This prior approval reprogramming action is submitted for approval because these actions use general transfer authority, exceed established reprogramming thresholds, affect congressional special interest items, and initiate new starts. This reprogramming action provides funding in support of higher priority items, based on unforeseen military requirements, than those for which originally appropriated; and is determined to be necessary in the national interest. It meets all administrative and legal requirements, and none of the items has previously been denied by the Congress.

<u>**Part I**</u> of this reprogramming action transfers or realigns \$431.939 million among various Fiscal Year (FY) 2019 Defense appropriations. This reprogramming action uses \$148.715 million of general transfer authority pursuant to section 8005 of division A of Public Law 115-245, the Department of Defense (DoD) Appropriations Act, 2019; and section 1001 of Public Law 115-232, the John S. McCain National Defense Authorization Act for FY 2019.

<u>**Part II**</u> of this reprogramming action realigns \$22.344 million within the Operation and Maintenance, Army, 19/19, appropriation.

<u>Part III</u> of this reprogramming action realigns \$36.0 million within the Missile Procurement, Army, 18/20, appropriation and \$27.5 million within the Research, Development, Test, and Evaluation, Army, 18/19, appropriation.
