This internal reprogramming action transfers \$2.550 million from Aircraft Procurement, Army, 04/06, appropriation to Research, Development, Test, and Evaluation, Army, 04/05, appropriation for proper execution. This action uses general transfer authority pursuant to section 8005 of Public Law 108-87, the DoD Appropriations Act, 2004; and section 1001 of Public Law 108-136, the National Defense Authorization Act, 2004. This action transfers a Congressional Special Interest item to the correct appropriation for proper execution. It does not change the purpose for which the funds were originally appropriated. Funding transferred is for a National Guard initiative to demonstrate a Homeland Security Module in support of civil defense. This action meets all administrative and legal requirements of the Congress and the Congress has not previously denied the item.

Explanation: This action will provide funding in support of the requirements for one prototype module to demonstrate capabilities prior to National Guard approval for final design and integration into the Block I system. There is no commercially available solution that will meet Air Worthiness Requirements. This requires a developmental effort and it is based upon emerging military requirements. This funding is an estimate based upon initial requirements development to build a demonstration module and demonstrate capabilities of A2C2S to provide communications for the Homeland Security Role. The demonstration of this module would be performed either on the Design Test System or the Training Demonstrator System. This reprogramming supports urgent emerging Army requirements.
