This internal reprogramming action transfers \$2.0 million added by the Congress for the Pollution Prevention Program from the Strategic Environmental Research and Development Program (SERDP) within the Research, Development, Test, and Evaluation, Defense-Wide appropriation to the Environmental Quality Technology Management Support program within the Research, Development, Test, and Evaluation, Army appropriation for proper execution. This action uses general transfer authority pursuant to section 8005 of Public Law 106-259, the DoD Appropriations Act, 2001, and section 1001 of Public Law 106-398, the Floyd D. Spence National Defense Authorization Act for FY 2001. This action does not change the purpose for which the funds were originally appropriated. It meets all administrative and legal requirements of the Congress and has not previously been denied by the Congress.

Explanation: The Pollution Prevention Regional Partnership project was appropriated by Congress in FY 2001 to the Strategic Environmental Research and Development Program (SERDP) administered by OSD. The funds are proposed for transfer to the Army to provide management and support of installation Pollution Prevention (P2) technology and to leverage regional partnerships through the Interstate Technology Regulatory Coordination (ITRC) Council as part of its P2 outreach program. The project will modify various compliance permit processes to achieve “regulatory flexibility” by implementing new and innovative techniques to assist DoD in meeting P2 Measures of Merit goal of diverting 40% (by weight) of solid waste from landfills or incineration by FY 2005 and 50% by FY 2010. This Army project – with EPA matching funds – will enable regional partnerships to enhance technology transfer and support fielding P2 technology.

Approved (Signature and Date)  AUG 20 2001 Dov S. Zakheim
