with next generation portable communication capabilities and platforms. Will continue to conduct technology and engineering assessments with the intent of integrating best of breed COTS products to support the implementation of on-demand service delivery options for all mobile and airborne platforms. Provide rapidly configurable travel systems and mobile vehicle capabilities for the White House, and others as directed. These capabilities mirror high end commercially available solutions that meet customers' requirements for security and high availability of services. Provide a modular system that manages the lifecycle of systems, equipment, and devices and tracks their deployment to mission locations and replenish equipment and service devices.</p> <p>Change from FY 2018 to FY 2019: The increase of +\$49.367 from FY 2018 to FY 2019 is attributable to a one-time increase (\$4.000) for Mobile At-Hoc network modernization efforts providing assured and secure communication services globally to the President and Vice President while traveling in the motorcade and a one-time increase (+\$4.220) for due to the replacement of motorcade communication vehicles that provide around the clock command and control communications to the POTUS when not on White House grounds, VHF line of Sight to the Limo, and transport infrastructure for classified mobile devices for Senior Level POTUS officials and the Military Aid within the Senior Leader Communications portfolio; one-time increase (+\$7.983) for outside plant cabling and supporting infrastructure modernization efforts at Camp David, providing future expansion capabilities and proper user accessibility and support by installing the latest supportable cable/conduit infrastructure between facilities within the Enterprise IT portfolio; and, one-time increase (+\$38.000) the PITC transition to cloud services providing network infrastructure upgrades, increased security, reliability, and adaptabilities to support growing mission requirements and consolidation of PITC services within both the Senior Leader Communication and Enterprise IT Portfolios. Increases are offset by a decrease of -\$4.836 due to completing communication infrastructure installation requirements at POTUS second residences.</p> <p>Performance Metrics:</p> <p>Broadcast and Audio Visual Services Portfolio goal (FY 2017 and FY 2018): Improve the President's and Senior Staff's access to and storage of high-quality multimedia broadcast information for both incoming and outgoing communication needs. Enables COOP to maintain essential Broadcast functions and next generation Broadcast services including High Definition Services for Streaming and Virtualization.</p> <ul style="list-style-type: none"> • Broadcast studio construction progress (Met); • Customer satisfaction for new studio services; • Broadcast services delivered;

Description:

The Joint Regional Security Stacks (JRSS) are a joint DoD security architecture comprised of complementary defensive security solutions that remove redundant Information Assurance (IA) protections; leverages enterprise defensive capabilities with standardized security suites; protects the enclaves after the separation of server and user assets; and provides the tool sets necessary to monitor and control all security mechanisms throughout DoD's Joint Information Environment.

Justification: FY 2017: (\$149.623) Procured hardware/software to enhance the DoD Cyber Situational Awareness Analytic Cloud (CSAAC) to incorporate Joint Regional Security Stacks/Joint Management Systems (JRSS/JMS) analytics data and correlation capabilities at JRSS locations; tech refresh enhancements to JRSS 1.5 capabilities; and began procurement of JRSS 2.0 capabilities required to meet functionality at the Department of Navy (DoN) Gateways. Once completed, it enabled the ability to collect, aggregate and review syslog and security event data, and perform automated and manual correlation for both cyber defense and application performance monitoring and troubleshooting and enable DoN to begin migrating behind JRSS. DISA procured the following capabilities: • JRSS and JMS 1.5 Tech Refresh - (\$76.599) Procured hardware to support technology refresh enhancements to JRSS and JMS 1.5 active stack capabilities. Tech refresh acceleration of Load Balancer, SSL decryption, and SIM will enable 2.0 capabilities. DISA will pursue multi-year warranties of refreshed items, which will support 40 major HW/SW end items & 400+ racks of equipment. • Web Security Gateway - (\$35.846) Supported fine grain content filtering of assembled pages, proxy and native SSL and provides Web Content (Malware/Policy Based) filtering; Integrated with SSL break and inspect capability; and Provided inline antivirus for web-based file scans. • Break and Inspect (B&I) (client to server, SSL/TLS only) - (\$29.706) Ability to break encrypted traffic, open attachments and segment off threat traffic. Complemented but did not replace DoD DMZ or other CDC/IPN/ISN B&I capabilities. Primary JRSS break and inspect use-case is outbound SSL from DoD users to Internet. • Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$7.472) Built-out the CSAAC requirements to enhance JRSS/JMS 1.5 ArcSight and Splunk log analytics and correlation capabilities utilizing existing Data Orchestrator for event aggregation, enrichment and forwarding providing enhanced cyber SA for COCOMS, Services and Agencies. FY 2018: (\$188.483) Will procure hardware/software to enhance the DoD Cyber Situational Awareness Analytic Cloud (CSAAC) to incorporate Joint Regional Security Stacks/Joint Management Systems (JRSS/JMS) analytics data and correlation capabilities at JRSS locations; upgrade Multiprotocol Label Switching (MPLS) connectivity to support integration with JRSS, and tech refresh/enhance JRSS/JMS to provide continued support for JRSS 1.5 capabilities and procure JRSS 2.0 capabilities. Once complete, will enable ability to collect, aggregate and review syslog and security event data, and perform automated and manual correlation for both cyber defense and application performance monitoring and troubleshooting and enable DoN to migrate behind JRSS. DISA will procure the following capabilities: • JRSS 2.0 Capabilities - (\$104.703) Will purchase new hardware/software to deploy JRSS 2.0 Capabilities for Web Content Filtering (\$12.000), Endpoint Licenses (\$19.300), Inline Intrusion Protections System (\$34.863), Break and Inspect (\$31.565) capabilities that will be deployed on NIPR and SIPR and the associated engineering support (\$6.975). • JRSS and JMS 1.5 Tech Refresh - (\$49.670) Will continue to procure hardware and software to support technology refresh enhancements of end of life enterprise JRSS hubs/spokes (\$11.820), tech refresh of end of life enterprise JRSS 1.5 and JMS 1.5 equipment (\$14.500); engineering support (\$4.650), license renewals (\$5.600), and a new global condensed stack to support the enterprise solution (\$13.100). • Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$11.210) Will acquire hardware/software to support the installation and integration of three NIPR and SIPR Hub Sites to perform Big Data Platform and CSAAC capabilities to enhance JRSS/JMS 1.5 ArcSight and Splunk log analytics and correlation capabilities, which include aggregation, enrichment, forwarding, and enhanced cyber situational awareness for the COCOMs Services and Agencies.

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 96 / Joint Regional Security Stacks
ID Code (A=Service Ready, B=Not Service Ready): A	Program Elements for Code B Items: 0303228K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>• Multiprotocol Label Switching (MPLS, formerly part of JRSS and JMS 1.5 Tech Refresh (\$9.400)) - (\$22.900) Will upgrade existing connections to provide additional bandwidth and streamlined management in order to support integration with JRSS and handle the additional traffic associated with enhanced cyber SA.</p> <p>Explanation of Change from FY 2017 to FY 2018: The increase of +\$38.860 between FY 2017 and FY 2018 is due to the upgrade of additional connections with MPLS routers at an estimated 23 locations (+ \$13.500) and the upgrade of additional connections with MPLS routers at an estimated 23 locations and acquisition of new hardware/software to support fielding of new JRSS 2.0 Capabilities (i.e. Break and Inspect - SIPR and Inline IPS) (+\$39.749). This is partially offset by a decrease in the acquisition of analytic hubs (-\$4.090) and JRSS/JMS 1.5 tech refresh enhancements within CONUS (-\$10.299).</p> <p>FY 2019: (\$140.338) Will procure hardware/software to support JRSS 1.5 and DoD Cyber Situational Awareness Analytic Capabilities tech refresh and enhancements. Will continue the upgrade of MPLS connectivity to support integration with JRSS. Once complete, this will enable the ability to collect, aggregate, and review syslog and security event data, perform automated and manual correlation for both cyber defense and application performance monitoring, and troubleshooting to support migrations to JRSS. DISA will procure the following capabilities:</p> <p>• JRSS and JMS Tech Refresh - (\$111.438) Will continue to procure hardware and software to support technology refresh enhancements of end-of-life/end-of-support JRSS hubs/spokes in order to keep current with evolving threats.</p> <p>• Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$6.000) Funds procurement, engineering, test, integration, and implementation of analytics supporting JRSS. Supports the hardware/software tech refresh/enhancement of CSAAC capabilities.</p> <p>• Multiprotocol Label Switching (MPLS) - (\$22.900) Will continue to upgrade existing connections to provide additional bandwidth and streamlined management in order to support integration with JRSS and handle the additional traffic associated with enhanced cyber SA.</p> <p>Explanation of Change from FY 2018 to FY 2019: The decrease of -\$48.145 between FY 2018 and FY 2019 is due to the completion of the JRSS 2.0 capabilities in FY18 (Break and Inspect and Inline IPS), acquisition of CSAAC hub HW/SW upgrades and reduced hardware/software tech refresh requirements for JRSS/JMS in FY19.</p> <p>Performance Metrics:</p> <p>1. Implement JMS CSAAC analytic capability at 6 JRSS locations in FY 2017, 6 additional JRSS locations in FY 2018, and 1 location in FY 2019. FY 2017 6 / Actual 0 FY 2018 6 FY 2019 1</p> <p>2. Procure Web Security Gateway capabilities for 75% of the JRSS sites and Break and Inspect capabilities for 67% of the JRSS sites in FY 2017. Procure 10% of the required Web Security Gateway capabilities for the remaining 25% of the JRSS sites in FY 2018. FY 2017 80% JRSS / 67% B&I / Actual 55% JRSS Web security Gateway / 0% B&I FY 2018 10% FY 2019 67% B&I planned</p> <p>3. MPLS enabled sites: FY17 Estimate: 9 Sites / Actual 9 FY18 Estimate: 23 Sites FY19 Estimate: 23 Sites</p>

Description:

Joint Service Provider (JSP) mission focuses on providing timely, trustworthy, and dependable information technology (IT) services for Pentagon and National Capital Region (NCR) customers. JSP provides the full range of information technology equipment, services, solutions, and customer support to the Office of the Secretary of Defense, the Office of the Deputy Chief Management Officer, and WHS to meet mission and business requirements. It enables missions and business processes through secure, robust, reliable state-of-the-art information technology and services.

Justification:

FY 2017: (\$0.000)

FY 2018: (\$100.783)

Voice, Data, and Video Infrastructure: (\$1.744) - Will provide support of Pentagon/NCR Voice, Data, and Video Infrastructure life-cycle refresh, modernization, and other approved project and initiatives. This includes life-cycle refresh and modernization of the 3 Pentagon unclassified and classified voice switches, the life-cycle refresh and modernization of Audio Visual (AV) and Video-Teleconference (VTC) hardware and software in the Mark Center Conference Center, Pentagon Conference Center, and the Pentagon Emergency Operations Center. Will procure hardware/software for lifecycle replacement for all IT equipment, software, and installation services. JSP provides IT support services for the Office of the Secretary of Defense (OSD), Joint Staff, Washington Headquarters Service (WHS), Pentagon Force Protection Agency (PFPA), Consolidated Adjudication Facility (CAF), and other WHS-supported users and communities supported within the Pentagon Reservation and other areas in the National Capitol Region.

Server, Compute, and Storage Infrastructure: (\$56.606) - Will provide network transport for all Services and Agencies in the Pentagon at all security classification levels. This program includes comprehensive network security, computer network defense, and intrusion detection at the DoD Information Networks Pentagon edge. It also provides the Pentagon IPN with full spectrum computing and data management, data storage, replication, recovery, and back-up. This program also provides the organizational messaging node for DoD and replaces existing firewalls with the joint computer network defense architecture for the Pentagon node. The program also funds Life Cycle Replacement and Modernization of the Pentagon's core network infrastructure minimizing the risk for increased occurrences/ durations of widespread network outages and higher maintenance costs. The program also provides the capacity needed to meet the Joint Information Environment bandwidth requirements based on the virtualization and continuing alignment of Enterprise services at DoD Core Data Centers.

End User Services: (\$33.823) - Will provide modernization and life-cycle refresh of office automation and IT end-user infrastructure requirements for the WHS/OSD, the Joint Staff, the DoD CAF, WHMO, the US Court of Appeals for the Armed Forces, and 14 organizational components of the OSD. Will procure approximately 30 office automation, application development, and classified and unclassified end user device support. Will provide the back-end server and data storage to support the virtualized desktop as a service infrastructure. This converged and virtualized platform enables JSP to avoid costly maintenance of individual desktops by deploying a reduced number of disparate user images directly from the server for better management of security patching, improved software license and version control, and ability of JSP-supported staff to work from geographically-dispersed locations.

High-Availability (HA) Architecture – Secretary of Defense Communications (SDCs): (\$1.676) - Will provide funding for critical business operations, high-availability architecture, and core infrastructure support, at all classification levels, for the immediate Office of the Secretary of Defense.

Consolidated Adjudication Facility (CAF) Infrastructure: (\$1.618) - Will provide continued support of the DoD CAF, a consolidation to promote and enhance greater consistency, standardization, and efficiency throughout the adjudicative process. The program also funds Continuity of Operations IT requirements that support the sustainment of critical business operations in the event of an emergency.

Information Technology (IT) Service Management: (\$4.806) - Will provide for investments in ITSM tools (hardware, software) required for the management of core classified and unclassified Pentagon/NCR network and cyber operations.

<p>Acquisition, Technology, and Logistics (AT&L) Mission Application Environment Infrastructure: (\$0.510) - Will provide funding for hardware and software required for management of the AT&L Mission Application Environment infrastructure.</p> <p>The increase of +\$100.783 between FY 2017 and FY 2018 is attributed to the functional transfer of JSP from Army Information Technology Agency, WHS-Enterprise Information Technology Service Division (EITSD), Joint Staff of IT Services and Office of the Administrative Assistant of the Secretary of the Army (OAA-Army).</p> <p>FY 2019: (\$107.182)</p> <p>Voice, Data, and Video Infrastructure: (\$1.678) - Will continue to provide support of Pentagon/NCR Voice, Data, and Video Infrastructure life-cycle refresh, modernization, and other approved project and initiatives. This includes life-cycle refresh (LCR) and modernization of the 3 Pentagon unclassified and classified voice switches, the life-cycle refresh and modernization of Audio Visual (AV) and Video-Teleconference (VTC) hardware and software in the Mark Center Conference Center, Pentagon Conference Center, and the Pentagon Emergency Operations Center. Will procure hardware/software for lifecycle replacement for all IT equipment, software, and installation services. JSP provides IT support services for the OSD, Joint Staff, WHS, PFPA, CAF, and other WHS-supported users and communities supported within the Pentagon Reservation and other areas in the National Capitol Region.</p> <p>Server, Compute, and Storage Infrastructure: (\$56.547) - Will continue to provide network transport for all Services and Agencies in the Pentagon at all security classification levels. This program includes comprehensive network security, computer network defense, and intrusion detection at the DoD Information Networks Pentagon edge. It also provides the Pentagon IPN with full spectrum computing and data management, data storage, replication, recovery, and back-up. This program also provides the organizational messaging node for DoD and replaces existing firewalls with the joint computer network defense architecture for the Pentagon node. The program also funds Life Cycle Replacement and Modernization of the Pentagon's core network infrastructure minimizing the risk for increased occurrences/ durations of widespread network outages and higher maintenance costs. The program also provides the capacity needed to meet the Joint Information Environment bandwidth requirements based on the virtualization and continuing alignment of Enterprise services at DoD Core Data Centers.</p> <p>End User Services: (\$40.563) - Will continue to provide modernization and life-cycle refresh of office automation and IT end-user infrastructure requirements for the WHS/OSD, the Joint Staff, the DoD CAF, WHMO, the US Court of Appeals for the Armed Forces, and 14 organizational components of the OSD. Will procure approximately 30 office automation, application development, and classified and unclassified end user device support. Will provide the back-end server and data storage to support the virtualized desktop as a service infrastructure. This converged and virtualized platform enables JSP to avoid costly maintenance of individual desktops by deploying a reduced number of disparate user images directly from the server for better management of security patching, improved software license and version control, and ability of JSP-supported staff to work from geographically-dispersed locations.</p> <p>High-Availability (HA) Architecture – Secretary of Defense Communications (SDCs): (\$1.604) - Will continue to provide funding for critical business operations, high-availability architecture, and core infrastructure support, at all classification levels, for the immediate Office of the Secretary of Defense.</p> <p>Consolidated Adjudication Facility (CAF) Infrastructure: (\$1.649) - Will continue to provide continued support of the DoD CAF, a consolidation to promote and enhance greater consistency, standardization, and efficiency throughout the adjudicative process. The program also funds Continuity of Operations IT requirements that support the sustainment of critical business operations in the event of an emergency.</p> <p>Information Technology (IT) Service Management: (\$4.621) - Will continue to provide for investments in ITSM tools (hardware, software) required for the management of core classified and unclassified Pentagon/NCR network and cyber operations.</p> <p>Acquisition, Technology, and Logistics (AT&L) Mission Application Environment Infrastructure: (\$0.520) - Will continue to provide funding for hardware and software required for management of the AT&L Mission Application Environment infrastructure.</p> <p>Explanation of Change from FY 2018 to FY 2019: The increase of +\$6.399 between FY 2018 and FY 2019 is due to an increase for procurement in support of migration efforts for the onboarding and consolidation of the Fourth Estate information technology mission to JSP - Non-NCR and LCR of major IT systems, infrastructure, and office automation capabilities, and procurement of hardware to ensure common commodity baselines to reduce spare parts in order to lower sustainment costs.</p>

Description:

Defense Information Systems Network (DISN) is the Department of Defense's (DoD's) consolidated worldwide telecommunications infrastructure that provides end-to-end information transport for DoD operations to the warfighters and the Combatant Commanders with a robust Command, Control, Communications, Computers and Intelligence information long-haul transport infrastructure. The DISN, seamlessly spanning full spectrum from terrestrial to space and strategic to tactical domains, provides the interoperable telecommunications connectivity and value-added services required to plan, implement, and support all operational missions, anytime, and anywhere pushing DISN services to the edge of the communications network. The DISN delivers an integrated platform consisting of DoD's core communications, computing, and information services as well as integrating terrestrial, wireless, and satellite communications into a network cloud that is survivable and dynamically scalable. Procurement funding primarily supports the Technology Refreshment (TR); Joint Worldwide Intelligence Communications System (JWICS); National Emergency Action Decision Network (NEADN)/Presidential and National Voice Conferencing (PNVC); the Enhanced Pentagon Capability (EPC)/Survivable Emergency Conferencing Network (SECN); DoD Mobility; and a significant satellite communications extension of the DISN. The procurement funding enables the DISN to remain technologically up-to date and capable by achieving the best possible balance between network performance and network cost through a process known as network optimization.

<p>Description:</p> <p>FY 2019-2023, the DLA Procurement program consists of Passenger Carrying Motor Vehicles (PCMV), Pacific Disaster Center (PDC) equipment, and Warstoppers equipment. The FY19 request includes PCMV (\$225K), PDC (\$4,508M), and Warstoppers (\$492K). The PDC request reflects a one time FY19 requirement of \$3,691M above their baseline funding levels.</p> <p>PCMV replacement is required to support DLA's overseas logistics operations. DLA maintains field offices in Europe, Kuwait, Korea, England and Japan. Replacement of Agency-owned and commercially leased PCMV's with owned PCMV's is required in cases when it is less expensive to own rather than commercially lease. PCMV ownership is usually significantly less expensive than commercial leasing at overseas locations.</p> <p>Pacific Disaster Center - this program is reported in accordance with Title 10, United States Code, Section 119(a)(1) in the Special Access Program Annual Report to Congress.</p> <p>WARSTOPPER Program identified a requirement in FY17 for procurement funds to modernize the microcircuit surge capability for emulated legacy (no active production) microcircuits. These microcircuits are identified as critical within over a hundred weapon systems and present an industrial readiness vulnerability. The modernization plan for the surge capability will require recurring funds for four additional years of funding. An additional requirement is also identified for electron tube manufacturing equipment for surge production. Electron tubes continue to be a critical element in many weapon systems and require Government investment to ensure industry can meet wartime requirements.</p>

Description:

The Defense Media Activity (DMA) Fiscal Year 2019 program of \$13.106 million dollars continues to provide capital investment funds for ongoing automation of major equipment and systems initiatives used to execute the media and visual information and overseas radio and television information and joint training and education missions, providing improved storage, management, and distribution of DoD imagery and visual information products.

<p>Description:</p> <p>Title III of the Defense Production Act (DPA) provides the Department of Defense (DoD) with a powerful tool to ensure the timely creation and availability of domestic production capabilities for technologies that have the potential for wide-ranging impact on the operational capabilities and technological superiority of United States (U.S.) defense systems. DPA Title III is unique in that it is the sole DoD program focused on creating, maintaining, protecting, and expanding or restoring domestic production capacity to strengthen domestic industry and to establish the industrial base capacity for essential national defense capabilities.</p> <p>The Defense Production Act is authorized by 50 U.S.C. Sections 4501-4568. This budget includes essential transformational initiatives using the authorities of Title III of the DPA. The multi-year projects in this budget will incentivize domestic sources to establish, strengthen, and expand domestic industrial base capabilities for key technologies that support transformational initiatives and maintain the technological superiority of U.S. defense systems.</p> <p>In accordance with the provisions of the Defense Production Act of 1950, as amended, (50 U.S.C. Sections 4501-4568), notification to Congress of the intent of the DoD to execute any of the projects described in this exhibit to correct domestic industrial base shortfalls for technologies and/or materials essential for the execution of the national security strategy of the U.S. will be provided via letter notification before the referenced projects are initiated.</p>

Justification:
Strategic overview:

DPA Title III investments for DoD are informed by the Department's key investment strategy documents including the Quadrennial Defense Review (QDR) and the Long Range Research and Development Plan (LRRDP). Investments for DoD will enable the production of capacity for technologies and materials emerging from the technology base when the private sector is unable to respond within DoD timelines. Technology focus areas include space, undersea, air dominance, strike, missile defense, and emerging technologies.

The National Security Space Industrial and Supply Base (NSS ISB) Risk Mitigation Program was developed by the DoD to formulate a systematic process to fund mitigation efforts to rectify shortcomings in the space industrial and supply base. The objective is to ensure access to critical technologies and capabilities in the quality, quantity, and timeframes required to support U.S. Government space programs. Projects in this program are addressing cross-platform, multi-agency/Service requirements. Projects are developed in response to risk mitigation determinations and prioritized critical requirements of stake holders in DoD and other agencies, as represented through the Department's Space Industrial Base Working Group.

Program Change Summary (\$ in Millions)

FY 2019 resources (\$M):
FY 2019 Request* \$38.578
*Includes an increase to the Advanced Weapon Component/Materials Production project due to changes in project timelines and obligation/expenditure rates resulting in change of \$1.177M.

FY 2018 resources (\$M):
FY 2018 Request \$37.401
The projects to be executed within FY 2018 resources are identified below. The multi-year cost phasing of each of these projects is addressed in the P5 exhibit.

National Security Space Industrial and Supply Base (NSS ISB) \$21.495
Secure Composite Shipping Containers \$3.001
Advanced Weapon Component/ Material Production \$2.901
Next Generation Jammer Gallium Nitride (GaN) Monolithic Microwave Integrated Circuits (MMIC) & Wideband Circulator Technologies \$3.001
Next Generation Soldier Protection \$7.003

ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0902199D8Z	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>FY 2017 resources (\$M): FY 2017 Request \$44.091 Congressional increase +\$20.000 Total FY 2017 Appropriated \$64.091 Transfer from Department of Energy (DOE) +\$45.00 Total DPA Fund \$109.091</p> <p>FY 2017 Congressional increase of \$20M was applied to the Alane Fuel project. This project develops aluminum trihydride or "AlH3" industrial base in support of DoD applications by building two pilot production sources within the US. FY 2017 The \$45M transfer from DOE was used for the Advanced Drop-in Bio-Fuel projects. This initiative establishes a domestic production plant producing Advanced Drop-in Biofuels which includes alternative jet fuel and marine diesel applications allowing the Navy and government agencies to meet their energy goals and objectives</p> <p>This budget includes essential transformational initiatives using the authorities of Title III of the DPA. Project descriptions are provided below for each of the P5 exhibit projects listed, and the single or multi-year cost phasing of each of the projects is addressed in the P5 exhibit.</p> <p>FY 2019 Project Descriptions:</p> <p>NSS ISB - Electron Beam Direct Write (FY 2016 – FY 2019): This project addresses a need for an advanced lithography tool for government integrated circuit developments. It will have benefits in vastly reduced mask costs, improved design turn-around times, improved yield & reliability, improved design security (trust), and increased die sizes. Production versions of this tool would be inserted in U.S. integrated circuit foundries fabricating parts for space and defense applications at a relatively low cost (versus commercial advanced lithography solutions in development) per system. The proposed project will accomplish the first such insertion. The project is to complete the development of a piece of lithography equipment that uses multiple electron beams (e-beams) to enable the direct transfer ("writing") of integrated circuit layer descriptions to a physical wafer being processed. Accomplishing this project brings a host of benefits when coupled with 1 D (1-dimensional or "unidirectional") layout techniques as part of a complementary ebeam write (CEBW) methodology.</p> <p>NSS ISB - Photovoltaic Substrates Supply Chain Diversification (FY 2016 – FY 2021): The purpose of this effort is to improve national security by addressing a critical gap in the North American supply chain for defense-critical, high-purity germanium (Ge) metal used for space-qualified photovoltaics in a wide range of warfighting and surveillance assets. Those assets include ground-based infrared (IR) optics for night vision operations, airborne IR windows and optical systems, space-based IR optics, and high-efficiency, multi-junction (M-J) photovoltaics (solar cells) used on over 95% of all space satellite assets, both Government and commercial. The investment will ensure the long-term domestic supply of space-qualified Ge substrates by successfully diversifying into higher-margin products that will maintain profitability and allow the company to serve Ge wafer markets.</p> <p>NSS ISB - Next Generation Reaction Wheel Assemblies (RWA) (FY 2016 – FY 2021): This project addresses a need for a multiple-phase Next-Generation scalable Reaction Wheel (NGRW) project to provide a systematic comprehensive, low cost/risk investment affording potential for high return on investment. The goal is to generate or revive a domestic competitor, or to expand the existing vendor's product line, with a focus on smaller wheels using advanced technologies. In addition, investigate encouraging a business partnership to maintain a second source in the U.S. Also, the project will investigate using another product controlled by a U.S. company.</p> <p>NSS ISB - Radiation-Hardened Digital/Analog Production & Qualification (FY 2016 –FY 2021): It is imperative that government organizations responsible for national security, e.g., intelligence acquisition, missile early warning, missile defense, and other space requirements maintain a strong industrial base to supply technology necessary to design, develop, and fabricate Trusted, radiation hardened, high reliability and DoD space qualified Application Specific Integrated Circuits (ASIC), Application Specific Standard Products (ASSP), such as very high speed data switches, and Multi-Core General Purpose Processors (MCGPP) at the less than or equal to 45nm technology node to support onboard processing and other critical applications. The objective of this project is to enhance the Radiation Hardened By Design 45nm ASIC/ASSP design flow, optimize selected circuit designs to reduce power and increase performance and complete the design, fabrication, test and qualification of certain critical devices to include the MC-GPP. In addition to achieving an estimated improvement in performance of > 25% for power and performance for some specific designs, the proposed effort will support life-time acquisition buys of these critical circuits for some identified systems with attendant reductions in system technical, cost and schedule risks.</p>

Exhibit P-40, Budget Line Item Justification: PB 2019 Office of the Secretary Of Defense		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0360D: Defense Production Act Purchases / BA 01: Defense Production Act Purchases / BSA 10: Defense Production Act Purchases		P-1 Line Item Number / Title: Title3 / Defense Production Act Purchases
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0902199D8Z	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>NSS ISB - Trusted Field Programmable Gate Arrays (FPGAs) (FY 2016 – FY 2021): The DoD and Intelligence Community have identified FPGAs as a critical enabling technology across a wide variety of present and future systems. Advanced, commercially available FPGAs do not meet the DoD requirements for Trusted systems as they are manufactured off-shore and are considered vulnerable to tampering and insertion of malicious software and/or hardware. This program seeks to improve the security posture and reduce the risk associated with FPGA technology by addressing security concerns in the design, development, fabrication and supply lifecycle of FPGA devices. The objective of this program is to develop and demonstrate an approach to ensure the availability of advanced "Trusted" and space qualified reprogrammable FPGA technology to support DoD/IC applications including satellite and strategic missile systems. Concerning this effort "Trust" is defined as assurance of the integrity and availability, of a product wherein that product will reliably operate as intentionally designed and not contain any malicious hardware and/or software that will compromise the intended application; e.g., exfiltration of sensitive data, etc.</p> <p>NSS-ISB - Radiation Test Facilities (FY 2017 – FY 2021): Radiation test facilities remain a critical asset to NSS and all of DoD to be able to quantify and qualify the radiation hardness of electronic components. This funding will upgrade and sustain these facilities to fulfill this need. As program budgets shrink in upcoming years, programs are less willing to sustain these facilities, leaving the burden on SMC and the NRO to fund them out of their ever shrinking O&M budget. Without assistance, one of the critical facilities will close (costing over \$1B to reconstitute). Without the current test infrastructure, the DoD would be very under capacity for this capability.</p> <p>NSS ISB - High Strength/High Modulus (HS/HM) Carbon Fibers (FY 2017 – FY 2020): This investment program will ensure there is a domestic industry of qualified to produced High Strength and High Modulus (HS/HM) carbon fibers for NSS and Defense applications. The program's purpose is to reduce inherent supply chain risks associated with a sole source foreign producer in Japan of unique and proprietary level materials while making available to DoD existing domestic second sources of similar materials that are reportedly higher quality, better performing and less expensive. This DoD investment program also supports greater U.S.-Japan (government and industry) defense supply chain security cooperation. If this investment is not made, programs will continue to utilize the sole foreign source, making it unlikely that new programs will consider sourcing from domestic suppliers. This puts NSS and Defense supply at continued risk of disruption due to foreign government controls as well as potential factory closures due to natural and manmade peacetime disasters as well as potential regional conflicts. Any one of these supply disruption scenarios could result in severe and long-lasting supply disruptions affecting multiple programs and their related costs, schedules and performance requirements-in addition to delaying important capabilities to our warfighters.</p> <p>NSS ISB - Mercury Cadmium Telluride Infrared Sensors (Prior Years - FY2021): The goal of this program is to establish and maintain a high quality production capability for Mercury Cadmium Telluride (MCT) epitaxy grown on Cadmium Zinc Telluride (CZT) substrates via molecular beam epitaxy (MBE) at key US-owned and operated foundries in order to assure the necessary supply of strategic focal plane arrays (FPAs) to National Security Space (NSS) agencies when needed. The primary goal is to demonstrate on-shore MCT detectors are equivalent in performance to FPAs utilizing off-shore substrates.</p> <p>Projects Other (non-NSS):</p> <p>Secure Composite Shipping Containers Production Capacity (prior years and FY 2017 –FY 2019): Developed under funding from the Department of Homeland Security (DHS) Advanced Research Projects Agency (HSARPA), the Secure Hybrid Composite Container (SHCC) is an intermodal ISO shipping container providing advanced security features, while meeting all the operational, structural, and customs requirements of standard steel 20ft and 40ft shipping containers. The security system is designed to confirm the integrity of the container and report breaches to the cognizant authorities. The container includes the capability to be tracked during its shipment and alert officials to track deviations and alarms. The ultimate goal of the container is to provide the level of security to law enforcement officials to ensure contraband products and malicious agents have not been inserted into the container for smuggling into the US. Investment under Title III to establish initial production capability for the secure hybrid composite container can help satisfy an estimated 3,000 container per year initial government need from the Department of Defense, Department of State, and the Intelligence Community agencies requiring secure shipping containers. A production line with an output of approximately 100 containers per year output is planned. Previously budgeted FY2016 funding was executed with prior year funds.</p> <p>Next Generation Jammer Gallium Nitride (GaN) MMIC & Wideband Circulator Technologies (Prior Years and FY 2017- FY 2019): This project is an investment in production technology and capacity expansion for gallium nitride (GaN) monolithic microwave integrated circuits (MMICs) and wideband circulator technologies for Next Generation Jammer (NGJ) program requirements. The objective is to establish/expand one or more domestic sources for GaN integrated circuit components to ensure the availability of critical components required for the Next Generation Jammer and other electronic warfare systems. Additionally,</p>

Line Item MDAP/MAIS Code: N/A		
<p>this initiative will mitigate program risk by ensuring on-shore availability of critical components, maintain secure sources for these essential electronic components through oversight of sources and processes, and address process and quality improvements to drive down costs.</p> <p>Advanced Weapon Component/Materials Production (FY 2016, FY 2018 – Continuing): The purpose of this continuous effort is to use DPA Title III authorities to make investments in the domestic industrial base that maintain the timely availability of critical-need, technologically superior production capabilities that are independently available within the U.S. for both current and future weapon systems, as informed by the Department's key investment strategy documents including the Quadrennial Defense Review (QDR) and the Long Range Research and Development Plan (LRRDP). These resources will focus on projects that span multiple agencies, weapons platforms, and Service needs, enabling the production of capacity for technologies and materials emerging from the technology base that the private sector is unable to respond to within DoD timelines. Technology focus areas include space, undersea, air dominance, strike, missile defense, and emerging technologies.</p> <p>FY 2018 Project Descriptions:</p> <p>NSS ISB - Trusted Field Programmable Gate Arrays (FPGAs) (FY 2016 – FY 2021)</p> <p>NSS ISB - Next Generation Reaction Wheel Assemblies (RWA) (FY 2016 – FY 2021)</p> <p>NSS ISB - Photovoltaic Substrates Supply Chain Diversification (FY 2016 – FY 2021)</p> <p>NSS ISB - Radiation-Hardened Digital/Analog Production & Qualification (FY 2016 –FY 2021)</p> <p>NSS ISB - Electron Beam Direct Write (FY 2016 – FY 2019)</p> <p>NSS ISB - Radiation Test Facilities (FY 2017 – FY 2021)</p> <p>NSS ISB - HS/HM Carbon Fibers (FY 2017 – FY 2020)</p> <p>NSS ISB - Mercury Cadmium Telluride Infrared Sensors (Prior Years - FY2021)</p> <p>Projects Other (non-NSS):</p> <p>Next Generation Jammer Gallium Nitride (GaN) MMIC & Wideband Circulator Technologies (Prior Years and FY 2017- FY 2019)</p> <p>Secure Composite Shipping Containers (prior years and FY 2017 –FY 2019)</p> <p>Next Generation Solider Protection (FY 2016 - FY 2018): The purpose of this project is to create a manufacturing capacity to produce lightweight, high-strength, inherently fire-resistant co-polymer aramid fibers to provide lightweight force protection for Soldiers and air, ground, and naval platforms and bases. Examples include lighter and stronger body armor, helmets, pelvic protection, enhanced combat vehicle survivability, enhanced aviation platform survivability, and integrated base protection. A next generation of co-polymer aramid fibers would provide a step-change increase in tenacity over existing fibers, a key attribute for enabling lighter-weight ballistic protection.</p> <p>Advanced Weapon Component/Materials Production (FY 2016, FY 2018 – Continuing)</p> <p>FY 2017 Project Descriptions</p>

Line Item MDAP/MAIS Code: N/A		
<p>NSS ISB - Radiation-Hardened Transistors & Diodes (FY 2016 – FY 2017): Many present and future DoD and intelligence systems have identified Rad Hard components as a critical base technology. There are very few remaining suppliers of Rad Hard space qualified components such as diodes, Metal Oxide on Silicon Field Effect Transistors (MOSFET), insulated-gate bipolar transistor (IGBT), Optocouplers and other Optical devices, Glassless diodes, JANKC diode dies, and more. These components are used almost universally to provide power and conditioned signals to Application-Specific Integrated Circuit (ASIC) and Field Programmable Gate Arrays (FPGA) circuits. Since this is an extremely niche market, a single company is the only manufacturer of components that designs and produces entirely with US persons in a US facility, and specializes in military, aerospace and space. The company also provides products to commercial space, to companies such as Boeing, Lockheed Martin, and Space Systems Loral. The reduction in demand for strategic radiation hardened electronics (RHE) (e.g., >1Mrad total ionization dose) over the past 15 years has resulted in a substantial decrease of the industrial base, which is down to two main suppliers, and only one supplier, which designs and manufactures their components in the USA today and has a proven process for Rad Hard by Design products.</p> <p>Projects Other (non NSS-ISB):</p> <p>Advanced Microelectronics Trusted Foundry (FY 2017): This project supports the Department's efforts to maintain domestic trusted sources of advanced microelectronics production. AT&L's strategy is focused on improving capability to evaluate and validate trust of microelectronics parts and advance standards to incentivize the commercial marketplace to recognize trust as a competitive design standard, and develop alternative approaches to the current manufacturing-driven means of trust to enable broader DoD access to commercial state of the art technology.</p>

Description:

Program Overview:

The Defense Security Service (DSS) supports national security and the warfighter through its industrial security oversight, education, and insider threat missions. The DSS is responsible for overseeing the protection of classified information and technologies, and materials in the hands of cleared industry by ensuring compliance with the National Industrial Security Program (NISP) on behalf of 26 Department of Defense (DoD) components and 32 other U.S. Federal agencies. The NISP serves as a single, integrated, cohesive industrial security program to protect classified information and to preserve our Nation's economic and technological interests. The DSS provides security oversight, counterintelligence coverage and support to approximately 10,000 cleared companies (comprising over 12,800 industrial facilities and about 850,000 cleared contractors), and accreditation of more than 55,000 workstations across multiple and differing classified networks that process classified information and 160 Secure Internet Protocol Router Networks (SIPRNet) nodes. The DSS supports the Automated Information Systems (AIS) and telecommunications infrastructure and programs that include: National Industrial Security Program (NISP), Counterintelligence (CI), Center for Development of Security Excellence (CDSE), and support elements. The DSS IT infrastructure includes: desktops, networks: (Joint Worldwide Intelligence Communications System (JWCIS), Non-Secure Internet Protocol (NIPRNet), and Secure Internet Protocol Router Network (SIPRNet), Help Desk operations and call center. The DSS manage activities associated with the Enterprise Security System (ESS), which includes ongoing support and maintenance of the following legacy systems: Industrial Security Facilities Database (ISFD), and Security Training Education and Professionalization Portal (STEPP) and the support of current mission systems: National Industrial Security System (NISS), National Industrial Security Program(NISP)Central Access Information Security System (NCAISS), and National Industrial Security Program(NISP)Contract Classification System (NCCS), and Office of the Designated Approval Authority (ODAA) Business Management System (OBMS).

Purpose and Scope: The funds requested provide resources necessary for life-cycle replacement of mission-essential IT equipment and to procure new investment items for Enterprise Security Systems applications.

Justification:

The FY19 funding supports DSS network infrastructure to expand JWICS accessibility and capabilities to various DSS field locations. This capability enables the Counterintelligence Directorate immediate access to TS/SCI information necessary to monitor, protect and leverage shared threat information to detect, deter and mitigate adversary threats to the National Industrial Base.

Program Overview

The Defense Threat Reduction Agency's (DTRA's) mission is to safeguard the United States and its allies from global weapons of mass destruction (WMD) and improvised threats by integrating, synchronizing, and providing expertise, technologies, and capabilities. DTRA is the Department of Defense's (DoD) combat support agency for the countering WMD (CWMD) missions, executing national missions related to CWMD threats at their sources, interdicting weapons and WMD materials at borders and in transit, as well as mitigating WMD effects. The enduring importance of CWMD compels DTRA to continue to leverage creativity and innovation, scientific excellence, and global engagement in achieving mission success across all domains anywhere, and at any time. Globalization, as well as scientific advancement, are lowering or eliminating barriers for a wide range of state and non-state actors to acquire sophisticated and lethal technologies, including increased access to WMD, a trend likely to continue. The DTRA budget request implements DoD guidance and represents a critical part of the Department's investment in securing the Nation from the threat of WMD.

The Joint Improvised-Threat Defeat mission under the authority, direction, and control of DTRA enables the DoD to counter improvised explosive devices and emerging improvised threats in order to support Combatant Commands (CCMDs) and deployed Warfighters.

DTRA's FY 2019 P, DW Budget Request includes Overseas Contingency Operations (OCO) funding in support of DTRA's Joint Improvised-Threat Defeat mission. The increase to DTRA's procurement budget reflects the realignment of activities in accordance with congressional intent to terminate the Joint Improvised-Threat Defeat Fund (JITDF) in section 9015 the Chairman's recommendation to the Senate Appropriations Committee for the Department of Defense Appropriations Bill, 2018.

Description: The Defense Threat Reduction Agency (DTRA) continues to expand its support for the Countering Weapons of Mass Destruction mission overseas. The FY 2019 budget supports DTRA vehicles located overseas which are purchased through U.S. embassies, and provides for a vehicle program that ensures uniform serviceability to all areas.												
Justification: Funding for this budget line item provides for the procurement, maintenance, and lifecycle replacement of DTRA's non-tactical vehicles in support of missions in the United States and overseas. These vehicles are operated in rocky and unpaved terrain resulting in shortened lifecycles and increased volume for maintenance. Lifecycle requirements are based on GSA fleet management guidelines and vehicle maintenance.

Description:

The Other Major Equipment Procurement Program provides for the modernization of DTRA core computing technologies, including information technology infrastructure upgrades to ensure interoperability and compliance with the Joint Information Environment Regional Security Stacks. The investment allows for focused enhancement of the Agency-wide Cybersecurity, Computer Network Defense, Network Operations, and Security Center capabilities in compliance with Department of Defense (DoD) Instruction 8500.01, "Cybersecurity," dated March 14, 2014, and the continuous monitoring capabilities mandated by DoD Instruction 8510.01, Change 2, "Risk Management Framework for DoD Information Technology (IT)," dated July, 28, 2017.

<p>Justification:</p> <p>FY 2017 funding of \$6,437 thousand resourced the following initiatives:</p> <ul style="list-style-type: none"> - Information Technology (IT) infrastructure core routing and switching required to maintain basic connectivity integrity to ensure domain security and viability; - DTRA Experimentation Lab/Reachback systems to conduct experimental computing; - Analytical equipment for Chemical Biological Weapons of Mass Destruction (CBWMD) search missions; - Lifecycle replacement of the primary Defense Integration and Management of Nuclear Data Services (DIAMONDS) enterprise server equipment located at DTRA, Fort Belvoir, Virginia; and - Nuclear Arms Control Technology (NACT) program for International Monitoring System (IMS) recapitalization, component replenishment/replacement, and monitoring system acquisition to meet on-going operational responsibilities. <p>The FY 2018 budget of \$12,363 thousand resources the following new and continuing efforts:</p> <ul style="list-style-type: none"> - One-time replacement of DTRA's classified network cable plant infrastructure that is obsolete. The cable connectors, which were installed in DTRA facilities a decade ago, are no longer manufactured, supported, or available on the market, causing compatibility issues with new end-user devices as well as network switching and routing equipment; - IT infrastructure core routing and switching, DTRA Experimentation Lab/Reachback systems, analytical equipment for CBWMD search missions, and the life-cycle replacement of DIAMONDS enterprise server equipment located at Kirtland Air Force Base, New Mexico; and - Continued support to the NACT program for IMS component replenishment and monitoring system acquisition necessary to meet on-going operational responsibilities. <p>The FY 2019 budget of \$5,592 thousand will fund the following new and continuing efforts:</p> <ul style="list-style-type: none"> - Chemical Biological (CB) analytical equipment kits/hardware for the Computer Network Defense Tool, expanding DTRA's capability to execute cyber vulnerability scanning in support of Balanced Survivability Assessments (BSAs); - Enterprise records management application, making DTRA compliant with Presidential OMB Directive M-12-18. The directive is requesting federal agencies to manage all permanent electronic records in an electronic format by the year 2019; - Information technology enhancements to the DTRA Experimentation Laboratory supporting Technical Reachback; - IT Infrastructure; and - Continues support for the NACT program to meet on-going operational responsibilities through the recapitalization of U.S. IMS stations, ensuring the continued delivery of nuclear explosion monitoring data in support of U.S. and DoD objectives. <p>The decrease from FY 2018 to FY 2019 reflects completion of the one-time cable plant infrastructure lifecycle replacement bringing DTRA's cable plant up to current industry standards and revised acquisition strategy for cloud services.</p>

Remarks:

Resources support the following mission critical programs:

- Nuclear Arms Control Technology (NACT): Provides for recapitalization of components of the International Monitoring System stations managed by the NACT program in support of the Comprehensive Nuclear Test Ban Treaty.
- Stockpile Logistics: Provides lifecycle replacement of the primary Defense Integration and Management of Nuclear Data Services (DIAMONDS) enterprise server equipment.
- Nimble Elder: Chemical Biological (CB) analytical equipment kits/hardware for the Computer Network Defense Tool used to execute cyber vulnerability scanning.

<p>Description:</p> <p>This Line Item is a new procurement line item in the DTRA budget, but not a new effort. This effort supports the Joint Improvised-Threat Defeat Organization and is part of the transfer of the Joint Improvised-Threat Defeat Fund (JITDF, 2093) to regular defense-wide appropriations (0100, 0400, and 0300) per the Chairman's recommendation to the Senate Appropriations Committee for the Department of Defense Appropriations Bill, 2018.</p> <p>The countering improvised threats mission under the authority, direction, and control of the Defense Threat Reduction Agency (DTRA), enables the DoD to counter improvised explosive devices and emerging threats in support of Combatant Commands (CCMDs) and deployed Warfighters.</p> <p>The overall mission is accomplished by:</p> <ul style="list-style-type: none"> - Sustaining an advanced information technology and fusion infrastructure that enables a threat awareness and understanding capability; - Providing expeditionary, forward-deployed operations, intelligence, training, and advisory capabilities with reach-back support; - Enabling rapid and innovative counter-improvised-threat solution development and delivery; - Supporting Military Departments/Services' pre-deployment training and CCDRs' priority training-exercise support requirements as requested and validated; and - Leveraging broad Communities of Action that include DoD, other U.S. Government departments and agencies, key coalition allies and partners, academia, and the private sector to leverage their capabilities, expertise, access, and authorities to counter threat-networks and their use and facilitation of improvised weapons.

Justification:
 The FY 2019 request supports contingency operations in Iraq and Afghanistan by providing U.S. Joint Force Combatant Commanders (CCDRs) with an awareness and understanding of the threat, and the resources needed to support other contingencies including those with the mission to defeat the Islamic State of Iraq and Syria (ISIS).

Specifically, the FY 2019 Procurement, Defense-Wide (P, DW) Overseas Contingency Operations (OCO) budget request supports measures to provide technologies to defeat improvised threats such as: Advanced wireless signals and compatible electronic countermeasures for improvised explosive device (IED) defeat/neutralization; Miniaturized and integrated sensors; Hand held detectors; and the procuring of Information Technology capabilities. These resources support the Department of Defense's (DoD) goal to rapidly close the gap between the enemy's innovation cycles and the preparedness and operational capabilities of deploying and deployed U.S. Joint Forces by procuring mission critical support items rapidly.

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

Remarks:

Funding enables DoD responses to improvised weapons. DTRA-JIDO delivers counter-IED and improvised threat solutions in full collaboration with its partners. Through a robust Communities of Action (CoA) approach, DTRA coordinates with the Combatant Commanders (CCDRs), the Joint Staff, the Military Departments/Services, the interagency, coalition partners, industry, and academia to develop counter-IED and improvised threat solutions that further enable the maneuverability and force protection of deployed U.S. Joint Forces. This methodology leverages the authorities, access, and capabilities of the entire U.S. Government and its partners to garner support for counter-IED and improvised threat development and delivery.

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

Remarks:

Assist Situational Understanding is broken down into support of named operations, Combatant Command (CCMD) support packages, and counter-improvised threat analytical capabilities. Funding provides for mission information technology (IT), intelligence-operations integration, and support services to provide IT capabilities that enable the rapid collection, fusion, and dissemination of operational information, intelligence, and technology to defeat threat networks for deployed operational forces.

P, DW OCO funding :

- Enables the capability to provide a global, distributed, and multi-level IT architecture across three primary security domains (NIPR/SIPR/JWICS), connection to coalition and partner networks, and all JIDO mobile and telecommunications;
- Provides the analytical cloud and tool suite on SIPRNet and JWICS; and
- Provides cybersecurity, computer network defense, incident response, risk management and compliance activities.

<p>Description: Program Overview</p> <p>The Department of Defense Dependents Education (DoDDE) programs are the Department of Defense Education Activity (DoDEA), the Family Advocacy/Assistance Program (FA/FAP).</p> <p>DoDEA is the Presidential and National showcase for education excellence. The DoDEA provides a world-class education program that inspires and prepares all students in military communities around the world to be successful and responsible citizens in a dynamic global environment. Courses of study in DoDEA schools are often more rigorous than those found in public schools in the United States. The DoDEA schools' diverse curriculum offerings fully support the DoDEA Community Strategic Plan. DoDEA schools are an important quality of life issue for military families and impacts the level of military retention. The DoDEA is a DoD field activity operating under the direction, authority and control of the Under Secretary of Defense for Personnel and Readiness (P&R) and Deputy Under Secretary of Defense for Military Community and Family Policy (MC&FP). The DoDEA is comprised of the Management Headquarters, the Consolidated School Support, the Department of Defense Dependents Schools (DoDDS), and the DoD Domestic Dependent Elementary and Secondary Schools (DDESS).</p> <p>Purpose and Scope of Work</p> <p>To provide resources necessary to replace mission essential systems and to procure new investments items required to perform Enterprise management of DoDEAs educational technology and administrative information systems.</p> <p>Justification: Resources are required to:</p> <p>PRIORITY 1: Purchase an Enterprise capability for Wide Area Network (WAN) optimization to include Quality of Service (QOS) controls across the OSI 7-Layer Spectrum. This requirement is intended to cover all DoDEA schools around the world.</p> <p>PRIORITY 2: Purchase a single Enterprise Point-of-Entry (POE) capability for the availability monitoring of systems and web applications across DoDEA.</p>

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

In FY 2019 the Office of the Secretary of Defense request for \$35.3 Million supports funding initiatives such as the Mentor Protégé Program, Enterprise Portals Program, Joint Capability Technology Demonstration, Long Range Planning, U.S. Mission to NATO, Countering Weapons of Mass Destruction Systems. The funding requested is for the modernization of office automation and Information Technology (IT) infrastructure requirements, procurement of mission essential new and replacement equipment for these components and for the Countering Weapons of Mass Destruction Systems to address National Technical Nuclear Forensics (NTNF) and a Defense-wide Countering Nuclear Threats (CNT) Materiel development Program.

Remarks:																		
In FY 2018 the Combatant Commanders Exercise Engagement and Training Transformation (CE2T2) program funding was transferred to Joint Staff.																		
The CE2T2 program continues to strengthen, expand and develop within the Joint Force warfighting capabilities and competencies. The Director, Joint Force Development Joint Staff J7 is responsible for the management and operation of the Joint Training Enterprise, which includes the following programs:																		
<div>• Joint Force Trainer (JFT): The JFT enables the Combatant Commanders to execute their Unified Command Plan responsibilities of certifying their designated Joint Task Forces (JTF) as trained and ready for deployment. Items procured under this funding line provide the training infrastructure and associated support that integrates new and improved functionality into the existing joint training environment.</div> <div>• Joint National Training Capability (JNTC): Procurement associated with JNTC supports Training Transformation (T2) pillars including the infrastructure and equipment required to support the maintenance and operation of the Joint Training Enterprise Network (JTEN).</div> <div>• Joint Deployment Training Center (JDTC): JDTC funding provides the equipment and infrastructure required to train Combatant Command/Service/Agency warfighters on Joint Deployment, Situational Awareness, and Global Force Management applications.</div> <div>• Joint Interoperability Division (JID): JID affords datalink computers, radios, antennas, crypto, and Link-16 simulator equipment for the Joint Interface Control Cell – Pope. Additionally, JID refreshes IT computers and accessories for two classrooms, five Mobile Training Teams and 58 administrative offices to enable joint/coalition training of 1,700 US and 400 Allied/Coalition students in the employment, planning, and management of tactical data links and joint C4I interoperability.</div> <div>• Live Virtual Constructive Unified Modeling and Simulation Architecture (LVC UA): supports a United States Forces Korea (USFK)/KORCOM requirement for a jointly accredited, supported, and funded federation of constructive simulations that are both capable of satisfying all joint exercise training requirements in the Korean Theater of Operations and interoperable with the Republic of Korea (ROK)-developed Korean Simulation System (KSIMS).</div> <div>• Joint Knowledge On-line (JKO): develops, delivers, tracks, and reports online training for CCMD exercises; CCMD required training; doctrinally based Joint Operations Core Curriculum; Multinational, Coalition, and Interagency training; and DoD required training (externally funded). JKO supports leading edge technology reviews and integration to directly enhance specific aspects of the training capability. JKO satisfies all requirements necessary to provide stakeholders with a distributed learning capability as well as access to web-based training content.</div>

Appropriation / Budget Activity / Budget Sub Activity: 0300D / 01 / 1	P-1 Line Item Number / Title: 30 / Major Equipment OSD	Item Number / Title [DODIC]: 30 / Commander's Exercise Engagement & Training Transformation (CE2T2)
ID Code (A=Service Ready, B=Not Service Ready) :		MDAP/MAIS Code:
<p>FY 2017 Presidents Budget Request supports the following:</p> <p>JNTC procurement funding enables distributed Joint training to a projected 170+ global warfighter training events per year. These funds provide training enablers which greatly enhance a variety of missions. JNTC procurement funds support the strategic shift from current stability operations to a broader post-OEF mission set. The Adaptive Training Capability Program (ATCP) is a subordinate component of JNTC that enables the joint force to be responsive to the warfighters' pace of changing operational concepts, threat environments, and best practices. ATCP funding advances joint capabilities and interoperability by addressing emerging joint training requirements through a managed set of globally distributed live, virtual, and constructive enablers. These requirements cover a range of capabilities including irregular warfare; Anti-Access/Area-Denial; Cyber; Joint, Interagency, Intergovernmental, and Multinational (JIIM); and unit/individual adaptivity. Specifically, JNTC funding will be used for the following:</p> <ul style="list-style-type: none"> • Integrate Cyber command and control elements into Joint and Service exercises and activities enabling capability to train in a contested cyber environment. • Distributed Interactive Simulation voice to real-world Command and Control Communication interface devices and Cross Domain Information solution for High Demand Low Density readiness training • Software Code modification to provide updated Distributed Interactive Simulation based interface to the NORAD -NORTHCOM Command and Control system Battle Control System • Range upgrades at Nellis Air Force Base that will enable simultaneous operation of four cyber ranges. The equipment will facilitate replication of adversary cyber threats to provide realistic and relevant threat replication • Hardware and software that enables the integration of Link-16, Situational Awareness Data Link (SADL), and Enhanced Position Locations Reporting System (EPLRS) into a single coordinated environment that allows the injection of live, virtual, and constructive elements into an electronic battlefield. • Upgrade of the Electronic Warfare server that controls Threat Emitter Pedestals. The upgrade enhances the capability and makes it usable at multiple locations due to its mobile capacity. • Upgrade of the Distributed Mission Operation Center's Virtual Surveillance Target Attack Radar Simulation. This allows for an actual simulation trainer to train Joint Surveillance Target Attack Radar System crew members. • Hardware and software procurement for the Multi-purpose Supporting Arms Trainer (MSAT). MSAT is used to certify Joint Terminal Attack Controllers (JTACs) and adds high fidelity simulation of Intelligence, Surveillance, and Reconnaissance assets in the close air support environment. A partial upgrade for MSAT has been executed. Hardware and additional software updates that are required for accurate and reliable training will be procured in FY17. Without a stable and accurate system, readiness will decline in proportion to the degradation of the system. The only other training alternative is live training which is costly and schedule prohibitive. • Battlespace Command and Control Center system to improve training between the Navy, Air Force, and Army forces participating in Navy Air Wing Fallon events. • Integrate Cyber command and control elements into Joint and Service exercises and activities enabling capability to train in a contested cyber environment. • Upgrade the Joint Training Enterprise Network (JTEN) to align with DoD's Global Information Grid and enable the JTEN to provide joint context to Service level training exercises and activities. • Hardware and software focused towards incorporation of current and future Opposing Forces capabilities in the Early Synthetic Prototyping (ESP) Game Environment. ESP includes a tool suite that enables assess to emerging technologies. <p>The JDTC procurement is necessary to provide the assets (servers, workstations and software) required to train Combatant Command/Service/Agency warfighters and provide world-wide exercise support. The equipment and infrastructure enable training on Joint Deployment, Situational Awareness, and Global Force Management applications. The Situational Awareness application, Common Operating Picture, will be upgraded to a new version which will require entirely new hardware/software to create a realistic and effective training environment.</p> <p>Joint Staff – J7 Support to Combatant Commanders equipment procurement creates the digital environment required to replicate the operational environment of the Joint Exercise Control Group and training audiences to support annual Combatant Command and Service Joint training events. FY 2017 procurement funds are programmed to provide life cycle replacement of deployable computers, routers, and switches to meet minimum cyber security and industry refresh standards plus 1-2 years. In FY 2017 life cycle maintenance support for J7 Support to Combatant Commanders deployable equipment transitions to O&M funding.</p> <p>USSTRATCOM requires procurement funding for hardware and software capabilities to expand current range infrastructure. The current Cyber Range Instrumentation FY 2017 procures a Cyberspace Training Range to support United States Cyber Command (USCYBERCOM)-led CYBER FLAG, CYBER GUARD, and CYBER KNIGHT exercises. As part of the Cyberspace Training Initiative, expansion of the cyber range infrastructure is needed to support the Combatant Commanders, Services and USCYBERCOM joint cyber training and exercise requirements. The current environment includes four secure network enclaves, a Blue forces Department of Defense Information Network to include Network Operations Security Centers, a Gray network of internet spaces to include .gov and .edu domains that will emulate Internet sites and user activities, a realistic representation of an Adversary "Red" network, and a management (control) systems network. This emulated training environment is designed to augment and amplify</p>

Remarks:

FY 2019 funding supports life cycle replacement and modernization of commercial off-the-shelf (COTS) hardware and software infrastructure including servers, peripheral equipment, operating systems, and application software. All hardware and software acquired will align with the Department's Enterprise Architecture. The Office of the Under Secretary of Defense of Acquisition, Technology and Logistics (OUSD (AT&L)) uses this equipment and software in support of mission-specific systems. Functions include the improvement and efficiency of the acquisition process, alignment of acquisition processes for the Department; and transformation of acquisition business processes through change management.

ID Code (A=Service Ready, B=Not Service Ready) : A		MDAP/MAIS Code: 300
<p>Remarks: FY 2019 funding supports the Mentor Protégé Pilot Program (MPP) that was established under Section 831 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510) to assist eligible small business concerns in enhancing their capabilities to perform as subcontractors and viable suppliers under Department of Defense (DoD) contracts and other federal government and commercial contracts. This program helps to sustain a competitive supplier base which contributes to affordability in current and future defense acquisitions. The FY 2019 funding request was reduced by \$4.5M to account for the availability of prior year execution balances.</p> <p>The DoD Mentor Protégé Pilot Program (MPP) is focused on several key initiatives with the intent to enable small businesses to effectively meet the Department's challenges by infusing small business utilization into the Department's major acquisition programs. The strategic focus of the DoD MPP is the cross functional alignment of DoD Service Component and Interagency Mentor Protégé Agreement's to satisfy the Department's objectives and mission; this is accomplished through the utilization of socio-economic disadvantaged small businesses. The DoD MPP identifies small business firms that possess unique mission critical capabilities; then, through technological transfer and business development efforts, it leverages these capabilities for the benefit of the Department and ultimately the warfighter. This program will continue to nurture small business firms that are agile and innovative to strengthen the manufacturing and industrial base throughout the DoD enterprise.</p> <p>By leveraging the Mentor Protégé Program, large firms (DoD Mentors) receive financial and credit incentives to provide technical and business assistance to Small Disadvantaged Businesses (SDBs), Women-owned Small Businesses (WOSBs), Service-Disabled Veteran-owned Small Businesses (SDVOSBs), Historically Underutilized Business Zone (HUBZone) firms, and firms employing severely disabled veterans and persons. Toward this end, incentives provided to DoD Mentors are either a direct cost reimbursement (RE) or a credit (CR) against established subcontracting goals for approved mentoring costs incurred. Additionally, DoD Mentor-Protégé agreements (MPAs) often provide strategic technology-inclusion engagements with minority serving institutions (MSIs), including Historically Black Colleges and Universities (HBCUs), Tribal Colleges and Universities, Hispanic Serving Institutions, other minority institutions and Community Colleges, to provide advanced developmental assistance to DoD Protégés. DoD MPAs align to DoD Service Component and Other Defense Agency (ODA) requirements toward resolving operational challenges or other critical national security needs characterized by science and technology thrusts identified by each agency, thus concentrating on key mission needs.</p> <p>Over the past 5 years (FY 2013 - FY 2017) DoD/IC Protégé mission partners participating in the program have been awarded more than \$5.4B in contracts, increased annualized revenues by an average of \$2.3B, and for every year a protégé firm participates in the program their workforce is increased by an average of 13.4 full-time employees (FTEs). The Department's new program initiatives are currently aligned with the Secretary of Defense priorities focusing on Lethality, Readiness, Affordability and Sustainment. In addition, fostering the productivity and innovation to sustain and increase benefits to the warfighter, Defense Industrial Base (DIB) industry sector, and the DoD MPP thereby reducing total costs of ownership (TCO) and management costs to include: 1) Consolidated Mentor-Protégé Agreement (MPA) solicitation framework with agile project management processes deployed to optimize workflows and approval processes to rapidly increase efficiencies of DoD MPP resources and assignments across DoD service components and Other Defense Agencies (ODAs) 2) Scaling Hybrid (HY) MPAs, the blending of Credit (CR) MPAs and Cost-Reimbursable (RE) MPAs, to meet or exceed complex Department of Defense/Intelligence Community (DoD/IC) requirements thus allowing more DoD and IC Prime contractors with new technologies for weapon systems and platforms to receive partial reimbursements for approved mentoring costs while concurrently receiving credit toward established DoD/IC subcontracting goals; the latter directly resulting in more DoD and IC Protégés leveraging credit MPAs to receive mentoring without additional funds, which is the most cost effective alternative for the government. 3) Federate Service Component and ODA MPP data to automate OSBP and MPP resource assignments for rapid MPA approvals, enhanced data tracking, capturing metrics, and providing digital analytics to OSBP and DOD/IC mission partners to improve targeted utilization of DoD MPP resources and DoD MPP interoperability across other programs in OSBP's portfolio.</p>

Remarks: FY 2019 funding supports the Office of the Director, Cost Analysis and Program Evaluation (CAPE) high-end computer workstations, networks, in-house-developed software, and other DoD-developed simulation models and applications to enable the organization to perform its mission and unique business functions. These integrated computers and networks provide CAPE analysts with the ability to support mission functions such as: Program Review support, Program Objective Memorandum (POM) coordination, Future Years Defense Plan (FYDP) coordination, and the collection, maintenance, and analysis of Defense Cost and Resource Center (DCARC) data. In addition, these sophisticated computer tools allow CAPE analysts to conduct research, studies, technical analyses, and collaborative studies within CAPE and with other DoD agencies, and provide analysts with the flexibility of running simulation models to produce valid analyses. In FY 2019, funding was realigned from the DoD Joint Service Provider to CAPE to support the migration, implementation, and sustainment of its DoD Non-Classified Internet Protocol Router Network Demilitarized Zone (DMZ) efforts. CAPE's Procurement funding described in this P-40 exhibit is to execute their own long-term solutions outside of the JSP DMZ. CAPE will maintain a steady state Long Range Planning Procurement program throughout the remainder of the FY 2019-2023 FYDP. Due to the migration to an Enterprise solution as well as recent modernization activities, prudent planning, and effective requirements analysis, CAPE continues to align procurement expenditures for maximum efficiency in order to fund higher priority requirements in the Department.

Remarks:

FY 2019 funding provides for collaborative environments required for processing, analyzing, and distributing critical intelligence information between the U.S., NATO allies, and coalition forces. Funding supports expansion of U.S. and NATO allied multinational and bi-lateral intelligence information sharing capabilities via expanded terrestrial and satellite communications, information technology systems, integrated wide area and meshed networking, deployable command and control containers/elements, and information applications exploitation as it relates to U.S./NATO/coalition activities within USEUCOM Intelligence Fusion Center, NATO Special Operations Coordination Center, US Battlefield Information Collection and Exploitation System(s) and US JOIC world-wide architectures. In addition, funding provides work stations, computing clusters, data servers, security accreditation, and network connections for co-located strategic, operational and forward deployed elements.

Remarks: FY 2019 funding supports initial acquisition of equipment for rapid transition of operational "joint unique" capabilities that have not yet completed transition into a program of record (PoR). The aim is to achieve efficiencies by aligning resources to fully integrate these more mature capabilities sooner into either an existing system or a new system being deployed or employed. In addition funding supports completion of JCTDs and prototypes in order to complete extended user evaluations and provide transition support to PoR's or fieldable prototypes. JCTDs efforts enhance DoD capabilities by gaining an "on ramp" to conventional acquisition processes for emerging capabilities.

Exhibit P-5, Cost Analysis: PB 2019 Office of the Secretary Of Defense		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D / 01 / 1	P-1 Line Item Number / Title: 30 / Major Equipment OSD	Item Number / Title [DODIC]: 30 / Countering Weapons of Mass Destruction (CWMD) Systems
ID Code (A=Service Ready, B=Not Service Ready) :		MDAP/MAIS Code:
<p>NTNF is the collection, analysis and evaluation of pre- and post-detonation radiological and nuclear materials, devices, and debris as well as the immediate effects created by a nuclear detonation to support attribution of an actual or attempted nuclear attack. NTNF will develop prototype ground-based prompt diagnostic detection systems (DISCREET OCULUS) to record signals emitted immediately following a nuclear detonation. Funds system installation in strategic cities to support transition to the Air Force for operation and sustainment. NTNF will also develop the Harvester Particulate Airborne Collection Systems (PACS) and the Modular Whole Air Airborne Collection Systems (M-WACS) for post-detonation nuclear debris sampling. Harvester PACS particulate and M-WACS gaseous sampling combine to augment WC-135 capabilities.</p> <p>CNT addresses capability gaps identified by Services, Combatant Commands, and Joint Staff to address obsolescence and technical upgrades for Joint Forces including the US Army 20th Support Command; Navy Visit, Board, Search, and Seizure; Technical Support Groups (NIMBLE ELDER); and the US Special Operations Command. Current programs for transition to service components include the modernization of obsolete legacy dosimeters with the Joint Personal Dosimeter (JPD) and the technical upgrade and standardization of the Services legacy contamination monitors with the Radiological Detection System (RDS) that also incorporates lessons learned from OPERATION TOMODACHI (response to Japan's Fukushima Daiichi nuclear power plant incident).</p>

Description:

The Chairman of the Joint Chiefs of Staff (CJCS) is the principal military adviser to the President, National Security Council, and Secretary of Defense. The Chairman presides over and serves as a member of the Joint Chiefs of Staff. CJCS relies upon the Joint Staff to craft and distribute guidance for combatant forces' unified strategic direction, operations under unified commands, and integration into effective combat forces. On behalf of the Chairman, the Joint Staff provides Combatant Commands (CCMDs), the Services, and U.S. war fighters with joint policy, strategy, and doctrine necessary to employ effective joint combat forces in contingencies worldwide.

Justification:

The Joint Staff requests \$4.360M in FY 2019 procurement for mission critical information technology systems, and applications investment requirements. The procurement request resources various efforts across the Joint Staff, including investments in joint force development data center and Information Technology (IT) / Information Security (IS) equipment.

1. Joint Lessons Learned Information System (JLLIS):

No new procurement funding is required for FY 2018 and beyond.

2. Planning and Decision Aid System (PDAS):

PDAS realigned Procurement funding, \$3,000K per year, to O&M to fund higher priority requirements for the following years: FY 2019, FY 2021 – FY2023

PDAS is a classified, protected program operated by the Joint Staff. PDAS supports the planning and execution of Joint Staff and Unified Combatant Commanders (COCOM) operations. PDAS is a world-wide network protecting sensitive information that meets the Intelligence Community Directive (ICD) 503 security requirements. PDAS provides office automation packages, document and information management tools; collaboration, voice, and video tools in a secure, flexible architecture that promotes a distributed enterprise. Within the enterprise, PDAS users have access to their data regardless of log-on location, secure data exchange, conferencing and planning sessions among physically distributed continental United States (CONUS) and outside continental United States (OCONUS) locations. Users are provided access to a Help Desk and remote troubleshooting within the PDAS enterprise.

Equipment modernization will allow the Joint Staff to develop plans to implement materiel solutions to address hardware and software configuration items that are outdated, nearing end-of-life or end-of-support or which can no longer be commercially acquired. Historically, this equipment has been purchased as required due to failures, end-of-life, or end-of-service which has led to many baselines and configurations of deployed hardware, software and communications equipment. Items reach end-of-life in different years providing a cascade of equipment replacement requirements. This spacing lessens the financial impact but

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 The Joint Staff		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 15: Major Equipment, TJS		P-1 Line Item Number / Title: 10 / Major Equipment, TJS
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>requires constant purchase, integration, testing and installation. Integration and testing ensures that hardware or software is compatible with other installed hardware and software configuration items and does not introduce vulnerabilities into PDAS, or allow unauthorized personnel to gain access to information for which they are not authorized. There are four specific focus uses as follows.</p> <p>PDAS funding will be used to procure additional program site installations, datacenter refresh, client refresh, and equipment modernizations. Due to the cyclic nature of the PDAS technical refresh requirement of datacenters, client computers and other IT equipment, this program presents a non-linear funding profile with noticeable spikes in funding requirements during technical refresh years. When possible, equipment is purchased in increments across fiscal years which mitigates spikes in funding requirements.</p> <p>Procurement of additional PDAS program site installations will allow the Joint Staff operational sponsor and program manager to complete the installation of additional PDAS user sites. PDAS is comprised of hundreds of user sites with thousands of users worldwide. In recent years, the number of PDAS sites grew by 25 percent with planned expansion of both sites and users. PDAS sites provide capabilities, services and the infrastructure necessary to meet operational mission needs.</p> <p>Datacenter refresh will allow the Joint Staff to provide refreshed datacenter hardware and software. The hardware and software to be replaced is reaching the end of its service life and approaching obsolescence. New equipment for the datacenters will enable the PDAS program to consolidate equipment baselines and provide commonality at the datacenters. This periodic refresh provides PDAS with an updated hardware and software infrastructure, enabling improved performance, security, efficiency, and reduced logistical requirements. From an operational perspective, it moves the program from event-driven, reactive situations of coping with the latest problem to a more proactive, forward-facing operational posture. The focus becomes one of preemptive quality assurance, standardization, and optimization.</p> <p>Client refresh will allow the Joint Staff to provide updated computer hardware to the PDAS users in order to be compliant with Security Control 28 (protection of information at rest to prevent insider threats). This periodic refresh provides the users with an up to date hardware and software infrastructure, enabling improved performance, security, efficiency, and reducing logistical requirements. Deferment of this purchase will require development of additional computer operating system baselines on deployed computer clients, significantly increasing life-cycle sustainment cost in future years.</p> <p>3. Management Headquarters: Management Headquarters provides the day-to-day financial resources necessary to conduct Joint Staff operations. Funding supports the Joint Integrated Air & Missile Defense Organization (JIAMDO), Joint Range Extender (JRE), mission-unique non-Joint Service Provider (JSP), Joint Staff IT requirements, and technology upgrades for the joint training facility.</p> <p>There are two JIAMDO focus areas:</p> <p>JIAMDO uses funds to support a Near Real Time (NRT) Server in support of Combat Identification (CID) applications. The NRT Server provides an increased storage capacity for NRT data for real-time processing as well as testing and evaluation of new capabilities. It provides the ability to store non-standard data securely and also to enable future use of the data in development and testing. This item supports JIAMDO's national-to-tactical CID mission. Additional details are classified.</p> <p>JIAMDO also uses these funds to procure JRE, semi-rugged laptops (with JRE software license) and JRE help desk support. These JREs are required to support JIAMDO's advanced combat identification efforts. The JREs will be installed in the digital integration for combat employment joint mobile lab and will support hosting of Link 16 terminals for participation in exercises, testing, and operational events. The purpose of this funding is to develop and operationalize enhanced CID capability. This item supports JIAMDO's national-to-tactical CID mission. Additional details are classified.</p> <p>Note: All JIAMDO procurement funding (~\$100K per year) was moved to RDT&E to fund higher priority requirements for FY 2019 and beyond.</p> <p>Management Headquarters funds are also used to procure major hardware and software technology upgrades investments for the Suffolk, VA, joint training facility. These funds provide significant network distribution/security, data processing, and capacity upgrades to the Suffolk Data Center to increase performance, security, reliability, and accessibility to the Combatant Commands and Services. Capability upgrades are required to host current joint training applications (Joint Knowledge Online, Joint Training Information Management System, Joint Lessons Learned Information Systems, and Joint Live, Virtual, and Constructive simulations). Additionally, the upgrades provide support to multi-site, multi-command, distributed live, virtual, and constructive joint force training events addressing transregional, multi-domain, and multi-functional threat environments.</p>

Exhibit P-40, Budget Line Item Justification: PB 2019 The Joint Staff		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 15: Major Equipment, TJS		P-1 Line Item Number / Title: 10 / Major Equipment, TJS
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>The Deputy Secretary of Defense (DepSecDef) approved the alignment of common IT services in the Pentagon and the National Capital Region to the Joint Service Provider (JSP) operating as a field service activity in Defense Information Systems Agency (DISA). In 2018, the Joint Staff Information Network (JSIN) resources permanently transferred to the JSP (DISA PE 0305830K). The overall effect to the Department was a net-zero profile change for FY 2018 and beyond. Limited IT procurement funding was retained for mission-unique, non-JSP Joint Staff IT requirements.</p> <p>4. Joint Information Operations Range (JIOR): The JIOR provides DoD a closed-loop, persistent, geographically distributed network to conduct training, testing, and experimentation in support of Computer Network Attack (CNA)/Computer Network Defense (CND) in a threat representative environment with realistic and relevant targets and command & control systems of interest. JIOR provides Services, Combatant Commanders (CCMDs), and other government agencies the ability to gain insights into advanced cyberspace, information operations (IO), and electronic warfare (EW) capabilities under current and future operational environment conditions. JIOR integrates other cyberspace ranges, replicates critical infrastructure, cyber targets, Internet traffic, and opposing forces. The JIOR security construct allows users to develop, test, and secure their unique cyber capabilities and protect their identity during range activities. The JIOR hosts multiple, simultaneous, and disparate training/certification, testing, and experimentation events on a secure, closed-loop enterprise network.</p> <p>The Department provided JIOR with resources (as a plus up FY 2018-FY 2022) to add 36 Guard and Reserve locations to the JIOR closed loop network. Adding these Guard and Reserve sites to the JIOR supports training and readiness of Cyber Mission Force (CMF) drilling at those locations. Specifically, the funding will be used to procure hardware and software to build and install 36 unique points required to connect these additional CMF teams to the JIOR network. Additionally, the funding will be used to complete overarching technology upgrades/modernization to the JIOR enterprise network. Equipment and software modernization will enable the JIOR to extend service to the 36 new sites/SDPs while continuing support to the existing 138+ JIOR access points. Historically, JIOR had limited IT refresh funding and has purchased replacement hardware due to failures, end-of-life, or end-of-service constraints which has not allowed for a focused modernization effort. Given the increased cyber mission focus, periodic technology upgrades are required to make the JIOR more efficient, agile, and sufficiently robust to accommodate this significant network expansion in support of additional CMF demand.</p>

<p>Description: The Chairman of the Joint Chiefs of Staff (CJCS) is the principal military adviser to the President, National Security Council, and Secretary of Defense. The Chairman presides over and serves as a member of the Joint Chiefs of Staff. CJCS relies upon the Joint Staff (TJS) to craft and distribute guidance for combatant forces' unified strategic direction, operations under unified commands, and integration into effective combat forces. On behalf of the Chairman, TJS provides Combatant Commands (CCMDs), the Services, and U.S. war fighters with joint policy, strategy, and doctrine necessary to employ effective joint combat forces in contingencies worldwide.</p>												
<p>Justification: The FY 2019 Joint Staff procurement appropriation resources mission critical hardware/software requirements for Combatant Commander's Exercise Engagement & Training Transformation (CE2T2).</p> <p>The funding profile increase between FY 2017 and FY 2018 is due to CE2T2 transferring to the Joint Staff from the Office of the Undersecretary of Defense (Personnel and Readiness) for direct execution and oversight of the program across the Services, Combatant Commands, and the Joint Staff. Transferring funding for the execution of CE2T2 through the Joint Staff is intended to provide improvements to the Chairman of the Joint Chiefs of Staff focus areas consisting of the following: 1) restoring joint readiness; 2) improving our joint warfighting capability; and 3) developing leaders for Joint Forces Next.</p> <p>The CE2T2 program continues to strengthen, expand, and develop Joint Force warfighting capabilities and competencies. Specifically, CE2T2 includes the following procurement activities:</p> <p>1. USCYBERCOM requires procurement funding for hardware and software capabilities to preserve and expand current infrastructure. The current Cyber Range instrumentation provides a joint cyberspace training range to support United States Cyber Command (USCYBERCOM)-led CYBER FLAG, CYBER GUARD, and CYBER KNIGHT exercises. As part of the joint cyberspace training initiative, continuance and expansion of the cyber range infrastructure is needed to support the Combatant Commanders, Services and USCYBERCOM joint cyber training and exercise requirements. The current target environment includes a "blue forces" Department of Defense Information Network to include Network Operations Security Centers, a "gray" network of internet spaces to include .gov and .edu domains that will emulate Internet sites and user activities, a realistic representation of an adversary "red" network, and a management systems network. This emulated training environment is designed to utilize the existing Joint Information Operation Range (JIOR) transport layer to directly support USCYBERCOM's mission. Moreover, it helps establish the Joint Force Cyber Training Range capability and directly supports the training and certification of Cyber Mission Forces. Procurement funding is imperative to increase storage capacity and improve the survivability/durability of the target environment. Additionally, ongoing hardware modernization efforts coupled with Opposing Forces (OPFOR) software requirements, necessitate CE2T2 procurement funding lines.</p>

<p>2. Joint Interoperability Division (JID): JID is a critical enabler to the training transformation program as sole DoD provider of Tactical Data Link (TDL) and Joint Interface Control Officer (JICO) training and requires procurement funding for one Multifunctional Information Distribution System - Joint Tactical Radio System (MIDS-JTRS / MIDS-J). The MIDS-J is a software programmable four-channel Link-16, enhanced throughput, frequency remapping, wideband networking waveform, UHF/VHF specialized radio. Procurement of this radio will enable the JID to train tactical data link students across the services on current equipment being used in the field to bring real-time situational awareness, location, targeting, and C2 data to smart bombs, dispersed joint forces on foot, or tactical vehicles in the air, land, or maritime environments. The MIDS-J radio system is required to support planning, implementation, and operations of mobile network connectivity to tactical war fighters and disadvantaged platforms such as ground vehicles, helicopters, unmanned aircraft, and small boats. Currently, MIDS-J is onboard the F/A-18E/F Super Hornet fighter family, the E-8C JSTARS battlefield surveillance & communication aircraft, and the RC-135 Rivet Joint airplane. Future weapon systems include the EC-130H Compass Call electronic warfare variant of the Hercules turboprop, E-2 Hawkeye and AWACS air/maritime surveillance airplanes, as well the Navy's aircraft carriers, destroyers, and cruisers. The USAF will eventually field it on F-15E Strike Eagles, its B-1B and B-52H bombers, Special Operations aircraft, ground C2 and Intelligence, Surveillance, Reconnaissance (ISR) units.</p>

CCA	Combatant Craft - Assault
CCH	Combatant Craft - Heavy
CCM	Combatant Craft - Medium
CCME	Combatant Craft Mission Equipment

ACRONYMS

CDU	Control Display Units
CERP	Capital Equipment Replacement Program
CFE	Contractor Furnished Equipment
CHMD	Color Helmet Mounted Display
CIO	Chief Information Officer
CIM	Civil Information Management
CIMDPS	Civil Information Management Data Processing System
CMNS	Combat Mission Needs Statement
CNVD	Clip-On Night Vision Device
COP	Common Operational Picture
COTI	Clip-On Thermal Imagers
COTM	Communications-on-the-Move
COTS	Commercial-Off-The-Shelf
CP	Counter-Proliferation
CPD	Capabilities Production Document
CQC	Close Quarter Combat
CT	Counter-Terrorism
C-UAS	Counter - Unmanned Aerial Systems
DAMS	Distributed Audio Media System
DCGS-SOF	Distributed Common Ground/Surface System--Special Operations Forces
DCM	Defensive Countermeasures
DCS	Dry Combat Submersible
DCU	Data Concentrator Unit
DDS	Dry Deck Shelter
DOD	Department of Defense
DRWG	Distributed Common Ground/Surface System Working Group
DT	Developmental Testing
DVE	Degraded Visual Environment
DVEPS	Degraded Visual Environment Pilotage System
DWS	Defensive Weapon System
EAC	Exploitation Analysis Centers
ECM	Electronic Countermeasures

ACRONYMS

ECOS	Enhanced Combat Optical Sights
ECP	Engineering Change Proposal
EDM	Engineering Development Model
EMD	Engineering and Manufacturing Development
EO/IR	Electro-Optical Infrared
ER	Extended Range
ESA	Enhanced Situational Awareness
ETI	Evolutionary Technology Insertion
EUD	End User Devices
EW	Electronic Warfare
FABS	Fly-Away Broadcast System
FCD	Field Computing Devices
FM	Frequency Modulation
FMV	Full Motion Video
FOC	Full Operational Capability
FoS	Family of Systems
FRP	Full Rate Production
FSOV	Family of Special Operations Vehicles
FVL	Future Vertical Lift
FY	Fiscal Year
FYDP	Fiscal Year Defense Plan
GATM	Global Air Traffic Management
GCC	Geographical Combatant Commander
GEOINT	Geospatial Intelligence
GFE	Government Furnished Equipment
GIG	Global Information Grid
GMV	Ground Mobility Vehicle
GOTS	Government-Off-The-Shelf
GPPU	General Purpose Processing Units
GPS	Global Positioning System
GSK	Ground Signals Intelligence Kit
HEL	High Energy Laser

ACRONYMS

HF	High Frequency
HFIS	Hostile Fire Indicator System
HFTTL	Hostile Forces Tagging, Tracking, and Locating
HHI	Hand Held Imager
HLM	Handheld Laser Marker
IC	Intelligence Community
IDIQ	Indefinite Delivery/Indefinite Quantity
ILS	Integrated Logistics Support
IM	Insensitive Munitions
INOD	Improved Night/Day Observation/Fire Control Device
IOC	Initial Operational Capability
IPN	Installation Processing Node
IR	Infrared
IRCM	Infrared Countermeasures
IRSS	Infrared Suppression System
ISP	Integrated Survey Plan
ISR	Intelligence, Surveillance and Reconnaissance
ISR&T	Intelligence, Surveillance, Reconnaissance, and Targeting
IT	Information Technology
ITMS	Integrated Tactical Mission Systems
JIE	Joint Information Environment
JOS	Joint Operational Stocks
JTWS	Joint Threat Warning System
LAM	Laser Aiming Marker
LCM	Low Cost Modification
LCS	Load Carriage System
LFT&E	Live Fire Test and Evaluation
LMAMS	Lethal Miniature Aerial Munition Systems
LOS	Line of Sight
LPI/LPD	Low Probability of Intercept/Low Probably of Detection
LRBS	Long Range Broadcast System
LRIP	Low Rate Initial Production

ACRONYMS

LRU	Line Replaceable Unit
LSDB	Laser--Small Diameter Bomb
LTATV	Lightweight Tactical All Terrain Vehicle
MAAWS	Multi-Purpose Anti-Armor/Anti-Personnel Weapons System
MANET	Mobile Ad-hoc Networking
MCE	Military Construction Collateral Equipment
MEDVAC	Medical Evacuation
MELB	Mission Enhancement Little Bird
MFD	Multi-Function Display
MFP	Major Force Program
MG	Machine Gun
MGS	Modular Glove System
MICH	Modular Integrated Communications Helmet
MIP	Military Intelligence Program
MIPR	Military Interdepartmental Purchase Request
MISO	Military Information Support Operations
MLE	Military Liaison Element
MPU	Mission Processor Unit
MS	Milestone
MSSEP	Mobile SOF Strategic Entry Points
MTD	Mission Training Devices
MTPS	Mission Training and Preparation Systems
MTS-B	Multi-Spectral Targeting System--B
MWS	Missile Warning System
NDI	Non-Developmental Item
NGA	National Geospatial-Intelligence
NGFLIR	Next Generation Forward Looking Infrared Radar
NG CCFLIR	Next Generation Combatant Craft Forward Looking Infrared Radar
NGLS	Next Generation Loud Speakers
NM	Nautical Mile
NRE	Non-Recurring Engineering
NSAV	Non-Standard Aviation

ACRONYMS

NSCV	Non-Standard Commercial Vehicle
NSSS	National Systems Support to SOF
NTM	National Technical Means
NVD	Night Vision Devices
OA	Operational Assessment
OCO	Overseas Contingency Operations
OEM	Original Equipment Manufacturer
OFP	Operational Flight Program
OT	Operational Test
OT&E	Operational Test and Evaluation
P3I	Pre-Planned Product Improvement
PCAS	Persistent Close Air Support
PCU	Protective Combat Uniform
PE	Program Element
PED	Processing, Exploitation, and Dissemination
PGL	Precision Geo Location
PGM	Precision Guided Munitions
PISA	Predator Integrated Signals Intelligence Architecture
POR	Program of Record
PSM	Personal Signature Management
PSP	Precision Strike Package
QL-CBA	Quick-Look Capabilities-Based Assessment
RAMS	Removable Airborne Military Information Support Operations System
RC-IED	Counter Radio Controlled-Improvised Explosive Device
R&D	Research and Development
RDT&E	Research, Development, Test, and Evaluation
RECCE	Tactical Reconnaissance Kit
RF	Radio Frequency
RFCM	Radio Frequency Countermeasures
RIS	Radio Integration System
ROP	Remote Observation Post
RSTA	Reconnaissance, Surveillance, and Targeting Acquisition

ACRONYMS

RWR	Radar Warning Receiver
SA	Surface-to-Air
SAFC	Special Applications for Contingencies
SAPNET	Special Access Program Network
SATCOM	Satellite Communications
SBIR	Small Business Innovative Research
SBUD	Simulator Block Updates
SCO	SOF Cryptologic Operator
SDB	Small Diameter Bomb
SDN	SOF Deployable Node
SDN-EP	SOF Deployable Node--Extension Packages
SDN-H	SOF Deployable Node-Heavy
SDN-L	SOF Deployable Node-Light
SDN-M	SOF Deployable Node-Medium
SDV	Sea, Air, Land (SEAL) Delivery Vehicle
SEAL	Sea, Air, Land
SEALION	Sea, Air, Land, Insertion Observation Neutralization
SFAC	Security Forces Assistance Craft
SGM	Small Glide Munition
SIE	Special Operations Forces Information Environment
SIGINT	Signals Intelligence
SIL	System Integration Lab
SIRFC	Suite of Integrated Radio Frequency Countermeasures
SKR	Silent Knight Radar
SMS	Special Mission System
SOCRATES	Special Operations Command, Research, Analysis and Threat Evaluation System
SOF	Special Operations Forces
SOF-P	Special Operations Forces--Peculiar
SOFNET	Special Operations Forces Network
SOFPREP	Special Operations Forces Planning, Rehearsal, and Execution Preparation
SOFSA	Special Operations Forces Support Activity
SOMPE	Special Operations Mission Planning and Execution

ACRONYMS

SOPGM	Standoff Precision Guided Munitions
SoS	System of Systems
SPCOM	Special Communications Field Segment - Enterprise
SPEAR	SOF Personal Equipment Advanced Requirements
SPPN	Special Purpose Processing Node
SMU	Special Mission Units
SR	Special Reconnaissance
SRTV	Secure Real-Time Video
SSE	Sensitive Site Exploitation
STC	SOF Tactical Communications
STLD	Small Target Location Devices
STTR	Small Business Technology Transfer
STUAS	Small Tactical Unmanned Aerial Systems
SWAP	Size, Weight and Power
SWCS	Shallow Water Combat Submersible
TACLAN	Tactical Local Area Network
TAS	Threat Awareness System
TCCC	Tactical Combat Casualty Care
TDL	Tactical Data Link
TENCAP	Tactical Exploitation of National Capabilities
TF/TA	Terrain Following/Terrain Avoidance
TOCNET	Tactical Operations Center
TPAN	Tactical Personal Area Networks
TRL	Technical Readiness Level
TTV	Team Transportable Variant
TTL	Tagging, Tracking and Locating
TV	Television
TVS/RSTA	Tactical Video System/Reconnaissance, Surveillance, and Target Acquisition
UAS	Unmanned Aircraft System
UAV	Unmanned Aerial Vehicle
UHF	Ultra High Frequency
UGS/UMS	Unattended Ground Sensors/Unattended Maritime Sensors

ACRONYMS

URG	Upper Receiver Groups
VAS	Visual Augmentation Systems
VAS-BM	Visual Augmentation-Binocular-Monocular
VASWA	Visual Augmentation System-Weapons Accessories
VBL	Visible Bright Light
VBSS	Visit, Board, Search, and Seizure
VHF	Very High Frequency
VTC	Video Teleconferencing

Description:

This P1 Line Item is part of the Military Intelligence Program. It includes programs which provide for Intelligence, Surveillance, and Reconnaissance (ISR) in support of irregular warfare operations. Primary mission emphasis is on signals intelligence, imagery, target acquisition, threat warning, threat identification, and surveillance missions. Includes avionics, and sensor maintenance, peculiar support equipment, communication systems, common datalink systems, training, trainers, mission training devices (MTD) and the associated ground processing, exploitation and dissemination system. This program received FY 2017 Overseas Contingency Operations (OCO) adds.

Description:

This P-1 Line Item is part of the Military Intelligence Program. The mission of the MC-12W/Javaman III is to provide a manned fixed wing capability for improved tactical airborne Intelligence, Surveillance, Reconnaissance, and Targeting in support of Theater Special Operations Forces. This line funds SOF peculiar modifications to manned ISR aircraft and the procurement and associated modifications of training systems to meet evolving SOF mission requirements. There is no associated RDT&E. This program received Overseas Contingency Operations funding in FY 2017.

Description:

This P-1 Line Item was previously named MH-60 Modernization Program. Army Special Operations Aviation (ARSOA) provides organic aviation support to Special Operations Forces (SOF) for world-wide contingency operations and low-intensity conflicts. ARSOA utilizes 72 highly specialized MH-60 aircraft capable of world-wide rapid deployment operations and penetration of hostile areas for these missions. The aircraft are capable of operating at extended ranges under adverse weather conditions and harsh environments deep in enemy territory. The aircraft are used to infiltrate, provide logistics for, reinforce, provide close air support, and extract SOF. The MH-60M program provides ARSOA with a single model aircraft prepared to support the SOF ground force commander into the foreseeable future. This program received FY 2017 Overseas Contingency Operations (OCO) funding to replace one MH-60M aircraft loss in August 2015.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:

Special Operations Forces (SOF) provide organic aviation support for world-wide contingency operations and low-intensity conflicts. The specialized aircraft for these missions must be capable of world-wide rapid deployment, undetected penetration of hostile areas, and operations in contested or anti-access/area denial (A2/AD) environments. These aircraft must also be capable of operating at extended ranges under adverse weather conditions to infiltrate, provide logistics for, reinforce, and extract SOF. This P-1 line item provides for on-going reliability, maintainability, spares, equipment, weapons, aircraft survivability equipment (ASE) upgrades, as-well-as, costs for fielded rotary wing aircraft and subsystems. These include: A/MH-6 Low Cost Modifications (LCM), A/MH-6 Block Upgrades, MH-47 Block Upgrades, MH-47 LCM, MH-60 LCM, Next Generation Forward Looking Infrared (NGFLIR), Secure Real Time Video (SRTV), Simulator Block Upgrades (SBUD), Commercial Spares, Aircraft Survivability Equipment (ASE), Silent Knight Terrain Following/Terrain Avoidance (TF/TA) Radar, Mission Processor Upgrades (MPU), MH-60M Block Upgrades, and Degraded Visual Environment (DVE).

The FY 2019 funding request was reduced by \$-0.863 million to account for the availability of prior year execution balances.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

1. The A/MH-6M Low Cost Modifications (LCM) include modifications to the A/MH-6 Mission Enhanced Little Bird (MELB), component miniaturizations, SOF-peculiar Engineering Change Proposals (ECP), spares, and minor modifications to SOF-unique equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, and incorporate mission critical capabilities.

FY 2019 PROGRAM JUSTIFICATION: Procures various hardware and software solutions to improve reliability and maintainability, correct deficiencies, addresses obsolescence, and incorporates mission critical capabilities.

2. The MH-47 LCM include Army ECP modifications due to the unique configuration of SOF aircraft, SOF-peculiar ECPs, spares, and minor modifications to SOF-unique equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, and incorporate mission critical capabilities.

FY 2019 PROGRAM JUSTIFICATION: Procures various hardware and software solutions to improve reliability and maintainability, correct deficiencies, addresses obsolescence, and incorporates mission critical capabilities.

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2019 United States Special Operations Command		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 02: Special Operations Command / BSA 1: Aviation Programs		P-1 Line Item Number / Title: 0201RWUPGR / ROTARY WING UPGRADES AND SUSTAINMENT
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: 1160482BB, 1160403BB, 1160427BB
Line Item MDAP/MAIS Code: 0000		
<p>3. The MH-60 LCM include modifications to the MH-60, component miniaturizations, SOF-peculiar ECPs, spares, and minor modifications to SOF-unique equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, and incorporate mission critical capabilities including improvements over the existing MH-60M fleet.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures various hardware and software solutions to improve reliability and maintainability, correct deficiencies, addresses obsolescence, and incorporates mission critical capabilities.</p> <p>4. The MH-47 Block Upgrades program funds increased capabilities, addresses obsolescence issues, and incorporates new and maturing emerging technologies into the MH-47 aircraft. This project also includes modifications to ASE and weapons systems to counter rapidly emerging threats, improve lethality and enhance aircraft survivability.</p> <p>5. The NGFLIR program consists of non-recurring engineering (NRE), procurement, and installation of FLIR Pre-Planned Product Improvements (P3I). The P3I will improve targeting, tracking, and aircrew situational awareness on Army Special Operations Aviation (ARSOA) light and heavy weight platforms.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Evaluating and assessing different commercial-off-the-shelf/non-developmental items for integration and user evaluation as a potential replacement for legacy FLIR systems for SOF platforms.</p> <p>6. The SBUD program procures concurrency, obsolescence, and fidelity upgrades to special mission aircraft combat mission simulators, ensuring realistic full-spectrum training and mission rehearsal capabilities. Rotary wing training systems include, but are not limited to, Combat Mission Simulators (CMS) for the MH-47, MH-60, A/MH-6, and peripheral devices. These CMS have the highest utilization rates across the Army Aviation Enterprise; thereby, reducing risk for complex mission sets and reducing overall costs and safety stresses of live training. This suite of training devices ensures the SOAR(A) meets its aviator throughput requirement by maximizing resources required to attain aircraft and mission proficiency.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Continues to procure modifications to aircrew training devices and production support.</p> <p>7. Commercial Spares provides replenishment and sparing of SOF peculiar mission equipment components for Army Special Operations Aviation Command aviation spare parts greater than the \$250K O&M individual item purchase threshold. Provides for in-service replacement of items damaged beyond economical repair.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures commercial spare parts.</p> <p>8. The Degraded Visual Environment Pilotage System (DVEPS) solution will fuse information from currently fielded aircraft sensors with emerging sensor technology and digital terrain elevation data to display real-time reference points, obstacles, and landing zone information to the aviator. The DVE solution will provide MH-47 and MH-60 aircrews with visual cues for obstacle avoidance and aircraft control during all phases of flight and significantly increase crew and passenger survivability in DVE.</p> <p>9. The SRTV program provides full motion video from ground or air assets to enable real-time threat assessment and to maximize mission effectiveness and survivability. SRTV will increase mission success and crew/platform survivability by confirming or denying that the assault plan is viable and that the offensive maneuver force is sufficient to overwhelm the enemy.</p> <p>10. The HFIS detects anti-aircraft artillery, rocket-propelled grenade launches, and other small arms fire. By providing detection and angle of arrival information, the HFIS will allow the aircrew to perform evasive and counter-fire actions, significantly increasing the aircraft's probability of survival.</p> <p>11. The Terrain Following/Terrain Avoidance (TF/TA) Silent Knight Radar program will procure and install the AN/APQ-187, a SOF-common TF/TA Multi-Mode Radar, spares, and Engineering Change Proposal (ECPs). The AN/APQ-187 is characterized by a Low Probability of Intercept/Low Probability of Detection capability, and will be installed on the MH-47G, MH-60M, CV-22, and MC-130J. This new radar provides mission essential capabilities while addressing obsolescence issues associated with today's legacy radar systems: the AN/APQ-174B and AN/APQ-186. Firm Fixed Price (FFP) Low Rate Initial Production</p>

Exhibit P-40, Budget Line Item Justification: PB 2019 United States Special Operations Command		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 02: Special Operations Command / BSA 1: Aviation Programs		P-1 Line Item Number / Title: 0201RWUPGR / ROTARY WING UPGRADES AND SUSTAINMENT
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: 1160482BB, 1160403BB, 1160427BB
Line Item MDAP/MAIS Code: 0000		
<p>(LRIP) Contract IIA was awarded to Raytheon in May 2016, followed by LRIP IIB contract award (also FFP) in February 2017. Follow-on platform A Kit aircraft install kits will be awarded each year for fielding. MH-47G and MH-60M A Kit production and installation will be completed at SOFSA.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 1 MH-47 A Kit, 13 B Kits, and 3 initial spares and engineering change proposals.</p> <p>12. The MPU replaces the current Mission Processor (to include the Multi-Function Displays and Control Display Units) within all ARSOA aircraft. This upgrade increases software processor performance margins and enables the Operational Flight Program (OFP) to accommodate planned future updates, which include: Federal Aviation Agency Global Air Traffic Management (GATM), and Airborne Mission Networking (AbMN). This program also includes upgrades to the Common Avionics Architecture System (CAAS) and the Aviation Management System (AMS), which are the software backbone to the OFPs, and upgrades the current embedded Global Positioning System (GPS)/Inertial Navigation System with an all-in-view GPS card in accordance with Global Area Navigation System/GATM requirements. AbMN will install ground force compatible radios to digitally exchange tactical information among participating forces culminating in an accurate, composite, and correlated picture of the entire battle space. AbMN provides Army Special Operations Aviation airborne platforms and on-board supported forces digital connectivity with ground elements and other airborne assets to include a Common Operational Picture (COP) of hostile and friendly forces.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 13 A-Kits, 30 B-Kits, non-recurring engineering, GPPU engineering, integration and testing.</p> <p>13. The ASE program was established to procure and field critical active and passive SOF-unique ASE to counter rapidly evolving Surface-to-Air (SA) and Air-to-Air (AA) threat systems for the A/MH-6, MH-60, and MH-47. This program includes fielding of new systems and pre-planned product improvements/upgrades of fielded ASE, addresses obsolescence issues through production based engineering change proposals, provides technical data and fielding support and testing. Beginning in FY 2017 this program included the Suite of Integrated Radio Frequency Countermeasures (SIRFC) and Infrared Countermeasures (IRCM) programs. SIRFC is a fully integrated, modular and adaptable suite of active aircraft survivability equipment that increases combat effectiveness and potential for mission accomplishment for ARSOA aircraft. SIRFC provides state-of-the-art radar warning receivers and technologically advanced radar-jamming capabilities for increased threat detection, enhanced situational awareness, and defensive countermeasures. The IRCM program provides a low Size, Weight, and Power capability suitable for the A/MH-6 MELB with potential use on the MH-60 and MH-47 aircraft. The IRCM program will develop, integrate, qualify, and test a Department of Navy developmental lightweight IRCM system to include a missile warning system and countermeasure capability.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures seven A/MH-6 A-Kits, 1 B-Kit, LRU-1 Upgrades, integration, flight and fielding support.</p> <p>14. The MH-60M Block Upgrades program funds increased capabilities, addresses obsolescence issues, and incorporates new and maturing emerging technologies into the MH-60M aircraft. This project also includes modifications to Aircraft Survivability Equipment (ASE) and weapons systems to counter rapidly emerging threats, improve lethality and enhance aircraft survivability.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 7 A Kits, 9 B-Kits, production engineering, and integrated logistics support.</p> <p>15. The A/MH-6M Block Upgrades. This modification will restore structural, performance, and safety margins for the aircrews while providing an acceptable level of situational awareness in the cockpit and accommodations for rapid integration of future capabilities. This project also includes modifications to ASE and weapons systems to counter rapidly emerging threats, improve lethality and enhance aircraft.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 16 avionics kits, 16 airframe kits, seven integrated airframe shells, two installs, integrated support and publications.</p>

Description:

This program procures a Special Operations Forces (SOF)-common Silent Knight Radar (SKR) Terrain Following/Terrain Avoidance (TF/TA). The SKR TF/TA system provides SOF common low-probability of intercept/low-probability of detection radar to defeat advanced passive detection threats while maintaining ability to fly safe TF. This radar is targeted for use on all MH-47G Chinook heavy assault helicopters, MH-60M medium assault helicopters, CV-22 Tilt-Rotor aircraft, and MC-130J aircraft. This new radar provides mission essential capabilities while addressing obsolescence issues associated with today's legacy radar systems: the AN/APQ-174B and AN/APQ-186.

Development Status/Major Development Milestones		
Date	Title	Description
Jul 2013	Low Rate Initial Production	Purchased four low rate initial production units in FY 2013 that delivered in FY 2015
May 2016	Low Rate Initial Production IIA	Purchased ten low rate initial production units for rotary wing
Aug 2016	MH47G/MH-60M Limited User Test (Software Version 7.13)	Assessment of suitability of SW ver 7.13 in operational environment resulted in identification of a required subsequent SW ver 7.14 development and test to enable close formation fight
Sep 2016	MH-47G/MH-60M Qualification Test	Qualification testing completed with Software Baseline 7.13.02
Feb 2017	Low Rate Initial Production IIB	Purchased eight low rate initial production units for rotary wing
Aug 2017	MH-47G/MH-60M Software Version 7.14 Demo	Successful flight demonstration of software release 7.14 to implement formation flight improvements.

Description:

The Mission Processor Upgrades (MPU) program provides for the technology refreshment/upgrade of the current mission and video processors for all Army Special Operations Aviation (ARSOA) Multi-Function Displays (MFD) and Control Display Units (CDU) as well as display modernization. Upgrading all internal processors increases the processing power to support critical functionality and emerging technologies that will be integrated into the Common Avionics Architecture System (CAAS). This mission processor upgrade provides the processing and memory resources required to incorporate the following functions into the General Purpose Processing Unit (GPPU): Global Air Traffic Management (GATM), replaces ground-based navigation aids with an international requirement that all aircraft be compliant with digital and space-based navigation systems; Automatic Dependent Surveillance-Broadcast (ADS-B) equipment allows Global Positioning System equipped aircraft to transmit their location and altitude to other aircraft and air traffic control. This capability has become more and more critical as the Federal Aviation Agency begins shutting down many of their existing surveillance radars. Airborne Mission Network (AbMN) will install ground force compatible radios to digitally exchange tactical information among participating forces culminating in an accurate, composite, and correlated picture of the entire battlespace. It provides critical, real-time battlefield data to ground forces and aircrew while en route to the objective. AbMN provides ARSOA airborne platforms and onboard supported forces digital connectivity with ground elements and other airborne assets, to include a Common Operational Picture of hostile and friendly forces.

Description:

Special Operations Forces (SOF) provide organic aviation support for world-wide contingency operations and low-intensity conflicts. The specialized aircraft for these missions must be capable of world-wide rapid deployment, undetected penetration of hostile areas, and operations in contested or anti-access/area denial (A2/AD) environments. The Aircraft Survivability Equipment (ASE) program procures and fields critical active and passive SOF-unique aircraft survivability equipment to counter rapidly evolving Surface-to-Air (SA) and Air-to-Air (AA) threat systems for the A/MH-6, MH-60, and MH-47. These SA threat systems are evolving at an unprecedented rate, requiring rapid procurement of mission equipment that will reduce the probability of engagement, increase the probability of detecting and countering threat systems, and improve the aircraft's ability to continue operating after sustained battle damage. This program includes fielding of new systems and pre-planned product improvements (P3I)/upgrades of fielded aircraft survivability equipment, addresses obsolescence issues through production-based engineering change proposals, and provides technical data and fielding support and testing. P3I upgrades may include expansion of frequency ranges on existing systems, modernization of legacy components, and potential "collaborative off-boarding/on-boarding" detect/countermeasures capabilities to provide expanded coverage for aircrews in a high threat environment.

The Infrared Countermeasures (IRCM) program provides a new mission-configurable Missile Warning System, IRCM capability and exhaust suppressor at a weight suitable for the A/MH-6 Mission Enhanced Little Bird with potential use on the MH-60 and MH-47 aircraft. Army Special Operations Aviation (ARSOA) requires the addition of IRCM to protect against increasingly proliferated and sophisticated Man-Portable Air-Defense Weapons.

The Suite of Integrated Radio Frequency Countermeasures (SIRFC) is the next generation of Radio Frequency (RF) detection and countermeasures for ARSOA MH-47 and MH-60 aircraft. SIRFC passively detects and actively counters radar-guided missile systems. SIRFC is a critical component of deep, clandestine penetration capabilities, as the state-of-the-art Radar Warning Receiver (RWR) provides enhanced situational awareness and the advanced radar-jamming components provide the defensive capabilities required to defeat RF threats. Jammers consist of both Line Replaceable Unit (LRU)-2, High Power Remote Transmitter, and LRU-3 Electronic countermeasures. Digital RF Memory, Fast Acquisition Receiver, and pre-planned product improvements provide state-of-the-art capability against advanced RF threats. Direction Finding/Intermediate Frequency & Swept Receiver upgrades ensure Silent Knight Radar compatibility. This P-3A reflects updated negotiated prices, new contract terms allowing individual LRU purchases, and Economic Order Quantity procurements.

Description: The MH-60M Block Upgrades program funds increased capabilities, addresses obsolescence issues, and incorporates new and maturing emerging technologies into the MH-60M aircraft. This project also includes modifications to Aircraft Survivability Equipment (ASE) and weapons systems to counter rapidly emerging threats, improve lethality and enhance aircraft survivability.

Description:

A/MH-6M Block Upgrades consist of modifications that will restore structural, performance, and safety margins for aircrews while providing an acceptable level of situational awareness in the cockpit and accommodations for rapid integration of future capabilities. The Block 3.0 upgrade includes two distinct efforts: the airframe upgrade and the avionics upgrade. The airframe upgrade incorporates the new rotor blades/flight control kits and new integrated airframe shells. This multi-phase procurement strategy supports vendor production lead time and aircraft build up time at the Special Operations Forces Support Activity (SOFSA). This project also includes modifications to aircraft survivability equipment (ASE) and weapons systems to counter rapidly emerging threats, improve lethality and enhance aircraft survivability.

Description:

This P-1 Line Item is part of the Military Intelligence Program. USSOCOM has been designated as the DOD lead for planning, synchronizing, and as directed, executing global operations against terrorist networks and targets. USSOCOM requires the capability to find, fix, and finish time-sensitive high-value fixed and fleeting targets at the unit and team level without placing personnel and units in harm's way. These targets can often only be identified with patient collection of information and require rapid, decisive action during the short periods in which they present themselves. This line item addresses the primary areas of Intelligence, Surveillance, Reconnaissance (ISR), and Targeting capabilities for Special Operations Forces (SOF). This program received Overseas Contingency Operations (OCO) funding in FY 2017.

This line item procures various expendable Unmanned Aerial Systems (UAS) and related sensor payloads for intelligence, surveillance, and reconnaissance, which allows for remotely controlled system emplacement and data exfiltration. It also funds the acquisition and support of SOF-unique mission kits, mission payloads, weaponization, and modifications of UAVs, ground control stations, and training systems. As the combatant command executing operations, USSOCOM requires the capability to find, fix, finish, exploit, and analyze time-sensitive high-value targets.

Standardization of payload interfaces for SOF Group 1-4 UASs will reduce the time and cost to develop, field, and sustain SOF Group 1-4 UAV future payload enhancements. Will also allow user in field to hot swap payloads on same platform and reduce time between sorties.

<p>Justification:</p> <p>1. Expeditionary Organic Tactical AISR Capability Set (EOTACS). EOTACS are a family of organic tactical UAS systems, consisting of Group 1 and 2. This program procures SOF-unique mission kits, mission payloads, air vehicle enhancements, and modifications on UAS and related ground control stations.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 4 Stalker UAS, 6 Group 2 Long Range / Long Endurance (LR / LE), 6 Group 1 Medium Range / Medium Endurance (MR / ME), 225 Group 1 Vertical Takeoff & Landing (VTOL) Short Range / Short Endurance (SR / SE), 160 Group 1 Micro VTOL, 527 Group 1 Nano VTOL, 56 Unmanned Tethered Aerial Systems (UTAS), and 9 Electronic Warfare (EW) / Signals Intelligence (SIGINT) payloads.</p> <p>2. Group 1 UAS (Small Unmanned Aerial System). Group 1 UAS are small systems, less than 20 pounds in weight. This program procures SOF-unique mission kits, mission payloads, air vehicle enhancements, and modifications on UAS and related ground control stations.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 50 Quadcopters, associated ancillary equipment, and payloads.</p> <p>3. Multi-mission Tactical Unmanned Aerial System (MTUAS). MTUAS are medium systems, between 21 pounds and 55 pounds in weight. This program procures Unmanned Aerial Systems, SOF-unique mission kits, mission payloads, air vehicle enhancements, and Ground Control Stations (GCS). Ancillary equipment includes base-lined versions of payloads, recovery systems, launchers and GCS modifications. MTUAS provides SOF with an organic ISR capability. Digital system upgrades will comply with DoD mandates for encrypted C-2 and mode-m GPS.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures ancillary equipment.</p> <p>4. Group 3 UAS. Group 3 UAS are systems, between 55 pounds and 1320 pounds in weight. This program procures SOF-unique mission kits and mission payloads. Group 3 UAS provide longer flight duration and payload capacity.</p> <p>FY 2019 OCO PROGRAM JUSTIFICATION: Procures six SOF Peculiar Advanced Payloads for STUAS that fill critical tactical ISR gaps in austere locations</p> <p>5. Group 4 UAS (previously justified as MQ-1). Group 4 UAS are large systems, greater than 1,320 pounds in weight flying less than 18,000 feet above sea level. The MQ-1 Unmanned Aerial Vehicle (UAV) funds the acquisition and support of SOF-unique mission kits, mission payloads, weaponization, and modifications on MQ-1 UAVs, ground control stations, and training systems as part of the Medium Altitude Long Endurance Tactical Program.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures SOF-unique mission kits, payloads, weaponization, modifications and production support.</p> <p>FY 2019 OCO PROGRAM JUSTIFICATION: Procures 16 A and B-kits for Small Glide Munitions (SGM), Beyond Line of Sight Wiring Harness for MQ-1C/ER, Vortex Integration for MQ-1C/ER and Persistent Close Air Support integration on MQ-1C/ER.</p>

<p>6. Special Applications for Contingencies. Procures various UAS platforms and expendable and related sensor payloads for intelligence, surveillance, and reconnaissance. Platforms will be used to develop/test payload systems that will increase UAS flight range and provide the user real-time access to analyzed target and battlefield data for SOF Group 1-4 UAS.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures two RQ-20 Puma UAS.</p>

Description:

The Non-Standard Aviation (NSAV) line provides funding to purchase, modify and equip Special Operations Forces (SOF) NSAV and Aviation Foreign Internal Defense (AvFID) aircraft to provide the required capabilities outlined below. This line also funds low cost modifications of NSAV assets to support world-wide SOF mobility and priority Partner Nation training.

<p>Justification:</p> <p>1. NSAV. Program supports worldwide SOF missions and must have flexible capabilities to facilitate Theater Special Operations Command (TSOC) tactical and strategic objectives. The NSAV program provides Short Take-Off and Landing , flexible, rapid, responsive operational support of special operations teams. Support to TSOCs and operational mission objectives include: SOF team mobility in austere and remote locations, casualty evacuation, non-combatant evacuation operations, and humanitarian assistance.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Funds low cost modifications and Global Positioning System (GPS) Improvements for C-146.</p> <p>2. AvFID. Conduct training of fixed wing aircraft with priority Partner Nations in support of U.S. strategic objectives. AvFID aircraft must have flexible capabilities to support objective mission sets including, but not limited to, train, advise, and assist Partner Nation in the areas of day and night operations in low-level navigation, airdrop, air land resupply, leaflet drop, MEDVAC, personnel recovery, visual meteorological condition formation, aerial Intelligence Surveillance and Reconnaissance, airborne command and control, convoy escort, close air support, strike, border patrol, counternarcotics, and humanitarian relief.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures and installs GPS improvements on MC12 Air National Guard Aircraft.</p> <p>FY 2019 OVERSEAS CONTINGENCY OPERATIONS (OCO) PROGRAM JUSTIFICATION: Procures Infrared Suppression Systems (IRSS) for 9 MC-12 ANG Aircraft and procures 12 High Definition Infrared Sensor MX-15 sensors.</p>

Description:

This P-1 Line Item is part of the Military Intelligence Program. The mission of the U-28 is to provide a manned fixed wing capability for improved tactical airborne Intelligence, Surveillance, Reconnaissance, and Targeting in support of Theater Special Operations Forces. USSOCOM funds SOF-peculiar modifications to U-28 aircraft and low cost modifications for the Mission Training Device (MTD), and support equipment to meet evolving mission requirements. This program received Overseas Contingency Operations (OCO) funding in FY 2017. There is no associated RDT&E.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.										
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										
<p>Justification:</p> <p>1. Mission Systems. Provides SOF-unique modifications to include: avionics, communication systems, Intelligence, Surveillance, and Reconnaissance systems, mission workstations, and mission software.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures and installs low cost modifications to U-28 mission systems.</p> <p>FY 2019 OCO PROGRAM JUSTIFICATION: Procures Enhanced Ground Proximity Warning Systems to address findings of Safety Investigation board (35 kits and 10 spares).</p> <p>2. Mission Training Device (MTD): Procures Mission Training Device and concurrency, obsolescence, and fidelity low cost modifications to the U-28 MTD ensuring realistic full-spectrum training and mission rehearsal capabilities. The MTD reduces risk for complex mission sets, reduces overall costs and safety stresses of live training required to attain aircraft and mission proficiency.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures two Mission Training Devices and installs MTD simulator low cost modifications to mission systems.</p> <p>3. Multi-Spectral Targeting System (MTS) Sensor. A full motion video sensor that provides electro-optical and infrared real-time video. The system also houses a laser designator that is co-aligned with the video. The MTS Sensor program received OCO funding in FY2017.</p> <p>4. Advanced Threat Warning (ATW) System. A sensor that provides threat warning of missiles, hostile fire, and lasers that are engaging an aircraft. The ATW System program received OCO funding in FY 2017.</p> <p>5. U-28 Infrared Suppression. Continues Joint Urgent Operational Need S0-0010 solution which began in FY 2016. Modification lowers U-28 infrared signature that reduces engagement risk and makes flares more effective. The Infrared Suppression program received OCO funding in FY 2017.</p> <p>6. U-28 Global Positioning System (GPS) Improvements. Provides ability to operate in a GPS degraded environment improving survivability/readiness of aircraft supporting ongoing operations. The U-28 GPS program received OCO funding in FY 2017.</p> <p>7. U-28 Automatic Dependent Surveillance – Broadcast (ADS–B) Upgrade. Federal Aviation Authority (FAA) mandate to improve safety and efficiency enabling unrestricted flight profiles in FAA airspace. This allows aircraft to conduct unrestricted training, transit and ISR operations.</p> <p>FY 2019 OCO PROGRAM JUSTIFICATION: Procures and installs ADS-B hardware and software for kit proof of first article and subsequent modification of 34 aircraft (26 mission and 8 trainers).</p> <p>8. U-28 EQ+ Modification. Follow-on effort to Combat Mission Needs Statement (CMNS) 210 to directly support C-ISIS operations. Enables deployment aircraft with 20" High Definition Full Motion Video Multi-Spectral Targeting System B Sensors OCONUS providing both extended stand-off operations and an enhanced Find, Fix, Finish capability. The U-28 EQ+ modification program received OCO funding in FY 2017.</p>

Description: This P-1 line item funds the MH-47 program. Army Special Operations Aviation (ARSOA) requires a long-term, capable, and reliable SOF heavy assault fleet in order to provide organic world-wide strategic Rotary-wing operations capable of rapid deployment and long range penetration of hostile tactical areas. ARSOA is authorized 69 highly specialized MH-47G Chinook aircraft, which currently includes 61 MH-47G sheet-metal constructed airframes, two of which have been lost in combat or pre-deployment training. This program will replace the remaining 61 MH-47G legacy sheet metal constructed airframes with newly built machined airframes incorporating emerging technologies to maintain mission effectiveness. These 61 sheet-metal airframes are, on average, 48 years-old with an average of over 9,000 cumulative flight hours each. The continuous engagement in combat operations since fielding, while operating in the high demand Special Operations Aviation flight spectrum, coupled with the aging airframe structural fatigue and corrosion, and diminishing manufacturing sources of supply, continue to increase the maintenance actions and costs required to meet operational availability. MFP-2 funds are provided by Army to cover common production, labor, and long lead material costs.

<p>Justification: FY 2019 PROGRAM JUSTIFICATION: Funds the manufacture of six newly built machined airframes incorporating emerging technologies to maintain mission effectiveness and address aging airframe structural fatigue and corrosion issues. Also funds Government Furnished Equipment/SOF-unique mission kits, block modifications, production engineering, publications, and program management. Funds modifications to address emerging threats, safety concerns, reliability and maintainability issues, and improved capabilities.</p> <p>FY 2019 OVERSEAS CONTINGENCY OPERATIONS (OCO) PROGRAM JUSTIFICATION: Funding procures one MH-47G new aircraft with Aircraft Survivability Equipment (ASE), Silent Knight Radar (SKR), sensors and avionics for October 2017 battle loss, restoring the USSOCOM BOI to 69 aircraft. Funds modifications to address emerging threats, safety concerns, reliability and maintainability issues, and improved capabilities.</p>

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description: The CV-22 Special Operations Forces (SOF) Modification line item funds the SOF variant of the V-22 vertical medium lift, multi-mission aircraft and associated training systems. The CV-22 provides long-range, high-speed infiltration, exfiltration, and resupply to Special Forces teams in hostile, denied, and politically sensitive areas. The Navy is the lead service for the joint V-22 program and is responsible for managing and funding the development of the MV-22, as well as the Block 0 portion of the CV-22. The Air Force funds the service common portion while USSOCOM funds the development and procurement of SOF peculiar systems of Block 10 and 20. Budgeted modification programs include but are not limited to defensive/survivability systems, situational awareness systems, terrain following/terrain avoidance radar, SOF Communications, the flight director, weapons integration, and Intelligence, surveillance and reconnaissance systems. The CV-22 Simulator Block Update (SBUD) program upgrades legacy CV-22 aircrew training device capabilities by addressing concurrency, obsolescence, and fidelity training issues. This program received a FY 2017 Overseas Contingency Operations (OCO) funding for attrition reserve aircraft.

Justification:

FY 2019 PROGRAM JUSTIFICATION:

Funds Low Cost Modifications and Simulator Block upgrades to address fielded deficiencies, obsolescence, reliability and maintainability issues. Block 20 upgrades to bring delivered CV-22 aircraft up to Block 20 configuration, and addresses SOF-unique CV-22 training concurrency, obsolescence and fidelity issues. These Block 20 upgrades include 3 Color Helmet Mounted Displays (CHMDs), 4 SIRFC Correction of Deficiency (COD) kits, 5 Global Positioning System (GPS) kits and 20 Search Landing Lights. Block 20 also includes nonrecurring engineering and support, equipment training, technical support and flight test.

Description:

This modification funds the retrofit of fielded CV-22 aircraft and related equipment. The CV-22 modification program includes, but is not limited to, efforts that (1) improve operational safety, suitability, and effectiveness, (2) correct deficiencies identified during operational testing and/or field operations, (3) improve reliability/maintainability of the aircraft, (4) enhance defensive systems and self-deployment capabilities, and (5) modify aircraft to common configuration. Block 20 modifications include, but are not limited to the following systems; Cabin Lighting, Color Helmet Mounted Displays, Airborne Mission Networking & Enhanced Situational Awareness, and Electronic Warfare Upgrades. The USAF MFP-4 and USSOCOM MFP-11 modification budgets fund CV-22 modifications. USSOCOM MFP-11 funds Special Operations Forces (SOF) specific modifications, and USAF MFP-4 funds modifications that are common with other USAF platforms and/or with the joint V-22 program. This budget line item also includes funds to upgrade CV-22 support equipment, training equipment, and weapon system software with changes driven by aircraft Engineering Change Proposals (ECPs). This program received Overseas Contingency Operations funding in FY 2017 for Suite of Integrated Radio Frequency Countermeasures Correction of Deficiencies (SIRFC COD) and Global Positioning System (GPS) Improvements.

Description:

The MQ-9 Unmanned Aerial Vehicle (UAV) line item funds the acquisition of Special Operations Forces (SOF)-unique mission kits, payloads, weaponization, modifications, production support for MQ-9 UAVs, Ground Control Stations GCSs), and training systems. USSOCOM is designated the DoD lead for planning, synchronizing, and as directed, executing operations against terrorist networks. As the combatant command executing these operations, USSOCOM requires the capability to find, fix, finish, exploit, and analyze time-sensitive high-value targets. These targets can often only be identified with patient collection of information and require rapid, decisive action during the short periods in which they present themselves. This line item addresses the primary areas of Intelligence, Surveillance, Reconnaissance, Target Acquisition, and Strike. This program received FY 2017 Overseas Contingency Operations adds.

Description: The Precision Strike Package (PSP) for Special Operations Forces (SOF) funds the procurement and installation of the PSP onto various SOF platforms and training devices to provide a close air support, air interdiction, and armed reconnaissance capability including sensors, communications systems, precision guided munition systems, mission operator pallet, and gun systems. The recapitalization of the AC-130H, AC-130W, and AC-130U aircraft will be accomplished by installing PSP kits onto MC-130J donor aircraft. The PSP kit is modular, scalable, and platform agnostic. This program received a FY 2017 Overseas Contingency Operations add.

Description:

The AC/MC-130J line funds the replacement of aging airframes: 14 MC-130E Combat Talon I, 23 MC-130P Combat Shadow, 20 MC-130H Talon II, 12 AC-130W Stinger II, 8 AC-130H Spectre and 17 AC-130U Spooky aircraft. These platforms perform clandestine or low visibility, single, or multi-ship low-level missions intruding politically-sensitive or hostile territory. The platforms provide air refueling for special operations helicopters and CV-22 aircraft; airdrop of leaflets, small special operations teams, resupply bundles and combat rubber raiding craft; and close air support, air interdiction, and armed reconnaissance. Additional capabilities include low-light navigation and in-flight refueling as a receiver. The Air Force procures and fields the basic aircraft, common support equipment, and trainers for USSOCOM. Designated MC-130J aircraft will be modified with kits required for Precision Strike Package (PSP) integration to achieve the AC-130J Gunship configuration. USSOCOM funds the procurement and integration of Special Operations Forces (SOF)-peculiar systems such as terrain following radar, electronic warfare and survivability systems, cargo handling provisions, variable speed refueling drogues, situational awareness systems, navigation systems, mission processors, mission automation, communication systems, beacons, electro-optical systems, minor modifications, and the infrastructure and processors supporting SOF peculiar systems. USSOCOM also funds unique publications and associated modifications to training devices. Future upgrades include, but are not limited to, intelligence, surveillance, and reconnaissance systems and weapons to the AC/MC-130J fleet. Crew stations will be modified to aid aircrew members operating the SOF-unique systems. The SOF-peculiar systems will be procured and integrated incrementally with non-recurring engineering as required for each baseline. The SOF-unique aircrew training devices for the AC/MC-130J weapons systems are also included in this program. This program received Overseas Contingency Operations funding in FY 2017.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 PROGRAM JUSTIFICATION: Procures four Auxiliary Flight Deck Station kits for the MC-130J and nine Special Mission System kits plus installs, other government costs, trainer modifications, initial spares, support and engineering for AC/MC-130J aircraft. Supports technical risk reduction and consolidation of technical data and modification for MC-130J systems which interface to the aircraft and each other through the Special Mission System. Procures seven Low Rate Initial Production (LRIP) Electronic Warfare Radio Frequency Countermeasures A Kits, and five LRIP B Kits for installation on the AC/MC-130J aircraft. Procures Special Operations Forces – unique hardware, spares, non-recurring engineering, training and program support for Airborne Mission Networking on the MC-130J. Funds integration of five MC-130J aircraft Precision Strike Package (PSP) retrofit modifications and other government costs to the AC-130J configuration. Procures AC-130J simulator block upgrades. Procures various SOF-unique modifications for MC-130J Commando II aircraft. Procures one C-130 SOF common TFTA (Silent Knight) Radar A kit.

Description:

This modification program incrementally procures and integrates, onto AC/MC-130J aircraft, SOF-unique modifications necessary to correspond with the incremental upgrade strategy of the AC/MC-130J Program. The Special Mission System (SMS) program also integrates SOF-peculiar capabilities with existing aircraft controls and displays, and enable hosting of SOF mission software applications. Supports technical risk reduction and consolidation of technical data and modification for systems which interface to the aircraft and each other through the SMS. Auxiliary Flight Deck Station and SMS equipment will be installed by contractor or depot onto AC-130J and MC-130J aircraft.

Description:

This modification program procures and fields Radio Frequency Countermeasures (RFCM) for AC/MC-130J fleet. The RFCM Countermeasures detects, identifies and provides geo-located threat position data to the existing Situational Awareness system and display, and determines and implements appropriate response to eliminate or degrade the threat.

Description:

This modification program prepares the MC-130J aircraft for Precision Strike Package (PSP) integration. A total of 37 MC-130Js will be modified with the PSP to provide the AC-130J close air support, air interdiction, and armed reconnaissance capability in accordance with the Capability Production Document (CPD) for AC-130J. AC-130J CPD defines a 37 AC-130J aircraft program. This program received Overseas Contingency Operations funding in FY 2017.

<p>Description:</p> <p>The C-130 Modifications line item funds Special Operations Forces (SOF)-unique modifications to various SOF models of the C-130 aircraft and associated training systems. Program is comprised of modifications generated from mission performance deficiencies, logistics problems, and evaluation of emerging technologies. USSOCOM funds the procurement of SOF-peculiar systems such as electronic warfare and survivability, communication, situational awareness, training, intelligence surveillance and reconnaissance, weapons integration, and low cost modifications into the SOF C-130 fleet.</p> <p>The FY 2019 funding request was reduced by \$-1.957 million to account for the availability of prior year execution balances.</p>

<p>Justification: C-130 Modifications:</p> <p>1.1 C-130 Low Cost Modifications (LCM). Minor modifications to MC-130H/J, AC-130W/U/J and EC-130J aircraft SOF-unique equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, incorporate mission enhancements, and critical safety changes. Modifications include, but are not limited to: radar upgrades, avionics and display upgrades, sensor installations and upgrades, intelligence collection and dissemination capabilities, communication systems, mechanical and electrical modifications, and weapons integration. Current projects include but are not limited to AC-130U Global Positioning System (GPS) improvements, MC-130H GPS retrofit, MC-130H Joint Threat Warning System-Air Variant permanent installation, MC-130H lightweight armor, EC-130J Tie Down, EC-130J Co-site De-confliction, AC-130J 30mm Ammunition Handling System, VHF1 Antenna Move, and MC-130H data link system integration.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Continues minor upgrades/modifications to SOF C-130 equipment.</p> <p>1.2. Enhanced Situational Awareness (ESA). Provides C-130 SOF fleet with near-real time intelligence to include data fusion, threat detection, identification, and avoidance; electronic support measures for threat geo-location; and specific emitter identification.</p> <p>1.3 C-130 Avionics Modifications. This program replaces various SOF C-130 unique avionics systems across the SOF C-130 fleet. MFP-4 funds address service-common avionics systems. Projects include but are not limited to GPS improvements.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures GPS hardening and M-Code modifications for the SOF C-130 fleet.</p> <p>1.4 Simulator Block Updates (SBUD). The C-130 SBUD program sustains legacy C-130 aircrew training device capabilities by addressing concurrency, obsolescence, and fidelity training issues. The C-130 weapon systems possessing aircrew training devices include the AC-130J, AC-130U, AC-130W, EC-130J, MC-130H and MC-130J.</p> <p>FY 2019 PROGRAM JUSTIFICATION: The SBUD program continues to procure modifications to C-130 aircrew training devices to sustain or improve training capabilities.</p> <p>1.5 EC-130J Upgrade Modifications. This program funds the hardware and integration of SOF-unique portions of the USAF C-130J 7.0/8.1 software block cycle upgrades, airframe and aircraft infrastructure modifications.</p> <p>2. EC-130J Commando Solo (CSOLO). CSOLO supports combat operations by flying Military Information Support Operations (MISO) missions for the purpose of broadcasting radio and/or television signals deep into denied territory. This program funds the de-modification of legacy CSOLO aircraft to make them SOF multi-mission capable and procurement of roll-on/roll-off Removable Airborne MISO Systems (RAMS).</p>

Description:

The Underwater Systems line item procures dry and wet combat submersibles, modifications, field changes to the Dry Deck Shelter (DDS), and various systems and components for Special Operations Forces (SOF) Combat Diving. Current acquisition procurement programs of record are the Shallow Water Combat Submersible (SWCS) program, Dry Combat Submersible (DCS), SOF Combat Diving and Dry Deck Shelter (DDS). SWCS is the next generation free-flooding combat submersible that transports SOF personnel and their combat equipment in hostile waters for a variety of missions. SOF units require specialized underwater systems that improve their warfighting capability and survivability in harsh operating environments. The Dry Combat Submersibles (DCS) will provide the capability to insert and extract SOF and/or payloads into denied areas from strategic distances. The program is structured to minimize technical, cost, and schedule risks by leveraging commercial technologies, procedures, and classing methods to achieve an affordable DCS. SOF Combat Diving systems support the unique requirements impacting fully equipped operators while conducting underwater, real-world missions. Other examples of underwater systems and maritime equipment include, but may not be limited to, underwater navigation, diving equipment, and underwater propulsion systems. Systems and equipment are used in the conduct of infiltration/extraction, reconnaissance, beach obstacle clearance, and other missions. The capabilities of submersible systems and unique equipment provides small, highly trained forces the ability to successfully engage the enemy and conduct operations associated with SOF maritime missions.

<p>Justification:</p> <p>1. DDS: The DDS is a certified diving system that attaches to modified host submarines. Program provides certification, field changes, and modifications for the DDS.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures minor modification efforts and field changes to the current class of six DDSs that are in service with the U.S. Navy. Funding continues engineering design, fabrication, assembly, acceptance, and testing for field change kits. Includes changes for relocation of equipment inside the DDS hangar to accommodate SWCS, also includes field changes for items such as camera replacements, gauge replacements, mechanical quieting, lighting upgrades, and other general field changes to support deficiency resolution.</p> <p>2. SWCS: Shallow Water Combat Submersible (SWCS) is a free-flooding combat submersible mobility platform suitable for transporting and deploying SOF and their payloads for a variety of SOF missions. SWCS will be deployable from a Dry Deck Shelter (DDS), surface ships, and land.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Purchases three SWCS vehicles and support equipment, Government Furnished Equipment (GFE) (batteries and trailers), detachment deployment packages, engineering change proposals (ECO), and initial spares.</p> <p>3. DCS: The DCS provides SOF with a dry diver lock-in and lock-out capability that transports personnel and their combat equipment in hostile waters for a variety of missions.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Purchases one DCS vehicle, initial spares, GFE, ECO and Mid-Water Column Lock-in/Lock-out (MWC Li/Lo) capability.</p> <p>4. SOF Combat Diving: This program provides for procurement and transition of SOF peculiar diving technologies for the SOF combat diver while conducting underwater, real-world missions.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures ten diver environmental protection items.</p>

Description:

This line item funds ordnance items, munitions, small caliber, medium caliber, and large caliber ammunition, demolitions, pyrotechnics, explosive initiation devices, underwater munitions, grenades, foreign weapons and ammunition, air delivered munitions, precision guided munitions, shoulder fired munitions and rockets for Special Operations Forces (SOF). Ammunition provided will allow SOF components to accomplish the required annual training, support required combat missions, and build toward the required war reserve quantities.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										

Justification:

1. Air Delivered Munitions. Program provides AC-130 gunship munitions to include several tactical and training configurations of the 105mm, 30mm, and fuzes, including the associated safety certification, Insensitive Munitions (IM) qualification, production engineering and transportation.

FY 2019 PROGRAM JUSTIFICATION: Procures and qualifies air delivered ammunition to meet mission requirements required to maintain AC-130 Gunship crew mission-related readiness skills and provides combat mission support. Procures several tactical and training configurations of 105mm and 30mm ammunition and fuzes. Replenishes munitions expended in real-world events and training. Actual quantities vary depending on training requirements.

2. Small Caliber Bullets. Provides barrel launched munitions including the associated safety certification, IM qualification, production engineering and transportation. Provides several tactical and training configurations of U.S. and non-standard foreign munitions, weapons and related equipment, in calibers of 4.6mm, 5.45mm, 5.56mm, 6.5mm, .260, 7.62mm, .300, .338, 9mm, .357, .380, .40, .44, .45, .50, 12.7mm, 14.7mm, 12 gauge, 25mm, 40mm, 60mm, 64mm, 66mm, 81mm, 84mm, 105mm, 4.2", 107mm, 120mm, 155mm, rocket propelled grenades and other calibers as required.

FY 2019 PROGRAM JUSTIFICATION: Funding procures the following munitions: Handgun, Rifle, Sniper Rifle, and Machine Gun (all types of 5.56mm, 7.62mm, 40mm, .300 WM, .50 Caliber, .260, 6.5MM, .300NM, and .338NM); replenishes munitions expended in real-world events and training. Procures various types of Non-Standard foreign ammunition. Actual quantities vary depending on training requirements.

3. Demolition, Breaching and Pyrotechnics. Provides Demolition, Breaching and Pyrotechnics munitions including the associated safety certification, IM qualification, production engineering and transportation. Provides several tactical and training configurations of munitions and related equipment of explosively formed penetrators, conical shape charges, linear shaped charges, diversionary devices, demolition hand grenades, breaching devices, explosives, firing devices, underwater munitions, flares, signaling devices, along with tools, equipment, and attaching devices for constructing and emplacing a variety of demolition charges and other munitions as required. This program received Overseas Contingency Operations funding in FY 2017.

FY 2019 PROGRAM JUSTIFICATION: Procures grenades (offensive/smoke), training devices, a variety of demolition materiel consisting of explosives, firing devices, and accessories. Replenishes munitions expended in real-world events and training. Actual quantities vary depending on training requirements.

4. Shoulder Fired Munitions and Rockets. Provides shoulder-fired munitions, launchers, and rockets including the associated safety certification, IM qualification, production engineering and transportation. Provides tactical and training configurations of munitions and related equipment providing armored vehicle destruction, bunker and hardened facility destruction, soft target destruction, fire from enclosure, anti-personnel, smoke obscuration, visible and infrared illumination, as well as sub-caliber training devices with back blast simulation. These systems give SOF extended range fires to operate where no artillery, mortar, or armor support is available.

FY 2019 PROGRAM JUSTIFICATION: Replenishes shoulder-fired munitions and rockets expended in real-world events and training. Actual quantities vary depending on training requirements.

Description:

This P-1 line item is part of the Military Intelligence Program. This line item provides for the identification, development, and testing of Special Operations Forces (SOF) intelligence equipment to identify and eliminate deficiencies in providing timely intelligence to deployed forces. Sub-projects address the primary areas of intelligence dissemination, sensor systems, integrated threat warning to SOF mission platforms, and tactical exploitation of national system capabilities. The systems procured in this line item are Joint Threat Warning System (JTWS); Special Operations Tactical Video System/Reconnaissance, Surveillance, and Target Acquisition (TVS/RSTA); Tactical Local Area Network (TACLAN); Hostile Forces-Tagging, Tracking, and Locating (HF-TTL); Medium Altitude Intelligence Surveillance and Reconnaissance (ISR); Special Operations Command, Research, Analysis and Threat Evaluation System (SOCRATES); Sensitive Site Exploitation (SSE), Integrated Survey Program (ISP); and Special Operations Forces Planning, Rehearsal, and Execution Preparation (SOFPREP).

U.S. Special Operations Command (USSOCOM) has developed an overall strategy to ensure that Command, Control, Communications, Computers, and Intelligence (C4I) systems continue to provide SOF with the required capabilities into the 21st century. USSOCOM's C4I programs are comprised of an integrated network of systems providing positive command and control and the timely exchange of intelligence and threat warning to all organizational echelons. The C4I systems that support this architecture employ the latest standards and technology by transitioning from separate systems to full integration with the SOF Information Environment (SIE). The SIE allows SOF elements to operate with any force combination in multiple environments. The intelligence programs funded in this line item will meet annual emergent requirements and are grouped by the level of organizational element they support: Operational Element (Team) and Above Operational Element (Garrison).

The FY 2019 funding request was reduced by \$-1.354 million to account for the availability of prior year execution balances.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title / Category Title when only P-40a Categories are shown.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification: OPERATIONAL ELEMENT (TEAM)

1. JTWS. This program is an evolutionary acquisition program effort. The JTWS SoS enables the SOF Cryptologic Operator (SCO) to collect, process, locate and exploit threat communications signals of interest in order to provide timely, relevant, and responsive intelligence, cross-cueing, and threat avoidance information directly to the SOF Commanders. The JTWS SoS is assembled in four variants (level 1): Ground SIGINT Kit (GSK) variant, Maritime variant, Air variant (AVS) and Unmanned Air System (UAS) variant. Each kit is further subdivided into a functional layer: (level 2): Communications Intelligence, Electronic Intelligence, and Precision Geo-location (PGL) kits and an implementation layer (level 3) designed around the SCO mission environment and SOF platform specific requirements. The contracting strategy uses a mixture of full and open competition for prime integrators and indefinite delivery/indefinite quantity contracts for Commercial off-the-shelf (COTS) procurement with new development only as necessary.

FY 2019 PROGRAM JUSTIFICATION: Funds the capital equipment replacement program (CERP) of 25 GSK kit variants, CERP of 17 AVS variants, 1 PGL ground system kit, CERP of 7 PGL ground systems kits, 1 PGL Air kit, CERP of 1 Team Transportable Enhanced Technical Insertion, 2 Unmanned Aerial Collection Systems, 4 Maritime variants, initial training and spares.

2. TVS/RSTA. This program provides SOF with critical Special Reconnaissance equipment that directly supports the planning and execution of SOF missions. This capability allows the SOF warfighter to meet SOF SR mission requirements to find, fix, finish, exploit, analyze, and disseminate information of adversary's movement, construct, identification, location; and associated things and activities. TVS/RSTA provides Global Combatant Commanders (GCCs) and SOF operators with an immediate capability to visually and electronically acquire people, things, and activities and provides actionable intelligence for SOF planners and Commanders. The TVS/RSTA program consists of a Family of Systems (FoS) that employs an evolutionary acquisition strategy for Evolutionary Technology Insertions (ETI) (supplemented

Exhibit P-40, Budget Line Item Justification: PB 2019 United States Special Operations Command			Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 02: Special Operations Command / BSA 4: Other Procurement Programs		P-1 Line Item Number / Title: 020400INTL / INTELLIGENCE SYSTEMS	
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 1160405BB		Other Related Program Elements: 1160405BB
Line Item MDAP/MAIS Code: N/A			
<p>with commodity procurement) enhance the performance of specific kits. These ETI modifications vary in both cost and quantity. The FoS consists of interoperable equipment to capture and transfer near-real-time ground-based, tactical day/night/reduced visibility, imagery, video, and electronic proximity and movement sensing, all capable of dissemination through SOF organic, global C4I, and commercial communications infrastructures. Kits are type designated as RSTA or TVS Mission Kits. RSTA kits are operationally configured as Sensor Kits; Tactical Reconnaissance (RECCE) Kit; Remote Observation Post (ROP); Unattended Ground Sensors/Unattended Maritime Sensors (UGS/UMS); and Austere Location Force Protection Kits (ALFPK).</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 20 Sensor Kits, 45 RECCE Kits, 5 ROP Kits, 23 TVS Kits, and 2 Maritime TVS/RSTA Kits.</p> <p>FY 2019 Overseas Contingency Operations (OCO) PROGRAM JUSTIFICATION: Procures 22 Austere Location Force Protection Kits (ALFPK).</p> <p>3. TACLAN. Provides SOF operational commanders and forward deployed forces advanced automated data processing and display capabilities, facilitating the interchange of classified and unclassified information to support situational awareness, mission planning, rehearsal, and execution, and C2 of forces in tactical environments. The program consists of information technology hardware, software and ancillary equipment, including network servers, routers, switches, storage and computing end user devices, as well as common and specialized user applications. The family of systems are mobile, modular and size configurable to suit peculiar mission needs that support SOF users from the individual to the Special Operations Task Force (SOTF) echelon.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures CERP of 14 TACLAN suites and ancillary equipment.</p> <p>4. HF-TTL. This program provides SOF with critical tools to enhance situational awareness for the planning and execution of SOF missions. This capability allows the SOF warfighter to find, fix, and finish terrorist networks through the emplacement of sophisticated tags and devices that feed into an integrated architecture. HF-TTL provides GCCs and SOF operators with an immediate capability to tag, track, and locate people, things and activities. The HF-TTL program provides actionable intelligence for SOF planners. The Mission Sets are comprised of a mix of different classes of tags and their associated detection, interrogation, viewing, tracking, and communications systems that are fielded annually to each SOF Component and Theater Special Operations Command (TSOC) based upon dynamic and emergent SOF operational requirements.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 16 mission sets.</p> <p>5. Medium Altitude ISR (MAISR). This program procures MAISR Aircraft to meet critical ISR needs. Specific details can be provided under separate cover. This program received OCO funding in FY 2017.</p> <p>ABOVE OPERATIONAL ELEMENT (GARRISON)</p> <p>6. SOCRATES. This program is the SOF extension of the Joint Worldwide Intelligence Communications System network and is used to develop, acquire and support garrison automated intelligence system requirements for SOF organizations worldwide. It provides the capabilities to exercise command and control, planning, collection, collaboration, data processing, video mapping, a wide-range of automated intelligence analysis, direction, intelligence dissemination, imagery tools and applications, to include secondary imagery dissemination, as well as news and message traffic. The system ensures intelligence support to mission planning and the intelligence preparation of the battle space by connecting numerous data repositories while maintaining information assurance. The system supports Headquarters USSOCOM, its component commands, TSOCs and forward based SOF units. SOCRATES is composed of state-of-the-art networking devices (firewalls, routers, switches, hubs, and modems), servers, storage devices, workstations, associated peripherals and government-off-the-shelf /commercial-off-the-shelf software.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures evolutionary technology insertion, Mission Support Center relocation, and Global Messaging/Counter Messaging Software/Hardware.</p> <p>7. SSE. This program provides the capability to exploit personnel, documents, electronic data, material, and forensic evidence on sensitive sites/objectives. Biometrics kits allows collection and transmission of unique, measurable biometric signatures from personnel, including live/latent fingerprints, iris patterns, and facial features. It also provides a means to verify against and enroll subjects into the DOD authoritative database, and to query that database to support hold or release decisions. Forensic kits enable on-objective linking of events to specific persons through chemical analysis, latent fingerprints, cell phones and computer data analysis, and DNA collection. Exploitation Analysis Centers (EACs) provide theater-level forensic laboratory capabilities for more in-depth exploitation of captured evidence.</p>

<p>FY 2019 PROGRAM JUSTIFICATION: Procures 2 Forensic Exploitation Analysis Center equipment, CERP of 62 forensic exploitation kits, and 790 Biometric Devices.</p> <p>8. ISP. This program collects and produces current, detailed, tactical planning data to support military operations to counter threats against U.S. citizens, interests, and property located both domestic and overseas. ISP products are specifically tailored packages that provide operational information as well as intelligence data for use by DOD and the U.S. Department of State to support operational planners for counter-terrorism operations, evacuations, and other rescue missions.</p> <p>9. SOFPREP. This program serves as the intelligence focal point for production of SOF enhanced Geospatial Intelligence (GEOINT) (maps, imagery, and terrain data) and 3D scene visualization databases. SOFPREP gathers, processes, exploits, disseminates and manages classified high resolution 3D databases and GEOINT data in support of SOF training, mission rehearsal and execution systems. The program builds the SOF common geospatial environment and manages the authoritative database of SOF-specific GEOINT terrain data. SOFPREP is a NGA-certified co-producer in support of time-sensitive SOF-specific requirements.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Acquire emerging COTS datasets to incorporate with NTM into geospecific 3D scene visualizations.</p>

Description:

This program element is part of the Military Intelligence Program (MIP). The Distributed Common Ground/Surface System Special Operations Forces (DCGS-SOF) is part of a family of systems providing Intelligence, Surveillance, and Reconnaissance Processing, Exploitation, Dissemination (PED), and analytical capabilities at the Joint Task Force level and below through a combination of reach back, forward support, and collaboration. The mission tailored infrastructure interconnects the warfighter and sensors to find and fix High Value Targets and provides a network-enabled, interoperable construct allowing continual, unimpeded sharing of intelligence data, information and services with SOF and between the Services, other national intelligence agencies, combatant commands and multi-national partners. It connects the SOF warfighter with the essential intelligence information and provides situation awareness information to the SOF leadership at all echelons. The four components of DCGS-SOF include the following: The Enterprise provides infrastructure and processing capability to allow for worldwide SOF intelligence information sharing. Full Motion Video (FMV) PED provides PED capabilities in garrison and deployed environments of manned and unmanned sensors. SILENT DAGGER provides Signals Intelligence exploitation capability in both garrison and deployed environments. The All Source Information Fusion will provide the intelligence analytical tools via a global and disconnected architecture. This program received Overseas Contingency funding in FY 2017.

Description:

This P-1 line item provides for the procurement and associated costs of specialized equipment in the areas of Aircraft Support, Military Construction (MILCON) Collateral Equipment, Command, Control, Communications, and Computer Information and Automated Systems (C4IAS), Tactical Local Area Network (TACLAN), Special Access Program Network (SAPNET), Joint Operational Stocks (JOS), Civil Information Management Data Processing System (CIMDPS), Multi-Mission Payload System (MMP) formerly known as Long Range Broadcast Systems (LRBS), and Miscellaneous Equipment. Additionally, this P-1 line item consists of miscellaneous equipment items that do not reasonably fit in any other USSOCOM procurement line item categories and are above the \$250K threshold.

The FY 2019 funding request was reduced by \$-1.474 million to account for the availability of prior year execution balances.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										

Justification:

1. Aircraft Support. This program provides various types of equipment and minor modifications required to support Special Operations Forces (SOF) fixed wing aircraft. Special Operations Wing (SOW) Support Equipment: Procures SOF-unique aircraft support equipment to satisfy SOF warfighting requirements identified by Air Force Special Operations Command flying squadrons. Supports small equipment upgrades as required. The temporary shelters and ancillary equipment provides a temporary maintenance workspace for the Army fixed wing aircraft supporting limited free fall operations at Yuma Proving Grounds, Arizona. C-27J Minor Modifications: Includes minor modifications to C-27J aircraft with SOF-unique equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, incorporate mission enhancements, and critical safety changes. Current projects include but are not limited to: procuring landing gear, overhaul of landing gear, cockpit resets and upgrades. No associated RDT&E funds.

FY 2019 PROGRAM JUSTIFICATION: Procures SOF-unique aircraft support equipment by funding small equipment parts and upgrades. Per DOD policy, and in accordance with Air Force policy, these funds reimburse the Air Force Stock Fund for SOF initial spares provisioned with Air Force Stock Fund obligation authority. Procures the replacement of aging landing gear on existing C-27J aircraft in order to refurbish existing landing gear.

2. MILCON Collateral Equipment. This program procures collateral equipment for SOF military construction facilities. No associated RDT&E funds. This program received Overseas Contingency Operations (OCO) funding in FY 2017.

FY 2019 PROGRAM JUSTIFICATION: Provides information technology equipment, video monitoring, targeting systems and other equipment above the Operation and Maintenance threshold of \$250 thousand, as well as items that are centrally managed.

3. C4IAS. Provides garrison infrastructure directly supporting the Command's global mission by providing a seamless and interoperable interface with SOF, DOD, and Service information systems. It provides the capabilities to exercise command and control (C2) and collaboration, process and share data, and facilitate mission planning and operational preparation of the battle space, connecting numerous data repositories while maintaining information assurance. Additionally, it provides the critical reach back for SOF tactically deployed local area networks/wide area networks. This program is composed of state-of-the-art automated systems (firewalls, routers, switches, hubs, modems) servers, storage devices, workstations and associated peripherals supporting a myriad of SOF user requirements, and uses a variety of off-the-shelf software and databases to ensure interoperability between SOF units.

FY 2019 PROGRAM JUSTIFICATION: Continues to acquire next generation automation systems and emerging technologies to provide new capabilities and dramatic improvements to the SOF information environment. Continues implementation of dual distributed datacenters that support the consolidation of Headquarters, USSOCOM and Component Command's Information Technology (IT) infrastructure, and Evolutionary Technology Insertion (ETI). Procures network infrastructure, audiovisual, workstations, computers, programmed expansion, integration and software.

FY2019 Overseas Contingency Operations (OCO) PROGRAM JUSTIFICATION: Extends SOFNET Services to TSOCs deployed, which is critical for coordination of all conventional forces, coalition partners and SOF.

4. TACLAN Automation Systems. Provides SOF operational commanders and forward deployed forces advanced automated data processing and display capabilities, facilitating the interchange of classified and unclassified information to support situational awareness, mission planning, rehearsal, and execution, and C2 of forces in tactical environments. The program consists of information technology hardware,

<p>software and ancillary equipment, including network servers, routers, switches, storage and computing end user devices, as well as common and specialized user applications. The family of systems are mobile, modular and size configurable to suit peculiar mission needs that support SOF users from the individual to the Special Operation Task Force echelon.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures Capital Equipment Replacement Program (CERP) for 21 TACLAN suites, 500 Field Computing Devices (FCDs), integration, and ancillary equipment.</p> <p>5. SAPNET. Supports multi-SAP collaboration and information exchange for mission operations. It is interoperable on SAP systems and databases, enabling secure voice, video and data communication between National/Theater SOF and select mission partners. SAPNET integrates advanced technologies and gains efficiencies through collapsing infrastructure while still supporting user growth and mission readiness.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures evolutionary technical insertions (ETIs).</p> <p>6. Joint Operational Stock (JOS). Composed of USSOCOM centrally procured and managed stocks of materiel designed to provide SOF access to immediately available equipment in support of contingency, Humanitarian Assistance/Disaster Response and training missions. The equipment contained within JOS generally falls into one of the following categories: night vision devices and optics, weapons, communications, personnel protection, and bare-base support. Bare-base support includes equipment required to provide key life support and work areas to SOF units deployed in austere locations. The JOS inventory is maintained, stored and issued through the SOF Support Activity located in Lexington, KY. The Military Liaison Element (MLE) equipment program provides for CERP and sustainment of operational and home station training sets used in direct support of the MLE mission. No associated RDT&E funds.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures newly approved equipment as well as CERP of existing capabilities within the JOS and MLE programs.</p> <p>7. CIMDPS. An automation system that assists active Civil Affairs and others engaged in civil-military operations to collect, process, analyze, maintain, mine, and deliver CI and analysis products in support of military operations.</p> <p>8. Multi-Mission Payload. Modular MISO broadcast asset capable of providing AM, FM, TV UHF/VHF, and cellular MISO broadcasts to foreign target audiences in permissive, semi-permissive, and denied environments with broadcast system integrated into long-loiter Unmanned Aerial Vehicle (UAV) and manned aircraft.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures seven MMP production systems.</p>

Description:

The Combatant Craft Systems line item serves as the umbrella for medium and heavy combatant craft programs, sub-systems, and ancillary equipment to include prime movers and trailers. Currently, it includes Combatant Craft Medium (CCM), Combatant Craft Heavy (CCH), Riverine Craft, Combatant Craft Forward Looking Infrared (CCFLIR) program, Security Forces Assistance Craft (SFAC), and Combatant Craft Assault (CCA).

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										
Justification:										
1. CCM: The CCM is a semi-enclosed, multi-mission combatant craft for platoon-size maritime mobility in maritime denied environments. It is multi-mission capable, including Maritime Interdiction, insert / extract, and Visit, Board, Search, and Seizure (VBSS) Operations. CCM is Naval Special Warfare's (NSW) craft-of-choice for long-range, high-payload SOF mobility operations in denied environments up to high-threat. CCM has NSW's best Iron Triangle: 40 knot (kt) speed; 4 crew + 19 passengers (pax) / 10,000 pound (lb) payload; and 600 nautical miles (nm) range. CCM Mk 1 payload capacity enables inclusion of shock mitigating seats, which is critical for ride quality, operator tactical readiness, and operator health. At 60 feet long, CCM is C-17 / C-5 transportable and can launch/recover by well deck or shore based trailer.										
2. CCH: The CCH program represents a family of solutions that provides platoon-size maritime surface mobility. The current CCH is the Sea, Air, Land Insertion, Observation, and Neutralization (SEALION) craft. SEALION is a fully-enclosed, climate-controlled, semi-submersible craft that operates in denied environments up to high-threat. SEALION is NSW's most versatile and survivable combatant craft and the craft-of-choice for sensitive maritime intelligence, surveillance, and reconnaissance missions and those missions requiring a prolonged presence in denied environments. Its clandestine mobility capability is only exceeded by an undersea craft. Iron Triangle: 40 kt speed; 7 crew + 12 pax / 3,300 lb payload; and 400 nm range. SEALION payload capacity enables inclusion of shock mitigating seats, which is critical for ride quality, operator tactical readiness, and operator health. At 77+ feet long, SEALION is C-17/C-5 transportable and can launch/recover by well deck or shore based mobile travel lift or crane.										
3. Riverine Craft: The Riverine Craft provides the capability to insert and extract SOF in the riverine environment. The craft is capable of navigating restricted and shallow rivers, estuaries, and bays. It is also capable of carrying light organic arms and is C-130 transportable.										
FY 2019 PROGRAM JUSTIFICATION: Procures one prime mover and ECPs.										
4. CCFLIR: The CCFLIR program consists of a legacy CCFLIR and the CCFLIR2. The CCFLIR capability provides Special Operations Forces (SOF) with a multi-sensor, electro-optic system that enhances SOF effectiveness by improving their ability to detect, recognize, identify, range, track, and highlight objects of interest in a maritime environment. The legacy CCFLIR is under sustainment and is currently used on all NSW combatant craft. The CCFLIR2 will use technological advancements to gain significant improvements in capability such as operational range, image fusion, net-centric data sharing, information assurance, and seamless craft and combat systems integration.										
FY 2019 PROGRAM JUSTIFICATION: Procures nine CCFLIR2.

Line Item MDAP/MAIS Code: N/A		
<p>5. CCA: The CCA program is a National-to-Theater transition. The CCA is a combatant craft for squad-size maritime mobility operations in maritime denied environments. CCA is NSW's best craft for VBSS in maritime denied environments up to and including medium threat. It is the craft-of-choice for maritime interdiction and boarding operations because of the open deck space, maneuverability, and interoperability with an Afloat Forward Staging Base. Iron Triangle: 40 kt speed; 3 crew + 12 pax / 5,000 lb payload; and 300 nm range. At 41 feet long, CCA is air transportable by C-130 / C-17 / C-5 and can launch/recover by crane, davit, well deck, or shore based trailer.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures GFE, ECPs, prime movers, and ancillary equipment.</p>

Description:

Special Operations Forces (SOF) ground tactical vehicles are used for Counterterrorism, Counter-Proliferation, Foreign Internal Defense, Special Reconnaissance, Direct Action, and Unconventional Warfare missions, and serve as a weapons platform throughout all areas of the battlefield and/or mission area. The current SOF tactical vehicles include: Ground Mobility Vehicles (GMV) (Medium), Non-Standard Commercial Vehicles (NSCV) for use in tactical missions and Mine Resistant Ambush Protected Vehicles (MRAP) (Heavy). These tactical vehicles are highly effective in executing SOF contingency missions worldwide.

<small>Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.</small>										
<p>Justification:</p> <p>1. GMV (Medium). The GMV 1.1 is an extremely mobile vehicle capable of internal air transport in a MH-47 that allows SOF operators a fast roll-on/roll-off capability ideal for a full spectrum of operations. The GMV 1.1 is equipped with an A Kit to accept a Command, Control, Communication, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) suite to provide an integrated and standardized communications platform. This program received Overseas Contingency Operations (OCO) funding in FY 2017.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 87 GMV 1.1 platforms with SOF Kits, 73 C4ISR/ Electronic Countermeasures Systems (ECMS) A-Kits, production support, and initial spares.</p> <p>FY 2019 OCO PROGRAM JUSTIFICATION: Procures 60 GMV 1.1 platforms with SOF Kits, 60 C4ISR/ECMS A-Kits, 60 armor kits and 6 initial spares.</p> <p>2. NSCV. Program provides a base vehicle that is representative of the local area where SOF is operating, and then installs SOF-peculiar modifications to provide increased protection, mobility, and communications. Depending on the mission, SOF modifications may include armor protection, winch, high capacity alternator, upgraded brakes and suspension system, and mounts/antennas for communications equipment. These low signature vehicles allow SOF to blend in with the local population in various locations around the world.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 123 (117 armored/6 unarmored) NSCVs, 123 C4ISR/ECMS A-Kits, and production and fielding support.</p> <p>FY 2019 OCO PROGRAM JUSTIFICATION: Procures 63 armored NSCVs and 63 C4ISR/ECMS A-Kits.</p>

Description:

This P-1 Line Item provides for the procurement and associated costs of specialized equipment in the areas of communications, weapons, soldier protection and survival systems, visual augmentation systems, lasers and sensors, radios, radio controlled-counter improvised explosive device (RC-CIED) jamming systems, and trainers, simulators and mission planning and rehearsal systems to meet Special Operations Forces (SOF)-unique requirements. The efforts within this P-1 Line Item improve SOF warfighting capabilities, by continuing the procurement of smaller, lighter, more efficient and more robust capabilities. Communications efforts will maintain a Command, Control, and Communications (C3) link between SOF Commanders and SOF Teams, and provide interoperability with all Services, various agencies of the U.S. Government, Air Traffic Control, commercial agencies and allied foreign forces. Small Arms and Weapons procures SOF weapons and associated equipment that have increased capabilities over the service-common small arms. Specialized protection and survival equipment improves survivability and load bearing equipment impacting the mobility of SOF while conducting varied missions. RC-CIED jamming force protection system will further enhance the bandwidth performance to defeat emerging radio frequency detonation threats during mobile and dismount operations. Visual Augmentation, lasers and sensor systems provides SOF day and night optic systems that have increased capabilities over the service-common visual augmentation systems. Tactical radios rapidly and seamlessly establish and maintain mobile and fixed Command and Control (C2) communications between operational elements and higher echelon headquarters, allowing SOF to operate with any force combination in multiple environments.

The FY 2019 funding request was reduced by \$-16.251 million to account for the availability of prior year execution balances.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										

Justification:

1. Special Communications (SPCOM) Enterprise. Program includes organization, practices, processes, services, networks, systems and subsystems that manage and provide clandestine exchange of information between elements (field-to-field, field-to-base and base-to-field).

FY 2019 PROGRAM JUSTIFICATION: Procures 17 field mission sets.

2. Satellite Deployable Node (SDN). Family of deployable, super high frequency, multi-band, Satellite Communications (SATCOM) systems providing the transport path for high-capacity, voice, data, Video Teleconferencing (VTC), and video at all levels of classification. It consists of SDN subprograms, transport for intelligence variants, technology insertions and capital equipment replacement, to include Full Motion Video (FMV) and Communications-On-the-Move (COTM). SDN-Heavy (SDN-H) is a deployable multi-channel/multi-band SATCOM terminal and associated switching equipment that provides wide-area connectivity through SOCOM Mobile SOF Strategic Entry Points (MSSEPs) and commercial teleports for SOF task forces. SDN-Medium (SDN-M) is a lightweight, multi-channel SATCOM system that provides Command, Control, Communications, and Computers for SOF mid-level tactical headquarters and operational elements. SDN-Light (SDN-L) is a rugged, portable SATCOM package that supports small SOF liaison teams and small operational elements. Wide-band COTM consists of SDN afloat, ground mobile and airborne packages for SOF elements. MSSEP is a deployable SOF strategic entry point that augments the SOF Information Environment global architecture in support of regional requirements. The airborne Intelligence Surveillance Reconnaissance transport is communications architecture equipment that supports the delivery of near real-time sensor data to the strategic, operational and tactical edge users. This program received Overseas Contingency Operations (OCO) funding in FY 2017.

FY 2019 PROGRAM JUSTIFICATION: Procures Capital Equipment Replacement Plan (CERP) of 15 SDN-H, 50 SDN-H Antennas, 73 SDN-M, 705 SDN-L, three Predator Receive Terminals, three SDN-Extension Packages, COTM ETIs and CERP, 50 Light Vx Variants, five KuSS Ingest Hub Sustainment, and FMV Evolutionary Technology Insertions (ETIs).

FY2019 Overseas Contingency Operations (OCO) PROGRAM JUSTIFICATION: Replaces five SDN-M and four SDN-L for battle losses.

3. SCAMPI (not an acronym). Wide Area Network (WAN) foundation system that supports Unified Communications/transport, encrypts, and accelerates all data, voice, and video information between Headquarters USSOCOM, SOF deployed forces, all subordinate commands, Special Mission Units (SMUs), and selected government agencies and activities directly supporting the special operations community. SCAMPI provides transports of SOF data, voice, and video, for all classification levels, to all USSOCOM locations in the SOF Information Environment (SIE). SCAMPI also utilizes commercial Satellite Infrastructure globally to extend the SIE to Satellite Deployable Nodes.

FY 2019 PROGRAM JUSTIFICATION: CERP one Special Purpose Processing Node (SPPNs), 11 Installation Gateways, and one Strategic Installation Gateway; procures nine Installation Gateways; and software/hardware for Global Messaging/Counter Messaging (GMCM)

4. Weapons. Provides the SOF operator with common caliber weapons that enable SOF to accurately engage enemy personnel and material in all SOF environments at ranges up to 1500 meters. The Weapons program is delineated into four sub-programs: Weapons-Rifles, Weapons-Sniper Rifles, Weapons-Machine Guns, and Weapons-Handguns. Weapons include common caliber pistols to engage at close range, modular assault rifles to engage out to 600 meters, Sniper Support Rifles to engage out to 800 meters, sniper rifles to engage out to 1500 meters, shoulder fired grenade launchers, vehicle and man-portable high velocity grenade launchers, machine guns to engage out to 1000 meters, multi-barreled mini-guns which can be mounted on boats, vehicles, aircraft, and ground mounted to engage out to 3,500

meters, and Weapon Accessories to be used on both service-common and SOF weapons, enabling the operator to tailor the configuration of the weapon to the assigned mission and operational environment, enhancing the overall effectiveness of the weapons, which enables mission accomplishment and operator survivability. This program received OCO funding in FY 2017.		
FY 2019 PROGRAM JUSTIFICATION: Procures 980 Rifle Upper Receiver Groups (URG), 91 MK 13 Sniper Rifles, 69 MK 15 Sniper Rifles, 41 MK 44 Machine Guns, 800 Glock 19 Handguns and weapons range equipment.		
5. Tactical Combat Casualty Care (TCCC). Provides medical devices and equipment for treatment of casualties in support of forward deployed SOF. This program consists of the Operator Kit, Medic Kit, and Casualty Evacuation (CASEVAC) Set. The TCCC Program procures a variety of Food and Drug Administration-approved medical items include intraosseous (injection into the bone marrow) infusion devices; patient monitoring and assessment devices; emergency airway kits; and devices that support patient management, extraction, transportation, and casualty care. The TCCC program fields tactical medical and CASEVAC capabilities with the intention to transition capabilities developed under the National Military Forces Tactical Medical Program. Finally, this program provides significant ability to lessen battlefield losses by providing timely, critical lifesaving, and evacuation capabilities to forward-deployed SOF Operators.		
FY 2019 PROGRAM JUSTIFICATION: Procures 37 CASEVAC sets and production support.		
FY 2019 OCO PROGRAM JUSTIFICATION: Procures 66 CASEVAC sets.		
6. Personal Signature Management (PSM). The PSM program provides signature reducing materials and technology that reduce the probability of detection by battlefield threat sensors.		
FY 2019 PROGRAM JUSTIFICATION: Procures 120 PSM systems.		
7. Counter Radio Controlled-Improvised Explosive Device (RC-IED). Centralized program that provides a capability for US Special Operations Command to acquire RC-IED jamming systems. Various system designs provide soldier protection while operating in various environments, while vehicle mounted or dismounted. All of these systems are designed for easy update to protect against an evolving threat matrix. Procurement of the next generation low visibility RC-IED jamming force protection system will further enhance the bandwidth performance to defeat emerging radio frequency (RF) detonation threats during mobile and dismount operations. This program provides scalable RC-IED systems whose configuration and modularity address a mission critical capability gap to counter the proliferation of RF-initiated IEDs globally. This program received OCO funding in FY 2017.		
FY 2019 PROGRAM JUSTIFICATION: Procures 116 force protection Counter RC-IED devices, ancillary equipment, and initial spares.		
8. Visual Augmentation Systems (VAS) - Optics. Provides the SOF operator with a lightweight, man-portable thermal imagers that detect, acquire, and to observe targets during day/night operations; equip the sniper with a lightweight, low signature, fire control and observation device that allows detection, acquire, and engage targets out to the weapon's maximum effective range under day/night conditions; the devices allow the sniper to utilize the weapon during day to night operations without re-zeroing. VAS optics enhances target acquisition and accuracy of all SOF weapons, resulting in increased mission accomplishment and operator survivability. This budget item incorporated the Improved Night/Day Observation/Fire Control Devices (INOD); Hand Held Imagers (HHI); VAS - Binocular/Monocular (VAS B/M); and VAS Weapons Accessories - Enhanced Combat Optical Sights (ECOS), Clip-on Night Vision Devices (CNVD), and weapon optics programs. This program received a Congressional Add in FY 2017.		
FY 2019 PROGRAM JUSTIFICATION: Procures 1,185 Binocular Night Vision Devices, 534 Clip on Thermal Imagers, 13 INOD Block IIIs, 10 HHI-Mini, 105 Clip on Short Wave Infrared Imagers, and 2,655 ECOS devices.		
FY 2019 OCO PROGRAM JUSTIFICATION: Procures 50 INOD Block IIIs.		
9. VAS - Lasers. Provides markers, lasers (handheld, body or helmet worn), infrared sights, and small target location devices. Provides laser target designators with range finding capability. The marker and location devices allow operators to conduct close air support and air interdiction missions through the terminal guidance of laser-guided munitions and provide precise location of targets. The marking devices reduce collateral damage and increase precise target engagements with fighter aircraft and attack helicopters. Thermal devices provide a night vision capability and verify that the energy from the device is on the

<p>target. This system is specifically gated and turned to view the invisible laser spot of the marker for use in designating laser guided bombs to targets. The Small Target Location Device (STLD) provides precise location of devices via lasers and celestial/terrestrial or alternative positional subsystems. Thermal beacon enables assets equipped with thermal sensors to identify the location of forces in order to prevent friendly fire or fratricide events. This budget item incorporated the VAS Weapons Accessories - Advanced Target Pointer Illuminator Aiming Laser (ATPIAL), Visible Bright Lights (VBL), and Laser Aiming Markers (LAM) programs.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 33 LAM, 16,080 ATPIALS, and 21 STLDs.</p> <p>10. SOF Tactical Communications (STC). Provides the next generation SOF communication system and replaces most of the currently fielded SOF suite of radios. The capability will consist of four basic form factors: 1) Man-pack device will be a multi-band device capable of being carried by an individual or being mounted on various SOF platforms; 2) Fixed configuration will be a multi-band and/or High-Frequency (HF) device designed for implementation into air/ground/sea platforms or base stations; 3) HF device in a man-pack configuration will be capable of being mounted on various SOF platforms; 4) Handheld device will include both an urban and maritime variant. This system will introduce additional capabilities to SOF to improve current situational awareness capabilities and performance on SOF platforms. Capabilities will include: real time, hostile and friendly force information; Line of Sight (LOS) and Beyond LOS communications; and access to situational awareness in the form of intelligence inputs, broadcasts, and networks. This system will be a key component of an integrated network providing information connectivity among SOF, the Services, other government agencies, and potentially indigenous and surrogate forces. This program received OCO funding in FY2018.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 470 Handheld Link-16 radios, CERP of 1,968 handheld radios, 12 handheld for Combatant Craft Assault, 1,313 man-pack radios and 355 high-frequency radios.</p> <p>11. Radio Integration System (RIS). RIS provides the command, control, and communications (C3) linkage between deployed SOF bases and LNO teams to SOF, SOF headquarters, and SOF support elements. RIS is an evolutionary acquisition program to procure the most current tactical C3 communications system for deployed and forward-based SOF and is fully modular and scalable and consists of subsystems that allow users to tailor system capabilities, size, and features dependent on a particular mission. RIS interfaces, enhances, and combines multiple single channel radios into one integrated C3 suite to exchange secure/non-secure voice, secure data, and remote communications with other communications platforms in support of the SOF mission. Currently fielded systems consist of a full-scaled deployable transit case variant, a deployable downsized transit case variant, and a fixed base station variant. New RIS variants include; the Multi-Band Radio Transit Case, High Frequency Transit Case, and Mobile Base Station, and provide operators with increased capability, greater scalability, and a reduction in the size, weight, and power of previously fielded versions. These variants integrate existing and future radios to enable the SOF operational commander to exercise reliable, effective, and efficient C3 functions regardless of area of operation.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 24 Multi-Band Radio Transit Cases and eight High Frequency Transit Cases.</p> <p>FY 2019 OCO PROGRAM JUSTIFICATION: Procures six Multi-Band Radio Transit Cases and four High Frequency Transit Cases to replace battle loss equipment.</p> <p>12. Blue Force Tracking (BFT). Family of devices used to remotely track and monitor Blue forces. The capability enhances C2, threat warning, force protection, situational awareness, combat search and rescue, counter-fratricide, and battlefield visualization. This capability is unique to SOF because it requires the devices to be lightweight, portable, secure and a Low Probability of Intercept/Low Probability of Detection. SOF systems include the miniature transmitter and the handheld device that provides automated transmission of position location information and brevity codes supporting both ground and air assets. This information is collected by national assets, relayed to select command units, and displayed on the receiving unit's common operational picture.</p> <p>FY 2019 PROGRAM JUSTIFICATION: Procures 1,209 BFT devices.</p>

Description:

The Combat Mission Requirements line item procures emergent critical equipment shortfalls that must be rapidly fielded to Special Operations Forces operators in the field to conduct combat missions. These equipment shortfalls are identified by Geographical Combatant Commanders (GCCs) and validated and approved by United States Special Operations Command (USSOCOM) as a Combat Mission Needs Statement (CMNS). Each requirement is vetted through a rigorous USSOCOM process and must meet the following criteria: provide force protection to troops or ensure mission success. Equipment purchased under the CMNS umbrella include, but are not limited to, radios, intelligence equipment, unmanned aerial vehicles, blast and ballistic protected tactical vehicles, ammunition, weapons, aircraft defensive systems, night vision devices, and aircraft precision strike systems. USSOCOM submits an annual report to Congress that describes the CMNS approved during that fiscal year. This program received FY 2017 Overseas Contingency Operations funding,

Justification:

FY 2019 PROGRAM JUSTIFICATION: Funding procures various equipment to rectify emergent critical equipment shortfalls identified by GCCs, and submitted and approved through the CMNS process or directed by Commander, USSOCOM.

FY 2019 OVERSEAS CONTINGENCY OPERATIONS JUSTIFICATION: SOF will have an increased presence in the Central Command and Africa Command's Areas of Responsibility. This will drive an increased need for battlefield equipment to cover unforeseen capability gaps that directly effect mission success and force protection. Funding will procure various equipment to rectify emergent critical equipment shortfalls identified by GCCs, and submitted and approved through the CMNS process or directed by Commander, USSOCOM.

<p>Description:</p> <p>The program decrease results from a one-time add in FY 2018 of \$10.0 million for near term requirements to protect critical facilities, assets, and mission from Unmanned Aircraft Systems (UAS) threats. Funding supported capability development of a Counter-Unmanned Aircraft Systems (C-UAS); documentation; operating concepts development; system and operation integration; employment tactics, and training at a Pentagon site.</p> <p>This FY 2019 budget request funds procurement of physical security vehicles assigned to missions in high threat OCONUS locations. Request reflects the life-cycle replacement cost for one Commercial Heavy Armored Vehicle (CHAV) that supports the Secretary of Defense, Deputy Secretary of Defense, and OSD Senior officials providing a secure and reliable ground transportation capability. CHAVs are armored to various levels of protection and are on platforms of varying sizes and gross vehicle weights, dependent upon the level of threat and the operating environment. In addition to the CHAVs request, the line item includes life-cycle replacement cost of information technology (IT) equipment which directly supports the mission of the Washington Headquarters Services White House Military Office (WHMO) that provides essential services to the President that helps to maintain continuity of operations (COOP).</p> <p>Justification:</p> <p>The FY 2019 budget request reflects the life-cycle replacement cost for one Commercial Heavy Armored Vehicle (CHAV) that supports the Secretary of Defense, Deputy Secretary of Defense, and OSD Senior officials. The CHAVs provide a secure, protective and reliable ground transportation capability for the Secretary and Deputy Secretary of Defense. Budget request also includes the modernization and life-cycle refresh cost of major information technology (IT) systems which are required to support the business and operational requirements of the Washington Headquarters Services White House Military Office (WHMO).</p>

Description: * Indian Financing is listed as P-1 line number 46-1 because it is not showing on the P-1 and falls under WHS. The FY 2017 approved conference report did not include language in support of funding of \$15.000 million for Indian Finance. Prior approval reprogramming FY17-20 PA for Indian Financing Act did not transfer in the accounting system prior to lock for the end of the FY 2017 actuals, however funds have been received and are executing in FY 2018. The DOD Indian Incentive Program (IIP) is authorized by Section 504 of the Indian Financing Act of 1974 (U.S.C 1544). In 1989, Congress began providing annual funds through the DOD Appropriation Act for the DOD Indian Incentive Program. The program motivates prime contractors to utilize Indian organizations and Indian-owned economic enterprises by providing a 5% rebate on subcontracted work performed by those companies that fall into the following categories: Federally Recognized American Indian Organizations, Indian-Owned economics enterprises and small businesses owned by members of recognized tribes, Alaskan Natives or Native Hawaiians. Through the generation of subcontracts to the above mentioned entities, the IIP fulfills its purpose as an economic multiplier for Native American communities.												
Justification: The FY 2017 approved conference report did not include language in support of funding of \$15.000 million for Indian Finance. Approval for reprogram of the Indian Financing Act was delayed therefore the impact for duty was delayed, however funds have been received and are executing in FY 2018. The Office of Small Business Programs did not process rebate requests in 2017 to contractors for utilizing Native American firms. However, it plans to process between 120 and 150 rebate requests in 2018.

Description:

The Joint Urgent Operational Needs Fund (JUONF) provides the Secretary of Defense with essential agility to quickly respond to Warfighter urgent operational needs that if left unresolved will result in, or have already resulted in, loss of life and/or critical mission failure to United States (U.S.) forces in contingency operations, world-wide. Asymmetric and unforeseen threats will continue to pose dangerous challenges to the U.S. forces around the globe. Although Prior Approval reprogramming actions are a robust tool, they add time to the resourcing process which delays initiation of immediate action to address an urgent operational need. Understanding this, the Congress has provided the Department with Rapid Acquisition Authority (RAA) which allows for the very rapid acquisition of required materiel in meeting Warfighter requirements. However, because RAA lacks an appropriation from which to draw funds, a funding offset must be identified before any resourcing activity can execute, again delaying resolution of critical operational needs. The Department has increased its use of RAA for the past four years, totaling over \$700 million in funding authority to expedite solutions to urgent Warfighter requirements. This experience indicates a continuing need for a level of immediate, flexible funding to accompany current authorities. The requested funding of the JUONF would be used to support RAA requirements and would enable immediate initiation of action to resolve urgent requirements while the Department completes any reprogramming necessary that will provide the balance of funding needed. The Department has an effective process in place to validate and prioritize the selective application of this flexible funding from the JUONF. Judicious use of the JUONF prevents critical mission failures and saves time, money and Warfighter lives.

The Joint Urgent Operational Needs Fund (JUONF) was established as an account in the Treasury by Title 10, United States Code, Section 2216A. Amounts in the fund are to be available to the Secretary of Defense for capabilities that are determined by the Secretary, pursuant to the review process required by section 804(b) of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (10 U.S.C. 2302 note), to be suitable for rapid fielding in response to urgent operational needs.

Description: <p>The Joint Improvised-Threat Defeat Fund (JIDF) is available for obligation for three years. While these resources are documented in exhibit formats that are customary for Procurement appropriations, Congress approved these funds for development, procurement, and fielding of measures to defeat improvised threats to U.S. Joint Forces (such as, but not limited to, the development of defeat technologies for advanced wireless signals, compatible electronic countermeasures for improvised explosive devices (IED) defeat/neutralization, miniaturized and integrated sensors, hand held detectors, and fielding of cutting edge Information Technology capabilities). These resources support the Department of Defense's (DoD) goal to close the gap between the enemy's innovation cycles and the operational capabilities of the U.S. Joint Forces.</p> <p>The Joint Improvised-Threat Defeat mission under the authority, direction, and control of the Defense Threat Reduction Agency (DTRA) enables DoD actions to counter improvised threats, including improvised explosive devices. DTRA provides tactical responsiveness to near and mid-term threats (0-2 years) and supports the Combatant Commands' efforts to prepare for and adapt to battlefield surprise in support of counter-terrorism (CT), counter-insurgency (COIN), and other related mission areas, including counter-improvised explosive devices (C-IED).</p>																		
Justification: <p>Historical Context:</p> <p>Prior to FY 2017, funds were enacted as the Joint Improvised Explosive Device Defeat Fund (JIEDDF) and were executed through the Army.</p> <p>JIEDDF / JIDF</p> <table style="width:100%; border: none;"> <tr> <td style="width:33%;">FY 2017</td> <td style="width:33%;">FY 2018</td> <td style="width:33%;">FY 2019</td> </tr> <tr> <td>\$427.272</td> <td>\$497.500</td> <td>\$0.000</td> </tr> </table> <p>The FY 2017 actual shown above does not include \$62.8M requested, but transferred to Operation & Maintenance, Defense-Wide (O&M, DW) under DTRA as per the Consolidated Appropriations Act, 2017 (P.L. 115-31). The FY 2017 actual shown above does include \$87.8M in the Army's JIEDDF (2093A) per the Further Continuing and Security Assistance Appropriations Act, 2018 (P.L. 114-254).</p>													FY 2017	FY 2018	FY 2019	\$427.272	\$497.500	\$0.000
