<b>Note 1.</b>	<b>Significant Accounting Policies</b>
----------------	--

**1.A. Basis of Presentation**

These financial statements have been prepared to report the financial position and results of operations of the Department of the Navy (DON) General Fund (GF), as required by the “Chief Financial Officers (CFO) Act of 1990,” expanded by the “Government Management Reform Act (GMRA) of 1994,” and other appropriate legislation. The financial statements have been prepared from the books and records of DON in accordance with the “Department of Defense (DoD) Financial Management Regulation”, Office of Management and Budget (OMB) Circular A-136, Financial Reporting Requirements, and to the extent possible, generally accepted accounting principles (GAAP). Effective 4<sup>th</sup> Quarter FY 2006, DoD no longer publishes consolidating/combined financial statements. The accompanying financial statements account for the resources for which DON GF is responsible to report within the context of current reporting policy.

Information relative to classified assets, programs, and operations is aggregated and reported in such a manner that it is not discernable.

The DON is unable to fully implement all elements of GAAP and the OMB Circular A-136 due to limitations of its financial management processes and systems and nonfinancial systems and processes that feed into the financial statements. The DON derives its reported values and information for major asset and liability categories, largely from nonfinancial systems, such as inventory systems and logistic systems. These systems were designed to support reporting requirements for maintaining accountability over assets and reporting the status of federal appropriations rather than preparing financial statements in accordance with GAAP. The DON continues to implement process and system improvements addressing these limitations many of which are detailed below.

The DON currently has six auditor identified financial statement material weaknesses: (1) accuracy and complete reporting of accounts payable, (2) identifying and reporting environmental disposal liabilities, (3) military equipment reporting, (4) valuation of inventory and operating materials and supplies, (5) Fund Balance with Treasury, and (6) real property.

Fiscal year (FY) 2007 represents the twelfth year that DON GF has prepared audited financial statements as required by CFO Act and GMRA.

**1.B. Mission of the Reporting Entity**

The DON was created on April 30, 1798 by an act of Congress (I Stat. 533; 5 U.S.C. 411-12). The overall mission of DON is to maintain, train, and equip combat-ready Navy and Marine Corps forces capable of winning wars, deterring aggression and maintaining freedom of the seas.

### **1.C. Appropriations and Funds**

The DON receives its appropriations and funds as general, working capital (revolving funds), trust, special, and deposit funds. The DON uses these appropriations and funds to execute its missions and report on resource usage.

General Funds are used for financial transactions funded by congressional appropriations, including personnel; operations and maintenance; research and development; procurement; and military construction accounts.

Working capital or revolving funds receive their initial funding to establish a corpus through an appropriation or a transfer of resources from existing appropriations or funds. The fund uses those resources to finance the costs of the fund. Revolving fund entities provide goods and services on a reimbursable basis. Reimbursable receipts fund ongoing operations and generally are available in their entirety for use without further congressional actions. The National Defense Sealift Fund is DON GF's only revolving fund.

Trust funds contain receipts and expenditures of funds held in trust by the government for use in carrying out specific purposes or programs in accordance with the terms of the donor, trust agreement, or statute.

Special fund accounts are used to record government receipts reserved for a specific purpose.

Certain trust and special funds may be designated as earmarked funds. Earmarked funds are financed by specifically identified revenues, required by statute to be used for designated activities, benefits, or purposes, and remain available over time. Earmarked funds also have a requirement to account for and report on the receipt, use, and retention of revenues and other financing sources that distinguish them from general revenues.

Deposit funds are used to record amounts held temporarily until paid to the appropriate government or public entity. The DON is acting as an agent or a custodian for funds awaiting distribution, for example payroll taxes.

The DON GF is a party to allocation transfers with other federal agencies as a receiving (child) entity. Allocation transfers are legal delegations by one agency of its authority to obligate budget authority and outlay funds to another agency. Generally, all financial activity related to these allocation transfers (e.g. budget authority, obligations, outlays) is reported in the financial statements of the parent entity. Exceptions to this general rule apply to specific funds for which OMB has directed that all activity be reported in the financial statements of the child to the transfer. Exceptions include all U.S. Treasury-Managed Trust Funds, Executive Office of the President, and all other funds specifically designated by the OMB.

The DON is a party to allocation transfers as the child from the Executive Office of the President for the Foreign Military Financing Program, as well as for the International

Military Education and Training program. These funds meet the OMB exception; however, activities for these funds are reported in the DoD financial statements, not the DON's. The DON also receives allocation transfers, as the child, from the U.S. Forest Service and the Federal Highway Administration and reports activities for those funds to the parent.

The asset accounts used to prepare the statements are categorized as either entity or nonentity. Entity accounts consist of resources that the agency has the authority to use, or where management is legally obligated to use funds to meet entity obligations. Nonentity accounts are assets that are held by an entity but are not available for use in the operations of the entity.

### **1.D. Basis of Accounting**

For FY 2007, DON's GF financial management systems are unable to meet all of the requirements for full accrual accounting. Many of DON's financial and nonfinancial feeder systems and processes were designed and implemented prior to the issuance of

GAAP for federal agencies. These systems were not designed to collect and record financial information on the full accrual accounting basis as required by GAAP. Most of DON's legacy systems were designed to record information on a budgetary basis.

The DoD has undertaken efforts to determine the actions required to bring its financial and nonfinancial feeder systems and processes into compliance with GAAP. One such action is the current revision of its accounting systems to record transactions based on the U.S. Standard General Ledger (USSGL). Until all of DON's financial and nonfinancial feeder systems and processes are updated to collect and report financial information as required by GAAP, DON's financial data will be based on budgetary transactions (obligations, disbursements, and collections), transactions from nonfinancial feeder systems, and adjustments for known accruals of major items such as payroll expenses, accounts payable, and environmental liabilities. As a result, the proprietary records may not align with the budgetary records without adjustment.

In addition, the DoD identifies program costs based upon the major appropriation groups provided by the Congress. Current processes and systems do not capture and report accumulated costs for major programs based upon performance measures as required by the Government Performance and Results Act (GPRA). The DoD is in the process of reviewing available data and attempting to develop a cost reporting methodology that balances the need for cost information required by the Statement of Federal Financial Accounting Standard (SFFAS) No. 4, "Managerial Cost Accounting Concepts and Standards for the Federal Government," with the need to keep the financial statements from being overly voluminous.

#### **1.E. Revenues and Other Financing Sources**

The DON receives congressional appropriations as financing sources on either an annual or multi-year basis. When authorized by legislation, these appropriations are supplemented by revenues generated by sales of goods or services. The DON recognizes revenue as a result of costs incurred or services provided to other Federal agencies and the public. The price charged for goods and services furnished by DON depends on whether that good or service is provided to, or for the benefit of, a DoD Component, a non-DoD Federal agency, a private party, or a foreign military sales customer. Full cost pricing is required by OMB Circular A-25. The DON recognizes revenue when earned within the constraints of current system capabilities. In other instances, revenue is recognized when bills are issued.

The DON does not include nonmonetary support provided by U.S. allies for common defense and mutual security in amounts reported in the Statement of Net Cost and the Statement of Financing. The U.S. has cost sharing agreements with other countries. Examples include countries where there is a mutual or reciprocal defense agreement, where U.S. troops are stationed, or where the U.S. Fleet is in a port.

#### **1.F. Recognition of Expenses**

For financial reporting purposes, the DoD policy requires the recognition of operating expenses in the period incurred. However, because DON's financial and nonfinancial feeder systems were not designed to collect and record financial information on the full

accrual accounting basis, accrual adjustments are made for major items such as payroll expenses, accounts payable, environmental liabilities, and unbilled revenue. The DON's expenditures for capital and other long-term assets are recognized as operating expenses based on depreciation. In the case of Operating Materials and Supplies (OM&S), operating expenses are generally recognized when the items are purchased. Efforts are underway to migrate towards the consumption method for recognizing OM&S expenses.

#### **1.G. Accounting for Intragovernmental Activities**

Preparation of reliable financial statements requires the elimination of transactions occurring among entities within DoD or between two or more federal agencies. However, DON cannot accurately identify most of its intragovernmental transactions by customer because DON's systems do not track buyer and seller data needed to match related transactions. For the DON GF, the Defense Finance and Accounting Service (DFAS) is responsible for eliminating transactions and balances between components or activities of DON GF. Seller entities within DoD provided summary seller-side balances for revenue, accounts receivable, and unearned revenue to the buyer-side internal DoD accounting offices. In most cases, the buyer-side records are adjusted to agree with DoD seller-side balances. Intra-DoD intragovernmental balances are then eliminated. The DoD is developing long-term system improvements that will include sufficient up-front edits and controls to eliminate the need for after-the-fact reconciliations. The volume of intragovernmental transactions is so large that after-the-fact reconciliation cannot be accomplished effectively with existing or foreseeable resources.

The U.S. Treasury Financial Management Service (FMS) is responsible for eliminating transactions between DoD and other federal agencies. The U.S. Treasury Financial Manual, Part 2 – Chapter 4700, “Agency Reporting Requirements for the Financial Report of the United States Government,” and the U.S. Treasury’s “Federal Intragovernmental Transactions Accounting Policy Guide,” provide guidance for reporting and reconciling intragovernmental balances. While DON is unable to fully reconcile all intragovernmental transactions with all federal partners, DON is able to reconcile balances pertaining to investments in federal securities, Federal Employees’ Compensation Act transactions with the Department of Labor, and benefit program transactions with the Office of Personnel Management. The DoD’s proportionate share of public debt and related expenses of the Federal Government are not included. The Federal Government does not apportion debt and its related costs to federal agencies. The DoD’s financial statements, therefore, do not report any portion of the public debt or interest thereon, nor do the statements report the source of public financing whether from issuance of debt or tax revenues.

Financing for the construction of DoD facilities is obtained through appropriations. To the extent this financing ultimately may have been obtained through the issuance of public debt, interest costs have not been capitalized since the U.S. Treasury does not allocate such interest costs to the benefiting agencies.

#### **1.H. Transactions with Foreign Governments and International Organizations**

Each year, DON sells defense articles and services to foreign governments and international organizations under the provisions of the “Arms Export Control Act of

1976.” Under the provisions of the Act, DoD has authority to sell defense articles and services to foreign countries and international organizations generally at no profit or loss to the U.S. Government. Payment in U.S. dollars is required in advance. Beginning in FY 2007, the DoD (not the DON) reports in its basic financial statements the Foreign Military Sales Program DoD executes on behalf of the Executive Office of the President.

#### **1.I. Funds with the U.S. Treasury**

The DON’s monetary financial resources are maintained in U.S. Treasury accounts. The disbursing offices of the Defense Finance and Accounting Service (DFAS), the Military Services, the U. S. Army Corps of Engineers (USACE), and the Department of State’s financial service centers process the majority of DON’s cash collections, disbursements, and adjustments worldwide. Each disbursing station prepares monthly reports that provide information to the U.S. Treasury on check issues, electronic fund transfers, interagency transfers, and deposits.

In addition, these disbursing offices submit reports to the U.S. Treasury, by appropriation, on interagency transfers, collections received, and disbursements issued. The U.S. Treasury records this information to the applicable Fund Balance with Treasury (FBWT) account. Differences between DON’s recorded balance in FBWT accounts and U.S. Treasury’s FBWT accounts sometimes result and are subsequently reconciled.

#### **1.J. Foreign Currency**

Cash is the total of cash resources under the control of DON, which includes coin, paper currency, negotiable instruments, and amounts held on deposit in banks and other financial institutions. Foreign currency consists of the total U.S. dollar equivalent of both purchased and nonpurchased foreign currencies held in foreign currency fund accounts.

All cash and foreign currency is classified as nonentity and, therefore, is restricted. Amounts reported consist primarily of cash and foreign currency held by Disbursing Officers to carry out their paying, collecting, and foreign currency accommodation exchange missions.

The DON conducts a significant portion of its operations overseas. The Congress established a special account to handle the gains and losses from foreign currency transactions for five GF appropriations: operations and maintenance, military personnel, military construction, family housing operations and maintenance, and family housing construction. The gains and losses are computed as the variance between the exchange rate current at the date of payment and a budget rate established at the beginning of each fiscal year. Foreign currency fluctuations related to other appropriations require adjustments to the original obligation amount at the time of payment. The DON does not separately identify foreign currency fluctuations.

### **1.K. Accounts Receivable**

As presented in the Balance Sheet, accounts receivable includes three categories: accounts receivable, claims, and refund receivable from other federal entities and from the public. Allowances for uncollectible accounts due from the public are based upon analysis of collection experience by fund type. The DON does not recognize an allowance for estimated uncollectible amounts from other federal agencies. Claims against other federal agencies are to be resolved between the agencies in accordance with dispute resolution procedures defined in the Intragovernmental Business Rules published in the Treasury Financial Manual at <http://www.fms.treas.gov/tfm/vol1/07-03.pdf>.

### **1.L. Direct Loans and Loan Guarantees**

Not applicable.

### **1.M. Inventories and Related Property**

Related property includes Operating Materials and Supplies (OM&S) and stockpile materials. The DON uses both the consumption method and the purchase method of accounting for OM&S. Items that are centrally managed and stored, such as ammunition and engines, are generally recorded using the consumption method and are reported on the Balance Sheet as an asset. When current systems cannot fully support the consumption method, DON uses the purchase method. Under the purchase method, materials and supplies are not recorded as an asset, but rather, are expensed when purchased. During FY 2007, DON expensed significant amounts using the purchase method because the systems could not support the consumption method or management deemed that the item was in the hands of the end user. This is a DoD-wide material weakness and long-term system corrections are in process. Once the proper systems are in place, these items will be accounted for under the consumption method of accounting.

The DON values OM&S assets using several valuation methods. Most OM&S is valued at an approximation of historical cost using latest acquisition cost adjusted for holding gains and losses. The latest acquisition cost method is used because legacy inventory systems were designed for materiel management rather than accounting purposes. Although these systems provide visibility and accountability over inventory and related property items, they do not maintain historical cost data necessary to comply with SFFAS No. 3, "Accounting for Inventory and Related Property." Additionally, these systems cannot produce financial transactions using USSGL, as required by the Federal Financial Management Improvement Act of 1996 (P.L. 104-208). The DON is continuing to transition the balance of the inventories to the moving average cost method. However, since the on-hand balances which were transitioned were not, for the most part, baselined to auditable historical cost, the reported values remain noncompliant with SFFAS No. 3 and GAAP.

The DON manages only military or government specific materiel under normal conditions. Materiel is a unique term that relates to military force management, and includes items such as weapons system spare parts and repair parts necessary to equip, operate, maintain, and support military activities without distinction as to its application for administrative or combat purposes. Items commonly used in and available from the

commercial sector are not managed in DON materiel management activities. Operational cycles are irregular and the military risks associated with stock-out positions have no commercial parallel. The DON holds materiel based on military need and support for contingencies.

In conjunction with DoD, DON determined that the recurring high dollar value of OM&S in need of repair is material to the financial statements and required a separate reporting category. Many high dollar items, such as aircraft engines, are categorized as OM&S rather than military equipment.

The DON recognizes condemned materiel as “Excess, Obsolete, and Unserviceable.” The cost of disposal is greater than the potential scrap value; therefore, the net value of condemned materiel is zero. Materiel that potentially may be redistributed, presented in previous years as “Excess, Obsolete, and Unserviceable,” is included in the “Held for Use” or “Held for Repair” categories according to its condition.

#### **1.N. Investments**

For the trust funds, DON reports investments in U.S. Treasury securities at cost, net of amortized premiums or discounts. Premiums or discounts amortize into interest income over the term of the investment using the effective interest rate method or another method obtaining similar results. The DON’s intent is to hold investments to maturity, unless they are needed to finance claims or otherwise sustain operations. Consequently, a provision is not made for unrealized gains or losses on these securities.

The DON invests in nonmarketable securities. The two types of nonmarketable securities are par value and market-based intragovernmental securities. The Bureau of Public Debt issues nonmarketable par value intragovernmental securities. Nonmarketable, market-based intragovernmental securities mimic marketable securities, but are not publicly traded.

#### **1.O. General Property, Plant and Equipment**

The SFFAS No. 23, “Eliminating the Category National Defense Property, Plant, and Equipment,” established generally accepted accounting principles for valuing and reporting military equipment (e.g., ships, aircraft, combat vehicles, weapons) in federal financial statements. The Standard provided for the use of estimated historical cost for valuing military equipment if obtaining actual historical cost information is not practical. The DoD used Bureau of Economic Analysis (BEA) to calculate the value of the military equipment for reporting periods from October 1, 2002, through March 31, 2006.

Effective 3<sup>rd</sup> Quarter, FY 2006, DoD replaced the BEA estimation methodology with an estimation methodology for military equipment based on departmental internal records. The DoD initially identified the universe of military equipment by accumulating information relating to program funding and associated military equipment, equipment useful life, program acquisitions, and disposals to create a baseline. The military equipment baseline is updated using expenditure information and information related to acquisition and disposals.

In FY 2006, the capitalization threshold was revised from \$100 thousand to \$20 thousand for real property. The DON has not implemented the \$20 thousand real property capitalization threshold, pending an evaluation of real property systems, processes, and procedures that will have to be revised in order to implement the lowered threshold. The current \$100 thousand capitalization threshold remains unchanged for the remaining General PP&E categories.

General PP&E assets are capitalized at historical acquisition cost plus capitalized improvements when an asset has a useful life of two or more years and the acquisition cost equals or exceeds the DoD capitalization threshold of \$100 thousand. The DoD also requires capitalization of improvement costs over the DoD capitalization threshold of \$100 thousand for General PP&E. The DoD depreciates all General PP&E, other than land, on a straight-line basis. Land is not depreciated.

Prior to FY 1996, General PP&E was capitalized if it had an acquisition cost of \$15 thousand, \$25 thousand, and \$50 thousand for fiscal years 1993, 1994, and 1995, respectively, and an estimated useful life of two or more years. General PP&E previously capitalized at amounts below \$100 thousand were written off GF financial statements in FY 1998.

When it is in the best interest of the government, DON provides government property to contractors when deemed necessary to complete contract work. The DON either owns or leases such property, or it is purchased directly by the contractor for the government based on contract terms. When the value of contractor-procured General PP&E exceeds the DoD capitalization threshold, Federal accounting standards require that it be reported on DON's Balance Sheet.

The DoD is developing new policies and a contractor reporting process for Government Furnished Equipment that will provide appropriate General PP&E information for future financial statement reporting purposes. Accordingly, DON reports only government property in the possession of contractors that is maintained in DON's property systems. The DoD has issued new property accountability and reporting requirements that require DoD components to maintain, in their property systems, information on all property furnished to contractors. This action and other DoD proposed actions are structured to capture and report the information necessary for compliance with Federal accounting standards.

#### **1.P. Advances and Prepayments**

It is DoD policy to record payments in advance of the receipt of goods and services as advances or prepayments and report the advances as an asset on the Balance Sheet, and to recognize the expense and/or proper asset classification when it receives the related goods and services.

#### **1.Q. Leases**

Lease payments for the rental of equipment and operating facilities are classified as either capital or operating leases. When a lease is essentially equivalent to an installment purchase of property (a capital lease) DON records the applicable asset and liability if the

value equals or exceeds the current capitalization threshold. The DON records the amounts as the lesser of the present value of the rental and other lease payments during the lease term (excluding portions representing executory costs paid to the lessor) or the asset's fair market value. The discount rate for the present value calculation is either the lessor's implicit interest rate or the government's incremental borrowing rate at the inception of the lease. The DON as the lessee receives the use and possession of the leased property, for example real estate or equipment, from a lessor in exchange for a payment of funds. An operating lease does not substantially transfer all of the benefits or risks of ownership. Payments for operating leases are charged to expense over the lease term as it becomes payable.

Office space leases entered into by DON are the largest component of operating leases. These costs were gathered from existing leases, General Service Administration (GSA) bills, and Inter-service Support Agreements. Future year projections use the Consumer Price Index (CPI) rather than the DoD inflation factor. The CPI impacts increases to the leases, especially those at commercial lease sites. Equipment leases have a variety of lease terms, which are not expected to be renewed upon expiration. Other operating leases are generally one-year leases. The DON will strive to displace commercial leases with more economical GSA leases.

#### **1.R. Other Assets**

Other assets include those assets, such as military and civil service employee pay advances, travel advances, and certain contract financing payments that are not reported elsewhere on the Department's Balance Sheet.

The DON conducts business with commercial contractors under two primary types of contracts: fixed price and cost reimbursable. To alleviate the potential financial burden on the contractor that long-term contracts can cause, DON may provide financing payments. Contract financing payments are defined in the Federal Acquisition Regulations, Part 32, as authorized disbursements of monies to a contractor prior to acceptance of supplies or services by the Government. Contract financing payments clauses are incorporated in the contract terms and conditions and may include advance payments, performance-based payments, commercial advance and interim payments, progress payments based on cost, and interim payments under certain cost-reimbursement contracts. Contract financing payments do not include invoice payments, payments for partial deliveries, lease and rental payments, or progress payments based on a percentage or stage of completion, which the Defense Federal Acquisitions Regulations Supplement authorizes only for construction of real property, shipbuilding, and ship conversion, alteration, or repair. Progress payments for real property are reported as Construction in Progress. It is DoD policy to record certain contract financing payments as Other Assets.

#### **1.S. Contingencies and Other Liabilities**

The SFFAS No. 5, "Accounting for Liabilities of the Federal Government," as amended by SFFAS No. 12, "Recognition of Contingent Liabilities Arising from Litigation," defines a contingency as an existing condition, situation, or set of circumstances that involves an uncertainty as to possible gain or loss. The uncertainty will be resolved when one or more future events occur or fail to occur. The DON recognizes contingent

liabilities when past events or exchange transactions occur, a future loss is probable, and the loss amount can be reasonably estimated.

Financial statement reporting is limited to disclosure when conditions for liability recognition do not exist but there is at least a reasonable possibility of incurring a loss or additional losses. Examples of loss contingencies include the collectibility of receivables, pending or threatened litigation, and possible claims and assessments. The DON's loss contingencies arise as a result of pending or threatened litigation or claims and assessments occur due to events such as aircraft, ship and vehicle accidents, medical malpractice; property or environmental damages; and contract disputes.

Other liabilities arise as a result of anticipated disposal costs for DON's assets. This type of liability has two components: nonenvironmental and environmental. Consistent with SFFAS No. 6, "Accounting for Property, Plant, and Equipment," recognition of an anticipated environmental disposal liability begins when the asset is placed into service. Nonenvironmental disposal liabilities are recognized for assets when management decides to dispose of the asset based upon DoD's policy, which is consistent with SFFAS No. 5, "Accounting for Liabilities of the Federal Government." The DON recognizes nonenvironmental disposal liabilities for military equipment nuclear-powered assets when placed in service. Such amounts are developed in conjunction with, and not easily identifiable separately from, environmental disposal costs.

#### **1.T. Accrued Leave**

The DON reports as liabilities military leave and civilian earned leave, except sick leave, that has been accrued and not used as of the Balance Sheet date. Sick leave is expensed as taken. The liability reported at the end of the accounting period reflects the current pay rates.

#### **1.U. Net Position**

Net Position consists of unexpended appropriations and cumulative results of operations. Unexpended Appropriations represent the amounts of authority that are unobligated and have not been rescinded or withdrawn. Unexpended appropriations also represent amounts obligated for which legal liabilities for payments have not been incurred. Cumulative Results of Operations represent the net difference, since inception of an activity, between expenses and losses and financing sources (including appropriations, revenue, and gains). Beginning with FY 1998, the cumulative results also include donations and transfers in and out of assets without reimbursement.

#### **1.V. Treaties for Use of Foreign Bases**

The DON has the use of land, buildings, and other overseas facilities that are obtained through various international treaties and agreements negotiated by the Department of State. The DON purchases capital assets overseas with appropriated funds; however, the host country retains title to land and improvements. Generally, treaty terms allow DON continued use of these properties until the treaties expire. In the event treaties or other agreements are terminated, whereby use of the foreign bases is prohibited, losses are recorded for the value of any nonretrievable capital assets. This takes place after

negotiations between the U.S. and the host country have determined the amount to be paid to the U.S. for such capital investments.

**1.W. Comparative Data**

Not applicable.

**1.X. Unexpended Obligations**

The DON obligates funds to provide goods and services for outstanding orders not yet delivered. The financial statements do not reflect this liability for payment for goods and services not yet delivered.

**1.Y. Undistributed Disbursements and Collection**

Undistributed disbursements and collections represent the difference between disbursements and collections matched at the transaction level to a specific obligation, payable, or receivable in the activity field records as opposed to those reported by the U.S. Treasury. These amounts should agree with the undistributed amounts reported on the departmental accounting reports. In-transit payments are those payments that have been made by other agencies or entities that have not been recorded in the DON's accounting records. These payments are applied to the DON's outstanding accounts payable balance. In-transit collections are those collections from other agencies or entities that have not been recorded in the DON's accounting records. These collections are applied to the DON's accounts receivable balance.

The DoD policy is to allocate supported undistributed disbursements and collections between federal and nonfederal categories based on the percentage of distributed federal and nonfederal accounts payable and accounts receivable. Unsupported undistributed disbursements are recorded in accounts payable. Unsupported undistributed collections are recorded in other liabilities. The DON follows this procedure.

**1.Z. Data Collection Approach**

The DON financial statements include information from both financial systems and nonfinancial feeder systems. The Defense Finance and Accounting Service, Cleveland (DFAS-CL) and Kansas City (DFAS-KC) collect the financial system information and incorporate it into the financial statements. The DON collects financial information from nonfinancial feeder systems through a data call process and submits it to DFAS-CL and DFAS-KC for incorporation into the financial statements. DFAS also collects information from multiple sources, such as intragovernmental data from DON's trading partners, which is incorporated into the financial statements. Beginning FY 2007, DON completed migration from the DON Data Collection Instrument to the Defense Departmental Reporting System (DDRS) Data Collection Module (DCM). The DDRS DCM captures certain required financial information from feeder systems for the GF financial statements. The DDRS DCM identifies the information requirements to the source provider, provides an audit trail, and integrates data into the financial statement preparation process.

<b>Note 2.</b>	<b>Nonentity Assets</b>
----------------	-------------------------

As of June 30	2007	2006
<b>1. Intragovernmental Assets</b>		
A. Fund Balance with Treasury	\$ 531,483,436.90	\$ 409,391,194.46
B. Accounts Receivable	0.00	0.00
C. Total Intragovernmental Assets	\$ 531,483,436.90	\$ 409,391,194.46
<b>2. Nonfederal Assets</b>		
A. Cash and Other Monetary Assets	\$ 172,854,810.28	\$ 200,050,887.44
B. Accounts Receivable	3,256,828,340.51	3,109,066,281.82
C. Other Assets	0.00	0.00
D. Total Nonfederal Assets	\$ 3,429,683,150.79	\$ 3,309,117,169.26
<b>3. Total Nonentity Assets</b>	\$ 3,961,166,587.69	\$ 3,718,508,363.72
<b>4. Total Entity Assets</b>	\$ 396,570,629,250.79	\$ 377,923,476,864.23
<b>5. Total Assets</b>	\$ 400,531,795,838.48	\$ 381,641,985,227.95

**Standard Disclosures**Intragovernmental Fund Balance with Treasury.

This nonentity asset category represents amounts in DON's deposit and receipt fund accounts such as the savings plans that were established by Congress to benefit deployed sailors and Marines. Amounts in deposit and receipt accounts are not available for DON's use in normal operations.

Cash and Other Monetary Assets.

This nonentity asset category represents disbursing officers' cash, foreign currency, and undeposited collections as reported on the Disbursing Officer's Statement of Accountability. These assets are held by DON disbursing officers as agents of the U.S. Treasury and are not available for DON's use in normal operations.

Nonentity Nonfederal Accounts Receivable (Public).

The primary component of nonentity accounts receivable is an advance payment made to a contractor, and associated accrued interest, which remains in litigation. These receivable balances are being reported in nonentity accounts receivable since the original appropriation year has been cancelled, and any funds collected as a result of this litigation would be remitted to the U.S. Treasury.

**Other Disclosures**Entity accounts.

Assets that DON has the authority to use, or that can be legally obligated for entity obligations.

Nonentity accounts.

Assets held by an entity, but are not available for use in the operations of the entity.

<b>Note 3.</b>	<b>Fund Balance with Treasury</b>
----------------	-----------------------------------

As of June 30	2007	2006
<b>1. Fund Balances</b>		
A. Appropriated Funds	\$ 140,350,407,899.07	\$ 128,420,844,338.51
B. Revolving Funds	2,262,851,349.63	2,693,147,682.98

F. Total Fund Balances	\$ 143,156,199,615.21	\$ 131,533,337,867.39
<b>2. Fund Balances Per Treasury Versus Agency</b>		
A. Fund Balance per Treasury	\$ 143,207,947,276.00	\$ 131,514,402,977.68
B. Fund Balance per DON	143,156,199,615.21	131,533,337,867.39
<b>3. Reconciling Amount</b>	\$ 51,747,660.79	\$ (18,934,889.71)

**Standard Disclosure**

The total reconciling amount of \$51.7 million in Fund Balance with Treasury (FBWT) is primarily due to \$37.8 million of FBWT in parent-child allocations for which FBWT is recorded in the Treasury ledgers as belonging to the Department of Navy (DON). However, these child allocations are not reported in DON's general ledger accounts in accordance with OMB guidance. Therefore a reconciling amount is reported for the discrepancy between the Treasury ledgers and the DON's ledgers. The DON receives allocation transfers, as the child, from the Executive Office of the President for the Foreign Military Financing Program, as well as for the International Military Education and Training program. The DON also receives allocation transfers, as the child, from the U.S. Forest Service and the Federal Highway Administration.

Other Fund Types (Line 1.E) consists primarily of amounts in the following deposit and receipt accounts: General Fund Proprietary Receipts, Pay of the Navy Deposit Fund, and Withheld State and Local Taxes.

<b>Status of Fund Balance with Treasury</b>
---

As of June 30	2007	2006
<b>1. Unobligated Balance</b>		
A. Available	\$ 56,628,646,529.69	\$ 51,454,209,128.84
B. Unavailable	2,958,947,247.21	2,462,776,488.44
<b>2. Obligated Balance not yet Disbursed</b>	\$ 88,313,361,126.90	\$ 82,160,429,127.02
<b>3. Nonbudgetary FBWT</b>	\$ 542,506,775.38	\$ 396,217,413.49
<b>4. NonFBWT Budgetary Accounts</b>	\$ (5,287,262,063.97)	\$ (4,940,294,290.40)
<b>5. Total</b>	<u>\$ 143,156,199,615.21</u>	<u>\$ 131,533,337,867.39</u>

### Standard Disclosures

The Status of FBWT consists of unobligated and obligated balances. These balances reflect the budgetary authority remaining for disbursements against current or future obligations. In addition, the Status includes various accounts that affect either budgetary reporting or FBWT, but not both.

Unobligated Balance represents the cumulative amount of budgetary authority that has not been set aside to cover outstanding obligations. Unobligated Balance is classified as available or unavailable and is associated with appropriations expiring at fiscal year end that remain available only for obligation adjustments until the account is closed.

Obligated Balance not yet Disbursed represents funds that have been obligated for goods that have not been received, services that have not been performed, and goods and services that have been delivered/received but not yet paid.

Non-Budgetary FBWT includes entity and nonentity FBWT accounts that do not have budgetary authority, such as unavailable receipt accounts or clearing accounts. For DON General Fund (GF), Non-Budgetary FBWT consists of balances in receipt accounts and clearing accounts.

Non-FBWT Budgetary Accounts include budgetary accounts that do not affect FBWT. For DON GF, Non-FBWT Budgetary Accounts include Trust Fund investments in U.S. Treasury securities, unfilled customer orders without advance, and reimbursements receivable. This category reduces the Status of FBWT.

### Other Disclosures

Unobligated, Unavailable balances are restricted to future use and are not apportioned for current use.

Although funds have been appropriated, expired single year appropriations such as Operation and Maintenance and Military Pay accounts, are not generally available for obligation because the period for obligation established by law has lapsed. Multi-year accounts and "X" or no year accounts are

restricted based on their appropriation type. Trust funds and Earmarked funds are restricted to their intended use.

Current year amounts of single year appropriations, such as Operations and Maintenance and Military Personnel are apportioned on a quarterly basis by OMB.

### Standard Disclosures

The F3845 suspense account represents the balance of proceeds from the sale of personal property.

The F3875 suspense clearing represents the Disbursing Officer's suspense. Account F3885, represents the Interfund/IPAC suspense. Account F3886 represents the (payroll) Thrift Savings Plan suspense. These three suspense accounts temporarily hold collections or disbursements until they can be assigned or identified to a valid appropriation.

The F3880 suspense account represents the balance of U.S. Treasury checks that (1) have either been lost by the payee and need to be reissued, (2) have never been cashed by the payee, or (3) have been cancelled by the U.S. Treasury and need to be transferred to the original appropriation.

The F3882 suspense account was established for the Uniformed Services Thrift Savings Plan in FY 2002. The amounts in this account represent a timing difference between the posting of the Thrift Savings Plan deductions by the National Finance Center and the posting of these amounts in the military accounting systems in the following month.

<b>Disclosures Related to Problem Disbursements</b>
---

As of June 30	2005	2006	2007	(Decrease)/ Increase from FY 2006 to 2007

<b>Total</b>	<b>\$ 3,818,480,029.93</b>	<b>\$ 2,567,582,173.53</b>	<b>\$ 1,913,028,819.51</b>	<b>(654,553,354.02)</b>

**Standard Disclosures**

An Unmatched Disbursement occurs when a payment is not matched to a corresponding obligation in the accounting system.

Absolute Value is the sum of the positive values of debit and credit transactions without regard to the sign (plus or minus).

A Negative Unliquidated Obligation occurs when a payment is made against a valid obligation, but the payment is greater than the amount of the obligation recorded in the official accounting system. These payments have been made using available funds and are based on valid receiving reports for goods and services delivered under valid contracts.

In-Transit Disbursements represent the absolute value of disbursements and collections made by a disbursing activity on behalf of an accountable activity, which have not been posted in an accounting system.

The problem disbursements reported by DON are in balance with the problem disbursement metric furnished to DFAS Arlington.

Starting 2<sup>nd</sup> Quarter FY 2007, in-transit disbursements are reported as absolute value as opposed to net amounts disclosed in prior years. This reporting change applies to amounts in the note schedule for both the current and comparative years.

## **Standard Disclosures**

Other Funds (Line 1.A.4) represents Department of the Navy (DON) Trust Funds holdings in interest-bearing securities for the Naval Academy General Gift Fund and the Navy General Gift Fund. These investments are Nonmarketable Market-Based U.S. Treasury securities reported at cost, net of amortized premiums and discounts. In accordance with the Statement of Federal Financial Accounting Standards No. 27, "Identifying and Reporting Earmarked Funds," DON Trust Funds are classified and reported as earmarked funds.

### Intragovernmental Investments for Earmarked Funds.

The Federal Government does not set aside assets to pay future benefits or other expenditures associated with DON's earmarked Trust Funds. The cash receipts collected from the public for an earmarked fund are deposited in the U.S. Treasury, which uses the cash for general Government purposes. U.S. Treasury securities are issued to DON as evidence of its receipts. U.S. Treasury securities are an asset to the DON and a liability to the U.S. Treasury. Because DON and the U.S. Treasury are both entities of the Government, these assets and liabilities offset each other from the standpoint of the Government as a whole. For this reason, they do not represent an asset or a liability in the U.S. Government wide financial statements. U.S. Treasury securities provide the DON with authority to draw upon the U.S. Treasury to make future benefit payments or other expenditures. When DON requires redemption of its Treasury securities held in DON earmarked Trust Funds to make expenditures, the Government finances those expenditures out of accumulated cash balances, by raising taxes or other receipts, by borrowing from the public or repaying less debt, or by curtailing other expenditures. This is the same way that the Government finances all other expenditures.

<b>Note 5.</b>	<b>Accounts Receivable</b>

**Standard Disclosures**Allocation of Undistributed Collections.

Undistributed collections are allocated between federal and nonfederal categories based on the percentage of federal and nonfederal Accounts Receivable as submitted in the field level general ledgers. This allocation was suggested as appropriate in a Defense Finance and Accounting Service (DFAS) memorandum of October 4, 2000, which required disclosure to the audit community of the applicable methodology used to allocate undistributed collections. The methodology used to calculate the allocation excludes nonentity accounts receivable, including cases in litigation, from the calculation. Undistributed collections are allocated based on the percentage of entity federal and entity nonfederal accounts receivable.

Elimination Adjustments.

The Department of the Navy (DON) accounting systems do not consistently capture trading partner data at the transaction level in a manner that facilitates trading partner reconciliations. Therefore, DON was unable to reconcile intragovernmental accounts receivable balances with the accounts payable balances of its intragovernmental trading partners. Through the ongoing Business Transformation Agency effort, the Department of Defense (DoD) is developing long-term systems improvements that will capture the data necessary to perform reconciliations.

### **Information Related to Aged Accounts Receivable.**

Nondelinquent accounts receivable consists of receivables outstanding for 30 days or less or those not yet due under the contract or billing document pertaining to the receivable. Current nondelinquent accounts receivable are those that are due in the next twelve months. Noncurrent nondelinquent accounts receivable include out-of-service debt that are due beyond the next twelve months, and are valued at \$107.7 million for 3<sup>rd</sup> Quarter, FY 2007. These accounts are not considered delinquent since the associated repayment schedules allow for repayment after a 30-day period. The DON is actively pursuing collection action on all accounts receivable, both public and intragovernmental, in accordance with guidance in the DoD Financial Management Regulation, Volume 4, Chapter 3, and Office of Management and Budget Circular A-129 "Policies for Federal Credit Programs and Non-Tax Receivables."

For public debt, these collection actions include referring delinquent vendor debt to the Debt Management Office (DMO) for servicing no later than 60 days after the payment due date, and coordinating with DMO to further refer such debt over 180 days delinquent to Treasury for further collection action. A current example of collection actions related to public debt is a partnership between DON and DFAS to identify habitually delinquent public entities and develop standard processes with a goal of improving the joint business relationship. For delinquent intragovernmental debt, collection actions include detailed research of subsidiary accounting

transactions with DFAS, the compilation and review of dispute packages, and consultation and negotiation with debtor agencies to resolve outstanding receivables.

It must be recognized that, in certain instances, the status of litigation impacts the ability of DON to actively pursue collection action on public debt.

The accounts receivable aging schedule prior year column represents 4<sup>th</sup> Quarter, FY 2006 ending balances, rather than the ending balances as 3<sup>rd</sup> Quarter, FY 2006. Therefore, the prior year accounts receivable balance on the aging schedule will not agree with the prior year balance on the Balance Sheet or the prior year balance in the first schedule in this note.

The amount of \$188.5 million recorded as “Other” in the aging schedule above was recorded to balance the budgetary accounts receivable recorded in the budget execution reports with the subsidiary accounts receivable data that exists in the accounting systems. The subsidiary accounts receivable data is used to provide seller side trading partner data but also includes public accounts receivable data that must be reconciled to the Treasury Report on Receivables and other accounts receivable reports.

<b>Note 6.</b>	<b>Other Assets</b>
----------------	---------------------

As of June 30	2007	2006
<b>1. Intragovernmental Other Assets</b>		
A. Advances and Prepayments	\$ 549,939,618.28	\$ 438,743,936.20
B. Other Assets	0.00	0.00
C. Total Intragovernmental Other Assets	\$ 549,939,618.28	\$ 438,743,936.20
<b>2. Nonfederal Other Assets</b>

B. Other Assets (With the Public)	397,849,805.78	462,829,347.97
C. Total Nonfederal Other Assets	\$ 7,965,181,119.50	\$ 7,350,320,603.62
<b>3. Total Other Assets</b>	<b>\$ 8,515,120,737.78</b>	<b>\$ 7,789,064,539.82</b>

### Standard Disclosures

#### Nonfederal Other Assets - Outstanding Contract Financing Payments.

Contract terms and conditions for certain types of contract financing payments convey certain rights to the Department of the Navy (DON) that protect the contract work from state or local taxation, liens or attachment by the contractor's creditors, transfer of property, or disposition in bankruptcy; however, these rights should not be misconstrued to mean that ownership of the contractor's work has transferred to the Government. The government does not have the right to take the work, except as provided in contract clauses related to termination or acceptance, and the Department is not obligated to make payment to the contractor until delivery and acceptance of a satisfactory product.

The Contract Financing Payment balance of \$7.6 billion is comprised of \$7.2 billion in contract financing payments and an additional \$318.7 million in estimated future funded payments that will be paid to the contractor upon future delivery and Government acceptance of a satisfactory product. (See additional discussion in Note 15, Other Liabilities).

### Other Disclosures

#### Intragovernmental Other Assets - Advances and Prepayment.

The DON buyer-side advances to others amounts were adjusted to agree with seller-side advances from others on the books of other Department of Defense (DoD) reporting entities. Additionally, DON's buyer-side prepayment balances were adjusted to agree with seller-side deferred credits on the books of other DoD reporting entities. Material differences may exist as advances and prepayments to Other Federal Agencies were estimated since DON accounting systems are unable to identify the agency that is being advanced money from the buyer side perspective. The estimates were based upon historical trading partner data obtained from the Intragovernmental Review and Analysis System.

Nonfederal Other Assets, Other Assets (With the Public).

Other Assets (With the Public) includes advance pay to DON military personnel, travel advances to military and civilian personnel, and miscellaneous advances to contractors that are not considered outstanding contract financing payments.

<b>Note 7.</b>	<b>Cash and Other Monetary Assets</b>
----------------	---------------------------------------

As of June 30	2007	2006
<b>1. Cash</b>	\$ 105,537,621.46	\$ 194,931,115.79
<b>2. Foreign Currency</b>	67,317,188.82	5,119,771.65
<b>3. Other Monetary Assets</b>	0.00	0.00
<b>4. Total Cash, Foreign Currency, &amp; Other Monetary Assets</b>	\$ 172,854,810.28	\$ 200,050,887.44

**Standard Disclosures**

Cash and Foreign Currency consists primarily of cash held by Disbursing Officers to carry out their payment, collection, and foreign currency accommodation exchange mission. Foreign currency is also held in overseas banks in support of contingency operations. The primary source of the amounts reported is the Disbursing Officers Statements of Accountability.

The Department of Navy (DON) translates foreign currency to U.S. dollars utilizing the U.S. Treasury Prevailing Rate of Exchange. This rate is the most favorable rate that would legally be available to the U.S. Government's acquisition of foreign currency for its official disbursement and accommodation of exchange transactions.

Cash - the total of cash resources under the control of DON, which includes coin, paper currency, purchased foreign currency, negotiable instruments, and amounts on deposit in banks and other financial institutions.

Foreign Currency - consists of the total U.S. dollar equivalent of foreign currencies.

Restriction on Cash, Foreign Currency and Other Monetary Assets – total cash, foreign currency and other monetary assets reported are nonentity assets that are not available for DON's use in normal operations. Therefore, the \$172.9 million in cash and foreign currency is restricted as to its use. There are no known restrictions on the conversion of foreign currency to U.S. dollars or other foreign currencies as it is held by Disbursing Officers in support of their payment and foreign currency accommodation exchange mission.

### Standard Disclosures

#### Restrictions on the use of Operating Materials and Supplies (OM&S)

There are no known restrictions on the use of OM&S.

#### General Composition of OM&S.

OM&S includes spare and repair parts, ammunition, conventional missiles, torpedoes, aircraft configuration pods, and centrally managed aircraft engines. The general composition of OM&S is Ammunitions and Munitions, Principal End and Secondary Items, Sponsor Owned Material (SOM), Real-time Reutilization Asset Management (RRAM) Material and Other OM&S.

Ammunition and Munitions are maintained in the DON Ordinance Information System and valued at latest acquisition cost.

Principal End and Secondary Items include OM&S such as shipboard hull, mechanical and electronic equipment, and uninstalled aircraft engines. They are items of such importance that central inventory control is required. They normally possess one of the following characteristics; essential for combat or training; high dollar value; difficult to procure or produce; or critical basic materials or components.

SOM is defined as programmatic material required in support of Program Manager's mission requirements for production, life cycle maintenance, and installation of systems and equipment. The material usage may involve, but is not limited to: item fabrication, assembly, testing, manufacture, development, repair, or research and development.

Material maintained and valued in RRAM is considered excess to the owner, or material manager responsible for the material, but may not be excess to the Department of the Navy (DON). Standard price is used to value all stock-numbered items. Part-numbered items are valued by best available information.

Other OM&S consists primarily of Fleet Hospitals held by the Bureau of Medicine and Surgery and War Reserve material in possession of the U.S. Coast Guard.

Decision Criteria for Identifying the Category to Which Operating Materials and Supplies Are Assigned.

In order to standardize the reporting categories of Held for Use; Held for Repair; and Excess, Obsolete and Unserviceable, DON implemented the Under Secretary of Defense (Comptroller) (USD(C)) condition code crosswalk as defined in the memorandum “Accounting for Excess, Unserviceable, and Obsolete Inventory and Operating Materials and Supplies” dated August 12, 2002. In addition, the condition code crosswalk was amended to include code “V” in the Excess, Obsolete, Unserviceable category in September 2002. OM&S is reported as follows:

OM&S Category	Condition Codes
Held for Use	A, B, C, D
Held for Repair	E, F, G, J, K, L, M, N, R
Excess, Obsolete, Unserviceable	P, H, S, V

Condition Codes are used for material management purposes and are defined in the Naval Supply Systems Command Publication 409.

Valuation Method for OM&S.

On July 6, 2001, OUSD(C) issued a memorandum directing each Military Department and Defense Agency to implement the Moving Average Cost (MAC) valuation method for Inventory Held for Sale and OM&S as they renovated or replaced their systems. The DON is participating in a DoD Business Transformation Agency effort that is currently designing and updating the Business Enterprise Architecture (BEA). The BEA includes guidance on transition plan strategy concepts, considerations, processes, and principles. MAC will be implemented as existing OM&S systems are renovated or replaced. Until then, DON continues to value OM&S using different valuation methodologies such as standard purchase price or actual cost. These valuation methodologies vary by system.

**Standard Disclosures****Restrictions on the use or convertibility of General Property, Plant, & Equipment (PP&E).**

The Department of the Navy (DON) has the use of land, buildings, and other overseas facilities that are obtained through various international treaties and agreements negotiated by the Department of State. Generally, treaty terms allow DON continued use of these properties until the treaties expire. There are no other known restrictions on General PP&E.

**Acquisition cost of General PP&E.**

The DON does not have significant amounts of General PP&E for which the acquisition cost is unknown.

**Military Equipment.**

In accordance with the requirements of Statement of Federal Financial Accounting Standards (SFFAS) No. 23, "Eliminating the Category National Defense Property, Plant, and Equipment," beginning in FY 2003, the Department of Defense (DoD) capitalized military equipment into General PP&E at estimated historical cost using information obtained from the Bureau of Economic Analysis (BEA). The DoD changed its method of valuing military equipment in 3<sup>rd</sup> Quarter, FY 2006, and now uses a valuation method based on internal records. Previously, military equipment was valued using the BEA data.

## Heritage Assets and Stewardship Land.

### Relationship of Heritage Assets to DON's Mission.

The overall mission of DON is to control and maintain freedom of the seas; project power beyond the sea; and influence events and advance U.S. interests across the full spectrum of military operations. As the DON mission has been executed, DON has become a large-scale owner of historic buildings, structures, districts, archeological sites and artifacts, ships, aircraft, other cultural resources, and several hundred installations to include stewardship land. Protection of these components of the nation's heritage assets and stewardship land is an essential part of DON's mission; DON is committed to responsible cultural resources stewardship.

### Stewardship Policies for Heritage Assets and Description of Each Major Category of Heritage Assets.

The overall policy for DON's stewardship policies for heritage assets is contained in the Secretary of the Navy Instruction 4000.35A, "DON Cultural Resources Program."

- Heritage Assets are items that are unique for one or more of the following reasons: (1) historical or natural significance; (2) cultural, educational, or artistic importance; or (3) significant architectural characteristics. The process used to define items as having heritage significance varies between categories and type of assets being evaluated.
- Consultation, as appropriate, is initiated with State Historic Preservation Officers, Tribal Historic Preservation Officers, Advisory Council on Historic Preservation, Native Americans, Native Hawaiians, and other interested agencies and publics whenever DON conducts or supports undertakings that may affect any National Register resource. Preservation considerations are incorporated into routine DON management of historic buildings, structures, districts, sites, ships, aircraft, and other cultural resources.
- Archaeological Sites are locations that contain the remains of past human activity of various sorts that are listed or eligible for listing on the National Register of Historic Places. These sites are excavated only to the extent required for evaluation and identification.
- Buildings and Structures are listed as or determined eligible for listing on the National Register of Historic Places, including Multi-Use Heritage Assets.
- Cemeteries are government owned burial grounds on which gravesites of prominent historical figures may be located in addition to other gravesites.
- Major Collections include archeological artifacts that are maintained and inventoried by cubic feet, archival items that are maintained and inventoried by linear feet, and artwork and historical artifacts that are maintained and inventoried by individual items.
- Monuments and Memorials are those items that are built or placed to commemorate a person or event, preserve the memory of a historical event, or are shown or maintained for its historical interest.

### Stewardship Land Policy.

The DON Stewardship Land policy is the same as that which DON maintains over all land and installations. The DON strives to be a responsible steward of the land and to maintain it in a way that both protects human health and the environment and allows training and support of fleet readiness. For DON, Stewardship Land includes land acquired through public domain, land set

aside, and donated land. Some of this land is used as a buffer around the perimeter of DON installations and may include, but is not limited to, grazing lands and forestry maintenance areas.

The DON did not receive any stewardship land by donation or devise through 3<sup>rd</sup> Quarter, FY 2007. The DON's heritage asset system does not identify the method by which heritage assets were obtained nor does it maintain costs, therefore we are unable to determine the number and value of heritage assets that may have been obtained through donation or devise. Examples of heritage assets that are obtained on a regular basis include artwork and historical artifacts, such as papers and mementos that have been donated by former sailors, Marines, and their families.

## **Other Disclosures**

### Real Property.

The Internet Naval Facility Asset Database Store (iNFADS) provides real property values for financial statement reporting purposes.

### Leasehold Improvements.

The DON's iNFADS real property system does not track leasehold improvements as a separate component of a building's total value. However, DON collects this information through a data call and began recognizing the leasehold improvement values beginning in FY 2004.

### Software.

The DON uses the Defense Property Accountability System to capture costs associated with Internal Use Software.

### Construction-in-Progress (CIP).

The CIP balances were obtained from the Facilities Information System. The value of construction that is performed for the benefit of external customers, such as Air Force and several of the Defense Agencies is provided to Air Force, the Defense Agencies, and the Defense Finance and Accounting Service. The value of construction for external customers is not included in DON CIP balances except in cases where DON will be the preponderant user of the facility. Since preponderant use policy does not apply to medical facilities, the CIP value of Navy medical facilities is included in the DON's CIP.

### Preponderant Use Policy.

Per the DoD Financial Management Regulation, Volume 4, Chapter 6, legal ownership is not always the determinant factor when establishing which DoD Component recognizes a particular General PP&E asset for accounting and reporting purposes. If the following four criteria are met, the preponderant user should report the property regardless of legal ownership or funding source:

- The asset embodies a probable future benefit;
- The DoD Component that reports the asset obtains the benefit and controls access to the benefit inherent in the asset.
- The transaction or event giving the Component the right to, and control over, the benefit has already occurred; and
- The predominantly used assets, taken as a whole, are material to the Component's financial statements.

In accordance with an Office of the Under Secretary of Defense (Comptroller) memorandum of July 5, 2005, the military departments and Defense Agencies meeting the criteria of preponderant user are responsible for reconciliation of preponderant use property. A milestone of the DON Financial Improvement Plan is to reconcile real property with Defense Agencies and to ensure that the DON real property database recognizes the preponderant user. As these efforts are completed and reconciliations are documented, DON General Fund will adjust the General PP&E asset account.

<b>5. Total Liabilities</b>	<b>\$ 33,360,341,608.60</b>	<b>\$ 29,709,470,263.04</b>

**Standard Disclosures**

Intragovernmental Liabilities – Other (Not Covered by Budgetary Resources) (Line 1.C) consists primarily of liabilities to U.S. Treasury and Federal Employees' Compensation Act (FECA) due to the Department of Labor.

Military Retirement and Other Federal Employment Benefits (Line 2.B) consists of FECA liabilities to employees. Refer to Note 17, Military Retirement and Other Federal Employment Benefits, for additional details and disclosures.

Nonfederal Liabilities – Other (Not Covered by Budgetary Resources) (Line 2.D) consists primarily of liabilities for annual leave, estimated legal contingencies, and for the disposal of excess and obsolete structures.

**Other Disclosures**

Liabilities Covered by Budgetary Resources are those that are incurred by the reporting entity, which are covered by realized budgetary resources as of the balance sheet date. Budgetary resources encompass not only new budget authority, but also other resources available to cover liabilities for specified purposes in a given year.

Realized budgetary resources include:

- New budget authority
- Spending authority from offsetting collections (credited to an appropriation or fund account)
- Recoveries of unexpired budget authority through downward adjustments of prior year obligations
- Unobligated balances of budgetary resources at the beginning of the year or net transfers of prior year balances during the year, and
- Permanent indefinite appropriations or borrowing authority, which have been enacted and signed into law as of the balance sheet date, provided that the resources may be apportioned by the Office of Management and Budget without further action by the Congress or without a contingency first having to be met.

Conversely, Liabilities Not Covered by Budgetary Resources are those liabilities that are not considered covered by realized budgetary resources as of the balance sheet date. Budgetary Authority to satisfy these liabilities is expected to be provided in a future Defense Appropriations Act. When that future budgetary authority is provided, these respective liabilities will be recorded as Covered by Budgetary Resources with an associated funded expense. To prevent overstatement on the Balance Sheet and Statement of Net Cost, the liabilities previously recorded as Not Covered by Budgetary Resources and the associated unfunded expenses are reversed.

<b>Note 12.</b>	<b>Accounts Payable</b>
-----------------	-------------------------

As of June 30	2007			2006
	Accounts Payable	Interest, Penalties, and Administrative Fees	Total	Total
1. Intragovernmental Payables	\$ 1,157,388,604.43	\$ N/A	\$ 1,157,388,604.43	\$ 912,685,044.48
2. Nonfederal Payables (to the Public)	1,220,506,803.97	0.00	1,220,506,803.97	1,848,382,712.67
<b>3. Total</b>	<b>\$ 2,377,895,408.40</b>	<b>\$ 0.00</b>	<b>\$ 2,377,895,408.40</b>	<b>\$ 2,761,067,757.15</b>

**Other Disclosures**Intragovernmental Accounts Payable.

This line consists of amounts owed to other federal agencies for goods or services ordered and received but not yet paid. Interest, penalties and administrative fees are not applicable to intragovernmental payables.

Nonfederal Payables (to the Public).

This line represents amounts owed to nonfederal government entities, corporations, and individuals.

Undistributed Disbursements.

Undistributed Disbursements are the difference between disbursements recorded at the detailed level to a specific obligation or payable in the activity field records versus those reported by the U.S. Treasury. This should agree with the undistributed disbursements reported on monthly accounting reports. Generally, timing issues between systems cause undistributed disbursements. In-transit disbursements are payments that have been made by other agencies, entities, or systems that have not yet been recorded in Department of Navy (DON) accounting records.

Intragovernmental Elimination.

DON accounting systems do not capture trading partner data at the transaction level to facilitate reconciliation of intragovernmental accounts payable to the related intragovernmental accounts receivable on another agencies' records that generated the payable. Therefore, Department of Defense (DoD) and other Federal agencies' summary level seller accounts receivables were compared to DON's accounts payable resulting in an adjustment to DON's accounts payable.

The DoD intends to develop long-term systems improvements that will include up-front edits and controls to eliminate the need for after-the-fact reconciliations. The volume of intragovernmental transactions is so large that after-the-fact reconciliation cannot be accomplished with existing or foreseeable resources. In the interim, Defense Finance Accounting Service is leading an effort to identify alternative means of capturing and recognizing buyer side trading partner data.

## Standard Disclosures

	2007	2006
(Amounts in thousands)		
<b>Other Accrued Environmental Costs – Other</b>	\$2,618,615	\$0

The “Other” type of environmental liabilities under Other Accrued Environmental Costs (Line 1.B.4.) represents an environmental estimate for disposal of Polychlorinated Biphenyls (PCBs) transformers located at various Navy installations. Under the Department of the Navy (DON) Financial Improvement Program, during FY 2006 Navy completed a fence to fence survey of all installations and began reporting the results 1<sup>st</sup> Quarter, FY 2007. Therefore, there is no comparative 3<sup>rd</sup> Quarter, FY 2006 data.

	2007	2006
(Amounts in thousands)		
<b>Environmental Disposal for Weapon Systems Programs - Other</b>	\$3,237,406,105	\$3,237,406,105

The “Other” type of environmental liabilities under Disposal for Weapons Systems Programs (Line 1.D.6) represents Spent Nuclear Fuel, which is the used fuel that is removed from the nuclear reactors of nuclear powered ships and submarines. The estimate includes shipping, processing, and storing the Spent Nuclear Fuel.

In addition to the liabilities reported above, DON has the potential to incur costs for restoration initiatives in conjunction with returning overseas Defense facilities to host nations. The DON is unable to provide a reasonable estimate at this time because the extent of restoration required is not known.

### 1. Applicable Laws and Regulations of Cleanup Requirements

The following is a summary of significant laws that affect DON’s conduct of environmental policy and regulations.

The National Environmental Policy Act (NEPA) of 1970 requires DON to consider the environmental impacts of proposed actions in the decision making process. Per DON regulations, the action proponent will determine the level or amount of NEPA documentation required. The Resource Conservation and Recovery Act (RCRA) of 1976 as amended by the Hazardous and Solid Waste Amendments of 1984, was the first comprehensive federal effort to deal with safe disposal of all types of hazardous wastes, and provides for “cradle to grave” tracking of hazardous wastes. Permits are required for treatment, storage, or disposal. Requirements for underground storage tanks are also contained in RCRA.

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), commonly referred to as the Superfund legislation, provided Federal agencies authority to respond to the release or the substantial threat of release of hazardous substances into the environment. CERCLA was amended several times; one of which was the Superfund Amendments and Reauthorization Act of 1986. It established procedures to ensure that actual or threatened hazardous substance releases have proper responses. Another amendment to CERCLA was the Community Environmental Response Facilitation Act of 1992. The DON must identify real property on each facility that is not contaminated and that offers the greatest opportunity for expedited reuse and redevelopment. When property is transferred, DON is still

responsible for any remediation or corrective action or any response action found to be necessary after the transfer.

The Clean Water Act (CWA) of 1977, Section 405 Disposal of Sewage Sludge, amended the Federal Water Pollution Control Act. The purpose of CWA is to restore and maintain the integrity of the nation's waters and the implementing regulations established closure and post closure requirements for sewage sludge disposal. To help protect the nation's drinking water supply, including underground injections through a permitting scheme, the Safe Drinking Water Act of 1974 (Well Head Protection Areas) was created. The Clean Air Act of 1990 established standards/limitations to prevent and control air pollutant discharges that could harm human health and natural resources. Requirements ensure that units can no longer operate when they are shut down. Finally, the Toxic Substances Control Act of 1976 was implemented to understand the health risks of chemical substances by developing production and health risk data from the manufacturers. The control of PCBs is a good example.

For the nuclear powered aircraft carriers and submarines, other nuclear powered ships, and spent nuclear fuel, the following significant laws affect DON's conduct of environmental policy and regulations. The Atomic Energy Act of 1954, as amended, assures the proper management of source, special nuclear, and byproduct material. As in all cases with nuclear power, DON coordinates all actions with the Department of Energy (DOE). The Nuclear Waste Policy Act of 1982 required all owners and generators of high-level nuclear waste and spent nuclear fuel to pay their respective shares of the full cost of the program. Finally, the Low Level Radioactive Waste Policy Amendments Act of 1986 provides for the safe and efficient management of low-level radioactive waste.

## **2. Methods for Assigning Total Cleanup Costs to Current Operating Periods**

Accrued Environmental Restoration (Defense Environmental Restoration Program (DERP) Funded Liabilities).

Active Installations – Environmental Restoration: Accrued restoration (cleanup) liabilities represent the cost to correct past environmental areas that are funded under the Defense Environmental Restoration Program in accordance with “Management Guidance for DERP,” and “Environmental and Non-Environmental Liabilities,” Chapter 13 of Volume 4 of Department of Defense Financial Management Regulation (DoD FMR). These liabilities relate to Plant, Property, and Equipment, including acquired land and Stewardship Land, as those major asset categories are described in Chapter 6 of Volume 4 of DoD FMR. Environmental restoration activities may be conducted at operating installations, at Formerly Used Defense Sites, and at Closed, Transferred, and Transferring Ranges. Environmental restoration measurements involve the use of cost estimates that consider, on a current cost basis, the anticipated costs of the level of effort required to affect the restoration, as well as applicable legal and/or regulatory requirements. Program management and support costs are included in the estimates. The estimates are based on DON's cost-to-complete (CTC) module of the Normalization of Data System (NORM). Verification, validation, and accreditation of CTC module was completed in FY 2002. Such cost estimates are based on the current technology available. The DON, as the baseline for environmental restoration (cleanup) liability measurement (i.e., the current cost to acquire the required services), used the site inventory and estimated cost data prepared for DERP report to the Congress. The Accrued Environmental Restoration (Cleanup) Costs do not include the costs of environmental compliance; pollution prevention, conservation activities, contamination, or spills associated with current operations

or treaty obligations, all of which are accounted for as part of ongoing operations. The DON Environmental Restoration Program includes 3,704 clean-up sites at active installations while those installations covered by Base Realignment and Closure (BRAC) funding include 1,148 clean-up sites. The Marine Corps is included in these programs. In addition, the DON Environmental Corrective Action Program at BRAC installations includes 610 sites.

**Active Installations – Military Munitions Response Program:** This area represents the environmental liabilities associated with the identification, investigation and removal and remedial actions to address environmental contamination at ranges that were closed prior to September 30, 2002. The contamination may include munitions, chemical residues from military munitions and munitions scrap at ranges on active installations that pose a threat to human health or the environment. The amount reported is the portion of the liability that can be estimated based on site level investigations and characterizations. The estimate produced is based on site-specific information and use of cost models validated in accordance with DoD Instruction 5000.61, "DoD Modeling and Simulation, Verification, Validation, and Accreditation" of May 2003. Total liabilities (CTC) are not estimated until there is sufficient site-specific data available to estimate the total liability. However, DON uses the cost of the study as the estimate until the study is completed. Beginning in FY 2001, DON began an inventory of closed ranges and transferring ranges under the Military Munitions Response Program (MMRP) or Unexploded Ordnance (UXO) program and completed it in September 2002. Currently there are 221 closed ranges at active installations and 28 sites (transferring ranges) at BRAC installations.

**Environmental Disposal for Weapons Systems Programs:** This area represents environmental liabilities associated with the Nuclear Powered Aircraft Carriers and Submarines, Other Nuclear Powered Ships, Conventional Ships, and Spent Nuclear Fuel. During FY 2006, under DON Financial Improvement Program (FIP), DON completed a review of the estimating methodology for determining the cost for disposal of ships and submarines. This review resulted in an environmental and nonenvironmental liability estimate that more accurately reflects the true costs of disposal. The estimating methodology is based on average cost per class of ship rather than an average applied to all ships regardless of class. This change in estimating methodology was implemented during 3<sup>rd</sup> Quarter, FY 2006 and resulted in an overall decrease in the estimated environmental liability for Nuclear Powered Ships and Submarines and Conventional Ships. However, this decrease was offset by recognizing an estimated liability for spent nuclear fuel beginning in 3<sup>rd</sup> Quarter, FY 2006.

### **3. Description of the Types of Environmental Liabilities and Disposal Liabilities**

#### **Accrued Environmental Restoration (DERP Funded) Liabilities.**

The DON Environmental Restoration includes those sites that have been identified as legacy cleanup sites. For 3<sup>rd</sup> Quarter, FY 2007, DON estimated and reported \$3.1 billion for environmental restoration liabilities. This amount is comprised of \$2.3 billion in Active Installations – Installation Restoration Program (IRP) liabilities and \$794.5 million in Active Installations – MMRP, liabilities, which represents UXO. The DoD FMR, Volume 6B, Chapter 10 requires that "any estimate produced must be based on site specific information and use cost models validated in accordance with DoD Instruction 5000.61." The DON is supporting this requirement by continuing to validate its range inventory as well as by pursuing the process of obtaining valid cost estimates for each range.

#### Other Accrued Environmental Costs (Non-DERP funds).

The DON defines Non-DERP environmental units as those sites associated with on-going operations such as solid waste management unit cleanup, landfill closure, permitted facilities, removal, replacement, retro fill, and/or disposal of PCBs transformers, underground storage tank remedial investigation and closure. As part of the DON FIP efforts, the Navy completed surveying, identifying, and estimating, Non-DERP units and began recognizing the estimated environmental liability 1<sup>st</sup> Quarter, FY 2007. For 3<sup>rd</sup> Quarter, FY 2007, the total Other Accrued Environmental Liabilities is \$864.4 million. Of the total, the Navy portion is \$638.0 million while the Marine Corps portion is \$226.4 million.

#### Base Realignment and Closure.

BRAC environmental sites are environmental sites at DON installations that are or will be closed under the congressionally mandated BRAC process. For 3<sup>rd</sup> Quarter, FY 2007, DON estimated and reported \$2.0 billion for BRAC funded environmental restoration liabilities. This amount includes \$1.7 billion for IRP, \$148.6 million for MMRP, and \$81.1 million for environmental corrective action and closure requirements. MMRP includes military munitions, chemical residues from military munitions, and munitions scrap at locations on or associated with a military range on a BRAC installation.

#### Environmental Disposal for Weapons Systems Programs.

Environmental Disposal for Weapons Systems are those estimates associated with the environmental disposal costs for DON Nuclear Weapons Programs that includes Nuclear Powered Aircraft Carriers and Submarines and Other Nuclear Powered Ships, Conventional Ships, and Spent Nuclear Fuel. The DON reported an environmental disposal liability for Weapons Systems Programs of \$13.1 billion in 3<sup>rd</sup> Quarter, FY 2007. This amount includes Nuclear Powered Aircraft Carriers of \$5.7 billion, Nuclear Powered Submarines of \$3.7 billion, Other Nuclear Powered Ships of \$293.4 million, Other National Defense Weapons Systems (Conventional Ships) of \$207.8 million, and Spent Nuclear Fuel (Other) of \$3.2 billion.

#### **4. Nature of Estimates and the Disclosure of Information Regarding Possible Changes due to Inflation, Deflation, Technology, or Applicable Laws and Regulations**

For both current and prior periods, the changes due to price growth (inflation) and increases in labor rates and materials have been offset by a change in the estimating methodology for weapons systems. This change in estimating methodology resulted in an overall decrease in the estimated environmental disposal liability. However, this decrease was offset by recognizing an estimated liability for spent nuclear fuel beginning with 3<sup>rd</sup> Quarter, FY 2006. Currently, there are no indications that any of the environmental liabilities for any category will be adjusted due to deflation. As of 3<sup>rd</sup> Quarter, FY 2007, there are no changes to the environmental liability estimates due to changes in laws, regulations, and in agreements with regulatory agencies. The DON does not have any estimates that were changed due to advances in technology.

#### **5. Description of the Level of Uncertainty Regarding the Accounting Estimates used to calculate the Reported Environmental Liabilities**

The environmental liabilities for DON are based on accounting estimates that require certain judgments and assumptions that DON believes are reasonable based upon information available to us at the time of calculating the estimates. The actual results may vary materially from the accounting estimates if agreements with regulatory agencies require remediation to a

different degree than anticipated when calculating the estimates. The liabilities can be further impacted if further investigation of the environmental sites discloses contamination different than known at the time of the estimates.

Overall, DON has a reasonable level of confidence in the estimates recognized on the face of the financial statements. This reasonable level of confidence in the estimates is because the estimates for DERP/BRAC programs are based on the CTC module of the NORM System. A verification, validation, and accreditation were completed by a third party for CTC module of NORM, while the environmental program managers continue to validate the data.

For the Weapons systems, the environmental program managers base their environmental disposal estimates on actual costs for similar projects. A change in the overall methodology in weapons systems reflects a more accurate estimate of what it will cost to dispose of the weapons systems. Given the fact that the planned date for opening DOE's planned waste repository has been delayed, there is uncertainty associated with the estimate for spent nuclear fuel. As DOE's plans are solidified, DON's estimates for spent nuclear fuel will change accordingly.

The DON believes that the current environmental liabilities for BRAC are reasonable, based upon information available at the time in calculating the estimates. However, as the FY 2005 BRAC closure activities are implemented over the next several fiscal years, the actual results may vary materially from the required accounting estimates. The variance will depend on additional information gleaned from planned or ongoing studies of the extent and concentration of site environmental contamination. In addition to the possibility of the estimates changing on current identified sites, DON may incur additional environmental cleanup and restoration costs if new sites are identified as BRAC activities are implemented.

The DON believes that the environmental liabilities for Other Accrued Environmental Liabilities (Non-DERP) for 3<sup>rd</sup> Quarter, FY 2007 are reasonable, based upon the information available at the time in calculating the estimates and completing the fence to fence survey. However, as internal controls are implemented to sustain this effort, changes to some of the estimates could occur. In addition to the possibility of some of the estimates changing for the current list of identified units, DON may incur additional units and changes to estimates as the inventory of units are reviewed annually.

<b>Environmental Disclosures</b>
----------------------------------

As of June 30	2007	2006
A. The unrecognized portion of the estimated total cleanup costs associated with general property, plant, and equipment.	1,521,548,185.92	1,423,683,246.76
B. Changes in total cleanup costs due to changes in laws, regulations, and/or technology.	0.00	0.00
C. Portion of the changes in estimated costs due to changes in laws and technology that is related to prior periods.	0.00	0.00

Line A. The unrecognized portion of the estimated total cleanup costs is associated with Nuclear Powered Carriers and Submarines, Conventional Ships, Spent Nuclear Fuel, and Non-DERP. Of the total \$1.5 billion, \$1.4 billion is associated with Nuclear Powered Carriers and Submarines and Spent Nuclear Fuel, \$42.4 million is associated with conventional ships while the remainder of \$70.4 million is associated with Non-DERP. In addition, DON began recognizing and accruing environmental liabilities (Non-DERP) associated with assets placed in service after September 30, 1997 in 1<sup>st</sup> Quarter, FY 2007 that also contributed to the increase.

Lines B. and C. Through our quarterly data call process, for 3<sup>rd</sup> Quarter, FY 2007, DON determined that there are no changes to the environmental liability estimates due to changes in laws, regulations, in agreements with regulatory agencies, and advances in technology.

## Standard Disclosures

Nonfederal Other Liabilities includes Contingent Liabilities of \$318.7 million for estimated future contract financing payments that will be paid to the contractor upon delivery and Government acceptance of a satisfactory product. In accordance with contract terms, specific rights to the contractor's work vests with the Government when a specific type of contract financing payments is made; thereby protecting taxpayer funds in the event of contract nonperformance. These rights should not be misconstrued as the rights of ownership. The Department of the Navy (DON) is under no obligation to pay the contractor for amounts greater than the amounts authorized in the contract until delivery and Government acceptance of a satisfactory product. As it is probable that the contractor will complete its efforts and deliver a satisfactory product, and the amount of potential future payments are estimable; the DON has recognized a contingent liability for estimated future payments, which are conditional pending delivery and Government acceptance of a satisfactory product.

### Intragovernmental Other Liabilities - Other (Line 1.F).

Other Liabilities - Other consists primarily of a liability to the U.S. Treasury. The liability represents principal and accrued interest associated with pending litigation.

### Nonfederal Other Liabilities - Other Liabilities - Other (Line 2.D).

Other Liabilities - Other consists primarily of estimated legal contingent liabilities and outstanding contract financing contingent liabilities.

### Methodology used for Estimated Legal Contingent Liabilities.

Due to the inherent uncertainties of litigation, lawyers generally refrain from expressing judgments as to outcomes except in those relatively few clear cases. In response to a Department of Defense, Inspector General Audit, "DoD Process for Reporting Contingent Legal Liabilities," DON developed a methodology to determine an estimate for contingent legal liabilities. Beginning with 1<sup>st</sup> Quarter, FY 2007 DON recognized and disclosed an estimate for contingent legal liabilities. The methodology considers the likelihood of an unfavorable outcome or potential liability is provided as an overall assessment of all cases currently pending and not on an individual case basis. The likelihood of an unfavorable or potential liability was determined by using an average of the data from the preceding three years and the current year-to-date. The total dollar amount of the cases closed was divided by the total dollar amount claimed in those closed cases for each of the last three years plus current quarter, which were then used to calculate the average. This average represents the percentage that has historically been paid on claims. It is based entirely on historical data. The merits of each individual case have not been taken into consideration. Until sufficient historical data can be collected for the Navy Working Capital Fund, the estimate will consider all DON funding sources together. The estimate for those cases considered probable to result in an adverse judgment against DON is \$1.4 billion.

<b>3. Capital Lease Liabilities Not Covered by Budgetary Resources</b>				\$ 0.00	\$ 0.00	

**Note 16. Commitments and Contingencies****Standard Disclosure**

The Department of the Navy (DON) is a party in various administrative proceedings and legal actions, with claims including environmental damage claims, equal opportunity matters, and contractual bid protests which may ultimately result in settlements or decisions adverse to the Federal Government. These proceedings and actions arise in the normal course of operations and their ultimate disposition is unknown. The DON will accrue contingent liabilities for legal actions in those instances where DON's Office of General Counsel considers an adverse decision probable and the amount of loss is measurable. In the event of an adverse judgment against the Government, some of the liabilities may be payable from the Judgment Fund. Others may be payable from DON's resources, either directly or by reimbursement to the Judgment Fund. The DON records Judgment Fund liabilities in Note 11, "Liabilities not Covered by Budgetary Resources," and Note 12, "Accounts Payable." See Notes 11 and 12 for details.

The DON currently has sixteen cases; fifteen against the Navy and one against the United States Marine Corps, that meet the existing FY 2006 DON General Fund (GF) materiality threshold of \$56.1 million. DON legal counsel was unable to express an opinion concerning the likely outcome of these sixteen cases. Based on information contained in the FY 2006 preliminary and final Legal Representation Letters, management does not have sufficient reason to believe that it is likely that the Government will be liable for the amounts claimed in individual or aggregated cases.

For FY 2007, DON GF materiality threshold for reporting litigation, claims, or assessments is \$64.4 million. The Office of Navy General Counsel conducts a review of litigation and claims threatened or asserted involving DON General Fund to which Office of General Counsel attorneys devoted substantial attention in the form of legal consultation or representation. However, the FY 2007 preliminary and final Legal Representation letters are not due until the 4<sup>th</sup> Quarter.

Due to the inherent uncertainties of litigation, lawyers generally refrain from expressing judgments as to outcomes except in those relatively few clear cases. In response to a Department of Defense (DoD), Inspector General Audit, "DoD Process for Reporting Contingent Legal Liabilities," DON developed a methodology to determine an estimate for contingent legal liabilities. Beginning with 1<sup>st</sup> Quarter, FY 2007 DON recognized and disclosed an estimate for contingent legal liabilities. The methodology considers the likelihood of an unfavorable outcome or potential liability is provided as an overall assessment of all cases currently pending and not on an individual case basis. The likelihood of an unfavorable or potential liability was determined by using an average of the data from the preceding three years and the current year-to-date. The total dollar amount of the cases closed was divided by the total dollar amount claimed in those closed cases was divided by the total dollar amount claimed in those closed cases for each of the last three years plus current quarter which were then used to calculate the average. This average represents the percentage that has historically been paid on claims. It is based entirely on historical data. The merits of each individual case have not been taken into consideration. Until

sufficient historical data can be collected for the Navy Working Capital Fund, this estimate will consider all DON funding sources together.

The estimate for those cases considered reasonably possible to result in an adverse judgment against DON is \$4.3 billion. An estimate of \$1.4 billion for contingent legal liabilities that are probable to result in an adverse judgment in the amount has been recognized in Note 15.

The DON is a party in numerous individual contracts with escalation, price redetermination, or incentive clauses; contracts authorizing variations in quantities; and contracts where allowable interest may become payable based on contractor claims under the "Disputes" clause contained in contracts. Currently, DON does not have a documented process or standard contracting systems that capture the related amounts for those special contract clauses, across the entire universe of DON contracts, and therefore we cannot determine specific amounts at this time.

The DON has recorded in Note 15 a contingent liability in the amount of \$37.3 million for obligations related to cancelled appropriations.

The DON has recorded in Note 15 a contingent liability in the amount of \$149.2 million for Contract Incentives.

<b>4. Total Military Retirement and Other Federal Employment Benefits:</b>	\$ 1,519,670,441.50		\$ (6,026,547.13)	\$ 1,513,643,894.37	\$ 1,532,819,451.36

Actuarial Cost Method Used:

Assumptions:

Market Value of Investments in Market-based and Marketable Securities:

**Standard Disclosures**Military Retirement Pensions.

The portion of the military retirement benefits actuarial liability applicable to the Department of the Navy (DON) is reported on the financial statements of the Military Retirement Fund.

Military Retirement Health Benefits.

Health benefits are funded centrally at the Department of Defense (DoD) level. As such, the portion of the health benefits actuarial liability that is applicable to DON is reported on the DoD Agency-wide and the Medicare-Eligible Retiree Health Care Fund financial statements.

Federal Employees' Compensation Act.

Actuarial Cost Method Used and Assumptions:

The DON's actuarial liability for workers' compensation benefits is developed by the Department of Labor and provided to DON only at the end of each fiscal year. The liability for future workers'

compensation benefits includes the expected liability for death, disability, medical, and miscellaneous costs for approved compensation cases, plus a component for incurred but not reported claims. The liability is determined using a method that utilizes historical benefit payment patterns related to a specific incurred period to predict the ultimate payments related to that period. Consistent with past practice, these projected annual benefit payments have been discounted to present value using the Office of Management and Budget's economic assumptions for 10-year U.S. Treasury notes and bonds. Interest rate assumptions utilized for discounting were as follows:

FY 2006

5.170 % in Year 1

5.313 % in Year 2 and thereafter

To provide more specifically for the effects of inflation on the liability for future workers' compensation benefits, wage inflation factors (cost of living adjustments or COLAs) and medical inflation factors (consumer price index medical or CPIMs) were applied to the calculation of projected future benefits. The actual rates for these factors for the charge back year (CBY) 2006 were also used to adjust the methodology's historical payments to current year constant dollars.

The compensation COLAs and CPIMs used in the projections for various CBYs were as follows:

<u>CBY</u>	<u>COLA</u>	<u>CPIM</u>
2006	3.50%	4.00%
2007	3.13%	4.01%
2008	2.40%	4.01%
2009	2.40%	4.013%
2010+	2.43%	4.09%

The model's resulting projections were analyzed to ensure that the estimates were reliable. The analysis was based on four tests: (1) a sensitive analysis of the model to economic assumptions, (2) a comparison of the percentage change in the liability amount by agency to the percentage change in the actual incremental payments, (3) a comparison of the incremental paid losses per case (a measure of case-severity) in CBY 2006 to the average pattern observed during the most current three CBYs, and (4) a comparison of the estimated liability per case in the 2006 projection to the average pattern for the projections of the most recent three years.

Other Federal Employment Benefits

Other federal employment benefits (Line 3) consist primarily of voluntary separation incentive pay for former employees.

<b>Note 18.</b>	<b>General Disclosures Related to the Statement of Net Cost</b>

<b>6. Total Earned Revenue</b>	<b>\$ (4,044,289,494.11)</b>	<b>\$ (2,576,743,681.58)</b>
<b>7. Net Cost of Operations</b>	<b>\$ 107,609,607,558.95</b>	<b>\$ 93,684,713,491.47</b>

### Standard Disclosures

Intragovernmental costs and revenues are related to transactions made between two reporting entities within the Federal Government.

Public costs and revenues are exchange transactions made between the Department of the Navy (DON) and a nonfederal entity.

The Statement of Net Cost is unique because its principles are driven on understanding the net cost of programs and/or organizations that the Federal Government supports through appropriations or other means. This statement provides gross and net cost information that can be related to the amount of output or outcome for a given program and/or organization administered by a responsible reporting entity.

The DON's financial management systems are unable to meet all of the requirements for full accrual accounting. Many of DON's financial and nonfinancial feeder systems and processes were designed and implemented prior to the issuance of Generally Accepted Accounting Principles (GAAP) for federal agencies. These systems were not designed to collect and record financial information on the full accrual accounting basis as required by GAAP. Most of DON's legacy systems were designed to record information on a budgetary basis. Considering these systems limitations, the DON is unable to compare its intragovernmental costs and revenues with the corresponding balances of its intragovernmental trading partners.

The DON has undertaken efforts to determine the actions required to bring its financial and nonfinancial feeder systems and processes into compliance with all elements of GAAP. One such action is the revision of its accounting systems to record transactions based on the U.S. Standard

General Ledger. Until such time as all of the DON's financial and nonfinancial feeder systems and processes are updated to collect and report financial information as required by GAAP, DON's financial data will be largely based on budgetary transactions (obligations, disbursements, and collections), transactions from nonfinancial feeder systems, and adjustments for known accruals of major items such as payroll expenses, accounts payable, and environmental liabilities.

Heritage Asset Disclosure.

The DON's accounting systems do not capture information relative to Heritage Assets separately and distinctly from normal operations.

### Standard Disclosures

Appropriations Received on the Statement of Changes in Net Position (SCNP) does not agree with Appropriations Received on the Statement of Budgetary Resources (SBR) due to differences between proprietary and budgetary accounting concepts and reporting requirements. The difference of \$14.0 million is due to the values for Trust Funds and Special Receipt Accounts not being included in the Appropriations Received line of SCNP. Refer to Note 20 for additional details.

Statement of Federal Financial Accounting Standards Number 27, "Identifying and Reporting Earmarked Funds," effective for reporting years after FY 2005, required that the Department of Defense (DoD) modify the SCNP. The Federal Accounting Standards Advisory Board determined that restatement of prior comparative balances would not be allowed. To meet the requirement, additional columns were added to separately display gross amounts for earmarked funds and all other (non-earmarked) funds. On the SCNP, all offsetting balances (i.e. transfers-in and transfers-out, revenues and expenses) for intra-Department of the Navy (DON) activity between earmarked and other (non-earmarked) funds are reported on the same lines. This results in an eliminations column, which appears to contain no balances. In reality, the column contains all appropriate elimination entries, but all net to zero within each respective line.

The Earmarked Cumulative Results of Operations ending balance on the SCNP does not agree with the Earmarked Cumulative Results reported on the Balance Sheet because the cumulative results on the Balance Sheet are presented net of eliminations.

Imputed Financing.

The amounts DON remits to the Office of Personnel Management (OPM) by and for employees covered by the Civil Service Retirement System, the Federal Employees' Retirement System, the Federal Employees' Health Benefits program, and the Federal Employees' Group Life Insurance program do not fully cover the government's cost to provide these benefits. An imputed cost is recognized as the difference between the government's cost of providing these benefits to employees and DON's contributions for them. The OPM provides the cost factors to the Defense Finance and Accounting Service (DFAS) for the computation of imputed financing costs. These costs are provided by DFAS to the Office of the Under Secretary of Defense (Personnel and Readiness) for validation and approval. The approved imputed costs are then provided to the DoD reporting entities for inclusion in their financial statements.

Description of Other Lines on the SCNP.

Other Financing Sources – Other (Line 5.D) reflects the correction of an error in the Military Construction account that occurred in 4<sup>th</sup> Quarter, FY 2005. This error was corrected in 2<sup>nd</sup> Quarter, FY 2007 and will not have any future impact. This error occurred because unfilled customer orders with advances were inadvertently excluded from the calculation of revenue in the financial statement compilation process.

Other Adjustments (Line 13.C) reflects reductions to budget authority and rescissions in accordance with Public Law.

<b>Note 20.</b>	<b>Disclosures Related to the Statement of Budgetary Resources</b>
-----------------	--

As of June 30	2007	2006
1. Net Amount of Budgetary Resources Obligated for Undelivered Orders at the End of the Period	\$ 93,244,717,283.56	\$ 86,291,680,066.61
2. Available Borrowing and Contract Authority at the End of the Period	0.00	0.00

**Standard Disclosures**Apportionment Categories for Obligations Incurred.

On the Statement of Budgetary Resources (SBR): Obligations Incurred includes \$129.5 billion of Direct Program Obligations and \$5.2 billion of Reimbursable Program Obligations.

On the Report on Budget Execution (SF-133):

- Direct Obligations, Category A, amounts apportioned quarterly, are \$63.6 billion.
- Direct Obligations, Category B, amounts apportioned on a basis other than quarterly, are \$66.1 billion.
- Total Direct Obligations are therefore \$129.7 billion.
- The reason for the \$185.6 million difference in direct obligations between the SBR and SF-133 is that adjustments recorded on the SBR to recognize fringe benefit accruals, the reclassification from reimbursable obligations noted below, and recognize other adjustments that are not captured in the field accounting systems.
- Category B Reimbursable Obligations are \$5.4 billion.
- The reason for the \$154.7 million difference in reimbursable obligations between the SBR and SF-133 is that reclassification adjustments recorded on the SBR to reconcile to trading partner data.

Intraentity Transactions.

Intraentity transactions have not been eliminated because the statements are presented as combined and combining.

Permanent, Indefinite Appropriations.

Department of Navy (DON) has two permanent, indefinite appropriations.

National Defense Sealift Fund (NDSF).

The NDSF is operated under the authority of 10 U.S. Code 2218, which provides for the construction (including design of vessels), purchase, alteration, and conversion of Department of Defense (DoD) sealift vessels; operation, maintenance, and lease or charter of DoD vessels for national defense purposes; installation and maintenance of defense features for national defense purposes on privately owned and operated vessels that are constructed in the United States and documented under the laws of the United States; research and development relating to national

defense sealift; and expenses for maintaining the National Defense Reserve Fleet, including the acquisition, alteration or conversion of vessels. As of 3<sup>rd</sup> Quarter, FY 2007, one transfer for \$11.6 million from NDSF to Shipbuilding and Conversion, Navy appropriation was recorded; no transfers to NDSF occurred.

Environmental Restoration, Navy (ER, N).

The ER, N is a transfer account that funds environmental restoration, reduction, and recycling of hazardous waste, removal of unsafe buildings and debris, and similar purposes. Funds are to remain available until transferred and remain available for the same purpose and same time period as the appropriations to which transferred. As of 3<sup>rd</sup> Quarter, FY 2007 one transfer from ER, N for \$301.5 million to the Operations and Maintenance, Navy appropriation was recorded; no transfers to ER, N occurred.

In terms of obligations, differences exist between the SF-133 and the SBR for a number of reasons; including accruals recorded for fringe benefits, liabilities recorded for the Judgment Fund, and accruals recorded for trading partner advances and liabilities.

Appropriations Received on the SCNP does not agree with Appropriations Received on the SBR due to differences between proprietary and budgetary accounting concepts and reporting requirements. The difference of \$14.0 million is due to the values for Trust Funds and Special Receipt Accounts not being included in the Appropriations Received line of SCNP.

Unobligated budget authority is the difference between the obligated balance and the total unexpended balance. It represents that portion of the unexpended balance unencumbered by recorded obligations. Appropriations are provided on an annual, multi-year, and no-year basis. An appropriation expires on the last day of its period of availability and is no longer available for new obligations when in an expired status. Unobligated balances retain their fiscal year identity in an expired account for an additional five fiscal years. The unobligated balance remains available to make legitimate obligation adjustments, i.e., to record previously unrecorded obligations and to make upward obligation adjustments in previously underestimated obligations for five years. At the end of the fifth year, the budget authority is canceled. Thereafter, the budget authority is not available for any purpose.

Information about legal limitations and restrictions affecting the use of the unobligated balance of budget authority is specifically stated by program and fiscal year in the applicable appropriation language or in the alternative provisions section at the end of the appropriations act.

<b>Note 21.</b>	<b>Disclosures Related to the Statement of Financing</b>
-----------------	--

**Standard Disclosures**

The Statement of Financing (SOF) is designed to provide information about the total resources used by an entity, to explain how those resources were used to finance orders for goods and services not yet delivered, to acquire assets and liabilities, and to fund the entity's net cost of operations. It is designed to report the differences and facilitate the reconciliation of accrual based amounts used in the Statement of Net Cost (SNC) and obligation-based amounts used in the Statement of Budgetary Resources. The computations and presentation of items in the SOF demonstrate that the budgetary and proprietary information in an entity's financial management system is in agreement.

Due to Department of the Navy (DON) financial system limitations, budgetary data is not in agreement with proprietary expenses and assets capitalized. Differences between budgetary and proprietary data are a previously identified deficiency. This causes a difference in net cost between the SNC and the SOF that requires an adjustment to the SOF. For 3rd Quarter, FY 2007, an adjustment of \$59.1 million was made to Resources that Finance the Acquisition of Assets of the SOF so that proprietary accounts reconcile with the budgetary accounts.

The increase in resources that finance the acquisition of assets is primarily due to the implementation of SFFAS No. 23, "Eliminating the Category of National Defense Property, Plant, and Equipment." Correspondingly, there is also an increase in the reported depreciation for military equipment.

The SOF is presented as a consolidated statement. However, the following SOF lines are presented as combined instead of consolidated due to interagency budgetary transactions not being eliminated:

- Obligations Incurred
- Less: Spending Authority from Offsetting Collections and Recoveries
- Obligations Net of Offsetting Collections and Recoveries
- Less: Offsetting Receipts
- Net Obligations
- Undelivered Orders
- Unfilled Customer Orders

Description of Other Lines on the SOF.

Resources Used to Finance Activities – Budgetary Resources Obligated --

The balance of \$40.1 million reflects the correction of an error in the Military Construction account that occurred in 4<sup>th</sup> Quarter, FY 2005. This error was corrected in 2<sup>nd</sup> Quarter, FY 2007 and will not have any impact in future years. This error occurred because unfilled customer orders with advances were inadvertently excluded from the calculation of revenue in the compilation process.

Resources Used to Finance Items not Part of the Net Cost of Operations --

The balance of \$28.9 million reflects the value of donated fuel, and transfers of Construction-in-Progress and other assets from DoD Components. These are offset by the correction of the error in the Military Construction account noted above.

Components Requiring or Generating Resources in Future Periods --

The balance of \$3.2 billion consists primarily of an estimate for potential legal liabilities, and employment related liabilities.

Components not Requiring or Generating Resources --

The balance of \$48.3 million consists primarily of the value of donated fuel and the transfer of assets without reimbursement from other DoD Components. The fuel was donated by other nations to the United States military in support of the Global War on Terror.

The total components requiring or generating resources in future periods reflected on the SOF is \$6.6 billion in 3<sup>rd</sup> Quarter, FY 2007. This amount, in addition to the estimate for potential contingent legal liabilities, reflects changes in accruals of unfunded liabilities which included but are not limited to; unused annual leave, environmental and non environmental disposal, litigation, Federal Employees' Compensation Act, unemployment compensation, canceled year accounts payable, and contract incentives. The increase of \$1.9 billion since 4<sup>th</sup> Quarter FY 2006 in Liabilities Not Covered by Budgetary Resources on the Balance Sheet, Note 11, (Line 3) resulted in a difference of \$4.7 billion. This difference includes the aforementioned items and liabilities to U.S. Treasury for nonentity accounts receivable of DON. Collections on nonentity receivables would not require or generate resources for DON as they are deposited at U.S. Treasury and belong to the general cash balances of the United States Government.

**Standard Disclosures**

Earmarked funds are financed by specifically identified revenues and are required by statute to be used for designated activities or purposes. The Department of the Navy (DON) has seven earmarked funds. Four are categorized as Special Funds and three are categorized as Trust Funds. A list of these earmarked funds and a brief description of each follows below. There have been no changes in legislation during or subsequent to the reporting period that significantly changes the purpose of any of the seven funds or that redirects a material portion of the accumulated balances of any of the seven funds. Generally, revenues for the DON's earmarked funds are inflows of resources to the Government.

Special Earmarked Funds.

Wildlife Conservation, Military Reservations, Navy --

This fund, authorized by 16 United States Code 670b, provides for the development and conservation of fish and wildlife and recreational facilities on military installations. Proceeds from the sale of fishing and hunting permits are used for these programs at Navy and Marine Corps installations charging such user fees. These programs are carried out through cooperative plans agreed upon by the local representatives of the Secretary of Defense, the Secretary of the Interior, and the appropriate agency of the State in which the installation is located.

Kaho'olawe Island Conveyance, Remediation and Environmental Restoration Fund, Navy --

This fund, authorized by 107 Statute 1483, was established to recognize and fulfill the commitments made on behalf of the United States to the people of Hawaii and to return to the State of Hawaii the Island of Kaho'olawe. Congress has found it to be in the national interest and an essential element in the federal government's relationship with the State of Hawaii the conveyance, clearance, or removal of unexploded ordnance, environmental restoration, control of access to the Island and future use of the Island be undertaken in a manner consistent with the enhancement of that relationship, the Department of Defense's military mission, the federal interest, and applicable provisions of law.

Roosmoor Liquidating Trust Settlement Account --

The Roosmoor Liquidating Trust account was established by Section 2208 of Public Law 104-106; the National Defense Authorization Act of 1996. Per the statute, monies awarded the United States when litigation is settled in favor of the Roosmoor Liquidating Trust is deposited into this account. The

monies are made available to DON solely for the acquisition or construction of military family housing in, or in the vicinity of San Diego, California.

#### Ford Island Improvement Account --

The Ford Island Improvement fund is authorized by 10 United States Code 2814 and was established to carry out improvements to property and facilities that will deliver overall benefits to DON at the Pearl Harbor Naval Complex at Ford Island, Hawaii. Ford Island is a central feature in the Pearl Harbor National Historic Landmark. The Ford Island legislation allows DON to sell or lease properties in Hawaii and use the proceeds to develop Ford Island.

#### Trust Earmarked Funds.

##### DON General Gift Fund --

This trust fund is authorized by 10 United States Code 2601. Under the provisions of this statute, the Secretary of the Navy may accept, hold, administer, and spend any gift, devise, or bequest of real or personal property, made on the condition that they be used for the benefit, or in connection with the establishment, operation, or maintenance of a school, hospital, library, museum, cemetery, or other institution under the jurisdiction of the DON.

##### Ships Stores Profit, Navy --

This trust fund is authorized by 10 United States Code 7220. Deposits to this fund are derived from profits realized through the operation of ships' stores and from the acceptance of gifts accepted for providing recreation, amusement, and contentment for enlisted members of the Navy and Marine Corps.

##### U.S. Naval Academy General Gift Fund --

This trust fund is authorized by 10 United States Code 6973. Under the provisions of this statute, the Secretary of the Navy may accept, hold, administer, and spend any gift, devise, or bequest of personal property, made on the condition that it they used for the benefit, or in connection with the United States Naval Academy, or the Naval Academy Museum, its collections, or its services.
