Department of Defense Fiscal Year (FY) 2021 Budget Estimates

February 2020

Defense-Wide

Defense-Wide Justification Book Volume 1 of 2

Procurement, Defense-Wide

UNCLASSIFIED

UNCLASSIFIED

Procurement, Defense-Wide

The Fiscal Year (FY) 2021 Overseas Contingency Operations funding can be separated into the following categories:

- OCO for Direct War Costs (\$72,085,000): Direct War costs are those combat or direct combat support costs that will not continue to be expended once combat operations end at major contingency locations.
- OCO for Enduring Requirements (\$186,406,000): OCO for Enduring Requirements are enduring in-theater and in-CONUS costs that will likely remain after combat operations cease, and have previously been funded in OCO.
- OCO for Base Requirements (\$0): OCO for Base Requirements is funding to pay for base budget requirements that are financed in the OCO budget in order for the Department to comply with the Bipartisan Budget Act (BBA) of 2019.

Preparation of the Defense-Wide budget, excluding revolving funds, cost the Department of Defense a total of approximately \$1,220,000 in FY 2020.

Chemical and Biological Defense Program Overview

The Chemical and Biological Defense Program (CBDP) is vital to our Nation's ability to counter current and future threats posed by chemical and biological (CB) weapons. The hazards posed by CB weapons remain real and evolving. An increased willingness to use these types of weapons either for assassinations (e.g. Russia and North Korea) or to achieve asymmetric advantages (e.g. Syria and ISIS in Iraq) indicates eroding international norms against the use of CB weapons. This paradigm shift challenges the ability of the Joint Force to operate unencumbered. The proliferation of knowledge and technology, increased ease of access, difficulty in detecting illicit activities, emerging threats, improved delivery capabilities, and our limited ability to anticipate how adversaries might employ Weapons of Mass Destruction (WMD) heighten the risk of attacks against the U.S. or its allies.

The *2018 National Defense Strategy* (NDS) and Department of Defense (DoD) strategic guidance acknowledges an increasingly complex global security environment, characterized by the re-emergence of long-term, strategic competition between nations and the growing potential for strategic surprise stemming from advances in technology and science. The NDS recognizes the effects of WMD and prioritizes efforts to prevent WMD proliferation, defend the homeland from WMD, and manage the consequences of WMD attacks. We must remain vigilant in preparing and responding to threats from near-peer threat actors. Our adversaries' ambitions and increasing dominance in biotechnology, engineering, and computational science create challenges and opportunities for the Joint Force's battlefield superiority. Therefore, we must lean forward into the future to leverage innovation, integrate our collective CB knowledge, and deploy adaptive solutions to mitigate these enhanced and emerging threats.

Considering the international security environment and the objectives of the NDS, the vision for the CBDP is a Joint Force ready to fight and win in CB-contested environments through a coordinated and integrated effort that systematically neutralizes the chemical and biological threats presented by our adversaries. The CBDP will achieve this vision through its mission to enable the lethality of the Joint Force by anticipating future threats and delivering capabilities that ensure the Warfighter fights and wins in CB-contested environments. These capabilities are a part of an integrated and layered defensive capacity that enables countering weapons of mass destruction (CWMD) missions ranging from major combat operations to Defense Support to Civil Authorities (DSCA) domestic incident response. However, in Fiscal Year (FY) 2021, the program will no longer resource radiological passive defense and tactical disablement efforts to focus the CBDP on its core mission of CB defense. The FY 2021 President's Budget Request includes \$1.29 billion aligned against the highest CB defense priorities for the Department, Joint Services, and Combatant Commands to improve near-term Joint Force readiness and modernize the force to address emerging threats.

Budget Overview

This FY 2021 budget request supports the NDS and the DoD Strategy for CWMD and will continue to develop capabilities to increase the resiliency of our warfighters and support efforts to deter, prevent, mitigate, respond to, and recover from CB incidents and hazards in the following areas:

- Prevent Surprise (NDS Pillar: Build a More Lethal Force) - Reduce the risk from emerging threats resulting from advances in technology and the increased proliferation of WMD and enablers. Efforts focus on accelerating characterization and early assessment of possible CB hazards by leveraging advances in technology and artificial intelligence.
- Situational Awareness (NDS Pillar: Build a More Lethal Force) – Improve tactical and operational commanders' decisions by developing and fielding better detection and identification capabilities to conduct CB reconnaissance, surveillance, and site exploitation missions. Developmental efforts focus on increasing detection accuracy, range and effectiveness, ensuring that detection data integrates seamlessly with other non-CB sensor systems and relevant information systems, and integration of sensors onto Service-fielded unmanned platforms.
- Protection (NDS Pillar: Build a More Lethal Force) - Enhance mission performance and provide effective protection against current and emerging threats by rapidly developing and fielding modernized protection capabilities. Developmental efforts focus on advances in materials and systems engineering to enhance protective properties against a broader array of hazards, while reducing CWMD operational challenges and logistical burdens. Approaches focus on modular and customizable solutions that are effective against a broad range of challenges in varied environments.
- Hazard Mitigation (NDS Pillar: Build a More Lethal Force) - Preserve combat power by developing and fielding systems that mitigate exposure to CB hazards and restore combat readiness of critical personnel and platforms. Developmental efforts address personnel decontamination, to include handling mass casualties and human remains, along with materiel decontamination, which includes sensitive equipment and aircraft. Novel decontamination approaches focus on broad decontaminant applicability to CB hazards, while minimizing harm to individuals, equipment, and platforms.
- Medical Countermeasures (NDS Pillar: Build a More Lethal Force) - Improve delivery of medical countermeasures to the warfighter by enhancing development through a platform-based approach to enable cost effective and agile delivery of prophylactic, diagnostic, and therapeutic capabilities for known and emerging threats. Developmental efforts focus on advanced vaccines, therapeutic drugs, and diagnostic capabilities that provide safe and effective medical defenses against biological agents (bacteria, toxins, and viruses), emerging infectious diseases, and traditional and non-traditional chemical agents.

FY 2021 Budget Request Highlights

- The FY 2021 Research, Development, Test and Evaluation (RDT&E) budget request of \$993.7 Million supports key efforts including:
 - \$294 Million supporting RDT&E efforts advancing environmental detection and medical diagnostic capabilities providing enhanced situational awareness of traditional and non-traditional chemical hazards, as well as traditional and emerging biological hazards.
 - \$156 Million to continue support of research and development of Medical Countermeasures (MCMs), such as vaccines and therapeutics, addressing high-priority biological hazards.
 - \$103 Million to continue support of research and development of MCMs focused on protecting against and treating exposure to traditional and non-traditional chemical agents.
 - \$99 Million to support critical CB defense research, development, and test infrastructure and operations.
 - \$78 Million supporting RDT&E for personnel protection, respiratory and ocular protection, collective protection, and hazard mitigation capabilities against traditional and non-traditional CB agents.
 - \$81 Million supporting MCM platform and manufacturing technologies to streamline and accelerate product delivery and reduce developmental risk. Efforts center on leveraging and sustaining the DoD's Advanced Development and Manufacturing capability. Additionally, it resources efforts to improve domestic incident preparedness and response to a CB incident.
 - \$81 Million supporting basic research and threat agent sciences, advancing fundamental knowledge and experimental research in the life and physical sciences.
 - \$51 Million supporting integrated early warning, biosurveillance, warning & reporting, decision support, and modeling and simulation capabilities.
 - \$20 Million supporting concepts development, technology demonstrations, enhanced capability demonstrations, and Special Operations Forces Rapid Capability Development and Deployment to enhance military operational capabilities with technologies and equipment.

- The FY 2021 Procurement budget request of \$297.1 Million supports key efforts including:
 - \$95 Million to procure modernized respiratory and ocular protection for ground and air forces.
 - \$65 Million to procure modernized Analytical Laboratory Systems to enhance and sustain the National Guard – WMD Civil Support Teams analytical capabilities for DSCA. Funding also supports procurement of the Common Analytical Laboratory System capability to integrate a common suite of commercial- and government-off-the-shelf components to provide a common, modular, and transportable/mobile analytical laboratory system to support DoD field analytic units.
 - \$47 Million to procure CBRN Dismounted Reconnaissance Sets, Kits, and Outfits which allows warfighters to perform CBRN dismounted reconnaissance, surveillance, and site assessment of WMD suspect areas not accessible by traditional CBRN reconnaissance-mounted platforms.
 - \$23 Million to procure modernized collective protection capabilities (Joint Expeditionary Collective Protection, and CB Aircraft Survivability Barrier).
 - \$21 Million to procure Enhanced Maritime Biological Detectors to provide the U.S. Navy improved detection and identification capabilities with decreased operational costs and increased reliability for detection of biological agents.
 - \$5 Million to procure improved air crew ensembles to increase protection against advanced chemical threats and decrease physiological burden.

Summary

The proliferation of WMD continues to fall among the greatest challenges facing the United States of America, and the Nation must prioritize improving our ability to counter WMD. Currently, eroding international norms regarding CB weapons use, knowledge proliferation in the areas of advanced biotechnology and unmanned systems, and a diminishing distinction between chemical and biological capabilities all fuel the current CB threat environment. The DoD must remain at the leading edge of innovation and develop technologies to address present and future threats. Accordingly, this budget enables the CBDP to increase the lethality of the Joint Force by ensuring that they can fight and win in CB-contested environments, preserving the security and freedom of our Nation.

Description:

Enable the warfighter to deter, prevent, protect against, mitigate, respond to, and recover from Chemical, Biological, Radiological, and Nuclear (CBRN) threats and effects as part of an integrated and layered defense. Situational awareness provides the Joint Force the ability to proactively identify hazards from traditional and emerging CBRN threats with a focus on improving the timeliness and confidence of information for decision makers.

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2021 Chemical and Biological Defense Program		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 03: Chemical/Biological Defense / BSA 1: CBDP		P-1 Line Item Number / Title: 7001SA1000 / Chemical Biological Situational Awareness
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>Justification: Situational Awareness is a primary objective of the Chemical Biological Defense Program. Operational forces have an immediate need to safely operate, survive, and sustain operations in a Nuclear, Biological, Chemical (NBC) agent threat environment. Contamination Avoidance is necessary to maintain operational efficiency and minimize the need to decontaminate vehicles, equipment, and areas. Advanced nuclear, biological, and chemical defensive equipment is required to enhance US capability to detect and identify threat agents in the battle space and the homeland. Warning, reporting, and reconnaissance efforts will provide a tiered strategy for detection and warning comprised of complementary detection/identification systems to provide theater protection against a large area and point attacks. Additionally, efforts in this BLIN support Special Purpose Unit operations and the National Guard Bureau Weapons of Mass Destruction Civil Support Teams (WMD-CSTs).</p> <p>The Chemical Biological Defense Program FY 2021 funding request was reduced by \$4.705 million during the Defense-Wide Review (DWR) to account for programs being terminated or restructured.</p>

Remarks:																		
The Joint Warning and Reporting Network (JWARN) provides the Joint Forces with a comprehensive Early Warning (EW) analysis and response capability to minimize the effects of hostile Chemical, Biological, Radiological, and Nuclear (CBRN) attacks, incidents and accidents. It provides the operational capability to employ CBRN warning technology which will collect, analyze, identify, locate, report, and disseminate CBRN warnings. JWARN will transition from a Command and Control (C2) platform specific implementation to a Web-based Service Oriented Architecture (SOA) meeting the DoD's evolution to a more comprehensive Common Operating Environment (COE). JWARN 2 will provide an expansion of sensors that will connect to JWARN, increased automation of message handling, improved false alarm filtering, integration of route-planning calculator, and interoperability with additional Command and Control (C2), medical information and evolving Bio-Surveillance systems. JWARN will be located in Command and Control Centers at the appropriate level and will be employed by CBRN defense specialists and other designated personnel to improve the efficiency of limited CBRN personnel assets. This employment will transfer data automatically from existing sensors and to and from the future sensors to provide commanders with the capability to support operational decision making in a CBRN environment. JWARN will integrate existing sensors into a sensor network or host C2 system, but will not provide the sensors that will be employed in the operating environment. JWARN will prioritize and complete resourced Capability Drops to transition into sustainment.

Exhibit P-5, Cost Analysis: PB 2021 Chemical and Biological Defense Program		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 7001SA1000 / Chemical Biological Situational Awareness	Item Number / Title [DODIC]: JC0208 / JOINT EFFECTS MODEL (JEM)
ID Code (A=Service Ready, B=Not Service Ready) : A		MDAP/MAIS Code:
Remarks: <p>The Joint Effects Model 2 (JEM 2) is DoD's only operationally tested and accredited model for predicting hazards associated with the release of contaminants into the environment. JEM 2 is a web-based software program. It is the only accredited DoD computer-based tactical and operational hazard prediction model capable of providing common representation of chemical, biological, radiological, nuclear (CBRN) and toxic industrial chemicals/toxic industrial material hazard areas and effects. It may be used in two variants: as a standalone system, or as a resident application on host command, control, communications, computers, and intelligence systems. JEM 2 is capable of modeling hazards in a variety of scenarios including: counter-force, passive defense, accident and/or incidents, high altitude releases, urban NBC environments, building interiors, and human performance degradation. Battle space commanders and first responders must have a CBRN hazard prediction capability in order to make decisions that will minimize risks of CBRN contamination and enable them to continue mission operations. JEM 2 operates in an integrated fashion with operational and tactical Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) systems, and in a standalone mode. JEM 2 interfaces and communicates with the other programs such as Joint Warning and Reporting Network (JWARN), weather systems, intelligence systems, and various databases. JEM will prioritize and complete resourced Capability Drops to transition into sustainment.</p> <p>Defense-Wide Review (DWR): The Chemical Biological Defense Program (CBDP) FY 2021 funding request was reduced by \$0.718 million to account for program being terminated.</p>

Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 7001SA1000 / Chemical Biological Situational Awareness	Item Number / Title [DODIC]: JF0100 / JOINT CHEMICAL AGENT DETECTOR (JCAD)
ID Code (A=Service Ready, B=Not Service Ready) : A		MDAP/MAIS Code:
Remarks: The Joint Chemical Agent Detector (JCAD) program employed an incremental acquisition strategy to develop a miniaturized, rugged point chemical agent detector that automatically and simultaneously detects, identifies and alerts in the presence of nerve, blister, and blood chemical warfare agents. In FY19, JCADs and Communication Adaptor Kits were purchased for Joint Urgent Operational Needs (JUONS) 0557. FY20 JCAD Procurement will procure JCAD Solid Liquid Adapters (JCAD SLA) for production verification testing and initial fielding for United States Special Operations Command (USSOCOM) and Joint Services. The contract award is planned for April 2020. In FY21, JCAD transitions to JCAD-SLA. The JCAD SLA effort was a NGCD acceleration effort for USSOCOM and a chemical warfare - pharmaceutical agent development effort initially funded by the FY17 Congressional Add.		
Note: Coordinating Fulfillment of JCAD requirements for Platform/Kit Integration via Other Service Funding or through PM Owned Stock Release.

Remarks:																		
The Joint Handheld Bio-Agent Identifier (JHBI) program is a Joint Service Acquisition Category (ACAT) III program that addresses an existing United States Special Operations Command (SOCOM) requirement for handheld, multiplexed, environmental, bio-agent identification. The JHBI program will provide handheld bio-collection preparation, and identification systems for the rapid and accurate identification of organisms at the point of contact for multiple mission types. Biomeme developed the "two3" system for Increment 1 and is improving that system to become the "three9" system for Increment 2. Both are highly multiplexed, smart phone-based, Polymerase Chain Reaction (PCR) identification systems. Epistem is developing the "Genedrive", a 9-plex PCR system. The proposed JHBI systems will be handheld, PCR-based, multiplexed devices for the analysis of powder or liquid environmental biological samples and will be supported by tools for quickly collecting and preparing raw biological samples for use on these identifiers. JHBI capabilities will provide Special Operations Forces with timely and accurate identification of eight or more bio-agents at the point of need. Additional capabilities will be developed to meet time-phases or objective requirements. These capabilities may include additional chemical, biological, radiological, and nuclear (CBRN) threat assays, integrated sample preparation capabilities, and supporting capabilities, as required. JHBI Increment 1 is anticipated to serve as a supplemental capability to the man-portable, multiplex, Polymerase Chain Reaction Bio-identifier known as BioFire RAZOR, with Increment 2 fielding the complete replacement of the RAZOR by FY20.																		
Justification: There is no FY21 PB Request.																		
RDT&E Code B Item: 0604384BP/Proj CA5

Remarks:

The Next Generation Diagnostic System (NGDS) is a family of systems providing increments of diagnostic capabilities over time that address varied chemical, biological and radiological (CBR) threats across the different echelons of the Combat Health Support System. The mission of the NGDS is to provide CBR threat and infectious disease identification and FDA-cleared diagnostics to inform individual patient treatment and CBR situational awareness and disease surveillance. NGDS Increment 1 improves diagnostic capabilities in deployable and laboratory-based combat health support units. NGDS Inc 1 offers improved operational suitability and affordability over legacy systems by developing FDA cleared biological warfare agent (BWA) and infectious disease in vitro diagnostic (IVD) assays on an existing commercial diagnostic device with a well established FDA regulatory history and pipeline of commercial non-BWA infectious disease diagnostic tests. NGDS 2 will complement NGDS 1 by developing diagnostics for unmet biological pathogen and toxin threats, chemical and radiological exposures, and to provide capability to lower echelons of care. NGDS 2 will provide additional capability for diagnosis of CBR-induced diseases,

Remarks:

The Next Generation Diagnostic System (NGDS) 2 program addresses chemical, biological and radiological (CBR) agents and Concepts Of Employments (COEs) that the NGDS 1 Film Array does not address. More than one materiel solution is required to expand the scope of CBR agent diagnostics across multiple echelons of care. NGDS 2 will employ a family of systems approach to bridge identified capability gaps for man-portable diagnostics, immunoassay diagnostics, and chemical diagnostics systems. NGDS 2 Man Portable Diagnostic System (MPDS) will complement NGDS Increment 1 by providing a lightweight, portable, and simple-to-use diagnostic capability to end-users in non-laboratory, far-forward environments. In FY21 NGDS has been broken out into two separate programs; the NGDS (1) program and the NGDS 2 Man Portable Diagnostic System (MPDS) Program.

Justification: FY21 funding procures 23 NGDS 2 Man Portable Diagnostic systems for Unites States Special Operations Command (USSOCOM) train-the-trainer training.

Exhibit P-5, Cost Analysis: PB 2021 Chemical and Biological Defense Program		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 7001SA1000 / Chemical Biological Situational Awareness	Item Number / Title [DODIC]: JS0005 / COMMON ANALYTICAL LABORATORY SYSTEM (CALS)
ID Code (A=Service Ready, B=Not Service Ready) : B		MDAP/MAIS Code:
<p>The Common Analytical Laboratory System (CALS) capability integrates a common suite of commercial-and government-off-the-shelf (COTS/GOTS) components to provide a common, modular, and transportable/mobile analytical laboratory system to support Department of Defense (DoD) field analytic units. CALS consists of two (2) variants, Field Confirmatory Analytical Capability Sets (FC ACS) and Theater Validation Integrated System (TV IS), and will support the detection and/or identification of Chemical Warfare Agents (CWAs), Toxic Industrial Chemicals (TICs), Toxic Industrial Materials (TIMs), Biological Warfare Agents (BWAs), and radiological material in environmental samples. Information produced by CALS variants will assist commanders or the local authority with managing and mitigating the effects of a Chemical, Biological, Radiological (CBR) attack or disaster by providing the ability to rapidly develop a common operating picture to determine the appropriate course of action. The systems fielded will be designed to support the specific mission and Concept of Operations (CONOPS) of the gaining unit.</p> <p>The CALS FC ACS will be fielded to the various units within the US Army, Navy, Air Force, and National Guard Bureau. FC ACS system is comprised of biological and chemical subsystems. The FC ACS chemical subsystem components include a Gas Chromatograph / Mass Spectrometer (GC/MS), Fourier Transform-Infrared (FT-IR) spectrometer, and Raman spectrometer. The FC ACS biological subsystem components include Lateral Flow Immunoassays (LFIA), Electrochemiluminescence (ECL), and Polymerase Chain Reaction (PCR). Units employing FC ACS, based on their mission requirements, personnel education and training, will be able to provide sample analysis that provides a second layer of analysis for meeting field confirmatory levels as defined in Tactics, Techniques, and Procedures (mission requirements dictate whether Units will receive the bio components, the chem components, or both bio/chem components). These analytical results will support decisions for protection, treatment, decontamination and planning in support of future operations. The PR2 uses electrochemiluminescence (ECL) technology to carry out highly sensitive, multiplexed immunoassays for biothreat agents. ECL immunoassays enable highly sensitive measurement of samples for the presence of bacteria, viruses, and toxins.</p> <p>The CALS TV IS will be fielded to the US Army Area Medical Laboratory (AML) and Chemical, Biological, Radiological, Nuclear and Explosives (CBRNE) Analytical and Remediation Activity (CARA). The TV IS will provide a higher level of confidence in analytical results than the FC ACS through the use of orthogonal technologies and an expanded analytical suite. The subsystems and associated components of the TV IS will be housed in three (3) common 20-foot ISO containers, which will be integrated onto two (2) M1148 trucks and one (1) M1147 trailer. Sample/specimen receipt, analytical testing, storage of consumables will be performed within the ISO containers. The Prime Movers and power generators are system organic. Operational units, some with and some without CBR technical capability and experience, will deliver unknown and presumptively identified environmental samples for TV IS analysis. TV IS provides operators with the ability to identify the presence of priority targets (as identified by the Services).</p> <p>Note: Prior to FY18, CALS consisted of 3 variants. On 03 May 18, the CALS Field Confirmatory Integrated System (FC IS) transitioned to a Modification Work Order (MWO), the Analytical Laboratory System (ALS) Modification (MOD) concept, to address operational readiness issues with the ALS Increment 1 as a result of system obsolescence.</p> <p>CALS FY19 funds were prioritized toward the ALS MOD efforts to address the operational readiness issues associated with the obsolescence of the ALS Increment 1 vehicle, shelter, and analytical suite. For FY20 and beyond, ALS MOD funding is captured under Item Number SA0025, to further define the CALS FC IS transition to ALS MOD.</p> <p>CALS FY20 funding supports the US Air Force identified urgent key capability gap that resulted in the decision to use FC ACS FY20 procurement funds to purchase 47 Meso Scale Diagnostics PR2 instruments (Bio ECL component). The PR2 uses electrochemiluminescence (ECL) technology to carry out highly sensitive, multiplexed immunoassays for biothreat agents. ECL immunoassays enable highly sensitive measurement of samples for the presence of bacteria, viruses, and toxins.</p> <p>The remaining chem/bio subsystem components that an FC ACS system is comprised of will be fielded to all FC ACS Users beginning in FY21 (FY21 funding procures production hardware for 11 FC ACS systems). An FC ACS system consists of the biological and chemical subsystem components defined in the description.</p> <p>While the FC ACS program was previously on hold to prevent cost growth, the 17 SEP 2019 Joint Program Executive Office for Chemical, Biological, Radiological and Nuclear Defense (JPEO-CBRND) Acquisition Decision Memorandum (ADM) authorized the FC ACS program to move forward with Production & Deployment (P&D) efforts as stakeholders successfully agreed to an affordable and executable acquisition strategy that addressed an "analytics only" approach to meet the Users mission requirements.</p> <p>Justification: FY21 funding procures production hardware for 11 FC ACS systems and 2 TV IS systems. Additionally, FY21 funding includes respective fielding, training, and System Engineering and Program Management (SEPM) support costs for the FC ACS and TV IS systems.</p>

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<p>Remarks:</p> <p>The Analytical Laboratory System (ALS) Modification (MOD) program was established to address critical analytical equipment obsolescence (Analytical Suite) and system functionality for the National Guard Bureau's (NGB) Civil Support Teams. The ALS MOD capability will be modular, scalable and adaptable to a various environmental conditions. Additionally, the ALS MOD will support the specific mission and Concept of Operations (CONOPS) of the gaining unit and will be able to detect and/or identify Chemical Warfare Agents (CWAs), Toxic Industrial Chemicals (TICs), Toxic Industrial Materials (TIMs), Biological Warfare Agents (BWAs), and radiological material in environmental samples.</p> <p>Previously fielded ALS variants {2002-2005} to the NGB have experienced degraded system performance. Documented ALS system criticalities include obsolete prime movers, shelters, and analytical suite equipment. Services lease prime movers for the ALS MOD effort. The PM will be responsible for modifying the prime mover, modernizing the shelter, analytical suite equipment, to include network and IT equipment, for the ALS MOD.</p> <p>ALS MOD program supports the evaluation of advancements in CBRN commercial- and government-off-the-shelf (COTS/GOTS) equipment against the current technology baseline of equipment fielded to the (57) WMD-CST Teams. As such, the program will establish a time phased modernization plan to integrate and incorporate advancements in commercially available technology refresh into the CST operating mission set ahead of critical obsolescence. ALS MOD obsolescence will be done in concert with the two CALS variants (Theater Validation Integrated System (TV IS) and Field Confirmatory Analytical Capability Set (FC ACS).</p> <p>The ALS MOD will be fielded to the 57 NGB's WMD-CST Teams, the Army's 773rd CST, and USMC's Chemical Biological Incident Response Force.</p> <p>Note: CALS FY19 funds were used to support the ALS MOD efforts to address the operational readiness issues associated with the obsolescence of the ALS Increment 1 vehicle, shelter, and analytical suite. For FY20 and beyond, ALS MOD funding is captured in this separate P-form budget exhibit. The ALS MOD P-form budget exhibit contains funding that once resided in the CALS P-form budget exhibit, and was transferred over to further define the CALS FC IS transition to ALS MOD.</p> <p>Justification: FY21 Funding procures long lead items to support production of 6 systems in FY22. Additionally, FY21 funding includes labor and management support costs for the FY21 production build of 23 systems (hardware costs for these 23 systems are captured in FY20 procurement cost elements).</p> <p>RDT&E Code B Item: 0607384BP/Proj CM7</p> <p>CM7/ALS MOD: RDT&E ; FY2020 - 0.847 Million</p> <p>DEVELOPMENT/TEST STATUS AND MAJOR MILESTONES</p>

(±) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule. "A" in the Delivery Schedule indicates the Contract Award Date. Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:

The Special Purpose Units-Chemical Biological Equipment (SPU-CBE) program provides the integrated Chemical, Biological, Radiological, Nuclear (CBRN) and High-Yield Explosive (CBRNE) rapid response force, which includes the Chemical Biological Incident Response Force (CBIRF), the capability packages that are required for the United States Northern Command to execute Department of Defense Support of Civil Authority (DSCA) missions. The purpose of this program is to address legacy requirements gaps/deficiencies for SPU-CBEs where they exist through the streamlined acquisition of commercial- and government-off-the-shelf (COTS/GOTS) capability upgrades that incorporate proven advancements in technology to satisfy mission performance standards. CBRNE protection is required for CONUS/OCONUS DoD installation physical structures as well as military personnel and others within the perimeter of the military reservation.

P5: Justification: FY21 Program procures 450 National Institute for Occupational Safety and Health (NIOSH) Chemical Biological Radiological and Nuclear (CBRN) Powered Air Purifying Respirators (PAPRs) for replacement of obsolete mission critical equipment.

Remarks:

The Integrated Chemical Biological Radiological and Nuclear Response Enterprise (CRE) provides rapid response capability through packages such as the Chemical, Biological, Radiological, Nuclear (CBRN) and High-Yield Explosive (CBRNe) Enhanced Response Force Package (CERFP), to the United States Army Reserve (USAR) Chemical Recon Platoons, Decon Platoons and Defense Support of Civil Authority CBRN Response Force (DCRF), and the 20th Support Command Nuclear Disablement (NDT) and CBRNE Teams. The purpose of this program is to address legacy requirements gaps/deficiencies for Special Purpose Units-Chemical Biological Equipment (SPU-CBE) where they exist through the streamlined acquisition of commercial- and government-off-the-shelf (COTS/GOTS) capability upgrades that incorporate proven advancements in technology to satisfy mission performance standards. CBRNE protection is required for CONUS/OCONUS DoD installation physical structures as well as military personnel and others within the perimeter of the military reservation.

Remarks:																		
The Software Support Activity (SSA) is a user developmental support and service activity supporting all Joint Program Executive Office for Chemical, Biological, Radiological and Nuclear Defense (JPEO-CBRND) systems by providing enterprise-wide services to facilitate net-centric interoperability of systems in acquisition for the Warfighter. The SSA provides the CBRND Warfighter with Joint Service solutions for Cybersecurity/Information Assurance (CS/IA), Integrated Architectures, Data Management/Modeling, Interoperability Certifications, Verification, Validation and Accreditation (VV&A) to support interoperable and integrated net-centric, service-oriented solutions for CBRND systems within the CBDP. The SSA emphasizes development of reference implementations to guide Government and industry system and software developers to ensure that their products meet common interoperability standards.																		
The latest technologies/products include the definition of a Common CBRN Sensor Integration Standard (CCSI) and the CBRN Data Model. These technologies are direct enablers for the development of CBRN integrated sensor networks and the dissemination of CBRN information across all users.																		
The SSA directly supports CBDP Biosurveillance initiatives in providing common service oriented architecture and framework for the collection and dissemination of Biosurveillance information.																		
Justification: FY21 funds SSA system fielding support to the Chemical Biological Defense Program (CBDP) community.

Remarks:																		
The Defense Biological Product Assurance Program (DBPAP) integrates and consolidates DoD reagents (i.e., antibodies/antigens) and biological warfare agent detection requirements plus supports an internal initiative ("TARMAC") that uses state-of-the-art analytical capability for biological threats that will enable the compression of the discovery-to-decision time frame and provide awareness and understanding of the baseline biological threat footprint.																		
In order to detect biological warfare agents (antigen), a critical reagent (genomics material) may be needed for use in a detection platform. Multiple medical and non-medical platforms require a continuous, quality supply of critical reagents for effective warning to significantly enhance force survivability. They are also required for rapid medical diagnosis to ensure appropriate treatment of exposed personnel. A common set of reagents for relevant platforms are required.

<p>The DBPAP is also responsible for managing the production, storage and validation of Hand Held Assays (HHAs), Polymerase Chain Reaction (PCR) genomic assays, Electrochemiluminescence (ECL) immunoassays, antibodies, and select biological threat agents and genomic reference materials. The DBPAP's PCR assays have been used in the DoD's response effort to the Ebola epidemic in West Africa that began in early 2014. Deployed laboratories from US Army Medical Research Institute of Infectious Diseases (USAMRIID), the Naval Medical Research Center's (NMRC) Biological Defense Research Directorate's (BDRD) Mobile Labs and the 1st Area Medical Lab (AML), as well as interagency partners such as the National Institutes of Health (NIH) National Institute of Allergies and Infectious Disease (NIAID), have all used DBPAP PCR assays to detect Ebola virus during their response missions in West Africa.</p> <p>Note: Antibodies, assays, and reference materials are ordered using outside source funding (DoD and other Government agencies).</p> <p>Justification: FY21 funds support repository management (i.e. production, storage, distribution and quality assurance validation) of assays, antibodies, select biological threat agent and genomic reference materials.</p>

ID Code (A=Service Ready, B=Not Service Ready) : A		MDAP/MAIS Code:
<p>Remarks: The Global Biosurveillance Portal (Global-BSP) is a web-based enterprise environment that will facilitate collaboration, communication, and information sharing in support of the detection, management, and mitigation of man-made and naturally occurring biological events. Global-BSP bridges the communication gaps in the Biosurveillance domain to provide a central access point for Biosurveillance information and situational awareness for DoD, interagency and allied partners supporting the early identification and response to biological events. Global-BSP provides an integrated suite of web-based components designed to support public health officers, environmental officers, clinicians, physicians, and Chemical, Biological, Radiological, and Nuclear (CBRN) personnel as they maintain their situational awareness of local, regional, and global biological threats to the force. Global-BSP does not duplicate existing DoD capabilities, but rather leverages existing tools and technologies to provide users across multiple organizations and disciplines with a centralized "one-stop shop" for all of their Biosurveillance resources. The Global-BSP will achieve Full Operational Capability (FOC) in FY20 and commence transition to sustainment.</p> <p>Defense-Wide Review (DWR): The Chemical Biological Defense Program (CBDP) FY 2021 funding request was reduced by \$1.000 million to account for program being terminated.</p>

Remarks:

The Joint Nuclear Biological and Chemical Reconnaissance Systems (JNBCRS), including the Stryker Nuclear Biological and Chemical Reconnaissance Vehicles (NBCRV), and Nuclear Biological and Chemical (NBC) equipment suites provide field commanders with point and early warning intelligence for real time field assessment of NBC hazards. The NBC Equipment Suite consists of the Chemical and Biological Mass Spectrometer II (CBMS II), Joint Biological Point Detection System (JBPDs), Chemical Vapor Sampling System (CVSS), Training Aids, Devices and Simulation Systems (TADSS), the Sensor Processing Group and associated initial and pipeline spares. The NBC Equipment Suite performs the vital function of detecting, identifying, collecting, reporting, and marking NBC hazards and toxic industrial chemicals. In addition to hardware funding covers Engineering in Support to Production at contractor and Government integrated product team (engineering, test, logistics) support required in FY18, FY19, and FY20 for to support system upgrade efforts.

Remarks:

The Chemical, Biological, Radiological, and Nuclear Dismounted Reconnaissance System (CBRN DRS) provides CBRN Warfighters with a comprehensive suite of protection, detection, identification, sample collection, hazard marking, decontamination, and other support capabilities for use during dismounted reconnaissance and sensitive site assessment missions. The Warfighter will use the CBRN DRS respiratory and percutaneous protection to prevent potential contamination while conducting assessment and exploitation operations. The Warfighters will use the CBRN DRS sensor capabilities to find CBRN and toxic industrial hazards for marking and sampling with other capabilities in the system. Warfighters will also use the decontamination kit to remove contamination from personnel and equipment.

Justification: FY21 funds procure 46 CBRN DRS for the Air Force, 20 Explosive Ordinance Disposal Teams (EOD TMS) for the Marine Corps, and 160 System Enhancement Packages (Variant #1), as well as fielding, engineering, program management, and logistics support.

P5: EOD users will use the system to assess ordnance and improvised explosive devices during render safe operations.

Advancing threats and current capability gaps in sensitive site exploitation capability require a System Enhancement Package (SEP) to the baseline DR SKO systems. Starting in FY21, the SEP effort will produce capability to meet updated requirements to support advancing threats and capability gaps in sensitive site exploitation. Individual sets will be identified and incorporated into the CBRN DRS as engineering change proposals to the base kit. SEPv1 will provide an Improved Biological Detection Set (IBDS). SEP v2 will provide an Improved Protection and Power Set (IPPS). SEP v3 will provide an Improved Chemical Detection Kit. SEP v4 will provide a kit of situational awareness/decision support enhancements called the CBRN Dismounted Tactical Awareness Kit (CBRN DTAK). CBRN DRS systems will be produced at government production facilities. The SEP packages will be configured, produced, and fielded in accordance with priorities and needs of the Services.

(t) indicates the presence of a P-5a

Remarks:																		
Enhanced Maritime Biological Detection (EMBD) is a technology refresh to the Joint Biological Point Detection System (JBPDS) and provides improved detection capabilities, decreases operational costs while increasing reliability and maintainability. EMBD will provide an improved computer architecture to mitigate future obsolescence in both hardware and software. EMBD is an automated system that rapidly detects, collects and identifies airborne Biological Warfare Agent (BWA) assessed to pose a threat to the Navy. The Capability Production Document (CPD) requires integration of the EMBD on Navy ships and EMBD interoperability with the Navy's command and control infrastructure. EMBD consists of Line Replaceable Units (LRUs) that perform the following core biological defense functions: detection (Rapid Agent Aerosol Detector [RAAD]), collection (Wetted Wall Cyclone (WWC) Collector), identification (Lateral Flow Immunoassay Identifier), sample handling (Fluid Transfer System (FTS)) and a local user interface (Computing and Control Subsystem [CCS]).																		
Justification: FY21 funds procure 28 Full Rate Production (FRP) systems for fielding, production support, logistics support and initial fielding packages.

Remarks:																		
Chemical, Biological, Radiological, and Nuclear (CBRN) Sensor Integration on Robotic Platforms (CSIRP) is a rapid prototyping and fielding effort started in FY19 that has focused on small scale purchase of CBRN sensors for use with service identified unmanned platforms in the field. It is Integrating modular CBRN sensor solutions to enhance Service Unmanned Air and Ground Systems Programs of Record (PORs). CSIRP sensors will provide situational awareness across the echelons of command in order to enable freedom of maneuver and action on the battlefield. An integrated CSIRP capability will exploit advances in machine learning and autonomy for greater propulsion, sensing and communication capabilities that enable timely and accurate detection, warning and reporting of CBRN hazards for increased risk reduction opportunities at tactical and operational echelons in mounted and dismounted configurations. With accelerating advances in Robotic and Autonomous Systems (RAS) technologies, CSIRP will give the Joint Force a tremendous opportunity to enhance capabilities and maintain operational advantage in an increasingly lethal and sophisticated operating environment. CSIRP is using a spiral development concept

Remarks:																					
Chemical Biological Radiological and Nuclear Information Systems (CBRN IS) aligns Chemical Biological Radiological and Nuclear Defense (CBRND) information technologies, capability sets and applications in order to utilize a common software architecture, eliminate duplicative integration effort, produce interoperable system components, and minimize time-to-market of end user capability. CBRN IS provides the Joint warfighter, CBRN community of interest and international partners a collaborative Cloud hosted environment that allows users to collect and disseminate CBRN warning and reporting data, provide detailed CBRN hazard predictions, aid in decision support, and make relevant CBRN defense information available in near-real time. CBRN IS provides an environment that supports the implementation of Integrated Early Warning (IEW) capabilities that allow users to access netted sensor information, data fusion, disease modeling, biosurveillance data, source term estimation data, incident management tools, and planning and analysis capabilities. The CBRN IS enterprise makes CBRN decision aids readily accessible from any desktop through a web browser simplifying interoperability, reducing integration and deployment costs and increases cybersecurity protection.																					
Justification: FY21 supports the continued deployment, technical and engineering support cost associated with hosting CBRN IS on milCloud in support of worldwide accessibility for the warfighter.

ID Code (A=Service Ready, B=Not Service Ready) : A		MDAP/MAIS Code:
Remarks: The Mounted Manned Platform Radiological Detection Systems (MMPRDS) program includes Mounted Enhanced Radiac Long Range Imaging Networkable (MERLIN) technology packages transitioned from the Defense Threat Reduction Agency (DTRA). MERLIN is a set of externally mounted standoff sensors that support joint radiological/nuclear reconnaissance and surveillance operations. The MMPRDS program will sunset in FY20 and transition to a separate line of effort for MERLIN (Item Number SA0046) beginning in FY21. FY20 Procurement procured 5 MERLINS under the sensor's Countering Weapons of Mass Destruction (CWMD) Other Transaction Authority (OTA) agreement. Production systems supported production verification testing (PVT) and rapid/initial fielding to Stryker Nuclear Biological and Chemical Reconnaissance Vehicles (NBCRV) units via modification work order (MWO) and conditional materiel release. MERLIN-outfitted NBCRVs will receive a preliminary upgrade of their legacy mounted radiological/ nuclear sensor payload prior to receiving vehicle-wide Joint Nuclear Biological and Chemical Reconnaissance Systems (JNBCRS) sensor suite upgrade.

Exhibit P-5, Cost Analysis: PB 2021 Chemical and Biological Defense Program		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 7001SA1000 / Chemical Biological Situational Awareness	Item Number / Title [DODIC]: SA0011 / RADIOLOGICAL DETECTION SYSTEM (RDS)
ID Code (A=Service Ready, B=Not Service Ready) : A		MDAP/MAIS Code:
<p>The Radiological Detection System (RDS) is the first joint solution to provide the Warfighter with the net-ready capability to measure alpha, beta, gamma, neutron, and low energy x-rays. It replaces DoD's legacy RADIAC survey meters (AN/PDR-77, VDR-2, MFR Suite, and ADM-300). The RDS will provide common units of measurement including both conventional and international system units and its open architecture design will enable upgrade of probes over system lifecycle, reducing life-cycle costs.</p> <p>Defense-Wide Review (DWR): The Chemical Biological Defense Program FY 2021 funding request was reduced by \$1.248 million to account for program being terminated.</p> <p>Note: RDS production will be resourced in FY21 from Service funding; Other Procurement, Army, Budget Activity 03: Other Support Equipment, \$11.301 million and Procurement, Defense Wide \$1.447 million.</p> <p>P5: Unit cost for the RDS varies due to the type and quantity of the configurations that are needed in that fiscal year.</p> <p>(†) indicates the presence of a P-5a</p>

Remarks: Contract was competitively awarded to Visionary Products, Inc. (Draper, UT) in September 2016 for development with a FY19 LRIP procurement option and FY20-24 FRP options. The contract was awarded as an Indefinite Delivery/Indefinite Quantity (ID/IQ) with Options for the Low Rate Initial Production Contract and up to a 5-Year Full Rate Production Option. Contracting Office is USA Contracting Command- Aberdeen Proving Ground-W911SR, Edgewood Contracting Division. In FY21 and beyond, the Defense-Wide Review (DWR) reduced this program for higher priorities.

Remarks: The Joint Personal Dosimeter - Individual (JPD-I) will provide a sensor to record and retrieve a Service member's radiation exposure from occupational to tactical levels. This capability provides a Joint solution reducing life-cycle costs while also address lessons learned from Operation Tomodachi. JPD-I provides near-real time display of soldiers radiation exposure to support situational awareness.

Description:

Enable the Warfighter to deter, prevent, protect against, mitigate, respond to, and recover from chemical, biological, radiological, and nuclear (CBRN) threats and effects as part of an integrated and layered defense. Protection and Hazard Mitigation provides the Warfighter with Individual and Collective Protection, capabilities for Materiel and Personnel Contamination Mitigation as well as medical countermeasures against the effects of CBRN hazards. The efforts within this BLIN continue to protect against and mitigate CBRN hazard threats from State and non-State actors.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

Operational forces across the continuum of global, contingency, special operations/low intensity conflict, counternarcotics, and other high-risk missions have an immediate need to survive and sustain operations in a CB threat environment. Efforts in this budget line item number (BLIN) provide protective equipment and medical countermeasures that supports protection prior to potential operations and mitigates the hazard if exposed.

The Chemical Biological Defense Program FY 2021 funding request was reduced by \$11.836 million during the Defense-Wide Review (DWR) to account for programs being terminated or restructured.

Remarks:

The Decontamination Family of Systems (DFoS) is comprised of the following programs

DFoS General Purpose Decontaminant (GPD)

DFoS Joint Service Equipment Wipe (JSEW)

DFoS Contamination Indicator Decontamination Assurance System (CIDAS) Nerve

UNCLASSIFIED

Exhibit P-5, Cost Analysis: PB 2021 Chemical and Biological Defense Program		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 8001PH1000 / CB Protection & Hazard Mitigation	Item Number / Title [DODIC]: JD0050 / DECONTAMINATION FAMILY OF SYSTEMS (DFoS)
ID Code (A=Service Ready, B=Not Service Ready) : B		MDAP/MAIS Code:
<p>The DFoS GPD Program will provide thorough and operational decontamination capabilities for Hardened Military Equipment (HME), to include tactical vehicles, shipboard surfaces, crew-served weapons, and individual weapons, in hostile and non-hostile environments where it is reasonable to expect chemical, biological, radiological, and nuclear (CBRN) and Non-Traditional Agents (NTA) weapons will be employed or Toxic Industrial Materials (TIMs) may be encountered. The DFoS GPD will be employed within the integrated battle space as a means to decontaminate hazards posing threats to military personnel and operations including peacekeeping, stability and support, or consequence management operations. The DFoS GPD will be applied directly to the contaminated surface and be capable of reducing/neutralizing Chemical and Biological (CB) contamination to thorough levels after application. The DFoS GPD will be compatible with hardened materials consistent with those found on a Detailed Equipment Decontamination (DED) line. The DFoS GPD will be safe, suitable and compatible with HME and be operable in all operational environments that have been exposed to CB contamination.</p> <p>The DFoS JSEW Program will provide Warfighters with an immediate/operational decontamination capability for sensitive and non-sensitive equipment that has been exposed to chemical agents/contamination. There is currently no documented decontamination capability that is non-destructive to sensitive equipment. The DFoS JSEW will be applied directly to contaminated sensitive and non-sensitive equipment and will be capable of removing gross contamination and reducing contact hazard immediately without leaving a residue. The DFoS JSEW will provide the means to minimize or negate the vulnerability to and effects of chemical attacks for peacekeeping, stability and support or consequence management operations.</p> <p>The DFoS CIDAS Nerve Program will provide the Joint Forces with a new capability to reduce the logistics burden of decontamination by indicating presence and location of traditional Nerve and non-traditional chemical agents on militarily relevant surfaces pre- and post-decontamination. It will consist of an indicator and an applicator, for which there will be three applicator configurations (small scale, tactical large scale, and reusable large scale) and two indicator formulations (nerve training and nerve). Post application, the DFoS CIDAS Nerve will not cause material degradation other than that which is allowable in service platforms' specifications to complete primary mission functions.</p> <p>Starting in FY21, the DFoS CIDAS program is being broken into separate CIDAS Nerve and CIDAS Blister programs as the capabilities are intended to fulfill distinct solutions to meet Warfighter needs. However, there are no planned Blister efforts funded out of the Procurement appropriation in FY21. The CIDAS Nerve program will address the visual disclosure of traditional and non-traditional nerve agents while the CIDAS Blister program addresses traditional blister agents, two separate threat scenarios that require different materiel solutions.</p> <p>Justification: FY21 funds will procure 276,785 gallons of DFoS GPD chemical and biological (CB) agent thorough decontaminant for Hardened Military Equipment (HME). These funds are required for Warfighters to have a thorough decontaminant for HME that has a significantly reduced logistics footprint for tactical vehicles, shipboard surfaces, crew-served weapons, and individual/personal weapons in hostile and non-hostile environments that have been exposed to biological, and traditional and non-traditional chemical agents/contamination.</p> <p>FY21 funds will procure 440 DFoS CIDAS Nerve Large Scale Applicators (LSA) reusable, and 4,051 DFoS CIDAS Nerve Small Scale Applicators (SSA), and 673 DFoS CIDAS Nerve LSAs & training kits. These funds are required for Warfighters to have contamination indication/decontamination assurance technology and applicators for visually indicating traditional and nontraditional chemical warfare agents on tactical vehicles, aircraft, ships, crew-served and individual weapons exposed to chemical contamination.</p> <p>RDT&E Code B Item: 0604384BP/Proj DE5</p> <p>DE5/DFoS CIDAS: RDT&E FY2018 and Prior - 24.653Million; FY2019 - 4.046 Million; FY2020 - 4.626 Million DE5/DFoS GPD: RDT&E FY2018 and Prior - 10.328Million DE5/DFoS JSEW: RDT&E FY2018 and Prior - 3.687Million</p> <p>DEVELOPMENT/TEST STATUS AND MAJOR MILESTONES</p> <p>DFoS CIDAS - Initial Capability Document: Mar 2011 DFoS CIDAS - CIDAS Milestone A: Aug 2011 DFoS CIDAS - CIDAS Capability Development Document: Sep 2014</p>

Remarks:

The Joint Biological Agent Decontamination System (JBADS) will provide the capability to conduct biological agent decontamination of the interior and exterior of the C-130 aircraft. The JBADS is a capability set that will include a shelter to encapsulate an airframe, a decontamination delivery system (e.g. hot-humid air-blower, etc.), environmental control and monitoring system(s), and other ancillary components required to ensure efficacious biological agent decontamination. It will provide the capability to decontaminate biologically contaminated airframes to safe levels and allow more rapid return to service. Future capability may address biological decontamination of other airframes and vehicles.

Justification: In FY21, JBADS procurement funds support Full Rate Production (FRP) preparations and reviews, such as System Verification Review (SVR), Logistics Demonstration, and preparing documentation for Milestone C/Full Rate Production (FRP)/Full Materiel Release activities.

Remarks: The Joint Service Aircrew Mask (JSAM) system is a lightweight Chemical, Biological, Radiological and Nuclear (CBRN) protective mask consisting of mask, filter, blower (except JSAM SA), and accessories incorporating state-of-the-art technology to protect U.S. Forces from anticipated threats. The JSAM systems will be developed to support multiple aircraft platforms which will integrate with aircraft subsystems: Aircrew Life Support Equipment (ALSE), seating, portable aircrew systems, restraint systems, Night Vision Goggles (NVGs), and communications systems. The mask is optimized to minimize impact on the wearer's performance, maximize its ability to interface with aircrew protective clothing, and provide improved field of view when compared to current protective masks.

Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 8001PH1000 / CB Protection & Hazard Mitigation	Item Number / Title [DODIC]: JI0002 / JS AIRCREW MASK (JSAM)
ID Code (A=Service Ready, B=Not Service Ready) : B		MDAP/MAIS Code:
<p>The JSAM for Rotary Wing (JSAM RW - MPU-5) aircraft will provide head, eye, respiratory, and CB protection and "don in flight" capability for general purpose, rotary wing aircrew in all four Services and the US Coast Guard. The JSAM for Tactical Aircraft (JSAM TA) will provide CB pressure breathing for altitude and anti-G protection. The JSAM for Strategic Aircraft (JSAM SA - M69) will provide CB protection for aircrew positions that only need pressure breathing for altitude. Both the JSAM TA and JSAM SA will provide flame resistance; JSAM TA will provide demist/emergency demist.</p> <p>Justification: FY21 will procure 4,298 JSAM RW production masks, and support items to reach United States Army (USA), United States Navy (USN) and United States Marine Corps (USMC) Full Operational Capability (FOC) in 2024. FY21 will procure 11,100 JSAM SA production masks, including initial spares, to be used for fielding to various Service aircraft to meet FOC in 2024. JSAM SA will conduct New Equipment Training (NET), procure spare parts and support equipment. FY21 will also procure 840 JSAM TA production masks including transit cases, and spares/support equipment to meet FOC for United States Air Force (USAF) in 2021 and to reach United States Navy (USN)/United States Marine Corp (USMC) FOC in 2024.</p> <p>RDT&E Code B Item: 0604384BP/Proj IP5</p> <p>IP5/JSAM RW: RDT&E FY2018 and Prior - 23.896Million IP5/JSAM SA: RDT&E FY2018 and Prior - 18.325Million; FY2019 - 1.627 Million; FY2020 - 1.127 Million; FY2021 - 1.145 Million; FY2022 - 0.208 Million IP5/JSAM TA: RDT&E FY2018 and Prior - 16.622Million; FY2019 - 2.018 Million</p> <p>DEVELOPMENT/TEST STATUS AND MAJOR MILESTONES</p> <p>JSAM RW - Milestone A: Sep 2000 JSAM RW - Milestone B: Nov 2002 JSAM RW - Capability Development Document: Apr 2012 JSAM RW - Milestone C: Jan 2015 JSAM RW - Low Rate Initial Production: Jan 2015 JSAM RW - Capability Production Document: Jan 2015 JSAM RW - Systems Engineering Plan: Jan 2015 JSAM RW - Test and Evaluation Master Plan: Mar 2015 JSAM RW - USA/USAF Full Rate Production: Dec 2016 JSAM RW - Life Cycle Sustainment Plan: Mar 2017 JSAM RW - USAF Initial Operability Capability: Feb 2018 JSAM RW - USN/USMC Full Rate Production: Apr 2018 JSAM RW - USAF Full Operational Capability: Dec 2018 JSAM RW - USN/USMC Initial Operational Capability: Apr 2019 JSAM RW - USA Initial Operational Capability: May 2019 JSAM RW - Acquisition Decision Memorandum: Jun 2019 JSAM RW - Acquisition Program Baseline: Sep 2019 JSAM RW - USA/USN/USMC Full Operational Capability: Sep 2024 JSAM SA - Milestone B: Apr 2013 JSAM SA - Capability Development Document: Feb 2014 JSAM SA - Capability Production Document: Oct 2016 JSAM SA - Milestone C Low Rate Initial Production: Oct 2016 JSAM SA - DT/OT (Capability, Integration, Airworthiness Certification) (Dec 2017 to Dec 2021)</p>

Remarks:

Production rates are monthly for all manufacturers

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:

The Joint Service General Purpose Mask (JSGPM) family of systems provides lightweight, protective Nuclear Biological Chemical (NBC) mask system. It incorporates state-of-the-art technology to protect the U.S. Joint Forces from anticipated threats. The JSGPM provides above-the-neck, head/eye/respiratory protection against Chemical and Biological (CB) agents, radioactive particles, and Toxic Industrial Materials (TIMs). The mask design is optimized to minimize impact on the wearer's performance, and to maximize its ability to interface with fielded and future Joint Service equipment and protective clothing. The JSGPM mask system replaces the M40/M42 series of masks for Army and Marine ground and combat vehicle operations and the MCU-2/P series for Air Force and Navy ground and shipboard applications. In addition, the JSGPM replaces the M45 mask in the Land Warrior program. This can significantly reduce the number of masks that will have to be logistically supported by the Department of Defense. The M50 is the ground/ship version of the JSGPM, the M51 is the combat vehicle crewman version of the JSGPM, the M53 is the special operations version of the JSGPM, and the M53A1 is the National Institute for Occupational Safety and Health (NIOSH) certified variant approved for both military and domestic response missions. Individual protection efforts are focused on equipment that both improves current protection levels and reduces the physiological and logistical burden on the individual soldier, sailor, airman or marine.

Justification: FY21 funds procure 4,263 JSGPM Ground/Ship (M53A1) masks with blowers, training, initial spares, and total package fielding to support Army requirements.

Remarks: The Advanced Anticonvulsant System (AAS) will consist of the drug midazolam in an autoinjector for use in treating nerve agent induced seizures and will replace the currently fielded Convulsant Antidote for Nerve Agent (CANAs) autoinjector, which uses diazepam. Procurement funds will support Initial Operational Capability (IOC), Full Operational Capability (FOC), support AAS transitioning to the Defense Logistics Agency (DLA) for sustainment and anticipated post approval activities required by the FDA.																			
Justification: There is no FY21 PB Request.

Remarks:

Joint Expeditionary Collective Protection (JECP) provides the Joint expeditionary forces a Collective Protection (CP) capability which is lightweight, compact, modular, and affordable. The JECP Family of Systems (FoS) include tent kits, structure kits, and standalone shelters that allow the application of CP to transportable soft-side shelters, enclosed spaces of opportunity, and remote austere locations as a standalone resource. JECP is capable of protecting personnel groups of varying size, unencumbered by Individual Protective Equipment (IPE), from effects of Chemical and Biological (CB) agents, Radiological (R) particles, Toxic Industrial Materials (TIMs), heat, dust, and sand.

Tent kits consist of a CB protective liner or a tent system containing CB protective material, airlock system, and a CB filtration blower system. Tent Kit-1 (TK1) and Tent Kit-3 (TK3) interface with the US Navy's Base-X general purpose tents and all organic Base-X equipment including the Environmental Control Unit (ECU) and power systems. Tent Kit-2 (TK2) interfaces with the Air Force Small Shelter System (ASSS) general purpose tents and all organic ASSS equipment including the ECU and power systems. Tent Kit Single Skin (TKSS) interfaces with Air Force organic equipment including an ECU and power systems.

Structure kits may include a floorless CB protective liner or a CB protective liner with a floor, an airlock system, and a CB filtration blower system. Structure Kit-Improved (SKI) is retrofitted to structures such as office buildings, warehouses, or hangars that provide coherent walls and roofing, ventilation systems, doors and windows, and power. Structure Kit Unimproved (SKUI) are retrofitted to structures such as huts, sheds or other rudimentary structures that do not have any available electrical power but provide environmental and other basic elemental protection. This configuration uses a passive CP system relying on natural airflow through CB protective filtration panels.

Standalone Large (SAL) shelter is an all-encompassing active CP shelter for up to 20 people. SAL provides a general purpose tent system, CB protective liner, an airlock system, a CB filtration blower system, an ECU and all necessary power and ancillary equipment.

Remarks:

Production rates assume each system is manufactured exclusive of the other systems. ** Production rates are monthly for all manufacturers

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:

The Chemical Biological Aircraft Survivability Barrier (CASB) will protect the interior of DOD's airlift assets from incidental cross-contamination by Chemical and Biological (CB)-contaminated personnel and equipment under transport. The United States Special Operations Command (USSOCOM) requirement is to sustain tactical force operations with the focus on regenerating multiple sorties intra-theater before transitioning to inter-theater redeployment. This tactical arm of airpower is comprised of high-demand, low-density, and expensive assets. The loss of any single asset from a CB contamination event would result in the effective loss of that asset because there are no approved decontamination solutions and/or standards by which assets could be effectively returned to unrestricted service.

Justification: FY21 procures an additional 62 CASB systems along with technical, engineering, and fielding support to meet the USSOCOM service requirement.

Remarks:

Production rates are monthly for all manufacturers

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Remarks:																		
The Biological Vaccine Procurement Program ensures the Department of Defense (DoD) capability to acquire and stockpile adequate quantities of all Biological Warfare (BW) vaccines to protect the programmed force against validated BW agents. Items currently in the stockpile are the Food and Drug Administration (FDA) licensed Anthrax Vaccine Adsorbed (AVA), Smallpox vaccine, and Vaccinia Immune Globulin Intravenous (VIGIV). Funding supports vaccine and licensed biologic production, quality assurance and control, equipment validation, process change management, documentation control, and all FDA license maintenance and post-approval commitments (Phase 4 clinical trials). The annual vaccination program for the Services is funded by the Defense Health Program.																		
Justification: There is no FY21 PB Request. The Chemical Biological Defense Program (CBDP) FY 2021 funding request was reduced by \$4.262 million during the Defense-Wide Review (DWR) to account for programs Recombinant Botulinum A/B Vaccine (VAC BOT), Recombinant Plague (VAC PLG), and Smallpox VIGIV being terminated.

Remarks:

The Uniform Integrated Protection Ensemble (UIPE) Increment 1 is a Chemical, Biological, Radiological, Nuclear (CBRN) protective system offering the capability to select a tailored material solution based on the expected threat level commensurate with operational mission requirements. Where appropriate, a family of systems approach that meets the scope of UIPE individual protection capability needs will be utilized. The objective of UIPE is to fully integrate CBRN and toxic industrial material (TIM) protections into an ensemble, identical in fit and form to the combat uniform (including ancillary equipment, mask - helmet integration, and protective boots and gloves), thus negating the need for separate protective ensemble components. This integrated protection approach will result in increased warfighter operational performance in a CBRN environment. The UIPE program will develop, integrate, test, procure and field incremental capability solutions that are modular in function and offer improvements in form and fit over current systems; the program will explore trade-space in areas such as protection level, heat stress, durability, antimicrobial properties, flame resistance, launderability, self-detoxification, and protection time in order to provide capabilities that afford maximum utility to the warfighter. Where appropriate modeling and simulation tools will be used to lower UIPE program risks, reduce costs, and ensure a high confidence in selected technologies. UIPE Increment 1 is aimed specifically at providing enhanced individual protection capabilities to the warfighter through reduction of physiological and psychological effects associated with CBRN protective garment thermal burden, weight, and bulk. The UIPE program will consider modernization in order to ensure that the warfighter retains access to state of the art capability to support future operational mission requirements. The UIPE Increment 1 protective system offers the capability to select a tailored material solution based on the expected threat level commensurate with operational mission requirements. This ability to tailor the type and level of the protective system will result in optimized protection, thereby minimizing physiological and psychological burdens associated with the weight, bulk, thermal strain, and encumbrance of wearing CBRN protective equipment on the Warfighter and affording the lowest impact on the operational mission.

Justification: FY21 begins the program close-out process, ramping the production and contract activities down until complete in FY22.

Remarks:

The Uniform Integrated Protection Ensemble (UIPE) Family of Systems (FoS) will develop a family of systems that will provide the Warfighter percutaneous protection from operationally relevant traditional and non-traditional Chemical, Biological, Radiological, Nuclear (CBRN) threats. The family of systems will be developed based on Service Mission Areas with the goal being to minimize operational burden and provide improved fit, function, and integration with the current Warfighter kits compared to legacy systems. The acquisition strategy allows for multiple decision points throughout product development, which

<p>In FY21, UIPE FoS transitions to UIPE FoS General Purpose (GP), UIPE FoS Air and UIPE FoS Gloves. The four Mission Areas are: Land, Air, Sea, and Homeland Defense. Each of the Mission Areas has unique mission requirements that the UIPE FoS GP, Air and Gloves solutions fulfill.</p> <p>UIPE FoS GP will provide a family of systems that will give the Warfighter percutaneous protection from operationally relevant traditional, non-traditional, and advanced Chemical, Biological, Radiological, Nuclear (CBRN)/Toxic Industrial Material (TIM) threats likely to be encountered during joint force operations. The family of systems is being developed based on agreed upon Service Mission Areas of which there are four: Land, Sea, Air, and Homeland Defense. Each of the Mission Areas have unique mission requirements that the combined UIPE FoS solutions will fulfill. The overarching goal of each of the four Mission Areas is to minimize operational burden and provide improved form, fit, function, and integration with the current Warfighter kits compared to legacy systems. The Tactical All-Hazards Threat Protective Ensemble (TATPE) will be a subset to the UIPE FoS GP and capitalize on the protection factor of commercial Level A with design modifications to align with the necessary operational imperatives to eliminate this risk paradox. This suit serves as an additional tool in the arsenal until technology matures to the point of delivering a similar capability applied against the range of military operations in all environments under all conditions. The TATPE will provide United States Special Operations Command (USSOCOM) a solution for a range of military operations in all environments under all conditions.</p> <p>Justification: FY21 funds will procure 100 complete Tactical All-Hazards Threat Protective Ensemble (TATPE) suits to begin the production line, establish New Equipment Training, and reserve initial quantities for Surveillance testing.</p> <p>RDT&E Code B Item: 0603884BP/Proj IP4; 0604384BP/Proj IP5</p> <p>IP4/UIPE FOS GP: RDT&E ; FY2021 - 1.989 Million; FY2022 - 2.983 Million IP5/UIPE FOS GP: RDT&E ; FY2021 - 7.278 Million; FY2022 - 7.326 Million; FY2023 - 6.730 Million; FY2024 - 3.140 Million</p> <p>DEVELOPMENT/TEST STATUS AND MAJOR MILESTONES</p> <p>UIPE FOS GP - Initial Operational Capability (IOC): Sep 2023 UIPE FOS GP - Full Operational Capability (FOC): Sep 2024 UIPE FOS GP - TATPE Milestone C: Jan 2021 UIPE FOS GP - TATPE Production Contract Award: Jan 2021 UIPE FOS GP - TATPE IOC: Sep 2021 UIPE FOS GP - TATPE FOC: Sep 2024</p> <p>(t) indicates the presence of a P-5a</p>

Remarks: In FY21, UIPE FoS transitions to UIPE FoS General Purpose (GP), UIPE FoS Air and UIPE FoS Gloves. The four Mission Areas are: Land, Air, Sea, and Homeland Defense. Each of the Mission Areas has unique mission requirements that the UIPE FoS GP, Air and Gloves solutions fulfill.

Appropriation / Budget Activity / Budget Sub Activity: 0300D / 03 / 1	P-1 Line Item Number / Title: 8001PH1000 / CB Protection & Hazard Mitigation	Item Number / Title [DODIC]: PHM034 / UNIFORM INTEGRATED PROTECTION ENSEMBLE FOS AIR (UIPE FOS AIR)
ID Code (A=Service Ready, B=Not Service Ready) : B		MDAP/MAIS Code:
<p>The Uniform Integrated Protection Ensemble (UIPE) Air falls under the UIPE Family of Systems (FoS) program whose aim is to develop a family of systems that will provide the Warfighter percutaneous protection from operationally relevant traditional and non-traditional Chemical, Biological, Radiological, Nuclear (CBRN) threats. UIPE FoS and the Services identified a mature solution to meet the Air Mission Area requirements - the United States Air Force's Chemical, Biological, Radiological Layer (CBRL), which is a part of the Integrated Aircrew Ensemble (IAE). There is high confidence in the CBRL meeting the requirements for the Services. The Air Mission Area suit will provide United States Air Force (USAF), United States Navy (USN), and United States Marine Corps (USMC) a percutaneous solution for tactical/ ejection seat, Rotary Wing, and non-ejection Fixed Wing platforms. The family of systems is being developed based on Service mission areas with the goal of minimizing operational burden and provide improved fit, function, and integration with the current Warfighter kits compared to legacy systems. The Mission Areas are: Land, Sea, Air, and Homeland Defense.</p> <p>Justification: FY21 funds will procure 3,860 Air Mission Area Chemical, Biological, Radiological Layer (CBRL) Suits, continue New Equipment Training (NET), and reserve quantities for surveillance testing.</p> <p>DEVELOPMENT/TEST STATUS AND MAJOR MILESTONES</p> <p>UIPE FOS AIR - Capability Development Document (CDD): May 2019 UIPE FOS AIR - Request for Proposal (RFP): Dec 2019 UIPE FOS AIR - Milestone C: Mar 2020 UIPE FOS AIR - Low Rate Initial Production (LRIP) USAF: Mar 2020 UIPE FOS AIR - Full Rate Production (FRP) USN/USMC: Mar 2021 UIPE FOS AIR - Initial Operational Capability: Sep 2022 UIPE FOS AIR - Full Operational Capability (FOC): Mar 2029</p> <p>(t) indicates the presence of a P-5a</p>

Remarks:

Special Purpose Unit Rapid Capability Development and Deployment (SPU RCDD) works with elements of the Joint Special Operations Command (JSOC), select elements from across the Special Operations Forces (SOF) Enterprise such as Combatant Commanders' Response Forces (CRFs) and other Joint Force enabling units such as the 20th Chemical, Biological, Radiological, Nuclear and Explosives Command to identify near term mission critical capability gaps needed for mission success. Solutions for these identified gaps are needed in a short timeframe and require the use of rapid acquisition strategies to meet the needs of the User. Specific requirements may consist of individual protective (suits, boots, gloves, or mask), detection, decontamination, or collective protection needs.

Remarks:																		
Modernization Protection Decontamination (MODPROT DE) projects address procurement actions associated with modernization efforts on hazard mitigation systems. The M26 Joint Service Transportable Decontamination System - Small Scale (JSTDS-SS) provides the capability to conduct operational and thorough decontamination of medium-to-large mobile or fixed equipment and aircraft. The M26 replaced the M-17 series decontamination systems. The engine on the M26 system is no longer available for procurement prior to the end of the planned system life. To address this Diminishing Manufacturing Source/ Material Shortage (DMSMS) issue, a qualified alternative engine will be procured and a Modification Work Order (MWO) will be performed to replace obsolete engines with modernized engines on fielded M26

Remarks:

The Chemical and Biological Protective Shelter (CBPS) satisfies the Services need for a highly mobile, self-contained collective protection system which can provide a contamination free working area for Echelon I and II medical treatment facilities and other selected units. The system consists of a Collectively Protected (CP) shelter modularized and integrated into a service selected prime-mover. The system is completely self contained, self powered, mobile, and adaptable to a variety of missions. CBPS relieves medical, combat service, and combat service support personnel from wearing chemical and biological protective clothing. The system is capable of operating continuously for 72 hours providing a contamination free environmentally controlled working area.

Defense-Wide Review (DWR): The Chemical Biological Defense Program (CBDP) FY 2021 funding request was reduced by \$7.574 million to account for program being terminated.

Note: Other Service Funding: Other Procurement, Army (OPA), Budget Activity 03, Budget Sub Activity 10, Line Item 4516M01001 procures 8 CBPS M8E1 systems in FY19 and 3 CBPS M8E1 systems in FY20.

P5: Unit costs for CBPS will increase or decrease depending on the number of systems procured each year.

(t) indicates the presence of a P-5a

Remarks:

FY20 unit cost increase attributed to standard inflation and reduction in total yearly production quantities between PDW and OPA funds.

In FY21 and beyond, the Defense-Wide Review (DWR) reduced this program for higher priorities.

Description: These funds provide for the purchase of the latest technologically advanced electronic information technology equipment to support DCAA's contract audit mission. In order to efficiently perform our audit reviews, it is essential that DCAA auditors be provided with equipment and software that are compatible with defense contractors' information technology systems, that provide access to the Agency's Management Information System and to the Internet for researching audit issues, and that provide the capability to securely electronically transmit and receive audit documents. In addition, up-to-date equipment is needed to satisfy the hardware/software/communication requirements for Information Assurance compliance as well as to interface with a variety of DoD standard systems such as: Defense Agencies Initiative (DAI), Defense Civilian Personnel Data System (DCPDS), Defense Civilian Pay System (DCPS), Defense Property Accountability System (DPAS), Defense Travel System (DTS), Program Budget and Accounting System (PBAS), and the Standard Procurement System (SPS). Procurement funds will be applied to the continued upgrading of DCAA's Integrated Information Network automation efforts. FY 2019 DCAA Integrated Information Network. (\$.945 million) Funding in the amount of \$945,000 is required to support the life-cycle replacement of technologically obsolete infrastructure. FY 2020 Starting in FY 2020, funds for the purchase of equipment have been transferred to DCAA's O&M line.

<p>Description:</p> <p>DCMA is currently engaged in several major initiatives to improve our information technology environment. Information technology is the primary enabling capability our acquisition workforce is reliant upon to communicate with contractors, the DoD acquisition community and our customers. These initiatives are driven by the National Defense Strategy business reform line of effort. On December 21, 2017, the Reform Management Group directed the Information Technology (IT) and Business Systems Reform Lead to review Fourth Estate IT networks, policies, business processes, functions, costs and Chief Information Officer (CIO) organizational structures and manpower requirements across the Fourth Estate. In support of this directive, DCMA is structuring its information technology investments to be in synchronization with the vision of the DoD guidance. One early result of this review is the decision to transfer commodity information technology administrative control to Defense Information Systems Agency (DISA).</p> <p>DCMA's IT investment strategy is being driven by the Director's initiatives to: 1) Develop Mission Business Systems; 2) Leverage Commodity Buying Power Through DISA; and 3) Focus on The Last Tactical Mile. These initiatives directly align and support the Optimization and Modernization efforts of the DoD CIO, which include: 1) Network Optimization; 2) Data Center Optimization; 3) Mission Partner Engagement; 4) Defense Travel Modernization ; 5) Enterprise Collaboration; 6) Consolidation of Cyber and IT Responsibilities; 7) Rationalize Business Systems; 8) Streamline IT Commodity Purchasing.</p> <p>These initiatives will empower mobile and fixed users' the ability to utilize DoD enterprise capabilities with the same or better level of efficiency and effectiveness. In addition, it will create an IT infrastructure that enables shared services and improve timely access to data via cloud capability in a secure and protected integrated environment.</p> <p>The Major Equipment program supports DCMA's requirement to procure servers, enterprise storage, and firewall equipment.</p>												
<p>Justification:</p> <p>FY 2021</p> <p>In FY 2021, funding in the amount of \$500,000 thousand supports Preventing Malicious Cyber Activity Investment:</p> <ul style="list-style-type: none"> o DCMA Firewall Replacement: DCMA is required to implement Enclave protections and network separation per the Defense Information Security Agency (DISA) Security Technical Implementation Guide (STIG) that is monitored by a TIER II and TIER III Cybersecurity Service Provider (CSSP). This capability is to ensure DCMA is properly protecting the DCMA and DoDIN networks from external and internal malicious network activities.

<p>Description: Program Overview:</p> <p>The Defense Counterintelligence and Security Agency (DCSA) formerly known as Defense Security Service (DSS) is a strategic asset to the nation and our allies - continuously ensuring a trusted federal, industrial, and affiliated workforce, and enabling industry's delivery of uncompromised capabilities by leveraging advanced technologies and innovation. DCSA uniquely blend critical technology protection, trusted personnel vetting, counterintelligence and professional education and certification to advance and preserve America's strategic edge.</p> <p>Purpose and Scope: The funds requested provide resources necessary for life-cycle replacement of mission-essential IT equipment and to procure new investment items for the Enterprise Security System applications.</p> <p>Justification: The FY21 funding will provide resources necessary for day to day IT functions, fostering new and emerging information technology, modernizing existing automations, and provide agency IT governance, policy, and oversight of essential mission and business systems. Additionally, it provide for network cybersecurity capabilities throughout the enterprise. Lastly, funding will support the transfer, maintenance, and sustainment of hardware and software transferring from Defense Information Systems Agency (DISA)/Joint Service Provider (JSP) to DCSA in order to continue to provide IT support to the DoD Consolidated Adjudications Facility (CAF).</p>

Description:

The Department of Defense Human Resources Activity (DHRA) is a consolidated Field Activity under the direction and control of the Under Secretary of Defense (Personnel and Readiness) (USD (P&R)) established for the collection and interaction of manpower and personnel data to support Department-wide tracking, analysis, research, studies, and a wide variety of reporting requirements. DHRA provides functional information management, civilian personnel policy support, and civilian personnel administrative services to DoD Components and activities. The scope of operations is necessarily broad and encompasses all aspects of data collection and utilization of Defense manpower and personnel data records to support DoD-wide analysis, studies, research, and reporting requirements. DHRA is the responsible organization within DoD for the interchange of automated manpower data with other government agencies.

Enterprise Human Resources (HR) Information Systems (EHRIS) is responsible for developing and maintaining the Information Technology (IT) systems that support Civilian HR Management (CHRM) processes across DoD. The EHRIS mission is to increase Civilian Force effectiveness by deploying innovative, leading-edge technology solutions and strategies for DoD end-users, to include employees, supervisors, managers, and leaders as well as Civilian HR customers and stakeholders.

Defense Enrollment Eligibility Reporting System (DEERS) is the DoD's authoritative eligibility and enrollment repository for manpower and personnel identity and affiliation data on military, civilian, retirees, family members, and other affiliated populations. DEERS determines eligibility for statutory benefits and entitlements, and tracks and verifies enrollment in these programs. DEERS also maintains medical and personnel readiness information on all Uniformed Services members, to include managing TRICARE eligibility, enrollment, and claims processes. Procurement funding for this program provides a secure self-service portal, known as MilConnect, to allow beneficiaries to securely view and update their DoD benefits and entitlements. As part of the Defense-Wide Review, DMDC will decommission MilConnect in FY 2021.

The Identity Credential Management (ICM) program supports the issuance of identification (ID) cards to Service members, civilian employees, contractors, retirees, and other affiliated persons. Supports the Real-time Automated Personnel Identification System (RAPIDS) as the enterprise system that issues the Uniformed Services ID card and provides online personnel and family member updates to the Defense Enrollment Eligibility Reporting System (DEERS). RAPIDS also issues the Common Access Card (CAC) to Service members, civilian employees, and eligible contractors, thus providing an enterprise-wide credential for both physical and logical access to DoD facilities and networks.

The Personnel Accountability (PA) program designs and implements technological solutions to gather, analyze, and share information on the physical location of DoD members and affiliated personnel in order to ensure the safety and enhance the readiness of the Armed Forces of the United States. PA provides end-to-end tracking, reconciliation and reporting of DoD personnel location and movements, to include

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2021 DoD Human Resources Activity		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 20: Major Equipment, DHRA		P-1 Line Item Number / Title: 500 / Personnel Administration
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0901220SE	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>Service members, DoD-affiliated civilians and contractors, other DoD-affiliated personnel, and U.S. citizens. This includes DoD travel, contracts, and contractor personnel tracking in support of contingencies, military readiness, reporting of locations at the unit and person level, accountability of DoD personnel during (and after) natural or man-made disasters, and accountability and visibility of noncombatant evacuees.</p> <p>As the Master Data Management (MDM) arm of DMDC, Enterprise Data Services (EDS) governs the collection, storage, and distribution of DMDC data assets to include: data modeling, database standardization, data quality, database architectures, and data distribution safeguarded by the security mechanisms which ensure compliance with the DoD information assurance standards and the PII directives of the DoD. EDS is also the enterprise focal point for cybersecurity toolset management and data center consolidation.</p>		
<p>Justification:</p> <p>Project: EHRIS. EHRIS is responsible for developing and maintaining the information technology systems that support Civilian Personnel processes across DoD. DMDC has secured Infrastructure-as-a-Service (IaaS) and Software-as-a-Service (SaaS) capabilities to support the majority of this portfolio. A small amount of Procurement funding is still required to support any requirements that are not available as IaaS or SaaS offerings.</p> <p>Project: DEERS. In FY 2021, DMDC reduced Procurement investment in the DEERS program. In compliance with the Data Center Optimization Initiative (DCOI) established by OMB Memorandum M-16-19, DMDC has secured Infrastructure-as-a-Service (IaaS) capabilities from DISA. With this shift to IaaS, DMDC will no longer procure its own infrastructure, but will instead reimburse service providers annually to provide infrastructure and hosting services. DMDC has reprogrammed \$0.527 million to O&M funding to support this requirement. DMDC will decommission seven portlets and migrate six portlets to other systems, enabling the decommission of MilConnect by FY 2021, as directed by the Defense-Wide Review, for a -\$900 thousand reduction. This decommissioning will eliminate the need for infrastructure funding for the DEERS program.</p> <p>Project: RAPIDS/CAC. FY 2021 investment in Automated Data Processing (ADP) equipment includes the acquisition of upgraded RAPIDS/CAC infrastructure, allowing the replacement of outdated and/or maintenance-intensive equipment in order to continue to ensure full functionality, system security, and HSPD-12 compliance of the RAPIDS/CAC system.</p> <p>Project: PA. FY 2021 investment in the NEO Tracking System (NTS) will be used to upgrade fielded NTS across the COCOMs and the National Guard. This centralized procurement of equipment will enable DMDC to track the systems in the field and provide support such as software upgrades, training and equipment tracking. Upgraded equipment will provide the COCOMs with more manageable and reliable systems. Other PA programs such as SPOT-ES and JPARR will receive upgraded equipment that decreases their footprint and meets the requirement of reducing redundant IT services across the Department, while providing expanded services.</p> <p>Project: EDS. FY 2021 investment will be used to procure hardware and software to implement common access services to improve DMDC's insider threat posture and mature data cyber security capability. DMDC will procure an Intrusion Prevention System (IPS) for layered and defense-in-depth security. This is a network monitoring preventative measure to detect and prevent vulnerability exploits.</p>

Description:

The Information Systems Security Program (ISSP) mission focuses on delivering Department of Defense (DoD) enterprise solutions to Combatant Commands, Services, and Defense-wide agencies to ensure critical mission execution in the face of cyber attacks. The ISSP ensures that, "the network, the computing centers, and core enterprise services will evolve to better support a joint information assurance model that has common enterprise-scale perimeter defenses and will support a broad range of sharing policies from completely unclassified to tightly-held within a classified community." The ISSP provides solutions to harden the network by: (1) reducing the exposed attack surface and gaps that potential adversaries can exploit to disrupt communications; (2) providing vital situational awareness to senior decision-makers and network defenders to enable attack detection and diagnosis; (3) supporting safe sharing of information with allies and mission partners; (4) publishing security guidelines and assessing compliance; (5) providing training to the DoD community; and (6) implementing Software Defined Networking to enable network agility for faster response times to mission need and improved deterrence against cyber attacks. The Sharkseer Program enables the Department of Defense the capability for (1) boundary defense and protection, (2) remote accessible malware analysis, (3) automated cyber threat intelligence sharing, and (4) cyber readiness services.

<p>Justification:</p> <p>FY 2019: (\$31.590) Procured the necessary hardware for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA acquired the following capabilities:</p> <ul style="list-style-type: none"> • Perimeter Defense - (\$13.028) Procured hardware/software (HW/SW) to tech refresh the suite of systems that serve as the defense layer between the commercial internet and Non-classified Internet Protocol (IP) Router Network (NIPRNet). Specifically, acquired outbound Uniform Resource Locator (URL) filtering and inbound spyware, malware, anti-virus and vulnerability filtering equipment; Splunk logging system; Procured equipment to support the NIPRNet Federated Gateway capability in Outside Continental United States (OCONUS) and firewall capability at specific IAP network locations; and tech refresh of the sensing appliance capabilities at Internet Access Points (IAPs). • Cyber Information Sharing Systems - (\$1.781) Procured tech refresh servers for security information manager coop environments that enable network defenders at the Defense Information System Network (DISN) perimeter and endpoints. • Cross Domain Enterprise Services (CDES) - (\$2.780) Procured tech refresh, guard solutions, enterprise file sharing, and email solution between users and devices residing on different networks. • Public Key Infrastructure (PKI) - (\$1.930) Procured Non-Person Entity (NPE) hardware and software detection capabilities for encrypting and decrypting the associated user's identity within authorized DoD Networks. • Cyber Security Range - (\$2.071) Procured HW/SW upgrades for the Cyber Security Range to emulate the new network infrastructure. • Sharkseer - (\$10.000) Supported procurement and accelerated the Sharkseer National Defense Authorization Act (NDAA) requirements. Specifically, the Joint DISA/National Security Agency (NSA) Program Management Office (PMO) identified efficiencies and integrate perimeter-endpoint defenses. Additionally, the Joint PMO developed DoD enterprise Sand-box-as-a-Service for a internet facing forensic environment and Enhanced Endpoint Analytics to track mitigations across multiple cyber defense platforms. <p>FY 2020: (\$4.718) Continue to procure software licenses and hardware/software upgrades necessary hardware for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will acquire the following capabilities:</p> <ul style="list-style-type: none"> • Network Management and Cyber Information Sharing Systems (formerly Cyber Information Sharing Systems) - (\$1.201) Will procure software licenses as a component of a security orchestration automation and response capability in support of the Security Information and Event Management (SIEM) system. • Cyber Security Range - (\$2.117) Will procure HW/SW upgrades for the Cyber Security Range to emulate the new network infrastructure. • Sharkseer - (\$1.400) Will fund the enhancement of the lab environment to allow for more rigorous testing prior to deployment in production.

Line Item MDAP/MAIS Code: N/A		
<p>Explanation of Change from FY 2019 to FY 2020: The decrease of -\$26.872 is due to completing the installation of FEDERAL Demilitarized Zone (DMZ) web proxies (-\$0.425), FED DMZ server and router upgrades (-\$1.200), and Web Content Filtering load balancers (-\$5.500), integration completion of Security Information Event Manager (SIEM) next gen hardware (-\$0.580), and transition of Perimeter Defense capabilities to Capacity as a Service (-\$4.358). Completion of Sharkseer accelerated transition, integration of sand-box-as-a-service, and migration of Enhanced Endpoint Analytics (-\$8.600). Fund transfer to DISA Defense Working Capital Fund (DWCF) to establish a DISN Capital Investment Program (CIP) for Cybersecurity (-\$6.209). Web Content Filtering, NIPRNET Federated Gateway, Zero Day Network Defense Email, and Test Lab equipment Refresh programs were eliminated.</p> <p>FY 2021: (\$17.211) Continue to procure software licenses and hardware/software upgrades necessary for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will acquire the following capabilities:</p> <ul style="list-style-type: none">• Sharksheer - (\$1.998) Will provide for Continental United States (CONUS) IAP/Sharkseer upgrades to increase bandwidth throughput from 18G to 25G.• User Activity Monitoring (UAM) - (\$6.994) Will conduct Tech Refresh for seven Combatant Commands (COCOMs) (US African Command (AFRICOM), US Central Command (CENTCOM), US European Command (EUCOM), US Southern Command (SOUTHCOM), US Special Operations Command (SOCOM), US Strategic Command (STRATCOM), and US Northern Command (NORTHCOM)) to help counter the insider threat.• Enterprise Collaborative Operational Sensors (ECOS) - (\$1.224) Will tech refresh End-of-Life ECOS sensors to provide Network Operations Analysts with data needed to protect the Defense Information System Network (DISN).• NIPRNet DoD Demilitarized Zone (NIPR DMZ) - (\$5.995) Will tech refresh Break and Inspect (B&I) at 3 IAPs.• Cross Domain Enterprise Services (CDES) - (\$1.000) Will procure Voice and Video Cross-Domain Solution (V2CDS) HW/SW to provide CDES expansion to INDOPACOM AOR to provide cross domain Voice/Video capability. <p>Explanation of Change from FY 2020 to FY 2021: The increase of +\$12.493 is due to Sharkseer upgrades to 6 CONUS IAPs (+\$0.598) to increase bandwidth from 18G to 25G; tech refresh of User Activity Monitoring (UAM) End-of-Life HW at 7 COCOMs (+\$6.994) to help counter the Insider Threat; continued tech refresh of End-of-Life ECOS sensors used to gather data used by Network Operations Analysts to protect the DISN (+\$0.066); purchase of HW/SW to tech refresh B&I at 3 IAPs (+\$5.995), and an increase due to the CDES expansion to INDOPACOM AOR (+\$1.000). This is DWR offset by a decrease of -\$2.160 in Cybersecurity Range to avoid duplication of effort with CyberCom Range that is currently under development.</p> <p>Performance Metrics:</p> <p>1. Maintain ECOS MAC III sensor availability to 98.6%; sensor recovery should be within 5 days of failure</p> <p>FY 2019 Planned 98.6% / Actual 99% FY 2020 Planned 98.6% FY 2021 Planned 98.6%</p> <p>2. Tech refresh of existing CDES systems supporting NIPR-SIPR email and file sharing in CONUS and OCONUS.</p> <p>FY 2019 Planned 1 system / Actual 0 FY 2021 Planned 1 system</p>

Description:
FY 2019 funding totals include \$3.800 appropriated for Overseas Contingency Operations.

FY 2020 funding totals include \$25.103 for Base and \$3.800 for Overseas Contingency Operations (OCO), of which \$3.800 was realigned as part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011.

Department of Defense (DoD) Teleport system is a satellite communications (SATCOM) gateway that links the deployed warfighter to the Department of Defense Information Network (DODIN). The Teleport program has fielded system capabilities incrementally using a multi-generational approach with Generation 1 and 2 Full Deployment authorized by DoD Chief Information Officer on February 18, 2011 and the DISA Component Acquisition Executive on June 7, 2012. Teleport Generation 3 consists of three phases, all of which are in the Production and Deployment acquisition phase. Each Teleport investment increases the warfighter's ability to communicate with a world-wide, net-centric set of information capabilities, which is vital for the DoD to maintain a persistent presence among its adversaries.

Currently, the Teleport system operates as an upgrade of satellite communication capabilities at selected DoD satellite communications gateways. This system provides deployed warfighters with seamless worldwide multi-band SATCOM connectivity to the Defense Information System Network (DISN) Service Delivery Nodes and legacy tactical command, control, communications, computers, and intelligence systems. It also provides centralized integration capabilities, contingency capacity, and common interfaces to access the DISN.

Teleport's goal is to provide secure, seamless, interoperable, and economical upgrades to DoD SATCOM Gateways and meet the growing throughput requirements of the deployed warfighter.

The primary beneficiaries of the Teleport investment are the DoD Combatant Commanders, Military Departments, Defense Agencies, and the warfighter. Teleport Generation 3 is designed to meet the growing demands of the warfighter through the execution of the following phases:

Phase 1: Gateway Advanced Extremely High Frequency (AEHF) [Extended Data Rate (XDR)] terminals provides tactical users with a 350% bandwidth increase in survivable, anti-jam communications through all peacetime and combat operations by installing Navy Multiband Terminals (NMT) at select Teleport sites. In addition to enhanced throughput, the NMT maintains compatibility with legacy waveforms and current tactical terminals.

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2021 Defense Information Systems Agency		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 14 / Teleport
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 1203610K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>Phase 2: Gateway Wideband Global SATCOM (WGS) X/Ka-band terminals provides enhanced WGS X/Ka capability to warfighters worldwide by installing terminals from the Modernization of Enterprise Terminal (MET) program at Teleport and other gateway sites. This gateway enhancement allows Teleport to replace end of life (EOL) Defense Satellite Communications System (DSCS) terminals while remaining interoperable with tactical WGS X/Ka-band users. The MET enhancement provides a 300% Ka-band capacity increase and an 1100% X-band capacity increase to current enterprise terminal X/Ka capabilities. Additionally, it enables the Teleport system to maintain operational availability consistent with Generation 2 requirements and reduce the overall life-cycle cost of X/Ka capabilities across the DoD.</p> <p>Phase 3: Mobile User Objective System (MUOS) to Legacy ultra high frequency (UHF) systems interoperability will provide interoperability between MUOS users and Legacy UHF users by installing MUOS-to-Legacy UHF SATCOM Gateway Component (MLGC) suites of equipment at Teleport sites. MUOS is the next generation DoD UHF SATCOM system that will provide the warfighter with modern worldwide mobile communication services, utilizing the Wideband Code Division Multiple Access waveform for use in the military UHF SATCOM band. MLGC suites will provide critical continuity and interoperability as DoD tactical satellite users transition from legacy waveforms and radios to the Joint Tactical Radio System.</p> <p>Standardized Tactical Entry Point (STEP)</p> <p>The STEP investment is driven by Combatant Command (COCOM) operational requirements validated by the Joint Chiefs of Staff and is linked with Defense Information Systems Agency (DISA) core strategic goals. STEP capabilities directly support DoD's transformational initiatives and goals by: (1) enabling effective communications for the warfighter through early implementation of Net-Centric capability; (2) enhancing the capability and survivability of space systems and supporting infrastructure; and (3) continuing to develop joint interoperable Networks and Information Integration (NII) architecture.</p> <p>The STEP program is integral for SATCOM Gateway evolution and sustainment activities in support to the deployed forces. STEP sustains the network by replacing EOL Transmission Security (TRANSEC), Communication Security (COMSEC), switches, routers, and baseband equipment. Further, DISA is able to leverage the network and equipment at these sites to support world-wide operations for Expeditionary Forces and Overseas Contingency Operations. Additionally, the STEP program supports the COCOMs Command and Control (C2) and Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) SATCOM requirements. Finally, STEP resources support the converged Gateway Architecture to ensure the network is able to keep pace with the user community requirements and capabilities as they migrate and adopt emerging technology to accommodate their respective mission needs keeping synchronized and at pace with the evolving Teleport technology architecture.</p> <p>High Speed Terminal:</p> <p>The program is performing classified work. Classified details are not included in the submission due to the level of security classification and necessity of special security clearances. Detailed information for this program is submitted separately in classified Department of Defense exhibits.</p> <p>Enterprise SATCOM Gateway System:</p> <p>The SATCOM Gateway is an enterprise system that will adhere to the Joint Information Environment (JIE) architecture, and support all DoD satellite communications requirements, to include Strategic (Presidential, Secretary of Defense (SECDEF), Secretary of State (SECSTATE), Chairman Joint Chiefs of Staff, Missile Defense Agency (MDA)) and Tactical (combatant command/services/agencies) users over satellite trunks through the DoD Information Network (DODIN). The SATCOM Gateway program will begin fielding upgrades and leverage existing SATCOM systems, which include the DSCS terminals, the Teleport and STEP tactical system capabilities. Initial efforts will define a two phase approach, with the first phase (FY16-19) upgrading 12 facilities to a converged Internet Protocol (IP) transport suites that supports the full range of Strategic and Tactical users; the second phase (FY16-23) will address the remaining 34 sites that support mainly Strategic user requirements. Each investment increases the Department's ability to communicate with a world-wide, net-centric set of information capabilities, which is vital for the DoD to maintain a persistent presence among its Strategic and coalition adversaries. This upgrade will standardize satellite communication capabilities at all DoD satellite communications gateways. This system provides Strategic National leaders and deployed warfighters with seamless worldwide multi-band SATCOM connectivity to the DISN Service Delivery Nodes, legacy tactical command, control, communications, computers, intelligence systems and transport to specific special user enclaves.</p> <p>Our Nation's Senior Leaders, Combatant Commanders, Military Departments, Defense Agencies, and other special users will all benefit from this SATCOM Gateway.</p> <p>Integrate Waveform (IW):</p>

<p>Justification:</p> <p>FY 2019: (\$17.211) Teleport GEN 1/2: DoD Teleport replaced EOL equipment and field enhancement at Teleport SATCOM sites. This funding was also used to address performance, cyber, and maintainability issues for fielded Teleport Systems by installing, integrating, and fielding next generation technologies.</p> <p>FY 2020: (\$13.324): Teleport GEN 1/2: DoD Teleport will replace EOL equipment and field enhancement at Teleport SATCOM sites. This funding will also be used to support integration, maintenance, and security test activities for fielded enhancements.</p> <p>Explanation of change from FY 2019 to FY 2020: The decrease of -\$3.887 between FY 2019 and FY 2020 is due to a reduced number of baseband devices/equipment planned to be replaced as part of component life cycle replacement.</p> <p>FY 2021: (\$0.000): Teleport GEN 1/2:</p> <p>Explanation of change from FY 2020 to FY 2021: The decrease of -\$13.324 between FY 2020 and FY 2021 is due to the realignment of funding to a consolidated DoD Teleport Technology Refresh/Technology Insertion line item starting in FY 2021 to support all Generations of the DoD Teleport Program.</p> <p>Performance Metrics:</p> <p>Generation 1/2 Metric</p> <p>Percentage of Teleport and Gateway critical end of life/end of service issues mitigated.</p> <p>FY 2019 100% Planned / 100% Actual</p> <p>FY 2020 40% Planned</p> <p>Percentage of system changes resulting in interoperability certification</p> <p>FY 2019 100% Planned / 100% Actual</p>

<p>FY 2020 100% Planned</p> <p>Generation 3 Cost and Schedule Performance Metrics:</p> <p>Teleport manages and tracks its cost and schedule performance parameters using a tailored Earned Value Management System (EVMS) process, integrating the program plan, the program schedule, Work Breakdown Structure (WBS), and financial data. Progress is monitored/documented monthly showing percentages complete for schedule and cost. Formal updates with changes to the schedule are documented against the program baseline.</p> <p>FY 2019: (\$2.991): Teleport Generation 3: DoD Teleport completed the installation of a Modernization Enterprise Terminal (MET) in the CENTCOM AOR and procured Generation Three Phase 2 baseband equipment for additional capabilities in the PACOM AOR.</p> <p>FY 2020: (\$0.000): Teleport Generation 3:</p> <p>Explanation of change from FY 2019 to FY 2020: The decrease of -\$2.991 between FY 2019 and FY 2020 is due to completion of Generation Three Phase 2 Modernization Enterprise Terminal (MET) installations and baseband equipment procurement.</p> <p>Generation 3 Program Metrics:</p> <p>Across appropriations, performance metrics have been established in four measurement areas: 1) customer results, 2) mission and business results, 3) processes and activities, and 4) technology. Specific measurement indicators and units of measure vary by measurement area, and metrics in each of the aforementioned areas are measured annually. Teleport will use the same measurement areas for performance metrics in FY 2019.</p> <p>Generation 3 Metric Generation 3 Phase 1 operationally capable NMT terminals FY 2019 18 Operational/18 Total Planned; 18 Actual</p> <p>Number of Generation 3 Phase 2 operationally capable MET terminals FY 2019 11 Operational/13 Total Planned; 10 Actual</p> <p>Number of Generation 3 Phase 3 Teleport with operationally capable MLGC systems FY 2019 0 Operational/5 Total Planned; 0 Actual</p> <p>DoD Teleport Technology Refresh/Technology Insertion</p> <p>FY 2021: (\$14.193): DoD Teleport Technology Refresh/Technology Insertion: DoD Teleport will replace end-of-life (EOL) equipment and field enhancement at Teleport SATCOM sites. Major efforts include the replacement of EOL Hub Line Cards. This funding will also address performance, cyber, and maintainability issues for fielded Teleport Systems by installing, integrating, and fielding next generation technologies.</p> <p>Explanation of change from FY 2020 to FY 2021: The increase of +\$14.193 between FY 2020 and FY 2021 represents the realignment of funding from Generation 1/2 starting in FY 2021. The increase in funding (+\$0.869) will be used to address performance, cyber, and maintainability issues for fielded Teleport Systems by installing, integrating, and fielding next generation technologies.</p> <p>DoD Teleport Technology Refresh/Technology Insertion Performance Metrics:</p>

<p>Percentage of Teleport and Gateway critical end of life/end of service issues mitigated FY 2021 65% Planned</p> <p>Percentage of system changes resulting in interoperability certification FY 2021 100% Planned</p> <p>STEP</p> <p>FY 2019: (\$1.388) Provided technology enhancements to meet IP requirements at 4 DoD Gateways in support of the Enhanced SATCOM Gateway Architecture.</p> <p>FY 2020: (\$1.146) Will continue technology enhancements of the SATCOM Gateways to meet increased IP mission requirements at 3 DoD SATCOM Gateways.</p> <p>Explanation of change from FY 2019 to FY 2020: The decrease of -\$0.242 between FY 2019 and FY 2020 is due to a 50% reduction (from 16 to 8) in the number of spare remote modems required to support IP training at Ft Gordon.</p> <p>FY 2021: (\$1.173) Will continue technology enhancements of the SATCOM Gateways to meet increased IP mission requirements at 2 DoD SATCOM Gateways.</p> <p>Explanation of change from FY 2020 to FY 2021: The increase of +\$0.027 between FY 2020 and FY 2021 is due to additional cost for spares supporting the deployed terminals, tech refresh (including spares) of earlier deployed equipment, and additional cost for equipment to support the 10 gigabits per second (GBS) throughput for DODIN.</p> <p>FY 2019 OCO: (\$3.800) Provided technology enhancements to meet IP requirements and the implementation of IP routers at 1 DoD Gateway.</p> <p>FY 2020 OCO: (\$3.800) Will continue technology enhancements to meet IP requirements and the implementation of IP routers at 1 DoD Gateway.</p> <p>Explanation of change from FY 2019 to FY 2020: There is no change.</p> <p>FY 2021 OCO: (\$0.000)</p> <p>Explanation of change from FY 2020 to FY 2021: The decrease of -\$3.800 between FY 2020 and FY 2021 is due to reduction of engineering and installation support for the SATCOM Gateways.</p> <p>STEP Performance Metrics:</p> <p>Schedule, performance, and customer satisfaction measures are compiled as a real-time barometer to measure how well STEP is satisfying the needs of present customers, and to predict success in meeting future STEP objectives. The nature of this compiled data permits objective assessments and predictions on the quality and reliability of STEP support to its customers (e.g., availability and reliability of the STEP system). Availability: Probability that STEP resources are operable or usable to perform its designated or required function (ratio of time the system is functional). No more than 8 hours, 45 minutes, and 36 seconds of downtime or service interruptions per site per year. Reliability: Probability that STEP will accurately perform its specified task under stated environmental conditions (ability of the system to perform consistently to its design). Standard: No more than 8 hours, 45 minutes, and 36 seconds of system downtime or service interruptions per site per year.</p> <p>Specific Performance Metrics:</p>

Integrated Waveform (IW) FY 2020: (\$9.000): Will procure and install software updates for Ultra High Frequency (UHF) IW radios for six operational gateways.		
Explanation of change from FY 2019 to FY 2020: The increase of +\$9.000 is attributed to the initial procurement and installation of software updates to UHF IW radios at six operational gateways.		
FY 2021: (\$12.440): Will complete IW software upgrades of the existing UHF systems at 6 SATCOM gateways. Procure UHF SATCOM hardware for a new gateway site currently without UHF capabilities and begin site preparations. Procure 8 MLGC suites for allied support and expansion of US-only capabilities.		
Explanation of change from FY 2020 to FY 2021: The increase of +\$3.440 is due to the procurement of 8 U.S. Expansion and Allied MLGC suites (+\$4.190). This increase is partially offset by the realignment of - \$0.750 from UHF Integrated Waveform and Allied MLGC/MUOS Voice Gateway (MVG) procurement to fund operational and sustainment requirements.		
IW Performance Metrics:		
UHF IW-Capable Sites FY 2020 3 Operational / 3 Total Planned FY 2021 6 Operational / 7 Total Planned

<p>Description:</p> <p>JFHQ-DODIN's mission is to exercise command and control (C2) of DODIN Operations and Defensive Cyberspace Operations – Internal Defensive Measures (DCO-IDM) globally in order to synchronize the protection of DoD components' capabilities to enable power projection and freedom of action across all warfighting domains. The full mission scope of the JFHQ-DODIN includes: the critical daily requirement to protect the DODIN, C2 of all DoD cyber entities, a mature joint headquarters, management of requirements for global engagement, and the capability to assess the readiness of the DODIN against mission critical Combatant Command requirements.</p> <p>JFHQ-DODIN provides unity of command between United States Cyber Command (USCYBERCOM) and subordinate headquarters and unity of effort with all other DoD Components in order to ensure the DODIN is available and secure for Joint missions, to include effects delivered in and through cyberspace, and to ensure that the readiness posture of the DODIN is known.</p> <p>Justification:</p> <p>FY 2021: (\$3.091) - Will procure Cyber Threat emulation system and tools for DODIN inspections across 43 Areas of Operation (AOs), and JFHQ-DODIN Operations Center technology enhancements (Joint Worldwide Intelligence Communications System (JWICS), Non-classified Internet Protocol Router Network (NIPR) and Secret Internet Protocol Router Network (SIPR) systems) for 24/7 DODIN Operations and Defensive Cyber operations-Internal Defensive Measures. Joint Defense Operations Center (JDOC) functions enabled real-time situation monitoring of ongoing operations across the DODIN Joint Operations Area (JOA) and a unity of command between USCYBERCOM, subordinate headquarters and mission partners..</p> <p>Explanation of Change from FY 2020 to FY 2021: The increase of +\$3.091 between FY 2020 and FY 2021 is for the initial procurement of servers, storage space, network equipment, workstations, operating software and threat emulation tools to establish an initial isolated Threat emulation testing system to develop and test informed threat packages for utilization of DODIN inspection, as well procurement of workstations, communication devices, network devices and collaboration capabilities for JFHQ-DODIN 24/7 Operations Center.</p> <p>Performance Metrics:</p> <p>Continuity of Operations (COOP): Transportable Communications Capability (TCC)</p> <p>FY 2021: 75% of mission critical functions restored within 12 hours (Federally mandated time frame) (Planned)</p>

Description:												
White House Situation Support Staff (WHSSS):												
<p>WHSSS provides classified communications, computer, and intelligence for the White House Situation Room, the National Security Staff, and other White House offices. WHSSS delivers the ability to meet and maintain a rate of 99.99% reliable telecommunications and information services through state-of-the-art equipment and technology, at the best possible price to the public.</p> <p>FY 2019: (\$8.810) Upgraded and secured critical systems that support classified voice, data and video used in the White House Situation Room and throughout the National Security Council (NSC) for the President, Vice President, White House Senior Staff, Executive Office of the President and the inter-agency as directed by the Assistant to the President for National Security Affairs. These systems are also used at White House Continuity of Operations (COOP) and Continuity of Government (COG) locations, Trip Sites and residences. Also, funding supported costs associated with increased NSC mission requirements related to the Presidential Information Technology Community (PITC) initiative.</p> <p>FY 2020: (\$9.081) Will continue to upgrade and secure critical systems that support classified voice, data and video used in the White House Situation Room and throughout the NSC for the President, Vice President, White House Senior Staff, Executive Office of the President and the inter-agency as directed by the Assistant to the President for National Security Affairs. These systems are also used at White House COOP and COG locations, Trip Sites and residences. Also, funding will continue to support costs associated with increased NSC mission requirements related to the Presidential Information Technology Community (PITC) initiative.</p> <p>Explanation of change from FY 2019 to FY 2020: The increase of +0.271 from FY 2019 to FY 2020 is due to anticipated increase in cost for equipment supporting PITC IT network infrastructure requirements.</p> <p>FY 2021: (\$8.427) Will continue to upgrade the White House secure critical IT systems infrastructure that supports the classified voice, data, and video networks supporting the President, Vice President, White House Senior Staff, Executive Office of the President and the inter-agencies as directed by the Assistant to the President of National Security Affairs. These systems are also used at White House COOP and COG locations, trip sites, and residences.</p> <p>Explanation of change from FY 2020 to FY 2021: The decrease of -\$0.654 from FY 2020 to FY 2021 is due to realignment of funds to Operations and Maintenance (O&M) to provide sustainment to procured classified IT Network infrastructure.</p>

Description:

DISA provides a portfolio of services that includes legacy capabilities delivered by the Net-Centric Enterprise Services (NCES) Program supporting a resilient and flexible infrastructure that enables a collaborative environment for secure information sharing across the Department of Defense (DoD). These critical warfighter, Business, and Intelligence Mission Area services enable more than two million authorized DoD users to collaborate across the Combatant Commands (COCOMs)/Services/Joint Staff/Agency/Mission Partners using a suite of web-accessible services. The portfolio also includes the DoD Visitor service that transitioned from a Government developed service to a Commercial-Off-the-Shelf annual right-to-use licensed service operating on domain controllers throughout the DoD. This service allows personnel to "go anywhere within the DoD, login, and be productive". It includes the privilege management Authentication Gateway Services (AGS) and the DoD Enterprise Portal Service. The AGS is integrated with the Identity and Access Management services supporting brokered Public Key Infrastructure (PKI) authentication for DoD applications without a native PKI authentication capability. The DoD Enterprise Portal Service provides users with a flexible web-based hosting solution to create and manage mission, community, organization, and user focused sites. The individual suite of capabilities within the portfolio of services provides the user with the flexibility to couple the services in varying ways to support their mission needs. This flexibility provides unprecedented secure access to web and application content, critical imagery, intelligence and warfighter information from anywhere, at any time, on any DoD authorized device. The portfolio of enterprise services delivers tangible benefits to the Department by providing capabilities that are applied by the US Forces, Coalition forces, and Allied forces to support full spectrum joint and expeditionary campaign operations. These enabling benefits include the ability to:

- Enhance collaborative decision-making processes
- Improve information sharing and integrated situational awareness
- Share and exchange knowledge and services between enterprise units and commands
- Share and exchange information between previously unreachable and unconnected sources
- Schedule and coordinate meetings with people across the DoD Components
- "Go anywhere in the DoD, login, and be productive"
- Create and manage mission, community, organization, and user-focused sites from global locations
- Exchange knowledge to enable situational awareness, determine the effects desired, select a course of action, the forces to execute it, and accurately assess the effects of that action

The portfolio contains capabilities that are also key enablers to the Defense Information Systems Agency's (DISA) mission of providing a global net-centric enterprise infrastructure in direct support of joint Warfighter, National level leaders, and other mission and coalition partners across the full spectrum of operations.

<p>Description:</p> <p>FY 2020 funding totals include \$17.574 for Base and \$12.000 for Overseas Contingency Operations (OCO), of which \$12.000 was realigned as part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011.</p> <p>FY 2021 funding totals include \$26.978 for Base and \$6.120 for Overseas Contingency Operations (OCO), of which \$6.120 was realigned as part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011.</p> <p>Defense Information Systems Network (DISN) is the Department of Defense's (DoD's) consolidated worldwide telecommunications infrastructure that provides end-to-end information transport for DoD operations to the warfighters and the Combatant Commanders with a robust Command, Control, Communications, Computers and Intelligence information long-haul transport infrastructure. The DISN, seamlessly spanning full spectrum from terrestrial to space and strategic to tactical domains, provides the interoperable telecommunications connectivity and value-added services required to plan, implement, and support all operational missions, anytime, and anywhere pushing DISN services to the edge of the communications network. The DISN delivers an integrated platform consisting of DoD's core communications, computing, and information services as well as integrating terrestrial, wireless, and satellite communications into a network cloud that is survivable and dynamically scalable. Procurement funding primarily supports the Technology Refreshment (TR); Joint Worldwide Intelligence Communications System (JWICS); National Emergency Action Decision Network (NEADN)/Presidential and National Voice Conferencing (PNVC); the Enhanced Pentagon Capability (EPC)/Survivable Emergency Conferencing Network (SECN); DoD Mobility; and a significant satellite communications extension of the DISN. The procurement funding enables the DISN to remain technologically up-to date and capable by achieving the best possible balance between network performance and network cost through a process known as network optimization.</p>

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 (\$160.100)

JWICS: (\$5.614) - Supported deployment of JWICS transport core-lite nodes worldwide to assure delivery of JWICS transport core services to JWICS edge users in multiple Areas Of Responsibility (AORs) globally. Also, supported retirement of legacy JWICS core capabilities at locations in Continental United States (CONUS), US European Command (EUCOM) and US Pacific (PACOM) AORs as services migrated over to transport core. Included the continuation of engineering efforts to ensure delivery of service to edge locations via Joint Information Environment (JIE) and retirement of legacy Time-Division Multiplexing (TDM) paths to realize programmatic cost savings provided by Carrier Ethernet / Converged IP transport. The hardware that was procured to satisfy these efforts were a combination of Cisco and Juniper products along with various model lines of COMSEC products.

Tech Refresh: (\$150.017) - Purchased and installed End-of-Life (EOL) replacement and upgrades throughout the DISN. Convergence activities at multiple layers eliminating the need for a one-to-one TR of all components but rather TR at service and capability layers. Investment goals included IP Optimization, Legacy technology elimination and DISN enhancements to ensure a survivable infrastructure. The key efforts included: Timing & Synchronization of the Packet based IP networks and OPTICAL/Transport Network (OTN) systems, Internet Access Point (IAP), Next Generation Optical (formerly known as Packet Optical Transport Network (P/OTN) Layer), Operations Support System (OSS) Refresh, Multi-Protocol Label Switching (MPLS), Voice Internet Service Provider (ISP), Warehouse Support (formerly known as Logistics Support), SIPRNet Access Migration (formerly known as Communication Security (COMSEC Refresh)), Transmission Security (TRANSEC) (formerly known as COMSEC Refresh), and Next Generation Access Transport (formerly Optical Refresh Multi-service Provisioning Platform (MSPP)), SIPRNET Refresh (Endpoint Security Solutions (ESS), Advanced Crypto Compliant (ACC) Compliance) (formerly known as COMSEC Refresh), Software Defined Networking (formerly Rapid Provisioning), Combatant Command (COCOM) Infrastructure Resiliency and DISN Service Delivery Node Resiliency.

EPC/SECN: (\$1.455) - Procured additional equipment to complete SECN digitization, for Advanced Extremely High Frequency (AEHF) Satellite Communication (SATCOM) interfaces implementation, and upgrades for EOL conferencing operator consoles. SECN Digitization was designed to improve voice quality and facilitate the transition from Military Strategic, Tactical & Relay (MILSTAR) to AEHF SATCOM by allowing the transition of SECN to PNVC-developed Baseband Interface Group (BIG) in advance of full PNVC implementation. The specialized operator consoles used to initiate and control the secure voice conference of EPC, SECN and eventually PNVC, are PC-based and require periodic hardware and software tech refresh. New conferencing operator consoles were procured and installed at EPC/SECN sites.

PNVC: (\$1.386) - Installation of PNVC equipment suites at the fixed sites continues according to a prioritized order. Spares of each equipment type were purchased to ensure the correct quantities maintain the fielded equipment. PNVC baseband suites and the required High Altitude Electromagnetic Pulse (HEMP) hardened Base Band Kit (BBK) enclosures were purchased for fourteen special users.

Exhibit P-40, Budget Line Item Justification: PB 2021 Defense Information Systems Agency		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 18 / Defense Information System Network
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303126K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>ISR Transport Services: (\$1.628) - Installed the Ku-band Spread Spectrum (KuSS) multi-band hub at selected SATCOM sites based on selected prioritized list. Spares were purchased and stored on-site to preclude delays in shipping and to ensure high mission availability. Training, at the time of installation and prior to hub and terminal activation, was provided.</p> <p>FY 2020 (\$29.574)</p> <p>JWICS: (\$6.464) - Will continue to support the deployment of JWICS transport edge nodes worldwide to assure delivery of JWICS enterprise services in multiple AORs globally. Also will support retirement of legacy JWICS core capabilities at locations in CONUS, EUCOM and PACOM AORs as services migrate over to the new infrastructure. Includes the continuation of engineering efforts to ensure delivery of service to edge locations via JIE and retirement of legacy TDM paths to realize programmatic cost savings provided by Carrier Ethernet/Converged IP transport.</p> <p>Tech Refresh: (\$3.000) - Will continue to purchase and install EOL replacement and upgrades throughout the DISN for DRSN and DNS related efforts. Convergence activities will continue at multiple layers eliminating the need for a one to one TR of all components but rather TR at service and capability layers. Investment goals include IP Optimization, Legacy technology elimination and DISN enhancements to ensure a survivable infrastructure.</p> <p>EPC/SECN: (\$1.590) - Will procure additional equipment to complete SECN digitization, for (AEHF) SATCOM interfaces implementation, and upgrades for EOL conferencing operator consoles. SECN Digitization is designed to improve voice quality and facilitate the transition from Military Strategic, Tactical & Relay (MILSTAR) to AEHF SATCOM by allowing the transition of SECN to PNVC-developed Baseband Interface Group (BIG) in advance of full PNVC implementation. The specialized operator consoles used to initiate and control the secure voice conference of EPC, SECN and eventually PNVC, are PC-based and require periodic hardware and software tech refresh. New conferencing operator consoles will be procured and installed at EPC/SECN sites.</p> <p>ISR Transport Services: (\$6.520) - Will continue the installation of the KuSS multi-band hub at selected SATCOM sites based on selected prioritized list. Spares will also be purchased and stored on-site to preclude delays in shipping and to ensure high mission availability. Training, at the time of installation and prior to hub and terminal activation, will also be provided. Also, funds will procure and field UVDS platform for PACOM support.</p> <p>ISR Transport Services OCO: (\$12.000) - Will procure and install equipment (modems/terminals) to support the enhanced Airborne Intelligence, Surveillance, and Reconnaissance (AISR) data transport for operational and tactical users.</p> <p>Explanation of Change from FY 2019 to FY 2020: The decrease of -\$130.526 from FY 2019 to FY 2020 is due to the functional transfer to DISA Defense Working Capital Fund (DWCF) to establish a DISN Capital Investment (CIP) for DISN investment (-\$130.728), DISN Survivable Networking and DISN IP Optimization resulting from the completion of installation activities addressing network resiliency at two COCOMs (-\$5.384), decrease in PNVC due to the transfer to the Air Force (-\$1.386) and a decrease due to the completion of UVDS platform (-\$1.628) . Also, decrease is due to the reduction in hardware required to replace end of support hardware that is currently online (-\$0.629), additional decreases in ISR Transport is attributed to reduced equipment costs (-\$0.108), and decrease in one-time funding for TR of Continuity of Operations Plan (COOP) equipment (-\$3.648). The decrease is offset by an increase in JWICS due to the continuing growth of technical debt caused by the aging of network equipment including routers, switches, and encryption devices and the need to replace these devices (+\$0.850), an increase in EPC/SECN for additional spare Secure Voice Conferencing Equipment to support SECN digitization (+ \$0.135), and an increase of ISR Transport Services OCO (+\$12.000) as part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011. This funding transferred from Line Item Number DISN (DISN OCO).</p> <p>FY 2021 (\$33.098)</p> <p>JWICS: (\$7.941) - Will procure and install capabilities in support 7.0 rollout, which includes crypto and routing hardware upgrades.</p> <p>Tech Refresh: (\$2.998) - Will continue to purchase and install EOL replacement and upgrades throughout the DISN for DRSN and DNS related efforts. Convergence activities will continue at multiple layers eliminating the need for a one to one TR of all components but rather TR at service and capability layers. Investment goals include IP Optimization, Legacy technology elimination and DISN enhancements to ensure a survivable infrastructure.</p>

Description:

The White House Communication Agency (WHCA) provides assured voice, video, and data information services to the President of the United States (POTUS), Vice President of the United States (VPOTUS), White House Staff, National Security Staff (NSS), US Secret Service (USSS), and others as directed by the White House Military Office (WHMO). The WHMO also directs the WHCA to serve as the Information Technology (IT) provider to the WHMO enterprise of customers, to include Presidential Airlift Group/Air Force One, Marine One, Camp David, White House Transportation Agency, White House Presidential Mess, White House Medical Unit, military aides, and others within WHMO. WHCA must balance the integration of innovative and customer-desired technologies with the ability to operate on-demand within any environment from normal to emergency conditions. WHCA will continue to provide command and control capabilities to the President and senior national leaders while integrating technology and innovation to transform the President's multiple communication capabilities and information sharing domains into one integrated, seamless environment of unified capabilities.

Along with supporting all POTUS/VPOTUS/First Lady of the United States (FLOTUS) travel both within the continental United States and overseas, WHCA maintains a physical communications infrastructure at the White House, the Naval Observatory, Camp David, Presidential and Vice Presidential Second Residences, and numerous classified facilities. WHCA operates and maintains a radio infrastructure in the National Capital Region, from Camp David to Quantico, providing network coverage for the USSS, Presidential Helicopter Squadron, and the Presidential Airlift Group.

Justification:

FY 2019 (\$94.201). WHCA's Presidential Service Strategy 2022 (PSS 2022) updated WHCA's Presidential Communications Vision 2020 (PCV 2020) to reflect capability achievements made in mobility, cybersecurity, retirement of legacy technologies, and other modernization efforts to improve the White House's ability to develop and implement national level policy on a day to day basis and during crisis using the National Leadership Command Capabilities (NLCC) infrastructure. Efforts included strategic enterprise level initiatives required by the White House Director of Information Technology (D/WHIT) for unified services enabled by converging network and service infrastructures and business practices. Some of WHCA's portfolios have changed to better represent service capabilities, improve mission alignment, and identify traceability of initiatives to new modernization efforts advanced in WHCA's Presidential Service Strategy. WHCA's PSS 2022 was the central theme of WHCA's Strategic Plan and approach for transformational modernization and innovation to ensure POTUS and VPOTUS can communicate anywhere, anytime, by any means with anyone in the world. PSS 2022 was WHCA's means to achieve targeted architectures comprised of mobile IP solutions enabling unified capabilities and seamless services for information sharing and communications including: Presidential Travel Services Modernization; Senior Leader Communications, Command and Control; Mobility; Cyber Resilience; Network Infrastructure Convergence; Next Generation Networking; High Definition Broadcast Services; and, enterprise collaboration capabilities for personnel supporting Presidential events. WHCA strategically managed IT capabilities within five service portfolios: Senior Leader Communications, Enterprise IT, Broadcast and Audio Visual, Transport, and Deployable Services. The PSS was organized around these service portfolios to align WHCA's strategy, vision, and future capabilities with planned initiatives to ensure future success.

Broadcast and Audio Visual Services: (\$5.437) Evolved broadcast studio capabilities and strategies for unified communications, increased bandwidth, on-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Implemented Next Generation broadcast event production and support systems; leveraged smart tagging techniques for global access and search; modernized and automated the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use. Provided multimedia services and production products to government, news, and other organizations for recording events, providing historical records, and custom broadcast products and services of the POTUS, VPOTUS, and other leaders as designated. Services and focus areas within this portfolio are Audio Visual System Support, Broadcast Production, Presidential Broadcast Archive, and Multi-Media Production. Embraced mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization continued to fulfill capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.

Transport Services: (\$6.661) Leveraged and acquired emerging network transport and satellite communication (SATCOM) technologies to build out a MLS backbone supporting secure unified communications and high speed assured transport; and evaluated DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Deployed the Presidential Transport Network (PTN) as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending Presidential Information Technology Community (PITC) Enterprise IT services to customers. Adopted emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continued to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.

Senior Leader Communications: (\$28.630) Applied a multi-phased data cloud solution, incorporated DISA Enterprise Services where possible, that supported the PITC and mobile users during Presidential events. Evolved and consolidated WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Continued to provide storage, virtualization, and collaborative tools to WHMO/WHCA. Adopted DoD Senior National Leadership Command and Control Communications recommendations for assured communications that met WHCA's Primary Alternate Contingency Emergency communications requirements including CONOPS, and COG. Provided reliable, secure, and modern Senior Leader Communication capabilities that enabled timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the NLCC infrastructure. Provided national level classified conferencing and continuity of support for the President whether in a permanent or temporary location, using ground transportation, or while aboard fixed-wing and rotary-wing aircraft. Leveraged new commercial solutions

<p>for new or enhanced capabilities including PUMC that linked key vehicles in the Motorcade into a mobile Voice Video, and Visualization, Virtual Personal Assistant, post Zero Day recovery, and next generation networking. Provided replacement of motorcade communication vehicles that provided 24/7 Command and Control (C2) communications to the POTUS when not on White House grounds (UHF SATCOM), VHF line of Sight to the Limo, and transport infrastructure for classified mobile devices for Senior Level POTUS officials and the Military Aid. Established of a Mobile Ad-Hoc Network (MANET) that provided lightweight and robust mobile networking capabilities that can be deployed as a temporary service for the POTUS and VPOTUS within any forward deployed environment. MANET included the use of emerging government solutions including PUMA, PITC Trip Kit, and Presidential Transport Network, employing service bonding and persistence technologies riding SATCOM, Government or Commercial services.</p>		
<p>Enterprise IT (EIT): (\$44.761) Refined defense solutions, personnel, techniques, and best practices to defend, detect, and mitigate cyber-based threats throughout the PITC infrastructure via a PDSA "Zero Trust" that enabled WHCA critical systems to defend against modern, large scale, remote attacks. Replaced end-of-life encryption equipment and software for existing operations of all voice, video, data and transport systems. Delivered reliable, secure, and modern digital services architecture and mobile information sharing environment that employed best-in-class security and innovative business applications. Upgraded WHCA's telecommunications infrastructure to support multiple WHMO/WHCA facilities to include Camp David. Supported the WHMO/WHCA's consolidation of infrastructure and communications capabilities that provided unified operations and seamless SA, COP and C2 capabilities. Implemented IT Service Delivery best practices that met or exceeded service levels agreements; and, postured the PITC network to enable WHCA customers to serve effectively by frequently introducing new digital capabilities and anticipating future data and bandwidth demands. Transitioned to Cloud Services providing a single, consolidated network service infrastructure for all members of the PITC including: Long-term storage; phased migration and synchronization capability for infrastructure, accounts, and software; High availability and gaunt tolerance within the same site and across data centers; and, service resilience and disaster recovery.</p>		
<p>Deployable Services: (\$8.712) Evolved field smart, secure mobile, wireless devices and technologies that provided mobile users with next generation portable communication capabilities and platforms. Conducted technology and engineering assessments with the intent of integrating best of breed COTS products that supported the implementation of on-demand service delivery options for all mobile and airborne platforms. Provided rapidly configurable travel systems and mobile vehicle capabilities for the White House, and others as directed. These capabilities mirrored high end commercially available solutions that met customers' requirements for security and high availability of services. Provided a modular system that managed the lifecycle of systems, equipment, and devices and tracks their deployment to mission locations and replenish equipment and service devices.</p>		
FY 2020 (\$45.079)		
<p>Broadcast and Audio Visual Services: (\$5.546) Will continue to evolve broadcast studio capabilities and strategies for unified communications, increased bandwidth, on-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Will continue to implement Next Generation broadcast event production and support systems; will continue to leverage smart tagging techniques for global access and search; modernize and automate the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use. Will provide multimedia services and production products to government, news, and other organizations for recording events, providing historical records, and custom broadcast products and services of the POTUS, VPOTUS, and other leaders as designated. Services and focus areas within this portfolio are Audio Visual System Support, Broadcast Production, Presidential Broadcast Archive, and Multi-Media Production. Will continue to embrace mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization will continue to fulfil capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.</p>		
<p>Transport Services: (\$6.794) Will continue to leverage and acquire emerging network transport and SATCOM technologies to build out a MLS backbone supporting secure unified communications and high speed assured transport; and evaluate DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Will deploy the PTN as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending PITC Enterprise IT services to customers. Will adopt emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continues to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.</p>		
<p>Senior Leader Communications: (\$11.892) Will continue to apply a multi phased data cloud solution, incorporating DISA Enterprise Services where possible, that supports the PITC and mobile users during Presidential events. Will continue to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Continues to provide storage, virtualization, and collaborative tools to WHMO/WHCA. Continues to adopt DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency communications requirements including CONOPS, and COG. Will provide reliable, secure, and modern Senior Leader Communication capabilities that enable timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the NLCC infrastructure.</p>

Broadcast Archive, and Multi-Media Production. Continues to embrace mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization will continue to fulfill capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.		
Transport Services: (\$6.929) Transport services will provide global, point-to-point connectivity between broadly located mission partners over a choice of technologies: Satellite or Synchronous Optical Network (SONET) Wide Area Network (WAN). This service is a mix of government-owned and commercially-leased, secure and highly available enclave of circuits or satellite systems for the purpose of supporting Senior National Leadership for day-to-day and Emergency Actions. Leverage and acquire emerging network transport and SATCOM technologies to build out a MLS backbone supporting secure unified communications and high speed assured transport; and evaluate DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Will deploy the PTN as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending PITC Enterprise IT services to customers. Adopt emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continues to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.		
Senior Leader Communications: (\$10.310) WHCA will provide telecommunication, Command and Control, and messaging services to the President, Vice President, and NSS, WHMO leadership, USSS and other designated senior national leaders. In support, WHCA will operate three 24-7 customer support and call centers that provide secure teleconferencing, videoconferencing, radio communications, and customer support using assured, dedicated, and independent infrastructure and systems. Will continue to apply enhancements to provide a secure private data cloud solution, while looking for opportunities to incorporate DISA Enterprise and commercial cloud services that supports the PITC and mobile users with assured, secure and resilient Presidential infrastructure and events in a fixed and mobile environments. Continue to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Continue to provide storage, virtualization, and collaborative tools to WHMO/WHCA. Continue to adopt DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency communications requirements including CONOPS, and COG. Provide reliable, secure, and modern Senior Leader Communication capabilities that enable timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the NLCC infrastructure. Will provide national level classified conferencing and continuity of support for the President whether in a permanent or temporary location, using ground transportation, or while aboard fixed-wing and rotary-wing aircraft. Leverage new commercial solutions for new or enhanced capabilities including PUMC that will link key vehicles in the Motorcade into a mobile Voice Video, and Visualization, Virtual Personal Assistant, post Zero Day recovery, and next generation networking. Provide replacement of motorcade communication vehicles that provide 24/7 C2 communications to the POTUS when not on White House grounds (UHF SATCOM), VHF line of sight to the Limo, and transport infrastructure for classified mobile devices for Senior Level POTUS officials and the Military Aid, Senior Leader Conferencing voice, video, and visualization, Commercial Solutions for Classified (CSfC), Type-1 Encryption on a Chip, Multi-Level Security in Mobile Devices, voice, visualization and video teleconferencing, Motorcade as a Network with seamless wireless/wired transitions, Virtual Personal Assistants, Motorcade Bandwidth Expansion, First Net, MUOS, 5G, Free Space Optics, AEHF Satellite Communications, Red Switch IP Modernization, Multi-Level Security in Mobile Devices, Land Mobile Radio (LMR), UHF over Long-Term Evolution (LTE), Commercial and MIL satellite systems, Radio over IP Technologies, and Head of State expansion, contraction and technical enhancements.		
Enterprise IT (EIT): (\$12.201) The WHCA Enterprise IT Services will deliver a reliable, secure, and modern network infrastructure and digital services ecosystem to enable a responsive and mobile PITC environment by employing modern best-in-class security and innovative business applications that enhance our customers' ability to serve the American public. The WHCA will evolve the PITC through continuance enhancements and implementation of common network services, operational rules, standardize its customer desktop and mobile products, evaluate and consolidate software applications. The PITC will continuously improve its customer service and executive support services as it strives to deliver more efficient converged unclassified digital services. As the PITC customer digital services footprint expands, WHCA will ensure the highest state of readiness and availability of those services. WHCA will continue to evolve and implement a Digital Services Assurance strategy that integrates PITC operation centers into a single cohesive entity that detects, analyzes and responds to network events and incidents. WHCA will also provide the cyber resiliency necessary to effectively withstand attacks and efficiently recover from a post cyber network incident environment.		
Deployable Services: (\$9.064) The WHCA Deployable Services will provide rapidly configurable travel systems and mobile vehicle services for our PITC and Senior Leader customers that mirror high-end commercially available solutions and meet our customer security and high availability needs by continuously evaluating and interactively deploying executive support industry capability advances. This portfolio converges the other four into a travel service portfolio. Services and focus areas within this portfolio include Presidential travel missions, support within secondary residences, support in temporary locations and events, and support coverage while on the move. Evolves field smart, secure mobile, wireless devices and technologies to provide mobile users with next generation portable communication capabilities and platforms. Conduct technology and engineering assessments with the intent of integrating best of breed COTS products to support the implementation of on-demand service delivery options for all mobile and airborne platforms. Provide rapidly configurable travel systems and mobile vehicle capabilities for the White House, and others as directed. These capabilities mirror high-end commercially available solutions

that meet customers' requirements for security and high availability of services. Provide a modular system that manages the lifecycle of systems, equipment, and devices and tracks their deployment to mission locations and replenish equipment and service devices.		
Change from FY 2020 to FY 2021: The decrease of -\$0.918 from FY 2020 to FY 2021 is due to completion of White House Voice Network audio conferencing bridge capabilities that replaced end-of-life systems to a redundant, robust IP-based system within the Senior Leader Communications portfolio (-\$1.582). Decreases are offset by an increase of +\$0.664 due to modernization of systems, equipment, and devices fulfilling capability gaps providing next generation solutions.		
Performance Metrics:		
Broadcast and Audio Visual (BAV) Services Portfolio goal (FY 2019 - FY 2021): Provide broadcast quality video documentation and live streaming of all official activities of the POTUS for National Archives at a 99.99% success rate.		
• Master Control COOP - Optimize Master Control COOP and storage capabilities FY19 Target: 99.99% (Met) FY20 Target: 99.99% FY21 Target: 99.99%		
• 18 Acre Event Production - Optimize Quality and Delivery of Event Production on the White House 18 Acre Complexes FY20 Target: 45.93% FY21 Target: 75%		
• Encoding, Streaming, Virtual Reality - Continue to expand Streaming TV and other broadcast services to rapidly expanding national and global, commercial and public markets FY19 Target: 99.99% (Met) FY20 Target: 99.99%		
• Multi-media (MM) Center Services - MM Services provide full on-demand access to POTUS and Senior Staff to high-quality multimedia broadcast information with a 99.99% success rate FY19 Target: 99.99% begin to evolve MM products and live streaming to 4K High Definition (Met) FY20 Target: 99.99% continue to enhance MM products and live streaming to 4K High Definition FY21 Target: 99.99%		
• Broadcast Travel Equipment (included in PDS /Mobile Event Equipment) FY19 Target: 99.99% BAV Travel Equipment logistics for POTUS, VPOTUS, and FLOTUS WH/Travel Events Schedule (PTN sustainment and event use). (Met) FY20 Target: 99.99% BAV Travel Equipment logistics for POTUS, VPOTUS, and FLOTUS WH/Travel Events Schedule (PTN sustainment and event use). FY21 Target: 99.99% BAV Travel Equipment logistics for POTUS, VPOTUS, and FLOTUS WH/Travel Events Schedule (PTN sustainment and event use).		
Deployable Services Portfolio goal (FY 2019 - FY 2021): Deploy integrated, mobile systems and platforms that provide mobile communications and information service capabilities in multiple environments.		
• Deployed Trip Site Services FY19 Target: 99.99% of scheduled delivery (NextGen MCV Fleet, sustainment) (Met) FY20 Target: 99.99% of scheduled delivery (NextGen MCV Fleet, sustainment) FY21 Target: 99.99% of scheduled delivery (NextGen MCV and ECV Fleet, sustainment)

Description:

The Joint Regional Security Stacks (JRSS) are a joint DoD security architecture comprised of complementary defensive security solutions that remove redundant Information Assurance (IA) protections; leverages enterprise defensive capabilities with standardized security suites; protects the enclaves after the separation of server and user assets; and provides the tool sets necessary to monitor and control all security mechanisms throughout DoD's Joint Information Environment.

Justification:
 FY 2019: (\$133.836) Procured hardware/software to support JRSS 1.5 and DoD Cyber Situational Awareness Analytic Capabilities tech refresh and enhancements, enabling the ability to collect, aggregate, and review syslog and security event data, perform automated and manual correlation for both cyber defense and application performance monitoring, and perform troubleshooting to support migrations to JRSS. Continued the upgrade of Multiprotocol Label Switching (MPLS) connectivity to support integration with JRSS. DISA procured the following capabilities:

- JRSS and Joint Management Systems (JMS) Tech Refresh - (\$104.936) Procured hardware and software to support technology refresh enhancements of end-of-life/end-of-support JRSS hubs/spokes in order to keep current with evolving threats. DISA procured the following capabilities: Security and Information Event Management, data brokering, pre-migration discovery, routers, load balancing, Intrusion Prevention System, and Intrusion Detection System.
- Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$6.000) Funded procurement, engineering, test, integration, and implementation of analytics supporting JRSS, as well as hardware/software tech refresh/enhancement of associated JRSS capabilities.
- Multiprotocol Label Switching (MPLS) - (\$22.900) Upgraded existing connections to provide additional bandwidth and streamlined management in order to support integration with JRSS and handle the additional traffic associated with enhanced cyber SA.

FY 2020: (\$88.000) Will procure hardware/software to support JRSS 1.5 and DoD Cyber Situational Awareness Analytic Capabilities tech refresh and enhancements, enabling the ability to collect, aggregate, and review syslog and security event data, perform automated and manual correlation for both cyber defense and application performance monitoring, and perform troubleshooting to support migrations to JRSS. DISA will procure the following capabilities: Security and Information Event Management, firewalls, anti-malware, core switches, and performance monitoring. DISA will procure the following capabilities:

- JRSS and JMS Tech Refresh - (\$83.000) Will continue to procure hardware and software to support technology refresh enhancements of end-of-life/end-of-support JRSS hubs/spokes in order to keep current with evolving threats.
- Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$5.000) Funds procurement, engineering, test, integration, and implementation of analytics supporting JRSS, as well as hardware/software tech refresh/enhancement of associated JRSS capabilities.

Explanation of Change from FY 2019 to FY 2020: The decrease of -\$45.836 between FY 2019 and FY 2020 is due to the completion of JRSS 2.0 capabilities in FY19 and reduced hardware/software tech refresh requirements for JRSS/JMS in FY20 based on FY19 upgrades (-\$22.936), and the completion of MPLS acceleration activates in support of Joint Information Environment (JIE) (-\$22.900).

FY 2021: (\$88.741) Will procure hardware/software to support JRSS 2.0 tech refresh, enhancements, optimization, and virtual training environment. This will enable the ability to collect, aggregate, and review syslog and security event data, perform automated and manual correlation for both cyber defense and application performance monitoring, and perform troubleshooting to support migrations to JRSS. Cyber Situational Awareness Analytic Capabilities have been integrated into JRSS SIEM. DISA will procure the following capabilities: tech refresh / insertion, performance monitoring expansion, SIEM expansion, firewalls, and virtual training environment support.

Description:

Joint Service Provider (JSP) mission focuses on providing timely, trustworthy, and dependable information technology (IT) services for Pentagon and National Capital Region (NCR) customers. JSP provides the full range of information technology equipment, services, solutions, and customer support to 45,000 customers across the Office of the Secretary of Defense, Headquarters Department of the Army, the Joint Staff, Defense Security Cooperation Agency, and Defense Technology Security Agency to meet mission and business requirements. It enables missions and business processes through secure, robust, reliable state-of-the-art information technology and services.

Justification:

FY 2019: (\$99.982)

Voice, Data, and Video Infrastructure: (\$1.678) - Provided support of Pentagon/NCR Voice, Data, and Video Infrastructure life-cycle refresh, modernization, and other approved project and initiatives. This included life-cycle refresh (LCR) and modernization of the 3 Pentagon unclassified and classified voice switches, the life-cycle refresh and modernization of Audio Visual (AV) and Video-Teleconference (VTC) hardware and software in the Mark Center Conference Center, Pentagon Conference Center, and the Pentagon Emergency Operations Center. Procured hardware/software for lifecycle replacement for all IT equipment, software, and installation services. JSP provided IT support services for the Office of Secretary of Defense (OSD), Joint Staff, Washington Headquarters Service (WHS), Pentagon Force Protection Agency (PFPA), Consolidated Adjudication Facility (CAF), and other WHS-supported users and communities supported within the Pentagon Reservation and other areas in the National Capitol Region.

Server, Compute, and Storage Infrastructure: (\$45.142) - Provided network transport for all Services and Agencies in the Pentagon at all security classification levels. This program included comprehensive network security, computer network defense, and intrusion detection at the DoD Information Networks Pentagon edge. It provided the Pentagon IPN with full spectrum computing and data management, data storage, replication, recovery, and back-up. This program also provided the organizational messaging node for DoD and replaces existing firewalls with the joint computer network defense architecture for the Pentagon node. The program also funded Life Cycle Replacement and Modernization of the Pentagon's core network infrastructure minimizing the risk for increased occurrences/ durations of widespread network outages and higher maintenance costs. The program also provided the capacity needed to meet the Joint Information Environment bandwidth requirements based on the virtualization and continuing alignment of Enterprise services at DoD Core Data Centers.

End User Services: (\$39.194) - Provided modernization and life-cycle refresh of office automation and IT end-user infrastructure requirements for the WHS/OSD, the Joint Staff, the DoD CAF, White House Military Office (WHMO), the US Court of Appeals for the Armed Forces, and 14 organizational components of the OSD. Procured approximately 30 office automation, application development, and classified and unclassified end user device support. Provided the back-end server and data storage to support the virtualized desktop as a service infrastructure. This converged and virtualized platform enabled JSP to avoid costly maintenance of individual desktops by deploying a reduced number of disparate user images directly from the server for better management of security patching, improved software license and version control, and ability of JSP-supported staff to work from geographically-dispersed locations.

High-Availability (HA) Architecture – Secretary of Defense Communications (SDCs): (\$2.178) - Provided funding for critical business operations, high-availability architecture, and core infrastructure support, at all classification levels, for the immediate Office of the Secretary of Defense.

Consolidated Adjudication Facility (CAF) Infrastructure: (\$1.649) - Provided continued support of the DoD CAF, a consolidation to promote and enhance greater consistency, standardization, and efficiency throughout the adjudicative process. The program funded Continuity of Operations IT requirements that supported the sustainment of critical business operations in the event of an emergency.

Information Technology (IT) Service Management (ITSM): (\$4.621) - Provided for investments in ITSM tools (hardware, software) required for the management of core classified and unclassified Pentagon/NCR network and cyber operations.

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2021 Defense Information Systems Agency		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 97 / Joint Service Provider (JSP)
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0903235K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Acquisition, Technology, and Logistics (AT&L) Mission Application Environment Infrastructure: (\$0.520) - Provided funding for hardware and software required for management of the AT&L Mission Application Environment infrastructure.		
4th Estate IT Migration Planning: (\$5.000) - Purchased Network infrastructure and server equipment for DISA Headquarters (HQ) and Defense Technical Information Center (DTIC) HQ to build the backbone of Department of Defense Network (DoDNET).		
FY 2020: (\$107.907)		
Pentagon/National Capital Region (NCR) Information Technology (IT) Modernization (\$104.589) - Will enable modernization and replacement of outdated technologies and capabilities in support of Pentagon/NCR Common IT operations. JSP Modernization efforts covers voice, data, video, messaging, server, storage, cyber security, and end-user computing enhancements in support of the Office of the Secretary of Defense, the Joint Staff, Headquarters Department of the Army, on-boarded 4th Estate IT organizations, as well as tenants in the Pentagon, Mark Center, and other supported leased-facilities across the NCR. Major lines of effort covered under this activity include:		
· Voice, Data, and Video Infrastructure Modernization/Replacement - Will provide modernization/life-cycle refresh of Audio Visual (AV) and Video-Teleconference (VTC) hardware and software in the Mark Center Conference Center, Pentagon Conference Center, and the Pentagon Emergency Operations Center.		
· Communications, Workloads, Compute, and Storage Infrastructure Modernization/Life-cycle Replacement - Will provide for the replacement of end-of life (EOL) legacy IT hardware network devices to strengthen and support comprehensive network security, computer network defense, and intrusion detection at the DoD Information Networks Pentagon edge. Will also implement new technologies in support of the Pentagon/Mark Center Installation Processing Node (IPN) with full spectrum computing and data management, data storage, replication, recovery, and back-up. Will allow information to become more secure, process faster and provide for a more stable and standardized environment. Will procure Life Cycle Replacement and Modernization of end of service IT equipment supporting the Pentagon's core communications network infrastructure and Metropolitan Area Network (MAN), at all three classification levels.		
· End-User Device Modernization - Will provide modernization and life-cycle refresh of end user IT equipment and systems, to include virtualized desktop infrastructure and end-points, workstations (desktops, laptops, tablets, and thin-clients), print/copy/scan hardware, and peripherals and software.		
Secretary of Defense Communications (SDC) Critical Infrastructure Modernization (formally known as High-Availability (HA) Architecture) (\$1.636) - Includes the procurement and purchasing of critical IT equipment (end-user, mobility, software tools, crypto, routers and switches) that will provide critical business operations, high-availability architecture, and core infrastructure support to the Office of the Secretary of Defense (SECDEF). Will ensure critical, dedicated, and secure access to multi-path, resilient, and highly reliable communications capabilities, consistent with the mandated National Leadership Command Capability (NLCC) responsibilities.		
Central Adjudication Facility (CAF) (\$1.682) - Will implement new technologies that will allow information to be more secure, process faster, and promote a work environment that is more stable, standardized, and consistent to meet increasing CAF IT mission needs. Remaining procurement of servers, routers and switches and virtualized software as well as the installation and configuration of the network hardware will be completed in support of the CAF Hyper-Converged Infrastructure in support of 1000 users. This project also includes updating Cyber Security measures that include firewalls, intrusion prevention systems and software defined networking to ensure a secure operating environment.		
Explanation of Change from FY 2019 to FY 2020: The increase of +\$7.925 between FY 2019 and FY 2020 is due to an increase of +\$13.434 to procure IT hardware in support of modernization efforts for Pentagon and National Capital Region supported locations and includes modernization efforts covering voice, data, video, messaging, server, storage, cyber security, and end-user computing enhancements. Modernization of major IT systems and infrastructure and procurement of hardware ensures common commodity baselines to reduce spare parts in order to lower sustainment costs. Additionally, an increase in the Central Adjudication Facility cost (+\$0.033) is attributed to the purchasing of additional network hardware and virtualized software. This is offset by a decrease of -\$0.542 is due to reduction in purchasing critical IT equipment (end-user, routers, and switches) and a decrease of -\$5.000 due to one-time funding for 4th Estate IT Migration Planning used to initiate the program. It will be moved into its own procurement line for FY21 and beyond.

Description:

Fourth Estate Network Optimization (4ENO) is a consolidation effort directed by the Deputy Secretary of Defense in the memorandum, "Fourth Estate Network Optimization Execution Guidance" on 15 August 2019. As part of the Department's ongoing IT Reform efforts, DISA has been designated as the Department's Single Service Provider (SSP) for 4ENO which will consolidate the commodity IT local area networks and service desks associated with 14 Defense Agencies and Field Activities (DAFAs) over the next 5 years. Once completed, the consolidation will collapse 28 unclassified and classified commodity IT networks to a single unclassified and classified network infrastructure. Similarly, components will transition to a consolidated Global Service Desk (GSD) provided by DISA over the next 2 years. Adoption of the Single Service Provider construct is intended to achieve significant gains in the cyber security posture of the Fourth Estate while also driving uniform adoption of enterprise services. Investment funding supports the refresh and/or build-out of local area network infrastructure in support of this effort.

<p>Justification:</p> <p>Defense Enclave Services (DES) Equipment: (\$42.084) - Will acquire network infrastructure hardware (HW) to tech refresh outdated equipment at multiple 4th Estate site locations. Modernized infrastructure includes equipment by number of sites, site size, cabling/integration, migration costs to survey, design, and install all new network equipment. Procured hardware will be used to support the initial build out of DoDNet architecture across DISA, Defense POW/MIA Accounting Agency (DPAA), Defense Technical Information Center (DTIC), Defense Media Activity (DMA), and Defense MicroElectronics Agency (DMEA). Upon deployment and integration, this effort will consolidate multiple networks into a single central managed network. Will tech refresh outdated, end-of-life equipment and provide enhancements to standardize network infrastructure, improve cyber security posture of networks, and strengthen network resiliency across the 4th Estate environment. Hardware will also support network monitoring capabilities critical to perform network discovery and network operation service performance. These capabilities are necessary to quickly identify and mitigate service issues down to the LAN environment. Deployment of hardware and network monitoring capabilities will provide the ability to adjust quickly to changes in DOD/Agency priorities and needs as well as reduce the proliferation of redundant information technology systems and increase visibility of all network connected devices.</p> <p>- DODNet (\$20.702) - Will procure HW replacement of equipment at DMA, DPAA, and DMEA sites which have reached or exceeded end-of-life. Network HW includes the routers, switches, firewalls, intrusion detection systems. File, print, and DNS server equipment will also be replaced in order to standardize to a single common architecture. Standardized equipment enables central management of the network, reducing network operational complexity and increases operational efficiencies</p> <p>- Global Service Desk (GSD) Sites - Secret Internet Protocol Router Network (SIPR) (\$1.696) - Will procure the core network infrastructure necessary to support the global service desk technicians for the SIPRNet environment. Network equipment includes the routers, switches, firewalls, & intrusion detection system. Infrastructure deployed will support global service desk operations in support of DISA, DPAA, DMEA, DMA, and DTIC.</p> <p>- Lifecycle Replacement (\$19.686) - Will procure HW equipment (i.g. firewalls, routers, and switches) for DISA Mechanicsburg, Annapolis Junction, Site R, Annapolis, Chambersburg, Camp Smith, Ford Island, Fort Meade, Montgomery, Wiesbaden, and Yokota locations. Procured hardware will replace equipment which has reached end-of-life. Hardware purchased will be standardized and integrated into the DoDNet environment.</p> <p>Explanation of Change from FY 2020 to FY 2021: The increase of +\$42.084 between FY 2020 and FY 2021 is due to DWR and the initial acquisition of phase 1 equipment to support DoDNet 1st Generation and replace equipment that has reached end-of-life.</p> <p>Performance Metrics:</p> <p>1. Number of Non-classified Internet Protocol Router Network (NIPR) sites equipment purchased FY 2021 - 30 Planned</p> <p>2. Number of SIPR sites equipment purchased FY 2021 - 5 Planned</p>

<p>Description: FY 2019 funding totals include \$12.000 appropriated for Overseas Contingency Operations.</p> <p>Defense Information Systems Network (DISN) is the Department of Defense's (DoD's) consolidated worldwide telecommunications infrastructure that provides end-to-end information transport for DoD operations to the warfighters and the Combatant Commanders with a robust Command, Control, Communications, Computers and Intelligence information long-haul transport infrastructure. The DISN, seamlessly spanning full spectrum from terrestrial to space and strategic to tactical domains, provides the interoperable telecommunications connectivity and value-added services required to plan, implement, and support all operational missions, anytime, and anywhere pushing DISN services to the edge of the communications network. The DISN delivers an integrated platform consisting of DoD's core communications, computing, and information services as well as integrating terrestrial, wireless, and satellite communications into a network cloud that is survivable and dynamically scalable. Procurement funding primarily supports the Technology Refreshment (TR); Joint Worldwide Intelligence Communications System (JWICS); National Emergency Action Decision Network (NEADN)/Presidential and National Voice Conferencing (PNVC); the Enhanced Pentagon Capability (EPC)/Survivable Emergency Conferencing Network (SECN); DoD Mobility; and a significant satellite communications extension of the DISN. The procurement funding enables the DISN to remain technologically up-to date and capable by achieving the best possible balance between network performance and network cost through a process known as network optimization.</p>												
<p>Justification: FY 2019 Overseas Contingency Operations (OCO): Global Broadcast Service (GBS): (\$12.000) Procured and installed equipment to support the Enhanced AISR data transport for operational and tactical users.</p> <p>FY 2020 OCO: Global Broadcast Service (GBS): (\$0.000)</p> <p>Explanation of Change from FY 2019 to FY 2020: The decrease of -\$12.000 from FY19 to FY20 is part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011. This funding transferred to Line Item Number 18 (DISN).</p> <p>Performance Metrics:</p> <p>Number of Terminals:</p>

Description:

FY 2021-2025, the DLA Procurement program consists of Military GPS User Equipment (MGUE), Logistics Support Activity (LSA) equipment, Warstopper equipment, and Morale, Welfare and Recreation (MWR) equipment, and Passenger Carrying Motor Vehicles (PCMV). The FY21 request includes MGUE (\$405.000 million), LSA (\$11.422 million), Warstopper (\$0.492 million), MWR (\$0.332 million), and PCMV (\$0.223 million).

MGUE program - request is for the end-of-life procurement and management of the Application Specific Integrated Circuits (ASIC). ASIC are integrated into higher level Global Positioning System (GPS) assemblies called Military GPS User Equipment (MGUE), which are modernized receiver platforms, utilized in hundreds of critical weapon systems and military equipment items. Recently, the trusted foundry responsible for the production of ASIC provided end-of-life notification to the Department of Defense (DoD). DLA has been tasked by the Department to conduct the end-of-life procurement of all remaining ASIC units and provide oversight for ASIC storage and distribution. This will provide a stable supply of these circuits to the Military Services for the next 8 years, or until the next incremental ASIC is developed and produced. The DoD also increased the Operation and Maintenance (O&M) budget to fund associated costs with this effort.

LSA program - is reported in accordance with Title 10, United States Code, Section 119(a)(1) in the Special Access Program Annual Report. The DoD provided additional Procurement funds for increased requirements in FY 2021.

Warstopper program - identified an emerging first-time requirement to purchase Government Furnished Equipment (GFE) for fuel bladder manufacturing. Fuel bladder reliability has created significant readiness impacts across multiple aircraft weapons systems. Warstopper procurement funding also supports an on-going requirement for fully automated metrology equipment for wafer test and inspection of emulated microcircuits. An additional Warstopper procurement requirement was identified to purchase of GFE for ration manufacturers to include retort machines, vertical forms, and seal machines used for Meals Ready to Eat (MRE).

MWR program - Closed Circuit TV (CCTV) systems at the Child Development Center (CDC) require upgrades and expanded coverage of video surveillance capabilities. These systems mitigate anti-terrorism and force protection vulnerabilities and provide enhanced security at the CDCs as well as serve as an institutional child abuse deterrent. The enhanced remote viewing of the center is required to ensure the safety and well-being of our children as well as employees. These systems satisfy the Unified Facilities Criteria (UFC) Design: Child Development Centers (UFC 4-740-14) CCTV requirements.

PCMV program - supports DLA's overseas logistics operations. DLA maintains field offices in Europe, Kuwait, Korea and Japan. Replacement of Agency-owned and commercially leased PCMV's with owned PCMV's is required in cases where it makes economic sense, and PCMV ownership is usually significantly less expensive than commercial leasing at overseas locations.

Report/Study Cost Estimate (E-7CB4ACF)

1. Report/Study Title:					
FY2021 President's Budget, DPAA Procurement Appropriation Justification Book					
2. Expected Publication Date: 3. Study/Report Number:					
2020-01-31					
4. This Report/Study was funded and performed during Fiscal Years:					
From: To:					
2020 2020					
5. Name of Organization(s) Sponsoring the Report/Study: 5b. DoD Component Organization Name.					
Department of Defense			DPAA - Defense POW/MIA Accounting Agency		
6. Name of Organization Preparing the Cost Estimate:					
Comptroller					
7. This report/study is required to comply with DoD regulation:					
True					
7b. Enter the DoD regulation(s) required for compliance:					
DoD Financial Management Regulations					
8. This report/study is required to comply with Congressional direction:					
True					
8b. Enter the Congressional Report Number:					
Procurement, Defense-Wide Appropriation					
9. This report/study is required by law:					
True					
9b. Enter the Statutory law(s):					
Procurement, Defense-Wide Appropriation					
10. List costs of all non-labor activities used to prepare and complete the report/study (i.e., contracts, printing, travel, etc.):					
Activity	Description	Units	Unit Value	Actual Cost (\$k)	
Other Costs	Other	1	\$0.0	\$0.0	
Total:				\$0.0	
11. Total DoD Manpower Required for Oversight of Report/Study Execution:					
Oversite/Activity	Description	Grade	Manpower	Qualifier	Estimated Cost (\$k)
Study Activity	Exhibit Prep and Review	GS-14	10	Man Days	\$6.5
Total:					

	\$6.5
12. Will this cost estimate data be required on a recurring basis?	
Yes	
12b. Enter the frequency of this recurring Report/Study estimate (i.e., biennial, annual, quarterly, etc.):	
Annual	
13. Please provide any additional comments.	
The estimated cost of this report or study for the Department of Defense is approximately \$ 6,500.0 . This includes \$ 0.0 in expenses and \$ 6,500.0 in DoD labor.	
Approved By

Description: Purchase non-US manufactured, trucks, light trucks, and sport utility vehicles (SUV) for DPAA investigation and recovery activities in southeast Asia. Vehicle prices vary depending on the type of vehicle replaced. Likely range between \$25,000 and \$47,000. Quantities of specific vehicles will vary from year to year depending on available programmed service life.												
Justification: The Defense POW/MIA Accounting Agency (DPAA) provides families and the Nation with the fullest possible accounting for missing personnel from past conflicts. As a Defense Agency, the DPAA leads the national effort to develop and implement DoD policy on all matters relating to personnel accounting from past conflicts, conduct global search, recovery, and laboratory operations to identify personnel from past conflicts, provide information and answers to the families of missing personnel, share their stories, and, when possible, bring home their remains. This includes those who are unaccounted for from World War II, the Korean War, Cold War, Indochina (Vietnam) War, Persian Gulf War, the Iraq Theater of Operations, and other conflicts or incidents as the Secretary of Defense (SECDEF) directs. The DPAA also provides analytical support to official United States delegations and technical discussions with host nation officials. Additionally, the DPAA is continuing to implement the transformation of DoDs personnel accounting for past conflicts as directed by the SECDEF, involving such things as enhanced strategic partnerships to more effectively account for missing personnel and to ensure their families receive accurate information. DPAA maintains a number of vehicles at OCONUS detachments in southeast Asia (Vietnam, Laos, and Thailand) to transport investigation and recovery teams. Due to the poor road conditions and inadequate repair facilities, the service-life of the vehicles is considerably shorter.

Description:

Purchase non-US manufactured, trucks, light trucks, and sport utility vehicles (SUV) for DPAA investigation and recovery activities in southeast Asia. Vehicle prices vary depending on the type of vehicle replaced. Likely range between \$25,000 and \$47,000. Quantities of specific vehicles will vary from year to year depending on available programmed service life.

Justification:

The Defense POW/MIA Accounting Agency (DPAA) provides families and the Nation with the fullest possible accounting for missing personnel from past conflicts. As a Defense Agency, the DPAA leads the national effort to develop and implement DoD policy on all matters relating to personnel accounting from past conflicts, conduct global search, recovery, and laboratory operations to identify personnel from past conflicts, provide information and answers to the families of missing personnel, share their stories, and, when possible, bring home their remains. This includes those who are unaccounted for from World War II, the Korean War, Cold War, Indochina (Vietnam) War, Persian Gulf War, the Iraq Theater of Operations, and other conflicts or incidents as the Secretary of Defense (SECDEF) directs. The DPAA also provides analytical support to official United States delegations and technical discussions with host nation officials. Additionally, the DPAA is continuing to implement the transformation of DoDs personnel accounting for past conflicts as directed by the SECDEF, involving such things as enhanced strategic partnerships to more effectively account for missing personnel and to ensure their families receive accurate information.

DPAA maintains a number of vehicles at OCONUS detachments in southeast Asia (Vietnam, Laos, and Thailand) to transport investigation and recovery teams. Due to the poor road conditions and inadequate repair facilities, the service-life of the vehicles is considerably shorter.

<p>Description:</p> <p>Title III of the Defense Production Act (DPA) provides the President of the United States broad authorities to ensure the timely availability of domestic industrial base capabilities essential for the national defense. DPA Title III is an important DoD program with the authority to utilize economic incentives to create, maintain, protect, expand, or restore domestic sources for critical components, critical technology items, and industrial resources. The DPA is authorized by 50 U.S.C. Sections 4501-4568.</p> <p>This budget includes a project portfolio that will appropriately utilize DPA Title III authorities to strengthen domestic industrial base capabilities essential to national defense. The multi-year projects in this budget will incentivize domestic sources to establish, strengthen, and expand domestic industrial base capabilities in key areas such as strategic radiation-hardened microelectronics and the rare earths supply chain.</p>

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.										
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										
<p>Justification: Strategic overview:</p> <p>DPA Title III investments are driven by strategy starting with the National Security Strategy and National Defense Strategy. DPA Title III investments are also supporting Department of Defense modernization priorities and the recommendations from the interagency report in response to Executive Order 13806: Assessing and Strengthening the Manufacturing and Defense Industrial Base and Supply Chain Resiliency of the United States (E.O. 13806).</p> <p>Defense-Wide Review (DWR) reduced \$7.915 million across the FYDP on Defense Production Act Purchases Title III to focus on the Secretary's guidance to streamline operations, increase efficiency, and promote greater affordability within the OSD and Defense Agencies and Field Activities in order to ensure the Department's optimum alignment to the National Defense Strategy and DoD strategic guidance, with particular focus on building a more lethal, resilient, agile, and ready force while strengthening alliances, prioritizing cyber and space capabilities, and focusing on innovation to maintain the technological advantage.</p> <p>The Office of Management and Budget (OMB) has added \$120 million to FY 2021 budget to aid the Department in resourcing the DPA Fund so the DPA Title III Program can address critical shortfalls in the domestic industrial base, as identified in the interagency report in response to Executive Order 13086, and ensure the industrial base can support the Department's strategic modernization initiatives. Industrial base efforts that this \$120 million will fund include rare earths, critical chemicals, small unmanned aerial systems, hypersonic applications, electronics, and space. Specified numbers for each effort are estimates that are subject to change based on ongoing market research and the acquisition process.</p> <p>The National Security Space Industrial and Supply Base (NSS ISB) Risk Mitigation Program was developed to formulate a systematic process to fund mitigation efforts to rectify shortfalls in the space industrial and supply base. The objective is to ensure access to critical technologies and capabilities in the quality, quantity, and timeframes required to support U.S. Government space programs. Projects in this program are addressing cross-platform, multi-agency/Service requirements. Projects are developed in response to risk mitigation determinations and prioritized critical requirements of stakeholders in DoD and other agencies, as represented through the Department's Space Industrial Base Working Group.</p> <p>Program Change Summary (\$ in Millions)</p> <p>FY 2021 resources (\$M): FY 2021 Request*: \$181.931 * Includes Defense Wide Review Reductions: - \$1.960, DoD Programmatic Adjustments/Transfers: + \$30.700, and OMB Increase: + \$120.000</p> <p>FY 2020 resources (\$M): FY 2020 Request: \$34.393 Congressional increase: +\$30.000 Total FY 2020 Appropriated: \$64.393</p>

Line Item MDAP/MAIS Code: N/A		
<p>FY 2019 resources (\$M): FY 2019 Request: \$38.578 Congressional increase: +\$15.000 Total FY 2019 Appropriated: \$53.578</p> <p>This budget includes essential transformational initiatives using the authorities of Title III of the DPA. Project descriptions are provided below for each of the P5 exhibit projects listed, and the single or multi-year cost phasing of each of the projects is addressed in the P5 exhibit.</p> <p>Project Descriptions:</p> <p>NSS ISB – Space Qualified Solar Cell Supply Chain: The purpose of these projects is to ensure a domestic capability to supply this critical power supply component for national security space assets. Projects involve ensuring a viable domestic source for space qualified germanium substrates and high performance photovoltaic cells, panels, and systems. Current projects are helping domestic photovoltaic manufacturing and integration companies maintain their performance lead over foreign competitors by expanding production of AIAA S-111 space-qualified photovoltaic solar cells with improved cost and performance efficiencies. Performance improvements include characterizing high-efficiency inverted metamorphic (IMM) solar cells grown on Gallium Arsenide substrates as a drop-in replacement for ZTJ triple-junction solar cells, and completing the qualification of the IMM solar cells to the AIAA S-111A standard. Other improvements on high-efficiency XTJ Prime triple- junction solar cells grown on Germanium substrates include increasing the cell Beginning-of-Life efficiency and reducing End-of-Life cost per watt. Multiple awards were made in FY 2019 utilizing prior year funds. Additional projects are expected to be awarded in FY 2020 utilizing prior year funds.</p> <p>NSS ISB - Next Generation Reaction Wheel Assemblies (RWA): This project addresses a need for a multiple-phase Next-Generation scalable Reaction Wheel (NGRW) to provide a systematic comprehensive, low cost/risk investment affording potential for high return on investment. The goal is to generate or revive a domestic competitor, or to expand the existing vendor's product line, with a focus on smaller wheels using advanced technologies. In addition, the effort will explore encouraging a business partnership to maintain a second source in the U.S. Also, the project will investigate using another product controlled by a U.S. company. A study phase was completed and the execution phase is anticipated to be awarded in FY 2020 utilizing prior year funds.</p> <p>NSS ISB - Radiation-Hardened Digital/Analog Production & Qualification: This project funds work at the 45nm and 14nm nodes. It is imperative that government organizations responsible for national security, e.g., intelligence acquisition, missile early warning, missile defense, and other space requirements maintain a strong industrial base to supply technology necessary to design, develop, and fabricate secure, radiation hardened, high reliability, and DoD space qualified Application Specific Integrated Circuits (ASIC), Application Specific Standard Products (ASSP), such as very high speed data switches, and Multi-Core General Purpose Processors (MCGPP) at the less than or equal to 45nm technology node to support onboard processing and other critical applications. The objective of this project is to enhance the Radiation Hardened By Design flow, optimize selected circuit designs to reduce power and increase performance, and complete the design, fabrication, testing, and qualification of certain critical devices to include the MC-GPP. In addition to achieving an estimated improvement in performance of > 25% for power and performance for some specific designs, the proposed effort will support life-time acquisition buys of these critical circuits for some identified systems with attendant reductions in system technical, cost, and schedule risks. An award was made toward this effort in FY 2019 utilizing prior year funds. Additional projects are anticipated in FY 2020 utilizing both prior year and FY 2020 funds.</p> <p>NSS ISB – Access to Field Programmable Gate Arrays (FPGA) for Space Applications: The DoD and Intelligence Community have identified FPGAs as a critical enabling technology across a wide variety of present and future systems. Advanced, commercially available FPGAs are manufactured off-shore and are considered vulnerable to tampering and insertion of malicious software and/or hardware. This program seeks to improve the security posture and reduce the risk associated with FPGA technology by addressing security concerns in the design, development, fabrication, and supply lifecycle of FPGA devices. The objective of this program is to develop and demonstrate an approach to gain access to advanced, assured, and space qualified reprogrammable FPGA technology to support DoD/IC applications including satellite and strategic missile systems. Concerning this effort "assured" is defined as assurance of the integrity and availability, of a product wherein that product will reliably operate as intentionally designed and not contain any malicious hardware and/or software that will compromise the intended application; e.g., exfiltration of sensitive data, etc. A study phase was completed, and the execution phase is anticipated to be awarded in FY 2020 utilizing prior year and FY 2020 funds.</p>

Appropriation / Budget Activity / Budget Sub Activity: 0360D: Defense Production Act Purchases / BA 01: Defense Production Act Purchases / BSA 10: Defense Production Act Purchases		P-1 Line Item Number / Title: Title3 / Defense Production Act Purchases
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0902199D8Z	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>NSS ISB – Fibers and Composites: These projects are intended to ensure the domestic industrial base can provide key qualified fibers and composites that are critical to NSS, such as rocket nozzle throats, light weight structures, and light-weight, resilient shielding and interconnects. Current items of interest include fibers, fabrics, and components made out of rayon, polyacrylonitrile (PAN), and carbon nanotubes. These efforts mitigate key risks factors such as reliance on foreign sources and very limited or no domestic suppliers.</p> <p>NSS ISB - Infrared Sensor Substrates (Cadmium Zinc Telluride / Mercury Cadmium Telluride): The purpose of this effort is to establish and maintain a high quality production capability for Mercury Cadmium Telluride (MCT) epitaxy grown on Cadmium Zinc Telluride (CZT) substrates via molecular beam epitaxy (MBE) at key US-owned and operated foundries in order to assure the necessary supply of infrared focal plane arrays (IRFPAs) to National Security Space (NSS) agencies when needed. The primary goal is ensure domestic availability of these detectors, and demonstrate on-shore MCT detectors are equivalent in performance to IRFPAs utilizing off-shore substrates. Additional awards were made toward this effort in FY 2019 utilizing prior year funds. Further efforts are anticipated in FY 2020 utilizing prior year and FY 2020 funds.</p> <p>NSS ISB – ROIC Foundry Improvement and Sustainment: This project is a follow-on to a prior read-out integrated circuit (ROIC) project that focused on maintaining minimal, yet adequate, production capabilities at domestic foundries to ensure a necessary supply of strategic ROICs for Government space programs while simultaneously improving product design and processes.</p> <p>Projects Other (non-NSS)/ISB:</p> <p>Strategic Radiation Hardened Trusted Microelectronics Foundry: The purpose of this effort is to provide an assured capability to produce or acquire strategic radiation hardened trusted microelectronics in compliance with Department of Defense instruction 5200.44 to supply critical microelectronic components for necessary radiation environments involved with the acquisition of delivery systems for nuclear weapons. The project provides production, engineering, and sustainment services in support of Strategic Radiation Hardened microelectronics fabrication via a Defense Microelectronics Activity-accredited Trusted Supplier using a Trusted flow. Multiple contracts have been awarded toward this effort in FY 2019 utilizing FY 2018 and FY 2019 funds.</p> <p>Critical Chemicals for DoD Missiles and Munitions: Multiple efforts are being scoped to address critical shortfalls in the domestic industrial capability to produce materials for DoD missiles and munitions. In January 2019, the President signed four Presidential Determinations addressing vulnerabilities in the supply chain for critical chemicals for DoD munitions, including: precursor materials, inert materials, energetic materials, and advanced manufacturing techniques for producing the materials. Relying on foreign sources, especially China, for these critical chemicals poses a risk to the Department's readiness to deter and defeat adversaries. Multiple projects are anticipated to be awarded in FY 2020 utilizing FY 2019 funds.</p> <p>Rare Earth Supply Chain: In July 2019, the President signed 5 Presidential Determinations addressing the rare earth elements supply chain, including: Light Rare Earth Separation and Processing, Heavy Rare Earth Separation and Processing, Production of Rare Earth Metals and Alloys, Production of Neodymium Iron Boron Rare Earth Permanent Magnets, and Production of Samarium Cobalt Rare Earth Permanent Magnets. This line of effort will establish a domestic industrial capability to support key aspects of the rare earth supply chain. China dominates the Rare Earth Elements (REE) market on a global scale in both mining and processing of RE raw materials and has the ability to manipulate global markets. Relying on foreign sources for these critical materials poses a risk to the DoD's readiness to deter and defeat adversaries. Important defense applications for the end product of this supply chain, REE permanent magnets, include jet fighter engines, missile guidance systems, antimissile defense, space-based satellites, and communication systems. Efforts are currently being developed to bolster the domestic industrial base to support the separation and processing of rare earth elements and domestic production capability for Neodymium Iron Boron (NdFeB) rare earth permanent magnets. Multiple projects are anticipated to be awarded in FY 2020 utilizing prior year funds.</p> <p>Hypersonics Industrial Base: The DPA Title III program is actively working with stakeholders to identify gaps in the industrial capability to produce components for hypersonic systems and scale production from prototype levels to the required capacity. Multiple projects are anticipated to address hypersonic industrial base shortfalls, should the President authorize the use of DPA Title III authorities.</p> <p>Assured Electronics Supply: The challenges facing the electronics industrial base are wide-reaching and significant. Commercial industry has trended toward yearly product refreshes and updating technology nodes frequently, leaving legacy DoD systems that must be maintained for decades with severe obsolescence issues. On the opposite end of the spectrum, new systems that desire to integrate the newest technologies face challenges obtaining assured and/or trusted supply as much of the electronics manufacturing supply chain has gone overseas. In addition, domestic suppliers that exist are reluctant to work with unique DoD requirements as it would negatively affect their commercial runs and overall business viability. The DPA Title III Program, in concert with its stakeholders, is working to identify and vet efforts to serve DoD's need for electronic materials, digital/analog/mixed signal integrated circuits, discrete components, displays, power electronic components, electro-optical/IR components, radio frequency components, advanced packaging, and other cross-cutting technologies.</p>

Line Item MDAP/MAIS Code: N/A		
<p>Small Unmanned Aerial Systems (sUAS): In June 2019, the President issued a Presidential Determination authorizing the use DPA Title III to strengthen the domestic industrial base for sUAS. The sUAS domestic industrial base has struggled to compete commercially in the midst of dominant foreign competition and DPA Title III is currently assessing where investments would best remedy the domestic industrial base shortfall and result in an economically viable domestic supplier. The DPA Title III program is working with stakeholders across USG to determine an appropriate investment strategy to enable the domestic industrial base to meet requirements. FY 2020 funds have been aligned to this effort with awards anticipated as early as late FY 2020, with additional efforts to follow depending upon the availability of funds.</p> <p>Next Generation Soldier Protection: The purpose of this project is to create a manufacturing capacity to produce lightweight, high-strength, inherently fire-resistant co-polymer aramid fibers to provide lightweight force protection for Soldiers and air, ground, and naval platforms and bases. Examples include lighter and stronger body armor, helmets, pelvic protection, enhanced combat vehicle survivability, enhanced aviation platform survivability, and integrated base protection. A next generation of co-polymer aramid fibers would provide a step-change increase in tenacity over existing fibers, a key attribute for enabling lighter-weight ballistic protection. This project was awarded in FY 2019 utilizing prior year funds, and funding was reallocated to reflect updated project requirements.</p> <p>Secure Composite Shipping Containers Production Capacity: Developed under funding from the Department of Homeland Security (DHS) Advanced Research Projects Agency (HSARPA), the Secure Hybrid Composite Container (SHCC) is an intermodal ISO shipping container providing advanced security features, while meeting all the operational, structural, and customs requirements of standard steel 20ft and 40ft shipping containers. The container includes the capability to be tracked during its shipment and alert officials to track deviations and alarms. The ultimate goal of the container is to provide the level of security to law enforcement officials to ensure contraband products and malicious agents have not been inserted into the container for smuggling into the US. Investment under Title III to establish initial production capability for the secure hybrid composite container can help satisfy an estimated 3,000 container per year initial government need from the Department of Defense, Department of State, and the Intelligence Community agencies requiring secure shipping containers. A production line with an output of approximately 100 containers per year output is planned. This project was awarded in FY 2019 utilizing prior year funding.</p> <p>Shielded Infrastructures: The purpose of this project is to further increase the production capacity of conductive composite nanomaterials to meet emerging DoD requirements for light weight, unique form factor, electromagnetically shielded products. It is anticipated to leverage the success of a prior DPA Title III project by integrating and scaling the technology (chemical vapor depositioned nickel coated nano-materials) into other novel applications such as non-metallic enclosures, cases, laminates, injection moldings, wallpapers, paints, windows, etc. This project is anticipated to be awarded in FY 2020 utilizing prior year funds.</p> <p>Lithium Sea-Water Batteries: The purpose of this project is to establish the domestic production capability for Lithium Sea-Water (Li-SW) batteries. Currently, no commercially available battery technology has been tested to meet the energy-density, performance, and environment requirements needed to enable the Next Generation Airborne Passive Sensor (NGAPS) sonobuoys. The Office of Naval Research has conducted research and proven that Li-SW batteries will be able to meet the NGAPS requirements if manufactured in the required form factor. The need exists to establish a production line for Li-SW batteries, and to maintain affordable unit prices to support the DoD's needs. This project is anticipated to be awarded in FY 2020 utilizing prior year funds.</p> <p>Alane (AlH3) Fuel: This project will create the domestic manufacturing capability for Aluminum Hydride (AlH3) or "Alane" Fuel. Alane fuel is a high-energy-density fuel that is not petroleum-based and is environmentally friendly. Alane fuel cells utilized in Alane-fuel-powered systems provide higher energy density than the traditional lithium ion batteries on the market. Alane fuel-powered systems are alternatives to the traditional battery packs utilized in military platforms and by soldiers today. These small form factor systems reduce the load carrying burden on soldiers and systems, therefore increasing mobility, operational effectiveness, and survivability. There is currently no domestic industrial manufacturing capability for these cells and a public/private partnership under the authorities of Title III of the Defense Production Act will spur industry to create the initial capability to meet defense needs as well as provide an impetus for domestic commercial adaptability and use of the technology. This project is anticipated to be awarded in FY 2020 utilizing prior year funds, and funding was reallocated to reflect updated project requirements.</p> <p>Thin Wall Castings for Military Applications: Domestic foundries prefer to prioritize high volume, low-risk commercial work over low volume, high-risk defense work. This environment has led to a reduced number of suppliers qualified to provide large, aerospace-grade castings, limited investment in new technologies, and increased cost and lead-times for defense aerospace-related casting products. The objective of this project is to sustain and expand economically viable, merchant suppliers for large, complex, thin-walled aerospace grade magnesium and aluminum sand casting products for rotorcraft platforms, such as the CH-53K. This project was awarded in FY 2020 and is utilizing prior year funds.</p> <p>High Purity Beryllium: The purpose of this project is to ensure the availability of high purity Beryllium metal for DoD and national security requirements through capital improvements to an existing sole source supplier. Beryllium, a light weight metal, possesses unique properties that make it indispensable in many of today's critical defense systems. High purity beryllium is used extensively in structures, digital electronics, and instruments found in defense weapon systems where stiffness, low weight, good thermal conductivity, and dimensional stability are required. Defense demand for beryllium generally includes</p>

<p>the following four areas: sensors, missile and satellite applications, avionics, and nuclear weapons managed by the Department of Energy. This project is a follow-on to a previous DPA Title III project from 2005 to 2012 which established the domestic production capability for primary High Purity Beryllium metal through the design and implementation of a facility. The current project will implement capital improvements required to gain production efficiencies at the facility constructed by the previous effort. This project was awarded in FY 2019 utilizing prior year funds.</p> <p>AN-SSQ Series Sonobuoys Production Capability: The purpose of this effort is to ensure the availability of qualified AN/SSQ-101B sonobuoys. The domestic industrial base for AN/SSQ series sonobuoys was deemed at risk of not being able to produce the needed classes and quantities of sonobuoys and would require assistance to establish the required production lines. This project is anticipated to be awarded in FY 2020 utilizing prior year funds.</p> <p>F135 Integrally Bladed Rotors (IBR): The purpose of this effort is to expediently restore the domestic production capacity for 2nd and 3rd stage integrally bladed rotors (IBRs) for the F135 engine to minimize impact on the F-35 Joint Strike Fighter (JSF) delivery schedule. This effort mitigates the loss of a qualified source in the F135 engine's global supply chain. This project was awarded in FY 2019 utilizing FY 2019 funds.</p> <p>Three-Dimensional (3D) Microelectronics for Information Protection: The purpose of this effort is to establish a domestic, merchant supplier manufacturing capability to provide two- and three-dimensional high density packaging technology, which accepts a wide range of custom and commercial-off-the-shelf components that can drastically increase the security of DoD platforms. This DPA Title III effort is working to create a low rate initial production capability of the packaging technology to enable the early DoD adopters to reliably procure products and achieve cost savings for their programs. The contract for this project was awarded in March 2018, and a second phase of this effort is anticipated to be awarded in FY 2021 utilizing FY 2021 funds.</p>

Description:

The George C. Marshall center will use FY 2021 procurement funds to replace the obsolete analog rear-projection video display systems. These displays are a component of a newly installed system that is paramount to the College of International Security Studies and its method of lecture presentation, video documentation, video teleconferencing and live event production. The video displays are a key component of the audiovisual system that serves to not only display important information large enough for all to see, but also relays demonstrative video and video teleconferencing from within the room and from other conference rooms. Key benefits of this lifecycle replacement are a reduction of obsolete equipment for which spare parts can no longer be procured and the introduction of LED 4K high definition displays that are virtually maintenance free and have a typical lifecycle of 8-10 years.

FY 2021 Estimate \$12.749 million
FY 2020 Estimate \$16.322 million
FY 2019 Estimate \$11.333 million

Program Overview

Our nation and the Department of Defense (DoD) face an increasingly complex security environment with growing and evolving threats. This environment includes diverse, dynamic, and growing proliferation risks. Weapons of mass destruction (WMD) and improvised-threat employment are transregional and multi-functional. Competitors and adversaries increasingly synchronize, integrate, and direct lethal operations and other non-lethal elements of power with greater sophistication. In this competitive environment, WMD and improvised-threat proliferation is more difficult to anticipate and therefore its prevention is increasingly challenging. Accordingly, the Defense Threat Reduction Agency (DTRA) is investing in the capabilities, expertise, and methodologies to meet its enduring mission to enable DoD, the U.S. Government, and international partners to counter and deter WMD and improvised-threat networks.

As a Combat Support Agency, DTRA works alongside interagency and international partners in support of the warfighter to ensure unity of effort in addressing the most consequential risks posed by WMD and improvised threats from competitive powers, rogue states, Violent Extremist Organizations, and transnational crime organizations, while supporting the nation's nuclear deterrent modernization. DTRA's budget request is aligned with overarching guidance from the National Security Strategy, National Defense Strategy, and Nuclear Posture Review. Furthermore, DTRA supports DoD's strategic counter WMD (CWMD) priorities and requirements articulated in the Guidance for the Employment of the Force, the Joint Strategic Capabilities Plan, and Combatant Command campaigns.

DTRA will not only develop the capabilities needed to enable our partners to counter and defeat emerging and disruptive technology threats, but also illuminate the threat networks that undergird our adversaries' acquisition pathways.

Purpose and Scope of Work

To provide resources necessary to procure new investment items required to perform DTRA's assigned mission and to replace mission-essential vehicles in support of DTRA programs.

Funding Detail

DTRA's Procurement funds will support the vehicle program, \$0.207 million in FY 2019, \$0.211 million in FY 2020, and \$0.215 million in FY 2021. The Procurement program also includes resources for Other Major Equipment at a cost of \$5.592 million for FY 2019, \$11.521 million for FY 2020, and \$9.994 million for FY 2021, as well as Overseas Contingency Operations (OCO) funding for Counter Improvised Threat Technologies at a cost of \$5.534 million in FY 2019, \$4.590 million in FY 2020, and \$2.540 million in FY 2021.

<p>Description: The Defense Threat Reduction Agency (DTRA) continues to expand its support to counter and deter Weapons of Mass Destruction and Improvised Threat Networks. The FY 2021 budget supports the procurement and life-cycle replacement of DTRA's fleet of aged agency owned non-tactical vehicles located in the continental United States (CONUS) and overseas (OCONUS), purchased through the General Services Administration and approved acquisition sources that provide a vehicle program which ensures uniform serviceability to all areas, to include tractors, and other specialized industrial trucks powered by electric motors or internal combustion engines. These vehicles are heavily operated in rocky unpaved terrain resulting in shortened life-cycles and increased maintenance volume.</p>												
<p>Justification: FY 2021 funding for this budget line item provides for life-cycle replacement of the fleet-aged, agency owned non-tactical vehicles. Budget estimate assumes procurement of five (5) agency owned vehicles with specific requirements based on factors such as terrain, special support requirements and location. Life-cycle requirements are based on General Services Administration guidelines for fleet management and vehicle maintenance.</p>

Description:

The Other Major Equipment Procurement Program supports the following mission requirements:

- Stand-alone low visibility gamma/neutron wide-area detection system, designed to improve the concealability of the existing Multi-Platform System via miniaturization and modularization;
- Comprehensive Nuclear-Test-Ban Treaty's International Monitoring System and replacement components to support the operations of the Nuclear Arms Control Technology; (NACT) program and the U.S. Government's nonproliferation objectives related to implementation, compliance, monitoring and inspections for nuclear arms control activities;
- Virtualization of the Defense Stockpile Management System (DSMS);
- Materials Handling Equipment (MHE) supports missions in the United States and overseas. MHE refers to various equipment for handling supplies with greater ease and economy, to include but not limited to forklifts. The equipment is operated on rocky and unpaved terrain, resulting in shortened life-cycles and increased maintenance;
- The Other Major Equipment Procurement Program also supports the backend IT infrastructure supporting DTRA's systems, capabilities and security posture.

<p>Justification:</p> <p>The FY 2019 funding of \$5.592 million resourced the following new and continuing efforts:</p> <ul style="list-style-type: none"> - Purchased Information Operations Computer Network Defense system equipment, giving DTRA a greater capability to execute cyber vulnerability scanning tools for Balanced Survivability Assessments. - Continued the first phase to support the one-time replacement of DTRA's cable plant infrastructure started in FY 2018. - Enhanced the DTRA Experimentation Laboratory supporting Technical Reachback. - Continued Defense Stockpile Management System (DSMS) lifecycle replacement of the primary Defense Integration and Management of Nuclear Data Services (DIAMONDS) enterprise server equipment. - Continued support to the Nuclear Arms Control Technology (NACT) program to meet on-going operational responsibilities in support of the Comprehensive Nuclear-Test-Ban Treaty's International Monitoring System and the U.S. Government's nonproliferation objectives related to implementation, compliance, monitoring, and inspection for nuclear arms control activities. - Purchased an additional three (3) Orca systems to provide Weapons of Mass Destruction (WMD) search teams a low visibility gamma/neutron wide-area detection system, designed to improve the concealability of the existing Multi-Platform System via miniaturization and modularization. This is a life-cycle replacement of the existing Multi-Platform System. <p>The FY 2020 budget of \$11.521 million funds the following new and continuing efforts:</p> <ul style="list-style-type: none"> - Purchase an additional eighteen (18) Orca systems to provide WMD search teams a low visibility gamma/neutron wide-area detection system, designed to improve the concealability of the existing Multi-Platform System via miniaturization and modularization. This is a life-cycle replacement of the existing Multi-Platform System. - One-time purchase of two (2) BLACK RHINO Next Generation deployable toolkits designed to provide a lightweight flyaway/portable kit configured with high-end systems pre-loaded with next generation Cybersecurity technologies and software designed to conduct Balanced Survivability Assessments of Military and Federal installations. - Continue DSMS lifecycle replacement of the primary DIAMONDS enterprise server equipment. - Continue support to the NACT program to meet on-going operational responsibilities to operate, maintain, and recapitalize U.S. International Monitoring System stations in support of the United States and Department of Defense objectives and the Comprehensive Nuclear-Test-Ban Treaty objectives related to implementation, monitoring, and verification for nuclear arms control activities. - Purchase Materials Handling Equipment (MHE) in support of missions in the U.S. and overseas. Equipment consists of mechanical devices for handling of supplies with greater ease and economy. MHE includes various equipment, including forklifts, tractors, and other specialized industrial trucks powered by electric motors or internal combustion engines. This could be operated in rocky, unpaved terrain and warehouse environments resulting in shortened life-cycles and increased volume for maintenance. <p>The FY 2021 budget of \$9.994 million will fund the following new and continuing efforts:</p> <ul style="list-style-type: none"> - Continue support to the NACT program to meet on-going operational responsibilities for the recapitalization of the U.S. International Monitoring System stations in support of the United States and Department of Defense objectives and the Comprehensive Nuclear-Test-Ban Treaty objectives related to implementation, monitoring, and verification for nuclear arms control activities. - Perform technical refresh of backend Information Technology infrastructure supporting DTRA's mission critical systems and capabilities. - Purchase an additional eighteen (18) Orca systems to provide WMD search teams a low visibility gamma/neutron wide-area detection system, designed to improve the concealability of the existing Multi-Platform System via miniaturization and modularization. This is a life-cycle replacement of the existing Multi-Platform System. - Replace primary DSMS core systems at DTRA Ft Belvoir and DTRA Kirtland AFB. This replacement of core systems includes the procurement of twenty-four (24) high end components for the complete, across-the-board, virtualization of the DSMS.

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

Remarks:

The FY 2021 request supports the following mission critical programs:

- Nuclear Arms Control Technology (NACT): Provides for recapitalization of components of the International Monitoring System stations managed by the NACT program in support of the United States and Department of Defense objectives and the Comprehensive Nuclear-Test-Ban Treaty.
- Stockpile Logistics: Provides lifecycle replacement of the primary Defense Integration and Management of Nuclear Data Services (DIAMONDS) enterprise server equipment.
- Nimble Elder: Supports the purchase of (18) Orca systems to provide the Weapons of Mass Destruction search teams a low visibility gamma/neutron wide-area detection system to improve their concealability and life cycle replacement of the existing Multi-Platform System via miniaturization and modularization.

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

Remarks:
The FY 2021 request supports DTRA's Information Technology Infrastructure, including technical refresh of backend mission critical systems and capabilities and enhanced security features.

The net decrease of \$1.592 million from FY 2020 to FY2021 is based on the following:

An increase of \$1.495 million to resource DTRA's Information Technology Infrastructure, including technical refresh and enhanced security features.
A decrease of \$3.087 million in infrastructure that included a one-time purchase in FY 2020 of two (2) BLACK RHINO Cyber Assessment tool kits.

<p>Description:</p> <p>FY 2019 funding totals include \$5.534 million appropriated for Overseas Contingency Operations (OCO). FY 2020 funding totals include \$4.590 million for OCO. FY 2021 funding totals include \$2.540 million for OCO.</p> <p>The Defense Threat Reduction Agency (DTRA) counter and deter threat network mission applies the tactics, tools and techniques honed in the counter terrorist fight to counter Chinese, Russian, Iranian, North Korean and their proxy threat networks while maintaining pressure on Violent Extremist Organizations (VEOs). DTRA accomplishes this mission by procuring items to support the following:</p> <ul style="list-style-type: none"> - Sustaining an advanced information technology and fusion infrastructure that enables a threat awareness and understanding capability; - Providing expeditionary, forward-deployed operations, intelligence, training, and advisory capabilities with reach back support; enabling rapid and innovative counter-improvised threat solution development and delivery; - Supporting Military Departments/Services' pre-deployment training and Combatant Commanders' priority training-exercise support requirements; - Leveraging broad Communities of Action that include DoD, other U.S. Government departments and agencies, key coalition allies and partners, academia, and the private sector to employ their capabilities, expertise, access and authorities to counter threat networks and their use and facilitation of improvised weapons. <p>Justification:</p> <p>The FY 2019 Overseas Contingency Operations (OCO) funding of \$5.534 million resourced the following new and continuing efforts:</p> <ul style="list-style-type: none"> - In support of contingency operations in Iraq and Afghanistan, provided U.S. Joint Force Combatant Commanders with an awareness and understanding of the threat as well as the resources needed to support other contingencies including those with the mission to defeat the Islamic State of Iraq and Syria (ISIS). - The provision of technologies to defeat improvised threats such as: advanced wireless signals and compatible electronic countermeasures for improvised explosive device defeat/neutralization; miniaturized and integrated sensors; handheld detectors; and the procurement of mission-critical support items and information technology capabilities in support the DoD's goal to rapidly close the gap between the enemy's innovation cycles and the preparedness and operational capabilities of deploying and deployed U.S. Joint Forces. <p>The FY 2020 OCO funding of \$4.590 million funds the following efforts:</p>

<p>- Lifecycle replacement and additional procurement of Joint Expeditionary Kits (JEKs) used by forward-deployed troops operating in austere locations around the globe. These kits support combat operations by equipping troops with a self-contained analytical tool kit that extends DTRA's combat support and intelligence analysis capabilities into forward operating locations. These locations have minimal or no existing communications infrastructure or tactical intelligence support.</p> <p>- Lifecycle replacement of a high-performance computing platform (primary system and disaster recovery fail-over system) that supports warfighter capabilities for use by Combatant Commands, Theater Special Operations Commands, forward-deployed combat troops, and mission partners in the DoD, Intelligence Community, Services, Homeland Security, and Law Enforcement community.</p> <p>The FY 2021 OCO budget of \$2.540 million will fund the lifecycle replacement of seven (7) JEKs (one third of existing kits are replaced each year under a three-year lifecycle replacement plan) and procurement of two (2) additional JEKs to support additional requirements, for a total of nine (9) JEKs. JEKs are used by forward-deployed troops operating in austere locations around the globe. These JEKs support combat operations by equipping troops with a self-contained analytical tool kit that extends DTRA's combat support and intelligence analysis capabilities into forward operating locations. These locations have minimal or no existing communications infrastructure or tactical intelligence support. The three-year lifecycle management/replacement plan is required because these kits operate in sub-optimal conditions in forward-deployed locations and are subject to accelerated operational wear and failure in the field.</p> <p>The decrease from FY 2020 to FY 2021 is due to revalidation of procurement requirements.</p>

Description:
Program Overview

The Department of Defense Dependents Education (DoDDE) programs are the Department of Defense Education Activity (DoDEA), the Family Advocacy/Assistance Program (FA/FAP).

DoDEA is the Presidential and National showcase for education excellence. The DoDEA provides a world-class education program that inspires and prepares all students in military communities around the world to be successful and responsible citizens in a dynamic global environment. Courses of study in DoDEA schools are often more rigorous than those found in public schools in the United States. The DoDEA schools' diverse curriculum offerings fully support the DoDEA Community Strategic Plan. DoDEA schools are an important quality of life issue for military families and impacts the level of military retention. The DoDEA is a DoD field activity operating under the direction, authority and control of the Under Secretary of Defense for Personnel and Readiness (P&R) and Deputy Under Secretary of Defense for Military Community and Family Policy (MC&FP). The DoDEA is comprised of the Management Headquarters, the Consolidated School Support, the Department of Defense Dependents Schools (DoDDS), and the DoD Domestic Dependent Elementary and Secondary Schools (DDESS).

Purpose and Scope of Work

To provide resources necessary to replace mission essential systems and to procure new investments items required to perform Enterprise management of DoDEAs educational technology and administrative information systems.

Justification:
Resources are required to:

PRIORITY 1: Purchase an Enterprise capability for Wide Area Network (WAN) optimization to include Quality of Service (QOS) controls across the OSI 7-Layer Spectrum. This requirement is intended to cover all DoDEA schools around the world.

PRIORITY 2: Purchase a single Enterprise Point-of-Entry (POE) capability for the availability monitoring of systems and web applications across DoDEA.

Description: The Office of the Secretary of Defense (OSD) is the principal staff element of the Secretary of Defense in the exercise of policy development, planning, resource management, fiscal, and program evaluation responsibilities. OSD includes the immediate offices of the Secretary and Deputy Secretary of Defense, Under Secretaries of Defense, Assistant Secretaries of Defense, General Counsel, Director of Operational Test and Evaluation, Assistants to the Secretary of Defense, Chief Management Officer, and such other staff offices as the Secretary establishes to assist in carrying out assigned responsibilities.												
Justification: In FY 2020 the Office of the Secretary of Defense request for \$43.7 Million supports funding initiatives such as the Mentor Protégé Program, Enterprise Portals Program, Joint Capability Technology Demonstration, Long Range Planning, and the U.S. Mission to NATO. The funding requested is for the modernization of office automation and Information Technology (IT) infrastructure requirements, procurement of mission essential new and replacement equipment for these components and for the Countering Weapons of Mass Destruction Systems to address National Technical Nuclear Forensics (NTNF) and a Defense-wide Countering Nuclear Threats (CNT) Materiel development Program. The funding also supports the DoD's Artificial Intelligence (AI) efforts through the Algorithmic Warfare Cross-Functional Team (AWCFT). As a result of Defense Wide Review, Mentor Protégé Program (MPP) program funding was zeroed. However, the MPP business model will shift from a cost reimbursable program to an allowable cost program to attract and expand participation in the MPP. The Department is committed to working with industry to define the new program requirements, cost structure, and agreements to strengthen the DoD supply chain to address warfighter needs. The total reduction across the Future Years Defense Plan (FYDP) reads as follows: Resources (\$ in Million) FY 2021 -\$29.7 FY 2022 -\$30.1 FY 2023 -\$30.5 FY 2024 -\$30.8 FY 2025 -\$31.2 FYDP -\$152.4

<p>Description:</p> <p>The Chairman of the Joint Chiefs of Staff (CJCS) is the principal military adviser to the President, National Security Council, and Secretary of Defense. The Chairman presides over and serves as a member of the Joint Chiefs of Staff. CJCS relies upon the Joint Staff to craft and distribute guidance for combatant forces' unified strategic direction, operations under unified commands, and integration into effective combat forces. On behalf of the Chairman, the Joint Staff provides Combatant Commands (CCMDs), the Services, and U.S. war fighters with joint policy, strategy, and doctrine necessary to employ effective joint combat forces in contingencies worldwide.</p> <p>Justification:</p> <p>The Joint Staff requests \$8.329M in FY 2021 procurement for mission critical information technology systems and applications investment requirements. The procurement request resources various efforts across the Joint Staff, including National Defense University.</p> <p>Note: In FY 2020, Joint Information Operations Range (JIOR) was moved to a new line item (line 15) to improve visibility into Cyber program resources.</p> <p>1. Planning and Decision Aid System (PDAS):</p> <p>PDAS is a classified, protected program operated by the Joint Staff. PDAS is a command and control system that supports the planning and execution of Joint Staff and Unified Combatant Commanders (CCMD) operations. PDAS is a worldwide network protecting sensitive information that meets the Intelligence Community Directive 503 security requirements. PDAS provides office automation packages, document and information management tools; collaboration, voice, and video tools in a secure, flexible architecture that promotes a distributed enterprise. Within the enterprise, PDAS users have access to their data regardless of log-on location, secure data exchange, conferencing and planning sessions among physically distributed continental United States and outside continental United States locations. PDAS provides users with access to a Help Desk and remote troubleshooting within the PDAS enterprise.</p> <p>PDAS realigned Procurement funding, \$3.0M per year, to O&M to fund higher priority requirements for the following years: FY 2019, FY 2021 – FY 2024. FY 2020 Procurement funding supports equipment modernizations and technology refresh for major systems and data centers. Due to an expanding base of users, Procurement funding was increased by \$1.0M in FY 2020 to support additional equipment modernization and technology refresh requirements.</p>

Line Item MDAP/MAIS Code: N/A		
<p>Equipment modernization will allow the Joint Staff to develop plans to implement materiel solutions to address hardware and software configuration items that are outdated, nearing end-of-life or end-of-support or which can no longer be commercially acquired or supported. Historically, this equipment has been purchased as required due to failures, end-of-life, or end-of-service which has led to many baselines and configurations of deployed hardware, software and communications equipment. Items reach end-of-life in different years providing a cascade of equipment replacement requirements. This spacing lessens the financial impact in any one year but requires constant purchase, integration, testing and installation resulting in higher overall cost and effort. Integration and testing ensures that hardware or software is compatible with other installed hardware and software configuration items and does not introduce vulnerabilities into PDAS, or allow unauthorized personnel to gain access to information for which they are not authorized. There are four specific procurement requirements as follows.</p> <p>PDAS funding will be used to procure equipment modernizations, datacenter refresh, and client refresh. Due to the cyclic nature of the PDAS technical refresh requirement of datacenters, client computers and other IT equipment, this program presents a non-linear funding profile with noticeable spikes in funding requirements during technical refresh years. When possible, equipment is purchased in increments across fiscal years to lessen spikes in funding requirements where possible. Funding spikes support major system upgrades for data centers in FY 2018 and user clients in FY 2020.</p> <p>PDAS is composed of hundreds of user sites with thousands of users worldwide. In recent years, the number of PDAS sites grew by 25 percent and continues with demand for expansion of both new sites and users. Funding provides capabilities, services and the infrastructure necessary to meet these operational mission needs.</p> <p>Client refresh allows the Joint Staff to provide updated computer hardware to the PDAS users in order to be compliant with Security Control 28 (protection of information at rest to prevent insider threats). This periodic refresh will provide users with an updated hardware and software infrastructure, enabling improved performance, security, efficiency, and reducing logistical requirements. Client refresh is planned to begin in FY 2020 and completed in FY 2022.</p> <p>Datacenter refresh allows the Joint Staff to provide refreshed datacenter hardware and software. The hardware and software will be reaching the end of its service life and approaching obsolescence. New equipment for the datacenters will enable the PDAS program to consolidate equipment baselines and provide commonality at the datacenters. This periodic refresh provides PDAS with an updated hardware and software infrastructure, enabling improved performance, security, efficiency, and reduced logistical requirements. From an operational perspective, it moves the program from event-driven, reactive situations of coping with the latest problem to a more proactive, forward-facing operational posture. The focus becomes one of preemptive quality assurance, standardization, and optimization. Datacenter refresh is planned to begin in FY 2025.</p>		
2. Management Headquarters:		
<p>Management Headquarters provides the day-to-day financial resources necessary to conduct Joint Staff operations. Funding supports the mission-unique non-Joint Service Provider (JSP), Joint Staff IT requirements, and technology upgrades for the joint training facility, and Joint Integrated Air & Missile Defense Organization (JIAMDO), Joint Range Extender (JRE).</p> <p>Management Headquarters funds are also used to procure major hardware and software technology upgrade investments for the Suffolk, VA, joint training facility. These funds provide significant network distribution/security, data processing, and capacity upgrades to the Suffolk Data Center to increase performance, security, reliability, and accessibility to the Combatant Commands and Services. Capability upgrades are required to host current joint training applications (Joint Knowledge Online, Joint Training Information Management System, Joint Lessons Learned Information Systems, and Joint Live, Virtual, and Constructive simulations). Additionally, the upgrades provide support to multi-site, multi-command, distributed live, virtual, and constructive joint force training events addressing transregional, multi-domain, and multi-functional threat environments.</p> <p>The Deputy Secretary of Defense approved the alignment of common IT services in the Pentagon and the National Capital Region to JSP operating as a field service activity in Defense Information Systems Agency (DISA). In FY 2018, the Joint Staff Information Network resources permanently transferred to the JSP (DISA PE 0305830K). The overall effect to the Department was a net-zero profile change for FY 2018 and beyond. Limited IT procurement funding was retained for mission-unique, non-JSP Joint Staff IT requirements.</p>		
3. National Defense University (NDU):		

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2021 The Joint Staff		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 15: Major Equipment, TJS		P-1 Line Item Number / Title: 10 / Major Equipment, TJS
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>The mission of the National Defense University (NDU) is to educate joint warfighters in critical thinking and the creative application of military power to inform national strategy and globally integrated operations, under conditions of disruptive change, in order to conduct war. NDU seeks to create strategic advantage by developing warfighters and other national security leaders and forging relationships through whole-of-nations and whole-of-government educational programs, research, and engagement.</p> <p>NDU requests \$6.000M in FY 2021 procurement for mission critical information technology systems and applications. This is a new procurement line item required to acquire IT systems and components that exceed the threshold for using Operation and Maintenance funds (Department of Defense Financial Management Regulation - DoD 7000.14-R) and is a net-zero realignment of funds from Operations and Maintenance to Procurement within the NDU program.</p> <p>The objective is to modernize NDU's outdated IT infrastructure and associated classroom technology which will offset years of deferred lifecycle maintenance. This modernization includes replacing archaic and insecure network infrastructure, updating teaching spaces and tools, and providing the necessary resources to meet the operating standards defined by the Department of Defense (DOD) and the University accrediting standards. Specifically, NDU plans the following IT modernization efforts:</p> <p>Upgrade Campus Servers: Currently, 49% (67/136 servers) of NDU campus servers are at End of Service (EOS) status.</p> <p>Upgrade Telecommunications Closets: Communication closets throughout NDU did not originally follow a configuration management process at installation. As such, cable and physical security (e.g., badge readers) are not in accordance with industry standards, space layout is inefficient, and space environmental support is insufficient. Power temperature (due to HVAC limitations), electrical, and fire safety requirements are at maximum capacity. These inadequacies impose a significant risk to physical and information security as well as to personnel safety.</p> <p>Upgrade Teaching Facilities: Technology in 97 classrooms, conferences rooms, and auditoriums are also at end of service life.</p> <p>In order to accomplish the aforementioned modernization goals, NDU will execute a long term strategy that involves both acquisition and execution elements over a multi-fiscal year timeframe. Planned FY 2021 procurement include: Classroom Technology Audiovisual Upgrades: \$1.5M (estimate) Storage and Server Upgrades: \$1.1M (estimate) Workstation Upgrades: \$1.3M (estimate) Auditorium Upgrades: \$2.1M (estimate)</p> <p>This effort will enable NDU to meet its Professional Military Education mission requirement while maintaining an IT operational environment that is robust, efficient and agile to meet the vision of the Chairman of the Joint Chiefs.</p>

Description: The Chairman of the Joint Chiefs of Staff (CJCS) is the principal military adviser to the President, National Security Council, and Secretary of Defense. The Chairman presides over and serves as a member of the Joint Chiefs of Staff. CJCS relies upon the Joint Staff to craft and distribute guidance for combatant forces' unified strategic direction, operations under unified commands, and integration into effective combat forces. On behalf of the Chairman, the Joint Staff provides Combatant Commands (CCMDs), the Services, and U.S. war fighters with joint policy, strategy, and doctrine necessary to employ effective joint combat forces in contingencies worldwide.												
Justification: Joint Information Operations Range (JIOR) The Joint Information Operations Range (JIOR) provides DoD with a closed-loop network that forms a global live-fire information operations range complex. JIOR uses encrypted tunneling over existing transport networks to conduct mission rehearsal, training, testing, concept development and experimentation in support of Information Operations (IO), Electronic Warfare (EW), Offensive Cyber Operations (OCO), Defensive Cyber Operations (DCO), Spectrum Warfare, Space Operations, and Special Operations Forces mission areas in a realistic threat representative environment. JIOR provides the capability to train and certify Cyber Mission Forces on the full spectrum of cyber weapons/capabilities without risk of observation or fratricide. JIOR is unique within the Department of Defense and is accredited by DIA for operations at Unclassified through Top Secret-Special Compartment Information (TS-SCI) in a Multiple Independent Levels of Security (MILS) environment. JIOR is approved for use by Special Access Programs (SAP), Special Access Required Programs (SAR), and for Special Technical Operations (STO). JIOR provides Combatant Commands, Services and Agencies (C/S/A's) and key allied partners the ability to test deployment and collaboratively gain insights into advanced cyberspace and Electronic Warfare (EW) capabilities under current and future operational environments. JIOR integrates available cyberspace ranges with the training/test audience providing access to low density/high demand test and training resources including critical infrastructure, cyber targets, internet traffic, and opposing forces. JIOR supports Presidential policy and CJCS mandates for training, certification, and recertification of 6000+ cyber mission forces and DoD/Interagency cyber vulnerability assessments. C/S/A's conduct hundreds of mission rehearsal, training, testing, and experimentation events on the JIOR annually. JIOR procurement funding is used to purchase technology upgrades/modernization to the JIOR enterprise network. Planned equipment and software modernization enable the JIOR to extend service to 36 new sites while continuing support to the existing 138 JIOR access points. Equipment for 7 of these sites will be procured in FY 2021.

<p>Historically, JIOR had limited IT refresh funding and has purchased replacement hardware due to failures, end-of-life, or end-of-service constraints which has not allowed for a focused modernization effort. Given the increased cyber mission focus, periodic technology upgrades are required to make the JIOR more efficient, agile, and sufficiently robust to accommodate this significant network expansion to meet the additional Cyber Mission Force demand.</p>

<p>Description: The Chairman of the Joint Chiefs of Staff (CJCS) is the principal military adviser to the President, National Security Council, and Secretary of Defense. The Chairman presides over and serves as a member of the Joint Chiefs of Staff. CJCS relies upon the Joint Staff (TJS) to craft and distribute guidance for combatant forces' unified strategic direction, operations under unified commands, and integration into effective combat forces. On behalf of the Chairman, TJS provides Combatant Commands (CCMDs), the Services, and U.S. war fighters with joint policy, strategy, and doctrine necessary to employ effective joint combat forces in contingencies worldwide.</p>												
<p>Justification: FY 2019 CE2T2 procurement funding was used to support:</p> <ol style="list-style-type: none"> 1. USCYBERCOM-led CYBER FLAG, CYBER GUARD, and CYBER KNIGHT exercises. The exercise environment included a "blue forces" Department of Defense information network, a "gray" network of internet spaces to include .gov and .edu domains that emulated Internet sites and user activities, a realistic representation of an adversary "red" network, and a management systems network. This emulated training environment utilized the existing Joint Information Operation Range (JIOR) transport layer to directly supported USCYBERCOM's mission. Procurement funding increased storage capacity and improved the survivability/durability of the target environment. 2. Joint Interoperability Division (JID). JID provided Tactical Data Link and Joint Interface Control Officer (JICO) training. Procurement funds supported acquisition of one Satellite Simulator (SATSIM) and two Situational Awareness Data Link (SADL) radio systems required for JICO mission equipment.

Description:

This is a New Start.

Programmed Transferred from Air Force Light Attack Aircraft (P-1 Line Item Number OAX0001) to the United States Special Operations Command beginning with FY 2021 budget request.

Armed Overwatch provides Special Operations Forces (SOF) deployable and sustainable aircraft systems fulfilling Close Air Support, Precision Strike, and SOF Intelligence, Surveillance & Reconnaissance (ISR) requirements in austere and permissive environments for the Countering-Violent Extremist Organizations mission. Armed Overwatch missions include: Armed ISR, Strike Coordination & Reconnaissance, and Airborne Forward Air Control. These capabilities will be pursued via rapid fielding techniques when appropriate.

Description: This P-1 Line Item is part of the Military Intelligence Program (MIP). It includes programs which provide for Intelligence, Surveillance, and Reconnaissance (ISR) in support of irregular warfare operations. This line funds Special Operations Forces (SOF) peculiar modifications and rapid fielding to manned ISR aircraft. Primary mission emphasis is on signals intelligence, imagery, target acquisition, threat warning, threat identification, and surveillance missions. Includes avionics, sensor maintenance, peculiar support equipment, communication systems, common datalink systems, training, trainers, Mission Training Devices (MTD) and the associated ground processing, exploitation, and dissemination system. This program received FY 2019 Overseas Contingency Operations (OCO) funding (\$5.000 million) and FY 2020 Enduring OCO funding (\$5.000 million). FY 2021 funding includes OCO for Enduring Requirements (\$5.000 million). These capabilities will be pursued via rapid fielding techniques when appropriate.

Description:

This P-1 Line Item is part of the Military Intelligence Program (MIP). The mission of the MC-12W/Javaman is to provide a manned fixed wing capability for tactical airborne Intelligence, Surveillance, Reconnaissance (ISR), and Targeting in support of Theater Special Operations Forces. This line funds Special Operations Forces (SOF) peculiar manned ISR aircraft modifications and associated training systems to meet evolving SOF mission requirements. There is no associated Research, Development, Test and Evaluation. These capabilities will be pursued via rapid fielding techniques when appropriate. This program received Overseas Contingency Operations (OCO) funding in FY 2019 (\$23.900 million) and FY 2020 Enduring OCO funding (\$5.000 million). FY 2021 funding includes OCO for Enduring Requirements (\$5.000 million).

Description: Army Special Operations Aviation (ARSOA) provides organic aviation support to Special Operations Forces (SOF) for world-wide contingency operations and low-intensity conflicts, multi-domain operations (MDO) against near peer threat environments. ARSOA utilizes 72 highly specialized MH-60 aircraft capable of world wide rapid deployment operations and penetration of hostile areas for these missions. The aircraft are capable of operating at extended ranges under adverse weather conditions and harsh environments deep in enemy territory. These aircraft are used to infiltrate, provide logistics for, reinforce, provide close air support, and extract SOF. The MH-60 program provides ARSOA with a single model aircraft prepared to support the SOF ground force commander into the foreseeable future. This program received Overseas Contingency Operations (OCO) funding in FY 2019 (\$27.600 million) and enduring OCO for FY 2020 (\$25.264 million) to replace aircraft battle losses that occurred in FY 2017 and FY 2018. Configuration of baseline aircraft received from Army will drive the increase in costs from year-to-year in order to complete the SOF-unique conversions. These capabilities will be pursued via rapid fielding techniques when appropriate.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

 Description: This P-1 Line Item provides ongoing reliability, maintainability, spares, equipment, weapons, and Aircraft Survivability Equipment (ASE) upgrades for fielded rotary wing aircraft and subsystems. These include: A/MH-6 Low Cost Modifications (LCM), A/MH-6 Block Upgrades, MH-47 Block Upgrades, MH-47 LCM, MH-60 LCM, Improved Rotary Wing Electro-Optical Sensor (IRES), formerly known as Next Generation Forward Looking Infrared (NGFLR), Secure Real Time Video (SRTV), Simulator Block Upgrades (SBUD), Commercial Spares, ASE, Special Operations Forces (SOF) Common Terrain Following/Terrain Avoidance (TF/TA), best known as Silent Knight Radar (SKR) or AN/APQ-187, Mission Processor Upgrades (MPU), MH-60M Block Upgrades, and Degraded Visual Environment (DVE) Pilotage System. SOF provide organic aviation support for worldwide contingency operations and low-intensity conflicts. The specialized aircraft for these missions must be capable of worldwide rapid deployment, undetected penetration of hostile areas, and operations in contested or anti-access/area denial (A2/AD) environments. These aircraft must also be capable of operating at extended ranges under adverse weather conditions to infiltrate, provide logistics for, reinforce, and extract SOF. These capabilities will be pursued via rapid fielding techniques when appropriate.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

1. The A/MH-6M LCM include modifications to the A/MH-6 Mission Enhanced Little Bird (MELB), application of Commercial Engine Bulletins and Federal Aviation Administration Airworthiness directives, SOF-peculiar Engineering Change Proposals (ECP), spares, and minor modifications to SOF-peculiar equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, and incorporate mission critical capabilities.

<p>FY 2021 PROGRAM JUSTIFICATION: Procures various hardware and software solutions to improve reliability and maintainability, correct deficiencies, address obsolescence, and incorporate mission critical capabilities.</p> <p>2. The MH-47 LCM include Army ECP modifications due to the unique configuration of SOF aircraft, SOF-peculiar ECPs, spares, and minor modifications to SOF-peculiar equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, and incorporate mission critical capabilities.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures various hardware and software solutions to improve reliability and maintainability, correct deficiencies, address obsolescence, and incorporate mission critical capabilities.</p> <p>3. The MH-60 LCM include modifications to the MH-60 in order to provide mission payload, greater range, SOF-peculiar ECPs, spares, and minor modifications to SOF-peculiar equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, and incorporate mission critical capabilities including improvements over the enduring MH-60M fleet. This program supports modifications that are mission unique and time-sensitive.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures various hardware and software solutions to improve reliability and maintainability, correct deficiencies, address obsolescence, and incorporate mission critical capabilities.</p> <p>4. The SBUD program procures hardware and software updates for six high fidelity special mission aircraft flight simulators for the MH-47, MH-60, A/MH-6, and related peripheral training devices. The simulator updates provide aviators the ability to train in the exact same helicopter configuration that the unit has on the flight line, ensuring no negative habits develop through training. SBUD ensures realistic full-spectrum training and mission rehearsal capabilities that reduce risk for complex mission sets; reduce overall cost; create positive training habits; and safely recreates the stresses of live training. These training devices have the highest utilization rate across the Army Aviation enterprise, ensuring the 160th Special Operations Aviation Regiment (Airborne) (160th SOAR) meets their aviator throughput requirement by maximizing resources required to attain aircraft and mission proficiency.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Continues to procure software and hardware modifications for the high fidelity special mission aircraft flight simulators and associated production support. Continues modifications and upgrades for the MH-47 configuration and begins modernization updates for MH-60 configuration.</p> <p>5. Commercial Spares provides replenishment and sparing of SOF-peculiar mission equipment components for Army Special Operations Aviation (ARSOA) spare parts greater than the \$250,000 Operations & Maintenance (O&M) individual item purchase threshold. Provides for in-service replacement of items damaged beyond economical repair.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures commercial spare parts.</p> <p>6. SRTV program provides full motion video from ground or air assets to enable real-time threat assessment and to maximize effectiveness and survivability. SRTV will increase mission success and crew/platform survivability by confirming or denying that the assault plan is viable and that the offensive maneuver force is sufficient to overwhelm the enemy.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures system support to optimize SRTV system configuration. Candidate areas include a smaller, lighter-weight SRTV processor suitable for use on the A/MH-6, display applications providing flexibility to the aircrew, and transceivers compatible with evolving video formats.</p> <p>7. The IRES program, formerly known as NGFLR, procures new and increased sensor capabilities that are necessary due to obsolescence and the underperformance of sensor systems currently supporting air to ground tactics, techniques, and procedures. The improved sensor capability will have better image quality and pointing accuracy, increased spectrum, and will be lighter weight to mitigate capability gaps in currently employed sensor systems on A/MH-6, MH-60M, and MH-47G platforms. This capability will provide increased situational awareness primarily through improved target identification and target location accuracy at extended ranges.</p>

Exhibit P-40, Budget Line Item Justification: PB 2021 United States Special Operations Command		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 02: Special Operations Command / BSA 1: Aviation Programs		P-1 Line Item Number / Title: 0201RWUPGR / ROTARY WING UPGRADES AND SUSTAINMENT
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: 1160482BB, 1160427BB, 1160403BB
Line Item MDAP/MAIS Code: 0000		
FY 2021 PROGRAM JUSTIFICATION: Procures 21 A/B Kits and provides for integrated logistics support.		
8. The DVE Pilotage System solution will fuse information from aircraft sensors and digital terrain elevation data to display real-time reference points, obstacles, and landing zone information to the aviator. The DVE solution will provide MH-47 and MH-60 aircrews with visual cues for obstacle avoidance and aircraft control during all phases of flight and significantly increase crew and passenger survivability in DVE. The AAQ-250 Brownout Camera (a sub-component of the DVE Pilotage System) is being procured and fielded as an interim capability to provide the user with enhanced situational awareness ahead of the full DVE system. Procured Brownout Cameras will be provided as GFE to the vendor once production begins on DVE Pilotage Systems.		
FY 2021 PROGRAM JUSTIFICATION: Procures 13 A Kits, 11 avionics integration B Kits, and production support. A Kit quantities support both MFP-2 Service-provided and MFP-11 procured B Kits.		
9. This program procures a SOF Common TF/TA SKR, spares, and ECPs. SKR provides a low-probability of intercept/low probability of detection radar to defeat advanced passive detection threats while maintaining the ability to fly safe TF. This radar is targeted for use on all MH-47G Chinook heavy assault helicopters and MH-60M medium assault helicopters. Radars for CV-22 Tilt-Rotor aircraft and MC-130J aircraft are reported by the Fixed Wing Program of Record. This radar provides mission essential capabilities while addressing obsolescence issues associated with today's legacy radar systems: the AN/APQ-174B and AN/APQ-186.		
The SKR program office will award a three-year multiyear contract in FY 2021 which will stabilize the procurement price of the radar. Current unit quantities and cost reflect existing Indefinite Delivery/Indefinite Quantity (IDIQ) contract pricing. Per unit cost and quantities will be updated following contract award in 1QFY21. This budget request includes funding to support a FY 2021 through FY 2023 Multi-Year Procurement (MYP) for the SOF Common TF/TA SKR program. This MYP plans to award SKRs with funding in the following P-1 Titles: Rotary Wing Upgrades and Sustainment, CV-22 Modification, and AC/MC130J.		
FY 2021 PROGRAM JUSTIFICATION: Procures A Kits, 9 SKR B Kits, and three initial spares.		
10. The MPU replaces the current Mission Processor (to include the Multi-Function Displays and Control Display Units) within all ARSOA aircraft. This upgrade increases software processor performance margins and enables the Operational Flight Program (OFP) to accommodate planned future updates, which include: Federal Aviation Agency Global Air Traffic Management (GATM), and Tactical Mission Networking (TMN), formerly known as Airborne Mission Network (AbMN). This program also includes upgrades to the Common Avionics Architecture System (CAAS) (MH-60/MH-47) and the Aviation Management System (AMS) (A/MH-6), which are the software backbone to the OFPs, and upgrades the current embedded Global Positioning System (GPS)/Inertial Navigation System with an all-in-view GPS card in accordance with Global Area Navigation System/GATM requirements. TMN will install ground force compatible radios to digitally exchange tactical information among participating forces culminating in an accurate, composite, and correlated picture of the entire battle space. TMN provides ARSOA airborne platforms and on-board supported forces digital connectivity with ground elements and other airborne assets to include a Common Operational Picture (COP) of hostile and friendly forces.		
FY 2021 PROGRAM JUSTIFICATION: Procures both AMS and CAAS software updates; 96 General Purpose Processing Unit (GPPU) Power Supply Module B kits, TMN A Kits, B kits and 17 multi-band network radios, hardware and software integration, Non-Reoccurring Engineering MPU and TMN integration assets/support.		
11. The ASE program procures and fields critical active and passive SOF-unique ASE to counter rapidly evolving Surface-to-Air (SA) and Air-to-Air (AA) threat systems for the A/MH-6, MH-60, and MH-47. This program includes fielding of new systems and pre-planned product improvements/upgrades of fielded ASE, addresses obsolescence issues through production based engineering change proposals, and provides technical data and fielding support and testing. Beginning in FY 2017 this program included the Suite of Integrated Radio Frequency Countermeasures (SIRFC) and Infrared Countermeasures (IRCM) programs. SIRFC is a fully integrated, modular and adaptable suite of active aircraft survivability equipment that increases combat effectiveness and potential for mission accomplishment for ARSOA aircraft. SIRFC provides state-of-the-art radar warning receivers and technologically advanced radar-jamming capabilities for increased threat detection, enhanced situational awareness, and defensive countermeasures. The Infrared Countermeasures (IRCM) program provides a low Size, Weight, and Power capability suitable for the A/MH-6 MELB with potential use on the MH-60 and MH-47 aircraft. The IRCM program fields a Department of Navy lightweight IRCM system to include a missile warning system and countermeasure capability. The IRCM program will also develop, integrate, qualify, test and field an engine exhaust heat suppressor for the A/MH-6 MELB to reduce its heat signature and reduce the risk of engagement by heat seeking missiles.

Exhibit P-40, Budget Line Item Justification: PB 2021 United States Special Operations Command		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 02: Special Operations Command / BSA 1: Aviation Programs		P-1 Line Item Number / Title: 0201RWUPGR / ROTARY WING UPGRADES AND SUSTAINMENT
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: 1160482BB, 1160427BB, 1160403BB
Line Item MDAP/MAIS Code: 0000		
<p>FY 2021 PROGRAM JUSTIFICATION: Procures A/MH-6 IRCM 3.0 A Kits and missile warning and counter measure upgrades; SIRFC non-recurring upgrades, integration, flight, and fielding support.</p> <p>12. The MH-60M Block Upgrades program continues to modify the fleet of 72 U.S. Army SOF MH-60M aircraft. The current configuration (commonly referred to as Block 0) is already undergoing a Block 1 modification. Known upgrades include Common IRCM (CIRCM), TF/TA SKR, obsolescence of weapons targeting hardware, vibration reduction of direct fire weapons systems, integration of Upturned Exhaust System (UES) II, TMN, and future mission equipment technology insertions. This program will result in the most relevant and combat effective ARSOA MH-60M platform, providing savings in operations and sustainment costs. The MH-60M provides the critically needed performance for high altitude, hot temperature, heavy aircraft missions commonly required to support Overseas Contingency Operations and multi-domain operations (MDO) against near peer threat.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures Nine A Kits, Nine B Kits, system engineering, program support, and production engineering for Block upgrades to MH-60M ARSOA aircraft and modifications.</p> <p>13. A/MH-6M Block Upgrades. This modification restores structural, performance, and safety margins for the aircrews while providing an acceptable level of situational awareness in the cockpit and accommodations for rapid integration of future capabilities. This project includes modifications to ASE and weapons systems to counter rapidly emerging threats, improve lethality and enhance aircraft. Installation funding is required in the fiscal year prior to aircraft induction to allow for build of installation kits.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures 7 Avionics, 9 Performance, 9 Collective Trim, and 11 Integrated Airframe Shells, 4 legacy Airframe parts, and integration support.</p> <p>Efforts with funding starting in FY 2022 through FY 2025 are summarized on the P-40. Not all details of this funding are included in this P-40 exhibit set. A summary of the excepted details is as follows:</p> <div style="margin-left: 400px;"> <p>(a) FY 2022 Cost Delta: 24.532 million</p> <p>(b) FY 2023 Cost Delta: 26.432 million</p> <p>(c) FY 2024 Cost Delta: 26.638 million</p> <p>(d) FY 2025 Cost Delta: 27.180 million</p> </div>

Description:

The Improved Rotary Wing Electro-Optical Sensor (IRES) program, formerly known as Next Generation Forward Looking Infrared (NGFLR), is a commercial off the shelf (COTS)/non-developmental lighter-weight Electro-Optical Sensor System (EOSS) needed to reduce aircraft nose weight and mitigate obsolescence of the currently fielded Q2 and Q3 FLIR systems on the MH-47, MH-60, and A/MH-6 aircraft. Both assault and attack turreted systems will include multi-spectrum infrared (IR), day TV, laser spot tracker, laser range finder, and laser illuminator with the ability to fuse camera images. The attack turrets will also include a laser designator for targeting capabilities.

Description:

This program procures a Special Operations Forces (SOF) Common Terrain Following/Terrain Avoidance (TF/TA) Silent Knight Radar (SKR), spares, and Engineering Change Proposals (ECPs). SKR provides a low-probability of intercept/low probability of detection radar to defeat advanced passive detection threats while maintaining the ability to fly safe TF. This radar is targeted for use on all MH-47G Chinook heavy assault helicopters and MH-60M medium assault helicopters. Radars for CV-22 Tilt-Rotor aircraft and MC-130J aircraft are reported by the Fixed Wing Program of Record. This radar provides mission essential capabilities while addressing obsolescence issues associated with today's legacy radar systems: the AN/APQ-174B and AN/APQ-186.

The SKR program office will award a 3-year multiyear contract in FY 2021 which will stabilize the procurement price of the radar. Current unit quantities and cost reflect existing Indefinite Delivery/Indefinite Quantity (IDIQ) contract pricing. Per unit cost and quantities will be updated following contract award in the first quarter of FY 2021. This budget request includes funding to support a FY 2021 through FY 2023 Multi-Year Procurement (MYP) for the SOF Common TF/TA SKR program. This MYP plans to award SKRs with funding in the following P-1 Titles: Rotary Wing Upgrades and Sustainment, CV-22 Modification, and AC/MC130J.

Development Status/Major Development Milestones		
Date	Title	Description
May 2019	MH-47G/MH-60M Regression test and functional qualification test (FQT)	Successful flight demonstration of software version 7.15, regression test, and FQT
Jun 2019	Low Rate Initial Production (LRIP) IV	Procured 16 (13 SKRs, 3 Spares) LRIP units for Rotary Wing
Nov 2019	Full Rate Production (FRP) Lot I	Procure 12 (9 SKRs, 3 Spares) FRP units for Rotary Wing
Nov 2020	FRP Lots 2-4 Multi-Year Procurement (MYP) contract award	Planned award of three-year MYP contract for FRP in FY21, FY22, and FY23
Oct 2019	FRP Decision	Obtained Acquisition Decision Memorandum (ADM) for FRP from Milestone Decision Authority (MDA)

Description:

The Mission Processor Upgrades (MPU) program provides for technology refreshment/upgrade/modernization of cockpit displays (Multi-Function Display and Control Display Units) and mission/video processors for all Army Special Operations Aviation (ARSOA) aircraft. Upgrading all internal processors increases the processing power to support critical functionality and emerging technologies that will be integrated into the Common Avionics Architecture System (CAAS). This mission processor upgrade provides the processing and memory resources required to incorporate the following functions into the General Purpose Processing Unit (GPPU): Global Air Traffic Management (GATM), which replaces ground-based navigation aids with an international requirement that all aircraft be compliant with digital and space-based navigation systems; Automatic Dependent Surveillance-Broadcast (ADS-B) equipment allows Global Positioning System (GPS) equipped aircraft to transmit their location and altitude to other aircraft and air traffic control. This capability has become increasingly critical as the Federal Aviation Agency (FAA) begins shutting down many of their existing surveillance radars. Tactical (Airborne) Mission Network (TMN) (formerly known as Airborne Mission Network (AbMN)) will install ground force compatible radios to digitally exchange tactical information among participating forces, culminating in an accurate, composite, and correlated picture of the entire battlespace. It provides critical, real-time battlefield data to ground forces and aircrew while en route to the objective. TMN provides ARSOA airborne platforms and onboard supported forces digital connectivity with ground elements and other airborne assets, to include a Common Operational Picture of hostile and friendly forces.

<p>Description:</p> <p>Special Operations Forces (SOF) provide organic aviation support for world-wide contingency operations and low-intensity conflicts. The specialized aircraft for these missions must be capable of world-wide rapid deployment, undetected penetration of hostile areas, and operations in contested or anti-access/area denial (A2/AD) environments. The Aircraft Survivability Equipment (ASE) program procures and fields critical active and passive SOF-unique aircraft survivability equipment to counter rapidly evolving Surface-to-Air (SA) and Air-to-Air (AA) threat systems for the A/MH-6, MH-60, and MH-47. These SA threat systems are evolving at an unprecedented rate, requiring rapid procurement of mission equipment that will reduce the probability of engagement and increase the probability of detecting and countering threat systems. This program includes fielding of new systems and pre-planned product improvements (P3I)/upgrades of fielded aircraft survivability equipment, addresses obsolescence issues through production based engineering change proposals, and provides technical data and fielding support and testing. P3I upgrades may include expansion of frequency ranges on existing systems, modernization of legacy components, and potential "collaborative off-boarding/on-boarding" detect/countermeasures capabilities to provide expanded coverage for aircrews in high-threat environments.</p> <p>The Infrared Countermeasures (IRCM) program provides a new light-weight, mission-configurable Missile Warning System (MWS), IRCM capability and exhaust suppressor at a weight suitable for the A/MH-6 Mission Enhanced Little Bird (MELB). In addition to meeting the A/MH-6 MELB's weight/size restrictions, the light-weight MWS may potentially be used on MH-60 and MH-47 aircraft to provide for the increased payload capacity demanded by the user. Army Special Operations Aviation (ARSOA) requires the addition of IRCM to protect against increasingly proliferated and sophisticated Man-Portable Air-Defense Weapons.</p> <p>The Suite of Integrated Radio Frequency Countermeasures (SIRFC) is the current generation of Radio Frequency (RF) detection and countermeasures for ARSOA MH-47 and MH-60 aircraft. SIRFC passively detects and actively counters radar-guided missile and anti-aircraft artillery systems. SIRFC is a critical component of deep, clandestine penetration capabilities, as the state-of-the-art Radar Warning Receiver (RWR) provides enhanced situational awareness and the advanced radar-jamming components provide the defensive capabilities required to defeat RF threats. Jammers consist of both Line Replaceable Unit (LRU)-2 High Power Remote Transmitter, and LRU-3 Electronic countermeasures. Digital RF Memory, Fast Acquisition Receiver, and pre-planned product improvements provide state-of-the-art capability against advanced RF threats. Direction Finding/Intermediate Frequency & Swept Receiver upgrades ensure Silent Knight Radar compatibility. This P-3A reflects updated negotiated prices, new contract terms allowing individual LRU purchases, and Economic Order Quantity procurements.</p>

Description:

This program continues to modify the fleet of 72 U.S. Army Special Operations Forces (SOF) MH-60M aircraft. The current configuration (commonly referred to as Block 0) is already undergoing a Block 1 modification. The pace of technology and user requirements dictate new system configurations before OPTEMPO provides for complete fielding of Block 1. Known upgrades include Common Infrared Countermeasures, Terrain Following/Terrain Avoidance Radar (TF/TAR), obsolescence of weapons targeting hardware, vibration reduction of direct fire weapons systems, integration of Upturned Exhaust System II, Tactical (Airborne) Mission Network, and future mission equipment technology insertions. This program will result in the most relevant and combat effective Army Special Operations Aviation (ARSOA) MH-60M platform, providing savings in operations and sustainment costs. The MH-60M provides the critically needed performance for high, hot, heavy missions commonly required to support Overseas Contingency Operations (OCO).

Description:

The A/MH-6M Block 3 modification consists of three major efforts: a new fuselage, a performance enhancement kit, and a new cockpit. The fuselage and performance kit are produced by Boeing. The cockpit is comprised of hardware made by Collins Aerospace, Industrial Electronics Engineers, Avalex, L3-Harris, and software developed by Collins Aerospace. The systems integration and aircraft modification are completed by Lockheed-Martin at the Special Operations Forces Support Activity (SOFSA) in Lexington, KY.

Description:

This P-1 Line Item is part of the Military Intelligence Program (MIP). United States Special Operations Command (USSOCOM) has been designated as the DoD lead for planning, synchronizing, and as directed, executing global operations against terrorist networks and targets. USSOCOM requires the capability to find, fix, and finish time-sensitive high-value fixed and fleeting targets at the unit and team level without placing personnel and units in harm's way. These targets can often only be identified with patient collection of information and require rapid, decisive action during the short periods in which they present themselves. This line item addresses the primary areas of Intelligence, Surveillance, Reconnaissance (ISR), and Targeting capabilities for Special Operations Forces (SOF). This program received Overseas Contingency Operations (OCO) funding in FY 2019 (\$43.600 million) and FY 2020 Enduring OCO funding (\$8.207 million). FY 2021 funding includes OCO for Enduring Requirements (\$8.207 million).

This line item procures various expendable Unmanned Aerial Systems (UAS) and related sensor payloads for intelligence, surveillance, and reconnaissance, which allows for remotely controlled system emplacement and data exfiltration. These systems are procured from an Approved Resource List in order to provide for rapid fielding of proven capability. It also funds the acquisition and support of SOF-unique mission kits, mission payloads, weaponization, and modifications of Unmanned Aerial Vehicles (UAVs), ground control stations, and training systems. As the combatant command executing operations, USSOCOM requires the capability to find, fix, finish, exploit, and analyze time-sensitive high-value targets. USSOCOM aims to standardize payload interfaces for Special Operation Forces (SOF) Group 1-4 UAS to accelerate the procurement and fielding of much needed capability in order to reduce the time and cost to develop, field, and sustain SOF Group 1-4 UAV future payload enhancements. This will allow user in field to quickly change out payloads on the same platform and reduce time between sorties. These capabilities will be pursued via rapid fielding techniques when appropriate.

For the Defense Wide Review (DWR), USSOCOM performed a comprehensive analysis of future capabilities and is divesting of the Special Application for Contingency (SAFC) Procurement budget while all future efforts of the program will be completed in RDTE to better align with the Department's priorities as outlined in the National Defense Strategy (-\$1.573 million).
-\$1.573 million - SAFC - divests various UAS platforms and related sensor payloads.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.										
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										

Justification:

1. Expeditionary Organic Tactical Airborne ISR (AISR) Capability Set (EOTACS). EOTACS are a family of organic tactical group 1 and group 2 UAS systems. This program procures SOF-unique mission kits, mission payloads, air vehicle enhancements, and modifications on UAS and related ground control stations. Ancillary equipment includes payloads, recovery systems, and launchers.

FY 2021 PROGRAM JUSTIFICATION: Procures 30 Group 1 Short Range/Short Endurance Vertical Take-Off and Landing (VTOL) systems, 20 Group 1 Micro VTOL systems, and ancillary equipment.

FY 2021 OCO PROGRAM JUSTIFICATION: Procures 17 Group 1 Nano VTOL systems.

2. Group 1 UAS funding will be realigned and executed under the EOTACS program beginning in FY20.

3. Group 2 Multi-Mission Tactical Unmanned Aerial System (MTUAS). MTUAS are Group 2 systems, between 21 pounds and 55 pounds in weight. MTUAS provides SOF with an organic ISR capability. This program procures UAS, SOF-unique mission kits, mission payloads, air vehicle enhancements, training systems, and Ground Control Stations (GCS). Ancillary equipment includes baselined versions of payloads, recovery systems, launchers, and GCS modifications.

FY 2021 PROGRAM JUSTIFICATION: Procures ancillary equipment and payloads. Begins procurement of air vehicles, ground control stations, payloads, support equipment, tools, spares, training, interim technical support, and technical data for revised user requirements.

4. Group 3 UAS are systems, between 55 pounds and 1320 pounds in weight. This program procures SOF-unique mission kits and mission payloads. Group 3 UAS provide longer flight duration and payload capacity.

FY 2021 OCO PROGRAM JUSTIFICATION: Procures SOF-peculiar advanced payload suites for 10 systems.

5. Group 4 UAS are large systems, greater than 1,320 pounds in weight flying less than 18,000 feet above sea level. The MQ-1 UAV line funds the acquisition and support of SOF-unique mission kits, mission payloads, weapons, and modifications on MQ-1C UAVs, GCS, and training systems as part of the Medium Altitude Long Endurance Tactical (MALET) Program. Group 4 UAS Program of Record in FY19 is a transition from Air Force Research Laboratory (AFRL) Rapid Capability Insertion (RCI) formerly known as Long Endurance Aircraft (LEA) program. The LEA UAV line funds the acquisition and support of SOF-unique mission kits, mission payloads, weapons, and modifications on the LEA Family of Systems aircraft, turrets, and GCSs in support of Joint Special Operations Command (JSOC) ISR Multi-Intelligence capacity.

FY 2021 PROGRAM JUSTIFICATION: Procures SOF unique mission MQ-1 kits and payloads and persistent close air support integration.

FY 2021 OCO PROGRAM JUSTIFICATION: Procures 12 SOF unique mission kits and payloads.

<p>6. Special Applications for Contingencies (SAFC) procures various UAS platforms and expendable and related sensor payloads for intelligence, surveillance, and reconnaissance. Platforms will be used to develop/test payload systems that will increase UAS flight range and provide the user real-time access to analyzed target and battlefield data for SOF Group 1-4 UAS. For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is divesting of the SAFC Procurement budget while all future efforts of the program will be completed in RDTE to better align with the Department's priorities as outlined in the National Defense Strategy.</p>

Description:
 Note: C-27J modifications for FY19 President's Budget was under Aircraft Support P-1 Line Item Titled: Other Items <\$5M.

The Non-Standard Aviation (NSAV) line provides funding to purchase, modify, equip, and rapidly field Special Operations Forces (SOF) NSAV, Aviation Foreign Internal Defense (AvFID), and C-27J aircraft to provide the required capabilities outlined below. This line also funds Low Cost Modifications (LCM) of NSAV assets to support world-wide SOF mobility and priority Partner Nation training. This program received Overseas Contingency Operations (OCO) funding in FY 2019. There is no associated RDTE. These capabilities will be pursued via rapid fielding techniques when appropriate.

For the Defense Wide Review (DWR), United States Special Operations Command (USSOCOM) performed a comprehensive analysis of future capabilities and is reducing AvFID and NSAV programs to better align with the Department's priorities as outlined in the National Defense Strategy (-\$32.514 million).
 -\$2.514 million - NSAV - reduces LCM
 -\$30.000 million - AvFID - reduces two Armed Intelligence, Surveillance, and Reconnaissance (ISR) aircrafts.

Justification:

1. NSAV. Program supports worldwide SOF missions and must have flexible capabilities to facilitate Theater Special Operations Command (TSOC) tactical and strategic objectives. The NSAV program provides Short Take-Off and Landing, flexible, rapid, responsive operational support of special operations teams. Support to TSOCs and operational mission objectives include: SOF team mobility in austere and remote locations, casualty evacuation, non-combatant evacuation operations, and humanitarian assistance.

2. AvFID. Conduct training of fixed wing aircraft with priority Partner Nations in support of U.S. strategic objectives. AvFID aircraft must have flexible capabilities to support objective mission sets including, but not limited to, train, advise, and assist Partner Nation in the areas of day and night operations in low-level navigation, airdrop, air land resupply, leaflet drop, medical evacuation (MEDEVAC), personnel recovery, visual meteorological condition formation, aerial ISR, airborne command and control, convoy escort, close air support, strike, border patrol, counter narcotics, and humanitarian relief.

FY 2021 PROGRAM JUSTIFICATION: Funds three Armed ISR aircraft and initial spares.

3. C-27J. This program provides modifications to C-27J aircraft with equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, incorporate mission enhancements, and make critical safety changes.

FY 2021 PROGRAM JUSTIFICATION: Funds one landing gear overhaul and two aircraft cockpits.

Efforts with funding starting in FY 2022 through FY 2025 are summarized on the P-40. Not all details of this funding are included in this P-40 exhibit set. A summary of the excepted details is as follows:

(a) FY 2022 Cost Delta: 19.696 million

(b) FY 2023 Cost Delta: 1.814 million

(c) FY 2024 Cost Delta: 1.856 million

Description:

This program provides modifications to C-27J aircraft with equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, incorporate mission enhancements, and make critical safety changes. Current projects include but are not limited to: procuring landing gear, overhaul of landing gear, cockpit resets and upgrades. FY 2019 for C-27J resides in P-1 line item Other Items <\$5 million. No associated RDTE funds.

Description:

This P-1 Line Item is part of the Military Intelligence Program (MIP). The mission of the U-28 is to provide a manned fixed wing capability for improved tactical airborne Intelligence, Surveillance, Reconnaissance (ISR), and Targeting in support of Theater Special Operations Forces. United States Special Operations Command (USSOCOM) funds Special Operation Forces (SOF) peculiar modifications to rapidly field U-28 aircraft and low cost modifications for the Mission Training Device (MTD), and support equipment to meet evolving mission requirements. This program received Overseas Contingency Operations (OCO) funding in FY 2019 (\$73.422 million) and FY 2020 direct OCO funding (\$31.500 million). There is no associated Research, Development, Test, and Evaluation (RDTE). These capabilities will be pursued via rapid fielding techniques when appropriate.

Justification:

1. Mission Systems: Provides SOF-unique modifications to include: avionics, communication systems, Intelligence, Surveillance, and Reconnaissance (ISR) systems, mission workstations, and mission software.

 FY 2021 PROGRAM JUSTIFICATION: Procures and installs low cost modifications to U-28 mission systems.
2. MTD: Procures MTD and concurrency, obsolescence, and fidelity low cost modifications to the U-28 MTD ensuring realistic full-spectrum training and mission rehearsal capabilities. The MTD reduces mission risk, overall costs, and safety stresses of live training required to attain aircraft and mission proficiency.

 FY 2021 PROGRAM JUSTIFICATION: Installs MTD simulator low cost modifications to mission systems.
3. U-28 Automatic Dependent Surveillance – Broadcast (ADS–B) Upgrade: Federal Aviation Authority (FAA) mandate to improve safety and efficiency enabling unrestricted flight profiles in FAA airspace. This allows aircraft to conduct unrestricted training, transit, and ISR operations.
4. U-28 EQ+ Modification: Follow-on effort to Combat Mission Needs Statement (CMNS) 210 to directly support counter Islamic State of Iraq and Syria (ISIS) operations. Enables deployment aircraft with 20" High Definition Full Motion Video Multi-Spectral Targeting System B Sensors Outside Continental United States (OCONUS) providing both extended stand-off operations and an enhanced Find, Fix, Finish capability. This effort included converting EQ configured aircraft to the EQ+ configuration and converting PC-12 aircraft to the EQ+ configuration. The U-28 EQ+ modification program received OCO funding in FY 2019 and Direct OCO funding in FY 2020.
5. U-28 Mission Equipment Racks: Procures and installs Military Standard compliant mission equipment racks. This effort was OCO funded in FY 2019.
6. High Power Antenna: Procures and installs high power Ku band Beyond Line Of Sight (BLOS) antennas to expand bi-directional data throughput and assure satellite connectivity.
7. Alternative Precision Location and Timing (Alt PNT): Procures and integrates an Alt PNT solution that allows operations in a Global Positioning System (GPS) denied environment. This effort was OCO funded in FY 2019.
8. Radar Warning Capability: procures and installs the Embedded National Tactical Receiver incorporated into the Integrated Broadcast Service to provide a radar warning capability for the U-28 aircrew. This effort was OCO funded in FY 2019.

Description:

This P-1 line item funds the MH-47 program. Army Special Operations Aviation (ARSOA) requires a long-term, capable and reliable Special Operations Forces (SOF) heavy assault fleet in order to provide organic world wide strategic Rotary Wing operations capable of rapid fielding and deployment as well as long range penetration of hostile tactical areas. ARSOA is authorized 69 highly specialized MH-47G Chinook aircraft, 61 of which are currently sheet metal constructed airframes. Three of the sheet metal aircraft have been lost in combat or pre-deployment training. Operational availability continues to be affected by increased maintenance actions and cost caused by high operational tempo and continuous combat operations within the Special Operations Aviation flight spectrum. Aging airframe fatigue and corrosion issues have necessitated replacement of the remaining 61 MH-47G legacy sheet metal airframes with newly machined airframes which incorporate emerging technologies to maintain mission effectiveness. The remaining eight machined airframes also require a retrofit to incorporate emerging technologies and improvements in machined airframe engineering, while maintaining mission effectiveness and performance across the entire MH-47G BLK II fleet. MFP-2 funds are provided by Army to cover common production, labor, and long lead material costs. This program received Overseas Contingency Operations (OCO) funding in FY 2019 (\$36.500 million) and FY 2020 (\$34.281 million) to replace aircraft battle losses that occurred in FY 2017 and FY 2018. FY 2020 Flyaway Unit Cost includes costs for eight Renew aircraft and one new OCO funded aircraft. Production line overhead costs are being assumed by the MH-47 program in FY 2020; MH-47 unit cost is consequently higher in FY 2020. These capabilities will be pursued via rapid fielding techniques when appropriate.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:
FY 2021 PROGRAM JUSTIFICATION: Funds the manufacture of six newly built machined airframes incorporating emerging technologies to maintain mission effectiveness and address aging airframe structural fatigue and corrosion issues. Also funds Government Furnished Equipment (GFE)/SOF-unique mission kits, block modifications, production engineering, publications, and program management. Funds modifications to address emerging threats, safety concerns, reliability and maintainability issues, and improved capabilities.

(t) indicates the presence of a P-5a

Footnotes:

- (1) Boeing: Sole Source Original Equipment Manufacturer. Due to DTIC system constraints, Airframe Base and OCO quantities in FY19 and FY20 are combined but have significantly different costs. Due to fewer CH-47F procurements beginning in FY21, production line overhead costs are being assumed by the MH-47 program in FY20; MH-47 unit cost is consequently higher in FY20.
- (2) FY19 Airframe Unit Costs include both Renew and New (OCO funded) aircraft which have significantly different costs.
- (3) FY20 Airframe Unit Costs include both Renew and New (OCO funded) aircraft which have significantly different costs.
- (4) GFE increase after FY20 due to reduced amount of salvaged equipment, resulting in increased GFE costs.
- (5) Production Engineering increase due to Lot 4 flight tests and shipboard dynamic interface testing.

^(†) indicates the presence of a P-21

Footnotes:

⁽⁶⁾ FY 2018 Airframe costs include four Renew Aircraft and four New (Congressional funded) aircraft which have significantly different cost.

⁽⁷⁾ FY 2020 Airframe unit cost increased due to fewer CH-47F procurements beginning in FY 2021, causing increased production line costs in FY 2020.

⁽⁸⁾ FY 2020 OCO Airframe unit cost increased due to airframe being a new build vice renew of an existing airframe.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

⁽⁹⁾ Minimum Production Rate for Boeing being met by a combination of United States Special Operations Command (USSOCOM) funded MH-47 aircraft, Army funded CH-47 aircraft, Foreign Military Sales aircraft, and Direct Commercial Sales aircraft.

Description:

The CV-22 Special Operations Forces (SOF) Modification line item funds the SOF variant of the V-22 vertical medium lift, multi-mission aircraft and associated training systems. The CV-22 provides long-range, high-speed infiltration, exfiltration, and resupply to SOF in hostile, denied, and politically sensitive areas. The Navy is the lead service for the Joint V-22 program and is responsible for managing and funding the development of the MV-22 and CMV-22, as well as the Block 0 portion of the CV-22. The Air Force funds the service common portion while United States Special Operations Command (USSOCOM) funds the development and procurement of SOF peculiar systems of Block 10 and 20. Budgeted modification programs include but are not limited to defensive/survivability systems, situational awareness systems, SOF Common Terrain Following/Terrain Avoidance TF/TA) Silent Knight Radar (SKR), SOF Communications, flight director, weapons integration, and Intelligence, Surveillance, and Reconnaissance (ISR) systems. The CV-22 Low Cost Modification (LCM) program addresses fielded deficiencies, obsolescence, reliability, and maintainability issues. The CV-22 Simulator Block Update (SBUD) program upgrades legacy CV-22 aircrew training device capabilities by addressing concurrency, obsolescence, and fidelity training issues. These capabilities will be pursued via rapid fielding techniques when appropriate.

Justification:

FY 2021 PROGRAM JUSTIFICATION: Funds system upgrades to bring delivered CV-22 aircraft up to Block 20 configuration and addresses SOF-unique CV-22 training concurrency, obsolescence and fidelity issues. These Block 20 upgrades include, but not limited to, Color Helmet Mounted Display kits (CHMD), Suite of Integrated Radio Frequency Countermeasures (SIRFC) Correction of Deficiencies (COD) kits, and Full-azimuth Defensive Weapon System (FDWS) kits. Block 20 also includes Engineering Change Program (ECP) Non-recurring engineering, training equipment, support equipment, technical support, flight test, and 12 CHMD installations. Funds SOF Common TF/TA SKR A-Kits and one B-Kit. Funds LCMs and SBUDSs to address fielded deficiencies, obsolescence, reliability, and maintainability.

The SKR program office will award a 3-year multiyear contract in FY 2021 which will stabilize the procurement price of the radar. Current unit quantities and costs reflect existing Indefinite Delivery/Indefinite Quantity (IDIQ) contract pricing. Per unit cost and quantities will be updated following contract award in 1QFY21. This budget request includes funding to support a FY 2021 through FY 2023 Multi-Year Procurement (MYP) for the SOF Common TF/TA SKR program. This MYP plans to award SKRs with funding in the following P-1 Line Item Title: Rotary Wing Upgrades and Sustainment, CV-22 Modifications, and AC/MC-130J.

Efforts with funding starting in FY 2022 through FY 2025 are summarized on the P-40. Not all details of this funding are included in this P-40 exhibit set. A summary of the excepted details is as follows:

- (a) FY 2022 Cost Delta: 5.202 million
- (b) FY 2023 Cost Delta: 5.339 million
- (c) FY 2024 Cost Delta: 8.627 million
- (d) FY 2025 Cost Delta: 8.799 million

Description:

This line funds the retrofit of fielded CV-22 aircraft and related equipment. The CV-22 modification program includes, but is not limited to, efforts that (1) improve operational safety, suitability, survivability, situational awareness, communications, Intelligence, Surveillance, and Reconnaissance (ISR), and effectiveness, (2) correct deficiencies identified during operational testing and/or field operations, (3) improve reliability/maintainability of the aircraft, (4) enhance defensive systems and self-deployment capabilities, and (5) modify aircraft to common configuration. Block 20 modifications include, but are not limited to the following systems: Cabin Lighting, Color Helmet Mounted Displays (CHMD), Full-azimuth Defensive Weapon System, and Electronic Warfare Upgrades. The United States Air Force MFP-4 and USSOCOM MFP-11 modification budgets fund CV-22 modifications. USSOCOM MFP-11 funds Special Operations Forces (SOF) specific modifications, and USAF MFP-4 funds modifications that are common with other USAF platforms and/or with the joint V-22 program. This budget line item also includes funds to upgrade CV-22 support equipment, training equipment, and weapon system software with changes driven by aircraft Engineering Change Proposals (ECPs).

Description:

This line funds the retrofit of fielded CV-22 aircraft and related equipment. The CV-22 SOF Common Terrain Following/Terrain Avoidance (TF/TA) Silent Knight Radar (SKR) modification program includes, but is not limited to: SOF Common Terrain Following/Terrain Avoidance (TF/TA) Silent Knight Radars (SKR), SKR Ethernet and network connectivity upgrades, SKR navigational display enhancements, upgrades to correct deficiencies identified during operational testing and/or field operations, and improvements in reliability/maintainability of the SKR system. The United States Air Force MFP-4 and USSOCOM MFP-11 modification budgets fund CV-22 modifications. USSOCOM MFP-11 funds Special Operations Forces (SOF) specific modifications, and USAF MFP-4 funds modifications that are common with other USAF platforms and/or with the joint V-22 program. This budget line item also includes funds to upgrade CV-22 support equipment, training equipment, and weapon system software with changes driven by aircraft Engineering Change Proposals (ECPs).

The SKR program office will award a 3-year multiyear contract in FY 2021 which will stabilize the procurement price of the radar. Current unit quantities and costs reflect existing Indefinite Delivery Indefinite Quantity (IDIQ) contract pricing. Per unit cost and quantities will be updated following contract award in 1QFY21. This budget request includes funding to support a FY 2021 through FY 2023 Multi-Year Procurement (MYP) for the SOF Common TF/TA SKR program. This MYP plans to award SKRs with funding in the following P-1 Line Item Title: Rotary Wing Upgrades and Sustainment, CV-22 Modifications, and AC/MC-130J.

Description:

The MQ-9 Unmanned Aerial Vehicle (UAV) line item funds the acquisition and rapid fielding of Special Operations Forces (SOF) unique mission kits, payloads, weaponization, modifications, production support for MQ-9 UAVs, Ground Control Stations (GCSs), and training systems. USSOCOM is designated the DoD lead for planning, synchronizing, and as directed, executing global operations against terrorist networks. As the combatant command executing these operations, USSOCOM requires the capability to find, fix, finish, exploit, and analyze time-sensitive high-value targets. These targets can often only be identified with patient collection of information and require rapid, decisive action during the short periods in which they present themselves. This line item addresses the primary areas of Intelligence, Surveillance, Reconnaissance, Target Acquisition, and Strike. This P-1 line item includes FY 2020 direct Overseas Contingency Operations (OCO) funding (\$1.900 million). These capabilities will be pursued via rapid fielding techniques when appropriate.

Description:

The Precision Strike Package (PSP) for Special Operations Forces (SOF) funds the procurement, installation, and rapid fielding of the PSP onto various SOF platforms and training devices to provide a close air support, air interdiction, and armed reconnaissance capability including sensors, communications systems, precision guided munition systems, mission operator pallet, gun systems and high energy laser. The recapitalization of the AC-130H, AC-130W, and AC-130U aircraft will be accomplished by installing PSP kits onto MC-130J service provided aircraft. The PSP kit is modular, scalable, and platform agnostic. These capabilities will be pursued via rapid fielding techniques when appropriate.

Justification:
 FY 2021 PROGRAM JUSTIFICATION: Procures five PSP kits (including the large caliber gun capability), non-recurring AC-130J/W deficiency resolutions, test, hanger lease, technical orders, associated peculiar support equipment (includes installation hardware & special test equipment), contractor support, facilities, travel, initial spares, and other government costs for integration and test onto service provided MC-130J aircraft. Increase in other government costs is due to additional integration and testing of deficiency resolutions for block 30 aircraft to include cybersecurity updates.

Description: The AC/MC-130J line funds the replacement and rapid fielding of Special Operations Forces (SOF) capabilities on these aging airframes: 14 MC-130E Combat Talon I, 23 MC-130P Combat Shadow, and 20 MC-130H Combat Talon II aircraft. "AC" strike platforms perform close air support, air interdiction, and armed reconnaissance missions. "MC" mobility platforms perform clandestine or low visibility, single, or multi-ship low-level missions intruding politically-sensitive or hostile territory. The AC/MC-130J project funds core SOF-unique modifications to replace aging/retired legacy strike and mobility C-130 aircraft. The AC-130J Ghost Rider aircraft are modified with the Precision Strike Package (PSP) to replace the AC-130H Spectre (8 of 8 retired), AC-130W Stinger II (3 of 12 retired) and AC-130U Spooky (11 of 17 retired) airframes. The AC-130J aircraft will provide close air support, air interdiction, and armed reconnaissance capability. MC-130J Commando II aircraft are being modified with SOF mission capabilities to replace the MC-130E Combat Talon I (14 of 14 retired), MC-130P Combat Shadow (23 of 23 retired), and MC-130H Combat Talon II (4 of 20 retired) airframes. The MC-130J Commando II provides clandestine, single or multi-ship low-level aerial refueling for special operations helicopters and CV-22 aircraft, and performs airdrops of leaflets, small special operations teams, resupply bundles and combat rubber raiding craft. The Air Force procures and fields the basic aircraft, common support equipment, and Weapon System Trainers (WST). USSOCOM modifies the WST with SOF-peculiar equipment and procures additional training devices for SOF unique mission systems. Rapid fielding and incremental upgrades are used to integrate SOF capabilities onto the aircraft. SOF capabilities include, but are not limited to, real time situational awareness, data fusion, threat detection and avoidance, integrated Terrain Following/Terrain Avoidance (TF/TA), navigation, electronic warfare, dynamic route replanning, and embedded training. Integrating SOF mission systems and automating these capabilities is critical to fielding SOF-capable AC/MC-130J aircraft to recapitalize Air Force Special Operations Command's (AFSOC) legacy C-130 fleet and reduce the required crew complement for this operational environment. This budget line item also funds AC/MC-130J efforts related to communications security and joint/coalition interoperability, such as Cryptographic Modernization. These capabilities will be pursued via rapid fielding techniques when appropriate.

Justification:

FY 2021 PROGRAM JUSTIFICATION: Procures five Special Mission System (SMS) kits for installation on five AC/MC-130J aircraft plus support costs. Supports technical risk reduction, consolidation of technical data, and modification for MC-130J mission systems which interface to the aircraft and each other through the SMS. Procures two Electronic Warfare Radio Frequency Countermeasures (RFCM) A Kits, and two B Kits for installation on the AC/MC-130J aircraft plus initial spares and support costs. Funds integration of five MC-130J aircraft PSP retrofit modifications and other government costs to the AC-130J configuration. MC-130J kit procurement is focused on meeting the consolidated modification line installation schedule. Procures four Airborne Mission Networking (AbMN) A-kits for consolidated modification line installation on the MC-130J plus other government costs. Procures four MC-130 SOF common Terrain Following/Terrain Avoidance (TF/TA) Silent Knight Radar (SKR) A Kits and three B Kits for consolidated modification line installation on the MC-130J aircraft plus other government costs, interim contractor support (labor), and peculiar support equipment. Procures four Auxiliary Flight Deck Station (AFDS) kits for consolidated modification line installation on the MC-130J aircraft plus other government costs, interim contractor support (labor), and peculiar support equipment. Supports modifications to include, but not limited to: Defensive Systems Upgrades (DSU) and Variable Speed Drogue (VSD) and Weight Management (WM) on MC-130J aircraft plus support costs.

Description:

This modification program incrementally procures and integrates, onto AC/MC-130J aircraft, Special Operations Forces (SOF)-unique modifications necessary to correspond with the incremental upgrade strategy of the AC/MC-130J Program. The Special Mission System (SMS) program integrates SOF-peculiar capabilities with existing aircraft controls and displays, and enables hosting of SOF mission software applications. Supports technical risk reduction and consolidation of technical data and modification for systems which interface to the aircraft and each other through the SMS. Auxiliary Flight Deck Station (AFDS) and SMS equipment will be installed by contractor or depot onto AC-130J and MC-130J aircraft.

This program will be going to Full Rate Production contract in FY22 which will utilize a competitive award. Delivery dates will be provided upon contract award.

Description:

This modification program procures and fields Radio Frequency Countermeasures (RFCM) for AC/MC-130J fleet. The RFCM suite detects, identifies and provides geo-located threat position data to the Situational Awareness system and display, and determines and implements appropriate response to eliminate or degrade the threat.

Program will competitively award initial production contract in FY 2020.

Description:

This modification program prepares the MC-130J aircraft for Precision Strike Package (PSP) integration. A total of 37 MC-130Js will be modified with the PSP to provide the AC-130J close air support, air interdiction, and armed reconnaissance capability in accordance with the Capability Production Document (CPD) for AC-130J. AC-130J CPD defines a 37 MC-130J aircraft program.

Note: Quantity is 38 due to loss of aircraft 1. Total inventory at end of program will be 37 aircraft.

Description:

This program procures the Special Operations Forces (SOF)-unique mission equipment (radios, computers, network hardware, displays, antennas, software, etc.) and aircraft modifications required to integrate the Airborne Mission Networking (AbMN) system on MC-130J aircraft. AbMN provides a suite of integrated situational awareness and communication tools providing the crew with a correlated common operating picture of the air and ground battlespace that does not currently exist in SOF mobility aircraft. AbMN reduces MC-130J crew workload requirements to execute clandestine SOF insertion/extraction, aerial refueling, and airdrop missions previously performed by five crew members on the MC-130H Combat Talon II.

Program will competitively award a Full Rate Production contract in FY21.

Footnotes: ⁽¹²⁾ The MC-130J AbMN program relies on Air Force funding for service common hardware and software. The Air Force funding provides Beyond Line of Site, Line of Site, and Full Motion Video datalink capabilities on the MC-130J that directly feed primary data to the SOF tactical displays. MC-130J SOF peculiar hardware and software includes communications and data processing, threat correlation, and tactical display hardwares to the operator. This budget line item only captures the SOF peculiar MC-130J AbMN aircraft kit cost, but this program is reliant on the associated Air Force funding to provide a complete AbMN capability set. ⁽¹³⁾ MC-130J Initial spares are procured for the MC-130J to meet delivery of operationally fielded aircraft at five operating bases. ⁽¹⁴⁾ Simulator/trainers procurement supports modifications to existing crew training devices for MC-130J using an overarching multiyear IDIQ contract.

Description:

This program procures the MC-130 SOF common Terrain Following/Terrain Avoidance (TF/TA) Silent Knight Radar (SKR) or APQ-187 and aircraft modifications required to integrate the subsystem on MC-130J aircraft. The TF/TA SKR subsystem provides SOF common low probability of intercept/low probability of detection capabilities to defeat advanced passive detection threats while maintaining the ability to fly safely.

The SKR program office will award a 3-year multiyear contract in FY 2021 which will stabilize the procurement price of the radar. Current unit quantities and costs reflect existing Indefinite Delivery Indefinite Quantity (IDIQ) contract pricing. Per unit cost and quantities will be updated following contract award in 1QFY21. This budget request includes funding to support a FY 2021 through FY 2023 Multi-Year Procurement (MYP) for the SOF Common TF/TA SKR program. This MYP plans to award SKRs with funding in the following P-1 Line Item Title: Rotary Wing Upgrades and Sustainment, CV-22 Modifications, and AC/MC-130J.

This program will be a Full Rate Production contract for aircraft kits in FY 2022.

Footnotes: ⁽¹⁵⁾ The SKR program office will award a 3-year multiyear contract in FY 2021 which will stabilize the procurement price of the radar. Per unit cost and quantities will be updated following contract award in 1QFY21. This budget request includes funding to support a FY 2021 through FY 2023 Multi-Year Procurement (MYP) for the SOF Common TF/TA SKR program. ⁽¹⁶⁾ MC-130J Initial spares are procured for the MC-130J to meet delivery of operationally fielded aircraft at five operating bases. ⁽¹⁷⁾ Simulator/trainers procurement supports modifications to existing crew training devices for MC-130J using an overarching multiyear IDIQ contract. ⁽¹⁸⁾ Peculiar Support equipment procurements provides for the installation, removal, and repair of the TF/TA SKR and associated Line Replaceable Units (LRU).

 Description: The C-130 Modifications line item funds Special Operations Forces (SOF) unique modifications and rapid fielding to various SOF models of the C-130 aircraft and associated training systems. Program is comprised of modifications generated from mission performance deficiencies, logistics challenges, and evaluation of emerging technologies. USSOCOM funds the procurement of SOF-peculiar systems such as electronic warfare and survivability, communication, situational awareness, training, intelligence surveillance and reconnaissance, weapons integration, and low cost modifications into the SOF C-130 fleet. These capabilities will be pursued via rapid fielding techniques when appropriate.

<p>*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.</p> <p>Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.</p>										
<p>Justification:</p> <p>1. C-130 Modifications:</p> <p>1.0 C-130 Low Cost Modifications (LCM). Minor modifications to MC-130H/J, AC-130W/U/J and EC-130J aircraft SOF-unique equipment to improve reliability and maintainability, correct deficiencies, address obsolescence, incorporate mission enhancements, and critical safety changes. Modifications include but are not limited to: radar upgrades, avionics and display upgrades, sensor installations and upgrades, intelligence collection and dissemination capabilities, communication systems, mechanical and electrical modifications, and weapons integration. Current projects include, but are not limited to, MC-130H/J lightweight armor, MC-130H Data Link 16 system integration, EC-130J Co-site De-confliction, MC/EC-130J VHF1 Antenna Move, MC-130J Cottonmouth Permanent MC-130J Loadmaster Signal Lights, MC-130J UHF DropSonde receiver Permanent and MC-130J Variable Speed Droge Receiver improvements.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Continues minor LCM to SOF C-130 equipment.</p> <p>1.1 C-130 Avionics Modifications. This program replaces various SOF C-130 avionics systems across the SOF C-130 fleet. Projects include, but are not limited to; GPS Hardening improvements, EC-130J Defensive Systems Upgrade and Weight and Balance modifications.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Funds the MC-130J Weight and Balance Modifications.</p> <p>1.2 Simulator Block Updates (SBUD). The C-130 SBUD program sustains legacy C-130 aircrew training device capabilities by addressing concurrency, obsolescence, and fidelity training issues. The C-130 weapon systems possessing aircrew training devices include the AC-130J, AC-130U, AC-130W, EC-130J, MC-130H and MC-130J.</p> <p>FY 2021 PROGRAM JUSTIFICATION: The SBUD program continues to procure modifications to C-130 aircrew training devices to sustain or improve training capabilities.</p> <p>1.3 EC-130J Upgrade Modifications. This program funds modifications to the EC-130J aircraft, included but not limited to hardware and integration of SOF-unique portions of the USAF C-130J 7.0/8.1 software block cycle upgrades, airframe and aircraft infrastructure modifications, and the Link 16 modification.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Continues the EC-130J Link 16 modification.</p> <p>1.4 Enhanced Situational Awareness (ESA). Integrates carry-on communication kit on MC-130J aircraft to enhance situational awareness.</p> <p>2. EC-130J Commando Solo (CSOLO). CSOLO supports combat operations by flying Military Information Support Operations (MISO) missions for the purpose of broadcasting radio and/or television signals deep into denied territory. This program previously funded the Removable Airborne MISO System (RAMS) and then transitioned to the Multi-Mission Platform – Heavy (MMP-H) system.</p>

Description:

The Underwater Systems line item procures dry and wet combat submersibles, Combatant Craft Light (CCL), modifications and field changes to the Dry Deck Shelter (DDS), and various systems and components for Special Operations Forces (SOF) Combat Diving. Current acquisition procurement programs of record are the Shallow Water Combat Submersible (SWCS), Dry Combat Submersible (DCS), SOF Combat Diving, Dry Deck Shelter (DDS), and Combatant Craft Light (CCL). SWCS is the next generation free-flooding combat submersible that transports SOF personnel and their combat equipment in hostile waters for a variety of missions. SOF units require specialized underwater systems that improve their warfighting capability and survivability in harsh operating environments. The DCS will provide the capability to insert and extract SOF and/or payloads into denied areas from strategic distances. The program is structured to minimize technical, cost, and schedule risks by leveraging commercial technologies, procedures, and classing methods to achieve an affordable DCS. CCL is a small combatant craft capable of supporting SOF operators for selected missions in multiple threat environments. SOF Combat Diving supports the unique requirements impacting fully equipped operators while conducting underwater, real-world missions; examples include underwater navigation, diving equipment, and underwater propulsion systems. These systems and equipment are used for infiltration/extraction, reconnaissance, beach obstacle clearance, and other missions. The capabilities of submersible systems and unique equipment provides small, highly trained forces the ability to successfully engage the enemy and conduct operations associated with SOF maritime missions. These capabilities will be pursued via rapid fielding techniques when appropriate.

For the Defense Wide Review (DWR), USSOCOM performed a comprehensive analysis of future capabilities and is reducing DDS modifications and field changes to better align with the Department's priorities as outlined in the National Defense Strategy (NDS) (-\$8.000 million).

Justification: 1. DDS: The DDS is a certified diving system that attaches to modified host submarines and provides for insertion of SOF forces and platforms. United States Special Operations Command (USSOCOM) has a cost share agreement with the Navy to support the modernization of the DDS in order to accommodate current and future Naval Special Warfare payloads as well as large U.S. Navy payloads. FY 2021 PROGRAM JUSTIFICATION: Funding continues the support of the DDS modernization effort, which includes relocation of equipment inside the DDS Hangar to support current and future payloads. Funding also includes field changes for product improvements developed to overcome obsolescence and Diminishing Manufacturing Sources and Material Shortages (DMSMS). 2. SWCS: Shallow Water Combat Submersible (SWCS) is a free-flooding combat submersible mobility platform suitable for transporting and deploying SOF and their payloads for a variety of SOF missions. SWCS will be deployable from a DDS, surface ships, and land. FY 2021 PROGRAM JUSTIFICATION: Purchases Government Furnished Equipment (GFE), Engineering Change Proposals (ECP), detachment deployment packages, and initial spares. 3. DCS: The DCS provides SOF with a dry diver lock-in and lock-out capability that transports personnel and their combat equipment in hostile waters for a variety of missions. FY 2021 PROGRAM JUSTIFICATION: Purchases spares, GFE, ECP, system integration lab, and simulator. 4. SOF Combat Diving: This program integrates Combat Diving Equipment with all Undersea Systems and Platforms associated with SOF missions. SOF Combat Diving is designated an MTA program which uses the rapid fielding pathway and is executed using existing contracts, govt agencies, and new contracts competitively selected as appropriate. FY 2021 PROGRAM JUSTIFICATION: Procures deployment equipment, spares, ECPs, system integration, and product improvements to overcome obsolescence. 5. CCL: The CCL program is a small maritime combatant craft that supports deployment of six combat equipped SOF operators and their payloads for selected missions in multiple threat environments. Its compact form factor provides SOF with versatile mission transportability, deployment, and utility capabilities.

⁽²⁾ DDS modernization is currently a 68/32 cost share between SOCOM MFP-11 and Department of the Navy MFP2. The initial Modernized DDS is projected to be \$48.100 million. The Modernization of the remaining shelters is projected to cost \$25.000 million each. The current plan is to modernize three of the DDS over the FYDP. We will be modernizing the second shelter in FY22 thru FY23 and then the third shelter in FY24 thru FY25.

⁽³⁾ DCS ECPs include install of depressurization pump and mid-water lock-in lock-out and enhancements to system integration lab and desktop simulator.

⁽⁴⁾ SOF Combat Diving quantities are a combination of both Maritime Environmental Protection and Navigation.

<p>Description:</p> <p>This line item funds ordnance items, munitions, small/medium/large caliber ammunition, demolitions, pyrotechnics, explosive initiation devices, underwater munitions, grenades, foreign weapons and ammunition, air delivered munitions, precision guided munitions, and rockets for Special Operations Forces (SOF). Ammunition provided will allow SOF components to accomplish the required rapid fielding, annual training, and support required combat missions, and build toward the required war reserve quantities. This P-1 Line Item received Overseas Contingency Operations (OCO) funding in FY 2019 (\$100.850 million) and FY 2020 OCO for Enduring Operations (\$138.252 million). FY 2021 funding includes OCO for Direct War Costs (\$49.505 million) and OCO for Enduring Requirements (\$55.850 million). These capabilities will be pursued via rapid fielding techniques when appropriate.</p> <p>For the Defense Wide Review (DWR), US Special Operations Command performed a comprehensive analysis of future capabilities and is reducing the Ammunition and Stand-Off precision Guided Munitions (SOPGM) programs to better align with the Department's priorities as outlined in the National Defense Strategy.</p> <p>- \$4.013 million - Small Caliber Bullets - Reduces procurement of rifle ammunition (1,190,000 rounds), machine gun ammunition (640,000 rounds) and foreign ammunition (395,400 rounds).</p> <p>- \$8.290 million - Demolition, Breaching and Pyrotechnics - Reduces grenade offensive/smoke munitions (12,540 grenades), training devices (6,900 devices), and explosives, firing devices, and accessories (23,938 devices).</p> <p>- \$11.268 million - Precision Strike Systems (PSS) - Reduces procurement of manpackable and vehicle mount PSS munitions (57 rounds) and manpack and vehicle mount launcher and control kits (2 kits).</p> <p>- \$45.000 million - SOPGM - Increase in unit cost and decrease on quantity of munitions which reduces War Reserve Materiel (WRM) stock. Eliminate procurement of mini munitions, decrease procurement of Griffin with datalink munitions by 251 units, decrease procurement of Small Guided Munitions (SGM) with datalink by 185 units, and decrease procurement of Laser Small Diameter Bombs (LSDBs) by 250 units.</p>

Justification: 1. Air Delivered Munitions. Program provides AC-130 gunship munitions to include several tactical and training configurations of the 105mm, 30mm, and fuzes, including the associated safety certification, Insensitive Munitions (IM) qualification, production engineering and transportation. FY 2021 PROGRAM JUSTIFICATION: Procures and qualifies air delivered ammunition to meet mission requirements required to maintain AC-130 Gunship crew mission-related readiness skills and provides combat mission support. Procures several tactical and training configurations of 105mm and 30mm ammunition and fuzes. Due to differences in complexity and/or materials of these configurations, the Unit Costs can vary considerably by item. In addition, for some 30mm capabilities, the cost to SOCOM is a modification/re-pack of a Service Common Munition, which is a much lower cost (~\$15-\$30) than a complete Munition (~\$130-\$175). Replenishes munitions expended in real-world events and training. Actual quantities vary depending on training requirements. 2. Small Caliber Bullets. Provides barrel launched munitions including the associated safety certification, IM qualification, production engineering and transportation. Provides several tactical and training configurations of U.S. and non-standard foreign munitions, weapons and related equipment, in calibers of 4.6mm, 5.45mm, 5.56mm, 6.5mm, .260, 7.62mm, .300, .338, 9mm, .357, .380, .40, .44, .45, .50, 12.7mm, 14.7mm, 12 gauge, 25mm, 40mm, 60mm, 64mm, 66mm, 81mm, 84mm, 105mm, 4.2", 107mm, 120mm, 155mm, rocket propelled grenades and other calibers as required. FY 2021 PROGRAM JUSTIFICATION: Funding procures the following munitions: Handgun, Rifle, Sniper Rifle, and Machine Gun (all types of 5.56mm, 7.62mm, 40mm, .300 WM, .50 Caliber, .260, 6.5MM, .300NM, and .338NM); replenishes munitions expended in real-world events and training. Procures various types of Non-Standard foreign ammunition. Actual quantities vary depending on training requirements. 3. Demolition, Breaching and Pyrotechnics. Provides Demolition, Breaching and Pyrotechnics munitions including the associated safety certification, IM qualification, production engineering and transportation. Provides several tactical and training configurations of munitions and related equipment of explosively formed penetrators, conical shape charges, linear shaped charges, diversionary devices, demolition hand grenades, breaching devices, explosives, firing devices, underwater munitions, flares, signaling devices, along with tools, equipment, and attaching devices for constructing and emplacing a variety of demolition charges and other munitions as required. FY 2021 PROGRAM JUSTIFICATION: Procures grenades (offensive/smoke), training devices, a variety of demolition materiel consisting of explosives, firing devices, and accessories. Replenishes munitions expended in real-world events and training. Actual quantities vary depending on training requirements. 4. Shoulder Fired Munitions and Rockets. Provides unguided and laser-guided shoulder fired munitions, launchers and rockets, including the associated safety certification, IM qualification, production engineering and transportation. Provides tactical and training configurations of munitions and related equipment providing armored vehicle destruction, bunker and hardened facility destruction, soft target destruction, fire from enclosure, anti-personnel, smoke obscuration, visible and infrared illumination, as well as sub-caliber training devices with back blast simulation. These systems give SOF extended range fires to operate where no artillery, mortar, or armor support is available. FY 2021 PROGRAM JUSTIFICATION: Replenishes shoulder-fired munitions expended in real-world events and training. Actual quantities vary depending on training requirements.

Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 02: Special Operations Command / BSA 3: Ammunition Programs		P-1 Line Item Number / Title: 0203ORD / ORDNANCE ITEMS <\$5M
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: 1160481BB, 1160431BB
Line Item MDAP/MAIS Code: N/A		
<p>5. Precision Strike Systems (PSS). Provides a family of precision strike munitions with the ability to rapidly Launch, Fly, Track and Engage stationary and moving targets in a variety of environments. The PSS provide SOF units an organic capability in contested and multi-domain battlefield where close-air support may not be available. Man-packable and vehicle mounted systems with Electro Opti/Infrared (EO/IR) sensor downlink keeps operators in-the-loop. Datalink, GPS, and inertial aided guidance extends range beyond laser-guided shoulder launched munitions.</p> <p>FY2021 PROGRAM JUSTIFICATION: Procures approximately 22 man-packable guided munitions, three man-pack PSS (control kit), 11 vehicle mount PSS medium range platform launched munitions, and two vehicle mount PSS (launcher and control kit). Actual quantities may vary based on the data transmit units, ground control stations, and associated support equipment to be supplied.</p> <p>6. Stand-Off Precision Guided Munitions (SOPGM). Provides Precision Guided Munitions including the associated safety certification, IM qualification, production engineering, transportation, and provides for the integration of service-common and SOF-unique SOPGM munitions onto SOF platforms to support lethal strike and armed over-watch capability on the battlefield. Includes procurement of SOF-peculiar munitions for designated SOF platforms and modification of Service-provided munitions to meet specific SOF mission sets including first-pass lethality, low collateral damage requirements, time-sensitive High Value Targets, and dynamic moving targets. This program received Overseas Contingency Operations (OCO) funding in FY 2019 and FY 2020. This program is a DoD high interest item.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures approximately 876 SOPGMs and integration & shipping. Budget enables production of 482 SOF-peculiar and 394 Service-provided modified munitions. Production numbers enhance operational planning flexibility and establishing war reserve materiel inventories.</p> <p>FY 2021 OCO PROGRAM JUSTIFICATION: Procures approximately 1022 SOPGMs. Budget enables maximum production of SOF-peculiar munitions. Production numbers enhance operational planning flexibility and replenishes annual combat expenditures.</p>

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

Footnotes:

- ⁽¹⁾ For the Defense Wide Review (DWR), United States Special Operations Command (USSOCOM) performed a comprehensive analysis of future capabilities and is reducing procurement of rifle ammunition (1,190,000 rounds), machine gun ammunition (640,000 rounds) and foreign ammunition (395,400 rounds) (-\$4.013 million)..
- ⁽²⁾ For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is reducing grenade offensive/smoke munitions (12,540 grenades), training devices (6,900 devices), and explosives, firing devices, and accessories (23,938 devices) (-\$8.290 million).
- ⁽³⁾ Precision Strike Systems (PSS) munitions were previously reported in this P40-a under Shoulder-Fired Munitions and Rockets.
- ⁽⁴⁾ For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is reducing procurement of manpackable and vehicle mount PSS munitions (57 rounds) and manpack and vehicle mount launcher and control kits (2 kits) (-\$11.268 million).
- ⁽⁵⁾ For the DWR, USSOCOM performed a comprehensive analysis of future capabilities resulting in an increase in unit cost and decrease on quantity of munitions which reduces War Reserve Materiel (WRM) stock. Eliminate procurement of mini munitions, decrease procurement of Griffin with datalink munitions by 251 units, decrease procurement of Small Guided Munitions (SGM) with datalink by 185 units, and decrease procurement of Laser Small Diameter Bombs (LSDBs) by 250 units (-\$45.000 million).

Description:

This P-1 line item is part of the Military Intelligence Program. This line item provides for the identification, testing, and rapid fielding of Special Operations Forces (SOF) intelligence equipment to identify and eliminate deficiencies in providing timely intelligence to deployed forces. Sub-projects address the primary areas of intelligence dissemination, sensor systems, integrated threat warning to SOF mission platforms, and tactical exploitation of national system capabilities. The systems procured in this line item are Joint Threat Warning System (JTWS); Special Operations Tactical Video System/Reconnaissance, Surveillance, and Target Acquisition (TVS/RSTA); Tactical Local Area Network (TACLAN); Hostile Forces-Tagging, Tracking, and Locating (HF-TTL); Special Operations Command, Research, Analysis and Threat Evaluation System (SOCRATES); Sensitive Site Exploitation (SSE), and Special Operations Forces Planning, Rehearsal, and Execution Preparation (SOFPREP). This P-1 line item received FY 2019 Overseas Contingency Operations (OCO) funding (\$20.790 million) and FY 2020 OCO funding (\$16.500 million). FY 2021 funding includes OCO for Enduring Requirements (\$16.234 million).

U.S. Special Operations Command (USSOCOM) has developed an overall strategy to ensure that Command, Control, Communications, Computers, and Intelligence (C4I) systems continue to provide SOF with the required capabilities into the 21st century. USSOCOM's C4I programs are comprised of an integrated network of systems providing positive command and control and the timely exchange of intelligence and threat warning to all organizational echelons. The C4I systems that support this architecture employ the latest standards and technology by transitioning from separate systems to full integration with the SOF Information Environment (SIE). The SIE allows SOF elements to operate with any force combination in multiple environments. The intelligence programs funded in this line item will meet annual emergent requirements and are grouped by the level of organizational element they support: Operational Element (Team) and Above Operational Element (Garrison). These capabilities will be pursued via rapid fielding techniques when appropriate.

For the Defense Wide Review (DWR), USSOCOM performed a comprehensive analysis of future capabilities and is reducing the HF-TTL, JTWS, SOTVS, and TACLAN programs to better align with the Department's priorities as outlined in the National Defense Strategy (-\$7.810 million).

- \$0.336 million - JTWS - reduces one Maritime variant and TTV spares.
- \$1.297 million - SOTVS - reduces one RSTA Sensor kit and seven RSTA Tactical Reconnaissance kits.
- \$0.176 million - TACLAN - reduces two Prime Mission Equipment (PME) Suites - Block II Capital Equipment Replacement Program (CERP) and ancillary equipment.
- \$6.001 million - HF-TTL - reduces five Mission sets.

Justification:
OPERATIONAL ELEMENT (TEAM)

1. JTWS. This program is an evolutionary acquisition program effort for Signals Intelligence. The JTWS System of Systems (SoS) enables the Joint Components, through their SOF Cryptologic Operators, to collect, process, locate and exploit threat communications signals of interest in order to provide timely, relevant, and responsive intelligence, cross-cueing, enhanced target acquisition, and threat avoidance information directly to the SOF Commanders. Intelligence gathered is then transposed to National Databases. The JTWS SoS is comprised of four variants: Ground SIGINT Kit (GSK); Maritime; Air; and Unmanned Aerial Systems (UAS). Each variant has additional requirements for Communications Intelligence, Electronic Intelligence, and Precision Geo-location. The contracting strategy uses a mixture of full and open competition for prime integrators and indefinite delivery/indefinite quantity contracts for Commercial off-the-Shelf (COTS) procurement with new development only as necessary.

FY 2021 PROGRAM JUSTIFICATION: Funds the CERP of 26 GSK kit variants, CERP of 11 AVS variants, three PGL ground kits, CERP of 10 PGL ground kits, one PGL Air kit, CERP of one Team Transportable Variant (TTV) Evolutionary Technical Insertion (ETI), two Unmanned Aerial Collection Systems, seven Maritime variants, one PGL Maritime kit, and initial training and spares.

2. TVS/RSTA. This program provides SOF with critical Special Reconnaissance (SR) equipment that directly supports the planning and execution of SOF missions. This capability allows the SOF warfighter to meet SOF SR mission requirements to find, fix, finish, exploit, analyze, and disseminate information of adversary's movement, construct, identification, location; and associated things and activities. TVS/ RSTA provides Global Combatant Commanders (GCCs) and SOF operators with an immediate capability to visually and electronically acquire people, things, and activities and provides actionable intelligence for SOF planners and Commanders. The TVS/RSTA program consists of a Family of Systems (FoS) that employs an evolutionary acquisition strategy for Evolutionary Technology Insertions (ETI) (supplemented with commodity procurement) to enhance the performance of specific kits. These ETI modifications vary in both cost and quantity. The FoS consists of interoperable equipment to capture and transfer near-real-time ground-based, tactical day/night/reduced visibility, imagery, video, and electronic proximity and movement sensing, all capable of dissemination through SOF organic, global C4I, and commercial communications infrastructures. Kits are type designated as RSTA or TVS Mission Kits. RSTA kits are operationally configured as Sensor Kits; Tactical Reconnaissance (RECCE) Kit; Remote Observation

Post (ROP); Unattended Ground Sensors/Unattended Maritime Sensors (UGS/UMS); Maritime Combat TVS/RSTA Kit; and Austere Location Force Protection Kits (ALFPK). This program received Overseas Contingency Operating (OCO) funding in FY 2019 and FY 2020.		
FY 2021 PROGRAM JUSTIFICATION: Procures four Sensor Kits, two UGS, 28 RECCE Kits, one ROP Kit, one TVS Kit, 22 Austere Location Force Protection Kits (ALFPK), and two Maritime TVS/RSTA Kits.		
FY 2021 OCO PROGRAM JUSTIFICATION: Procures 21 Austere Location Force Protection Kits (ALFPK).		
3. TACLAN. Provides SOF operational commanders and forward deployed forces advanced automated data processing and display capabilities, facilitating the interchange of classified and unclassified information to support situational awareness, mission planning, rehearsal, and execution, and Command and Control (C2) of forces in tactical environments. The program consists of information technology hardware, software and ancillary equipment, including network servers, routers, switches, storage and computing end user devices, and common and specialized user applications. The family of systems is mobile, modular, and size configurable to suit peculiar mission needs that support SOF users from the individual to the Special Operations Task Force (SOTF) echelon. TACLAN modular network suites include Top Secret/Sensitive Compartmentalized Information (TS/SCI) enclaves.		
FY 2021 PROGRAM JUSTIFICATION: Procures CERP of 13 TACLAN TS/SCI enclaves for the modular network suites and ancillary equipment.		
4. HF-TTL. This program provides SOF with critical tools to enhance situational awareness for the planning and execution of SOF missions. This capability allows SOF to find, fix, and finish target assets through the emplacement of sophisticated tags and devices that feed into an integrated architecture. Through rapid acquisition HF-TTL provides GCCs and SOF operators with an immediate capability to tag, track, and locate people, things and activities. The HF-TTL program provides actionable intelligence for SOF planners. The Mission Sets are comprised of a mix of different classes of tags and their associated detection, interrogation, viewing, tracking, and communications systems that are fielded annually to each SOF Component Command and Theater Special Operations Command (TSOC) based upon dynamic and emergent SOF operational requirements.		
FY 2021 PROGRAM JUSTIFICATION: Procures 11 mission sets.		
ABOVE OPERATIONAL ELEMENT (GARRISON)		
5. SOCRATES. This program is the SOF extension of the Joint Worldwide Intelligence Communications System network and is used to develop, acquire and support garrison automated intelligence system requirements for SOF organizations worldwide. It provides the capabilities to exercise command and control, planning, collection, collaboration, data processing, video mapping, a wide-range of automated intelligence analysis, direction, intelligence dissemination, imagery tools and applications, to include secondary imagery dissemination, and news and message traffic. The system ensures intelligence support to mission planning and the intelligence preparation of the battle space by connecting numerous data repositories while maintaining information assurance. The system supports Headquarters USSOCOM, its component commands, TSOCs and forward based SOF units. SOCRATES is composed of state-of-the-art networking devices (firewalls, routers, switches, hubs, and modems), servers, storage devices, video teleconference, secure voice, workstations, associated peripherals and government-off-the-shelf /commercial-off-the-shelf software.		
FY 2021 PROGRAM JUSTIFICATION: Procures equipment to support expansion of Components and Theater Special Operations Commands (TSOCs) and provides Video Teleconference and secure voice capability to SOCRATES.		
6. SSE. This program uses rapid acquisition to procure Biometric and Forensic technologies that provide state-of-the art capabilities to the Warfighter thus allowing for exploitation of documents, electronic data, material and forensic evidence on sensitive sites/objectives. Biometrics kits allow collection and transmission of unique, measurable biometric signatures from personnel, including live/latent fingerprints, iris patterns, and facial features. It also provides a means to verify against and enroll subjects into the DoD authoritative database, and to query that database to support hold or release decisions. Forensic kits enable on-objective linking of events to specific persons through chemical analysis, latent fingerprints, cell phones and computer data analysis, and Deoxyribonucleic Acid (DNA) collection. Exploitation Analysis Centers (EACs) provide theater-level forensic laboratory capabilities for more in-depth exploitation of captured materiel.		
FY 2021 PROGRAM JUSTIFICATION: Procures two Forensic Exploitation Analysis Center equipment and CERP of 55 forensic exploitation kits.

<p>7. SOFPREP. This program serves as the intelligence focal point for production of SOF enhanced Geospatial Intelligence (GEOINT) (maps, imagery, and terrain data) and 3D scene visualization databases. SOFPREP gathers, processes, exploits, disseminates and manages classified high resolution 3D databases and GEOINT data in support of SOF training, mission rehearsal and execution systems. The program builds the SOF common geospatial environment and manages the authoritative database of SOF-specific GEOINT terrain data. SOFPREP is a NGA-certified co-producer in support of time-sensitive SOF-specific requirements. Acquires emerging COTS to accelerate computational processing applied to exploitation of GEOINT data, speeding production of 3D databases used by Components for realistic and unique joint SOF training and mission rehearsal for current operations.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures evolutionary technology insertions for GEOINT Processing, Exploitation and Dissemination.</p>

Description:

This program element is part of the Military Intelligence Program (MIP). The Distributed Common Ground/Surface System Special Operations Forces (DCGS-SOF) is part of a family of systems providing rapid fielding of Intelligence, Surveillance, and Reconnaissance (ISR) Processing, Exploitation, Dissemination (PED), and analytical capabilities at the Combatant Command (COCOM), Component/Theater Special Operations Command (TSOC) level and below through a combination of reach back, forward support, and collaboration. The mission tailored infrastructure interconnects the warfighter, analysts, and sensors to find and fix High Value Targets and provides a network-enabled, interoperable construct allowing continual, unimpeded sharing of intelligence data, information and services with SOF and between the Services, other national intelligence agencies, combatant commands and multi-national partners. It connects the SOF warfighter and analysts with the essential intelligence information and provides situational awareness information to SOF leadership at all echelons. The three components of DCGS-SOF include the following: The Enterprise/All Source Information Fusion (ENT/ASIF) provides infrastructure, processing and intelligence analytical tools to allow for worldwide SOF intelligence information sharing via a globally connected cloud based architecture as well as a forward disconnected capability. SOF Geospatial Intelligence Processing Exploitation, and Dissemination (SGIP) provides capabilities in garrison and deployed environments for the PED of manned and unmanned sensors. SOF Signals Intelligence (SIGINT) PED provides SIGINT exploitation capability in both garrison and deployed environments. These capabilities will be pursued via rapid fielding techniques when appropriate.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2021 PROGRAM JUSTIFICATION: Capital Equipment Replacement Program (CERP) for 22 SOF SIGINT PED Communication kits, SOF advance analytics, CERP of 19 Deployable/Tactical SGIP, and the CERP of Garrison SGIP infrastructure components. USSOCOM ENT/ASIF advanced analytics partnered with the National Reconnaissance Office in FY18 to utilize the fielded Government Off The Shelf (GOTS)/Commercial Off The Shelf (COTS) Fusion Analysis and Development Effort (FADE) platform. This utilization of the fielded GOTS capability reduces the requirements for ENT/ASIF upgrades and CERP in FY20 and beyond.

Description:

This P-1 line item provides for the procurement, rapid fielding, and associated costs of specialized equipment in the areas of Aircraft Support, Military Construction (MILCON) Collateral Equipment, Command, Control, Communications, and Computer Information and Automated Systems (C4IAS), Tactical Local Area Network (TACLAN), Special Access Program Network (SAPNET), Joint Operational Stocks (JOS), Base Procured Equipment (BPE), Multi-Mission Payload System (MMP) formerly known as Long Range Broadcast Systems (LRBS), Flyaway Broadcast System (FABS), and Miscellaneous Equipment. Additionally, this P-1 line item consists of miscellaneous equipment items that do not reasonably fit in any other USSOCOM procurement line item categories and are above the \$250K threshold. This P-1 line item includes FY 2019 Overseas Contingency Operations (OCO) funding (\$12.125 million) and FY 2020 OCO funding (\$0.028 million). FY 2021 funding includes OCO for Enduring Requirements (\$0.984 million). These capabilities will be pursued via rapid fielding techniques when appropriate.

For the Defense Wide Review (DWR), US Special Operations Command (USSOCOM) performed a comprehensive analysis of future capabilities and is reducing the C4IAS and TACLAN programs to better align with the Department's priorities as outline in the National Defense Strategy (-\$4.497 million).

-\$1.915 million - C4IAS - Reduces Classified Network System Infrastructure

-\$2.582 million - TACLAN - Reduces 14 suites - Capital Equipment Replacement Program (CERP)

<p>*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.</p> <p>Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.</p>										
<p>Justification:</p> <p>1. Aircraft Support. This program provides various types of equipment and minor modifications required to support Special Operations Forces (SOF) fixed wing aircraft.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures SOF-unique aircraft support equipment by funding small equipment parts and upgrades. Per DoD policy, and in accordance with Air Force policy, these funds reimburse the Air Force Stock Fund for SOF initial spares provisioned with Air Force Stock Fund obligation authority.</p> <p>2. MILCON Collateral Equipment. This program procures collateral equipment for SOF military construction facilities. No associated RDT&E funds.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Provides information technology equipment, video monitoring, targeting systems and other equipment above the Operation and Maintenance threshold of \$250 thousand, as well as items that are centrally managed.</p> <p>3. C4IAS. Provides garrison infrastructure directly supporting the Command's global mission by providing a seamless and interoperable interface with SOF, DoD, and Service information systems. It provides the capabilities to exercise Command and Control (C2) and collaboration, process and share data, and facilitate mission planning and operational preparation of the battle space, connecting numerous data repositories while maintaining information assurance. Additionally, it provides the critical reach back for SOF tactically deployed local area networks/wide area networks. This program is composed of state-of-the-art automated systems (firewalls, routers, switches, hubs, modems) servers, storage devices, and associated peripherals supporting a myriad of SOF user requirements, to include cyber, and uses a variety of off-the-shelf software and databases to ensure interoperability between SOF units.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Continues to acquire next generation automation systems through the use of Evolutionary Technology Insertions (ETIs) to provide new capabilities and dramatic improvements to the SOF information environment. Continues implementation of dual distributed datacenters that support the consolidation of Headquarters, USSOCOM, Theater Special Operations Commands (TSOC), and Component Command's Information Technology (IT) infrastructure. Procures distributive data center network hardware, network system infrastructure, integration, and ETIs in support of SOF Command and Control (C2).</p> <p>4. TACLAN Automation Systems. Provides SOF operational commanders and forward deployed forces advanced automated data processing and display capabilities, facilitating the interchange of classified and unclassified information to support situational awareness, mission planning, rehearsal, and execution, and C2 of forces in tactical environments. The program consists of information technology hardware, software and ancillary equipment, including network servers, routers, switches, storage and computing end user devices, as well as common and specialized user applications. The family of systems are mobile, modular and size configurable to suit peculiar mission needs that support SOF users from the individual to the Special Operation Task Force echelon.</p> <p>FY 2021 PROGRAM JUSTIFICATION: CERP for 30 TACLAN modular network suites and integration.</p> <p>FY 2021 OCO PROGRAM JUSTIFICATION: Procures CERP for 4 TACLAN modular network suites and integration.</p>

Exhibit P-40, Budget Line Item Justification: PB 2021 United States Special Operations Command		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 02: Special Operations Command / BSA 4: Other Procurement Programs		P-1 Line Item Number / Title: 0204OTHER / OTHER ITEMS <\$5M
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: 1160431BB, 1160402BB
Line Item MDAP/MAIS Code: N/A		
<p>5. SAPNET. Supports multi-SAP collaboration and information exchange for mission operations. It is interoperable on SAP systems and databases, enabling secure voice, video and data communication between National/Theater SOF and select mission partners. SAPNET integrates advanced technologies and gains efficiencies through collapsing infrastructure while still supporting user growth and mission readiness through evolutionary ETIs.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures ETIs.</p> <p>6. Joint Operational Stock (JOS). Composed of USSOCOM centrally procured and managed stocks of materiel designed to provide SOF access to immediately available equipment in support of contingency, Humanitarian Assistance/Disaster Response and training missions. The equipment contained within JOS generally falls into one of the following categories: night vision devices and optics, weapons, communications, personnel protection, and bare-base support. Bare-base support includes equipment required to provide key life support and work areas to SOF units deployed in austere locations. The JOS inventory is maintained, stored and issued through the SOF Support Activity located in Lexington, KY. The Military Liaison Element (MLE) equipment program provides for CERP and sustainment of operational and home station training sets used in direct support of the MLE mission. No associated RDT&E funds.</p> <p>7. Base Procured Equipment (BPE): This program procures authorized investment equipment which exceed the \$250K investment/expense threshold and are not part of an existing program of record (PoR). Examples of equipment include support equipment for modular facilities, mobile shoot houses, training ranges shelters, wargaming center equipment, uninterruptible power supply systems and terrain models.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures various equipment items that exceed the \$250K investment/expense threshold and are not part of an existing program of record.</p> <p>8. Multi-Mission Payload (MMP). Formerly known as Long Range Broadcasting System (LRBS), the MMP is a family of broadcast assets capable of providing Frequency Modulation (FM), Television (TV) Ultra High Frequency (UHF)/Very High Frequency (VHF), and cellular Military Information Support Operations (MISO) broadcasts to foreign target audiences in permissive, semi-permissive, and denied environments with broadcast system integrated into long-loiter Unmanned Aerial Vehicle (UAV) and manned aircraft. The MMP consists of three variants: MMP-Heavy (H), MMP-Medium (M), and MMP-Light (L). MMP-H integrates onto EC-130J aircraft. The MMP-M integrates onto a MQ-1C and other select aircraft. Cost differs between variants because MMP-L consists of a series of modular pods that integrate onto Shadow UAVs and other select aircraft.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures seven MMP-Light.</p> <p>9. Fly Away Broadcast System (FABS). FABS is a transit case broadcast system that utilizes commercial and industry standard technology to disseminate approved messaging to target audiences via FM, short wave (SW) cellular Secure Messaging System and TV transmitter.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Supports procurement of three Next Generation FABS (v3).</p>

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

Footnotes:

- (1) For the Defense Wide Review (DWR), United States Special Operations Command (USSOCOM) performed a comprehensive analysis of future capabilities and is reducing Classified Network System Infrastructure (-\$1.915 million).
- (2) For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is reducing 14 suites - CERP (-\$2.582 million).
- (3) Unit cost reduction between FY20 and FY21 is due to economies of scale.

Description:

The Combatant Craft Systems line item serves as the umbrella for small, medium, heavy, and assault combatant craft programs, sub-systems, and ancillary equipment to include prime movers and trailers. Currently, it includes Combatant Craft Medium (CCM), Combatant Craft Heavy (CCH), Riverine Craft, Combatant Craft Forward Looking Infrared (CCFLIR) program, and Combatant Craft Assault (CCA). These capabilities will be pursued via rapid fielding techniques when appropriate.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										

Justification:

1. CCM: The CCM is a semi-enclosed multi-mission combatant craft for platoon-size maritime mobility in maritime contested environments. It is multi-mission capable, including Maritime Interdiction, Insert/Extract, and Visit, Board, Search, and Seizure (VBSS) Operations. CCM is Naval Special Warfare's (NSW) craft-of-choice for long-range, high-payload SOF mobility operations in contested environments. CCM has NSW's best Iron Triangle: 40 knot (kt) speed; 4 crew + 19 passengers (pax)/10,000 pound (lb) payload; and 600 nautical miles (nm) range. CCM Mk 1 payload capacity enables inclusion of shock mitigating seats, which is critical for ride quality, operator tactical readiness, and operator health. At 60 feet long, CCM is C-17/C5 transportable and can launch/recover by well deck or shore based trailer.

FY 2021 PROGRAM JUSTIFICATION: Procures Government Funded Equipment (GFE), Engineering Change Proposal (ECPs), and spares.

2. CCH: The CCH program represents a family of solutions that provides platoon-size maritime surface mobility. The current CCH is the Sea, Air, Land Insertion, Observation, and Neutralization (SEALION) craft. SEALION is a fully-enclosed, climate-controlled, semi-submersible craft that operates in contested environments. SEALION is NSW's most versatile and survivable combatant craft and the craft-of-choice for sensitive maritime intelligence, surveillance, and reconnaissance missions. Iron Triangle: 40 kt speed; 7 crew + 12 pax/3,300 lb payload; and 400 nm range. SEALION payload capacity enables inclusion of shock mitigating seats, which is critical for ride quality, operator tactical readiness, and operator health. At 77+ feet long, SEALION is C-17/C-5 transportable and can launch/recover by well deck or shore based mobile travel lift or crane.

3. Riverine Craft: The Riverine Craft provides the capability to insert and extract SOF in the riverine environment. The craft is capable of navigating restricted and shallow rivers, estuaries, and bays. It is also capable of carrying light organic arms and is C-130 transportable.

FY 2021 PROGRAM JUSTIFICATION: Procures one prime mover and Detachment Deployment Package (DDP) and ECP.

4. CCFLIR: The CCFLIR program consists of a legacy CCFLIR and the CCFLIR2. The CCFLIR capability provides Special Operations Forces (SOF) with a multi-sensor, electro-optic system that enhances SOF effectiveness by improving their ability to detect, recognize, identify, range, track, and highlight objects of interest in a maritime environment. The legacy CCFLIR is under sustainment and is currently used on all NSW combatant craft.

FY 2021 PROGRAM JUSTIFICATION: Procures eight Next Generation (NG) CCFLIR2.

5. CCA: The CCA program is a combatant craft for squad-size maritime mobility operations in contested environments. CCA is NSW's best craft for VBSS. It is the craft-of-choice for maritime interdiction and boarding operations because of the open deck space, maneuverability, and interoperability with an Afloat Forward Staging Base. Iron Triangle: 40 kt speed; three crew + 12 pax/5,000 lb payload; and 300 nm range. At 41 feet long, CCA is air transportable by C-130/C-17/C-5 and can launch/recover by crane, davit, well deck, or shore based trailer.

FY 2021 PROGRAM JUSTIFICATION: Procures two life cycle replacement CCAs, GFE, ECPs, prime movers, and ancillary equipment and spares as required.

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

Footnotes:

- ⁽¹⁾ Decrease of -\$7.205 million is due to a Congressional Add decrease in FY 21 due to a CCM training loss.
- ⁽²⁾ Decrease of -\$2.500 million for prime movers which met basis of issue.
- ⁽³⁾ Decrease of -\$1.618 million for reduction in spares.
- ⁽⁴⁾ Decrease -\$11.358 million is due to CCFLIR2 replacement reaching basis of issue of 58.
- ⁽⁵⁾ By combining Craft Systems (5.1) and Craft Systems (Congressional Add) (5.2) in FY20 into a single purchase order, Maritime is able to purchase four (4) Combatant Craft Assault (CCA) Systems due to an economic order quantity of \$3.244 million.
- ⁽⁶⁾ By combining Craft Systems (5.1) and Craft Systems (Congressional Add) (5.2) in FY20 into a single purchase order, Maritime is able to purchase four (4) Combatant Craft Assault (CCA) Systems due to an economic order quantity of \$3.244 million.
- ⁽⁷⁾ Net decrease of \$8.511 million from FY20 is due to a Congressional Add decrease (-\$8.169 million) and a one time buy for lead craft equipment on new production contract (-\$0.342 million).

Description:

Special Operations Forces (SOF) ground tactical vehicles are used for Counterterrorism, Counter-Proliferation, Foreign Internal Defense, Special Reconnaissance, Direct Action, and Unconventional Warfare missions, and serve as a weapons platform throughout all areas of the battlefield and/or mission area. The current SOF ground tactical vehicles include: Ground Mobility Vehicles (GMV) (Medium), Non-Standard Commercial Vehicles (NSCV) for use in tactical missions, Mine Resistant Ambush Protected Vehicles (MRAP) (Heavy), Light Tactical All-Terrain Vehicle (LTATV) and Joint Light Tactical Vehicle (JLTV). These ground tactical vehicles are highly effective in executing SOF contingency missions worldwide. This program supports the rapid fielding of SOF GMV (Medium) and NSCV. This P-1 line item received FY 2019 Overseas Contingency Operations (OCO) funding (\$59.891 million) and FY 2020 OCO (\$2.990 million) for Enduring Requirements. FY 2021 funding includes OCO for Enduring Requirements (\$2.990 million). These capabilities will be pursued via rapid fielding techniques when appropriate.

For the Defense Wide Review (DWR), US Special Operations Command performed a comprehensive analysis of future capabilities and is reducing the NSCV program to better align with the Department's priorities as outlined in the National Defense Strategy (-\$9.348 million).
 -\$9.348 million - NSCV - Reduces 25 Armored NSCVs and 25 CRISR/ECMS - A Kits and production and fielding support.

<p>Justification:</p> <p>1. GMV (Medium). The GMV 1.1 is an extremely mobile vehicle capable of internal air transport in a MH-47 that allows SOF operators a fast roll-on/roll-off capability ideal for a full spectrum of operations. The GMV 1.1 is equipped with an A Kit to accept a Command, Control, Communication, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) suite to provide an integrated and standardized communications platform. This program received Overseas Contingency Operations (OCO) funding in FY 2019.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures 18 C4ISR/ECMS A-Kits and initial spares.</p> <p>2. NSCV. Program provides a base vehicle that is representative of the local area where SOF is operating, and then installs SOF-peculiar modifications to provide increased protection, mobility, and communications. Depending on the mission, SOF modifications may include armor protection, winch, high capacity alternator, upgraded brakes and suspension system, and mounts/antennas for communications equipment. These low signature vehicles allow SOF to blend in with the local population in various locations around the world. This program received OCO funding in FY 2019 and FY 2020.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures 71 (61 armored/10 unarmored) NSCVs, 83 C4ISR/ECMS A-Kits, and production and fielding support (shipping and training).</p> <p>FY 2021 OCO PROGRAM JUSTIFICATION: Procures 12 Armored NSCVs.</p>

Description:

This P-1 Line Item provides for the procurement, rapid fielding, and associated costs of specialized equipment in the areas of communications, weapons, soldier protection and survival systems, Personal Signature Management (PSM), Counter Radio-Controlled Improvised Explosive Device (RC-IED) jamming systems, Counter-Unmanned Aircraft Systems (C-UAS), Visual Augmentation Systems (VAS): optics, lasers and simulators, radios, trainers, simulators, mission planning and rehearsal systems to meet Special Operations Forces (SOF)-unique requirements. The efforts within this P-1 Line Item improve SOF warfighting capabilities by continuing the procurement of smaller, lighter, more efficient and more robust capabilities. Communications efforts will maintain a Command, Control, and Communications (C3) link between SOF Commanders and SOF Teams, and provide interoperability with all Services, various agencies of the U.S. Government, Air Traffic Control, commercial agencies and allied foreign forces. Small Arms and Weapons procures SOF weapons and associated equipment that have increased capabilities over the service-common small arms. Specialized protection and survival equipment improves survivability and load bearing equipment impacting the mobility of SOF while conducting varied missions. RC-IED jamming force protection system will further enhance the bandwidth performance to defeat emerging radio frequency detonation threats during mobile and dismount operations. C-UAS enhances the SOF Operator's ability to detect, track, identify, exploit and defeat specific stand-off unmanned weapon threats, and to acquire objects of military significance before an operator is detected and to target threat objects accurately for engagement by operators C-UAS defeat capabilities. Visual augmentation, lasers and sensor systems, simulators and accessories provide SOF with day and night detection, observation, engagement, assessment and proficiency training capabilities that exceed service-common systems and optimizes hyper-enabled operator effectiveness. Tactical radios rapidly and seamlessly establish and maintain mobile and fixed Command and Control (C2) communications between operational elements and higher echelon headquarters, allowing SOF to operate with any force combination in multiple environments. Mission Command System Common Operating Picture (MCS/COP) procures new technology hardware components for establishing a unified SOF COP across all domains at the strategic, operational and tactical level. This P-1 line item received Overseas Contingency Operations (OCO) funding in FY 2019 (\$21.135 million) and enduring OCO in FY 2020 (\$37.512 million). FY 2021 funding includes OCO for enduring requirements (\$32.573 million). These capabilities will be pursued via rapid fielding techniques when appropriate.

For the Defense Wide Review (DWR), USSOCOM performed a comprehensive analysis of future capabilities and is reducing and streamlining contract support efforts for RC-IED, C-UAS, SDN, SPCOM, and VAS programs to better align with the Department's priorities as outlined in the National Defense Strategy (\$31.003 million).

- \$0.640 million - SPCOM - reduces procurement quantities by four SPCOM Field Mission Sets.
- \$16.972 million - SDN - reduces procurement quantities by one SDN-Heavy hardware Capital Equipment Replacement Plan (CERP), 14 SDN Medium Hardware CERP, 85 SDN-Light Hardware CERP, and Extension Package CERP.
- \$0.428 million - RC-IED - reduces procurement of and contract support efforts for ancillary equipment which includes Modi Vehicle Power Modules (VPM), Modi backpacks and Egon Master Modules.
- \$0.443 million - C-UAS - reduces procurement quantities and contract support efforts for various C-UAS devices and ancillary equipment.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

1. Special Communications (SPCOM) Enterprise. Program includes organization, practices, processes, services, networks, systems and subsystems that manage and provide clandestine exchange of information between elements (field-to-field, field-to-base and base-to-field) for worldwide deployed SOF units, often in austere environments with heavy adversarial monitoring. Acquisition efforts are structured for rapid procurements to counter adaptable emerging threats in all theaters of SOF sensitive missions. This program received Overseas Contingency Operations (OCO) funding in FY 2020.

FY 2021 PROGRAM JUSTIFICATION: Procures 15 field mission sets, as well as enterprise segment and base end segment such as mission-tailored, anti-intrusion/detection, enterprise-level, obfuscated communication capabilities for sensitive missions.

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2021 United States Special Operations Command		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 02: Special Operations Command / BSA 4: Other Procurement Programs		P-1 Line Item Number / Title: 0204WARSYS / WARRIOR SYSTEMS <\$5M
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: 1160431BB
Line Item MDAP/MAIS Code: N/A		
FY 2021 OCO PROGRAM JUSTIFICATION: Procures enterprise segment capabilities for sensitive missions.		
2. Satellite Deployable Node (SDN). Family of deployable, super high frequency, multi-band, Satellite Communications (SATCOM) systems providing the transport path for high-capacity, voice, data, Video Teleconferencing (VTC), and Intelligence Surveillance Reconnaissance (ISR) Full Motion Video (FMV) at all levels of classification. It consists of SDN subprograms, transport for intelligence variants, technology insertions and capital equipment replacement, to include FMV and Communications-On-the-Move (COTM). SDN-Heavy (SDN-H) is a deployable multi-channel/multi-band SATCOM terminal and associated switching equipment that provides wide-area connectivity through SOCOM Strategic Entry Points (SSEP) and commercial teleports for SOF task forces. SDN-Medium (SDN-M) is a lightweight, multi-channel SATCOM system that provides Command, Control, Communications, and Computers (C4) for SOF mid-level tactical headquarters and operational elements. SDN-Light (SDN-L) is a rugged, portable SATCOM package that supports small SOF liaison teams and small operational elements. Wide-band COTM consists of SDN afloat, ground mobile and airborne packages for SOF elements. The SDN ISR supports multimedia (ground, air, sea) sensor data backhaul and reception between platforms and various networks. This program received OCO funding in FY 2019 and FY 2020.		
FY 2021 PROGRAM JUSTIFICATION: Procures CERP of seven SDN-H, CERP 36 SDN-M, CERP 178 SDN-L, CERP Full Motion Video (FMV) - Evolutionary Technology Insertions (ETIs), SDN-Extension Packages, COTMs, CERP COTM ETIs, CERP 42 Light Vx Variants, and SSEP.		
FY 2021 OCO PROGRAM JUSTIFICATION: Procures SDN-Extension Packages and COTMs.		
3. SCAMPI (not an acronym). Wide Area Network (WAN) foundation system that transports, encrypts, and accelerates all data, voice, and video information between Headquarters USSOCOM, SOF deployed forces, all subordinate commands, and selected government agencies and activities directly supporting the special operations community. SCAMPI provides transport of SOF data, voice, and video, for all classification levels, to all USSOCOM locations in the SOF Information Environment (SIE). SCAMPI also utilizes commercial Satellite Infrastructure globally to extend the SIE to SDNs. This program received OCO funding in FY 2020.		
FY 2021 PROGRAM JUSTIFICATION: CERP one Special Purpose Processing Node (SPPNs), procure one Installation Gateway (IG), CERP nine Installation Gateways, CERP one Strategic Installation Gateway (SIG), and procure nine Airborne ISR Transport manned/unmanned hubs.		
FY 2021 OCO PROGRAM JUSTIFICATION: CERP five Installation Gateways.		
4. Weapons. Provides the SOF operator with common caliber weapons that enable SOF to accurately engage enemy personnel and materiel in all SOF environments at ranges up to 1500 meters. The Weapons program is delineated into four sub-programs: Weapons-Rifles, Weapons-Sniper Rifles, Weapons-Machine Guns, and Weapons-Handguns. Weapons include common caliber pistols to engage at close range, modular assault rifles to engage out to 600 meters, Sniper Support Rifles to engage out to 800 meters, sniper rifles to engage out to 1500 meters, shoulder fired grenade launchers, vehicle and man-portable high velocity grenade launchers, machine guns to engage out to 1000 meters, multi-barreled mini-guns which can be mounted on boats, vehicles, aircraft, and ground mounted to engage out to 3,500 meters, and Weapon Accessories to include suppressors used on both service-common and SOF weapons. These enable the operator to tailor the configuration of the weapon to the assigned mission and operational environment, enhancing the overall effectiveness of the weapons, which enables mission accomplishment and operator survivability. Mid-Range Gas Gun (MRGG), Lightweight Machine Gun-medium, and Personal Defense Weapons System (PDW) are designated MTA programs which uses the rapid fielding pathway and is executed using existing contracts, government agencies, and new contract competitively selected as appropriate.		
FY 2021 PROGRAM JUSTIFICATION: Procures 508 Rifle Upper Receiver Groups (URG), 76 MK 15 Sniper Rifles, 303 Advanced Sniper Rifles (ASR), 298 Glock 19 Handguns and weapons range equipment.		
5. Tactical Combat Casualty Care (TCCC). Provides medical devices and equipment for treatment of casualties in support of forward deployed SOF. This program consists of the Operator Kit, Medic Kit, and Casualty Evacuation (CASEVAC) Set. The TCCC Program procures a variety of Food and Drug Administration-approved medical items include intraosseous (injection into the bone marrow) infusion devices; patient monitoring and assessment devices; emergency airway kits; and devices that support patient management, extraction, transportation, and casualty care. The TCCC program fields essential lifesaving CASEVAC equipment and capabilities and is a platform to transition capabilities developed under the National Mission Force's Tactical Medical Program. Finally, this program provides significant ability to lessen battlefield losses by providing timely, critical lifesaving, and evacuation capabilities to forward-deployed SOF Operators. This program received OCO funding in FY 2019 and FY 2020.

Exhibit P-40, Budget Line Item Justification: PB 2021 United States Special Operations Command		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 02: Special Operations Command / BSA 4: Other Procurement Programs		P-1 Line Item Number / Title: 0204WARSYS / WARRIOR SYSTEMS <\$5M
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: N/A	Other Related Program Elements: 1160431BB
Line Item MDAP/MAIS Code: N/A		
<p>FY 2021 PROGRAM JUSTIFICATION: Procures six CASEVAC sets and production support.</p> <p>FY 2021 OCO PROGRAM JUSTIFICATION: Procures nine CASEVAC sets.</p> <p>6. PSM. The PSM program provides signature reducing materials and technology that reduce the probability of detection by battlefield threat sensors.</p> <p>7. RC-IED. Centralized program that provides a capability for USSOCOM to acquire RC-IED jamming systems. Mounted and Dismounted system designs provide force protection while operating in various environments. These systems are designed for easy update to protect against an evolving threat matrix. Continued procurement of the low visibility RC-IED jamming force protection system will further enhance the bandwidth performance to defeat emerging radio frequency (RF) detonation threats during mobile and dismount operations. This program provides scalable RC-IED systems whose configuration and modularity address a mission critical capability gap to counter the proliferation of RF-initiated IEDs globally. USSOCOM coordinates with other government agencies and Services to maximize hardware procurement savings through economies of scale. The procurement of SOF-specific RC-IED systems provides unique special mission ECM capabilities to National units.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures 61 force protection RC-IED devices, and ancillary equipment.</p> <p>8. C-UAS. Provides the SOF Operator protection with a wide range of lightweight, low signature mounted, dismounted (hand held and man-portable) and expeditionary fixed site systems, to include but not limited to radio frequency (RF) detection, acoustic, electro-optical infrared (EO/IR), passive and active radar sensors. Procurement of SOF C-UAS systems allow the detection, identification, tracking, location and exploitation of enemy unmanned systems during dismounted and mounted operations in hostile and denied environments, while the services focus primarily on providing capability to address fixed site defense of Forward Operating Bases (FOB). C-UAS supports the National Defense strategy in providing joint lethality in contested environments by its continuous efforts in developing a variety of countermeasures to address C-UAS emerging threats. This program received OCO funding in FY 2020.</p> <p>FY 2021 OCO PROGRAM JUSTIFICATION: Procures C-UAS devices (to include, but not limited to: passive/active mounted, dismounted (hand-held, man-portable) and expeditionary fixed site) and ancillary equipment.</p> <p>9. VAS - Optics. Provides the SOF operator with lightweight, man-portable thermal imagers that detect, acquire, and observe targets during day/night operations; equip the sniper with a lightweight, low signature, fire control and observation device that allows operators to detect, acquire, and engage targets out to the weapon's maximum effective range under day/night conditions; the devices allow the sniper to utilize the weapon during day to night operations without re-zeroing. VAS optics enhances target acquisition and accuracy of all SOF weapons, resulting in increased mission accomplishment and operator survivability. This program received OCO funding in FY 2019.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures 1,000 Binocular Night Vision Devices, 200 Clip on Thermal Imagers, 60 Clip on Short Wave Infrared Imagers, 2,076 S-VPS (SFP) SU-293/VPS, 1,014 S-VPS (FFP) SU-294/VPS, and one SU-91/PVS Day Optics Handgun Reflex Sight (HRS).</p> <p>10. VAS - Lasers. Provides markers, lasers (handheld, body or helmet worn), infrared sights, and small target location devices. Provides laser target designators with range finding capability. The marker and location devices allow operators to conduct close air support and air interdiction missions through the terminal guidance of laser-guided munitions and provide precise location of targets. The marking devices reduce collateral damage and increase precise target engagements with fighter aircraft and attack helicopters. Thermal devices provide a night vision capability and verify that the energy from the device is on the target. This system is specifically gated and turned to view the invisible laser spot of the marker for use in designating laser guided bombs to targets. The Small Target Location Device (STLD) provides precise location of devices via lasers and celestial/terrestrial or alternative positional subsystems. Thermal beacon enables assets equipped with thermal sensors to identify the location of forces in order to prevent friendly fire or fratricide events. This budget item incorporated the VAS Weapons Accessories - Advanced Target Pointer Illuminator Aiming Laser (ATPIAL), and Laser Aiming Markers (LAM) programs.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures 2,300 ATPIAL Squad Aiming Lasers, 35 ATPIAL Precision Aiming Lasers, 56 ATPIAL Handguns, 350 ATPIAL Ranging Aiming Laser, and 45 STLDs.</p>

Line Item MDAP/MAIS Code: N/A		
<p>11. VAS – Simulators. Simulator trainers enable SOF operators to learn, enhance, and hone skills, at a greatly reduced cost to training on a weapons range with live munitions. This item procures various simulators to enhance skills, such as the Joint Terminal Attack Controller (JTAC) simulation training for forward deployed SOF operators who direct the action of combat aircraft engaged in close air support and other offensive air operations. There are three required configurations, which include a full immersive system, classroom systems, and deployable system. The immersive and classroom configurations provide a full realistic simulation which addresses multiple phases of training to include proficiency, readiness, and mission preparation. The deployable configuration will support Host Nation/Partner Nation (HN/PN) training, as well as internal currency and rehearsal requirements when a JTAC is away from the garrison unit during training or forward deployed.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures 11 Joint Terminal Attack Controller (JTAC) simulators.</p>		
<p>12. SOF Tactical Communications (STC). Provides the next generation SOF communication system and replaces most of the currently fielded SOF suite of radios. The capability will consist of four basic form factors: 1) Man-Pack (MP) device will be a multi-band device capable of being carried by an individual or being mounted on various SOF platforms; 2) Fixed configuration will be a multi-band and/or High-Frequency (HF) device designed for implementation into air/ground/sea platforms or base stations; 3) HF device in a man-pack configuration will be capable of being mounted on various SOF platforms; 4) Handheld (HH) device will include both an urban and maritime variant. This system will introduce additional capabilities to SOF to improve current situational awareness capabilities and performance on SOF platforms. Capabilities will include: real time, hostile and friendly force information; Line of Sight (LOS) and Beyond LOS communications; and access to situational awareness in the form of intelligence inputs, broadcasts, and networks. This system will be a key component of an integrated network providing information connectivity among SOF, the Services, other government agencies, and potentially indigenous and surrogate forces. This program received OCO funding in FY 2019 and FY 2020 and Congressional Adds in FY 2019.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures 286 HH Link-16 radios, CERP 2,254 HH radios, CERP 1,308 MP radios, and CERP 330 HF radios.</p> <p>FY 2021 OCO PROGRAM JUSTIFICATION: Procures 188 HH Link-16 radios.</p>		
<p>13. Radio Integration System (RIS). RIS provides the command, control, and communications (C3) linkage between deployed SOF bases and Liaison Officer (LNO) teams to SOF, SOF headquarters, and SOF support elements. RIS is an evolutionary acquisition program to procure the most current tactical C3 communications system for deployed and forward-based SOF and is fully modular and scalable and consists of subsystems that allow users to tailor system capabilities, size, and features dependent on a particular mission. RIS interfaces, enhances, and combines multiple single channel radios into one integrated C3 suite to exchange secure/non-secure voice, secure data, and remote communications with other communications platforms in support of the SOF mission. RIS variants include; the Multi-Band Radio Transit Case, High Frequency Transit Case, and Mobile Base Station, and provide operators with increased capability, greater scalability, and a reduction in the size, weight, and power of previously fielded versions. These variants integrate existing and future radios to enable the SOF operational commander to exercise reliable, effective, and efficient C3 functions regardless of area of operation. This program received OCO funding in FY 2019.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures nine Multi-Band Radio Transit Cases, seven High Frequency Transit Cases, and five Mobile Base Stations.</p>		
<p>14. Blue Force Tracking (BFT). Family of devices used to remotely track and monitor Blue Forces. The capability enhances C2, threat warning, force protection, situational awareness, combat search and rescue, personnel recovery, counter-fratricide, and battlefield visualization. This capability is unique to SOF because it requires the devices to be lightweight, portable, secure and a Low Probability of Intercept/ Low Probability of Detection. SOF systems include handheld devices that provides automated transmission of position location information and brevity codes supporting both ground and air assets. This information is collected by national or commercial assets, relayed to select command units, and displayed on the receiving unit's common operational picture.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures 122 SHOUT-TS1, 154 Riverjack Tracker (RJT), 15 Lightning Bolt Handheld (LBHH),493 SHOUT-TS1S, and 31 Sand Dollar.</p>		
<p>15. MCS/COP. MCS/COP provides shared situational awareness for Special Operations Forces Commanders across all domains at the tactical, operational, and strategic levels. The MCS/COP delivers a near-real time common operational picture for understanding of the intelligence and operational environment to support decision making.</p> <p>FY 2021 PROGRAM JUSTIFICATION: Procures new technology for a unified SOF Common Operating Picture. High performance cloud computing infrastructure.</p>

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.																				
Footnotes:																				
(1) For the Defense Wide Review (DWR), United States Special Operations Command (USSOCOM) performed a comprehensive analysis of future capabilities and is reducing procurement quantities by one SDN-Heavy hardware CERP, 14 SDN Medium Hardware CERP, 85 SDN-Light Hardware CERP, and Extension Package CERP (-\$0.640 million).																				
(2) For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is reducing procurement quantities by one SDN-Heavy hardware CERP, 14 SDN Medium Hardware CERP, 85 SDN-Light Hardware CERP, and Extension Package CERP (-\$16.972 million).																				
(3) For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is reducing procurement of and contract support efforts for ancillary equipment which includes Modi Vehicle Power Modules (VPM), Modi backpacks and Egon Master Modules (-\$0.428 million).																				
(4) For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is reducing procurement quantities and contract support efforts for various C-UAS devices and ancillary equipment (-\$0.443 million).																				
(5) For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is reducing procurement quantities by 194 Binocular Night Vision Devices (NVD) - AN/PVS-31, 133 Clip On Thermal Imagers (COTI) - AN/PVS-29, 89 Clip On Short Wave Infrared Imager (COSI) AN/PAS-34, 10 Hand Held Imager (HHI), Mini Long-Range AN/PAS-33, 924 S-VPS (SFP) SU-293/PVS, 1,810 S-VPS (FFP) SU-294/PVS, and 199 SU-91/PVS Day Optics Handgun Reflex Sight (HRS) (-\$6.622 million).																				
(6) For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is reducing procurement quantities by 400 ATPIAL Squad Aiming Lasers LA-23 PEQ, 118 ATPIAL Precision Aiming Lasers, 228 ATPIAL Handgun Aiming Lasers, 750 ATPIAL Ranging Aiming Lasers, and 450 Thermal Beacons (-\$4.528 million).																				
(7) For the DWR, USSOCOM performed a comprehensive analysis of future capabilities and is reducing procurement quantities for various VAS-Simulators (-\$1.370 million).																				
(8) FY21 Program net increase of \$12.564 million is primarily due to functionally aligning \$5.614 million for joint operational stock equipment and additional \$6.950 million OCO to Base for Enduring Requirement for CERP of Hand Held Link 16 radios.																				
(9) FY21 increase is due the increased component life cycle replacement (\$4.152 million).																				
(10) FY21 Program increase due to functionally aligning AISR-T funding for procurement of AISR Manned/Unmanned Hubs requirements (\$17.328 million).																				
(11) Unit Cost for FY19 lowered to \$0.147 million per system due to SOCOM/Army/OGA total purchase of 770 Modi systems within 90 day ordering window. Unit Cost for FY20/21 factors in continued strategic partner alliance with SOCOM/Army/OGA achieving step-ladder pricing cost savings, although smaller quantities than FY19.																				
(12) Ancillary equipment includes Modi Vehicle Power Modules, Modi backpacks, and a third-party module (Special Application Module).																				
(13) OCO Ancillary equipment includes Modi Vehicle Power Modules (VPM) and Modi backpacks.																				
(14) Ancillary equipment includes, but not limited to: cables, antennas, mounting hardware, containers for storage and shipping.																				
(15) Procurement of C-UAS devices (to include, but not limited to: passive/active mounted, dismounted (hand-held, man-portable) and expeditionary fixed site. Quantities will be determined via successful Combat Evaluations (CV) that result in a formal follow-on enterprise C-UAS requirement to procure and field "best of breed" solutions via an official Program of Record to be established 1QFY21.																				
(16) FY19 funding supported Combat Evaluations of commercially available C-UAS Passive Detection systems (acoustic panels) to fill an operational deficiency of force protection for expeditionary fixed site operations in hostile and denied environments. Lessons learned will inform follow-on enterprise C-UAS requirements to procure and field "best of breed" solutions.																				
(17) FY19 funding supported Combat Evaluations of commercially available C-UAS Active Detection systems (EO/IR Optic) to fill an operational deficiency of force protection for expeditionary fixed site operations in hostile and denied environments. Lessons learned will inform follow-on enterprise C-UAS requirements to procure and field "best of breed" solutions.																				
(18) FY21 increase is for the accelerated procurement of Handheld Link 16 radios (\$7.942 million).																				
(19) FY21 increase is to accelerate the CERP of Handheld radios (\$28.046 million).																				
(20) FY21 decrease is due to the rebaselining of Manpack (MP) radio CERP as a result of accelerated purchase of MPs in FY20 (-\$21.134 million).																				
(21) MCS/COP includes but not limited to server racks, laptops, various hardware, etc.

Description: The Combat Mission Requirements line item procures emergent critical equipment shortfalls that must be rapidly fielded to Special Operations Forces operators in the field to conduct combat missions. These equipment shortfalls are identified by Geographical Combatant Commanders (GCCs) and validated and approved by United States Special Operations Command (USSOCOM) as a Combat Mission Needs Statement (CMNS). Each requirement is vetted through a rigorous USSOCOM process and must meet the following criteria: provide force protection to troops or ensure mission success. Equipment purchased under the CMNS umbrella include, but are not limited to, radios, intelligence equipment, unmanned aerial vehicles, blast and ballistic protected tactical vehicles, ammunition, weapons, aircraft defensive systems, night vision devices, and aircraft precision strike systems. USSOCOM submits an annual report to Congress that describes the CMNS that were approved during the current fiscal year. This P-1 line item received Overseas Contingency Operations (OCO) funding in FY 2019 (\$10.000 million) and FY 2020 (\$10.000 million) for Direct War Costs. FY 2021 funding includes OCO for Direct War Costs (\$10.000 million)

Description:

This P-1 line item is part of the Military Intelligence Program. Details provided under separate cover.

For the Defense Wide Review (DWR), US Special Operations Command performed a comprehensive analysis of future capabilities and is reducing the Global Video Surveillance Activities (GVSA) (details provided under separate cover) to better align with the Department's priorities as outlined in the National Defense Strategy (-\$2.000 million).

Justification:

Details provided under separate cover.

<p>Description: Provides support to the White House Military Office (WHMO) including food service, presidential transportation, medical support, emergency medical services, hospitality services, supplies and materials, facility sustainment, other goods and services from federal sources, and other services from non-federal sources.</p> <p>Justification: The FY 2021 request reflects the modernization and life-cycle refresh cost of major information technology equipment for the White House Military Office (WHMO) which is required to support the business and operational requirements in order to provide essential services to the President and to help maintain continuity of operations (COOP).</p> <p>This request also includes procurement of physical security vehicles assigned to missions in high threat OCONUS locations, specifically the life-cycle replacement cost for one Commercial Heavy Armored Vehicle (CHAV) that supports the Secretary of Defense, Deputy Secretary of Defense, and OSD Senior officials providing secure and reliable ground transportation capability. CHAVs are armored to various levels of protection and are on platforms of varying sizes and gross vehicle weights, dependent upon the level of threat and the operating environment.</p>

Description: The DoD Indian Incentive Program (IIP) is authorized by Section 504 of the Indian Financing Act of 1974 (U.S.C 1544). In 1989, Congress began providing annual funds through the DoD Appropriation Act for the DoD Indian Incentive Program. The program motivates prime contractors to utilize Indian organizations and Indian-owned economic enterprises by providing a 5% rebate on subcontracted work performed by those companies that fall into the following categories: Federally Recognized American Indian Organizations, Indian-Owned economics enterprises and small businesses owned by members of recognized tribes, Native Alaskans or Native Hawaiians. Through the generation of subcontracts to the above mentioned entities, the IIP fulfills its purpose as an economic multiplier for Native American communities.												
Justification: The Department will submit a prior approval reprogramming during FY 2020 to realign funds for the Indian Incentive Program (IIP). The Office of Small Business Programs will process FY 2020 contractor rebate requests.
