

Subject: MIP January 2024		DoD Serial Number: FY 24-03 PA
Appropriation Title: Research, Development, Test, and Evaluation, Air Force 23/24		
		Includes Transfer? No

Component Serial Number:	<i>(Amounts in Thousands of Dollars)</i>							
	Program Base Reflecting Congressional Action		Program Previously Approved by Sec Def		Reprogramming Action		Revised Program	
Line Item	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount
a	b	c	d	e	f	g	h	i

This prior approval reprogramming action is submitted for approval because these actions use general or special transfer authority, exceed established reprogramming thresholds, affect special interest items, or initiate a new start. This reprogramming action provides funding in support of higher priority items, based on unforeseen military requirements, than those for which originally appropriated; and are determined to be necessary in the national interest. They meet all administrative and legal requirements, and none of the items have previously been denied by the Congress. This reprogramming impacts the Military Intelligence Program (MIP).

This reprogramming action realigns \$10.00 million within the Research, Development, Test, and Evaluation, Air Force, 23/24, appropriation.

<u>FY 2023 REPROGRAMMING INCREASE:</u>	<u>+10,000</u>
<u>AIR FORCE INCREASE</u>	<u>+10,000</u>
<u>Research, Development, Test, and Evaluation, Air Force, 23/24</u>	<u>+10,000</u>
<u>Budget Activity 07: Operational Systems Development</u>	
0305206F Airborne Reconnaissance Systems	
70,048	76,139
	+10,000
	86,139

Explanation: Funds are required to complete the Advanced Synthetic Aperture Radar System (ASARS-2B) Engineering and Manufacturing Development (EMD) Phase. Technical engineering and design challenges with integrating the Air-Cooled Scalable commercial-off-the-shelf processor, antenna, and receiver exciter have extended schedule and increased cost above what was original planned. Additional funds are required for continued development and integration including system integration laboratory, developmental, and operational testing. If not funded, the program will stop work on ASARS-2B EMD efforts which would have serious negative consequences for the Army High Accuracy Detection and Exploitation System (HADES) program and classified mission partners. This is a **MIP PROJECT**.

Approved (Signature and Date)

Paul McLeod 2/8/24
