This prior approval reprogramming action is submitted for approval because these actions use general or special transfer authority, exceed established reprogramming thresholds, affect special interest items, or initiate a new start. This reprogramming action provides funding in support of higher priority items, based on unforeseen military requirements, than those for which originally appropriated; and are determined to be necessary in the national interest. They meet all administrative and legal requirements, and none of the items have previously been denied by the Congress. This reprogramming impacts the **Military Intelligence Program (MIP)**.

PART I of this reprogramming action transfers \$4.60 million between Air Force appropriations. This reprogramming action uses \$4.60 million of general transfer authority pursuant to section 8005 of the Department of Defense Appropriations Act, 2022 (division C of Public Law 117-103).

Explanation: Funds are required to purchase deployable, transportable Sensitive Compartmented Information Facilities (SCIFs) to deploy and operate Space Force’s Tactical Intelligence, Surveillance, and Reconnaissance (ISR) Operations Cell and Deployable Intelligence Support Cell in the USCENTCOM area of responsibility. The unit’s current temporary SCIF is a tent-based solution, which is inadequate for sustaining long duration personnel operations; sustaining operational and fully functional ISR; and sustaining information technology/communications systems. This is a **MIP project**. This is a **new start**.
