Note 1.	Significant Accounting Policies
----------------	--

1.A. Basis of Presentation

The Defense Finance and Accounting Service (DFAS) prepared these financial statements to report the financial position and results of operations of the Military Retirement Fund, (MRF) as required by the “Chief Financial Officers Act of 1990,” expanded by the “Government Management Reform Act of 1994,” and other appropriate legislation. The DFAS Denver Trust Fund Division, Accounting Directorate, prepared the financial statements from its books and records of the MRF in accordance with the “DoD Financial Management Regulation,” the Office of Management and Budget Circular A-136, Financial Reporting Requirements, and to the extent possible generally accepted accounting principles (GAAP). The accompanying financial statements account for all resources for which the Military Retirement Fund is responsible. Information relative to classified assets, programs, and operations is aggregated and reported in such a manner that it is not discernable.

1.B. Mission of the Reporting Entity

The mission of the Department of Defense (DoD) MRF is to accumulate funds in order to finance, on an actuarially sound basis, the liabilities of the DoD under military retirement and survivor benefit programs.

The asset accounts used to prepare the statements are categorized as either entity or non-entity assets, where applicable. Entity accounts consist of resources that the agency has the authority to use or where management is legally obligated to use funds to meet entity obligations. Non-entity accounts are assets that are held by an entity but are not available for use in the operations of the entity.

1.C. Appropriations and Funds

The MRF receives its appropriations and funds as general, working capital (revolving funds), trust, special, deposit funds and earmarked funds. The MRF uses these appropriations and funds to execute their missions and report on resource usage.

The MRF is a pension program established in fiscal year (FY) 1984 by PL 98-94, for the payment of annuities and pensions to retired military personnel and their survivors. The DoD Retirement Board of Actuaries determines the contributions made to the MRF. The DoD contribution is a percentage of basic pay. The Department of Treasury contribution is the annual unfunded amortization payment. Excess funds from the contributions are invested and accrued interest revenue is used to cover future liabilities of the Fund.

Certain special and trust funds may be designated as earmarked funds. Earmarked Funds are financed by specifically identified revenues, required by statute to be used for designated activities, benefits or purposes, and remain available over time. Earmarked funds also have a requirement to account for and report on the receipt, use and retention of revenues and other financing sources that distinguish it from general revenues.

1.D. Basis of Accounting

Under the authority of the CFO Act of 1990, the Federal Accounting Standards Advisory Board (FASAB) was established to recommend Federal Accounting Standards to the Secretary of the Treasury, the Director of the Office of Management and Budget (OMB) and the Comptroller General. The Statements of Federal Financial Accounting Standards (SFFAS) have been issued by the Director of OMB and the Comptroller General, some of which have deferred effective dates.

In April 2000, the American Institute of Certified Public Accountants (AICPA) through Statements on Auditing Standards (SAS) No. 69, The Meaning of Present Fairly in Conformity with GAAP in the Auditor's Report, as amended by SAS No. 91, established the following hierarchy of accounting principles for Federal government entities:

- (A) Federal Accounting Standards Advisory Board (FASAB) Statements and Interpretations plus AICPA and Financial Accounting Standards Board (FASB) pronouncements if made applicable to Federal governmental entities by a FASAB Statement or Interpretation;
- (B) FASAB Technical Bulletins and the following pronouncements if specifically made applicable to Federal governmental entities by the AICPA and cleared by the FASAB: AICPA Industry Audit and Accounting Guides and AICPA Statement of Position;
- (C) AICPA Accounting Standards Executive Committee Practice Bulletins if specifically made applicable to Federal governmental entities and cleared by the FASAB and Technical Releases of the Accounting and Auditing Policy Committee of the FASAB; and
- (D) Implementation guides published by the FASAB staff and practices that are widely recognized and prevalent in the Federal government.

In the absence of a pronouncement covered by Federal GAAP or another source of established accounting principles, the auditor of a federal government entity may consider other accounting literature, depending on its relevance in the circumstances. When directed by OMB, through OMB Circular A-136, generally accepted accounting principles in the United States of America serve as authoritative guidance for Federal agencies in preparing reports that are addressed within this circular.

In addition, the MRF identifies program costs based upon the major appropriation groups provided by the Congress. Current processes and systems do not capture and report accumulated costs for major programs based upon the performance measures as required by the Government and Performance and Results Act (GPRA). The MRF is in the process of reviewing available data and attempting to develop a cost reporting methodology that balances the need for cost information required by the SFFAS No. 4, "Managerial Cost Accounting Concepts and Standards for the Federal Government," with the need to keep the financial statements from being overly voluminous.

1.E. Revenues and Other Financing Sources

Financing sources for the MRF are provided primarily through monthly Military Service contributions as a percentage of base pay, an annual unfunded liability payment from the U.S. Department of Treasury, and interest earned on investments.

The MRF does not include non-monetary support provided by U.S. allies for common defense and mutual security in amounts reported in the Statement of Net Cost and the Statement of Financing. The U.S. has cost sharing agreements with other countries. Examples include countries where there is a mutual or reciprocal defense agreement, where U.S. troops are stationed, or where the U.S. Fleet is in a port.

1.F. Recognition of Expenses

For financial reporting purposes, DoD policy requires the recognition of operating expenses in the period incurred. However, because the MRF financial feeder system was not designed to collect and record financial information on the full accrual accounting basis, accrual adjustments are made for major items such as payroll expenses, accounts payable, environmental liabilities, and unbilled revenue.

1.G. Accounting for Intragovernmental Activities

The MRF purchases and redeems nonmarketable market-based securities issued by the U.S. Treasury, Bureau of the Public Debt. Nonmarketable market-based securities include U.S. Treasury bills, notes, bonds, inflation-protected securities, and overnight certificates. U.S. Treasury bills are short-term securities with maturities of one year or less and are purchased at a discount. U.S. Treasury notes have maturities of at least one year, but not more than 10 years, and are purchased at a discount or premium. U.S. Treasury bonds are long-term securities with maturity terms of 10 years or more and are purchased at either a discount or premium.

The MRF records investments at book value in US Standard General Ledger (USSGL) 1610, investments, net. Discounts and premiums are recorded on the trial balance in 1611, discount on U.S. Treasury securities issued by public debt and 1612, premium on U.S. Treasury securities issued by public debt respectively. The Fund calculates amortization of discounts and premiums using the effective interest method and records this amortization on the trial balance in USSGL 1613, amortized discount/premium, U.S. Treasury securities issued by public debt.

The Fund receives interest on the value of its nonmarketable market-based securities from the U.S. Treasury on a semi-annual basis for U.S. Treasury bonds and notes.

Preparation of reliable financial statements requires the elimination of transactions occurring among entities within the DoD or between two or more federal agencies. Seller entities within the DoD provide summary seller-side balances for revenue, accounts receivable, and unearned revenue to the buyer-side internal DoD accounting offices. In most cases, the buyer-side records are adjusted to agree with DoD seller-side balances. Intra-DoD intragovernmental balances are then eliminated.

The Department of the Treasury Financial Management Service (FMS) is responsible for eliminating transactions between the DoD and other federal agencies. The Treasury Financial Manual, Part 2 – Chapter 4700, “Agency Reporting Requirements for the Financial Report of the United States Government” and the Treasury’s “Federal Intragovernmental Transactions Accounting Policy Guide,” provide guidance for reporting and reconciling intragovernmental balances. While the MRF is unable to fully reconcile intragovernmental transactions with all federal partners, the MRF is able to reconcile balances pertaining to investments in federal securities, borrowings from the U.S. Treasury and the Federal Financing Bank, Federal Employees’ Compensation Act transactions with the Department of Labor (DOL), and the benefit program transactions with the Office of Personnel Management (OPM). The DoD’s proportionate share of public debt and related expenses of the federal government are not included. The federal government does not apportion debt and its related costs to federal agencies. The DoD’s financial statements, therefore, do not report any portion of the public debt or interest thereon, nor do the statements report the source of public financing whether from issuance of debt or tax revenues.

Financing for the construction of DoD facilities is obtained through appropriations. To the extent this financing ultimately may have been obtained through the issuance of public debt, interest costs have not been capitalized since the Department of the Treasury does not allocate such interest costs to the benefiting agencies.

1.H. Transactions with Foreign Governments and International Organizations

N/A

1.I. Funds with the U.S. Treasury

The U.S. Treasury allows the Fund to be fully invested. Therefore, the Fund Balance with Treasury (FBWT) may be zero during various quarters of the fiscal year.

The MRF’s monetary financial resources are maintained in U.S. Treasury accounts. The DFAS Denver Trust Funds staff processes all fund receipts and adjustments. The DFAS Denver staff prepares monthly reports that provide information to the U.S. Treasury on transfers and deposits.

In addition, DFAS Denver submits reports to the Department of the Treasury, by appropriation, on collections received and disbursements issued. The Department of the Treasury records this information to the applicable Fund Balance with Treasury (FBWT) account. Differences between the MRF’s recorded balance in the FBWT and Treasury’s FBWT accounts sometimes result and are subsequently reconciled.

1.J. Foreign Currency

N/A

1.K. Accounts Receivable

As presented in the Balance Sheet, accounts receivable includes accounts, claims, and refunds receivable from other federal entities or from the public. Allowances for uncollectible accounts due from the public are based upon analysis of collection experience by fund type. The DoD does not recognize an allowance for estimated

uncollectible amounts from other federal agencies. Claims against other federal agencies are to be resolved between the agencies (per Code of Federal Regulations 4 CFR 101).

The MRF bases the estimate of uncollectible accounts receivable from the public on the General Reserve Method. Under this method, a reserve is based on the age of debts and bad debt experience.

1.L. Loans Receivable

N/A

1.M. Inventories and Related Property

N/A

1.N. Investments in U.S. Treasury Securities

The MRF reports investments in U.S. Treasury securities at cost, net of amortized premiums or discounts. Premiums or discounts amortize into interest income over the term of the investment using the effective interest rate method. The MRF's intent is to hold investments to maturity, unless they are needed to finance claims or otherwise sustain operations. Consequently, a provision is not made for unrealized gains or losses on these securities.

The MRF invests in nonmarketable securities. The two types of nonmarketable securities are par value and market-based intragovernmental securities. The Bureau of Public Debt issues nonmarketable par value intragovernmental securities. Nonmarketable, market-based intragovernmental securities mimic marketable securities, but are not publicly traded.

1.Q. Leases

N/A

1.R. Other Assets

N/A

1.S. Contingencies and Other Liabilities

The SFFAS No. 5, "Accounting for Liabilities of the Federal Government," as amended by SFFAS No. 12, "Recognition of Contingent Liabilities Arising from Litigation," defines a contingency as an existing condition, situation, or set of circumstances that involves an uncertainty as to possible gain or loss. The uncertainty will be resolved when one or more future events occur or fail to occur. The MRF recognizes contingent liabilities when past events or exchange transactions occur, a future loss is probable, and the loss amount can be reasonably estimated.

Financial statement reporting is limited to disclosure when conditions for liability recognition do not exist but there is at least a reasonable possibility of receivables, pending or threatened litigation, and possible claims and assessments. The MRF's loss contingencies arise as a result of pending or threatened litigation or claims and assessments occur due to events such as aircraft, ship and vehicle accidents, medical malpractice, property or environmental damage, and contract disputes.

The MRF does experience Death Payment Contingencies that result from the DoD responsibility to pay entitlements to exact date of death, while Department of Veterans Affairs entitlements end in the month preceding death. Footnote 11 provides material disclosures.

1.T. Accrued Leave

N/A

1.U. Net Position

Net Position consists of unexpended appropriations and cumulative results of operations.

Unexpended Appropriations represent the amounts of authority that are unobligated and have not been rescinded or withdrawn. Unexpended appropriations also represent amounts obligated for which legal liabilities for payments have not been incurred. The MRF does not report unexpended appropriations because these amounts are not applicable.

Cumulative Results of Operations represent the net difference, since inception of an activity, between expenses and losses and financing sources (including appropriations, revenue, and gains). Beginning with FY 1998, the cumulative results also include donations and transfer in and out of assets without reimbursement.

1.V. Treaties for Use of Foreign Bases

N/A

1.W. Comparative Data

Financial statement fluctuations greater than two percent of total assets on the Balance Sheet or ten percent from the previous period presented are explained within the notes to the financial statements.

Note 2.	Nonentity Assets
----------------	-------------------------

As of June 30	2006	2005
1. Intragovernmental Assets		
A. Fund Balance with Treasury	\$ 0.00	\$ 0.00
B. Accounts Receivable	0.00	0.00
C. Total Intragovernmental Assets	\$ 0.00	\$ 0.00
2. Nonfederal Assets		
A. Cash and Other Monetary Assets	\$ 0.00	\$ 0.00
B. Accounts Receivable	1,099,860.20	1,032,422.57
C. Other Assets	0.00	0.00
D. Total Nonfederal Assets	\$ 1,099,860.20	\$ 1,032,422.57
3. Total Nonentity Assets	\$ 1,099,860.20	\$ 1,032,422.57
4. Total Entity Assets	\$ 212,348,759,126.67	\$ 201,217,070,499.51
5. Total Assets	\$ 212,349,858,986.87	\$ 201,218,102,922.08

Line 3, Total Non-Entity Assets, represents the Accounts Receivable for penalties, fines, and administrative fees receivable; net of the allowance for loss on penalties, fines, and administrative fees. The overall decrease of \$67.4 thousand (7%) is comprised of two fluctuations: a decrease of \$156.9 thousand in the penalties, fines, and administrative fees receivable offset by an increase of \$89.5 thousand in the allowance for loss on penalties, fines, and administrative fees receivable.

During the 3rd Quarter, FY 2006, the DFAS Cleveland Continuing Government Activities, the office that oversees the service contract for Retired and Annuitant Pay, determined that the retired pay accounts receivable balance had been overstated due to a system programming error. This error was fixed as of May 31, 2006. A validation to ensure that the accounts receivable balance is correct will be completed by September 30, 2006. Note 5 discusses the programming error in detail.

As the Custodian, the Military Retirement Fund collects these fees on behalf of the United States Department of the Treasury. The Defense Debt Management System assesses the interest, penalties, and administrative charges.

The intent of the interest assessment is to compensate for the loss of the use of money over a period of time; penalty charges are intended to stimulate prompt payment of delinquent claims owed to the government by individual (debts); administrative charges are assessed to recover costs incurred in the processing of such debts into the General Fund of the Treasury as miscellaneous receipts.

Custodians of Money requires all agencies to deposit all monies they receive for the use of the United States. An agency cannot retain such collections for its own use unless authorized by statute.

Agencies must deposit these collections into Treasury receipt accounts since there is no statute that authorizes agencies to augment their appropriations by using funds received for interest, penalties, and administrative charges.

Notes 11 and 15 discuss the custodial liability associated with the interest, penalties, and fees attributable to delinquent accounts receivable.

Note 3. Fund Balance with Treasury

As of June 30	2006	2005
1. Fund Balances		
A. Appropriated Funds	\$ 0.00	\$ 0.00
B. Revolving Funds	0.00	0.00
C. Trust Funds	18,900,292.63	21,037,941.39
D. Special Funds	0.00	0.00
E. Other Fund Types	0.00	0.00
F. Total Fund Balances	\$ 18,900,292.63	\$ 21,037,941.39
2. Fund Balances Per Treasury Versus Agency		
A. Fund Balance per Treasury	\$ 18,900,292.63	\$ 21,037,941.39
B. Fund Balance per Military Retirement Fund	18,900,292.63	21,037,941.39
3. Reconciling Amount		
	\$ 0.00	\$ 0.00

The Fund Balance with Treasury (FBWT) decreased \$2.1 million (10%) due to more actual disbursements made on the last day of the 3rd Quarter, FY2006, than on the last day of the 3rd Quarter FY2005, impacting the FBWT holdback amount.

The Military Retirement Fund holds back \$25.0 million in the FBWT on the last day of the month because actual disbursements made cannot be captured from the disbursement office, until the first day of the following month. The \$25.0 million is an estimated amount that is held in FBWT to ensure the availability of sufficient funds to cover the unknown last day disbursements that could not be captured in time to meet the month end investment timeframe. The remaining MRF funds are invested, in nonmarketable market based securities on the last day of each month.

For 3rd Quarter FY05, our actual disbursements exceed the estimated amount by \$4.0 million leaving \$21.0 million in the FBWT. For 3rd Quarter FY06, the actual disbursements exceed the estimated by \$6.1 million leaving \$18.9 million in FBWT.

Status of Fund Balance with Treasury

As of June 30	2006	2005
1. Unobligated Balance		
A. Available	\$ (2,955,566,025.95)	\$ 195,333,708,864.19
B. Unavailable	209,660,564,523.41	0.00
2. Obligated Balance not yet Disbursed	\$ 3,401,737,066.73	\$ (195,312,670,922.80)
3. Nonbudgetary FBWT	\$ 0.00	\$ 0.00
4. NonFBWT Budgetary Accounts	\$ (210,087,835,271.56)	\$ 0.00
5. Total	\$ 18,900,292.63	\$ 21,037,941.39

The Status of FBWT consists of both unobligated and obligated balances. These balances reflect the budgetary authority remaining for disbursements against current or future obligations. In addition, the Status includes various accounts that affect either budgetary reporting or FBWT, but not both.

There are no restrictions on unavailable balances.

The Office of Management and Budget (OMB) advises that certain US Standard General Ledger accounts are inconsistent with the budget presentations for certain Special and Trust Fund Receipts. Consequently, the Fund reclassified unobligated fund balance brought forward from FY 2005 as receipts unavailable or precluded from obligation. As a result, the differences between 3rd Quarter, FY 2005, and 3rd Quarter, FY 2006, on the following lines, were attributable to the OMB-directed restatement in the 4th Quarter, FY 2005: Lines 1A and 1B (Unobligated Balances), line 2 (Obligated Balance not yet Disbursed), and line 4 (Non-FBWT Budgetary Accounts).

Unobligated Balance represents the cumulative amount of budgetary authority that has not been set aside to cover outstanding balances. Unobligated Balance is classified as available or unavailable and is associated with appropriations expiring at fiscal year end that remain available only for obligation adjustments until the account is closed.

Obligated Balance not yet Disbursed represents funds that have been obligated for goods that have not been received or services that have not been performed.

Nonbudgetary FBWT includes entity and nonentity FBWT accounts which do not have budgetary authority, such as unavailable receipt accounts or clearing accounts.

NonFBWT budgetary accounts include budgetary accounts that do not affect FBWT, such as contract authority, borrowing authority and investment accounts. This category reduces the Status of FBWT.

The difference between the 3rd Quarter, FY 2005, and 3rd Quarter, FY 2006, amount on line 4, Non-FBWT Budgetary Accounts, is attributable to the change in the format of this footnote. The amount for the Non-FBWT Budgetary Accounts was first displayed in this footnote effective with 4th Quarter, FY 2005.

4. Other Investments					
A. Total Investments	<u>\$ 0.00</u>		<u>\$ 0.00</u>	<u>\$ 0.00</u>	<u>N/A</u>

Other Information.

Investments increased \$11.1 billion (6 %) from 3rd Quarter, FY 2005, to 3rd Quarter, FY 2006, because of a cumulative positive cash flow. This positive cash flow occurred because there were a number of US Treasury Notes and Bills that matured and the contributions exceed the payments to the retirees and annuitants. The principal and interest earned were reinvested in overnight US Treasury Securities, which yield a higher interest. The investments listed above are also presented at Market Value as of June 30, 2006. The following tables display the Par Value of the U.S. Treasury Securities referenced above:

	FY 2006 <u>PAR VALUE (in thousands)</u>	FY 2005 <u>PAR VALUE (in thousands)</u>
Bonds	\$ 34,704,232	\$ 53,999,882
Notes	\$ 49,437,658	\$ 65,777,160
TIPS	\$ 93,791,286	\$ 54,812,025
Overnights	<u>\$ 8,085,121</u>	<u>\$ 6,116,560</u>
Total	<u>\$186,018,297</u>	<u>\$180,705,627</u>

Line 1. B. accrued interest, decreased \$429.7 million (16%) in the 3rd Quarter, FY 2006, principally due to higher interest rate bonds being called by the Department of Treasury, and higher interest rate notes maturing. Proceeds were reinvested in lower rate Treasury Inflation-Protected Securities (TIPS).

Contributions to the Military Retirement Fund (MRF) maintain the fund on an actuarially sound basis. This concept means that there will be sufficient funds to make all covered payments on behalf of eligible beneficiaries each year, and that MRF balance is projected to eventually equal the actuarial liability, i.e., all unfunded liabilities are liquidated. In order to accomplish this objective, the Department of Defense (DoD) Office of the Actuary calculates the normal costs to fully fund the current year projected liability for active duty members and reservists. In addition, the DoD Office of the Actuary calculates the amortization payments to fund liabilities that were present at MRF's inception (initial unfunded) and any emerging actuarial gains or losses.

The actuaries are amortizing the initial unfunded liability of the program over a 50-year period and all subsequent gains and losses experienced by the system over a 30-year period. Chapter 56 of Title 10, U.S. Code requires that the methods and assumptions for the following amounts be approved by the DoD MRF Board of Actuaries: computation of actuarial costs and liabilities, as well as all actuarial gains and losses, and the amortization of the initial unfunded liability. The Secretary of Defense appoints the Board of Actuaries, which is a Federal Advisory Committee.

The Federal Government does not set aside assets to pay future benefits or other expenditures associated with earmarked funds. The cash receipts collected from the public for an earmarked fund are deposited in the U.S. Treasury, which uses the cash for general Government purposes. The U.S. Treasury issues securities to MRF as evidence of its receipts. Treasury securities are an asset to MRF and a liability to the U.S. Treasury. Because MRF and the U.S. Treasury are both parts of the Government, these assets and liabilities offset each other from the standpoint of the Government as a whole. For this reason, they do not represent an asset or a liability in the U.S. Government wide financial statements. The U.S. Treasury securities provide MRF with authority to draw upon the U.S. Treasury to make future benefit payments or other expenditures. When MRF requires redemption of these securities to make expenditures, the Government finances those expenditures out of accumulated cash balances by raising taxes or other receipts, by borrowing from the public or repaying less debt, or by curtailing other expenditures. This is the same way that the Government finances all other expenditures.

Note 5.	Accounts Receivable
----------------	----------------------------

As of June 30	2006			2005
	Gross Amount Due	Allowance For Estimated Uncollectibles	Accounts Receivable, Net	Accounts Receivable, Net
1. Intragovernmental Receivables	\$ 0.00	N/A	\$ 0.00	\$ 0.00
2. Nonfederal Receivables (From the Public)	\$ 29,301,276.52	\$ (5,965,270.37)	\$ 23,336,006.15	\$ 28,425,139.91
3. Total Accounts Receivable	\$ 29,301,276.52	\$ (5,965,270.37)	\$ 23,336,006.15	\$ 28,425,139.91

Line 2, Nonfederal Receivables (From the Public), column three, decreased a total of \$5.1 million (18 %) from 3rd Quarter, FY 2005, to 3rd Quarter, FY 2006. This decrease is attributable to a decrease in the Gross Amount of Accounts Receivable Due of \$4.2 million and an offsetting increase in the Allowance for Estimated Uncollectibles of \$801.0 thousand. The amounts on line 2 include accounts receivable as well as penalties, fines, and fees receivable.

During the 3rd Quarter, FY 2006, the DFAS Cleveland Continuing Government Activities (CGA), the office that oversees the service contract for Retired and Annuitant Pay (R&A Pay), determined that one (the H3056) of four feeder reports was overstating the actual amount of accounts receivable for the Retired Pay accounts covered by this report. When a debt was reclassified or written off, the H3056 displayed the total amount of the debt rather than the amount of the unpaid balance. Over the course of time, this faulty programming logic has created a negative balance for two of the four reporting Military Services (the Navy and Air Force accounts); however, the report displayed these negative amounts as positive balances. Since the R&A Pay staff was not aware of this programming error, they reported these negative balances as positive amounts thereby creating an overstatement of accounts receivable. The R&A Pay, the CGA, and the DFAS Cleveland Accounting Division are currently in the process of correcting the H3056 report. In the meantime, the R&A Pay staff is generating an interim H3056 report that contains the correct accounts receivable information for the Retired Pay accounts. The first interim H3056 report was generated as of May 31, 2006. A validation to ensure that the accounts receivable balance is correct will be completed by September 30, 2006

The accounts receivable variance is also impacted by a systems error for feeder report H4057 that was not corrected until 4th Quarter, FY 2005.

The MRF uses the General Reserve Method to calculate a percentage for an allowance for estimated uncollectibles. This method, which is described in Volume 4, Chapter 3, Annex 1, paragraph A.1.a.(3), of the DoD Financial Management Regulation, establishes a reserve based on age of the debts and bad debt experience. Column 2, above, displays these amounts, which include uncollectibles for accounts receivables as well as for interest, penalties, and fees receivable.

To comply with the U.S. Department of Treasury requirements, the system-generated Defense Debt Management System (DDMS) data for the Treasury Report on Receivables Due from the Public (TROR) separates the dollar amount of delinquent debt by aging categories. The instructions for preparing the TROR prescribe the data to be included in each category. By law, federal agencies must pursue debt collection for 10 years on the types of debt maintained in DDMS.

For the TROR, debts must be aged based on specific requirements established by Treasury. An example of how DDMS must report this data is as follows: a debtor enters into an installment agreement and faithfully complies with the terms of the agreement for 4 years. The debtor then fails to make payment on the debt for 1 month, thus breaking the terms of the installment agreement. In accordance with TROR requirements, for this particular month, the debt in question must be reported as delinquent and is subsequently aged back to the original debt notification date. Under this scenario, Treasury requires the DDMS to report the installment amount due as delinquent and age this amount as 4 years delinquent. Under this scenario, the debt was never delinquent until the debtor failed to make payment in the 4th year. Once the debt reaches delinquent status, it is referred to the Treasury Offset Program for simultaneous collection action. Debts with balances of \$2,500 or more can be referred to the Department of Justice for collection.

I. Other Liabilities	234,999.27	0.00	234,999.27	214,357.47
J. Total Nonfederal Other Liabilities	\$ 3,401,972,066.00	\$ 0.00	\$ 3,401,972,066.00	\$ 3,201,406,522.77
3. Total Other Liabilities	\$ 3,401,972,066.00	\$ 1,099,860.20	\$ 3,403,071,926.20	\$ 3,202,438,945.34

From the 3rd Quarter, FY 2005, to the 3rd Quarter, FY 2006, Line 1.F, Intragovernmental Other Liabilities, increased \$67.4 thousand (7%). During the 3rd Quarter, FY 2006, the DFAS Cleveland Continuing Government Activities (CGA), the office that oversees the service contract for Retired and Annuitant Pay (R&A Pay), determined that the retired pay accounts receivable balance had been overstated due to a system programming error. This error was fixed as of May 31, 2006. A validation to ensure that the accounts

receivable balance is correct will be completed by September 30, 2006. Note 5 discusses the programming error in detail.

Line 2.A, Accrued Funded Payroll and Benefits increased \$200.5 million (6%) from 3rd Quarter, FY 2005, to 3rd Quarter, FY 2006. Fluctuations are primarily due to an increase in retiree benefits. This increase included concurrent receipt benefits for certain disabled retirees, an increase in Survivor Benefit Plan benefits, and a cost of living increase for retirees.

Line 2.I, Non-Federal Other Liabilities reports the death payment contingency for FY 2006. The contingency results from the Department of Defense's (DoD) responsibility to pay entitlements to the exact date of death, while Department of Veterans Affairs (DVA) entitlements end in the month preceding death. The contingency amount becomes payable by the DoD to cover the retiree benefits not paid by the DVA during the month of death.

3. Total Military Retirement Benefits and Other Employment Related Actuarial Liabilities:	\$ 892,111,600,551.72		\$ (209,660,564,523.41)	\$ 682,451,036,028.31	\$ 634,303,697,149.72

Actuarial Cost Method Used: Aggregate Entry Age Normal Method

Assumptions: The long-term economic assumptions were 6.25 percent interest, 3.0 percent Consumer Price Index, and 3.75 percent salary increase. For fiscal years 2005 and 2006, inflation rates of 2.7 percent and 4.1 percent, salary increases of 3.5 percent and 3.1 percent were used, respectively. Other assumptions used to calculate the actuarial liabilities, such as mortality and retirement rates, were based on actual experience. Because of reporting deadlines, the current year actuarial present value of projected plan benefits is rolled forward, using accepted actuarial methods, from the prior year valuation results as reported in the DoD Office of Actuary Valuation of the Military Retirement System. For purposes of the Fund's financial reporting, this process is applied annually.

Market Value of Investments in Market-based and Marketable Securities: \$201,171,804,858.77

Fluctuation

Line 1A, Military Retirement Pensions above, displays an increase of \$48.1 billion (8%) in the unfunded actuarial liability for the Military Retirement Fund (MRF) from the 3rd Quarter, FY 2005, to the 3rd Quarter, FY 2006. This change is attributable to an increase of \$57.5 billion in the actuarial liability that is offset by an increase of \$9.4 billion in the value of assets available to pay benefits. The table below provides further details about the \$57.5 billion increase in the actuarial liability. Footnote 11 also contains additional information about this change.

The market value of MRF's nonmarketable market-based securities as of June 30, 2006, totaled \$201.2 billion, which included \$2.3 billion in accrued interest.

Change in MRF Actuarial Liability

The reported Actuarial (or Accrued) Liability is only changed at the end of each fiscal year. For this reason, there is no change in the June 30, 2006, Actuarial Liability from the September 30, 2005, Actuarial Liability. For the same reason, the change in the Actuarial Liability from June 30, 2005 to June 30, 2006 is the same as the change from September 30, 2004, to September 30, 2005. This FY 2005 change in the Actuarial Liability is developed in the table below.

(\$ In Thousands)	<u>FY 2005</u>
A. Beginning of Year Accrued Liability	\$834,582,098
B. Normal Cost Liability	14,857,208
C. Plan Amendment Liability	25,835,945
D. Assumption Change Liability	4,904,136
E. Benefit Outlays	(38,704,379)
F. Interest on Pension Liability	51,427,451
G. Actuarial Loss (Gain)	<u>(790,858)</u>
H. End-of-Year Accrued Liability (A+B+C+D+E+F+G)	<u>\$892,111,601</u>
I. Net Change in Actuarial Liabilities (B+C+D+E+F+G)	<u>\$57,529,502</u>

Other Information

The Military Retirement Trust Fund is a single-employer, defined benefit plan. Administrative costs of the Fund are not ascertainable. Projected revenues into the Fund, authorized by Public Law (PL) 98-94, come from three sources: interest earnings on Fund assets, monthly DoD contributions, and annual contributions from the Department of Treasury. The monthly DoD contributions are determined as a percentage (approved by the DoD Retirement Board of Actuaries) of basic pay. The contribution from Treasury is paid into the Fund at the beginning of each fiscal year, and represents the amortization of the unfunded liability for service performed prior to October 1, 1984, as well as the amortization of actuarial gains and losses that have arisen since then. Starting October 1, 2004, PL 108-136 requires U.S. Treasury to contribute the normal cost amount for the concurrent receipt provisions under Sections 1413, 1413a, and 1414 in addition to the unfunded liability amortization payment. The Board determines Treasury's contribution, and the Secretary of Defense directs the Secretary of Treasury to make the payment.

Each year the actuarial liability is expected to increase with the normal cost, decrease with benefit outlays, and increase with the interest cost. In the absence of (1) actuarial gains and losses, (2) plan benefit changes, and (3) assumption changes, the DoD Office of the Actuary expected an increase of \$27.6 billion accrued liability during FY 2005.

The September 30, 2005, accrued liability includes changes due to (1) assumptions, (2) benefit changes, and (3) experience. The new assumptions include an updated set of retiree divorce rates and refinements in the methodology used to project drilling reservists, the net effect of which is an increase in the September 30, 2005, accrued liability of \$4.9 billion, shown on line D above. The change in retirement benefits for FY 2005 includes accelerated phase-in of concurrent receipt benefits for certain retirees and an increase in Survivor Benefit Plan benefits in the FY 2005 National Defense Authorization Act (NDAA).

The combined effect of these benefit changes is an increase in the September 30, 2005, accrued liability of \$25.8 billion, shown on line C. The decrease in the accrued liability due to the net experience gain of \$791.0 million, shown on line G, reflects the new population on which the September 30, 2004, roll-forward is based, as well as other economic experience being different than assumed.

Treasury Contributions:

The October 1 unfunded liability amortization contribution from the Treasury is determined in accordance with the methodology set by the DoD Retirement Board of Actuaries, and increased from \$22.897B in first quarter FY 2005 to \$25.524B in first quarter FY 2006. The amortization payment was expected to increase \$0.802B because of the Board's amortization methodology. The majority of the rest of the increase is due to Survivor Benefit Plan provisions of the FY 2005 National Defense Authorization Act (NDAA 05). The NDAA 05 was the primary reason for actuarial loss that increased the benefit change amortization component of the contribution \$1.280B (the expected October 1, 2005, benefit change portion of the contribution was \$4.801B; the actual was \$6.081B). NDAA 04 required that the Treasury contribution include the normal cost for the concurrent receipt benefits, beginning October 1, 2004. This normal cost component of the October 1, 2005, Treasury contribution was \$2.344B. There were other assumption changes and experience gains that had minimal effects on the contribution.

Service Contributions:

The contributions from the Services are the product of basic pay and normal cost percentages (NCPs) determined in accordance with methodology set by the Board of Actuaries. Basic pay generally increases each year, and on January 1, 2005, there was a 3.5% across-the-board basic pay increase. The NCPs for FY 2005 set by the Board of Actuaries in their September 2003 public meeting were 27.5% (full-time) and 16.7% (part-time). The NCPs for FY 2006 set by the Board in their August 2004 public meeting were 26.5% (full-time) and 16.7% (part-time). In the August 2004 meeting, the Board approved changes to factors in the model that reflect increasing VA offsets to DoD military retired pay for new retirees. These new factors were the primary reason for the 1.0% decrease in the full-time NCP. Other assumptions were also adopted by the Board, but these had a minimal effect on the NCP.

Note 18. General Disclosures Related to the Statement of Net Cost

Intragovernmental Costs and Exchange Revenue

As of June 30	2006	2005
1. Intragovernmental Costs	\$ 0.00	\$ 0.00
2. Public Costs	30,792,745,754.50	29,183,682,350.78
3. Total Costs	<u>\$ 30,792,745,754.50</u>	<u>\$ 29,183,682,350.78</u>
4. Intragovernmental Earned Revenue	\$ (45,205,207,085.56)	\$ (42,312,309,264.11)
5. Public Earned Revenue	(10,262,400,648.08)	0.00
6. Total Earned Revenue	<u>\$ (55,467,607,733.64)</u>	<u>\$ (42,312,309,264.11)</u>
7. Net Cost of Operations	<u>\$ (24,674,861,979.14)</u>	<u>\$ (13,128,626,913.33)</u>

Line 4, Intragovernmental Earned Revenue increased \$2.9 billion (7%) due to the following:

**Earned Revenues for Program Costs:
(\$ in thousands)**

	FY 2006	FY 2005
1. Service Contributions as a Percentage of Base Pay	\$10,262,400	\$11,043,017
2. Annual Treasury Unfunded Liability Payment	23,180,000	21,358,000
3. Annual Treasury Normal Cost Payment	2,344,000	1,539,000
4. Interest on Investments	<u>9,418,807</u>	<u>8,372,292</u>
Total	<u>\$45,205,207</u>	<u>\$42,312,309</u>

The Statement of Net Cost (SNC) is unique because its principles are driven on understanding the net cost of programs that the Federal Government supports through appropriations or other means. The SNC provides gross and net cost information that can be related to the amount of output for a given program administered by a responsible reporting entity. The table above, Earned Revenues for Program Costs, shows the revenues that make up intragovernmental earned revenue. Intragovernmental revenue and costs are related to transactions made between two reporting entities within the Federal Government. Alternatively, public costs and revenues are exchange transactions made between the reporting entity and a nonfederal entity. The Military Retirement Fund was able to compare its intragovernmental costs and revenues with the corresponding balances of its intragovernmental trading partners. There were no material differences.

As shown above in Line 1 of the Earned Revenues for Program Costs table, Service Contributions have decreased \$780.6 million (7%) from 3rd Quarter, FY 2005, to 3rd Quarter, FY 2006, due to the normal cost percentages determined in accordance with methodology approved by the Board of Actuaries.

Line 2, Annual Treasury Unfunded Liability Payment, increased \$1.8 billion (9%) from 3rd Quarter, FY 2005, to 3rd Quarter, FY 2006. Line 3, Annual Treasury Normal Cost Payment, increased \$805.0 million (52%), from 3rd Quarter, FY 2005, to 3rd Quarter, FY 2006. Both increases are based on the October 1, 2005, unfunded liability amortization contribution from the Treasury, which is determined in accordance with the methodology, set by the Department of Defense Retirement Board of Actuaries. The amortized payment increased \$802.0 thousand because of the Board's amortization methodology. The remaining increase is due to the Survivor Benefit Plan provisions of the FY 2005 National Defense Authorization Act. There were other assumption changes and experience gains that had minimal effects on the contribution. See additional details in Note 17.

Line 4, Interest on Investments, increased \$1.0 billion (12%) in the 3rd Quarter, FY 2006, principally due to the increase in Treasury payments and the increase in interest rates. Beginning with FY 2006, the Annual Treasury Payment includes, in addition to the Unfunded Liability Payment, the normal cost for the concurrent receipt benefits enacted in the FY 2004 National Defense Authorization Act.

Note 19.	Disclosures Related to the Statement of Changes in Net Position
-----------------	--

As of June 30	2006		2005	
	Cumulative Results of Operations	Unexpended Appropriations	Cumulative Results of Operations	Unexpended Appropriations
1. Prior Period Adjustments				
Increases (Decreases) to Net Position Beginning Balance				
A. Changes in Accounting Standards	\$ 0.00	\$ 0.00	\$ 0.00	\$ 0.00
B. Errors and Omissions in Prior Year Accounting Reports	0.00	0.00	0.00	0.00
C. Total Prior Period Adjustments	\$ 0.00	\$ 0.00	\$ 0.00	\$ 0.00
2. Imputed Financing				
A. Civilian CSRS/FERS Retirement	\$ 0.00	\$ 0.00	\$ 0.00	\$ 0.00
B. Civilian Health	0.00	0.00	0.00	0.00
C. Civilian Life Insurance	0.00	0.00	0.00	0.00
D. Judgment Fund	0.00	0.00	0.00	0.00
E. IntraEntity	0.00	0.00	0.00	0.00
F. Total Imputed Financing	\$ 0.00	\$ 0.00	\$ 0.00	\$ 0.00

Appropriations Received on the Statement of Changes in Net Position (SCNP) does not agree with Appropriations Received on the Statement of Budgetary Resources (SBR) because of differences between proprietary and budgetary accounting concepts and reporting requirements. The SCNP reported zero in Appropriations Received, and the SBR reported \$49.3 billion. The Military Retirement Fund accounts for its incoming funds, which are treated as other financing sources, in the cumulative results of operations account rather than the unexpended appropriations account.

Note 20.	Disclosures Related to the Statement of Budgetary Resources
-----------------	--

As of June 30	2006	2005
1. Net Amount of Budgetary Resources Obligated for Undelivered Orders at the End of the Period	\$ 0.00	\$ 0.00
2. Available Borrowing and Contract Authority at the End of the Period	0.00	0.00

Information Related to the Statement of Budgetary Resources

Fluctuation

Line 7, Total Budgetary Resources, decreased \$198.7 billion (87%) from 3rd Quarter, FY 2005, to 3rd Quarter, FY 2006. This decrease is primarily attributable to the Office of Management and Budget (OMB)-directed reclassification of the unobligated fund balance brought forward in FY 2005 as receipts unavailable or precluded from obligation. As a result, beginning with the September 30, 2005, year-end reporting, the unobligated unavailable balance is no longer displayed on the Statement of Budgetary Resources (SBR).

Apportionment Categories

Office of Management and Budget Circular No. A-136, section 9.27, specifically requires disclosure of the amount of direct and reimbursable obligations incurred against amounts apportioned under categories A, B, and exempt from apportionment. This disclosure should agree with the aggregate of the related information as included in each reporting entity's SF 133 and line 8 in the SBR. The Military Retirement Fund (MRF) reported \$30.8 billion in exempt from apportionment obligations and no category A or category B obligations.

Permanent Indefinite Appropriation

Title 10, United States Code 1461 established the MRF to accumulate funds to finance, on an actuarially sound basis, the liabilities of the Department of Defense military retirement and survivor benefit programs. This provides a permanent indefinite appropriation to operate.

Reconciliation Differences

The Department of the Treasury issues annual warrants that pay amortized payments for the unfunded actuarial liabilities for the MRF. The MRF's annual warrant for FY 2006 totaled \$25.5 billion. The Other Defense Organizations General Fund credits, and subsequently expends, this amount in accordance with the OMB guidance. The OMB is aware, and approves, of this duplicate reporting for Appropriations Received.

In addition, the MRF reports Appropriations Received for contributions paid by the Departments of the Army, Navy, and Air Force. The Military Departments also include these amounts in their Appropriations Received for MRF. As a result, \$10.3 billion is duplicated on the SBR.

The intra-entity transactions have not been eliminated because the statements are presented as combined and combining.

Note 21.	Disclosures Related to the Statement of Financing
-----------------	--

Information Related to the Statement of Financing

Due to the Department of Defense's (DoD) financial system limitations, budgetary data is not in agreement with proprietary expenses and assets capitalized. Differences between budgetary and proprietary data are a previously identified deficiency. The Statement of Financing is presented as combined instead of consolidated due to budgetary accounts that can not be eliminated.

Line 4, Less: Offsetting Receipts, increased \$2.6 billion (11%). This increase is due to the change in the computation provided by the DoD Retirement Board of Actuaries for the annual Treasury unfunded liability payment. See Note 17 for additional information.

Line 27d, Components not requiring or generating resources - Other, increased \$6.5 million (213 %) because of a change in the net accounts receivable between the 2nd and 3rd Quarters, FY 2005 and the 2nd and 3rd Quarters, FY 2006. During the 3rd Quarter, FY 2006, the DFAS Cleveland Continuing Government Activities, the office that oversees the service contract for Retired and Annuitant Pay, determined that one of four feeder reports was overstating the actual amount of accounts receivable for the Retired Pay accounts covered by that report. The total effect of this programming error is unknown at this time. Note 5 discusses the programming error in detail.

1. A description of the fund's purpose, how the component accounts for and reports the fund, and its authority to use those revenues, and other financing sources.

The Military Retirement Fund receives its appropriations and funds as trust and earmarked funds. The Military Retirement Fund uses these appropriations and funds to execute their missions and report on resource usage.

The Military Retirement Fund is a pension program established in fiscal year 1984 by Public Law 98-94, for the payment of annuities and pensions to retired military personnel and their survivors. The Department of Defense (DoD) Retirement Board of Actuaries determines the contributions made to the Military Retirement Fund. The DoD contribution is a percentage of basic pay. The Department of the Treasury contribution is the annual unfunded amortization payment. Excess funds from the contributions are invested and accrued interest revenue is used to cover future liabilities of the Fund.

2. The sources of revenue or other financing for the period and an explanation of the extent to which they are inflows or resources to the Department.

Financing sources for the Military Retirement Fund are provided primarily through monthly Military Service contributions as a percentage of base pay, an annual unfunded liability payment from the U.S. Department of Treasury, and interest earned on investments.

On the consolidated Balance Sheet, Assets section, the Fund Balance with Treasury \$18.9 million represents the funds held back at the end of the month for any unexpected expenses. Next, the \$212.3 billion represents the net Investments of the fund, which consist of bills, bonds, notes, overnights, and inflation-protected securities as well as interest receivable. The Accounts and Interest Receivable line is the accounts receivable of \$22.9 million attributed to interest, penalties and fees.

The consolidated Balance Sheet, Liabilities section, starts with \$892.1 billion for the actuarial military retirement benefits liability. The \$3.4 billion amount is comprised of concurrent receipt benefits for certain disabled retirees, Survivor Benefit Plan benefits, and a cost of living for retirees and annuitants. Finally, the \$683.1 billion is the net difference since inception of MRF between the revenues and expenses, interest revenue from investments, contributions, operating expenses, bad debt expenses, and future unfunded expenses.

The consolidated Statement of Net Cost, reports Program Costs of \$30.8 billion. This amount represents the total program costs, which is a combination of operating expenses, bad debt expenses, and future unfunded expenses. The Earned Revenue line of \$45.2 billion is comprised of contributions and interest revenue from investments.

The consolidated Statement of Changes in Net Position displays the Net Position Beginning of the Period of \$697.6 billion. This amount represents the net difference since inception of the activity between the revenues and expenses. The Net Cost of Operations of \$14.4 billion represents the current year net result of totaling the interest revenue from investments, contributions, operating expenses, bad debt expenses, and future unfunded expenses.

3. Any change in legislation during or subsequent to the reporting period and before the issuance of the financial statements that significantly changes the purpose of the fund.

There have been no changes in legislation during or after this reporting period that significantly changed the purpose of this Fund.

4. Any elimination(s) between earmarked funds and other funds within the reporting entity should be disclosed.

The MRF trades with other entities outside the Fund. These other entities are the Military Services and the U.S. Treasury.
