## Introduction & Explanation of Contents

The Department of Defense Fiscal Year (FY) 2020 Budget Estimates Submission RDT&E (Includes Procurement, O&M, and MILCON), Defense-wide Volume 2, Missile Defense Agency (MDA) justification materials consists of two books titled Volume 2a and 2b. Justification documents are provided in the books as listed below.

### Volume 2a

- R-1 Comptroller Exhibit
- MDA FY 2020 Budget Estimates Overview
- MDA Appropriation Summary
- Acronyms
- RDT&E Exhibits in BA-03, BA-04, and BA-06

### Volume 2b

- P-1 Comptroller Exhibit
- MDA Operations and Maintenance Exhibit
- MDA MILCON Exhibits
- MDA Procurement Exhibits

OVERVIEW**

**Approved for Public Release**

**MDA Overview 19-C-0166**

**Vol2a RDT&E 19-C-0146**

**Vol2b O and M 19-C-0144**

**Vol2b MILCON 19-C-0148**

**Vol2b Procurement 19-C-0145**

The Missile Defense Agency (MDA) mission is “to develop and deploy a layered Ballistic Missile Defense System to defend the United States, its deployed forces, allies, and friends from missile attacks of all ranges and in all phases of flight.” MDA’s budget request is \$9.431 billion in Fiscal Year (FY) 2020, a decrease of \$1.06 billion from the FY 2019 enacted budget of \$10.491 billion.

In FY 2020, MDA will aim to strengthen and expand the deployment of defenses for our Nation, deployed forces, allies, and international partners against increasingly capable missile threats. The missile defense program will support the Warfighter and the needs of the Combatant Commanders by developing, integrating, testing, and deploying interceptors, sensors, and the command and control, battle management and communications (C2BMC) system for the Ballistic Missile Defense System (BMDS). MDA’s priorities for missile defense development and fielding are as follows: 1) continue to focus on increasing system reliability to build warfighter confidence; 2) increase engagement capability and capacity; and 3) address the advanced threat. This budget request maintains operational missile defense capabilities for existing homeland and regional defense forces and will continue to increase interceptor inventory capacity and use existing technologies to improve sensors, battle management, fire control, and kill vehicle capabilities to address evolving threats. MDA is cognizant of the growing cyber threat and is working to ensure the Nation's missile defenses are resilient and able to operate in a highly contested cyber environment. MDA remains focused on supporting the DoD Cybersecurity Campaign through implementation of the DoD Cybersecurity Discipline Implementation Plan - Four Lines of Effort. The four lines of effort are Strong Authentication, Hardening of Systems, Reducing the DoD Attack Surface, and Alignment to

Cybersecurity / Computer Network Defense Service Providers across all networks; all are critical to the reliability of the MDA networks.

## **I. Missile Threat**

Current global trends indicate ballistic and cruise missiles are becoming more capable, due in part to the proliferation of advanced technologies, resulting in systems with global reach, increasing speed, and greater accuracy. Nearly all of our adversaries are concerned with U.S. missile defenses and have devised various means to complicate missile defense operations. Many foreign ballistic and cruise missile systems are progressively incorporating advanced countermeasures, including maneuverable reentry vehicles, multiple independent reentry vehicles, and electromagnetic jamming, all intended to defeat our missile defense capabilities. Future supersonic/hypersonic powered cruise missiles may be launched by large rocket boosters that have traditionally been associated with ballistic missiles. Hypersonic glide vehicles are being developed as a new type of ballistic missile payload. The combination of high speed, maneuverability, and relatively low altitude makes them challenging targets for missile defense systems.

The United States remains vigilant to the pursuit of missile capabilities and nuclear weapons by potential adversaries. North Korea continues to develop a long-range, nuclear-armed missile that is capable of posing a direct threat to the United States. In 2016 and 2017, North Korea conducted over 40 launches of short- medium-intermediate-submarine-launched, and intercontinental-range systems.

Iran has ambitious ballistic missile and space launch development programs and continues to attempt to increase the lethality of its ballistic missile force. Iran is fielding increased numbers of theater ballistic missiles and improving its existing inventory. Its progress on space launch vehicles could shorten a pathway to an Intercontinental Ballistic Missile (ICBM). Iran's ballistic missiles are capable

of striking targets throughout the region, ranging as far as southeastern Europe. It has used these missiles in the region, conducting retaliatory strikes on ISIS targets in Syria. Iran has steadily increased its regional ballistic missile force, deploying next-generation short- and medium-range ballistic missiles (SRBMs and MRBMs) with increasing accuracy and new submunition payloads. Iran is developing, and has publicized the testing of, SRBMs with anti-ship payloads. Iran also continues to proliferate ballistic missiles to states and non-state groups.

To combat the current threat, this budget request maintains operational homeland and regional missile defense capabilities and continues to increase interceptor inventory capacity. This budget request funds the use of existing technologies to improve sensors, battle management, fire control, and kill vehicle capabilities to address evolving threats, while pursuing game-changing technologies to address the advanced threat.

The following discussion provides a summary of highlights of the major Program Elements, but does not necessarily examine all funding and activities included within each Program Element.

## **II. Homeland Defense**

MDA remains committed to operating, sustaining, and improving the nation's homeland missile defenses. The budget request includes:

- **Ground-based Midcourse Defense (GMD) (PE 0603882C).** MDA is requesting \$1.2 billion in FY 2020. MDA continues the development and expansion of long-range homeland missile defense capabilities, with 44 currently emplaced Ground Based Interceptors (GBIs) and efforts underway to expand the fielded GBI fleet to 64 in response to the rapidly advancing North Korean threat. MDA continues the efforts to field 20 additional GBIs equipped with the Redesigned Kill Vehicle, 20 silos in Missile Field

4 in Fort Greely, Alaska, and two additional silos in Missile Field 1. This will improve protection against North Korean and other ICBM threats as they emerge. To further improve Homeland Defense, MDA will complete the construction, manufacturing, and delivery of an In-Flight Interceptor Communication System (IFICS) Data Terminals (IDT) to be co-located with the Homeland Defense Radar – Hawaii (HDR-H) in FY 2023. MDA will add a Communications Facility at Fort Greely by FY 2024 to ensure Homeland Defense Fire Control redundancy. MDA will also upgrade the capability of key Ground Systems and Fire Control systems components such as the GMD Fire Control (GFC) equipment, and the GMD Communications Network (GCN). Capability upgrades will include On-Demand Communications (ODC) required for the Redesigned Kill Vehicle (RKV); GMD implementation of BMDS System Track; 2-or/3-stage selectable GBI battle management; Mid-Term Discrimination; enhancements to the Buffer Zone; cybersecurity implementations; and other GFC-Warfighter interface and logic improvements. Technology modernization will mitigate obsolescence issues, improve cybersecurity resilience, reduce life-cycle cost, increase system reliability and operational availability, and simplify the insertion of future technologies.

- **Improved Homeland Defense Interceptors (PE 0604874C).** MDA is requesting \$412.4 million in FY 2020. The Redesigned Kill Vehicle (RKV) will improve reliability and make homeland defenses more robust. The RKV will also help address the evolving threat, improve in-flight communications to better utilize off-board sensor data, and heighten Combatant Commanders’ situational awareness via hit/kill assessment messages. The RKV program is anticipated to be delayed by up to two years with a rescheduling of the RKV Critical Design Review (CDR) from late 2018 to the 2020 timeframe. While the overall RKV design is mature and robust, MDA does not want to enter the CDR until the complete RKV design meets all of the requirements. In accordance with the

Integrated Master Test Plan (IMTP) version 20.1, MDA will conduct the first controlled test vehicle flight test of the RKV in FY 2022. The first intercept flight test is planned for FY 2023 with a second intercept flight test in FY 2024. MDA anticipates emplacing 20 additional GBIs tipped with the RKV within the FY 2025 timeframe.

- **Ground-based Midcourse Defense Test (PE 0604887C).** MDA is requesting \$98.1 million in FY 2020 for the GMD test program, which supports the IMTP version 20.1. This budget request funds developmental/operational ground test campaigns and flight test missions that are essential for system development and fielding interceptors with new capabilities. MDA will execute a non-intercept Ground-based Midcourse Defense Booster Vehicle Test-03 (GM BVT-03), in support of 2- or 3-Stage selectable boost vehicle software that will provide additional engagement battlespace to the warfighter using a GBI launched from VAFB, California in FY 2020. Other efforts also include the three RKV flight tests previously mentioned--one controlled test vehicle and two intercept missions in FY 2022-2024.
- **GMD Procurement.** MDA is requesting \$9.5 million in FY 2020. This request funds the mitigation of GBI obsolescence-driven redesign and testing in support of GBI procurements.
- **GMD Maintenance and Sustainment.** MDA is requesting \$153.2 million in FY 2020 for the Operation and Maintenance (O&M) of the GMD weapon system. In addition to operation, maintenance and sustainment of the GMD weapon system and operational and support facilities at Fort Greely, Alaska, Vandenberg Air Force Base (VAFB), Fort Drum NY, Schriever AFB, Colorado, and Eareckson Air Station, Alaska, it includes Warfighter training, wargames, and exercises to maintain readiness.

- **Sea-Based X-band (SBX) Radar (PE 0603907C).** MDA is requesting \$128.2 million in FY 2020. The SBX radar provides precision midcourse tracking, debris mitigation, and discrimination capabilities, and the SBX is an integral component in flight tests to demonstrate discrimination and debris mitigation. To address the continued missile test activity in North Korea, the MDA budget request includes funds to extend time at sea and conduct contingency operations for defense of the homeland. Specifically, SBX would log approximately 305 days at sea and 60 days for in-port maintenance in FY 2020, and approximately 330 days at sea annually from FY 2021-2024. The budget request also continues the x86 X-Band Radar (XBR) superdome replacement to address obsolete equipment and increase the XBR processing capabilities. The replacement superdome will be fielded in the 2021 timeframe.
- **Long Range Discrimination Radar (LRDR) (PE 0604873C).** MDA is requesting \$136.4 million in FY 2020. The LRDR provides an improved persistent midcourse BMDS discrimination capability in the Pacific sensor architecture. The LRDR will also increase the defensive capacity of the GMD interceptor inventory and address evolving threats. In FY 2020, MDA will complete assembly and installation of the LRDR and conduct system integration and power-up testing at Clear Air Force Station, AK. Initial fielding of the LRDR is planned for 2020 leading to an Operational Acceptance by the Warfighter in the 2022 timeframe. MDA's request includes funding for software Independent Verification and Validation (IV&V), Modeling and Simulation (M&S) efforts, and development of software for BMDS Increment 7 capability.
- **Home Defense Radar – Hawaii (HDR-H) (PE 0604672C).** MDA is requesting \$274.7 million in FY 2020 for the Homeland Defense Radar – Hawaii. The HDR-H will provide a persistent capability, augmented by other sensors, to mitigate the effects of evolving threats to the BMDS, optimize discrimination capability in the Pacific architecture, and increase capability of GBIs in the

defense of Hawaii. MDA has awarded a fixed-price incentive contract to manage, develop, build, integrate, test, and field the radar prime mission equipment. The radar prime contractor will deliver a full technical data package that will enable the government to effectively and affordably sustain the system. The HDR-H radar is expected to complete development and initial fielding in FY 2023 for BMDS integration and testing. MDA will request military construction funding for the HDR-H in FY 2021. The radar will be constructed in two phases, Phase 1 in FY 2021 and Phase 2 in FY 2022.

- **Pacific Discriminating Radar (PE 0604673C).** MDA is requesting \$6.7 million in FY 2020 for the Pacific Discriminating Radar. In FY 2020, MDA will complete program requirements development activities associated with systems engineering, hardware and software development, discrimination improvements, design reviews, testing, and M&S efforts for radar development. The Pacific Discriminating Radar will provide persistent midcourse discrimination, precision tracking, and hit assessment to support the defense of the Homeland against long-range missile threats and defense against regional threats in the USINDOPACOM area of responsibility. The Pacific Radar is expected to complete fielding in the 2026 timeframe.

### **III. Regional Defense**

There are hundreds of ballistic missiles within range of U.S. forces and its international partners and allies worldwide. MDA’s FY 2020 budget request continues to resource and build integrated regional missile defenses that are interoperable with systems deployed by international partners to protect deployed forces, allies and international partners against SRBMs, MRBMs, and IRBMs.

The Aegis Ashore Missile Defense System in Romania currently protects U.S. deployed forces and NATO allies in Europe from ballistic missile threats from the Middle East. MDA will further enhance defensive coverage for NATO allies in Europe against medium and

intermediate range threats with the deployment of an Aegis Ashore site in Poland and the SM-3 Block IIA and associated Aegis BMD weapon system upgrades for Aegis BMD ships and Aegis Ashore sites. The Aegis Ashore site in Poland is projected to be delivered by 2020. The U.S. Navy will continue to operate the Aegis Ashore site in Romania as an integral part of NATO's BMD architecture, which includes a forward-based Army Navy/Transportable Radar Surveillance System (AN/TPY-2) in Turkey, BMD-capable Aegis Destroyers homeported in Rota, Spain, SM-3 interceptors, and a command-and-control node operated from Ramstein Air Base, Germany. MDA is using an incremental development approach integrated within the Aegis Baseline (BL) 9 architecture to develop and deliver an additional layer to Aegis BMD with a Sea Based Terminal (SBT) capability. By expanding the capability of the SM-6 missile and associated Aegis weapon system changes, we are delivering capability to maritime forces to protect against anti-ship ballistic missiles and provide a layered defense for forces ashore.

Continued provocations demonstrate the serious threat North Korea poses to the Republic of Korea (ROK), the Asia-Pacific region, and U.S. forward-deployed forces. MDA continues to provide training, maintenance and supply support of the THAAD batteries (including its Terminal Mode AN/TPY-2 radar) stationed in Guam and South Korea. MDA also supports U.S. forward deployed forces with Navy Aegis BMD ships stationed in Japan. This presence provides key defenses for Japan and Guam. MDA also supports Japanese's deployed Navy Aegis ships. MDA is strengthening the capability of this regional BMDS presence in response to a United States Forces Korea Joint Emergent Operational Need (USFK JEON) to increase integrated missile defense system interoperability and expand the defended area. This requirement is supported by United States Strategic Command (USSTRATCOM) and approved by the Chairman of the Joint Chiefs of Staff (CJCS).

Both the Aegis BMD and THAAD systems continue to be key component of the Nation's regional defense for our deployed forces, allies, partners and friends, and directly supports and expands our homeland defenses with long range surveillance and track capability. MDA proposes to continue funding the development, procurement, testing, operations and sustainment of these systems. The PB 20 request includes:

- **Aegis BMD (PE 0603892C).** MDA requests \$727.5 million in FY 2020. The program includes the integration of the SM-3 Block IIA into the Aegis BMD weapon system, transition of the Kinetic Warhead hardware commonality effort to system integration testing, and pre-production of all-up-rounds to support initial deployment. MDA is strongly committed to maintaining and enhancing the Aegis BMD weapon system capability alignment with Navy requirements to improve performance against SRBM, MRBM, and IRBM, as well as demonstrate capability against ICBM threats. Utilizing improved radar discrimination, Aegis BMD will increase capability against longer range and more sophisticated threats. MDA continues software development for Integrated Air and Missile Defense (IAMD) Baseline 9.C2 (BMD 5.1) in support of EPAA Phase 3 and the IAMD Baseline 10 (BMD 6.0). The BMD 6.0 computer upgrade will integrate BMD capability with data provided by the Advanced Air and Missile Defense Radar (AMDR), also known as the AN/SPY-6, for enhanced engagement capability and increased raid capacity. Additionally, MDA continues upgrading the SM-3 Block IB hardware and software to leverage the capability of the SM-3 Block IIA, which is also common with the GMD RKV.
- **Aegis BMD Testing (PE 0604878C).** MDA is requesting \$169.8 million in FY 2020 for the Aegis BMD test program, which supports IMTP version 20.1. Aegis BMD Flight Test Program performs comprehensive testing of Aegis BMD components and

demonstrates their interoperability with the BMDS. Using accredited Modeling and Simulation (M&S), the ground test program provides the evidence required for MDA and the Combatant Commanders to transition the capability to the Operational Capacity Baseline. On December 10, 2018, MDA and U.S. Navy sailors manning the Aegis Ashore Missile Defense Test Complex (AAMDTC) at the Pacific Missile Range Facility (PMRF) at Kauai, Hawaii, successfully conducted Flight Test Integrated-03 (FTI-03). The test was of great significance to the future of multi-domain missile defense operations and supports a critical initial production acquisition milestone for the SM-3 Block IIA missile program. MDA will also conduct a flight test to meet the 2018 NDAA requirement to demonstrate a SM-3 Block IIA capability against an ICBM-class target that, if proven, would add an additional layer of protection to augment the currently operational GMD system. As directed by the 2018 NDAA language, MDA will conduct this demonstration no later than December 2020.

- **Aegis Procurement.** MDA requests a total of \$697.8 million in FY 2020 for SM-3 Procurement. The request procures 30 SM-3 Block IB and seven SM-3 Block IIA missiles. Each missile variant can be used on Aegis BMD ships and at the Aegis Ashore sites in Romania and Poland. The request provides a five-year Multiyear Procurement, for SM-3 Block IB missiles ending in FY 2023. The procurement budget also requests \$124.9 million for Aegis BMD weapon systems consisting of Aegis shipset equipment, software, and installation materials. The budget also requests \$25.7 million for the Aegis Ashore site in Poland.
- **Aegis BMD Maintenance and Sustainment.** MDA is requesting \$75.2 million in FY 2020 in Operation and Maintenance (O&M) funding. The Aegis BMD program will perform missile recertification, repair efforts, and Ordnance Assessment/Surveillance. This funding supports BMD Computer Program, Ship Equipment, Aegis Ashore Romania sustainment, and Fleet integration support.

Also key to Regional Defense capability is the Terminal High Altitude Area Defense (THAAD) weapon system. THAAD is a globally transportable, ground-based missile defense system that defends against short-, medium-, and limited intermediate-range ballistic missiles in the terminal stage of flight both inside and outside the atmosphere. THAAD provides Combatant Commanders a rapidly deployable capability to deepen, extend, and complement BMDS homeland and regional defenses. MDA supports forward-deployment of one THAAD battery in Guam, one THAAD Battery in the Republic of Korea (ROK), and plans additional OCONUS THAAD Battery deployments in FY 2019 and FY 2020.

MDA PB 20 request includes:

- **BMD Terminal Defense (PE 0603881C).** MDA is requesting \$302.8 million for THAAD development efforts in FY 2020. MDA will continue the development of multiple, independent THAAD software upgrades to address the evolving threat, improve the Warfighter's defense planning and, improved capability to engage SRBM, MRBM, and limited IRBM threats. THAAD development and integration will provide enhanced debris mitigation capability and, improved interoperability with other BMDS elements, expand defended areas via remote operation of THAAD Launchers, and initiate development efforts to utilize the Terminal Mode radar to report hypersonic threats to the BMDS. Finally, MDA continues development efforts associated with USFK JEON that provides enhanced THAAD capability against specific USFK threats, integrates THAAD's capability to detect and track threat ballistic missiles at longer ranges with the Patriot Advanced Capability – 3 Missile Segment Enhancement (PAC-3 MSE) to take advantage of its full kinematic capability, integrate MSE launchers and missiles into the THAAD weapon system, and accelerates initial capability to remote launchers and increase defended area.

- **BMD Terminal Defense Testing (PE 0604876C).** MDA requests \$25.1 million for Terminal Defense Testing in FY 2020, which supports IMTP version 20.1. This includes THAAD support of Army's Lower Tier Project Office demonstration of Patriot Launch on Remote (THAAD) in two events as well as demonstration of THAAD's capability to intercept an Intermediate Range Ballistic Missile (IRBM) in FTO-03.
- **THAAD Procurement.** MDA is requesting \$425.9 million for THAAD procurement in FY 2020 for 37 THAAD interceptors, obsolescence mitigation, production and training support, and procurement of tooling and equipment for the THAAD stockpile reliability and recertification program.
- **THAAD Operations and Maintenance.** MDA is requesting \$99.8 million of Operations and Maintenance (O&M) in FY 2020 to support the maintenance and upkeep of all BMDS unique items of the fielded THAAD Batteries, as well as for all THAAD training devices. MDA will provide support to seven THAAD batteries, including the two forward batteries stationed in U.S. Indo-Pacific Command area of responsibility.

#### **IV. Developing New Capabilities**

MDA is investing in advanced technology today to prepare for tomorrow's threats by improving system performance and effectiveness. This budget request will continue development of technology improvements for the current BMDS, along with breakthrough technologies for integration into the future BMDS. These efforts include advanced discrimination techniques, hypersonic defense technology, high-powered lasers, and Neutral Particle Beam (NPB). MDA is investigating solutions that reduce the cost per kill while addressing BMDS performance gaps, to improve homeland performance at dramatically reduced cost.

- **Hypersonic Defense (PE 0604181C).** MDA requests \$157.4 million for FY 2020. MDA will develop near term sensor and command and control capability upgrades for defense from hypersonic threats in response to the Defense Science Board's recommendations to develop and deliver a set of material solutions to address and defeat hypersonic threats. MDA will then demonstrate incremental progress in integrated hypersonic defense development by modifying existing BMDS sensors and C2BMC; defining weapon concepts and investing in key technologies to enable a broad set of kinetic and non-kinetic solutions, and conducting ground, airborne, and space-based technology experiments to track representative hypersonic threats.
- **Technology Maturation Initiatives (PE 0604115C).** MDA is requesting \$303.5 million in FY 2020 for Technology Maturation Initiatives to demonstrate sensor capabilities against ballistic targets and advanced threats to improve tracking performance and operational utility. MDA will complete integration and begin flight testing of an advanced sensor system to improve tracking precision to Aegis engage-on-remote and discrimination performance levels with the goal of migrating this technology to a space sensor layer. Working with national laboratories and industry, MDA will address laser scaling by investing in the laser component technology required to demonstrate efficient electric lasers. MDA will conduct component demonstration to prove out laser capability. The addition of the Neutral Particle Beam effort will design, develop, and conduct a feasibility demonstration for a Space-Based Directed Energy intercept layer. NPB efforts will leverage past and current work on particle beam and related enabling technologies as well as laser scaling, pointing, and stability to provide a component technology to improve the cost-benefit and size, weight and power for an operational system. This future system will offer new kill options for the BMDS and adds another layer of protection for the homeland.

- **Advanced Research Program (PE 0603180C).** MDA is requesting \$20.7 million in FY 2020, to conduct innovative research and development with small businesses, universities, and international partners to seek emerging technology and advance future missile defense capability. MDA continues to capitalize on the creativity and innovation of the nation’s small business community, academia, and other partners to enhance the BMDS.
- **Multi-Object Kill Vehicle (Common Kill Vehicle Technology / PE 0603294C).** MDA is requesting \$13.6 million in FY 2020, to establish the technology foundation for killing multiple lethal objects from a single interceptor. The more kill vehicles put on an interceptor, the greater the raid capacity of the Ground-based Midcourse Defense system. MOKV has the potential to significantly enhance homeland defense capabilities against the threat at a lower cost per engagement. MDA competitively awarded contracts to three major prime contractors in 2017 to reduce the technical risk for MOKV product development. The MOKV Technology Risk Reduction effort will culminate with component demonstrations specific to the three industry concepts.
- **Advanced Concepts & Performance Assessment (PE 0603176C).** MDA is requesting \$14.2 million in FY 2020, to centralize advanced technology concept modeling, simulation, and performance analysis. The program delivers independent assessments of government, university, and industry technology concepts that, along with systems engineering requirements, support acquisition strategy decisions and defines our technology focus areas. The request will fund independent government assessments of industry sensor, directed energy, and interceptor technology concepts and mature related tracking, discrimination, and sensor fusion algorithms. Assessment activities include development of Hypersonic Defense, Artificial Intelligence and Machine Learning Initiatives, and Left through Right Integration key technology areas. The innovative structured concept definition and assessment

methodology enables the MDA to validate focus areas, verify contractor technology solutions, and evaluate promising concepts in future Missile Defense System architectures.

## V. Space

- **BMD Space Program (PE 1206895C).** MDA is requesting \$27.6 million in FY 2020. This request funds the Spacebased Kill Assessment (SKA) experiment, which uses a network of fast frame rate and infrared sensors hosted on commercial satellites to deliver an experimental kill assessment capability tailored to homeland defense. As MDA’s pathfinder program to host military payloads on commercial satellites, SKA proved that commercial hosting can deploy assets on orbit quickly – around half the time of the average traditional space program – and at a significant cost savings. To increase the Department’s overall experience with commercial hosting, MDA collected and shared its SKA lessons learned with several organizations, including DARPA and the U. S. Air Force. SKA sensors on orbit today have performed a variety of MDA flight tests and engineering activities. FY 2020 will see a focus on steps necessary to potentially add the SKA system to the operational BMDS.
- **Space Tracking and Surveillance System (STSS) satellite operations and sustainment (PE 1206893C).** MDA is requesting \$35.8 million in FY 2020. The satellites, which were launched in 2009, have far exceeded their life expectancy and have proven to be a very good investment. STSS consists of two satellites operating in Low Earth Orbit and provides risk reduction data for a potential operational BMDS tracking and surveillance constellation in the areas of sensor management, target signatures, discrimination, and fire control loop closure. STSS will continue participating in MDA test events and data collections providing battlespace awareness, technical intelligence, and space situational awareness to the Warfighter. This request also funds the Missile

Defense Space Center (MDSC), which provides a collaborative environment to exploit and integrate STSS and other national security space assets for ballistic missile defense. Both the STSS program and the MDSC are also supporting concept development activities for space sensor architecture studies and analyses to address advanced threats.

## **VI. Other Program Highlights**

- **BMD Radars Program Maintenance and Sustainment** supports both homeland and regional defense missions. MDA is requesting \$194.3 million in FY 2020 to sustain COBRA DANE, the Upgraded Early Warning Radars (UEWR), and the AN/TPY-2 radars. The Services and Combatant Commands, with logistical support from MDA, operate AN/TPY-2 (Forward Based Mode) radars in Japan (two radars), Israel, Turkey, and United States Central Command (USCENTCOM) in support of regional defense. MDA continues to support the AN/TPY-2 radar (Terminal Mode) as part of forward-deployed THAAD batteries in Guam and South Korea.
- **BMD Sensors (*PE 0603884C, Budget Project MD11*)**. MDA is requesting \$263.5 million in FY 2020 to provide periodic software updates for the AN/TPY-2, COBRA DANE, Sea-Based X-Band, and UEWR radars to counter evolving threats, and to develop future radar capabilities through system engineering, software development, and testing. This project includes development of advanced algorithms for the BMD Sensors to improve the ability to discriminate between lethal and non-lethal objects, as well as Modeling and Simulation (M&S) efforts that include enhanced sensor models, development of Radio Frequency scene generators, integration of digital simulations into the BMDS M&S architecture, and Verification, Validation, and Accreditation of radar models.

- **Sensors Test (PE 0604879C).** MDA is requesting \$105.5 million in FY 2020. This includes planning, analysis and execution of BMDS flight test events, including pre- and post-test efforts such as Digital and Hardware-in-the-Loop (HWIL) Pre-Mission Tests and Post-Flight Reconstruction. Sensors Test also provides planning, analysis and execution for BMDS-level ground tests identified in the IMTP version 20.1.
- **Command and Control, Battle Management and Communication (C2BMC) (PE 0603896C).** MDA is requesting \$564.2 million in FY 2020 for C2BMC. C2BMC provides persistent acquisition, tracking, cueing, discrimination, and fire-control quality data to Aegis BMD, GMD, THAAD, Patriot, and coalition partners to support homeland and regional defense. MDA's C2BMC capabilities support Warfighter command, control and battle management needs across the globe by providing the Combatant Commander with the BMD planner, situational awareness tools, and battle management capability to support global BMD situational awareness, coalition operations, weapons release authority for homeland defense, and to control and task a variety of BMDS radars. C2BMC operators and maintainers deploy to some of the world's most threatening regions and continue to provide around-the-clock support to the local commanders. In FY 2020, MDA will sustain the C2BMC fielded capability (Spiral 8.2-3) in NORTHCOM, INDOPACOM, EUCOM and CENTCOM Areas of Responsibilities, which includes the following capability: Mobile Sensor Phase 1 and BMDS Overhead Persistent Infra-Red Architecture (BOA) 6.1 track data to the BMDS, support for Space Situational Awareness with AN/TPY-2 radars, and Aegis engage on remote, which can provide a five-fold increase in defended area coverage when compared to individual weapon system organic capability. MDA will continue development of Spiral 8.2-5, which integrates LRDR into the BMDS for support of homeland defense. This Spiral provides initial situational

awareness and tracking capability for Hypersonic threats, significantly expands Space Situational Awareness capabilities for the Air Force with LRDR, integrates the Army's IAMD Battle Management System into the BMDS, and develops Initial BMDS System Track for homeland defense. MDA will initiate development tasks for Robust Post Intercept Assessment supporting our regional defense focus and BMDS shoot-assess-shoot capability. MDA continues to improve the BMDS to keep pace with emerging threats worldwide by investing in the development, integration and testing of advanced algorithms to improve track and discrimination capabilities and enhance the use of space-based sensor data, using the BMDS OPIR architecture. Finally, MDA will continue to update its architecture to increase cybersecurity by assessing the risk of C2BMC architecture against possible attack. C2BMC capabilities will be involved in multi-agency cyber-focused tests and assessments planned for in FY20 to identify and correct cyber vulnerabilities.

- **MDA Engineering (*PE 0603890C, Budget Projects MD24, and MD31*)**. MDA is requesting \$252.8 million in FY 2020 to perform the system-level engineering required to design, build, test, assess and field the integrated BMDS. MDA Engineering defines BMDS architectures and functional requirements for integrated BMDS capabilities to defeat the evolving threats, analyzes architecture alternatives to address future threats, enables interoperability between U.S. forces and international partners, and drives future capability development from a system perspective to maximize the effectiveness of BMD technologies. MDA Engineering also performs pre- and post-mission analysis for BMDS tests, and assesses BMDS performance in order to deliver capabilities to the warfighter. In FY 2020, MDA will complete the engineering and technical assessment for the EPAA Phase 3 Technical Capability Declaration (TCD) to provide confidence to the Warfighter that the Aegis Ashore site in Poland will operate as designed. MDA

employs system-level and element-level models and simulations to verify BMDS performance and assess BMDS capability to engage and defeat complex threats across a spectrum of scenarios that cannot be demonstrated in flight tests. As a result, MDA is able to deliver to the Warfighter evolving, integrated, and layered BMDS performance and capabilities that have been thoroughly assessed and validated through testing and Modeling and Simulation. In this budget, MDA is pursuing improvements to both system-level digital simulation and integrated system-level ground test simulations.

- **MDA Testing.** MDA, in collaboration with our IMTP stakeholders, plans and executes a fully integrated test program that synchronizes the system under test with the Warfighters trained to operate the system under varying wartime conditions against current and emerging threats. Stakeholders, who are also IMTP signatories, include: Director, Operational Test & Evaluation (DOT&E); Director, Developmental Test and Evaluation (DT&E); Commander, Joint Functional Component Command for Integrated Missile Defense (JFCC IMD) representing Combatant Commands (CCMD); Service Operational Test Agencies (OTA); and Commander, Joint Interoperability Test Command (JITC). For flight testing, the Agency incorporates the nine operational realism criteria defined by the Ballistic Missile Defense System Response to National Defense Authorization Act Section 234, for Fiscal Year 2005, Increasing Operational Realism. Thirty-nine of the sixty-nine flight tests in the BMDS Test Program are currently planned to achieve these criteria. For system-level ground testing, all tests culminate in operational testing with Warfighters on console and independent operational assessments by the BMDS Operational Test Agency Team. This ensures that BMDS capabilities are credibly demonstrated and validated prior to delivery to the Warfighter. MDA, in conjunction with IMTP

stakeholders, works to identify and incorporate all testing requirements into the IMTP, which is a comprehensive, highly integrated, complex, cost-effective series of flight tests, ground tests, cybersecurity testing, exercises, and wargames.

- **Israeli Programs.** MDA’s work with the Israeli Missile Defense Organization is a testament to the strong missile defense partnership we maintain with Israel. MDA is requesting \$500 million for Israeli programs in FY2020. This funding level remains consistent with the Memorandum of Understanding that the United States and Israel signed in 2016. This budget continues MDA's longstanding support of U.S.-Israeli Cooperative BMD Programs, to include the co-development and co-production of the David's Sling Weapon System and Upper Tier Interceptor, and improvements to the Arrow Weapon System. The Department continues to support co-production efforts for the Iron Dome program to provide critical defense against short-range rockets and artillery. In FY 2020, the MDA budget will also support several flight tests across the Israeli portfolio. These continued joint efforts provide Israel with a three-tiered defense to defend from ballistic missiles, rockets, and cruise missiles and ensures Israel maintains its qualitative military edge against its adversaries.

## **VII. Summary**

MDA requests \$9.431 billion in FY 2020 to strengthen and expand the deployment of defenses for our Nation, deployed forces, allies, and international partners against an increasingly proliferated and advanced missile threat.

Reporting Requirement Reference	Reporting Requirement Language	Budget Documentation
<p><i>FY16 National Defense Authorization Act (HR 1735), pp. 1056-1059</i></p>	<p><b>SEC. 1684. ADDITIONAL MISSILE DEFENSE SENSOR COVERAGE FOR PROTECTION OF UNITED STATES HOMELAND</b></p> <p>(b) STUDIES AND EVALUATIONS ON HOMEPORT OF SEA-BASED X-BAND RADAR.—Not later than 60 days after the date of the enactment of this Act, the Director of the Missile Defense Agency shall commence any siting studies, environmental impact assessments or statements required pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) that have not otherwise been prepared, homeport agreements for sea-based X-band radar support, evaluations of any needed pier modifications, and evaluations of any communications capabilities or other requirements to carry out the reassignment of the homeport of the sea-based X-band radar to a homeport on the East Coast of the United States.</p> <p>(c) POTENTIAL FUTURE MISSILE DEFENSE SENSOR SITES.—</p> <p>(1) EVALUATION.—Not later than March 31, 2016, the Director shall commence a study to evaluate at least three possible additional locations (in or outside the United States), selected by the Director, that would be best suited for future deployment of an advanced missile defense sensor site optimized against threats from Iran.</p> <p>(2) ENVIRONMENTAL IMPACT STATEMENTS.— Except as provided by paragraph (3), the evaluation under paragraph (1) shall include an environmental impact statement or other analysis in accordance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) for each location included in the evaluation.</p> <p>(3) EXCEPTION.—If an environmental impact statement or other analysis described in paragraph (2) has already been prepared, or is not required by law, for a location included in the evaluation under paragraph (1), the Director shall not be required to carry out paragraph (2) with respect to such location.</p> <p>(d) DEPLOYMENT OF ADDITIONAL COVERAGE.— (1) DEPLOYMENT.—Not later than December 31, 2020, the Director, in cooperation with the relevant combatant command, shall deploy a long-range discrimination radar or other appropriate sensor capability in a location optimized to support the defense of the homeland of the United States from emerging long-range ballistic missile threats from Iran.</p> <p>(2) SEA-BASED X-BAND RADAR.—If the Director carries out paragraph (1) by reassigning the homeport of the sea-based X-band radar, the Director and the Secretary of the Navy may not carry out such reassignment until the date on which the Director certifies to the congressional defense committees</p>	<p>Submitted in the FY2020 Budget Justification Materials in PE 0603890C (BMD Enabling Programs) and PE 0603884C (BMD Sensors)</p>

	<p>that Hawaii will have adequate missile defense coverage prior to such reassignment.</p> <p>(e) SUBMISSION OF INFORMATION.—</p> <p>(1) REPORT.—Not later than December 31, 2018, the Director shall submit to the congressional defense committees a report containing the following:</p> <p>(A) The findings of the study conducted under paragraph (1) of subsection (c), including any environmental impact statements or analyses required by paragraph (2) of such subsection.</p> <p>(B) Notification of the manner in which Hawaii is being provided ballistic missile defense coverage.</p> <p>(2) PLAN.—In the budget justification materials submitted to Congress in support of the budget for each of fiscal years 2017 through 2020 submitted by the President to Congress under section 1105 of title 31, United States Code, the Director shall include—</p> <p>(A) the plan of the Director to carry out subsection (d); and</p> <p>(B) an update on the progress of the Director in implementing subsections (b) and (c).</p>	
<p><i>FY04 National Defense Authorization Act (H.R. 1588) Report 108-354, pp. 30-31</i></p>	<p><b>BUDGET JUSTIFICATION MATERIALS</b></p> <p>In the budget justification materials submitted to Congress in support of the Department of Defense budget for any fiscal year (as submitted with the budget of the President under section 1105(a) of title 31), the Secretary of Defense shall specify, for each ballistic missile defense system element for which the Missile Defense Agency is engaged in planning for production and initial fielding, the following information: (1) The production rate capabilities of the production facilities planned to be used for production of that element. (2) The potential date of availability of that element for initial fielding. (3) The estimated date on which the administration of the acquisition of that element is to be transferred from the Director of the Missile Defense Agency to the Secretary of a military department.</p>	<p>MDA to provide BMDS Accountability Report (BAR) to Congressional Defense Committees. The BAR partially satisfies the requirement through its schedule baseline.</p> <p><b>Exhibit P-21 – Budget Production Schedule</b></p>
<p><i>FY04 National Defense Authorization (H.R. 1588), Report 108-354, pp. 30-31</i></p>	<p><b>FUTURE-YEARS DEFENSE PROGRAM</b></p> <p>The Secretary of Defense shall include in the future-years defense program submitted to Congress each year under section 221 of this title an estimate of the amount necessary for procurement for each ballistic missile defense system element, together with a discussion of the underlying factors and reasoning justifying the estimate.</p>	<p><b>Exhibit P-21 – Budget Production Schedule</b></p>

N/A

**A. Mission Description and Budget Item Justification**

The Advanced Concepts and Performance Assessment (ACPA) Program Element delivers an integrated government concept definition, simulation, and analysis capability. It also centralizes assessment of advanced missile defense technology. Delivering insight into the performance of proposed concepts extends the Missile Defense Agency's (MDA) ability to address evolving threats for the warfighter.

Subject Matter Experts (SMEs) provide independent assessments of government, university, and industry technology concepts, used in concert with systems engineering requirements, to support acquisition strategy decisions and define technology focus areas. The innovative structured concept definition and assessment methodology enables MDA to quickly validate focus areas, verify contractor technology solutions, and evaluate promising concepts in future Ballistic Missile Defense System (BMDS) architectures. This methodology significantly enhances MDA's ability to assess technology concepts while decreasing the cost of development through:

- Independent model-based simulations of industry technology concepts to inform the systems engineering process
- Digital simulation and hardware-in-the-loop performance assessments of algorithms and hardware concepts prior to expensive live fire test events
- End-to-end testing of technology concepts integrated with weapon systems and Command, Control, Battle Management and Communications (C2BMC)

Performance assessment of advanced concepts incorporates Better Buying Power philosophy in the earliest stages of technology development to maximize the efficiency of technology investments. Performance assessment supports evaluation of advanced threats and analysis of capabilities left through right of launch integration.

• Reprogrammings	2.375	0.000			
• SBIR/STTR Transfer	-0.287	0.000			
• Missile Defeat and Defense Enhancement	0.000	0.000	0.000	-	0.000
• Other Adjustment	2.599	0.000	-0.059	-	-0.059

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 of \$2.375M reflects the Above Threshold Reprogramming for compliance with cyber security requirements as required in the Department of Defense (DoD) Instruction Number 8510.01 which establishes Risk Management Framework (RMF) requirements for DoD information technology (IT).

Increase in FY 2018 from PB19 to PB20 of \$2.599M reflects the investment in artificial intelligence (AI) infrastructure to develop, test, and demonstrate machine learning solutions.

**A. Mission Description and Budget Item Justification**

ACPA centralizes advanced technology concept modeling, simulation, software, and analysis. Integrating models of promising technical solutions into BMDS system-level simulations enables leadership to make data driven acquisition and technology investment decisions. This funding capitalizes on the innovation of small businesses, universities, Federally Funded Research and Development Centers (FFRDCs), and University Affiliated Research Centers (UARCs) to pursue a broad range of hardware, software, models, algorithms, trade studies, and analysis. These innovations bring together government developed models representing existing and future missile defense architectures, technology concepts, and advanced algorithms to provide detailed assessments of concept performance and inform investment decisions. These innovations, combined with a robust high performance computing infrastructure, provide a unique in-house government capability to demonstrate and assess technology concepts for emerging technology risk reduction, to mature concepts with laboratory, ground, and flight test data, and where possible, apply concepts in simulated exercises with weapon systems across representative communication architectures.

**B. Accomplishments/Planned Programs (\$ in Millions)**

<b>Title:</b> Advanced Concepts and Performance Assessment	FY 2018	FY 2019	FY 2020
<p><b>Description:</b> Provide quantitative assessments that define the benefits of technology investments and inform requirements using an integrated concept definition, simulation, and performance analysis capability. A staff of diverse Subject Matter Experts (SMEs) deliver independent government performance evaluations which exercise kinetic and non-kinetic missile defense concept representations against the broad spectrum of evolving threats.</p> <ul style="list-style-type: none"> <li>- Assess forward-based airborne electro-optical infrared and advanced sensors</li> <li>- Provide independent government assessments of industry sensor (e.g. Advanced Sensor), directed energy (e.g. Low Power Laser Demonstrator), and kill vehicle technology concepts</li> <li>- Examine directed energy pathfinder solutions</li> <li>- Study low earth orbit satellite capabilities</li> <li>- Assess and identify promising boost phase intercept capabilities</li> <li>- Perform concept performance against emerging advanced threats including hypersonic threat testing scenarios</li> <li>- Mature advanced technology concepts through lab, ground, and flight test data</li> <li>- Apply concepts in simulated exercises with weapon systems</li> </ul>	13.958	11.628	11.552

**Remarks**

**D. Acquisition Strategy**

Employ various contracting strategies in a flexible manner to maximize the contribution to MDA. Execute through utilization of small businesses, leverage the Nation's engineering centers of excellence (FFRDCs and UARCs); generate cooperatives with other Government Agencies to provide concept modeling and assessment capability. This strategy uses agency and partner SMEs and government model-based assessments to inform Better Buying Power acquisition decisions.

**A. Mission Description and Budget Item Justification**

Program Wide Support (PWS) contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore, fluctuates by year based on the adjusted RDT&E profile.

**Note**

The increase from FY 2019 to FY 2020 re-establishes the baseline requirement to meet Risk Management Framework (RMF) requirements which map to the Office of Management and Budget (OMB) and Office of the Secretary of Defense (OSD) vision of improved management of cybersecurity risk and on the ability to provide actionable and timely cybersecurity performance information. This provides resources to sustain and improve IT toolsets, maintain hardware currency, and sustain the IT and information assurance (IA) workforce.

**A. Mission Description and Budget Item Justification**

This project supports the monitoring and tracking of Cybersecurity mitigations as required in the Department of Defense (DoD) Instruction Number 8510.01 which establishes RMF requirements for DoD IT. Funds in this project implement and sustain DoD-required RMF and associated Controls Validation Testing (CVT) activities, analysis of validation results, risk assessments and reviews of proposed Program Manager/Information Assurance System Security Manager (ISSAM) Plans of Action and Milestones for enabling modeling and simulation mission systems. This project captures the RMF documentation (artifacts, validation results, IA risk assessment results, and MDA authorizing official and chief information officer accreditation decisions) into the Defense Information Systems Agency's Enterprise Mission Assurance Support Service system. Hardware and software upgrades required to meet DoD standards are supported by funding in this project. Independent verification and validation team actions ensure the availability, integrity, authentication, confidentiality and non-repudiation of the MDA mission, test and administrative systems. Activities in the project are necessary to comply with the Federal Information Security Management Act.

**Note**

Directed Energy Research (MD69) laser scaling efforts transferred to the Technology Maturation Initiatives (TMI) Program Element (PE) (0604115C) under the Directed Energy Demonstrator Development project (MD98) in FY 2019.

**A. Mission Description and Budget Item Justification**

Through FY 2018, the Weapons Technology PE developed and tested a high-powered directed energy laser to build the foundation of the next-generation laser system on a high altitude unmanned airborne platform. The Missile Defense Agency's (MDA) High Energy Laser (HEL) investment incrementally develops scalable, efficient, and compact HEL technology in the laboratory before beginning a high power laser flight test program. The technology required for tracking the target, aiming the laser, and building flight demonstrators is being developed under the TMI PE (0604115C).

In FY 2019, this PE provides the Hypersonic Defense Weapon Systems Concept Definition efforts to enable the Warfighter to counter the growing global hypersonic threat. The concept architectures must provide a kill chain that is highly maneuverable and agile, yet able to engage the hypersonic threats at much greater ranges during the threat's glide phase.

The Phase I Concept Definition effort will contract with twenty-one industry partners to start development of weapon systems concept architectures through a multi-phased approach to provide a near term capability to defeat hypersonic glide vehicles.

For FY 2020, MDA in coordination with the United States Air Force (USAF) is developing engineering and test requirements to support joint USAF/MDA program oversight and verification of a USAF system under development to provide a missile defense capability. Additional details on the USAF system are available at higher classification levels.

**UNCLASSIFIED**

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustment of \$20.000 million and an increase of \$4.000 million for directed energy.

Increase in FY 2019 from PB19 to PB20 reflects the enacted congressional adjustment of \$13.400 million for the acceleration of Hypersonic Defense.

Increase in FY 2020 from PB19 to PB20 provides MDA joint efforts with the USAF to develop engineering and test requirements to support program oversight and verification of a USAF system under development to provide a missile defense capability.

**Note**

Directed Energy Research (MD69) laser scaling efforts transferred to the TMI PE (0604115C) under the Directed Energy Demonstrator Development project (MD98) in FY 2019.

**A. Mission Description and Budget Item Justification**

Through FY 2018, the Directed Energy Research project funded the laboratory development of two high energy laser technologies, the Diode Pumped Alkali Laser (DPAL) with Lawrence Livermore National Laboratory (LLNL) and the Fiber Combined Laser (FCL) with the Massachusetts Institute of Technology Lincoln Laboratory (MIT/LL). These laser technologies have considerable promise for scaling to very high average power while simultaneously achieving high system electrical-to-optical efficiencies, exceeding 40 percent, and very low system weight and volume.

**B. Accomplishments/Planned Programs (\$ in Millions)**

<p><b>Title:</b> Directed Energy Research</p> <p><b>Description:</b> Directed Energy Research funded two promising laser technologies: LLNL's DPAL and MIT/LL's FCL. Each technology takes a unique approach to attaining high power. The DPAL scales in power by increasing the size of a single laser gain cell. This approach has the benefit of simplicity of design, but must address very high energy levels within the single cell. LLNL successfully demonstrated over 16 kilowatts (kW) in FY 2016.</p> <p>MDAs key fiber laser investments are targeted at driving the weight per kW of power in the fiber amplifier system down while increasing the individual fiber amplifier power output. MDA joined with the Defense Advanced Research Projects Agency (DARPA) and the USAF to demonstrate 44 kW in a room-sized, 40 kilogram per kW configuration in FY 2015, to a packaged 7 kilograms per kW, 30 kW system in FY 2018.</p> <p>Specific and/or unique accomplishments to each FY are as follows:</p> <p><b>FY 2019 Plans:</b> N/A</p> <p><b>FY 2020 Plans:</b> N/A</p> <p><b>FY 2019 to FY 2020 Increase/Decrease Statement:</b></p>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>

**Remarks**

**D. Acquisition Strategy**

The acquisition strategy for Directed Energy Research (MD69), consists of partnering with Industry, DARPA, USAF, FFRDCs, and UARCs. MDA will leverage Agency and partner subject matter experts and use government model based assessments to inform Better Buying Power philosophy acquisition decisions. The MDA will then award contracts to industry and universities via the Advanced Technology Innovation Broad Agency Agreement (BAA) and competitive procurements to develop and demonstrate promising components and integrated systems in realistic test environments.

**Note**

FY 2019 reflects the congressional adjustment for acceleration of Hypersonic Defense. Other Hypersonic Defense efforts are funded in PE 0604181C in FY 2020 and out years.

**A. Mission Description and Budget Item Justification**

In FY 2019, MDA along with industry partners will develop Hypersonic Defense Weapon Systems concept architectures (weapon and kill chain) that are able to engage the hypersonic threats at much greater ranges during the threat's glide phase and in terminal phase for layered defense.

The weapon systems concepts will provide MDA insight into architecture performance, cost, and schedule for future development efforts.

Hypersonic Defense Weapon Systems Concept Definition seeks investigation of a broad trade space for innovative concepts that can provide affordable, reliable, and robust capabilities to negate hypersonic vehicle threats.

For FY 2020, MDA in coordination with the United States Air Force (USAF) is developing engineering and test requirements to support joint USAF/MDA program oversight and verification of a USAF system under development to provide a missile defense capability.

**Remarks**

**D. Acquisition Strategy**

To optimize Missile Defense System (MDS) performance, MDA leverages the nation's engineering centers of excellence at government agencies, Military Services, FFRDC, UARCs and industry. The executing agents use varying contracting strategies in a flexible manner to maximize their contribution to the MDS. MDA acquires products and services by competitive means to the extent that is possible, practical and uses the BAA process to award concept definition contracts.

**Note**

Increase in FY 2019 reflects the congressional adjustment (\$22.200 million) to accelerate Hypersonic Defense (HD) technologies to raise the technology readiness levels (TRL) of new hypersonic components and to integrate into the HD architecture to include: kinetic, non-kinetic, sensors, communications, command and control (C2), and modeling and simulation (M&S).

Other Hypersonic Defense efforts are funded in PE 0604181C in FY 2020 and outyears.

**A. Mission Description and Budget Item Justification**

The Advanced Research program element (PE) conducts leading edge advanced research and development to create and enable future missile defense capabilities. The Missile Defense Agency (MDA) executes this mission by capitalizing on the creativity and innovation of the brightest minds in our Nation's universities and small businesses, collaborative research partnerships between allied countries, academic institutions, and innovative ideas from industry. This includes a focus on facilitating the transition of technology to the Ballistic Missile Defense System (BMDS) through a Commercialization and Transition Office and the execution of the Rapid Innovation Fund Program.

**A. Mission Description and Budget Item Justification**

MDA explores potential new BMDS capabilities by leveraging the creativity and innovation of the Nation's small businesses and universities to conduct advanced technology development. MDA also pursues advanced technology development through cooperative international research agreements between U.S. and foreign universities of allied nations. The program manages the selection process and administers the Missile Defense Small Business Innovation Research (SBIR) program element (PE), 0605502C. SBIR topics and projects are selected annually based on needs across the BMDS and executed in partnership with sponsoring intra-agency organizations.

MDA's Advanced Technology Development Project pursues a broad range of emerging technologies targeted for application and insertion into the BMDS. This work facilitates the commercialization and transition of promising technologies into the BMDS by promoting a cooperative environment to reduce cost and increase return on investment between small businesses, prime contractors, and MDA elements.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Beginning in FY 2020, in accordance with Department priorities, Multi Object Kill Vehicle (MOKV) efforts include limited component technology maturation and concept studies for future MOKV development.

**A. Mission Description and Budget Item Justification**

The MOKV program will enhance interceptor performance to enable the Warfighter to counter numerous and complex threats to the homeland by establishing the technological foundation for engaging multiple objects from a single interceptor compared to what is currently fielded. The Missile Defense Agency (MDA) is developing the concepts for an MOKV based on a modular open systems architecture designed to common interfaces and standards, making upgrades easier, and enabling a more competitive, broader supplier industrial base.

MOKV will rely on a Ballistic Missile Defense System (BMDS) architecture that balances performance across the sensor, Command, Control, Battle Management and Communications, and kill vehicle elements. Analysis shows that having multiple kill vehicles on each interceptor can dramatically improve the performance of the system, significantly reduce the burden on interceptor inventory, and reduce cost per kill to defend the Homeland.

**Note**  
Beginning in FY 2020, in accordance with Department priorities, Multi Object Kill Vehicle (MOKV) efforts include limited component technology maturation and concept studies for future MOKV development.

**A. Mission Description and Budget Item Justification**

MDA will focus on MOKV competitive technology risk reduction with industry.

The MOKV concepts and identified technology component risk reduction will formulate the trade space across cost, risk, and kill vehicle performance to inform requirements that are feasible and affordable for the engineering, manufacturing and development of a future MOKV.

As part of MOKV concept development, industry identified technology component risk reduction efforts that support their concepts. In FY 2019, MDA will continue limited risk reduction for selected kill vehicle and carrier vehicle component technologies that lower technical risk. MOKV limited component technology risk reduction will draw from existing efforts such as engagement management, communications, seekers and advanced sensors, divert attitude and control systems, integrated avionics, and inertial measurement units. In FY 2020, MOKV efforts are limited to component technology maturation and concept studies for future MOKV development.

**Remarks**

**D. Acquisition Strategy**

The full acquisition strategy consists of three focus areas. First, through competition with missile integration contractors, develop kill vehicle architectures and interfaces with competitive design of multi- object kill concepts incorporating engagement management concept of operations, kill vehicles and enhanced discrimination capability. Second, conduct risk reduction activities to identify and mature the technology necessary to increase the reliability and performance of our kill vehicles using the Advanced Technology Innovation Broad Agency Announcement and competitive procurements. Make investments that mitigate the component technology gaps for future multi- object kill vehicles that enhance the competitive environment. Third, leverage the technical expertise of Federally Funded Research and Development Centers, University Applied Research Centers, and Universities and government laboratories to independently develop reference concept using proven modeling and analysis techniques.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

Program Wide Support (PWS) contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**B. Accomplishments/Planned Programs (\$ in Millions)**

**Program MDAP/MAIS Code:** 362

**Note**

Decrease from FY 2019 to FY 2020 reflects completion and delivery of the THAAD Remote Launcher capability (USFK JEON) in FY 2019; completion of Position, Navigation and Timing (PNT) Antenna and regional clock capabilities to replace the GPS antennas; and completion of developmental activities for Software Build 4.0 - THAAD / Missile Segment Enhancement (MSE) Integration (USFK JEON).

**A. Mission Description and Budget Item Justification**

The Ballistic Missile Defense (BMD) Terminal Defense Segment provides vital forward-deployable capabilities to support regional defensive BMD operations. The Terminal High Altitude Area Defense (THAAD) system provides Combatant Commanders a globally-transportable, rapidly-deployable capability to intercept and destroy short-range, medium-range, and limited intermediate-range missile threats inside or outside the atmosphere during terminal phase of flight. Continued development and integration will provide enhanced debris mitigation capability, improved interoperability with other BMDS elements, and training devices to support the THAAD Institutional Training Base.

This Program Element also investigates concepts and performs systems engineering to address emerging threats.

**Change Summary Explanation**

Net increase in FY 2018 from PB19 to PB20 reflects the enacted congressional reduction of \$20.000 million for THAAD software development, and increases of \$186.700 million for USFK JEON, and improved electronic protection / objective debris mitigation (EP/ODM) discrimination.

Net increase in FY 2019 from PB19 to PB20 reflects the enacted congressional reduction of \$10.000 million for THAAD software development, and increase of \$184.100 million for USFK JEON.

Increase in FY 2020 from PB19 to PB20 provides full funding of the USFK JEON requirements.

**Note**

Decrease from FY 2019 to FY 2020 reflects completion and delivery of the THAAD Remote Launcher capability (USFK JEON) in 2019; completion of Position, Navigation and Timing (PNT) Antenna and regional clock capabilities to replace the GPS antennas; and completion of developmental activities for Software Build 4.0 - THAAD / Missile Segment Enhancement (MSE) Integration (USFK JEON).

**A. Mission Description and Budget Item Justification**

The THAAD Development Program consists of multiple, independent software builds (e.g. Build 2.0, Build 3.0 - Improved Debris Mitigation, Software Build 3.2 - Remote Launcher Part 1 (USFK JEON), Software Build 4.0 - THAAD / Missile Segment Enhancement (MSE) Integration (USFK JEON), Software Build 5.0 - Expanded Regional Defense, and Software Build 6.0 - Enhanced Correlation and Discrimination) in an incremental evolution to expand the capability of the previously delivered THAAD system. All new software builds include cyber security and information assurance upgrades.

Software Build deliveries have been adjusted to most efficiently and effectively deliver both the USFK JEON content (THAAD Remote Launcher Part 1; Patriot Launch on Remote; THAAD / Missile Segment Enhancement (MSE) Part 1) along with program of record capabilities as follows:

Software Build 3.2 - Remote Launcher Part 1 (USFK JEON) (scheduled to be completed in 4Q FY 2019)

- Initial requirements for increased defended area footprints via remote operation of THAAD Launchers in support of USFK JEON
- PATRIOT Launch on Remote to utilize THAAD's capability to detect and track threat ballistic missiles at longer ranges and utilize PAC-3 MSE's full kinematic capability in support of USFK JEON

Software Build 4.0 - THAAD / MSE Integration Part 1 (USFK JEON) (scheduled to be completed in 2Q FY 2021)

- Initial requirements to integrate MSE launchers and missiles into the THAAD weapon system enabling a more tightly integrated upper/lower tier defensive capability in support of USFK JEON
- Expanded requirements for increased defended area footprints via THAAD Remote Launcher Part 2
- Improved capability to engage short-range ballistic missile (SRBM), medium-range ballistic missile (MRBM) and limited intermediate-range ballistic missile (IRBM) threats capable of creating complex scenes

Software Build 5.0 - Expanded Regional Defense (scheduled to be completed in 2Q FY 2023)

- Hypersonic tracking and reporting for the warfighter to utilize the Terminal Mode radar to report hypersonic threats to the BMDS
- Capability to track, discriminate and engage lethal objects reported on surveillance
- Expanded requirements for THAAD / MSE Integration Part 2 to increase defended area footprints via remote operation of MSE Launchers in a THAAD Battery

**UNCLASSIFIED**

<b>Exhibit R-2A, RDT&amp;E Project Justification:</b> PB 2020 Missile Defense Agency		<b>Date:</b> March 2019

Software Build 6.0 - Enhanced Correlation and Discrimination (scheduled to be completed in 1Q FY 2025)  
 - Enhance engagement coordination with other BMD assets  
 - Upgrades to process Command, Control, Battle Management and Communications (C2BMC) messages to obtain direction for target engagement

---	----------------	----------------	----------------

**Description:** Program Operations provides strategic planning, program integration, contracting, acquisition, engineering, financial management, internal reviews and audits, and program assessments for the THAAD Program Office.

- Recurring activities include:
- Provide technical and business management support activities to provide the Program Director with critical program status and decision quality data,
  - Ensure THAAD program compliance with internal and external direction, policies, and regulations to deliver critical capability within a consistent and disciplined process,
  - Conduct internal program reviews to measure program progress against the six Missile Defense Agency approved baselines
  - Continue a Mission Assurance and Manufacturing Engineering Program to include Quality, Configuration Management, Manufacturing, Engineering, and Safety in all phases of the system life cycle, throughout the supply chain, and at all levels of assembly emphasizing high yield rates which minimize test and rework costs, and
  - Provide Quality Safety and Mission Assurance (QSMA) operations to ensure compliance with Agency requirements for design, test, manufacturing, quality, safety and reliability to ensure high quality products are delivered to the Warfighter.

Specific and/or unique accomplishments to each FY are as follows:

**FY 2019 Plans:**

- SEE ABOVE.

**FY 2020 Plans:**

- SEE ABOVE.

**FY 2019 to FY 2020 Increase/Decrease Statement:**

Decrease from FY 2019 to FY 2020 reflects transfer of Program Operations associated with Terminal Defense Segment Test from this Program Element to the Terminal Defense Segment Test 0604876C Program Element.

<b>Title:</b> USFK JEON	100.557	58.000	33.300
<b>Articles:</b>	-	-	-

**Description:** This accomplishment fully funds the THAAD portion of USFK JEON to deliver expanded engagement options and increased coverage area. This includes accelerating some content previously included in the THAAD Development accomplishment, while adding new development efforts which include Rapid Deployment of Command and Control and Software upgrades and Performance Optimization Against Additional Threats as well as the following three new priorities:

<b>Description:</b> This activity provides support for efforts such as communications and interoperability upgrades to operate on joint, service, or allied communications networks. This activity provides support for safety and mission assurance requirements, and support of independent government offices as part of the Materiel Release process.			
Recurring efforts include: - Interoperability development and maintenance to ensure the weapon system is authorized to operate on joint, service, or allied communications networks, - Safety confirmation and verification testing, preparation and approvals of System Safety Risk Assessments, issuance of hazard classifications and safety releases, insensitive munitions approvals and waivers, and independent oversight and support in the areas of reliability, availability, and maintainability (RAM) and quality assurance.			
Specific and/or unique accomplishments to each FY are as follows:

**Remarks**

**D. Acquisition Strategy**

The THAAD program awards Indefinite Delivery Indefinite Quantity (IDIQ) Task Orders on the Advanced Capability Development (ACD) contract for THAAD development. The ACD contract is comprised of over 40 separate task orders with varying contract types such as firm fixed price, fixed price incentive firm, cost plus incentive fee, and cost plus fixed fee. The discrete task orders allow management and tracking of Development work.

**Note**

Increase from FY 2019 to FY 2020 provides the improved cyber security requirements for software development efforts to align with Agency and USD(R&E) priority. Development efforts involve more robust cyber security for both offense and defense to address the advanced threat.

**A. Mission Description and Budget Item Justification**

Cyber Operations sustain MDA Risk Management Framework (RMF) and Controls Validation Testing (CVT) activities; analysis of validation results, risk assessments; reviews of proposed Program Manager/Information Assurance Manager Plans of Action and Milestones for MDA THAAD mission systems; and supports THAAD certification to operate in the BMDS.

**Note**

Decrease from FY 2019 to FY 2020 reflects completion of the USFK JEON PATRIOT Launch on Remote

**A. Mission Description and Budget Item Justification**

PAC-3 is an operational, land-based weapon built upon the proven U.S. Army Phased Array Tracking Radar Intercept on Target (PATRIOT) air and missile defense infrastructure. The Army is responsible for production and further development of the PAC-3 System and Missile Segment Enhancements (MSE); MDA remains responsible for any BMDS interoperability and integration efforts. Lower Tier Project Office (LTPO) will utilize MDA funds to further the integration of PATRIOT with the BMDS.

Beginning in FY 2018, this project also includes LTPO's portion of the USFK JEON including:

- 1) PATRIOT launch on remote to utilize THAAD's capability to detect and track threat ballistic missiles at longer ranges and utilize MSE's full kinematic capability
- 2) THAAD / MSE Integration Part 1 that integrates MSE launchers and missiles into the THAAD weapon system enabling a more tightly integrated upper/lower tier defensive capability

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Increase from FY 2019 to FY 2020 provides an increase for ground systems software development and hardware upgrades, initiation of the development of the Hawaii In-Flight Interceptor Communications System (IFICS) Data Terminal (IDT), upgrade and reactivation of the IDT on the Sea Based X-Band Radar (SBX), Ground Based Midcourse Defense (GMD) Lab upgrades and cybersecurity efforts.

**A. Mission Description and Budget Item Justification**

The GMD element of the Ballistic Missile Defense System (BMDS) provides combatant commanders with a continuously available (24 hours a day, 7 days a week, 365 days a year) capability to defend the Homeland against limited Intercontinental Ballistic Missile (ICBM) attacks. The GMD capability consists of Ground Based Interceptor (GBI), GMD Fire Control system (GFC), GMD Communications Network (GCN), Hawaii IFICS IDT and ground Launch Support Systems (LSS). The Missile Defense Agency (MDA) will deliver 64 operationally deployed GBIs located at Fort Greely, Alaska (60 GBIs) and Vandenberg Air Force Base, California (4 GBIs). Each GBI delivers a single kill vehicle to defeat threat warheads in space during the midcourse phase of the ballistic trajectory. The GFC consists of fire control nodes in Fort Greely, Alaska and Missile Defense Integration and Operations Center (MDIOC) Colorado Springs, Colorado. IDTs are currently located in Fort Greely, Alaska: Vandenberg Air Force Base, California; Eareckson Air Station, Alaska; and Fort Drum, New York. The GMD capability leverages integration of BMDS sensors across the globe. Development objectives for GMD include: improve homeland defensive capability against an evolving threat that is increasing both in number of missiles and complexity of threat payloads, execute flight testing, modernize the GMD ground system, provide fire control and communications, develop GBI software enhancements that improve reliability, capability, and discrimination, improve GMD models and simulations (M&S), and participate with other BMDS assets in system ground tests.

• Other Adjustment	-5.532	0.000	110.271	-	110.271

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustment of \$229.996 million in accordance with the FY 2018 Appropriations Act.

Decrease in FY 2019 from PB19 to PB20 reflects the enacted congressional adjustment for forward financing in the FY 2018 Appropriations Act.

Increase in FY 2020 from PB19 to PB20 provides the development of the Hawaii In-Flight Interceptor Communications System (IFICS) Data Terminal (IDT), upgrade and reactivation of the IDT on the Sea Based X-Band Radar (SBX), Ground Based Midcourse Defense (GMD) Lab upgrades and cybersecurity efforts.

**Note**

Increase from FY 2019 to FY 2020 provides increased ground systems software development and hardware upgrades, initiation of the development of the Hawaii IFICS IDT, upgrade and reactivation of the IDT on the SBX, GMD Lab upgrades and cybersecurity efforts.

**A. Mission Description and Budget Item Justification**

GMD includes development and delivery of GMD Ground Systems, GBIs, Systems Engineering and Program Management. Development objectives for GMD include: improve homeland defensive capability against an evolving threat that is increasing both in number of missiles and complexity of threat payloads, execute Flight Tests, modernize the GMD ground system provides improved fire control and communications, develop GBI software enhancements that improve reliability and discrimination, improve GMD M&S, and participate with other BMDS assets in system ground tests. GMD will continue the effort to develop and field improved standalone and integrated BMDS discrimination capabilities, both of which will improve the BMD System's ability to identify lethal reentry vehicles and non-lethal threat objects for enhanced interceptor performance.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	FY 2018	FY 2019	FY 2020
<b>Title:</b> Ground Based Interceptor	390.118	104.276	167.186
<b>Articles:</b>	-	-	-
<p><b>Description:</b> Due to the move of GBI manufacturing to procurement, the FY19 Ground Based Interceptor Development, Manufacturing and Reliability accomplishments were consolidated in this accomplishment beginning in FY 2020. The GBI accomplishment will continue to develop improvements to enhance reliability, counter emerging threats, eliminate obsolescence and incorporate available technologies. The GBI Program will continue acquisition of boosters. The GBI reliability program conducts the analysis and testing necessary to characterize the reliability and service life of the GBI Fleet. The data generated from the reliability program allows the Program Office to manage the GBI fleet, develop design improvements, develop fleet maintenance strategies, and extend interceptor service life. The data is also used by MDA engineering to develop battle simulations for the ground test program; and by the Warfighter in developing tactics, techniques, and procedures.</p> <p>Recurring work: Conduct of key Kill Vehicle (KV) engineering assessments including integrated sneak circuit analyses, Worst Case Circuit Analysis, and electrical/thermal derating analyses to document current performance/capability and identify potential risk areas to assess and improve overall KV reliability for the Warfighter; collection of Reliability, Availability, Maintainability and Testability (RAM-T) data and analysis of performance metrics on the Operational System in order to continuously improve the system for the Warfighter; continue the Probabilistic Risk Assessment (reliability model) development to assess the GBI</p>

**Remarks**

**D. Acquisition Strategy**

The GMD program will continue to follow testing, development, and evolutionary acquisition through incremental development. The Agency acquisition strategy ensures GMD components are upgraded to improve both All-Up System (AUS) performance and AUR performance in order to retain the proven GMD contribution to the Integrated BMDS. This acquisition approach reduces obsolescence risk, provides opportunities for incremental capability improvements, and allows decision makers to make informed trades between cost, schedule, and performance while exploring improved operational and technological capabilities.

GMD awarded a competitive Development and Sustainment Contract (DSC) on December 30, 2011. This contract included development, fielding, test, systems engineering, integration, and configuration management; equipment manufacturing and upgrade; training, operations and sustainment of the GMD system and associated support facilities.

In January of 2018 the MDA Director approved the extension of the DSC to execute the Missile Defeat and Defense Enhancement scope (20 silos and 20 GBIs). On January 31, 2018, the DSC Extension was awarded to the Boeing Company with a period of performance through Q1 FY2024. In addition to the MDDE requirements,

**Exhibit R-2A, RDT&E Project Justification:** PB 2020 Missile Defense Agency **Date:** March 2019

<b>Appropriation/Budget Activity</b>	<b>R-1 Program Element (Number/Name)</b>	<b>Project (Number/Name)</b>
0400 / 4	PE 0603882C / <i>Ballistic Missile Defense Midcourse Defense Segment</i>	MD08 / <i>Ground Based Midcourse</i>

the DSC Extension also includes supporting test, engineering, software, and performance based logistics scope. The DSC structure breaks out major efforts into separate Contract Line Item Numbers with individual incentives for management insight, accounting and property accountability.

GM is also implementing a more robust Program Board structure allowing more Government insight and decisions into the technical baseline and has changed business processes for greater Government involvement in Program decisions. In addition, GM utilizes Government laboratory modeling & simulation, and analysis capabilities to augment Boeing's efforts.

**Note**

Increase from FY 2019 to FY 2020 reflects increased efforts to mitigate cybersecurity threats with the implementation of cyber resiliency on the GMD systems through the development of system level requirements which will enhance the operation capability.

**A. Mission Description and Budget Item Justification**

Sustains MDA Risk Management Framework and Controls Validation Testing (CVT) activities, analysis of validation results, risk assessments and reviews of proposed Program Manager/Information Systems Security Manager (PM/ISSM) Plans of Action and Milestones (POA&Ms) for MDA GMD mission systems. It maintains the Assessment and Authorization (A&A) data repository, capturing the RMF documentation (artifacts, validation results, and Cybersecurity Risk Assessment results, and Authorization decisions) and POA&Ms on all MDA information systems.

Monitor and track Cybersecurity mitigations detailed in Information Technology security POA&Ms. Activities include preparation of A&A documentation and authorization recommendations to the MDA Senior Information Systems Security Officer (SISSO)/ Security Control Assessor (SCA), and Authorizing Official (AO). Independent Verification and Validation (IV&V) team actions ensure the availability, integrity, authentication, confidentiality and non-repudiation of the MDA mission, test and administrative systems. Activities in the Project are necessary to comply with the Federal Information Systems Modernization Act (FISMA) 2014.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

<b>Articles:</b>	-	-	-
<b>Description:</b> Sustains the MDA RMF and CVT activities, analysis of validation results, risk assessments and reviews of proposed PM POA&Ms for MDA GMD mission system. It maintains the AA data repository, capturing the RMF documentation (artifacts, validation results, and Information Assurance Risk Assessment results, and Authorization Official (AO) accreditation decisions) and POA&M on all MDA information systems. Provides GMD Cybersecurity civilian salaries. Conducts cybersecurity/ Information Assurance (IA) engineering and architecture planning for GMD information technology systems. Plans and tests cybersecurity controls for BMDS GMD systems. Conducts CVT of GMD mission systems and provide PO&Ms to mitigate cybersecurity deficiencies. Conducts annual cybersecurity reviews on the GMD enclaves to assess compliance in implementing and maintaining cybersecurity controls. Develops GMD DoD RMF Assessment and Authorization packages.			
Specific and/or unique accomplishments to each FY are as follows:			
<b>FY 2019 Plans:</b>

**Remarks**

**D. Acquisition Strategy**

GMD uses the cybersecurity funding to apply security engineering principles to acquire, design, test, implement and field technical solutions throughout the systems architecture to ensure sufficient protections exist from a threat and risk based approach. To achieve this, cybersecurity protection requirements must be validated and properly flowed into system requirements and design specifications early enough to provide the most cost benefit. Many BMDS systems are now or within the very near future undergoing tech-refresh and so the opportunity to receive the most benefit of implementing the more stringent protections is at hand and aligns with the proposed budget as submitted.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

**Program MDAP/MAIS Code:** 362

**Note**

Homeland Defense Radar - Hawaii (HDR-H) funding was appropriated/budgeted as follow:

FY 2017: PE 0603884C BMDs Sensors, Project MD41

FY 2018: PE 0604673C Pacific Discriminating Radar, Project MD41

FY 2019: PE 0604672C Homeland Defense Radar Hawaii, Project MD41

The decrease from FY 2019 to FY 2020 reflects completion of AN/TPY-2 development in FY 2019 to provide improved raid handling and enhanced Aegis Engage on Remote Capability.

**A. Mission Description and Budget Item Justification**

The Ballistic Missile Defense System (BMDS) network of layered Sensors provides essential situational awareness and fire control data for the command and control of BMDS weapon systems, such as Ground-Based Midcourse Defense (GMD), Aegis Ballistic Missile Defense (BMD), and Terminal High Altitude Area Defense (THAAD). The suite of remote ground-based sensors provides; early warning, midcourse and terminal missile defense threat data enabling layered detection and tracking of missile targets, providing fire-control quality position, velocity, and discrimination data through Ground-Based Midcourse Defense Fire Control (GFC), or Command and Control, Battle Management and Communications (C2BMC).

Overlapping coverage of geographically diverse sensors provides improved threat track data, reduces the impact of the loss of any one sensor, and reduces the potential impact of countermeasures. The extended coverage and accuracy provided by a network of layered sensors increases the defensive footprint and reduces the number of target engagements required, thereby conserving interceptor inventory and maintaining a high probability of successful engagement. Networked forward-based sensors enable C2BMC to pair the best sensor coverage with the best available weapon system to provide the most effective defense against missile threats.

This program element includes BMDS threat discrimination improvements, which will enhance BMDS effectiveness against the evolving adversary threat. The result will be a BMDS architecture more capable of discriminating and destroying reentry vehicles with a higher degree of confidence, improving Warfighter shot doctrine, and

Exhibit R-2, RDT&E Budget Item Justification: PB 2020 Missile Defense Agency Date: March 2019

<b>Appropriation/Budget Activity</b> 0400: <i>Research, Development, Test &amp; Evaluation, Defense-Wide I BA 4: Advanced Component Development &amp; Prototypes (ACD&amp;P)</i>	<b>R-1 Program Element (Number/Name)</b> PE 0603884C / <i>Ballistic Missile Defense Sensors</i>
---	--

more efficiently using interceptor inventory. BMDS threat discrimination improvements are funded from the Enabling (0603890C), Midcourse (0603882C), BMD Sensors (0603884C), C2BMC (0603896C), and Aegis BMD (0603892C) PEs.

The BMD Sensors Program contributes to regional missile defense through the development, delivery and deployment/redeployment of Army Navy/Transportable Radar Surveillance and Control (AN/TPY-2) radars for operations or tests. AN/TPY-2 radars can be configured to operate either as a THAAD Fire Unit Radar (terminal mode) or Forward-Based Radar. These radars are transportable, they add flexibility to respond to geographical changes in threats. Radars provide early warning tracking and discrimination data through all phases of missile flight. Through the BMDS C2BMC and coalition data links, the AN/TPY-2 provides fire control data to enable remote Standard Missile (SM)-3 engagements by Aegis BMD, and to cue deployed THAAD and U.S. and partner Patriot batteries.

The BMDS sensor network includes; the COBRA DANE Radar at Eareckson Air Station, Alaska, the Upgraded Early Warning Radars (UEWRs) at Beale Air Force Base, CA; Fylingdales Royal Air Force, United Kingdom, and Thule Air Base in Greenland for defense of the homeland. The Clear Ultra High Frequency Early Warning Radar (EWR), at Clear Air Force Station, AK, and the Cape Cod EWR, at Cape Cod Air Force Station, MA, are also being upgraded to include missile defense functionality against long-range threats in addition to their existing Missile Warning and Space Surveillance missions. Upgrade activities began in CY 2012 and are now projected to be completed in CY 2020 due to current UEWR operational configuration emergency maintenance required by AF Space Command that blocked access to the radar sites for operational testing. The addition of the Clear UEWR and Cape Cod UEWRs to the BMDS sensor architecture improves BMDS sensor coverage and provides new engagement options against long-range missile threats from Northeast Asia and Southwest Asia respectively.

In accordance to Section 1684 (e) (2) of the National Defense Authorization Act for fiscal year 2016, the Missile Defense Agency is required to submit with the President's Budget request for fiscal year 2020 a plan to carry out Section 1684(d) and an update on progress in meeting Section 1684 (b) and (c). A decision to deploy an additional radar in the Atlantic has not yet been made. Current planned radar deployments include the Long-Range Discrimination Radar in Alaska, the Homeland Defense Radar - Hawaii, and the Pacific Radar that begin operating in 2021, 2023, and 2026 respectively.

The SBX is currently deployed in the Pacific Ocean. Current operational plans do not require homeporting of the SBX to the Atlantic.

The MDA previously completed the studies required by Section 1684 (b) and (c) of the National Defense Authorization Act for fiscal year 2016 and submitted them to the Congressional Defense Committees.

Cyber Operations sustain the Risk Management Framework (RMF) and Controls Validation Testing (CVT) activities, analysis of validation results, risk assessments, reviews of Plans of Action and Milestones (POA&Ms), and alignment and integration to the Tier 2 Cybersecurity Service Provider (CSSP) for the Sensors mission system.

• Other Adjustment	0.000	0.000	33.249	-	33.249

**Change Summary Explanation**

Net increase in FY 2018 from PB19 to PB20 reflects improvements in discrimination capabilities and USFK JEONS.

Net increase in FY 2019 from PB19 to PB20 reflects enacted congressional increases (USFK JEON, cyber threats, improved discrimination capabilities, systems engineering enhancements, AN/TPY-2 radar improvements) and decreases (program operations unjustified request; and transfer of Pacific Radar from this Program Element to Pacific Radar PE 0604673C).

Increase in FY 2020 from PB19 to PB20 provides additional VV&A, M&S Enterprise improvements, and USFK JEONS integration requirements.

**Note**

Decrease in FY 2020 reflects the completion of AN/TPY-2 development in FY 2019 providing new BMDS capabilities, to include additional raid handling and enhanced Aegis BMD Engage on Remote.

**A. Mission Description and Budget Item Justification**

The BMDS Radars project includes development of future AN/TPY-2, COBRA DANE, LRDR, Sea Based X-Band (SBX), and UEWR capabilities through system engineering; software development; and testing support.

Modeling and Simulation (M&S) efforts include enhanced sensor models, development of Radio Frequency scene generators, integration of digital simulations into the Ballistic Missile Defense System (BMDS) M&S architecture, and Verification, Validation, and Accreditation of radar models. United States Forces Korea (USFK) Joint Emerging Operational Needs Statement (JEONS) provides rapid deployment of software upgrades to optimize performance against increasing threats and improve regional integration. This project also funds participation and support for Ballistic Missile Defense System (BMDS) element ground and flight test campaigns and Warfighter games and exercises.

This project will continue development of discrimination advanced algorithms for the AN/TPY-2, COBRA DANE, Sea Based X-Band (SBX), and the UEWR radars to counter evolving threats. The discrimination improvement effort will develop and field integrated Element capabilities to improve BMDS ability to identify lethal and non-lethal objects. Sensors will continue development of discrimination improvement mid-term design and test support for SBX and far-term trade analysis and planning.

<b>Title:</b> Basic Development Program	25.004	25.502	28.742
<b>Articles:</b>	-	-	-
<b>Description:</b> The Basic Development Program includes development and testing of software maintenance updates to address software trouble reports identified on fielded SW versions and flight/ground test events. Software maintenance updates also includes annual cybersecurity certifications and accreditations, testing for vulnerabilities, and third party assessments of all sensors systems. Software improvement efforts also include optimization of increased processing capabilities. The Basic Development Program also provides analysis of software performance during flight and ground testing of Phased Adaptive Approach (PAA) Phases II and III to conduct Materiel Release Analysis for software delivery. The Materiel Release Closure Plan for the AN/TPY-2 ensures the Reliability, Availability, and Maintainability (RAM) Program promotes reliability growth in the suite of AN/TPY-2 radars via product improvements.

<b><i>Title:</i></b> Capability Development Program	136.611	223.777	103.973
<b><i>Articles:</i></b>	-	-	-
<b><i>Description:</i></b> The Capability Development Program provides engineering support to enable compliance with BMD System Specification threat capabilities and addresses advanced threats prevalent in 2017 and beyond. This task includes the redesign of select components to address obsolescence and improve reliability of the system. This task initiates electronic protection and objective debris mitigation development efforts to reduce or eliminate the effect of corporate clutter and electronic attack on sensors. This effort develops the Post Intercept Assessment (PIA) capability for the SBX and UEWRs. It develops, designs and tests sensor mid-term discrimination improvements for X-Band radars, to include SBX threat discrimination improvements. It also performs object classification performance updates to UEWR radars. This effort funds participation in far-term discrimination improvement threat model specifications and develops discrimination and countermeasure mitigation capability development. Additional software development activities include support to THAAD Launch on Remote (LoR) capability and X86 performance optimization to enhance processing speed.			
Specific and/or unique accomplishments to each FY are as follows:			
<b><i>FY 2019 Plans:</i></b> - SEE ABOVE			
<b><i>FY 2020 Plans:</i></b> - Initiate additional raid handling, - Initiate enhanced Aegis BMD Engage on Capability, - Initiate expanded active sensor bias and full sensor bias reporting. - Initiate threat updates and verification, core standards system engineering, required updates to models and simulation, and performance assessments.

**Remarks**

**D. Acquisition Strategy**

The Radar Development Contract (RDC) awarded on Nov 1, 2017 supports the Sensors Directorate's X-Band Radars (XBR). Ballistic Missile Defense System (BMDS) capability and performance requirements, which underpin continuing XBR development requirements include, but are not limited to, the Army/Navy Transportable Radar Surveillance and Control (AN/TPY-2) radar and the Sea-Based X-Band (SBX) radar. These requirements stem directly from formal Warfighter requirements as developed in the United States Strategic Command (USSTRATCOM)-led Warfighter Involvement Process (see USSTRATCOM Special Instruction (SI) 538-3, Missile Defense Warfighter Involvement Process, June 25, 2008). Achievable requirements documented in the Prioritized Capabilities List (PCL) and Modification and Fielding Requirements List (MFRL) are documented in MDA's Achievable Capabilities List (ACL) and translated via the BMDS architecture and system specifications into flow-down requirements, characteristics, and capability needs for individual BMDS program specifications, and ultimately are approved through the systems engineering and baseline change management process for BMDS programs to execute. The RDC supports the XBRs for product improvement, including developmental upgrades of software and development of hardware and software to meet enhanced capabilities and risk reduction measures; warfighter support, including wargames and exercise support; engineering services, including engineering support for delivered and accepted radars to facilitate maintenance efforts which may include, but are not limited to, hardware obsolescence studies, hardware redesign, technology insertion and refurbishment; BMDS test subject matter expert (SME) support; modeling and simulation SME support; and cybersecurity. These support activities are for all AN/TPY-2 radars, in the Forward Based Mode (FBM) and Terminal Mode (TM), and the SBX Radar to include the Weather Air Search Radar (WxASR) located on the SBX platform.

The BMDS Communications System Complex-Transportable (BCSC-T) Program Plan addresses the design, development, acquisition, testing, integration, activation, and fielding of the BCSC-T. The overall executing agent is the Program Manager Defense Communications and Transmission Systems (PMDCATS). Lockheed Martin Mission Systems (C2BMC prime contractor) via an Other Transaction Agreement provides on-site support.

**Note**

Increase from FY 2019 to FY 2020 provides developmental efforts for DoD directed cybersecurity improvements including DoD required cybersecurity tools, policies and procedures for improved network defense against cyber threats to enhance BMDS cybersecurity posture as well as to begin full Sensors system integration with an automated BMDS Cybersecurity Service Provider (CSSP).

**A. Mission Description and Budget Item Justification**

Sustain the Department of Defense Instruction (DoDI) 8510.01 Risk Management Framework (RMF) for DoD Information Technology (IT) requirement for the MDA Sensors Directorate and conduct Security Control Assessments (SCA) activities, analysis of validation results, risk assessments and reviews of proposed Program Manager/Information System Security Manager (PM/ISSM) Plans of Action and Milestones for MDA Sensors mission systems. It also includes support for external cybersecurity assessments and penetration testing of the Sensors mission systems, both in laboratory Element Cybersecurity Experiments and in ground test activities, in accordance with the Director, Operational Test and Evaluation (DOT&E) directive and the Integrated Master Test Plan (IMTP). It maintains the Assessment and Authorization (A&A) data repository, capturing the RMF documentation (artifacts, validation results, Cybersecurity Risk Assessment results, cybersecurity scorecard, and Authorizing Official (AO) authorization decisions) and POA&M for all MDA information systems. This project supports the alignment, development, and implementation of an integrated Tier 2 Cyber Security Service Provider (CSSP) capability on the Sensors mission systems IAW the DoD Cybersecurity Discipline Implementation Plan and DoDI 8530.01 Cybersecurity Activities Support to DoD Information Network Operations.

Provides the monitoring, prioritization, and tracking of Cybersecurity mitigation detailed in Information Technology security POA&Ms. The activities include preparation of A&A documentation and accreditation recommendations to the MDA Senior Information Security Officer (SISO)/Security Control Assessor (SCA) and Authorizing Official (AO). Independent Verification and Validation (IV&V) team actions ensure the availability, integrity, authentication, confidentiality and non-repudiation of the MDA mission; test; and administrative systems. Activities in the Project are necessary to comply with the Federal Information Security Management Act (FISMA).

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

<b>Title:</b> Network / System Assessment and Authorization (A&A)	3.894	6.079	8.212
<b>Articles:</b>	-	-	-
<b>Description:</b> Cyber Operations funds Sensors Directorate Information System Security Manager (ISSM) civilian salaries and cybersecurity engineering and architecture planning for program information technology systems. This project plans and tests the cybersecurity controls for the BMDS and maintains Sensors Risk Management Framework (RMF) authorizations for Sensors-managed information systems, conducts Controls Validation Testing (CVT)/ Security Controls Assessment (SCA) of sensors mission and support systems and provides and maintains Plans of Action and Milestones to mitigate cybersecurity deficiencies.

Quantity of RDT&E Articles	-	-	-	-	-	-	-	-	-	-		

**Note**

HDRH funding was appropriated/budgeted as follow:

FY 2017: PE 0603884C BMDS Sensors, Project MD41 FY 2018: PE 0604673C Pacific Discriminating Radar, Project MD41 FY 2019: PE 0604672C Homeland Defense Radar Hawaii, Project MD41

**A. Mission Description and Budget Item Justification**

The Homeland Defense Radar-Hawaii (HDR-H) is a persistent discrimination radar that will provide additional capability to the Ballistic Missile Defense System (BMDS) to support the defense of Hawaii. HDR-H's primary mission is to provide autonomous acquisition and persistent precision tracking and discrimination to optimize the defensive capability of the BMDS and counter evolving threats. The HDR-H radar will be integrated into the BMDS through the C2BMC system and will feature a scalable and open system architecture to mitigate evolving threats. HDR-H's inherent capability will support additional mission areas, including but not limited to, Space Situational Awareness (SSA). The HDR-H radar is comprised of an equipment shelter housing a singled-faced array, a Mission Control Facility (MCF) which supports radar operations, a Radar Antenna Base, a Thermal Control System, and supporting facilities and infrastructure. The radar prime contractor will be responsible for building and fielding the radar equipment with associated Radar Antenna Base and Thermal Control, and the HDR-H Equipment Shelter (HES). Siting surveys will be conducted and EIS will be completed to determine the final recommended site. The HDR-H radar will be made operational in Hawaii by not later than September 30, 2023.

<b>Title:</b> MD41 Homeland Defense Radar - Hawaii (HDR-H)"	2.078	0.000	0.000
<b>Articles:</b>	-	-	-
<b>Description:</b> The HDR-H program includes requirements development activities associated with systems engineering, hardware and software development, discrimination improvements, design reviews, testing, and Models and Simulation (M&S) efforts for radar development. Efforts include site activation and preparation of site infrastructure for construction activities. The program will develop and integrate C2BMC systems for HDR-H functionality.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Decrease from FY 2019 to FY 2020 reflects the return to core funding levels following completion of content added in response to FY 2019 congressional funding increase.

**A. Mission Description and Budget Item Justification**

The Ballistic Missile Defense System (BMDS) Enabling Programs provide critical products and processes needed to combine element missile defense systems into a single, integrated and layered BMDS to provide new defensive capabilities and evaluate existing capabilities against the emerging threats. Specifically, the Enabling Programs:

- Define BMDS architectures and functional requirements, conduct Analyses of Alternatives (AoA) for the DoD, and provide engineering requirements, execution support, and pre- and post-mission analysis for BMD System tests
- Provide validated models and simulations for BMD System assessment
- Assess BMDS performance (through data collection and analysis) and deliver capabilities to the Warfighter
- Provide multi-disciplinary security and intelligence support for BMDS acquisition, development, test, and deployment
- Identify potential threats and vulnerabilities to MDA and the BMDS and develop and implement strategies to mitigate those risks

**UNCLASSIFIED**

---	--

- Assess architecture alternatives to address advanced threats and provide recommendations for future BMDS configurations to keep pace with evolving threats
- Provide Information Management tools and products supporting the development of BMDS capabilities while safeguarding networks and critical program information
- Provide MDA secure communication networks, IT systems, special purpose processing nodes, operations and monitoring centers, and disaster recovery and continuity of operations requirements
- Evaluate quality, technical safeguards, and mission assurance effectiveness
- Assess System ability to maintain integrity and superiority with advances in technology development

This Program Element also funds BMDS threat discrimination development to enhance BMDS effectiveness against the evolving adversary threat. The end result will be a BMDS architecture more capable of discriminating and destroying reentry vehicles with a higher degree of confidence, improving Warfighter shot doctrine, and more efficiently using interceptor inventory. BMDS threat discrimination development is funded from the Enabling (0603890C), Midcourse (0603882C), BMD Sensors (0603884C), BMD Command, Control, Battle Management and Communications (C2BMC) (0603896C), and Aegis BMD (0603892C) PEs.

<b>B. Program Change Summary (\$ in Millions)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020 Base</b>	<b>FY 2020 OCO</b>	<b>FY 2020 Total</b>
Previous President's Budget	465.642	540.926	542.326	-	542.326
Current President's Budget	533.993	620.831	571.507	-	571.507
Total Adjustments	68.351	79.905	29.181	-	29.181
• Congressional General Reductions	0.000	-3.595			
• Congressional Directed Reductions	-10.000	-10.800

• Congressional Adds	56.342	94.300			
• Congressional Directed Transfers	0.000	0.000			
• Reprogrammings	27.236	0.000			
• SBIR/STTR Transfer	-10.566	0.000			
• Missile Defeat and Defense Enhancement	0.000	0.000	0.000	-	0.000
• Other Adjustment	5.339	0.000	29.181	-	29.181

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects the Omnibus Above Threshold Reprogramming for advanced threat systems engineering and cybersecurity, and the following congressional adjustments:

- decrease of \$10.000 million for development activities in support of an organic Aegis Ashore Defense capability.
- increase of \$6.000 million for additional modeling and simulation capabilities for the all-digital M&S representation of the BMDS.
- increase of \$23.342 million for improved discrimination capabilities.
- increase of \$1.900 million to repeat flight test FTM-29 (FTM-45).
- increase of \$25.000 million for additional cyber training requirements and cyber defense enhancements to counter emerging threats.

Increase in FY 2019 from PB19 to PB20 reflects the following congressional adjustments:

UNCLASSIFIED

Exhibit R-2, RDT&E Budget Item Justification: PB 2020 Missile Defense Agency Date: March 2019

<b>Appropriation/Budget Activity</b> 0400: <i>Research, Development, Test &amp; Evaluation, Defense-Wide I BA 4: Advanced Component Development &amp; Prototypes (ACD&amp;P)</i>	<b>R-1 Program Element (Number/Name)</b> PE 0603890C / <i>BMD Enabling Programs</i>
---	--

- decrease of \$6.600 million for modeling and simulations.
- decrease of \$4.200 million for cyber operations.
- increase of \$34.100 million for systems engineering improvements.
- increase of \$4.000 million for discrimination improvements.
- increase of \$16.200 million for cyber assessments of Defense Industrial Base.
- increase of \$40.000 million for cyber security enhancements.

Increase in FY 2020 from PB19 to PB20 provides emerging Department of Defense priorities, including execution of a continuous integration and agile ground testing capability; modeling and simulation enhancements for Hardware-in-the-Loop (HWIL) and end-to-end digital simulation to provide significantly more data for BMD System Assessment and give Warfighters confidence in BMDS performance; and additional enhancements to cybersecurity.

**Note**

The budget project reflects the FY 2019 Appropriations Act add of \$38.1 million for Systems Engineering Improvements and Discrimination Improvements. The FY 2020 decrease reflects a return to Core Engineering funding levels following completion of congressional add content.

**A. Mission Description and Budget Item Justification**

The System Engineering & Integration (SE&I) workforce, including Industry and Contractor Support Services (CSS), defines, designs, tests and integrates the BMDS, and provides analysis, decision support and planning activities for real-world operations to the National Command Authority, Joint Staff, Military Services, Combatant Commanders, Operational Test Agencies, Director of Operational Test and Evaluation, Allies, and others.

The SE&I Major Program Goals are:

- Plan, design, develop, integrate, and test a layered BMDS that provides the required BMD performance
- Provide system-level engineering support to the BMDS Elements, and lead collaborative cross-Element, cross-Component engineering
- Lead the engineering required to achieve Enhanced Homeland Defense capability
- Develop architectures and requirements to respond to the proliferation of short and medium range ballistic missiles
- Provide a more effective missile defense capability for U.S. deployed forces, allies, and partners, and enhance homeland defense
- Develop discrimination improvements for the Homeland and Regional Defense missions
- As technical authority for Integrated Air and Missile Defense (IAMD), provide a consistent, disciplined systems engineering process using a multi-Service team to integrate Joint IAMD systems
- Provide technical direction to Element and Component developers and provide System-level forums to track, assess, and improve hardware and software reliability
- Identify BMDS capabilities and limitations
- Develop performance assessment requirements, verify BMDS performance through testing, and conduct assessments to form the basis for technical capability declarations in support of fielding decisions
- Identify Critical Engagement Conditions and data required to develop the test campaigns to demonstrate BMDS performance
- Define the test objectives necessary to anchor BMDS-level models and simulations, enable independent verification and validation
- Identify System issues occurring in ground and flight tests and lead the effort to resolve them
- Analyze architecture alternatives and new technologies to establish technical roadmaps for future capabilities
- Ensure the BMDS is complementary to and interoperable with NATO and other theater systems
- Develop anti-tamper approaches to enable international fielding of the BMDS

--	---	---

The BMDS discrimination and countermeasures mitigation effort will develop and field integrated Element capabilities to increase the BMDS ability to identify lethal and non-lethal objects. SE&I will conduct BMDS performance analysis and engineering to specify the BMDS requirements and interfaces to achieve the capability increase.

<b>Title:</b> Manufacturing and Producibility	4.944	7.724	4.686
<b>Articles:</b>	-	-	-

**Description:** This activity supports a system-level manufacturing and producibility team to address materials, key component, and subsystem design and development to reduce cycle time, part count, and risk. This activity also supports a system-level reliability team to reduce risk of test failures and performance shortcomings and drive reliability into system and component designs.

- Assess BMDS industrial base and determine critical manufacturing technologies
- Conduct assessments of critical component supply base and update critical technologies database
- Collaborate with national security space components on investment strategies for critical technologies
- Develop engineering management tool to characterize industrial base risks.
- Utilize supply chain risk identification and mitigation tracking system to mitigate manufacturing supply issues for critical components
- Assess the effectiveness of reliability programs for each MDA Product (Radar, Launcher, Missile/Interceptor, etc.) to achieve/sustain required reliability.
- Perform reliability, composite risk, and probability of mission success assessments for flight tests.
- Identify failure trends/modes and evaluate impact on the Probability of Mission Success; evaluate potential corrective actions
- Provide element/program scorecard data to support reliability evaluations/assessments.
- With Logistics Support, develop MDA Reliability and Logistic Policies/Plans to promote an integrated Sustainability efforts
- Ensure that BMDS products have achieved the required maturity in Reliability, Availability, and Maintainability (RAM) to support the transition from MDA to the appropriate service organization; provide RAM expertise as needed to Element Program Offices.
- Provide updates to MDA RAM policy and guidance.

Specific and/or unique accomplishments to each FY are as follows:

**FY 2019 Plans:**

- SEE ABOVE.
- Per FY 2019 Appropriations Act Add for Systems Engineering Improvements:
  - Address systems engineering challenges in the manufacturing and producibility arena to address concerns regarding BMDS reliability and sustainability

**FY 2020 Plans:**

- SEE ABOVE.

**FY 2019 to FY 2020 Increase/Decrease Statement:**

**Remarks**

**D. Acquisition Strategy**  
In order to optimize the performance of the BMDS, MDA leverages the nation's engineering Centers of Excellence at government agencies and Military Services, FFRDCs, UARCs, and industry. The executing agents utilize various contracting strategies in a flexible manner to maximize their contribution to the BMDS. Products and Services will be acquired by competitive means to the extent that is possible and practical.

**Note**

Increase from FY 2019 to FY 2020 provides ramp-up to conduct pre-mission activities for Continuous Integration and Agile Test (CI/CAT) sprints in FY 2021 while maintaining support for current flight- and ground test missions, and implementation of a Continuous Development and Integration (CDI) Environment to reduce test risk by resolving technical issues early, enabling better flexibility and ability to meet CI/CAT testing tempo.

**A. Mission Description and Budget Item Justification**

The Enabling Test project includes the SE&I that drives BMDS test planning, execution, and post-test analysis and assessment, and the M&S tools and framework required to prepare for and execute ground and flight tests.

SE&I allocates test requirements to individual test events, designs test architectures, defines target requirements, and generates ground and flight test scenarios to collect data essential for model validation and system verification. SE&I works with the Service Operational Test Agencies (OTA) to incorporate operational test requirements into BMDS events to ensure the incremental capability being transferred to the Warfighter will be operationally effective, suitable, and survivable. The resulting data ensures BMDS requirements are being met by the system under test and confirms proper BMD System operation. It also helps to anchor system and element M&S for use in simulations to characterize BMDS performance across the battle space, including areas where no live-fire-testing is performed.

Engineering ground test (GT) responsibilities include BMDS performance sensitivity analysis; scenario design and optimization; analysis to mitigate test data collection risks; test architecture certification analysis; and test result analysis. Flight test (FT) responsibilities include pre-mission scenario analysis to identify and mitigate test execution risk in advance; range safety analysis; mission analysis during test execution; extensive post-mission analysis; and event analysis reporting products. These efforts inform senior leaders' decisions on BMDS development and evolution and underpin the BMDS capability declarations that deliver new capabilities to the Warfighter.

Pre-mission predictions use the test framework and Hardware in the Loop (HWIL) and digital models of the test configuration to exercise system interfaces, calculate expected BMDS performance, and gauge readiness for test execution. Post-mission, MDA uses test results to anchor System and element M&S and provide confidence in their ability to correctly predict BMDS behavior and performance.

Reliability, Availability and Maintainability data collected through BMDS test events increases confidence in BMDS performance over the entire lifecycle. SE&I documents any abnormal system behavior observed during tests and alerts MDA to issues with test article reliability. SE&I leads test failure review boards, identifies data collection shortfalls, and reallocates objectives to future test events as needed until all required model validation data is collected. The Failure Reporting, Analysis, and Corrective Action System provides a framework to investigate test failures and anomalies and identify solutions that will ultimately improve BMDS performance and reliability.

<b>Appropriation/Budget Activity</b> 0400 / 4	<b>R-1 Program Element (Number/Name)</b> PE 0603890C / BMD Enabling Programs	<b>Project (Number/Name)</b> MT23 / Enabling - Test
--	---	--

MDA's M&S systems and products provide the BMDS, the Warfighter, and the OTA with the capability to evaluate individual BMDS components and the overall M&S system-of-systems. MDA validates and accredits system-level models and simulations to support accurate and comprehensive assessments of the BMDS. M&S System and product testing follows the test program outlined in MDA's IMTP and serves as a necessary precursor to conducting BMD System-level testing. Resources for the planning, design, execution and management of this testing are provided in accordance with the BMDS Test Policy, as listed in the most current version of the IMTP.

**D. Acquisition Strategy**

In order to optimize the performance of the BMDS, MDA leverages the nation's engineering Centers of Excellence at government agencies and Military Services, FFRDCs, UARCs, and industry. The executing agents utilize various contracting strategies in a flexible manner to maximize their contribution to the BMDS. MDA will acquire products and services by competitive means to the extent practical.

**A. Mission Description and Budget Item Justification**

The Intelligence and Security program provides multi-disciplinary intelligence and security for the BMDS acquisition, development, test and deployment. The Intelligence and Security Major Program Goals are:

- Ensure the Intelligence Community (IC) understands and fulfills MDA's current and future prioritized intelligence requirements; advocate BMDS test intelligence requirements; and work closely with the IC.
- Leverage available National and DoD Counterintelligence resources. Ensure counterintelligence products and services are fully integrated into all RDT&E programs and activities to protect classified information and critical technologies and to protect MDA and BMDS personnel, facilities, information and activities.
- Define cybersecurity systems engineering requirements for BMDS assets. Identify cybersecurity systems engineering and infrastructure intelligence requirements to focus IC collection, analysis and production to target MDA/BMDS cyber vulnerabilities. Incorporate cybersecurity engineering requirements into the BMDS systems engineering process.
- Provide cross-Agency acquisition security oversight and support for the identification and protection of Critical Program Information (CPI), and evaluation and implementation of developing Supply Chain Risk Management (SCRM) requirements. Provide physical security for BMDS weapons/sensor system deployments, including Foreign Military Sales (FMS). Implement MDA's information security and declassification programs. Strengthen Test and Operations Security (OPSEC) across the Agency.

The Security and Intelligence Project captures five specific areas: 1) Intelligence; 2) Counterintelligence; 3) Cybersecurity Engineering; 4) Program Protection; and 5) Threat Systems Engineering. Collectively, these efforts provide critical information regarding threat ballistic missile system capabilities; protection of personnel, activities, and technology from espionage and terrorism; and identification and mitigation of BMDS system vulnerabilities.

	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
<b>Title:</b> Intelligence	8.842	10.186	9.696
<b>Articles:</b>	-	-	-
<b>Description:</b> The Intelligence program provides expertise to develop intelligence products on threat ballistic missile system capabilities, and leverages unique intelligence-community developed, owned, and operated capabilities for the benefit and advocacy of the missile defense community. Program goals include:			
- Serve as designated intelligence broker between MDA and the Intelligence Community			
-- Maintain and communicate prioritized, specific BMDS intelligence requirements to the Intelligence Community.

<b>Title:</b> Program Protection	10.217	11.889	11.443
<b>Articles:</b>	-	-	-

**Description:** Program Protection protects BMDS information, Critical Program Information, technologies, and deploying systems; develops and coordinates Security Classification Guides; and performs declassification reviews to identify equities that warrant continued protection in order to preserve the technological advantage of the BMDS. Program Protection also coordinates MDA intelligence, counterintelligence and security to help BMDS test activities. Program goals include:

- Perform reviews required for all Agency public release, security classification, and FOIA and Mandatory Declassification Reviews to ensure sensitive BMDS information is not inadvertently released into the public domain.
- Perform Information Security program management and oversee implementation by MDA programs
- Perform internal program reviews, policy oversight and implementation, and training to identify and fix deficiencies and protect critical BMDS information

**A. Mission Description and Budget Item Justification**

The BMD Information Management Systems budget project funds information technology mission critical functions necessary for the efficient operations and safeguarding of BMD information in compliance with DoD policies and in keeping with the President's declaration on 29 May 2009, "cyber threat is one of the most serious economic and national security challenges we face as a nation". IT is critical to the day-to-day functions of MDA personnel to communicate (classified and unclassified) with each other, Congress, senior DoD and other U.S. government agency personnel, Combatant Commander's, NATO partners, and other industry partners. Communication among these organizations facilitates the MDA mission of developing and fielding an integrated BMDS to defend the United States, our deployed forces, allies, and friends against all ranges of enemy ballistic missiles in all phases of flight.

MDA information management systems capabilities support rigorous missile defense Research, Development, Test and Engineering (RDT&E) and facilitate the development of technologies to guard against evolving missile threat. Communications are vital for missile defense to continue a viable homeland defense against rogue threats and to provide the integration required to defend deployed forces, allies, and friends against theater threats. The BMD information management consists of MDA Special Purpose Processing Nodes (SPPNs), IT systems, data centers, operations and monitoring centers which are vital to support the strategic mission of the Agency and necessary to meet disaster recovery and continuity of operations requirements. This infrastructure is required to sustain access to the Secret Internet Protocol Router Network (SIPRNET), Non secure Internet Protocol Router Network (NIPRNET), MDA classified and unclassified networks, classified and unclassified video teleconferencing services, test and business knowledge data centers, the Defense Research Engineering Network (DREN). These mission critical functions provide for the efficient operation and safeguarding of all agency information in locations supporting MDA around the world.

Project MD30 is aligned into the following inter-agency mission critical IT services and the associated plans in accordance with the Federal Information Technology Shared Services Strategy.

1. End User Support
2. Special Purpose Processing Nodes (SPPNs)
3. IT Planning and Solutions
4. Unified Communications
5. Portal and Data Services
6. Business Automation Services

<p><b>Title:</b> Special Purpose Processing Nodes (SPPNs) (formerly Network and Infrastructure Services)</p> <p align="right"><b>Articles:</b></p> <p><b>Description:</b> Provides for the developmental engineering and operational strategies and concepts; and planning, design, implementation and maintenance for MDA Research, Development, Test and Evaluation (RDT&amp;E) Special Purpose Processing Nodes (SPPNs) in Huntsville, AL and Colorado Springs, CO. The SPPN infrastructure consists of routers, switches, firewalls, compute, storage and intrusion detection systems that provide IT support to over 10,500 MDA classified/unclassified users worldwide. The SPPNs support dynamic and rapid modifications and reconfigurations of network infrastructure in support of RDT&amp;E mission and event unique configurations. Funds provide for network operations and performance monitoring; development of detailed solutions, designs, and plans; Disaster Recovery and Continuity of Operations (DR/COOP) rehearsals; Internet access management; and web filtering. Sustains core communications distribution services across the MDA Enterprise. Includes investments in equipment at end-of-life to comply with Federal and DoD mandated cybersecurity policies. Plan, engineer and implement sustainment projects for general IT services and business systems consistent with the IT architecture roadmap.</p>	17.309	10.964	11.632

**Remarks**

**D. Acquisition Strategy**

This acquisition strategy to provide IT services for MDA consists of three MDA issued contracts. The Integrated Research and Development for Enterprise Solutions (IRES) provides IT design, engineering, implementation and sustainment services. The Research and Development Enterprise Collaboration Services (RECS) provides Video Teleconferencing, Portal, Data and Business Automation Services. MDA issues multiple Military Interdepartmental Purchase Requisitions (MIPRs) for leased communications including DISA, DREN and the US Army.

**Note**

Accomplishments map to the Office of Management and Budget (OMB) and Office of the Secretary of Defense (OSD) approved Cybersecurity Taxonomy including 1) Preventing Malicious Activity; 2) Detect, Analyze and Mitigate Intrusions, 3) Planning, Policy Development and Workforce Management, 4)Continuous Monitoring and 5)Outside Federal Outreach, Defense Industrial Base.

Decrease from FY 2019 to FY 2020 reflects the FY 2019 congressional plus up for Cybersecurity Enhancements.

**A. Mission Description and Budget Item Justification**

A number of key IT strategies were identified in the DoD Information Technology Enterprise Strategy and Roadmap issued by the Deputy Secretary of Defense in 2011. The IT Roadmap specifically addresses the need to improve Cybersecurity. It states that DoD networks are under constant attack from cybersecurity threats launched from various sources. MDA must meet the National Command Authority Directives for rapid deployment of the BMDS while complying with the key principles of the Cybersecurity standards to ensure MDA remains a secure member of the DoD Information Network (DODIN).

DoD Instruction 8500.01 Cybersecurity issued in March 2014, requires continuous monitoring, data analysis, reporting and incident mitigation of DoD classified and unclassified, mission, test and administrative networks. To comply with the Instruction, MDA must implement a multi-tiered cybersecurity risk management capability to protect critical BMD data and systems from rapidly evolving internal and external threats.

The issuance of DoD Instruction 8510.01, Risk Management Framework (RMF) Information Technology in March 2014 requires additional resources to implement, manage, monitor and report as a result of a thirty-five percent increase in controls (237 controls with 817 enhancements). DoD 8510.01 also states that resources for implementing the RMF must be identified and allocated as part of the Defense planning, programming, budgeting, and execution process. The Controls must be tested on all IT supporting research, development, test and evaluation and DoD-controlled IT operated by a contractor or other entity on behalf of DoD and reported.

This project provides funds to sustain the Risk Management Framework (RMF) and Controls Validation Testing (CVT) activities, analysis of validation results, risk assessments and reviews of proposed Program Manager/Information Systems Security Officer (PM/ISSO) Plan of Action and Milestones (POA&M) for the MDA mission, test and administrative systems. Maintains the Certification and Accreditation (C&A) data repository, capturing the RMF documentation (artifacts, validation results, and Cybersecurity Risk Assessment results, and Authorizing Official (AO) accreditation decisions) and POA&M on all MDA information systems. Supports the monitoring and tracking of Cybersecurity mitigations detailed in IT security POA&Ms. Activities include preparation of C&A documentation and accreditation recommendations to the MDA PM/ISSO and AO. Independent Verification and Validation (IV&V) team actions ensure the availability, integrity, confidentiality and non-repudiation of the MDA mission, test and administrative systems. Activities in the Project are necessary to comply with Federal Information Security Management Act(FISMA).

<b>Appropriation/Budget Activity</b> 0400 / 4	<b>R-1 Program Element (Number/Name)</b> PE 0603890C / BMD Enabling Programs	<b>Project (Number/Name)</b> MC30 / Cyber Operations
--	---	---

This project funds the MDA Security Operations Center (SOC), responsible for monitoring, managing, patching, and maintaining MDA network and core IT services; issuing and tracking Technical Compliance Orders; and coordinating overarching Enterprise NetOps. The SOC provides the network security operations centers and supporting processes to protect and defend BMDS and the MDA Enterprise information and information systems.

The MDA Computer Emergency Response Team (CERT) monitors the classified and unclassified information technology MDA administrative IT networks and reports vulnerabilities. The MDA CERT coordinates with U.S. Cyber Command to identify and implement network vulnerability updates and patches to comply with U.S. Cyber Command vulnerabilities identified for DoD networks.

The project funds Cybersecurity governance management and administrative management support, annual Agency-wide computer-based IA training and metrics reporting, implementation of Public Key Infrastructure and Enabling and COMSEC related activities.

New Accomplishment beginning in FY 2019:

Outside Federal Service Outreach - Defense Industrial Base

- Participate and liaison with the Defense Security Service (DSS), MDA organizations and industry partners to conduct site visits and inspections to improve network monitoring capabilities at classified contractor sites to ensure protection of MDA BMDS data.

-Assist with the analysis of network scans of industry partner networks and mitigation of risks to BMDS data.

<b>FY 2019 to FY 2020 Increase/Decrease Statement:</b> Decrease from FY 2019 to FY 2020 reflects the FY 2019 congressional plus up for Cybersecurity Enhancements.				
<b>Title:</b> Preventing Malicious Cybersecurity Activity		9.685	18.738	20.080
<b>Articles:</b>		-	-	-
<b>Description:</b> Provide: Federal Information Security Management Activity Act (FISMA)-related activities; Intrusion Prevention Systems; Trusted Internet Connections; Identity Management and Authentication; Supply Chain Management; Network & Data Protection and Insider Threat Mitigation Activities. This effort includes integration and test capabilities for element interface verification and provide operations and sustainment of the deployed PNT Last Mile integration capabilities at BMDS locations.  Recurring Activities to Preventing Malicious Cyber Attacks: -Maintain a current Information Assurance risk and residual risk assessment of the BMDS. -Coordinate all IT projects and remote sites to ensure Cybersecurity compliance. -Implement methodologies and goals to identify insecure and unauthorized vectors of access to networks or applications, analyze the threat, attempt to exploit the vectors and confirm existence and analyze the risk for exploiting an application, network or service. -Track ports, protocols, and services. -Coordinate with private partnerships to ensure the Defense Industrial Base protects MDA data.				
<b>FY 2019 Plans:</b> -SEE ABOVE.				
<b>FY 2020 Plans:</b> - SEE ABOVE.				
<b>FY 2019 to FY 2020 Increase/Decrease Statement:</b> N/A				
<b>Title:</b> Continuous Monitoring		7.032	5.134	7.495
<b>Articles:</b>		-	-	-
<b>Description:</b> Provide IT Security Tools and Other Continuous Monitoring.  Recurring Activities for the Continuous Monitoring Accomplishment: -Manage data-at-rest encryption to ensure compliance with Global Information Grid mandated policies. -Procure/renew cybersecurity software maintenance agreements for IT Security Tools. -Procure/renew cybersecurity hardware maintenance for hardware.

---	----------------	----------------	----------------

Specific and/or unique accomplishments to each FY are as follows:

**FY 2019 Plans:**

- SEE ABOVE.

**FY 2020 Plans:**

- SEE ABOVE.

**FY 2019 to FY 2020 Increase/Decrease Statement:**

Increase from FY 2019 to FY 2020 provides ArcSight licenses (bi-annual license cost).

**Title:** Planning, Policy Development, Workforce Training & Force Management

**Articles:**

4.213	3.017	3.243
-	-	-

**Description:** Provide National Initiative for Cybersecurity Education (NICE); Workforce Development; Security Training for Employees with Significant Security Responsibilities; and Cybersecurity Strategic Planning, Policy, Oversight and Management. Specific and/or unique accomplishments to each FY are as follows:

- Recurring Activities for the Planning, Policy Development, Workforce Training and Force Management Accomplishment:
- Document and maintain Standard Operating Instructions/Procedures for consistent interface with the MDA BMDS Network Operations Support Center (BNOSC) and the BMDS elements.
  - Publish MDA policies to incorporate new requirements stated in DoDI 8510.01 Risk Management Framework (RMF) to comply with 237 new controls and 817 control enhancements into controls validation testing of BMDS elements and networks.
  - Manage the Information Assurance Workforce Improvement Program to certify Cybersecurity professionals and report compliance in accordance with Federal Information Security Management Act (FISMA) and Information Assurance Workforce Improvement Program (DoD Manual 8570.1), achieving the DoD certification goal; reports IA Risk Assessments, Primary RMF artifacts.
  - Interface with Central Command (CENTCOM) to provide BMDS Mission RMF package.
  - Conduct an annual IA Security review of the BMDS in accordance with DoDI 8510.01 and provide an analysis of changes in IA posture.
  - Collect, analyze, and report vulnerability and cyber warfare attack metrics to the MDA CIO, MDA leadership, and U.S. Cyber Command.
  - Provide Information Assurance engineering and planning guidance and vulnerability assessment for all MDA Information Technology acquisition programs.

Specific and/or unique accomplishments to each FY are as follows:

**A. Mission Description and Budget Item Justification**

MDA's Modeling and Simulation (M&S) program is essential to ensuring missile defense capabilities are affordable and effective. M&S develops system-level models, frameworks, truth, simulations, and operational environments as missile defense technologies continually advance and the threat changes, and evaluates performance of the Elements, Components, and overall BMD System for verification, validation and accreditation purposes. MDA's M&S program provides a cost effective means to assess and examine the performance space of the BMDS beyond what can be physically tested under current test range conditions and within the Agency's fiscal constraints. M&S future concept simulation activities provide the capability to design and develop technologies to hedge against future missile threats. MDA's M&S systems and products provide analysis, decision-making, and planning capabilities for Real-World Operations to inform the National Command Authority, Joint Staff, Military Services, NATO, Combatant Commanders (CCMDs), Operational Test Authority (OTAs), Director of Operational Test & Evaluation (DOT&E), and Allies.

The strategy of MDA's M&S Program is 1) to execute a single, integrated, and synchronized program to manage M&S development and sustainment in support of MDA's BMDS acquisition, 2) to improve BMDS Flight and Ground Test execution, 3) to leverage MDA test activities to collect data to anchor M&S, and 4) to perform warfighter training and tactics validation. The strategy also incorporates key elements to address DOT&E's BMDS Assessment Report: Ensure that future M&S architectures are composable and flexible, and simplify the integration process to conserve resources and improve capabilities; Ensure that future M&S architectures incorporate and require the use of consistent truth representations (phenomenology, lethality, environmental factors, threat simulations, etc.); Improve cross-organizational system engineering processes to optimize requirements generation and ensure the inclusion of all stakeholders; Develop refined M&S accreditation criteria between MDA and the OTA.

MDA's M&S Program consists of system and product planning, development, integration, and operation; threat model development, verification, and analysis; and integration and deployment of MDA's Distributed BMDS real-time Hardware-in-the-Loop (HWIL) and digital M&S simulation capabilities. Models and simulations are tailored to the specific needs of the Agency's test events and to match BMDS components in their various stages of development, ranging from low-to-medium fidelity analyses supporting concept definitions studies, to high-fidelity models used to support engineering level activities. MDA validates and accredits system-level models and simulations by anchoring them to ground and flight test events, per the Integrated Master Test Plan (IMTP), to enable accurate and comprehensive assessments of the BMDS.

<b>B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
---	----------------	----------------	----------------

**Description:** This activity provides the integrated program lifecycle planning and requirements definition of all BMDS M&S models and capabilities to enable assessment of BMDS capability deliveries. M&S capability development executes an integrated, synchronized program to manage M&S development in support of BMDS development, testing, and assessment. The following actions are required on a continuing basis to accomplish the M&S lifecycle planning and requirements definition mission:

- Maintain traceability between the M&S Systems Requirements Documents and M&S product development.
- Produce capability documents and specifications for M&S product development to enable BMDS flight and HWIL tests, training events, exercises, wargames, concept evaluation and development engineering.
- Support MDA response to export requests for M&S software and technical data to nations or international organizations.
- Participate in Technical Interchange Meetings and provide support for bilateral agreements with allies and partners.
- Support system engineering capability trades for all BMDS capability deliveries (including BMDS capability deliveries for Phased Adaptive Approach and Homeland Defense).
- Continue the transition to replace the Single Stimulation Framework (SSF) with the Objective Simulation Framework (OSF) to support M&S Intended Uses.
- Provide integrated program lifecycle planning and scheduling of all BMDS M&S models and capabilities to enable assessment of BMDS capability deliveries for Homeland and Regional Defense.
- Execute M&S planning, development, framework and test integration and operation; threat model development, verification, and analysis; and integration and deployment of MDA's Distributed BMDS real-time Hardware-in-the-Loop (HWIL) and digital M&S simulation capabilities.
- Develop/sustain models and simulations tailored to the specific needs of the Agency's test events; match BMDS components in their various stages of development or sustainment as required for the test venue.

Specific and/or unique accomplishments to each FY are as follows:

**FY 2019 Plans:**

- Upgrade the System Interface Unit (SIU) Fleet to current technical standards, interfaces, components and product line support to meet BMDS stakeholder needs for all BMDS Increments and associated test campaigns
- Update Threat Modeling Tools to meet future threat data needs and event environments
- Ensure Environment and Plume core truth model development, verification, maintenance and sustainment meets requirements
- Incorporate emerging BMDS capabilities to include advanced threats into BMD simulations and ground test events

**FY 2020 Plans:**

- SEE ABOVE.

<b>Title:</b> BMDS Simulations & Tools	11.618	12.326	12.585
<b>Articles:</b>	-	-	-

**Description:** This activity funds the development and sustainment of digital products and the architecture framework, and delivery/maintenance of infrastructure for BMDS performance assessments, Warfighter events, and BMD International Simulation events. The following actions are required on a continuing basis:

- Event Integration/Support Operations:
- Provide ground test architecture integration to meet IMTP requirements. Use the BMDS test framework to integrate distributed architectures in support of BMDS capability deployments for EPAA Phase 3.
  - Deliver integrated architecture instantiations of the BMDS to support Performance Assessments and integration of new capabilities into the BMDS Operational Capability Baseline.- Integrate, test, and verify the M&S enterprise supporting BMDS testing, assessment, exercises, and wargaming, including testing infrastructure.
  - Integrate, test, functionally qualify, and deliver M&S tools and complex test architectures to provide system test capabilities to support MDA IMTP based test events, wargames, and exercises.
  - Continue the transition of real-time digital simulation capability to OSF to support Intended Uses.
  - Maintain simulations for Element M&S development laboratories used in the BMDS Integration & Development Lab and Digital M&S Integration Center (DMIC) in Huntsville, AL and in the MDIOC Simulation Center.
  - Conduct integration, testing and system-level verification per the digital System Requirements Document (SRD). Operate the testbed to mature the OSF-based digital system simulation.
  - Provide Event Integration Support for non-MDA BMDS component and weapon system models for use in MDA test and validation events.
  - Provide HWIL/M&S benchmarking/integration, documentation and coordination. Sustain, integrate and execute ground tests, FAST Events and Exercises/Wargames.
  - Provide communications emulation (MTJ, STJ, and Link-16) and network analysis support via the Tactical Communications Environment Segment (TCES) for use in IMTP events, HWIL System Post Flight Reconstructions (SPFRs) and HWIL System Pre Mission Tests (SPMTs).
  - Perform operational planning for planned BMDS assessment events.
  - Conduct M&S system integration and verification to support M&S system architecture development. Conduct developmental integration testing.
- M&S Operations:
- Provide digital representations of BMDS elements/components using MDA's BMD International Simulation (I-SIM) in support of CCMD and International Wargames, conceptual planning, BMD visualizations, BMD training/orientation, M&S demonstrations, and the Warfighter's Modification & Fielding Requirements List (MFRL) for exercises and training.

<b>Title:</b> M&S Objective Simulation Framework (OSF)	13.360	14.680		14.661
<b>Articles:</b>	-	-		-

**Description:** The following actions are required on a continuing basis to accomplish the OSF mission:

- Develop and implement OSF upgrades to incorporate advanced tracking, discrimination, engagement and associated upper tier debris mitigation capabilities, as well as other requirements and capabilities to meet MDA's evolving M&S Enterprise needs.
- Perform testing and integration of Core Truth Model capabilities into the OSF framework.
- Sustain and enhance framework products to maintain capabilities to support stakeholders and to keep pace with the IMTP.
- Develop plans, procedures and documentation for scheduled events including Wargames and Combatant Command Exercises and the Distributed, Focused and Integrated HWIL Events as presented in the IMTP. Provide event architecture integration and checkout of Wargames for these same IMTP scheduled events.
- Provide the ground test architecture integration expertise to meet the testing requirements of the IMTP. Support delivery of integrated architectures for test across all test venues using the BMDS test framework to integrate distributed architectures in support of BMDS.

<b>Title:</b> M&S Improvements		11.320	31.186	36.735
		<b>Articles:</b>	-	-
<p><b>Description:</b> This effort funds BMDS Enterprise-wide M&amp;S improvements that will enhance digital and ground test capabilities. Planned improvements include an experimental, developmental M&amp;S prototype capability necessary to achieve a BMDS-level integrated, high-fidelity end-to-end digital simulation. The prototype effort designs and develops a digital simulation capability that will provide assessment data for the BMDS, supplemental to Ground- and Flight tests, in areas that those venues cannot address. The end-to-end digital simulation will eventually replace the current stand-alone approach to digital predictive pre-mission analysis. MDA is also implementing Ground Test Re-architecture to address accreditation and assessment limitations, increased Hardware-in-the-Loop (HWIL) complexity and reduced available integration times. The Ground Test Integrated System-level Simulation (GTISS) will make truth data consistent, implement standard framework interfaces, and provide common data formats to correct ground test simulation inadequacies in threat uncertainty as well as debris modeling.</p> <p>Specific and/or unique accomplishments to each FY are as follows:</p> <p><b>FY 2019 Plans:</b></p> <ul style="list-style-type: none"> <li>- Develop M&amp;S infrastructure needed to modify Element-level models to meet System-level requirements</li> <li>- Continue the development of initial digital capability for first use supporting BMDS Increment 6b in FY 2021 Timeframe</li> </ul>

**Remarks**

**D. Acquisition Strategy**

The M&S acquisition strategy utilizes full and open competition to develop, acquire and deliver the integrated architectures/frameworks while the Elements, using the same open competition methods, develop and deliver models of their systems. The Digital and HWIL product centers integrate the suite of M&S into a composite simulation capability, all based on an open architecture. M&S achieves this end-state via close collaboration between its integrating contractor teams (Digital and HWIL) and those of the Element prime contractors, with additional technical standards and engineering oversight provided by FFRDCs and UARCs.

**Note**

Increase in FY 2019 includes congressional plus up for Cyber Assistance Teams (CATs) to assess the safeguarding of MDA's information on Defense Industrial Base partners' networks. Beginning in FY 2020, funding for CATs is distributed across all Agency PE's in cyber projects.

**A. Mission Description and Budget Item Justification**

This project supports the monitoring and tracking of Cybersecurity mitigations detailed in Information Technology security POAMs. Activities include preparation of certification and accreditation documentation and accreditation recommendations to the MDA Senior Information Assurance Officer (SIAO)/Certification Authority (CA) and DAA. Independent Verification and Validation team actions ensure the availability, integrity, authentication, confidentiality and non-repudiation of the MDA mission, test and administrative systems. Activities in the Project are necessary to comply with the Federal Information Security Management Act.

This project implements Risk Management Framework (RMF) system engineering principles as specified within DOD 8510.01 to acquire, design, test, implement and field technical solutions throughout the systems architecture to ensure sufficient protections exist from a threat and risk based approach. MDA's goal is to ensure Cybersecurity engineering principles flow into system requirements and design specifications early to provide the most cost benefit and ensure security controls are aligned with the National Institute of Standards and Technology (NIST) 800-53a security controls as applicable to systems categorized as National Security Systems.

This project includes funding to conduct an MDA Insider threat program to identify, deter, and mitigate potential insider threats. This activity is Presidentially and DoD-mandated.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	FY 2018	FY 2019	FY 2020
<b>Title:</b> Information Assurance / Cyber Network Defense	6.466	20.666	11.564
<b>Articles:</b>	-	-	-
<b>Description:</b> This activity funds network defense and Information System Security Manager (ISSM) activities for MDA Engineering. Specific tasks include:			
- Conduct Cybersecurity/information assurance engineering and architecture planning for Engineering information technology systems.			
- Plan and test the information assurance controls for Engineering systems.			
- Implement RMF system engineering principles to ensure sufficient protections exist from a threat and risk based approach			
- Conduct Controls Validation Testing of systems and provide Plan of Action and Milestones to mitigate information assurance deficiencies.

**A. Mission Description and Budget Item Justification**

Quality, Safety, and Mission Assurance verifies that all systems are functioning and tracking against actual verified targets and that all associated processes and procedures are strictly followed.

Quality: Provides on-site Quality Assurance (QA) inspection for all ground and flight tests to ensure that all processes and procedures are adhered to and no short cuts or deviations occur. Quality management system audits are performed on the sub tier supply chain to determine adequacy of contractor requirement flow down and sub tier supplier compliance to industry standards. Quality Subject Matter Experts (SMEs) attend BMDS configuration control boards to ensure quality is implemented across all Programs. Provides quality on-site formal inspection and resolution when troubled suppliers are identified and also initiates and leads on-site Joint Government and Industry Team field support and expertise to assist when critical sole source suppliers are failing. Conducts initiatives to revamp sole source suppliers by assisting them to get healthy and perform at world class levels, establishes consistent acquisition and award fee contractual requirements to ensure that a strategic approach is applied to all mission critical systems and maintains MDA Assurance Provisions for the Agency.

Safety: Responsible for system safety of the BMDS and for the Safety and Occupational Health of personnel located in the National Capital Region (NCR); Huntsville, Alabama; Fort Greely, Alaska; Vandenberg Air Force Base (VAFB), California; and, Dahlgren, VA. Additionally responsible for ensuring the overall safety of the civilian, contractor and military workforce. BMDS Safety Officers (BSOs) provide on-site support 24 hours a day, 365 days a year to ensure operational safety of systems.

Mission Assurance: Provides in-plant MDA Assurance Representatives (MARs) for the MDA at government and contractor facilities. MARs are Government Mission Assurance and Quality experts who provide quality and technical oversight of contractor manufacturing. Mission Assurance Audits are conducted which focus on design margin, the effectiveness of acceptance testing and the sufficiency of manufacturing processes. Audits are performed for contractual requirements, internal requirements, and industry best practices. These audits are one of MDA's most effective methods of enabling change among the MDA contractors and suppliers. Quality, Safety, and Assurance provides Subject Matter Experts (SMEs) who attend all technical reviews (i.e. Design, Test, Mission Readiness Reviews, and Failure Review Boards) to ensure mission assurance principles are consistently implemented across the Ballistic Missile Defense System (BMDS). Quality, Safety, and Mission Assurance develops overarching design and quality standards such as the MDA Assurance Provisions (MAP) for MDA which enhances BMDS reliability. Hardware acceptance reviews and pedigree documentation reviews are performed to ensure all manufacturing rework and repair is performed within approved processes.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Decrease from FY 2019 to FY 2020 reflects the following:

- Reflects the completion of the SM-3 Block IIA FY16 manufacturing contract.
- Transition of flight test execution support costs from this PE to PE 0604878C Aegis Test to ensure continued transparency and program efficiency.
- Transition of Common Source Library (CSL), BMD 5.0 CU software maintenance, and transition of Test Site Usage for in-service baselines from RDT&E to O&M.
- Resolution of hardware availability issues and increased commonality within the SM-3 Missile family with utilization of previous material acquisitions of Kinetic Warhead (KW) and Guidance Section (GS).

**A. Mission Description and Budget Item Justification**

The Aegis BMD mission is to deliver an enduring, operationally effective and supportable BMD capability to defend the nation, deployed forces, friends and allies, and to increase this capability by delivering evolutionary improvements as part of Ballistic Missile Defense System (BMDS) upgrades. The Aegis BMD element of the BMDS capitalizes upon and evolves from the existing United States Navy Aegis Weapons System (AWS) and Standard Missile (SM) infrastructures. Aegis BMD provides a forward-deployable, mobile capability to detect and track Ballistic Missiles of all ranges, and the ability to destroy Short-Range Ballistic Missiles (SRBMs), Medium-Range Ballistic Missiles (MRBMs), and Intermediate-Range Ballistic Missiles (IRBMs) in the midcourse phase of flight, and shorter range missiles in the terminal phase of flight. Aegis BMD also provides a Long Range Surveillance and Track (LRS&T) capability to the BMDS. Upgrades to both the Aegis BMD Weapon System and the Standard Missile-3 (SM-3) configuration enable Aegis BMD to provide effective, supportable defensive capability against longer range, more sophisticated threats and an enduring Aegis Ashore defensive capability.

<b>Appropriation/Budget Activity</b> 0400: <i>Research, Development, Test &amp; Evaluation, Defense-Wide / BA 4: Advanced Component Development &amp; Prototypes (ACD&amp;P)</i>	<b>R-1 Program Element (Number/Name)</b> PE 0603892C / <i>AEGIS BMD</i>
---	--

This Program Element includes BMDS threat discrimination improvements, which will enhance BMDS effectiveness against the evolving adversary threat. The result will be a BMDS architecture more capable of discriminating and destroying reentry vehicles with a higher degree of confidence, improving Warfighter shot doctrine, and more efficiently using interceptor inventory. BMDS threat discrimination improvements are funded from the Enabling (0603890C), Midcourse (0603882C), BMD Sensors (0603884C), C2BMC (0603896C), and Aegis BMD (0603892C) PEs.

**Change Summary Explanation**

Decrease in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustments for Aegis BMD 6.x development due to excess growth and SM-3 Block IIA All Up Rounds (AURs) transferred to Procurement

Decrease in FY 2019 from PB19 to PB20 reflects Congressional reduction of Weapon System Capability due to early to need (RDT&E)

Decrease in FY 2020 from PB19 to PB20 reflects the following:

- Transition of flight test execution support costs from this PE to PE 0604878C Aegis Test to ensure continued transparency and program efficiency.
- Transition of Common Source Library (CSL), BMD 5.0 CU software maintenance, and transition of Test Site Usage for in-service baselines from RDT&E to O&M
- Resolution of hardware availability issues and increased commonality within the SM-3 Missile family with utilization of previous material acquisitions of KW and GS

Quantity of RDT&E Articles	-	-	-	-	-	-	-	-	-	-		

**Note**

Increase from FY 2019 to FY 2020 provides the following:

- Aegis BMD 5.x capability upgrade which adds new BMD threats inherent in the SM-3 Block IIA Build 8 missile software and improve Raid performance through Force Level Engagement and Sensor Coordination Raid (FENSR)
- Aegis Baseline 5.4 (BMD 4.1) certification in FY2020 and begins development of Aegis Baseline 5.4 (BMD 4.2) which adds radar refurbishment and Low Noise Amplifiers (LNA) upgrades
- Requirements to modify Aegis BMD models in support of BMDS Ground Test re-architecture, all-Digital BMDS M&S architecture, additional model development, analysis and M&S simulation support

**A. Mission Description and Budget Item Justification**

Aegis BMD continues development of a Sea-Based BMD capability in support of the MDA's mission to protect the homeland, deployed forces, friends and allies from ballistic missile threats of all ranges and in all stages of flight.

Systems Engineering & Integration performs requirements development, engineering analysis, capability integration, and performance verification for Aegis BMD development and BMDS integration.

Aegis Ballistic Missile Defense (BMD) Technology Design and Insertion enables cross-baseline specification management and capability assessments to ensure consistent application of technical standards, processes, and procedures across the Aegis BMD program. Aegis BMD specific efforts include: systems engineering and architecture (process and execution); modeling and simulation (M&S); Verification and Validation (V&V) test and evaluation support; ship integration; quality; safety and mission assurance M&S. V&V efforts in this accomplishment are performed at the Aegis BMD element level, which feed into the overall BMDS system level.

Aegis BMD 4.1 capability builds upon legacy Aegis BMD 4.0 and captures all the threats built into Aegis BMD 5.0 CU. It includes an increased BMD threat set, and provides increased maximum engagements and maximum missiles-in-flight over BMD 4.0.

Aegis BL 5.4 (BMD 4.1) merges the BMD 4.1 capability with the U. S. Navy (USN) Aegis Baseline 5.3 into a single integrated computer program with planned U.S. Navy Certification in FY 2019. 21 legacy Aegis Flight I/II Destroyers, not planned for Aegis Modernization (AMOD), possess two separate certified computer programs: Aegis BMD 4.0 for BMD missions and Aegis Baseline 5.3 for Anti-Air Warfare (AAW), Surface Warfare (SUW), and Undersea Warfare (USW). The Aegis BL 5.4 (BMD 4.1) computer program integrates Aegis Baseline 5.3 and Aegis BMD 4.0 to remedy the need for the warfighter to use both simultaneously. An additional benefit of the single integrated computer program is enabling future SPY-1 Low Noise Amplifier (LNA) Refurbishment efforts to be added during the ship's Service Life.

**UNCLASSIFIED**

**Exhibit R-2A, RDT&E Project Justification:** PB 2020 Missile Defense Agency **Date:** March 2019

<b>Appropriation/Budget Activity</b> 0400 / 4	<b>R-1 Program Element (Number/Name)</b> PE 0603892C / AEGIS BMD	<b>Project (Number/Name)</b> MD09 / Aegis BMD
--	---	--

Aegis BL 5.4.X (BMD 4.2) AN/SPY-1 upgrade with the U.S. Navy provides refurbishment of existing ship AN/SPY-1 radar arrays with the installation of antenna LNAs (MDA funding beginning in FY 2019). MDA and PEO IWS will establish a rotatable pool of antenna arrays to be installed and the removed arrays will be refurbished for the follow-on installation. These refurbished and upgraded antennas, when integrated with Aegis BL 5.4.X (BMD 4.2), will increase BMD capabilities with improved sensitivity, discrimination, and more efficient radar resource utilization.

Aegis BMD 5.1 builds upon Aegis BMD 5.0 CU (COTS based open architecture) and further expands the threat set required for EPAA Phase III. This includes the integration of the SM-3 Block IIA, introduction of an Engage on Remote (EoR) capability, and improved BMDS interoperability and engagement coordination. The Aegis BMD 5.1 computer program will also incorporate new BMD threats inherent in the SM-3 Block IIA Build 8 missile software and improve Raid performance through FENSR.

Aegis BMD 6.0 provides an increased BMD capability by incorporating the Air and Missile Defense Radar (AMDR), now designated SPY-6, for introduction on the first DDG Flight III. Aegis BMD 6.0 will enable BMDS element utilization of AMDR data for remote engagement and supplement deployed assets with simultaneous multi-mission capabilities (e.g. Integrated Air and Missile Defense (IAMD)). It will include IAMD planning; search, track, and discrimination. SPY-6 will support force level (multi-asset) approach to raid defense and enable U.S. Navy ships greater stand-off range from threat environments.

Aegis Underlay funds Aegis Weapon System and SM-3 Block IIA software modifications to existing systems to support a phased delivery of operational capability against expanded threat/mission space.

Modeling & Simulation (M&S) Objective Simulation Framework (OSF) effort develops, maintains and deploys the framework hardware and software for use at element laboratories and Combatant Command (CCMD) locations to support IMTP events, BMDS capability delivery assessments, Warfighter training, exercises, and wargames.

M&S BMDS Simulations & Tools effort provides development and sustainment of digital products and the architecture framework, and delivery/maintenance of infrastructure for BMDS performance assessments.

BMD System Assessment and Verification, Validation & Assessment (VV&A) funds activities to support BMDS Operational Capacity Baseline (OCB) delivery decisions and Technical Capability Declarations (TCDs), and anchor System modeling and simulation.

Land Based SM-3 Site Activation provides site design, site activation, temporary facilities, base operations support, and utilities as site activation progresses and until sites are transferred to the Navy.

<p><b>Title:</b> Aegis BMD 5.x Development</p> <p><b>Description:</b> Aegis BMD 5.1 builds upon BMD 5.0 CU and will further expand the threat set to include those threats required for EPAA Phase III through the integration of the SM-3 Block IIA, introduction of EoR capability, and improved BMDS interoperability and engagement coordination. In addition to expanding the BMD battlespace, EoR with SM-3 Block IIA frees up radar resources and increases the number and type of threats that can be engaged simultaneously over previous baselines. Aegis BMD Phase 1 capabilities include SM-3 Block IIA missile integration, SM-3 weapons selection algorithm, enhanced tracking, discrimination and mission planner updates to support organic engagements, Launch-on-Remote (LoR) engagements, and Long Range Surveillance &amp; Tracking (LRS&amp;T) missions. Aegis BMD 5.1 Phase 1 integration, testing, and evaluation (IT&amp;E) events include various lab-based and shipboard weapon-system-to-missile integration testing utilizing the Virtual Operational Missile (VOM) and the Inert Operational Missile (IOM), as well as participation in BMDS-wide ground test campaigns. Aegis BMD 5.1 Phase 1 development supports early integration and testing with the SM-3 Block IIA missile testing. The development of partial capability is contiguous across both Phase 1 and Phase 2 and supports delivery for EPAA Phase III. Aegis BMD 5.1 Combat System certification occurs in FY 2018. Post-certification upgrades include incorporating new BMD threats inherent in SM-3 Block IIA Build 8 missile software and improved raid performance through FENSUR, which preserves missile inventory and radar resources</p> <p>Recurring Accomplishments:</p> <ul style="list-style-type: none"> <li>- Continue supporting BMDS ground test events, collect Objective Qualitative Evidence (OQE) to support MDA OCB reviews, and EPAA Phase III TCD</li> </ul> <p>Specific and/or unique accomplishments to each FY are as follows:</p>		76.772	12.678	32.656

<b>Title:</b> Aegis BMD 6.x Development	43.155	63.479		66.798
---	--------	--------	--	--------

<p style="text-align: right;"><b>Articles:</b></p> <p><b>Description:</b> U.S. Navy is developing the Advance Capability Build (ACB) 20 Combat System (CS) and the Air and Missile Defense Radar (AMDR), now designated SPY-6, for introduction on the first DDG Flight III. Aegis BMD 6.0 will integrate Aegis BMD 5.1 capability with the ACB 20 Combat System, to include new SPY-6 requirements. Aegis BMD 6.0 exploits SPY-6 radar improvement to enhance Engagement and Search &amp; Track capabilities to include discrimination, raid defense and expanded threat space. This will enable BMDS element utilization of SPY-6 data for remote engagements and will supplement deployed assets with simultaneous multi-mission capabilities (e.g. IAMD). SPY-6 will support a force-level (multi-asset) approach to raid defense and will enable U.S. Navy ships to have a greater stand-off range from threat environments.</p> <p>Recurring Accomplishments:</p> <ul style="list-style-type: none"> <li>- Develop (CIDS), IDS and all supporting engineering documents and plans</li> <li>- Conduct design studies and concepts supporting development and integration</li> <li>- Conduct Aegis BMD performance analysis supporting In-Process Reviews(IPR)</li> <li>- Participation in program leadership and technical forums including Program Management Team, System Engineering Team, and Cross Product Teams for Integration and Test, Modeling &amp; Simulation, Test, Evaluation &amp; Certification, and Fleet Integration and Design</li> <li>- Computer program development for Aegis BMD 6.0 supporting Software Increment Reviews (SWIR)</li> <li>-MDA/Navy co-funded effort to provide BMD capability on Flight III DDGs</li> </ul> <p>Specific and/or unique accomplishments to each FY are as follows:</p> <p><b>FY 2019 Plans:</b></p> <ul style="list-style-type: none"> <li>- Execute coordinated development with U.S. Navy on the combined computer program</li> <li>- Prepare for and conduct Aegis BMD performance analysis supporting CDR/Interim Program Review (IPR)</li> <li>- Compile Element Review Team (ERT) and CDR/IPR data packages and begin Element Technical Reviews (ETR) to validate system requirements</li> </ul>	-	-		-

<b>B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
---	----------------	----------------	----------------

**Description:** This effort includes: development and sustainment of digital products and the architecture framework, and delivery/maintenance of infrastructure for BMDS performance assessments.

Recurring Accomplishments:

- Integrate, test, and verify the M&S enterprise supporting BMDS testing, assessment, exercises, and wargaming, including testing infrastructure. Guide and facilitate integration testing of MDA's M&S frameworks and core truth models, and all M&S components into virtual representations of the BMDS that are credible, affordable, and provide decision makers with the data needed
- Integrate, test, functionally qualify, and deliver M&S tools and complex test architectures to provide system test capabilities to support MDA IMTP based test events, wargames, and exercises
- Continue the transition of real-time digital simulation capability to the OSF to support Intended Uses
- Provide HWIL/M&S Benchmarking/Integration documentation and coordination
- Conduct M&S system integration and verification to support M&S system architecture development. Provide developmental integration testing to support M&S system architecture integration

Specific and/or unique accomplishments to each FY are as follows:

**FY 2019 Plans:**

- SEE ABOVE.

**FY 2020 Plans:**

- SEE ABOVE.

**FY 2019 to FY 2020 Increase/Decrease Statement:**

N/A

**Title:** BMDS Verification, Validation & Assessment (VV&A)

**Articles:**

20.219	20.437	21.156
-	-	-

**Description:** This activity funds BMD System Assessment and VV&A activities to support BMDS Operational Capacity Baseline (OCB) delivery decisions and Technical Capability Declarations (TCDs), and anchor System modeling and simulation.

Recurring Accomplishments:

- Verify BMDS performance, and produce BMDS verification status reports
- Conduct extensive analysis of data collected in BMDS ground and flight test events, instrumental to understanding BMD System operations and performance and anchoring models and simulations
- Identify mitigation approaches for BMDS performance issues uncovered during system level analysis and assessment
- Maintain M&S VV&A database, and verification data for BMD System Specification Change Notices
- Develop, maintain, and update the M&S VV&A tool kit
- Provide recommendations for improving assessment confidence, including M&S and testing issue resolutions

**Remarks**

**D. Acquisition Strategy**

The Aegis BMD element acquisition approach supports evolutionary development, continuously building upon demonstrated capabilities to advance overall BMDS capability. After considering all the technical and management aspects of the program and to meet the requirements presented by an evolving ballistic missile threat, the Aegis BMD program awarded sole source contracts to Raytheon and Lockheed Martin to continue development of the SM-3 and the Aegis BMD Weapon System, respectively.

The M&S acquisition strategy utilizes full and open competition to develop, acquire and deliver the integrated architectures/frameworks, as well as develop and deliver models of Aegis systems. The Digital and HWIL product centers integrate the suite of M&S into a composite simulation capability, all based on an open architecture. M&S achieves this end-state via close collaboration between its integrating contractor teams (Digital and HWIL) and those of the Aegis BMD prime contractors, with additional technical standards and engineering oversight provided by Federally Funded Research and Development Centers (FFRDCs) and University Affiliated Research Centers (UARCs).

**E. Performance Metrics**

Aegis BMD utilizes Award Fee and Incentive-based contracts to ensure project completes on time

**Note**

Decrease from FY 2019 to FY 2020 reflects the completion of the SM-3 Block IIA FY16 manufacturing contract.

**A. Mission Description and Budget Item Justification**

This project supported Aegis BMD purchase of Development Articles to use as test articles, and initial deployment in support of EPAA Phase III. Project included manufacturing of SM-3 Block IIA All Up Round (AUR) for the purposes of flight testing and delivery to the fleet as operational assets, and to ensure the maturation of SM-3 Block IIA manufacturing process.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	FY 2018	FY 2019	FY 2020
<b>Title:</b> FY16 SM-3 Block IIA RDT&E All Up Rounds	194.018	120.217	0.000
<b>Articles:</b>	-	-	-
<b>Description:</b> Manufacture seventeen (17) SM-3 Block IIA All Up Rounds (AURs) (delivered FY 2018 through FY 2020) for the purposes of flight testing as reflected in the IMTP and, if not consumed in testing, delivery to the fleet as operational assets prior to an initial production decision in support of EPAA Phase III. SM-3 Block IIA AURs validate the Engineering Manufacturing Readiness Level 3 criteria for an Initial Production Decision scheduled 4Q FY 2018.			
Recurring Accomplishment: Deliver SM-3 Block IIA AURs Specific and/or unique accomplishments to each FY are as follows:			
<b>FY 2019 Plans:</b> Continue manufacturing and deliver of FY16 SM-3 Block IIA RDT&E All Up Rounds deliveries			
<b>FY 2020 Plans:</b> Complete manufacturing and deliver of FY16 SM-3 Block IIA RDT&E All Up Rounds deliveries			
<b>FY 2019 to FY 2020 Increase/Decrease Statement:</b> Decrease from FY 2019 to FY 2020 reflects the completion of the SM-3 Block IIA FY16 manufacturing contract.

**C. Other Program Funding Summary (\$ in Millions)**

N/A

**Remarks**

**D. Acquisition Strategy**

The Aegis BMD element acquisition approach supports evolutionary development, continuously building upon demonstrated capabilities to advance overall BMDS capability. After considering all the technical and management aspects of the program and to meet the requirements presented by an evolving ballistic missile threat, the Aegis BMD program awarded sole source contracts to Raytheon and Lockheed Martin to continue development of the SM-3 and the Aegis BMD Weapon System, respectively.

**Note**

The increase from FY 2019 to FY 2020 provides for increased GEU Activities (manufacturing readiness review for custom electronic parts and verify unit is production ready; GEU re-qualification; Computer in the Loop (CIL) and Hardware in the Loop (HIL); and transition GEU upgrades into current production lines), and completion of manufacturing maturity (EMRL 4).

**A. Mission Description and Budget Item Justification**

Provides development of SM-3 Missiles, Upgrade Modifications, and Integration into the Aegis Weapon System.

The SM-3 Block IB improves Aegis BMD's ability to expand the BMD battlespace, engage longer range, more sophisticated ballistic missiles that may deploy countermeasures and launch in larger raid sizes. The SM-3 Block IB Kinetic Warhead's (KW) two color infra-red (IR) seeker and advanced signal processor provides a real-time discrimination and characterization capability while improving sensitivity for longer range targets and performance against more sophisticated threats. Additionally, the new Throttleable Divert and Attitude Control System (TDACS) KW divert engine has been upgraded over the SM-3 Block IA to provide a more flexible divert in order to maneuver the KW to intercept.

The SM-3 Block IIA consists of an upgrade to a 21-inch diameter SM-3 missile and expands beyond the SM-3 Block IB battlespace to counter Intermediate Range Ballistic Missile (IRBM). SM-3 Block IIA provides an increased kinematic envelope through improved infa-red (IR) discrimination and divert capability that provide performance against the EPAA phase III expanded threat set. When combined with Aegis BMD 5.1 weapon system modifications, the SM-3 Block IIA will provide Engage on Remote (EoR) capability, which allows the use of remote off board sensor information to launch and guide the SM-3 Block IIA to final intercept. Aegis BMD 5.1 EoR capability with SM-3 Block IIA also frees up Radar resources and increases the number and type of threats to be engaged simultaneously over previous baselines.

<b>Articles:</b>	-	-	-
<b>Description:</b> This effort develops and modernizes the SM-3 Block IB missile, which improves on the SM-3 Block IA performance and enables engagement of more sophisticated ballistic missiles and larger raid sizes. SM-3 Block IB Modernization will provide the following upgrades: - Upgraded SM-3 KW Common Avionics Package will provide improved producibility and reduced cost resulting from utilization of common components between SM-3 Block IIA and the Redesigned Kill Vehicle (RKV). SM-3 Block IB Common Components

**A. Mission Description and Budget Item Justification**

Sustain the DoD RMF Certification and Accreditation process and Controls Validation Testing (CVT) activities, analysis of validation results, risk assessments and reviews of proposed Program Manager/Information Systems Security Manager (PM/ISSM).

This project supports the monitoring and tracking of Cybersecurity mitigation detailed in Information Technology Security POA&Ms. Activities include preparation of C&A documentation and accreditation recommendations to the MDA Authorizing Official (AO). Independent Verification and Validation (IV&V) team actions ensure the availability, integrity, authentication, confidentiality and non-repudiation of the AB mission and non-mission systems, which includes test and remote site administrative systems. Activities in the Project are necessary to comply with the Federal Information Security Management Act (FISMA).

Quantity of RDT&E Articles	-	-	-	-	-	-	-	-	-	-		

**Note**

Decrease from FY 2019 to FY 2020 reflects the following:

- Transition of Common Source Library (CSL), BMD 5.0 CU software maintenance, and transition of Test Site Usage for in-service baselines from RDT&E to O&M
- Transition of test related program management costs from this PE to PE 0604878C Aegis Test to ensure continued transparency and program efficiency

**A. Mission Description and Budget Item Justification**

Aegis Ballistic Missile Defense (BMD), in accordance with negotiated agreements between the U.S. Navy and the Missile Defense Agency (MDA) has identified and segregated funding for Developmental Support of Aegis BMD specific elements resident aboard Aegis capable U.S. Navy ships. Computer Program Support consists of, but is not limited to, reviews of Technical Observation Reports (TORs) that are generated by ship crews during exercises or deployments, determination of root causes and preparation of Computer Program Change Request (CPCR) to correct TORs, updates to the in-service computer program to apply, test and certify multiple CPCRs, and tests installation of Aegis Weapon System (AN/SPY-radar/Fire Control System (FCS)) alignment updates as required. Aegis BMD provides support to Annual Integration Events (AIEs) to ensure any updated Aegis Combat System (ACS) computer programs do not degrade BMD equipped ships and provides distance and technical support for BMD equipped ships.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	FY 2018	FY 2019	FY 2020
<b>Title:</b> Fleet Integration	9.257	15.395	16.871
<b>Articles:</b>	-	-	-
<p><b>Description:</b> Provide Fleet operations and mission support to enable the conduct of sustained BMD operations; advocate war fighter requirements and fleet feedback in baseline development and capability upgrades to Aegis BMD weapon system; provide analysis and Mission Planning support for Geographic Combatant Commanders for operational application of Maritime BMD capabilities; and provide BMD Capabilities Analysis and Exercise Support for Aegis BMD baselines under development or currently deployed in the Operational Fleet. Deliver Aegis BMD Mission Planner Prototype (Cerberus).</p> <p>Recurring Accomplishments:</p> <ul style="list-style-type: none"> <li>- Define, develop and review Joint and Fleet Doctrine for incorporation of Aegis BMD capability transition to warfighter and baseline acceptance into MDA Operational Capacity Baseline (OCB)</li> <li>- Research and define certification and warfighter acceptance requirements for Aegis BMD baselines to ensure successful capability delivery</li> <li>- Develop Aegis BMD training simulations and scenarios to support shipboard training including BMD Qualification (BMDQ) and higher level exercises</li> </ul>

**Remarks**

**D. Acquisition Strategy**

The Aegis Ballistic Missile Defense (BMD) element acquisition approach supports evolutionary development, continuously building upon demonstrated capabilities to advance overall BMDs capability. After considering all the technical and management aspects of the program and to meet the requirements presented by an evolving ballistic missile threat, the Aegis BMD program awarded sole source contracts to Raytheon and Lockheed Martin to continue development of the Standard Missile-3 (SM-3) and the Aegis BMD Weapon System, respectively.

Competition will be maximized for purchase of any products or services as appropriate.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

**Program MDAP/MAIS Code:** 362

**Note**

Increase from FY 2019 to FY 2020 provides an expansion of C2BMC space tasking capability development; additional System Level Discrimination Data Integration and Integrated Threat Characterization development activities; expanded depth and breadth of ground test scope to include Models and Simulation (M&S) development and Verification and Validation for new BMDS M&S environment; integration and testing of the new Army Integrated Air and Missile Defense (IAMD) Battle Command System (IBCS); and addition of Space-based Kill Assessment Sensor operationalization and prototyping for the Robust BMDS Post Intercept Assessment capability. Additionally, the increase reflects the transfer of the Space-Based Infrared Sensors/BMDS OPIR Architecture (SBIRS/BOA) test lab from PE 0603914C to PE 0603896C to consolidate lab efforts to synergize efforts and gain efficiencies.

**A. Mission Description and Budget Item Justification**

The Command and Control, Battle Management, and Communications (C2BMC) program is the integrating element of the Ballistic Missile Defense System (BMDS). It is a vital operational system that enables the U.S. President, Secretary of Defense and Combatant Commanders at strategic, regional and operational levels to systematically plan missile defense operations, to collectively see the battle develop, and to dynamically manage designated networked sensors and weapons systems to achieve global and regional mission objectives. Systems linked through C2BMC include Patriot, Terminal High Altitude Area Defense (THAAD), Aegis Ballistic Missile Defense (BMD), Aegis Ashore, Ground-based Midcourse Defense (GMD), and Army Integrated Air and Missile Defense Battle Command System (IBCS), and sensors such as the Army Navy/Ground Transportable Radar Surveillance model 2 (AN/TPY-2) Radar, Sea-Based X-Band Radar (SBX), Homeland Defense Radar - Hawaii (HDR-H), Pacific Radar, Long Range Discrimination Radar (LRDR), Space-Based Infrared System (SBIRS), and BMDS Overhead Persistent Infra-Red (OPIR) Architecture (BOA). The C2BMC program also works to increase coalition partners' capabilities and investigates concepts and explores system engineering issues associated with innovative space applications for a missile defense intercept and defeat system.

<b>B. Program Change Summary (\$ in Millions)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020 Base</b>	<b>FY 2020 OCO</b>	<b>FY 2020 Total</b>
Previous President's Budget	454.862	475.168	515.239	-	515.239
Current President's Budget	449.985	507.817	564.206	-	564.206
Total Adjustments	-4.877	32.649	48.967	-	48.967
• Congressional General Reductions	-2.000	0.000			
• Congressional Directed Reductions	-3.575	-10.851			
• Congressional Rescissions	0.000	0.000			
• Congressional Adds	5.100	43.500			
• Congressional Directed Transfers	0.000	0.000			
• Reprogrammings	2.230	0.000			
• SBIR/STTR Transfer	-6.632	0.000			
• Missile Defeat and Defense Enhancement	0.000	0.000	0.000	-	0.000
• Other Adjustment	0.000	0.000	48.967	-	48.967

**Change Summary Explanation**

Net decrease in FY 2018 from PB19 to PB20 reflects the combined effect of enacted congressional adjustments for improved discrimination and Mobile Sensor Integration (MSI) Phase I, reduction for concurrent development efforts, and the C2BMC portion of the congressional general RDT&E reduction.

Increase in FY 2019 from PB19 to PB20 reflects the enacted congressional adjustments for MSI Phase II and Cybersecurity and reductions for S8.2-3 scope adjustment and C2BMC future incremental capabilities.

Increase in FY 2020 from PB19 to PB20 provides enhanced regional and homeland defense capabilities related to hypersonic tracking, advanced discrimination techniques, and integration of discriminating radars in accordance with the BMDS Phased Implementation Plan (PIP). This increase also reflects the transfer of Space-Based Infrared Sensors/BMDS Overhead Persistent Infra-Red (OPIR) Architecture test lab support from PE0603914C to PE0603896C to consolidate and gain efficiencies in lab efforts.

**Note**

Increase from FY 2019 to FY 2020 provides an expansion of C2BMC space tasking capability development; additional System Level Discrimination Data Integration and Integrated Threat Characterization development activities; expanded depth and breadth of ground test scope to include Models and Simulation (M&S) development and Verification and Validation for new BMDS M&S environment; integration and testing of the new Army Integrated Air and Missile Defense (IAMD) Battle Command System (IBCS); and addition of Space-based Kill Assessment Sensor operationalization and prototyping for the Robust BMDS Post Intercept Assessment capability.

**A. Mission Description and Budget Item Justification**

Provides incremental development, deployment and operational support of C2BMC capabilities required for BMDS planning, situational awareness, sensor management, and engagement coordination. The FY 2019 National Defense Authorization Act (NDAA) section 869 recognized C2BMC for its implementation of this iterative practice and directed C2BMC's inclusion in a Community of Practice to advise on agile or iterative development.

C2BMC delivers capabilities incrementally with each software build (named as a Spiral), adding to or enhancing the capability of the previous build. C2BMC incremental delivery of Spiral 8.2 provides critical Homeland Defense for increased GMD battlespace, improved threat tracking using multiple sensors communicating via Link 16, enhanced sensor tasking to meet track quality and discrimination timeliness requirements, space situational awareness tasking support, and improved cyber capabilities. Enhanced Homeland Defense also integrates the BMDS Overhead Persistent Infra-Red (OPIR) Architecture (BOA) with the BMDS to enhance system level missile-tracking capabilities through earlier cueing of radars and weapon systems.

European Phased Adaptive Approach (EPAA) Phase 3/Engage on Remote (EOR) (Spiral 8.2-3) provides critical sensor management capability, greater engagement flexibility, improved OPIR-based cueing, and enhanced Aegis BMD defended area by enabling Aegis to use Army Navy/Ground Transportable Radar Surveillance model 2 (AN/TPY-2) data for EOR engagements, providing a five-fold increase in defended area coverage in the CENTCOM/EUCOM area of responsibility compared to individual weapon system organic capability. Spiral 8.2-3 also includes Space Situational Awareness and integrates Mobile Sensor Integration (MSI) Phase 1 and BMDS Overhead Persistent Infra-Red Architecture (BOA) data into the BMDS.

Long Range Discrimination Radar (LRDR) Control for Homeland Defense (Spiral 8.2-5) enables increased homeland and regional defense by providing LRDR sensor management, creation and dissemination of a BMD System track inclusive of LRDR sensor data; hypersonic threat tracking; significant expansion of Space Situational Awareness (SSA) capabilities for the Air Force; implements Link-16 reporting; integration of system level discrimination data; transmission of LRDR-based information

<b>Exhibit R-2A, RDT&amp;E Project Justification:</b> PB 2020 Missile Defense Agency		<b>Date:</b> March 2019
<b>Appropriation/Budget Activity</b> 0400 / 4	<b>R-1 Program Element (Number/Name)</b> PE 0603896C / <i>Ballistic Missile Defense Command and Control, Battle Management &amp; Communication</i>	<b>Project (Number/Name)</b> MD01 / <i>Command &amp; Control, Battle Management, Communications (C2BMC)</i>
<p>to GMD Fire Control (GFC) and other BMDS elements; operationalization of Space-based Kill Assessment (SKA) as part of Post Intercept Assessment (PIA); and integration of the new Army Integrated Air and Missile Defense (IAMD) Battle Command System (IBCS) with the BMDS.</p> <p>Future incremental C2BMC capability enhancements will include expanded Regional and Homeland Defense to continue risk reduction, planning, and development efforts including C2BMC tasking of OPIR Enterprise assets, enhanced system-level integrated discrimination functionality with Advanced Discrimination regional weapon system use of Link 16 based system track, AN/TPY-2 tasking improvements to support Aegis Engage on Remote, transmission of advanced discrimination features for regional BMD use, and monitoring of modified Aegis BMD, THAAD, PATRIOT, IBCS peer-to-peer engagement coordination.</p> <p>C2BMC continues to develop incremental improvements to the BMDS to keep pace with emerging threats worldwide by investing in the development, integration and testing of advanced algorithms to improve track and discrimination capabilities, prototyping Robust Post Intercept Assessment (PIA) and enhancing use of space based sensor data from sources such as the Space Based Infra-Red System (SBIRS), using the BMDS OPIR architecture. Related disciplines provide development and deployment support to C2BMC system capabilities. In support of Hypersonic Defense, C2BMC will provide contingency capability to demonstrate, develop and deploy a detection and warning for advanced threats.</p> <p>C2BMC International Partner system engineering ensures friends and allies are integrated to the fullest extent possible with U.S. BMDS capabilities. Collaborative system engineering, testing, and fielding facilitate interoperability with North Atlantic Treaty Organization (NATO) and partner nations such as Israel and Japan. C2BMC works with these nations to define and document international interfaces that are compatible with international standards and traceable to U.S. BMDS requirements. C2BMC participates in test events and live fire exercises hosted by international partners to ensure U.S. missile defense weapons, sensors, and Command and Control (C2) systems are interoperable with international systems. C2BMC maintains and upgrades the U.S./NATO secure data sharing gateways located at Ramstein Air Base, Germany, for missile defense operations and training. C2BMC also supports development of Japan's BMD requirements to ensure interoperability of Japanese and U.S. BMD systems (sensors, shooters, command and control) resulting in an integrated regional, operational, and strategic defense of Japan.</p> <p>C2BMC Modeling and Simulation (M&amp;S) maintains BMDS simulation/stimulation tools and federated models to support development and verification of deployed C2BMC and BOA Spirals. The BMDS C2BMC Model (BCM) is used for Flight Test pre-mission analysis and exercises to represent a second C2 Suite for Cross-Area of Responsibility (XAOR) functionality, Early Digital Product (EDP) for C2BMC performance assessment, and supports development and integration of GMD, AN/TPY-2, and Aegis software and models. The OPIR sensor M&amp;S is used in the Ground Test Integrated System-level Simulation (GTISS) as the stimulus for BOA. The BCM program provides a cost effective means to assess and explore the performance space of the BMDS beyond what can be physically tested via Flight Tests and Target of Opportunity collections.</p> <p>C2BMC develops, integrates, and tests advanced algorithms to improve discrimination capabilities and enhance the use of space-based sensor data. In support of MDA's discrimination improvements effort, C2BMC demonstrates, develops, and deploys multiple techniques to improve BMD System ability to identify lethal and non-lethal objects.</p>

**Remarks**

**D. Acquisition Strategy**

The C2BMC acquisition strategy is consistent with the Agency's capability-based acquisition strategy that emphasizes testing, incremental development, evolutionary acquisition, and knowledge-based funding. Lockheed Martin Mission Systems was the C2BMC prime contractor via an Other Transaction Agreement contract vehicle, which ended 1st quarter FY 2012. A sole source C2BMC follow-on contract to Lockheed Martin for Spiral Development, Operation and Sustainment, and Testing was awarded 1st quarter FY 2012 for an ordering period of five years. In 2015 the contract was extended through 1st quarter FY 2022, adding an additional five years to

**UNCLASSIFIED**

<b>Exhibit R-2A, RDT&amp;E Project Justification:</b> PB 2020 Missile Defense Agency		<b>Date:</b> March 2019
<b>Appropriation/Budget Activity</b> 0400 / 4	<b>R-1 Program Element (Number/Name)</b> PE 0603896C / <i>Ballistic Missile Defense Command and Control, Battle Management &amp; Communication</i>	<b>Project (Number/Name)</b> MD01 / <i>Command &amp; Control, Battle Management, Communications (C2BMC)</i>

the ordering period required to complete Spiral 8.2-5. Spiral 8.2 is planned to be fielded incrementally. Enhanced Homeland Defense (Spiral 8.2-1) fielded in FY 2018, European Phased Adaptive Approach (EPAA) Phase 3/EOR (Spiral 8.2-3) begins fielding in FY 2019, completion of system deployment with LRDR for Homeland Defense (Spiral 8.2-5) in FY 2021, and Enhanced Regional and Homeland Defense in FY 2024. This incremental fielding required a modification to the base contract increasing the ceiling and adding an additional five-year ordering period to extend the contract through first quarter FY 2022. Major team members to Lockheed are Northrop Grumman, Boeing, Raytheon, and General Dynamics. They are charged with the development, testing, fielding, training, operations and sustainment, and cyber operations support of the C2BMC system. They perform development and testing of C2BMC products in Huntsville, AL; and Colorado Springs, CO; and provide worldwide on-site operations and maintenance support. Additionally, the Defense Information Systems Agency (DISA) supports C2BMC worldwide long-haul communications. C2BMC Program Office government, Federally Funded Research and Development Center/University Affiliated Research Center (FFRDC/UARC), and Contract Support Services (CSS) personnel are also fully integrated as part of the Prime contractor's team to function in an Integrated Product Team environment. Finally, a sole source contract Specialized Warfighter Development Contract (SWDC) was awarded to Northrop Grumman in March 2018 (3 year base and 2 one year option periods) for continuation of the systems engineering, software development, test and integration for BMDS Overhead Persistent Infrared Radar Architecture (BOA), and Simultaneous Correlation of Unambiguous Tracks (SCOUT).

**Note**

Decrease from FY 2019 to FY 2020 reflects the FY 2019 congressional plus up for continued upgrade of hardware and software and includes DoD required cyber tools, policies and procedures to improve C2BMC network defense against cyber threats and enhance cybersecurity posture.

**A. Mission Description and Budget Item Justification**

Command and Control, Battle Management, and Communications (C2BMC) Cyber Operations sustain the Missile Defense Agency (MDA) Risk Management Framework (RMF) and Security Controls Assessments (SCA)/Controls Validation Testing (CVT) activities, analysis of validation results, risk assessments and reviews of proposed Program Manager/Information System Security Manager (PM/ISSM) Plan of Action and Milestones (POA&Ms) for MDA C2BMC mission systems. Activities in this Project are necessary to comply with the Federal Information Systems Modernization Act (FISMA).

<b>Articles:</b>	-	-	-
<p><b>Description:</b> This activity maintains the Assessment and Authorization (A&amp;A) and Certification and Accreditation (C&amp;A) data repository, capturing the RMF documentation (artifacts, validation results, and Information Assurance Risk Assessment results, and Authorizing Official (AO) accreditation decisions) and Plan of Action and Milestones (POA&amp;Ms) on all Missile Defense Agency (MDA) information systems. This activity prepares and submits C&amp;A documentation and accreditation recommendations to the MDA Chief Information Officer (CIO) / Security Controls Assessor and the AO. Leverages Cross Domain Solution (CDS) as single authority implementing standard security policies for C2BMC across the BMDS. Independent Verification and Validation team actions ensure the availability, integrity, authentication, confidentiality, and non-repudiation of the MDA mission, test, and administrative systems.</p> <ul style="list-style-type: none"> <li>- Conduct cybersecurity design, engineering, and architecture planning for C2BMC information technology systems</li> <li>- Plan and test the cybersecurity controls for C2BMC systems</li> <li>- Conduct Security Controls Assessment testing continuous monitoring of C2BMC mission systems and provide POA&amp;Ms to mitigate cybersecurity vulnerabilities.</li> </ul> <p>Specific and/or unique accomplishments for each FY are as follows:</p> <p><b>FY 2019 Plans:</b></p>

<b>B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
- Continue purchase of hardware/software upgrades and implementation of Windows Server 2016			
<b><i>FY 2020 Plans:</i></b> - Implement DoD required Endpoint Security Solution to replace current Host Based Security Solution - Continue upgrade and implementation of DoD required Secure Host Baselines for required operating systems - Plan and test virtualization and artificial intelligence capability solutions in relation to cyber resiliency			
<b><i>FY 2019 to FY 2020 Increase/Decrease Statement:</i></b> Decrease from FY 2019 to FY 2020 reflects the FY 2019 congressional plus up for continued upgrade of hardware and software and includes DoD required cyber tools, policies and procedures to improve C2BMC network defense against cyber threats and enhance cybersecurity posture.			
<b>Accomplishments/Planned Programs Subtotals</b>	5.421	17.651	14.162

**C. Other Program Funding Summary (\$ in Millions)**

N/A

**Remarks**

**D. Acquisition Strategy**

The C2BMC acquisition strategy is consistent with the Agency's capability-based acquisition strategy that emphasizes testing, incremental development, evolutionary acquisition, and knowledge-based funding. Lockheed Martin Mission Systems was the C2BMC prime contractor via an Other Transaction Agreement contract vehicle, which ended 1st quarter FY 2012. A sole source C2BMC follow-on contract to Lockheed Martin for Spiral Development, Operation and Sustainment, and Testing was awarded 1st quarter FY 2012 for an ordering period of five years. In 2015 the contract was extended through 1st quarter FY 2022, adding an additional five years to the ordering period required to complete Spiral 8.2-5. Spiral 8.2 is planned to be fielded incrementally. Enhanced Homeland Defense (Spiral 8.2-1) fielded in FY 2018, European Phased Adaptive Approach (EPAA) Phase 3/EOR (Spiral 8.2-3) begins fielding in FY 2019, completion of system deployment with LRDR for Homeland Defense (Spiral 8.2-5) in FY 2021, and Enhanced Regional and Homeland Defense in FY 2024. This incremental fielding required a modification to the base contract increasing the ceiling and adding an additional five-year ordering period to extend the contract through first quarter FY 2022. Major team members to Lockheed are Northrop Grumman, Boeing, Raytheon, and General Dynamics. They are charged with the development, testing, fielding, training, operations and sustainment, and cyber operations support of the C2BMC system. They perform development and testing of C2BMC products in Huntsville, AL; and Colorado Springs, CO; and provide worldwide on-site operations and maintenance support. Additionally, the Defense Information Systems Agency (DISA) supports C2BMC worldwide long-haul communications. C2BMC Program Office government, Federally Funded Research and Development Center/University Affiliated Research Center (FFRDC/UARC), and Contract Support Services (CSS) personnel are also fully integrated as part of the Prime contractor's team to function in an Integrated Product Team environment. Finally, a sole source contract Specialized Warfighter Development Contract (SWDC) was awarded to Northrop Grumman in March 2018 (3 year base and 2 one year

**Note**

Increase from FY 2019 to FY 2020 reflects the transfer of the Space-Based Infrared Sensors/BMDS OPIR Architecture (SBIRS/BOA) test lab from PE 0603914C to PE 0603896C to consolidate lab efforts to synergize efforts and gain efficiencies.

**A. Mission Description and Budget Item Justification**

**TESTING:**

Command and Control, Battle Management and Communications (C2BMC) Test supports system flight and ground testing, wargames, and exercises as detailed in the Missile Defense Agency (MDA) Integrated Master Test Plan (IMTP) to ensure C2BMC capabilities delivered are consistent with the Prioritized Capabilities List and are interoperable with other Ballistic Missile Defense System (BMDS) components.

**LAB INFRASTRUCTURE:**

MDA gains efficiencies and minimizes laboratory resource requirements (footprint, personnel, and hardware) by utilizing the C2BMC test bed infrastructure as the laboratory environment supporting System Test, Development, and Sustainment. For System Ground and Flight Test, the labs are used for pre-test analysis, test execution and post-test analysis. For Development, the labs are utilized for software verification and validation testing and system integration testing. For Sustainment, the labs are used to assist with root cause determination for issues discovered on the fielded system and validation of any required software patches.

<b>Articles:</b>	-	-	-
<b>Description:</b> This activity funds C2BMC participation in BMDS flight and ground testing, wargames and exercises, and resources in accordance with the BMDS IMTP. Recurring accomplishments include: Test Execution: - Assess BMDS interoperability, integration, and functionality in lab and distributed environments, leveraging a complex set of scenarios to test the limits of the C2BMC system. Participate in and analyze results of ground tests and flight tests in accordance with the BMDS IMTP. Support all phases of the MDA Ground Test Concept of Operations (CONOPS) and the MDA Flight Test CONOPS. Provide Flight Test Predictive Analysis support. Generate, test, and distribute federated model compatible scenarios for Ground Test and Flight Test Experimentation test support. Use BMDS C2BMC Model (BCM) to support exercise integration testing activities including test case and scenario checkout.

**Remarks**

**D. Acquisition Strategy**

The C2BMC acquisition strategy is consistent with the Agency's capability-based acquisition strategy that emphasizes testing, incremental development, evolutionary acquisition, and knowledge-based funding. Lockheed Martin Mission Systems was the C2BMC prime contractor via an Other Transaction Agreement contract vehicle, which ended 1st quarter FY 2012. A sole source C2BMC follow-on contract to Lockheed Martin for Spiral Development, Operation and Sustainment, and Testing was awarded 1st quarter FY 2012 for an ordering period of five years. In 2015 the contract was extended through 1st quarter FY 2022, adding an additional five years to the ordering period required to complete Spiral 8.2-5. Spiral 8.2 is planned to be fielded incrementally. Enhanced Homeland Defense (Spiral 8.2-1) fielded in FY 2018, European Phased Adaptive Approach (EPAA) Phase 3/EOR (Spiral 8.2-3) begins fielding in FY 2019, completion of system deployment with LRDR for Homeland Defense (Spiral 8.2-5) in FY 2021, and Enhanced Regional and Homeland Defense in FY 2024. This incremental fielding required a modification to the base contract increasing the ceiling and adding an additional five-year ordering period to extend the contract through first quarter FY 2022. Major team members to Lockheed are Northrop Grumman, Boeing, Raytheon, and General Dynamics. They are charged with the development, testing, fielding, training, operations and sustainment, and cyber operations support of the C2BMC system. They perform development and testing of C2BMC products in Huntsville, AL; and Colorado Springs, CO; and provide worldwide on-site operations and maintenance support. Additionally, the Defense Information Systems Agency (DISA) supports C2BMC worldwide long-haul communications. C2BMC Program Office government, Federally Funded Research and Development Center/University Affiliated Research Center (FFRDC/UARC),

and Contract Support Services (CSS) personnel are also fully integrated as part of the Prime contractor's team to function in an Integrated Product Team environment. Finally, a sole source contract Specialized Warfighter Development Contract (SWDC) was awarded to Northrop Grumman in March 2018 (3 year base and 2 one year option periods) for continuation of the systems engineering, software development, test and integration for BMDS Overhead Persistent Infrared Radar Architecture (BOA), and Simultaneous Correlation of Unambiguous Tracks (SCOUT).

N/A

**A. Mission Description and Budget Item Justification**

C2BMC Development Support provides operations engineering, integrated logistics, warfighter integration, deployment, and disposal of the current operational system and/or systems fielded in STRATCOM, NORTHCOM, INDOPACOM, EUCOM, and CENTCOM and the operation of the C2BMC Control Center. This activity provides continuous support of the development, deployment, sustainment of the C2BMC training systems, and updates training material to stay current with fielded capabilities.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

<p><b>Description:</b> This activity funds C2BMC support of current operational, test, and training systems. Recurring efforts include:</p> <ul style="list-style-type: none"> <li>- On-site maintenance, help-desk support, and developer reach-back support to ensure operational availability</li> <li>- C2BMC Command Center (CCC) 24 hours a day, 365 days a year operations providing system and network monitoring, system administration, and network defense against cyber-attacks</li> <li>- Integrated logistics support by providing a secure supply chain; reliability, availability, and maintainability (RAM) engineering; obsolescence engineering; and sparing to ensure operational availability</li> <li>- Cybersecurity engineering providing C2BMC Commercial-off-the-shelf (COTS) software/hardware updates and CCC upgrades that address system vulnerabilities, field quarterly updates to reduce system component vulnerability to cyber-attacks</li> <li>- Information System Security Officers (ISSOs) ensuring C2BMC compliance with latest cybersecurity requirements and policies</li> <li>- System modifications driven by Warfighter Involvement Process (WIP), Continuous Improvement Process (CIP), RAM and obsolescence engineering, and external systems such as Space-Based Infrared Sensors (SBIRS), Ground-based Midcourse Defense (GMD) Fire Control (GFC), Aegis, Terminal High Altitude Area Defense (THAAD), Navy Link Monitoring and Management Tool (LMMT), AN/TPY-2, standard Army communications, Defense Information Systems Agency (DISA) fiber networks, and Allied/Coalition interfaces</li> </ul>

perform a variety of tests and upgrades on the operational BMDS; and decreases recall-to-mission operations times from weeks and days to hours and minutes. Recurring accomplishments include sustaining current training systems for BMDS training events for the Unified Combatant Command developing the next generation training systems, to include the integration of Red Force / Blue Force capability, to keep current with the operational system capabilities.			
Specific and/or unique accomplishments for each FY are as follows:			
<b>FY 2019 Plans:</b> - Initiate development on BMDS LRDR for Homeland Defense (Spiral 8.2-5) TSS and DTS			
<b>FY 2020 Plans:</b> - Continue development and verification testing on BMDS LRDR for Homeland Defense (Spiral 8.2-5) TSS and DTS - Initiate deployment of BMDS LRDR for Homeland Defense (Spiral 8.2-5) TSS and DTS - Initiate development on BMDS Homeland Defense Radar - Hawaii (HDR-H) TSS and DTS			
<b>FY 2019 to FY 2020 Increase/Decrease Statement:</b> Increase in funding from FY 2019 to FY 2020 provides TSS and DTS training system enhancements/new modeling capability for the Homeland Defense Radar - Hawaii (HDR-H) and incorporating core C2BMC algorithm changes and new defense designs elements.

**Remarks**

**D. Acquisition Strategy**

The C2BMC acquisition strategy is consistent with the Agency's capability-based acquisition strategy that emphasizes testing, incremental development, evolutionary acquisition, and knowledge-based funding. Lockheed Martin Mission Systems was the C2BMC prime contractor via an Other Transaction Agreement contract vehicle, which ended 1st quarter FY 2012. A sole source C2BMC follow-on contract to Lockheed Martin for Spiral Development, Operation and Sustainment, and Testing was awarded 1st quarter FY 2012 for an ordering period of five years. In 2015 the contract was extended through 1st quarter FY 2022, adding an additional five years to the ordering period required to complete Spiral 8.2-5. Spiral 8.2 is planned to be fielded incrementally. Enhanced Homeland Defense (Spiral 8.2-1) fielded in FY 2018, European Phased Adaptive Approach (EPAA) Phase 3/EOR (Spiral 8.2-3) begins fielding in FY 2019, completion of system deployment with LRDR for Homeland Defense (Spiral 8.2-5) in FY 2021, and Enhanced Regional and Homeland Defense in FY 2024. This incremental fielding required a modification to the base contract increasing the ceiling and adding an additional five-year ordering period to extend the contract through first quarter FY 2022. Major team members to Lockheed are Northrop Grumman, Boeing, Raytheon, and General Dynamics. They are charged with the development, testing, fielding, training, operations and sustainment, and cyber operations support of the C2BMC system. They perform development and testing of C2BMC products in Huntsville, AL; and Colorado Springs, CO; and provide worldwide on-site operations and maintenance support. Additionally, the Defense Information Systems Agency (DISA) supports C2BMC worldwide long-haul communications. C2BMC Program Office government, Federally Funded Research and Development Center/University Affiliated Research Center (FFRDC/UARC),

and Contract Support Services (CSS) personnel are also fully integrated as part of the Prime contractor's team to function in an Integrated Product Team environment. Finally, a sole source contract Specialized Warfighter Development Contract (SWDC) was awarded to Northrop Grumman in March 2018 (3 year base and 2 one year option periods) for continuation of the systems engineering, software development, test and integration for BMDS Overhead Persistent Infrared Radar Architecture (BOA), and Simultaneous Correlation of Unambiguous Tracks (SCOUT).

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**A. Mission Description and Budget Item Justification**

The Joint Warfighter Support Program (JWSP) is Missile Defense Agency's primary means for providing direct technical support to Combatant Commands (CCMDs), the Military Services and the Joint Staff on Ballistic Missile Defense System (BMDS) development, testing, and operational support, to include real world testing and validation of the warfighter's operational Integrated Broadcast Service (IBS). It enables delivery of BMDS capabilities to Warfighters and ensures their participation in identification and development of new Ballistic Missile Defense (BMD) capabilities via the Warfighter Involvement Process (WIP). The JWSP allows the Warfighter and Missile Defense Agency to work together to identify gaps, seams, and needs in warfighting capability and enhance BMDS attributes by submitting modification and fielding requests. It also provides 24 hours a day, 7 days a week, 365 days a year BMD operational support to Warfighters worldwide. The program enables rapid response to Warfighter Requests for Information (RFIs) and Requests for Analyses (RFAs), which are especially critical to mission success in protecting U.S. forces and other defended assets during "Real World" threat events. The program supports improving products delivered to Warfighters through technical reviews and technical analyses supporting strategic and regional BMD planning, development of shot doctrine and BMD defense design. The JWSP also enables the inclusion of both CCMD and MDA BMD objectives in CCMD/Joint Staff-sponsored wargames and exercises, which are used to sharpen and enhance joint BMD warfighting skills.

MD40 Program-Wide Support (PWS) consists of essential non-headquarters management efforts providing integrated and efficient support to MDA functions and activities across the entire BMDS.

There are six primary functions in Joint Warfighter Support (MD03):

- (1) Current Operations Support
- (2) Combatant Command Support
- (3) Military Department Engagement
- (4) Operational BMDS Verification and Validation
- (5) Warfighter Training Support
- (6) Joint Staff Engagement

Detailed descriptions and accomplishments are provided in the following section

**Remarks**

**D. Acquisition Strategy**

The Integrated Research and Development for Enterprise Solutions Contract and the Specialized Warfighter Development Contract are the major performing integrated contracts. The acquisition strategy for Strategic Warfighter Integration mission execution is to employ a contract to perform designated integration and sustainment tasks to conduct BMDS Research, Development, Test and Evaluation (RDT&E). Strategic Warfighter Integration is operated by missile defense subject matter experts composed of Government, military, civilian personnel, Contract Support Services, and major defense contractors.

**A. Mission Description and Budget Item Justification**

Joint Warfighter Support Test is comprised of two primary responsibilities: Wargames and Exercises (WGEx) and warfighter operational support.

Wargames and exercises:

- Support the Warfighter to plan and conduct worldwide WGEx supporting BMDS development and fielding.
- Enable the Warfighter to define, test, deploy, and employ new missile defense capabilities.
- Support JFCC-IMD BMDS Table Top Exercises (TTX) to facilitate the global missile defense capability and to refine the European capability concept of operations through low-fidelity demonstration Models & Simulation (M&S).
- Examine current and future BMDS operational capabilities for Geographic (i.e., USCENTCOM, USEUCOM, and USPACOM) and Strategic (i.e., USNORTHCOM and USSTRATCOM) Combatant Commands (CCMDs).
- Complete test planning for BMDS events.

Warfighter operational support (program planning and operations):

- Prepare MDA senior leadership for engagements with the Geographic Combatant Commands (GCCs) by providing logistical support and developing briefings for the GCC Assistant Test Directors (ATDs) and MDA Director.
- Interface with the GCCs on BMD operational issues by providing planning and analysis support and capturing/transmitting warfighter responses in the MDA RFI/RFA database.
- Support GCC contingency activation planning for real-world contingencies and theater security cooperation programs by supervising the activation of MDA assets to use in the operational BMDS.
- Aid GCC participation in BMDS capability definition, design, development, integration, and delivery processes through the Warfighter Involvement Process (WIP) to synchronize capability delivery with operational readiness and acceptance.
- Provide resource management and administration of MT03 personnel and funding.

**Remarks**

**D. Acquisition Strategy**

In order to optimize the performance of the Ballistic Missile Defense System, MDA leverages Defense Department executive agents as well as the MDA Integrated Research and Development for Enterprise Solutions (IRES) contract.

The executing agents utilize various contracting strategies in a flexible manner to maximize their contribution to the BMDS. Products and Services will be acquired by competitive means to the extent that is possible and practical.

**Note**

Project MC03 is the Defensive Cyber Operations Project established in this Program Element (PE) during PBR 2018. Funds were previously reported in Project MD03 of this PE.

**A. Mission Description and Budget Item Justification**

The funds in this project are required to verify and validate that cybersecurity and/or cybersecurity-enabled products (firewalls, data/network encryption devices, routers, Intrusion Detection Systems, etc.) used within the MDA infrastructure have a current and Evaluated Assurance Level (EAL) certification and rating. They assure that validated IT products are listed on the DOD Approved Products List (APLITS). There is an additional requirement to routinely identify findings and prepare a report with recommendations. The Warfighter Strategic Integration directorate (DDW) requires this support in the IT product evaluation provided. Activities in the Project are necessary to comply with the Federal Information Systems Modernization Act of 2014 (FISMA).

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	FY 2018	FY 2019	FY 2020
<b>Title:</b> Strategic Warfighter Integration Software Assurance Support	0.146	0.154	0.156
<b>Articles:</b>	-	-	-
<b>Description:</b> Perform manual and automated software code analysis, using GFE tools (e.g. Fortify 360), to detect false positives, weaknesses, and vulnerabilities.			
1) Verify and validate cybersecurity and/or cybersecurity-enabled products (firewalls, data/network encryptors, routers, Intrusion Detection Systems, etc.) used within the MDA infrastructure have a current and Evaluated Assurance Level (EAL) certification and rating. Validate IT products are listed on the DoD Approved Products List (APLITS).			
2) Participate in meetings with customers to review software analysis findings and proposed courses of action for remediation.			
3) Prepare a comprehensive report detailing the weaknesses and vulnerabilities found. Document the references to files and line numbers.			
4) Maintain a record of all software code analysis documentation and organized in accordance with Government policy.			
Specific and/or unique accomplishments to each FY are as follows:			
<b>FY 2019 Plans:</b> - SEE ABOVE.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

**A. Mission Description and Budget Item Justification**

The Missile Defense Integration and Operations Center (MDIOC) is the Missile Defense Agency's (MDA) field operating activity in Colorado Springs, Colorado. It provides necessary infrastructure and support services through a mission execution platform for MDA elements/components and designated Combatant Commanders' Ballistic Missile Defense System (BMDS) operations executing missions at the MDIOC. The Integration Center is the organization responsible for providing a single, integrated set of skilled personnel matrixed from across MDA to manage this mission. The MDIOC mission facilities consist of a highly secure research and development complex and a mission support module (area) located at Schriever Air Force Base, adjacent to North American Aerospace Defense Command (NORAD) and United States Northern Command (USNORTHCOM). The MDA Integration Center provides mission critical system technical capabilities and subject matter expertise in a dedicated and adaptable environment that enables developers, testers, and operators to evolve, assess and deliver the capabilities for layered missile defense execution for homeland defense and theater/regional support. The MDIOC interfaces with the Information Technology/Information Assurance Enterprise to provide high availability access to worldwide secure communications, network health and status monitoring, mission critical restoral capability, and technical expertise for all MDA directed activities and events. The MDIOC functions as the mission control for BMDS distributed ground tests and system wide flight tests enabling the mission and test directors to control both main and associated test operations using secure voice, test, and mission network hubs from the MDIOC. The MDIOC also functions as the only system-level integration and interoperability mission execution platform for BMDS fire control; and it provides the physical interface between the developers and the Combatant Command warfighters.

MDIOC mission facilities contribute to the BMDS by directly supporting the concept of Concurrent Test, Training, and Operations (CTTO) for the BMDS by providing engineering integration, resource scheduling, configuration management, and implementation development support for MDA and BMDS-level test, training, and operational mission execution.

MDIOC Major Program Goals:

**UNCLASSIFIED**

<b>Exhibit R-2, RDT&amp;E Budget Item Justification:</b> PB 2020 Missile Defense Agency	<b>Date:</b> March 2019
---	-------------------------

<b>Appropriation/Budget Activity</b> 0400: <i>Research, Development, Test &amp; Evaluation, Defense-Wide I BA 4: Advanced Component Development &amp; Prototypes (ACD&amp;P)</i>	<b>R-1 Program Element (Number/Name)</b> PE 0603904C / <i>Missile Defense Integration and Operations Center (MDIOC)</i>
---	--

- Provide the capabilities and services necessary to support engineering integration, resource scheduling for ground and flight tests, configuration management, and implementation development support of on-site activities
- Ensure around the clock support and restoral of designated BMDS operational activities
- Improve interface with designated Combatant Command missile defense activities; host/support the headquarters and operations center for the United States Strategic Command Joint Functional Component Command - Integrated Missile Defense
- Maintain and improve the reliability, availability, and maintainability of MDIOC mission critical systems

<b>B. Program Change Summary (\$ in Millions)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020 Base</b>	<b>FY 2020 OCO</b>	<b>FY 2020 Total</b>

• Other Adjustment	-0.159	0.000	-2.337	-	-2.337

**Change Summary Explanation**

Increase in FY 2019 from PB19 to PB20 reflects the enacted congressional adjustments for facilities, sustainment, restoration and modernization to support maintenance of current MDA assets.

Decrease in FY 2020 from PB19 to PB20 reflects the decrease for facilities, sustainment, restoration and modernization projects funded in FY 2019 with FY 2019 congressional increase.

**A. Mission Description and Budget Item Justification**

The Missile Defense Integration and Operations Center (MDIOC) sustains and operates a 24 hours a day, 365 days a year mission complex for critical research, development, testing, training, and operations for BMDS activities. The MDIOC supports the Ground-based Midcourse Missile Defense Mission Control Center Facility, as well as the Command, Control, Battle Management, and Communications (C2BMC) Integration and Test Centers and the C2BMC Experimentation Laboratories. It provides infrastructure support for the Satellite Tracking and Surveillance System's (STSS) Missile Defense Space Center (MDSC); and the Targets and Countermeasures' (TC) Mission Control Center - Targets (MCC-T). The MDIOC also provides developmental support to the Enterprise Sensors Laboratory (ESL) composed of a common satellite ground station and sensor netting test bed for designated Ballistic Missile Defense System (BMDS) elements. The MDIOC supports BMDS test events based on the Integrated Master Test Plan (IMTP). It supports BMDS Critical Engagement Conditions testing and analysis through the operation of the Test Execution Control node for distributed BMDS ground tests. During system flight tests, the MDIOC provides infrastructure (power; Heating, Ventilation and Air Conditioning; and communications) support to the Flight Test Director and crew, and ensures the protection of facility and test assets throughout the test window. Further, the MDIOC provides the facilities that support operations of the Missile Defense Element, manned by the U.S. Army 100th Missile Defense Brigade, the United States Northern Command (USNORTHCOM) C2BMC Command and Control Center (CCC), the United States Strategic Command's (USSTRATCOM's) Joint Functional Component Command-Integrated Missile Defense (JFCC-IMD) and the Missile Defense Agency (MDA) Warfighter Support Center. In addition, the MDIOC supports the MDA Operations Support Center, which provides situational awareness of the health and status of the end-to-end BMDS, and provides network subject matter expertise and technical reach back for the program elements and Combatant Commanders. The MDIOC hosts BMDS wargames and exercises in support of the warfighter, and delivers the requisite infrastructure to integrate the modeling and simulation assets that form system-level constructive simulations for full-envelope BMDS performance assessments, with surrogate capability for BMDS ground tests. The MDIOC maintains a technical repository of BMDS Implementation Architectures for real-time operations and configuration control; provides state change management and asset management technical support for the BMDS; and provides the technical environment for BMDS Watch Officers, Safety Officers, and Information Assurance Officers to perform their assigned duties. The MDIOC also supports the operations of the Joint Early Warning Laboratory (JEWL), which provides USSTRATCOM with quick response analyses of real-world launches, and rapid anomaly identification and resolution.

<b>Articles:</b>		-	-	-
<b>Description:</b> RECURRING: - Provide Mission Assurance by ensuring the successful execution of Concurrent Test, Training, and Operations (CTTO) activities at the MDIOC facility. - Ensure independent verification, and coordinate customer validation of all activities, work products and requirements fulfilled by MDIOC Engineering. - Provide Risk Management by identifying, assessing, and prioritizing risks. Coordinate resources to minimize, monitor and control the probability and impact of events. Develop strategies to manage threats, including avoidance, reduction, transfer and retention. - Ensure Coordination and Integration through a proactive approach of sharing critical information necessary for the successful conduct of CTTO activities in a dynamic environment. - Provide Systems Engineering by developing effective solutions through a structured, repeatable process for MDIOC engineering activities. Provide governance and training to stakeholders, enforce policy, establish and maintain a unified board structure for the vetting and implementation of requirements. - Ensure Configuration Management so that CTTO events are not disrupted by multiple competing activities. - Maintain the Technical Baseline to establish a common reference, and implement a formalized process that provides stability across the MDIOC. - Provide Change Management to track changes to the IT and MDIOC physical infrastructure. Understand how any change may affect CTTO activities, and determine when any change is least likely to impact key functionality. Ensure all changes, across the technical baseline, are clearly recorded and identified on a near-real-time basis. - Provide effective requirements management by documenting decisions and information generated during requirements development in conjunction with the design solution processes.

**Remarks**

**D. Acquisition Strategy**

The Integrated Research and Development for Enterprise Solutions Contract is the major performing integrated contract. The acquisition strategy for MDIOC mission execution is to employ a contract to perform designated integration and sustainment tasks to conduct BMDS Research, Development, Test and Evaluation (RDT&E). The MDIOC is operated by missile defense subject matter experts composed of Government, military, civilian personnel, MDIOC Contract Support Services, and major defense contractors.

**E. Performance Metrics**

**Remarks**  
Funds for utilities and base communications are specified in the Inter-service Support Agreement with the 50th Space Wing. In addition, the Missile Defense Integration and Operations Center (MDIOC) provides Technical Contract Support Services employees, for MDIOC operations and oversight of the Integrated Research and Development for Enterprise Solutions (IRES) contract, as well as funding for IRES work as required by the government.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**  
Decrease from FY 2019 to FY 2020 reflects completion of software and x86 processor upgrades.

**A. Mission Description and Budget Item Justification**

The SBX is an advanced X-band radar that provides the capability for mid-course acquisition, tracking, discrimination and hit-assessment of missile threats. The SBX radar is mounted on a mobile, ocean-going, semi-submersible platform, enabling it to cover any region of the globe. The SBX supports the Ballistic Missile Defense System (BMDS) Homeland Defense mission by tracking and discriminating sophisticated Intercontinental Ballistic Missile (ICBM) threats.

SBX operates at sea for BMDS flight and ground test participation or in an active, operational status when indications and warnings signal the need for enhanced discrimination. The SBX is located in a Pacific port when not required at sea. The SBX maintains vessel certifications for operations at sea as well as software compatibility with the BMDS.

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects enacted congressional adjustment for a program increase and to accelerate SBX software upgrades.

Decrease in FY 2019 from PB19 to PB20 reflects enacted congressional adjustment due to FY 2018 forward financing for SBX software upgrades.

Decrease in FY 2020 from PB19 to PB20 reflects delay of dry dock from FY 2020 to FY 2025.

**Note**  
Decrease from FY 2019 to FY 2020 reflects completion of software and x86 processor upgrades.

**A. Mission Description and Budget Item Justification**

This project provides developmental operations and support of the SBX Radar and its four major sub-systems: the self-propelled vessel; the X-Band Radar (XBR); the In-Flight Interceptor Communications System Data Terminal; and the communications network. Developmental operations and support activities include operation and sustainment of the vessel, developmental operation and sustainment of the XBR, limited XBR software support and vessel and shore side security. The FY 2020 budget reflects the continued development required to deliver BMDS enhanced discrimination capability.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
<b>Title:</b> Vessel Operations and Support	96.370	72.762	67.563
<b>Articles:</b>	-	-	-
<b>Description:</b> Vessel Operations and Support provides for sustainment of the SBX vessel for full operations. This effort maintains annual surveys and U.S. Coast Guard Certifications to ensure readiness for operational contingencies, provides for resupply of SBX, and conducts in port and underway maintenance. The SBX participates in BMDS ground tests and flight tests per the Integrated Master Test Plan (IMTP). This effort also provides force protection for SBX and military flight deck upgrade.			
Specific and/or unique accomplishments to each FY are as follows:			
<b>FY 2019 Plans:</b> - SEE ABOVE.			
<b>FY 2020 Plans:</b> - SEE ABOVE			
<b>FY 2019 to FY 2020 Increase/Decrease Statement:</b> Decrease from FY 2019 to FY 2020 reflects a decrease in requirements after FY 2018 Congressional Plus Ups and completion of software and x86 processor upgrades.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Content supports expected contributions from Israel per international agreements.

**A. Mission Description and Budget Item Justification**

Since 1986, the United States and the State of Israel have cooperated on missile defense. Currently, Missile Defense Agency (MDA) has three major projects with Israel to develop and improve their indigenous capability to defend against short and medium range ballistic missiles. These include Upper Tier Interceptors (MD20), the Arrow Weapon System (MD26) and the Short-Range Ballistic Missile Defense, also known as the David's Sling Weapon System (MD34). Within these projects MDA develops and produces weapon systems, conducts tests, and exercises interoperability between U.S. Ballistic Missile Defense System (BMDS) and the Israeli Missile Defense Architecture.

The United States and State of Israel entered into a Memorandum of Understanding (MOU) on September 2016, in which 'Such funding, should over a ten year period beginning in FY 2019 and ending in FY 2028, be provided at a level of \$500 million per year.' These funds will be distributed between the Israeli Programs in Research Development Test & Evaluation (RDT&E) and Procurement Funds.

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects enacted congressional adjustments that increased MD20: Israeli Upper Tier by \$133,139, MD26: Israeli Arrow Program by \$71,459 and MD34: Short Range Ballistic Missile Defense (David's Sling Weapon System) by \$63,848.

Funds for the Israeli Upper Tier MD20 were incorporated into Arrow Weapon System Development MD26 as part of the MOU beginning in FY 2019.

**Note**

This project code encompasses the Missile Defense Agency's (MDA) U.S.-Israeli cooperative program for the Israeli Upper Tier Program. Funding for MD20 Israeli Upper Tier was incorporated into MD26 Arrow Weapon System (AWS) Development beginning in FY 2019.

**A. Mission Description and Budget Item Justification**

Israeli Upper Tier Interceptor (UTI) Project: The Upper Tier Program provides the Arrow-3 missile, increasing the system's capability against advanced medium range threats by providing approximately four times the current Arrow-2 battle space. The primary near term objective is to complete and demonstrate Upper Tier design, and continue Initial Lot Production (ILP) deliveries.

This project provides funding for the Upper Tier component of the Arrow Weapon System (AWS) development. The United States through the cooperative effort gains knowledge and experience of the Israeli Defense Forces operation of a multi-layered defense architecture. This project also includes the procurement of the Silver Sparrow Air-Launched Target which is necessary to validate the performance of the Arrow-3 Missile and related Block 5 spiral development activities.

Spiral development and UTI upgrades were incorporated into the Arrow Weapon System (MD26: Israeli ARROW Program) as the UTI initial development and Low Rate Initial Production were complete beginning in FY 2019.

The United States and State of Israel entered into a Memorandum of Understanding (MOU) on September 2016, in which 'Such funding, should over a ten year period beginning in FY 2019 and ending in FY 2028, be provided at a level of \$500 million per year.' These funds will be distributed between the Israeli Programs in Research Development Test & Evaluation (RDT&E) and Procurement Funds.

**Remarks**

**D. Acquisition Strategy**

The Upper-Tier Interceptor Project Agreement under the Research, Development, Test and Evaluation (RDT&E) Framework agreement between the U.S. and Israel creates a joint program office to manage this program. Missile Defense Agency (MDA) and the Israeli Ministry of Defense (IMoD) continue to implement best management practices that allow for the more effective use of program management tools to ensure risk is adequately managed to include Knowledge Points that assess Israel's development progress. The DoD U.S. Israeli Cooperative Program Office jointly manages the Upper Tier program with IMoD to ensure that all systems are delivered on time, on budget, and meet the needs of the warfighter. The program is equitably funded between the U.S. and Israel. A portion of the Israeli cost share comes from non-financial contributions such as previously completed work prior to joint program initiation. Contracts are awarded by IMoD or MDA dependent on what is most advantageous to the Joint Governments. In regard to the Upper Tier Interceptor, IMoD will contract with Israel Aerospace Industries (IAI). IAI subcontracts with Israeli companies, Boeing and other U.S. companies.

**Note**  
Funds for MD20 Israeli Upper Tier were incorporated into this project beginning in FY 2019.

**A. Mission Description and Budget Item Justification**

Israeli Arrow Weapon System (AWS): This system includes block upgrades to the AWS components which enhances capabilities against evolving medium range threats by increasing the total defended area. AWS elements include the Arrow-2 missile and launcher, Citron Tree Battle Management Center (BMC), Green Pine (GP) and Super Green Pine (SGP) Radars, and the Hazelnut Tree Launcher Control Center (LCC). Also included is the integration of Block 5 assets which include the Arrow-3 missile and launcher.

Arrow Block 5 development will also incorporate a Long Range Detection Suite that consists of an unmanned aerial vehicle Airborne Early Warning System (ABEWS) and Sharp Eye Radar for increased sensor range, early detection and enhanced raid size capacity. The program also includes the continued development of Arrow's interoperability with U.S. BMDS.

The United States and State of Israel entered into a Memorandum of Understanding (MOU) on September 2016, in which 'Such funding, should over a ten year period beginning in FY 2019 and ending in FY 2028, be provided at a level of \$500 million per year.' These funds will be distributed between the Israeli Programs in Research Development Test & Evaluation (RDT&E) and Procurement Funds.

**C. Other Program Funding Summary (\$ in Millions)**

N/A

**Remarks**

**D. Acquisition Strategy**

The DoD U.S. Israeli Cooperative Program Office jointly manages the Arrow Program with Israel Ministry of Defense (IMoD) to ensure that all systems are delivered with quality on time, on budget, and meet the needs of the warfighter. The program funding is equitably funded between the U.S. and Israel with Israel providing matching contributions. However, a portion of the Israeli cost share comes from non-financial contributions such as previously completed work prior to joint program initiation. Contracts are awarded by IMoD or MDA dependent on what is most advantageous to the Joint Governments. In regard to AWS, IMoD contracts on behalf of U.S. government with Israel Aerospace Industries (IAI). IAI subcontracts with Israeli and U.S. companies. For the Israeli Test Bed, the Missile Defense Agency (MDA) contracts directly with Elbit Systems, Ltd. while IMoD provides an equitable share of the funding to the U.S. Finally, MDA provides funding and contracts directly with WALES, Ltd for the Israeli System Architecture and Integration program.

**Note**

This project code encompasses the Missile Defense Agency's (MDA) U.S.-Israeli cooperative program for the Israeli David's Sling Weapon System Program.

**A. Mission Description and Budget Item Justification**

Short Range Ballistic Missile Defense (SRBMD): SRBMD, also known as the David's Sling Weapon System (DSWS), is designed to counter short range rockets, cruise missiles, and tactical ballistic missiles and will be integrated into the Israeli Missile Defense Architecture adding another layer of defense to the current Arrow System. The David's Sling Weapon System (DSWS) includes the Stunner Interceptor, Missile Firing Unit (MFU), Multi-Mission Radar (MMR), Launch Site Controller (LSC), Data Link (DL), Elevated Sensor (ES), and the Golden Almond Battle Management Center (BMC).

The United States and State of Israel entered into a Memorandum of Understanding (MOU) on September 2016, in which 'Such funding, should over a ten year period beginning in FY 2019 and ending in FY 2028, be provided at a level of \$500 million per year.' These funds will be distributed between the Israeli Programs in Research Development Test & Evaluation (RDT&E) and Procurement Funds.

<b>Title:</b> SRBMD Program	101.500	137.000	141.000
<b>Articles:</b>	-	-	-
<p><b>Description:</b> The scope of the David's Sling Weapon System covers system development, testing, material procurement to include initial lot production, and integration of spiral software development for Blocks 1-3. Block 1 capability enhances the short range rocket and missile defense capability. Block 2 will add capability to defend against medium range and cruise missiles. Block 3 will provide robust defense capability and add significant detection capability to the Israeli Air Defense Architecture. Recurring Planned Accomplishments include:</p> <ul style="list-style-type: none"> <li>- Conduct Testing of the DSWS</li> <li>- Continue Blocks 2 and 3 Spiral Development of the DSWS</li> <li>- Establish and Continue Interoperability with Israeli Air Missile Defense Network</li> </ul>

**Remarks**

**D. Acquisition Strategy**

The Short Range Ballistic Missile Defense (SRBMD), also known as the David's Sling Weapon System (DSWS) Project Agreement under the Research, Development, Test and Evaluation (RDT&E) Framework agreement between the U.S. and Israel creates a joint program office to manage this program. Missile Defense Agency (MDA) and the Israeli Ministry of Defense (IMoD) continue to implement management practices that allow for the more effective use of program management tools to ensure risk is adequately managed to include Knowledge Points that assess Israel's development progress. The DoD U.S. Israeli Cooperative Program Office jointly manages the SRBMD/DSWS program with IMoD to ensure that all systems are delivered in an effective manner, and meet the needs of the warfighter. The program is equitably funded between the U.S. and Israel. A portion of the Israeli cost share comes from non-financial contributions such as previously completed work prior to joint program initiation. Contracts are awarded by IMoD or MDA dependent on what is most advantageous to the Joint Governments. For the Stunner Interceptor, Rafael Advanced Systems (an Israeli company), subcontracts to Raytheon Missile Systems for Stunner interceptor components.

**Program MDAP/MAIS Code:** 362

**Note**  
Decrease from FY 2019 to FY 2020 in accordance with the Integrated Master Test Plan (IMTP) 20.1

**A. Mission Description and Budget Item Justification**

Missile Defense Agency (MDA) utilizes a disciplined system engineering process to develop and integrate the Ballistic Missile Defense System (BMDS) into an effective, layered defense against ballistic missiles of all ranges during all phases of flight. This process consists of the following steps: Plan, Define, Design, Build, Test and Verify, Assess, and Deliver BMDS Capability, followed by transfer of selected capabilities. The BMDS Test Program Element (PE) is responsible for testing that provides critical data to: determine validity of models and simulations used to verify and assess BMDS capabilities; validate that Elements and Components are properly designed, built, and integrated; and provide confidence that the BMDS will perform as designed. Results from the Test and Verify step provide feedback into the Plan, Define, and Design steps to identify areas for system improvements. Key to the systems engineering process is Modeling and Simulation (M&S), which reflects the integrated operational system's performance. Confidence in M&S is based on a comprehensive Verification, Validation, and Accreditation (VV&A) process. The BMDS Test Program, as documented in the Integrated Master Test Plan (IMTP), has a primary emphasis to provide the data necessary to verify and assess BMDS capabilities in support of Technical Capability Declarations, and to anchor BMDS M&S. As models are validated and accredited, MDA and the BMDS Operational Test Agency (OTA) Team will utilize these models to assess BMDS capabilities through a campaign of ground testing.

BMDS Test Program Functions include:

- Represent MDA as the single test authority to the test and evaluation community, international cooperative program representatives, and other organization representatives
- Develop and implement MDA test policy, standards, tools, products, and processes to enable effective tests while balancing MDA and element programmatic needs
- Develop an IMTP that compiles all MDA test objectives, test schedules, and funding requirements from the year of execution through the Future Years Defense Program time period and beyond (through FY 2027)
- Act as the single point of contact in MDA for all external ranges and common test resources
- Provide, maintain, and develop common test resources and infrastructure required to execute tests in the MDA Test Program by leveraging element laboratories, ranges, executing agents, and functional expertise, as applicable

**Note**

The MD04 project has been added in FY 2021 to provide the procurement and outfitting of the Consolidated Test Center (CTC).

**A. Mission Description and Budget Item Justification**

The CTC is a two-phase complex of test and development focused buildings to be located on Redstone Arsenal. When completed, this complex will provide a more operationally realistic, secure, and efficient test infrastructure environment. Current Agency test infrastructure consists of 109 labs in 29 facilities across ten states. The consolidation of these geographically dispersed test centers into the CTC allows for future upgrades to capability and efficiently maintains a more robust security posture in accordance with DoD policy. The consolidation into the CTC also aligns the Agency to the mandated Federal Data Center Consolidation Initiative and reduces security vulnerabilities from several disparate security authorities. The Agency will be better positioned to support emerging requirements and address agile integration and testing through a conformed DoD network, not dispersed geographically which adds additional complexity and security issues to an evolving threat response. Agency testing requires agility and complexity to meet the evolving threat, and updating the current test infrastructure requires substantial investment.

CTC-1 will allow the Agency to consolidate developmental testing and Hardware-In-the-Loop (HWIL) assets into a single complex to support the increasing pace of system-level testing. This strategy is critical because several data centers are approaching capacity. It also ensures compliance with Agency commitments to vacate currently leased space and consolidate laboratories into MDA-owned facilities. By synchronizing technology refreshes across the laboratories and data centers, the Agency will reduce the cost of common test infrastructure across the Agency and will provide more efficient infrastructure for continuous operations. CTC-2 will move the majority of MDA developmental laboratories out of Army (AMRDEC/SED) and other premises and under Agency cognizance, with the potential to reduce future infrastructure costs (beyond FYDP) while improving Agency security posture through developmental laboratory consolidation. CTC-1 MILCON is scheduled to begin in FY 2022, with outfitting and equipping beginning simultaneously to ensure complete transition NLT FY 2025. CTC-2 MILCON is planned to begin in FY 2025.

**Note**  
Decrease from FY 2019 to FY 2020 in accordance with the Integrated Master Test Plan (IMTP) 20.1.

**A. Mission Description and Budget Item Justification**

The Test Program provides consolidated MDA capabilities and resources to support the management and execution of BMDS and Element-level testing.

The MDA Test Program is responsible for all BMDS testing and relies on BMDS Systems Engineering to provide the system test objectives that define the test architecture by developing, updating, coordinating, and assessing the IMTP. The MDA Test Program plans and executes BMDS test events and develops the necessary test policy, test plans, and test infrastructure to conduct an effective test program. The goals of this budget project are to sustain and improve a robust testing program and to enhance M&S efforts to provide, in conjunction with flight and ground testing, confidence to the Combatant Commanders that the missile defense system works.

Activities are grouped into six major areas: 1) Program Planning and Operations; 2) Flight Test; 3) Ground Test; 4) Test Infrastructure; 5) Engineering Test Analysis; and 6) USFK JEON.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

<b>Title:</b> Program Planning and Operations	100.203	85.841	95.465
<b>Articles:</b>	-	-	-
<b>Description:</b> The BMDS Test program is responsible for the following Program Planning and Operational activities:			
- Provide BMDS OTA System Team funding for civilian salaries and personnel support of system-level testing and conduct cybersecurity assessments of BMDS.			
- Implement cybersecurity test requirements as directed by the National Defense Authorization Act (NDAA) for Fiscal Year 2016, Pub. L. No. 114-92, Sec. 1647 (a), Director, Operational Test and Evaluation (DOT&E), and Deputy Assistant Secretary of Defense, Developmental Test and Evaluation (DT&E) to include planning, coordination, and execution of Cooperative Vulnerability and Penetration Assessments, Adversarial Assessments, Cyber Table Top Exercises, and Element Cybersecurity Experiments			
- Serve as the MDA Test Interface/Liaison to the DOT&E, the DASD (DT&E), JFCC IMD, JITC and the Service OTAs.			
- Maintain a professional and diverse civilian workforce for flight and ground test support events.			
- Establish, maintain and execute the BMDS Test program budget.			
- Provide Integrated Master Test Plan cost modeling.			
- Provide day-to-day Test Functional Area (TFA) management.

**Remarks**

**D. Acquisition Strategy**

The BMDS Test Program acquisition strategy is consistent with the MDA capabilities-based acquisition strategy that emphasizes testing, evolutionary acquisition, and knowledge-based funding. Test directs a team of various internal staff (government and scientific, engineering and technical assistance support), executing agents (including DoD agencies, Service Organizations, Laboratories and Program Offices, Federally Funded Research and Development Center (FFRDC) and other MDA programs to execute the various diverse efforts within the BMDS test program through competition. When a specific effort/activity being conducted, acquired, or maintained requires the use of an executing agent, respective headquarter regulations are used to conform the acquisition strategy.

The MDA IMTP establishes and documents the test requirements for the BMDS with the specific focus on collecting the data needed for the Verification, Validation, and Accreditation (VV&A) of the BMDS Models and Simulations. This paradigm uses critical factor analysis to drive test design, planning, and execution for accrediting M&S, which is used to validate and assess system performance. With this test approach, MDA will establish confidence that the M&S used to evaluate the BMDS represent real world behavior, thereby enabling simulation-based performance assessment to verify system functionality.

**Remarks**  
 Recategorized and streamlined BMDS Test cost category content to better align test priorities.  
  
 The FY 2019 to FY 2020 increase of \$54.411 million in Ground Test - Ground Test Infrastructure line reflects movement of all Ground Test infrastructure from the Test Infrastructure R-2A accomplishment to the Ground Test R-2A accomplishment.

**Note**

Decrease from FY 2019 to FY 2020 reflects completion of cybersecurity enhancements, as addressed in House Rpt 115-676, page 232, accompanying the National Defense Authorization Act for Fiscal Year 2019.

**A. Mission Description and Budget Item Justification**

BMDS Test Cyber Operations sustain Missile Defense Agency Risk Management Framework (RMF) Standards, Computer Network Defense Service Provider and Controls Validation Testing activities: validation results; risk assessments; and reviews of proposed Program Manager/Information Systems Security Manager (PM/ISSM) Plans of Action and Milestones (POA&Ms) for MDA Ballistic Missile Defense Test program. It maintains the Certification and Accreditation (C&A) data repository, capturing the RMF documentation (artifacts, validation results, and Cybersecurity Risk Assessment results, and Authorizing Official (AO) accreditation decisions) and POA&Ms on all MDA information systems. This project supports the monitoring and tracking of Cybersecurity mitigations detailed in Information Technology security POA&Ms. Activities include preparation of C&A documentation and accreditation recommendations to the MDA Senior Information Systems Security Officer/ Security Controls Assessor (SCA) and AO. Independent Verification and Validation (IV&V) team actions ensure the availability, integrity, authentication, confidentiality and non-repudiation of the MDA mission, test and administrative systems. Activities in the Project are necessary to comply with the Federal Information Systems Modernization Act (FISMA) of 2014. The MDA Information Technology Networks and Systems (ICTA) and Cross Domain Solution (CDS) provide oversight and guidance for implementing standard CDS security policies across the BMDS. The Network Operations Security Center (DNOSC) is the Local Control Center (LCC) (Tier 3) that protects, detects, characterizes, reports, and mitigates cyber threats through real-time continuous monitoring for flight and ground test assets.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**A. Mission Description and Budget Item Justification**

The Ballistic Missile Defense System (BMDS) Targets Program provides centrally managed targets and countermeasures development and procurement for a cost effective, integrated system-level approach to BMDS testing. Based on engineering assessments of threat intelligence data, the BMDS Targets Program develops, builds, and supports the launch of Short Range Ballistic Missile (SRBM: Less than 1000 Kilometer range) targets, Medium Range Ballistic Missile (MRBM: 1000-3000 Kilometer Range) targets, Intermediate Range Ballistic Missile (IRBM: 3000-5500 Kilometer Range) targets, Intercontinental Ballistic Missile (ICBM: Greater than 5500 Kilometer range) targets, and Multi-Class Components to test, verify, and validate the performance of the BMDS against threats. The BMDS Targets Program provides an economical and reliable inventory of targets, which are representative of feasible future threats and support demonstration of the capability of the evolving layered missile defense system in a simultaneous test and operations threat environment.

---	--

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustments to accelerate deployment of 20 additional Ground Based Interceptors (GBI) with Redesigned Kill Vehicle (RKV), Terminal High Altitude Area Defense (THAAD)/Patriot Joint Emergent Operational Need (JEON), and FTM-29 flight test repeat.

Increase in FY 2019 from PB19 to PB20 reflects the enacted congressional adjustments to fund cybersecurity upgrades, THAAD/Patriot JEON requirements, and development of an advanced target. The congressional decrease was for acceleration of boosters - requirement forward funded in FY 2018.

Increase in FY 2020 from PB19 to PB20 provides the advanced target, fully funding the USFK JEON, target obsolescence, and Integrated Master Test Plan flight test adjustments.

FY 2019 reflects congressional adjustment to address cybersecurity threats.

**A. Mission Description and Budget Item Justification**

Defense Cyber Operations sustains Missile Defense Agency DoD Information Assurance Certification and Accreditation Program (DIACAP), Risk Management Framework Standards, Computer Network Defense Service Provider and Controls Validation Testing activities; analysis of validation results; risk assessments and reviews of proposed Program Manager/Information Assurance Manager (PM/IAM) Plans of Action and Milestones (POA&Ms) for MDA Ballistic Missile Defense Test program. It maintains the Certification and Accreditation (C&A) data repository, capturing the DIACAP documentation (artifacts, validation results, and Information Assurance Risk Assessment results, and Designated Approving Authority (DAA) accreditation decisions) and POA&M on all MDA information systems. This project supports the monitoring and tracking of Cybersecurity mitigations detailed in Information Technology security POA&Ms. Activities include preparation of C&A documentation and accreditation recommendations to the MDA Senior Information Assurance Officer/Certification Authority (CA) and DAA. Independent Verification and Validation (IV&V) team actions ensure the availability, integrity, authentication, confidentiality and non-repudiation of the MDA mission, test and administrative systems. Activities in the Project are necessary to comply with the Federal Information Security Management Act (FISMA).

**A. Mission Description and Budget Item Justification**

The mission of the BMDS Targets Program is to provide an economical and reliable inventory of targets that are representative of feasible future threats. These targets enable demonstration of BMDS capabilities in operationally realistic scenarios. The BMDS Targets Program develops and acquires four target types across four target classes. The classes include: Short Range Ballistic Missiles (SRBM), Medium Range Ballistic Missiles (MRBM), Intermediate Range Ballistic Missiles (IRBM), and Intercontinental Ballistic Missiles (ICBM). The target types (Type 1-4) designate the complexity of the target within its class. Type-1 targets are simple baseline configurations. Type-2 targets have increased capability or complexity. Type-3 targets have unique configurations. Type-4 targets are subscale targets.

The BMDS Targets Program develops and provides Modified Ballistic Re-Entry Vehicles (MBRV) and Countermeasures that can be used across the spectrum of target types and classes. The BMDS Targets Program provides target digital models that enable MDA weapon system program offices to simulate end to end sensor and interceptor performance during pre-mission analysis. The BMDS Targets Program also provides maintenance, aging surveillance, refurbishment, and routine testing of government furnished equipment boosters and target components.

The BMDS Targets Program carefully plans the year of execution to assure the best use of appropriated funds. However, the BMDS Targets Program must be flexible in its execution of the program in order to respond to emerging real world threats or changes in the intelligence community estimates of when a threat will be deployed. The BMDS Targets Program must also work with BMDS systems engineers on a continuing basis to align the targets program to the BMDS need to demonstrate capabilities as reflected in MDA's Integrated Master Test Plan (IMTP). The BMDS Targets Program makes every effort to reduce instability in contracts, production base and budget while managing in this dynamic work environment.

The BMDS Targets Program develops and builds targets and countermeasures at multiple locations including: Courtland, AL; Orlando, FL; Huntsville, AL; and Chandler, AZ. Storage and maintenance facilities are also located throughout the country including: Huntsville, AL; White Sands, NM; Ogden, UT; Tooele, UT; Cape Canaveral Air Force Station, FL, and Courtland, AL.

The BMDS Targets Program consists of four major areas: Consumables, Program Planning and Operations, Resources, and Flight Test Execution.

<b>Exhibit R-2A, RDT&amp;E Project Justification:</b> PB 2020 Missile Defense Agency		<b>Date:</b> March 2019
<b>Appropriation/Budget Activity</b> 0400 / 4	<b>R-1 Program Element (Number/Name)</b> PE 0603915C / <i>Ballistic Missile Defense Targets</i>	<b>Project (Number/Name)</b> MT05 / <i>BMDS Targets Program</i>

<b>B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
---	----------------	----------------	----------------

**Description:** Consumables include SRBM target hardware development and manufacturing.

Target development includes non-recurring engineering, MBRVs, Countermeasures, and launch support equipment for BMDS flight testing as required by the BMDS IMTP. Target development provides air, sea, and ground launch capabilities to maximize flexibility in MDA test design. Development activities include requirements decomposition, design, modeling and simulation, qualification testing, and characterization. The BMDS Targets Program Office manages target configuration, component interface specifications, range integration, reliability, mission assurance, and costs. The BMDS Targets Program ensures target designs are producible, reliable, and affordable.

Target manufacturing includes the build of targets and target components that are required to execute the BMDS IMTP. Manufacturing includes government furnished equipment and new component acquisition, assembly, and integration. Also included are target characterization, quality and mission assurance, transportation, and logistics support. The BMDS Targets Program delivers fully assembled and integrated targets to the BMDS Test Program. Future revisions to the IMTP will likely affect target types and quantities noted in the Planned Accomplishments.

Specific and/or unique planned accomplishments to each FY are as follows:

**FY 2019 Plans:**

- Short Range Ballistic Missile T4-G (SRBM T4-G) - deliver Ship Sets 1 and 2 to support pre-ship readiness reviews and flight tests in FY 2019
- SRBM T4-B - deliver Ship Set 25 to support a pre-ship readiness review and flight test in FY 2019; continue manufacture of Ship Set 26 to support a pre-ship readiness review in FY 2020
- Award contract and initiate development of future short range (subscale) targets to include initiation of SRBM T4 manufacture of Ship Sets 1, 2, and 3 to support pre-ship readiness reviews in FY 2022

**FY 2020 Plans:**

- SRBM T4-B - deliver Ship Set 26 to support a pre-ship readiness review and flight test in FY 2020
- Future short range ballistic missile (subscale) targets - continue development efforts, continue manufacture of SRBM T4 Ship Sets 1, 2, and 3 to support pre-ship readiness reviews in FY 2022, and initiate manufacture of SRBM T4 Ship Set 4 to support pre-ship readiness review in FY 2023

**C. Other Program Funding Summary (\$ in Millions)**

N/A

**Remarks**

**D. Acquisition Strategy**

The BMDS Targets Program provides for the development and purchase of ballistic missile targets and countermeasures for the BMDS in support of the MDA's flight test program. The BMDS Targets Program requirements are derived from the BMDS Integrated Master Test Plan (IMTP).

The BMDS Targets Program is currently in various stages of planning or execution for procurement of ballistic missile targets by range class: SRBM, MRBM, IRBM, and ICBM. These targets are procured using a Target Performance Specification to support flight test requirements as identified in the IMTP. Each target class may be solicited, evaluated, and competitively awarded independently in IMTP 'need date' priority order.

The BMDS Targets Program competitively awarded a prime contract in 2011 to Orbital Sciences Corporation (now Northrop Grumman Innovation Systems (NGIS)) with a period of performance (PoP) of March 2011 through September 2025 for air-launched IRBM targets. This award included two follow-on options, one for eight IRBM targets exercised in 2014 and another for six IRBM targets exercised in 2017.

The BMDS Targets Program conducted a limited competition in 2012 and awarded a contract modification to Orbital Sciences Corporation (now NGIS) with a PoP of October 2012 through September 2025 for the development of ICBM targets. This award included two ICBM Stage Zero Kits to be used with an existing air-launched IRBM target. Four ICBM Stage Zero Kits were added in 2018.

The BMDS Targets Program competitively awarded a prime contract in 2016 to Orbital Sciences Corporation (now NGIS) with a period of performance (PoP) of July 2016 to December 2020 for three MRBM T3c2 targets. This award included an option for up to four MRBM T3c2 targets.

The BMDS Targets competitively awarded a prime contract to L-3 Communications/Coleman Aerospace Corporation with a PoP of October 2013 through December 2027 to provide six MRBM targets. This award includes one follow-on option, for up to twelve additional MRBM targets. The first target from this contract will be delivered in 4QFY19.

<b>Exhibit R-2A, RDT&amp;E Project Justification:</b> PB 2020 Missile Defense Agency		<b>Date:</b> March 2019
<b>Appropriation/Budget Activity</b> 0400 / 4	<b>R-1 Program Element (Number/Name)</b> PE 0603915C / <i>Ballistic Missile Defense Targets</i>	<b>Project (Number/Name)</b> MT05 / <i>BMDs Targets Program</i>
<p>The SRBM T4 and MRBM T4 (previously called the Aegis Readiness Assessment Vehicles (ARAVs)) target efforts are managed by BMDs Targets Program and the Naval Surface Warfare Center Port Hueneme Division White Sands (NSWC PHD WS). NSWC PHD WS has unique sounding rocket expertise and access to existing contracts managed by White Sands Missile Range that makes this a beneficial relationship for both parties. BMDs Targets Program provides targets funding via Military Interdepartmental Purchase Orders that NSWC PHD WS expends on its hardware development and engineering contracts. The BMDs Targets Program Office will be transitioning the NSWC subscale efforts to a new competitively awarded contract anticipated in FY 2019. This transitioning reduces the mission and schedule risk of ensuring the Program Office maintains a relationship with NSWC as a backup plan/surge need to have NSWC quick turn and deliver targets.</p> <p>The BMDs Targets Program Future Acquisition Strategy is based on two premises. The first is to utilize existing capabilities/infrastructure and sustain an industrial base to deliver targets. The second is to initiate acquisitions that delivers low cost/affordable targets that replicate evolving threats. The Acquisition Strategy is proceeding through the MDA Acquisition Panel/Board reviews for decision-making. Depending on the approved outcome, multiple Request for Proposals may be released for future target acquisitions.</p>

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Increase in FY 2019 reflects congressional adjustments to continue research and development for three separate laser scaling efforts, to retain three performers for Low Power Laser Demonstrator (LPLD) through Critical Design Review (CDR) and to address cyber threats.

Increase in FY 2020 provides the continued Electro Optical/Infrared (EO/IR) participation in Ballistic Missile Defense System (BMDS) level tests and the addition of Neutral Particle Beam (NPB), a new directed energy capability to defeat the emerging threat.

**A. Mission Description and Budget Item Justification**

Technology Maturation Initiatives (TMI) demonstrates the utility of directed energy for missile defense. MDA's directed energy plan incrementally demonstrates and improves the constituent components required to execute a directed energy kill chain; acquisition, tracking and lethality. The efforts shape future BMDS acquisition choice by advancing the technology readiness levels of emerging and developing technology, while simultaneously assessing the performance and contributions to the BMDS architecture. TMI includes development, demonstration, systems engineering and test efforts to improve performance of lasers, EO/IR sensors, and disruptive directed energy concepts

MDA will develop cost effective technology demonstrators to address specific risks:

- An advanced sensor integrated into an airborne or space platform to provide discrimination of lethal objects and other advanced sensor applications
- A compact, ruggedized advanced sensor that builds on the airborne discrimination program to demonstrate persistent overhead discrimination coverage from space
- Sensor system tests to validate performance against emerging advanced threats

UNCLASSIFIED

<b>Exhibit R-2, RDT&amp;E Budget Item Justification:</b> PB 2020 Missile Defense Agency		<b>Date:</b> March 2019
<b>Appropriation/Budget Activity</b> 0400: <i>Research, Development, Test &amp; Evaluation, Defense-Wide / BA 4: Advanced Component Development &amp; Prototypes (ACD&amp;P)</i>	<b>R-1 Program Element (Number/Name)</b> PE 0604115C / <i>Technology Maturation Initiatives</i>	
<ul style="list-style-type: none"><li>- Component technology development leading to future advancements of strategic laser weapons</li><li>- Technology risk reduction for a disruptive directed energy concept</li></ul> <p>The Directed Energy Demonstrator Development (DEDD) addresses technology risk reduction and maturation for high powered strategic lasers as well as beam control and steering. The laser scaling effort is tightly coupled with the Office of the Assistant Secretary of Defense for Research and Engineering (ASD R&amp;E) Laser Road map, and is essential to mature strategic laser technology sufficient to enter into the ASD R&amp;E approach. Once strategic laser concepts meet the minimum requirements, they can be transitioned into the R&amp;E laser scaling program for further development.</p> <p>The Neutral Particle Beam is a game changing space-based directed energy capability for strategic and regional missile defense. MDA will design, develop and conduct a feasibility demonstration of a first stage accelerator subsystem.</p> <p>The Discrimination Sensor Demonstrator Development (DSDD) program includes the development of an advanced sensor to discriminate lethal objects and uses MDA configured airborne platforms to introduce EO/IR sensors into the BMDS. The advanced sensor incorporates incrementally developed, integrated, and tested next-generation sensors and electronics to demonstrate Launch-on-Remote, Engage-on-Remote, discrimination and handover improvements for missile defense from the air and/or space. These advanced sensors improve the probability of engagement success for stressing threats, expand the Ballistic Missile Defense (BMD) battle space and increase the ability to negate larger raid sizes. The MDA configured airborne platforms are used to obtain additional EO/IR data by tracking targets in MDA flight tests. They also help develop the associated concept of operations and provide the basis for a quick reaction precision tracking capability to augment radar. To address emerging advanced threats, MDA may use MDA-configured airborne platforms to support hypersonic threat testing scenarios.</p> <p>TMI Test and Cyber Operations provide enabling capabilities to support all directed energy technical maturation initiatives.</p> <p>MDA collaborates with the ASD R&amp;E, the Defense Advanced Research Projects Agency (DARPA), the High Energy Laser Joint Technology Office, Department of Energy, and the Air Force, and national laboratories in a systems engineering based strategy to research, develop and test directed energy weapons technology. MDA is developing a set of common core disruptive technologies that will enable both missile defense and air dominance missions.</p>

• Other Adjustment	3.943	0.000	131.035	-	131.035

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustments for retaining three vendors for the Low Power Laser Demonstrator (LPLD).

Increase in FY 2019 from PB19 to PB20 reflects the enacted congressional adjustments to continue research and development for three separate laser scaling efforts, to retain three performers for LPLD through Critical Design Review (CDR), and to address cyber threats.

Increase in FY 2020 from PB19 to PB20 provides for the addition of the Neutral Particle Beam (NPB), a new directed energy capability to defeat the emerging threat, laser scaling, and Electro Optical/Infrared (EO/IR) participation in Ballistic Missile Defense System (BMDS) level tests.

**Note**

Decrease from FY 2019 to FY 2020 reflects the Department's priorities for laser scaling.

**A. Mission Description and Budget Item Justification**

The DEDD project develops, integrates, and tests the component technologies required to demonstrate the complete acquisition, tracking and lethality engagement sequence of a high energy laser system for missile defense. Laser scaling focuses on maturing strategic laser capability to levels sufficient to enter into the ASD R&E Laser Scaling Road map efforts. The DEDD project provides the necessary technology, test data, and operations familiarity to successfully transition to a higher power directed energy weapon.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
<b>Title:</b> Directed Energy Demonstrator Development	81.179	224.317	116.266
<b>Articles:</b>	-	-	-
<b>Description:</b> Laser scaling develops, integrates, and tests the component technologies required to demonstrate the complete acquisition, tracking and lethality engagement sequence of a high energy strategic laser system. MDA will maintain partnerships with Industry and National Laboratories to focus on laser scaling, the highest technology risk.			
Specific and/or unique planned accomplishments to each FY are as follows:			
<b>FY 2019 Plans:</b>			
Incrementally develop scalable, efficient, and compact high-energy laser components for integration into high power systems			
- Demonstrate robust high power diodes			
- Complete beam quality measurement of a next generation Diode Pumped Alkali Laser (DPAL)			
- Complete Fiber Combining Laser (FCL) beam quality and power demonstration			
- Complete Distributed Gain Laser (DGL) concept design			
Continue the LPLD design work, retaining three performers through CDR			
- Conduct a CDR			
-- Complete final engineering analysis			
-- Complete test planning requirements

**Remarks**

**D. Acquisition Strategy**  
The acquisition strategy consists of contracts to industry via the Advanced Technology Innovation Broad Agency Announcement (BAA) and competitive procurement(s) and agreements with FFRDCs and National Laboratories. MDA will leverage agency partner subject matter experts and use government model based assessments for Better Buying Power 3.0 philosophy acquisition decisions.

**Note**

Increase from FY 2019 to FY 2020 reflects the addition of the Neutral Particle Beam (NPB), a directed energy capability to defeat the emerging threat.

**A. Mission Description and Budget Item Justification**

The NPB provides a game changing space-based directed energy weapon capability for strategic missile defense. MDA explores game changing approaches that address the evolving threat to the homeland.

The NPB initiative will consist of a robust systems engineering process and continued cost and programmatic refinements as the concept and technologies mature. The NPB is planned to be a proof of concept culminating in an initial on-orbit space prototype demonstration of the NPB capability in FY 2023. The early NPB work includes design, development, and conducting a feasibility demonstration of a first stage accelerator subsystem.

The NPB neutralizer, system power, and thermal management are the key technology sub-components to be matured to lower risks for early demonstration.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
<b>Title:</b> Neutral Particle Beam	0.000	0.000	34.000
<b>Articles:</b>	-	-	-
<b>Description:</b> The NPB is a space-based, directed energy capability for homeland defense, providing a defense for boost phase and mid-course phase. A beam of neutral particles bombards its target with energy sufficient to disrupt, incapacitate, or kill the threat.			
Specific and/or unique planned accomplishments to each FY are as follows:			
<b>FY 2019 Plans:</b> N/A			
<b>FY 2020 Plans:</b> - Conduct detailed systems engineering design and lethality requirements trade studies - Conduct technology risk assessment, establish technical risk baseline for initial and follow-on development phases, and align program plan to mitigate risk

**Remarks**

**D. Acquisition Strategy**

The acquisition strategy consists of partnering with industry, other Government Agencies, FFRDCs and University Affiliated Research Centers. MDA will leverage agency and partner subject matter experts and use government model based assessments to inform Better Buying Power philosophy acquisition decisions. MDA will then award contracts to industry and universities via competitive procurements to develop and demonstrate promising components and integrated systems in realistic test environments.

**Note**

Increase in FY 2019 to FY 2020 provides for increased participation in EO/IR tests through aircraft lease and ground support costs for BMDS level tests and flight qualification efforts leading to advanced sensor flight tests.

**A. Mission Description and Budget Item Justification**

Areas of concentration include tracking lasers, advanced detectors, infrared sensors, and precision tracking and discrimination algorithms. DSDD demonstrates precision track of advanced threats at extended ranges, simple scene discrimination, and then complex scene discrimination through ground, flight, and space demonstrations.

Develops and tests high-precision advanced sensors that improve, identify, acquire, track, and discriminate incoming threats, specifically addressing U.S. Strategic Command's Prioritized Capabilities List requirements. DSDD activities and software maturation enhances the BMDS capability to discriminate lethal objects in a threat cluster, and track and hand over the threat object with Aegis Launch on Remote and Engage on Remote precision. The increased kinematics envelope of the SM-3 Block IIA, when combined with Engage on Remote capability, will expand battlespace and increase the number of threats engaged.

Development of next-generation advanced sensor systems to include tracking lasers, specialized detectors, unique processors and the corollary ground, airborne and space subsystems. These advanced sensors operate at strategic ranges required to augment BMDS radar, improve BMDS discrimination capability and provide precision track of large raids. They also promise to track multiple targets simultaneously, substantially reducing the number of sensor assets required for large raids. The program will leverage the technology demonstrated from the ground and in the air to develop compact ruggedized advanced sensor technology. These include cost-effective focal plane arrays and advanced sensor components to inform future BMDS layer decisions for persistent tracking and discrimination.

Promising advanced sensor technology is tested at the Mount Wilson Aerospace Facility for Integrated Optical Test (MAFIOT) in conjunction with BMDS tests. This system provides line of sight viewing of missile launches from Vandenberg AFB and San Nicolas Island. The Massachusetts Institute of Technology / Lincoln Laboratory (MIT/LL) will also conduct advanced sensor testing to assess system performance. Additionally, MDA uses a transportable ground test bed to test advanced sensors.

Provides sensor integration into an MDA configured airborne platform to test in operationally relevant environments and demonstrations. Airborne platforms equipped with an EO/IR sensor could provide the MDA a viable quick reaction capability to augment BMDS radar. MDA may explore options to partner with the Services and develop concepts for cost effective integration of sensor technology into limited fielding upgrade kits, which may inform follow-on development decisions. These kits could be installed on platforms deployed in theater to add missile defense capabilities on short notice.

**Remarks**

**D. Acquisition Strategy**

The acquisition strategy for DSDD consists of a contract(s) to industry via the Advanced Technology Innovation BAA and competitive procurements and agreements with FFRDCs to develop and demonstrate an advanced sensor system in realistic test environments. MDA will leverage agency partner subject matter experts and use government model based assessments for Better Buying Power 3.0 philosophy acquisition decisions.

**Note**

Increase from FY 2019 to FY 2020 provides increased passive sensor participation test costs such as asset shipment, range support and Command, Control, Battle Management and Communications (C2BMC).

Costs associated with lease, maintenance and operation of the aircraft are included in budget project MD99.

**A. Mission Description and Budget Item Justification**

The TMI test project funds the management and execution of TMI system participation in BMDS level tests, hardware-in-the-loop testing, and performance analysis costs for flight test data. This includes test asset shipment to test ranges, labor, travel, range support, C2BMC test support specific to TMI.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
<b>Title:</b> Technology Maturation Initiatives Test	4.974	1.982	11.262
<b>Articles:</b>	-	-	-
<b>Description:</b> The TMI Test project tests the systems developed under the DEDD and DSDD projects under realistic conditions in conjunction with on-going BMDS testing and through dedicated live fire tests to inform continued testing, full development and limited fielding decisions. This effort also demonstrates potential sensors, systems, and architectures to integrate the BMDS for left through right of launch.			
Specific and/or unique planned accomplishments to each FY are as follows:			
<b>FY 2019 Plans:</b>			
- Conduct system level hardware-in-the-loop testing in conjunction with Enterprise Sensor Laboratory and Experimental Laboratory for a BMDS level test			
- Shipping, labor, travel, and range support for a BMDS level test			
<b>FY 2020 Plans:</b>			
- Conduct system level hardware-in-the-loop testing in conjunction with Enterprise Sensor Laboratory and Experimental Laboratory for BMDS level tests

**Remarks**

**D. Acquisition Strategy**

The MDA Integrated Master Test Plan establishes and documents the test requirements for the BMDS with the specific focus on collecting the data needed for the Verification, Validation, and Accreditation of the BMDS models and simulations. This paradigm uses critical factor analysis to drive test design, planning, and execution for accrediting models & simulations, which is used to validate and assess system performance. With this test approach, the MDA will establish confidence that the models and simulations used to evaluate the BMDS represent real world behavior, thereby enabling simulation-based performance assessment to verify system functionality.

**Note**

Decrease from FY 2019 to FY 2020 reflects the enacted congressional adjustment in FY 2019 to support cyber threats.

**A. Mission Description and Budget Item Justification**

Cyber Operations sustains MDA DoD Risk Management Framework and Controls Validation Testing activities, analysis of validation results, risk assessments and reviews of proposed Program Manager/Information Assurance Manager Plans of Action and Milestones for all Technology Maturation Initiative mission systems. It maintains Certification and Accreditation data repository, capturing DoD Information Assurance Certification and Accreditation Program documentation (artifacts, validation results, and Information Assurance Risk Assessment results, and Designated Approving Authority accreditation decisions) and Plans of Action and Milestones on all MDA information systems.

This project monitors and tracks Cybersecurity mitigations detailed in Information Technology security Plans of Action and Milestones. Activities include preparation of Certification and Accreditation documentation and accreditation recommendations to MDA Senior Information Assurance Officer /Certification Authority and Designated Approving Authority. Independent Verification and Validation team actions ensure the availability, integrity, authentication, confidentiality and non-repudiation of MDA mission, test and administrative systems. Activities in the project are necessary to comply with the Federal Information Security Management Act.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Increase from FY 2019 to FY 2020 provides for the transition of Hypersonic Defense weapon system concept development to technology risk reduction activities.

**A. Mission Description and Budget Item Justification**

This program element supports a focused program that includes executing the systems engineering process, full kill chain technology identification and maturation, providing analysis and assessment of target of opportunity events, and executing near term sensor and command and control capability upgrades to address defense from hypersonic threats, which pose a significant threat.

The Hypersonic Defense effort will develop and deliver a series of material solutions to defeat hypersonic threats informed by a set of near term technology demonstrations. The Missile Defense Agency (MDA) continues to assess architecture alternatives and provide recommendations for future BMDS configurations to keep pace with evolving threats. MDA will leverage and upgrade existing systems, pursue hypersonic threat defeat weapon system capabilities, and develop disruptive technologies that augment future hypersonic defense architectures. These integrated sets of enhancements will provide incremental capabilities measured by progress and knowledge points in the following areas:

- Systems Engineering (Architecture Analysis, technology prioritization, requirements development, integration planning, test planning & assessment and lethality)
- Modification of existing Ballistic Missile Defense System (BMDS) sensors and Command, Control, Battle Management, and Communications (C2BMC) element for hypersonic threats
- Hypersonic Defense Weapon Systems Technology Development to enable a broad set of solutions including kinetic and non-kinetic means
- Advanced development of Sensor and C2 Technology to include ground, airborne and space-based technologies, to inform the development strategy

**UNCLASSIFIED**

• Other Adjustment	0.000	0.000	-0.247	-	-0.247

**Change Summary Explanation**

Decrease in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustments of:

- \$15.200 million reduction to Hypersonic Defense for funds request early to need pending completion of the Analysis of Alternatives
- \$4.350 million Reprogramming add for Hypersonic Defense

Increase in FY 2019 from PB19 to PB20 reflects the enacted congressional adjustment for hypersonic defense.

Quantity of RDT&E Articles	-	-	-	-	-	-	-	-	-	-		

**Note**

Increase from FY 2019 to FY 2020 provides initiation of Hypersonic Defense concept development and technology risk reduction activities following completion of the Hypersonic Defense Analysis of Alternatives.

**A. Mission Description and Budget Item Justification**

The Hypersonic Defense effort will develop and deliver a series of material solutions to defeat hypersonic threats informed by a series of near term technology demonstrations.

MDA will conduct systems engineering activities required to develop Missile Defense System capabilities to defeat advanced threats. Efforts will include full kill chain and component allocations for requirements development, performance analysis, integration planning, and ground/flight test planning & assessment for near term and far term architectures.

MDA will continue operationalization and integration of the initial hypersonic tracking capability developed under Pacific Command Joint Emergent Operational Need PC-0015 into the C2BMC program of record, Spiral 8.2-5. MDA plans to leverage the lessons learned and analysis from this capability development for the design and development of additional sensors for potential advanced threat applications. In addition, MDA will begin integrating these additional sensors into C2BMC and continue to enhance advanced threat ground processing to leverage data from these new sensors.

To address the weapon technology required to defeat the hypersonic threat, MDA will focus on the development of weapon concepts through competitive development efforts with industry. MDA will assess those concepts and identify technology component risk reduction efforts for cost, risk, and performance, and refine requirements to inform future development efforts. The Agency will also enhance analysis tools to assess concept designs and provide input to the requirements process.

MDA will conduct sensor demonstrations and develop sensor technology for hypersonic threats. The demonstrations build on ground, air, and space sensor technology to demonstrate capabilities to detect and track hypersonic threats. Demonstrations will employ tracking capability in all three phases of flight: boost phase, mid-phase using airborne, and terminal phase using ground, airborne, or tracking. MDA will also conduct pre and post demonstration performance assessment to analyze data collects.

<b>B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
- Identify, develop, and demonstrate advanced technologies across the hypersonic defense full kill chain in the key areas of: -- Large field of view, digital focal plane array. -- High speed processing & algorithm development. -- High data rate, low latency processing and communications.  Hypersonic Defense Weapon Systems Concept Definition: - Complete concept definition follow-on phase for the hypersonic weapon system architecture with industry partners. The weapon system concepts will aid the Agency in establishing the foundation for hypersonic defense capability - Conduct hypersonic weapon systems technology risk reduction to lower technical risk.  <b><i>FY 2019 to FY 2020 Increase/Decrease Statement:</i></b> Increase from FY 2019 to FY 2020 provides for the transition of Hypersonic defense weapon system efforts from concept development to technology risk reduction activities.

**Remarks**

**D. Acquisition Strategy**

To optimize Missile Defense System performance, MDA leverages the nation's engineering centers of excellence at government agencies, Military Services, Federally Funded Research and Development Centers (FFRDCs), University Affiliated Research Centers (UARCs), and industry. The executing agents use varying contracting strategies in a flexible manner to maximize their contribution to the Missile Defense System. MDA acquires products and services by competitive means to the extent that is possible, practical and uses the Advanced Technology Broad Area Announcement process to award concept definition contracts.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Homeland Defense Radar - Hawaii (HDR-H) funding was appropriated/budgeted as follows:

FY 2017: PE 0603884C BMDs Sensors, Project MD41

FY 2018: PE 0604673C Pacific Discriminating Radar, Project MD41

FY 2019: PE 0604672C Homeland Defense Radar Hawaii, Project MD41

Increase from FY 2019 to FY 2020 provides purchase of radar equipment.

**A. Mission Description and Budget Item Justification**

The HDR-H Program Element (PE) 0604672C is comprised of a persistent discrimination sensor for the Ballistic Missile Defense System (BMDS). HDR-H addresses United States Northern Command (NORTHCOM) and United States Indo-Pacific Command (INDOPACOM) operational requirements for a near term persistent solution against advancing threats and closes capability gaps. HDR-H provides 24 hours a day, 7 days a week, and 365 days a year tracking and discrimination capability against increasingly complex threats, improve capability of Ballistic Missile Defense (BMD) interceptors, and supports multi-mission areas (e.g., Space Situational Awareness and Intelligence Collection). The radars will leverage development efforts from other sensor projects to enhance discrimination, tracking, and hit assessment to maximize interceptor usage. The HDR-H final testing, integration and delivery is planned for FY 2023.

**Note**  
 Homeland Defense Radar - Hawaii (HDR-H) funding was appropriated/budgeted as follows:  
 FY 2017: PE 0603884C BMDS Sensors, Project MD41  
 FY 2018: PE 0604673C Pacific Discriminating Radar, Project MD41  
 FY 2019: PE 0604672C Homeland Defense Radar Hawaii, Project MD41  
 Increase from FY 2019 to FY 2020 provides purchase of radar equipment.

**A. Mission Description and Budget Item Justification**

The Homeland Defense Radar-Hawaii (HDR-H) is a persistent discrimination radar that will provide additional capability to the Ballistic Missile Defense System (BMDS) to support the defense of Hawaii. HDR-H's primary mission is to provide autonomous acquisition and persistent precision tracking and discrimination to optimize the defensive capability of the BMDS and counter evolving threats. The HDR-H radar will be integrated into the BMDS through the C2BMC system and will feature a scalable and open system architecture to mitigate evolving threats. HDR-H's inherent capability will support additional mission areas, including but not limited to, Space Situational Awareness (SSA). The HDR-H radar is comprised of an equipment shelter housing a singled-faced array, a Mission Control Facility (MCF) which supports radar operations, a Radar Antenna Base, a Thermal Control System, and supporting facilities and infrastructure. The radar prime contractor will be responsible for building and fielding the radar equipment with associated Radar Antenna Base and Thermal Control, and the HDR-H Equipment Shelter (HES). Siting surveys will be conducted and EIS will be completed to determine the final recommended site. The HDR-H radar is anticipated to be operational in Hawaii in FY 2023.

<b>Title:</b> Homeland Defense Radar Hawaii (HDRH)	0.000	62.221	267.901
<b>Articles:</b>	-	-	-
<b>Description:</b> The HDR-H program includes requirements development activities associated with systems engineering, hardware and software development, discrimination improvements, design reviews, testing, and Models and Simulation (M&S) efforts for radar development. Efforts include site activation and preparation of site infrastructure for construction activities. The program will develop and integrate C2BMC systems for HDR-H functionality. The program will develop and deliver radar software Build 1 and establish independent Verification and Validation (IV&V) lab for testing of operational software. The program includes purchase, manufacture, and test of long lead components.

**Remarks**

**D. Acquisition Strategy**

The HDR-H acquisition strategy was approved in December 2017 for a single radar. In May of 2018 a change was approved to the acquisition strategy to a multiple-award IDIQ contract for up to three radars. The HDR-H procurement will be the first delivery order of the competitively awarded IDIQ contract and HDR-H is a full/open competitive award. An additional two radar delivery orders will be awarded competitively. MDA awarded the HDR-H in December 2018. The prime contractor will manage, develop, build and integrate, test, and field the radar. The prime contract includes other fixed price and cost-reimbursable line items (to include the antenna base and radar thermal control and options in order to properly balance acquisition costs and risks. Performance and cost incentives were included to motivate contractor performance. The radar prime contractor will deliver a full technical data package, which will enable the government to effectively and affordably sustain the system. The HDR-H is expected to complete DD250 and initial fielding in 2023.

**Note**

Beginning in FY 20 Program Wide Support (PWS) is allocated to the Homeland Defense Radar-Hawaii PE. PWS is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS and supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Homeland Defense Radar - Hawaii (HDR-H) funding was appropriated/budgeted as follows:  
 FY 2017: PE 0603884C BMDS Sensors, Project MD41 FY 2018: PE 0604673C Pacific Discriminating Radar, Project MD41 FY 2019: PE 0604672C Homeland Defense Radar Hawaii, Project MD41.

Decrease in FY 2020 reflects a delay in PAC Radar initial fielding by two years from FY 2024 to FY 2026.

**A. Mission Description and Budget Item Justification**

The Pacific Discriminating Radar Program Element is comprised of the PAC Radar program, a persistent discrimination sensor for the Ballistic Missile Defense System (BMDS). PAC Radar addresses USNORTHCOM and USINDOPACOM operational requirements for a near term persistent solution against advancing threats and closes capability gaps throughout the Pacific region. PAC Radar provides 24/7 persistent tracking and discrimination capability against Homeland and Regional threats within an increasingly complex countermeasure environment, improves capability of Ballistic Missile Defense (BMD) interceptors and supports multi-mission areas (e.g., Space Situational Awareness & Intelligence Collection). The radar will leverage development efforts from other sensor projects to enhance discrimination, tracking, and hit assessment to maximize interceptor usage.

• Other Adjustment	0.000	0.000	-157.456	-	-157.456

**Change Summary Explanation**

Decrease in FY 2019 from PB19 to PB20 reflects congressional transfer of Homeland Defense Radar - Hawaii (HDR-H) Budget Project MD41 from this PE to the new HDR-H PE 0604672C, and congressional adjustment --early to need.

Decrease in FY 2020 from PB19 to PB20 reflects the transfer of Homeland Defense Radar - Hawaii (HDR-H) (MD41) from this PE to the new HDR-H PE 0604672C and a delay in PAC Radar initial fielding by two years from FY 2024 to FY 2026.

**Note**

Beginning in FY 2020, Program Wide Support (PWS) was proportionately reallocated to the Pacific Discriminating Radar program element. PWS is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Note**

Beginning in FY 2019, Pacific Radar (PAC Radar) (Formerly known as Medium Range Discriminating Radar (MRDR)) was transferred from BMD Sensors Program Element 0603884C.

**A. Mission Description and Budget Item Justification**

The mission of the PAC Radar program office is to define, develop, acquire, field, and sustain the radar as an element of the BMDS. Initial fielding of the PAC Radar is planned for FY 2026 and it will provide persistent midcourse discrimination, precision tracking, and hit assessment to support the defense of the Homeland against long-range missile threats and defense against regional threats in the USINDOPACOM area of responsibility. The PAC Radar will be integrated into the BMDS through the C2BMC system and will feature a scalable and open system architecture to mitigate evolving threats. The radar also supports additional mission areas including Space Situational Awareness. The PAC Radar is comprised of an equipment shelter housing multiple array faces, a Mission Control Facility (MCF) which supports radar operations, and supporting facilities and infrastructure. The radar prime contractor will be responsible for building and fielding the radar equipment with associated cooling system and the radar equipment shelter to include foundation. Siting surveys will be conducted and EIS will be completed to determine final recommended site.

**D. Acquisition Strategy**

The PAC Radar acquisition strategy was approved in December 2017. The PAC Radar procurement will be part of the Multi-Award IDIQ (MAIDIQ) contract that will include the full/open competitive award of the first Delivery Order for the PAC Radar no later than FY 2022. The prime contractor will manage, develop, build and integrate, test, and deliver the radar. The prime contract will include other fixed price and cost-reimbursable line items and options in order to properly balance acquisition costs and risks. Performance and cost incentives will be included to motivate on-time delivery. The radar prime contractor will deliver a full technical data package, which will enable the government to effectively and affordably sustain the system. Initial fielding for PAC Radar is planned for FY 2026.

**Program MDAP/MAIS Code:** 362

**Note**

Decrease from FY 2019 to FY 2020 reflects completion of development and manufacturing of radar hardware and transition to on site radar assembly and integration.

**A. Mission Description and Budget Item Justification**

The mission of the Long Range Discrimination Radar (LRDR) program is to design, develop, integrate, deliver, field, and sustain the LRDR as an element of the Ballistic Missile Defense System (BMDS) Increment 6b Homeland Defense (HLD) Capability. This capability is representative of LRDR Configuration 1. Initial fielding of the LRDR is planned for 2020 leading to an Operational Capability Declaration in FY 2022. The LRDR is comprised of a LRDR Equipment Shelter (LES), housing two radar array faces, a Mission Control Facility (MCF) which supports radar operations, and supporting facilities and infrastructure. The Secretary of the Air Force approved Clear Air Force Station, Alaska as the LRDR site. The Air Force Space Command (AFSPC) is the designated Lead Major Command (MAJCOM).

The LRDR operates in the S-band frequency, features scalable and open systems architecture to mitigate evolving threats, and integrates into the BMDS through the Command and Control, Battle Management, and Communications (C2BMC) system. This Program Element includes BMDS threat discrimination improvements to enhance BMDS effectiveness against the evolving threat. The result will be a BMDS architecture more capable of discriminating and intercepting re-entry vehicles with a higher degree of confidence to improve Warfighter shot doctrine, and conserve Ground-Based Defense (GMD) interceptor inventory. LRDR also supports additional mission areas including Space Situational Awareness.

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustment for Ballistic Missile Early Warning Radar System (BMEWS) removal.

Increase in FY 2019 from PB19 to PB20 reflects the enacted congressional adjustment for Facility Restoration Sustainment and Maintenance (FSRM).

Increase in FY 2020 from PB19 to PB20 provides pre-transition and transfer logistics activities, data collection events to support system acceptance, and prime contract costs.

**Note**

Decrease from FY 2019 to FY 2020 reflects completion of development and manufacturing of radar hardware and transition to on site radar assembly and integration.

**A. Mission Description and Budget Item Justification**

This project provides for the development and initial fielding of a Long Range Discrimination Radar (LRDR) by 2020 leading to an Operational Capability Declaration in FY 2022. This provides an improved persistent midcourse BMDS discrimination capability in the Pacific sensor architecture. The LRDR will also increase the defensive capacity of the Ground-Based Midcourse Defense (GMD) interceptor inventory and address evolving threats. MDA's request includes funding for the design and development of the LRDR, delivery of spares for initial fielding, system engineering, software development, software Independent Verification and Validation (IV&V), hardware manufacturing, qualification testing, developmental testing support and Modeling and Simulation (M&S) efforts. M&S includes development of LRDR digital simulations and their integration into the BMDS, M&S architecture, and Verification, Validation, and Accreditation (VV&A) of LRDR models. The United States Air Force (USAF) will leverage the LRDR inherent capabilities to augment ancillary missions including Space Object Identification and Space Situational Awareness.

**Remarks**

**D. Acquisition Strategy**

The LRDR acquisition strategy, which was approved on January 7, 2015, incorporates robust acquisition practices to ensure delivery of a best value solution that meets mission performance requirements and reduces lifecycle costs. MDA awarded a fixed-price incentive contract to Lockheed Martin Corporation of Moorestown, New Jersey, on October 21, 2015 to design, develop, manufacture, integrate & test, and field the LRDR prime mission equipment. The prime contract included other fixed-price and cost-reimbursable line items and options in order to properly balance acquisition costs and risks. Performance and cost incentives were included to motivate contractor performance. The radar prime contractor will deliver a full technical data package, which will enable the government to effectively and affordably sustain the system. MDA will synchronize the radar development contract efforts with a simultaneous MILCON effort which will be executed through the US Army Corps of Engineers. The LRDR is expected to complete development and initial fielding in 2020 for BMDS integration and testing.

**A. Mission Description and Budget Item Justification**

Cyber Operations funds Sensors Directorate Information System Security Manager (ISSM) civilian salaries and cybersecurity engineering and architecture planning for program information technology systems. This project plans and tests the cybersecurity controls for the BMDS and maintains Sensors Risk Management Framework (RMF) authorizations for Sensors-managed information systems, conducts Controls Validation Testing (CVT)/ Security Controls Assessment (SCA) of sensors mission and support systems and provides and maintains Plans of Action and Milestones to mitigate cybersecurity deficiencies. Cyber Operations conducts annual cybersecurity program reviews on the LRDR enclaves to assess compliance in implementing and maintaining controls.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PEs each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**A. Mission Description and Budget Item Justification**

The Ground-based Midcourse Defense (GMD) element of the BMDS provides combatant commanders with a continuously available (24 hours a day, 7 days a week, 365 days a year) capability to defend the Homeland against limited Intercontinental Ballistic Missile (ICBM) attacks. The improved Homeland Defense interceptor includes a RKV and the All Up Round (AUR) engineering necessary to integrate the RKV with new and existing booster configurations. The RKV improves interceptor reliability, reduces unit cost, improves maintainability in the field, and improves performance against emerging threats. The AUR engineering enables RKV integration with new and existing boost vehicles for flight testing and operational fielding.

	FY 2018	FY 2019	FY 2020
<b>Title:</b> Improved Homeland Defense (HLD) Interceptor Development	712.457	390.298	389.333
<b>Articles:</b>	-	-	-
<p><b>Description:</b> HLD development objectives include: redesigning the GMD kill vehicle, implementing tactical booster modifications, and conducting AUR system engineering. The RKV will be built with a modular, open architecture and designed with common interfaces and standards, making upgrades easier and broadening MDA's vendor and supplier base. The design for growth allows future upgradability. The AUR development approach integrates the RKV with the boost vehicle. The goal of all of these efforts is to develop and field an integrated set of capabilities to improve the reliability, survivability, lethality, and discrimination to defeat future threats.</p> <p>Specific and/or unique accomplishments to each FY are as follows:</p> <p><b>FY 2019 Plans:</b></p> <ul style="list-style-type: none"> <li>-Continue In-Flight Interceptor Communications System (IFICS) End-to-End Test to demonstrate communication between the RKV and the GMD Ground System</li> <li>-Conduct Integrated Communications Radio Kill Vehicle (KV) to Kill Vehicle (KV) Integration to demonstrate and validate the design approach of the new RKV communication capability</li> <li>-Conduct Production Highly Accelerated Life Testing to support RKV reliability improvements, identify stable operating and destruct limits, and improve the probability of first pass success during qualification</li> <li>-Continue KV to KV Antenna demonstrations to characterize engineering parameters, gather data and validate the design approach of the new RKV communication capability</li> </ul>

**Remarks**

**D. Acquisition Strategy**

MDA is executing an acquisition strategy to develop an integrated RKV with a Cross-Industry team design solution. This concept includes potential production sources from industry and provides a consolidated product that includes the collective knowledge of and leverages capabilities from the industry leaders in kill vehicle design and development. The industry teaming method incorporates the most viable technical approaches from each contractor and allows for combination of resources to shorten the learning curve and reduce the time needed to develop and begin initial production. This strategy allows for industry to provide the best value and best design solution for the MDA while setting the conditions for future competition of production. The development phase is followed by initial production and then a competitive full rate production phase. The competitive production phase encompasses the purchase, production, and the integration of the proven components demonstrated in the development phase and provides competitive benefits to the Government. This strategy allows for industry to provide the best value and best design solution for the MDA while setting the conditions for future competition of production. The Government, as the design authority, retains responsibility for the execution of the program cost, schedule, and the technical performance of the RKV to meet requirements levied on the contractor. The Government has implemented a rigorous systems engineering process to ensure that the design and development efforts meet requirements. This acquisition strategy is documented in the RKV Acquisition Plan signed by the Defense Acquisition Executive in October 2015.

In January of 2018, the MDA Director signed an Acquisition Strategy Decision Memorandum (ASDM) changing the acquisition strategy to execute the Missile Defeat and Defense Enhancement scope. The Development and Sustainment Contract (DSC) will continue with the Boeing Company to Q1 FY2024 to build the 20 GBI's and 20 Silo's with supporting test, engineering, software, and performance based logistics scope. This additional capability will provide 64 interceptors as well as maintain operation and support capabilities and support upcoming ground and flight tests. The Justification and Approval for this action was signed by the MDA Director on 2 January 2018.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**  
Decrease from FY 2019 to FY 2020 is in accordance with the Integrated Master Test Plan (IMTP).

**A. Mission Description and Budget Item Justification**

Ballistic Missile Defense Terminal Defense Segment Test provides the Terminal High Altitude Area Defense (THAAD) program's participation in Ballistic Missile Defense System (BMDS) Flight Tests and Ground Tests in accordance with the BMDS Integrated Master Test Plan (IMTP). THAAD Test coordinates with Operational Test Agencies, conducts pretest planning, coordination and analysis, conducts flight test operations, performs post-flight test reporting, and performs data distribution and storage.

**B. Program Change Summary (\$ in Millions)**

	<u>FY 2018</u>	<u>FY 2019</u>	<u>FY 2020 Base</u>	<u>FY 2020 OCO</u>	<u>FY 2020 Total</u>
Previous President's Budget	36.239	61.017	16.917	-	16.917
Current President's Budget	35.738	61.017	25.137	-	25.137
Total Adjustments	-0.501	0.000	8.220	-	8.220
• Congressional General Reductions	0.000	0.000			
• Congressional Directed Reductions	0.000	0.000			
• Congressional Rescissions	0.000	0.000			
• Congressional Adds	0.000	0.000			
• Congressional Directed Transfers	0.000	0.000			
• Reprogrammings	-0.501	0.000			
• SBIR/STTR Transfer	0.000	0.000			
• Missile Defeat and Defense Enhancement	0.000	0.000	0.000	-	0.000
• Other Adjustment	0.000	0.000	8.220	-	8.220

**Change Summary Explanation**

Increase in FY 2020 from PB19 to PB20 reflects transfer of test related Program Operations from the Terminal Defense Segment 0603881C Program Element to this Program Element.

**Note**  
Decrease from FY 2019 to FY 2020 is in accordance with the Integrated Master Test Plan (IMTP).

**A. Mission Description and Budget Item Justification**

THAAD Test conducts BMDS Flight Tests and Ground Tests with other BMDS elements (such as Army Navy / Transportable Radar Surveillance (AN/TPY-2), BMDS Command, Control, Battle Management, and Communication (C2BMC), PATRIOT, and Aegis) in accordance with the BMDS IMTP. THAAD Test coordinates with Operational Test Agencies, conducts all pre and post flight test, ground test, cyber security enhancements, and war-games and exercises requirements.

**Remarks**

**D. Acquisition Strategy**

THAAD awards Indefinite Delivery Indefinite Quantity (IDIQ) Task Orders on the Advanced Capability Development (ACD) contract for the continuation of THAAD development and test as described and approved in the MDA Integrated Master Test Plan. The discrete task orders allow management and tracking of IMTP-related work.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

**Program MDAP/MAIS Code:** 362

**Note**

Increase in FY 2020 from PB19 to PB20 is in accordance with the Integrated Master Test Plan (IMTP) 20.1. This PE also provides transition of flight test execution support costs from PE 0603892C Aegis BMD to ensure continued transparency and program efficiency.

**A. Mission Description and Budget Item Justification**

The Aegis Ballistic Missile Defense (BMD) mission is to deliver an enduring, operationally effective, and supportable BMD capability to defend the nation, deployed forces, friends, and allies and to increase this capability by delivering evolutionary improvements as part of Ballistic Missile Defense System (BMDS) upgrades. The Aegis BMD element of the BMDS capitalizes upon and evolves from the existing U.S. Navy Aegis Weapons System (AWS) and Standard Missile (SM) infrastructures. Aegis BMD provides a forward-deployable, mobile capability to detect and track Ballistic Missiles of all ranges and the ability to destroy Short-Range Ballistic Missiles (SRBMs), Medium-Range Ballistic Missiles (MRBMs), and Intermediate-Range Ballistic Missiles (IRBMs) in the midcourse phase of flight in addition to shorter range missiles in the terminal phase of flight. Aegis BMD also provides a Long Range Surveillance and Track (LRS&T) capability to the BMDS. Upgrades to both the Aegis BMD Weapon System and the SM-3 configuration enable Aegis BMD to provide effective and supportable defensive capability against longer range more sophisticated threats and an enduring Aegis Ashore defensive capability.

- Working with all U.S. Armed Services that participate in the BMDS level Operational Test Agency (OTA) Team, with the support of the Director of Operational Test and Evaluation (DOT&E), MDA has developed a test program to improve confidence in missile defense capabilities under development and ensure the capabilities transferred to the warfighter are operationally effective, suitable, and survivable.
- As part of the MDA's rigorous test program, System Pre-Flight predictions provide confidence in test execution by predicting element performance and exercising element interfaces. System Post-Flight Reconstruction replicates the BMDS configuration, actual environmental conditions, and target dynamics observed in flight to anchor Modeling and Simulation (M&S) results.
- The IMTP is event-oriented and extends until the collection of all identified data is completed ensuring adequate test investments.

• Other Adjustment	-11.999	0.000	89.138	-	89.138

**Change Summary Explanation**

Decrease in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustments for flight test delays and general reductions

Decrease in FY 2019 from PB19 to PB20 is in accordance with the Integrated Master Test Plan (IMTP)

Increase in FY 2020 from PB19 to PB20 is in accordance with the Integrated Master Test Plan (IMTP) 20.1. This PE also provides transition of flight test execution support costs from PE 0603892C Aegis BMD to ensure continued transparency and program efficiency.

**A. Mission Description and Budget Item Justification**

The FY 2020 Aegis BMD Test Program concentrates on critical IMTP flight tests that support the BMDS incremental development strategy and the U.S. Navy, European Phased Adaptive Approach (EPAA).

The FY 2019 Aegis BMD Test Program concentrates on critical IMTP flight tests that support the U.S. Navy and European Phased Adaptive Approach (EPAA), Weapon System Certification, and Missile Production Decision requirements. Aegis BMD will concentrate on Aegis Baseline (BL) 9.C2 (BMD 5.x) and Standard Missile SM-3 Block IIA operational testing.

- Working with the U.S. Navy Integrated Warfare System (IWS) Services' Operational Test Agencies (OTA), with the support of the Director of Operational Test and Evaluation (DOT&E), MDA has developed a test program to improve missile defense capabilities under development and ensure the capabilities transferred to the warfighter are operationally effective, suitable, and survivable
- As part of MDA's rigorous test program, System Pre-Flight predictions provide confidence in test execution by predicting element performance and exercising element interfaces. System Post-Flight Reconstruction replicates the Ballistic Missile Defense System configuration and actual environmental conditions and target dynamics observed in flight to anchor M&S results
- The IMTP is event-oriented and extends until the collection of all identified data is completed ensuring adequate test investments

<b>Title:</b> Aegis BMD Flight Test Execution	64.194	33.707	106.315
<b>Articles:</b>	-	-	-
<b>Description:</b> Aegis BMD Flight Test Program performs comprehensive testing of Aegis BMD components and their interoperability with the BMDS using accredited Modeling & Simulation (M&S) that provides the evidence required for the MDA and Combatant Commanders to transition the capability to the Operational Capacity Baseline. All flight testing is reflected in the R4 and IMTP.			
Recurring Accomplishments include:			
-Prepare for and conduct BMDS Flight Test events as reflected in the IMTP and the R-4 schedule.			
-Collect Aegis BMD data for Modeling and Simulation anchoring used in comprehensive flight testing.

<b>Title:</b> Aegis BMD Ground Test Execution	17.561	24.339		18.504
<b>Articles:</b>	-	-		-

**Description:** Aegis BMD Ground Test Program performs comprehensive testing of Aegis BMD Components and their interoperability with the BMDS using accredited M&S that provides the evidence required for the MDA and Combatant Commanders to transition the capability to the Operational Capacity Baseline. More specifically, ground testing is used to collect data for Aegis BMD characterization and assessment, flight test risk reduction, and exploration of scenarios where flight testing is either impracticable or impossible.

Recurring Accomplishments include:

- Participate in BMD System Ground Tests to include pre-mission analysis, mission execution, and post-mission analysis.
- Conduct planning to ensure BMDS Test Site (BTS) capabilities support Aegis BMD testing, exercises, flight tests, and demonstration requirements. This includes upgrades to the ground testing labs to ensure compliance with operational and test baselines.
- Continue testing of U.S. Navy C4I systems and Aegis BMD baselines to ensure BMDS interoperability.
- Continue to participate in System Level Ground Testing as an element of the layered BMDS to collect data for Aegis BMD characterization and assessment and exploration of scenarios where flight testing is either impracticable or impossible.
- Continue operation support of HWIL M&S for Element ground testing.
- Prepare and conduct a Hardware Ground Test of cooled gas Attitude Control System (ACS).

<b>Title:</b> Aegis BMD Test Resources	25.130	18.508	17.287
<b>Articles:</b>	-	-	-

**Description:** This effort provides resources to conduct ground and flight testing to improve confidence in missile defense capabilities under development and ensure the capabilities transferred to the warfighter are operationally effective, suitable, and survivable.

Recurring Accomplishments include:

- Provide Core Test and Evaluation support for Aegis BMD test and evaluation missions and laboratories, field activities, range support activities, analysis activities, and shipboard and land-based test site test teams.
- Provide Test & Evaluation (T&E) infrastructure support for Aegis BMD Test Missions as reflected in the IMTP to collect truth data for post-event analysis.
- Conduct core Element M&S validation and accreditation activities.
- Exercise tactical communications during testing to ensure interoperability with the BMDS and Combatant Command (CCMD) systems.
- Continue core test planning for Aegis BMD test missions to include assessment of target requirements, development of M&S, and preparation of the range to ensure all missions are executable and apply to the technical program objectives.
- Develop and execute risk-reduction activities to minimize or mitigate shipboard and missile test and programs risks.
- Develop and execute data collection plans and supporting instrumentation requirements.

Specific and/or unique accomplishments to each FY are as follows:

**FY 2019 Plans:**

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Increase from FY 2019 to FY 2020 provides Sensors' participation in Ballistic Missile Defense System (BMDS) ground and flight test in accordance with Integrated Master Test Plan (IMTP) 20.1.

**A. Mission Description and Budget Item Justification**

MDA Sensors executes a robust test program that includes flight and ground tests to support both strategic and regional BMDS capabilities against medium- and long-range threats. The Sensors elements of the Ballistic Missile Defense System (BMDS) Integrated Master Test Plan (IMTP) are intended to demonstrate the integrated missile defense capabilities under development to ensure the capabilities delivered to the Warfighter are operationally effective, suitable, and survivable. The Sensors Test Program Element specifically includes the planning, execution, and analysis of flight and ground tests and the associated infrastructure.

The Sensors Test program provides data required for the Technical Capability Declaration for European Phased Adaptive Approach (EPAA) Phase III Robust Intermediate Range Ballistic Missile (IRBM) Defense, Enhanced Homeland Defense, and Mid-term Discrimination Improvements. It supports Operational Test and Evaluation of the regional and strategic BMDS architecture.

The Sensors Test program supports Long Range Discrimination Radar (LRDR) integration into the BMDS, Ground Based Midcourse Defense Redesigned Kill Vehicle (RKV) developmental testing, mid and far-term Discrimination Improvements, and Operational Test and Evaluation of the theater/regional and strategic BMDS architecture.

<b>B. Program Change Summary (\$ in Millions)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020 Base</b>	<b>FY 2020 OCO</b>	<b>FY 2020 Total</b>
Previous President's Budget	101.839	81.001	77.654	-	77.654
Current President's Budget	88.840	77.405	105.530	-	105.530
Total Adjustments	-12.999	-3.596	27.876	-	27.876
• Congressional General Reductions	-3.000	-3.596			
• Congressional Directed Reductions	0.000	0.000			
• Congressional Rescissions	0.000	0.000			
• Congressional Adds	14.400	0.000			
• Congressional Directed Transfers	0.000	0.000			
• Reprogrammings	-14.400	0.000			
• SBIR/STTR Transfer	0.000	0.000			
• Missile Defeat and Defense Enhancement	0.000	0.000	0.000	-	0.000
• Other Adjustment	-9.999	0.000	27.876	-	27.876

**Change Summary Explanation**

Decrease in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustments to support a SM-3 Block IIA Missile Test. These funds were adjusted through an Above Threshold Reprogramming. Additional adjustment to support IMTP.

Decrease in FY 2019 from PB19 to PB20 reflects the enacted Congressional General Reduction.

Increase in FY 2020 from PB19 to PB20 provides flight and ground tests and sensor participation in accordance with IMTP 20.1.

**Note**

Increase from FY 2019 to FY 2020 provides Sensor participation in Ballistic Missile Defense System (BMDS) ground and flight tests in accordance with the Integrated Master Test Plan (IMTP) 20.1.

**A. Mission Description and Budget Item Justification**

This project provides activities for planning, analysis, and execution of BMDS flight test events, including pre- and post-test ground testing such as Digital and Hardware-in-the-Loop (HWIL) Pre-Mission Tests (PMTs) and Post-Flight Reconstruction (PFR). Sensors Test provides planning, analysis, and execution for BMDS system level ground tests identified in the IMTP. Test infrastructure funding provides for HWIL labs and program management required to operate and maintain a flight and ground test capability.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	FY 2018	FY 2019	FY 2020
<b>Title:</b> Test Resources	16.703	19.312	27.851
<b>Articles:</b>	-	-	-
<b>Description:</b> Test Resources efforts include configuration and maintenance of Sensors HWILs for use in ground test execution (BMDS and element developmental testing) and in BMDS flight test execution pre-mission testing, and technical oversight to all BMDS system level activities with Sensors participation. It also includes conducting the detailed test event planning and design, integration, and execution for all BMDS flight and ground test campaigns. Test Resources provides support for evolving Objective Stimulation Framework (OSF) (software upgrades) integration into the BMDS HWIL ground test execution and flight test execution. **Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Increase from FY 2019 to FY 2020 provides site activation requirements due to Poland construction delays and increased Aegis Ashore Missile Defense Test Complex activities to include installation of hardware and infrastructure repairs and maintenance

**A. Mission Description and Budget Item Justification**

This program supports development of the Land-Based Standard Missile-3 (LBSM3) capability, Aegis Ashore. On 17 September 2009, the President announced an overarching plan to provide regional missile defense to U.S. deployed forces, allies, and partners in Europe called the European Phased Adaptive Approach (EPAA). The EPAA policy specifically defines a timeline to deploy a mix of afloat and land-based Ballistic Missile Defense (BMD) capabilities. Aegis Ashore represents one of these land-based capabilities. The U.S. can also build on current efforts to pursue Phased Adaptive Approaches (PAAs) in the Asia Pacific and the Middle East regions. The PAA tailors U.S. BMD capabilities to specific theater needs enhancing integrated regional missile defenses to protect defended assets against medium, intermediate, and ultimately intercontinental range ballistic missiles.

Aegis Ashore is a key component of EPAA Phases II (Romania) and III (Poland) and provides Aegis BMD capability against short to intermediate-range ballistic missiles in an ashore configuration. Aegis Ashore provides sophisticated engagement strategies and can adapt to threat updates while also being deployed/redeployed worldwide where needed to provide persistent coverage for the Geographic Combatant Commanders. Aegis Ashore re-hosts the required BMD components of a U.S. Navy Destroyer, including: SPY-1 Radio Direction and Ranging (Radar); Vertical Launch System (VLS), Computing Infrastructure; Command Control; Communications; Computers and Intelligence (C4I) Systems; and Operator Consoles.

This program element will continue to modernize, develop, and test Aegis Ashore capability improvements at Aegis Ashore Missile Defense Test Complex (AAMDTC) in Hawaii for implementation at operational sites.

Quantity of RDT&E Articles	-	-	-	-	-	-	-	-	-	-		

**Note**

Increase from FY 2019 to FY 2020 provides site activation requirements due to Poland construction delays and increased Aegis Ashore Missile Defense Test Complex (AAMDTC) activities to include installation of hardware and repairs and maintenance of infrastructure.

**A. Mission Description and Budget Item Justification**

Deployed sites, referred to as Aegis Ashore Missile Defense Systems (AAMDS), will be modified to support future computer programs and missile variants in step with the U.S. Navy's Destroyer Modernization Plan. MDA is responsible for maintaining and modernizing the test center at the Pacific Missile Range Facility (PMRF), while the U.S. Navy is responsible for maintaining and modernizing all deployed Aegis Ashore sites. The initial AAMDS deployed to Romania in 2015 employing Aegis BMD 5.0 CU (Capabilities Upgrade) and SM-3 Block 1B. A second AAMDS deploys to Poland and is scheduled to become operational in 2020. These sites provide an Aegis Ashore exo-atmospheric defense against short to intermediate-range ballistic missile threats in the later stages of flight. If the threat dictates, additional systems can be purchased and deployed globally.

Research and Development efforts include design of modifications to adapt the Aegis Weapon System for land-based use, modernization in pace with the U.S. Navy's Destroyer Modernization Plan, development and testing of Aegis Ashore capability improvements at the AAMDTC in Hawaii, and modifications, as required, to enhance co-existence with Broadband Wireless Access systems in the European theater.

In support of EPAA Phase III, Aegis Ashore integrates the Aegis BMD 5.1 and Standard Missile (SM-3) Block IIA capabilities into the Aegis Ashore sites. MDA is responsible for any upgrade to BMD capability, BMD specific mission equipment, and integration with existing Ballistic Missile Defense System (BMDS) nodes for all Aegis Ashore sites.

**Remarks**

**D. Acquisition Strategy**

The Aegis Ashore Engineering Agent (AAEA) is responsible for the design, development, integration and test of the Aegis Weapons System capability into a reconstitutable deckhouse. The AAEA will also support Aegis Ashore deployment to Romania.

The Global Deployment (GD) program office is utilizing Naval Facilities Engineering Command (NAVFAC) and U. S. Corps of Engineers Europe District (Core of Engineers North Atlantic Union) CENAU to award and administer contracts for base operating support, commercial power, temporary site activation facilities, and integrated electronic security systems for Romania and Poland sites.

**E. Performance Metrics**

Cost Plus Award Fee Contracts

**A. Mission Description and Budget Item Justification**

Sustain Missile Defense Agency (MDA) DoD Information Assurance Certification and Accreditation Program (DIACAP) and Controls Validation Testing (CVT) activities, analysis of validation results, risk assessments and reviews of proposed Program Manager/Information Assurance Manager (PM/IAM) Plans of Action and Milestones (POA&Ms) for MDA Aegis Ballistic Missile Defense (BMD) mission systems. It maintains the Certification and Accreditation (C&A) data repository, capturing the DIACAP documentation (artifacts, validation results, and Information Assurance Risk Assessment results, and Designated Approving Authority (DAA) accreditation decisions) on all MDA Information Systems.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
<b>Title:</b> Network/System Certification and Accreditation (C&A)	2.724	3.255	2.980
<b>Articles:</b>	-	-	-
<p><b>Description:</b> Monitor and track cybersecurity mitigation detailed in Information Technology Security Guidance. Activities include preparation of C&amp;A documentation and accreditation recommendations to the MDA Senior Information Assurance Officer (SIAO)/ Certification Authority (CA) and DAA. Independent Verification and Validation (IV&amp;V) team actions ensure the availability, integrity, authentication, confidentiality and non-repudiation of the MDA mission, test and administrative systems. Activities in the Project are necessary to comply with the Federal Information Security Management Act (FISMA).</p> <p>Recurring Accomplishments:</p> <ul style="list-style-type: none"> <li>- Provide Cybersecurity engineering and architecture requirements planning for Aegis BMD systems</li> <li>- Coordinate the development and implementation of Aegis BMD Risk Management Framework (RMF) accreditation packages</li> <li>- Conduct regular Controls Validation Testing (CVT) of Aegis BMD systems and provide a Risk Assessment Report (RAR) to mitigate cybersecurity deficiencies</li> <li>- Conduct annual cybersecurity reviews on the Aegis BMD systems to assess compliance in implementing and maintaining RMF controls</li> <li>- Implement HW/SW to conduct continuous daily monitoring</li> <li>- Conduct monthly reviews of systems in eMass</li> <li>- Provide daily management of eMass</li> </ul> <p>Specific and/or unique accomplishments to each FY are as follows:</p>

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Aegis SM-3 Block IIA Co-Development RDT&E completed in FY 2018.

**A. Mission Description and Budget Item Justification**

The Aegis Ballistic Missile Defense (BMD) mission is to deliver an operationally effective and supportable BMD capability to defend the nation, deployed forces, and allies. Aegis BMD aims to increase this capability by delivering evolutionary improvements as part of Ballistic Missile Defense System (BMDS) upgrades. Aegis BMD provides a forward-deployable, mobile capability to detect and track ballistic missiles of all ranges, and the ability to destroy Short-Range Ballistic Missiles (SRBM), Medium-Range Ballistic Missiles (MRBM), and Intermediate-Range Ballistic Missiles (IRBM) in the midcourse phase of flight. Upgrades to both the Aegis BMD Weapon System and the Standard Missile-3 (SM-3) configuration enable Aegis BMD to provide effective, supportable defensive capability against longer range, more sophisticated threats and an enduring Aegis Ashore defensive capability.

Beginning in 2006, Aegis BMD and the Japanese Ministry of Defense (JMOD) have undertaken an SM-3 Cooperative Development (SCD) Project. The objective of the SCD project is the development and initial at-sea flight test of the SM-3 Block IIA. The U.S. and Japan will bear equitable burden to complete the project, as documented in the U.S./Japan Memorandum of Understanding (MOU) SCD Annex. Each nation will fund the full extent of its participation in the project. No funds are transferred between the U.S. and Japan under the MOU.

The SM-3 Block IIA provides important improvements over SM-3 Block IB capability, including increased velocity and range provided by a 21-inch diameter rocket motor propulsion stack, more than doubled seeker sensitivity, and more than tripled divert capability incorporated in an advanced Kinetic Warhead (KW). New component technologies include, but are not limited to: lightweight nosecone, advanced kinetic warhead, 21-inch second stage rocket motor, and 21-inch third stage rocket motor. The effort includes risk reduction for key components and supports EPAA Phase III.

**Note**

Aegis SM-3 Block IIA Co-Development RDT&E completed in FY 2018.

**A. Mission Description and Budget Item Justification**

The Scope of Work of the SCD project is defined in three phases:

Phase I took the program through System Design Review (SDR) in FY 2009. Aegis BMD executed risk reduction efforts for the Propulsion, Nosecone, Seeker, Divert Attitude Control System (DACS) development efforts, and test plans. Phase I Included requirements definition for the SM-3 Block IIA.

Phase II encompassed the work from SDR through the Critical Design Review (CDR) in FY 2014. Aegis BMD refined requirements and defined the performance allocation and component configuration for the development of the SM-3 Block IIA. The U.S. and Japan designed, fabricated, tested, and evaluated the SM-3 Block IIA sections per the agreed work-share agreement.

Phase III extends from CDR to the completion of the SCD flight test program as defined in the Agreement. This phase defines developmental cost share agreements between the United States and the Government of Japan, completes component engineering and integration, executes cooperative flight tests, and continues discussions on production and maintenance options. Phase III is planned to complete in FY 2018.

The SCD project will:

- Develop and integrate components for the SM-3 Block IIA into an All Up Round (AUR). Japan's work share includes 21 inch 2nd and 3rd stage components and the 21 inch nosecone. The U.S. work share includes the advanced kinetic warhead, advanced seeker, large diameter divert and attitude control system, and lightweight Vertical Launch System (VLS) canister.
- Integrate the SM-3 Block IIA VLS with Aegis Ship Systems.

**Remarks**

**D. Acquisition Strategy**

The SM-3 Cooperative Development program for the SM-3 Block IIA missile utilizes a performance-based approach that ties program decision milestones to the performance of development prototypes, as well as Propulsion Test Vehicle and Controlled Test Vehicle flight test article performance. Acquisition of hardware, software modifications and required services will occur in conjunction with contractual and tasking efforts to U.S. Navy work and events, and as defined by signed agreements between the Governments of the United States and Japan.

**E. Performance Metrics**

SM-3 Block IIA Program Office is utilizing Incentive-based contracts to ensure project completes on time.

**Note**

FY 2017 and FY 2018, Program Wide Support (PWS) reflects proportional changes as a result of a budget decrease and a FY 2019 elimination of the SM-3 Block IIA Co-Development program element.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis and therefore, fluctuates by year based on the adjusted RDT&E profile (which excludes: 0305103C Cyber Security Initiative, 0603891C Special Programs, 0603913C Israeli Cooperative Program and 0901598C Management Headquarters).

Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

Increase from FY 2019 to FY 2020 reflects the realignment of test related funding from the Ballistic Missile Defense Midcourse Segment (0603882C) to this PE for flight test execution and analysis. Also, provides ground test Continuous Development, Continuous Integration and Continuous Agile Testing (CIT/CAT). Ground testing was previously performed sequentially but will now be performed in parallel to reduce the test cycle time, with periods of 3 lab-based activities simultaneously. These new sequential test flows require additional test teams, off shift work to de-conflict assets and network infrastructure, and additional data packages and test reviews. In addition, the increase provides for new Cybersecurity testing events which will use a crawl, walk, run approach for each future GMD Ground Systems build which will require earlier and additional installation and checkout in the labs to support earlier learning, feedback to the product development team, and final evaluation of cyber capability prior to operational cyber testing.

**A. Mission Description and Budget Item Justification**

Ballistic Missile Defense Midcourse Defense Segment Test provides flight and ground testing of GMD functionality to demonstrate Enhanced Homeland Defense capabilities against long-range threats. The GMD components are tested in an integrated environment with BMDS sensors; C2BMC; Warfighters; and national collection assets to assess the ability to defend the United States and its territories against ballistic missile attack.

Primary programs include Resource's, Flight Test Execution, Ground Test Execution and Program Operations for which detailed descriptions and accomplishments are provided in section B.

• Other Adjustment	-1.000	0.000	2.681	-	2.681

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects the enacted congressional adjustment of +\$9.300M for an additional 20 GBIs.

Decrease in FY 2019 from PB19 to PB20 reflects the congressional adjustment for forward financing in FY 2018.

Increase in FY 2020 from PB19 to PB20 reflects the realignment of test funding previously budgeted in Ballistic Missile Defense Midcourse Segment (0603882C) for flight test execution and analysis.

**Remarks**

**D. Acquisition Strategy**

GMD awarded a competitive Development and Sustainment Contract (DSC) on December 30, 2011. This contract included development, fielding, test, systems engineering, integration, and configuration management; equipment manufacturing and upgrade; training, operations and sustainment of the GMD system and associated support facilities.

In January of 2018 the MDA Director approved the extension of the DSC to execute the Missile Defeat and Defense Enhancement scope (20 silos and 20 GBIs). On January 31, 2018, the DSC Extension was awarded to the Boeing Company with a period of performance through Q1 FY2024. In addition to the MDDE requirements, the DSC Extension also includes supporting test, engineering, software, and performance based logistics scope. The DSC structure breaks out major efforts into separate Contract Line Item Numbers with individual incentives for management insight, accounting and property accountability.

GM is also implementing a more robust Program Board structure allowing more Government insight and decisions into the technical baseline and has changed business processes for greater Government involvement in Program decisions. In addition, GM utilizes Government laboratory modeling & simulation, and analysis capabilities to augment Boeing's efforts.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**Program MDAP/MAIS Code:** 362

**Note**

FY 2020 MOKV funding realigned to other Department of Defense priorities.

**A. Mission Description and Budget Item Justification**

The MOKV program will enhance the BMDS Homeland Defense Interceptor performance to enable the Warfighter to counter more numerous and complex threats to the Homeland by enabling engagement of multiple objects from a single interceptor. The Missile Defense Agency (MDA) is developing the concepts for a MOKV based on a modular, open systems architecture designed to common interfaces and standards, making upgrades easier and broadening MDA's vendor and supplier base.

The MOKV will rely on a Ballistic Missile Defense System (BMDS) architecture that balances performance across the Sensors, Command, Control, Battle Management and Communications (C2BMC), and GMD elements. Analyses show that having multiple kill vehicles on each interceptor can dramatically improve the performance of the system, significantly reduce the burden on interceptor inventory, and reduce cost to defend the Homeland.

**B. Program Change Summary (\$ in Millions)**

**Note**

FY 2020 MOKV funding realigned to other Department of Defense priorities.

**A. Mission Description and Budget Item Justification**

MDA has implemented a structured, disciplined systems engineering process to assure the MOKV is a BMDS solution. The systems engineering effort will define the requirements for a deployable MOKV. The Government will develop MOKV system engineering guidelines from industry concepts, government analysis, modeling, and simulation. Results from MOKV concept development and follow on technology risk reduction efforts will inform the Top Level Requirements development needed in order to execute a feasible, affordable future MOKV Product Development. MDA anticipates deploying this capability in the next decade to address the evolving threat.

As part of MOKV concept development, industry identified technology component risk reduction efforts that support their concepts. MOKV technology risk reduction efforts include maturation of engagement management algorithms, communications, seekers, advanced sensors, Divert and Attitude Control Systems (DACs) propulsion, integrated avionics, and Guidance, Navigation and Control (GNC) technology.

The GMD element of the BMDS provides combatant commanders with a continuously available (24 hours a day, 365 days a year) capability to defend the United States Homeland against Intercontinental Ballistic Missile (ICBM) attacks. In order to address the evolving and expanding threat of ballistic missile attacks on the Homeland, MDA is developing a more capable ground-based interceptor with a MOKV that will be able to defeat complex future threats.

	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>
<b>Title:</b> Multi-Object Kill Vehicle	6.347	6.130	0.000
<b>Articles:</b>	-	-	-
<b>Description:</b> In order to address the evolving and expanding threat of ballistic missile attacks on the Homeland, MDA is developing a more capable ground-based interceptor with a MOKV that will be able to defeat complex future threats.			
The MOKV replaces a unitary kill vehicle (KV) on current GBIs with a payload containing multiple, smaller kill vehicles (KVs). The MOKV concept also allows for a potentially substantial reduction of the GBI inventory required to protect the homeland, as multiple GBIs with a unitary KV will no longer be required to address a target complex with multiple threats.			
Specific and/or unique accomplishments to each FY are as follows:			
<b>FY 2019 Plans:</b> - Complete and document initial market research

**Remarks**

**D. Acquisition Strategy**  
The acquisition strategy for Technology Risk Reduction consists of three focus areas. First, through competition with missile integration contractors, develop kill vehicle architectures and interfaces with competitive design of MOKV concepts incorporating engagement management concept of operations, kill vehicles and enhanced discrimination capability. Second, conduct risk reduction activities to identify and mature the technology necessary to increase the reliability and performance of our kill vehicles using the Advanced Technology Innovation Broad Agency Announcement (BAA) and competitive procurements. Make investments that mitigate the component development gaps for future MOKV, and enhance the competitive environment. Make the necessary investments to maturing component technology; enhanced inertial navigation and kill vehicle-to-kill vehicle communications. Third, leverage the technical expertise of Federally Funded Research and Development Centers (FFRDCs), University Applied Research Centers (UARCs), and Universities and government laboratories to independently develop reference concept using proven modeling/analysis techniques.

**Note**

FY 2020 reflects proportional PWS changes as a result of the consolidation of the CKV Technology program element 0603294 with this program element 0604894C.

**A. Mission Description and Budget Item Justification**

Program Wide Support (PWS) contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**A. Mission Description and Budget Item Justification**

The two Space Tracking and Surveillance System (STSS) satellites launched in 2009 provide an on-orbit capability to validate remote sensor fire control integration to inform design and operation of Missile Defense Agency (MDA) space-layer capabilities. MDA uses STSS data to characterize contribution of space data into the Ballistic Missile Defense System (BMDS) and to provide sensor measurements and background data supporting trade studies and analyses for MDA space-layer options for both Homeland and Regional Defense.

STSS continues to provide risk reduction for MDA space capabilities, models, algorithms, interface definitions, communications architectures, and performance across threat object acquisition, tracking, complex target signatures, discrimination and multi-mission support. STSS also informs the Ballistic Missile Defense System (BMDS) Concept of Operations, timelines and performance requirements for remote space sensor cuing for ballistic missile engagements, expanding battle space for weapon systems such as Aegis Ballistic Missile Defense (BMD).

The STSS program demonstrates the functions and interfaces required for space data delivery to the BMDS, validating the data quality necessary for interceptors to launch and/or engage on STSS sensor data. The two STSS satellites are operated from the ground station processing center at the Missile Defense Space Center (MDSC). The STSS satellites demonstrate MDA space-layer capabilities and reduce risk for systems by viewing high-value Targets of Opportunity and participating in BMDS flight tests.

Though the STSS satellites are operating beyond their life expectancy, MDA will continue STSS operations for as long as possible due to the continued contributions STSS provides to the BMDS mission.

The MDSC provides MDA's only centralized collaboration and integration environment that leverages existing Overhead Persistent Infrared (OPIR) enterprise integration in support of BMDS research and development test, and sensor operations. The MDSC capabilities and infrastructure support flight tests, operational concept and prototype development, technology demonstrations, experiments, and algorithm development within a multi-security, collaborative environment to integrate and exploit

**A. Mission Description and Budget Item Justification**

Two Space Tracking and Surveillance System (STSS) satellites provide a low earth orbit sensor capability with visible and infrared sensors for integrated testing with other Ballistic Missile Defense System (BMDS) elements. STSS demonstrates space-based capabilities including persistent tracking and integrated BMDS discrimination improvements. These two satellites provide valuable risk reduction for acquisition, tracking, complex scenes, and discrimination functionality to include stereo data fusion, cueing radars over the horizon and over-the-horizon fire control.

The on-orbit sensors collect invaluable background, scene, and target signature data to support MDA space-layer and other weapon sensor development trade studies. STSS activities provide information for integration of space-based missile tracking (midcourse phase); remote sensor and weapons cueing via the Command and Control, Battle Management and Communications (C2BMC); features and discrimination; and hit/impact point assessments. STSS enables early capability assessment to address the Warfighter's need for highly available early missile tracking from space, providing an operationally suitable means of global persistent surveillance and engagement. Capabilities being assessed for MDA space-layer capabilities include detecting and acquiring missiles; tracking missiles and their deployed objects; performing autonomous acquisition-to-track handover within a satellite; performing tracking handover to a satellite from a ground cue; performing uplink and downlink of mission, health, and status data both directly and via crosslink between two satellites; reporting missile and intercept event to close the fire-control loop; filtering reports to C2BMC; and providing near real-time object data to external users. STSS support to other mission areas improves definition for Enterprise system approaches.

The Missile Defense Space Center (MDSC) provides capabilities and infrastructure to support space operations, integration and testing with the BMDS. It provides a multi-level security environment for sensor data management and integration across space and terrestrial sensor data activities. MDSC experiments leverage DoD and national security space capabilities. MDSC activities support analyses, demonstration and integration of space sensor capabilities into developmental and operational MDA elements. MDSC enables the development of advanced technology and algorithms including fusion of multiple sensor types (radar, overhead persistent infrared, electro-optical and other emerging sensor technologies). It also supports mission integration of space-based missile tracking, sensor and weapons cueing via C2BMC, features and discrimination, kill and impact point assessments into the BMDS and other non-MDA mission areas, including Space Situational Awareness, technical intelligence, and battle space characterization. This effort is a continuation of work previously performed in program element 0603895C that supported the STSS program.

Lessons learned and data gathered from the STSS demonstration satellites program provide valuable information for MDA space-layer modeling and simulation activities in assessing the capability provided by Overhead Persistent Infrared sensors.

**D. Acquisition Strategy**

The STSS demonstration satellites program follows MDAs capability-based acquisition strategy that emphasizes testing, incremental development, and evolutionary acquisition. The STSS effort utilizes a single prime contractor, Northrop Grumman Aerospace Systems (NGAS) with the subcontractor Raytheon providing the sensor payload. This contract implements MDA`s capability-based acquisition strategy by using existing satellite hardware as a low risk opportunity, building upon the lessons learned from previous development efforts, and establishing a series of planned enhancements to bring added capability to the BMDS.

MDSC efforts will be acquired on the Specialized Warfighter Development Contract vehicle. This contract is responsible for integrating Research, Development, Test and Evaluation, operations support, resource and infrastructure management for the MDSC.

**Note**

Decrease from FY 2019 to FY 2020 reflects completion of hardware replacement and executing steady-state support to meet cyber security requirements.

**A. Mission Description and Budget Item Justification**

Space Tracking and Surveillance System (STSS) Cyber Operations sustain the Missile Defense Agency (MDA) Risk Management Framework (RMF) and Security Controls Assessments (SCA)/Controls Validation Testing (CVT) activities, analysis of validation results, risk assessments and reviews of proposed Program Manager/ Information System Security Manager (PM/ISSM) Plans of Action and Milestones (POA&Ms) for MDA STSS mission systems. Activities in this Project are necessary to comply with the Federal Information Security Management Act (FISMA).

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)**

**Program MDAP/MAIS Code:** 362

**Note**

FY 2019 includes \$73.000 million congressional plus up for development of the Space Sensor Layer (SSL), formerly named Missile Defense Tracking System.

The SSL program is a collaborative effort between the Missile Defense Agency (MDA), Defense Advanced Research Projects Agency (DARPA), Space Development Agency (SDA) and the USAF to develop the capability to detect and track evolving threats. Beginning in FY20, funds for continuing SSL efforts are included in the SDA and DARPA budget.

**A. Mission Description and Budget Item Justification**

This program element primarily funds the Spacebased Kill Assessment (SKA) project, a Missile Defense Agency (MDA) experiment, demonstrating kill assessment from space. MDA Aegis BMD (Ballistic Missile Defense) program intercept testing experience provided a solid understanding of kill assessment physics.

Several events set the stage for the kill assessment experiment that later became known as SKA:

- Section 237 in the FY 2014 National Defense Authorization Act directed MDA to improve kill assessment for the GMD program with an initial kill assessment capability by December 31, 2019
- An MDA study called the Space Layer Option Study found that disaggregated systems could provide sensor capabilities at lower costs
- A once in a decade opportunity became available when the commercial sector offered hosted payload services at costs far below what MDA could expect if it used traditional DOD space acquisition models

SKA incorporates Government Accountability Office (GAO) recommendations to examine the operational feasibility of disaggregating large satellites (report number GAO-15-7) and to provide data for the business case for shared or dedicated satellite control, including the ground antenna networks (report number GAO-13-315). The favorable cost and schedule performance on SKA is also consistent with the GAO's assessment of commercially hosted payload programs (report number GAO-18-493). The SKA experiment will utilize a network of small IR sensors integrated onto commercial host satellites which, while on orbit, will observe missile defense

---	--

intercepts and deliver a kill assessment declaration to the BMDS. SKA has the opportunity to change the economics of the defense of the American homeland from enemy missiles.

Space Sensor Layer: In FY 2019 the MDA, in collaboration with U.S. Air Force, Defense Advanced Research Projects Agency (DARPA), and the Space Development Agency (SDA) is defining a capabilities-based spiral acquisition space program, referred to as the Space Sensor Layer (SSL). SSL is an integral part of a resilient, multi-tiered Overhead Persistent Infrared (OPIR) Enterprise Architecture. This multi-tiered architecture will consist of systems in different orbits that provide and integrated capability to meet critical warfighter requirements in a contested space environment.

This program element also funds Cyber Security efforts necessary to support BMDS Space Programs.

<b>B. Program Change Summary (\$ in Millions)</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020 Base</b>	<b>FY 2020 OCO</b>	<b>FY 2020 Total</b>
Previous President's Budget	30.994	16.484	19.555	-	19.555
Current President's Budget	45.123	94.484	27.565	-	27.565
Total Adjustments	14.129	78.000	8.010	-	8.010
• Congressional General Reductions	0.000	0.000			
• Congressional Directed Reductions	0.000	0.000			
• Congressional Rescissions	0.000	0.000			
• Congressional Adds	0.000	78.000			
• Congressional Directed Transfers	0.000	0.000			
• Reprogrammings	13.500	0.000			
• SBIR/STTR Transfer	-0.533	0.000			
• Missile Defeat and Defense Enhancement	0.000	0.000	0.000	-	0.000
• Other Adjustment	1.162	0.000	8.010	-	8.010

**Change Summary Explanation**

Increase in FY 2018 from PB19 to PB20 reflects the Omnibus Above Threshold Reprogramming which provided funding to support the Space Sensor Layer (SSL).

Increase in FY 2019 from PB19 to PB20 reflects congressional plus ups for SSL development (\$73.000 million) and funding Cyber Security Initiatives (\$5.000 million) as outlined in Public Law 115-245.

Increase in FY 2020 from PB19 to PB20 provides the conversion of an experimental SKA to an operational SKA by replacing the administrative quality communications lines with ruggedized, BMDS-quality communications lines, BMDS integration for operationalization, and adds a training capability necessary for the new operators in the Missile Defense Integration and Operations Center (MDIOC) Payload Analysis Center.

**Note**

The increase from FY 2019 to FY 2020 provides the conversion of an experimental SKA to an operational SKA by replacing the administrative quality communications lines with ruggedized, BMDS-quality communications lines, BMDS integration for operationalization, and adds a training capability necessary for the new operators in the Missile Defense Integration and Operations Center (MDIOC) Payload Analysis Center.

**A. Mission Description and Budget Item Justification**

The SKA system is composed of two segments: a space segment and a ground segment.

- The space segment is composed of a network of small infrared (IR) sensors (sensors, processor cards and cabling), each mated to a different satellite. The total number of sensors and their network placement are specifically tailored for the kill assessment mission. The space segment includes key design features to improve its resiliency.
- The ground segment is a small network of desktop computers, servers and routers that monitor the health of the on-orbit sensors, command the sensors to perform the kill assessment mission and analyze the data to make a kill assessment determination for the Ballistic Missile Defense System (BMDS). The ground segment also includes the equipment necessary for communications security and information assurance. The Missile Defense Space Center (MDSC) is the communications hub for SKA data, routing SKA data between the commercial payload integrator and the SKA Payload Analysis Center.

**Remarks**

**D. Acquisition Strategy**

SKA leverages experience that the Johns Hopkins University Applied Physics Laboratory (JHU/APL) has with its extensive history of performing kill assessment activities and conducting experiments associated with the Aegis BMD program. JHU/APL is the developer of the SKA experiment and its primary subcontractor will be responsible for payload integration and hosting accommodation using a firm fixed price contract to contain costs. The SKA experiment uses a commercial satellite program as the platform host for a DOD payload, taking full advantage of a multi-billion dollar space and ground system that already exists.

**Note**

In FY 2019, this program element received a \$73.000 million congressional plus up for development of the Space Sensor Layer (SSL), formerly named Missile Defense Tracking System.

The SSL program is a collaborative effort between the Missile Defense Agency (MDA), Defense Advanced Research Projects Agency (DARPA), Space Development Agency (SDA) and the USAF to develop the capability to detect and track evolving threats. Beginning in FY20, funds for continuing SSL efforts are in the SDA and DARPA budget.

**A. Mission Description and Budget Item Justification**

The Space Sensor Layers (SSL) priority is to maintain the pace of the development schedule to meet the urgent warfighter need to address rapidly developing threats. To meet this priority, SSL must use high technology readiness level components, take advantage of existing government capabilities to minimize development, use a management culture that does not slow down the pace of development and use Other Transaction Agreements (OTA) to minimize contracting cycle times. OTAs allow the Government to work with traditional, non-traditional, and New Space businesses to identify innovative solutions.

The SSL requirements are derived from Unites States Strategic Command (USSTRATCOM) Prioritized Capabilities List (PCL), the National Defense Authorization Act for Fiscal Year 2019, and DoD requirements from the Joint Requirements Oversight Council (JROC).

The current SSL objectives are as follows:

- Complete multiple, competing Preliminary Concept Reviews (PCR) for prototype constellations at Low-Earth Orbit altitude
- Estimate the costs and schedules for developing the competing prototype systems
- Complete risk reduction activities that will enable the MDA to initiate development of the SSL prototype, if authorized and appropriated.

The primary technical activity in this phase is developing the target signal-to-clutter algorithms. These algorithms will be evaluated in a Signal Chain Processing (SCP) demonstration in which prototype data processing subsystems will process, and distribute the mission data. This activity also includes development of prototype infrared sensor payloads and provides insight into the constellation architecture, communications approach, and preliminary command and control design aspects.

MDA is working concurrently and collaboratively with the Defense Advanced Research Projects Agency (DARPA), the U.S. Air Force, and the Space Development Agency (SDA). DARPA's and SMC's research focuses on spacecraft design, constellation management, and improving industrial production capacity. MDA's research focuses on developing payloads and signal chain processing to detect and track missile targets of interest.

<b>Appropriation/Budget Activity</b> 0400 / 4	<b>R-1 Program Element (Number/Name)</b> PE 1206895C / <i>Ballistic Missile Defense System Space Programs</i>	<b>Project (Number/Name)</b> MD37 / <i>Space Sensor Layer</i>
--	--	--

Like other MDA space sensors, SSL is planned to integrate with the existing Joint OPIR Ground (JOG) architecture for mission tasking and data distribution. This OPIR enterprise architecture will be integrated with the terrestrial Ballistic Missile Defense System (BMDS) sensors to improve missile defense architecture capabilities.

**Note**

Program Wide Support (PWS) is allocated on a pro-rata basis across multiple Agency PE's each fiscal year based on the total Agency budget, and therefore fluctuates per PE by fiscal year.

**A. Mission Description and Budget Item Justification**

PWS contains non-headquarters management costs in support of MDA functions and activities across the entire BMDS. It Includes Government Civilians and Contract Support Services. This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

This provides integrity and oversight of the BMDS as well as supports MDA in the development and evaluation of technologies that will respond to the changing threat. Additionally, PWS includes personnel to support global deployments performing deployment site preparation and activation, and provides facility capabilities for MDA Executing Agent locations. Other MDA wide costs include: physical and technical security; civilian drug testing; audit readiness; the Science, Technology, Engineering, and Mathematics (STEM) program; legal services and settlements; travel and agency training; office, equipment, vehicle, and warehouse leases; utilities and base operations; data and unified communications support; supplies and maintenance; materiel and readiness and central property management of equipment; Facilities Sustainment, Restoration and Modernization (SRM) program, (formerly Real Property Maintenance) to keep the Department's inventory of facilities in good working order; and similar operating expenses. PWS is allocated on a pro-rata basis across most Agency PEs and therefore fluctuates per PE by fiscal year based on the total Agency budget in that fiscal year.

**A. Mission Description and Budget Item Justification**

Small Business Innovation Research (SBIR) explores innovative concepts pursuant to Public Law 106-554 (Small Business Reauthorization Act of 2000) and Public Law 107-50 (Small Business Technology Transfer Program Reauthorization Act of 2001), which mandates a two-phase competition for small businesses with innovative technology that can be commercialized. SBIR and Small Business Technology Transfer (STTR) programs will develop new dual-use technology for future Missile Defense Agency (MDA) Ballistic Missile Defense Systems (BMDS) needs. Dual-use means that the technology will be judged on the potential for future private sector investment both as a vehicle for reducing development time and cost, unit costs of new BMDS technology, and as a route to national economic growth through new commercial products. MDA will conduct the competition, award, and manage the contracts.

**Program MDAP/MAIS Code:** 362

**Note**

This program element (PE) reflects OSD addition in FY 2019. All prior and subsequent FYs are funded in PE 0603914C MC04. This is a continuation of efforts funded within the Management and Support Office of the Secretary of Defense (OSD) PE 0604942DZ Assessments & Evaluation.

Pursuant to section 1647 of Public Law 114-92, the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2016, and Congress mandated the Department of Defense (DoD) conduct cyber vulnerability evaluations of all major DoD weapons by December 31, 2019. The alternative provides \$84.1 million to the applicable Components for platform level assessments, platform mitigations, and red team enhancements. Missile Defense Agency received \$3.4 million in FY 2019 for Cyber Vulnerability Assessment and Mitigation.

**A. Mission Description and Budget Item Justification**

This program element (PE) provides funds for cyber vulnerability assessments of critical elements of the Ballistic Missile Defense System (BMD) that Missile Defense Agency (MDA) is responsible for conducting, as directed by Sec. 16470 of the Fiscal Year 2017 National Defense Authorization Act.

Resources will be used for assessments and non-recurring engineering for mitigations for elements of the BMD system that MDA is responsible for conducting.

**Program MDAP/MAIS Code:** 362

**Note**

The Management Headquarters Activity (MHA) Program Element (PE) 0901598C includes decreases in accordance with Department of Defense (DoD) reform efforts to maintain major headquarter activities' civilian staffing at reduced levels. DoD efforts to establish a common MHA framework resulted in a net funding decrease due to the transfer of civilian manpower performing functions MDA considered MHA in prior years. Funding and civilian manpower performing these non-MHA functions were appropriately transferred to Program Wide Support. Implementation of prior year efficiencies continues through FY 2020.

**A. Mission Description and Budget Item Justification**

As prescribed by DoD Instruction 5100.73 Major Headquarters Activities, MDA's Management Headquarters PE supports the operation of MDA's management headquarters activities. This program element funds government civilian salaries and benefits, travel, contract support services, and operations of non-fielded activities.

Management Headquarters Activities provide executive leadership planning, develop centralized agency policy, prepare and defend annual budget submissions, respond to external inquiries, and implement SECDEF and Presidential priorities. As a DoD research, development and acquisition agency, the Headquarters Activities provide cost efficient oversight, direction, and control of initiatives and processes that assure best value, high quality, on-time, and successful performance of MDA acquisition programs. This is accomplished by ensuring acquisition and procurement program management emphasizes systems engineering; incorporates life cycle management objectives; implements risk management; and assesses cost, schedule or performance trade-offs.
