This reprogramming action is submitted for prior approval because this action uses general transfer authority, and exceeds established reprogramming thresholds. This action reprograms funds in support of higher priority items, based on unforeseen military requirements, than those for which originally appropriated; and is determined to be necessary in the national interest. The adjustments meet all administrative and legal requirements, and none of the items have previously been denied by the Congress. This impacts the **Military Intelligence Program (MIP)**.

This reprogramming action transfers \$18.750 \$2.750 million among Fiscal Year (FY) 2014 Defense appropriations. This reprogramming action uses \$18.750 \$2.750 million of general transfer authority pursuant to section 8005 of Division C of Public 113-76, the Department of Defense (DoD) Appropriations Act, 2014, and section 1001 of Public Law 113-66, the National Defense Authorization Act for Fiscal Year (FY) 2014.

FY 2014 REPROGRAMMING INCREASES: **+18,750 +2,750**

Procurement, Defense-Wide, 14/16 **+2,750**
Budget Activity 01: Major Equipment
 Classified Program **+2,750**

Explanation: The details for this action are classified. This is a **MIP project**. This is a base budget requirement.

Research, Development, Test, and Evaluation, Navy, 14/15 **+16,000**
Budget Activity 07: Operational System Development
PE 0305234N Small (Level 0) Tactical UAS (STUASL0)
5,013 **5,013** **+16,000** **21,013**

Explanation: Funds are required to integrate a heavy fuel engine onto RQ-21. Force rebalancing and the Marine Corps focus on shipboard operations have prioritized the need to accelerate amphibious Intelligence, Surveillance, and Reconnaissance. Integration of a heavy fuel engine will be the first step in enabling the extension of the current RQ-21 range and will influence a significant area of the battle space and reduce ground control station requirements. This is a **MIP project**. This is a base budget requirement.
