1.2.1. DoD Manual 4165.63, “DoD Housing Management”;

1.2.2. Title 42 United States Code (U.S.C.), section 3374;

1.2.3. DoD Directive 4165.50E, “Homeowners Assistance Program” (HAP); and

1.2.4. Title 32 Code of Federal Regulations (CFR), Part 239 “Homeowners Assistance Program – Application Processing”

* 1.2.5. The standard general ledger accounts used to report DoD debt and illustrative entries are provided in the Transaction Library and Standard Reporting Chart of Accounts available on the Office of the Deputy Chief Financial Officer Standard Financial Information Structure web page.

2.0 TYPES OF COMPONENT DEBT

Debt incurred by DoD Components is generally associated with direct and guaranteed loans, and housing programs determined to be necessary to carry out the DoD’s mission, including mortgage agreements accepted pursuant to the Family Housing Program (FHP) and the Homeowners Assistance Fund (HAF).

*2.1 Loans and Loan Guarantees

2.1.1. The Department must pay the debt on direct loans if borrowers (e.g., foreign governments, county or city governments, ship owners, or housing builders) default. For loan guarantees, the Department must pay the amount of outstanding principal guaranteed.

2.1.2. The accounting policy for loans and loan guarantees is provided in Volume 12, Chapter 4.
2.2 Housing Program Debt

2.2.1. Family Housing Program. The Defense FHP provides military and civilian families housing referral services including administration of private rental housing for DoD personnel overseas, leasing private housing for DoD personnel, or guaranteeing service members’ rental, mortgage and mortgage insurance payments on privately owned housing. Guidance for financing the FHP is contained in Volume 2B, Chapter 6 and DoD Manual 4165.63, while guidance for accounting for funds made available for this program is contained in Volume 3, Chapter 5.

2.2.2. Homeowners Assistance Fund

2.2.2.1. Under 42 U.S.C., section 3374, the Secretary of Defense is authorized to aid owners of one- or two-family dwellings located at or near military installations ordered to be closed in whole or in part. In certain instances, this assistance is rendered by acquiring negotiated title to the properties from such owners. Section (d) of the statute established the HAF. Funding for this program is through annual appropriations made available by the Congress.

2.2.2.2. DoD Directive 4165.50E, “Homeowners Assistance Program,” (HAP) provides overall policy guidance and information on this program. The directive also specifies that detailed guidance regarding available benefits, both foreign and domestic, will be provided in the regulations published by the Secretary of the Army as the DoD Executive Agent for the HAP, and codified in 32 CFR Part 239. The Army uses the Headquarters, United States Army Corps of Engineers to implement the program.

3.0 ACCOUNTING POLICY FOR DEBT ASSOCIATED WITH HOUSING PROGRAMS

The overall accounting policy for properties acquired under both the FHP and HAP is the same as those for real property discussed in Volume 4, Chapter 24. The accounting policy for the liabilities incurred under the FHP and HAP programs is discussed in the following paragraphs.

3.1 Liability for Amounts Owed on Housing Acquired under FHP and HAP

The liability for amounts owed on housing acquired under FHP and HAP programs will be equal to (1) borrowings from other Federal Agencies and the public to construct or acquire the properties, or (2) the mortgages assumed when title passes to the DoD.

3.2 Mortgage Balance Payable Reductions

The balance of the mortgages payable will be reduced by that portion of the periodic payments made which represent the mortgage principal.

3.3 Liabilities for Borrowing from Other Organizations

Liabilities for borrowings from other Federal Agencies and non-federal organizations will be recorded at the amounts obtained. Amounts paid to financial organizations to obtain the borrowings must be treated as a current period operating expense.

CHAPTER 12
OTHER LIABILITIES

1.0 GENERAL

*1.1 Purpose

This chapter promulgates the accounting policy and related requirements that the Department of Defense (DoD) Components General Fund and Defense Working Capital Fund (DWCF) entities must follow to account for unearned revenues, contingent liabilities, and contract progress payments. These liabilities are reported on the Balance Sheet as “other liabilities” as they are often immaterial and therefore do not warrant separate reporting. See Volume 6B, Chapter 4 for financial reporting requirements for other liabilities. Each DoD Component must develop and implement internal operating procedures to implement this overarching policy in a manner that ensures accurate, complete, and relevant financial data.

1.2 Authoritative Guidance

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.2. FASAB SFFAS 5, “Accounting for Liabilities of the Federal Government”;

1.2.3. FASAB SFFAS 7, “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting”;

1.2.4. FASAB SFFAS 12, “Recognition of Contingent Liabilities Arising from Litigation: An Amendment of SFFAS 5, Accounting for Liabilities of the Federal Government”;

1.2.5. Office of Management and Budget (OMB) Circular A-11, “Preparation, Submission and Execution of the Budget”;

*1.2.6. The standard general ledger accounts used to report DoD other liabilities and illustrative entries are provided in the Transaction Library and Standard Reporting Chart of Accounts available on the Office of the Deputy Chief Financial Officer Standard Financial Information Structure web page.

1.2.7. The U.S. Department of the Treasury (Treasury) Fast Book;

1.2.8. The Treasury USSGL, a supplement of the Treasury Financial Manual (TFM).
2.0 **UNEARNED REVENUES**

2.1 **Advances and Prepayments**

2.1.1. Advances and prepayments are amounts received in advance for goods and services that will be delivered at a future date.

2.1.2. When advance fees or payments are received by DoD Components, such as for large-scale, long-term projects, revenue should not be recognized until the goods and services are provided (regardless of whether the fee or payment is refundable). When the cash is received, an increase in cash and an increase in advances and prepayments liability should be recorded in accordance with SFFAS 7.

2.1.3. Liability for advances and prepayments includes advances received that are transfers of assets from the public and other federal entities to cover future expenses or the acquisition of other assets. The DoD Components receiving an advance or prepayment must record the amount received as a liability until payment is earned (goods or services have been delivered or contract terms met). After the payment is earned (performance has occurred), the DoD Components must record the appropriate amount as revenue and reduce advances and prepayments liability accordingly.

2.1.4. The two major activities for which DoD receives advances are as follows:

2.1.4.1. **Reimbursable Activities.** DoD provides services to other federal agencies and to the public on a reimbursable basis. When a non-federal customer enters into a reimbursable agreement with DoD, the customer is required to pay for services in advance unless exempted by law. Generally, non-DoD entities are required to pay in advance.

2.1.4.2. **Defense Working Capital Funds (DWCF) Activities.** The appropriation language for DoD’s DWCF permits the fund to receive advances for supplies and services. Therefore, the DWCF business entities may be advanced funds identified in the DWCF customer orders during the fiscal year, as required, to enable the DWCF activity to pay for its costs of operation.

2.2 **Nonfiduciary Deposit Funds**

* 2.2.1. **Deposit funds are in general monies that do not belong to the Federal Government.** Nonfiduciary deposit funds are deposit funds that do not meet the definition and characteristics of fiduciary activities in SFFAS 31. While awaiting disposition, nonfiduciary deposit funds are reported separately on the entity’s financial statements.

2.2.2. **Deposit funds must be recorded as a liability because those assets do not belong to the Federal Government.** The liability includes, but is not limited to, currency and coin on hand, cash on deposit at designated depositories (excluding Disbursing Officer held cash), negotiable instruments on hand, military payment certificates, and unsupported undistributed collections. Such funds are not available for paying salaries, grants, or other expenses of the Federal Government.
2.2.3. See TFM Volume I Part 2 Chapter 150 Section 1550 for more details on deposit fund accounts.

2.2.4. See Treasury’s FAST Book for a full list of DoD deposit accounts.

2.3 Clearing Accounts

2.3.1. Clearing accounts represent amounts known to belong to the Federal Government but held temporarily in this account until additional information is collected for the disposition or reclassification of these amounts. Examples of how to use clearing accounts are:

2.3.1.1. To record unmatched transactions from the public when there is a reasonable presumption that the amounts belong to a Federal Government account other than miscellaneous receipts in the Treasury.

2.3.1.2. To record unmatched transactions between Federal agencies, including intra-governmental payment and collection transactions.

2.3.2. Refer to Chapters 2 and 3 for a discussion of the requirements for reconciling, aging, and clearing Budget Clearing Accounts.

3.0 CONTINGENT LIABILITIES

3.1 Definition and recognition of contingent liabilities

3.1.1. A contingency is an existing condition, situation, or set of circumstances involving uncertainty as to possible gain or loss to an entity. The uncertainty will ultimately be resolved when one or more future events occur or fail to occur.

3.1.2. To account for a contingency, a contingent liability should be recognized in the financial reports and statements when all of the following conditions are met:

3.1.2.1. A past event or exchange transaction has occurred (e.g., a DoD Component has breached a contract with a non-federal entity).

3.1.2.2. A future outflow or other sacrifice of resources is probable (e.g., the non-federal entity has filed a legal claim against a DoD Component for breach of contract and the Component entity’s management believes the claim is likely to be settled in favor of the claimant).

3.1.2.3. The future outflow or sacrifice of resources is measurable (e.g., the DoD Component entity's management determines an estimated settlement amount).

3.1.3. The estimated contingent liability may be a specific amount or a range of amounts. If some amount within the range is a better estimate than any other amount within the range, that amount is recognized. If no amount within the range is a better estimate than any other amount,
the minimum amount in the range is recognized, and the range and description of the nature of the contingency should be disclosed.

3.1.4. If any of the conditions identified in 3.1.1 are not met, the contingent liability need not be recognized in the DoD Components Balance Sheet but should be disclosed in the financial statement notes when it is at least reasonably possible that a loss or additional loss may have been incurred. Disclosure should include the nature of the contingency and an estimate of the possible liability, an estimate of the range of the possible liability, or a statement that such an estimate cannot be made.

3.2 Probability classifications for contingent liabilities

3.2.1. Probable. The future confirming event or events are more likely than not to occur, with the exception of pending or threatened litigation and unasserted claims. For pending or threatened litigation and unasserted claims, the future confirming event or events are presumed likely to occur.

3.2.2. Reasonably Possible. The chance of the future confirming event or events occurring is more than remote but less than probable.

3.2.3. Remote. The chance of the future event or events occurring is slight.

3.3 Legal contingencies

3.3.1. Legal contingencies arise from litigation, claims, and assessments. It is the Component management’s responsibility, with legal counsel’s advice, to assess the likelihood of adverse outcomes for legal cases and decide whether to recognize them as liabilities and to disclose them in the notes to the financial statements. The Component should obtain evidence relevant to the following factors with respect to litigation, claims, and assessments:

3.3.1.1. The existence of a condition, situation, or set of circumstances indicating uncertainty as to the possible loss to the Component arising from litigation, claims, and assessments;

3.3.1.2. The period in which the underlying causes for a legal action occurred;

3.3.1.3. The likelihood (probable, reasonably possible, or remote) of an unfavorable outcome; and

3.3.1.4. The amount or range of potential loss, if able to estimate.

3.3.2. In accordance with SFFAS 5 and SFFAS 12, the only available categories to assess contingent losses based on the likelihood of the loss are Probable, Reasonably Possible, and Remote. When legal counsel cannot indicate whether the unfavorable outcome is probable or remote, (e.g., unable to express an opinion) the Component should categorize the outcome as Reasonably Possible, and make a disclosure in the notes to the financial statements.
3.3.3. The disclosure should include the nature of the contingency and an estimate of the possible liability, an estimate of the range of the possible liability, or a statement that such an estimate cannot be made. When disclosing that an estimate cannot be made, the claimed amount should be disclosed. Disclosures and amounts prescribed may be aggregated for presentation in the notes to the financial statements.

4.0 CONTRACT PROGRESS PAYMENTS

When a DoD contractor submits a request for a contract progress payment for the costs incurred in pursuit of the contract, it results in a measurable liability to the DoD. Any progress payment requests from a contractor to the DoD that are expected to be paid within one year must be recorded as an “Accounts Payable,” and the estimated amount of costs incurred by the contractor that are expected to remain unpaid for more than one year until the completed asset is delivered must be recorded as “Other Liabilities.” For every progress payment request, a Contracting Officer Representative, or other authorized representative, must certify that the work reflected has been performed, and is consistent with the requirements of the contract.

CHAPTER 13

ENVIRONMENTAL AND DISPOSAL LIABILITIES

1.0 GENERAL

1.1 Purpose

This chapter prescribes the accounting policy for measuring, recognizing, recording, and disclosing Department of Defense (DoD) environmental and disposal liabilities. General accounting principles and policy for liabilities are contained in Chapter 8. The policies prescribed in this chapter apply to all environmental and disposal liabilities regardless of the funding source or availability of funding. Refer to Volume 6B for guidance on roles and responsibilities in the preparation of related financial reports and note disclosures.

1.2 Authoritative Guidance

This chapter implements applicable provisions of:

1.2.3. 50 U.S.C. § 1521, “Destruction of existing stockpile of lethal chemical agents and munitions;”

1.2.4. Title 40, Code of Federal Regulations, part 266.202 (40 CFR § 266.202);”

1.2.6. U.S. Department of Treasury (Treasury) Treasury Financial Manual (TFM) United States Standard General Ledger (USSGL);

1.2.7. Statement of Federal Financial Accounting Standards SFFAS 1, “Accounting for Selected Assets and Liabilities;”

1.2.8. SFFAS 5, “Accounting for Liabilities of the Federal Government;”

1.2.9. SFFAS 6, “Accounting for Property, Plant, and Equipment;”

1.2.10. SFFAS 21, “Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources;”
1.2.11. **SFFAS 23**, “Eliminating the Category National Defense Property, Plant, and Equipment;”

1.2.13. **FASAB Interpretation 9**, “Cleanup Cost Liabilities Involving Multiple Component Reporting Entities: An Interpretation of SFFAS 5 & SFFAS 6;”

1.2.15. **FASAB TR 10**, “Implementation Guidance on Asbestos Cleanup Costs Associated with Facilities and Installed Equipment;”

1.2.16. **FASAB TR 11**, “Implementation Guidance on Cleanup Costs Associated with Equipment;”

1.2.20. DoD Instruction (DoDI) 4165.14, “Real Property Inventory and Forecasting;”

1.2.21. **DoDI 4165.72**, “Real Property Disposal;”

1.2.22. **DoDI 4715.05**, “Environmental Compliance at Installations Outside the United States;”

1.2.23. **DoDI 4715.06**, “Environmental Compliance in the United States;”

1.2.24. **DoDI 4715.07**, “Defense Environmental Restoration Program (DERP);”

1.2.25. **DoDI 4715.08**, “Remediation of Environmental Contamination Outside the United States;”
1.2.26. **DoDI 5000.61**, “DoD Modeling and Simulation Verification, Validation, and Accreditation;”

1.2.27. **DoDI 5000.64**, “Accountability and Management of DoD Equipment and Other Accountable Property;”

1.2.28. **DoDI 5530.03**, “International Agreements;”

1.2.29. **DoDM (DoDM) 4160.21**, “Defense Materiel Disposition: Disposal Guidance and Procedures;”

1.2.31. **DoDM 4715.20**, “Defense Environmental Restoration Program (DERP) Management.”

2.0 DEFINITIONS

The following definitions apply to environmental and disposal liabilities:

2.0.1. **Asset-Driven Liability.** An environmental and disposal liability is the environmental and disposal cost associated with future DoD Property, Plant, and Equipment (PP&E) asset closure or disposal that involves non-routine removal of hazardous waste at the point of disposal or closure and/or environmental response explicitly required (by permit or other policy or law). Examples of an asset-driven liability include equipment environmental disposal liabilities, asbestos and environmental closure requirements.

2.0.2. **Baseline.** A study or survey used to establish the initial site universe of environmental and disposal liability sites. The baseline provides a starting point from which sites that contribute to financial statement reporting balances will be adjusted over time. Once the baseline is established, DoD Components must rely upon established procedures to maintain their E&DL universe.

2.0.3. **Contamination.** Defined as a release of a hazardous substance, or the potential release of a discarded hazardous substance, which may have a harmful effect or become injurious to the environment or to the public health, safety, or welfare.

2.0.4. **Cost Model.** A framework upon which an estimating methodology is developed. The model may use mathematical equations to convert resource data into cost data and require users to enter a minimal amount of information to generate cleanup cost estimates.

2.0.5. **Cost-to-Complete (CTC).** Represents the total estimated future costs for site level cleanup not currently funded at the end of a given fiscal year. CTC estimates assume that approved funding in the year of execution will be received and obligated in full. CTC (including DERP CTC) estimates also include program management costs.
2.0.6. **DoD Component.** Refers to the Office of the Secretary of Defense, the Military Departments (including their Reserve components), the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the Office of the Inspector General of the DoD, the Defense Agencies, the DoD Field Activities, and all other organizational entities in the DoD.

2.0.7. **Due Care.** As defined in TR 2, due care in the context of environmental and disposal liability refers to “a reasonable effort to identify the presence or likely presence of contamination. Due care is exercised if an agency has effective policies and procedures in place to routinely identify contamination and forward that information to the responsible agency official.”

2.0.8. **Environmental Cleanup, Closure, and/or Disposal Costs.** For financial statement reporting purposes, the term “environmental cleanup costs” includes costs associated with restoration of environmental sites funded under DERP, corrective actions, and environmental costs associated with the future closure of operations, including closure and disposal of PP&E. Cleanup costs as defined in SFFAS 6, paragraph 85, are the cost of removing, containing, and/or disposing of hazardous waste from real property, or material and/or personal property that consists of hazardous waste at the time of shutdown or disposal, and material and/or property that consists of hazardous waste at permanent or temporary closure or shutdown of associated PP&E. Consistent with SFFAS 6, paragraph 87, cleanup costs may include, but are not limited to, decontamination, decommissioning, site restoration, site monitoring, closure, and post-closure costs. Per SFFAS 6, paragraph 93, cleanup costs, such as those resulting from accidents or where cleanup is an ongoing part of operations, are to be accounted for in accordance with liability standards (SFFAS 1 and SFFAS 5) and are not subject to the recognition guidance provided in SFFAS 6 for environmental and disposal liabilities since the cleanup effort is not deferred until operation of the associated PP&E ceases either permanently or temporarily.

2.0.9. **Environmental and Disposal Liabilities.** For financial reporting purposes, a DoD environmental and disposal liability is a probable future outflow or other sacrifice of resources that exists as of the financial reporting date for environmental cleanup, closure, and/or disposal costs resulting from past transactions or events. A DoD environmental and disposal liability exists when: (1) contamination is known to be present or likely to be present; (2) environmental cleanup, closure, and/or disposal is required by applicable federal, state, interstate, or local requirements or an authorized legal agreement such as a lease, contract, or international agreement; and (3) DoD activities created the liability and/or an authorized legal agreement establishes DoD as the responsible entity. An environmental and disposal liability may also exist if environmental contamination is not DoD related, but DoD enters into a binding agreement that formally accepts financial responsibility for cleanup, closure, and/or disposal.

2.0.10. **Environmental and Disposal Liability Site Universe.** All sites identified after performing a due care approach to determine if “probable” and “reasonably estimable” criteria outlined in TR 2 have been met.
2.0.11. **Environmental Site.** An environmental site is a discrete location(s) for which there is an environmental issue that requires evaluation. A site is a distinct area of an installation containing one or more releases or threatened releases of hazardous substances treated as a discrete entity or consolidated grouping for response purposes. Environmental sites can also be created due to certain re-designation of land per the provisions contained in the environmental permitting processes.

2.0.12. **Equipment.** Equipment is personal property that is functionally complete for its intended purpose, durable, and nonexpendable. Equipment generally has an estimated useful life of two years or more; is not intended for sale; does not ordinarily lose its identity or become a component part of another article when put into use; has been acquired or constructed with the intention of being used or being available for use by the entity.

2.0.13. **Event-Driven Liability.** An event-driven liability is an environmental and disposal liability resulting from either a government-acknowledged event or a government-related event where there is a release of contamination to the environment that will require future cleanup.

2.0.14. **Friable Asbestos and Non-Friable Asbestos.** In accordance with 40 CFR 61.141, friable asbestos is any material containing more than one percent asbestos that, when dry and left undisturbed, can be pulverized, or reduced to powder by hand pressure. Non-friable asbestos is any material containing more than one percent of asbestos that, when dry, cannot be crumbled, pulverized, or reduced to powder by hand pressure during disturbance/removal.

2.0.15. **Hazardous Waste.** According to SFFAS 6, paragraph 86, hazardous waste is a solid, liquid, or confined gaseous waste, or combination thereof, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may cause or significantly contribute to an increase in mortality or in an increase in serious irreversible, or incapacitating irreversible, illness or pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, disposed of, or otherwise managed. DoD Components should use the hazardous waste definition provided by the Environmental Protection Agency and any materials FASAB specifically identifies as hazardous waste, such as the hazardous air pollutant asbestos. Hazardous substances, as defined under the CERCLA, are generally also hazardous wastes.

2.0.16. **Non-routine Environmental and Disposal Liability.** A unique cleanup cost of hazardous waste associated with the closure (either temporarily or permanently), disposal, or decommissioning of equipment that meets the “probable” and “reasonably estimable” criteria outlined in TR 2. Additional guidance on non-routine environmental and disposal liabilities is included in TR 11.

2.0.17. **Permanent Removal from Service.** Permanent removal from service requires two business events to occur: (1) the termination of the asset’s use; and (2) documented evidence of management’s decision to permanently remove the asset from service, by selling, scrapping, recycling, donating or demolishing the asset or where there has been destruction of the asset such
as in an aircraft crash. If only one of these two business rules occurs, a “permanent” removal of an asset from service has not occurred.

2.0.18. Probable. As defined in SFFAS 5, probable is that which can reasonably be expected or is believed to be more likely than not on the basis of available evidence or logic. More likely than not is a greater than 50 percent chance that the DoD Component has a responsibility to address the contamination. The probability of a future outflow or other sacrifice of resources is assessed based on current facts and circumstances. These current facts and circumstances include the law that provides general authority for federal entity operations and specific budget authority to fund programs. If budget authority has not yet been provided, a future outflow or other sacrifice of resources might still meet the probability test if (1) it directly relates to ongoing entity operations and (2) it is the type for which budget authority is routinely provided. Therefore, the definition applies both to liabilities covered by budgetary resources and to liabilities not covered by budgetary resources. Additional guidance on determining "probable" for environmental and disposal liabilities is provided in TR 2.

2.0.19. Property, Plant, and Equipment (PP&E). Tangible assets that (1) have an estimated useful life of 2 or more years, (2) are not intended for sale in the ordinary course of business, and (3) are intended to be used or available for use by the entity.

2.0.20. Real Property. Consists of buildings, structures, linear structures, and land and improvements to the land. Real Property includes equipment affixed and built into the facility as an integral part of the facility (such as heating systems), but not movable equipment (e.g., plant equipment, industrial equipment, buoys).

2.0.21. Reasonably Estimable. The ability to reliably quantify, in monetary terms, the outflow of the required resources. The process for determining if an environmental and disposal liability is “reasonably estimable” is applied after a transaction or event has occurred that meets the definition of “probable.” Additional guidance on determining "reasonably estimable" for environmental and disposal liabilities is provided in TR 2.

2.0.22. Recognition is the formal process by which an item is incorporated into an entity’s financial statements as an asset, liability, revenue, expense, or other relevant category.

2.0.23. Removal from Service. Removal from service is defined as an event that terminates the use of a PP&E asset (e.g., shut down of a facility). Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or identification as excess to an entity or DoD Component’s mission needs. General removal of an asset from service is not the same as “permanent removal from service.” Removal from service must be considered other than permanent unless (1) the asset’s use is terminated and (2) there is documented evidence of the DoD Component’s decision to permanently remove the asset from service. If only one of the two business events has occurred, permanent removal from service has not occurred (i.e., the removal is considered other than permanent).
2.0.24. Roll Forward Procedures. A documented process bridging the timing gap between June 30 (or other interim date that an analysis has been performed) and September 30 to determine if any significant changes to environmental and disposal liabilities have occurred between June 30 (or other interim date that an analysis has been performed) and September 30. Any significant changes that have occurred between June 30 and September 30 must be reflected in the environmental and disposal liability balance through an adjustment to the environmental and disposal liability balance as of September 30.

2.0.25. Routine Hazardous Waste Disposal. The cost of hazardous waste disposal from day-to-day on-going operations, performed on a regular basis (for example, removing and disposing of batteries, cleaning solvents, and motor oil incurred as part of periodic routine maintenance of equipment over its useful life) should be recognized as an operating expense and accrued liability/payable the period the cleanup occurs in accordance with liability standards outlined in SFFAS 1. The cost of removing and disposing of the same routine maintenance hazardous waste at the time of equipment disposal would likewise be expensed and the associated liability is recognized when incurred (TR 11, paragraphs 12-14). In accordance with SFFAS 6, paragraph 93, if such cleanup is an ongoing part of operations and not deferred until operation of associated PP&E ceases either permanently or temporarily, the costs are not subject to the recognition guidance provided in SFFAS 6, paragraphs 97 and 98.

2.0.26. Transaction Level Detail Reports. Provide the line item details that support the summarized values reported on DoD Component financial statements. For event-driven liabilities, transaction level detail reports could include, but are not limited to, site level or program management level data from environmental and disposal liability systems and accounting systems that report CTC estimates, prior year cost incurred, current year cost incurred, and unpaid obligations as of the reporting period. For asset-driven liabilities, transaction level detail reports could include, but are not limited to, cost model outputs at the asset level.

2.0.27. Unpaid Obligations (UPO). Represents valid obligations supported by documentary evidence to conform to 31 U.S.C. § 1501(a). The amount of unpaid obligations represents the amount of orders for goods and services remaining unfilled at fiscal year-end for which the liability has not yet accrued.

3.0 ACCOUNTING POLICY FOR ENVIRONMENTAL AND DISPOSAL LIABILITIES

3.1 Audit Readiness

Each DoD Component must develop and implement internal operating procedures and/or guidance to implement this overarching policy in a manner that ensures accurate, timely, and relevant reporting of financial data.

3.2 Environmental and Disposal Liability Recognition

This paragraph outlines the policy for recognizing, measuring, and disclosing environmental and disposal liabilities in accordance with applicable accounting standards.
3.2.1. Environmental and disposal liabilities must be recognized on the financial statements as a result of past transactions or events when the future outflows or expenditures of resources for environmental cleanup, closure, and/or disposal actions are probable and reasonably estimable, in accordance with TR 2. A probable environmental and disposal liability exists when it is more likely than not that contamination from hazardous waste exists for which DoD is either legally liable for the cleanup or has acknowledged responsibility for the cleanup. A reasonably estimable environmental and disposal liability exists when a dollar value can be estimated for (1) the cleanup costs based on the results of remedial investigation/feasibility study or experience with similar sites and/or conditions; or (2) where there is no known technology to perform cleanup, the costs can be estimated for a remedial investigation/feasibility study and costs to contain the contamination (see subparagraph 3.2.2).

3.2.2. Cleanup costs associated with government-related events resulting in a liability, such as ongoing operations that result in routine hazardous waste or accidental damage (e.g., oil spill) to property caused by federal operations, must be recognized as an operating expense in the period the event occurs if the future outflow or other sacrifice of resources is probable and the liability can be measured, or as soon thereafter as it becomes probable and measurable. If the DoD Component does not complete the cleanup, closure, and/or disposal action within the current reporting period, and the cleanup is related to routine ongoing operations, the DoD Component must record an accrued liability for the non-routine cleanup, closure, and/or disposal costs incurred and not paid in accordance with Chapter 9.

3.2.3. Cleanup costs associated with government-acknowledged events (such as toxic waste damage caused by nonfederal entities and natural disasters) do not meet the definition of a “liability” until, and to the extent that, the government formally acknowledges financial responsibility for the cost from the event and an exchange or nonexchange transaction has occurred. The liability and expense should be recognized when both (1) the Congress has appropriated or authorized resources, and (2) an exchange occurs (contractor performs repairs) or nonexchange amounts are unpaid as of the reporting date (direct payments to disaster victims), whichever applies, in accordance with SFFAS 5.

3.2.4. SFFAS 5 address liabilities for environmental cleanup resulting from an accident, natural disaster, or other one-time occurrence. SFFAS 6 provides the standards related to the timing of recognition of environmental and disposal liabilities and related inter-period operating expenses when cleanup cannot be performed until permanent or temporary closures or shutdown and a portion of the estimated total cleanup costs is to be recognized as an expense during each operating period benefiting from operations of the general PP&E. This allocation must be based on a systematic and rational method. For example, the estimated cost could be allocated to operating periods based on the expected physical capacity of the PP&E and the amount of capacity used each period. In addition, disclosure of the total estimated cost is required.

3.2.5. Cleanup costs must be estimated when the associated PP&E is placed in service. The estimate must be referred to as the “estimated total cleanup cost. As cleanup costs are paid, payments must be recognized as a reduction in the liability for cleanup costs. These include the cost of PP&E or other assets acquired for use in cleanup activities. SFFAS 6, paragraph 94
describes two approaches to recognizing the total cleanup cost: one applies to Stewardship PP&E and another to general PP&E.

3.2.5.1. The estimated environmental and disposal liabilities associated with the total cleanup cost for Stewardship PP&E must be consistent with the treatment of the acquisition cost of Stewardship PP&E (i.e., expensing in the period placed in service). For Stewardship PP&E placed in service after the standard is adopted, the agency must recognize an expense and a liability for the full amount of estimated total cleanup cost when the Stewardship PP&E is placed in service. For Stewardship PP&E already in service, according to SFFAS 6, on the day the standard is adopted or upon early implementation, the agency must charge net position through a prior period adjustment and recognize a liability for the full amount of the estimated total cleanup costs. As re-estimates are made, adjustments to the liability must be recognized in expense as “changes in estimated cleanup costs from prior periods.”

3.2.5.2. SFFAS 6 had an effective implementation date for periods beginning after September 30, 1997 and TB 2006-1 as amended by TB 2011-2 had an effective date for periods beginning after September 30, 2012. For the initial implementation of these standards, DoD Components must record environmental and disposal liabilities for PP&E as described in Table 13-1 (for non-asbestos related liabilities) or Table 13-2 (for asbestos related liabilities).

Table 13-1. Cleanup Cost Liability Options for PP&E-September 30, 1997 and Prior

<table>
<thead>
<tr>
<th>Environmental and Disposal Liability</th>
<th>Accounting Treatment</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Option 1</strong></td>
<td>Liability should be recognized for the portion of the estimated total cleanup cost that is attributable to that portion of the physical capacity used or that portion of the estimated useful life that has passed since the PP&amp;E was placed in service. In each subsequent year of the asset’s useful life, recognize a proportionate amount of the remaining costs as an operating expense on the Statement of Net Cost and accumulation of liability on the Balance Sheet (SFFAS 6, paragraph 97-98, 104-105). As re-estimates are made, cumulative effect of changes in total estimated cleanup costs related to current and past operations must be recognized as expense and the liability adjusted in the period of the change in estimate.</td>
</tr>
<tr>
<td><strong>Option 2</strong></td>
<td>If costs are not intended to be recovered primarily through user charges, management may elect to recognize the estimated total cleanup cost as a liability upon implementation of the standard. In addition, in periods following the implementation period, any changes in the estimated total cleanup cost must be expensed when re-estimates occur, and the liability balance adjusted.</td>
</tr>
</tbody>
</table>
Note: The offsetting charge is to be recorded as a prior period adjustment on the Statement of Net Position (SFFAS 6, paragraph 104-105).

No amounts may be recognized as expense in the period of implementation. The amounts involved must be disclosed and to the extent possible the amount associated with current and prior periods should be noted.

Table 13-2. Cleanup Cost Liability Options for Asbestos-September 30, 2012 and Prior

The following table describes cleanup cost liability options for the initial implementation of TB 2006-1, as amended by TB 2011-2 for asbestos related liabilities that existed on or before September 30, 2012.

<table>
<thead>
<tr>
<th>Asbestos</th>
<th>Accounting Treatment</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Option 1</strong></td>
<td>Record a liability for estimated cleanup costs equal to that portion of the physical capacity used or that portion of the estimated useful life of the asset that has passed since the PP&amp;E was placed in service. The remaining cost must be recognized in a systematic and rational manner based on use of the physical capacity of the associated PP&amp;E, whenever possible.</td>
</tr>
<tr>
<td><strong>Option 2</strong></td>
<td>If the asset has been in service for a substantial portion (greater than 50% of the useful life) of its estimated used life, management can elect to recognize the entire amount of the estimated cleanup cost. This option can only be used if costs are not intended to be recovered primarily through user charges (SFFAS 6, paragraphs 97-98, and 104-105).</td>
</tr>
</tbody>
</table>

Note 1. The offsetting charge for any liability for asbestos related cleanup costs related to general PP&E in service at the date of implementation must be made to the net position of the entity. The amount of the adjustment must be shown as a “change in accounting principle” in any statement of changes in net position that may be required (TB 2006-1, paragraphs 40-41).

Note 2. Illustrative Example of Asbestos Related Cleanup Costs calculation and reporting is presented in Appendix B of TB 2006-1.
Table 13-3. Cleanup Cost Liability Treatment for PP&E Placed in Service After Effective Date

The following table describes the cleanup cost liability treatment for assets placed in service after September 30, 1997 (for non-asbestos related liabilities), as well as the cleanup cost liability treatment for assets placed in service after September 30, 2012 (for asbestos related liabilities).

<table>
<thead>
<tr>
<th>Environmental and Disposal Liability</th>
<th>Effective Date</th>
<th>Assets Placed in Service After Effective Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-Asbestos</td>
<td>After September 30, 1997</td>
<td>Estimate the total cleanup costs related to the PP&amp;E and recognize annually a portion of the costs over the useful life of the asset. Recognition of the expense and accumulation of the liability must begin on the date that the PP&amp;E is placed into service, continue in each period that operation continues, and be completed when the PP&amp;E ceases operation (SFFAS 6, paragraphs 97-98).</td>
</tr>
<tr>
<td>Asbestos</td>
<td>After September 30, 2012</td>
<td>A portion of estimated total asbestos related cleanup costs must be recognized as expense during each period that PP&amp;E is in operation. The estimated useful life of the associated PP&amp;E may serve as the basis for systematic and rational recognition of expense and accumulation of the liability. Recognition of the expense and accumulation of the liability must begin on the date that the PP&amp;E is placed into service, continue in each period that operation continues, and be completed when the PP&amp;E ceases operation (SFFAS 6, paragraph 98 and TB 2006-1, paragraph 38). As re-estimates are made, the cumulative effect of changes in total estimated asbestos related cleanup costs related to current and past operations must be recognized as expense and the liability adjusted in the period of the change in estimate. In certain scenarios, such as when cleanup costs have been fully expensed, the re-estimate may result in a credit to expense for that year (TB 2006-1). As asbestos related cleanup costs are paid, payments must be recognized as a reduction in the liability for asbestos related cleanup costs (SFFAS 6, paragraph 100).</td>
</tr>
</tbody>
</table>
3.2.5.3. The estimated environmental and disposal liabilities associated with PP&E placed in service after September 30, 1997 (i.e., after the initial implementation of SFFAS 6, paragraph 104), that have future environmental cleanup, closure, and/or disposal requirements must be systematically recognized over the useful life or physical capacity usage of the asset. In accordance with SFFAS 6, the accumulation of the liability and the recognition of the related expense should commence when the asset is placed in service, continue in each period that operation continues, and be completed when the PP&E cease operations. The accounting treatment for PP&E placed in service after September 30, 1997, is applicable irrespective of whether the costs are intended to be recovered through user charges or not. If the environmental and disposal liability is not associated with an asset having a useful life, for example an event-driven environmental and disposal liability, the total estimated cleanup cost should be recognized upon identification of the liability in accordance with SFFAS 5.

3.2.5.4. Estimates must be evaluated and revised periodically (at least annually) to account for material changes due to inflation or deflation and changes in regulations, plans, and/or technology (see subparagraph 2.3.4.5). The cumulative effect of changes in total estimated cleanup costs related to current and past operations must be recognized as expense and the liability adjusted in the period of the change in estimate (SFFAS 6, paragraphs 96 and 99).

3.2.5.5. For asbestos (both friable and non-friable) related environmental and disposal liabilities associated with PP&E, the initial date of the standard implementation (i.e., TB 2006-1 amended by TB 2011-2) is the effective date for the systematic liability recognition. Asbestos related environmental and disposal liabilities associated with PP&E placed in service after September 30, 2012, must be systematically recognized over the remaining useful life of the PP&E.

3.2.6. Environmental and disposal liabilities that are unique in nature have different recognition criteria.

3.2.6.1. An environmental and disposal liability for military range cleanup, closure and/or disposal, including disposal of unexploded ordnance, does not exist until a formal decision is made to close the range, or hazardous waste is migrating off the range. If hazardous waste is migrating off the range, the DoD Component will recognize an environmental and disposal liability for the affected portion of the location outside the boundaries of the operational range. This accounting guidance is based on the conditional exemption provided to DoD per EPA regulation 40 CFR 266.202. The EPA regulation effectively excludes military munitions on a military range from the definition of solid waste. A military munition is not a solid waste when:

3.2.6.1.1. Used in training military personnel or explosives and munitions emergency response specialists (including training in proper destruction of unused propellant or other munitions); or

3.2.6.1.2. Used in research, development, testing, and evaluation of military munitions, weapons, or weapon systems; or
3.2.6.1.3. Recovery, collection, and on-range destruction of unexploded ordnance and munitions fragments during range clearance activities at active or inactive ranges. However, “use for intended purpose” does not include the on-range disposal or burial of unexploded ordnance and contaminants when the burial is not a result of product use.

3.2.6.2. Environmental and disposal liabilities related to conventional munitions that are determined to be excess and/or obsolete as of the financial reporting date are recognized for the total disposal estimate (i.e., the environmental and disposal liability). Conventional munitions are typically an inventory item intended for consumption; therefore, an environmental and disposal liability would exist only when the munitions are considered excess or obsolete, because the unused portions require special actions to ensure proper disposal. Conventional munitions are considered to be obsolete when no longer needed due to changes in technology, laws, or operations. Excess quantities of conventional munitions and obsolescence of conventional munitions must be evidenced by documentation of management’s decision to permanently remove an asset from service and the asset’s use is terminated.

3.2.6.3. Environmental and disposal liabilities for stockpile and non-stockpile chemical agents and munitions inventory, and buried chemical agents and munitions, should be recognized for cleanup, closure, and/or disposal costs when the probable and reasonably estimable criteria have been met, in accordance with TR 2. Per 50 U.S.C. § 1521, DoD is required to dispose of chemical weapons and materiel contained in the stockpile, as well as the non-stockpile. The stockpile consists of the chemical weapons and materiel in the inventory. The non-stockpile items are binary chemical weapons, miscellaneous chemical warfare materiel, recovered chemical weapons, and former production facilities. Proper action is needed to mitigate risk to human health and the environment from buried chemical agents and munitions. The determination to dispose of chemical weapons and materials must be evidenced by documentation supporting management’s decision to permanently remove an asset from service and the asset’s use is terminated.

3.2.6.4. For assets permanently removed from service, the environmental cleanup costs liability associated with the disposal, closure, and/or shutdown of the PP&E must be recognized in full. If removal of service is considered other than permanent, the liability and associated cleanup cost expense must continue to accumulate. Permanent removal from service is defined under subparagraph 2.0.17. In compliance with TR 14, documentation must exist of management’s decision to permanently remove an asset from service. Recognition of the full liability for cleanup costs associated with PP&E will not be recorded if an asset’s useful life has not been terminated and there is no documented evidence validating management’s decision to permanently remove the asset from service.

3.2.6.5. Overseas environmental and disposal liabilities are environmental cleanup, closure, and/or disposal costs associated with the operation of installations overseas in accordance with DoDI 4715.08 and international agreements as defined by DoD Directive 5530.3. Environmental and disposal liabilities resulting from DoD operations are considered “Government Related Events,” as defined by SFFAS 5, and will be recognized when the event creating the liability occurs. The requirements to be met will be based on the applicable SFFAS standards,
DoD Issuances (i.e., DoD Directive, DoD Instruction, DoD Manual), and international agreements, in accordance with DoDI 4715.05.

3.2.6.6. When estimating the disposal cost of assets containing hazardous waste, non-environmental costs that are considered immaterial to the total cost of removing or disposing of the asset(s) may be recognized as an environmental and disposal liability. Materiality depends on the degree to which an omission or misstatement would change or influence the judgment of a reasonable person relying on the information and requires the application of professional judgment. Each DoD Component is responsible for supporting any materiality determinations.

3.2.6.7. Both friable and non-friable asbestos related cleanup, closure, and/or disposal costs must be estimated in accordance with TB 2006-1, as amended by TB 2011-2. Cost estimates for asbestos must include both friable and non-friable, however itemization of the two types of asbestos is not required in the estimate. Asbestos related cleanup, closure, and/or disposal costs are the costs of removing, containing, and/or disposing of:

3.2.6.7.1. Asbestos-containing materials from property, or

3.2.6.7.2. Material and/or property that consist of asbestos-containing material at permanent or temporary closure, or shutdown of associated PP&E (i.e., when cleanup cannot occur until the end of the useful life or at regular intervals during that life). Asbestos related cleanup, closure, and/or disposal costs associated with PP&E must be recognized in accordance with information in Table 13-2 and Table 13-3. TR 10 provides a framework for identifying assets containing asbestos, assessing assets to collect information, and/or developing assumptions needed to estimate asbestos cleanup costs.

3.2.7. Multiple reporting entities may have distinct responsibilities regarding general PP&E and related cleanup costs. Some component reporting entities are designated by law, rule, or administrative regulation to fund the cleanup liability associated with PP&E owned and operated by another reporting entity during the asset’s useful life. In such cases, a component reporting entity that recognizes general PP&E during its useful life differs from the component reporting entity that will eventually be responsible for the future outflows or other sacrifices of resources required for cleanup costs or funding the cleanup liability when the asset is removed from service. FASAB Interpretation 9 clarifies that during the assets useful life, the reporting entity that owns the asset must continue to recognize inter-period operating costs on its Statement of Net Cost and accrue the liability for PP&E on its Balance Sheet until the general PP&E and the associated liability are transferred to the entity designated responsible by law, statute or policy for cleanup. At that time, the general PP&E and the liability should be de-recognized by the component reporting entity that recognized them during the general PP&E’s useful life and recognized by the component reporting entity that will liquidate the liability. De-recognition and recognition of the general PP&E and liability should be performed in accordance with existing accounting standards. The DoD Component recording the environmental and disposal liability must have sufficient supporting documentation to establish its responsibility for the liability. If the receiving entity does not provide DD 1354 Transfer and Acceptance of DoD Real Property,
Certificate of Title Transfer, quit claim deed, or other instrument of transfer, the transferring entity continues to recognize the environmental and disposal liabilities.

3.2.8. Environmental and disposal liabilities are generally based on accounting estimates that are discussed in paragraph 3.3. Recognition of necessary adjustments to accounting estimates used in establishing environmental and disposal liabilities are as follows:

3.2.8.1. The cumulative effect of changes in cost estimates is recognized as an expense in the current accounting period and the corresponding liability is adjusted. Additionally, the related cleanup cost for the current period must be expensed and accrued as an environmental and disposal liability. Refer to section 3.0 for the appropriate accounting procedures for recording environmental and disposal liabilities.

3.2.8.2. Material adjustments that are required to correct errors related to prior period operations must be recognized as a prior period adjustment that restates the prior period comparative financial statements. Adjustments to correct errors typically result from mistakes, or the oversight or misuse of facts that would materially misstate the entities’ financial statements. This includes errors in the calculation of estimated environmental and disposal liabilities. This type of adjustment is reflected in the Statement of Changes in Net Position and omits any expense recognition in the current period. The amounts involved must be disclosed, and to the extent possible, the amount associated with current and prior periods must be noted. Adjustments required for immaterial amounts are recognized as a current period event.

3.2.9. The risk of material misstatement of accounting estimates normally varies with the complexity and subjectivity associated with the process, the availability and reliability of relevant data, the number and significance of assumptions made, and the degree of uncertainty associated with those assumptions. DERP and non-DERP environmental sites require cleanup cost estimates to be single point estimates using the best available data. If a range is estimated for environmental and disposal liabilities and an amount within the range is considered a better estimate than any other estimate, that amount must be recognized; however, if no amount within a range is considered a better estimate, then the minimum amount in the range must be recognized. Refer to paragraph 3.4 for disclosure requirements of estimates that are based on uncertainty.

3.3 Environmental and Disposal Liability Estimates

3.3.1. Environmental and disposal liabilities are generally developed based on accounting estimates, because the extent of the environmental cleanup, closure, and/or disposal costs cannot be determined until completing cleanup/disposal operations. The DoD Component’s responsible program management function and accounting function should work together to identify and support the environmental and disposal liability estimates and maintain audit records to support assumptions, methodologies, and internal controls used in developing the estimates. The responsible program management function is accountable for generating and approving the cost estimates; the accounting function is responsible for reviewing the cost estimates and ensuring the liability is recognized according to the guidance published in this chapter. Each estimate is based on subjective as well as objective factors. Accordingly, sound business judgment based on
knowledge and experience about past and current events and assumptions is required. The accounting estimates are subject to audit standards of SAS Number 122/AU-C Section 540. Organizations that prepare accounting estimates must retain adequate documentation of quality review, estimator and reviewer qualifications, data sources, estimating methodologies, substantiation including the cost models, and internal control procedures. The process of establishing accounting estimates would normally consist of:

3.3.1.1. Identifying situations for which accounting estimates are required;

3.3.1.2. Identifying the relevant factors that may affect the accounting estimate;

3.3.1.3. Accumulating relevant, sufficient, and reliable data on which to base the estimate;

3.3.1.4. Developing assumptions that represent management’s judgment of the most likely circumstances and events with respect to the relevant factors;

3.3.1.5. Determining the estimated amount based on the assumptions and other relevant factors;

3.3.1.6. Comparing prior accounting estimates to actual results and with new estimates to assess the reliability of the process used to develop estimates;

3.3.1.7. Determining that the accounting estimate is consistent with the operational plans of the entity; and

3.3.1.8. Determining that the accounting estimate is presented in conformity with applicable accounting principles and that disclosure is adequate.

3.3.2. The environmental cleanup, closure, and/or disposal costs that are probable and reasonably estimable must be estimated based on site-specific information using engineering estimates, comparison with similar sites, contaminants, equipment, parametric methodologies, or cost models validated in accordance with DoDI 5000.61. As cost estimates by definition are subjective and have an element of uncertainty, documentation to support cost estimates must be substantial and robust. The reliability of the cost estimate will depend on the amount of site-specific information available, the extent of experience and resemblance with similar site conditions or assets, availability of remediation technology, and parametric methodologies cost models. Once the DoD Component generates a cost estimate, the liability must be recognized in accordance with paragraph 3.2 and any uncertainty disclosed in the notes to the financial statements.

3.3.2.1. A cost estimate produced from a site-specific study is generally more reliable because it is based directly on environmental conditions at the site. Further, environmental personnel can evaluate the alternative cleanup, closure, and/or disposal actions identified through a site-specific study to develop engineering estimates and to identify the selected alternative.
However, understanding that DoD Components often include multiple sites on an individual contract, supporting documentation required to justify individual UPO transaction level details does not need to be at the site level. Where multiple sites are included on an individual contract, the UPO must have details of each of the sites to decipher reasonably associated costs for each site. In such circumstances, contracts and invoices supporting the UPO transaction level details for the combined multiple sites must be retained to support future audit requirements.

3.3.2.2. If a site-specific study has not been completed, then the DoD Component must determine whether the site is similar to other sites, where experience has been gained based on the completion of a comprehensive study or actual remediation. If there is no investigation and/or comparable site data available, costs are not considered reasonably estimable. In this case, the DoD Component should recognize the anticipated costs of conducting future studies as an environmental and disposal liability in accordance with paragraph 3.2 until they complete the site-specific study.

3.3.2.3. If an acceptable cleanup technology is not available to address the site, then the DoD Component must recognize the estimate to contain the hazardous waste and other relevant costs, such as the costs for future studies, as an environmental and disposal liability in accordance with paragraph 3.2. The DoD Component must also disclose the range of uncertainty in the notes to the financial statement.

3.3.2.4. When cost models are leveraged to develop cost estimates, DoD Components must:

3.3.2.4.1. Accumulate relevant, sufficient, and reliable data on which accounting estimates for a given environmental and disposal liability concern were based;

3.3.2.4.2. Ensure estimates are prepared by qualified personnel and adequately reviewed and approved by the appropriate levels of authority before being finalized;

3.3.2.4.3. Sustain the use of a cost model methodology by compiling and/or collecting and maintaining documentation from appropriate service providers (as applicable) to support review of cost factors on a regular basis and implementing a data collection process. For purposes of implementing this approach, DoD considers “performed on a regular basis” to mean at least annually. At a minimum, DoD Components must ensure that appropriate reviews have been performed and subsequent supporting documentation is available to provide to an auditor. Decisions on when to update cost factors must be driven by the impact that new information has on existing estimate;

3.3.2.4.4. Compile documentation and/or collect documentation from appropriate service providers (as applicable) supporting the reasonableness of cost factors used by cost estimation software;
3.3.2.4.5. Compile documentation and/or collect assurance from appropriate service providers (as applicable) that cost estimation software has been validated or otherwise ensure that the functions performed by the software are executed as intended; and

3.3.2.4.6. Compare a representative sample of prior accounting estimates with subsequent results to assess the reliability of the process used to develop estimates and the reasonableness of estimates developed.

3.3.3. Environmental and disposal liability estimates must be developed to include all event-driven environmental liability sites in the current asset/site universe and must include all asset-driven cleanup, closure, and/or disposal costs. Such cost estimates are calculated on a current cost basis and are based on a current plan, existing laws, and technology. Overhead management costs for environmental sites, assets, and equipment that cannot be attributed to specific sites should be added to the environmental and disposal liability at a summary level. Environmental and disposal liability estimates must include the following cost elements, as applicable:

3.3.3.1. Compensation and benefits of government personnel expected to devote significant time directly to a disposal effort;

3.3.3.2. Cost of employing contractors, engineers, and consultants;

3.3.3.3. Disposal costs (includes demilitarization, material handling, transportation, and tipping fees);

3.3.3.4. Cost of dedicated facilities, machinery, and equipment, and the related operating and maintenance costs;

3.3.3.5. Research and development costs for alternative remediation technologies;

3.3.3.6. Payments to regulatory agencies to provide technical support (e.g., document review of planned studies);

3.3.3.7. Efforts to tear down, remove, and dispose of the item(s), to include transportation, demilitarization, and dismantlement only as required by regulation and/or permit;

3.3.3.8. Planning and design efforts, to include contract advertisement and document reproduction;

3.3.3.9. Landscaping costs to replace landscaping elements damaged or destroyed by remediation efforts;

3.3.3.10. Permits, licenses, and approval to include State Historic Preservation Officer concurrence and documentation, and required for remediation by environmental regulation;
3.3.3.11. Grants or payments to state, tribal, and local governments;

3.3.3.12. Program management costs for DERP, a statutorily defined program with a limited universe of sites on active, BRAC and Formerly Used Defense Sites properties. Program management associated with DERP exists solely to support the remediation of sites specifically eligible for DERP. Since these program management costs will cease at the conclusion of the DERP site response actions, these costs must be reported as part of environmental and disposal liability. These costs are necessary to effectively manage and execute the site cleanup requirements for DERP sites; however, they cannot be directly attributed to an individual cleanup site. Per DoDM 4715.20, the DoD Components must report these costs as rolled-up CTC estimates at the appropriate program level. Estimated program management costs must be included for the Future Years Defense Program (FYDP) and beyond. DoD Components must estimate program management costs beyond the FYDP by applying the average percentage of program management costs through the FYDP to the site level requirements remaining past the FYDP. As with other environmental and disposal liability, these estimates must be supported with appropriate documentation.

3.3.4. Environmental and disposal liability estimates must be reviewed annually and revised when there is evidence that significant changes in the cost measurement have occurred, such as changes in scope, ownership, regulation, or technology. In the event a significant change has occurred between the environmental and disposal liability valuation date and September 30, roll forward procedures must be performed (see paragraph 4.2). At a minimum, long-term cost estimates should be adjusted upward or downward annually, through indexing, to maintain them on a current cost basis as if acquired in the current period. Expenditures should be managed to the transaction level to allow for comparison of prior estimates to subsequent results. Supporting documentation required to justify individual transaction level details does not need to be at the site level. However, contracts and invoices supporting the transaction level details for combined multiple sites must be retained to support future audit requirements.

3.3.5. A portion of estimated total cleanup costs must be recognized as an expense during each period the PP&E is in operation. This must be accomplished in a systematic and rational manner based on use of the physical capacity of the associated PP&E, whenever possible. If physical capacity is not applicable or estimable, the estimated useful life of the associated PP&E may serve as the basis for systematic and rational recognition of expense and accumulation of the liability. A more thorough explanation of the term “useful life” is provided in Chapter 25. The current period estimated expense is equal to:

3.3.5.1. The total final estimated costs of the disposal or closure effort;

3.3.5.2. Divided by the total capacity;

3.3.5.3. Multiplied by the physical capacity used;

3.3.5.4. Minus the amounts previously recognized as expense;
3.3.5.5. Equals the current period estimated expense.

3.3.6. DoD Components must follow at least one (or some combination) of the approaches outlined (as applicable for the environmental and disposal liability considered) to establish and maintain a complete and current universe of environmental and disposal liabilities (i.e., baseline):

3.3.6.1. Reconcile PP&E asset records maintained in Accountable Property Systems of Record (APSRs) with environmental and disposal liability records in environmental databases of record;

3.3.6.2. Produce evidence of the performance of a historical fence-to-fence survey focused on identifying and recording environmental and disposal liabilities and recent efforts to maintain currency over initial survey findings; and

3.3.6.3. Reconcile environmental and disposal liability records with other appropriate source lists.

3.3.7. After an initial baseline has been established, DoD Components must maintain site universes by using the following techniques:

3.3.7.1. For asset-driven and event-driven liabilities, leverage PP&E asset acquisition and disposal processes/systems to update routinely the established baseline;

3.3.7.2. For event-driven liabilities, document and adhere to standard operating procedures for responding to typical site addition processes (e.g., spill programs, environmental surveys) and update the baseline; accordingly, and

3.3.7.3. For event-driven liabilities, document and adhere to standard operating procedures for removing future cost estimates when remediation requirements have been met and no additional future liability exists and update the baseline accordingly.

3.3.8. When implementing guidance outlined in subparagraphs 3.3.6 and 3.3.7, DoD Components must establish and maintain environmental and disposal liability universe baselines for event-driven and asset-driven environmental and disposal liabilities:

3.3.8.1. Event-driven environmental and disposal liabilities. In these instances, it is important that DoD Components define the history, timeline, and activities employed in the environmental surveys to demonstrate that a due care approach was taken, in accordance with TR 2, to establish an initial baseline using current factors (e.g., technology, cost, and the regulatory environment), and that there are sufficient procedures in place to identify and update the baseline to reflect the impact of changes in these factors. Documentation must be readily available to support the baseline, allowing auditors to verify the completeness of established cleanup site universes.
3.3.8.2. Asset-driven environmental and disposal liabilities. To apply the recognition and measurement principles and disclosure requirements for general PP&E in accordance with SFFAS 6, DoD Components may categorize PP&E into categories (base units) of PP&E against which the category definitions will be applied to identify relevant environmental and disposal liabilities. If only a subset of the PP&E asset universe is applicable to a given environmental and disposal liability subcategory, DoD Components must begin by considering the entire PP&E asset universe and demonstrate why individual subcategories are not applicable.

3.3.9. DoD Components must identify and account for environmental and disposal liabilities that are non-routine at the time of equipment disposal, in accordance with TR 11. When using the methodology described in TR 11, DoD Components should:

3.3.9.1. Leverage APSRs to define and categorize equipment assets that should be assessed using TR 11 guidelines.

3.3.9.2. Focus on establishing documentation consistent with guidelines set forth in TR 11 to establish an audit trail for reported equipment environmental and disposal liabilities. An audit trail must be produced even if the resulting value of equipment environmental disposal liabilities is deemed immaterial.

3.3.9.3. Review applicable contractual agreements to understand better the responsibilities and obligations during disposal of equipment assets being considered. In some instances, other contractual parties may assume all or part of a liability at the point of disposal, which could affect DoD financial reporting requirements.

3.3.9.4. Coordinate with the following communities (as applicable): Acquisition, Financial Management, Program Management, and Environmental.

3.4 Environmental and Disposal Liability Disclosures

3.4.1. Financial statement disclosures provide pertinent information in notes or narratives about the amounts reported on the face of the financial statements. (Refer to Volume 6B, Chapter 10 for guidance on completing the financial statement notes.) Disclosure requirements for liabilities, including environmental and disposal liabilities, differ depending on the underlying event and the probability and measurability (reasonably estimable) of loss. Key determinants of probable are the likelihood of contamination, the contamination is government related, the government is legally liable, or government acknowledges the financial responsibility, and whether remediation technology exists. The classifications of likelihood are probable, reasonably possible and remote. Probable means that the future confirming event or events are more likely than not to occur; reasonably possible means that the chance of the future confirming event or events is more than remote but less than probable; and, remote means the chance of the future event or events occurring is slight.

3.4.2. Environmental and disposal liabilities meeting the criteria in TR 2 for “probable” and “reasonably estimable” must be recognized on the Balance Sheet. The recognition of
environmental and disposal liabilities requires the following disclosures associated with the cleanup, closure, and/or disposal cost estimates that must be addressed each reporting period within the financial statement note for environmental and disposal liabilities:

3.4.2.1. The sources (list applicable laws and regulations) of cleanup, closure, and/or disposal requirements;

3.4.2.2. The method for assigning estimated total cleanup, closure, and/or disposal costs to current operating periods (i.e., based on consumed useful life or physical capacity of the assets);

3.4.2.3. The unrecognized amounts of environmental and disposal liabilities for assets that require the systematic recognition of the total estimated cleanup, closure, and/or disposal costs. The DoD Component must recognize the portion of the total cost that is attributed to the useful life of the asset that has expired since the asset was placed in service. The balance of the total estimated cleanup, closure and/or disposal cost is the unrecognized portion of the liability;

3.4.2.4. Material changes in the total estimated cleanup, closure and/or disposal costs due to changes in laws, technology, or plans, and the portion of the change in estimate that relates to prior period operations;

3.4.2.5. The nature of estimates and the disclosure of information regarding possible changes due to inflation, deflation, technology, plans, or applicable laws and regulations; and

3.4.2.6. A description of the type of environmental and disposal liabilities identified.

3.4.3. Environmental and disposal liabilities that are not recognized because they do not meet the criteria of “probable” and “reasonably estimable” but for which there is at least a reasonable possibility that a loss may have been incurred are contingent environmental and disposal liabilities that must be disclosed in the notes to the financial statements. OMB Circular A-136 provides details for this disclosure. The financial statement disclosure should include the nature of the environmental and disposal liability and an estimate of the possible liability, an estimate of the range of dollar amounts for the possible liability, or a statement that such an estimate cannot be made.

3.4.4. Environmental and disposal liabilities that are classified as remote or with a slight chance of occurring do not require disclosure in the general-purpose financial statements and accompanying notes, but the law may require disclosure in special purpose reports. If such information is included in general purpose financial reports (e.g., the total face amount of insurance and guarantees in force), it should be labeled in such a way to avoid the misleading inference that there is more than a remote chance of a loss of that amount.
3.4.5. DoD Components must disclose Intragovernmental Liabilities Not Covered by Budgetary Resources separately from Liabilities Covered by Budgetary Resources in accordance with Volume 6B, Chapter 10.

3.4.5.1. Liabilities Covered by Budgetary Resources are liabilities incurred which are covered by realized budgetary resources as of the Balance Sheet date. Budgetary resources encompass not only new budget authority but also other resources available to cover liabilities for specified purposes in a given year. Available budgetary resources include:

3.4.5.1.1. New budget authority;

3.4.5.1.2. Unobligated balances of budgetary resources at the beginning of the year or net transfers of prior year balances during the year;

3.4.5.1.3. Spending authority from offsetting collections (credited to an appropriation or fund account); and

3.4.5.1.4. Recoveries of unexpired budget authority through downward adjustments of prior year obligations.

3.4.5.2. Liabilities are considered covered by budgetary resources if they are to be funded by permanent indefinite appropriations, which have been enacted and signed into law and are available for use as of the Balance Sheet date, provided that the resources may be apportioned by OMB without further action by the Congress and without a contingency having to be met first.

3.4.5.3. Liabilities Not Covered by Budgetary Resources include liabilities incurred for which revenues or other sources of funds necessary to pay the liabilities have not been made available through Congressional appropriations or current earnings of the reporting entity.

3.4.6. DoD reports environmental litigation liabilities separately from other environmental and disposal liabilities in the notes to the financial statements. DoD Components must report estimates of certified third-party damage claims that are probable or reasonably possible. See Volume 6B, Chapters 4 and 10 for information regarding reporting and disclosing requirements on environmental and disposal liabilities arising from litigation claim.

3.4.7. Documentation to support the environmental and disposal liability recognition and disclosures, including management reviews, must be retained for the life of the liability. Once the liability has been eliminated, the documentation must be retained according to applicable retention and disposal instructions in accordance with Volume 1, Chapter 9.

4.0 ACCOUNTING PROCEDURES FOR RECORDING ENVIRONMENTAL AND DISPOSAL LIABILITIES

4.1 Standard Line of Accounting and Accounting Transactions
4.1.1. The Standard Financial Information Structure (SFIS) is a comprehensive data structure that supports requirements for budgeting, financial accounting, cost/performance, interoperability, and external reporting needs across the DoD enterprise. It is a common business language that enables budgeting, performance-based management, and the generation of financial statements. SFIS standardizes financial reporting across DoD and allows revenues and expenses to be reported by programs that align with major goals, rather than basing reporting primarily on appropriation categories. It also enables decision-makers to efficiently compare programs and their associated activities and costs across DoD and provides a basis for common valuation of DoD programs, assets, and liabilities.

4.1.2. Volume 1, Chapter 4 prescribes the requirements for SFIS and Standard Line of Accounting/Accounting Classification compliance for DoD business systems to meet statutory requirements and additional requirements implemented by the OMB and the Treasury. As stated in Volume 1, Chapter 4, subparagraph 1.3.8, the Treasury Bureau of the Fiscal Service publishes the USSGL which is updated annually in the TFM. TFM Volume 1 Supplements include the latest USSGL Bulletin and seven major sections that comprise the Treasury USSGL guidance: (I) Chart of Accounts, (II) Accounts and Definitions, (III) Account Transactions, (IV) Account Attributes for USSGL Proprietary Account and Budgetary Account Reporting, (V) Crosswalks to Standard External Reports for Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) Reporting, (VI) Crosswalks to Reclassified Statements for Reporting, and (VII) GTAS Validations and Edits for Reporting. Refer to the Office of the Deputy Chief Financial Officer SFIS website, the authoritative source for the DoD Standard Chart of Accounts (including point accounts), the Transaction Library and data element definitions when recording financial transactions related to environmental and disposal liabilities and environmental contingent liabilities.

4.2 Performing Roll Forward Procedures

4.2.1. Environmental and disposal liabilities reported in the financial statements must reflect the liability as of the Balance Sheet date (i.e., as of September 30, or as of June 30), not an earlier date. Thus, when the annual evaluation of the environmental and disposal liabilities is performed as of a date earlier than September 30, DoD Components must develop, document, and execute a process for performing roll forward procedures. These procedures are to determine if any changes that meet the “probable” and “reasonably estimable” criteria occurring during the roll forward period have a significant impact (see Appendix A) on the estimates to be reported as of September 30. To limit the time period covered by the roll forward procedures, DoD Components need to complete a robust cost estimation process at least as recently as June 30 of each year. Subsequent significant changes that have occurred between June 30 and September 30 must be reflected in the environmental and disposal liability reported as of the Balance Sheet date. To assist DoD Components with segmenting their universe to identify subsets of environmental and disposal liability cleanup sites that may not require a reassessment during the roll forward period, a decision tree has been developed and included in Figure 1.

4.2.2. While performing the roll forward procedures, each DoD Component must identify and assess any potential qualifying events to determine their significance to reported financial
To roll forward the environmental and disposal liability for event-driven liabilities, the DoD Component must consider:

4.2.2.1. Whether the process for developing supporting justification to determine the significance of a roll forward event may not be as robust as the process for developing supporting justification produced to support the initial estimates or annual evaluation. Sufficient evidence must be available to support the roll forward assessments.

4.2.2.2. Establishing or adjusting liabilities for discoveries/changes occurring in the roll forward period based on prior experience with similar sites and/or conditions for the total cost of cleanup. If several similar sites and/or conditions are considered with no single scenario more likely than any other, the scenario with the minimum associated amount in the range should be used.

4.2.2.3. Macroeconomic factors (e.g., raw materials, regulatory standards, technology) that changed during the roll forward period to determine if they will have a significant impact to the overall cost estimates.

4.2.2.4. Establishing, documenting, and performing roll forward procedures that can sufficiently support the determination of whether any significant changes occurred or alternatively those changes are insignificant. Even if the result of those procedures determines that very few or no events are significant to the financial statements and/or balances as of September 30, the documented process for arriving at that determination will need to be available for auditor’s review.

4.2.3. To update the environmental and disposal liability balance for asset-driven liabilities during the roll forward period of July, August and September, DoD Components must consider changes in asset inventories and/or significant occurrence impacting established cost factors developed to predict disposition of non-routine, environmentally hazardous waste at the point of PP&E asset disposal.
Figure 1. Roll Forward Decision Tree for Event-Driven Environmental and disposal Liabilities

Note: This decision tree assumes an interim analysis was performed as of June 30.

*New activities could include: change in project scope, change in standards or regulations, new technology, new obligation, change in DoD policy, new or additional contamination discovered.

**See Appendix A for determination of significant amounts in the roll forward period.
* Figure 2. Roll Forward Decision Tree for Asset-Driven Environmental and Disposal Liabilities

Note: This decision tree assumes an interim analysis was performed as of June 30.

*New activities could include: change in capacity, change in standards or regulations, new technology, new obligation, change in DoD policy, new or additional contamination discovered.

**See Appendix A for determination of significant amounts in the roll forward period.
Appendix A. Quantitative Determination of Significant Amounts in the Roll Forward Period

DoD Components should use this quantitative approach to determine what are considered significant amounts in the roll forward period. Significant amounts that have occurred between June 30 and September 30 must be reflected in environmental and disposal liability through an adjustment to the environmental and disposal liability as of September 30. To assist DoD Components with segmenting their cleanup universe to identify subsets of environmental and disposal liability cleanup sites that may not require a reassessment during the roll forward period, decision trees have been developed and included in Figure 1 and Figure 2. DoD Components should leverage Figure 1 and Figure 2 or methods consistent with Figure 1 and Figure 2. The intent of Figure 1 and Figure 2 is to assist DoD Components with segmenting their cleanup universe to identify high risk subsets, subsequently reducing the overall effort required to implement roll forward procedures. Subsequently, DoD Components must assess qualifying events to determine significance to the reported financial statement balances.

Approach to calculate significant amount threshold:

1. Total Environmental and Disposal Liabilities balance on the DoD Component’s financial statements as of the most recently reported period.
2. This materiality amount is equivalent to Performance Materiality as described in the GAO FAM §230.12.
3. Based on OUSD’s judgment to compensate for the potential aggregation of amounts at the DoD Component level.

Environmental & Disposal Liability Balance\(^1\) $xxxxx

Multiply by 1% \(\times 0.01\)

Materiality\(^2\) $xxxxx

Multiply by no more than 3%\(^3\) \(\times 0.03\)

Significant Amount Threshold $xxxxx

Note: DoD Components must use the calculated significant amount threshold or $1 million, whichever is greater.

The significant amount threshold calculation has been developed to compensate for the possible aggregation of misstatements in the recorded liability amount by a DoD Component (i.e., misstatements for multiple environmental and disposal liability sites) and among DoD Components at the consolidated DoD financial statement level. While individual misstatements may not be material to the financial statements, when aggregated with other misstatements they could result in a material misstatement.

---

\(^1\) Total Environmental and Disposal Liabilities balance on the DoD Component’s financial statements as of the most recently reported period.

\(^2\) This materiality amount is equivalent to Performance Materiality as described in the GAO FAM §230.12.

\(^3\) Based on OUSD’s judgment to compensate for the potential aggregation of amounts at the DoD Component level.
VOLUME 4, CHAPTER 14: “PAYMENT INTEGRITY”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated May 2020 is archived.

CHAPTER 14

PAYMENT INTEGRITY

1.0 GENERAL

1.1 Overview

This chapter establishes policy for the Department of Defense’s (DoD) Payment Integrity portfolio. The portfolio comprises separate Payment Integrity programs that report improper payment and unknown payment risk assessments or statistical estimates. These programs include disbursements related to pay and benefits, commercial goods and services, health care, military retirement, and travel, which collectively encompass the majority of payments made by DoD annually in accordance with the Payment Integrity Information Act of 2019 (PIIA). Refer to the Federal Government PaymentAccuracy.gov website for a complete listing of DoD Payment Integrity programs. PIIA repealed the Improper Payments Information Act of 2002, the Improper Payments Elimination and Recovery Act of 2010, the Improper Payments Elimination and Recovery Improvement Act of 2012, and the Fraud Reduction and Data Analytics Act of 2015. The requirements for compliance with PIIA are described in the Office of Management and Budget (OMB) Circular A-123, Appendix C, “Requirements for Payment Integrity Improvement,” and OMB Circular A-136, “Financial Reporting Requirements,” or their successor publications.

1.2 Purpose

The purpose of this policy is to provide guidance to the DoD Components (i.e., Military Services, Defense Agencies, DoD Field Activities, and Combatant Commands) to implement the requirements from the authorities identified in paragraph 1.3. This policy applies to all DoD Components who make “payments” (as defined in the PIIA).

1.3 Authoritative Guidance

1.3.1 Public Law, 116-117, PIIA

1.3.2. Title 31, United States Code, Section 3351 et. seq

1.3.3. OMB Circular No. A-123, Appendix C, “Requirements for Payment Integrity Improvement”

*2.0 DoD PROGRAM PAYMENT INTEGRITY ACTIVITIES BY PHASE

Programs with annual outlays greater than $10,000,000 will be classified into one of two possible categories: Phase 1 or Phase 2. Programs that are not likely to have an annual amount of improper payments (IP) plus an annual unknown payments (UP) above the statutory threshold (which is either (1) both 1.5 percent of program outlays and $10,000,000 of all program payments made during the fiscal year (FY) or (2) $100,000,000, regardless of the IP percentage of total...
program outlays) are referred to as being in Phase 1. If a program in Phase 1 determines that it is likely to annually make IPs plus UPs above the statutory threshold, then the program will move into Phase 2 the following year. Once in Phase 2, a program will have additional compliance requirements such as reporting an annual IP and UP estimate.

2.0.1. Phase 1 Payment Integrity Activities Performed by the DoD Components. PIIA requires that federal agencies assess all programs with annual outlays greater than $10,000,000 for IP risk at least once every three years. The purpose of an IP risk assessment is to adequately conclude whether the program is likely to make total annual IPs plus UPs above or below the statutory threshold, and thus, may be susceptible to significant improper payments for the given year.

2.0.1.1. If the IP risk assessment demonstrates that the program is not likely to make IPs plus UPs above the statutory threshold, then the program will not produce a statistically valid estimate in the following year and instead will conduct another IP risk assessment in three years.

2.0.1.2. An IP risk assessment is a tool that can help a program understand the points within the payment process that may be vulnerable to IPs and UPs. The results of the IP risk assessment help identify weaknesses in internal controls that, if strengthened, could prevent future IPs and UPs from occurring. Establishing and maintaining effective internal controls, including an internal control system that prevents IPs and UPs from being made and promptly detects and recovers any IPs that are determined to be recoverable, should be a priority.

2.0.1.3. Programs must perform an adequate reconciliation of any population used in the creation of the IP risk assessment to conclude on the likelihood of the program being susceptible to significant improper payments. The reconciliation process should be documented in the IP risk assessment. See the DoD Payment Integrity Risk Appetite Statement for further guidance on the allowable materiality threshold for what percentage of payments from a given universe must be reconciled for the sample population to be considered “complete.”

2.0.2. Phase 2 Payment Integrity Activities Performed by the DoD Components. If the results of a program’s IP risk assessment determine that the total annual IPs plus UPs for the program are likely to be above the statutory threshold, the program will report a statistically valid IP estimate and UP estimate in the subsequent FY in which the determination was made. Programs that report IP and UP estimates are referred to as being in ‘Phase 2’. The main purpose of an IP estimate is to reflect the annual estimated known IPs and UPs made by the program.

2.0.2.1. Sampling and Estimation Methodology Plan (S&EMP). Programs reporting IPs for the first time must produce a S&EMP. A program’s S&EMP should have a mechanism for identifying, accounting for, and estimating the annual IPs and the annual UPs separately. The program will be responsible for designing and documenting a S&EMP that produces an IP and UP estimate that is accurate and appropriate given program characteristics, and it will be the DoD Office of Inspector General’s (OIG) responsibility to evaluate whether the explanation provided by the program and the S&EMP without point estimates and confidence intervals around those estimates warrants compliance during the annual DoD OIG compliance
review. S&EMPs will be considered statistically valid if they produce point estimates and confidence intervals around those estimates. Components must work with a statistician to determine the appropriate confidence interval given program characteristics, available resources, and whether the estimate is reliable. If a program is unable to develop a S&EMP that produces a point estimate and confidence interval around the estimate, then it must include in their S&EMP a detailed explanation as to why it is not possible. Once a program has submitted a S&EMP to OMB, the program does not need to resubmit a S&EMP unless an update to the plan is warranted (i.e., if the program is impacted by any significant legislative, funding, structural, or guidance changes).

2.0.2.2. Programs must perform an adequate reconciliation of any population such as the disbursement systems used in the creation of the S&EMP. The reconciliation process should be documented in the S&EMP. See the DoD Payment Integrity Risk Appetite Statement for further guidance on the allowable materiality threshold for what percentage of payments from a given universe must be reconciled for the sample population to be considered "complete."

2.0.2.3. If a program is in Phase 2, has established a baseline, and reports an IP and UP estimate that is below the statutory threshold, it will automatically move back into Phase 1 the following FY unless the DoD OIG issued a noncompliance finding for the program in the previous year and the finding demonstrated that the program IP and UPs estimate was inaccurate and inappropriate given the program characteristics.

2.0.3. DoD Components will sample, conduct post payment reviews, estimate the amount of improper payments and unknown payments using statistically valid sampling methodologies, and report improper payments and unknown payments to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) for reporting in the consolidated DoD Agency Financial Report (AFR) and the annual OMB Payment Integrity data call.

*3.0 COMPLIANCE WITH PIIA REQUIREMENTS

3.0.1. The DoD OIG, on an annual basis, will evaluate the Department’s compliance with the requirements under PIIA. The Department is not considered compliant under PIIA if one or more of its programs are found non-compliant with one or more PIIA requirements. Refer to Table 14.1 for applicable compliance requirements by program phase classification type (Phase 1 or Phase 2). The six PIIA requirements are:

3.0.1.1. Published a Payment Integrity section in the Other Information section of the consolidated DoD AFR for the most recent fiscal year and posted the consolidated AFR and any accompanying materials required by OMB. The payment integrity information that is published on PaymentAccuracy.gov is the most common accompanying materials to the annual DoD AFR and the primary location for the comprehensive detailed Department payment integrity program information. OUSD(C) Financial Management Policy and Reporting (FMPR) achieves the OMB and PIIA statutory requirements by reporting the Department’s payment integrity information through OMB’s Annual Data Call, which OMB subsequently publishes on PaymentAccuracy.gov.
3.0.1.1.1. DoD Components are not required to include payment integrity information in their individual AFRs.

3.0.1.1.2. DoD Components must include the following statement under the Payment Integrity section in their individual AFRs: “DoD reports payment integrity information (i.e., improper payments) at the agency-wide level in the consolidated DoD Agency Financial Report. For detailed reporting on DoD payment integrity, refer to PaymentAccuracy.gov and to the Other Information section of the consolidated DoD AFR.”

3.0.1.2. Conducted a program-specific risk assessment for each DoD program or activity and adequately concluded whether the program is likely to make improper payments plus unknown payments above or below the statutory threshold.

3.0.1.3. Published improper payment and unknown payment estimates for programs susceptible to significant improper and unknown payments in the accompanying materials to the consolidated DoD AFR.

3.0.1.4. Published corrective action plans (CAPs) for each program susceptible to significant improper and unknown payments for which an estimate above the statutory threshold was published in the accompanying materials to the annual financial statement.

3.0.1.5. Published a reduction target for each DoD program that has reported improper payment and unknown payment estimates above the statutory threshold, demonstrated improvements to payment integrity or reached a tolerable improper payment or unknown payment rate, and developed a plan to meet the established reduction target.

3.0.1.6. Reported an improper payment and unknown payment estimate of less than 10 percent for each DoD program and activity for which an improper payment and unknown payment estimate was published in the accompanying materials to the annual financial statement.

3.0.2. To be fully compliant with the PIIA, the DoD Components must meet each of the applicable requirements based on the program’s phase classification described in subparagraph 2.1.

3.0.3. If the DoD OIG determines that a program is non-compliant for any requirement, then the final OIG report must provide concrete recommendations to the program or DoD Component with specific actions the program must take to achieve compliance with the requirement.

4.0 OUSD(C) ROLES/RESPONSIBILITIES

4.1 Financial Management Policy and Reporting Directorate Role

The Deputy Chief Financial Officer designated the FMPR Directorate as the Executive Agent (EA) for the DoD Payment Integrity portfolio. As the EA for the DoD Payment Integrity portfolio, the FMPR Directorate provides oversight to the DoD Components to ensure compliance with the authoritative guidance listed in paragraph 1.3. Additionally, OUSD(C), FMPR must be notified by the audit agency of any stand-alone audits regarding Payment Integrity.

4.2 FMPR Directorate Responsibilities

4.2.1. Interpret and provide proactive Payment Integrity related guidance and strategy to the DoD Components to ensure compliance with the authoritative guidance listed in section 3.0.

4.2.2. Review, collaborate and coordinate Senior Executive approval (as appropriate) for the DoD Components’ performance and execution of their program-specific risk assessments in determining the susceptibility to significant improper and unknown payments.

4.2.3. Review, collaborate and coordinate Senior Executive approval (as appropriate) for the DoD Components’ statistical sampling plans and if required, submit them to OMB.

4.2.4. Coordinate progress in reducing monetary loss, and compile and submit quarterly High-Priority Program Quarterly Payment Integrity Scorecard reports to OMB on DoD programs and activities reporting more than $100 million projected in improper payments that resulted in monetary losses that are designated as “high-priority” by OMB.

* 4.2.5. Establish and report baselines and subsequently collaborate with DoD Components to establish reduction targets and develop a plan to meet the reduction targets for applicable program(s).

4.2.6. Review, adjudicate, and consolidate the DoD Components’ payment integrity data and report the consolidated results in the Payment Integrity section of the consolidated DoD AFR and to OMB through their Annual Data Call.

4.2.7. Review the DoD Components’ CAPs to ensure they are complete and link planned actions and improper payments and unknown payments to their root causes.

4.2.8. Review the DoD Components’ CAP milestones to track and monitor progress.

4.2.9. Prepare and submit all DoD-wide reports regarding Payment Integrity.
4.2.10. Serve as the primary liaison for annual DoD OIG performance audits and Government Accountability Office (GAO) audits to ensure that all requested information is transmitted to the auditor in a timely manner and that the auditor recommendations are implemented.

4.2.11. Provide administrative and technical support to the DoD PIIA Senior Accountable Officials (SAOs) Steering Committee. This committee comprises SAOs from the Military Services and several Defense Agencies responsible for proactive oversight of the DoD Payment Integrity program. The SAO Steering Committee implements best practices, monitors performance, and drives actions for achieving compliance with PIIA. The OUSD(C) FMPR schedules the committee meetings; prepares agendas and briefing materials; prepares meeting minutes; tracks action items to completion; and communicates necessary information to Committee members and stakeholders.

4.2.12. Ensure that the policy contained within the DoD Financial Management Regulation regarding Payment Integrity is current.

4.2.13. Retain documentation submitted by the DoD Components. Refer to Volume 1, Chapter 9, for additional information on financial records retention.

5.0 DoD COMPONENT ROLES/RESPONSIBILITIES

5.1 DoD Components’ Role

The DoD Components ensure that their payments are valid, accurate, and complete. Additionally, the DoD Components ensure that their payments are subjected to post-payment reviews that align with the Department’s Payment Integrity lines of effort.

5.2 DoD Components’ Responsibilities

5.2.1. For each DoD program under Phase 1, conduct a program-specific risk assessment to determine if the DoD program or activity is susceptible to significant improper payments.

5.2.2. For each DoD program under Phase 2 that has been determined to be susceptible to significant improper payments, develop a statistically valid S&EMP. In addition, implement the S&EMP to produce statistically valid improper payment and unknown payment estimates for all DoD programs and activities determined to be susceptible to significant improper payments.

5.2.2.1. For the payment integrity programs in phase 2, the Defense Finance and Accounting Service (DFAS) Enterprise Solutions and Standards, Enterprise Accounting and Audit Support Office (EAAS) performs most of the annual post-payment reviews, with coordinated support and concurrence from the DoD Components and executive oversight from the OUSD(C), FMPR Payment Integrity team.

5.2.2.1.1. The Army performs annual post-payment reviews of its travel payments and vendor payments that are outside the continental United States.
5.2.2.1.2. The Department of the Air Force performs annual post-payment reviews of its travel payments that are made from the Reserve Travel System.

5.2.2.2. Ensure all payments are subject to improper and unknown payment testing either internally or through the sampling methodologies and post-payment review processes performed by the DFAS, Enterprise Solutions and Standards, EAAS Office. The PIIA does not require agencies to test payments made by a Federal agency to another Federal agency. Therefore, DoD Components are not required to test for intergovernmental and intragovernmental payments transactions and these payments may be excluded from all testing populations.

5.2.2.3. Report annual results of improper payments and unknown payments to OUSD(C), FMPR, for adjudication, consolidation, and reporting in the Payment Integrity section of the consolidated DoD AFR and to OMB through their Annual Data Call. DoD Intelligence Agencies must follow the Office of the Director of National Intelligence, National Intelligence Program, PIIA guidelines and reporting requirements. Classified payments are excluded from public reporting.

5.2.3. For programs or activities determined to be susceptible to significant improper payments and unknown payments above the statutory threshold designated by OMB, identify the root causes of improper payments and unknown payments and develop cost-effective CAPs that eliminate the root causes of improper payments and unknown payments and prevent and reduce improper payments and unknown payments.

* 5.2.3.1. Submit results on a quarterly basis to OUSD(C), FMPR, for consolidation and reporting in accordance with OMB for high-priority programs. This designation is for programs with improper payments resulting in monetary losses that exceed $100 million annually. High-priority programs must provide quarterly Payment Integrity Scorecard reporting on PaymentAccuracy.gov.

5.2.3.2. Measure the effectiveness and progress of each CAP by assessing the results of actions taken to eliminate the root causes of improper payments and unknown payments.

5.2.4. Implement a cost-effective payment recovery program to recover improper overpayments that resulted in monetary losses.

5.2.5. Support the annual DoD OIG performance audit and relevant GAO audits in a timely manner by furnishing all required provided-by-client documentation, providing responses to auditor’s inquiries, and implementing auditor recommendations.

5.2.5.1. Provide support for all ad-hoc requests from external oversight bodies (i.e., OMB, GAO, and Congress).

5.2.5.2. Notify OUSD(C), FMPR of any stand-alone audits regarding Payment Integrity that directly impact their Component.
5.2.6. Use the DNP Initiative resources to review payment or award eligibility for purposes of identifying and preventing improper payments.

5.2.7. Retain documentation submitted by the DoD Components. Refer to Volume 1, Chapter 9, for additional information on financial records retention.

6.0 OMB Circular No. A-123, Appendix C

DoD Components must implement the requirements in OMB Circular No. A-123, Appendix C, or its successor publication. The following paragraphs of this section provide a cursory overview of the key Appendix C requirements.

6.0.1. Programs or Activities Not Susceptible to Significant Improper Payments. PIIA requires that all DoD programs or activities not currently reporting an annual improper payment estimate assess their risk for improper payments. If a DoD component determines that a program or activity is not susceptible to significant improper payments, the DoD component must reassess that program’s improper payment risk at least once every three years.

6.0.2. Programs or Activities Susceptible to Significant Improper Payments. If a DoD component determines a program to be susceptible to significant improper payments, the DoD component must estimate and report improper payments for that program annually.

6.0.3. Annual Improper Payment Estimates. In accordance with PIIA, DoD programs that are determined to be susceptible to significant improper payments must produce a statistically valid estimate of the improper payments and unknown payments made.

6.0.4. Annual Reporting. Most payment integrity reporting requirements are met through annual data requests from OMB and by reporting data in the consolidated DoD AFR. For more details on annual payment integrity reporting, see paragraph 7.0 for a summary of OMB Circular A-136 reporting requirements.

6.0.5. High-Priority Programs. PIIA requires OMB to designate the programs with the most egregious cases of improper payments and unknown payments as high-priority; and requires those programs to submit semi-annual or quarterly actions to track the progress towards reducing improper payments and unknown payments. Refer to subparagraph 7.0.2 for more information on the reporting requirements for high-priority programs.

6.0.6. Preventing Improper Payments. If a DoD Component determines that a program or activity is susceptible to significant improper payments, the DoD component must identify the root causes of the improper payments and unknown payments and implement appropriate corrective actions to prevent and reduce these types of payments.

6.0.7. Internal Control Over Payments. As DoD Components implement Appendix C, they should approach improper payments and unknown payments with an Enterprise Risk Management framework in mind and link agency efforts in establishing internal controls and
preventing improper payments and unknown payments. For more information see OMB Circular No. A-123, Appendix A, “Management of Reporting and Data Integrity Risk.”

6.0.8. Payment Recovery Audits. One fundamental requirement that DoD Components must meet is to recover any Federal dollars that are a monetary loss to the Government unless legislation specifically prevents such recovery. Monetary loss to DoD represents overpayments such as duplicate payments or amounts that should not have been paid and can be recovered. PIIA requires any DoD program or activity that expends at least $1 million during the year to implement payment recovery audits, if cost effective to the agency, in order to recover improper payments. Volume 10, Chapter 22, provides additional detail on payment recovery audits. The requirement to conduct payment recovery audits is independent of whether a program is susceptible to significant improper payments.

6.0.9. Annual Inspector General Compliance Review. The PIIA contains an important component of accountability to the entire spectrum of improper payment efforts. Every year, the DoD OIG reviews DoD Components’ improper payment reporting in the consolidated DoD AFR and any accompanying material (such as the information provided on PaymentAccuracy.gov) to determine if the agency complies with PIIA and OMB guidance.

6.0.10. The Do Not Pay (DNP) Initiative. The DNP Initiative encompasses multiple resources that are designed to help DoD Components review payment eligibility for purposes of identifying and preventing improper payments.

* 6.0.1.1. Confirmed Fraud Reporting. As part of the annual OMB Payment Integrity reporting requirements, OUSD(C) FMPR collaborates with the DoD Components to report FY confirmed fraud results. It is important to note the classification of confirmed fraud is determined to be fraudulent through the adjudication process. Confirmed fraud does not include transactions determined by management to be anomalous or indicative of potential fraud that were referred to the DoD OIG or the Department of Justice, unless the appropriate judicial or adjudicative process has made the determination.

*7.0 OMB Circular No. A-136

The Department must implement the requirements in OMB Circular No. A-136, or its successor publication. The following paragraphs of this section provide a cursory overview of the key PIIA reporting requirements.

7.0.1. The Department must complete the Annual Data Call issued by OMB and provide a link to PaymentAccuracy.gov in the annual consolidated AFR. The Department is responsible for: (1) contacting OMB (PaymentIntegrity@omb.eop.gov) by September 1st of the reporting year to gain access to the Annual Data Call and (2) reviewing the Annual Data Call guidance to determine which requirements are applicable. If the Department performs recovery audits and the recovery audit contractor recommends actions that can be taken to prevent overpayments, the Department should report on the actions taken in the consolidated AFR.
7.0.2. Beginning in FY 2023, high-priority programs will be required to provide in the annual consolidated AFR a summary of their payment integrity activities and results. The summary must include:

7.0.2.1. A description of improper payments made by the agency; an estimate of the improper payment amount and rate; an explanation of the causes of improper payments; and any major actions taken or planned to mitigate those causes;

7.0.2.2. An explanation for changes in payment integrity methodologies, activities, or results that occurred during the reporting period; and

7.0.2.3. A hyperlink for PaymentAccuracy.gov. The summary must not conflict with data that is available on PaymentAccuracy.gov, which is intended to be the complete source for all qualitative, quantitative, and contextual payment integrity information.

8.0 DEFINITIONS

*8.1 Baseline

A baseline is a starting point or benchmark against which future progress can be assessed or compared. If a program had a 24-month reporting cycle where no significant changes occur in the S&EMP, the program will most likely be considered to have established a baseline.

8.2 Improper Payment

An improper payment is any payment that should not have been made or that was made in an incorrect amount under statutory, contractual, administrative, or other legally applicable requirements. Incorrect amounts are overpayments or underpayments that are made to eligible recipients (including inappropriate denials of payment or service, any payment that does not account for credit for applicable discounts, payments that are for the incorrect amount, and duplicate payments). An improper payment also includes any payment that was made to an ineligible recipient or for an ineligible good or service (as defined in the PIIA), or payments for goods or services not received (except for such payments authorized by law). In addition, when an agency’s review is unable to discern whether a payment was proper as a result of insufficient or lack of documentation, this payment must also be considered an improper payment.

8.3 Payment

The term payment in this chapter means any transfer or commitment for future transfer of Federal funds such as cash, securities, loans, loan guarantees, and insurance subsidies, to any non-Federal person, non-Federal entity, or Federal employee, that is made by a Federal agency, a Federal contractor, a Federal grantee, or a governmental or other organization administering a Federal program or activity.
*8.4 Recovery Audit

A recovery audit is the review and analysis of an agency’s or program’s accounting and financial records, supporting documentation, and other pertinent information supporting its payments, that is specifically designed to identify overpayments.

8.5 Root Cause

Root causes may be due to anomalies, random events, or due to process vulnerabilities and other systemic factors (e.g., failure to obtain documentation or failure to update recipient eligibility). A root cause is the origin of a problem or condition that led to the failure in a program or activity that resulted in an improper payment. Root cause analysis must identify the internal control deficiency or underlying problems and events that directly contributed to the improper payment.

8.6 Significant Improper Payments

Significant improper payments are defined as gross annual improper payments and unknown payments (i.e., the total amount of monetary loss of improper payments, non-monetary loss improper payments, and unknown payments) in the program exceeding: (1) both 1.5 percent of program outlays and $10 million of all reported program or activity payments made during the fiscal year reported, or (2) $100 million (regardless of the improper payment percentage of total program outlays).

*8.7 Tolerable Improper Payment and Unknown Payment Rate

The Tolerable Improper Payment and Unknown Payment Rate is the improper payment and unknown payment estimate achieved with a balance of payment integrity risk and controls. The tolerable improper payment and unknown payment rate for a program is determined by agency senior management and often includes improper and unknown payments, which are unavoidable, cost prohibitive, and sometimes mission prohibitive for the agency to prevent. If a program’s tolerable Improper Payment and Unknown Payment Rate is above the statutory threshold, then the Improper Payment and Unknown Payment reduction target will eventually be set to equal that tolerable IP and UP rate.

*8.8 Unknown Payment

An unknown payment is a payment that could be either proper or improper, but the agency is unable to discern whether the payment was proper or improper because of insufficient or lack of documentation.

CHAPTER 15

NET POSITION

1.0 GENERAL (1501)

1.1 Overview (150101)

Net Position is the difference between the total assets and total liabilities recognized in the Federal Government’s or a component reporting entity’s Balance Sheet. Net Position may be positive (assets greater than liabilities) or negative (assets less than liabilities). Net Position accounts represent the net investment of the United States (U.S.) Government in the Department of Defense (DoD) or to the reporting entities of the DoD. As such, for the DoD agency-wide statements, it includes all operations of DoD activities, including General Funds, Working Capital Funds, and Special and Trust funds. The general policy to account for the Net Position of the U.S. Government in DoD is contained in this chapter. Posting entries for the Net Position accounts can be found at the DoD United States Standard General Ledger (USSGL) Transaction Library.

1.2 Purpose (150102)

This chapter provides descriptions of the USSGL accounts that comprise Net Position on the Balance Sheet and the Statement of Changes in Net Position (SCNP) financial statements. It also outlines the reporting of prior-period adjustments on the financial statements.

*1.3 Authoritative Guidance (150103)

The financial management policy and related requirements set forth in this chapter are in accordance with the applicable provisions of:

1.3.1. Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standards (SFFAS) 21, “Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources;”

1.3.2. FASAB SFFAS 27, “Identifying and Reporting Funds from Dedicated Collections;”

1.3.3. FASAB SFFAS 43, “Funds from Dedicated Collections: Amending Statement of Federal Financial Accounting Standards 27, Identifying and Reporting Earmarked Funds;”

1.3.5. The U.S. Department of the Treasury (Treasury) USSGL, a supplement of the Treasury Financial Manual.
2.0 STANDARD GENERAL LEDGER ACCOUNTS FOR NET POSITION (1502)

2.1 Unexpended Appropriations – Cumulative, Account Number 310000 (150201)

This account reports the amount of unexpended appropriations after fiscal year-end closing. The balance in this account remains the same during the fiscal year. Activity to increase or decrease unexpended appropriations is reflected in other USSGL accounts in the 310000 series. At year-end, the nominal USSGL accounts in the 310000 series are closed to this USSGL account, including Special and Trust funds that receive appropriations from the General Fund of the U.S. Government. See the DoD USSGL Transaction Library (Transactions F300.XXX – F499.XXX) for year-end closing entries. DoD Transaction Code F342.XXX must be used to record the closing of fiscal year activity to unexpended appropriations. During the fiscal year, the net of debit and credit balances in the 310000 series accounts reflects the total remaining balance of unused appropriations. Special and Trust funds that receive appropriations from the General Fund of the U.S. Government are to record this account. Account 310000 does not close at year-end.

2.2 Unexpended Appropriations – Appropriations Received, Account Number 310100 (150202)

This account reports the amount of new appropriations received during the fiscal year. Special and Trust funds do not use this USSGL account to record appropriations of dedicated collections. However, Special and Trust funds that receive appropriations from the General Fund of the U.S. Government are to use this account.

2.3 Unexpended Appropriations – Transfers-In, Account Number 310200 (150203)

This account reports the amount of unexpended appropriations, from current or prior years, transferred in during the fiscal year. Special and Trust funds that receive appropriations from the General Fund of the U.S. Government are to use this account for transfers of unexpended appropriations.

2.4 Unexpended Appropriations – Transfers-Out, Account Number 310300 (150204)

This account reports the amount of unexpended appropriations, from current or prior years, transferred out during the fiscal year. Special and Trust funds that receive appropriations from the General Fund of the U.S. Government are to use this account for transfers of unexpended appropriations.

2.5 Unexpended Appropriations – Prior-Period Adjustments Due to Corrections of Errors - Years Preceding the Prior Year, Account Number 310500 (150205)

This account reports the amount of net increase or decrease to unexpended appropriations due to errors in years preceding the prior year's financial statements that resulted from mathematical mistakes, mistake in the application of accounting principles, or oversight or misuse of facts that existed at the time the financial statements were prepared. This account is only to be
used when comparative financial statements are being presented. Although the normal balance for this account is debit, it is acceptable in certain instances for this account to have a credit balance.

2.6 Unexpended Appropriations – Adjustments, Account Number 310600 (150206)

This account reports the amount of adjustments during the fiscal year to unexpended appropriations from current or prior years. Examples of adjustments include rescissions, and cancellation of expired appropriations. Although the normal balance for this account is debit, it is acceptable in certain instances for this account to have a credit balance.

2.7 Unexpended Appropriations – Used, Account Number 310700 (150207)

This account reports the amount of reduction during the fiscal year to unexpended appropriations from current or prior years that is paired with USSGL account 570000, “Expended Appropriations,” when goods and services are received or benefits provided. Special and Trust funds that receive appropriations from the General Fund of the U.S. Government are to use this account.

2.8 Unexpended Appropriations - Prior-Period Adjustments Due to Corrections of Errors, Account Number 310800 (150208)

This account reports the amount of net increase or decrease to unexpended appropriations due to errors in prior-period financial statements that resulted from mathematical mistakes, mistakes in the application of accounting principles, or oversight or misuse of facts that existed at the time the financial statements were prepared. (See DoD Transaction Code D-304.001, in the DoD USSGL Transaction Library.) Use USSGL account 310500, Unexpended Appropriations – Prior – Period Adjustments Due to Corrections of Errors – Years Preceding the Prior-Year for the amount of net increase or decrease to unexpended appropriations due to errors occurring in years preceding the prior-year’s financial statements. Although the normal balance for this account is debit, it is acceptable in certain instances for this account to have a credit balance.

2.9 Unexpended Appropriations - Prior-Period Adjustments Due to Changes in Accounting Principles, Account Number 310900 (150209)

This account reports the amount of net increase or decrease to unexpended appropriations from a prior period due to a change from one generally accepted accounting principle to another one that can be justified as preferable or the adoption of a new FASAB standard. (See DoD Transaction Code D-302.001, in the DoD USSGL Transaction Library.) Although the normal balance for this account is debit, it is acceptable in certain instances for this account to have a credit balance.
2.10 Cumulative Results of Operations, Account Number 331000 (150210)

This account reports the net difference since the inception of the activity between (1) expenses and losses, and (2) financing sources including appropriations, revenues, and gains. Although the normal balance for this account is credit, it is acceptable in certain instances for this account to have a debit balance. Account 331000 does not close at year-end.

3.0 ACCOUNTING POLICY FOR NET POSITION (1503)

3.1 Activities Financed By Appropriations (150301)

Activities whose operations are financed by appropriations must show the results of their operations as reductions to the Unexpended Appropriations account on a transaction basis and as changes in the Cumulative Results of Operations account with respect to the equity effect of transactions. The Unexpended Appropriations account is increased for the receipt of appropriations or other appropriation like resources and reduced for amounts expended for assets or operating expenses, and any appropriation withdrawals.

3.2 Activities Financed by Revenues (150302)

Activities whose operations are financed by revenues, generally defined as exchange revenue, must have their results of operations reflected as increases or decreases to the Cumulative Results of Operations account, which will include transfers of assets, which are recognized as financing sources. Appropriations received for a specific funding purpose will be accounted for in the Unexpended Appropriations account until used as a financing source.

*4.0 RECOGNITION IN FINANCIAL STATEMENTS (1504)

The Component reporting entity’s Net Position accounts are Unexpended Appropriations and Cumulative Results of Operations and each must be shown in the consolidated Balance Sheet and SCNP. See Volume 6B, “Form and Content of the Department of Defense Audited Financial Statements.”

4.1 Unexpended Appropriations (150401)

This amount includes the portion of the entity's appropriations represented by undelivered orders and unobligated balances. Unexpended appropriations on the Balance Sheet must equal unexpended appropriations on the SCNP. Unexpended appropriations attributable to Funds from Dedicated Collections, if material, must be shown separately on the face of the Balance Sheet and should equal unexpended appropriations in the notes to the financial statements as prescribed in OMB Circular A-136.

4.2 Cumulative Results of Operations (150402)

This amount represents the net results of operations since inception plus the cumulative amount of prior-period adjustments. This includes the cumulative amount of donations and
transfers of assets in and out without reimbursement. Cumulative results of operations on the Balance Sheet should equal cumulative results of operations on the SCNP. Cumulative results of operations attributable to Funds from Dedicated Collections, if material, must be shown separately on the face of the Balance Sheet and should equal the cumulative results of operations in the Funds from Dedicated Collections Note, in accordance with SFFAS 27 as amended.

5.0 ACCOUNTING FOR NET POSITION (1505)

Transactions affecting net position frequently require a compound entry; that is, entries must be made in both the proprietary (asset, liability, revenue, expense, and equity) and the budgetary accounts. Entries to the proprietary accounts normally require compound entries to budgetary accounts in the 400000 series of accounts. See the DoD USSGL Transaction Library for the listing of the transaction postings to the 300000 series accounts. Entries that affect direct program Delivered Orders, Paid and Unpaid must also include postings to Appropriation Used and Unexpended Appropriation.

6.0 CORRECTION OF AN ERROR OR A CHANGE IN ACCOUNTING PRINCIPLE (1506)

6.1 Errors in Financial Statements (150601)

Errors in financial statements result from mathematical mistakes, mistakes in the application of accounting principles, or oversight or misuse of facts that existed at the time the financial statements were prepared. When errors are discovered after the issuance of financial statements, and if the financial statements would be materially misstated absent correction of the errors, corrections should be made as follows:

6.1.1. If only the current period statements are presented, then the cumulative effect of correcting the error should be reported as a prior-period adjustment. The adjustment should be made to the beginning balance of cumulative results of operations, in the SCNP.

6.1.2. If comparative financial statements are presented, then the error should be corrected in the earliest affected period presented by correcting any individual amounts on the financial statements. If the earliest period presented is not the period in which the error occurred and the cumulative effect is attributable to prior periods, then the cumulative effect should be reported as a prior-period adjustment. The adjustment should be made to the beginning balance of cumulative results of operations, in the SCNP for the earliest period presented.

6.1.3. The nature of an error in previously issued financial statements and the effect of its correction on relevant balances should be disclosed. Financial statements of subsequent periods need not repeat the disclosures.

6.1.4. Prior-period financial statements should only be restated for corrections of errors that would have caused any statements presented to be materially misstated. See SFFAS 21 for additional guidance.
6.2 Changes in Accounting Principles (150602)

A change in accounting principle is a change from one generally accepted accounting principle to another one that can be justified as preferable. Changes in accounting principles also include those occasioned by the adoption of new federal financial accounting standards. Unless otherwise specified in the transition instructions section of a new FASAB standard, for all changes in accounting principles that would have resulted in a change to prior-period financial statements:

6.2.1. The cumulative effect of the change on prior periods should be reported as a “change in accounting principle.” The adjustment should be made to the beginning balance of cumulative results of operations in the SCNP for the period that the change is made.

6.2.2. Prior-period financial statements presented for comparative purposes should be presented as previously reported; and

6.2.3. The nature of the changes in accounting principle and its effect on relevant balances should be disclosed in the current period. Financial statements of subsequent periods need not repeat the disclosure. See SFFAS 21 for additional guidance.
### SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

The previous version dated March 2012 is archived.

CHAPTER 16

REVENUE AND OTHER FINANCING SOURCES, GAINS, AND LOSSES

*1.0 GENERAL (1601)

1.1 Purpose (160101)

This chapter describes the accounting principles and concepts that the Department of Defense (DoD) Components must follow to account for revenues, other financing sources, gains, and losses. Expenses are discussed in Chapter 17. Losses are discussed in both this chapter and Chapter 17 because the same type of transaction sometimes results in a gain and at other times a loss, e.g., disposition of real property at a price above or below the book value. The “Table of Transactions” in Appendix A assists in classifying exchange and nonexchange revenues, other financing sources, and gains and losses. Also see Volume 6B for information about how to report revenue on the financial statements.

1.2 Authoritative Guidance (160102)

The authoritative source for accounting guidance on Revenue and Other Financing Sources is *Statement of Federal Financial Accounting Standards (SFFAS) 7*, “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting.” Additional guidance is promulgated by the Department of the Treasury (Treasury) on the *United States Standard General Ledger (USSGL)* website. USSGL information is adapted for the DoD in the *Standard Financial Information Structure (SFIS)* DoD Standard Chart of Accounts and Transaction Library.

2.0 REVENUE (1602)

2.1 Sources of Revenue (160201)

Within the DoD, revenues are amounts earned as a result of normal operations while gains or losses relate to other transactions. Revenues result from the sale of, or reimbursement for, goods and services provided to DoD activities, other Federal Government agencies and the public. Revenue is an inflow of resources that results in an increase of assets, a decrease in liabilities (or a combination of both), and an increase in Net Position during a reporting period. Decreases in Liabilities for Advances and Prepayment after delivery of goods or services are examples of how decreases in liabilities impact revenue.

2.1.1. The distinction between revenues and gains or losses is whether the transaction is usual or recurring. Revenues are recorded at gross amount while gains are shown net of related costs.

2.1.1.1. Revenue comes from two sources: exchange transactions and nonexchange transactions.
2.1.1.2. Exchange revenues must be recognized when something of value is provided to another government entity or to the public.

2.1.1.3. Exchange revenue must be posted at the actual price that is received or receivable under the established pricing arrangement.

2.1.1.4. Nonexchange revenues are inflows of resources that the government demands or receives by donation.

2.1.1.5. Refunds received are recoveries of overpayments and, as such, are not revenue. Refunds can result from errors in paying invoices or items returned to vendor.

2.2 Special Revenue Situations (160202)

2.2.1. When appropriated funds are used to furnish goods and services on a reimbursable basis, the appropriated fund must have specific legal authority to retain the collections. Otherwise, the funds collected must be transferred to a miscellaneous receipt account. The expenses incurred in providing the goods or service must be recorded in the appropriate expense accounts and must not be reduced, even though the collection is deposited to miscellaneous receipts. See Volume 11A, Chapter 1 for additional information about reimbursements.

2.2.2. Revenue must be recorded in the financial records, collected promptly, and deposited in the appropriate Treasury account. Amounts received in advance of performance, however, must be accounted for as Liability for Advances and Prepayments until performance is accomplished in accordance with Chapter 12.

2.2.3. When revenues are generated by providing goods and services, the cost of the goods and services provided must be recorded as a cost of goods sold. Use of the cost of goods sold account is discussed in Chapter 17.

* 2.2.4. Revenues from Nonappropriated Funds Activities must be accounted for in accordance with Volume 13, Chapter 5. Nonappropriated Fund Activities are not included in federal financial statements and are considered as non-federal activities for budgetary and proprietary accounting purposes. They follow accounting standards promulgated by the Financial Accounting Standards Board rather than Federal Accounting Standards Advisory Board.

2.3 Exchange Revenue (160203)

2.3.1. Exchange revenues are inflows of resources to a governmental entity that the entity has earned. They arise from transactions that occur when each party to the transaction sacrifices value and receives value in return. Exchange revenue includes most user charges other than taxes. Exchange transactions also include those intragovernmental transactions where the price serves as a full or partial reimbursement for the costs incurred.

2.3.2. Revenue from exchange transactions must be recognized at the time goods or services are provided to the public or another government entity for a price.
2.3.3. Revenue from specific types of exchange transactions must be recognized as follows:

2.3.3.1. When services are provided to the public or another government entity (except for specific services performed to order under a contract), revenue must be recognized when the services are performed.

2.3.3.2. When goods are made to order under a contract (either short or long term), or specific services are performed under a contract (either short or long term), revenue must be recognized monthly in proportion to estimated total cost when goods and services are acquired to fulfill the contract. The amount of revenue to recognize is based on the ratio of the costs incurred to date to the total estimated costs of completing the contract. If a loss is probable (more likely than not), revenue must continue to be recognized in proportion to the estimated total cost and costs must continue to be recognized when goods and services are acquired to fulfill the contract. Thus, the loss must be recognized in proportion to total cost over the life of the contract.

2.3.3.3. When goods are kept in inventory and are available for sale to customers when ordered, revenue must be recognized when the goods are issued to the customer.

2.3.3.4. When services are rendered continuously over time or the right to use an asset extends continuously over time, such as the use of borrowed money or the rental space in a building, the revenue must be recognized in proportion to the passage of time or the use of the asset.

2.3.3.5. When an asset other than inventory is sold, any gain (or loss) must be recognized when the asset is delivered to the purchaser.

2.3.3.6. Revenue received from Nonappropriated funds is accounted for as non-federal revenue from transactions with the public. Nonappropriated funds are not included in federal financial statements.

2.3.4. The source of balances for some trust funds and special funds may not be predominantly nonexchange revenue, and the source of balances for working capital funds and trust revolving funds may not be predominantly exchange revenue. For example, the main source of balances for two major trust funds, the Civil Service Retirement and Disability Fund and the DoD Military Retirement Trust Fund, consists of exchange revenue and other financing sources. In such exceptional cases, the interest must be classified in the same way as the predominant source of funds, as exchange revenue. See SFFAS 7, paragraphs 154-160 for more information.
2.4 Nonexchange Revenue (160204)

2.4.1. Nonexchange revenues include income taxes, excise taxes, duties, fines, penalties, and other inflows of resources arising from the Government’s power to demand payments, as well as voluntary donations. Nonexchange revenue must be recognized when a reporting entity establishes a specifically identifiable, legally enforceable claim to cash or other assets. It is recognized to the extent that the collection is probable (i.e., more likely than not) and the amount is measurable (i.e., reasonably estimable).

2.4.2. Nonexchange revenue should be measured by the collecting entities, but should be recognized by the entities legally entitled to the revenue (the recipient entities). SFFAS 7, paragraphs 48 through 63 describe the application of this general standard.

3.0 OTHER FINANCING SOURCES (1603)

3.1 Other Financing Sources (160301)

The term “revenue” does not encompass all financing sources of government reporting entities, such as most of the appropriations they receive. These other financing sources do, however, provide resource inflows to government reporting entities, although not to the government as a whole. Other sources of financing include appropriations used, transfers of assets from other government entities, and imputed financing with respect to any cost subsidies.

*3.2 Appropriations (160302)

Until used, appropriations are not a financing source. They must be recognized in capital as “unexpended appropriations” (and among assets as “Fund Balance with Treasury” or “Fund Balance with Treasury Under a Continuing Resolution”) when made available for apportionment, even if a Treasury Warrant has not yet been received, or the amount has not been fully apportioned. Unexpended appropriations must be reduced for appropriations used and adjusted for other changes in budgetary resources, such as certain types of rescissions and transfers. The net increase or decrease in unexpended appropriations for the period must be recognized as a change in net position of the entity. When used, appropriations must be recognized as a financing source in determining net results of operations. Appropriations are used in operations when goods and services are received or benefits and grants are provided. Goods and services (including amounts capitalized) are considered received when a liability is established. Benefits are considered to be provided when the related liability is established. Grants are considered to be provided when grantees meet the requirements that allow them to use the grant funds.

3.3 Imputed Financing (160303)

Government entities often receive goods and services from other government entities without reimbursing the providing entity for all the related costs. In addition, government entities often incur costs such as pensions, which are paid in total or in part by other entities. These goods and services constitute subsidized costs to be recognized by the receiving entity to
the extent required by other accounting standards. An imputed financing source must be recognized equal to the imputed cost. This offsets any effect of imputed cost on net results of operations for the period. Within the DoD, imputed costs can include military personnel costs, pensions, other retirement benefits, other postemployment benefits, costs unreimbursed by tenants of real property, and environmental cleanup costs not reimbursed to the entity administering the fund when the administering fund is outside the DoD reporting entity.

3.4 Transfers (160304)

An intragovernmental transfer of cash or of a capitalized asset without reimbursement changes the resources available to both the receiving entity and the transferring entity. The receiving entity must recognize a transfer-in as an additional financing source in its result of operations for the period. Similarly, the transferring entity must recognize the transfer-out as a decrease in its result of operations. The value recorded must be the transferring entity’s book value of the asset. If the receiving entity does not know the book value, the asset must be recorded at its estimated fair market value as of the date of transfer. See Appendix A for more information on property, plant, and equipment (PP&E) transfers.

*3.5 Donations (160305)

Donations are contributions to the government, i.e., voluntary gifts of resources to a government entity by a non-federal entity. Donations may be financial resources, such as cash or securities, or non-financial resources such as land or buildings. Revenue arising from donations must be recognized for those inflows of resources that meet recognition criteria for assets and must be measured at the estimated fair market value of the contribution. In cases of the donation of assets classified as heritage assets or stewardship land, no amount is recognized because such PP&E would have been expensed when purchased. Multi-use heritage assets should be recognized at fair market value, similar to general PP&E. See Chapter 6 and Appendix A for additional information about real property donations and PP&E.

*3.6 Gains or Losses (160306)

When a transaction occurs with the public or another government entity for a price which is unusual or nonrecurring, a gain or loss must be recognized rather than revenue or expense so as to differentiate such transactions. Gains or losses result from the sale, exchange, trade or disposition of government assets, with the exception of inventory held for sale. The reclassification of excess, obsolete, or unserviceable inventory will generally result in a loss when revalued because the value is now less than the acquisition or moving average cost of the item. The amount of revaluation is recognized as a loss or gain in determining the net cost of operations. As a rule, any difference between the sales proceeds at more or less than the book value of an asset is recognized as a gain or loss when the asset is sold. This general rule applies to the sale of PP&E, receivables, investments, and other assets where the selling entity is entitled to retain the proceeds of the sale. In addition, the distinction between revenues and gains or losses is a matter of classification in the general ledger accounts and their presentation in financial statements. Revenues are commonly reported at their gross amount while gains or losses are shown net of related book value.
4.0 ACCOUNTING FOR REVENUES, OTHER FINANCING SOURCES, DONATIONS, TRANSFERS, AND GAINS AND LOSSES (1604)

4.1 Transaction Library (160401)

The DoD SFIS Transaction Library is the transaction library for recording business events for revenue and other financing sources within the DoD. Also see Volume 1, Chapter 7. Additional information about how to classify transactions is available in SFFAS 7 and Appendix A. The following series of accounts are the primary USSGL accounts used to record revenue, other financing sources transaction, donations, transfers, and gains and losses. Specific account definitions for all USSGL accounts and subaccounts are included in the DoD Standard Chart of Accounts.

*4.2 Exchange Revenue Accounts (160402)

4.2.1. Revenue From Goods Sold (510000). Use this account to record exchange revenue earned from the sale of purchased or finished goods processed for sale or use under a program of trading or manufacturing. When goods are kept in inventory so that they are available to customers when ordered, revenue must be recognized in the same accounting period that the goods are delivered to the customer, or in the case of Defense Working Capital Fund (DWCF) when the ordered goods are placed into an in-transit status, (consistent with Fee On Board Shipping Point revenue recognition). Performers (DoD activities providing goods and/or services at cost) include the DWCF activities, working capital funds within the Military Departments, working capital funds within the “Other Defense Organizations,” and construction agents, such as the United States (U.S.) Army Corps of Engineers. Customers include any DoD Component, organization, office or other element; non-DoD Federal Government agencies; others officially representing the Federal Government; and members of the public (as specified by law). Federal customer orders (funded requests for goods and services) provide budgetary resources to finance reimbursable operations; consequently, customer orders must be obligations of a Federal Government activity unless otherwise specified by law. Customer orders from non-federal entities do not become budgetary resources until collected. Customer orders from Nonappropriated Funds are accounted for as orders from non-federal entities.

4.2.2. Contra Revenue for Goods Sold (510900). Use this account to offset revenue for goods sold when collection of accrued revenue is not expected. Record amounts based on adjustments, returns, allowances, price redetermination, and refunds other than taxes where revenue is earned, but does not include credit losses.

4.2.3. Revenue From Services Provided (520000). This account is used to record exchange revenue earned from the sale of services provided, including sale of power and transportation. Most often associated with revenue earned by working capital funds, revenue posted to this account is generally recorded at the point of sale. When services are provided to the public or another government entity, revenue must be recognized in the same accounting period that the services are performed. Service providers include DWCF activities, working capital funds within the Military Department, working capital funds within the “Other Defense Organizations,” the U.S. Army Corps of Engineers, and appropriation funded activities.
Customers of the Department include any DoD Component, organization, office or other element; non-DoD Federal Government agencies and others officially representing the Federal Government; and members of the public (as specified by law). Federal customer orders (funded requests for goods and services) provide budgetary resources to finance reimbursable operations; consequently, customer orders must be obligations of a Federal Government activity unless otherwise specified by law. Customer orders from non-federal entities do not become budgetary resources until collected. Customer orders from Nonappropriated Funds are accounted for as orders from non-federal entities.

4.2.4. **Contra Revenue for Services Provided (520900)**. Use this account to offset revenue for services provided when collection of accrued revenue is not expected. Record amounts based on adjustments, returns, allowances, price redetermination, and refunds other than taxes where revenue is earned, but does not include credit losses.

4.2.5. **Interest Revenue - Other (531000)**. This account is used to record revenue earned from interest not associated with investments or borrowings/loans. Depending on the source of the funds, this revenue can be exchange or nonexchange revenue. For example, revenue resulting from interest charges on delinquent receivables is considered exchange revenue (refer to Chapter 3, Annex 1). For interest revenue transactions not related to investments, consult the SFIS Transaction Library.

4.2.6. **Interest Revenue - Investments (531100)**. This account is used to record investment interest revenue. Depending on the source of the funds used to make an investment, the revenue can be exchange or nonexchange revenue. For example, invested balances for the Civil Service Retirement and Disability Fund and DoD Military Retirement Trust Fund are predominantly derived from exchange revenue and other financing sources and the interest earned on those balances must be classified as exchange revenue.

4.2.7. **Contra Revenue for Interest Revenue - Investments (531800)**. Record a reduction in revenue for interest accrued on investments when realization is not expected.

4.2.8. **Contra Revenue for Interest Revenue - Other (531900)**. Record a reduction in other revenue for interest accrued not associated with investments or borrowings/loans when realization is not expected. Amounts recorded are based on abatements, adjustments, returns, allowances, or price redeterminations.

4.2.9. **Administrative Fees Revenue (532500)**. Record revenue from administrative fees to this account including revenue from administrative fees associated with collections on delinquent accounts (refer to Chapter 3, Annex 1).

4.2.10. **Contra Revenue for Administrative Fees (532900)**. Record a reduction in revenue for administrative fees when realization is not expected as defined in SFFAS 7, paragraph 41.

4.2.11. **Benefit Program Revenue (540000)**. Revenue received by agencies administering retirement plans, insurance plans, and other annuity programs are recorded to this
account. Employees of the Federal Government provide service to their employer in exchange for compensation, of which some is received currently (the salary); and some is deferred (pensions, retirement health benefits, and other retirement benefits). The financing of these benefits includes contributions paid by the employer entity to the retirement fund and is an inflow of resources to the retirement fund as part of this exchange transaction. It is a payment by the employer in exchange for the future provision of a pension or other retirement benefit to its employees. Therefore, it is exchange revenue of the entity that administers the retirement plan and, thus, is an offset to that entity’s gross cost in calculating its net cost of operations.

4.2.12. Contra Revenue for Benefit Program Revenue (540900). Record a reduction in revenue for a benefit program based on adjustments as stipulated by law not including credit losses.

4.2.13. Insurance and Guarantee Premium Revenue (550000). Revenue earned from insurance and guaranteed premiums. The premiums are recorded as exchange revenue in this account and any interest earned on investments made with premium revenue is therefore exchange revenue recorded to Account 531100.

4.2.14. Contra Revenue for Insurance and Guarantee Premium Revenue (550900). Record a reduction in revenue for an insurance and guarantee premium based on adjustments stipulated by law not including credit losses.

4.2.15. Other Revenue (590000). Use this account to record the amount of revenue received but not otherwise classified. For example, funds received for administering international and other agreements when the U.S. Government is reimbursed represent Other Revenue. Other uses of this account include the sale of stockpile materials or the cancellation of a receivable for a reimbursable activity.

4.2.16. Contra Revenue for Other Revenue (590900). Record a reduction in revenue recorded in account 590000 when realization is not expected to this account. Amounts recorded are based on adjustments, returns, allowances, price redetermination, and refunds other than taxes. Credit losses on other nonexchange revenue also are recorded in this account.

*4.3 Nonexchange Revenue Accounts (160403)

4.3.1. Nonexchange revenues that can be retained by the collecting entity in accordance with permanent provisions of law or through the authorization and/or appropriations process are not matched with costs because they are not earned in the operations process. Because they are inflows that finance operations, nonexchange revenues must be classified and recognized only in determining the overall financial results of operations for the period. See Volume 6B, Chapter 6, for information about how to report nonexchange revenue in the notes to the financial statements. Collections not authorized by law for retention and used as appropriation reimbursements may be considered exchange or nonexchange revenue and must be deposited to the General Fund of the Treasury as miscellaneous receipts.
4.3.2. **Interest Revenue - Other (531000)**. This account is used to record revenue earned from interest not associated with investments or borrowings/loans. Depending on the source of the funds used to make the investment, the revenue can be exchange or nonexchange revenue. For example, interest revenue resulting from the Military Housing Privatization Program is considered nonexchange revenue. For interest revenue transactions not related to investments, consult the SFIS Transaction Library.

4.3.3. **Interest Revenue - Investments (531100)**. This account is used to record investment interest revenue. Depending on the source of the funds used to make the investment, the revenue can be exchange or nonexchange revenue. Interest on securities held by trust and special funds (except trust revolving funds) is often nonexchange revenue because the investment is made with funds derived from the government’s sovereign authority. The key is the source of the funds used to make the investment, i.e., exchange or nonexchange. For example, invested balances for the U.S. Army Corps of Engineers’ Harbor Maintenance Trust Fund are predominantly derived from nonexchange revenue and the interest earned on those balances must be classified as nonexchange revenue.

4.3.4. **Penalties and Fines Revenue (532000)**. Record revenue derived from penalties and fines to this account. Penalties and fines revenue should be reported as a non-entity custodial activity in accordance with SFFAS 7, paragraphs 260 and 262. The custodial activity will be presented at net value on the Balance Sheet along with a corresponding amount recorded as a custodial liability. Collection and disposition of custodial revenue to the General Fund Receipt Account will not impact the Net Position of the collecting entity. Refer to Volume 6B, for additional information on reporting of custodial revenue. Refer to Chapter 3, Annex 1, for more information about penalties and administrative charges.

4.3.5. **Contra Revenue for Penalties and Fines (532400)**. Record an amount reflecting a reduction in revenue for penalties and fines when realization is not expected as defined in SFFAS 7, paragraph 41.

* 4.3.6. **Administrative Fee Revenue (532500)**. This account is used to record revenue associated with administrative fees assessed on delinquent receivables. Refer to Volume 4, Chapter 3, Annex 1, for more information about penalties and administrative charges.

4.3.7. **Donated Revenue - Financial Resources (560000)**. Record the donation of financial resources to a Federal Government entity from a non-federal source, for example, cash or securities. Donations should be measured at the estimated market value of the contribution.

4.3.8. **Contra Revenue for Donations - Financial Resources (560900)**. Record an amount reflecting a reduction in revenue for donated financial resources that are returned.

4.3.9. **Donated Revenue - Nonfinancial Resources (561000)**. Record the donation of nonfinancial resources to a Federal Government entity from a non-federal source, for example, land or buildings. Nonfinancial donations are calculated on the estimated fair market value at the time of the donation.
4.3.10. **Contra Donated Revenue - Nonfinancial Resources (561900)**. Record an amount reflecting a reduction in revenue for donated nonfinancial resources that are returned.

*4.4 Other Financing Sources (160404)*

Financing sources, other than exchange and nonexchange revenues, that provide inflows of resources that increase results of operations during the reporting period include expended appropriations, transfers of assets from other government entities, and financing imputed with respect to any cost subsidies. Financing outflows may result from transfers of an entity’s assets to other Government entities or from exchange revenues earned by the entity that must be transferred to the general fund or another government entity.

4.4.1. **Expended Appropriations (570000)**. This account is used to record the amount of appropriations used during the fiscal year when goods and services are received or benefits are provided. Special and trust funds that receive appropriations from the General Fund of the Treasury must use this account.

4.4.2. **Transfer Accounts (572000 and 573000)**. These accounts are used to record the transfers of capitalized assets between DoD Components without the receipt of a direct appropriation or transfer document from the Office of Management and Budget (OMB). These accounts are not to be used to transfer Fund Balance with Treasury.

4.4.2.1. **Financing Sources Transferred In Without Reimbursement (572000)**. The amount determined to increase the financing source of a reporting entity that occurs as a result of an asset being transferred in. If the transfer is general PP&E, the amount of the asset is recorded at the book value of the transferring entity. However, if the asset is classified as stewardship PP&E in its entirety by both the transferring entity and the recipient entity, the transfer does not affect the net cost of operation or net position of either entity; therefore, it is not revenue, a gain or loss, or other financing source.

4.4.2.2. **Financing Sources Transferred Out Without Reimbursement (573000)**. This account is used to record the amount determined to decrease the financing source of a reporting entity that occurs as a result of an asset being transferred out. The amount of the asset is recorded at book value as of the transfer date. If the asset is general PP&E for the transferring entity but stewardship for the recipient entity, it is recognized as a transfer-out (a negative other financing source) of capitalized assets by the transferring entity.

4.4.3. **Other Transfer Accounts**. Transfers reduce budgetary resources (budget authority and unobligated balances) in one account and increase them in another. Refer to the [OMB Circular A-11](#), “Preparation and Submission of the Budget,” Section 20.4(j)), for guidance on the budgetary impact of transfers.

4.4.3.1. **Appropriated Dedicated Collections Transferred In (574000)**. Record the amount in the expenditure account of dedicated collections appropriated via warrant from an unavailable receipt account. Transactions using this account will have a budgetary impact.
4.4.3.2. Appropriated Dedicated Collections Transferred Out (574500). These accounts are used to record the amount in the unavailable receipt account of dedicated receipts appropriated, via warrant, to an expenditure account.

4.4.3.3. Expenditure Financing Sources - Transfers-In (575000). Record the amount of financing sources of a federal entity representing funds transferred in, or to be transferred in, occurring as a result of a nonexchange expenditure transfer-in from a trust or federal fund. Transactions using this account will have a budgetary impact.

4.4.3.4. Nonexpenditure Financing Sources - Transfers-In - Other (575500). This account is used to record the amount of financing sources of a reporting federal entity representing funds transferred in, or to be transferred in, occurring as a result of a nonexchange, nonexpenditure transfer-in between two trust funds or two federal funds where a credit to unexpended appropriations is not valid. This account excludes nonexpenditure transfers classified as capital transfers. Transactions using this account will have a budgetary impact.

4.4.3.5. Expenditure Financing Sources - Transfers-Out (576000). Record the amount of financing sources of a reporting federal entity representing funds transferred out, or to be transferred out, occurring as a result of a nonexchange expenditure transfer-out to a trust or federal fund. Transactions using this account will have a budgetary impact.

4.4.3.6. Nonexpenditure Financing Sources - Transfers-Out - Other (576500). This account is used to record the amount of financing sources of a reporting federal entity representing funds transferred out, or to be transferred out, occurring as a result of a nonexchange, nonexpenditure transfer-out between two trust funds or two federal funds where a debit to unexpended appropriations is not valid. This account excludes nonexpenditure transfers classified as capital transfers. Transactions using this account will have a budgetary impact.

4.4.4. Imputed Financing Sources (578000). Record the imputed financing amounts the federal entity received to cover imputed costs. The balance in this account must equal the balance in USSGL account 673000, “Imputed Costs.” Examples of costs that may be imputed include military personnel costs, pensions, other retirement benefits, other postemployment benefits, and unreimbursed tenant cost when occupying a facility that is not under the jurisdiction of the tenant. Another example is environmental cleanup costs not reimbursed to the entity administering the fund when the administering fund is outside the DoD reporting entity. See Interpretation of Federal Financial Accounting Standards 6: “Accounting for Imputed Intra-departmental Costs: An Interpretation of SFFAS 4,” for additional information about imputed costs. Additionally, imputed financing sources and costs are incurred when one DoD reporting entity uses another federal agency’s (including other DoD reporting entities) asset without financial compensation.
5.0 GAINS AND LOSSES (1605)

5.1 Gain Accounts (160501)

Specific guidance on gains and losses is included in each subject area. For example, Base Realignment and Closure gains and losses are discussed in Volume 12, Chapter 13.

5.1.1. Gains on Disposition of Assets - Other (711000). Record the gain on the disposition (such as sale, exchange, disposal, or retirement) of assets not associated with investments or borrowings/loans.

5.1.2. Gains on Disposition of Investments (711100). Record the gain on the disposition (such as sale, exchange, disposal, or retirement) of investments.

5.1.3. Unrealized Gains (718000). Record unrealized gains that include, but are not limited to, unrealized holding gains on available for sale securities in accordance with Financial Accounting Standard (FAS) 115, deferred gains on qualified hedges under FAS 133, and qualified foreign currency translation adjustments under FAS 52.

5.1.4. Other Gains (719000). Record the gain on assets resulting from events other than a disposition. This excludes amounts related to the gain on the change in long term assumptions from experience and gain on the change in long term assumptions for federal employee pension, other retirement benefit and other postemployment benefit liabilities, including veteran’s compensation. This account includes amounts related to the Federal Employees Compensation Act (FECA) Program. Uses for this account include transactions for:

   5.1.4.1. Miscellaneous gains such as a gain resulting from converting foreign currency holdings to U.S. dollars.

   5.1.4.2. Used by activities to record miscellaneous gains, e.g., ammunition, resulting from inventory counts of operating materials and supplies.

5.2 Loss Accounts (160502)

Specific guidance on gains and losses is included in each subject area. For example, Base Realignment and Closure gains and losses are discussed in Volume 12, Chapter 13.

5.2.1. Losses on Disposition of Assets - Other (721000). Record the loss on the disposition (such as sale, exchange, disposal, or retirement) of assets not associated with investments or borrowings/loans.

5.2.2. Losses on the Disposition of Investments (721100). Record the loss on the disposition (such as sale, exchange, disposal, or retirement) of investments.

5.2.3. Unrealized Losses (728000). To record unrealized losses that include, but are not limited to, unrealized holding losses on available for sale securities in accordance with FAS 115,
deferred losses on qualified hedges under FAS 133, and qualified foreign currency translation adjustments under FAS 52.

5.2.4. Other Losses (729000). Record the loss, damage, or obsolescence on assets resulting from events other than disposition. This excludes amounts related to the losses on the change in long term assumptions from experience and gain on the change in long term assumptions for federal employee pension, other retirement benefit and other postemployment benefit liabilities, including veteran’s compensation. This account includes amounts related to the FECA Program. Uses for this account include transactions for:

5.2.4.1. Recording a contingent liability.

5.2.4.2. Recording the loss of inventory that is deemed material.

5.2.4.3. Foreign currency.
VOLUME 4, CHAPTER 16, APPENDIX A: “TABLE OF TRANSACTIONS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, Paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated October 2012 is archived.

CHAPTER 16 APPENDIX A

TABLE OF TRANSACTIONS

1.0 GENERAL (A01)

1.1 Overview (A0101)

The Government of the United States (U.S.) has many ways to finance its cost of operations. These include: exchange transactions; nonexchange transactions; other financing sources; revaluations; or transactions not recognized as revenues, gains, or other financing sources. Transactions may be between a government reporting entity and the public or between two reporting entities within the government (i.e., intragovernmental transactions).

1.2 Purpose (A0102)

This appendix provides information concerning accounting standards that may be used for classifying transactions that finance the Department of Defense’s (DoD) cost of operations and a significant number of lesser transactions. The transactions in this appendix are divided into groups: nonexchange transactions; exchange transactions that produce revenue; other financing sources; gains and losses due to revaluation; and transactions that produce amounts not recognized as revenues, gains, or other financing sources.

1.3 Authoritative Guidance (A0103)

Statement of Federal Financial Accounting Standards (SFFAS) 7, “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting” established the standards for the classification of specific revenue transactions. Consult SFFAS 7, Appendix B when a transaction does not fall within any of the classifications included in this appendix. For the classifications included in this appendix, the SFFAS 7 paragraph number(s) is provided.

2.0 NONEXCHANGE TRANSACTIONS (A02)

*2.1 Nonexchange Transactions (A0201)

A nonexchange transaction arises when one party to a transaction receives value without directly giving or promising value in return. There is a one-way flow of resources or promises. Nonexchange revenue transactions do not require a Government entity to give value directly in exchange for the inflow of resources. The Government does not “earn” the nonexchange revenue. Because nonexchange revenues are inflows that finance operations, nonexchange revenues must be classified and recognized only in determining the overall financial results of operations for the period. Refer to SFFAS 7, Paragraph 240.
2.2 Nonexchange Transactions With the Public (A0202)

The Harbor Maintenance Trust Fund is an example of a “user fee” tax while classified in the budget as a governmental receipt together with other taxes and duties. It is an ad valorem tax imposed on commercial cargo loaded and unloaded at specified U.S. ports open to public navigation. The receipt is a dedicated collection to the Harbor Maintenance Trust Fund administered by the U.S. Army Corps of Engineers (USACE). It is similar in nature to other excise taxes that result from the government’s power to compel payment and that are dedicated to a trust fund or special fund to be spent for a designated purpose (for example, the gasoline excise tax, which is dedicated to the Highway Trust Fund). It, therefore, must be recognized as nonexchange revenue for the Harbor Maintenance Trust Fund by the USACE. Refer to SFFAS 7, Paragraph 249.

2.3 Nonexchange Transactions - Intragovernmental (A0203)

An example of this type of transaction is interest earned from Treasury securities held by trust funds and special funds. Paragraphs 306-310 of SFFAS 7, Appendix B deal with nonexchange revenue and Paragraphs 311-313 contain nonexchange gains and losses.

*3.0 EXCHANGE TRANSACTIONS (A03)

3.1 Revenue from Exchange Transactions (A0301)

Exchange revenues arise when a Government entity provides goods and services to the public or to another Government entity for a price. Revenue from exchange transactions is subtracted from gross cost in determining the net cost of operations and the change in net position. Refer to SFFAS 7, Paragraph 240.

3.2 Exchange Transactions with the Public - Sales of Goods and Services (A0302)

The cost of production for goods and services, such as electricity, mail delivery, and maps, is defrayed in whole or in part by revenue from selling the goods or services provided. The sales may be made by a revolving fund (such as the Defense Working Capital Fund (DWCF)) or a general fund (such as a Military Departments appropriated fund). Customers of the Department may include private parties and businesses when authorized by law, including foreign governments, state and local governments, and others not officially representing the Federal Government. Customer orders (requests for goods and services) should be accompanied by a cash advance unless otherwise specified by law. Customer orders from nonfederal entities do not become budgetary resources until collected. Each party receives and sacrifices something of value. The sale is, therefore, an exchange transaction, and the revenue is exchange revenue for the entity making the sale. Refer to SFFAS 7, Paragraph 270. Additionally, interest and rents, such as those collected from DoD owned homes in the Homeowners Assistance Program represent exchange revenue.
3.3 Exchange Transactions with the Public - Sales of Property Plant and Equipment (A0303)

When the Reporting Entity has legal authority to retain the proceeds from the sale of the asset, the transaction is an exchange transaction because each party receives and sacrifices something of value. If the sales price equals book value, then there is no gain or loss, because a cash inflow equal to book value is the exchange of one asset for another of equal recorded value and, therefore, not a net inflow of resources. If the sales price is more or less than book value, a gain or loss, respectively, is recognized to the extent of the difference. The amount of the difference ordinarily is a gain or loss rather than revenue or an expense, because sales of property, plant, and equipment (PP&E) ordinarily represent a nonrecurring inflow of resources. The entire sales price is a gain when the book value of the asset is zero. The book value is zero (a) when the asset is general PP&E that is fully depreciated or otherwise has been written-off or (b) when the asset is stewardship PP&E, for which the entire cost was expensed when the asset was purchased. Refer to SFFAS 7, Paragraphs 295-296.

3.4 Exchange Transactions - Intragovernmental Revenue (A0304)

3.4.1. Intragovernmental Sales of Goods and Services by a Revolving Fund. The cost of providing goods or services by a revolving fund is defrayed in whole or in part by selling the goods or services provided. Performers (DoD activities providing goods and/or services at cost) include DWCF activities, revolving funds within the Military Department reporting entities, revolving funds within the “Other Defense Organizations” reporting entity, and USACE. Customers of the Department include any DoD Component, organization, office or other element; non-DoD Federal Government Agencies; and others officially representing the Federal Government. Each party receives and sacrifices something of value. The proceeds are exchange revenue. Refer to SFFAS 7, Paragraph 314.

3.4.2. Intragovernmental Sales of Goods and Services by an Appropriated Fund or Trust Fund Activity (Other Than a Revolving Fund). The cost of providing goods or services is defrayed in whole or in part by selling the goods or services provided. Performers (DoD activities providing goods and/or services at cost) include the Military Departments, Defense Agencies, and USACE. Customers of the Department include any DoD Component, organization, office or other element, non-DoD Federal Government Agencies, and others officially representing the Federal Government. Each party receives and sacrifices something of value. The proceeds are exchange revenue. Refer to SFFAS 7, Paragraph 315.

3.4.3. Employer Entity Contributions to Pension and Other Retirement Benefit Plans for Federal Employees. Employees of the Federal Government provide service to their employer in exchange for compensation, of which some is received currently (the salary); and some is deferred (pensions, retirement health benefits, and other retirement benefits). This is an exchange transaction, because each party sacrifices value and receives value in return. As part of this transaction, the government promises a pension and other retirement benefits to the employees after they retire. The financing of these benefits may include contributions paid by the employer entity to the retirement fund. In broad terms, the employer entity contribution is an inflow of resources to the retirement fund as part of this exchange transaction. More narrowly, it is a payment by the employer entity in exchange for the future provision of a pension or other
retirement benefit to its employees. Therefore, it is exchange revenue of the entity that administers the retirement plan and, thus, is an offset to that entity’s gross cost in calculating its net cost of operations. Within the DoD, the reporting of this category of revenue applies specifically to the DoD Military Retirement Trust Fund. Any other DoD Component contemplating the use of this category of exchange revenue must first obtain approval from the Office of the Deputy Chief Financial Officer, DoD. Refer to SFFAS 7, Paragraphs 316-317.

3.4.4. Interest on Treasury Securities Held by Trust Revolving Funds. A trust revolving fund is a revolving fund that also is classified by law as a trust fund. Like other revolving funds, it earns exchange revenue, which is an offset to its gross cost. Trust revolving funds need capital in their operations, just like other revolving funds, the source of which predominantly is the revenue they have earned. When some of their capital is invested in Treasury securities, the interest is related to their cost of operations in the same way as the revenue earned from selling services. Furthermore, the source of the invested balances is predominantly revenue earned from the sales of services, for which they incurred costs of operations when the revenue was earned. The interest they receive must, therefore, be classified in the same way as the interest received by other revolving funds, which is exchange revenue. The source of balances for some trust revolving funds may not be predominantly exchange revenue. For such exceptions, the interest must be classified in the same way as the predominant source of balances rather than according to the normal rule. Refer to SFFAS 7, Paragraph 324-325.

3.4.5. Interest on Treasury Securities Held by Trust Funds. A major source of revenue for many trust and special funds (such as the DoD Military Retirement Trust Fund, the DoD Education Benefits Fund, the National Security Education Trust Fund, and the Voluntary Separation Incentive Fund) consists of exchange and other financing sources. When some of their capital is invested in Treasury securities, the interest is related to their cost of operations in the same way as the revenue earned from selling services. Furthermore, the source of the invested balances is predominantly revenue earned from the sales of services, for which they incurred costs when the revenue was earned. Classify the interest received in the same way as the interest received by other revolving funds, which is exchange revenue. Refer to SFFAS 7, Paragraph 308.

3.4.6. Interest on Uninvested Funds Received by Direct Loan and Guaranteed Loan-Financing Accounts. A guaranteed loan financing account holds uninvested balances as reserves against its loan guarantee liabilities and earns interest on these balances that adds to its resources to pay these liabilities. A direct loan financing account may hold uninvested balances to bridge transactions that are integral to its operations, such as when it borrows from Treasury to disburse direct loans prior to the time of disbursement; it earns interest on these balances to reflect the time value of money and, thereby, finance the interest it pays on its debt to Treasury. Thus, in both cases, the interest received by the financing account is earned through exchange transactions with Treasury and is an offset to the financing accounts related costs of operations. The interest is, therefore, exchange revenue of the financing account. Within the DoD, the reporting of this category of revenue applies specifically to the Family Housing Improvement Fund, Direct Loan Financing Account (97X4166); Family Housing Improvement Fund, Guaranteed Loan Financing Account (97X4167); Defense Export Loan Guarantee Financing Account (97X4168); and Arms Initiative Guarantee Loan Financing Account, Army (21X4275).
Any other DoD Component contemplating the use of this category of exchange revenue must first obtain approval from the Office of the Deputy Chief Financial Officer, DoD. Refer to SFFAS 7, Paragraph 326.

3.5 Exchange Transactions - Intragovernmental-Gains and Losses (A0305)

Treasury securities held by revolving funds, trust and trust revolving funds (e.g., Military Retirement Trust Fund) are primarily issued in the government account series, which can generally be redeemed on demand. Other Treasury securities held by these funds also may be callable or redeemable on demand. If these debt securities are retired before maturity, the difference, if any, between the reacquisition price and the net carrying value of the extinguished debt must be recognized as a gain or loss by the fund that owned the securities. The gain or loss must be accounted for as a nonexchange gain or loss if the interest on the associated debt securities is classified as nonexchange revenue, and it must be accounted for as an exchange gain or loss if the interest on the associated debt securities is classified as exchange revenue. Intragovernmental transactions that produce gains or losses must be classified as producing revenue or expense if they are usual and recurring for a particular reporting entity. Refer to SFFAS 7, Paragraph 329.

4.0 OTHER FINANCING SOURCES – INTRAGOVERNMENTAL (A04)

4.1 Cost Subsidies: Difference Between Internal Sales Price and Full Cost (A0401)

One entity may receive goods or services from another entity without paying the full cost of the goods or services or without paying any cost at all. In these cases, the difference between full cost and the internal sales price or reimbursement (sometimes called a “transfer price”) is an imputed cost to the receiving entity. In addition, the financing of the imputed cost also is imputed to the receiving entity. Imputed financing is necessary so that the imputed cost does not reduce the entity’s operating results. The imputed financing equals the imputed cost and is recognized as other financing source. It is not revenue, because the receiving entity does not earn the amount imputed or demand its payment. Within the DoD, examples include military personnel costs not reimbursed by Defense Agencies to the military personnel appropriations and environmental cleanup costs not reimbursed to the entity administering the fund when the administering fund is outside the DoD reporting entity. Refer to SFFAS 7, Paragraphs 333-334.

4.2 Transfer of General PP&E and Stewardship Assets without Reimbursement (A0402)

General PP&E and Stewardship Assets (Heritage Assets and Stewardship Land) may be transferred from one government entity to another. Refer to SFFAS 7, Paragraph 358.

4.2.1 If the asset that is transferred was classified as general PP&E for the transferring entity and general PP&E for the recipient entity, it is recognized as a transfer-out (a negative other financing source) of capitalized assets by the transferring entity and as a transfer-in (other financing source) of capitalized assets by the recipient entity, at the book value of the asset.
4.2.2. If the asset that is transferred was classified as general PP&E for the transferring entity but stewardship PP&E for the recipient entity, it is recognized as a transfer-out of capitalized assets by the transferring entity. No amount is recognized by the entity that receives the asset. Refer to SFFAS 7, Paragraph 346. Similarly, if multi-use heritage assets are transferred and cost remains on the books of the transferring entity, that cost is recognized as a transfer-out of capitalized assets. The receiving entity should not recognize any amount.

4.2.3. If the asset that is transferred was classified as stewardship PP&E for the transferring entity but general PP&E for the recipient entity, it is recognized as a transfer-in (other financing source) of capitalized assets by the recipient entity. No amount is recognized by the transferring entity.

4.2.4. If the asset was classified as a stewardship asset in its entirety by both the transferring entity and the recipient entity, the transfer does not affect the net cost of operations or net position of either entity. In such a case, it is not revenue, a gain or loss, or other financing source. Refer to SFFAS 7, Paragraph 345. Likewise, when stewardship PP&E is donated to the Government, no amount is recognized as a cost or revenue.

5.0 REVALUATIONS (A05)

Refer to SFFAS 7, Appendix B for these classifications.

*6.0 TRANSACTIONS NOT RECOGNIZED AS REVENUES, GAINS, OR OTHER FINANCING SOURCES (A06)

6.1 Disposition of Revenue to Other Entities - Custodial Transfers (A0601)

Revenue, primarily nonexchange revenue, may be collected by an entity acting on behalf of the General Fund or another entity within the government on whose behalf it was collected. The collecting entity accounts for the disposition of these by debiting a “nonentity” liability account and crediting its “nonentity” Fund Balance with Treasury account. These custodial transfers, by definition, do not affect the collecting entity’s net cost of operations or operating results, nor are they part of the reconciliation between its obligations and net cost of operations. The receiving entity recognizes the revenue as nonexchange or exchange revenue, depending on its nature, according to the applicable revenue standards. Refer to SFFAS 7, Paragraph 353.

6.2 Sales of Different Types of Government Assets (A0602)

The sale of government assets (other than forfeited property) is an exchange transaction, because each party receives and sacrifices something of value. As a general rule, any difference between the sales proceeds and book value is recognized as a gain or loss when the asset is sold. The remainder of the transaction does not provide a net inflow of resources, so no gain, revenue, or other financing source is recognized. If the sales proceeds equal book value, there is no gain or loss, because the exchange of one asset for another of equal recorded value is not a net inflow of resources. This general rule applies to PP&E, receivables (other than direct loans), foreclosed property associated with pre-1992 direct loans and loan guarantees, and miscellaneous assets. It does not apply to inventory, nor does it apply to forfeited property. It also does not apply to the
sale of direct loans and the sale of foreclosed property associated with post-1991 direct loans and loan guarantees. Refer to SFFAS 7, Paragraphs 354-355.

6.3 Repayment of Post-1991 Direct Loans (A0603)

The present value of estimated loan repayments is included in the calculation of the subsidy cost of direct loans, and this subsidy cost is recognized as an expense when the loans are disbursed. The present value of estimated loan repayments is likewise included in the value of the loans receivable. When cash is received for the repayment of loans, decrease the loans receivable by an equal amount. The increase in one asset is offset by an equal decrease in another asset. Therefore, cash inflow from the repayment is not recognized as a revenue, a gain, or other financing source. If the actual repayment is different from the previous estimate, the present value of the difference between cash inflows and outflows over the term of the loan, calculated as of the date of disbursement, is re-estimated and recognized as a subsidy expense or a reduction in subsidy expense. Refer to SFFAS 7, Paragraph 365.

6.4 Repayment of Pre-1992 Direct Loans (A0604)

When pre-1992 direct loans are repaid in whole or in part, the entity exchanges one asset (loans receivable) for another (cash) with equal value. There is no net inflow of resources. Therefore, the amount of cash inflow equal to book value is not recognized as a revenue, a gain, or other financing source. If the loan is not repaid, the unpaid amount is recognized as an adjustment to the bad debt allowance and does not affect revenue, gains, or other financing sources. Refer to SFFAS 7, Paragraph 366.

6.5 Repayment of Receivables - Except Direct Loans (A0605)

When receivables other than direct loans are paid or repaid in whole or in part, the entity exchanges one asset (loans receivable) for another (cash) with equal value. There is no net inflow of resources. Therefore, the amount of cash inflow equal to book value is not recognized as revenue, gain, or other financing source. If the receivable is not repaid, the unpaid amount is recognized as an adjustment to the bad debt allowance and does not affect revenue, gains, or other financing sources. Refer to SFFAS 7, Paragraph 367.

6.6 Sales of Direct Loans (A0606)

The sale of a direct loan is a modification according to the Federal Credit Reform Act of 1990 regardless of whether the loan being sold was obligated after Fiscal Year (FY) 1991 or before FY 1992. The book value loss (or gain) on a sale of direct loans equals the book value of the loans sold (prior to sale) minus the net proceeds of the sale. It normally differs from the cost of modification, which is recognized as an expense. This difference is due to the different interest rates used to discount future cash flows for calculating the subsidy cost (and subsidy allowance) when the loan is disbursed and for calculating the cost of modification at a later time. If the sale is with recourse, the present value of the estimated loss from the recourse is also recognized as an expense. Any difference between the book value loss (or gain) and the cost of modification is recognized as a gain or loss. The amount of cash inflow equal to book value is not a net inflow of resources to the entity, because it is an exchange of one asset for another of
equal recorded value. Therefore, the amount of cash inflow equal to book value is not recognized as revenue, gain, or other financing source. Refer to SFFAS 7, Paragraph 368.

*6.7 Acquisition of PP&E through Exchange (A0607)

The cost of PP&E acquired through an exchange of assets with the public is the fair value of the PP&E surrendered at the time of exchange. If the fair value of the PP&E acquired is more readily determinable than that of the PP&E surrendered, the cost is the fair value of the PP&E acquired. If neither fair value is determinable, the cost of the PP&E acquired is the cost recorded for the PP&E surrendered net of any accumulated depreciation or amortization. In the event that cash consideration is included in the exchange, the cost of PP&E acquired is increased (or decreased) by the amount of the cash surrendered (or received). Refer to SFFAS 7, Paragraph 356.

*6.8 Sales of Foreclosed Property Associated with Post-1991 Direct Loans and Loan Guarantees (A0608)

The net present value of the cash flow from the estimated sales of foreclosed property is included in calculating the subsidy cost of post-1991 direct loans and loan guarantees. This subsidy cost is recognized as an expense when the loans are disbursed. When property is foreclosed, the property is recognized as an asset at the net present value of its estimated net cash flows. When the foreclosed property is sold, any difference between the sales proceeds and the book value (i.e., the net present value as of the time of sale) requires a reestimate of the subsidy expense, which is recognized as a subsidy expense or a reduction in subsidy expense. The amount of cash flow equal to book value is an exchange of one asset for another of equal recorded value and therefore is not recognized as a gain, revenue, or other financing source. Refer to SFFAS 7, Paragraph 369.

*6.9 Negative Subsidies on Post-1991 Direct Loans and Loan Guarantees (A0609)

A negative subsidy means that the direct loans or loan guarantees are estimated to make a profit, apart from administrative costs (which are excluded from the subsidy calculation by law). The amount of the subsidy cost is recognized as an expense when the direct loan or guaranteed loan is disbursed. A negative subsidy is recognized as a direct reduction in expense, not as revenue, gain, or other financing source. Refer to SFFAS 7, Paragraph 362.

*6.10 Downward Subsidy Reestimates for Post-1991 Direct Loans and Loan Guarantees (A0610)

A downward subsidy reestimate means that the subsidy cost of direct loans or loan guarantees is estimated to be less than had previously estimated. The initial subsidy cost is recognized as an expense; a positive subsidy reestimate is recognized as an expense; and a downward subsidy reestimate is recognized as a direct reduction in expense, not as revenue, gain, or other financing source. Refer to SFFAS 7, Paragraph 363.
*6.11 Fees on Post-1991 Direct Loans and Loan Guarantees (A0611)

The present value of estimated fees is included as an offset in calculating the subsidy cost of direct loans and loan guarantees, which is recognized as an expense when the loans are disbursed. The present value of estimated fees is likewise included as one component in calculating the value of loans receivable or loan guarantee liabilities. When cash is received in payment of fees, the loans receivable decrease by an equal amount (or the loan guarantee liabilities increase by an equal amount). The increase in one asset is offset by an equal decrease in another asset (or by an equal increase in liabilities). Therefore, fees are not recognized as revenue, a gain, or other financing source. Refer to SFFAS 7, Paragraph 364.
VOLUME 4, CHAPTER 17: “EXPENSES AND MISCELLANEOUS ITEMS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

CHAPTER 17

EXPENSES AND MISCELLANEOUS ITEMS

1.0 GENERAL

1.1 Purpose

This chapter provides guidance to account for expenses and miscellaneous items, such as gains and losses, incurred in carrying out Department of Defense (DoD) operations. Additionally, it describes how to identify and account for extraordinary items and adjustments to prior period financial statements.

1.2 Authoritative Guidance

The Federal Accounting Standards Advisory Board concluded in Statement of Federal Financial Accounting Standards (SFFAS) 5, “Accounting for Liabilities of the Federal Government” that expenses are not independent of assets and liabilities and do not have their own essential characteristics. Expenses are changes in assets and/or liabilities during a reporting period resulting in a change in net position. Thus, the definition of expenses is dependent on the definitions of assets and liabilities. Additional guidance for expenses is found in the following:

1.2.1. SFFAS 3, Accounting for Inventory and Related Property.

1.2.2. SFFAS 4, Managerial Cost Accounting Standards and Concepts.

1.2.3. SFFAS 6, Accounting for Property, Plant, and Equipment.

1.2.4. SFFAS 7, Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting.

1.2.5. SFFAS 21, Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources.

1.2.6. SFFAS 55, Amending Inter-entity Cost Provisions.

1.2.8. SFFAC 7, Measurement of Accrual-Basis Financial Statements in Periods after Initial Recording.

17-4
2.0 AUDIT REMEDIATION AND INTERNAL PROCEDURES

Each DoD Component must develop and implement internal operating procedures and guidance to implement this overarching policy in a manner that ensures accurate, timely, and relevant reporting of financial data. Relevant records supporting financial statements must be maintained and made available during financial statement audits.

3.0 EXPENSE OVERVIEW

3.1 Definition

Expenses represent the outflow or consumption of assets or the incurrence of liabilities (or a combination of both) during a period of providing goods, rendering services, or carrying out other normal operating activities related to the entity’s programs and missions which results in a decrease in the entity’s net position.

3.2 Exceptions to Cash Outlays

Most expenses require cash outlays. There are exceptions such as depreciation, other losses, bad debt expenses and miscellaneous items. Miscellaneous items may result from extraordinary transactions, prior period adjustments, and changes in actuarial liabilities.

3.3 Unusual or Nonrecurring Transactions

Costs attributable to extraordinary or unexpected events are classified as miscellaneous items. Unusual or nonrecurring transactions or having resulted from peripheral or incidental activities of an entity should be recognized as a gain or loss, rather than as a revenue or expense.

3.4 Budgetary Accounts

An expense normally includes an application of budgetary or other resources. Goods and services ordered and received are recorded in the budgetary accounts as expended authority (Delivered Orders – Obligations, Unpaid) and in the proprietary accounts as an expense. The budgetary accounts provide financial control over the resources provided to the entity and ensure accurate accounting during the budget execution process.

3.5 Defense Working Capital Funds (DWCF) Expenses

The treatment of expenses by some DWCF activities differ compared to the treatment of appropriation funded activities. Expenses accumulated in asset accounts are costs. For some activity groups in the DWCF, such as depot maintenance, costs are accumulated by job order in Construction in Progress (account 172000) or Inventory Work in Process (account 152600) and subsequently billed to customers. Other activity groups, such as supply management, record civilian personnel costs as an expense to the activity or cost center as a whole, in the same manner as appropriated funded activities. Refer to Volume 11B, Chapter 12 for DWCF policy.
Figure 17-1 illustrates the relationship between Expended Budgetary Authority and Proprietary accounts.

Compound budgetary and proprietary entries are required when goods or services are received and/or accepted. Purchased goods or services are recorded in the budgetary accounts as expended authority or expenditures (Delivered Orders – Obligations Unpaid and Paid) and in the proprietary accounts as an expense (or asset, when DoD capitalization criteria are met).
4.0 PRESENTATION IN FINANCIAL STATEMENTS

4.1 Expense Recording

Expenses are commonly reported at the time they are incurred, not when invoices are received. Goods and services (costs) acquired from or provided to other government trading partners or programs (i.e., intragovernmental) must be recorded separately from those purchased from nonfederal entities (i.e., the public). The accounting entries are specified in the DoD United States General Ledger (USSGL) Standard Financial Information Structure (SFIS) Transaction Library.

4.2 Reporting Program Costs

4.2.1. Program costs must be reported in the Statement of Net Cost as required by Volume 6B, Chapter 5.

4.2.2. Program costs include the full costs of the program outputs and consist of the direct costs and all other costs directly traced, assigned on a cause and effect basis, or reasonably allocated to a program’s outputs. Program costs also include any nonproduction costs assigned to a program but not to its outputs.

4.2.3. The costs of program outputs must include the costs of services provided by other entities regardless of whether the providing entity is fully reimbursed. The costs of program outputs must also include costs paid in total or in part by other entities to the extent accounting standards require them to be recognized in financial statements. For example, DoD Components must recognize imputed costs of pensions and other retirement benefit expenses in their financial statements.

4.2.4. Imputed costs represent the unreimbursed portion of the full cost of goods and services received from another source. In the case of post-employment benefits for retired, terminated, and inactive employees, imputed costs are the excess of the costs actually incurred by employing agencies for covered employees over the total contributions made by and for covered employees. Imputed costs encompass all unreimbursed portions of the full cost of goods and services received by a DoD entity from a providing DoD entity according to SFFAS 55.

4.3 Production and Nonproduction Costs

4.3.1. Costs related to the production of outputs must be reported separately from costs not related to the production of outputs (i.e., nonproduction costs) on the Statement of Net Cost. Nonproduction costs are reported as a separate item in the financial statements and are addressed in the SFFAS 4.

4.3.2. The following nonproduction costs must be reported separately from other nonproduction costs, if incurred:
4.3.2.1. The cost of acquiring, constructing, improving, reconstructing, or renovating heritage assets. Costs associated with multi-use heritage assets are capitalized and depreciated over the expected useful life if they meet the capitalization criteria discussed in Chapter 28.

4.3.2.2. The acquisition cost of acquiring stewardship land.

4.3.2.3. The cost of maintenance not performed but delayed to a future period (deferred maintenance) reported in the Required Supplementary Information section of the financial statements (refer to Volume 6B, Chapter 12).

5.0 ACCOUNTING TREATMENT FOR EXPENSES

5.1 Accounting Treatment for Expenses and Miscellaneous Items

5.1.1. Operating expenses include personnel costs, contractual services, and operating materials and supplies. Expenses also can include an allocation of prior capital outlays (depreciation/amortization) or to recover costs of operations.

5.1.2. Refer to Chapters 24-28 for expenses incurred by research and development programs, or related to the search for knowledge and the conversion of knowledge into use for DoD missions as related to capitalization or expense of assets.

5.2 Operating Expenses/Program Costs

5.2.1. Operating expenses/program costs include costs associated with carrying out a specific program or function. Examples include personnel, travel, communications, contractual services, and other program expenses. Amounts paid often represent transactions requiring a budgetary entry, recording obligations from the unexpended obligation (undelivered order) to the expended authority (delivered order). DWCF activities routinely record operating expenses/program costs to a cost of goods sold account (either directly or via work in process accounts) so costs may be matched to revenue upon completion of the task or filling an order.

5.2.2. Accounting systems must have the ability to report expenses related to operating expenses/program costs at the detail necessary to support budget preparation and applicable cost accounting requirements.

5.3 Costs for Property, Plant and Equipment (PP&E)

Costs for PP&E acquired or constructed for a project must be capitalized if the acquisition cost exceeds the Department’s capitalization threshold (refer to Chapters 24-28), the items are not intended for sale in the ordinary course of operations, the items have been acquired or constructed with the intention of being used by the entity, and the items have a life expectancy of more than two years. An asset may be expensed (account 615000) if the amount of the expenses recognized by a purchasing agency when a capitalized asset acquired from another federal agency does not meet the purchasing agency’s capitalization threshold or has a useful life of less than two years.
5.4 Work in Process Account

Work in process accounts must be used to accumulate the costs of goods or services in accordance with guidance contained in Chapters 4, 5, and 24-28. The amounts recorded in these accounts, as well as amounts recorded in applicable inventory accounts, must be the basis for determining the amounts to be recorded as cost of goods sold.

5.5 Depreciation, Amortization and Depletion Account

Depreciation, Amortization and Depletion is used to record the allocation of the cost of an asset (tangible or intangible) over the period of time benefited or the asset’s useful life. The amounts to be recorded in these accounts must be determined in accordance with the guidance contained in Chapters 1, 7, and 24-28.

5.6 Depreciation Expense for Capitalized and Donated Assets

Depreciation expense for capitalized and donated assets is recorded with a debit to Depreciation, Amortization, and Depletion (account 671000) and a credit to the appropriate Accumulated Depreciation account related to the asset. No budgetary entry is recorded. For the DWCF, depreciation expense is an element included in the cost recovery rates, used to finance the capital programs. Refer to the DoD USSGL SFIS Transaction Library for additional information on account descriptions for reporting depreciation.

5.7 Benefits Expense

5.7.1 The employer’s contribution portion of the following employee benefit programs are: retirement funds, life insurance, Voluntary Separation Incentive Payment (VSIP), Federal Employee’s Compensation Act (FECA), unemployment for Federal employees, Social Security (Federal Old-Age, Survivors Insurance, and Federal Disability Insurance) and Medicare (Federal Hospital Insurance (Medicare Part A), Federal Supplementary Medical Insurance (Medicare Part B). The amount of benefit expense (such as employment benefits, entitlement benefits due and payable, or insurance and guarantee benefits) incurred by the program agency and/or administering agency for benefit payments must be recorded in the entity’s General Ledger.

5.7.2. Employer contributions to the Thrift Savings Plan are nonfederal expenses. The account must be supported by subsidiary accounts to show the types of transactions for which entitlement benefits were incurred.

5.7.3. Administrative expenses incurred for benefit payments are generally nonfederal expenses. This includes (but is not limited to) costs for retirement, life insurance, health insurance, VSIP, FECA, unemployment, entitlements, and insurance guarantees (i.e., flood insurance).
5.8 Cost of Goods Sold Account

The cost of goods sold account is used to record the cost of goods or services sold from inventory, by DWCF activities, or by other DoD activities authorized to provide services or material to other federal government agencies (including other DoD Components) or nonfederal organizations. This account is used predominantly by revolving fund activities. Appropriated fund activities must also use this account to support reimbursable programs.

5.9 Imputed Costs Account

The Imputed Cost account must be used by all DoD activities receiving goods or services without reimbursement from an activity outside the reporting entity. SFFAS 55 provides for recognition of significant inter-entity costs among and between federal agencies by business-type activities and allows non-business-type activities to elect not to recognize inter-entity costs, with the exception of inter-entity costs for personnel benefits and the United States Department of the Treasury Judgement Fund settlements unless otherwise directed by OMB. Business-type activity is significantly self-sustaining activities financing their accounting cycle of operations through collections of exchange revenues. For example, DWFC would be considered business-type activities.

5.10 Future Funded Expenses

Future funded expenses represent the amount of accrued expenses which are required to be funded from future year appropriations. Examples of future funded expenses are, accrued annual leave expense (except for working capital funds), accrued worker’s compensation, upward re-estimates for credit reform loan programs, and projected future cleanup costs associated with the removing, containing, and/or disposing of hazardous materials associated with PP&E.

5.11 Expense Transactions Not Requiring Budgetary Resources

Some expense transactions do not require the use of budgetary resources and, therefore, only proprietary accounts are used to record these transactions. These expenses are usually allocated over more than one reporting period (e.g., depreciation expense), costs incurred that are paid in total or in part by other entities (e.g., imputed costs), or recognizing costs to be funded from future year appropriations (e.g., future funded expenses).

6.0 LOSSES

Losses are associated with the transactions not incurred in the normal operation of the organization (such as the loss on the disposal of property).

6.1 Losses on Disposition of Assets Account

The Losses on Disposition of Assets account is used to record a loss incurred on the disposition of DoD owned assets. Such losses can result from the sale, exchange, casualty, or retirement of assets. Losses are reported net of any received proceeds.
6.2 Components of Losses on Disposition of Assets Account

The Losses on Disposition of Assets account must be used only by DoD Components authorized to dispose of DoD property; however, any DoD Component having control over personal and real property may incur such losses due to events beyond its control. The effect from such losses must be recorded in Losses on Disposition of Assets in the Statement of Net Cost.

6.3 Other Losses

Other Losses must be used to record the loss on assets resulting from events other than disposition, such as investment losses and miscellaneous losses.

7.0 EXTRAORDINARY ITEMS

Events distinguished by unusual nature and infrequency of occurrence. Both criteria of unusual nature and infrequency of occurrence must be met to classify an event as an extraordinary item, taking into account the environment in which the entity operates. Unusual nature criteria is the underlying event or transaction must possess a high degree of abnormality and be of a type clearly unrelated to, or only incidentally related to, the ordinary and typical activities of the entity. The criteria for infrequency of occurrence are the underlying event or transaction must be of a type not reasonably be expected to recur in the foreseeable future. The total amount of all extraordinary items is included in the applicable Gross Program Cost or Non Production Cost lines of the Statement of Net Cost. Disclosure of the nature and amount of each extraordinary item is included in the notes to the financial statements.

8.0 PRIOR PERIOD ADJUSTMENTS

8.1 Adjustments to Prior Period Financial Statements

Circumstances may arise requiring an entity to make adjustments to prior period financial statements due to a change in accounting principle or correction of a material error (or an aggregation of errors). Such circumstances include the retrospective application of a change in accounting principle or the correction of an error in prior period financial statements pursuant to SFFAS 21. See Volume 6B, Chapter 6 for information on reporting prior period adjustments in the financial statements.

8.2 Change in Accounting Principle

A change in accounting principle results from adoption of one Generally Accepted Accounting Principle to another that can be justified as preferable. Changes in accounting principles also include adoption of new federal financial accounting standards. The newly adopted accounting principle should result in more accurate and meaningful financial statement disclosures.
8.2.1. The term, accounting principle, includes not only accounting principles and practices but also the methods of applying them. Unless otherwise specified in the transition instructions section of a new federal financial accounting standard, the cumulative effect of the change on prior periods should be reported as a change in accounting principle, with the adjustment made to the beginning balance of the cumulative results of operations in the Statement of Changes in Net Position.

8.2.2. Prior period financial statements presented for comparative purposes should be presented as previously reported.

8.2.3. The nature of the changes in accounting principle and its effect on relevant balances should be disclosed in the current period. Financial statements of subsequent periods need not repeat the disclosure.

8.3 Correction of Errors

When errors are discovered after the issuance of the financial statements, and if the financial statements would be materially misstated absent correction of the errors, corrections should be made as follows:

8.3.1. If comparative financial statements are presented, then the error should be corrected in the earliest affected period presented by correcting any individual amounts on the financial statements. If the earliest period is not the period in which the error occurred and the cumulative effect is attributable to prior periods, then the cumulative effect should be reported as a prior period adjustment with the adjustment made to the beginning balance of cumulative results of operations in the Statement of Changes in Net Position for the earliest period presented.

8.3.2. The nature of an error in previously issued financial statements and the effect of its correction on relevant balances should be disclosed. Financial statements of the subsequent periods need not repeat the disclosures.

8.3.3. Prior period financial statements should only be restated for corrections of errors that would have caused any statements presented to be materially misstated.
VOLUME 4, CHAPTER 19: “MANAGERIAL COST ACCOUNTING”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

CHAPTER 19

MANAGERIAL COST ACCOUNTING

1.0 GENERAL

1.1 Overview

1.1.1. Managerial cost accounting standards and concepts are focused on providing reliable and timely information on the full cost of federal programs, projects, activities, and outputs. This information provides the structure needed for accurate, consistent, and reliable managerial cost accounting.

1.1.2. The concepts of managerial cost accounting describe the relationship among cost accounting, financial reporting, and budgeting. Managerial cost accounting concepts are an integral part of the financial management system in that they provide a basis of accounting, recognition, and measurement appropriate for the intended purpose.

1.1.3. The five standards set forth are fundamental elements of managerial cost accounting:

1.1.3.1. Accumulating and reporting costs of activities on a regular basis for management information purposes,

1.1.3.2. Establishing responsibility segments to match costs with outputs,

1.1.3.3. Determining full costs of government goods and services,

1.1.3.4. Recognizing the costs of goods and services provided among Federal entities, and

1.1.3.5. Using appropriate costing methodologies to accumulate and assign costs to outputs.

1.2 Purpose

The purpose of this chapter is to provide the DoD policy for managerial cost accounting to improve financial management and managerial decision making in five essential areas:

1.2.1. Budgeting and cost control,

1.2.2. Performance measurement,

1.2.3. Determining reimbursements and setting fees and prices,

1.2.4. Program evaluations, and
1.2.5. Making economic choice decisions.

1.3 Authoritative Guidance

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.1. Chief Financial Officers Act *(CFO) Act of 1990*;

1.3.2. Government Performance and Results Act *(GPRA) of 1993*;

1.3.3. Government Management Reform Act *(GMRA) of 1994*;

1.3.4. Federal Financial Management Improvement Act *(FFMIA) of 1996*;

1.3.6. *SFFAS 8*, “Supplementary Stewardship Reporting”;

1.3.7. Federal Accounting Standards Advisory Board (FASAB) Handbook *Appendix E: Consolidated Glossary*;

1.3.9. The United States (U.S.) Department of Treasury (Treasury) U.S. Standard General Ledger (USSGL) *Treasury Financial Manual*; and

2.0 DEFINITIONS

The following definitions primarily originate from the FASAB Handbook, Appendix E: Consolidated Glossary, and/or the MCAIG Glossary.

2.1 Activity

An activity is the actual work task or step performed in producing and delivering products and services, or an aggregate of actions performed within an organization that is useful for purposes of activity based costing.
2.2 Activity Based Costing

Activity Based Costing (ABC) is a cost accounting method that measures the cost and performance of process related activities and cost objects. It assigns cost to cost objects, such as products or customers, based on their use of activities. It recognizes the causal relationship of cost drivers to activities.

2.3 Budgetary Accounting

Budgetary accounting is the system that measures and controls the use of resources according to the purposes for which budget authority was enacted, and that records receipts and other collections by source. It is undertaken to assess and ensure compliance with fiscal legal requirements applicable to an appropriation or fund. It tracks the use of each appropriation for specified purposes in separate budgetary accounts through the various stages of budget execution—from appropriation to apportionment and allotment to obligation and eventual outlay.

2.4 Cost Accounting System

A cost accounting system is a continuous and systematic cost accounting process, which may be designed to accumulate and assign costs to a variety of objects routinely or as desired by management.

2.5 Cost Accumulation

Cost accumulation is the collection of costs in an organized fashion by means of a cost accounting system. There are two primary approaches to cost accumulation: job order and process costing. Under a job order system, the three basic elements of costs: direct materials, direct labor, and overhead, are accumulated according to assigned job numbers. Under a process cost system, costs are accumulated according to processing department or cost center.

2.6 Cost Allocation

Cost allocation is a method of assigning costs to activities, outputs, or other cost objects. The allocation base used to assign a cost to objects is not necessarily the cause of the incurred cost. For example, assigning the cost of power to machine activities by machine hours is an allocation because machine hours are an indirect measure of power consumption.

2.7 Cost Assignment

Cost assignment is a process that identifies costs with activities, outputs, or other cost objects. In a broad sense, costs can be assigned to processes, activities, organizational divisions, goods, and services. There are three approaches of cost assignment: (a) directly tracing costs wherever economically feasible, (b) using cause and effect, and (c) allocating costs on a reasonable and consistent basis.
2.8 Cost Finding

Cost finding techniques produce cost data by analytical or sampling methods. Cost finding techniques are appropriate for certain kinds of costs, such as indirect costs, items with costs below set thresholds within programs, or for some programs in their entirety. Cost finding techniques support the overall managerial cost accounting process and can represent nonrecurring analysis of specific costs.

2.9 Cost Object (Also Referred to as Cost Objective)

A cost object is an activity, output, or item whose cost is to be measured. In a broad sense, a cost object can be an organizational division, function, task, good, service, or customer. It is also defined as an activity, operation, or completion of a unit of work to complete a specific job for which management decides to identify, measure, and accumulate costs. The cost object must be discrete enough and described in writing to such a level of detail as to form a basis to establish cost centers and output products.

2.10 Direct Costs

Direct costs are the costs of resources directly consumed by an activity. Direct costs are assigned to activities by direct tracing of units of resources consumed by individual activities.

2.11 Financial Accounting (Proprietary Accounting)

Financial accounting is the accounting for assets, liabilities, net position, revenues, and expenses as a basis for reports to external parties. It is a methodology that focuses on reporting financial information primarily for use by owners, external organizations, and financial institutions. This methodology is constrained by rule making bodies such as the Financial Accounting Standards Board, Securities Exchange Commission, and the American Institute of Certified Public Accountants. For Federal Agencies, the rule making bodies include FASAB, the Treasury, and the OMB. Financial accounting supports accrual accounting and attempts to show actual financial position and results of operations.

2.12 Fixed Cost

A fixed cost is a cost that does not vary in the short term (usually less than one year) with the volume of activity. Fixed cost information is useful for cost savings by adjusting existing capacity or by eliminating idle facilities.

2.13 Full Cost

2.13.1. Full costs are the sum of all costs required by a cost object including the costs of activities performed by other entities regardless of funding sources. More specifically, the full cost of an output produced by a responsibility segment is the sum of (a) the costs of resources consumed by the responsibility segment that directly or indirectly contributes to the output,
(b) the costs of identifiable supporting services provided by other responsibility segments within the reporting entity and by other reporting entities.

2.13.2. Full cost is all direct and indirect costs to any part of the Federal Government of providing goods, resources, or services (OMB Circular A-25).

2.14 Indirect Cost

Indirect costs are costs that cannot be identified specifically with or traced to a given cost object in an economically feasible way.

2.15 Inter-Entity Costs

Inter-entity is a term meaning between or among different federal reporting entities. It commonly refers to activities or costs between two or more agencies, departments, or bureaus.

2.16 Intra-Entity Costs

Intra-entity costs are costs from organizational components within the reporting entity that provide support for the responsibility segment’s programs, projects, or activities. These costs include the direct and indirect costs of other organizational components of the reporting entity.

2.17 Job Order Costing

Job order costing is a method of cost accounting that accumulates costs for individual jobs or lots. A job may be a service or manufactured item, such as the repair of equipment or the treatment of a patient in a hospital.

2.18 Latest Acquisition Cost

Latest acquisition cost is a method in which all units are valued at the invoice price of the most recent items purchased less any discounts, plus any additional costs incurred to bring the item to a form and location suitable for its intended use.

2.19 Managerial Cost Accounting

Managerial cost accounting is the process of accumulating, measuring, analyzing, interpreting, and reporting cost information useful to both internal and external groups concerned with the way in which the organization uses, accounts for, safeguards, and controls its resources to meet its objectives. Managerial cost accounting is the integration of budgetary and financial accounting, and management reporting because it provides information for decision making purposes and performance measurement. Managerial cost accounting is the organization and procedures, whether automated or not, and whether part of the general ledger or stand-alone, that accumulate and report consistent and reliable cost data from various agency feeder systems.
2.20 Outcome

2.20.1. Outcome is defined in broad terms in Statements of Federal Financial Accounting Concepts (SFFAC) 1, “Objectives of Federal Financial Reporting (OFFR)”, paragraphs 204-208, as accomplishments or results that occur (at least partially) because of the service efforts of government entities. Some authorities use terms like “impact,” “effect,” or “results” to distinguish the change in outcomes specifically caused by the government activity from the total change in conditions that can be caused by many factors.

2.20.2. Outcome is an assessment of the results of a program compared to its intended purpose. Outcomes must: (a) be capable of being described in financial, economic, or quantitative terms, and (b) provide a plausible basis for concluding that the program has had or will have this intended effect. For measuring outcomes for research and development programs, results may be reported by a narrative discussion of the major results achieved by the program during the year (SFFAS 8, paragraphs 93 and 99).

2.21 Output

Output is any good or service generated from the consumption of resources. It is measured as a tabulation, calculation, or recording of activity or effort that can be expressed in a quantitative or qualitative manner. It must have two key characteristics:

2.21.1. Systematically or periodically captured through accounting or management information system, and

2.21.2. A logical connection between the reported measures and the program’s purpose.

2.22 Performance Measurement

Performance measurement is a means of evaluating efficiency, effectiveness, and results. A balanced performance measurement scorecard includes financial and nonfinancial measures focusing on quality, cycle time, and cost. Performance measurement should include program accomplishments in terms of outputs (quantity of goods or services provided, e.g., how many items are efficiently produced) and outcomes (results of providing outputs, e.g., are outputs effectively meeting intended agency mission objectives).

2.23 Pricing

Pricing is the process to determine the amount at which to sell a product or service. Setting prices is a policy matter, sometimes governed by statutory provisions and regulations, and other times by managerial or public policies. The price of a good or service does not necessarily equal the cost of the good or the service determined under a particular set of principles (SFFAS 4, paragraph 37).
2.24 Product

A product is any discrete, traceable, or measurable good or service provided to a customer. Often goods are referred to as tangible products, and services are referred to as intangible products. A good or service is the product of a process resulting from the consumption of resources.

2.25 Program

Program is defined as a mission program, whose products or services the Agency delivers as part of its strategic plan. Agencies decide the exact classification of programs based on the entity’s budget structure, the missions and outputs described in the GPRA strategic and annual plans and the guidance for defining and structuring responsibility segments.

2.26 Project

A project is a planned undertaking, usually related to a specific activity, such as the research and development of a new product or the redesign of the layout of a plant.

2.27 Process Costing

Process costing is a method of cost accounting that first collects costs by processes and then allocates the total costs of each process equally to each unit of output flowing through it during an accounting period.

2.28 Recovery of Cost

Recovery of cost is the method of recovering the costs of any given expenditure.

2.29 Relevant Costs

Relevant costs are those cost elements that are necessary for particular management analyses and/or decision making purposes when full cost is not appropriate. Relevant costs may include expected or potential costs that differ among alternative courses of action.

2.30 Resource

A resource is an economic element that is applied or used in the performance of activities. Salaries and materials, for example, are resources used in the performance of activities.

2.31 Responsibility Segment

A responsibility segment is a significant organizational, operational, functional, or process component which has the following characteristics: (a) its manager reports to the entity’s top management, (b) it is responsible for carrying out a mission, performing a line of activities or services, or producing one or a group of products, and (c) for financial reporting and cost
management purposes, its resources and results of operations can be clearly distinguished, physically and operationally, from those of other segments of the entity.

2.32 Service

A service is an intangible product or task rendered directly to a customer. (Also, see Product as defined in paragraph 2.24.)

2.33 Service Department

A service department is also known as an Intermediate Cost Object. A service department is an organizational unit of a facility that has the responsibility for providing support for the work of the production departments. Examples are purchasing, building and ground personnel, and power departments. All of these activities are necessary parts of the production process and primarily supportive of production departments. Service department costs must be allocated to production departments before overhead rates are determined.

2.34 Standard Costing

Standard costing is a costing method that attaches costs to cost objects based on reasonable estimates or cost studies and by means of budgeted rates rather than according to actual costs incurred. It is the anticipated cost of producing a unit of output. It is a predetermined cost to be assigned to products produced. Standard cost implies a norm, or what costs should be. Standard costing may be based on either absorption or direct costing principles, and may apply to all or some cost elements. Refer to Volume 11B and Volume 3, Chapter 19 for use of standard costing in the Working Capital Fund (WCF).

2.35 Unit Price

Unit price is the cost of a selected unit of a good or service.

2.36 Variable Cost

Variable cost is a cost that varies with changes in the level of an activity, when other factors are held constant. The cost of material handling to an activity, for example, varies according to the number of material deliveries and pickups to and from that activity.

3.0 MANAGERIAL COST ACCOUNTING POLICY

3.1 Concepts

3.1.1. As described in SFFAS 4, paragraphs 41-45, the concepts and standards of managerial cost accounting explain the relationship among budgetary, financial, and cost accounting. Managerial cost accounting is the process of accumulating, measuring, analyzing, and reporting cost information useful to both internal and external groups concerned with how DoD uses, accounts for, safeguards, and controls its resources to meet its objectives. Managerial costing
uses a basis of accounting, recognition, and measurement that is appropriate for the intended purpose. Managerial cost accounting is an essential element of proper financial planning, control, performance evaluation, and program accountability.

3.1.2. Managerial cost accounting is a basic, integral part of the DoD financial management system. Information from a common data source provides cost information relevant to budgetary and financial accounting and reporting while providing useful information directly to management for control and decision making. Financial, budgetary, and cost accounting processes ultimately produce the Department’s audited general purpose financial statements and special purpose reports from the DoD general and sub ledgers to achieve cost accountability and transparency to stakeholders. Cost information developed for different purposes are drawn from a common data source so that output reports are reconcilable to each other.

3.2 Standards

3.2.1. SFFAS 4 requires each reporting entity to accumulate and report the cost of its activities on a regular basis for management. Costs may be accumulated through cost accounting systems or through cost finding techniques. The standard provides flexibility based on organization mission, operations, size, capabilities, and resources. Agencies have flexibility in designing a cost accounting methodology that meet both internal and external user needs.

3.2.2. The following are the five standards referenced in SFFAS 4:

3.2.2.1. Requirement: Accumulate and report costs of activities on a regular basis for management information purposes (see section 4.0),

3.2.2.2. Responsibility Segments: Establish responsibility segments to match costs with outputs (see section 5.0),

3.2.2.3. Full Cost: Determine the full cost of goods and services (see sections 4.0, 5.0, and 6.0),

3.2.2.4. Inter-Entity Costs: Recognize the cost of goods and services provided among federal entities (see sections 5.0 and 6.0), and

3.2.2.5. Methodology: Use appropriate costing methodologies to accumulate and assign costs to outputs (see section 5.0).

3.3 Uses

In managing DoD programs, cost accounting information assists managers and other stakeholders in making informed decisions in the areas of budget and cost control, performance measurement, reimbursement and fee/price setting, program evaluations, and economic choice decisions. An organization should be able to answer the following types of questions:
3.3.1. Given the current spend plan and rate of execution, at what interval (if applicable) could the program experience a cost over-run?

3.3.2. What are the full costs to deliver goods and/or services by organization, line of business, or region?

3.3.3. How well is the organization managing its available resources in terms of mission effectiveness and cost efficiency?

3.3.4. How well has the organization met its strategic plan and the expected outcomes based on resources available?

3.4 Assignment and Methodologies

3.4.1. Cost assignment approaches link expenses from a financial accounting perspective using the USSGL, as further defined in the Office of the Deputy Chief Financial Officer Standard Financial Information Structure (SFIS) to outputs of an organization (see paragraph 5.3). Users should assign costs with one of the following approaches listed in the order of preference:

3.4.1.1. Directly trace costs wherever feasible and economically practicable,

3.4.1.2. Assigning costs on a cause and effect basis, or

3.4.1.3. Allocating costs on a reasonable and consistent basis.

3.4.2. Methodologies are processes used to accumulate and allocate costs to specific outputs. Although SFFAS 4 does not require the use of a particular costing methodology, the standard requires that a costing methodology, once adopted, be used consistently. The standard recognizes that the agency management is in the best position to select a type of costing system that would meet its needs and describes the four costing methodologies in section 5.0, which include (a) job order costing, (b) process costing, (c) standard costing, and (d) ABC. The DoD Component must select the costing methodologies that best meet the organization’s operational need and mission requirement.

3.5 Systems, Sources and Cost Finding

Managers must establish appropriate procedures and practices to enable the collection, measurement, accumulation, analysis, interpretation, and communication of consistent and periodic cost information with a system or the use of cost finding techniques.

3.5.1. A system is a continuous and systematic process, which may be designed to accumulate and assign costs from a common data source to a variety of objects routinely or as desired by managers. The common data source may include many different kinds of data from many financial and non-financial sources of information to support cost, financial and budgetary accounting. Costs are traced using the accounts described in the USSGL as the standard to produce financial and budgetary general purpose reports and special purpose performance reports. Cost
accumulation is facilitated by the SFIS structure, which includes the Standard Line of Accounting (SLOA). See paragraph 5.3.

3.5.2. When data systems are unable to provide the needed cost information or where information is required on a non-recurring basis (e.g., budget estimates, Business Case Analysis, Cost Benefit Analysis, and/or Analysis of Alternatives), cost finding techniques may provide the needed results through analytical or sampling methods and special cost studies and analysis. Cost finding techniques should not replace consistent and regular managerial cost reporting when available.

4.0 REPORTING AND ANALYSIS

4.1 Overview

4.1.1. Reliable costs of federal programs and activities is important to managers. Cost reporting and analysis provides a better understanding of specific programs and activities (e.g., products and services) to include costs and changes in costs; efforts and accomplishments over time; efficiency and effectiveness of assets and liabilities in support of budgetary, financial, and managerial cost reporting; and program business decisions. Additional benefits are derived when planned and actual performance data are aligned, such as the ability to capture full costs of products and/or manpower, transparency into pricing and fees, and consistency in standardized cost reporting for historic and forecasting value. Benefits derived will vary based on organization, model maturity, and department mission.

4.1.2. Managerial cost accounting improves both financial management and decision making by providing:

4.1.2.1. An understanding of the reporting requirements as seen by management,

4.1.2.2. The type of information management needs, and

4.1.2.3. An approach to developing the analysis that will eventually support the reporting and performance structure.

4.2 Users

4.2.1. Regardless of a stakeholder’s function, users need accurate reporting to identify cash, disbursements, collections, full cost of resources, activities, capabilities, and operations for various needs. Specifically, for the DoD Reporting Components, some of these needs include:

4.2.1.1. Making better decisions at the cost element levels,

4.2.1.2. Knowing the cost of operations and activities,

4.2.1.3. Linking budget planning and allocation to actual expenditures,
4.2.1.4. Responding to both external and internal cost related inquiries, and

4.2.1.5. Making costs visible to DoD leadership, component leadership, operational commanders, and program managers.

4.2.2. Internal Users

4.2.2.1. Government managers are the primary users of cost information. They are responsible for carrying out program objectives with resources entrusted to them. Reliable and timely cost information helps ensure that resources are spent to achieve expected results and outputs as well as identify waste and inefficiency.

4.2.2.2. Program Managers use cost information to (a) effect cost control, (b) make resource acquisition decisions, (c) evaluate and improve efficiency and cost effectiveness of various program activities, and (d) make budget and planning proposals to agency heads and Congress.

4.2.2.3. Financial Managers, including accountants and budget analysts, use cost information to (a) calculate unit costs of outputs, (b) analyze and explain cost variances, (c) formulate standard costs, (d) compile period financial reports, and (e) analyze the cost behavior to quantify variable, fixed, and/or incremental costs for decisions such as buy or lease.

4.2.2.4. Franchise Activity Managers use cost information to set prices or reimbursements for the goods or services they provide (MCAIG A-xxv).

4.2.2.5. Government executives use cost information to (a) evaluate the overall performance of the programs, (b) assess future resource requirements for financial plans and budgets, and (c) develop proposals to the President and Congress on resource allocations and program expansion, modification, or downsizing.

4.2.3. External Users

4.2.3.1. Congress makes policy decisions on program priorities and allocates resources among programs through the appropriations process. These officials need cost information to compare alternative courses of action and to make program authorization decisions by assessing costs and benefits and evaluating program performance outcomes and outputs.

4.2.3.2. Citizens, including news media and interest groups, use cost information to assess the efficiency and effectiveness of resource allocation.

4.3 Decision Making

4.3.1. To interpret cost data appropriately, it is important to distinguish between direct and indirect costs, fixed and variable costs, and full and relevant costs. Analysis of these cost components help managers understand the demand their program places on federal resources of other organizational units and contributes to their organizational costs.
The accurate recording and availability of detailed historical cost information is important in providing insight into budgets, cost estimates, and performance metrics.

4.3.2. Cost information should allow organizations to address:

4.3.2.1. Current spend plan and program expense status, and

4.3.2.2. The full costs to deliver goods and/or services by an organization, line of business, or region,

4.3.3. Cost information assists managers in budget and cost control, performance measurement, reimbursement and fee/price setting, program evaluations, and economic choice decisions.

4.4 Budget and Cost Control

4.4.1. Budget planning and control serves an important function within the Federal Government. Managers use historical and current costs of program activities as a basis in estimating future budgets and to measure actual performance against established goals.

4.4.2. Once budgets are approved and executed, current cost information serves as feedback on the budgets. DoD financial managers use the feedback derived from the current costs to budget analysis to control and reduce costs, as well as find and avoid waste. With appropriate cost information collected through managerial cost accounting, federal managers can:

4.4.2.1. Explain variances between actual and budgeted costs of a cost object,

4.4.2.2. Compare cost changes over time and identify their causes,

4.4.2.3. Compare costs of similar activities and identify cost differentials, and

4.4.2.4. Produce budgets at a detailed level which will improve accuracy, insight, and increased transparency of an agency’s expenditures.

4.4.3. Organizations should produce a Statement of Net Cost (actual to budget) in accordance with Volume 6B, Chapter 5.

4.5 Performance Measurement

4.5.1. The GPRA requires Federal Agencies to develop five-year strategic plans and annual performance plans and report annually on actual performance compared to goals. The GMRA reduces duplicative administrative services by establishing a self-sustaining franchise fund to provide common and efficient administrative support services on a reimbursable basis. Participation in these franchise funds requires proper costing procedures. Subsequently, the FFMIA was enacted to help improve compliance with accounting standards resulting in reporting full costs of programs and activities, which increases accountability and improves cost efficiency, performance, and
productivity. The FFMIA builds upon and complements the CFO Act, GPRA, and GMRA, and increases the capability of agencies to monitor execution of the budget by more readily permitting reports that compare spending of resources to results of activities. Cost information is necessary to aid organizations in evaluating and comparing actual costs to planned performance measures, outputs, and outcomes.

4.5.2. In defining annual performance plans, program managers can establish performance goals based upon an understanding of both the direct and indirect costs of programs, and thereby align strategic resources to results.

4.5.3. Results are often stated in terms of an “output,” because they are easier to identify and measure. Leading practice in performance management prefers to measure an “outcome” or a result or measureable goal, which is often more difficult to identify and measure. The utilization of managerial cost accounting can provide the performance details useful to leadership for determining whether the organization achieves an “outcome” or not. Defined cost goals will assist managers in deploying resources more efficiently to achieve the desired performance.

4.5.4. An annual performance plan defines measurements for each major activity, good, and service. Plans and performance goals are developed based upon anticipated resource levels. In the budget formulation process, program managers begin to connect federal resources to results. Managerial cost accounting policies require that financial managers base their planning upon all federal resources allotted to their programs. This includes resources for both direct and indirect costs. The indirect allocated support for activities, goods, and services that are separately appropriated or covered through relevant activities are often overlooked and not included. A complete and fully inclusive performance report will include both direct and indirect (from all sources within program or support programs) costs of the cost object. When the cost of a program is managed through managerial cost accounting, and cost goals are defined, the costs of the activity, good, and service can be monitored and managed more efficiently.

4.5.5. Performance measurement can be viewed as the government equivalent of private sector profitability measurements. However, selecting appropriate measurements is quite difficult and requires exercise of judgment. Cost itself can be a performance metric, but cost should also be combined with an effectiveness measure, such as the percent of a goal achieved at a level of expected performance, to ensure the resulting output is cost effective.

4.5.6. As suggested by SFFAS 4, paragraph 35, measuring cost is an integral part of measuring performance for efficiency and cost effectiveness. Efficiency is measured by relating outputs to inputs, often expressed as cost per unit of output. Effectiveness is measured by the outcome or the degree to which a predetermined objective is met, commonly expressed as “cost effectiveness.” Therefore, the service efforts and accomplishments of a government entity can be evaluated with the following measures:

4.5.6.1. Measures of an organization’s efforts (inputs), which include the costs of resources used or consumed, and non-financial measures,
4.5.6.2. Measures of an organization’s accomplishments (outputs), which include the quantity of goods and services provided and outcomes (the results of those goods and services), or

4.5.6.3. Measures that relate efforts to accomplishments, such as cost per unit of output or cost effectiveness.

4.6  Reimbursements and Fee/Price Setting

4.6.1. Cost information is important for setting prices and user fees for government provided goods and services. Pricing and costing, however, conceptually use cost information differently. In the Federal Government, setting prices is a policy matter, sometimes governed by statutory provisions and regulations, and at other times, by department or managerial policies.

4.6.2. SFFAS 4, paragraph 37 and OMB Circular A-25 requirements include:

4.6.2.1. With respect to goods and services that the government provides in its sovereign capacity to a particular group of individuals as a special benefit, user charges should be sufficient to recover the full cost of those goods and services.

4.6.2.2. With respect to goods and services that the government provides under business-like conditions, user charges for those goods and services need not be limited to the recovery of full cost and may yield net revenue. WCFs are revolving funds that rely on a cost recovery methodology to finance operations. WCF activities are designated as zero profit/loss or breakeven activities. The full costs of the goods and services delivered are reimbursed through the associated sales. Those sales represent receipts from the appropriated funds. For this to happen, it is critical that reimbursement rates be as accurate as possible. If the rates are set too high, the organization will overcharge its customers. If rates are set too low, costs will not be fully recovered. To set rates accurately, the DoD needs a comprehensive understanding of the goods and services that are delivered, the activities and tasks required for delivery, and the resources consumed by those activities. For more information on WCF see Volume 3, Chapter 19 and Volume 11B.

4.6.3. Cost information is also important in calculating reimbursements for goods and services provided by one federal agency to another. Hence, reimbursable accounting allows one federal organization to recover its cost from another federal organization for the direct and indirect costs of providing those goods and services. The reimbursable fee structure, best displayed in the reimbursement of communication, data, and accounting services by some of the DoD agencies, is specifically established for providing those goods and services. Even if fees or reimbursements do not recover the full costs due to policy or economic constraints, management needs to be aware of the difference between cost and price. With this information, program managers can properly inform the public, Congress, and federal executives about the costs of providing the goods or services. For more information on reimbursable fees, see Volumes 11A and 11B.
4.7 Program Evaluations

The cost of federal resources required by programs is an important factor in making policy decisions related to program authorization, modification, consolidation, or discontinuation. These decisions are usually subject to policy constraints. They often require the consideration of both social and economic costs and benefits affecting different sectors of the economy and society. For complete program cost evaluation, it may be necessary to obtain advice from outside the entities’ data systems. The Office of the Director, Cost Assessment and Program Evaluation (CAPE), provides independent analytic advice to the Secretary of Defense on all aspects of the Defense program, including alternative weapon systems and force structures, the development and evaluation of defense program alternatives, and the cost effectiveness of defense systems.

4.8 Economic Choice Decisions

As noted in SFFAS 4, agencies and programs often face decisions involving choices among alternative actions, such as whether to do a project in-house or contract it out, to accept or reject a proposal, or to continue or discontinue a good or service. Making these decisions requires cost comparisons among available alternatives. In the case of outsourcing, decisions may involve comparing the incremental cost and benefits of continuing a government activity with the incremental cost and benefits of turning the project over to a private sector business. In federal terms, it may use an analysis of alternatives, for example, in the selection of software application, an upgrade to an enhanced good or service, or a capital investment project. Cost studies of various types can help to decide whether to accept or reject a proposal for a government capital project, to continue or drop a government good or service, or to contract with a private sector vendor.

5.0 COST ASSIGNMENT AND COSTING METHODOLOGY

5.1 Overview

SFFAS 4, paragraph 116, requires that managers accumulate the cost of resources consumed by responsibility segments and type of resource; accumulate outputs produced and, if practicable, measured in units; and that the full cost of direct and/or indirect resources be assigned to outputs through consistently-applied and appropriate costing methodologies or cost finding techniques.

5.1.1. When assessing cost accounting requirements, reporting entities must determine the appropriate detail for processes and procedures based on the following factors:

5.1.1.1. Nature of the entity’s operations,

5.1.1.2. Precision desired and needed in cost information (accuracy, frequency, granularity, transparency, and cost benefit of obtaining data),

5.1.1.3. Practicality of data collection and processing,

5.1.1.4. Availability of service departments for indirect services,
5.1.1.5. Cost of installing, operating, and maintaining the cost accounting processes, and

5.1.1.6. Any specific information needs of management.

5.1.2. Management should evaluate alternative costing methods and select those that provide the best results considering its operating environment and economic feasibility (e.g., the benefits resulting from implementing the methods outweigh the costs).

5.1.3. SFFAS 4 requires that a costing methodology, once adopted, be used consistently so that cost information can be compared from year to year. This requirement, however, does not preclude necessary improvements and refinements to the system or methodology, so long as the effect of any change is documented and explained. Documenting the changes assists in appropriately incorporating the new processes over historic years and provides support to any forecast adjustments.

5.2 Cost Accumulation

5.2.1. SFFAS 4 states that cost accumulation is the process of collecting cost data in an organized way and that the accumulation is for costs incurred within each responsibility segment; this does not involve the assignment or allocation of costs incurred by other supporting segments.

5.2.2. Of the five standards in SFFAS 4, two reference cost accumulation:

5.2.2.1. Accumulating and reporting costs of activities on a regular basis for management information purposes, and

5.2.2.2. Using appropriate costing methodologies to accumulate and assign costs to outputs.

5.2.3. Cost accumulation for cost objectives or outputs is achieved by selecting costing methods (e.g., standard costing, job order costing, ABC) or cost finding techniques that are suited to the operational environment. For more information on cost finding techniques, see section 6.0.

5.2.4. SFFAS 4 requires organizations to accumulate costs for the identified types of outputs produced for various programs or projects. Organizations may establish a network of cost centers to accomplish this cost accumulation task. Cost centers are a tool that groups relevant costs that support a consistent output or objective. Cost centers can be used to simplify the various costs incurred by aggregating costs into a cost center that provides a product, be it a service or a good. A project management office is a common type of cost center.

5.2.5. Responsibility segments should accumulate the costs of resources consumed by the type of resource, such as costs of employees, employee benefits, and office space or rent. Accumulating the costs incurred by resource type supports detailed reporting and provides transparency of cost by type. Outputs (if practical, measured in units) produced by responsibility segments should also be accumulated; the full cost of resources that directly or indirectly
contribute to the production of outputs should be assigned, if the purpose is to support billing a customer (refer to Volumes 11A and 11B).

5.3 Cost Assignment Authoritative Guidance

The SFIS is a comprehensive DoD enterprise data structure and common business language for budgeting, financial accounting, cost, performance, and standardized reporting requirements. SFIS enables budgeting, performance-based management, and the generation of financial statements. Through the SLOA classification, SFIS improves interoperability between business systems, provides better end-to-end funds traceability and linkage between budget and expenditures, complies with Treasury requirements, and helps achieve audit readiness. SLOA provides additional granularity to accounting transactions that improves the appropriate assignment of costs. Volume 1, Chapters 4 and 7, and the SFIS resources web page provide complete information, including the SFIS matrix, Compliance Checklist, USSGL Transaction Library, the Standard Chart of Accounts (SCOA) and the SLOA.

5.4 Cost Assignment Approaches

5.4.1. Cost assignment is the process that identifies the accumulated costs to cost objects (an activity or item whose cost is measured). As per SFFAS 4, there are three approaches, summarized in Table 19-1, for assigning costs to outputs listed in order of preference:

5.4.1.1. Directly tracing costs wherever feasible and economically practicable,

5.4.1.2. Assigning costs on a cause and effect basis, and

5.4.1.3. Allocating costs on a reasonable and consistent basis

Table 19-1. Cost Assignment Approaches

5.4.2. Agencies and responsibility segments select the appropriate cost assignment approach based on their operational needs. Operational needs tend to follow historic practices.
(if reliable historic data is available); however, cost assignment approaches can change if the operating environment or regulations change. SFFAS 4 requires organizations to identify the full cost of outputs (the goods or services produced, the missions or tasks performed, and the customers or markets served) including:

5.4.2.1. Direct and indirect costs incurred within the responsibility segment,

5.4.2.2. Intra-entity costs from other responsibility segments, and

5.4.2.3. Inter-entity costs recognized by the receiving entity.

5.4.3. Responsibility segments that produce only one output assign costs of the resources used in production to the output. Responsibility segments that deliver intermediate goods or provide supporting services assign the costs to the segments that receive the goods and services. Inter-entity costs are assigned to the responsibility segments that use the inter-entity goods and services. A receiving entity should also recognize assigned inter-entity costs from other Federal Entities.

5.4.4. It is a requirement to document changes to a cost assignment approach. Documenting changes may also require noting in the financial statements. It is important to maintain a consistent cost assignment approach, where possible, for reporting and pricing efforts.

5.5 Direct Tracing

5.5.1. Direct tracing applies to resources directly used in the production of an output. Examples include materials used in production, employees providing direct effort, facilities, and equipment used exclusively in the production of the output, and goods or services received from other entities (inter-entity) directly used in support of the output. Direct tracing also applies to specific resources dedicated to particular outputs, such as resources tracked to a single task or objective.

5.5.2. Direct costs tend to originate internally by program, responsibility segment, or reporting entity; however, outside entities may also assign direct costs to a segment. Additionally, the direct tracing approach is not limited to direct costs. Indirect costs from these outside entities can also use the direct tracing approach to capture costs in more detail. Regardless of origin or funding profile, all direct costs are included in the cost of the output.

5.5.3. As noted in Table 19-1, directly tracing costs provides the highest level of granularity and yields the highest level of reporting information; however, it is not necessary to apply direct tracing to all elements of a cost object or output. For example, directly tracing office supplies to a particular weapon system upgrade would not be cost effective, but if a program or activity explicitly budgets for administrative or clerical services, then direct traceability is relevant for costing purposes.
5.6 Cause and Effect Basis

5.6.1. Costs that cannot be traced directly to a final output (such as activities or work elements), or it is cost prohibitive to do so, but a relationship can be made between the resource costs and outputs, are assigned to intermediate cost objects. The cause and effect basis recognizes that activities have incurred costs, outputs have required these activities, and therefore, a reasonable relationship can be derived between the two. The causal beneficial relationship permits the activity costs to be accumulated and assigned using the cause and effect basis.

5.6.2. Establishing an intermediate cost object requires the identification of homogenous activities to an output and determining the rate of allocation to receiving cost objects. For example, a laboratory’s costs can first be assigned to various tests it runs. The costs of the tests can then be assigned to the operating units that ordered the tests.

5.6.3. The cause and effect basis is useful when production is consistent and manageable. The cause and effect basis must not be used if cost cannot be normalized or linked to a final output; instead, costs are assigned using a more general process.

5.7 Cost Allocation

5.7.1. Cost allocation is the process of assigning costs that cannot be directly traced or assigned using the cause and effect basis. General and Administrative services used by various common segments apply cost allocation to assign costs to benefiting cost objects. Cost allocation provides the least detail in costs incurred and is used for indirect costs only.

5.7.2. General and Administrative support costs are allocated initially to the segments and then to the outputs of that segment on a pro rata basis. This involves two steps:

5.7.2.1. Allocate the accumulated costs of services to the segment, and

5.7.2.2. Allocate the accumulated costs to the outputs of each segment.

5.7.3. The usual basis for cost allocations is the relevant common denominator. The basis of cost allocation may include the number of employees, direct hours worked, or the amount of direct costs incurred in segments. The common denominator is also referred to as the allocation base. Grouped costs should be accumulated and assigned using a consistent and relevant base. The allocation frequency and base should remain consistent to allow cost comparison over a period of time.

5.7.4. Cost allocation is similar to cause and effect in that it may use an intermediate cost object to accumulate costs; however, it differs in that a single benefiting segment or output is unable to be identified for allocation purposes. Cost allocation is commonly used for general and administrative costs. A responsibility segment may use more detailed costing methods to accumulate costs within the intermediate cost object for more detailed internal reporting, but the allocation remains based on the accumulated cost.
5.7.5. Costs accumulated for intermediate cost objects must be homogeneous. Examples in homogeneity accumulation include, but are not limited to: human resource departments, program management offices, and general and administrative offices. Activities within these examples are often difficult to measure in meaningful amounts per unit or per cost object.

5.8 Costing Methodologies and Cost Behaviors

It is important to note that the costing methodologies described in paragraphs 5.9 through 5.12 are not mutually exclusive nor all inclusive, and can be utilized in combination based on the objective, job order, or process costing and can be applied to both ABC and standard costing systems.

5.9 Job Order Costing

5.9.1. Job order costing is a costing methodology that accumulates and assigns costs to discrete jobs. Job order costing systems are used by organizations that produce unique products or special order products, projects, assignments or groups of similar outputs. Job order costing is used if:

5.9.1.1. The production or service is being performed to meet customer specifications or requirements, or

5.9.1.2. Products or services require different amounts and types of direct material, labor and indirect costs.

5.9.2. In a job order costing system, different products with varying degrees of production time and different amounts of direct materials consumed are tracked separately by work orders. Job order costing provides more control, less estimation, and more direct and reliable allocation of costs.

5.9.3. Direct materials and supplies owned by the performing activity, acquired from a WCF or from an inventory account financed by appropriated funds, are charged to a job order in accordance with established costing procedures for the segment.

5.9.4. The structure for job order data must be consistent with the SFIS and the SFIS Business Rules (see paragraph 5.3). Where relevant, subsidiary ledger accounts or proprietary accounts will be incorporated into the structure for job order data.

5.9.5. A job order number is given to each identified cost object, similar to a project Work Breakdown Structure, in which a number is assigned to each task that is being tracked or reported. Job order numbers are the framework for identifying each job and a means of accumulating departmental direct labor, direct material, and overhead (indirect, general, and administrative) cost by job order. Detailed DoD specific transactions are available in the DoD USSGL Transaction Library and must be consistent with Volume 1, Chapters 4 and 7. Refer to Volumes 11A and 11B for reimbursable policies applicable to activities financed with annual appropriations and WCFs.
5.10 Process Costing

5.10.1. Process costing accumulates costs by individual processing cost center. These processing cost centers are involved in a continuous flow of effort, with each center contributing towards the completion of the end products. The output of a processing center becomes the input of the next processing cost center or becomes a part of the end product.

5.10.2. Process costing is appropriate for production of goods or services with the following characteristics:

5.10.2.1. The production involves a regular pattern of processes, and

5.10.2.2. The output consists of homogeneous units, and

5.10.2.3. All units are produced through the same process procedures.

5.10.3. Each cost center accumulates costs, assigns the costs to its outputs, and calculates the unit cost of its output. For each period, cost centers prepare a cost and performance report showing the costs, the completed effort, and the work-in-process. When a certain number of completed units are transferred from the cost center to the next cost center, the cost of those units are also transferred and are eventually incorporated into the costs of the end product. Therefore, the cost flow follows the physical flow of the production. The unit cost of the end product is the sum of the unit costs of all the divisions.

5.11 Standard Costing

5.11.1. Standard costs are carefully predetermined or expected costs that can be applied to activities, services or products on a per unit basis. The purpose of standard costing is to have a standard cost per product used as a goal to compare with actual costs.

5.11.2. A standard cost outlines how a task should be accomplished in nonfinancial terms (hours, minutes, board feet) and how much it should cost. Standard costing can be done for components such as direct materials, direct labor, and indirect costs. Standard costs are a fixed price per unit and are commonly used in production or service center models.

5.11.3. Standard costing is used in conjunction with job order costing, process costing, and activity based costing and it can be applied to specific outputs or activities, or to a responsibility segment in aggregate by comparing total actual costs with total standard costs based on outputs produced within a certain time period. Standard costing is appropriate for operations that produce services or products on a consistently repetitive basis. (Refer to Volumes 11A for Reimbursable Operations and 11B for WCF activities).
5.12 ABC

5.12.1. ABC focuses on activities of a production cycle, based on the premises that:

5.12.1.1. Output requires activities to produce, and

5.12.1.2. Activities consume resources.

5.12.2. ABC uses cost drivers to assign costs through activities to outputs.

5.12.3. The ABC cost assignment process is a two-stage process. The first stage assigns the cost of resources to activities. The second stage assigns activity costs to outputs.

5.12.4. Implementing ABC is a four step process:

5.12.4.1. Identifying activities within a segment. This may require an in-depth analysis of the operating processes, as some processes may consist of one or more activities. Activities may be classified into unit level, batch level, product sustaining, and facility sustaining activities. Management may combine related small activities into larger activities to avoid excessive costing efforts.

5.12.4.2. Assigning resource costs to activities to capture the full cost of the final output. Assigned resource costs should include direct and indirect costs as well as any inter- or intra-department costs relevant to the activity. Resource costs are assigned to activities in three ways, depending on feasibility and cost benefit considerations:

5.12.4.2.1. Direct tracing,

5.12.4.2.2. Standard costing or cost finding report, or

5.12.4.2.3. Allocations.

5.12.4.3. Identifying outputs. Outputs are any good or service generated by a segment, and can include information or paperwork generated by the completion of the tasks or customers (e.g., persons or entities to whom a federal agency is required to provide goods or services). Omitting a resource cost, activity, or output in the ABC process will result in overcharging costs to other outputs.

5.12.4.4. Assigning activity costs are assigned to outputs using activity drivers based on individual outputs’ consumption or demand for activities. For example, a driver may be the number of times an activity is performed or the length of time an activity is performed in the production of an output. These are referred to as transactional and durational drivers, respectively.

5.12.5. ABC can be used in conjunction with job order costing or process costing. Job order or process costing would be costing activities that occur in the production of a final output. For example, a contracting office has many activities that lead into the finalization of a contract.
There are routine processes relevant to all contracts, such as document formatting, printing, and delivery activities, that are likely allocated using a standard cost methodology (established rate per output), while other activities such as research and negotiation are not common and vary depending on contract type, are allocated using ABC methods.

5.12.6. A major advantage of using ABC is that it avoids or minimizes distortions in product costing that result from arbitrary allocations of indirect costs. By tracing costs through activities, ABC can provide more accurate good or service costs. Ranking activities by the degree to which they add value to the organization or its outputs encourages management to evaluate the efficiency and cost effectiveness of activities. An ABC method starts with identifying and examining the following:

5.12.6.1. What value-added activities are really needed in order to accomplish a mission, deliver a service, or meet customer demand?

5.12.6.2. How can activities be modified to achieve cost savings or product improvements?

5.12.6.3. What activities do not actually add value to services or products?

5.12.6.4. Where can cycle time analysis and value-added analysis be incorporated?

6.0 DATA SYSTEMS, DATA SOURCES AND COST FINDING

6.1 Data System

6.1.1. Financial accounting, budgeting, and managing are three essential ingredients of accountability. Data systems are the source of cost and programmatic information used for reporting. SFAS 4 requires that each reporting entity accumulate and report the cost of activities on a regular basis.

6.1.2. A data “system” is an organized grouping of methods, source information, and activities surrounding data collection used to produce reliable cost information on a consistent basis. Data systems include a collection of system tools and sources used for automating managerial cost accounting reporting, but can also include manual processes, such as cost finding reports. System based reporting should be used first before relying on cost finding reports in order to routinely collect reliable data from a common data source, process the data, and report cost and output information for general and special purposes. Data systems will integrate sources of information across an organization and may need to include data sources that cross multiple reporting segments of an entity in order to provide the proper cost information, such as accounting information, time records, or asset data. A data system can also include evaluation and decision source information derived as a result of prior reporting and feedback.

6.1.3. Cost information developed for managerial cost accounting purposes from established data systems should be reconcilable to financial, budgetary, or managerial accounting items. When possible, information produced from a data system should be corroborated with other
reporting tools to validate the content in the systems (quantity of line items or sum of dollars). This task may be included in a recurring internal control assessment to reduce redundancy. DoD financial managers will decide the best approach based on the complexity of the data and its reliance.

6.1.4. DoD data systems, to the extent practicable, should be integrated with an organization’s accounting, budgetary, and financial system(s). As SFFAS 4, paragraph 72 prescribes, a system should take into consideration:

6.1.4.1. The nature of the entity’s operations,

6.1.4.2. Precision desired and needed in cost information,

6.1.4.3. Practicality of data collection and processing,

6.1.4.4. Availability of electronic data handling,

6.1.4.5. Cost of installing, operating and maintaining the cost accounting processes, and

6.1.4.6. Any specific management information needs.

6.1.5. Data systems will support cost analyses used to compare actual to anticipated costs. To meet managerial cost accounting needs, data systems should use uniform and basic cost, transactional, or programmatic data. Examples of these data are units of output produced and input used, to include the amount of labor in terms of employees or employee hours.

6.2 Data Sources

6.2.1. Data sources, as SFFAS 4 describes it, “consists of all financial and programmatic information used by the budgeting, cost accounting, and financial accounting processes. The common data source may include many different kinds of data, which may be spread among multiple systems or locations, including non-computerized sources. These data are far more than the information about financial transactions found in the standard general ledger, although that is a significant part of the data source.” Non-financial data may include human capital, logistical, and operational data. Common data sources will include information about financial transactions found in the standard general ledger along with various other data types. The use of the term “data source” is not limited to the use of computerized systems for information, but includes a broad array of sources of information (for example, manually prepared reports or audit findings).

6.2.2. Data sources integrated into the data system must be relevant to the reporting segment and its reporting requirements. Data sources may originate from within the reporting segment or from an external entity. Data sources must be capable of retaining pertinent data over periods sufficient to provide historical reference and allow for forecasting. Managers will examine non-systematic data sources for content, accuracy, and reliability on a recurring basis.
6.2.3. Reporting needs will vary depending upon the circumstances and purpose for which the measurement is used. Data sources established within an entity’s data system may need to change as the operational needs change. However, as stated in SFFAC 1, the focus is on developing generally accepted accounting standards for reporting on the financial operations, financial position, and financial condition of the Federal Government and its component entities and other useful financial information. This implies a variety of data sources that complement budget information will be required and must be adapted to fit OFFR, SFIS, and SLOA standards.

6.3 Cost, Budget, and Financial System Relationships

6.3.1. Proper financial management requires that cost, budget, and financial systems work closely together to provide useful information. Per FASAB, OFFR should consider the needs of both internal and external users, the decisions they make and the information they need. The established data systems must follow the DoD USSGL Transaction Library and DoD SCOA for consistency of the cost information.

6.3.2. Budgetary accounting ensures compliance with fiscal legal requirements and tracks the use of each appropriation for specified purposes in separate budgetary accounts through the various stages of budget execution—from appropriation to apportionment and allotment to obligation and eventual outlay. Cost accounting informs budget formulators and decision makers with the full cost of federal resources required to support policy and program goals. Cost accounting also assists the budget execution process by consistently accumulating and reporting the costs of the federal resources consumed, and by comparing actual against planned federal resource consumption (MCAIG Glossary, page I-19). Managerial cost accounting uses the defined data elements prescribed by SLOA to produce a more detailed Statement of Net Cost for budget reconciliation (see paragraph 5.3).

6.3.3. Financial accounting tracks financial events of DoD Reporting Entities and produces results of operations, including assets, liabilities, and changes in net position, revenues, and expenses. Federal financial reporting derived from cost accounting data systems will encompass general and special purpose report capabilities to meet the needs of the four user groups: program managers, executives, Congress, and citizens. Information produced by managerial cost accounting appears in or influences both general and special purpose reports.

6.3.4. Data systems for cost accounting should provide sufficient cost detail on a timely basis to support performance reporting. Measuring and reporting actual performance against established goals is essential to assess governmental accountability. Cost information is necessary in establishing strategic goals, measuring service efforts, determining whether expected outcomes were achieved, and relating efforts to accomplishments.

6.3.5. Data systems that use different accounting bases or different recognition and measurement methods than the norm should be reconcilable and should fully explain the accounting bases and measurement methods. Regardless of the type of report in which it is presented, cost information should ultimately be traceable back to the original source.
6.3.6. As per SFAS 4, to be reconcilable, the amount of the differences in the information reported should be ascertainable and the reasons for the differences should be explainable. In some situations, informational differences may be clearly understandable without further explanation. However, other cases may require a narrative statement concerning the differences. In complicated situations, a schedule or table may be required to fully explain the differences. Any variances observed in data system reports to budgetary, financial, or managerial cost accounting reports must be documented noting the reason for the variance (if discernable), the source of the variance, and the resolution, if applicable.

6.4 Cost Finding

6.4.1. Cost finding is a tool used to perform cost examinations when a data system cannot provide sufficient data. Cost finding techniques produce cost data by analytical or sampling methods. Cost finding techniques are only appropriate for certain kinds of projects or programs that have limited scopes or costs. Organizations may use thresholds to limit the use of cost finding technique. When cost finding techniques are used, the value of the report should be limited and a timeframe for updating the cost finding report established. As cost information becomes available and normalized on the project or program, the cost finding report should be replaced with actual data.

6.4.2. Special purpose cost reports and analyses, or cost finding techniques, can be performed for financial based decision making. Cost finding techniques will vary depending on the type, level, and significance of the financial decision, e.g., planning decisions for replacement costs, capital costs, or sustainment of operations. It is important that the basis and method used be appropriate for the circumstances and consistent with the intended purpose.

6.4.3. Cost finding techniques produce cost data by analytical or sampling methods. Cost finding techniques are used for indirect costs, items with costs below set thresholds within programs, or for programs in their entirety. Cost finding techniques support the overall managerial cost accounting process and can represent nonrecurring analysis of specific costs.

6.5 Cost Finding Application

6.5.1. Cost findings generated manually outside of the standard reporting tools should utilize an established managerial cost accounting data system where possible. Cost finding techniques will vary. It is crucial that the process be thoroughly documented. Documentation must be sufficient to replicate the cost finding process used with consistent results.

6.5.2. Within the DoD, cost finding techniques will be used to compare costs of different organizational units or operations performing the similar output. Cost finding is one tool in estimating full costs, and can be used to compare organizational efficiency. For example, the costs for an intermediate object, such as processing a personnel action at a personnel office, can be compared with the cost at other personnel offices to determine the efficiency of one over the other or value of both.
6.5.3. Cost finding techniques are used for a number of different circumstances, but there are four general circumstances:

6.5.3.1. A cost accounting system is not in place for full cost of a cost objective.

6.5.3.2. The data system does not have the full costs incurred to provide an output or product. In this scenario, the output is often new or unique.

6.5.3.3. Activities do not have formal cost accounting capability as part of their financial management system, but periodically provide outputs to other DoD Components, Federal agencies, or to the public.

6.5.3.4. The cost of an item has not been recorded in the accounting system and the item is being transferred, sold, or recorded in the accounting system for the first time.

6.5.4. When the purpose of a cost finding includes the preparation of an internal report or an external report for another Federal agency or non-Federal organization, General Fund (GF) Components should follow the guidance contained in Volume 11A, Chapter 1 to ensure that all applicable costs are considered. WCF Components must follow the guidance in Volume 11B. When the purpose is to establish the cost of an activity associated with the Security Cooperation Program, managers and users will follow the guidance contained in Volume 15, Chapter 7.

6.6 Cost Finding Requirements

6.6.1. Cost finding techniques must be repeatable and set up in a manner that is consistent with similar prior cost finding reports in the cost collection approach, even if the effort is associated with a one-time cost accounting requirement. This is required to sustain an audit or assessment of the cost later.

6.6.2. Although cost finding practices are outside of the standard processes, cost finding techniques must align with the SFIS Business Rules for financial data (see paragraph 5.3).

6.6.3. A thoroughly documented cost finding approach requires:

6.6.3.1. The cost objects or outputs (both intermediate and final) to which cost finding techniques are to be applied, in addition to the relevant funds used to support the organization (WCF and GF),

6.6.3.2. The organizations involved in performing the cost objects and the tasks performed by each,

6.6.3.3. The applicable cost elements,

6.6.3.4. A plan that includes the specific cost finding techniques to be used and the criteria followed in selecting the specific cost finding technique, and
6.6.3.5. A description of how those techniques will be used to estimate the cost object.

6.6.4. The documented statement and the related work papers should be retained for the same length of time as other documentation used to support billings to federal agencies or the public. Refer to Volume 1, Chapter 9, for document retention and audit readiness.

6.6.5. Identifying and describing cost objects are an important element of the documentation requirement. When the cost object identified is at a reporting entity or organizational level, the cost finding approach could rely on more estimation techniques and fewer details in the cost estimates. If the cost object identified is at the specific function or operation level, additional granularity will be required to provide useful cost object data. At the specific function or operation level, the data may not be available in the legacy financial systems.

6.6.6. The task is to classify the direct or indirect cost objects. A cost object responsible for actually performing the work is direct. A cost object that provides support or performs an administrative function is indirect.

6.6.7. Organizations or cost objects may be either direct or indirect costs depending on the activities identified. For example, when using cost finding techniques to collect costs for paying a contractor invoice, the costs of the accounting technicians at the Defense Finance and Accounting Service (DFAS) disbursement function would be considered direct costs, as they are assigning their time directly to the specific customer. However, when using cost finding to collect costs for the operation of an aircraft carrier battle group, the disbursing function at DFAS is considered an indirect cost and allocated to all benefiting organizations. In the two examples, the difference is the activity scope performed and how cost is recognized as a singular cost easily identifiable in a cost summary or multiple cost aggregated into a single assignment.

6.6.8. An organization classified as indirect cost will not always be recognized in the computation of costs for a final cost object. At the macro level, service center type organizations generally will be recognized as indirect and the related costs allocated among direct organizations. At the micro level, materiality and usefulness will be determining factors on recording the costs as direct. Specifically, if some cost assignment amounts are not readily available, and they are estimated to be relatively insignificant in the context of the total costs, cost finding techniques would allow them to be excluded from the overall costs with a notation that they are not material.

6.6.9. An important aspect of any cost finding technique is identifying the direct and indirect cost elements applicable to the good or service. Even within a direct cost organization, there may be indirect cost elements. Both the direct and indirect activities may have the same cost elements, such as civilian personnel costs. The difference is in whether the costs are considered direct or indirect. If indirect, allocate across the direct cost elements.

6.6.10. All possible cost elements must be identified and determined if they are significant. Personnel compensation, purchased services, supplies, and materials are typical major categories within the SFIS Cost Element Code (see paragraph 5.3).
6.6.11. After the potential elements are identified, it must be decided which cost elements are sufficiently significant to the final cost object and if they warrant separate consideration. An evaluation of the elements would also include the relevance and materiality of each cost element to the cost object. Materiality is determined by analyzing whether excluding the data could distort the computed value for the final cost object.

6.6.12. Before the values for each cost finding can be determined, the source documents for the required data must be identified and physical hardcopies or softcopies retained for audit or performance examination purposes. Source documentation is cost information on a prior project, effort, or purchase that is the same or similar in nature. Examples include: invoices of procurements, contracts, statement on costs, and funding reports. When WCF organizations are part of the cost finding, detailed cost or pricing documentation should already be available since these data are needed for the customer rate setting process. Depending on the significance and intended use of the cost finding report, the identification of specific documents may not be necessary if it is insignificant to the operating costs to which it will be applied.

6.6.13. The following principles are intended to help guide the collection of comprehensive data:

6.6.13.1. Provide a comprehensive data structure for the cost object that specifies the source of all data,

6.6.13.2. Rely on the financial management system to the maximum extent possible and ensure the source data is complete and representative for its intended purpose (reflective of all debits, credits, cost transfers, and journal adjustments),

6.6.13.3. Document the rationale for direct and indirect costs,

6.6.13.4. Pricing lists, costing sheets, benchmarking studies on standard items such as direct and indirect labor and materials, and

6.6.13.5. Create an auditable, repeatable process to support cost management analysis over time.

6.6.14. The following guidance using cost finding techniques should be applied when determining the individual costs of intermediate and final cost objects:

6.6.14.1. Civilian direct labor costs are computed using the average pay grade for applicable General Schedule series personnel (e.g., step 5). For Wage Grade employees, use the average applicable pay grade (e.g., step 4). Amounts included as direct labor costs should recognize only productive time that is, the time actually used to perform the function. All other times, such as training or annual leave, are indirect labor and are included in indirect costs. Actual costs may be used, if known, provided appropriate documentation is available to support their substitution. Prior to applying the labor costs, it will be necessary to develop an approach for collecting the number of hours associated with an activity reflected in a cost object.
6.6.14.2. Civilian Personnel Fringe Benefit costs are computed using the rates published annually on the Office of the Under Secretary of Defense, Comptroller (OUSD(C)) Financial Management Reports website in accordance with Volume 11A, Chapter 6 or Volume 15, Chapter 7.

6.6.14.4. Both military and civilian labor should be included, as applicable. Labor that is directly traceable to jobs should be recorded as direct labor. Indirect labor (labor that cannot be charged to a specific job) should be used in computing indirect costs. Volume 11A, Chapter 1, reimbursable policy controls whether military labor costs actually are includable in charges to other DoD entities.

6.6.14.5. Direct material cost is determined using standard prices, unless the actual cost is known from vendor invoices. Standard prices can be obtained from vendor catalogs, supply system stock databases, recent contract purchases of similar items, or any other available data source.

6.6.14.6. Depreciation and amortization of capitalized property and real property represent an additional cost of an activity, project, or service. Chapters 24-27 provide additional guidance on calculation of depreciation and amortization for general equipment; assets under capital leases, internal use software, government furnished equipment, contractor acquired property, and real property.

6.6.14.7. Other costs that can be directly related to the cost object are determined using source documents, such as vendor invoices and travel vouchers.

6.7 Pricing for a Cost Finding Report

Pricing elements (labor, materials and overhead) for cost finding reports are estimates based on prior same or similar purchases, projects, or programs. When pricing for a cost finding primarily uses financial system data, it improves the accuracy and confidence in the estimate. Common elements such as labor, raw materials, and materiel are examples of standard costs found in financial systems. Pricing practices and standards should be researched for each agency before developing a new practice or procedure.

6.7.1. Information available from CAPE, such as full cost of manpower, and defense employment and purchase projection system are available to support pricing of labor costs. In addition to base pay, these sources provide additional costs related to labor, including fringe benefits and training. When pricing labor, it is important to include the full cost of labor, as fringe benefits will increase total labor costs significantly.
6.7.2. Materials and supply pricing tools are also available from CAPE. These tools can support costs for common purchase items. Pricing for materials and supplies should include the full cost of procurement, which can include material handling and destination charges. Supporting agencies like Washington Headquarters Services or Defense Logistics Agency may supply the full cost of procurement. It is important to identify where services and goods originate from as part of the pricing documentation. The life cycle of a procurement will need to be included as part of a procurement pricing estimate.

6.7.3. A pricing Basis of Estimate (BoE) will vary for services provided by a GF Component vice a WCF Component. Volume 11A, Chapter 1, paragraph 2.4 provides guidance on the pricing of reimbursements for providing authorized services or materiel unless a specific DoD issuance authorizes alternative reimbursement policies. Volume 11B provides WCF guidance for products and services cost recovery. A WCF-financed activity must include general and administrative costs and other overhead in a BoE to satisfy requirements for full cost recovery. Under reimbursable policies set forth in Volume 11A, Chapter 1, DoD activities that finance reimbursable operations using annual appropriations generally do not include such costs in charges to customer activities within the DoD.

CHAPTER 24

REAL PROPERTY

1.0 GENERAL (2401)

1.1 Overview (240101)

This chapter prescribes Department of Defense (DoD) accounting policy for real property, which is a subset of General Property, Plant, and Equipment (General PP&E).

1.1.1. Description. General PP&E, which includes real property, consists of tangible assets that:

1.1.1.1. Have an estimated useful life of two years or more;

1.1.1.2. Are not intended for sale in the ordinary course of operations; and

1.1.1.3. Are acquired or constructed with the intention of being used or being available for use by the entity.

1.1.2. Characteristics of Real Property. Real property items are used in providing goods or services, or support the mission of the entity, and typically have one or more of these characteristics:

1.1.2.1. The item could be used for alternative purposes (e.g., by other DoD or federal programs, state or local governments, or nongovernmental entities), but it is used to produce goods or services, or to support the mission of the entity;

1.1.2.2. The item is used in business-type activities which are defined as a significantly self-sustaining activity which finances its continuing cycle of operations through collection of exchange revenue; and/or

1.1.2.3. The item is used by entities in activities whose costs can be compared to those of other entities performing similar activities (e.g., federal hospital services in comparison to commercial hospitals).

1.1.3. Inclusions. Real property also includes:

1.1.3.1. Items acquired through capital leases, including leasehold improvements (see Chapter 26 for a discussion of accounting for real property acquired through leases);

1.1.3.2. Items under the accountability of the reporting DoD Component even though it may be in the possession of others (e.g., state and local governments, colleges and universities, or contractors);
1.1.3.3. Land, other than Stewardship Land that was specifically acquired for, or in connection with other General PP&E. See paragraph 240204 for election to expense land under Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standards (SFFAS) 50.

1.1.3.4. Land rights held by a DoD Component in land owned by others. See paragraph 240204 for election to expense land rights under FASAB SFFAS 50.

1.1.4. Examples. Real property examples include:

1.1.4.1. Real property including land, land rights, and facilities (includes buildings, structures, and linear structures) (addressed in this chapter);

1.1.4.2. Construction-in-progress (CIP) (addressed in this chapter);

1.1.4.3. Assets under capital lease (addressed in chapter 26); and

1.1.4.4. Leasehold improvements (addressed in this chapter).

1.1.5. Exclusions. Real property excludes items:

1.1.5.1. In which the DoD has a reversionary interest (for example, the DoD sometimes retains an interest in real property acquired with grant money in the event that the recipient no longer uses the real property in the activity for which the grant was originally provided and the real property reverts to the DoD); and

1.1.5.2. Classified as non-Multi-Use Heritage Assets or Stewardship Land (as described in Chapter 28).

1.2 Purpose (240102)

This chapter prescribes DoD accounting policy for real property, a subset of General PP&E. The applicable general ledger accounts are listed in the United States Standard General Ledger (USSGL) contained in Volume 1, Chapter 7, and the accounting entries for these accounts are specified in the DoD USSGL Transaction Library. Unless otherwise stated, this chapter is applicable to all DoD Components, both General Fund and Working Capital Fund (WCF) activities.

1.3 Authoritative Guidance (240103)

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.2. FASAB *[SFFAC 7]*, “Measurement of the Elements of Accrual-Basis Financial Statements in Periods After Initial Recording;”

1.3.3. FASAB *[SFFAS 1]*, “Accounting for Selected Assets and Liabilities;”

1.3.4. FASAB *[SFFAS 4]*, “Managerial Cost Accounting Standards and Concepts;”

1.3.5. FASAB *[SFFAS 6]*, “Accounting for Property, Plant, and Equipment;”

1.3.6. FASAB *[SFFAS 23]*, “Eliminating the Category National Defense Property, Plant, and Equipment;”

1.3.7. FASAB *[SFFAS 29]*, “Heritage Assets and Stewardship Land;”

1.3.8. FASAB *[SFFAS 40]*, “Definitional Changes Related to Deferred Maintenance and Repairs: Amending Statement of Federal Financial Accounting Standards 6, Accounting for Property, Plant, and Equipment;”

1.3.9. FASAB *[SFFAS 42]*, “Deferred Maintenance and Repairs: Amending Statements of Federal Financial Accounting Standards 6, 14, 29, and 32;”

1.3.10. FASAB *[SFFAS 44]*, “Accounting For Impairment of General Property, Plant, and Equipment Remaining In Use;”

1.3.12. FASAB *[SFFAS 55]*, “Amending Inter-entity Cost Provisions;”

1.3.15. FASAB *[TR 14]*, “Implementation Guidance on the Accounting for the Disposal of General Property, Plant & Equipment;”

1.3.16. FASAB *[TR 15]*, “Implementation Guidance for General Property, Plant, and Equipment Cost Accumulation, Assignment and Allocation;”

1.3.17. FASAB *[TR 17]*, “Conforming Amendments to Technical Releases for SFFAS 50, Establishing Opening Balances for General Property, Plant, and Equipment;”

1.3.18. FASAB *[TR 18]*, “Implementation Guidance for Establishing Opening Balances;”

1.3.20. FASAB **Staff Implementation Guidance 6.1**, “Clarification of Paragraphs 40 – 41 of SFFAS 6, Accounting for Property, Plant, and Equipment, as Amended;”

1.3.22. DoD Directive **(DoDD) 4165.06**, “Real Property;”

1.3.23. **DoDD 5110.04**, “Washington Headquarters Services (WHS);”

1.3.25. **DoDI 4000.19**, “Support Agreements;”

1.3.26. **DoDI 4165.14**, “Real Property Inventory (RPI) and Forecasting;”

1.3.27. **DoDI 4165.70**, “Real Property Management;”

1.3.28. **DoDI 4165.71**, “Real Property Acquisition;”

1.3.29. **DoDI 4165.72**, “Real Property Disposal;”

1.3.31. Title 10, United States Code, section 2674 (**10 U.S.C. § 2674**)

1.3.32. **10 U.S.C. § 2682;**

1.3.33. **10 U.S.C. § 2721;** and

1.3.34. Title 41, Code of Federal Regulations, part 102-75 (**41 CFR 102-75**)  

2.0 ACCOUNTING FOR REAL PROPERTY (2402)  

2.1 Definitions (240201)  

2.1.1. **Facility**. A facility is a building, structure, or linear structure whose footprint extends to an imaginary line surrounding a facility at a distance of five feet from the foundation that, barring specific direction to the contrary such as a utility privatization agreement, denotes
what is included in the basic record for the facility (e.g., landscaping, sidewalks, and utility connections). This imaginary line is commonly referred to as the “5-foot line.” A facility will have a Real Property Unique Identifier (RPUID) received from the Data Analytics & Integration Support platform, which is entered into an Accountable Property System of Record (APSR) as a unique real property record.

2.1.2. **Funding DoD Component.** The funding DoD Component is the entity paying to acquire the real property asset or improvement, regardless of the specific types of funds used (e.g., appropriation or working capital funds).

2.1.3. **Installation Host.** Installation Host is a term used by the DoD to describe the Military Department (i.e., Department of the Army, Department of the Navy which includes the U.S. Marine Corps, or Department of the Air Force) or Washington Headquarter Services (WHS) on whose installation a real property asset is located. An Installation Host may be either a General Fund or a WCF operation.

2.1.4. **Materiality.** Materiality, as defined by the SFFAS 1, is the degree to which an item's omission or misstatement in a financial statement makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or the misstatement.

2.1.5. **Net Realizable Value (NRV).** NRV is the estimated amount that can be recovered from selling, or any other method of disposing, of an item less estimated costs of completion, holding, and disposal.

2.1.6. **Real Property.** Real property assets consist of buildings, structures, linear structures (collectively called facilities), land, and land rights.

   2.1.6.1. A building is a roofed and floored facility enclosed by exterior walls and consisting of one or more levels that is suitable for single or multiple functions and that protects human beings and their properties from direct harsh effects of weather such as rain, wind, sun and other natural factors.

   2.1.6.2. A structure is a facility, other than a building or linear structure that is constructed on or in the land.

   2.1.6.3. A linear structure is a facility whose function requires that it traverse land (e.g., runway, road, rail line, pipeline, fence, pavement, electrical distribution line) or is otherwise managed or reported by a linear unit of measure at the category code (commonly known as CATCODE) level.

   2.1.6.4. Land is defined as a portion of the earth’s surface distinguishable by boundaries. Land must be accountable by parcel starting when the parcel was transferred into an Installation Host’s custody and control. Excluded from the definition are natural resources (e.g., depletable resources, such as mineral deposits and petroleum, renewable resources such as timber and the outer continental shelf resources) related to land.
2.1.6.5. A land right is an interest and privilege held by DoD or a DoD Component in land owned by others, such as leaseholds, easements, water and water power rights, diversion rights, submersion rights, rights-of-way, mineral rights and other like interests in land.

2.1.7. **Value-In-Use.** SFFAC 7 describes value-in-use as the benefit to be obtained by an entity from the continuing use of an asset and from its disposal at the end of its useful life.

### 2.2 Relevant USSGL Accounts (240202)

2.2.1. **Land and Land Rights (USSGL 171100).** The amount of identifiable cost of land and land rights of unlimited duration acquired for or in connection with General PP&E used in general operations and permanent improvements are recorded in this account.

2.2.2. **Construction-in-Progress (USSGL 172000).** The CIP is used to accumulate the costs of new construction of General PP&E (except for internal use software) and capital improvements while the asset is under construction. CIP accounts include all costs (e.g., direct labor, direct material, supervision, inspection and overhead) incurred in construction. Upon completion, these costs will be transferred to the appropriate General PP&E account.

2.2.3. **Buildings, Improvements, and Renovations (USSGL 173000).** The Buildings, Improvements, and Renovations account is used to record the cost of buildings acquired and improvement(s) to them, under the legal jurisdiction of the Installation Hosts, which are used in providing DoD services or goods. This account also includes the cost of renovation, improvement, or restoration of multi-use heritage assets classified as buildings after transfer from the CIP account.

2.2.4. **Accumulated Depreciation on Buildings, Improvements, and Renovations (USSGL 173900).** The Accumulated Depreciation on Buildings, Improvements, and Renovations account is used to record the amount of accumulated depreciation charged to expense for assets and improvements recorded in the USSGL 173000 account.

2.2.5. **Other Structures and Facilities (USSGL 174000).** The Other Structures and Facilities account is used to record the cost or appraised value of structures and linear structures and improvements to them, under the legal jurisdiction of the Installation Hosts, which are used in providing DoD services or goods. This account also includes the cost of renovation, improvement, or restoration of multi-use heritage assets classified as structures or linear structures after transfer from the CIP account.

2.2.6. **Accumulated Depreciation on Other Structures and Facilities (USSGL 174900).** The Accumulated Depreciation on Other Structures and Facilities account is used to record the amount of accumulated depreciation charged to expense for assets and improvements recorded in the USSGL 174000 account.

2.2.7. **General Property, Plant, and Equipment Permanently Removed but Not Yet Disposed (USSGL 199500).** The General Property, Plant, and Equipment Permanently Removed but Not Yet Disposed account is used to record the value of General PP&E assets, which have
been permanently removed from service but not yet disposed. Upon permanent removal from service, General PP&E assets must be recorded at their expected NRV and must cease to be depreciated.

2.2.8. Financing Sources Transferred In Without Reimbursement (USSGL 572000). The amount determined to increase the financing source of a reporting Federal entity that occurs as a result of an asset being transferred in. The amount of the asset is recorded at book value of the transferring Federal entity.

2.2.9. Financing Sources Transferred Out Without Reimbursement (USSGL 573000). The amount determined to decrease the financing source of a reporting Federal entity that occurs as a result of an asset being transferred out. The amount of the asset is recorded at book value as of the transfer date.

2.2.10. Depreciation, Amortization and Depletion (USSGL 671000). The expense recognized by the process of allocating costs of an asset (tangible or intangible) over the period of time benefited or the assets useful life is recorded in this account.

2.3 Valuation of Acquisitions and Transfers (240203)

2.3.1. Recorded Cost. When acquiring a real property asset, the recorded cost must be recognized in accordance with paragraph 240204. The recorded cost of a real property asset is the basis for computing depreciation. The recorded cost must include all amounts paid to bring the real property asset to its form and location suitable for its intended use. This subparagraph defines and prescribes the use of acquisition cost, net book value (NBV), fair value, and ancillary cost when recording the cost of newly acquired real property assets. The funding source (e.g., appropriation and WCFs) is not a factor in determining whether or not an item should be capitalized.

2.3.1.1. Acquisition Cost. For purposes of this chapter, acquisition cost refers to the original purchase or construction cost, net of (less) any purchase discounts. Purchase discounts lost and late payment interest expenses must not be included as a cost of the asset; rather, such costs must be recognized as operating expenses. Although the measurement basis for valuing real property remains historical cost, for purposes of establishing auditable opening balances, DoD Components should use the Plant Replacement Value as the methodology for calculating deemed cost as a surrogate for the historical cost for real property as described in SFFAS 6 as amended by SFFAS 50 (see Annex 4 for additional guidance).

2.3.1.2. NBV. NBV is the recorded cost of a real property asset, less its accumulated depreciation.

2.3.1.3. Fair Value. Fair value is the amount at which an asset or liability could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.
2.3.1.4. **Ancillary Cost.** Ancillary costs are included in the recorded cost in addition to the acquisition cost of the asset. These costs are identifiable and necessary to bring the asset to its form and location suitable for its intended use including other direct and indirect costs. Examples include:

2.3.1.4.1. Labor and other direct or indirect production costs (for assets produced or constructed);

2.3.1.4.2. Engineering, architectural, and other outside services for designs, plans, specifications, and surveys after funding and design authorization;

2.3.1.4.3. Acquisition and preparation costs of buildings and other facilities;

2.3.1.4.4. An appropriate share of the cost of the equipment used in construction work;

2.3.1.4.5. Fixed equipment and related installation costs required for activities in a building or facility;

2.3.1.4.6. Allowable direct costs of inspection, supervision, and administration of construction contracts and construction work;

2.3.1.4.7. Legal and recording fees and damage claims;

2.3.1.4.8. Fair value of facilities and installed equipment donated to the DoD;

2.3.1.4.9. Interest paid directly to providers of goods or services related to the acquisition or construction (not including late payment interest penalties).

2.3.2. **Method of Acquisition or Transfer Determines Recorded Cost**

2.3.2.1. **Purchased Real Property.** The cost to be recorded for real property assets acquired by purchase from a third party (private, commercial, or state or local government) is its purchase contract cost plus applicable ancillary costs. Examples of ancillary costs are included in the listing in subparagraph 240203.A.4. For purposes of this guidance, purchase includes procurements of real property by cash, check, or installment or progress payments on contracts or purchase agreements.

2.3.2.2. **Constructed Real Property.** The cost to be recorded for constructed real property asset(s) is the sum of all the costs incurred to bring the real property asset(s) to a form and condition suitable for its intended use. These costs include the costs of project design and actual construction such as labor, materials, and overhead costs (see Annex 1 for a list and description of the costs to be accumulated for constructed assets). Note that preliminary planning and design costs accumulated prior to funding and design authorization must be expensed and not
be captured as part of the recorded cost of constructed assets. The cost of real property under construction must be recognized in accordance with the CIP guidance prescribed in subparagraph 240204.G.

2.3.2.3. **Donated Real Property.** The cost to be recorded for real property received through donation, execution of a will, or judicial process excluding forfeiture must be its estimated fair value at the time received by the DoD and any costs incurred by the DoD to bring the asset into service (e.g., legal fees).

2.3.2.4. **Exchanged Real Property.** The cost to be recorded for real property acquired through exchange between the DoD and a nonfederal entity is the fair value of the consideration surrendered at the time of exchange. If the fair value of the real property acquired is more readily determinable than that of the consideration surrendered, the cost will be the fair value of the real property acquired. If neither fair value can be determined, the cost of the real property acquired will be the cost recorded for the consideration surrendered, net of any accumulated depreciation/amortization. Any difference between the net recorded amount of the consideration surrendered and the cost of the real property acquired must be recognized as a gain or loss. In the event that additional cash consideration is included in the exchange, the cost of real property acquired will be increased by the amount of cash consideration surrendered or decreased by the amount of cash consideration received. If the DoD Component enters into an exchange in which the fair value of the real property acquired is less than that of the consideration surrendered, the real property acquired will be recognized at the amount of consideration surrendered, as described previously and subsequently reduced to its fair value. A loss must be recognized in an amount equal to the difference between the amount of consideration surrendered for the real property acquired and its fair value. This guidance on exchanges applies only to exchanges between a DoD Component and a nonfederal entity. Exchanges between a DoD Component and another DoD Component or federal agency must be accounted for as a transfer.

2.3.2.5. **Capital Leases.** The recorded cost of real property acquired under a capital lease is the present value of the rental and other minimum lease payments during the lease term, excluding that portion of the payments representing executory costs (e.g., insurance, maintenance and taxes) to be paid by the lessor. The present value is the value of future cash flows (e.g., lease payments) discounted to the present at a certain interest rate (such as the reporting entity’s cost of capital), assuming compound interest. However, if the amount so determined exceeds the fair value of the leased property at the inception of the lease, the amount recorded will be the fair value. If the portion of minimum lease payments representing executory costs is not determinable from the lease provisions, the amount should be estimated. See Chapter 26 for additional guidance on capital leases.

2.3.2.6. **Seized and Forfeited Real Property.** The cost recorded for real property acquired through seizure or forfeiture is its fair value, less an allowance for any liens or claims from a third party.

2.3.2.7. **Vested and Seized Property During Times of War.** See Volume 12, Chapter 29, for discussion of vested and seized property during times of contingency operations.
2.3.2.8. Transferred Real Property from a non-DoD Federal agency to DoD. The cost recorded for real property transferred from a non-DoD Federal agency to a DoD Component is the cost recorded on the transferring entity’s books for the real property, net of any accumulated depreciation/amortization. If the receiving DoD Component cannot reasonably ascertain those amounts, the cost of the asset will be its fair value at the time of transfer.

2.3.2.9. Transfer of Capitalized Real Property between DoD Components. DoD Components must adhere to the following:

2.3.2.9.1. The cost recorded for real property transferred from one DoD Component to another DoD Component shall be the gross cost recorded net of accumulated depreciation/amortization on the transferring DoD Component’s books. The DoD Component transferring the real property is responsible for providing the gross cost net of accumulated depreciation/amortization of the asset being transferred to the DoD Component receiving the transfer. Both parties must agree to the transfer and the agreement must be documented using the appropriate documentation. Each DoD Component has execution responsibility to ensure that requisite tasks are being completed in a timely manner for all transfers.

2.3.2.9.2. When completing a transfer, the transferring DoD Component, is required to provide financial reporting information to the receiving DoD Component whenever the asset is transferred throughout the asset lifecycle. When transfers are implemented, supporting documentation which includes financial reporting information, trading partner information, and associated data elements must be provided. These data elements include, Project/Work Order Number, Name, RPUID, Real Property Site Unique Identifier (RPSUID), Contract Number(s), Operational Status Code, Acquisition Original Recorded Cost Amount and Capital Improvement Recorded Cost Amount (for all capitalized improvements), Placed in-Service Date, Capital Improvement Placed in-Service Date (for all capitalized improvements), Facility Total Accumulated Depreciation Amount, Capital Improvement Estimated Useful Life Year Quantity, Facility Estimated Useful Life Quantity, Facility Estimated Useful Life Adjustment Quantity, transaction details to include Acquisition Fund Source Code, Acquisition Method Code, and Real Property Asset Predominate Design Use Facility Analysis Code (FAC). If this information is not available, the receiving and transferring entities must develop and document an estimate to support the financial transfer of the asset. See Volume 12, Chapter 14, for further policy on transfers of DoD real property between Installation Hosts.

2.3.2.9.3. Within DoD Components, there are different capitalization thresholds. For transferred real property between DoD Components if an asset was capitalized at acquisition, it will continue to be capitalized and depreciated after transfer regardless of the new financial reporting entity’s capitalization threshold. If an asset was expensed at acquisition, it will not be capitalized and depreciated after transfer to the new financial reporting entity, even if the new financial reporting entity has a lower capitalization threshold than the original entity that acquired the asset. The receiving DoD Component will include the item in its APSR as accountable real property.

2.3.2.10. Joint Venture Type Arrangements. Joint venture type arrangements should be accounted for as follows:
2.3.2.10.1. There may be situations where a DoD Component jointly funds the acquisition or construction of real property with a Nonappropriated Fund Instrumentality (NAFI). As defined in DoDI 1015.15, a NAFI is a DoD organizational and fiscal entity that is supported in whole or in part by nonappropriated funds (NAFs). It acts in its own name to provide or assist Secretaries of Military Departments in providing programs for DoD personnel. It is not incorporated under the laws of any State or the District of Columbia, but has the legal status of an instrumentality of the U.S. Under current GAAP, NAFI entities are not included in the DoD consolidated financial statements. An example of a NAFI would be an Armed Services Exchange.

2.3.2.10.2. Where a DoD Component jointly funds the acquisition or construction of real property with a NAFI, the DoD Component will, assuming the amount meets the capitalization threshold in effect at the time of the acquisition, record the real property on its Balance Sheet and report it in its financial statements in the amount of its share of the funding. For example, if a DoD Component and a NAFI each fund $10 million in the acquisition of a real property asset with a total of 50,000 square feet (with each acquiring 25,000 square feet); the DoD Component would record the real property at $10 million. Subsequent to the acquisition, the DoD Component, that jointly funded the acquisition, should evaluate whether the real property asset should be transferred to another DoD Component in accordance with paragraph 240204 and follow the requirements to transfer the real property asset to another DoD Component, if applicable.

2.3.3. Documentation. When recording the acquisition of a real property asset in the APSR and/or accounting system, the asset must be assigned a dollar value (i.e., recorded cost) as detailed in this chapter. The dollar value must be supported by appropriate documentation. A complete discussion of supporting documentation can be found at paragraph 240302. To establish proper financial control when acquiring real property from another DoD Component or Federal agency, the acquiring DoD Component must request from the transferring DoD Component or other Federal agency, the necessary source information and financial transfer documents. Such information and documents must include unique identifier(s) for the asset(s); location; original acquisition cost(s); cost of any improvements; the date the asset was constructed, or acquired; the estimated useful life; the amount of accumulated depreciation; the condition; and other relevant information linked to that asset. If this information is not available, the receiving and transferring entities must develop and document an estimate to support the financial transfer of the asset. See Volume 12, Chapter 14 for further policy on transfers of DoD real property between Installation Hosts. See Volume 12, Chapter 14 and DoDI 4165.70 for further policy on transfers of DoD real property between Installation Hosts.

*2.4 Recognition (240204)

All real property assets acquired by DoD Components must be recognized for accountability and financially reported as required by this chapter. Recognition requires the appropriate accounting treatment (expensed or capitalized) and the reporting of capitalized amounts and accumulated depreciation/amortization on the appropriate DoD Component’s financial statements.

Note, SFFAS 50 applies to a reporting DoD Component that is presenting financial statements, or one or more line items in the financial statements, following Generally Accepted
Accounting Principles (GAAP) promulgated by FASAB either (1) for the first time or (2) after a period during which existing systems could not provide the information necessary for producing such GAAP based financial statements without use of the alternative methods for opening balances set out in SFFAS 50. A reporting DoD Component meeting either one of these criteria may elect to apply the alternative valuation method described in SFFAS 50, including the election to record a zero value for land and land rights. However, if the reporting DoD Component has previously undergone a financial statement audit and received an unmodified audit opinion, they would not meet either of these two criteria and therefore would not be able to elect this alternative valuation method. Refer to Annex 4 for additional guidance on alternative valuation methodology for establishing opening balances for buildings, structures, linear structures, land and land rights.

2.4.1. Recognition Responsibility.

2.4.1.1. General Requirements for Recognition Responsibility

2.4.1.1.1. 10 U.S.C. § 2682 states “a real property facility under the jurisdiction of the Department of Defense which is used solely by an activity or agency of the Department of Defense (other than a military department) shall be under the jurisdiction of a military department designated by the Secretary of Defense.” The DoD determined that because the entities with jurisdiction over real property assets have existing requirements to manage the asset-related data required for financial reporting, it is rational and consistent that those entities carry the financial reporting responsibility for those assets in accordance with FASAB TB 2017-2. In addition, WHS is delegated jurisdiction over its facilities via 10 U.S.C. § 2674 and DoDD 5110.04.

2.4.1.1.2. Real property is generally reported on the General Fund’s financial statements of a Military Department or WHS, but a Military Department WCF can report real property on its financial statements if it has been given jurisdiction over a specific installation.

2.4.1.1.3. Financial reporting responsibility for real property assets includes all aspects of financial reporting and disclosures such as, but not limited to, footnote disclosures, deferred maintenance and repair (DM&R), and other required supplemental information (RSI).

2.4.1.1.4. Financial reporting responsibility for real property assets must be supported by documentation establishing the rights and obligations of the reporting entity for each asset (see paragraph 240302). Such documentation may include real property records reflecting the jurisdiction of an Installation Host over real property, as well as inter- and intra-agency agreements and records reflecting host-tenant support relationships.

2.4.1.1.5. See Annex 5 for illustrative examples and journal entries relating to financial reporting responsibilities for real property.
2.4.1.2. Construction-In-Progress

2.4.1.2.1. The funding DoD Component reports CIP for real property (including improvements) in its CIP account until the asset or improvement is placed in service. The funding DoD Component also relieves CIP when the asset or improvement is placed in service. At this time, an asset or improvement will be recorded by the funding DoD Component and an interim DoD (DD) Form 1354 will be used to document the construction in accordance with existing DoD real property policy. If additional costs continue to be incurred after the asset or improvement is placed in service, those costs will continue to be recorded in the funding DoD Component’s CIP account. Upon final contract closeout, the CIP will be relieved and a final DD Form 1354 will be completed.

2.4.1.2.2. Once the asset is placed in service, if the funding DoD Component is not the Installation Host, then the asset will need to be transferred from the funding DoD Component to the Installation Host.

2.4.1.3. In-Service Real Property

2.4.1.3.1. Real property must be reported on the financial statements of the Installation Host on whose installation a real property asset is located.

2.4.1.3.2. DoD real property that is not located on a DoD installation (including property located on an installation that is hosted by an entity other than DoD) will be reported on the financial statements of the Military Department that is the Installation Host having jurisdiction of the real property asset. Jurisdiction of real property is identified in the Office of the Secretary of Defense (OSD) consolidated real property database. This database is maintained and managed by the Office of the Assistant Secretary of Defense (Sustainment). Disputes between Installation Hosts regarding who should be the financial reporting organization may be resolved by contacting the Office of the Assistant Secretary of Defense (Sustainment). If a real property asset is located on a DoD installation that is funded by an entity that is not part of the consolidated DoD financial statements, it will be the financial reporting responsibility of the non-DoD entity.

2.4.1.3.3. For DoD Components that do not already have an unmodified audit opinion, existing land and land rights will be valued at zero dollars and future land acquisitions will be expensed as described in SFFAS 50.

2.4.1.3.4. Assets assigned to/from one reporting DoD Component to another reporting DoD Component should be treated as transfers of assets per SFFAS 7, “Accounting for Revenue and Other Financing Sources.”

2.4.1.4. Capitalized Improvements to Real Property

2.4.1.4.1. Capital improvements to an asset will be reported by the DoD Component that reports the real property asset that is being improved. Capital improvements that are under construction will be reported in accordance with subparagraph 240204.A.2.
2.4.1.4.2. The cost of a capitalized improvement will be accumulated and reported by the funding DoD Component until the improvement to the asset is placed in service, at which time it will be transferred to the entity responsible for reporting the real property base asset. The funding DoD Component will coordinate the delivery of the final DD Form 1354 and supporting documentation to the Installation Host.

2.4.2. Intra-DoD Transfers

2.4.2.1. Both parties must agree to the transfer and the agreement must be documented using the appropriate documentation (e.g., DD Form 1354). In addition, the entity transferring the real property must provide adequate and appropriate supporting documentation for financial statement reporting (financial reporting information). Data elements included in the financial reporting information, should include but are not limited to, Project/Work Order Number, Name, RPUID, RPSUID, Contract Number(s), Operational Status Code, Acquisition Original Recorded Cost Amount and Capital Improvement Recorded Cost Amount (for all capitalized improvements), Placed in-Service Date, Capital Improvement Placed in-Service Date (for all capitalized improvements), Facility Total Accumulated Depreciation Amount, Capital Improvement Estimated Useful Life Year Quantity, Facility Estimated Useful Life Quantity, Facility Estimated Useful Life Adjustment Quantity, transaction details to include Acquisition Fund Source Code, Acquisition Method Code, and Real Property Asset Predominate Design Use FAC. The financial reporting information will be maintained with the asset throughout the asset lifecycle.

2.4.2.2. Transfers between DoD Components may occur regularly due to construction or improvement of real property. When a transfer occurs due to the construction or improvement of real property, the Installation Host will accept the transfer on their installation when the funding entity provides the appropriate transfer documentation. In cases where property is transferred, the values transferred should be the same on each side of the transfer to ensure there are no discrepancies between DoD Components. Adjustments to the transferred value recorded may subsequently be made to record value at deemed cost in accordance with SFFAS 50.

2.4.3. Memorandum of Agreement (MOA). All DoD Component tenants must have MOAs in place with the Installation Host. A MOA will be executed to establish rights and obligations between the Installation Host and the DoD Component using the real property asset. All tenants must maintain a list of real property facilities they occupy and for which they have facility operations and maintenance or facility improvement responsibility. The MOA should also identify the respective maintenance and other operational responsibilities of the host and tenant. DoDI 4000.19 prescribes DoD policy on intra-departmental support, to include establishment of MOAs to document host-tenant relationships.

2.4.4. WCF Capital Recovery Rate and Accounting Treatment. WCF will continue to recover costs associated with the construction of real property that is funded by the WCF regardless of financial reporting responsibility. In cases where a capital improvement is transferred to a different reporting entity, the WCF will record an imputed cost in lieu of an actual depreciation expense for the improvement. Capital recovery rates will be set in accordance with Volume 2B, Chapter 9.
2.4.5. **Inter-Entity Costs.**

2.4.5.1. SFFAS 55 requires the continued recognition of significant inter-entity costs among and between federal agencies by business-type activities (e.g., WCFs) and allows non-business type activities to elect not to recognize inter-entity costs, with the exception of inter-entity costs for personnel benefits and the U.S. Department of the Treasury (Treasury) Judgment Fund settlements unless otherwise directed by the OMB. DoD has elected to not recognize imputed costs and corresponding imputed financing from non-business-type-activities, aside from the exceptions stated in this subparagraph.

2.4.5.2. WCFs or other business like activities must impute costs in accordance with SFFAS 55. These imputed costs would include depreciation expense. The imputed costs will include what would otherwise have been depreciation expense for real property assets and improvements that were funded by the WCF and subsequently transferred to the General Fund, as well as any depreciation expense or other costs for assets not funded by the WCF (see Annex 2). Imputed costs are recorded as a debit to Imputed Cost (USSGL 673000) and a credit to Imputed Financing Sources (USSGL 578000).

2.4.5.3. Disclosure requirements for inter-entity costs are described in subparagraph 240305.D.

2.4.6. **Recognition Uncertainty.** It is important that the overall accounting records of the DoD and the Federal Government are not duplicative.

2.4.6.1. In situations where doubt exists as to which DoD Component should recognize the real property asset, DoD Components involved must reach agreement with the other applicable DoD Components or Federal agencies as to which DoD Component or Federal Agency will record the asset for financial reporting purposes.

2.4.6.2. If an agreement cannot be reached, the matter must be referred to Office of the Assistant Secretary of Defense (Sustainment) for resolution. Requests for resolution must be accompanied by adequate supporting documentation to assist in resolution of the matter and be submitted through the Financial Management and Comptroller of the submitting DoD Component.

2.4.7. **Recognition Timing.** Recognition of real property for financial reporting purposes must occur upon acceptance to the acquiring DoD Component. Contract progress payments made must be recorded in the CIP account until the real property asset is accepted. See subparagraph 240204.I for guidance on the use of the CIP account.

2.4.8. **Capitalization Thresholds.** The capitalization threshold for real property is $250,000 for both the General Fund and WCF, except for the National Security Agency and the Office of the Director of National Intelligence for which the threshold is $1 million. Real property assets with a recorded cost that equals or exceeds the capitalization threshold and have a useful life of at least two years must be capitalized as an asset in the appropriate DoD Component’s accounting records and depreciated/amortized over its useful life. Real property assets with a
recorded cost below the applicable capitalization threshold or which has a useful life of less than two years must be expensed.

2.4.9. CIP Process. CIP must be used to accumulate costs of new real property construction and capital improvements, which are anticipated to meet the capitalization criteria.

2.4.9.1. A CIP account will be created when either of these triggering events occurs: (i) work order and funding authorizations are received for an in-house construction project; or (ii) design and fund authorizations are received for construction projects performed by a construction agent (i.e., another DoD Component, Federal agency or commercial entity). When a DoD Component is constructing a real property asset to be transferred to another DoD Component, as the construction agent they must accumulate all costs since project inception in a CIP account until the costs are billed to the funding (purchasing) DoD Component. The billed costs in such a scenario must be removed from the CIP account of the construction agent when billed to the funding (purchasing) DoD Component entity and the funding (purchasing) DoD Component must record such billed amounts in their appropriate CIP account. See Volume 3, Chapter 17 for additional guidance on inter-governmental construction work or services.

2.4.9.1.1. When there is a cost shared project between Federal and nonfederal entities, a CIP account must only be created when the real property asset will be federally owned. Only the federal share of construction costs in conjunction with a nonfederal cost shared project should be captured in a CIP account. In the case of a cost shared project between DoD and another Federal agency (e.g., Department of State), only the DoD share of construction costs should be captured in a CIP account within DoD’s financial statements. At the time the asset is placed in service, the real property asset must be recognized in the financial statements of the acquiring DoD Component for the value of the DoD Component’s share of the costs.

2.4.9.1.2. For cost shared projects where a DoD Component is the construction agent and constructing a non-federally owned real property asset, costs must be accumulated in a CIP account to be billed to the customer. If a DoD Component is not the construction agent and the real property asset is not DoD owned, the DoD Component’s share of construction cost must be expensed as incurred. If the real property asset’s final ownership was not determined at project funding and design authorization, this cost must be relieved from the CIP account and properly expensed when it is determined that the real property asset will not be federally owned.

2.4.9.2. DoD Components must assign a Component unique project number and the Installation Host will assign at least one RPUID for each approved construction project. The project number and RPUID will be associated to a CIP account when created. The Component unique project number must remain the same and be used for all phases of a particular construction project regardless of the fiscal year.

2.4.9.3. All costs for a construction project will be accumulated in a CIP account. A reasonable allocation methodology must be established and documented to assign project costs, direct and indirect, to all real property assets that will be constructed or improved with
corresponding RPUIDs. Any indirect project costs must be allocated to the project CIP account as they are incurred. Thus, the full cost of constructed items must be adequately captured, reported and distributed across real property assets by RPUID, no later than the time the real property assets are placed in service and available for use. See Chapter 19 Managerial Cost Accounting for additional information on indirect costs.

2.4.9.4. CIP costs must be tracked by both the Component unique project number and the RPUID to ensure visibility, traceability, and accountability. The relationship among a construction project, RPUID and CIP account is provided in Figure 24-1.

Figure 24-1. Relationships among a Construction Project, RPUID, and CIP Account

2.4.9.5. The funding DoD Component must continue to report CIP on their financial statements until the constructed item is accepted by the accountable DoD Component (if the accountable DoD Component is different than the funding DoD Component). The minimum information associated with the CIP amount reported for financial statement preparation purposes must include the funding DoD Component’s Project Number, Project Detail Fund Code(s), Project Detail Fund Code Cost Amount, Project Detail Organization Code(s), Programmed Amount, and RPUID(s). For a specified project and for the purpose of an audit trail of the CIP account, the construction agent and the funding DoD Component must retain the supporting documentation for their respective portion(s) of the project to which they have fiscal accountability. For additional information regarding representative documentation for a construction project, refer to paragraph 240302. Upon acceptance of the constructed real property asset(s) or improvements,
the construction agent must provide the funding DoD Component and the military service real property accountable officer with auditable supporting documentation. The funding DoD Component and military service real property accountable officer, in turn, must ensure the documentation is retained in accordance with applicable laws, regulations, and instructions.

2.4.9.6. When constructed real property asset(s) or improvements are accepted and placed in service, the costs accumulated in the CIP account must be relieved in a manner that recognizes the cost of each individual real property asset with a RPUID (i.e., transferred to the appropriate real property account). To ensure constructed real property asset(s) or improvements are recorded at full cost, the recorded cost of the real property asset(s) or improvements accepted must equal the sum of all construction and applicable design costs. (See Annex 1 for a comprehensive list of cost types.) In addition, the funding DoD Component of a construction project must ensure that all costs incurred by the funding DoD Component are provided to the construction agent on a formal document for inclusion in the full cost of the real property asset(s) or improvements prior to acceptance by the accountable DoD Component.

2.4.9.7. For construction projects that are completed in multiple phases, the cost of each phase is transferred from the CIP account to the appropriate asset account, by RPUID, at the time each real property asset or useable portion of the asset in the phase is placed in service. Each constructed real property asset or useable portion of the asset, therefore, may have one or more placed in-service dates, which will be used to initiate the capitalization of each corresponding phase. Each phase must be depreciated over its estimated useful life when placed in service.

2.4.9.8. If a construction project is cancelled, all cost accumulated in the associated CIP account must be expensed. When a portion of a project is cancelled or decreased in scope, the cost directly associated to that portion of the project, and an allocated portion of the common cost in the CIP, must be expensed. All projects deferred for more than two years must be reviewed for continuance or cancellation during the review cycle.

2.4.10. Accounting for Real Property Outside of the U.S. As used in this chapter, U.S. means the 50 States of the U.S., the District of Columbia, and the commonwealths, territories, and possessions of the U.S. In carrying out their mission, operations and objectives, there are circumstances in which DoD Components occupy and use real property facilities outside of the U.S. DoD's rights to real property outside of the U.S. are different from those within the U.S. For financial reporting purposes, a DoD Component that occupies and uses facilities outside of the U.S. must adhere to the following guidance:

2.4.10.1. DoD real property that is not located on a DoD installation (including property located on an installation of a host nation) will be reported on the financial statements, (including capital improvements) of the Installation Host that is identified in the OSD approved Enduring Location Master List, which is maintained and managed by the Office of the Under Secretary of Defense for Policy, when all of the following criteria are met:

2.4.10.1.1. An agreement exists between the U.S. and the host nation/foreign government (e.g., Cooperative Security Agreement, Bilateral Security Agreement
and Status of Forces Agreement) and the agreement conveys a right to construct and operate facilities (i.e., real property);

2.4.10.1.2. The U.S. Government/DoD Component funded the asset's acquisition (e.g., purchase and construction) and/or capital improvements. See subparagraphs 240204.A and 240204.B for transfers between DoD Components when the real property acquisition is funded by a DoD Component other than an Installation Host having jurisdiction over the installation on which the real property resides.

2.4.10.1.3. The cost incurred is over the DoD Component's real property capitalization threshold (if the asset is partially funded by DoD, only the portion funded by DoD will be evaluated against the capitalization threshold and recognized as an asset if applicable);

2.4.10.1.4. The asset has an estimated useful life of two years or more; and

2.4.10.1.5. The DoD Component is using the asset in its operations.

2.4.10.2. Such capitalized assets will be depreciated over their estimated useful lives. Should the use of the asset terminate earlier than the estimated useful life, the asset's remaining NBV will be written off.

2.4.10.3. When a DoD Component occupies a facility but the DoD did not fund its acquisition, the DoD Component will recognize such facilities on its financial statements as assets under a capital lease, if a specific agreement with the host nation/foreign government exists and addresses the use of the facility. See Chapter 26 for guidance on applying the lease criteria for real property outside of the U.S.

2.4.10.4. SFFAS 4 “Managerial Cost Accounting Standards and Concepts” addresses imputed costs between federal agencies but does not extend to entities outside of the federal context. The concept of imputed costs does not apply to activities between a DoD Component and a host nation/foreign government. Therefore, a DoD Component will not record imputed costs for the use and/or occupancy of facilities, for which it does not pay directly or pay through reimbursement, provided by international organizations (e.g., North Atlantic Treaty Organization) or host nation/foreign government.

2.4.10.5. The Installation Host with jurisdiction over the installation outside of the U.S. must record all real property occupied and used by it in an APSR, regardless of interest type, including those that have not been capitalized for accounting and financial reporting purposes, in accordance with 10 U.S.C. § 2721, DoDI 4165.14 and subparagraphs 240204.J.1 and 240204.J.3. Assets that do not meet the criteria for capitalization in accordance with subparagraphs 240204.J.1 and 240204.J.3 will be expensed in the period received for use by DoD.

2.4.10.6. The Installation Host with jurisdiction over the installation outside of the U.S. must record an expense for any maintenance and sustainment costs relating to the real property paid, or to be paid by them in the period incurred regardless of real property interest type.
2.5 Capital Improvements (240205)

2.5.1. Capital improvements to real property assets must be capitalized when (1) the improvement increases the asset's useful life by two or more years, or increases its capacity or size, and (2) the cost of the improvement equals or exceeds the capitalization threshold (see subparagraph 240204.H). If capital improvements do not meet these two criteria, they should be expensed. Funding source (e.g., appropriation or WCFs) is not a factor in determining whether or not an improvement will be capitalized. If the capital improvement increases the underlying asset's useful life by two years or more, the DoD Component must capitalize and depreciate the improvement with the original asset over the revised estimated useful life. Costs of capital improvements which do not extend the useful life of an existing real property asset but enlarge or improve its capacity and have a useful life of two years or more must be capitalized and depreciated over the lesser of the useful life of the improvement or the remaining economic useful life of the underlying asset. Note that the economic life of the real property asset, in certain instances, may be different than the original estimated accounting useful life. The economic life reflects the remaining period of utility for the real property.

2.5.2. The cost of improvements to more than one real property asset as identified by a RPUID when constructed under a single project or work order, and that cannot be specifically identified by asset, will be capitalized only if the allocated cost per real property asset equals or exceeds the capitalization threshold. When more than one improvement is made to a single real property asset, in a single project and the improvements are part of one effort to increase the real property’s capacity, size, and/or useful life, the sum of the costs of the improvements must be capitalized, if the summed costs equal or exceed the capitalization threshold. This is required even when the improvements are funded by different fund sources. Once a determination has been made that the aggregate costs of the improvements will be capitalized, the summed costs of improvements should be capitalized and depreciated upon being placed in service as described in paragraph 240205.A.

2.5.3. Maintenance and repair costs are not considered capital improvements, regardless of whether the cost equals or exceeds the capitalization threshold. Per SFFAS 42, maintenance and repairs are defined as activities directed toward keeping fixed assets in an acceptable condition. Maintenance and repair activities include preventative maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain assets. Maintenance and repair activities also include cyclic work done to prevent damage that would be more costly to restore than to prevent (e.g., painting). A roof or a heating and air conditioning system that is replaced due to failure should be classified as a repair and should be expensed, even if the replacement incorporated a better quality and longer life shingle or a more efficient heating and air conditioning unit.

2.5.4. Although maintenance and repairs are generally expensed in the period incurred, certain replacements of parts, systems, or components may or may not be an improvement for accounting purposes. Crucial to the determination of whether a replacement must be recognized as a repair or an improvement is the intent behind the replacement. Replacement of parts, systems, or components that have failed, are in the incipient stages of failing, or are no longer performing the functions for which they were designated are classified as a repair; replacements falling into
this category must be expensed. If the replacement was undertaken to expand the capacity or extend the life of a real property asset that was in good working order, then the replacement must be recognized as an improvement. A replacement classified as a repair does not include rebuilding entire structures within the same physical area (footprint).

2.5.5. For the purpose of capital improvements, capacity is defined as an increased footprint, or internal structural reconfiguration that increases the amount of usable space, number of personnel, or increased throughput. Increased capacity includes activities that upgrade the asset to serve needs different from, or significantly greater than its current use.

2.5.6. Capital Improvements (which includes leasehold improvements), at or over the capitalization threshold in effect at the time the capital improvements/leasehold improvements are acquired, must be capitalized. The cost of a capitalized improvement should be accumulated and reported by the funding DoD Component in a CIP account until the improvement to the asset is placed in service, at which time it will be transferred to the entity responsible for reporting the real property base asset. See subparagraph 240204.B for intra-DoD transfers. Only Installation Hosts with jurisdiction over a specific installation have financial reporting responsibility for real property and completed capital improvements.

2.6 Depreciation (240206)

2.6.1. The recorded cost of real property and capital improvements which have been capitalized in accordance with the guidance prescribed by paragraphs 240204 and 240205 must be depreciated over the shorter of (i) the period of time benefited, or (ii) the asset’s useful life. Such capitalized amounts, as well as associated amounts of accumulated depreciation and depreciation expense, must be reflected in DoD financial statements.

2.6.2. Depreciation is the systematic and rational allocation of the recorded cost of an asset over its estimated useful life. Estimates of useful life for real property assets must consider factors such as usage, physical wear and tear and technological change. For purposes of computing depreciation on DoD real property assets, specific useful lives are prescribed. Table 24-1 reflects the useful lives to be used for DoD real property in establishing opening balances as well as for real property acquired after establishment of opening balances.
Table 24-1. DoD Useful Lives for Depreciable Real Property Assets

<table>
<thead>
<tr>
<th>Real Property Classification</th>
<th>Real Property Useful Lives</th>
<th>Capital Improvements (if useful life is not provided by an engineering estimate)(ii)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>45 years</td>
<td>20 years</td>

<tr>
<td>Linear Structures</td>
<td>40 years</td>
<td>20 years</td>
</tr>
<tr>
<td>Land Rights of a Limited Duration (i)</td>
<td>Over the specified duration</td>
<td>-</td>
</tr>
</tbody>
</table>

i. Land Rights are included on the balance sheet in General PP&E only if the DoD Component did not make the election to implement the provisions of SFFAS 50, paragraph 13 to exclude land rights from the opening balance of General PP&E and expense future land rights acquisitions after establishment of the opening balance.

ii. Engineering estimates are of particular importance when evaluating full restoration or conversion.

2.6.3. The event that triggers the calculation of depreciation is the date the real property asset is placed in service (regardless of whether it is actually used). The actual commencement of depreciation will generally be based on the Month Available for Service method. Under this method, the month the asset was available for use, regardless of whether it was actually used, is the month used to commence the calculation of depreciation expense for the first year.

2.6.4. DoD policy permits only the use of the straight-line method of depreciation for real property assets. Straight-line depreciation expense is calculated as the recorded cost divided equally among accounting periods during the asset’s useful life based on useful lives in Table 24-1.

2.6.5. If an asset remains in use longer than its estimated useful life, it must be retained in the APSR, as well as the accounting records, and reflect both its recorded cost and accumulated depreciation until disposition of the asset.

2.6.6. WCF activities are required to depreciate real property assets in accordance with the guidance in this chapter without regard to whether such assets are procured through the WCF activity’s Capital Purchase/Investment Program budget or whether depreciation for such assets is included in rates charged to customers. The recognition of real property assets and the depreciation of such assets by WCF activities, therefore, may be different for financial statement reporting purposes than the depreciation amounts used for WCF rate development and budget presentation. All real property depreciation of WCF activities must be recognized as an expense on the Statement of Net Cost, included in accumulated depreciation amounts on the Balance Sheet, and reported in the “Defense Working Capital Fund Accounting Report [Accounting Report (Monthly) 1307] (AR(M)1307).” Depreciation recorded on real property that was not acquired nor will be replaced through use of Defense WCF resources must be classified as non-recoverable for rate setting purposes and reported appropriately on the AR(M)1307. Defense WCF rates charged to customers are based on guidance in Volume 2B and Volume 11B.
2.7 Impairment (240207)

2.7.1. Description. SFFAS 44 defines impairment as a significant and permanent decline in the service utility of General PP&E (which includes real property assets) or expected service utility of CIP that results from events or changes in circumstances that are not considered normal and ordinary. Identified real property (i.e., real property for which a significant decline in the service utility has occurred) should be tested for impairment by determining whether the magnitude of the decline in the service utility is significant and whether the decline in the service utility is expected to be permanent.

2.7.1.1. See subparagraph 240207.B.2 for a discussion of determining the significance and permanence of a service utility decline.

2.7.1.2. The service utility of real property is the usable capacity that, at acquisition or after improvement, was expected to be used to provide service. The current usable capacity of real property may be less than its original usable capacity due to the normal or expected decline in useful life or to impairing events or changes in circumstances, such as physical damage, obsolescence, enactment of approval of laws or regulations or other changes in environmental or economic factors, or changes in the manner or duration of use.

2.7.1.3. Normal and ordinary events or circumstances are those that fall within the expected useful life of the real property such as standard maintenance and repair requirements. Events or circumstances that are not considered normal are those that, at the time the real property was acquired or improved, the event or change in circumstance would not have been expected to occur during the useful life of the real property or, if expected, was not sufficiently predictable to be considered in estimating the real property’s useful life.

2.7.2. Identification of Potential Impairment Loss. The determination of whether real property remaining in use is impaired is a two-step process which includes (1) identifying potential impairment indicators and (2) testing for impairment.

2.7.2.1. Step 1 – Identify Indicators of Potential Impairment. Indicators of potential impairment can be identified and brought to DoD Component’s attention in a variety of ways, such as procedures related to DM&R. Although DoD Components are not required to establish additional or separate procedures beyond those that may already exist, they should evaluate existing processes and internal controls to determine if they are sufficient to reasonably assure the identification of potential impairment indicators and implement appropriate additional processes and internal controls if necessary. Once identified, indicators are not conclusive evidence that a measurable or reportable impairment exists; DoD Components should carefully consider the surrounding circumstances to determine whether a test of potential impairment is necessary given the circumstances. Some common indicators of potential impairment include:

2.7.2.1.1. Evidence of physical damage;

2.7.2.1.2. Enactment or approval of laws or regulations which limit or restrict the usage of the real property asset;
2.7.2.1.3. Changes in environmental factors (e.g., change in floodplain);

2.7.2.1.4. Technological changes or evidence of obsolescence (however, if obsolete real property continues to be used, the service utility expected at acquisition may not be diminished);

2.7.2.1.5. Changes in the manner or duration of use of real property;

2.7.2.1.6. Construction stoppage or contract termination; and

2.7.2.1.7. Real property idled or unserviceable for excessively long periods.

2.7.2.2. Step 2 – Impairment Test. Identified real property should be tested for impairment by determining whether these two factors are present: (1) the magnitude of the decline in service utility is significant and (2) the decline in service utility is expected to be permanent.

2.7.2.2.1. Significant declines in service utility are those that cause costs (including operational and maintenance costs) to be disproportionate to the new expected service utility. The determination of whether or not an impairment is significant is a matter of professional judgement and is distinct from materiality considerations. Such judgements may be based on the relative costs of maintaining the service utility of the facility before and after the decline, the percentage decline in service utility, or other considerations.

2.7.2.2.2. The decline in service utility is considered permanent when the DoD Component has no reasonable expectation that the lost service utility will be replaced or restored; that is, the DoD Component expects that the real property will remain in service so that its remaining service utility will be utilized. In contrast, reasonable expectation that the lost service utility will be replaced or restored may exist when the DoD Component has:

2.7.2.2.2.1. Specific plans to replace or restore the lost service utility of the real property,

2.7.2.2.2.2. Committed or obligated funding for remediation efforts, or

2.7.2.2.2.3. A history of remediating lost service utility in similar cases or for similar real property.

2.7.2.3. For CIP, the testing of impairment in subparagraph 240207.B.2 should be performed over the period of expected future service utility rather than current service utility.

2.7.3. Determining the Appropriate Measurement Approach. Impairment losses on real property that will continue to be used by the DoD Component should be estimated using a measurement approach that reasonably estimates the portion of NBV associated with the diminished service utility of the real property. A measurement method would not be considered
appropriate if it would result in an unreasonable NBV associated with the remaining service utility of the real property. Conversely, a reasonable measurement method may result in no impairment loss to be recorded. Regardless of the method used, recognition of impairment loss should be limited to the asset’s NBV at the time of impairment. Widely recognized methods for measuring impairment include:

2.7.3.1. Replacement Approach. Impairment of real property with physical damage generally may be measured using a replacement approach. This approach uses the estimated cost to replace the lost service utility of the real property at today’s standards (i.e., at current market prices and in compliance with current statutory, regulatory, or industry standards) to identify the portion of the historical cost of real property that should be written off due to impairment. It may be appropriate to apply the ratio of estimated cost to replace the diminished service utility over total estimated cost to replace the real property, to the NBV of real property to determine the impairment amount.

2.7.3.2. Restoration Approach. This approach uses the estimated cost to restore the diminished service utility of the real property to identify the portion of the historical cost of the real property that should be written off. This approach does not include any amounts attributable to improvements and additions to meet today’s standards. The estimated restoration cost can be converted to historical cost by restating (i.e., deflating) the estimated restoration cost using an appropriate cost index. Alternatively, it may be appropriate to apply the ratio of estimated restoration cost to restore the diminished service utility over total estimated restoration cost to the NBV of the real property to determine the impairment amount.

2.7.3.3. Service Unit Approach. Impairment of real property that are affected by enactment or approval of laws or regulations or other changes in environmental factors or are subject to technological changes or obsolescence generally may be measured using a service unit approach. This approach compares the service units (e.g., operational capacity) provided by the real property before and after the impairment to isolate the historical cost of the service utility that cannot be used due to the impairment to determine the impairment amount.

2.7.3.4. Deflated Depreciated Current Cost Approach. Impairments of real property that are subject to a change in manner or duration of use generally may be measured using a deflated depreciated current cost approach. Under this approach, a current cost for a real property asset to replace the current level of service is estimated. This estimated current cost is then depreciated to reflect the fact that the real property is not new, and is then subsequently deflated to convert it to historical cost dollars. A potential impairment loss results if the NBV of the real property exceeds the estimated historical cost of the current service utility (i.e., deflated depreciated current cost).

2.7.3.5. Cash Flow Approach. Recognizes an impairment loss only if the NBV (i) is not recoverable and (ii) exceeds the higher of its NRV or value-in-use estimate.

2.7.3.5.1. The NBV of real property is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the real property.
2.7.3.5.2. If the NBV is not recoverable, the impairment loss is the amount by which the NBV of the real property exceeds the higher of its NRV or value-in-use estimate. No impairment loss exists if the NBV is less than the higher of the real property’s NRV or value-in-use estimate.

2.7.3.6. Lower of (a) NBV or (b) Higher of NRV or Value-In-Use Approach. Real property impaired from either construction stoppages or contract terminations, which are expected to provide service, should be reported at their recoverable amount; the lower of (i) the real property’s NBV or (ii) the higher of its NRV or value-in-use estimate. Impaired real property, which is not expected to provide service, should be accounted for in accordance with paragraph 240208.

2.7.4. Recognizing and Reporting Impairment Losses. The loss from impairment, if any, should be recognized and reported in the Statement of Net Cost in the period in which the Installation Host, with jurisdiction over the real property, concludes that the impairment is both (1) a significant decline in service utility and (2) expected to be permanent. Such losses may be included in program costs or costs not assigned to programs. A general description of the real property for which an impairment loss is recognized, the nature (e.g., damage or obsolescence) and amount of the impairment and the financial statement classification of the impairment loss must be disclosed in the notes to the financial statements in the period the impairment loss is recognized.

2.7.5. Recoveries. The impairment loss must be reported net of any associated recovery when the recovery and loss occur in the same fiscal year. Recoveries reported in subsequent fiscal years must be reported as revenue or other financing source as appropriate. The amount and financial statement classification of recoveries should be disclosed in the notes to the financial statements.

2.7.6. Remediating Previously Reported Impairments. The costs incurred to replace or restore the lost service utility of impaired real property remaining in use must be accounted for in accordance with applicable standards (i.e., recognized according to the nature of the costs incurred and the appropriate capitalization threshold).

2.7.7. Diminished Service Utility Without Recognized Impairment Loss. If the future service utility has been adversely affected but the impairment test determines that a loss does not need to be recognized, a change to the estimates used in depreciation calculations (such as estimated useful life and salvage value, if applicable) should be considered and adjusted as appropriate.

2.8 Removal/Disposal (240208)

2.8.1. FASAB TR 14 defines removal from service as an event that terminates the use of a real property asset. Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or identification as excess to mission needs. Removals from service should be considered other than permanent unless (1) the asset’s use is terminated and (2) there is documented evidence of the DoD
Component’s decision to permanently remove the asset from service (e.g., by selling, donating, or demolishing the asset). If only one of the two business events has occurred, permanent removal from service has not occurred (i.e., the removal is considered other than permanent).

2.8.2. If an asset’s normal use is terminated (i.e., it no longer provides service in the operations of the entity) but the DoD Component has not yet decided to permanently remove the asset from service, the removal from service must be accounted for as other than permanent. Other than permanent removal from service is evidenced by activities such as continuing low-level maintenance to sustain the asset in a recoverable status or until reutilization efforts are exhausted. There is no change in the reported value for assets that have been other than permanently removed from service and the assets must continue to be depreciated.

2.8.3. If (1) an asset’s use is terminated and (2) the DoD Component has documented its decision to permanently remove the asset from service, the removal from service must be accounted for as permanent. Assets permanently removed from service are no longer depreciated. Permanent removal from service is evident from the DoD Component’s documented decision to dispose of an asset by selling, donating, or demolishing the asset. The recorded cost as well as the accumulated depreciation/amortization of an asset permanently removed from service must be removed from the accounts in which they are reported, and the asset must be recorded at its NRV in General PP&E Permanently Removed But not Yet Disposed (USSGL Account 199500). Any difference between the NBV of the asset and its expected NRV must be recognized as a gain or loss. The expected NRV should be evaluated at the end of each fiscal year and any change in NRV should be recognized as a gain or loss. Assets permanently removed from service are no longer depreciated.

2.8.4. When an asset is disposed of (e.g., by selling, donating, or demolishing the asset) the asset must be written off and the difference between any disposal proceeds and the asset’s NBV must be recognized as a gain or loss. The disposal start date is the calendar date of a legally enforceable and recognizable obligation to complete the disposal action. For demolitions, this represents the demolition contract’s start date. For transfers to a non-DoD entity and sales, this represents the date on which the instrument is endorsed or operation is ceased, whichever comes later. For natural disasters, this represents the actual date of the incident if the asset is a complete loss.

3.0 ADDITIONAL CONSIDERATIONS (2403)

3.1 Use of Cancelled Treasury Account Symbol (240301)

3.1.1. The Treasury's Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) is a data collection system that replaces the reporting functionalities of Federal Agencies Centralized Trial Balance System I and II, Intra-governmental Fiduciary Confirmation System, and Intra-governmental Reporting and Analysis System, as the primary means for DoD Components to report their trial balance data to Treasury. Capitalized assets are required to be reported and remain in GTAS after the original purchasing Treasury Account Symbol (TAS) has expired and been cancelled. If a capitalized asset has not been moved to a cancelled (“C”) TAS as described in subparagraph 240301.B; GTAS will provide a “C” TAS on the GTAS Super Master
Account File (SMAF) for each fund family represented on the SMAF. The system generated “C” TAS will have three components: the three-digit agency identifier, availability type "C", and a four-digit main account.

3.1.2. All DoD Components must use the “C” availability type TAS to report capitalized assets. Assets may be moved to a “C” TAS at any time from the purchase date to the date the original purchasing fund cancels. (Refer to the TFM Volume 1, Part 2, Chapter 4700 for additional information.)

3.1.3. To transfer an asset to a “C” TAS:

3.1.3.1. Use USSGL account transaction E510 to transfer-out the asset from the purchasing fund account.

3.1.3.2. Use USSGL account transaction E606 to transfer-in the asset into the appropriate “C” TAS.

3.2 Supporting Documentation (240302)

Entries to record financial transactions in accounting system general ledger accounts and the accountable property records and/or systems must:

3.2.1. Be supported by source documents that reflect all transactions affecting the DoD Component’s investment in the real property.

3.2.1.1. All real property acquisitions, whether by purchase, transfer from other agencies, donation, or other means, must be supported as of the date the DoD Component takes custody of the real property. The documents listed in Table 24-2, where applicable, must be readily available to support the changes in asset value or physical attributes as a result of new acquisition or capital improvement.

</tbody>
</table>
3.2.1.2. All disposals must be supported as of the date the real property leaves the custody of the DoD Component to provide an adequate audit trail for the disposal of an asset. The execution of certain disposal events will generate financial or administrative accountability transactions. These documents, where applicable, must be readily available to support disposals:

3.2.1.2.1. Declaration of excess document;

3.2.1.2.2. Disposal approval documentation (to include disposal of land);

3.2.1.2.3. Original acquisition documents;

3.2.1.2.4. Legal instruments (such as a deed or contract) to indicate legal obligation to dispose of an asset;

3.2.1.2.5. Document showing the disposal completion date;

3.2.1.2.6. Receipt documentation; and

3.2.1.2.7. Transfer documents for transferred assets or as otherwise stated.

3.2.1.3. Documents that support the recorded cost of real property assets must be retained by the DoD Component in accordance with the National Archives and Records Administration requirements described in Volume 1, Chapter 9. Documentation (original documents and/or hard and electronic copies of original documentation) must be maintained in a readily available location during the applicable retention period to permit the validation of information pertaining to the asset such as the purchase cost, purchase date, and cost of improvements. The documentation must also be linked to the appropriate RP UID(s). Supporting documentation may include, but is not limited to, the documentation as outlined in this subparagraph.

3.2.2. Include sufficient information indicating the physical size, location, and unit cost of each real property asset. The APSR and/or other systems must be designed to be of maximum assistance in making procurement and utilization decisions, including decisions related to identifying potential excess real property that may be available for reuse, transfer to other DoD Components, or made available for disposal in accordance with current DoD regulations and other regulatory requirements.

3.2.3. Enable periodic, independent verification of the accuracy of the accounting and APSR and/or other systems through periodic physical counts/inventories of real property existence and completeness (known as “book to floor and floor to book”). Such periodic inventories also must include reconciling the APSR and/or other systems with the general ledger accounts and physical counts. Personal hand receipt self-validations are not acceptable for meeting the independent verification of physical inventory requirements (see DoDI 4165.14).

3.2.4. Identify and classify real property that was capitalized, recorded in the APSR and accounting system, and reported in the financial statements.
3.2.4.1. The Installation Host having jurisdiction over the real property, in accordance with DoDD 4165.06 and DoDI 4165.70, is required to record real property assets in their APSR.

3.2.4.2. The Installation Host must reconcile their real property APSR to their financial statements (or to their trial balance if financial statements are not required to be prepared) on a quarterly basis.

3.2.4.3. All DoD Components funding CIP must reconcile their recorded CIP balances on a quarterly basis with any construction service provider working on the CIP. CIP should reflect the value associated with the actual progress payments and other costs incurred based on the progress of work completed as of the quarter end.

3.2.5. Be based on the same documents, to ensure that entries to the financial accounting/reporting and APSR are the same. This will ensure that the APSR is integrated and subsidiary to the financial accounting system and such records can be reconciled with the accounting system.

3.2.6. Include documents used to accumulate the cost of construction projects. Each document must link to the appropriate RPUID(s). For a listing of those costs that may be incurred during the construction, see Annex 1.

3.2.7. Include all real property in which the DoD has a legal interest.

3.2.8. Provide information to identify and account for leased real property, regardless of whether the real property was acquired by a capital lease or operating lease or whether the value of the real property exceeds DoD capitalization thresholds.

3.2.9. Provide information to identify and account for capitalized improvements to real property.

3.3 Physical Inventories of Real Property (240303)

DoD Components must perform periodic physical inventories of real property in accordance with DoDI 4165.14.

3.4 DM&R (240304)

3.4.1. Description

3.4.1.1. FASAB SFFAS 42 defines DM&R as maintenance and repairs that were not performed when they should have been or were scheduled to be and which are put off or delayed to a future period.

3.4.1.2. Maintenance and repairs are activities directed toward keeping fixed assets in an acceptable condition. Maintenance and repairs include preventive maintenance; replacement
of parts, systems, or components; and other activities needed to preserve or maintain the asset in working condition.

3.4.1.3. Maintenance and repairs exclude activities aimed at expanding the capacity or capability of an asset or otherwise upgrading it to serve needs different from or significantly greater than its current use.

3.4.2. Measurement

3.4.2.1. The values reported for real property DM&R must be consistent with the Facility Condition Index ratings and Facility Plant Replacement Values of the applicable real property facilities.

3.4.2.2. DoD Components should determine what condition standards are acceptable and which DM&R measurement methods to apply. Condition standards and measurement methods must be consistently applied unless the DoD Component determines that changes are necessary. Changes deemed necessary by the DoD Component must be accompanied by an explanation documenting the rationale for the change(s) and any related impact the change(s) will have on the DM&R estimates.

3.4.2.3. DM&R must be measured for capitalized and non-capitalized real property, and fully depreciated real property. In addition, DM&R associated with inactive real property should only be included when the asset is reported with an operational status of caretaker (CARE), closed (CLSD) or non-functional (NONF). In addition, DM&R must measure funded maintenance and repairs that have been delayed for a future period as well as unfunded maintenance and repairs. The reported data should not include DM&R that would be funded with NAFs commissary surcharge, or funding from non-DoD sources.

3.4.3. Required Supplemental Information

The Installation Host that reports real property must report material amounts of DM&R as RSI to the financial statements (see Volume 6B, Chapter 12). At a minimum, the following information must be presented as RSI:

3.4.3.1. Estimates of the beginning and ending balances of DM&R for each major category of real property;

3.4.3.2. A summary of the DoD Component’s maintenance and repairs policies and a brief description of how they are applied (i.e., method of measuring DM&R);

3.4.3.3. Policies for ranking and prioritizing maintenance and repair activities;

3.4.3.4. Factors the DoD Component considers in determining acceptable condition standards;
3.4.3.5. Whether DM&R relates solely to capitalized facilities or also to amounts relating to non-capitalized or fully depreciated real property;

3.4.3.6. Capitalized real property for which the DoD Component does not measure and/or report DM&R and the rationale for the exclusion; and

3.4.3.7. If applicable, explanation of any significant changes to

3.4.3.7.1. DM&R amounts from the prior year; and

3.4.3.7.2. The policies and factors subject to the reporting requirements established in subparagraphs 240304.C.2 through 240304.C.6.

3.5 Financial Statement Disclosure Reporting and Representation Requirements (240305)

3.5.1. DoD Components that financially report real property should reference a note on the Balance Sheet that discloses information about the reported real property assets.

3.5.2. The management representation letter provided to the Independent Public Accountant (for those DoD Components that undergo a financial statement audit), and the notes to the financial statements must include a disclosure related to real property reporting accounting policy. Examples of note disclosures are included in Appendix 5, paragraph A50104. It is the responsibility of each DoD Component to ensure that they are making a full and complete disclosure of how real property is being reported in accordance with the policies in this chapter.

3.5.3. DoD Components must disclose in the notes to the financial statements those instances in which they are using real property provided by a host nation/foreign government without reimbursement by DoD to the host nation/foreign government, as applicable, that:

3.5.3.1. The DoD Component is utilizing real property provided by and owned by a host nation/foreign government in its operations outside of the U.S. without reimbursement by DoD to the host nation/foreign government and that there are no amounts recorded in the financial statements related to these properties.

3.5.3.2. The general nature of the agreement with the host nation/foreign government. It is not intended or recommended that the geographic location of the host nation/foreign government be disclosed.

3.5.4. In accordance with SFFAS 55, DoD Components must disclose in the notes to the financial statements that only certain inter-entity (imputed) costs are recognized for goods and services that are received from other federal entities and/or DoD Components at no cost or at a cost less than the full cost as applicable. Such imputed costs and revenues relate to business-type activities (if applicable), employee benefits, and claims to be settled by the Treasury Judgment Fund. However, unreimbursed costs of goods and services other than those identified in the preceding sentence are not included in DoD financial statements.
3.5.5. Refer to Volume 6B, Chapter 10 for additional disclosure reporting requirements.

3.6 Environmental Liabilities/Cleanup Costs (240306)

The accounting policy for environmental liabilities/cleanup costs pertaining to real property is contained in Chapter 13.

(Costs to be accumulated for constructed assets)

<table>
<thead>
<tr>
<th>Cost Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cost of contract work</td>
<td>Amounts paid for work performed under contract, as well as any incentive fees paid to contractors to reward performance goals.</td>

</table>
Annex 2. Decision Tree for Determining Imputed Costs

Accounting for imputed costs as displayed in the decision tree is applicable only to business-type activities (e.g., Working Capital Funds (WCFs)). See Chapter 24, subparagraph 240204.E for further guidance on inter-entity costs.

The following decision tree provides an illustrative guide to determine what real property asset-related costs should be imputed and reported by a Department of Defense (DoD) Component which is business-type activity (e.g., WCF) based on specific business case scenario attributes.

Note 1: With regard to imputed costs, if only partial direct payment or reimbursement is made by the DoD Component, it would record an imputed cost for the difference between the full value/benefit received and the direct payment or reimbursement.

Note 2: Quantitative information for imputing costs should be provided by the DoD Component incurring those costs (i.e., depreciation, amortization, operation costs, and sustainment costs).
Annex 3.  Capital Improvement Depreciation

3.1 As stated in paragraph 37 of Statement of Federal Financial Accounting Standards 6 (SFFAS 6), “costs which either extend the useful life of existing General PP&E, or enlarge or improve its capacity shall be capitalized and depreciated/amortized over the remaining useful life of the associated General PP&E.”

3.2 The following Scenarios I and II illustrate application of the depreciation methodology for capital improvements and the underlying real property asset as directed by SFFAS 6 for improvements that equal or exceed the Department of Defense’s (DoD’s) capitalization threshold. When improvements extend the useful life of the associated General PP&E, the original estimated useful life will be adjusted for the estimated extension created by the improvement. When an improvement increases the capacity, size, or functionality/use of the associated General PP&E, but does not extend its useful life, the improvement should be capitalized and depreciated over the lesser of the useful life of the improvement or the remaining economic useful life of the underlying asset. Note that the economic life of the real property asset, in certain instances, may be different than the original estimated accounting useful life. The economic life reflects the remaining period of utility for the real property.

3.3 Examples and Scenarios of Capital Improvements

3.3.1. Extends the useful life: Major restoration or reconstruction restore facilities damaged by a natural disaster or event of similar consequence (e.g., reconstruction of a building on an existing foundation).

3.3.2. Increase capacity: Raising the roof of the warehouse to increase cubic feet.

3.3.3. Increase size: Build an addition, expansion or extension to the building, i.e., increase the footprint.

3.3.4. Modify functionality: Convert an office to a warehouse; upgrade architectural elements of a facility that is or is not failing; e.g., upgrade a flat roof to a pitched roof; install elevator where none existed.
Scenario I. Capital Improvement Extends the Useful Life of Existing General PP&E

In this scenario, the estimated extension of the useful life is combined with the remaining useful life of the original asset to establish a revised useful life. The remainder of the revised useful life at the date the improvement is placed in service is then used as the basis for calculating depreciation for the combined NBV of the original asset plus the value of the improvement.

In this Scenario, for example the conversion of a warehouse to office space, the capital improvement is placed in service at the beginning of the 26th year of the useful life of the original asset.

</tbody>
</table>

¹From Table 24-1
²If an Engineering Estimate for the extended useful life of the capital improvement were not available; the 20 year useful life from Table 24-1 would be used.
Scenario II. Capital Improvement Increases the General PP&E Asset’s Capacity, Size, or Modifies the Functionality/Use but Does Not Extend the Life of the Original General PP&E Asset

In this type of scenario, the capital improvement is depreciated over the lesser of the useful life of the improvement or the remaining economic useful life of the underlying General PP&E asset.

In this scenario, the capital improvement is placed in service at the beginning of the 16th year in the useful life of the original base asset. In this scenario, the remaining economic useful life of the original base asset is 25 years at the date the capital improvement is placed in service.

4.1 Establishing Opening Balances for Buildings, Structures and Linear Structures (A40101)

4.1.1. The alternative valuation methods for establishing opening balances for Property, Plant and Equipment described in Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standards (SFFAS) 50, “Establishing Opening Balances for General Property, Plant and Equipment: Amending Statement of Federal Financial Accounting Standards (SFFAS) 6, SFFAS 10, SFFAS 23, and Rescinding SFFAS 35,” is available only once to each reporting Department of Defense (DoD) Component. Therefore, prior to the establishment of opening balances for buildings, structures and linear structures (real property facilities), DoD Components must validate that they are prepared to account for and comply with the recognition, measurement, presentation and disclosure requirements for real property in accordance with FASAB SFFAS 6, “Accounting for Property, Plant and Equipment.”

4.1.2. If historical cost, as described in SFFAS 6, has not already been recorded and included in financial statements that have been audited by an Independent Public Accountant and received an unmodified opinion, deemed cost will be used as a surrogate to establish opening balances for real property. In this context, deemed cost is an amount used as a surrogate for initial amounts that otherwise would be required by SFFAS 6 to establish opening balances. Although deemed cost may be based on any one of, or a combination of, allowable valuation methods such as fair value, estimated historical cost, or replacement cost (which includes Plant Replacement Value (PRV)), DoD’s selected valuation method for real property facilities is PRV. Once established using PRV, opening balances will be used as a surrogate for the initial amounts that would have existed had an SFFAS 6 compliant valuation method been used.

4.1.3. Only existing real property assets with a gross PRV value equal to or over the current real property capitalization threshold and with a remaining book value will be recorded as a part of the opening balance. When evaluating real property for the purpose of establishing opening balances, DoD Components should apply the applicable capitalization threshold to their entire population of real property retroactively, irrespective of the capitalization thresholds in effect for years prior to October 1, 2013. The current real property threshold is $250,000 for both the General Fund and Working Capital Fund (WCF), except for the National Security Agency (NSA) and the Office of the Director of National Intelligence (ODNI) for which the threshold is $1 million. When establishing real property opening balances, DoD Components need to take the appropriate steps to ensure all relevant prior period adjustments and note disclosures are included in their annual financial statements in accordance with SFFAS 50. As part of their evaluation, DoD Components should not simply value assets already recorded above the capitalization threshold. DoD Components should perform additional analytical procedures to identify any assets that have been improperly capitalized or expensed. Examples of this type of review can include searching for real property assets with values of $0 or $1 which are indications of erroneous values. An additional example can include real property for which an additional zero was added in error, incorrectly placing the asset above the capitalization threshold.
4.1.4. When establishing opening balances using deemed cost:

4.1.4.1. DoD Components will calculate a gross value and an accumulated depreciation value for real property assets. Both the gross value deemed cost and accumulated depreciation deemed cost will be recorded in the accounting records. The difference between the net book value (NBV) of the deemed cost on the opening Balance Sheet of the current fiscal year presented and the existing/historical NBV of the real property as of the ending Balance Sheet of the previous fiscal year, is considered a prior period adjustment. This prior period adjustment represents a change in accounting principle in accordance with paragraph 13 of FASAB SFFAS 21, “Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources.” If any depreciation based on the original historical real property value has been recorded in the year in which the prior period adjustment for deemed cost is recorded, that depreciation expense should be reversed and depreciation for the deemed cost value should be recorded.

4.1.4.2. Any adjustment must be properly documented and supported to assist ongoing audit efforts including retaining documentation of the existing/historical real property value in the Accountable Property System of Record (APSR) and documentation supporting the deemed cost value. The existing/historical gross value and accumulated depreciation of the real property will need to be removed from the APSR and be replaced with the new gross value and accumulated depreciation for deemed cost.

4.2 Financial Statement Disclosure Requirements (A40102)

DoD Components who apply the PRV deemed cost methodology to adjust their opening real property balances, must disclose in their financial statements that an alternative valuation method was applied in establishing their opening balances and describe the method used in the first reporting period in which the reporting DoD Component makes an unreserved assertion that its financial statements, or one or more line items, are presented fairly in accordance with Generally Accepted Accounting Principles (GAAP). An unreserved assertion is an unconditional statement. No disclosure of the distinction or breakout of the amount of deemed cost of real property included in the opening balances is required.

4.3 Deemed Cost Methodology (A40103)

4.3.1. The DoD’s selected deemed cost methodology for establishing opening balances in the absence of previously audited historical costs is current replacement cost or PRV, as calculated using the DoD’s PRV model. The PRV approach has been selected as the preferred method for the following reasons:

4.3.1.1. Cost and time effectiveness: The PRV model already exists and values are required to be updated annually for all assets;

4.3.1.2. Many of the key data elements required by the PRV model have been validated by the DoD Components during their existence and completeness procedures;
4.3.1.3. Consistency: The PRV model provides a common approach for DoD to establish and support its opening balances for these assets.

4.3.2. The use of deemed cost does not change the requirement that documentation be available to support asset values. Therefore, documentation must exist to support the values (e.g., support for data element inputs for PRV model calculations).

4.4 PRV Responsibilities (A40104)

The successful use of the PRV model in establishing opening balances requires specific actions on the part of the DoD Components, and the Office of the Secretary of Defense (OSD). OSD specific actions are carried out by the Office of the Under Secretary of Defense (Comptroller) Financial Improvement and Audit Remediation Directorate; and the Office of the Assistant Secretary of Defense (Sustainment). A summary of responsibilities is:

4.4.1. DoD Components are responsible for ensuring:

4.4.1.1. First, key PRV data element inputs are accurate. The critical data elements for the PRV model are:

4.4.1.1.1. Real Property Site Unique Identifier (RPSUID);
4.4.1.1.2. Real Property Unique Identifier (RPUID);
4.4.1.1.3. Real Property Asset (RPA) Interest Type;
4.4.1.1.4. Asset Allocation Current Use Category Code;
4.4.1.1.5. Asset Allocation Current Use Facility Analysis Category (FAC) Code;
4.4.1.1.6. Asset Allocation Size Quantity;
4.4.1.1.7. Asset Allocation Unit of Measure Code; and
4.4.1.1.8. RPA Historic Status Code.

4.4.1.2. Second, additional data elements are required to apply and report the PRV values are accurate.

4.4.1.2.1. RPA Placed in-Service Date. This data element is important for depreciation purposes. See subparagraph A40106 for guidance on determining placed in-service date.
4.4.1.2.2. Government Investment Percentage (For Government / Private Agreement (GVPV) interest type only). The amount of the Government’s investment as a percentage of an asset’s total value is required for GVPV interest types in order to allocate DoD’s portion of the total PRV.

4.4.1.3. Third, documentation exists and is readily available to support the Asset Allocation Size Quantity, RPA Historic Status Code, RPA Placed in-Service Date, and Government Investment Percentage (for GVPV interest types).

4.4.1.4. Fourth, processes, controls, and systems are in place to value newly acquired assets at actual cost in accordance with SFFAS 6.

4.4.1.5. Fifth, valuation calculations are performed correctly using the PRV formula and appropriate cost factors and adjustments found in the Unified Facilities Criteria 3-701-01 ([UFC 3-701-01](https://example.com/UFC_3-701-01)), “DoD Facilities Pricing Guide.”

4.4.1.6. Sixth, resulting accounting adjustments are performed accurately and timely, are supported with sufficient documentation, and are reflected in the DoD Component’s APSR, general ledger, and financial statements.

4.4.2. OSD is responsible for ensuring that:

4.4.2.1. The PRV model itself is supportable from a financial statement audit perspective. OSD will evaluate the processes, procedures, systems and controls that produce the PRV tables, factors, indexes, and functions, and reviewing the model outputs for overall reasonableness.

4.4.2.2. DoD estimated useful lives for depreciation purposes are supportable.

4.5 Steps to Establish Deemed Cost Using PRV (A40105)

DoD Components will perform several steps to develop opening balances using the PRV approach. In summary, DoD Components will:

4.5.1. Validate all asset data that the DoD Components used to calculate and apply PRV values (paragraph A40104.A.1 PRV Responsibilities);

4.5.2. Calculate each asset’s PRV as found in the DoD UFC 3-701-01. Capital improvements are included within the PRV calculation and do not need to be valued or depreciated separately from the base asset as part of this initial process. Each DoD Component’s management must formally document the review and acceptance of the resulting values;

4.5.3. For assets with a GVPV interest type, the percentage of DoD’s interest in the asset will be multiplied by the asset’s total PRV to calculate the amount the DoD Component will report. Only assets where DoD’s portion of the PRV equal to or more than $250,000 for both General Fund and WCF and $1 million for NSA and ODNI will be reported;
4.5.4. Identify all DoD accountable General Property, Plant, and Equipment (General PP&E) (commonly known as FEE assets) with a PRV equal to or more than $250,000 for both the General Fund and WCF and $1 million for NSA and ODNI. These assets will be considered capitalized assets and must be reported on the DoD Component’s Balance Sheet. For the purpose of establishing opening balances, the current real property capitalization threshold of $250,000 for both the General Fund and WCF and $1 million for NSA and ODNI will be applied to all existing real property assets;

4.5.5. Adjust, as appropriate, the DoD Component’s APSR, general ledger, and financial statements upon establishing the beginning balance. Documentation supporting any adjustments must be maintained.

4.6 Determining Placed in-Service Date (A40106)

4.6.1. The Real Property Information Model (RPIM) defines RPA Placed in-Service Date as “the calendar date the real property asset is available for use by DoD and the Government assumes liability and the warranties and receives legal interest.” The UFfC 1-300-08, “Criteria for Transfer and Acceptance of DoD Real Property,” notes this date as “the date an interim Transfer and Acceptance of Military Real Property document (DoD (DD) Form 1354) is signed and title for assets listed on the acceptance form is transferred to the DoD on behalf of the United States (U.S.) Government.”

4.6.2. To assure consistent and accurate placed in-service dates, DoD Components must adhere to one of the following methods, and ensure that sufficient supporting documentation exists for auditors to validate the date recorded. Existing guidance that describes how placed in-service dates for real property assets will be determined is presented in Table A4-1
Table A4-1

¹ Acquisition Date is a RPIM data element to be populated upon first acceptance by the United States Government. For RPA Placed in–Service Date, the term Acquisition Date equals the entry in the column titled Acquisition Date.

² The date reflected in box 7a on the DD Form 1354.

³ Changed from final DD Form 1354 to interim DD Form 1354.

⁴ Purchase acquisition method is associated to both the land purchase and land purchase with facilities and exchange acquisition scenarios.

⁵ This method of acquisition is being added to the UFC 1-300-08 as requiring a completed interim DD Form 1354 at acceptance.

4.6.3. In the absence of information noted in Table A4-1, the guidance in Table A4-2 should be used.

#### Table A4-2

In the case of constructed Property, PP&amp;E, the PP&amp;E shall be recorded as construction work in process until it is placed in service, at which time the balance shall be transferred to general PP&amp;E in the system.”</td>
</tr>
</tbody>
</table>
4.6.4. DoD Components must review real property asset records for the existence and adequacy of documentation to support placed in-service information. In reviewing asset records, answers to the following questions must be answered:

4.6.4.1. Does sufficient documentation exist?

4.6.4.2. Does alternative documentation need to be used?

4.6.4.3. Is the placed in-service date clearly identified and marked on supporting documents?

4.6.4.4. Are all required appropriate/authorized signatures noted on documentation?

4.6.5. Documentation to support the placed in-service date is vital to the completeness of both functional and financial records. GAAP allows for alternative placed in-service methodologies where adequate historical documentation does not exist. These estimates of cost and placed in-service date must be fully supported, and information retained in accordance with National Archives and Records Administration requirements described in Volume 1, Chapter 9. Table A4-3 lists examples of supporting documentation for placed in-service date in descending order of preference.

Table A4-3

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>Source Documentation (noted in Table A4-1)</td>
<td>Noted in the second column of Table A4-1.</td>
<td>1</td>
</tr>
<tr>
<td>Tax Assessor Records</td>
<td>If adequate historical placed in-service date is not available, a search of the county tax assessor's website for the asset and the purchase date should be used to determine a reasonable estimate for placed in-service date.</td>
<td>1</td>
</tr>
<tr>
<td>Dedication Plaque</td>
<td>If adequate historical placed in-service date is not available, a search of the asset should be conducted for a dedication plaque. Once the dedication plaque has been found, ensure that it references the DoD as owners. If DoD is listed as owners, obtain a photograph of the dedication plaque with an inscription indicating the dedication date. If DoD is not listed on the plaque, the date shall not be used as an alternative for placed in-service date.</td>
<td>2</td>
</tr>
<tr>
<td>Cornerstone</td>
<td>If adequate historical placed in-service date is not available, search the asset for a cornerstone. If the cornerstone is found, obtain a photograph of the cornerstone. The cornerstone should be located on the outside of the building or structure with an inscription on the stone indicating the construction date. This date would be used for the placed in-service date.</td>
<td>2</td>
</tr>
<tr>
<td>Earliest Site Plot of Asset</td>
<td>If adequate historical placed in-service date is not available, search online in the DoD Component database for the earliest site plot or asset drawing available. Once found, the date on the earliest plot or asset drawing may be used as a reasonable alternative for placed in-service date.</td>
<td>2</td>
</tr>
<tr>
<td>Documentation for Placed in-Service Date</td>
<td>Description</td>
<td>Tier</td>
</tr>
<tr>
<td>----------------------------------------</td>
<td>-------------</td>
<td>-----</td>
</tr>
<tr>
<td>Earliest Maintenance Record of Asset or Engineering Estimates (e.g., Engineering Form 3013)</td>
<td>If adequate historical placed in-service date is not available, search for work order or maintenance records from Department of Public Works or real property accountable officer or local program office. Once found, the date of the earliest recorded work order or maintenance may be used as a reasonable alternative for placed in-service date.</td>
<td>3</td>
</tr>
<tr>
<td>Placed in-Service Date of Major Asset on Site</td>
<td>If adequate historical placed in-service date is not available, research and obtain the actual or alternate placed in-service date established from a major asset on the DoD site. A major asset can be defined as a significant asset that is critical to the primary function of the site. The major assets may vary based on the purpose of the site. For example, a tower would be a major asset at a communications station, a house would be a major asset at a housing site, and a lighthouse would be a major asset for a site that includes the lighthouse, housing units, as well as other assets such as driveways, fences, and storage buildings that were established to support the lighthouse. For other sites, such as air stations, units, or sectors that may have multiple functions, a major asset could be a building where many of the management and administrative activities occur. The major assets must be located within the same real property site. Upon obtaining the placed in-service date of the major asset, use the placed in-service date of the major asset as the reasonable alternative for the placed in-service date of the supporting assets in question. If more than one major asset has a reliable placed in-service date on the site, and the placed in-service date of the major assets are different, then use the placed in-service date of the oldest asset on the site. Once found, the placed in-service date of the oldest major asset may be used as a reasonable alternative for placed in-service date.</td>
<td>3</td>
</tr>
<tr>
<td>Construction Style</td>
<td>If adequate historical placed in-service date is not available, a search for assets on the DoD site of a similar construction style or period. Once found, the placed in-service date of the similar style asset may be used as a reasonable alternative for placed in-service date. If only a range of years can be identified, then the mid-point of the range is an acceptable estimate of the placed in-service date.</td>
<td>3</td>
</tr>
</tbody>
</table>

4.7. Definitions (A40107)

4.7.1. Asset Allocation Current Use Category Code: A Military Service designator that represents the current use by the assigned user of a specific portion of a RPA.

4.7.2. Asset Allocation Current Use FAC Code: An OSD level designator that represents the current use by the assigned user of a specific portion of the RPA.

4.7.3. Asset Allocation Size Quantity: The amount of the asset granted for use based on the Asset Allocation Current Use FAC and expressed in terms of the Asset Allocation Unit of Measure Code.

4.7.4. Asset Allocation Unit of Measure Code: The unit of measure code used for the measurement of the associated Asset Allocation Size Quantity.
4.7.5. **Building**: A roofed and floored facility enclosed by exterior walls and consisting of one or more levels that is suitable for single or multiple functions and that protects human beings and their properties from direct harsh effects of weather such as rain, wind and sun.

4.7.6. **City Code**: The code used to identify the city or the nearest city to where the real property asset or real property site is located. The nearest city shall be in the same county as the asset.

4.7.7. **Country Code**: The Geopolitical Component Names, and Codes standard, code used to identify the country in which the real property asset or site is located.

4.7.8. **County Code**: The code used to identify the county in which the real property asset or site is located. This code identifies counties and equivalent administrative entities of the U.S., its possessions, and associated areas as defined by the Federal Information Processing Series (FIPS) and found in the General Services Administration (GSA) Geographic Locator Codes (GLCs) or the county equivalent for countries not covered in the GSA GLCs. A County Code is only unique if it is combined with a State or Country Primary Subdivision Code in the areas listed in the GSA GLCs or with the Country Code for areas not in the GSA GLCs.

4.7.9. **Deemed Cost**: An amount used as a surrogate for initial amounts that otherwise would be required by SFFAS 6 to establish opening balances.

4.7.10. **Fair Value**: The amount at which an asset or liability could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

4.7.11. **GVPV**: An interest in a real property asset held by the U.S. Government acquired by a mutually beneficial partnership agreement between a Military Department or WHS and a private entity, where equity interest in a project is shared for a specific business purpose. This interest type applies when the DoD has ongoing reported financial statement costs directly associated with an asset(s) gained by the project or the asset is located on a military installation.

4.7.12. **Linear Structure**: A facility whose function requires that it traverse land (e.g., runway, road, rail line, pipeline, fence, pavement, electrical distribution line) or is otherwise managed or reported by a linear unit of measure at the category code level.

4.7.13. **Opening Balances**: Account balances that exist at the beginning of the reporting period. Opening balances are based upon the closing balances of the prior period and reflect the effects of transactions and events of prior periods and accounting policies applied in the prior period. Opening balances also include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments.

4.7.14. **PRV**: A value, recorded in U.S. dollars, which represents the cost to design and construct a facility to current standards for replacement of an existing facility at the same location.

4.7.15. **RPA Historic Status Code**: A code used to identify the current historical status of a RPA.
4.7.16. **RPA Interest Type Code:** A code used to identify the type of legal interest that DoD holds in a RPA.

4.7.17. **RPSUID:** A unique non-intelligent code used to permanently identify real property sites. A real property site is a specific geographic location that has individual land parcels and/or facilities assigned to it. The City Code, County Code, State or Country Primary Subdivision Code and Country Code associated to the RPSUID will provide location information necessary for location cost factors.

4.7.18. **RPUID:** A unique non-intelligent code used to permanently identify a real property asset.

4.7.19. **State or Country Primary Subdivision Code:** The code used to identify the primary subdivision of a country such as a state, the District of Columbia, or a possession in which the real property asset or site is located.

4.7.20. **Structure:** A facility, other than a building or linear structure, that is constructed on or in the land.

### 4.8 Establishing Opening Balances for Land and Land Rights (A40108)

4.8.1. This paragraph does not change existing accounting or financial reporting guidance regarding Stewardship Land, including guidance in Chapter 28.

4.8.2. All DoD Components that have not yet undergone a financial statement audit where they received an unmodified audit opinion will exclude the value of General PP&E land and land rights from opening balances of GPP&E on their Balance Sheet. This means that DoD Components who have not undergone a financial statement audit where they received an unmodified audit opinion will adjust their land and land rights opening balances to zero. A DoD Component that has received an unmodified audit opinion will continue to account for land and land rights in accordance with SFFAS 6.

4.8.3. Entries in the DoD Component accounting systems/records to adjust the value of land and land rights to zero are subject to the reporting requirements under paragraph 13 of FASAB SFFAS 21, “Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources.” Accordingly, the entries will be reflected as a change in accounting principle. Any adjustments must be properly documented and supported to assist ongoing audit efforts.

4.8.4. DoD Components adjusting their land and land rights to zero in accordance with subparagraph A40108.B will also expense future General PP&E land and land rights acquisitions.

4.8.5. DoD Components must disclose, in the notes to their financial statements, with a reference on the Balance Sheet, the number of acres of General PP&E land and land rights (where the types of land rights are conducive to measurement in acres) held as of the period of its first audited financial statement. This acreage amount must be reported separately from the DoD
Component's Stewardship Land. There are no disclosure requirements for General PP&E land rights not measured in acres in establishing opening balances.

4.8.6. For all years after the initial financial statements, where land and land rights were reported as zero, DoD Components must disclose, in the notes to their financial statements, with a reference on the Balance Sheet, the number of acres of General PP&E land and land rights measured in acres held at the beginning of each reporting period, the number of acres added during the period, the number of acres disposed of during the period, and the number of acres held at the end of each reporting period. These acreage amounts must be reported separately from the DoD Component's Stewardship Land. There are no disclosure requirements for General PP&E land rights not measured in acres.
5.1 Construction-In-Progress (CIP) Illustrative Example and Journal Entries (A50101)

5.1.1. CIP Example: The Department of Defense Education Activity (DoDEA) funds the construction of a new high school on an Army Installation. DoDEA reports the CIP on its financial statements. When the asset is placed in service, DoDEA relieves the appropriate CIP amount, recognizes the asset, and transfers the asset to the Army along with all relevant supporting documentation. Upon transfer, the Army reports the school on its financial statements.

5.1.2. Table A5-1 depicts illustrative General Ledger (G/L) journal entries to demonstrate the relief of CIP in the accounting records and initial recording of the asset by the funding Department of Defense (DoD) Component and the subsequent transfer of that asset to the Installation Host when the funding DoD Component is not the Installation Host.

Note: If the transfer is not completed during the month CIP is relieved and depreciation has been recorded by the funding DoD Component, the recorded amount of accumulated depreciation recorded will also be transferred.

5.2. In-Service Real Property Illustrative Examples and Journal Entries (A50102)

5.2.1. In-Service Real Property Examples:

5.2.1.1. The Missile Defense Agency (MDA) operates a facility that includes other defense agency tenants located on an Army Installation. The Army does not have operations in the facility but is the designated Installation Host and carries the MDA facility as Army real property in its real property database. The Army is the financial reporting entity for the facility.
5.2.1.2. The Army Working Capital Fund (WCF) operates and has jurisdiction over a maintenance depot. The Army WCF will report the real property on that installation on its financial statements and is responsible for maintaining supporting documentation to support audit.

5.2.2. Table A5-2 depicts illustrative G/L journal entries to demonstrate the transfer of in-service real property from one DoD Component to the Installation Host.

5.3 Capitalized Improvements to Real Property Illustrative Examples and Journal Entries (A50103)

5.3.1. Capitalized Improvements to Real Property Examples:

5.3.1.1. The Defense Logistics Agency (DLA) WCF funds an improvement to a building on an Army base. DLA reports the CIP until the improvement is complete, then transfers the improvement to the Army to be reported on the Army’s General Fund financial statements. DLA will set its capital recovery rates related to the capital improvement in accordance with Volume 2B, Chapter 9, recording the imputed cost instead of actual depreciation expense as the basis for their budget.

5.3.1.2. The Defense Advanced Research Projects Agency (DARPA) funds a conversion of an office suite to another purpose that it occupies on a Navy installation. DARPA reports the CIP until the conversion is complete, relieves CIP, and then transfers the improvement to the Navy to be reported on the Navy’s General Fund financial statements.

5.3.2. Table A5-3 depicts illustrative G/L journal entries to demonstrate the transfer of in-service capital improvements from one DoD Component to the Installation Host.

5.4 Note Disclosure Examples (A50104)

5.4.1. The following is an example of a note disclosure for Installation Hosts, which could be Military Departments, WHS or Military Department WCFs:

The [Installation Host] reports the real property within the jurisdiction of [Installation Host] installations, in its financial statements because it is the designated Installation Host. This includes real property on [Installation Host] installations including real property used and occupied by [another Military Department, WHS, another Military Department WCF or other DoD Components (who are not the Installation Host)]. The [Installation Host] who is the Installation Host does not report assets on its installation that were funded by, and are exclusively used by an entity not included in the consolidated DoD financial statements. While the [Installation Host] is responsible and accountable for accepting, controlling, managing, and utilizing real property assets, the [Installation Host] has entered into Memoranda of Agreement, with another Installation Host, or other DoD Components, and license or permit with non-DoD governmental agencies, transferring the right to control the use of a [Installation Host] real property asset to the [other Installation Host] and other DoD Components and non-DoD governmental agencies (who are not the Installation Host). The transfer of the right to control the use of the real property asset does not transfer jurisdiction and the asset remains an asset under the jurisdiction of the [Installation Host].
5.4.2. The following are examples of note disclosures for DoD Components utilizing real property assets in their operations that are being financially reported by an Installation Host:

Example of the Note for DoD Component:
_The [DoD Component] does not report in its financial statements real property that they use and occupy within the jurisdictions of [Military Department or WHS]. This includes all real property used and occupied by the [DoD Component]. The [DoD Component] has entered into Memoranda of Agreement, with the [Installation Host] that is the Installation Host, which transfers the right to control the use of [Installation Host] real property asset to the [DoD Component]. The transfer of the right to control the use of the real property asset does not transfer jurisdiction and the asset remains an asset of the [Installation Host] acting as the Installation Host._

Example of the Note for a non-Military Department WCF Component (e.g., DLA):
_The [DoD WCF Component] does not report in its financial statements real property that they use and occupy within the jurisdiction of [Installation Host]. This pertains to all real property used and occupied by the [DoD WCF Component] including real property that was funded with WCF outlays that are being recovered through the capital recovery rate. The [DoD WCF Component] has entered into Memoranda of Agreement, with the [Installation Host] that is the Installation Host, which transfers the right to control the use of [Installation Host] real property asset to the [DoD WCF Component]. The transfer of the right to control the use of the real property asset does not transfer jurisdiction and the asset remains an asset of the [Installation Host] acting as Installation Host._

5.4.3. The following is an example of a note disclosure for a Military Department WCF that (1) has been given jurisdiction over specific installation(s) and financially reports that real property; and, (2) also used and occupied other real property for which it is not the financially reporting Installation Host:

_The [Military Department WCF] reports in its financial statements real property within the jurisdiction of the [Military Department WCF], when it is the designated Installation Host for the real property. This includes real property on [Military Department WCF] designated installations including real property used and occupied by [another Military Department, WHS or other DoD Components (who are not the Installation Host)]. However, the [Military Department WCF] who is the designated Installation Host does not report assets on its installation that were funded by, and are exclusively used by an entity not included in the consolidated DoD financial statements._

_The [Military Department WCF] used and occupied certain real property asset(s) in which it is not the designated Installation Host as a result does not include the real property asset(s) in its financial statements. The [Military Department WCF] has entered into Memoranda of Agreement, with the [Installation Host] that is the Installation Host, which transfers the right to control the use of [Installation Host] real property asset(s) to the [Military Department WCF]. The transfer of the right to control the use of the real property asset does not transfer jurisdiction and the asset remains an asset of the [Installation Host] acting as the Installation Host._

CHAPTER 25

GENERAL EQUIPMENT

1.0 GENERAL (2501)

1.1 Overview (250101)

This chapter prescribes Department of Defense (DoD) accounting policy for general equipment including Government-Furnished Property (GFP) and Contractor-Acquired Property (CAP) that fall under the category of general equipment, all of which are subsets of general Property, Plant, and Equipment (PP&E).

1.1.1. Description. General equipment, such as Military Equipment (weapon systems), consists of tangible assets that:

1.1.1.1. Have an estimated useful life of two years or more;

1.1.1.2. Are not intended for sale in the ordinary course of operations; and

1.1.1.3. Are acquired or constructed with the intention of being used or being available for use by the entity.

1.1.1.4. Were previously defined as Military Equipment, and before that as National Defense Property, Plant and Equipment (weapon systems).

1.1.2. Characteristics of General Equipment. General equipment items are used in providing goods or services, or support the mission of the entity, and typically have one or more of these characteristics:

1.1.2.1. The item could be used for alternative purposes (e.g., by other DoD or federal programs, state or local governments, or nongovernmental entities), but it is used to produce goods or services, or to support the mission of the entity;

1.1.2.2. The item is used in business-type activities which are defined as a significantly self-sustaining activity which finances its continuing cycle of operations through collection of exchange revenue; and/or

1.1.2.3. The item is used by entities in activities whose costs can be compared to those of other entities performing similar activities (e.g., federal hospital services in comparison to commercial hospitals).
1.2 Purpose (250102)

This chapter prescribes DoD accounting policy for general equipment including GFP and CAP that fall under the category of general equipment, all of which are subsets of general PP&E. The applicable general ledger accounts are listed in the United States Standard General Ledger (USSGL) contained in Volume 1, Chapter 7, and the accounting entries for these accounts are specified in the DoD USSGL Transaction Library. Unless otherwise stated, this chapter is applicable to all DoD Components, both General Fund and Working Capital Fund (WCF) activities.

1.3 Authoritative Guidance (250103)

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.2. FASAB SFFAC 7, “Measurement of the Elements of Accrual-Basis Financial Statements in Periods after Initial Recording”;

1.3.3. FASAB Statement of Federal Financial Accounting Standards (SFFAS) 1, “Accounting for Selected Assets and Liabilities”;

1.3.4. FASAB SFFAS 4, “Managerial Cost Accounting Standards and Concepts”;

1.3.5. FASAB SFFAS 6, “Accounting for Property, Plant, and Equipment”; 

1.3.6. FASAB SFFAS 23, “Eliminating the Category National Defense Property, Plant, and Equipment”;

1.3.7. FASAB SFFAS 40, “Definitional Changes Related to Deferred Maintenance and Repairs: Amending Statement of Federal Financial Accounting Standards 6, Accounting for Property, Plant, and Equipment”;

1.3.8. FASAB SFFAS 42, “Deferred Maintenance and Repairs: Amending Statements of Federal Financial Accounting Standards 6, 14, 29, and 32”;

1.3.9. FASAB SFFAS 44, “Accounting for Impairment of General Property, Plant, and Equipment Remaining in Use”;

1.3.11. FASAB **SFFAS 55**, “Amending Inter-entity Cost Provisions”;

1.3.15. FASAB **TR 15**, “Implementation Guidance for General Property, Plant, and Equipment Cost Accumulation, Assignment and Allocation”;

1.3.16. FASAB **TR 17**, “Conforming Amendments to Technical Releases for SFFAS 50, Establishing Opening Balances for General Property, Plant, and Equipment”;

1.3.17. FASAB **TR 18**, “Implementation Guidance for Establishing Opening Balances”;

1.3.19. FASAB **Staff Implementation Guidance 6.1**, “Clarification of Paragraphs 40-41 of SFFAS 6, Accounting for Property, Plant, and Equipment, as Amended”;

1.3.21. Federal Acquisition Regulation *(FAR)*;

1.3.22. Defense FAR Supplement *(DFARS)*;

1.3.23. DFARS Procedures, Guidance, and Information *(PGI)*;

1.3.25. **DoDI 5010.40** “Managers’ Internal Control Program Procedures”;

1.3.26. **DoDI 5000.64**, “Accountability and Management of DoD Equipment and Other Accountable Property”;

1.3.28. Title 40, United States Code, section 571 (40 U.S.C. § 571) – Public Buildings, Property, and Works; Subtitle 571 – General Rules for Deposit and Use of Proceeds; and

2.0 ACCOUNTING FOR GENERAL EQUIPMENT (2502)

2.1 Definitions (250201)

2.1.1. CAP. CAP is property acquired, fabricated, or otherwise provided by the contractor for performing a contract and to which the Government has title. CAP may be equipment, material, special tools, and special test equipment.

2.1.2. Constructive Delivery. Delivery that is inferred to have taken place from the conduct of the parties (such as when one transfers a title to another) involved in a transaction, even if the physical delivery did not take place. Constructive delivery must be based on the terms of the contract regarding shipping and/or delivery.

2.1.3. General Equipment. General equipment refers to tangible items that are used by DoD in providing goods and services.

2.1.3.1. General equipment items are those items that:

2.1.3.1.1. Are durable and have a useful life of two years or more;

2.1.3.1.2. Are not intended for sale in the ordinary course of operations;

2.1.3.1.3. Are not held in anticipation of physical consumption;

2.1.3.1.4. Are functionally complete and ready to use for their intended purpose; and

2.1.3.1.5. Do not ordinarily lose their identity or become a component part of another asset when put into use.

2.1.3.2. GFP and CAP that meet the criteria of subparagraphs 250201.A.1.a through 250201.A.1.e are general equipment.

2.1.3.3. General equipment excludes internal use software. However, any computer software that is integrated into (embedded) and necessary to operate equipment (rather than perform an application) will be considered part of the general equipment item of which it is an integral part. Embedded software is not classified as internal use software. Guidance relating to software that is not integrated, i.e., internal use software is contained in Chapter 27.
2.1.3.3.1. An Automated Data Processing (ADP) system, including Information Technology Systems, for accounting and financial statement reporting purposes consists of dedicated equipment or components linked together and used in the performance of a service or function in support of a mission of a DoD Component, command, or installation. This definition should not be confused with budgetary or property accountability policy and/or regulations which may be different. ADP systems for the purpose of this definition and the requisite accounting treatment are typically referred to as mainframe or minicomputer systems and generally, do not include personal computers (PCs) linked to a central server and used in an office environment. ADP systems must be capitalized and depreciated when the total cost of the system (considering the individual components as a whole system) equals or exceeds the applicable DoD capitalization threshold (see subparagraph 250204.D) and has an expected useful life of two years or more.

2.1.3.3.2. PCs that are not organic to an ADP system (attached PCs and used solely for the operation of the ADP system) are excluded from the accounting and financial statement reporting definition of an ADP system. The cost of such PCs, therefore, is not included in the capitalized cost of an ADP system. Such nonorganic PCs must be recognized in accordance with the guidance prescribed in paragraph 250204.

2.1.3.4. Items that had previously been classified as Military Equipment, i.e., weapon systems and related support equipment, are now classified as general equipment. Weapon systems are those items that are intended to be used by the Armed Forces to carry out battlefield, intelligence, or surveillance missions; examples include combat aircraft, pods, combat ships, support ships, satellites, and combat vehicles.

2.1.3.4.1. Weapon systems do not ordinarily lose their identity or become component parts of another article; and are available for the use of the reporting entity for their intended purpose.

2.1.3.4.2. Intangible items, such as software, are not considered weapon systems; however, computer software that is integrated into (embedded) and necessary to operate weapon systems (rather than perform an application) must be considered part of the weapon system of which it is an integral part.

2.1.3.4.3. Weapon systems are generally functionally complete and must be valued based on the cost of the final assembly, including the cost of embedded items.

2.1.4. GFP. GFP is property in the possession of, or directly acquired by, the Government and subsequently furnished to the contractor for performance of a contract. GFP includes, but is not limited to equipment, material, special tools, special test equipment, spares and property furnished for repair, maintenance, overhaul, or modification.

2.1.5. Indirect Project Costs. Costs incurred, such as construction administration, legal fees, and various office costs, that clearly relate to projects under development or construction.
2.1.6. Material. Material is property that may be consumed or expended during the performance of a contract, component parts of a higher assembly, or items that lose their individual identity through incorporation into an end item. Material does not include equipment, special tooling, or special test equipment.

2.1.7. Materiality. Materiality, as defined by the SFFAS 1, is the degree to which an item's omission or misstatement in a financial statement makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or the misstatement.

2.2 Relevant USSGL Accounts (250202)

2.2.1. Construction-in-Progress (USSGL 172000). The Construction-in-Progress (CIP) account is used to accumulate the costs of new construction of general PP&E (except for internal use software for which capitalized development costs are accumulated in USSGL 183200 - Internal Use Software in Development Account) and capital improvements while the asset is under construction. CIP accounts include all costs (i.e., direct labor, direct material, supervision, inspection and overhead) incurred in construction. Upon completion, these costs will be transferred to the appropriate general PP&E account. See subparagraph 250204.G for a discussion of the CIP process.

2.2.2. Equipment (USSGL 175000). The Equipment account is used to record the capitalized cost of tangible equipment items of a durable nature that are used by DoD in providing goods and services. This account excludes internal use software but includes the cost of computer software that is integrated into (embedded) and necessary to operate the equipment of which it is an integral part.

2.2.3. Accumulated Depreciation on Equipment (USSGL 175900). The Accumulated Depreciation on Equipment account is used to record the amount of accumulated depreciation charged to expense for assets recorded in the Equipment account (USSGL 175000). See paragraph 250206 for guidance on calculating and recording depreciation.

2.3.4. General Property, Plant, and Equipment Permanently Removed but Not Yet Disposed (USSGL 199500). The General Property, Plant, and Equipment Permanently Removed but Not Yet Disposed account is used to record the value of general PP&E assets which have been permanently removed from service. Upon permanent removal from service, general PP&E assets must be recorded at their expected net realizable value (NRV) and must cease to be depreciated. See paragraph 250208 for guidance on reporting general PP&E assets which have been permanently removed from service.

2.3.5. Depreciation, Amortization and Depletion (USSGL 671000). The expense recognized by the process of allocating costs of an asset (tangible or intangible) over the period of time benefited or the asset’s useful life is recorded in this account.
2.3 Acquisition/Valuation (250203)

2.3.1. Recorded Cost. When acquiring a general equipment item, the recorded cost must be recognized in accordance with paragraph 250204. The recorded cost of general equipment items is the basis for computing depreciation. The recorded cost must include all amounts paid to bring the equipment to its form and location suitable for its intended use, including the costs of any embedded items and/or integral software plus ancillary costs. This subparagraph defines and prescribes the use of acquisition cost, net book value, fair value, and recorded cost when recording the cost of newly acquired general equipment assets. The funding source (e.g., appropriation and WCFs) is not a factor in determining whether or not an item should be capitalized.

2.3.1.1. Acquisition Cost. For the purposes of this chapter, acquisition cost refers to the original purchase, construction, or development cost; net of (less) any purchase discounts. Purchase discounts lost and late payment interest expenses must not be included as a cost of the asset; rather, such costs must be recognized as operating expenses. Although the measurement basis for valuing general equipment remains historical cost, reasonable estimates maybe used to establish the historical acquisition cost for general equipment as described in SFFAS 6 as amended by SFFAS 50.

2.3.1.2. Net Book Value. Net Book value is the recorded cost of a general equipment asset, less its accumulated depreciation.

2.3.1.3. Fair Value. Fair value is the amount at which an asset or liability could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

2.3.1.4. Ancillary Cost. Ancillary costs are included in the recorded cost in addition to the acquisition cost of the asset. These costs are identifiable and necessary to bring the asset to its form and location suitable for its intended use including other direct and indirect costs. Examples include:

2.3.1.4.1. GFP installed in end items (e.g., engines installed in aircraft);

2.3.1.4.2. An appropriate share of the cost of Government-furnished materials used in the production of end items;

2.3.1.4.3. Transportation charges to the point of initial use;

2.3.1.4.4. Handling and storage costs;

2.3.1.4.5. Labor and other direct or indirect production costs (for assets produced or constructed);

2.3.1.4.6. Engineering and other outside services for designs, plans, specifications, and surveys;
2.3.1.4.7. An appropriate share of the cost of the equipment and facilities used in construction work;

2.3.1.4.8. Acquisition and preparation costs of equipment;

2.3.1.4.9. Direct costs of inspection, supervision, and administration of construction contracts and construction work;

2.3.1.4.10. Allowable direct cost of maintaining the Program Management Office, if material;

2.3.1.4.11. Legal and recording fees and damage claims;

2.3.1.4.12. Fair value of equipment donated to the DoD;

2.3.1.4.13. Interest paid directly to providers of goods or services related to the acquisition or construction (not including late payment interest penalties); and

2.3.1.4.14. A prorated share of non-recurring cost associated with the production of the equipment. A non-recurring cost is an unusual charge, expense, or loss that is unlikely to occur again in the normal course of business. Non-recurring costs include write-offs, fire or theft losses, and losses on sales of assets.

2.3.2. Method of Acquisition or Transfer Determines Recorded Cost

2.3.2.1. Purchased Equipment. The cost to be recorded for general equipment items acquired by purchase from a third party (private, commercial, or state or local government) is its purchase contract cost plus applicable ancillary costs. Examples of ancillary costs are included in the listing in subparagraph 250203.A.4. For purposes of this guidance, purchase includes procurements of general equipment by cash, check, or installment or progress payments on contracts.

2.3.2.2. Constructed Equipment. The cost to be recorded for constructed general equipment items is the sum of all the costs incurred to bring the item(s) to a form and condition suitable for their intended use. These include costs incurred after project design authorization for actual construction such as labor, materials, and overhead costs (see Annex 1 for a list and description of the costs to be accumulated for constructed items). Note that preliminary planning costs accumulated prior to design authorization must be expensed and not be captured as part of the recorded cost of constructed items. The cost of general equipment under construction must be recognized in accordance with the CIP guidance prescribed in subparagraph 250204.G.

2.3.2.3. Donated Equipment. The cost to be recorded for general equipment acquired through donation, execution of a will, or judicial process excluding forfeiture must be its estimated fair value at the time acquired by the DoD.
2.3.2.4. Exchanged Equipment. The cost to be recorded for general equipment acquired through exchange between the DoD and a nonfederal entity is the fair value of the consideration surrendered at the time of exchange. If the fair value of the equipment acquired is more readily determinable than that of the consideration surrendered, the cost will be the fair value of the equipment acquired. If neither fair value can be determined, the cost of the equipment acquired will be the cost recorded for the consideration surrendered, net of any accumulated depreciation. Any difference between the net recorded amount of the consideration surrendered and the cost of the equipment acquired must be recognized as a gain or loss. In the event that cash consideration is included in the exchange, the cost of general equipment acquired will be increased by the amount of cash consideration surrendered or decreased by the amount of cash consideration received. If the DoD Component enters into an exchange in which the fair value of the equipment acquired is less than that of the consideration surrendered, the equipment acquired will be recognized at the amount of the consideration surrendered, as described previously and subsequently reduced to its fair value. A loss must be recognized in an amount equal to the difference between the amount of the consideration surrendered for the equipment acquired and its fair value. This guidance on exchanges applies only to exchanges between a DoD Component and a nonfederal entity. Exchanges between a DoD Component and another DoD Component or Federal agency must be accounted for as a transfer.

2.3.2.5. Capital Leases. The recorded cost of general equipment acquired under a capital lease is the present value of the rental and other minimum lease payments during the lease term, excluding that portion of the payments representing executory cost (e.g., insurance, maintenance and taxes) to be paid by the lessor. The present value is the value of future cash flows (e.g., lease payments) discounted to the present at a certain interest rate (such as the reporting entity’s cost of capital), assuming compound interest. However, if the amount so determined exceeds the fair value of the leased property at the inception of the lease, the amount recorded will be the fair value. If the portion of minimum lease payments representing executory cost is not determinable from the lease provisions, the amount should be estimated.

2.3.2.6. Seized and Forfeited Equipment. The cost recorded for general equipment acquired through seizure or forfeiture is its fair value, less an allowance for any liens or claims from a third party.

2.3.2.7. Vested and Seized Property During Contingency Operations. See Volume 12, Chapter 29, for discussion of vested and seized property during times of contingency operations.

2.3.2.8. Transferred Equipment. Transfers of equipment must adhere to the following:

2.3.2.8.1. Generally, the cost recorded for general equipment transferred from another DoD Component or Federal agency is the cost recorded on the transferring entity’s books for the general equipment, net of any accumulated depreciation (i.e., net book value). If the receiving DoD Component cannot reasonably ascertain those amounts, the cost of the asset will be its fair value at the time of transfer. Accountability for general equipment can be transferred between entities in accordance with DoDI 5000.64 and financial reporting responsibilities will follow. Both parties must agree to the transfer and the agreement must be documented using the appropriate
documentation (e.g., DoD (DD) Form 1348-1A, DLMS 856S, or DD Form 1149). Each DoD Component has execution responsibility to ensure that requisite tasks are being completed in a timely manner for all transfers.

2.3.2.8.2. When completing a transfer, the transferring DoD Component, is required to provide financial reporting information to the receiving DoD Component whenever the asset is transferred throughout the asset lifecycle. When transfers are implemented, supporting documentation which includes financial reporting information, trading partner information, and associated data elements must be provided. These data elements include, but are not limited to, Name, Unique Identifier, Status, General Ledger Classification, Value, Estimated Useful Life, Date Placed in Service, and Transaction Date. If this information is not available, the receiving and transferring entities must develop and document an estimate to support the financial transfer of the asset. See Volume 12, Chapter 14, for further policy on transfers of DoD general equipment between Military Departments.

2.3.2.8.3. Within DoD Components, there are different capitalization thresholds. For transferred equipment between DoD Components if an asset was capitalized at acquisition, it will continue to be capitalized and depreciated after transfer regardless of the new financial reporting entity’s capitalization threshold. If an asset was expensed at acquisition, it will not be capitalized and depreciated after transfer to the new financial reporting entity, even if the new financial reporting entity has a lower capitalization threshold than the original entity that acquired the asset. The transferring DoD Component will remove the transferred general equipment from its Accountable Property System of Record (APSR) and the receiving DoD Component will include the item in its APSR as accountable general equipment.

2.3.2.9. Equipment Acquired by Trade-In. The cost to be recorded for general equipment acquired when trading in another general equipment asset is the sum of the net book value of the asset(s) traded plus (minus) any cash paid (received) or liabilities assumed (relinquished) for the new asset. The net book value is the recorded cost of a general equipment asset, less its accumulated depreciation.

2.3.2.10. CAP. The recorded cost for general equipment acquired as CAP will be in accordance with the contractual arrangement used to acquire the item as follows:

2.3.2.10.1. For fixed price type line, subline, or exhibit line items, the unit price identified in the contract at the time of delivery;

2.3.2.10.2. For cost type or undefinitized line, subline, or exhibit line items, the contractor’s estimated fully burdened unit cost to the Government at the time of delivery; and

2.3.2.10.3. For items delivered under a time and materials contract, the contractor’s estimated fully burdened unit cost to the Government at the time of delivery.
2.3.3. **Documentation.** When recording the acquisition of a general equipment item in the APSR and/or accounting system, the item must be assigned a dollar value (i.e., recorded cost) as detailed in this chapter. The dollar value must be supported by appropriate documentation. A complete discussion of supporting documentation can be found at paragraph 250302.

2.4 Recognition (250204)

All general equipment items acquired by DoD Components must be recognized for accountability in accordance with DoDI 5000.64 and financially reported as required by this guidance. Recognition requires the appropriate accounting treatment (expense or capitalization with depreciation) and the reporting of capitalized amounts and accumulated depreciation on the appropriate DoD Component’s financial statements.

2.4.1. **Recognition Responsibility.** Financial reporting responsibility for a given general equipment asset will reside with the same entity that has accountability for that asset as defined in DoDI 5000.64, including the responsibility for recording the asset in the DoD Component’s APSR. In most cases, the entity with accountability and financial reporting responsibility for in-service general equipment will be the funding entity acquiring the asset for use in its operations. While financial reporting begins while the asset is under construction, physical accountability for the asset begins at the point of receipt, delivery, or acceptance. See Annex 3 for illustrative examples of financial reporting responsibilities for general equipment and related journal entries.

2.4.1.1. The base asset and all capital improvements to the base asset will be reported by the same reporting entity in order to maintain consistency between the financial reporting and the physical assets.

2.4.1.2. In cases where accountability changes from one entity to another, the financial reporting of the asset will transfer with the accountability of the asset. When transferring financial reporting responsibility for assets, supporting documentation for assets is required as described in subparagraph 250203.B.8.

2.4.1.3. Financial reporting responsibility for the asset also includes all aspects of financial reporting and disclosures such as, but not limited to, footnote disclosures, deferred maintenance and repair (DM&R), and other required supplemental information (RSI).

2.4.1.4. DoD Components must follow existing DoDIs for establishing and maintaining accountability for general equipment assets using their APSRs.

2.4.1.5. All DoD Components who are responsible for the financial reporting of an asset should be prepared to support the financial statement assertions. These assertions include: existence and completeness, rights and obligations, accuracy and valuation, occurrence, and presentation and disclosure.
2.4.1.6. CAP must be recognized by the funding DoD Component as general equipment when the item is delivered and accepted by the DoD Component or an authorized representative thereof in accordance with the terms and conditions of the contract. Until acceptance, constructive delivery of the CAP item and its cost will be recognized in the CIP account. Delivery and acceptance of CAP will be in accordance with DFARS PGI 245.402-71.

2.4.1.7. A capital improvement that is funded by the same entity that reports the base asset will also be reported by that same entity by first accumulating the costs of the improvement in a CIP account and then transferring those costs to the same account as the base asset when the improvement goes into service. However, if the entity that funds the improvement is different than the entity that reports the base asset the following applies:

2.4.1.7.1. The entity or entities funding the improvement will accumulate the cost of the improvement in their CIP account(s) until the implementation of the improvement is complete.

2.4.1.7.2. When the improvement is placed in service, the CIP will be relieved by the funding organization(s) and the improvement will be recognized as a general equipment asset by the funding organization(s). The cost of the improvement will then be transferred and reported by the entity that has reporting responsibility for the base asset (see Annex 3, subparagraph A30103 for illustrative examples and journal entries).

2.4.1.7.3. The accounting objective is that the base asset and all capital improvements made to the base asset are reported by the same entity. The rationale for maintaining the base asset with the cost of the improvement is to maintain assets and their improvements on the same financial statements.

2.4.1.8. If a DoD general equipment asset is identified on site that is not recorded in the APSR of the local DoD Component, it is the local DoD Component’s responsibility to identify who has accountability for the asset. In this instance, the local DoD Component is defined as the DoD Component that the general equipment asset in question is residing closest in distance. For example, if the general equipment was in a building operated by the Defense Logistics Agency (DLA), then DLA would be the local DoD Component. Another example would be, if the general equipment were located on a yard maintained by the Navy, then the Navy would be the local DoD Component. It should be noted that it will not be uncommon for certain types of assets to be under the accountability of a DoD Component that is not the local DoD Component. When this situation occurs it will be critical for the local DoD Component and the accountable DoD Component to have a clear understanding of accountability of the general equipment asset, and ensure that the general equipment asset is recorded in the appropriate APSR. The accountable entity is required to inventory property in accordance with DoDI 5000.64 as well as have the proper internal controls in place to support Property Management in accordance with DoDI 5010.40. These elements will assist the accountable DoD Component with maintaining accountability of assets in their APSR. For audit purposes, if there are general equipment assets for which the local DoD Component is not accountable, it may be beneficial to maintain a listing of those assets and their respective accountable DoD Components.
2.4.1.9. Assets on loan or assets under temporary or stewardship control of another entity will not result in a transfer of accountability or financial reporting. The entity with stewardship control must maintain supporting documentation (e.g., hand receipt, Memorandum of Understanding) that identifies them as having physical control, but not financial reporting responsibility, and provide it to the accountable entity. Additionally, the custodial entity must support any audit requests from the accountable entity related to property in their control.

2.4.2. Recognition Uncertainty. It is important that the overall accounting records of the DoD and the Federal Government are not duplicative.

2.4.2.1. In situations where doubt exists as to which DoD Component should recognize an item, DoD Components involved must reach agreement with the other applicable DoD Components or Federal agencies as to which entity will record the item for financial reporting purposes.

2.4.2.2. Disputes between DoD Components regarding accountability for an asset under DoDI 5000.64 guidelines may be resolved by contacting the Office of the Deputy Assistant Secretary of Defense for Logistics.

2.4.3. Recognition Timing. Recognition of general equipment for financial reporting purposes must occur upon delivery and acceptance to the acquiring DoD Component even though title passage can occur either at the time of delivery or at an earlier contractually specified date. For weapon systems the recognition date will normally be the date source shown on the Invoicing, Receipt, Acceptance, and Property Transfer (iRAPT) receiving report.

2.4.3.1. Upon delivery or constructive delivery, the cost of general equipment items must be capitalized in the appropriate USSGL equipment account if the delivery is for finished goods; if the delivery is not for finished goods, the costs must be accumulated in the CIP USSGL account by the funding DoD Component, assuming the estimated total costs will reach the capitalization threshold. DoD Components must estimate whether the total cost will reach the capitalization threshold and if not, document and expense costs as they are incurred. Upon the date the asset is placed in service, the CIP will be relieved by the funding entity, and a depreciable asset will be recognized. In cases where there are multiple DoD funding entities, the entity with accountability according to DoDI 5000.64 will become the financial reporting entity and record the completed asset at full cost in their APSR. See subparagraph 250203.B.8 for details on transfers of in-service assets. Such transfers must be recorded in the same month that the asset was removed from CIP and placed in service (see Annex 3 for illustrative examples and journal entries). The property must be accounted for in the APSR regardless of whether it is capitalized or expensed subject to the accountability requirements set out in DoDI 5000.64.

2.4.3.2. For general equipment acquired by a contractor on behalf of a DoD Component (i.e., CAP), the assets must be recognized upon delivery or constructive delivery, whether to the contractor for use in performing the service or to the DoD Component. Delivery or constructive delivery will be based on the terms of the contract regarding delivery, receipt, and acceptance in accordance with DFARS PGI 245.402-71. Contract financing payments for work performed (e.g., progress payments, performance-based payments, and commercial interim
payments) made to a contractor prior to delivery or constructive delivery must be recorded in the CIP account until the goods are received, assuming estimated total costs will reach the capitalization threshold. Upon completion and contractual delivery of general equipment CAP to the Government, the CAP should either be capitalized in the appropriate USSGL account or, if the CAP does not meet the capitalization threshold, such item should be recorded in the appropriate expense account. DoD Components must estimate whether the total costs of the item under construction will reach the capitalization threshold and if not, document and expense costs as they are constructed. See subparagraph 250204.G for guidance on the use of the CIP account.

2.4.4. Capitalization Thresholds. The current capitalization threshold for general equipment is $1 million for the Department of Air Force and the Department of Navy general funds; $1 million for the National Security Agency and the Office of the Director of National Intelligence reporting entities; and $250,000 for all other DoD Component general funds and WCFs. A general equipment item with a recorded cost that equals or exceeds the applicable capitalization threshold and has a useful life of at least two years must be capitalized as an asset in the appropriate DoD Component’s accounting records and depreciated over its useful life. A general equipment item with a recorded cost below the applicable capitalization threshold or which has a useful life of less than two years must be expensed, with the exception of general equipment items acquired as part of a qualifying bulk purchase. See subparagraph 250204.F for guidance on bulk purchases.

2.4.5. CAP. All special tooling, special test equipment or equipment items meeting or exceeding the appropriate capitalization threshold with a useful life of at least two years must be capitalized at the time of delivery. Per SFFAS 6, general equipment should be recognized when title passes to the acquiring entity or when the general equipment is delivered to the entity or to an agent of the entity. Delivery or constructive delivery should be based on the terms of the contract regarding shipping and/or delivery. For general equipment acquired by a contractor on behalf of the DoD Component where the Government will ultimately hold title to the equipment, the equipment should be recognized upon delivery or constructive delivery whether to the contractor for use in performing services or to the entity. In the case of constructed equipment, the costs should be accumulated in the CIP USSGL account until the item is delivered, at which time the costs should be transferred from the CIP account to the appropriate equipment USSGL account. An accountable property record in the appropriate APSR for CAP should be established upon its delivery and acceptance. Valuation of the delivered item should be at the contractor provided fully burdened cost, (i.e., normal or provisional burdens to the direct costs in accordance with the applicable disclosed accounting practices; including an appropriate amount for fee or profit (as reflected in the contract under which the estimate is prepared)) in addition to the direct and indirect costs. Placed in service dates for equipment (e.g., special tooling or special test equipment) will be the date of acquisition by the contractor or date of completed manufacture, if a contractor fabricated the asset.
2.4.6. **Bulk Purchases.**

2.4.6.1. For accounting consideration purposes, a bulk purchase is a single contractual/purchase arrangement of multiple like general equipment items within a fiscal year. For bulk purchases made on a single multiple year contractual/purchase arrangement, purchases should be aggregated and evaluated on an individual fiscal year basis. Each DoD Component should evaluate whether the amounts of bulk purchases are considered material. This evaluation should be documented in writing. Each DoD Component should establish guidance on applying DoD capitalization thresholds to their bulk purchases.

2.4.6.2. The DoD Component evaluation should consider whether period costs on the Statement of Net Costs would be materially overstated and/or asset values on the Balance Sheet would be materially understated by expensing bulk purchases. Determining materiality requires appropriate and reasonable professional judgment. In making such a judgment, the DoD Component may review, for example, recent fiscal year bulk purchases, and consider if such purchases are likely to trend in a similar buying pattern in the current and subsequent years based on their understanding of the DoD Component's specific operational and mission needs. Based on a quantitative analysis aggregating bulk purchases from prior fiscal years, the DoD Component may compare these amounts to recorded amounts on the Balance Sheet and expenditures in the Statement of Net Costs to determine whether such amounts will or will not be considered material in the current fiscal year.

2.4.6.3. In the instance where more than one DoD Component has the authority to place orders under the same contractual/purchase arrangement, they should evaluate only those orders they fund for purposes of the bulk purchase evaluation and not those funded by other DoD Components.

2.4.7. **CIP Process.**

2.4.7.1. Constructed general equipment must be recorded in the CIP USSGL account until it is placed in service at which time the balance must be transferred to the general equipment USSGL account. Capital expenditures or progress payments paid to contractors, for general equipment being manufactured or constructed, are to be recorded in a CIP account. Reporting entities must be able to capture and accumulate capital costs separately for each acquisition program or acquisition contract. As completed assets are delivered and accepted by DoD or constructive delivery occurs, capital costs will be relieved from the CIP account and transferred to the general equipment asset account. See Figure 25-1 for the typical steps involved in the CIP process for construction to completion of the asset.
2.4.7.2. Advance Payments, as defined in FAR 32.202-2, are to be recorded in an advance account until the end items are delivered. Advances should be recorded to USSGL 141000, “Advances and Prepayments.” All other contract financing payments must be recorded as CIP. CIP must reflect actual progress on the contract. To ensure that CIP amounts reflect actual progress on the contract, DoD Components must perform a periodic reconciliation (at least quarterly) between amounts recorded in CIP and the actual progress on the contract. Generally, the reconciliation should be performed by the DoD Contracting Officer’s Representative. This may require working with the contractor to perform the reconciliation. Costs incurred in excess of finance payments should be reported as a liability.

2.4.7.3. For acquisition programs or acquisition contracts, the contract(s) must be written to reflect the general equipment items being manufactured or constructed. In order to trace commitments, obligations, and expenditures to the general equipment recorded in the DoD Component’s accounting records, it is essential that the level of detail in the contract be aligned to the level at which items will be delivered, recorded in the accounting records, and managed. DFARS Subpart 204.71 – Uniform Contract Line Item Numbering System provides specific instructions for the composition of the contract line item numbers (CLINs) and accounting classification reference numbers, which ensures funding citations are appropriately designated for items and services being acquired. Based on the terms of the contract and nature of the item or service being acquired, each CLIN will be determined to be either capital or noncapital. Table 25-1 provides examples of cost types that may be included in a contract and whether those costs would be capitalized or expensed.
Table 25-1. Examples of Cost Types and Accounting Treatment

<table>
<thead>
<tr>
<th>Acquisition Deliverable</th>
<th>Accounting Treatment</th>
</tr>
</thead>
</table>
| Air Vehicle              | □ Capitalize the cost, if the full cost is greater than the capitalization threshold and a useful life of two years or more  
                           □ Expense the cost, if the full cost is less than the capitalization threshold |
| Research, Development, Test and Evaluation (RDT&E)* | Expense costs* |
| Acquired Data            | Expense costs        |
| Support Equipment        | □ Capitalize the cost, if the full cost is greater than the capitalization threshold and a useful life of two years or more  
                           □ Expense the cost, if the full cost is less than the capitalization threshold |
| Initial Spares and Repair Parts | Report as Inventory for WCF activities or Operating Materials and Supply for general fund activities in accordance with Chapter 4 |

* RDT&E costs, which are typically expensed, will be capitalized if they are associated with the production of functional end items that will be placed in service or have alternative future uses.

2.4.7.4. A CIP account will be created following the decision to proceed with an acquisition program granted at Milestone C (design authorization) as described in DoDI 5000.02 and the successful completion of the funding authorization document. When a DoD entity is constructing an item for another DoD entity on a cost reimbursable basis, the constructing entity must accumulate all costs since project inception in a CIP account until the costs are billed to the funding entity. The billed costs in such a scenario must be removed from the CIP account of the DoD constructing entity when billed to the funding entity and the funding entity must record such billed amounts in their appropriate CIP account.

2.4.7.5. DoD Components must assign a service unique project number to each approved acquisition project when the CIP account is created to accumulate costs. When portions of CIP for the same construction project are performed by multiple entities, the same project number must be used for all phases of the construction project regardless of the performing entity.

2.4.7.6. All costs to be capitalized for a construction project will be accumulated in the CIP account of the funding entity. A reasonable allocation methodology should be established to assign project costs (including non-recurring costs as described in 250203.A.4.m) to the end items received and accepted by the DoD Component and placed into service. Any indirect project costs must be allocated across CIP accounts periodically as they are incurred, and no later than the date the items are placed in service based on the direct cost of each constructed item as a percentage of the total direct cost of all constructed items in the project. Thus, the full cost of constructed items can be adequately captured and reported. Allocation and cost identification are addressed in Chapter 19.
2.4.7.7. The DoD entity constructing the item must continue to report CIP on their financial statements until the constructed item is accepted by the accountable DoD Component or its agent. The minimum information associated with the CIP amount reported for financial statement preparation purposes must include the DoD Component’s project number, project fund code(s), project detail cost, project detail organization code(s), and programmed amount. For a specified project and for the purpose of an audit trail of the CIP account, the Government’s project construction agent and the DoD constructing entity must retain the supporting documentation for their respective portion(s) of the project to which they have fiscal accountability. For additional information regarding representative documentation for a construction project, refer to paragraph 250302. Upon acceptance of constructed items, the Government’s project construction agent and the DoD constructing entity must provide the accountable property officer with the legible copies of auditable supporting documentation that must be provided, along with their location. The accountable property officer, in turn, must ensure the documentation is retained in accordance with applicable laws, regulations, and instructions.

2.4.7.8. When constructed items are accepted, the costs accumulated in the CIP account must be relieved (i.e., transferred to the appropriate general PP&E account). To ensure constructed items are recorded at full cost, the recorded cost of the item(s) accepted must equal the sum of all the costs incurred to bring the item(s) to a form and condition suitable for their intended use. These include costs incurred after project design authorization for actual construction such as labor, materials, and overhead costs (see Annex 1 for a list and description of the costs to be accumulated for constructed 090385 items). In addition, the funding entity of a construction project must ensure that all costs incurred by the funding entity are provided to its construction agent on a formal document for inclusion in the full cost of the item(s).

2.4.7.9. If a construction project is cancelled, each cost accumulated in the associated CIP account must be expensed. When a portion of a project is cancelled or decreased in scope, the cost directly associated to that portion of the project, and an allocated portion of the common cost in the CIP, must be expensed. All projects deferred for more than two years must be reviewed for continuance or cancellation during the review cycle.

2.4.8. Accounting for General Equipment Outside of the United States. As used in this chapter, “United States” means the 50 States of the United States, the District of Columbia, and the commonwealths, territories, and possessions of the United States. In carrying out their mission, operations and objectives, there are circumstances in which DoD Components use general equipment outside of the United States. DoD’s rights to general equipment outside of the United States may be different from those within the United States. For financial reporting purposes, a DoD Component that uses general equipment outside of the United States must adhere to the following guidance:

2.4.8.1. A DoD Component will recognize a general equipment asset on its financial statements in accordance with the guidance provided throughout the other provisions of this chapter if the DoD Component purchases the general equipment asset outside of the host nation/foreign country to which it is bringing the general equipment.
2.4.8.2. If a DoD Component both purchases and uses the general equipment in the foreign country then the DoD Component must evaluate any foreign legal restrictions, or terms of any agreements with the host nation/foreign government to determine the accounting treatment for the general equipment asset as follows:

2.4.8.2.1. If there are no foreign legal restrictions, terms of agreement with the host nation/foreign government or similar barriers for owning general equipment purchased within the foreign country, the DoD Component will account for such general equipment in accordance with the other provisions of this chapter.

2.4.8.2.2. If there are foreign legal restrictions, terms of agreement with the host nation/foreign government or other restrictions that preclude the DoD’s ownership of the general equipment imposed by the host nation/foreign government, the DoD Component should estimate the period of time it will use the general equipment in the foreign country. If the estimated period of use is two years or greater and the cost of the general equipment equals or exceeds the capitalization threshold (see subparagraph 250204.D), the general equipment should be capitalized and depreciated over the lesser of the estimated period of use in the foreign country or the useful life in Table 25-2 for the particular type of general equipment.

2.4.8.3. If a general equipment acquisition is not funded/purchased by DoD but instead the general equipment is provided by the host nation/foreign government and the terms and use of the general equipment are set out in an agreement between the DoD Component and the host nation/foreign government, the DoD Component will recognize the general equipment as an asset under capital lease if it meets the lease criteria in Chapter 26.

2.4.8.4. SFFAS 4 and SFFAS 55 address imputed costs between Federal agencies but do not extend to entities outside of the federal context. The concept of imputed costs does not apply to activities between a DoD Component and a host nation/foreign government. Therefore, a DoD Component will not record imputed costs for the use of general equipment, for which it does not pay directly or pay through reimbursement, provided by international organizations (e.g., North Atlantic Treaty Organization) or host nations/foreign governments.

2.4.8.5. The DoD Component must record accountable general equipment it uses in an APSR, including those that have not been capitalized for accounting and financial reporting purposes in accordance with DoDI 5000.64.

2.4.8.5.1. General equipment which do not meet the criteria for capitalization in accordance with subparagraphs 250204.H.1, 250204.H.2 or 250204.H.3 will be expensed in the period acquired or built.

2.4.8.5.2. If the DoD Component does not pay the host nation/foreign government for use of general equipment provided to the DoD Component, then this general equipment will not be reflected in financial statements (other than through note disclosure as described in subparagraph 250305.B).
2.4.8.5.3. All other property attributes and data elements must be entered and maintained in the APSR for all general equipment regardless of the dollar value assigned to the asset.

2.4.8.6. The DoD Component must record an expense for any maintenance and sustainment costs relating to the general equipment paid, or to be paid by them in the period incurred.

2.4.8.7. See also the reporting requirements for disclosure at subparagraph 250305.B.

2.4.9. Accounting Treatment for Long Range Ballistic Missiles.

2.4.9.1. DoD defines the mission of the nuclear arsenal solely as one of deterrence. Under this mission, the useful life of nuclear assets is expected to exceed two years. Therefore, nuclear long range ballistic missiles (including, but not necessarily limited to, Intercontinental Ballistic Missiles and Submarine Launched Ballistic Missiles) which are fully configured and armed in support of this mission should be classified/recorded as general equipment.

2.4.9.2. Long range ballistic missiles which are not a part of a fully configured nuclear armed long range ballistic missile should be classified/recorded as operating materials and supplies, see Chapter 4.

2.5 Capital Improvements/Enhancements (250205)

Capital improvements/enhancements for general equipment are often referred to as modifications, modernizations, upgrades and improvements.

2.5.1. Capital improvements to general equipment must be capitalized when (1) the improvement increases the asset's useful life by two or more years, or increases the assets capability, or increases its capacity or size, and (2) the cost of the improvement equals or exceeds the capitalization threshold (see subparagraph 250204.D). If capital improvements do not meet these two criteria they should be expensed. Funding source (e.g., appropriation and WCFs) is not a factor in determining whether or not an improvement will be capitalized. If the capital improvement increases the underlying general equipment asset’s useful life by two years or more, the DoD Component must capitalize and depreciate the improvement with the original general equipment over the revised estimated useful life. Costs of capital improvements that do not extend the useful life of an existing general equipment asset but enlarge or improve its capacity and have a useful life of two years or more must be capitalized and depreciated over the lesser of the estimated useful life of the improvement or the remaining economic estimated useful life of the underlying general equipment asset. Note that the economic life of the asset, in certain instances, may prove to be different than the original estimated accounting useful life. The remaining economic life reflects the remaining period of utility for the equipment.
2.5.2. The cost of improvements to more than one general equipment item as identified by a unique identifier when performed under a single contract or work order, and that cannot be specifically identified by asset, should be capitalized only when the allocated cost per general equipment item equals or exceeds the applicable capitalization threshold and the estimated useful life is two or more years. When more than one improvement is made to a single item and the improvements are part of one overall effort to increase the item’s capability, size, and/or useful life, the sum of the costs of the improvements must be capitalized, if the summed costs equal or exceed the applicable capitalization threshold. This is required even when the improvements are funded separately. Once a determination has been made that the aggregate costs of the improvements will be capitalized, each improvement should be capitalized and depreciated upon being placed in service as described in subparagraph 250205.A.

2.5.3. Maintenance and repair costs are not considered capital improvements, regardless of whether the cost equals or exceeds the applicable capitalization threshold. In SFFAS 42, the FASAB defines maintenance and repairs as activities directed toward keeping fixed assets in an acceptable condition. Maintenance and repair activities include preventative maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain assets. Maintenance and repair activities also include cyclic work done to prevent damage that would be more costly to restore than to prevent (e.g., painting). For example, for a wheeled vehicle or an aircraft that has a new engine installed due to the existing engine failing, the cost of the new engine and installation must be expensed even if the new engine provides improved performance and/or longer use.

2.5.4. Although maintenance and repairs are generally expensed in the period incurred, certain replacements of parts, systems, or components may or may not be an improvement for accounting purposes. Crucial to the determination of whether a replacement must be recognized as a repair or an improvement is the intent behind the replacement. Repair by replacement occurs when parts, systems, or components have failed, are in the incipient stages of failing, or are no longer performing the functions for which they were designated. Replacements falling into this category must be expensed. If the replacement was undertaken to improve or extend the life of an item that was in good working order, then the replacement must be recognized as an improvement.

2.6 Depreciation (250206)

2.6.1. The recorded cost of general equipment and capital improvements which have been capitalized in accordance with the guidance prescribed by paragraphs 250204 and 250205 must be depreciated. Such capitalized amounts, as well as associated amounts of accumulated depreciation and depreciation expense, must be reflected in DoD financial statements.

2.6.2. Depreciation is the systematic and rational allocation of the recorded cost of an asset, less its estimated salvage or residual value, over its estimated useful life. Estimates of useful life for general equipment assets must consider factors such as usage, physical wear and tear, and technological change.

2.6.2.1. The salvage value, also known as the residual or scrap value, is the amount that would be expected to be obtained from selling an asset at the end of its useful life, but
only when such proceeds (from recycle, resale, or salvage) are permitted to be retained and used by the DoD Component. Typically, general equipment will not have a salvage value. If the asset is to be traded in on a new asset, the salvage value is the expected trade-in value. For purposes of computing depreciation, weapon systems do not have salvage values.

2.6.2.2. The depreciable basis of an asset is the recorded cost reduced by the asset’s salvage value (if applicable).

2.6.2.3. For purposes of computing depreciation on DoD general equipment assets, specific useful lives are prescribed. Table 25-2 reflects the useful lives to be used for DoD general equipment, except for certain weapon systems and general equipment assets with a useful life of less than five years.

2.6.2.3.1. DoD policy specifies using the straight line method of depreciation only. However, alternate depreciation methods such as activity based depreciation may be permitted. DoD Components that would like to implement a method of depreciation different from straight line must submit an approved written request from the DoD Component’s Accounting Policy Office to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C))/Office of the Deputy Chief Financial Officer (ODCFO) for approval to proceed.

2.6.2.3.2. If a DoD Component determines that a newly acquired general equipment asset costing more than the applicable DoD capitalization threshold has a useful life of at least two years, but less than five years, the DoD Component may elect to depreciate the asset over a useful life that more accurately reflects its useful life (two to four years, as appropriate). The DoD Component making this election must document the basis for that decision.

2.6.2.3.3. If a DoD Component acquires a general equipment asset costing more than the applicable DoD capitalization threshold which has a useful life of at least five years for which the DoD Component determines that a different useful life than that stated in Table 25-2 is justified, they must receive written approval from the DoD Component’s Accounting Policy Office prior to deviating from the standards in Table 25-2. The justification must be supported by sufficient evidentiary matter (e.g., an engineering estimate). OUSD(C)/ODCFO is the approving office for the DoD Components other than the Military Departments, unless delegated by the DCFO to the DoD Component.

*See Capital Improvements/Enhancements in paragraph 250205.*
2.6.3. The event that triggers the calculation of depreciation is the date of receipt shown on the asset receiving document in cases where no installation is required; the date installed (if required); or the date the asset is available for use, also known as the acceptance date (regardless of whether it is actually used). Generally, the actual commencement of depreciation will be based on the Month Available for Service method. Under this method, the month the asset was accepted, installed, or available for use as applicable, is the month used to commence the calculation of depreciation expense for the first year.

2.6.4. DoD policy permits only the use of the straight line method of depreciation. In some cases, exceptions can be made to using the straight line method. Straight line depreciation expense is calculated as the depreciable basis (recorded cost less salvage value, if applicable) divided equally among accounting periods during the asset’s useful life based on useful lives in Table 25-2. DoD Components may desire to depreciate certain weapon systems using an activity based or usage based method of depreciation. Activity based depreciation, referred to in DoD as Operational Tempo (OPTEMPO) recognizes changes in expected utilization rates and fatigue caused by operating environment and mission as set forth in the OPTEMPO methodology. DoD Components wanting to implement the OPTEMPO methodology for a certain weapon system should submit an approved written request from the DoD Component’s Accounting Policy Office to the OUSD(C)/ODCFO for approval to proceed.

2.6.5. If an asset remains in use longer than its estimated useful life, it must be retained in the APSR, as well as the accounting records, and reflect both its recorded cost and accumulated depreciation until disposition of the asset.

2.6.6. WCF activities are required to depreciate general equipment assets in accordance with the guidance in this chapter without regard to whether such assets are procured through a WCF activity’s Capital Purchase/Investment Program budget or whether depreciation for such assets is included in rates charged to customers. The recognition of general equipment assets and the depreciation of such assets by WCF activities therefore may be different for financial statement reporting purposes than the depreciation amounts used for WCF rate development and budget presentation. All general equipment depreciation of WCF activities must be recognized as an expense on the Statement of Net Cost, included in accumulated depreciation amounts on the Balance Sheet, and reported in the “Defense Working Capital Fund Accounting Report [Accounting Report (Monthly) 1307] (AR(M)1307).” Depreciation recorded on general equipment that was not acquired nor will be replaced through use of Defense WCF resources must be classified as non-recoverable for rate setting purposes and reported appropriately on the AR (M) 1307. Defense WCF rates charged to customers are based on guidance in Volume 2B and Volume 11B.

2.7 Impairment (250207)

2.7.1. Description. SFFAS 44 defines impairment as a significant and permanent decline in the service utility of general equipment (which includes general equipment assets) or expected service utility of CIP that results from events or changes in circumstances that are not considered normal and ordinary.
2.7.1.1. See subparagraph 250207.B.2 for a discussion of determining the significance and permanence of a service utility decline.

2.7.1.2. The service utility of general equipment is the usable capacity that, at acquisition, was expected to be used to provide service. The current usable capacity of general equipment may be less than its original usable capacity due to the normal or expected decline in useful life or to impairing events or changes in circumstances, such as physical damage, obsolescence, enactment or approval of laws or regulations or other changes in environmental or economic factors, or changes in the manner or duration of use.

2.7.1.3. Normal and ordinary events or circumstances are those that fall within the expected useful life of the general equipment such as standard maintenance and repair requirements. Events or circumstances that are not considered normal are those that, at the time the general equipment was acquired, the event or change in circumstance would not have been expected to occur during the useful life of the general equipment or, if expected, was not sufficiently predictable to be considered in estimating the general equipment’s useful life.

2.7.2. Identification of Potential Impairment Loss. The determination of whether general equipment remaining in use is impaired is a two-step process which includes (1) identifying potential impairment indicators and (2) testing for impairment.

2.7.2.1. Step 1 - Identify Indicators of Potential Impairment. Indicators of potential impairment can be identified and brought to DoD Component’s attention in a variety of ways, such as procedures related to DM&R. Although DoD Components are not required to establish additional or separate procedures beyond those that may already exist, they should evaluate existing processes and internal controls to determine if they are sufficient to reasonably assure the identification of potential impairment indicators and implement appropriate additional processes and internal controls if necessary. Once identified, indicators are not conclusive evidence that a measurable or reportable impairment exists; DoD Components should carefully consider the surrounding circumstances to determine whether a test of potential impairment is necessary given the circumstances. Some common indicators of potential impairment include:

2.7.2.1.1. Evidence of physical damage;

2.7.2.1.2. Enactment or approval of laws or regulations which limit or restrict general equipment usage;

2.7.2.1.3. Changes in environmental or economic factors;

2.7.2.1.4. Technological changes or evidence of obsolescence (however, if obsolete general equipment continues to be used, the service utility expected at acquisition may not be diminished);

2.7.2.1.5. Changes in the manner or duration of use of general equipment;
2.7.2.1.6. Construction stoppage or contract termination; and

2.7.2.1.7. General equipment idled or unserviceable for excessively long periods.

2.7.2.2. **Step 2 - Impairment Test.** Identified general equipment should be tested for impairment by determining whether these two factors are present: (i) the magnitude of the decline in service utility is significant and (ii) the decline in service utility is expected to be permanent.

2.7.2.2.1. Significant declines in service utility are those that cause costs (including operational and maintenance costs) to be disproportionate to the new expected service utility. The determination of whether or not an item is significant is a matter of professional judgement and is distinct from materiality considerations. Such judgements may be based on the relative costs of providing the service before and after the decline, the percentage decline in service utility, or other considerations.

2.7.2.2.2. The decline in service utility is considered permanent when the DoD Component has no reasonable expectation that the lost service utility will be replaced or restored; that is, the DoD Component expects that the general equipment will remain in service so that its remaining service utility will be utilized. In contrast, reasonable expectation that the lost service utility will be replaced or restored may exist when the DoD Component has:

2.7.2.2.2.1. Specific plans to replace or restore the lost service utility of the general equipment,

2.7.2.2.2.2. Committed or obligated funding for remediation efforts, or

2.7.2.2.2.3. A history of remediating lost service utility in similar cases or for similar general equipment.

2.7.2.3. For CIP, the testing of impairment in subparagraph 250207.B.2 should be performed over the period of expected future service utility rather than current service utility.

2.7.3. **Determining the Appropriate Measurement Approach.** Impairment losses on general equipment that will continue to be used by the entity should be estimated using a measurement approach that reasonably estimates the portion of net book value associated with the diminished service utility of the general equipment. A measurement method would not be considered appropriate if it would result in an unreasonable net book value associated with the remaining service utility of the general equipment. Conversely, a reasonable measurement method may result in no impairment loss to be recorded. Regardless of the method used, recognition of impairment loss should be limited to the asset’s net book value at the time of impairment. Widely recognized methods for measuring impairment include:
2.7.3.1. **Replacement Approach.** Impairment of general equipment with physical damage generally may be measured using a replacement approach. This approach uses the estimated cost to replace the lost service utility of the general equipment at today’s standards (i.e., at current market prices and in compliance with current statutory, regulatory, or industry standards) to identify the portion of the historical cost of general equipment that should be written off due to impairment. It may be appropriate to apply the ratio of estimated cost to replace the diminished service utility over total estimated cost to replace the general equipment, to the net book value of general equipment to determine the impairment amount.

2.7.3.2. **Restoration Approach.** This approach uses the estimated cost to restore the diminished service utility of the general equipment to identify the portion of the historical cost of the general equipment that should be written off. This approach does not include any amounts attributable to improvements and additions to meet today’s standards. The estimated restoration cost can be converted to historical cost by restating (i.e., deflating) the estimated restoration cost using an appropriate cost index. Alternatively, it may be appropriate to apply the ratio of estimated restoration cost to restore the diminished service utility over total estimated restoration cost to the net book value of the general equipment to determine the impairment amount.

2.7.3.3. **Service Unit Approach.** Impairment of general equipment that are affected by enactment or approval of laws or regulations or other changes in environmental factors or are subject to technological changes or obsolescence generally may be measured using a service unit approach. This approach compares the service units provided by the general equipment before and after the impairment to isolate the historical cost of the service utility that cannot be used due to the impairment to determine the impairment amount.

2.7.3.4. **Deflated Depreciated Current Cost Approach.** Impairment of general equipment that are subject to a change in manner or duration of use generally may be measured using a deflated depreciated current cost approach. Under this approach, a current cost for a general equipment to replace the current level of service is estimated. This estimated current cost is then depreciated to reflect the fact that the general equipment is not new, and is then subsequently deflated to convert it to historical cost dollars. A potential impairment loss results if the net book value of the general equipment exceeds the estimated historical cost of the current service utility (i.e., deflated depreciated current cost).

2.7.3.5. **Cash Flow Approach.** Recognizes an impairment loss only if the net book value (i) is not recoverable and (ii) exceeds the higher of its NRV or value-in-use estimate.

2.7.3.5.1. The net book value of general equipment is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the general equipment.

2.7.3.5.2. NRV is the estimated amount that can be recovered from selling, or any other method of disposing, of an item less estimated costs of completion, holding, and disposal. SFFAC 7 describes value-in-use as the benefit to be obtained by an entity from the continuing use of an asset and from its disposal at the end of its useful life.
2.7.3.5.3. If the net book value is not recoverable, the impairment loss is the amount by which the net book value of the general equipment exceeds the higher of its NRV or value-in-use estimate. No impairment loss exists if the net book value is less than the higher of the general equipment’s NRV or value-in-use estimate.

2.7.3.6. Lower of (a) Net Book Value or (b) Higher of NRV or Value-in-Use Approach. General equipment impaired from either construction stoppages or contract terminations, which are expected to provide service, should be reported at their recoverable amount; the lower of (i) the general equipment’s net book value or (ii) the higher of its NRV or value-in-use estimated. Impaired general equipment, which are not expected to provide service, should be accounted for in accordance with paragraph 250208.

2.7.4. Recognizing and Reporting Impairment Losses. The loss from impairment, if any, should be recognized and reported in the Statement of Net Cost in the period in which the DoD Component concludes that the impairment is both (1) a significant decline in service utility and (2) expected to be permanent. Such losses may be included in program costs or costs not assigned to programs. A general description of the general equipment for which an impairment loss is recognized, the nature (e.g., damage or obsolescence) and amount of the impairment and the financial statement classification of the impairment loss must be disclosed in the notes to the financial statements in the period the impairment loss is recognized.

2.7.5. Recoveries. The impairment loss must be reported net of any associated recovery when the recovery and loss occur in the same fiscal year. Recoveries reported in subsequent fiscal years must be reported as revenue or other financing source as appropriate. The amount and financial statement classification of recoveries should be disclosed in the notes to the financial statements.

2.7.6. Remediating Previously Reported Impairments. The costs incurred to replace or restore the lost service utility of impaired general equipment remaining in use must be accounted for in accordance with applicable standards (i.e., recognized according to the nature of the costs incurred and the appropriate capitalization threshold).

2.7.7. Diminished Service Utility Without Recognized Impairment Loss. If the future service utility has been adversely affected but the impairment test determines that a loss does not need to be recognized, a change to the estimates used in depreciation calculations (such as estimated useful life and salvage value, if applicable) should be considered and adjusted as appropriate.

2.8. Removal/Disposal (250208)

2.8.1. FASAB TR 14 defines removal from service as an event that terminates the use of a general equipment asset. Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or identification as excess to mission needs. Removals from service should be considered other than permanent unless (1) the asset’s use is terminated and (2) there is documented evidence of the DoD Component’s decision to permanently remove the asset from service (e.g. by selling,
donating, or demolishing the asset). If only one of the two business events has occurred, permanent removal from service has not occurred (i.e., the removal is considered other than permanent).

2.8.2. If an asset’s normal use is terminated (i.e., it no longer provides service in the operations of the entity) but the DoD Component has not yet decided to permanently remove the asset from service, the removal from service must be accounted for as other than permanent. Other than permanent removal from service is evidenced by activities such as continuing low-level maintenance to sustain the asset in a recoverable status or until reutilization efforts are exhausted. For example, assets that have been removed from service and sent to a depot for temporary storage with the intent to use the assets again in the future and other assets taken out of service on a temporary basis are considered other than permanently removed from service. There is no change in the reported value for assets that have been other than permanently removed from service and the assets must continue to be depreciated.

2.8.3. If (1) an asset’s use is terminated and (2) the DoD Component has documented its decision to permanently remove the asset from service, the removal from service must be accounted for as permanent. Permanent removal from service is evident from the DoD Component’s documented decision to dispose of an asset by selling, scrapping, recycling, donating, or demolishing the asset. For example, assets that are part of a Base Realignment and Closure or are declared as excess under a special legislation are considered permanently removed from service. The recorded cost as well as the accumulated depreciation of an asset permanently removed from service must be removed from the accounts in which they are reported, and the asset must be recorded at its NRV in general PP&E Permanently Removed But not Yet Disposed (USSGL Account 199500). USSGL Account 199500 is defined therein as the NRV of general PP&E that is permanently removed from service but not yet disposed and is reclassified in accordance with FASAB TR 14, paragraphs 10 and 12. NRV is the estimated amount that can be recovered from disposing of the asset less estimated costs of completion, holding, and disposal. Any difference between the net book value of the asset and its expected NRV must be recognized as a gain or loss. The expected NRV should be evaluated at the end of each fiscal year and any change in NRV should be recognized as a gain or loss. Assets permanently removed from service are no longer depreciated.

2.8.4. When an asset is disposed of (e.g., by selling, scrapping, recycling, donating, or demolishing the asset) the asset must be written off and the difference between any disposal proceeds and the asset’s net book value must be recognized as a gain or loss. Disposals of general equipment will be conducted in accordance with DoDM 4160.21. The disposal start date is the calendar date of a legally enforceable and recognizable obligation to complete the disposal action. For demolitions, this represents the demolition contract’s start date. For transfers to a non-DoD entity and sales, this represents the date on which the instrument is endorsed or operation is ceased, whichever comes later. For natural disasters, this represents the actual date of the incident if the asset is a complete loss.
2.8.5. Absent separate contract terms and conditions for GFP and CAP disposition, and provided the property was not reutilized, transferred, or otherwise disposed of, the contractor, as directed by the Plant Clearance Officer or authorizing official, must use Standard Form 1428, Inventory Disposal Schedule or electronic equivalent, to identify and report:

2.8.5.1. GFP that is no longer required for performance of the contract;

2.8.5.2. CAP, which is no longer required for performance of the contract; and

2.8.5.3. Termination Inventory.

2.8.6. Plant clearance officers follow the direction of FAR Subpart 45.6, DFARS Subpart-245.6, and DFARS PGI 245.602-70. Following the plant clearance officer’s acceptance of an inventory disposal schedule, the property must be screened for reutilization DoD-wide. Surplus personal property with commercial value that is processed through the reutilization screening process without success may be sold. Proceeds of any sale of surplus property are to be credited to the Treasury as miscellaneous receipts, unless otherwise provided by statute or the contract or any subcontract thereunder authorizing the proceeds to be credited to the price or cost of the work (40 U.S.C. § 571 and § 574, FAR 45.604-3).

3.0 ADDITIONAL CONSIDERATIONS (2503)

3.1 Use of Cancelled Treasury Account Symbol (250301)

3.1.1. The Treasury’s Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) is a data collection system that replaced the reporting functionalities of Federal Agencies Centralized Trial-Balance System I and II, Intragovernmental Fiduciary Confirmation System, and Intragovernmental Reporting and Analysis System as the primary means for DoD Components to report their trial balance data to the Treasury. Capitalized assets are required to be reported and remain in GTAS after the original purchasing Treasury Account Symbol (TAS) has expired and been cancelled. If a capitalized asset has not been moved to a cancelled (“C”) TAS as described in 250301.B; GTAS will provide a “C” TAS on the GTAS Super Master Account File (SMAF) for each fund family represented on the SMAF. The system generated “C” TAS will have three components: the three-digit agency identifier, availability type “C”, and a four-digit main account.

3.1.2. All DoD Components must use the “C” availability type TAS to report capitalized assets. Assets may be moved to a “C” TAS at any time from the purchase date to the date the original purchasing fund cancels. (Refer to the TFM Volume 1, Part 2, Chapter 4700 for additional information.)
3.1.3. To transfer an asset to a “C” TAS:

3.1.3.1. Use USSGL account transaction E510 to transfer out the asset from the purchasing fund account.

3.1.3.2. Use USSGL account transaction E606 to transfer in the asset into the appropriate “C” TAS.

3.2 Supporting Documentation (250302)

Entries to record financial transactions in accounting system general ledger accounts and/or the APSR and/or other systems must:

3.2.1. Be supported by source documents that reflect all transactions affecting the Component’s investment in the general equipment.

3.2.1.1. All general equipment acquisitions, whether by purchase, transfer from other agencies, donation, or other means, must be supported as of the date of delivery and acceptance (including acceptance where constructive receipt has occurred) by the DoD Component. The documents listed in Table 25-3, where applicable, must be readily available to support the changes in asset value or physical attributes as a result of new acquisition or capital improvement.
Table 25-3. **Examples of Supporting Documentation for General Equipment Acquisition**
(Note: These examples may not be all inclusive for all circumstances.)

|                                 | 3. Indirect Costs incurred internally by the gaining activity that relate to the new acquisition or capital improvement. |
| Acceptance/Receipt (Acceptance of New Acquisitions and receipt or requisition of equipment items) | Such as, but not limited to: 1. **DD Form 250**, Material Inspection and Receiving Report;  
|                                 | 2. General Services Administration *(GSA)* **1334**, Request for Transfer of Excess Real and Related Personal Property;  
|                                 | 3. Executed acquisition document and appraisal results for the donated assets;  
|                                 | 4. Signed lease for leased property;  
|                                 | 5. Executed reversionary document;  
|                                 | 6. Transfer letter and documents for transferred assets to include **DD Form 1348-1A**, Issue Release/Receipt Document; and equivalent Electronic Turn-In Document;  
|                                 | 7. Receiving report, e.g., iRAPT receiving report;  
|                                 | 8. **DD Form 1149**, Requisition and Invoice/Shipping Document;  
|                                 | 9. **DD Form 1150**, Request for Issue/Transfer/Turn-In;  
|                                 | 10. **DD Form 1155**, Order for Supplies or Services. |
| Project Closeout                | Such as, but not limited to a final DD 1354 with associated source documentation retained by the responsible party. |
3.2.1.2. All disposals or retirements must be supported as of the date the general equipment leaves the custody of the DoD Component to provide an adequate audit trail for the disposal of the asset. The execution of certain disposal events will generate financial or administrative accountability transactions. These documents, where applicable, must be readily available to support disposals:

3.2.1.2.1. ‘Declaration of excess’ document;

3.2.1.2.2. Approval documentation;

3.2.1.2.3. Original acquisition documents;

3.2.1.2.4. Legal instruments (such as a contract) to indicate legal obligation to dispose of an asset;

3.2.1.2.5. Document showing the disposal start date and disposal end date;

3.2.1.2.6. Receipt documentation; and

3.2.1.2.7. Transfer documents for transferred assets or as otherwise stated.

3.2.1.3. Documents that support the recorded cost of general equipment assets must be retained by the DoD Component in accordance with the requirements contained in Volume 1, Chapter 9 or as otherwise stated. Documentation (original documents and/or hard and electronic copies of original documentation) must be maintained in a readily available location during the applicable retention period to permit the validation of information pertaining to the asset such as the purchase cost, purchase date, and cost of improvements. The documentation must also be linked to the appropriate unique identifier(s). Supporting documentation may include, but is not limited to, the documentation as outlined in this subparagraph.

3.2.2. Include sufficient information indicating the physical quantity, location, and unit cost of the general equipment. The APSR and/or other systems must be designed to be of maximum assistance in making procurement and utilization decisions, including decisions related to identifying potential excess general equipment that may be available for reuse, transfer to other DoD Components, or made available for disposal in accordance with current DoD regulations and other regulatory requirements.

3.2.3. Enable periodic, independent verification of the accuracy of the accounting and APSR and/or other systems through periodic physical counts/inventories of general equipment (existence and completeness—“book to floor and floor to book”). Such periodic inventories also must include reconciling the APSR and/or other systems with the general ledger accounts and physical counts. Personal hand receipt self-validations are not acceptable for meeting the independent verification of physical inventory requirements (see DoDI 5000.64).
3.2.4. Identify and classify general equipment that was capitalized, recorded in the APSR and accounting system, and reported in the financial statements.

3.2.4.1. All DoD Components (i.e., Military Departments, Washington Headquarters Service and Other Defense Organizations) must reconcile their APSR to their financial statements (or to their trial balance if financial statements are not required to be prepared) on a quarterly basis.

3.2.4.2. All DoD Components funding CIP must reconcile their recorded CIP balances on a quarterly basis with any service provider/contractor working on the CIP. CIP should reflect the value associated with the actual progress of work completed which may be more or less than amounts invoiced to the DoD Component as of the quarter end.

3.2.5. Be based on the same documents, to ensure that entries to the financial accounting/reporting and APSR are the same. This will ensure that the APSR is integrated and subsidiary to the financial accounting system and that such records can be reconciled with the accounting system.

3.2.6. Include documents used to accumulate the cost of construction or developmental projects. Each document must link to the appropriate asset unique identifier. For a listing of those costs that may be incurred during the construction, see Annex 1.

3.2.7. Include all general equipment possessed by the DoD (to include property held by others) and general equipment of others held by DoD through seizure, forfeiture, loss, or abandonment.

3.2.8. Provide information to identify and account for leased general equipment, regardless of whether the general equipment was acquired by a capital lease or operating lease or whether the value of the general equipment exceeds DoD capitalization thresholds. Refer to DoDI 5000.64 for accountability requirements for general equipment.

3.2.9. Provide information to identify and account for capitalized improvements to general equipment.

3.3 Physical Inventories of General Equipment (250303)

DoD Components must perform periodic physical inventories of general equipment in accordance with DoDI 5000.64.

3.4 DM&R (250304)

3.4.1. Description

3.4.1.1. Per SFFAS 42, DM&R is defined as maintenance and repairs that were not performed when they should have been or were scheduled to be and which are put off or delayed to a future period.
3.4.1.2. Maintenance and repairs are activities directed toward keeping fixed assets in an acceptable condition. Maintenance and repairs include preventive maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain the asset.

3.4.1.3. Maintenance and repairs exclude activities aimed at expanding the capacity or capability of an asset or otherwise upgrading it to serve needs different from, or significantly greater than its current use.

3.4.2. Measurement

3.4.2.1. Amounts for DM&R may be measured using condition assessment surveys, life-cycle cost forecasts, or other methods that are similar to the condition assessment survey or life-cycle costing methods.

3.4.2.1.1. Condition assessment surveys are periodic physical inspections of general equipment to determine their current condition and estimated cost to correct any deficiencies. DoD Components should assess the condition of general equipment assets as a function of their day-to-day operations and document condition through periodic assertion/assessment statements provided by their field office managers. DoD Components also need to evaluate the cost and benefits of doing condition assessment surveys. Such things as cycling the assessments on a rotating basis, the frequency of assessments (i.e., every three or five years) and the criteria and methodology used for making such assessments need to be considered.

3.4.2.1.2. Life-cycle costing is an acquisition or procurement technique, which considers operating, maintenance, and other costs in addition to the acquisition cost of assets. Since it results in forecasts of maintenance and repairs expense, these forecasts may serve as a basis against which to compare actual maintenance and repairs expense to arrive at an estimate of DM&R.

3.4.2.2. DoD Components should determine what condition standards are acceptable and which DM&R measurement methods to apply. Once determined, condition standards and measurement methods must be consistently applied unless the DoD Component determines that changes are necessary. Changes deemed necessary by the DoD Component must be accompanied by an explanation documenting the rationale for the change(s) and any related impact the change(s) will have on the DM&R estimates.

3.4.2.3. DM&R must be measured for capitalized and non-capitalized general equipment and fully depreciated general equipment. In addition, DM&R must be measured for inactive and/or excess general equipment to the extent that it is required to maintain the general equipment in acceptable condition (e.g., to comply with existing laws and regulations or to preserve value pending disposal). In addition, DM&R must measure funded maintenance and repairs that have been delayed for a future period as well as unfunded maintenance and repairs.
3.4.3. RSI

DoD Components who report general equipment must report material amounts of DM&R as RSI to the financial statements (see Volume 6B, Chapter 12). At a minimum, this information must be presented as RSI for all general equipment:

3.4.3.1. Estimates of the beginning and ending balances of DM&R for each major category of equipment;

3.4.3.2. A summary of the DoD Component’s maintenance and repairs policies and a brief description of how they are applied (i.e., method of measuring DM&R);

3.4.3.3. Policies for ranking and prioritizing maintenance and repair activities;

3.4.3.4. Factors the Components consider in determining acceptable condition standards;

3.4.3.5. Whether DM&R relates solely to capitalized general equipment or also to amounts relating to non-capitalized or fully depreciated general equipment;

3.4.3.6. Capitalized general equipment for which the DoD Component does not measure and/or report DM&R and the rationale for the exclusion; and

3.4.3.7. If applicable, explanation of any significant changes to

3.4.3.7.1. DM&R amounts from the prior year; and

3.4.3.7.2. The policies and factors subject to the reporting requirements established in subparagraphs 250304.E.2 through 250304.E.6.

3.4.4. Weapon Systems

Maintenance and repair of weapon systems is accomplished by two different, yet complementary components—depot level maintenance and repair activities and field level maintenance and repair activities. The term “field level maintenance and repair” includes all non-depot level maintenance and repair activities (e.g., organizational, intermediate, and regional). DoD Components should determine whether the year-end amounts of field level DM&R on weapon systems are material when compared to their component depot level amounts of DM&R. This determination should be updated and documented on an annual basis. Material amounts of weapon systems field level DM&R should be reported in the financial statements. Materiality is defined in subparagraph 250201.G.

3.4.4.1. Depot level maintenance and repair includes: major repair, overhaul, or complete rebuilding of weapon systems, end items, parts, assemblies, and subassemblies; manufacture of parts; technical assistance; and testing. Material amounts of depot level deferred maintenance due to the unavailability of funding and/or capacity constraints have been historically
reported through the DoD’s budget process by the Military Departments. Such amounts are provided annually to the Congress in the President’s Budget submission and also satisfy the intent of the federal accounting standard definition. The same budget submission amounts must be reported in the financial statements of the Military Departments.

3.4.4.2. Field level maintenance and repair comprises maintenance and repair activities at lower organizational levels than depot level. The Military Departments may or may not separate this level of maintenance and repair into intermediate and organizational maintenance and repair activities when describing the field level maintenance and repair structure and capability.

3.4.4.2.1. Intermediate field level maintenance and repair includes limited repair of commodity oriented components and end items; job shop, bay and production line operations for special mission requirements; repair of printed circuit boards; software maintenance; and fabrication or manufacture of repair parts, assemblies, and components. The intermediate maintenance and repair mission is to sustain the combat readiness and mission capability of supported activities by providing quality and timely materiel support at the nearest location with the lowest practical resource expenditure.

3.4.4.2.2. Organizational field level maintenance and repair is normally performed by an operating unit on a day-to-day basis in support of its own operations. The organizational maintenance and repair mission is to maintain assigned equipment by performing functions such as inspections, servicing, preventive maintenance, and corrective maintenance.

3.5 Reporting Requirements (250305)

3.5.1. DoD Components with general equipment should reference a note on the Balance Sheet that discloses information about the reported general equipment assets. Note 1 of the financial statements should include a disclosure related to the DoD Component’s general equipment reporting accounting policy. DoD Components should state that they are financially reporting property that they have accountability for according to DoDI 5000.64. Additionally, DoD Components should disclose that they may use assets to complete their mission which are financially reported by another DoD Component. See Volume 6B, Chapter 10 for the specific reporting requirements.

3.5.2. DoD Components must disclose in the notes to the financial statements those instances where they are using general equipment provided by a host nation/foreign government without reimbursement by DoD to the host nation/foreign government, as applicable, that:

3.5.2.1. The DoD Component is utilizing general equipment provided by and owned by a host nation/foreign government in its operations outside of the United States without reimbursement by DoD to the host nation/foreign government and that there are no amounts recorded in the financial statements related to these assets.
3.5.2.2. The general nature of the agreement with the host nation/foreign government. It is not intended or recommended that the geographic location of the foreign government/host nation be disclosed.

3.6 Environmental Liabilities/Cleanup Costs (250306)

The accounting policy for environmental liabilities/cleanup costs pertaining to general equipment is contained in Chapter 13.
(Costs to be accumulated for construction items)

<table>
<thead>
<tr>
<th>Cost Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cost of contract work</td>
<td>Amounts paid for work performed under contract, as well as any incentive fees paid to contractors to reward performance goals.</td>
</tr>
<tr>
<td>Direct cost of labor</td>
<td>The direct cost of labor and all associated fringe benefits in connection with the construction project. Includes both military and civilian labor costs.</td>
</tr>
<tr>
<td>Direct cost of materials and supplies</td>
<td>The purchase price, the cost of inspection, and loading assumed by the carrier.</td>
</tr>
<tr>
<td>Cost of Supervision, Inspection, and Overhead</td>
<td>Support associated with the administration of contracts for facility projects. May include contract award, payments, inspections, material testing, and other actions taken during contract execution.</td>
</tr>
<tr>
<td>Cost of transportation</td>
<td>Amounts paid for transportation of workers, materials, and supplies in connection with the construction project.</td>
</tr>
<tr>
<td>Cost of handling and storage</td>
<td>Amount paid for packaging and storing the materials and supplies and equipment used in the construction project.</td>
</tr>
<tr>
<td>Cost of legal and recording fees</td>
<td>Legal fees incurred to bring the asset to its intended use (e.g., title or recording fees).</td>
</tr>
<tr>
<td>Cost of architecture and engineering studies</td>
<td>Amounts paid for engineering, architectural, and other outside services for designs, plans, specifications, and surveys.</td>
</tr>
<tr>
<td>Cost of government-furnished property</td>
<td>An appropriate share of the cost of the government-furnished equipment and material and facilities used in construction work.</td>
</tr>
<tr>
<td>Cost of donated assets</td>
<td>The fair value of facilities and equipment donated to the government, as authorized by a special legislation, in connection with the construction project.</td>

</table>

1.0 Establishing Opening Balances for General Equipment (A20101)

The alternative valuation methodologies for establishing opening balances for general equipment including Government-Furnished Property (GFP), Contractor-Acquired Property (CAP) and Construction-in-Progress (CIP) for Equipment are:

1.1 The alternative valuation methods for establishing opening balances for Property, Plant and Equipment described in Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standards (SFFAS) 50, “Establishing Opening Balances for General Property, Plant and Equipment: Amending Statement of Federal Financial Accounting Standards (SFFAS) 6, SFFAS 10, SFFAS 23, and Rescinding SFFAS 35” is available only once to each reporting entity. Therefore, prior to the establishment of opening balances for general equipment, including GFP, CAP and CIP for equipment (general equipment), Department of Defense (DoD) Components must validate that they are prepared to account for and comply with the recognition, measurement, presentation and disclosure requirements for general equipment at historical cost in accordance with FASAB SFFAS 6, as amended, “Accounting for Property, Plant and Equipment.”

1.2 If historical cost, as described in SFFAS 6 has not already been recorded and included in financial statements that have been audited by an Independent Public Accountant and received an unmodified (“clean”) opinion, deemed cost will be used as a surrogate to establish opening balances for general equipment. In this context, deemed cost is an amount used as a surrogate for initial amounts that otherwise would be required by SFFAS 6 to establish opening balances. Deemed cost may be based on any one of, or a combination of, allowable valuation methods such as cost of similar assets at the time of acquisition, contract based estimates and budget based estimates. Once established using deemed cost, opening balances will be used as a surrogate for the initial amounts that would have existed had an SFFAS 6 compliant valuation method been used.

1.3 When evaluating general equipment for the purpose of establishing opening balances, DoD Components should apply the applicable capitalization threshold to their entire population of general equipment retroactively, irrespective of the capitalization thresholds in effect for years prior to October 1, 2013. When doing so, DoD Components need to take the appropriate steps to ensure all relevant prior period adjustments and note disclosures are included in their annual financial statements in accordance with SFFAS 50. As part of their evaluation, DoD Components should not simply value assets already recorded above the capitalization threshold. DoD Components should perform additional analytical procedures to identify any assets that have been improperly capitalized or expensed. Examples of this type of review can include searching for equipment with values of $0 or $1 which are indications of erroneous values. An additional example can include equipment for which an additional zero was added in error, incorrectly placing the asset above the capitalization threshold.
1.4 When establishing opening balances using Deemed Cost:

1.4.1. DoD Components will calculate a gross value and an accumulated depreciation value for General Equipment assets. Both the gross value Deemed Cost and accumulated depreciation Deemed Cost will be recorded in the accounting records. The difference between the Net Book Value (NBV) of the Deemed Cost on the opening Balance Sheet of the current fiscal year presented and the existing/historical NBV of the general equipment as of the ending Balance Sheet of the previous fiscal year, is considered a prior period adjustment. This prior period adjustment represents a change in accounting principle in accordance with paragraph 13 of FASAB SFFAS 21, “Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources.” If any depreciation based on the original historical equipment value has been recorded in the year in which the prior period adjustment for Deemed Cost is recorded, that depreciation expense should be reversed and depreciation for the Deemed Cost value should be recorded.

1.4.2. Any adjustment must be properly documented and supported to assist ongoing audit efforts including retaining documentation of the existing/historical equipment value in the Accountable Property System of Record (APSR) and documentation supporting the Deemed Cost value. The existing/historical gross value and accumulated depreciation of the general equipment will need to be removed from the APSR and be replaced with the new gross value and accumulated depreciation for Deemed Cost.

2.0 Financial Statement Disclosure Requirements (A20102)

DoD Components who apply the deemed cost methodology to adjust their opening general equipment balances, must disclose in their financial statements that an alternative valuation method was applied in establishing their opening balances and describe the method used in the first reporting period in which the reporting entity makes an unreserved assertion that its financial statements, or one or more line items, are presented fairly in accordance with Generally Accepted Accounting Principles. An unreserved assertion is an unconditional statement. No disclosure of the distinction or breakout of the amount of deemed cost of general equipment included in the opening balances is required.

3.0 Deemed Cost Methodology (A20103)

3.1 When a Component cannot apply the initial amount measurement approach (historical cost) outlined in SFFAS 6, it is acceptable to estimate the initial amounts (historical cost) to establish the opening balances for general equipment. Estimates should be based on any one or a combination of the following allowable valuation methods:

3.1.1. Replacement Cost;

3.1.2. Fair Value;

3.1.3. Cost of similar assets at the time of acquisition;
3.1.4. Contract based estimates; or

3.1.5. Budget based estimates.

3.2 DoD Components must estimate the historical cost for establishing opening balances of general equipment based on a deemed cost method if historical costs cannot be adequately supported with appropriate documentation as described in paragraph A20104. The DoD Components must consider the deemed cost methods described in subparagraph A20103.B.1 through A20103.B.3 and select the approach that will be most efficient in producing an auditable value. DoD Components that anticipate substantial use of replacement cost or fair value methodologies for equipment valuation must contact the Office of the Under Secretary of Defense (Comptroller)/Office of the Deputy Chief Financial Officer and the Office of the Deputy Assistant Secretary of Defense for Logistics prior to committing significant resources to these methods.

3.2.1. Cost of Similar Assets at the Time of Acquisition. This method is frequently used for commercial off-the-shelf general equipment, but may also be used for other general equipment, such as weapon systems when appropriate. When using this method, DoD Components must:

3.2.1.1. Work closely with other organizations to gather the information needed to support the valuation when using general equipment from another organization as a comparable asset;

3.2.1.2. Exercise due care to ensure that the source value is supported. If the comparable asset is not properly supported, the subject general equipment is also not properly supported; and

3.2.1.3. Apply appropriate price indices to estimate the cost of the general equipment in the period when it was placed into service if the comparable general equipment has a different in-service date. See FASAB Federal Financial Accounting and Auditing Technical Release 13, “Implementation Guide for Estimating the Historical Cost of General Property, Plant & Equipment,” for additional details for using indices to inflate or deflate costs.

3.2.2. Contract Based Estimates. This methodology involves valuing general equipment using the pricing data included in contracts. A complete understanding of the acquisition program, including the structure of all related contracts is required to implement this methodology. DoD Components must align activities and costs of general equipment with relevant accounting standards to isolate the costs that are to be capitalized versus those that are to be expensed (e.g., research and development costs, factory training). When using this methodology, DoD Components must consider the complexity of multiple contracts used to develop or acquire the general equipment assets. Steps for performing contract based estimates include:

3.2.2.1. Identification by Program Management Offices (PMOs) of all contracts for the acquisition or modification of the general equipment. Relevant contracts include those that have a financial impact on the value of the asset and/or establish its placed-in-service date;
3.2.2.2. Working with Financial Managers, Procurement Contracting Officers, and PMOs will review all line items in the contract to identify costs that will be included in the capitalized acquisition costs and the costs that will be excluded;

3.2.2.3. Compiling documentation supporting the valuation including copies of relevant contract documents; and

3.2.2.4. Documenting the process and results.

3.2.3. Budget Based Estimates. This methodology utilizes information included in DoD Component budget exhibits to estimate the value of the general equipment. The key requirement is that the available procurement budget detail must allow DoD Components to clearly associate budgeted amounts with the general equipment end items. When using this methodology DoD Components must consider that acquisition programs can span many years; and, not all costs associated with the budgeted amount should be capitalized. Steps for performing budget based estimates include:

3.2.3.1. Reviewing the relevant President’s Procurement Budget documentation for the general equipment acquisition program to determine whether the budget has adequate detail to support the budget valuation methodology. Specifically, determining whether the budget detail provides visibility of the various cost estimates comprising the general equipment acquisition program (e.g., end items versus spares);

3.2.3.2. Identifying costs and determining which costs should be included in the capitalized costs of the general equipment;

3.2.3.3. Compiling documentation supporting the valuation including copies of the referenced budget exhibits; and

3.2.3.4. Documenting the process and results.

4.0 Historical Cost for Commercial Off-the-Shelf General Equipment (A20104)

4.1 Some general equipment is acquired “off-the-shelf” and not developed as part of a program. This includes commercially available items acquired via Simplified Acquisition Procedures (see Federal Acquisition Regulation (FAR) Part 13); Sealed Billing (see FAR Part 14); or Contracting by Negotiation (see FAR Part 15). Examples of general equipment in this category include:

4.1.1. Commercial vehicles;

4.1.2. Heavy-duty construction equipment;

4.1.3. Railroad engines;

4.1.4. Dockside Cranes;
4.1.5. Depot machinery (e.g., computer driven lathes);

4.1.6. Computer hardware; and

4.1.7. Medical equipment.

4.2 The procurement of general equipment following these existing acquisition processes, require obtaining an approved purchase request, following the acquisition procedures in accordance with either FAR Part 13, FAR Part 14, or FAR Part 15, receiving and accepting the general equipment, receiving a vendor invoice, and submitting payment for the invoice. The acquisition cost for these assets is determined from the invoice amount and may also be shown on the receiving report. If this supporting documentation is readily available, valuing these assets based on actual historical cost is encouraged but not required to establish opening balances. The DoD Component must determine the most efficient and cost effective approach to assign and support auditable values for general equipment opening balances.

5.0 CIP for Equipment (A20105)

5.1 Capital expenditures or progress payments paid to contractors, coinciding with the portion of the work completed for general equipment being manufactured or constructed, should be recorded in a CIP account. The CIP balance is included in the notes to the financial statements (generally Note 10) and is included in the general equipment line of the Balance Sheet, and must therefore be included in the general equipment opening balance. As a result, each DoD Component’s Financial Management Community, working with their Acquisition Community, must establish a CIP balance for each existing/ongoing acquisition program with outstanding general equipment deliverables at the date for which the opening balance is established. To create the CIP balances, DoD Components must determine capital versus non-capital costs (if the expected value of the completed general equipment asset will be equal to or greater than the applicable capitalization threshold and it will have a useful life of two years or more then it is a capital cost and should be accumulated in CIP). Where possible, transaction detail should be evaluated to identify costs that need to be capitalized. The opening balance for CIP should represent the amount disbursed to contractors (capital costs only) from program inception less the acquisition cost of general equipment delivered and capitalized. The difference between the two amounts should be the CIP opening balance. The CIP opening balance formula is:

\[
\text{CIP Opening Balance} = \text{Total Capital Costs Paid to Contractor} - \text{Total Amount of General Equipment Capitalized based on Deemed Cost}
\]

5.2 For some contract types that include contract finance payments, the Component must reconcile the payments to actual progress completed by the Contractor. If the CIP balance based on the formula in this subparagraph surpasses progress on the contract and is material, the DoD Component must move the appropriate amount from CIP into the Advances account (USSGL 141000).
5.3 CIP Go Forward Process – End State Target Environment

5.3.1. DoD Components must be able to capture capital costs paid to contractors and accumulate them (where they meet the criteria for capitalization) in CIP. DoD Components must maintain reasonable estimates of per unit costs which will be used to relieve CIP and capitalize the resulting general equipment asset. Costs which should be capitalized include other direct and indirect costs such as program management costs. These costs need to be captured as incurred, recorded in CIP, and allocated to the end item value. DoD Components need to determine how they will capture actual program management costs as well as other costs and the method for how they will allocate these costs.

5.3.2. Advance Payments, as defined in FAR 32.202-2, are to be recorded in an advance account until the end items are delivered. All other contract financing payments must be recorded as CIP. CIP must reflect actual progress on the contract. To ensure that CIP amounts reflect actual progress on the contract, DoD Components must perform a periodic reconciliation (at least quarterly) between amounts recorded in CIP and the actual progress on the contract. This may require working with the contractor to perform the reconciliation. Costs incurred in excess of finance payments should be reported as a liability. Figure A2-1 illustrates the CIP go forward process.

Figure A2-1. CIP Go Forward Process

Note: Asset acquisition cost based on financial transactions and cost allocation (SFFAS 6)
5.4. Programs and Contracts in Effect as of the Opening Balance

5.4.1. Figure A2-2 illustrates the process for capturing actual capital costs paid to a contractor and accumulating them in a CIP account for existing programs with remaining deliverable equipment end items. Capital costs will be relieved from CIP as the assets are delivered. The value of an asset constructed after the opening balance can be based upon a reasonable estimate of the per unit cost in accordance with SFFAS 6 and SFFAS 4, “Managerial Cost Accounting Standards and Concepts.” Reasonable estimates may be based on established methods that will approximate historical cost such as contracts, budget documents, engineering and acquisition documents, or reports reflecting amounts to be expended. Figure A2-2 also illustrates the allocation of estimates based on expenditures.

Figure A2-2. Allocation of Estimates Based on Expenditures

5.4.2. Some assets will be under construction at the time the opening balance is established. The value assigned to these assets will consist of two parts. One part will be the portion of the asset under construction as of the opening balance. The value of this portion will be based on how it was estimated when initially calculated and recorded as a Deemed Cost. The second part of the value will be the portion of the asset constructed after the opening balance. The value of this portion of the asset will be recorded in accordance with SFFAS 4 and SFFAS 6 as described in subparagraph A20105.C. The resulting value of the asset that will be debited to the general equipment account and credited to the CIP account, upon completion of the construction when the asset is available for use, will be the sum of both parts.

1.0 Construction-In-Progress (CIP) (A30101)

1.1 CIP Example: The Air Force, Missile Defense Agency (MDA), and National Geospatial-Intelligence Agency (NGA), fund the construction of a satellite to be launched into space. Each entity will report their portion of CIP in their CIP accounts until a depreciable asset is recognized. The Air Force is the accountable entity under DoD Instruction (DoDI) 5000.64 once the asset is placed in service. When the satellite is placed into service all funding entities will recognize the capitalized costs of the satellite and transfer the capitalized costs to their Equipment account. MDA and NGA will then transfer the costs in their Equipment account to the Air Force’s Equipment account. The Air Force will subsequently record depreciation for the full cost of the asset.

1.2 Table A3-1 illustrates the general ledger (G/L) entries that are required to liquidate CIP and recognize a depreciable asset.

2.0 In-Service Assets (including weapon systems and Government-Furnished Property) (A30102)

2.1 Following are three illustrative examples for In-Service Assets:

2.1.1. The Army is conducting an inventory of capital assets and identifies a Humvee that was not previously reported on their Accountable Property System of Record (APSR). They are unable to locate any procurement documentation for the asset, but the Army has been using and maintaining the asset and will assume accountability for the asset in accordance with DoDI 5000.64. Because the Army has accountability for the asset it will also be responsible for the financial reporting of the asset.

2.1.2. The Defense Health Program (DHP) funds the acquisition of a magnetic resonance imaging (MRI) machine, and records it in its APSR as the accountable entity in accordance with DoDI 5000.64. The MRI machine will be located at a Navy hospital, but will remain in DHP’s APSR. DHP will have financial reporting responsibility for the asset. To facilitate an information request from an auditor of the Navy or DHP on the MRI machine, the Navy and DHP must have processes in place that will allow them to easily demonstrate the designation of the responsible reporting entity based on the policy in Chapter 25.
2.1.3. The US Special Operations Command (USSOCOM) funds the acquisition of a mine resistant ambush protected (MRAP) vehicle and records it in its APSR as the accountable entity in accordance with DoDI 5000.64. The MRAP is later issued to an Army special operations unit, where it is added to the Army’s APSR. USSOCOM transfers accountability and financial reporting responsibility to the Army at the time of issuance. All required financial information and supporting documentation should be provided to the Army to support their financial reporting.

2.2 Table A3-2 illustrates the G/L entries to be recorded if a transfer is required to implement the policy in Chapter 25 or if a transfer is needed after an asset is placed in service.

3.0 In-Service Capital Improvements (A30103)

3.1 Once capital improvements are placed in service they become a part of the total recorded value of the depreciable asset (regardless of whether or not the asset is tracked or depreciated separately from the base asset). Following are two illustrative examples for capital improvements:

3.1.1. The Air Force provides USSOCOM a C-130 for use in its operations. USSOCOM makes an improvement to convert it to an AC-130 aircraft. Because the Air Force is responsible for the financial reporting of the base asset, it is also responsible for the financial reporting of any capital improvements to the base asset.

3.1.2. An F-18E Super Hornet (i.e., the base asset) that was the financial reporting responsibility of the Navy received a capital improvement package that significantly increased its capacity to perform its mission. The improvement package was added to a Navy asset so the Navy is responsible for the financial reporting of the capital improvement.

3.2 Table A3-3 illustrates the G/L entries to be recorded if a transfer is required to implement the policy in Chapter 25. If the transfer is not completed during the month the improvement was placed in service and depreciation has been incurred, the accumulated depreciation will transfer with the asset.

*CHAPTER 26

ASSETS UNDER CAPITAL LEASE

1.0 GENERAL (2601)

1.1 Purpose (260101)

This chapter prescribes Department of Defense (DoD) accounting policy for assets under capital lease, which is a subset of General Property, Plant and Equipment (PP&E). Unless otherwise stated, this chapter is applicable to all DoD Components, including Working Capital Fund (WCF) activities. Budgetary accounting treatment of capital leases and lease purchases is found in the Office of Management and Budget Circular A-11, “Preparation, Submission, and Execution of the Budget,” Appendix B and does not fall under the scope of this chapter.

*1.2 Authoritative Guidance (260102)

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.2. FASAB SFFAC 6, "Distinguishing Basic Information, Required Supplementary Information and Other Accompanying Information";

1.2.3. FASAB SFFAC 7, "Measurement of the Elements of Accrual-Basis Financial Statements in Periods After Initial Recording";

1.2.4. FASAB Statement of Federal Financial Accounting Standards (SFFAS) 1, "Accounting for Selected Assets and Liabilities";

1.2.5. FASAB SFFAS 3, "Accounting for Inventory and Related Property";

1.2.6. FASAB SFFAS 4, "Managerial Cost Accounting Standards and Concepts";

1.2.7. FASAB SFFAS 5, "Accounting for Liabilities of The Federal Government";

1.2.8. FASAB SFFAS 6, "Accounting for Property, Plant, and Equipment";

1.2.9. FASAB SFFAS 10, "Accounting for Internal Use Software";

1.2.10. FASAB SFFAS 29, "Heritage Assets and Stewardship Land";
1.2.11. FASAB SFFAS 40, "Definitional Changes Related to Deferred Maintenance and Repairs: Amending Statement of Federal Financial Accounting Standards 6, Accounting for Property, Plant, and Equipment"

1.2.12. FASAB SFFAS 42, "Deferred Maintenance and Repairs: Amending Statements of Federal Financial Accounting Standards 6, 14, 29 and 32;"

1.2.13. FASAB SFFAS 44, "Accounting for Impairment Of General Property, Plant, and Equipment Remaining in Use"

1.2.15. FASAB Technical Release (TR) 13, "Implementation Guide for Estimating the Historical Cost of General Property, Plant and Equipment"

1.2.16. FASAB TR 14, "Implementation Guidance on the Accounting for the Disposal of General Property, Plant & Equipment"

1.2.17. FASAB TR 15, "Implementation Guidance for General Property, Plant, and Equipment Cost Accumulation, Assignment and Allocation"

1.2.18. DoD Directive 5110.4, "Washington Headquarters Services (WHS)"

1.2.19. DoD Instruction (DoDI) 4165.14, "Real Property Inventory (RPI) and Forecasting"; and

1.2.20. DoDI 5000.64, "Accountability and Management of DoD Equipment and Other Accountable Property".

2.0 ACCOUNTING FOR ASSETS UNDER CAPITAL LEASE (2602)

*2.1 Definitions (260201)

A lease conveys the use of an asset or part of an asset (such as part of a building) from one entity, the lessor, to another, the lessee, for a specified period of time in return for rent or other compensation. Leases can be either capital or operating leases as described in this chapter. The asset being leased under a lease, which meets the criteria of a capital lease, is capitalized and depreciated. The asset being leased under a lease that does not meet the criteria of a capital lease is classified as an operating lease, the asset is not capitalized and lease payments are expensed over the term of the lease.

2.1.1. Bargain Purchase Option. A bargain purchase option is a provision allowing the lessee to purchase the leased property for a price, which is sufficiently lower than the expected fair
value of the property at the date the option becomes exercisable, and where exercise of the option appears, at the inception of the lease, to be reasonably assured.

2.1.2. Bargain Renewal Option. A bargain renewal option is a provision allowing the lessee, at their option, to renew the lease for a rental sufficiently lower than the fair rental of the property at the date the option becomes exercisable, and where exercise of the option appears, at the inception of the lease, to be reasonably assured.

2.1.3. Capital Lease. Capital leases are leases that transfer substantially all the benefits and risks of ownership to the lessee. Lessees must classify a lease as a capital lease if, at its inception, one or more of the following four criteria are met:

2.1.3.1. The lease transfers ownership of the property to the lessee by, or at, the end of the lease term;

2.1.3.2. The lease contains an option to purchase the leased property at a bargain price (refer to the definition in subparagraph 260201.A);

2.1.3.3. The lease term (as defined in subparagraph 260201.H) is equal to or greater than 75 percent of the estimated economic life of the leased property; or

2.1.3.4. The present value of rental and other minimum lease payments, excluding that portion representing executory costs to be paid by the lessor, equals or exceeds 90 percent of the fair value of the leased property. The lessee must compute the present value of the minimum lease payments using the Treasury Instrument interest rate (Resource Center bill, note or bond) for the beginning of the month when the lease started, which matches the term of the lease. For example, the interest rate for an 8.5-year capital lease would be the average of the interest rates for a 7-year Treasury Note and a 10-year Treasury Note unless:

2.1.3.4.1. It is practicable for the lessee to learn the interest rate implicit in the lease computed by the lessor; and

2.1.3.4.2. The implicit rate computed by the lessor is less than the Treasury Instrument Rate.

2.1.3.5. The criteria cited in subparagraphs 260201.C.3 and 260201.C.4, do not apply if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property. While leases/occupational agreements with the General Services Administration (GSA) typically do not meet the capital lease criteria, if a GSA lease does meet the criteria cited in subparagraph 260201.C it should be capitalized.

2.1.3.6. If a lease does not meet at least one of the four criteria cited in subparagraphs 260201.C.1 through 260201.C.4, it should be classified as an operating lease. Operating leases of General PP&E are leases in which the entity does not assume the risks of ownership of the asset. Multi-year service contracts and multi-year purchase contracts for expendable commodities are not capital leases. Multi-year purchase contracts for expendable commodities are not capital leases. Multi-year service contracts that do not include provisions for
exclusive use of assets (either through identification of specific assets, segregation of services provided from other customers or exclusive use of an asset) are not capital leases.

2.1.4. Contingent Rentals. Contingent rentals are rentals on which the amounts are dependent on some factor other than the passage of time, such as a store lease where contingent rentals are based on a percentage of sales in excess of stipulated amounts or under certain data processing equipment leases based on hours of use in excess of stipulated minimums. Contingent rentals are not part of the minimum lease payments and are expensed as incurred over the term of the lease.

2.1.5. Estimated Economic Life. Estimated economic life is the estimated remaining period during which the property is expected to be economically usable by one or more users, with normal repairs and maintenance, for the purpose for which it was intended at the inception of the lease, without limitation by the lease term.

2.1.6. Fair Value. Fair value is an unbiased, equitable or just value based on the cost of a similar item or the price that an impartial buyer would be willing to pay for the item or a similar item.

2.1.7. Interest Rate Implicit in the Lease. The interest rate implicit in the lease is the discount rate that, when applied to the minimum lease payments (less executory costs and the unguaranteed residual value), causes the aggregate present value at the beginning of the lease term to be equal to the fair value of the leased property at the inception of the lease.

2.1.8. Lease Term. The lease term is the fixed noncancelable term of the lease including:

2.1.8.1. All periods, if any, covered by bargain renewal options;

2.1.8.2. All periods, if any, for which failure to renew the lease imposes a penalty on the lessee in such amount that a renewal appears, at lease inception, to be reasonably assured;

2.1.8.3. All periods, if any, covered by ordinary renewal options during which any of the following conditions exist:

2.1.8.3.1. A guarantee by the lessee of the lessor's debt directly or indirectly related to the leased property is expected to be in effect; or

2.1.8.3.2. A loan from the lessee to the lessor directly or indirectly related to the leased property is expected to be outstanding.

2.1.8.4. All periods, if any, covered by ordinary renewal options preceding the date as of which a bargain purchase option is exercisable;

2.1.8.5. All periods, if any, representing renewals or extensions of the lease at the lessor's option; and
2.1.8.6. The lease term should not be assumed to extend beyond the date a bargain purchase option becomes exercisable.

2.1.9. Leasehold Improvements. A leasehold improvement is an improvement to leased land, to include easements and right-of-ways, buildings, structures, and linear structures utilized by the United States Federal Government.

2.1.10. Materiality. Materiality, as defined by the SFFAS 1, is the degree to which omitting or misstating information about the item makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or the misstatement.

2.1.11. Minimum Lease Payments. Minimum lease payments are the payments that the lessee is obligated to make or can be required to make in connection with the leased property. Minimum lease payments exclude:

2.1.11.1. Contingent rentals

2.1.11.2. Any guarantee by the lessee of the lessor’s debt and the lessee’s obligation to pay (apart from rental payments) executory costs such as insurance, maintenance, and taxes in connection with the leased property.

2.1.12. Noncancelable. Noncancelable means the lease is cancelable only on the occurrence of a remote contingency or with the permission of the lessor. Funds that are not appropriated by the Congress in future years to cover the lease are considered a remote contingency. If the lessee enters into a new lease with the same lessor, the term of the new lease would be considered noncancelable. In addition, a lease term would be considered noncancelable if the lessee incurs a penalty in such amount that continuation of the lease appears, at inception, reasonably assured.

2.1.13. Operating Leases. Operating leases are leases that meet all of the following criteria. (If the criteria is not met, the lease is to be considered a capital lease or a lease-purchase, as appropriate.)

2.1.13.1. Ownership of the asset remains with the lessor during the term of the lease and is not transferred to the Government at or shortly after the end of the lease term;

2.1.13.2. The lease does not contain a bargain price purchase option;

2.1.13.3. The lease term does not exceed 75 percent of the estimated economic life of the asset;

2.1.13.4. The present value of the minimum lease payments over the life of the leases is less than 90 percent of the fair value of the asset at the beginning of the lease term;
2.1.13.5. The asset is a general purpose asset rather than being for a special purchase of the Government and is not built to the unique specification of the Government as a lease; and

2.1.13.6. There is a private sector market for the asset.

2.1.14. Renewal or Extension of Leases. The renewal or extension of a lease refers to the continuation of a lease agreement beyond the original lease term, including a new lease under which a lessee continues to use the same property. Renewals or extensions do not include modifications of any of the terms in the original arrangement before the end of the term of the original arrangement.

*2.2 Relevant USSGL Accounts (260202)

The DoD USSGL accounts are specified on the Office of the Deputy Chief Financial Officer Standard Financial Information Structure website for the DoD Standard Chart of Accounts (including point accounts) and the Transaction Library. USSGL accounts most commonly used in accounting for capital leases include:

2.2.1. **Assets Under Capital Lease (Account 181000)**. The Assets Under Capital Lease account is used to record general equipment assets and real property assets acquired under capital lease and properly capitalized according to the guidance in subparagraphs 260201.C and 260204.D.1.

2.2.2. **Accumulated Depreciation on Assets Under Capital Lease (Account 181900)**. The Accumulated Depreciation on Assets Under Capital Lease account accumulates the annual/periodic depreciation expense for assets under capital lease.

2.2.3. **Leasehold Improvements (Account 182000)**. The Leasehold Improvement account is used to record the value of capitalized improvements to leased general equipment and leased real property.

2.2.4. **Accumulated Amortization on Leasehold Improvements (Account 182900)**. The account, Accumulated Amortization on Leasehold Improvements, is used to accumulate the periodic amortization expense for leasehold improvements.

2.2.5. **Capital Lease Liability (Account 294000)**. The Capital Lease Liability account is used to record the present value of liabilities for general equipment assets and real property assets acquired under a lease agreement that meets the test for capitalizing the assets.

2.2.6. **Depreciation, Amortization, and Depletion (Account 671000)**. This account is used to recognize the expense resulting from the process of allocating costs of an asset (tangible or intangible) over the period of time benefited or the asset's useful life.

2.2.7. **Other Losses from Impairment of Assets (Account 729200)**. The loss from the partial impairment of General Property, Plant and Equipment including assets under capital lease, but excluding internal use software.
2.3 Acquisition/Valuation (260203)

2.3.1. Recorded Cost. When acquiring a General PP&E asset under a capital lease, the recorded cost must be recognized in accordance with paragraph 260204. The recorded cost of General PP&E under capital lease is the basis for computing depreciation/amortization (if applicable). This paragraph defines and prescribes the use of net book value, fair value, and recorded cost when recording the cost of General PP&E items acquired under capital lease.

2.3.1.1. Net Book Value. Net book value is the recorded cost of a General PP&E asset, less its accumulated depreciation/amortization.

2.3.1.2. Fair Value. Fair value is an unbiased, equitable or just value based on the cost of a similar item or the price that an impartial buyer would be willing to pay for the item or a similar item.

2.3.1.3. Amount to Record. The recorded cost of General PP&E items under a capital lease is the present value of the rental and other minimum lease payments during the lease term, excluding that portion of the payments representing executory cost such as insurance, maintenance and taxes paid to the lessor. If the present value amount, however, exceeds the fair value of the leased property at the inception of the lease, the amount recorded should be the fair value. If the executory cost portion of the minimum lease payments cannot be determined, the amount must be estimated.

2.3.2. Documentation. When recording the acquisition of a General PP&E item under capital lease in the accountable property system of record (APSR) and/or accounting system, the item must be assigned a dollar value (i.e., recorded cost) as detailed in this chapter. The dollar value must be supported by appropriate documentation, including the executed lease agreement. The DoD Component entering into a lease must have the lease agreement available for determining the capitalization of the leased item. Guidance on supporting documentation can be found in paragraph 260302.

2.4 Recognition (260204)

2.4.1. All General PP&E items acquired by DoD Components under a capital lease must be recognized for accountability and financial reporting purposes. Recognition requires the proper accounting treatment (expense or capitalization with depreciation/amortization) and the reporting of capitalized amounts and accumulated depreciation/amortization on the appropriate DoD Component’s financial statements.

2.4.2. Recognition Responsibility. The DoD Component that procures a General PP&E item by entering into a capital lease will be the DoD Component that must initially record the item. In the event where a DoD Component other than the initial lessee uses and benefits from the leased asset, the recognition responsibility of the leased asset must be reevaluated. The subsequent recognition responsibility of a General PP&E item under capital lease is determined based on the type of asset being leased. Refer to the appropriate chapter in this Volume for additional guidance.
2.4.3. Recognition Uncertainty. It is important that the overall accounting records of the DoD and the Federal Government are not duplicative.

2.4.3.1. In situations where doubt exists as to which DoD Component should record an item, the DoD Components involved must reach agreement with the other applicable DoD Component(s) or Federal agencies as to which entity will record the item.

2.4.3.2. If the DoD Components cannot reach an agreement, the matter must be referred to the Office of the Deputy Chief Financial Officer, Office of the Under Secretary of Defense (Comptroller) for resolution. Requests for resolution must be accompanied by adequate supporting documentation to assist in resolution of the matter and be submitted through the Financial Management and Comptroller of the submitting Military Department or Defense Agency.

2.4.4. Recognition Timing. Recording of a General PP&E item under capital lease for financial reporting purposes must occur at lease inception.

2.4.4.1. Lease inception is the date of the lease agreement. A lease agreement must be in writing, signed by the parties in interest to the transaction, and should specifically set forth the principal provisions of the transaction. For leasehold improvements, the date it should be recorded is the date the leasehold improvement is placed in service.

2.4.4.2. For General PP&E assets under capital lease acquired by an external third party contractor on behalf of a DoD Component, the lease agreement must be executed by an authorized DoD contracting officer. The assets must be recorded upon signing of the lease and delivery or constructive delivery of the leased asset, whether to the contractor performing the service or to the DoD Component. Delivery or constructive delivery will be based on the terms of the contract regarding delivery, receipt, and acceptance. The leased asset should either be capitalized in the appropriate USSGL account or, if the leased asset does not meet the lease criteria for capitalization and the capitalization threshold, such items must be recorded in the appropriate expense account.

2.4.5. Capitalization Thresholds. A capitalization threshold is the amount that determines the financial reporting of an asset or expensing its cost.

2.4.5.1. The capitalization threshold for General PP&E items acquired under capital lease, with the exception of real property items, is:

2.4.5.1.1. $1 million for the Department of Air Force and the Department of Navy general funds;

2.4.5.1.2. $1 million for the Office of the Director of National Intelligence General PP&E; and

2.4.5.1.3. $250 thousand for all other DoD Component’s (including Department of the Army) General Fund and WCF.
2.4.5.2. The capitalization threshold for real property items acquired under capital lease for all DoD Components is $250 thousand.

2.4.5.3. General PP&E items under capital lease with a recorded cost that equals or exceeds the applicable capitalization threshold, must be capitalized as an asset in the appropriate DoD Component’s accounting records and depreciated/amortized over its lease term. Leasehold improvements should be depreciated/amortized over the lesser of its estimated economic life or the remaining lease term. General PP&E items under capital lease, with a recorded cost below the applicable capitalization threshold must be accounted for as an operating lease with no balance sheet recognition, with the exception of General PP&E items acquired as part of a qualifying bulk acquisition as described in subparagraph 260204.H.

2.4.5.4. For General PP&E items acquired under capital lease, which meet or exceed the appropriate capitalization threshold, the lessee must recognize both a capital lease asset and a capital lease liability at lease inception.

2.4.6. **Allocation of Lease Payments.** A portion of each lease payment must be allocated to interest expense, and the balance should be applied to reduce the lease liability using the effective interest rate method. (Interest is calculated on the balance of the lease obligation for each period, and the remainder of the payment is applied as a reduction of the lease obligation.) The periodic payment amount allocated to interest expense must be computed based on the interest rate used to compute the present value of minimum lease payments, unless the lease is recorded at fair value.

2.4.7. **Leases with Residual Guarantee or Penalty.** Leases with a residual guarantee by the lessee or a penalty for failure to renew the lease at the end of the lease term, generally should result in a liability balance that will equal the amount of the guarantee or penalty at the end of the lease term. If a renewal or other extension of the lease term or a new lease under which the lessee continues to lease the same property renders the guarantee or penalty inoperative, the asset and the liability under the lease should be adjusted. The adjustment must be the amount equal to the difference between the present value of the future minimum lease payments under the revised agreement and the present balance of the liability. The present value of future minimum lease payments under the revised lease agreement should be computed using the rate of interest used to record the lease initially. Other renewals and extensions of lease terms should be considered new agreements.

2.4.8. **Bulk Acquisitions Through Leases.** For capitalization purposes, a bulk acquisition is defined as the acquisition of like items as part of multiple leases with a single lessor within a fiscal year. Acquisitions through multiple leases with a single lessor during separate fiscal years are to be considered separately within each fiscal year. To determine proper recognition of bulk acquisitions through leases, the acquisition cost of all like items leased under multiple leases with a single lessor within a fiscal year must be totaled, and the resulting total must be considered against the lease criteria for capitalization and the capitalization threshold prescribed by subparagraphs 260201.C and 260204.E respectively.
2.4.9. **Accounting for Real Property Outside of the United States.** As used in this chapter, “United States” means the 50 States of the United States, the District of Columbia, and the commonwealths, territories, and possessions of the United States. In carrying out their mission, operations and objectives, there are circumstances in which DoD Components occupy and use real property facilities and/or general equipment outside of the United States for which there is not a lease agreement. When a DoD Component occupies an asset and/or uses general equipment outside of the United States but the DoD did not fund its acquisition, the DoD Component will recognize such facilities and/or general equipment on its financial statements as assets under a capital lease only if a specific agreement with the host nation/foreign government exists. The agreement must include a requirement that the DoD Component pay minimum regular payments for its use. The agreement must meet one of the criteria for a capital lease as specified in SFFAS 6, paragraph 20:

**Table 26-1. Capital Lease Criteria**

<table>
<thead>
<tr>
<th>Capital Lease Criterion</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>The lease transfers ownership of the property to the lessee by the end of the lease term.</td>
<td>Not likely for foreign owned real property.</td>
</tr>
<tr>
<td>The lease contains an option to purchase the leased property at a bargain price.</td>
<td>Not likely for foreign owned real property.</td>
</tr>
<tr>
<td>The lease term is equal to or greater than 75 percent of the estimated economic life of the leased property.</td>
<td>Not likely for foreign owned real property. The specified term of the agreement with the host nation/foreign government will substitute for the lease term for this analysis. Terms specified in these agreements are typically less than 75 percent of a real property asset's estimated economic life.</td>
</tr>
<tr>
<td>The present value of rental and other minimum lease payments, excluding that portion of the payments representing executory costs, equals or exceeds 90 percent of the fair value of the leased property.</td>
<td>Not likely for foreign owned real property. The payments to the host nation/foreign government established in the agreement will substitute for lease payments for this analysis. If minimum payments established in the agreement cover multiple items, only the proportional amount paid for the subject asset should be considered for this analysis.</td>
</tr>
</tbody>
</table>

Note: The last two criteria are not applicable when the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property.

2.4.9.1. If a lease agreement (as contrasted with another type of agreement with the host nation/foreign government) exists, the other provisions of this chapter would apply.

2.4.9.2. See also reporting requirements for disclosure of real property outside the United States at subparagraph 260305.B.
2.5 Improvements/Enhancements (260205)

2.5.1. The costs to improve (leasehold improvements) a General PP&E item under lease (capital or operating) must be capitalized when (1) the costs of the improvement increase the item’s capability, size, and/or extends its useful life and (2) the cost of the improvement equals or exceeds the applicable capitalization threshold (see subparagraph 260204.E), regardless of funding source.

2.5.2. When leasehold improvements meet or exceed DoD capitalization criteria (see subparagraphs 260204.E and 260205.A), such improvements must be capitalized and amortized over the lesser of the remainder of the lease period or the improvement’s useful life.

2.5.3. Maintenance and repair costs expended on leased assets are not considered capital improvements, regardless of whether the cost equals or exceeds the applicable capitalization threshold. In SFFAS 42, the FASAB defines maintenance and repairs as activities directed toward keeping fixed assets in an acceptable condition. Maintenance and repair activities include preventative maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain assets. Maintenance and repair activities also include cyclic work done to prevent damage that would be more costly to restore than to prevent (e.g., painting). A roof or a heating and air conditioning system that is replaced due to the failing of the existing asset must be classified as a repair and must be expensed, even if the replacement incorporated a better quality and longer life shingle or a more efficient heating and air conditioning unit.

2.5.4. Although maintenance and repairs are generally expensed in the period incurred, certain replacements of parts, systems, or components may or may not be an improvement for accounting purposes. Crucial to the determination of whether a replacement must be recognized as a repair or an improvement is the intent behind the replacement. Repair by replacement occurs when parts, systems, or components have failed, are in the incipient stages of failing, or are no longer performing the functions for which they were designated. Replacements falling into this category must be expensed. If the replacement was undertaken to improve an item that was in good working order, then the replacement must be recognized as an improvement.

2.6 Depreciation/Amortization (260206)

2.6.1. The recorded cost of assets under capital lease and leasehold improvements, which have been capitalized in accordance with the guidance prescribed by this chapter, must be depreciated/amortized. Such capitalized amounts, as well as associated amounts of accumulated depreciation/amortization and depreciation/amortization expense, must be reflected in DoD financial statements.

2.6.2. For leased General PP&E, depreciation/amortization is the systematic and rational allocation of the recorded cost of an asset over the lease term. The depreciation/amortization recovery period (useful life) to be used to depreciate personal or real property acquired by a capital lease is the lease term regardless of the recovery period designated for the type of property. For example, if a capital lease is used to acquire a fire truck and the lease term is seven years and the DoD estimated recovery period for a truck is five years, then the fire truck would be depreciated over seven years. In the same example, if the lease period were only four years, the fire truck would be fully depreciated over four years.

<td>7</td>
</tr>
</tbody>
</table>

2.6.2.1. The salvage value, also known as the residual or scrap value, is the amount that would be expected to be obtained from selling an asset at the end of its useful life, but only when such proceeds (from recycle, resale, or salvage) are permitted to be retained and used by the DoD Component. Salvage value is only applicable to assets under capital lease if the asset meets the criteria in subparagraphs 260201.C.1 and 260201.C.2.

2.6.2.2. The depreciable/amortizable basis of an asset is the recorded cost reduced by the asset’s salvage value.

2.6.3. In the case of leased General PP&E assets, the event that triggers the calculation of depreciation is the beginning of the lease term. In the case of capitalized leasehold improvements, the event that triggers amortization is when the improvement is placed into service.

2.6.4. The recorded cost of leased General PP&E assets and capitalized leasehold improvements must be depreciated/amortized using the straight-line method of depreciation/amortization.

2.6.4.1. Straight-line depreciation/amortization expense for the capitalized lease is calculated as the depreciable/amortizable basis (recorded cost less salvage value as described in subparagraph 260206.B.1) divided equally among accounting periods during the lease term.

2.6.4.2. Straight-line depreciation/amortization expense for leasehold improvements is calculated as the depreciable/amortizable basis (recorded cost of the leasehold improvement) divided equally among accounting periods during the remaining lease term or the useful life of the leasehold improvement, whichever is less.

2.6.5. An asset under capital lease must be retained in the APSR, as well as the accounting records, and reflect both its recorded cost and accumulated depreciation/amortization until the end of the lease term or disposition of the asset.

2.6.6. WCF activities are required to depreciate/amortize General PP&E assets under capital lease in accordance with the guidance in this chapter without regard to whether such assets are procured through a WCF activity’s Capital Purchase/Investment Program budget or whether depreciation/amortization for such assets is included in rates charged to customers. The recognition of General PP&E assets under capital lease and the depreciation/amortization of such assets by WCF activities therefore may be different for financial statement reporting purposes than the depreciation/amortization amounts used for WCF rate development and budget presentation. Depreciation/amortization for all General PP&E assets under capital lease of WCF activities must be recognized as an expense on the Statement of Net Cost, reflected in the Statement of Changes in Net Position, included in accumulated depreciation/amortization amounts on the Balance Sheet,
and reported in the “Defense Working Capital Fund Accounting Report [Accounting Report (Monthly) 1307]. Depreciation/amortization recorded on General PP&E assets under capital lease, which was not acquired nor will be replaced through use of Defense WCF resources, must be classified as non-recoverable for rate setting purposes and reported appropriately on the AR (M) 1307. Defense WCF rates charged to customers are based on guidance in Volume 2B and Volume 11B.

*2.7 Impairment (260207)

2.7.1. Description. SFFAS 44 defines impairment as a significant and permanent decline in the service utility of General PP&E or expected service utility of construction in progress that results from events or changes in circumstances that are not considered normal and ordinary.

2.7.1.1. See subparagraph 260207.B.2 for a guidance on determining the significance and permanence of a service utility decline.

2.7.1.2. The service utility of General PP&E is the usable capacity that, at acquisition, was expected to provide service. The current usable capacity of General PP&E may be less than its original usable capacity due to the normal or expected decline in useful life or to impairing events or changes in circumstances, such as physical damage, obsolescence, enactment or approval of laws or regulations, or other changes in environmental or economic factors, or changes in the manner or duration of use.

2.7.1.3. Normal and ordinary events or circumstances are those that fall within the expected useful life of the General PP&E such as standard maintenance and repair requirements. Events or circumstances that are not considered normal are those where, at the time the General PP&E was acquired, the event or change in circumstance would not have been expected to occur during the useful life of the General PP&E or, if expected, was not sufficiently predictable to be considered in estimating the General PP&E’s useful life.

2.7.2. Identification of Potential Impairment Loss. The determination of whether General PP&E under capital lease remaining in use is impaired is a two-step process, which includes (1) identifying potential impairment indicators and (2) testing for impairment.

2.7.2.1. Step 1 - Identify Indicators of Potential Impairment. Indicators of potential impairment can be identified and brought to DoD Component’s attention in a variety of ways, such as procedures related to deferred maintenance and repair (DM&R). Although DoD Components are not required to establish additional or separate procedures beyond those that may already exist, they should evaluate existing processes and internal controls to determine if they are sufficient to reasonably assure the identification of potential impairment indicators and implement appropriate additional processes and internal controls if necessary. Once identified, however, indicators are not conclusive evidence that a measurable or reportable impairment exists. DoD Components should carefully consider the surrounding circumstances to determine whether a test of potential impairment is necessary given the circumstances. Some common indicators of potential impairment include:
2.7.2.1. Evidence of physical damage;

2.7.2.1.2. Enactment or approval of laws or regulations, which limit or restrict General PP&E usage;

2.7.2.1.3. Changes in environmental or economic factors;

2.7.2.1.4. Technological changes or evidence of obsolescence (however, if obsolete General PP&E continues to be used, the service utility expected at acquisition may not be diminished);

2.7.2.1.5. Changes in the manner or duration of use of General PP&E;

2.7.2.1.6. Construction stoppage or contract termination; and

2.7.2.1.7. General PP&E idled or unserviceable for excessively long periods.

2.7.2.2. **Step 2 - Impairment Test.** Identified General PP&E should be tested for impairment by determining whether these two factors are present: (i) the magnitude of the decline in service utility is significant and (ii) the decline in service utility is expected to be permanent.

2.7.2.2.1. Significant declines in service utility are those that cause costs (including operational and maintenance costs) to be disproportionate to the new expected service utility. The determination of whether or not an item is significant is a matter of professional judgment and is distinct from materiality considerations. Such judgments should be based on the relative costs of providing the service before and after the decline, the percentage decline in service utility, or other considerations.

2.7.2.2.2. The decline in service utility is considered permanent when the DoD Component has no reasonable expectation that the lost service utility will be replaced or restored; that is, the DoD Component expects that the General PP&E will remain in service so that its remaining service utility will be utilized. In contrast, a reasonable expectation that the lost service utility will be replaced or restored may exist when the DoD Component has: (1) specific plans to replace or restore the lost service utility of the General PP&E, (2) committed or obligated funding for remediation efforts, or (3) a history of remediating lost service utility in similar cases or for similar General PP&E.

2.7.3. **Determining the Appropriate Measurement Approach.** Impairment losses on General PP&E assets under capital lease that will continue to be used by the entity should be estimated using a measurement approach that reasonably estimates the portion of net book value associated with the diminished service utility of the General PP&E. A measurement method would not be considered appropriate if it would result in an unreasonable net book value associated with the remaining service utility of the General PP&E. Conversely, a reasonable measurement method may result in no impairment loss to be recorded. Regardless of the method used, recognition of
impairment loss should be limited to the asset’s net book value at the time of impairment. Widely recognized methods for measuring impairment include:

2.7.3.1. Replacement Approach. Impairment of General PP&E with physical damage generally may be measured using a replacement approach. This approach uses the estimated cost to replace the lost service utility of the General PP&E at today’s standards (i.e., at current market prices and in compliance with current statutory, regulatory, or industry standards) to identify the portion of the historical cost of General PP&E that should be written-off due to impairment. It may be appropriate to apply the ratio of estimated cost to replace the diminished service utility over total estimated cost to replace the General PP&E, to the net book value of General PP&E to determine the impairment amount.

2.7.3.2. Restoration Approach. Uses the estimated cost to restore the diminished service utility of the General PP&E, but does not include any amounts attributable to improvements and additions to meet today’s standards.

2.7.3.3. Service Unit Approach. Impairment of General PP&E that are affected by enactment or approval of laws or regulations or other changes in environmental factors or are subject to technological changes or obsolescence generally may be measured using a service unit approach. This approach compares the service units provided by the General PP&E before and after the impairment, to isolate the historical cost of the service utility that cannot be used due to the impairment, to determine the impairment amount.

2.7.3.4. Deflated Depreciated Current Cost Approach. Impairment of General PP&E that are subject to a change in manner or duration of use generally may be measured using a deflated depreciated current cost approach. Under this approach, a current cost for a General PP&E to replace the current level of service is estimated. This estimated current cost is then depreciated/amortized to reflect the fact that the General PP&E is not new, and is then subsequently deflated to convert it to historical cost dollars. A potential impairment loss results if the net book value of the General PP&E exceeds the estimated historical cost of the current service utility (i.e., deflated depreciated current cost).

2.7.3.5. Cash Flow Approach. Recognizes an impairment loss only if the net book value (a) is not recoverable and (b) exceeds the higher of its net realizable value (NRV) or value-in-use estimate.

2.7.3.5.1. The net book value of General PP&E is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the General PP&E.

2.7.3.5.2. NRV is the estimated amount that can be recovered from selling, or any other method of disposing, of an item less estimated costs of completion, holding, and disposal. SFFAC 7 describes value in use as the present value of future cash flows that an entity expects to derive from an asset, including cash flows from use of the asset and eventual disposal.
2.7.3.5.3. If the net book value is not recoverable, the impairment loss is the amount by which the net book value of the General PP&E exceeds the higher of its NRV or value in use estimate. No impairment loss exists if the net book value is less than the higher of the General PP&E’s NRV or value in use estimate.

2.7.3.6. Lower of (a) Net Book Value or (b) Higher of NRV or Value-in-Use Approach. General PP&E impaired from either construction stoppages or contract terminations, which are expected to provide service, should be reported at their recoverable amount; the lower of (a) the General PP&E’s net book value or (b) the higher of its NRV or value-in-use estimated. Impaired General PP&E under capital lease, which are not expected to provide service, should be accounted for in accordance with paragraph 260208.

2.7.4. Recognizing and Reporting Impairment Losses. The loss from impairment, if any, should be recognized and reported in the Statement of Net Cost in the period in which the DoD Component concludes that the impairment is both (1) a significant decline in service utility and (2) expected to be permanent. Such losses may be included in program costs or costs not assigned to programs. A general description of the General PP&E for which an impairment loss is recognized, the nature (e.g., damage or obsolescence) and amount of the impairment and the financial statement classification of the impairment loss must be disclosed in the notes to the financial statements in the period the impairment loss is recognized.

2.7.5. Recoveries. The impairment loss must be reported net of any associated recovery, when the recovery and loss occur in the same fiscal year. Recoveries reported in subsequent fiscal years must be reported as revenue or other financing source as appropriate. The amount and financial statement classification of recoveries should be disclosed in the notes to the financial statements.

2.7.6. Remediating Previously Reported Impairments. The costs incurred to replace or restore the lost service utility of impaired General PP&E remaining in use must be accounted for in accordance with applicable standards (i.e., recognized according to the nature of the costs incurred and the appropriate capitalization threshold).

2.7.7. Diminished Service Utility Without Recognized Impairment Loss. If the future service utility has been adversely affected but the impairment test determines that a loss does not need to be recognized, a change to the estimates used in depreciation/amortization calculations (such as estimated useful life and salvage value) should be considered.

*2.8 Derecognition (260208)

A lease modification is a termination of a capital lease before the expiration of the lease term. The lease modification must be accounted for by the lessee by removing the asset and obligation, with a gain or loss recognized for the difference. Supporting documentation required for derecognition is listed in subparagraph 260302.A.2.
3.0 ADDITIONAL CONSIDERATIONS (2603)

*3.1 Use of Canceled Treasury Account Symbol (TAS) (260301)

3.1.1. The Department of Treasury's Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) is a data collection system that replaces the reporting functionalities of Federal Agencies Centralized Trial-Balance System I and II, Intragovernmental Fiduciary Confirmation System, and Intragovernmental Reporting and Analysis System as the primary means for Components to report their trial balance data to the Department of Treasury. Capitalized assets must be reported in GTAS when purchased and after the original purchasing TAS has expired and canceled. Treasury’s GTAS provides a “cancelled” or “C” TAS on the GTAS Super Master Account File (SMAF) for each fund family represented on the SMAF to allow Components to continue to report capitalized leased assets using appropriations that subsequently have cancelled. The system generated “C” TAS has three components: the three-digit agency identifier, availability type "C", and a four-digit main account.

3.1.2. All DoD Components must use the “C” availability type TAS to report capitalized assets. Assets may be moved to a C TAS at any time from the purchase date to the date the original purchasing fund cancels.

3.1.3. To transfer an asset to a C TAS:

3.1.3.1. Use USSGL account transaction E510 to transfer out the asset from the purchasing fund account.

3.1.3.2. Use USSGL account transaction E606 to transfer in the asset into the appropriate C TAS.

*3.2 Supporting Documentation (260302)

Entries to record financial transactions in accounting system general ledger accounts and/or the accountable property records and/or systems must:

3.2.1. Be supported by source documents that reflect all transactions affecting the DoD Component’s investment in assets under capital lease.

3.2.1.1. All acquisitions, whether by capital lease, purchase, transfer from other agencies, donation, or other means, must be supported as of the date the DoD Component takes custody of the asset. The documents listed in Table 26-3, where applicable, must be readily available to support the changes in asset value or physical attributes as a result of a new acquisition or leasehold improvement.
Table 26-3. Supporting Documentation for Assets Under Capital Lease Acquisition

2. GSA Form 1334, Request for Transfer of Excess Real and Related Personal Property;  
3. DD Form 1354, Transfer and Acceptance of DoD Real Property (interim or final), with associated source documentation retained by the responsible party;  
4. Signed lease for leased property;  
5. Executed Occupancy agreement; and  
6. Transfer letter and documents for transferred assets. |

* The supporting documentation examples included in Table 26-3 could also be applicable to operating leases.

3.2.1.2. All derecognition of capital leases must be supported as of the date the lessee is no longer liable for the lease obligation. The execution of certain derecognition events will generate financial or administrative accountability transactions. These documents, where applicable, must be readily available to support derecognition:

3.2.1.2.1. “Declaration of excess” document;

3.2.1.2.2. Original lease document;

3.2.1.2.3. Approval documentation for derecognition;

3.2.1.2.4. Lease modification (e.g., for early termination of lease);

3.2.1.2.5. Document to support any improvements made to the assets under capital lease;

3.2.1.2.6. Transfer documents for transferred assets or as otherwise stated.
3.2.1.3. Documents that support the recorded cost of General PP&E assets under capital lease must be retained by the DoD Component in accordance with the requirements contained in Volume 1, Chapter 9 or as otherwise stated. Documentation (original documents and/or hard and electronic copies of original documentation) must be maintained in a readily available location during the applicable retention period to permit the validation of information pertaining to the asset such as the lease term, lease date and cost of leasehold improvements. The documentation must also be linked to the appropriate unique identifier(s). Supporting documentation may include, but is not limited to, the documentation as outlined in this subparagraph.

3.2.2. Include sufficient information indicating the physical quantity, location, and unit cost of the General PP&E assets under capital lease. The accountable property records must be designed to be of maximum assistance in making procurement and utilization decisions, including decisions related to identifying potential excess General PP&E that may be available for reuse, transfer to other DoD Components, or made available for disposal in accordance with current DoD regulations and other regulatory requirements.

3.2.3. Enable periodic, independent verification of the accuracy of the accounting and accountable property records through periodic physical counts/inventories of General PP&E assets under capital lease (existence and completeness -- “book to floor and floor to book”). Such periodic inventories also must include reconciling the APSR and accounting systems with the general ledger accounts and physical counts. Personal hand receipt self-validations are not acceptable for meeting the independent verification of physical inventory requirements. See DoDI 5000.64 (excluding real property) and DoDI 4165.14 for real property.

3.2.4. Identify and classify General PP&E that was capitalized, recorded in the APSR and accounting system, and reported in the financial statements.

3.2.5. Be based on the same documents, to ensure that entries to the accounting and accountable property records are the same. This will ensure that the property accountability records are integrated and subsidiary to the accounting system and those records can be reconciled with the accounting system.

3.2.6. Include all General PP&E possessed by the Department (to include DoD leased property held by contractors).

3.2.7. Provide information to identify and account for leased General PP&E, regardless of whether the General PP&E was acquired by a capital lease or operating lease or whether the value of the General PP&E exceeds DoD capitalization thresholds.

3.2.8. Provide information to identify and account for improvements to General PP&E assets under capital lease.
3.3 Physical Inventories of General PP&E (260303)

DoD Components must perform periodic physical inventories of General PP&E including assets under capital lease in accordance with DoDI 5000.64 (equipment and other accountable property) or DoDI 4165.14 (real property).

*3.4 DM&R (260304)

3.4.1. In SFFAS 42, the FASAB defines DM&R as maintenance and repairs that were not performed when they should have been or were scheduled to be and which are put off or delayed to a future period.

3.4.1.1. For purposes of this policy, maintenance and repairs are activities directed toward keeping fixed assets in an acceptable condition. Maintenance and repairs include preventive maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain the asset in acceptable condition.

3.4.1.2. Maintenance and repairs exclude activities aimed at expanding the capacity or capability of an asset or otherwise upgrading it to serve needs different from or significantly greater than its current use.

3.4.2. Amounts for DM&R may be measured using condition assessment surveys, life-cycle cost forecasts, or other methods that are similar to the condition assessment survey or life-cycle costing methods.

3.4.2.1. Condition assessment surveys are periodic physical inspections of General PP&E to determine their current condition and estimated cost to correct any deficiencies.

3.4.2.2. Life-cycle costing is an acquisition or procurement technique that considers operating, maintenance, and other costs in addition to the acquisition cost of assets. Since it results in forecasts of maintenance and repairs expense, these forecasts may serve as a basis against which to compare actual maintenance and repairs expense to arrive at an estimate of DM&R.

3.4.3. DoD Components should determine what condition standards are acceptable and which DM&R measurement methods to apply. Once determined, condition standards and measurement methods must be consistently applied unless the DoD Component determines that changes are necessary. Changes deemed necessary by the DoD Component must be accompanied by an explanation documenting the rationale for the change(s) and any related impact the change(s) will have on the DM&R estimates.

3.4.4. DM&R must be measured for capitalized and non-capitalized General PP&E (including assets under capital lease), fully depreciated General PP&E, Heritage Assets, and Stewardship Land. In addition, DM&R must be measured for inactive and/or excess General PP&E to the extent that it is required to maintain the General PP&E in acceptable condition (e.g., to comply with existing laws and regulations or to preserve value pending disposal). In addition,
DM&R must measure funded maintenance and repairs that have been delayed for a future period as well as unfunded maintenance and repairs.

3.4.5. DoD Components must report material amounts of DM&R as Required Supplementary Information (RSI) to the financial statements (see Volume 6B, Chapter 12). At a minimum, the Components must present the following information as RSI:

3.4.5.1. Estimates of the beginning and ending balances of DM&R for each major category of General PP&E asset under capital lease;

3.4.5.2. A summary of the DoD Component’s maintenance and repairs policies and a brief description of how they are applied (i.e., method of measuring DM&R);

3.4.5.3. Policies for ranking and prioritizing maintenance and repair activities;

3.4.5.4. Factors the DoD Component considers in determining acceptable condition standards;

3.4.5.5. Whether DM&R relates solely to capitalized General PP&E or also to amounts relating to noncapitalized or fully depreciated General PP&E under capital lease;

3.4.5.6. Capitalized General PP&E for which the DoD Component does not measure and/or report DM&R and the rationale for the exclusion; and

3.4.5.7. If applicable, explanation of any significant changes to (a) DM&R amounts from the prior year and (b) the policies and factors subject to the reporting requirements established in subparagraphs 260304.E.1 through 260304.E.6.

*3.5 Reporting Requirements (260305)

3.5.1. DoD Components with leased General PP&E should reference a note on the Balance Sheet that discloses information about the reported assets. See Volume 6B for the specific reporting requirements.

3.5.2. Disclosure of Real Property Outside of the United States

DoD Components must disclose in the notes to the financial statements those instances where they are using real property provided by a foreign government/host nation without reimbursement by DoD to the foreign government/host nation, as applicable, that:

3.5.2.1. The DoD Component is utilizing real property provided by and owned by a foreign government/host nation in its operations outside of the United States without reimbursement by DoD to the foreign government/host nation and that there are no amounts recorded in the financial statements related to these properties.
3.5.2.2. The general nature of the agreement with the foreign government/host nation. It is not intended or recommended that the geographic location of the foreign government/host nation be disclosed.

3.6 Environmental Liabilities/Cleanup Costs (260306)

The lease agreement must clearly identify the party responsible for environmental liabilities/cleanup costs. The accounting policy for environmental liabilities/cleanup costs pertaining to General PP&E is contained in Chapter 13.

CHAPTER 27

INTERNAL USE SOFTWARE

1.0 GENERAL (2701)

1.1 Overview (270101)

1.1.1. This chapter prescribes Department of Defense (DoD) accounting policy for Internal Use Software (IUS), which is a subset of General Property, Plant, and Equipment (PP&E). This overview paragraph will define and describe the characteristics of General PP&E.

1.1.2. General PP&E items are used in providing goods or services, or support the mission of the entity, and typically have one or more of the following characteristics:

1.1.2.1. The item could be used for alternative purposes (e.g., by other DoD or Federal Programs, state or local governments, or nongovernmental entities), but it is used to produce goods or services, or to support the mission of the entity;

1.1.2.2. The item is used in business-type activities; and/or

1.1.2.3. The item is used by entities in activities whose costs can be compared to those of other entities performing similar activities (e.g., federal hospital services in comparison to commercial hospitals).

1.2 Purpose (270102)

The applicable general ledger accounts are listed in the government-wide United States Standard General Ledger (USSGL) contained in Volume 1, Chapter 7. The accounting entries for these accounts and the DoD Standard Chart of Accounts are specified in the DoD USSGL Standard Transaction Library. Unless otherwise stated, this chapter is applicable to all DoD Components, including Working Capital Fund (WCF) activities.

*1.3 Authoritative Guidance (270103)

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.2. FASAB SFFAC 7, “Measurement of the Elements of Accrual-Basis Financial Statements in Periods After Initial Recording;”

1.3.3. FASAB Statement of Federal Financial Accounting Standards (SFFAS) 1, “Accounting for Selected Assets and Liabilities;”
1.3.4. FASAB **SFFAS 4**, “Managerial Cost Accounting Standards and Concepts;”

1.3.5. FASAB **SFFAS 10**, “Accounting for Internal Use Software;”

1.3.8. FASAB **TR 14**, “Implementation Guidance on the Accounting for the Disposal of General Property, Plant & Equipment;”

1.3.9. FASAB **TR 15**, “Implementation Guidance for General Property, Plant, and Equipment Cost Accumulation, Assignment and Allocation;”

1.3.10. FASAB **TR 16**, “Implementation Guidance for Internal Use Software;”

1.3.11. FASAB **TR 17**, “Conforming Amendments to Technical Releases for SFFAS 50, Establishing Opening Balances for General Property, Plant, and Equipment;”

1.3.12. FASAB **TR 18**, “Implementation Guidance for Establishing Opening Balances;”

1.3.14. DoD Instruction (DoDI) **5000.76**, “Accountability and Management of Internal Use Software (IUS);” and

---

2.0 ACCOUNTING FOR IUS (2702)

*2.1 Definition (270201)

2.1.1. “Software” includes the application and operating system programs, procedures, rules, and any associated documentation pertaining to the operation of a computer system or program. Most often, software is an integral part of an overall system(s) having interrelationships between software, hardware, personnel, procedures, controls, and data. IUS is software that:

2.1.1.1. Is acquired or developed to meet the entity’s internal or operational needs (intended purpose); and
2.1.1.2. Is a stand-alone application, or the combined software components of an information technology (IT) system that can consist of multiple applications, modules, or other software components integrated and used to fulfill the entity’s internal or operational needs (software type).

Figure 27-1. IUS is Generally One Component of an IT System

2.1.2. IUS can be:

2.1.2.1. Purchased from commercial off-the-shelf (COTS) vendors and be ready for use with little or no changes;

2.1.2.2. Internally developed by employees of DoD, including new software and existing or purchased software that is modified with or without a contractor’s assistance; or

2.1.2.3. Contractor-developed software that a DoD Component paid a contractor to design, program, install, and implement, including new software and the modification of existing or purchased software.

2.1.3. IUS includes software that is:

2.1.3.1. Used to operate an entity’s programs (e.g., financial and administrative software, including that used for project management);

2.1.3.2. Used to produce the entity’s goods and to provide services (e.g., maintenance work order management and loan servicing); and
2.1.3.3. Developed or obtained for internal use and subsequently provided to other Federal Entities with or without reimbursement.

2.1.4. Integrated (embedded) software is not IUS.

2.1.4.1. IUS does not include computer software that is integrated into and necessary to operate General PP&E, rather than perform an application. Such software must be considered part of the PP&E of which it is an integral part, and capitalized and amortized accordingly (e.g., software embedded in airport radar, computer-operated lathes, military equipment/weapon systems and special test equipment). The aggregate cost of the hardware and software must be used to determine whether to capitalize or expense the costs. In situations where software and the hardware on which it runs have independent service lives, the determination of the useful life of the software must be viewed independently of the useful life of the hardware. The determination must be made on a case-by-case basis. The rationale for this determination must be documented.

2.1.4.2. Software used in conjunction with the operation of equipment, which is not the same as the integrated or embedded software, can be considered IUS if all of the following criteria apply:

2.1.4.2.1. The software was developed separately from the equipment;

2.1.4.2.2. The software is not required for the equipment to perform its core purpose and functions; and

2.1.4.2.3. The quantity of equipment items on which the software will be installed is unknown.

2.1.5. DoD entities may purchase IUS as part of a package of products and services (e.g., training, maintenance, data conversions, reengineering, site licenses and rights to future upgrades and enhancements). If the costs are not readily separable between the IUS and the services on the invoice, contract or other procurement documents, costs should be allocated based on the relative fair values of the IUS and the services. The cost of the IUS should be capitalized (assuming it meets the capitalization criteria) and the cost of the training/maintenance should be expensed. Non-IUS costs (e.g., training and maintenance services) that are not susceptible to allocation between maintenance and relatively minor enhancements must be expensed.

2.1.6. Materiality, as defined by the SFFAS 1, is the degree to which an item's omission or misstatement in a financial statement makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the inclusion or correction of the item.

2.1.7. Additional definitions can be found in Annex 1.
*2.2 Relevant USSGL Accounts (270202)

2.2.1. **Fund Balance with Treasury (Account 101000).** This account is used to record the aggregate amount of funds on deposit with the United States Department of the Treasury, excluding seized cash deposited.

2.2.2. **Internal Use Software (Account 183000).** This account is used to record the amount of capitalized cost of IUS for those costs that are to be capitalized in accordance with Table 27-1. It includes (1) purchased COTS software, (2) contractor-developed software, and (3) internally developed software.

2.2.3. **Internal Use Software in Development (Account 183200).** This account is used to record the full cost amount incurred for those costs that are to be capitalized in accordance with Table 27-1 during the software development phase of (1) contractor-developed software and (2) internally developed software, (as defined in SFFAS 10). Upon completion, these costs will be transferred to USSGL account 183000, Internal Use Software. There is no Generally Accepted Accounting Principles (GAAP) requirement to establish a separate account for each software under development. However, DoD Components may elect to create separate subaccounts to better differentiate and track costs.

2.2.4. **Accumulated Amortization on Internal Use Software (Account 183900).** This account is used to record the accumulated amount of amortization charges to expense for IUS.

2.2.5. **General Property, Plant, and Equipment Permanently Removed but Not Yet Disposed (Account 199500).** The General Property, Plant, and Equipment Permanently Removed but Not Yet Disposed account is used to record the value of General PP&E assets that have been permanently removed from service. Upon permanent removal from service, IUS assets must be recorded at their expected net realizable value (NRV) and must cease to be amortized. See paragraph 270209 for guidance on reporting IUS assets that have been permanently removed from service.

2.2.6. **Gains on Disposition of Assets – Other (Account 711000).** This account is used to record the gain on the disposition (such as sale, exchange, disposal, or retirement) of assets not associated with investments or borrowings/loans.

2.2.7. **Losses on Disposition of Assets – Other (Account 721000).** This account is used to record the loss on the disposition (such as sale, exchange, disposal, or retirement) of assets not associated with investments or borrowings/loans.

*2.3 Acquisition/Valuation (270203)

2.3.1. **Recorded Cost.** When acquiring IUS, the acquisition cost and other costs necessary to bring the software to an operable condition must be recognized in accordance with paragraph 270204.
2.3.1.1. COTS Software. The capitalized cost of COTS software must be the actual purchase price, plus any costs incurred to place the software in service or otherwise make the software ready for use.

2.3.1.2. Contractor-Developed Software. The capitalized cost of contractor-developed software must include the amount paid to the contractor to design, program, install, and implement new software or to modify existing or COTS software, plus any costs incurred to implement or otherwise make the software ready for use.

2.3.1.3. Internally Developed Software. The capitalized costs of internally developed software must include the full cost (direct and indirect costs, as described in subparagraphs 270203.A.4.a, 270203.A.4.b and 270203.A.4.c) incurred after:

2.3.1.3.1. The DoD Component authorizes and commits to a software project and believes that it is more likely than not that the project will be completed and the software will be used to perform the intended function(s), and it will have an estimated service life of two years or more; and

2.3.1.3.2. The completion of the conceptual planning/planning and requirements phase (i.e., project evaluation, concept testing, and evaluation alternatives) as evidenced by a documented approval decision.

2.3.1.4. Table 27-1. This table provides a matrix of the software project phases and their related processes. The treatment of costs must be applied based on the nature of the costs incurred, not the exact sequence of the work. Full cost includes the costs of new software (e.g., salaries of programmers, systems analysts, project managers, and administrative personnel; associated employee benefits; outside consultants’ fees; rent; and supplies and overhead) and technical documentation. The development of technical documentation and manuals must be capitalized, but the costs of mass-producing manuals should be expensed in the period incurred. The various types of costs incurred during the software project phases include:

2.3.1.4.1. Direct Labor Costs. Direct labor costs are typically the labor costs of project teams (e.g., programmers, engineers, managers) incurred during the Design/Development and Testing/Implementation Phase and are capitalized as part of the costs of the software project. Project managers and/or program managers must track direct labor cost and allocate to individual software projects. The allocation methodology must be consistent between projects and must be auditable.

2.3.1.4.2. Indirect Labor Costs. Indirect labor costs are typically the labor costs associated with the Program Management Office (PMO) personnel responsible for overseeing more than one software project. In many instances, PMO indirect labor costs are immaterial when compared with the overall costs of a software project, and if determined to be immaterial, can be expensed. Decisions regarding the materiality of indirect labor costs, when such costs are expensed, must be justified, documented, and must be able to stand up to audit scrutiny. If indirect labor costs are determined to be material to a software project or projects and are to be distributed to the capitalized costs of such project, the costs must be allocated based on a distribution methodology that is consistently applied, documented and auditable.
2.3.1.4.3. **Overhead Costs.** Overhead costs are those costs associated with utilities, building maintenance, and supplies that are essential to the overall accomplishment of a software project. In many instances, overhead costs are immaterial when compared with the overall costs of a software project and if determined to be immaterial, the DoD Components should expense these costs. Decisions regarding the materiality of overhead costs when such costs are to be expensed must be justified, documented, and must be able to stand up to audit scrutiny. If overhead costs are determined to be material to a software project or projects and are to be distributed to the capitalized costs of such project, the costs must be allocated based on a distribution methodology that is consistently applied, documented and auditable.

2.3.1.4.4. **Contractor Costs.** Contractor costs must be evaluated to determine whether the costs are to be expensed or capitalized. Such determination is based on the type of work performed by the contractors. Table 27-1 provides a breakdown of the various work activities and whether the cost of such activities must be expensed or capitalized.

2.3.1.4.5. **Data Conversion Costs.** All data conversion costs incurred for internally developed, contractor developed, or COTS software must be expensed as incurred, including the cost to develop or obtain software that allows for access or conversion of existing data to the new software. Such costs may include the purging or cleansing of existing data, reconciliation or balancing of data, and the creation of new or additional data.

2.3.2. **Software Development Phases Determine Recorded Cost (Internally Developed Software).** Software’s life-cycle phases include planning, development, and operations. This subparagraph provides a framework for identifying software development phases and processes to help isolate the capitalization period for IUS that the DoD entity is developing. The three phases of software development described in subparagraph follow a linear software development method. Generally, costs incurred during the development phase are to be capitalized and costs incurred in other phases are to be expensed. However, software development under other methods does not follow this linear approach and capitalization decisions absent distinct phases are more difficult. Regardless of timing, the cost incurred for development phase activities must be capitalized or expensed based on their substance/task activity rather than their phase. The three phases of software development are:

2.3.2.1. **Conceptual Planning/Planning and Requirements Phase.** In this phase, the DoD Components will most likely do the following:

2.3.2.1.1. Make strategic decisions to allocate resources between alternative projects at a given time. For example, should programmers develop new software or direct their efforts toward correcting problems in existing software?

2.3.2.1.2. Determine performance requirements (i.e., what it is that they need to do)?

2.3.2.1.3. Invite vendors to perform demonstrations of how their software will fulfill a DoD Component’s needs.
2.3.2.1.4. Explore alternative means of achieving specified performance requirements. For example, should a DoD Component make or buy the software? Should the software run on a mainframe or client server system?

2.3.2.1.5. Determine that the technology needed to achieve performance requirements exists.

2.3.2.1.6. Select a vendor if a DoD Component chooses to obtain COTS software.

2.3.2.1.7. Select a consultant to assist in the software’s development or installation.

2.3.2.2. Software Design/Development and Testing/Implementation Phase. In this phase, the DoD Components will likely to do the following:

2.3.2.2.1. Use a system to manage the project;

2.3.2.2.2. Track and accumulate life-cycle cost and compare it with performance indicators;

2.3.2.2.3. Determine the reasons for any deviations from the performance plan and take corrective actions;

2.3.2.2.4. Test the deliverable to verify that they meet the specifications.

2.3.2.3. Operations and Maintenance/Disposition Phase. In this phase, the DoD Components will likely to do the following:

2.3.2.3.1. Operate the software, undertake preventative maintenance, and provide ongoing training for users;

2.3.2.3.2. Convert data from the old to the new system;

2.3.2.3.3. Undertake post-implementation review comparing asset usage with the original plan; and/or

2.3.2.3.4. Track and accumulate life-cycle cost and compare it with the original plan.

PROGRAM MANAGEMENT

The costs of program management and the PMO that may be incurred during each phase of software development or acquisition are indirect costs. PMO indirect costs should be expensed or capitalized, depending on: 1) their materiality to overall costs of individual software development projects, and 2) in which phase the costs are incurred.

2.3.3. Software Development Methods. Software development methods are ever evolving, with new methods and techniques being introduced over time. Included in the following subparagraphs are several descriptive examples of common software development methods.

2.3.3.1. Linear/Waterfall Software Development Method. The linear/waterfall software development method is a sequential design process, used in software development in which progress is seen as flowing steadily downwards (like a waterfall) through the software development phases. The linear/waterfall software development method follows the phases outlined in Table 27-1 in sequence, whereas the other software development methods as described in subparagraphs 270203.C.2 through 270203.C.4 can move between phases during the life of the development. Regardless of the development method (e.g., waterfall, prototyping, agile, or spiral), the capitalization decisions follow the tasks identified.
2.3.3.2. **Prototyping Software Development Method.** The prototyping software development method is a system development method in which a prototype (an early approximation of a final system or product) is built, tested, and then reworked as necessary until an acceptable prototype is finally achieved from which the complete system or product can be developed. This model works best in scenarios where not all of the project requirements are known in detail ahead of time. An iterative, trial-and-error process takes place between the developers and the users.

2.3.3.3. **Agile Software Development Method.** The agile software development method is a group of software development methods in which requirements and solutions evolve through collaboration between self-organizing, cross-functional teams.

2.3.3.3.1. In an agile project, working software is deployed in iterations of typically one to eight weeks in duration, each of which provides a segment of functionality. Initial planning regarding cost, scope, and timing is usually conducted at a high level, and the project status is primarily evaluated based on software demonstrations.

2.3.3.3.2. The IUS development phases listed in subparagraph 270203.B could be applied to agile development projects on an iteration basis. If an iteration developed meets the module or component asset description in accordance with subparagraph 270203.F.3 and the capitalization cut-off period described in subparagraph 270203.F.6, then it could be treated as an individual IUS project. If the numbers of iterations are dependent on the outcomes of multiple processes for a complete function, the cost incurred in these iterations should be grouped together based on the nature of the activities (capital or expense) and treated as one project for the purposes of recognition, measurement, and disclosure. Any future incremental releases that result in additional functionality can be treated as an enhancement of the original IUS project and accounted for in accordance with paragraph 270205.

2.3.3.4. **Spiral Software Development Method.** The spiral software development method combines the features of the waterfall and prototyping incremental models, but with more emphasis placed on risk analysis and management.

2.3.3.4.1. The spiral methodology projects are typically separated into phases like the waterfall method: planning, risk analysis, engineering, and evaluation. However, they are broken up into incremental releases of the product, or incremental refinement through each time around the spiral and through continuously analyzing the requirements and improving the definition and implementation. At each iteration around the cycle, the project is improved and extended.

2.3.3.4.2. The IUS development phases listed in subparagraph 270203.B could be applied to a spiral development project on a process iteration basis. If an iteration developed meets the module or component asset description in accordance with subparagraph 270203.F.3 and the capitalization cut-off period described in subparagraph 270203.F.6, then it could be treated as an individual IUS project. If the number of iterations are dependent on the outcomes of multiple spiral processes for a complete function, the cost incurred in these iterations should be grouped together based on the nature of the activities (capital or expense) and treated as
one project for the purposes of recognition, measurement, and disclosure. Any future incremental releases that result in additional functionality can be treated as an enhancement of the original IUS project and accounted for in accordance with paragraph 270205.

2.3.4. Cross-Functional IUS Reviews. Software development can be complex and accounting decisions often require a measure of judgment and expertise found throughout an organization. Examples of these decisions can include identifying assets that meet the IUS definition, determining the point at which an IUS project is more likely than not to be completed, whether an enhancement should be capitalized, and determining the useful life. DoD Components will ensure that key stakeholders from the IUS program, acquisition, and accounting organizations have adequate visibility into the major milestones throughout the acquisition process to make these decisions. This could take the form of an IUS acquisition review board, consisting of knowledgeable stakeholders who assess pending and active IUS projects to make such decisions. It could also include leveraging portfolio management processes already in place at some DoD Components. Stakeholders will meet periodically and with enough frequency to make timely decisions concerning the IUS and the decisions will be documented. Additional cross-functional decisions and deadlines for making them are found in Table 27-2. This review activity can also serve as a key control.

2.3.5. Capital Versus Expense IUS Activities. Many IUS programs and contracts include a variety of activities that are conducted by government and/or contractor personnel throughout the software development life cycle. Some costs associated with these activities should be capitalized as part of the cost of the IUS and some costs should be expensed. Regardless of the software development method (e.g., waterfall, prototyping, agile, or spiral), the capitalization decisions follow the activity. When reviewing contracts and budget documentation, care must be taken to distinguish between activities that are to be capitalized and those that are to be expensed. Refer to Table 27-1 for additional details on capital versus expense for IUS activities.

2.3.6. Capitalizable Cost

2.3.6.1. DoD Components must capitalize the cost of software when such software meets the criteria for General PP&E (see subparagraph 270204.E).

2.3.6.2. Costs related to capitalized activities identified in Table 27-1 must be accumulated in account 183200 (Internal Use Software in Development), but are not amortized until the software is placed-in-service. Costs should begin accumulating in this account if the IUS is anticipated to meet capital criteria and the criteria listed in subparagraph 270203.A.3 have been met.

2.3.6.3. Accumulated costs must be transferred to account 183000 (Internal Use Software) when the IUS is placed-in-service (see placed-in-service dates in subparagraph 270207.C). Many larger and more complex software systems, such as Enterprise Resource Planning systems, are developed and placed-in-service over time. For each module or component of a software project, costs must be moved from account 183200 (Internal Use Software in Development) to account 183000 (Internal Use Software), and amortization must begin when a module or component has been successfully tested. If the use of a module is dependent on the completion of another module(s), the movement from 183200 to 183000 will take place and amortization will begin when both that module and the other module(s) have successfully completed testing. For example, a DoD Component may develop an accounting software system containing three modules: a general ledger, an accounts payable sub-ledger, and an accounts receivable sub-ledger. In this example, each module could be analyzed to determine whether it could be treated as a separate IUS asset. Specifically, if the module provides economic benefit through distinct, substantive functionality, and meets the tests for capitalization threshold, ownership, and eligibility for capital treatment, then the module could be treated as a separate IUS asset.

2.3.6.4. Capitalized IUS costs must have sufficient supporting documentation as discussed in paragraph 270302, including support for costs incurred in the development of the IUS. Documentation in the form of narratives, software architectural documentation, user manuals and other similar documents supporting the functionality of the components/modules of a software system must be available to substantiate whether the IUS should be treated as separate IUS assets.
2.3.6.5. The full cost (direct and indirect cost as described in subparagraphs 270203.A.4.a through 270203.A.4.d) incurred during the software development phase must be capitalized. Considering economic feasibility, a cost estimation technique could be developed to trace the costs to outputs based on the SFFAS 4, paragraph 124, provision that “[i]n principle, costs should be assigned to outputs in one of the methods listed in the order of preference:

2.3.6.5.1. Directly tracing costs wherever economically feasible;

2.3.6.5.2. Assigning costs on a cause-and-effect basis; and

2.3.6.5.3. Allocating costs on a reasonable and consistent basis.

2.3.6.6. Costs incurred after final technical acceptance testing has been successfully completed must be expensed (see Table 27-1). Technical acceptance testing is testing undertaken to verify if a software product meets technical specifications. Technical acceptance testing costs are capitalizable costs. Operational testing and evaluation and other functional testing conducted after technical acceptance must be expensed. Similarly, if the software consists of multiple individual components or modules, the capitalization phase must end for each component/module after technical acceptance testing is complete for that component/module. In some development practices, each iteration within an IUS development has its own acceptance testing before moving forward to the next iteration and final acceptance testing may not always be performed. The entity should identify a pre-determined agency milestone such as the go-live or in-service date, which is equivalent to a final technical acceptance test for capitalization cut-off purposes.

2.3.6.7. For COTS software, capitalized costs must include the amount paid to the vendor for the software. For contractor-developed software, capitalized costs must include the amount paid to a contractor to design, program, install, and implement the software. Material internal costs incurred by the Federal Entity to implement the COTS or contractor-developed software and otherwise to make it ready for use must be capitalized.

2.3.7. Documentation

2.3.7.1. When recording the acquisition of IUS in the Accountability Property System of Record (APSR) and/or accounting system, the software must be assigned a dollar value (i.e., recorded cost) as detailed in this chapter. Appropriate documentation must be available to support the dollar value. Paragraph 270302 includes a complete discussion of supporting documentation related to IUS.
2.3.7.2. To establish proper PP&E financial control when acquiring IUS from another DoD Component or Federal Agency, the acquiring DoD Component must request from the losing DoD Component or other Federal Agency, the necessary source information and financial transfer documents, to include unique identifier(s) for the software(s); location; original acquisition cost(s); cost of enhancements; the date the software was developed, or acquired; the estimated useful life; the amount of accumulated amortization; and other relevant information linked to that software. If this information is not available, the gaining and losing entities must develop and document a reasonable estimate to support the financial transfer of the software.

*2.4 Recognition (270204)

DoD Components must recognize all acquired IUS for accountability and financial reporting purposes. Recognition requires the proper accounting treatment (expense or capitalization with amortization) and the reporting of capitalized amounts and accumulated amortization on the appropriate DoD Component’s financial statements. For financial reporting purposes, all IUS that has a useful life of two years or more and meets the capitalization criteria described in subparagraph 270204.E must be capitalized. IUS that does not meet the capitalization threshold must be expensed.

2.4.1. Recognition Responsibility

2.4.1.1. The DoD Component’s financial reporting responsibility can be determined using a two tier criteria:

2.4.1.1.1. Exclusive/sole Use. When a DoD Component is the exclusive/sole user of capitalized IUS, it will report the IUS on its Balance Sheet. If there is no exclusive/sole user, the DoD Component must apply the second criteria.

2.4.1.1.2. Control. If an exclusive/sole user does not exist, the DoD Component that controls the IUS will have financial reporting responsibility. Evidence of control can include funding the software maintenance, exercising access control, and prioritizing enhancements.

2.4.1.2. DoD Components that possess and/or control IUS items that materially contribute to the Component’s mission must maintain accounting and financial reporting for such items, regardless of the organization that originally acquired or provided the funding for the items. If a DoD Component prepares financial statements, such IUS items must be appropriately recognized in its financial statements.
2.4.2. Recognition Uncertainty

2.4.2.1. It is important that the overall accounting records of the DoD and the Federal Government are not duplicative. In situations where doubt exists as to which DoD Component should recognize an item, DoD Components involved must reach agreement with the other applicable DoD Components or Federal agencies as to which entity will recognize the item. The process used to reach this agreement and the terms of the agreement must be documented in a memorandum of agreement and be considered supporting documentation.

2.4.2.2. If an agreement cannot be reached, the matter must be referred to the Office of the Deputy Chief Financial Officer, Office of the Under Secretary of Defense (Comptroller) for resolution. Requests for resolution must be accompanied by adequate supporting documentation to assist in resolution of the matter and be submitted through the Financial Management and Comptroller of the submitting Military Department or Defense Agency.

2.4.3. Recognition Timing

2.4.3.1. Recognition of the COTS IUS for financial reporting purposes must occur no later than the technical acceptance of the software.

2.4.3.2. IUS in development must be recorded in the Internal Use Software in Development account (USSGL 183200) during the design, development and testing, and implementation phases. After technical acceptance testing is completed, an IUS asset will be recognized, capital costs will be transferred to the Internal Use Software account (USSGL 183000), and accountability must be established in the APSR.

2.4.3.3. For IUS assets acquired by a contractor on behalf of a DoD Component (i.e., the DoD Component that will ultimately hold title/license to the assets), the software must be recognized upon completion of the technical acceptance testing by the contractor performing the service, or by the DoD Component. Contract financing payments (e.g., progress payments, performance-based payments, and commercial interim payments) made to a contractor prior to completion of final technical acceptance testing must be recorded in a Software in Development account until the IUS is placed-in-service. Upon completion of technical acceptance testing, the Contractor Acquired Property (CAP) must be capitalized in the appropriate USSGL account. See subparagraph 270203.F for guidance on the use of the Software in Development account.

2.4.4. Capitalization Thresholds

2.4.4.1. The current IUS capitalization threshold for all DoD Components is $250,000, except for the Office of the Director of National Intelligence, for which the capitalization threshold is $1 million.
2.4.4.2. IUS with a cost that equals or exceeds the appropriate capitalization threshold must be capitalized according to subparagraph 270204.E as an asset in the appropriate DoD Component’s accounting records and amortized over its useful life. IUS items with a cost below the appropriate capitalization threshold must be expensed; with the exception of IUS items acquired as part of a qualifying bulk purchase (see subparagraph 270204.G).

2.4.4.3. The capitalization threshold described in subparagraph 270204.D.1 is for financial reporting purposes. The requirement for accountability of IUS is discussed in subparagraph 270204.K.

2.4.5. Capitalization Criteria

2.4.5.1. IUS is recognized and capitalized if it meets the following criteria for General PP&E:

2.4.5.1.1. Useful life of two years or more;

2.4.5.1.2. Intended for use or being available for use by the entity;

2.4.5.1.3. Not intended for sale in the normal course of business; and

2.4.5.1.4. Total cost is greater than DoD Component’s capitalization threshold (as described in subparagraph 270204.D).

2.4.5.2. As development work accumulates, the costs must be entered into an Internal Use Software In Development account (183200). When the IUS passes final technical acceptance testing, the accumulated costs must be removed from the “In Development” account and transferred to the Internal Use Software account (183000). Accounting entries for this account are specified in the DoD USSGL Transaction Library.

2.4.6. Joint Ventures

If IUS is developed through a joint venture between two or more entities, including at least one entity outside of the DoD, the DoD Component must capitalize the IUS asset if it meets the criteria for capitalization, based on its portion of the development cost in relation to the capitalization threshold. The DoD Component will only record the portion it funded which will be capitalized if it meets the criteria for capitalization.
2.4.7. Bulk Purchases of Software Applications/Programs

2.4.7.1. Bulk purchases must be considered if they may materially affect the fiscal year financial statements during which they were purchased. The determination of whether an item is material depends on the degree to which omitting or misstating information about the item makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or the misstatement. To ensure that the statements are not materially affected, new bulk purchases of software with an aggregate cost that exceeds the capitalization threshold must be capitalized.

2.4.7.2. An exception to this requirement includes license agreements that do not meet the criteria established for capital leases in subparagraph 270204.H. Costs related to such purchases must be expensed in the period incurred.

2.4.7.3. When multiple acquisitions of the same IUS application(s)/programs (for example spreadsheets, word processing programs, etc.) or modules or components of a software system are made as part of a single contract within a fiscal year, the purchases must be added together to determine whether they meet the capitalization threshold. Purchases made on a single contract during separate fiscal years are to be considered separately. DoD Components must not split bulk purchases into multiple transactions with the intent of avoiding capitalization.

2.4.7.4. Bulk purchases of licensed IUS with terms less than two years in length do not need to be considered for capitalization. Table 27-3 provides capitalization guidelines for bulk purchase licenses.

Table 27-3. Capitalization is Dependent on Term and Aggregate Purchase Amount

</tr>
<tr>
<td>License Term = / &gt; 2 years or Perpetual</td>
<td>Equal to or exceeding capitalization threshold*</td>
<td>Capitalize</td>
</tr>
</tbody>
</table>

*Maintenance agreements included in the purchase of licenses are not to be considered part of the cost for this determination.

2.4.8. Software Licenses

2.4.8.1. Software licenses are defined as licenses for which the license holder is only entitled to use the software for a specified time period, after which the right to use the software expires and the license must be renewed or a new license purchased in order to continue using the software. License agreements to use software come in many forms and vary in length of the license period. Software licenses can be term or perpetual.

2.4.8.1.1. Term licenses provide the right to use the software for a specified period of time. The determination of whether term licensed IUS will be capitalized or not must be based on lease accounting concepts in which the criteria in Table 27-3 are applied.
2.4.8.1.2. Perpetual software licenses give the DoD Component the right to use the software in perpetuity in exchange for an upfront cost, which could be charged as a one-time payment or financed over a set period of time. If the license is perpetual, then the entity is purchasing the IUS and must apply the capitalization criteria to determine if the license must be capitalized or expensed.

2.4.8.2. If one of the following criteria applies, the IUS can be expensed and the lease criteria analysis does not need to be conducted:

2.4.8.2.1. The license term is less than two years;

2.4.8.2.2. The license cost (excluding any maintenance agreements) is less than the capitalization threshold; or

2.4.8.2.3. The aggregate cost of a bulk license purchase (excluding any maintenance agreements) is less than the capitalization threshold. See subparagraph 270204.G for guidance related to bulk purchases of software.

2.4.8.3. If none of the criteria listed in subparagraph 270204.H.2 is applicable, the capital lease criteria described in Table 27-4 must be applied. If any one or more of the criteria listed in Table 27-4 apply, the IUS must be recorded as a capital lease.
Table 27-4. Capital Lease Criteria as Applied to Licenses

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>The license transfers ownership of the property to the licensee by the end of the license term.</td>
<td>For IUS, this would mean that the license transfers ownership of the intellectual property (e.g., source code) to the licensee by the end of the license term.</td>
</tr>
<tr>
<td>The license contains an option to purchase the software at a bargain price.</td>
<td>For IUS, this would mean that the license contains an option to purchase the software intellectual property (e.g., source code) at a bargain price.</td>
</tr>
<tr>
<td>The present value of minimum license payments, excluding that portion of the payments representing executory cost, equals or exceeds 90 percent of the fair value of the software.*</td>
<td>It is very unusual for software to meet this criteria. The value of the software itself typically far outweighs a license to use a copy of it.</td>
</tr>
<tr>
<td>The license term is equal to or greater than 75 percent of the estimated economic life of the software.*</td>
<td>Some licenses may meet this criteria. Economic life is defined as the estimated remaining period during which the property is expected to be economically usable by one or more users, with normal repairs and maintenance, for the purpose for which it was intended at the inception of the lease, without limitation by the lease term. For example, a perpetual license will always be equal or greater than 75 percent of the estimated economic life. A license term of 5 years for software that has an economic life of 10 years would not meet this criteria.</td>
</tr>
</tbody>
</table>

* The last two criteria are not applicable when the beginning of the license term falls within the last 25 percent of the total estimated economic life of the software.

2.4.8.4. A license agreement may include executory costs for maintenance and technical support. DoD Component judgment should apply in determining what portions of license fees are attributable to software capitalizable costs versus executory costs. Assuming lease capitalization criteria and thresholds are met, software license capitalization amounts may be derived from the payment schedule contained in the license agreement. As stated in SFFAS 5, if the portion of the minimum lease payments representing executory cost is not determinable from the lease provisions, the amount should be estimated. DoD Components may also want to consider having each license agreement specifically identify the various costs throughout the license life cycle, for example, initial license, maintenance, and enhancement.

2.4.8.5. Additional guidance regarding accounting for license agreements includes:

2.4.8.5.1. Maintenance costs agreed to as part of the initial license agreement are to be expensed in the period they are incurred;

2.4.8.5.2. “True-up” costs associated with unlimited license agreements or enterprise licenses that may occur (depending on the agreement terms) at the end of each year to reconcile and account for the actual quantity of users will also be expensed; and
2.4.8.5.3. Software upgrades that are included in annual maintenance and security assurance agreements should be expensed, not be capitalized as enhancements or separate assets.

2.4.8.6. License agreements that do not meet the criteria established for capital leases set out in Table 27-4 must be expensed by the DoD Component in the period incurred.

2.4.9. Cloud and Other Subscription Based Services

2.4.9.1. A cloud computing service is any resource that is provided over the Internet. It has the following essential characteristics: on-demand self-service, broad network access, resource pooling, rapid elasticity, and measured service. The most common cloud service resources are: software as a service, platform as a service, and infrastructure as a service. Cloud services can take a number of forms. To determine whether the arrangement includes capitalized IUS, the DoD Component will need to examine the nature of the arrangement and apply the capitalization criteria.

2.4.9.2. When a DoD Component pays regular subscription fees to access and use software that is funded, maintained, and owned by a non-DoD entity, the subscription costs are to be expensed in the period incurred. This scenario is a service and does not constitute an IUS asset for the DoD Component.

2.4.9.3. A subscription arrangement using a cloud with a non-DoD entity can result in DoD-owned IUS if the using DoD Component takes possession, or has the ability to take possession of a software application without incurring a significant penalty. DoD Components must capitalize this IUS if it meets the capitalization criteria as described in subparagraphs 270204.D and 270204.E.

2.4.9.4. When a cloud or subscription arrangement exists between DoD Components, the Component that owns the software (see subparagraph 270204.A) will report it as IUS. The subscribing DoD Component(s) will expense any fees paid for the service in the period incurred.

2.4.9.5. If a cloud computing arrangement includes a software license, the customer must account for the software license element of the arrangement consistent with the acquisition of other software licenses in accordance with the lease criteria discussed in subparagraph 270204.H. SFFAS 10 is not applicable to a cloud computing arrangement that does not convey a contractual right to the IUS or to ones that do not include an IUS license. The entity that develops and owns the software, platform or infrastructure used in the cloud computing arrangement would account for the software development in accordance with SFFAS 10. If the funding to develop cloud computing is shared among entities without clear ownership, the service provider entity that receives funding and is responsible for maintaining the software, platform or infrastructure must account for the software in accordance with SFFAS 10 and the full cost/inter-entity cost requirements of SFFAS 4.
2.4.10. Shared Services

2.4.10.1. Shared services means a mission or support function provided by one business unit to other business units within or between organizations. The funding and resourcing of the service is shared and the providing entity effectively becomes an internal/external service provider.

2.4.10.2. There are three types of shared service structures in the Federal Government:

2.4.10.2.1. **Intra-agency.** Intra-agency shared services include those provided within the boundaries of a specific organization such as a Federal Department or Agency, to that organization’s internal units. Intra-agency shared services would be those between one DoD Component and another DoD Component.

2.4.10.2.2. **Inter-agency.** Inter-agency shared services are those provided by one Federal Organization to other Federal Organizations that are outside of the provider’s organizational boundaries. Inter-agency shared services would be those between one DoD Component and another Federal Agency/Organization outside of DoD.

2.4.10.2.3. **Commercial.** Commercial shared services are those provided by private vendors.

2.4.10.3. For intra-agency shared services, a cost allocation methodology could be developed in accordance with SFFAS 4, paragraphs 120-125. Additional guidance on cost allocation methodology can be found in the Volume 4, Chapter 19. For inter-agency shared services and commercial shared services, the service provider entity that owns (receives funding/responsible for maintaining) the software must account for the software in accordance with SFFAS 10. In the event that the entity receiving the service (the customer) has the contractual right to take possession of the software at any time during the hosting period without significant penalty, and it is feasible for the customer to either run the software on its own hardware or contract with another party unrelated to the vendor to host the software, then the customer must account for the software in accordance with SFFAS 10.

2.4.10.4. If the shared service arrangement includes a software license, the DoD Component must account for the software license element of the arrangement consistent with the acquisition of their other software licenses, as discussed in subparagraph 270204.H. SFFAS 10 is not applicable to a shared service arrangement that does not convey a contractual right to the IUS or to ones that do not include an IUS license.
2.4.11. Accountable Records of IUS

DoD Components must establish accountable records for all government IUS purchased or otherwise obtained. IUS which meets the criteria for capitalization must be accounted for in an APSR. IUS which does not meet the criteria for capitalization must be accounted for in either an APSR or approved managerial system. Managerial systems must contain all general data elements that would be contained in a data compliant APSR. In addition, managerial systems must have documented controls and procedures in place that are sufficient to withstand potential audit scrutiny and support the audit requirement of a complete universe of assets. The primary Accountable Property Officer or designated delegate should grant managerial system approval. See DoDI 5000.76.

*2.5 IUS Enhancements (270205)

2.5.1. An IUS enhancement is a modification to existing IUS that provides it with significant additional capabilities and enables the software to perform tasks that it was previously incapable of performing. DoD Components must capitalize an enhancement that increases the capability of the IUS when its cost meets or exceeds the capitalization threshold. Criteria to capitalize enhancements to IUS differs from that of other PP&E in that changes that merely extend the useful life or improve efficiency are to be expensed, irrespective of the cost. (Even though the costs associated with the extension of useful life are expensed, the amortization of any previously capitalized amount must be extended to reflect that new useful life period.) Capitalizable enhancements normally require new software specifications and may require a change to all or part of the existing software specifications. For example, DoD Components should capitalize the cost of modifying existing software for making ad hoc queries, if it required new software specifications and/or changes to existing software specifications and it also exceeds the capitalization threshold. In addition, the DoD Components should expense the nominal charges paid for enhanced versions of software in the period incurred.

2.5.2. If one module is dependent upon another to function, then those modules must be evaluated together as one enhancement. Components must amortize all costs of an enhancement that have been capitalized based on the IUS capitalization criteria, including any costs carried over or allocated from the original software, over the enhancements estimated useful life, which should not exceed five years.

2.5.3. DoD Components must begin accumulating costs for enhancements when it is determined that it is more likely than not that the enhancement will result in new capabilities; and the project phase in which the costs are being incurred and the nature of the cost meets the criteria for capitalization treatment set out in Table 27-1; and the estimated total cost of the enhancement meets the IUS capitalization threshold. When the development of the enhancement takes place over multiple periods, the costs will accumulate in account 183200 (Internal Use Software in Development) until the completion of the enhancement (see subparagraph 270207.C on placed-in-service dates), at which time the costs are moved to account 183000 (Internal Use Software).
2.5.4. DoD Components must separately account for enhancements in a manner that allows them to specifically identify and support each capitalized enhancement made to the IUS.

2.5.5. An enhancement to IUS that meets or exceeds the capitalization threshold to correct a design flaw, and in effect doubles its useful life, must be expensed in the period incurred, unless the enhancement adds new capabilities to the software. However, the useful life of the IUS is subject to adjustment and must reflect the enhancement. Knowledgeable personnel must determine and document the additional useful life, which should not exceed five years added to the existing useful life.

2.5.6. The cost of minor enhancements resulting from ongoing systems maintenance or incurred solely to repair a design flaw without adding additional capabilities must be expensed in the period incurred. Examples of minor enhancements include updating data tables, web-enabling, customizing reports, or changing graphic user interfaces. Enhancements that extend the useful life of the software without adding significant capabilities are to be considered minor enhancements and expensed. However, in instances where the useful life of the software is extended, the amortization period must be adjusted as described in subparagraph 270205.E.

2.5.7. A specific software development project may include expenditures for enhancements and maintenance that cannot be easily separated but may be reasonably and consistently allocated. One approach that can be used is a ratio based on the projected work hours for development phase activities relative to other types of work. Such a ratio can be applied to determine the expenditures that should be capitalized when the expenses meet the other capitalization criteria. The basis for allocating costs must be applied consistently and in accordance with GAAP.

2.5.8. Documentation related to IUS enhancement decisions, such as the justification for capitalizing the enhancement, a change of useful life, and the amount capitalized must be retained. Specific documents that support these decisions can vary by organization and asset, but could include an analysis from software developers or a cross-functional review team that defines the enhancement’s impact on functionality and useful life.

2.5.9. The cost of enhancements to more than one IUS asset as identified by a unique identifier, when performed under a single contract or work order that cannot be specifically identified by asset must be capitalized only if the allocated cost per IUS equals or exceeds the appropriate DoD capitalization threshold and the enhancements are determined more likely than not to add additional capability to the existing software.

2.5.10. When a single IUS goes under more than one enhancement and the enhancements are part of one overall effort to increase the software’s functionality, and/or useful life; the sum of the costs of the enhancements must be capitalized, if the summed costs equal or exceed the appropriate DoD capitalization threshold. This is required even when the enhancements are funded separately. The enhancements must be capitalized when the determination has been made that it is more likely than not that the enhancements will result in new significant capabilities.
2.6 Maintenance and Repair (270206)

2.6.1. Maintenance and repair costs are not considered capital enhancements, regardless of whether the cost equals or exceeds DoD capitalization threshold. Maintenance and repairs are activities directed toward keeping IUS asset in an acceptable condition so that it continues to provide services and achieves its expected useful life. Maintenance and repair activities include subsequent security accreditations (not included in user acceptance testing); software diagnostics; repair processing and/or performance failures; updates to documentation; minor software updates; minor corrections to design flaws; and other activities needed to preserve or maintain the software. Maintenance and repairs, as distinguished from enhancements, exclude activities directed towards expanding the capacity of IUS or otherwise upgrading it to serve needs different from, or significantly greater than, its current use.

2.6.2. The costs of maintenance agreements purchased with a software license are not included in the historical cost of IUS when determining whether to capitalize the IUS. If maintenance costs are not distinguishable from the cost of the license itself, reasonable and documented estimating methods must be used. Upgrades that are included in annual maintenance and security assurance agreements will not be capitalized as enhancements or separate assets.

*2.7 Amortization (270207)

2.7.1. Amortization is the systematic and rational allocation of the acquisition cost of IUS, over its estimated useful life. The DoD recovery periods (useful life) for IUS amortizable assets are set out in Table 27-5. The useful life must be determined during the planning phase of the software development, based on the length of time it is expected to have economic benefit or service potential to the DoD Component. The decision on the useful life must be documented and made with input from personnel familiar with the software’s technical characteristics and planned use. Software acquired for research and development with no alternative future use will be amortized over the period of the project as opposed to the normal life-cycle amortization.

2.7.2. The recorded cost of IUS and enhancements to IUS, which have been capitalized according to the guidance in Table 27-1, must be amortized. Such capitalized amounts, as well as associated amounts of accumulated amortization and amortization expense, must be reflected in DoD Component’s financial statements.

2.7.3. DoD Components must document the placed-in-service dates for both acquired IUS and developed IUS. Documented placed-in-service dates are critical in determining when to start amortization of capitalized IUS costs. IUS is considered placed-in-service when final technical acceptance testing is completed. The point at which this milestone is reached can vary for different types of software acquisitions.

2.7.3.1. For IUS acquired through a Major Automated Information System acquisition program, the Full Deployment Decision date made by the Milestone Decision Authority will serve as the placed-in-service date.
2.7.3.2. For other IUS system acquisitions, the Initial Operational Capability (IOC) date will be used as the placed-in-service date. System’s Capability Development Document (CDD) and/or Capability Production Document (CPD) often define the IOC. DoD Components can use other supporting documents for acquisitions that do not require a CDD or CPD.

2.7.3.3. If knowledgeable parties within a DoD Component determine that a placed-in-service date other than the ones listed in subparagraphs 270207.C.1 and C.2 better align to the completion of final technical acceptance testing for a specific software acquisition, the alternate placed-in-service date can be used. However, the DoD Components must document and justify the decision.

2.7.4. Before beginning amortization, the IUS must have successfully completed final acceptance testing. This criteria is necessary, especially for internally developed software but also for contractor-developed and COTS software because testing plays a major role for software assets by demonstrating that the software product can meet the requirements and of the need for a clear point for ending the developmental phase.

2.7.5. When IUS is replaced with new software, the unamortized cost of the old software must be expensed when the new software successfully completes testing. No adjustments will be made to the previously recorded amortization. Any additions to the book value or changes in useful life must be treated prospectively. The change should be accounted for during the period of the change and future periods.

2.7.6. All IUS must be accounted for in an APSR. Figure 27-2 provides a decision tree to assist in determining what elements of an IUS project should be capitalized for financial reporting purposes.

2.7.7. Proper supporting documentation must be retained by the program office to justify the estimated useful life of the program. Examples of proper documentation are engineering estimates, operational requirements documents, mission needs statements, commercial industry-equivalent information, contracts, and acquisition documents (such as the Select Acquisition Report). See paragraph 270202 for additional information on supporting documentation requirements.

2.7.8. In the case of IUS assets, after the successful completion of the final technical acceptance testing described in subparagraph 270201.D, the event that triggers the calculation of amortization is the date the asset is installed and placed-in-service (regardless of whether it is actually used). In the case of internally developed IUS, the costs of developing the IUS that are capitalizable should be recorded in the Internal Use Software in Development account (183200) but are not amortized until the software is placed-in-service, at which time the balance (total capitalizable development costs) should be transferred to the Internal Use Software account (183000). Amortization should begin when a module or component has been successfully tested. If the use of a module is dependent on the completion of another module(s), the movement from account 183200 to account 183000 will take place and amortization will begin when both that module and the other module(s) have successfully completed testing and are placed-in-service.
2.7.9. DoD policy permits the use of only the straight-line method of amortization. **Straight-line amortization expense** is calculated based on the recorded cost divided equally among accounting periods during the software’s useful life based on recovery periods in Table 27-5. The salvage value for all capitalized IUS for the DoD Components should be zero.

2.7.10. If an **IUS asset** remains in use longer than its estimated useful life, it **must** be retained in the **APSR**, as well as the accounting records, and reflect both its recorded cost and accumulated amortization until disposition of the **software**.

2.7.11. WCF activities are required to recognize and **amortize IUS assets** in accordance with the guidance in this chapter without regard to whether such assets are procured through a WCF activity’s Capital Purchase/Investment Program budget or whether amortization for such assets is included in rates charged to customers. The recognition of **IUS assets** and the **amortization** of such assets by WCF activities therefore may be different for financial statement reporting purposes than the **amortization amounts** used for WCF rate development and budget presentation. All **IUS asset amortization** of WCF activities **must** be recognized as an expense on the Statement of Net Cost, reflected in the Statement of Changes in Net Position, included in accumulated amortization amounts on the Balance Sheet, and reported in the “Defense Working Capital Fund Accounting Report [Accounting Report (Monthly) 1307] (AR(M)1307).” Accounting Report 1307 is described in Volume 6a Chapter 15. **Amortization** recorded on **IUS assets** that was not acquired nor will be replaced through use of Defense WCF resources **must** be classified as non-recoverable for rate setting purposes and reported appropriately on the AR(M)1307. Defense WCF rates charged to customers are based on guidance in Volume 2B and Volume 11B.
Table 27-5. DoD Recovery Periods for Amortizable IUS Assets

<tr>
<td>Enhancements</td>
<td>Not more than 5 years***</td>
</tr>
</tbody>
</table>

* The useful life will be determined during the planning phase of the asset’s development based on the length of time it is expected to have economic benefit or service potential to the DoD Component.

** The amortization period of an IUS must be adjusted (not extending more than 5 years) if minor upgrades resulting from ongoing systems maintenance or repair of a design flaw extend the useful life of the software without adding additional capabilities. The cost of the upgrades should be expensed in the period incurred. Also note the upgrades that do add additional capabilities would be considered enhancements and would be capitalized and amortized if they meet the capitalization criteria in subparagraph 270204.E.

***See paragraph 270205 on the criteria for capitalizing versus expensing of IUS enhancements.

*2.8 Impairment (270208)

2.8.1. Impairment must be recognized and measured when one of the following occurs and is related to post-implementation/operational software:

2.8.1.1. The software is no longer expected to provide substantive service potential and will be removed from service; or

2.8.1.2. A significant reduction occurs in the software’s or software module’s capabilities, functions, or uses.

2.8.2. If the impaired software is to remain in use, the loss due to impairment must be measured as the difference between the book value and either:

2.8.2.1. The cost to acquire software that would perform similar remaining functions (i.e., the unimpaired functions) or, if that is not feasible;

2.8.2.2. The portion of the book value attributable to the remaining functional elements of the software.
2.8.3. The loss must be recognized upon impairment, and the book value of the asset reduced accordingly. If neither criteria listed in subparagraph 270208.B can be determined, the DoD Component should continue to amortize the book value over the remaining useful life of the software. However, this decision and associated analyses must be documented and retained.

2.8.4. If the impaired software is to be removed from use, the loss due to impairment must be measured as the difference between the book value and the NRV, if any. The loss must be recognized upon impairment, and the book value of the asset reduced accordingly. The NRV, if any, must be transferred to an appropriate asset account until the software is disposed of and the amount is realized.

2.8.5. When it is more likely than not that a developmental software project will not be completed, no further costs are to be capitalized and any costs that have been capitalized must be expensed. Indications that the software development may no longer be completed include:

2.8.5.1. The expenditures are neither budgeted nor incurred to fund further development;

2.8.5.2. The discontinuance of the business segment for which the software was designed;

2.8.5.3. The inability to resolve programming difficulties timely;

2.8.5.4. A decision to obtain COTS software instead and abandon the current software development; or

2.8.5.5. Major cost overruns occur.

2.8.6. When a developmental software project is suspended pending management’s evaluation as to whether to resume or terminate the project, the software development cost may remain capitalized in an Internal Use Software in Development account (USSGL 183200) as long as it is more likely than not that the developmental software project will eventually be completed and the cost incurred or expected to be incurred meets the capitalization threshold. The status of the project must be reevaluated periodically and the capitalized cost must be written off if management concludes that it is more likely than not that the software will not be placed-in-service in the future.

2.8.7. The loss from impairment, if any, must be recognized and reported in the Statement of Net Cost in the period in which the DoD Component concludes that the impairment is both (1) a significant decline in service utility and (2) expected to be permanent. Such losses may be included in program costs or costs not assigned to programs. A general description of the IUS for which an impairment loss is recognized, the nature (e.g., damage or obsolescence) and amount of the impairment and the financial statement classification of the impairment loss must be disclosed in the notes to the financial statements in the period the impairment loss is recognized if the amount is significant to the financial statements.
2.8.8. The impairment loss must be reported net of any associated recovery of the net realizable value when the recovery and loss occur in the same fiscal year. Recoveries reported in subsequent fiscal years must be reported as revenue or other financing source as appropriate. The amount and financial statement classification of recoveries must be disclosed in the notes to the financial statements.

2.8.9. The costs incurred to replace or restore the lost service utility of impaired IUS remaining in use must be accounted for in accordance with applicable standards (i.e., recognized according to the nature of the costs incurred and the appropriate capitalization threshold).

*2.9  Removal/Disposal (270209)

2.9.1. In TR 14, FASAB defines removal from service as an event that terminates the use of a General PP&E asset. Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or identification as excess to mission needs. Removal from service must be considered other than permanent unless (1) the asset’s use is terminated and (2) there is documented evidence of the DoD Component’s decision to permanently remove the asset from service. If only one of the two business events has occurred, permanent removal from service has not occurred (i.e., the removal is considered other than permanent).

2.9.2. If an IUS’s normal use is terminated (i.e., it no longer provides service in the operations of the entity) but the DoD Component has not yet decided to permanently remove the IUS from service, the removal from service is considered other than permanent. Other than permanent removal from service is evidenced by activities such as continuing low-level maintenance to sustain the IUS in a recoverable status or until reutilization efforts are exhausted. For example, IUS taken out of service on a temporary basis is considered other than permanently removed from service. In such cases, the recorded cost of the IUS will remain in the Internal Use Software account (USSGL 183000). There is no change in the reported value for IUS that have been other than permanently removed from service and the IUS must continue to be amortized. Amortization charges to expense for IUS will continue to be recorded in USSGL 183900.

2.9.3. If (1) an IUS’s use is terminated and (2) the DoD Component has documented its decision to permanently remove the IUS from service, the removal from service must be accounted for as permanent. Permanent removal from service is evident from the DoD Component’s documented decision to dispose of an IUS by selling, recycling, or donating the IUS. The recorded cost as well as the accumulated amortization of an IUS permanently removed from service must be removed from the accounts in which they are reported, and the IUS must be recorded at its NRV in a General Property, Plant and Equipment Permanently Removed But not Yet Disposed account (USSGL 199500). USSGL account 199500 is defined in the DoD Standard Reporting Chart of Accounts under the DoD Account Definitions tab as the NRV of General PP&E that is permanently removed from service but not yet disposed and is reclassified in accordance with FASAB TR 14, paragraphs 10 and 12. NRV is the estimated amount that can be recovered from disposing of the asset less estimated costs of completion, holding, and disposal. Any difference between the net book value of the asset and its expected NRV must be recognized as a gain or loss. Any gain should be recorded in the Gains on Disposition of Assets – Other account...
(USSGL 711000); any loss should be recorded in the Losses on Disposition of Assets – Other account (USSGL 721000). The expected NRV should be evaluated at the end of each fiscal year and any change in NRV should be recognized as a gain or loss. IUS permanently removed from service is no longer amortized.

2.9.4. When an IUS is disposed of (e.g., by selling, recycling, donating, or destruction) the IUS must be written off from the financial records and financial statements and the difference between any disposal proceeds and the IUS’s net book value must be recognized as a gain or loss as described in subparagraph 270209.C. In such case, if the DoD Component receives a consideration (e.g., cash) for the disposal, a receipt of cash should be recorded in the Fund Balance with Treasury account (USSGL 101000). If the funds (consideration received) are not apportioned to the DoD Component, the fund must be transferred to miscellaneous receipts of the Treasury. There will be no consideration received for a donation. The disposal start date is the calendar date of a legally enforceable and recognizable obligation to complete the disposal action. For transfers and sales, this represents the date on which the instrument is endorsed or operation is ceased, whichever comes later. For natural disasters, this represents the actual date of the incident.

3.0 ADDITIONAL CONSIDERATIONS (2703)

*3.1 Use of Canceled Treasury Account Symbol (270301)

3.1.1. The Department of Treasury's Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) is a data collection system that replaces the reporting functionalities of Federal Agencies Centralized Trial-Balance System I and II, Intragovernmental Fiduciary Confirmation System and Intragovernmental Reporting and Analysis System as the primary means for DoD Components to report their trial balance data to the Department of Treasury. Capitalized assets are required to be reported and remain in GTAS after the original purchasing Treasury Account Symbol (TAS) has expired and been canceled. If a capitalized asset has not been moved to a “C” TAS as described in 270301.B. GTAS will provide a “C” TAS on the GTAS Super Master Account File (SMAF) for each fund family represented on the SMAF. The system generated “C” TAS will have three components: the three-digit agency identifier, availability type "C", and a four-digit main account.

3.1.2. All DoD Components must use the “C” availability type TAS to report capitalized assets. Assets may be moved to a C TAS at any time from the purchase date to the date the original purchasing fund cancels. (Refer to the TFM, Part 2, Chapter 4700 for additional information.)

3.1.3. To transfer an asset to a C TAS:

3.1.3.1. Use USSGL account transaction E510 to transfer-out the asset from the purchasing fund account.

3.1.3.2. Use USSGL account transaction E606 to transfer-in the asset into the appropriate C TAS.
3.2 Supporting Documentation (270302)

Entries to record financial transactions in accounting system general ledger accounts and/or the supporting subsidiary accountable property records and/or systems must:

3.2.1. Be supported by source documents that reflect all transactions affecting the DoD Component’s investment in the IUS.

3.2.1.1. All acquisitions, whether by purchase, transfer from other agencies, donation, or other means, must be supported as of the date the DoD Component takes custody of the IUS. The documents listed in Table 27-6, where applicable, must be readily available to support the changes in asset value or physical attributes as a result of new acquisition or capital enhancement.

</tbody>
</table>
3.2.1.2. All disposals or retirements must be supported as of the date the IUS leaves the custody of the DoD Component to provide an adequate audit trail for the disposal of an asset. The execution of certain disposal events will generate financial or administrative accountability transactions. These documents, where applicable, must be readily available to support disposals:

3.2.1.2.1. ‘Declaration of excess’ document;
3.2.1.2.2. Approval documentation for the disposal;
3.2.1.2.3. Original acquisition documents;
3.2.1.2.4. Legal instruments (such as a license agreement or contract) to indicate legal obligation to dispose of an asset;
3.2.1.2.5. Document showing the disposal start date;
3.2.1.2.6. Receipt documentation; and
3.2.1.2.7. Transfer documents for transferred assets or as otherwise stated.

3.2.1.3. Documents that support the recorded cost of IUS assets must be retained by the DoD Component in accordance with the requirements contained in Volume 1, Chapter 9 or as otherwise stated. Documentation (original documents and/or hard and electronic copies of original documentation) must be maintained in a readily available location during the applicable retention period to permit the validation of information pertaining to the asset such as the purchase cost, purchase date, and cost of enhancements. The documentation must also be linked to the appropriate unique identifier(s). Supporting documentation may include, but is not limited to, the documentation as outlined in this subparagraph. DoD Component asset managers will maintain all applicable documentation for the retention period outlined in Volume 1, Chapter 9.

3.2.2. Include sufficient information indicating the quantity (as applicable would include the number of seats for which the IUS asset is loaded; the number of licenses; and/or the number of copies of a computer disk purchased), location and unit cost (as measured consistently with the criteria for quantification) of the IUS. The accountable property records must be designed to be of maximum assistance in making procurement and utilization decisions, including decisions related to identifying potential excess IUS that may be available for reuse, transfer to other DoD Components, or made available for disposal in accordance with current DoD regulations and other regulatory requirements.

3.2.3. Identify and classify IUS that was capitalized, recorded in the APSR and accounting system, and reported in the financial statements.

3.2.4. Be based on the same documents, to ensure that entries to the accounting and accountable property records are the same. This will ensure that the property accountability
records are integrated and subsidiary to the accounting system and those records can be reconciled with the accounting system.

3.2.5. Include documents used to accumulate the cost of developmental projects. Each document must link to the appropriate asset unique identifier. For a listing of those costs that may be incurred during the development, see Table 27-1.

3.2.6. Include all IUS possessed by the Department (to include property held by others) and IUS of others held by DoD through seizure, forfeiture, loss, or abandonment.

3.2.7. Provide information to identify and account for licenses, regardless of whether the license meets the capital lease criteria or whether the value of the licenses exceeds DoD capitalization thresholds.

3.2.8. Provide information to identify and account for capitalized enhancements to IUS.

*3.3 Reporting Requirements (270303)

DoD Components with IUS should reference a note on the Balance Sheet that discloses information about the reported IUS assets. See Volume 6B, Chapter 10 for the specific reporting requirements.
*Figure 27-2. Capitalization Decision Tree for IUS Purchased from Commercial Off-the-Shelf Vendors; IUS Internally Developed by DoD and IUS Developed by a Third Party on Behalf of DoD*
Annex 1. Definitions and Examples

The following table contains common terms as they are generally defined by information technology and software programming professionals. It also includes scenarios relevant to IUS.

1.0 Establishing Opening Balances for Internal Use Software (A20101)

1.1 The alternative valuation method for establishing opening balances for Internal Use Software (IUS) described in Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standards (SFFAS) 50, “Establishing Opening Balances for General Property, Plant and Equipment: Amending Statement of Federal Financial Accounting Standards (SFFAS) 6, SFFAS 10, SFFAS 23, and Rescinding SFFAS 35” is available only once to each reporting entity. Therefore, prior to the establishment of IUS opening balances, DoD Components must validate that they are prepared to account for and comply with the recognition, measurement, presentation and disclosure requirements for IUS in accordance with FASAB SFFAS 10, “Accounting for Internal Use Software.”

1.2 DoD Components must identify any IUS that they have capitalized prior to establishing opening balances, including capitalized development costs. All DoD Components that have not previously undergone a financial statement audit where they received an unmodified (i.e., “clean”) audit opinion will exclude the value of all IUS, including development costs, from opening balances of General Property, Plant, and Equipment on their Balance Sheet. This means that DoD Components who have not undergone a financial statement audit where they received a “clean” audit opinion will adjust their capitalized IUS, including development costs, opening balances to zero. A DoD Component that has received a “clean” audit opinion should continue to account for IUS, including development costs, in accordance with FASAB SFFAS 10 and will not reduce their balances to zero.

1.3 Entries in the DoD Component accounting systems/records to record IUS opening balances at zero are subject to the reporting requirements under paragraph 13 of FASAB SFFAS 21, “Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources”. Accordingly, the entries will be reflected as a change in accounting principle. Any adjustments must be properly documented and supported to assist ongoing audit efforts.

2.0 Financial Statement Disclosure Requirements (A20102)

DoD Components who adjust their opening IUS balances, including development costs, in accordance with subparagraphs A.20101.B and A.20101.C, must disclose in their financial statements that an alternative valuation method was applied in establishing their opening balances. This disclosure must describe the alternative valuation method used in the first reporting period in which the reporting entity makes an unreserved assertion that its financial statements, or one or more line items, are presented fairly in accordance with Generally Accepted Accounting Principles. An unreserved assertion is an unconditional statement.
3.0 Prospective Accounting for Internal Use Software (A20103)

3.1 Once the opening balances for IUS have been recorded at zero as described in paragraph A.20101.B, the DoD Components shall capitalize IUS costs for IUS placed-in-service and IUS in development in accordance with the provisions of FASAB SFFAS 10 for which guidance is provided in Chapter 27. This capitalization requirement includes IUS development costs incurred after the establishment of opening balances for projects started prior to the establishment of opening balances. The DoD Components must have sufficient source documentation to support the capitalized amounts of IUS based on actual historical cost. The DoD Components must apply the provisions of FASAB SFFAS 10 regarding amortization and impairment to any unamortized capitalized cost of the IUS.

3.2 The DoD Components should also fully implement the systems, internal controls, processes and procedures to be compliant with accounting for IUS under FASAB SSFAS 10. They must also periodically review and update the documentation of the systems, processes, and procedures as needed.
**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by **blue font**.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

HERITAGE ASSETS, MULTI-USE HERITAGE ASSETS AND STEWARDSHIP LAND

1.0 GENERAL (2801)

1.1 Purpose (280101)

This chapter prescribes Department of Defense (DoD) accounting policy for heritage assets, multi-use heritage assets and stewardship land, which are subsets of property, plant and equipment (PP&E). Within PP&E, two categories have been defined for accountability and financial reporting purposes. The categories are: (1) general PP&E which includes multi-use heritage assets; and, (2) stewardship PP&E. Stewardship PP&E includes heritage assets and stewardship land. The applicable general ledger accounts are listed in the United States Standard General Ledger (USSGL) discussed in Volume 1, Chapter 7. Both the DoD Standard Chart of Accounts and the accounting entries for these accounts are specified in the DoD USSGL Transaction Library. Unless otherwise stated, this chapter is applicable to all DoD Components, including Working Capital Fund (WCF) activities.

1.2 Authoritative Guidance (280102)

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.2. FASAB SFFAS 5, “Accounting for Liabilities of the Federal Government”;

1.2.3. FASAB SFFAS 6, “Accounting for Property, Plant, and Equipment”;

1.2.4. FASAB SFFAS 7, “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting”;

1.2.5. FASAB SFFAS 29, “Heritage Assets and Stewardship Land”;

1.2.6. FASAB SFFAS 40, “Definitional Changes Related to Deferred Maintenance and Repairs: Amending Statement of Federal Financial Accounting Standards 6, Accounting for Property, Plant and Equipment”;

1.2.7. FASAB SFFAS 42, “Deferred Maintenance and Repairs: Amending Statements of Federal Financial Accounting Standards 6, 14, 29, and 32”;

1.2.8. FASAB SFFAS 44, “Accounting for Impairment of General Property, Plant, and Equipment Remaining in Use”;
1.2.9. FASAB *SFFAS 50*, “Establishing Opening Balances for General Property, Plant, and Equipment: Amending SFFAS 6, 10, and 23, and Rescinding SFFAS 35”;

1.2.10. FASAB *SFFAS 55*, “Amending Inter-entity Cost Provisions”;

1.2.13. FASAB *(TR) 14*, “Implementation Guidance on the Accounting for the Disposal of General Property, Plant & Equipment”;

1.2.16. DoD Instruction *(DoDI) 4165.14*, “Real Property Inventory (RPI) and Forecasting”;

1.2.17. *DoDI 4165.70*, “Real Property Management”;

1.2.18. *DoDI 4715.16*, “Cultural Resources Management”;

1.2.19. *DoDI 5000.64*, “Accountability and Management of DoD Equipment and Other Accountable Property”;

1.2.20. *Title 54 United States Code, Section 306131 (54 U.S.C. § 306131)*, “Standards and Guidelines”;

1.2.21. Code of Federal Regulations, Title 36, Chapter 1, Part 60, National Register of Historic Places, *Section 60.4 Criteria for Evaluation*; and

2.0 ACCOUNTING FOR HERITAGE ASSETS, MULTI-USE HERITAGE ASSETS AND STEWARDSHIP LAND (2802)

2.1 Definitions (280201)

2.1.1. Heritage Assets. Heritage assets are PP&E that are unique for one or more of the following reasons:
2.1.1.1. Historical or natural significance;

2.1.1.2. Cultural, educational, or artistic (e.g., aesthetic) importance; or

2.1.1.3. Significant architectural characteristics.

Heritage assets consist of (1) collection-type heritage assets, such as objects gathered and maintained for exhibition, for example, museum collections, art collections, and library collections; and (2) non-collection-type heritage assets, such as memorials, monuments, and buildings. Cultural resources and historic properties, as defined in DoDI 4715.16, may be categorized as heritage assets for financial accounting purposes, if they have the attributes of heritage assets as described in this definition.

2.1.2. Multi-use Heritage Assets. Heritage assets may in some cases serve two purposes: (a) a heritage function and (b) a government operations function. In cases where a heritage asset serves two purposes, and the predominant use of the asset is in general government operations, the heritage asset should be considered, and classified as, a multi-use heritage asset (e.g., the main Treasury building used as an office building). Another example of a multi-use heritage asset is the Pentagon, which has been listed on the National Register of Historic Places and also is used as an office building. Heritage assets having an incidental (i.e., not significant or predominant) use in government operations are not considered and are not classified as multi-use heritage assets; they are simply heritage assets. Cultural resources and historic properties, as defined in DoDI 4715.16, may be categorized as multi-use heritage assets for financial accounting purposes, if they have the attributes of multi-use heritage assets as described in this definition.

2.1.3. PP&E: PP&E consists of tangible assets, including land, that meet the following criteria – (i) they have estimated useful lives of two years or more; (ii) they are not intended for sale in the ordinary course of operations; and, (iii) they have been acquired or constructed with the intention of being used, or being available for use by the entity.

2.1.4. Stewardship Land. Stewardship land includes land and land rights owned by the Federal Government but not acquired for or in connection with the acquisition or construction of real property facilities. Examples of stewardship land include public land withdrawn for military purposes such as buffer zones and land used for forests, wildlife or grazing.

2.1.5. Materiality. Materiality, as defined by the SFFAS 1, is the degree to which an item's omission or misstatement in a financial statement makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the inclusion or correction of the item. Since the value of heritage assets and stewardship land are expensed when acquired, the focus for considering their materiality should be based on the DoD required accountability for the asset.
2.2 Relevant USSGL Accounts (280202)

2.2.1. **Land and Land Rights (USSGL 171100).** The amount of identifiable cost of land and land rights of unlimited duration acquired for or in connection with general property, plant and equipment used in general operations and permanent improvements. Stewardship land (national park or forest and land in public domain), materials beneath or above the surface, and Outer Continental Shelf resources are excluded. Under SFFAS 50, entities can elect to expense land and land rights. If this election is made, there would not be an amount for land and land rights recorded in this USSGL account.

2.2.2. **Construction-in-Progress (USSGL 172000).** The Construction-in-Progress (CIP) account is used to accumulate the costs of new construction of general PP&E (except for internal use software) and capital improvements while the asset is under construction. CIP accounts include all costs (i.e., direct labor, direct material, supervision, inspection and overhead) incurred in construction. Upon completion, these costs will be transferred to the appropriate general PP&E account.

2.2.3. **Buildings, Improvements, and Renovations (USSGL 173000).** The Buildings, Improvements, and Renovations account is used to record the cost, fair value or appraised value of DoD-owned buildings acquired and building improvements which are used in providing DoD services or goods. This account also includes the cost of renovation, improvement or restoration of multi-use heritage assets classified as buildings after transfer from the CIP account.

2.2.4. **Accumulated Depreciation on Buildings, Improvements, and Renovations (USSGL 173900).** The Accumulated Depreciation on Buildings, Improvements, and Renovations account is used to record the amount of accumulated depreciation charged to expense for assets and improvements recorded in the USSGL 173000 account.

2.2.5. **Other Structures and Facilities (USSGL 174000).** The Other Structures and Facilities account is used to record the cost, fair value or appraised value of DoD-owned structures and linear structures and structures and linear structure improvements which are used in providing DoD services or goods. This account also includes the cost of renovation, improvement or restoration of multi-use heritage assets classified as structures or linear structures after transfer from the CIP account.

2.2.6. **Accumulated Depreciation on Other Structures and Facilities (USSGL 174900).** The Accumulated Depreciation on Other Structures and Facilities account is used to record the amount of accumulated depreciation charged to expense for assets and improvements recorded in the USSGL 174000 account.

2.2.7. **Equipment (USSGL 175000).** The Equipment account is used to record the capitalized cost of tangible equipment items of a durable nature that are used by DoD in providing goods and services.
2.2.8. **Accumulated Depreciation on Equipment (USSGL 175900)**. The Accumulated Depreciation on Equipment account is used to record the amount of accumulated depreciation charged to expense for assets recorded in the USSGL 175000 account.

2.2.9. **General Property, Plant and Equipment Permanently Removed but Not Yet Disposed (USSGL 199500)**. The General Property, Plant, and Equipment Permanently Removed but Not Yet Disposed account is used to record the value of general PP&E assets which have been permanently removed from service. Upon permanent removal from service, general PP&E assets must be recorded at their expected net realizable value (NRV) and must cease to be depreciated. See paragraph 280210.B.3 for guidance on reporting general PP&E assets which have been permanently removed from service.

2.2.10. **Depreciation, Amortization and Depletion (USSGL 671000)**. The expense recognized by the process of allocating costs of an asset (tangible or intangible) over the period of time benefited or the asset’s useful life is recorded in this account.

2.3 Heritage Assets (280203)

2.3.1. As described in subparagraph 280201.A, heritage assets are PP&E that are unique for one or more of the following reasons:

2.3.1.1. Historical or natural significance;

2.3.1.2. Cultural, educational, or artistic (e.g., aesthetic) importance; or

2.3.1.3. Significant architectural characteristics.

2.3.2. Heritage assets are generally expected to be preserved indefinitely.

2.3.3. The cost or value should not serve as a precursor when deciding if an asset should be classified as a heritage asset. DoD Components should refer to cultural resources and collections policies, published registers, and consult with DoD subject matter experts (i.e., the DoD cultural resources or museum staffs), when making this assessment. Designation of a PP&E asset (including such assets as museum, library and art collections) as a heritage asset can be done at any time in its life-cycle, based on application of evaluation criteria by qualified staff. Historic significance may be identified if a property/asset meets at least one of the following criteria adapted from the National Register of Historic Places as determined by the relevant DoD Component with concurrence by the relevant State Historic Preservation Officer, or as determined by the guidelines of the National Register of Historic Places in the Code of Federal Regulations, Title 36, Part 60, Section 60.4:

2.3.3.1. Association with historic events or activities that have made a significant contribution to the broad patterns of our history (e.g., battles, development of military technology, prehistoric cultural patterns);
2.3.3.2. Association with the lives of significant historic persons (e.g., important military leaders, political leaders, inventors);

2.3.3.3. Distinctive design or physical characteristics of a type, period, or method of construction (e.g., work of a master architect, landscape architect, planner, or engineer; work representative of a particular approach to military design or a particular type or style of architecture or engineering; a formative example of standardized planned military housing); or

2.3.3.4. Potential to provide important information about prehistory or history (e.g., an archeological site on a military installation).

2.3.4. As contrasted with multi-use heritage assets (see subparagraph 280201.B), heritage assets are not used predominantly in general government operations.

2.4 Stewardship Land (280204)

2.4.1. Land and land rights owned by the Federal Government but not acquired for, or in connection with the acquisition or construction of real property facilities, is stewardship land.

2.4.2. “Acquired for or in connection with” is defined as including land or land rights acquired with the intent to construct general PP&E and land or land rights acquired in combination with general PP&E.

2.4.3. Land is defined as the solid part of the surface of the earth. Excluded from the definition are natural resources (e.g., depletable resources, such as mineral deposits and petroleum, renewable resources such as timber and the outer continental shelf resources) related to land.

2.4.4. Land and land rights owned by DoD or a DoD Component, but not acquired for or in connection with real property facilities must be reported as stewardship land.

2.4.5. Land and land rights owned by DoD or a DoD Component, and acquired for or in connection with real property facilities must be accounted for and reported as general PP&E and expensed under SFFAS 50, if elected.

2.4.6. Land rights are interests and privileges held by DoD or a DoD Component, in land owned by others, such as leaseholds, easements, water and water power rights, diversion rights, submersion rights, rights-of-way, mineral rights, and other like interests in land.

2.4.7. Some heritage assets will meet the definitions of, and be considered and reported as, both heritage assets and stewardship land. Such reporting would not be considered duplication as the type of information reported on the physical unit would be different for each category of stewardship asset (i.e., heritage assets and stewardship land.)
2.5 Acquisition/Valuation (280205)

2.5.1 Heritage Assets and Stewardship Land

2.5.1.1 The cost of acquiring heritage assets and stewardship land are expensed in the period incurred. The cost must include all costs incurred to bring the asset to a form and location suitable for its intended use.

2.5.1.2 Maintenance or renovation contracts, historical maintenance records or a history of payment of invoices, minutes of meetings, historical data bases, surveys of land records, a history of past/historical practices (e.g., establishing defacto ownership), or other relevant sources of information may provide acceptable alternative evidence of government ownership of heritage assets and stewardship land.

2.5.2 Multi-use Heritage Assets

2.5.2.1 Recorded Cost. When acquiring a multi-use heritage asset, which is a subset of general PP&E, the recorded cost must be recognized in accordance with paragraph 280206. The recorded cost of multi-use heritage assets is the basis for computing depreciation (if applicable). The method of acquisition determines the cost recorded for multi-use heritage assets, which are part of general PP&E, as described in subparagraph 280205.B.6. The recorded cost must include all amounts paid to bring the asset to its form and location suitable for its intended use, including the costs of any embedded items and/or integral software plus ancillary costs. This subparagraph defines and prescribes the use of acquisition cost, net book value, fair value, ancillary costs, and recorded cost when recording the cost of newly acquired multi-use heritage asset items.

2.5.2.2 Acquisition Cost. For the purposes of this chapter, acquisition cost refers to the original purchase, construction, or development cost; net of (less) any purchase discounts. Purchase discounts lost and late payment interest expenses must not be included as a cost of the asset; rather, such costs must be recognized as operating expenses.

2.5.2.3 Net Book Value. Net Book value is the recorded cost of a general PP&E asset, less its accumulated depreciation.

2.5.2.4 Fair Value. Fair value is the amount at which an asset or liability could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

2.5.2.5 Ancillary Costs. Ancillary costs are included in the recorded cost in addition to the acquisition cost of the asset. These costs are identifiable and necessary to bring the asset to its form and location suitable for its intended use including other direct and indirect costs. Examples include:

2.5.2.5.1 Government-furnished property installed in end items (e.g., engines installed in aircraft);
2.5.2.5.2. An appropriate share of the cost of government-furnished materials used in the production of end items;

2.5.2.5.3. Transportation charges to the point of initial use;

2.5.2.5.4. Handling and storage costs;

2.5.2.5.5. Labor and other direct or indirect production costs (for assets produced or constructed);

2.5.2.5.6. Engineering, architectural, and other outside services for designs, plans, specifications, and surveys;

2.5.2.5.7. Acquisition and preparation costs of buildings and other facilities;

2.5.2.5.8. An appropriate share of the cost of the equipment and facilities used in construction work;

2.5.2.5.9. Fixed equipment and related installation costs required for activities in a building or facility;

2.5.2.5.10. Direct costs of inspection, supervision, and administration of construction contracts and construction work;

2.5.2.5.11. Allowable direct cost of maintaining the Program Management Office, if material;

2.5.2.5.12. Legal and recording fees and damage claims;

2.5.2.5.13. Fair value of facilities and equipment donated to the DoD;

2.5.2.5.14. Material amounts of interest paid directly to providers of goods or services related to the acquisition or construction (not including late payment interest penalties); and

2.5.2.5.15. A prorated share of nonrecurring cost associated with the development and production of the property.

2.5.2.6. The method of acquisition determines the cost recorded for multi-use heritage assets, which are a part of general PP&E.

2.5.2.6.1. Purchased General PP&E. The cost to be recorded for assets acquired by purchase from a third party (private, commercial, or government) is its purchase contract cost plus applicable ancillary costs. Examples of ancillary costs are included in the listing
in subparagraph 280205.B.5. For purposes of this guidance, purchase includes procurements by cash, check, or installment or progress payments on contracts.

2.5.2.6.2. **Constructed General PP&E.** The cost to be recorded for constructed items is the sum of all the costs incurred to bring the item(s) to a form and condition suitable for their intended use. These include costs incurred after project design authorization for actual construction such as labor, materials, and overhead costs. Note that preliminary planning costs accumulated prior to design authorization must be expensed and not be captured as part of the recorded cost of constructed items.

2.5.2.6.3. **Donated General PP&E.** The cost to be recorded for general PP&E acquired through donation, execution of a will, or judicial process excluding forfeiture must be its estimated fair value (except for land expensed under SFFAS 50, if elected) at the time acquired by the DoD.

2.5.2.6.4. **Exchanged General PP&E.** The cost to be recorded for general PP&E acquired through exchange between the DoD and a nonfederal entity is the fair value of the consideration surrendered at the time of exchange. If the fair value of the general PP&E acquired is more readily determinable than that of the consideration surrendered, the cost will be the fair value of the general PP&E acquired. If neither fair value can be determined, the cost of the general PP&E acquired will be the cost recorded for the consideration surrendered, net of any accumulated depreciation. Any difference between the net recorded amount of the consideration surrendered and the cost of the general PP&E acquired must be recognized as a gain or loss. In the event that cash consideration is included in the exchange, the cost of general PP&E acquired will be increased by the amount of cash consideration surrendered or decreased by the amount of cash consideration received. If the DoD Component enters into an exchange in which the fair value of the general PP&E acquired is less than that of the consideration surrendered, the general PP&E acquired will be recognized at the amount of the consideration surrendered, as described previously and subsequently reduced to its fair value. A loss must be recognized in an amount equal to the difference between the amount of the consideration surrendered for the general PP&E acquired and its fair value. This guidance on exchanges applies only to exchanges between a DoD Component and a nonfederal entity. Exchanges between a DoD Component and another DoD Component or federal agency must be accounted for as a transfer.

2.5.2.6.5. **Capital Leases.** The recorded cost of general PP&E acquired under a capital lease is the present value of the rental and other minimum lease payments during the lease term, excluding that portion of the payments representing executory cost (e.g., insurance, maintenance and taxes) to be paid by the lessee. The present value is the value of future cash flows (e.g., lease payments) discounted to the present at a certain interest rate (such as the reporting entity’s cost of capital), assuming compound interest. However, if the amount so determined exceeds the fair value of the leased property at the inception of the lease, the amount recorded will be the fair value. If the portion of minimum lease payments representing executory cost is not determinable from the lease provisions, the amount should be estimated.
2.5.2.6.6. **Seized and Forfeited General PP&E.** The cost recorded for general PP&E items acquired through seizure or forfeiture is its fair value, less an allowance for any liens or claims from a third party.

2.5.2.6.7. **Vested and Seized Property During Times of War.** See Volume 12, Chapter 29 for discussion of vested and seized property during times of war.

2.5.2.6.8. **Transferred General PP&E.** The cost recorded for general PP&E transferred from another DoD Component or federal agency is the cost recorded on the transferring entity’s books for the general PP&E, and its accumulated depreciation. If the receiving DoD Component cannot reasonably ascertain those amounts, the cost of the asset will be its fair value at the time of transfer.

2.5.2.6.9. **General PP&E Acquired by Trade-In.** The cost to be recorded for general PP&E acquired when trading in another PP&E asset is the sum of the net book value of the asset(s) traded plus (minus) any cash paid (received) or liabilities assumed (relinquished) for the new asset. The net book value is the recorded cost of a general PP&E asset, less its accumulated depreciation.

### 2.6 Recognition and Measurement (280206)

All heritage assets, multi-use heritage assets, and stewardship land acquired by DoD Components must be recognized for accountability (in accordance with DoDI 4165.14, DoDI 4165.70, and DoDI 5000.64) and financial reporting purposes. Recognition requires the proper accounting treatment (expense or capitalization with depreciation) and the reporting of capitalized amounts and applicable accumulated depreciation and expensed amounts on the appropriate DoD Component’s financial statements.

#### 2.6.1. Heritage Assets

2.6.1.1. The cost of acquiring, improving, restoring or renovating heritage assets, other than multi-use heritage assets, should be recognized as a cost on the Statement of Net Cost for the period in which the cost is incurred. The cost should include all costs incurred to bring the asset to its current condition and location. The DoD Components will include heritage assets in its financial statement note disclosures only if it has both ownership and control of the asset and is also responsible for maintenance or sustainment of the asset. If no one DoD Component meets all the criteria, then the DoD Component that has control over the heritage asset must report the heritage asset in its financial statement note disclosures (see paragraph 280305, Reporting Requirements).

2.6.1.2. Except for assets classified as multi-use heritage assets, no amounts for heritage assets acquired through donation or devise (a will or clause of a will disposing of property) should be recognized in the cost of heritage assets.
2.6.1.3. Transfers of heritage assets, except for multi-use heritage assets, from one DoD Component to another or to another Federal agency do not affect the net cost of operations or net position of either entity. In some cases, assets included in general PP&E may be transferred to a DoD Component for use as heritage assets. In this instance, the transferring DoD Component should recognize a transfer-out of capitalized assets and the receiving DoD Component recognizes a transfer-in to facilitate reconciliation and a corresponding cost on the Statement of Net Cost.

2.6.2. Multi-use Heritage Assets

2.6.2.1. The costs of acquisition, improvement, or restoration of multi-use heritage assets should be capitalized as general PP&E and depreciated if the costs equals or exceeds the DoD capitalization threshold. Such multi-use heritage assets should be depreciated over their estimated useful life.

2.6.2.2. The capitalization threshold for general PP&E assets is:

2.6.2.2.1. $1 million for the Department of Air Force and the Department of Navy general funds General Equipment;

2.6.2.2.2. $1 million for the National Security Agency (NSA) and the Office of the Director of National Intelligence (ODNI) general PP&E; and

2.6.2.2.3. $250,000 for real property (other than NSA and ODNI), and all other General Equipment assets for all other general funds and WCFs.

2.6.2.3. Assets classified as multi-use heritage assets and acquired through donation or devise should be recognized as general PP&E at the fair value of the assets at the time received and the amount should also be recognized as non-exchange revenues as defined in FASAB SFFAS 7, Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting.

2.6.2.4. Transfers of multi-use heritage assets from one Federal entity to another (including those between DoD Components or between a DoD Component and another Federal entity) should be recognized by the receiving entity as a transfer-in and as an additional financing source and the transferring entity should recognize a transfer-out. The value recorded should be the transferring entity’s net book value of the multi-use heritage asset. If the receiving entity has not been provided the net book value, the multi-use heritage asset should be recorded at its estimated fair value.

2.6.3. Stewardship Land

2.6.3.1. Land classified as stewardship land must be reported as basic information within the financial statements of the DoD Component responsible for such land (see paragraph 280305, Reporting Requirements). The cost of the acquisition of stewardship land should be recognized as an expense on the Statement of Net Cost for the period in which the cost is incurred.
The cost should include all costs to prepare stewardship land for its intended use (e.g., grading the land). In such cases, land may be acquired along with existing facilities. The following treatments should apply:

2.6.3.1. To determine whether the facility itself would be deemed a heritage asset, the DoD Component should consult with Component cultural resources staff about whether the acquisition cost of the facility should be treated as the cost of stewardship land, heritage asset, or both;

2.6.3.1.2. The cost in its entirety should be treated as an acquisition of stewardship land, if the facility is to be used in operations (e.g., as general PP&E), and

2.6.3.1.2.1. The value of the facility is insignificant; or

2.6.3.1.2.2. Its acquisition is merely a byproduct of the acquisition of the land.

2.6.3.1.3. Facilities of significant value that have an operating use (e.g., a constructed hotel or employee housing block) should be treated as general PP&E by identifying the cost attributable to general PP&E and segregating it from the cost of stewardship land acquired.

2.6.3.2. No amounts for stewardship land acquired through donation or devise should be recognized as an expense in the Statement of Net Cost.

2.6.3.3. Transfers of stewardship land from one DoD Component to another or to another Federal agency, do not affect the net cost of operations or net position of either entity. In some cases, land included in general PP&E may be transferred to a DoD Component for use as stewardship land. In this instance, the transferring DoD Component should recognize a transfer-out for the amount it has capitalized in its financial accounting records (if land was not expensed under SFFAS 50) for the asset and the receiving DoD Component recognizes a transfer-in to facilitate reconciliation.

2.7 Improvements/Enhancements (280207)

2.7.1. Heritage Assets. The cost of improvement or renovation of heritage assets should be recognized on the Statement of Net Cost for the period in which the cost is incurred.

2.7.2. Multi-use Heritage Assets

2.7.2.1. Capital improvements to multi-use heritage assets must be capitalized when (1) the improvement increases the asset's useful life by two or more years, or increases its capacity or size, and (2) the cost of the improvement equals or exceeds the capitalization threshold (see subparagraph 280206.B.2). If capital improvements do not meet these two criteria they should be expensed. Funding source is not a factor in determining whether an improvement will be capitalized. If the capital improvement increases the underlying asset's useful life by two years or more, the DoD Component must capitalize and depreciate the improvement with the original asset
over the revised estimated useful life. Costs of capital improvements that do not extend the useful life of an existing real property asset but enlarge or improve its capacity and have a useful life of two years or more must be capitalized and depreciated over the lesser of the estimated useful life of the improvement or the remaining economic estimated useful life of the underlying asset. Note that the economic life of the multi-use heritage asset may be different than the original estimated accounting useful life. The economic life reflects the remaining period of utility for the multi-use heritage asset.

2.7.2.2. The cost of improvements to more than one multi-use heritage asset as identified by a unique identifier when performed under a single contract or work order, and that cannot be specifically identified by asset, should be capitalized only if the allocated cost per multi-use heritage asset equals or exceeds the capitalization threshold. When more than one improvement is made to a single asset and the improvements are part of one overall effort to increase the asset’s capability, size, and/or useful life, the sum of the costs of the improvements must be capitalized, if the summed costs equal or exceed the capitalization threshold. This is required even when the improvements are funded separately. Once a determination has been made that the aggregate costs of the improvements will be capitalized, each improvement should be capitalized and depreciated upon being placed in service.

2.7.2.3. Maintenance and repair costs are not considered capital improvements, regardless of whether the cost equals or exceeds the capitalization threshold. In SFFAS 42, the FASAB defines maintenance and repairs as activities directed toward keeping fixed assets in an acceptable condition. Maintenance and repair activities include preventative maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain assets. Maintenance and repair activities also include cyclic work done to prevent damage that would be more costly to restore than to prevent (e.g., painting).

2.7.2.4. Although maintenance and repairs are generally expensed in the period incurred, certain replacements of parts, systems, or components may or may not be an improvement for accounting purposes. Crucial to the determination of whether a replacement must be recognized as a repair or an improvement is the intent behind the replacement. Repair by replacement occurs when parts, systems, or components have failed, are in the incipient stages of failing, or are no longer performing the functions for which they were designated. Replacements falling into this category must be expensed. If the replacement was undertaken to expand the capacity or extend the useful life of an item that was in good working order, then the replacement must be recognized as an improvement. A roof or a heating and air conditioning system that is replaced due to the failing of the existing asset should be classified as a repair and should be expensed, even if the replacement incorporated a better quality and longer life shingle or a more efficient heating and air conditioning unit. Repair by replacement does not include rebuilding entire structures within the same physical area (footprint).

2.7.2.5. Capital Improvements at or over the capitalization threshold in effect at the time the capital improvements are completed, will be recorded and depreciated by the DoD Component acquiring the capital improvement irrespective of whether they are the Primary Economic Beneficiary responsible for sustainment requirements of the property containing the capital improvement. A WCF activity of a DoD Component using a capital improvement in
property that does not pay/reimburse the acquirer of the capital improvements for property use, will record an imputed cost in their financial statements for the value of the depreciation expense of the capital improvements from which they benefit. The requirement to impute costs is not applicable to DoD Component General Funds except for inter-entity costs for personnel benefits and Treasury Judgment Fund settlements. A DoD Component using space in a multi-use heritage asset that reports capital improvements for that asset and subsequently ceases use of the asset will transfer the book value of those capital improvements (acquisition value and accumulated depreciation) along with supporting documentation to the DoD Component responsible for reporting the multi-use heritage asset in its financial statements at the time they no longer are using the asset.

2.8 Depreciation (280208)

2.8.1. Heritage Assets. The cost of acquisition, improvement, or renovation of heritage assets should be recognized as an expense on the Statement of Net Cost for the period in which the cost is incurred. These costs are not capitalized and not subsequently depreciated. The cost should include all costs incurred during the period to bring the item to its current condition.

2.8.2. Stewardship Land. The cost of acquiring stewardship land is expensed in the period incurred. These costs are not capitalized and subsequently depreciated.

2.8.3. Multi-Use Heritage Assets. The recorded cost of capitalized multi-use heritage assets must be depreciated in accordance with the general PP&E guidance as described in 280208.C.1 through C.7. Such capitalized amounts, as well as associated amounts of accumulated depreciation and depreciation expense, must be reflected in DoD financial statements.

2.8.3.1. Depreciation is the systematic and rational allocation of the recorded cost of an asset, less its estimated salvage or residual value, over its estimated useful life. Estimates of useful life for general PP&E assets must consider factors such as usage, physical wear and tear and technological change.

2.8.3.2. The salvage value, also known as the residual or scrap value, is the amount that would be expected to be obtained from selling an asset at the end of its useful life, but only when such proceeds (from recycle, resale, or salvage) are permitted to be retained and used by the DoD Component. Typically, personal property will not have a salvage value. DoD real property does not have a salvage value. If the asset is to be traded in on a new asset, the salvage value is the expected trade-in value.

2.8.3.3. The depreciable basis of an asset is the recorded cost reduced by the asset’s salvage value, if the asset has a salvage value.

2.8.3.4. For purposes of computing depreciation on DoD general PP&E assets, specific useful lives are prescribed. Table 28-1 and Table 28-2 provide guidance on the useful lives to be used for DoD multi-use heritage assets that are real property or general equipment. Heritage assets and stewardship land are not capitalized and depreciated.
3.8.3.4.1. DoD policy permits the use of only the straight-line method of depreciation.

3.8.3.4.2. If a DoD Component determines that a newly acquired general PP&E asset with a cost equal to or greater than the applicable DoD capitalization threshold which has a useful life of at least two years, but less than five years, the Component may elect to depreciate the asset over a useful life that more accurately reflects its useful life (two to four years, as appropriate). The DoD Component making this election must document the basis for that decision.

*See Capital Improvements/Enhancements in paragraph 280207.
2.8.3.5. The event that triggers the calculation of depreciation is the date of receipt shown on the asset receiving document in cases where no installation is required; the date installed (if required); or the date the asset is available for use, also known as the acceptance date, (regardless of whether it is actually used). The actual commencement of depreciation should be based on the Month Available for Service Method. Under this method, the month the asset was accepted, installed, or available for use as applicable, is the month used to commence the calculation of depreciation expense for the first year.

2.8.3.6. If an asset remains in use longer than its estimated useful life, it must be retained in the accountable property system of record, as well as the accounting records, and reflect both its recorded cost and accumulated depreciation until disposition of the asset.

2.8.3.7. WCF activities are required to depreciate general PP&E assets in accordance with the guidance in this chapter without regard to whether such assets are procured through a WCF activity’s Capital Purchase/Investment Program budget or whether depreciation for such assets is included in rates charged to customers. The recognition of general PP&E assets and the depreciation of such assets by WCF activities therefore may be different for financial statement reporting purposes than the depreciation amounts used for WCF rate development and budget presentation. All general PP&E depreciation of WCF activities must be recognized as an expense on the Statement of Net Cost, included in accumulated depreciation amounts on the Balance Sheet, and reported in the “Defense Working Capital Fund Accounting Report [Accounting Report (Monthly) 1307] (AR (M) 1307).” Depreciation recorded on general PP&E that was not acquired nor will be replaced through use of Defense WCF resources must be classified as non-recoverable for rate setting purposes and reported appropriately on the AR (M)1307. Defense WCF rates charged to customers are based on guidance in Volume 2B and Volume 11B.

2.9 Impairment (280209)

2.9.1. Description. SFFAS 44 defines impairment as a significant and permanent decline in the service utility of general PP&E or expected service utility of CIP that results from events or changes in circumstances that are not considered normal and ordinary. The guidance in this paragraph is applicable to multi-use heritage assets only. Due to the nature of heritage assets and stewardship land and the fact that they are expensed when acquired, impairment is not calculated.
for these assets. Heritage assets are expected to be preserved indefinitely. Multi-use heritage assets are subject to impairment guidance for general PP&E as described in SFFAS 44.

2.9.1.1. See subparagraph 280209.B.2 for a discussion of determining the significance and permanence of a service utility decline.

2.9.1.2. The service utility of general PP&E is the usable capacity that, at acquisition, was expected to be used to provide service. The current usable capacity of general PP&E may be less than its original usable capacity due to the normal or expected decline in useful life or to impairing events or changes in circumstances, such as physical damage, obsolescence, enactment or approval of laws or regulations or other changes in environmental or economic factors, or changes in the manner or duration of use.

2.9.1.3. Normal and ordinary events or circumstances are those that fall within the expected useful life of the general PP&E such as standard maintenance and repair requirements. Events or circumstances that are not considered normal are those that, at the time the general PP&E was acquired, the event or change in circumstance would not have been expected to occur during the useful life of the general PP&E or, if expected, was not sufficiently predictable to be considered in estimating the general PP&E’s useful life.

2.9.2. Identification of Potential Impairment Loss. The determination of whether general PP&E remaining in use is impaired is a two-step process, which includes (1) identifying potential impairment indicators and (2) testing for impairment.

2.9.2.1. Step 1 - Identify Indicators of Potential Impairment. Indicators of potential impairment can be identified and brought to DoD Component’s attention in a variety of ways, such as procedures related to deferred maintenance and repair (DM&R). Although DoD Components are not required to establish additional or separate procedures beyond those that may already exist, they should evaluate existing processes and internal controls to determine if they are sufficient to reasonably assure the identification of potential impairment indicators and implement appropriate additional processes and internal controls if necessary. Once identified, indicators are not conclusive evidence that a measurable or reportable impairment exists; DoD Components should carefully consider the surrounding circumstances to determine whether a test of potential impairment is necessary given the circumstances. Some common indicators of potential impairment include:

2.9.2.1.1. Evidence of physical damage;

2.9.2.1.2. Enactment or approval of laws or regulations which limit or restrict general PP&E usage;

2.9.2.1.3. Changes in environmental or economic factors;

2.9.2.1.4. Technological changes or evidence of obsolescence (however, if obsolete general PP&E continues to be used, the service utility expected at acquisition may not be diminished);
2.9.2.1.5. Changes in the manner or duration of use of general PP&E;

2.9.2.1.6. Construction stoppage or contract termination; and

2.9.2.1.7. General PP&E idled or unserviceable for excessively long periods.

2.9.2.2. Step 2 - Impairment Test. Identified general PP&E should be tested for impairment by determining whether these two factors are present: (i) the magnitude of the decline in service utility is significant and (ii) the decline in service utility is expected to be permanent.

2.9.2.2.1. Significant declines in service utility are those that cause costs (including operational and maintenance costs) to be disproportionate to the new expected service utility. The determination of whether or not an item is significant is a matter of professional judgment and is distinct from materiality considerations. Such judgments may be based on the relative costs of providing the service before and after the decline, the percentage decline in service utility, or other considerations.

2.9.2.2.2. The decline in service utility is considered permanent when the DoD Component has no reasonable expectation that the lost service utility will be replaced or restored; that is, the DoD Component expects that the general PP&E will remain in service so that its remaining service utility will be utilized. In contrast, a reasonable expectation that the lost service utility will be replaced or restored may exist when the DoD Component has: (i) specific plans to replace or restore the lost service utility of the general PP&E, (ii) committed or obligated funding for remediation efforts, or (iii) a history of remediating lost service utility in similar cases or for similar general PP&E.

2.9.2.3. For construction work in process, the testing of impairment in subparagraph 280209.B.2 should be performed over the period of expected future service utility rather than current service utility.

2.9.3. Determining the Appropriate Measurement Approach. Impairment losses on general PP&E that will continue to be used by the entity should be estimated using a measurement approach that reasonably estimates the portion of net book value associated with the diminished service utility of the general PP&E. A measurement method would not be considered appropriate if it would result in an unreasonable net book value associated with the remaining service utility of the general PP&E. Conversely, a reasonable measurement method may result in no impairment loss being recorded. Regardless of the method used, recognition of impairment loss should be limited to the asset’s net book value at the time of impairment. Widely recognized methods for measuring impairment include the following. Note that the restoration approach should generally be used for multi-use heritage assets.

2.9.3.1. Replacement Approach. Impairment of general PP&E with physical damage generally may be measured using a replacement approach. This approach uses the estimated cost to replace the lost service utility of the general PP&E at today’s standards (i.e., at current market prices and in compliance with current statutory, regulatory, or industry
standards) to identify the portion of the historical cost of general PP&E that should be written-off due to impairment. It may be appropriate to apply the ratio of estimated cost to replace the diminished service utility over total estimated cost to replace the general PP&E, to the net book value of general PP&E to determine the impairment amount.

2.9.3.2. Restoration Approach. Impairment of multi-use heritage assets with physical damage should generally be measured by using a restoration approach. This approach uses the estimated cost to restore the diminished service utility of the general PP&E to identify the portion of the historical cost of the general PP&E that should be written-off. This approach does not include any amounts attributable to improvements and additions to meet today’s standards. The estimated restoration cost can be converted to historical cost by restating (i.e., deflating) the estimated restoration cost using an appropriate cost index. Alternatively, it may be appropriate to apply the ratio of estimated restoration cost to restore the diminished service utility over total estimated restoration cost to the net book value of the general PP&E to determine the impairment amount.

2.9.3.3. Service Unit Approach. Impairment of general PP&E that are affected by enactment or approval of laws or regulations or other changes in environmental/economical factors or are subject to technological changes or obsolescence generally may be measured using a service unit approach. This approach compares the service units provided by the general PP&E before and after the impairment to isolate the historical cost of the service utility that cannot be used due to the impairment to determine the impairment amount.

2.9.3.4. Deflated Depreciated Current Cost Approach. Impairment of general PP&E that are subject to a change in manner or duration of use generally may be measured using a deflated depreciated current cost approach. Under this approach, a current cost for a general PP&E to replace the current level of service is estimated. This estimated current cost is then depreciated to reflect the fact that the general PP&E is not new, and is then subsequently deflated to convert it to historical cost dollars. A potential impairment loss results if the net book value of the general PP&E exceeds the estimated historical cost of the current service utility (i.e., deflated depreciated current cost).

2.9.3.5. Cash Flow Approach. Recognizes an impairment loss only if the net book value (i) is not recoverable and (ii) exceeds the higher of its NRV or value-in-use estimate.

2.9.3.5.1. The net book value of general PP&E is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the general PP&E.

2.9.3.5.2. NRV is the estimated amount that can be recovered from selling, or any other method of disposing, of an item less estimated costs of completion, holding, and disposal. SSFAC 7 describes value-in-use as the benefit to be obtained by an entity from the continuing use of an asset and from its disposal at the end of its useful life. Value-in-use can be measured at the present value of future cash flows that an entity expects to derive from an asset, including cash flows from use of the asset and eventual disposal.
2.9.3.5.3. If the net book value is not recoverable, the impairment loss is the amount by which the net book value of the general PP&E exceeds the higher of NRV or value-in-use estimate. No impairment loss exists if the net book value is less than the higher of the general PP&E’s NRV or value-in-use estimate.

2.9.3.6. Lower of Net Book Value or Higher of NRV or Value-in-Use Approach. General PP&E impaired from either construction stoppages or contract terminations, which are expected to provide service, should be reported at their recoverable amount; the lower of (i) the general PP&E’s net book value or (ii) the higher of its NRV or value-in-use estimate. Impaired general PP&E, which are not expected to provide service, should be accounted for in accordance with SFFAS 6.

2.9.4. Recognizing and Reporting Impairment Losses. The loss from impairment, if any, should be recognized and reported in the Statement of Net Cost in the period in which the DoD Component concludes that the impairment is both (1) a significant decline in service utility and (2) expected to be permanent. Such losses may be included in program costs or costs not assigned to programs. A general description of the general PP&E for which an impairment loss is recognized, the nature (e.g., damage or obsolescence) and amount of the impairment and the financial statement classification of the impairment loss must be disclosed in the notes to the financial statements in the period the impairment loss is recognized.

2.9.5. Recoveries. The impairment loss should be reported net of any associated recovery when the recovery and loss occur in the same fiscal year. Recoveries reported in subsequent fiscal years should be reported as revenue or other financing source as appropriate. The amount and financial statement classification of recoveries should be disclosed in the notes to the financial statements.

2.9.6. Remediating Previously Reported Impairments. The costs incurred to replace or restore the lost service utility of impaired general PP&E remaining in use must be accounted for in accordance with applicable standards (i.e., recognized according to the nature of the costs incurred and the appropriate capitalization threshold).

2.9.7. Diminished Service Utility Without Recognized Impairment Loss. If the future service utility has been adversely affected but the impairment test determines that a loss does not need to be recognized, a change to the estimates used in depreciation calculations (such as estimated useful life and salvage value) should be considered and adjusted as appropriate.

2.10 Removal/Disposal (280210)

2.10.1. Heritage Assets and Stewardship Land. Heritage assets and stewardship land can be removed from service or otherwise disposed. For example, stewardship land can be granted to the DoD Component by the Department of Interior (DOI) for a definite period with the expectation the land will be returned at the end of the period. In this example, the stewardship land is considered to be removed from service when it is returned to DOI.
2.10.2. **Multi-Use Heritage Assets**

2.10.2.1. In TR 14, the FASAB defines removal from service as an event that terminates the use of a general PP&E asset. Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or identification as excess to mission needs. Removals from service should be considered other than permanent unless (1) the asset’s use is terminated and (2) there is documented evidence of the DoD Component’s decision to permanently remove the asset from service. If only one of the two business events has occurred, permanent removal from service has not occurred (i.e., the removal is considered other than permanent).

2.10.2.2. If an asset’s normal use is terminated (i.e., it no longer provides service in the operations of the entity) but the DoD Component has not yet decided to permanently remove the asset from service, the removal from service must be accounted for as other than permanent. Other than permanent removal from service is evidenced by activities such as continuing low-level maintenance to sustain the asset in a recoverable status or until reutilization efforts are exhausted. For example, assets that have been removed from service and sent to a depot for temporary storage with the intent to use the assets again in the future and other assets taken out of service on a temporary basis are considered other than permanently removed from service. There is no change in the reported value for assets that have been other than permanently removed from service and the assets must continue to be depreciated.

2.10.2.3. If (i) an asset’s use is terminated and (ii) the DoD Component has documented its decision to permanently remove the asset from service, the removal from service must be accounted for as permanent. Permanent removal from service is evident from the DoD Component’s documented decision to dispose of an asset by selling, scrapping, recycling, donating, or demolishing the asset. The recorded cost as well as the accumulated depreciation of an asset permanently removed from service must be removed from the accounts in which they are reported, and the asset must be recorded at its NRV in General PP&E Permanently Removed but Not Yet Disposed (USGL Account 199500). USGL Account 199500 is defined in the Treasury Financial Manual Chart of Accounts as “the NRV of general PP&E that is permanently removed from service but not yet disposed and is reclassified in accordance with FASAB TR 14, paragraphs 10 and 12.” NRV is the estimated amount that can be recovered from disposing of the asset less estimated costs of completion, holding, and disposal. Any difference between the net book value of the asset and its expected NRV should be recognized as a gain or loss. The expected NRV should be evaluated at the end of each fiscal year and any change in NRV should be recognized as a gain or loss. Assets permanently removed from service are no longer depreciated.

2.10.2.4. When an asset is disposed of (e.g., by selling, scrapping, recycling, donating, or demolishing the asset) the asset must be written-off from the financial records and statements and the difference between any disposal proceeds and the asset’s net book value must be recognized as a gain or loss. The disposal start date is the calendar date of a recognizable obligation to complete the disposal action. For demolitions, this represents the demolition contract’s start date. For transfers to a non-DoD entity and sales, this represents the date on which the instrument is endorsed or operation is ceased, whichever comes later. For natural disasters, this represents the actual date of the incident if the asset is a complete loss.
3.0 ADDITIONAL CONSIDERATIONS (2803)

3.1 Use of Canceled Treasury Account Symbol (280301)

3.1.1. Heritage assets and stewardship land are not reported in the Department of Treasury's Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS).

3.1.2. Multi-use heritage assets are required to be reported in GTAS, a data collection system that has replaced the reporting functionalities of Federal Agencies Centralized Trial-Balance System I and II, Intragovernmental Fiduciary Confirmation System and Intragovernmental Reporting and Analysis System as the primary means for DoD Components to report their trial balance data to the Department of Treasury. Capitalized assets are required to be reported and remain in GTAS after the original purchasing Treasury Account Symbol (TAS) has expired and been canceled. If a capitalized asset has not been moved to a cancelled (“C”) TAS as described in 280301.B.1; GTAS will provide a “C” TAS on the GTAS Super Master Account File (SMAF) for each fund family represented on the SMAF. The system generated “C” TAS will have three components: the three-digit agency identifier, availability type "C", and a four-digit main account.

3.1.2.1. All DoD Components must use the “C” availability type TAS to report capitalized assets. Assets may be moved to a “C” TAS at any time from the purchase date to the date the original purchasing fund cancels. (Refer to the TFM, Part 2, Chapter 4700 for additional information.)

3.1.2.2. To transfer an asset to a “C” TAS:

3.1.2.2.1. Use USSGL account transaction E510 to transfer-out the asset from the purchasing fund account.

3.1.2.2.2. Use USSGL account transaction E606 to transfer-in the asset into the appropriate “C” TAS.

3.2 Supporting Documentation (280302)

3.2.1. Entries to record financial transactions in accounting system general ledger accounts and/or the Accountable Property System of Record (APSR) and/or other systems, as well as information to be included in financial statement note disclosures, must be supported by source documents that reflect all transactions affecting the DoD Component’s stewardship investment in the PP&E.

3.2.1.1. All acquisitions, whether by purchase, transfer from other agencies, donation, or other means, must be supported as of the date the DoD Component accepts the heritage assets, multi-use heritage assets and/or stewardship land. The documents listed in Table 28-3, where applicable, must be readily available to support the changes in asset value or physical attributes as a result of new acquisition or capital improvement. Agencies should maintain historical files evidencing ownership of heritage assets, multi-use heritage assets and
stewardship land; and for some types of heritage assets, records and documentation pertaining to the asset's historical significance are required to be maintained pursuant to U.S.C. and DoD policy (e.g., 54 U.S.C. § 306131 and DoDI 4715.16). However, when original property records or other documentation (e.g., deeds, tax assessments, insurance records) for heritage assets and stewardship land do not exist, a methodology must be employed in order to develop alternative documentation to support management's assertions of Federal ownership.

3.2.1.2. As discussed in SFFAS 29 paragraphs 86 through 88 and in TR-9, since the historical records for items acquired long ago may not have been retained, other reasonable approaches and methods must be developed by the program offices to support the existence and completeness of heritage assets and stewardship land. When definitive documentation for stewardship land and/or heritage assets is not available, management must identify and use alternative methods for supporting management’s assertions for these assets. For assessing land, for example, these methods could mirror the areas used to determine major categories for Note disclosure in the financial statements, such as the number of areas of recreational use, geographic management areas, and federal water projects of fish hatcheries. Heritage assets also have many of the same documentation issues since antiquities laws and preservation acts did not go into effect prior to artifacts having been collected and preserved. Many of these assets may reside in federal and nonfederal repositories. However, records and detailed listings from these periods generally do not exist.

3.2.1.3. All disposals or retirements must have sufficient supporting documentation as of the date the PP&E leaves the custody of the DoD Component to provide an adequate audit trail for the disposal of the asset. The execution of certain disposal events will generate financial or administrative accountability transactions. These documents, where applicable, must be readily available to support disposals:

3.2.1.3.1. “Declaration of excess” document;

3.2.1.3.2. Approval documentation (to include disposal of land);

3.2.1.3.3. Original acquisition documents;

3.2.1.3.4. Legal instruments (such as a deed or contract) to indicate legal obligation to dispose of an asset, if applicable;

3.2.1.3.5. Document showing the disposal start date and disposal end date;

3.2.1.3.6. Receipt documentation; and

3.2.1.3.7. Transfer documents for transferred assets.

3.2.2. In their internal accounting policies and procedures, the DoD Components should document the identification, categorization, and method used to physically quantify the assets to ensure the consistent reporting for all similar heritage assets and stewardship land. As described in paragraph 280206, the cost of acquiring heritage assets and stewardship land should be
recognized as a cost on the Statement of Net Cost for the period in which the cost is incurred. In addition, financial statement note disclosure for the physical quantities of heritage assets and stewardship land are required. As further described in paragraph 280206, the cost to acquire a multi-use heritage asset that meets the capitalization threshold and has a useful life of two years or more is capitalized and depreciated over the asset’s estimated useful life.

3.2.3. Heritage assets should be quantified in terms of physical units (unit of measure) to facilitate the required financial statement note reporting. The appropriate level of aggregation and physical units of measure for each major category should be meaningful and determined by the preparer based on the entity’s mission, types of heritage assets, and how the entity manages the assets. For each major category of heritage asset, the following should be documented:

3.2.3.1. The number of physical units by major category. The major categories should be classified by collection- or non-collection-type heritage assets for which the entity is the steward as of the end of the reporting period;

3.2.3.2. The number of physical units by major category that were acquired and the number of physical units by major category that were withdrawn during the reporting period; and

3.2.3.3. A description of the major methods of acquisition and withdrawal of heritage assets during the reporting period. This should include disclosure of the number of physical units (by major category) of transfers of heritage assets between federal entities and the number of physical units (by major category) of heritage assets acquired through donation or devise, if material. In addition, the fair value of heritage assets acquired through donation or devise during the reporting period should be disclosed, if known and material.

3.2.4. Stewardship land should be quantified in terms of physical units (acres). The appropriate level of aggregation and physical units (acres) of measure for each major category (e.g., Land Predominate Use Code) of stewardship land use should be meaningful and determined by the preparer based on the entity’s mission, types of stewardship land use, and how the entity manages the assets. For each major category of stewardship land, the following should be documented:

3.2.4.1. The number of physical units (acres) by major category of stewardship land use for which the entity is the steward as of the end of the reporting period;

3.2.4.2. The number of physical units (acres) by major category of stewardship land use that were acquired and the number of physical units (acres) by major category of stewardship land use that were withdrawn during the reporting period; and

3.2.4.3. A description of the major methods of acquisition and withdrawal of stewardship land during the reporting period. This should include disclosure of physical units (acres) (by major category of stewardship land use) of transfers of stewardship land between federal entities and the number of physical units (acres) (by major category of stewardship land use) of stewardship land acquired through donation or devise, if material. In addition, the fair value
of stewardship land acquired through donation or devise during the reporting period should be disclosed, if known and material.

3.2.5. Sufficient documentation must:

3.2.5.1. Indicate the physical quantity, location, and unit cost of the multi-use heritage assets. The APSR must be designed to be of maximum assistance in making procurement and utilization decisions, including decisions related to identifying general PP&E that may be available for reuse, transfer to other DoD Components, or made available for disposal in accordance with current DoD regulations and other regulatory requirements.

3.2.5.2. Enable periodic, independent verification of the accuracy of the accounting and APSR through periodic physical counts/inventories (existence and completeness, i.e., “book to floor and floor to book”). Such periodic inventories also must include reconciling the APSR and/or other systems with the general ledger accounts and physical counts for multi-use heritage assets, heritage assets and stewardship land. Personal hand receipt self-validations are not acceptable for meeting the independent verification of physical inventory requirements. See DoDI 4165.14 for real property and DoDI 5000.64 for personal property.

3.2.5.3. Identify and classify multi-use heritage assets that were capitalized, recorded in the APSR and accounting system, and reported in the financial statements.

3.2.5.4. Be based on the same documents, to ensure that entries to the financial accounting/reporting and APSR are the same. This will ensure that the APSR is integrated and subsidiary to the financial accounting system, and that such records can be reconciled with the accounting system for multi-use heritage assets, heritage assets and stewardship land.

3.2.5.5. Include all multi-use heritage assets, heritage assets and stewardship land possessed by DoD (to include property held by others) and multi-use heritage assets, heritage assets and stewardship land of others held by DoD through seizure, forfeiture, loss, or abandonment.

3.2.5.6. Provide information to identify and account for improvements to multi-use heritage asset.

3.3 Physical Inventories of Heritage Assets, Multi-use Heritage Assets and Stewardship Land (280303)

DoD Components must perform periodic physical inventories of heritage assets and multi-use heritage assets in accordance with DoDI 5000.64 and DoDI 4165.14. Periodic physical inventories of stewardship land must be performed in accordance with DoDI 4165.14.

3.4 DM&R (280304)

3.4.1. Description

3.4.1.1. In SFFAS 42, the FASAB defines DM&R as maintenance and repairs that were not performed when they should have been or were scheduled to be and which are put off or delayed to a future period.
3.4.1.2. For purposes of this policy, maintenance and repairs are activities directed toward keeping general PP&E assets in an acceptable condition. Maintenance and repairs include preventive maintenance; replacement of parts, systems, or components; and other activities needed to preserve or maintain the asset.

3.4.1.3. Maintenance and repairs exclude activities aimed at expanding the useful life, capacity or capability of an asset or otherwise upgrading it to serve needs different from, or significantly greater than, its current use.

3.4.2. Measurement

3.4.2.1. Amounts for DM&R may be measured using condition assessment surveys, life-cycle cost forecasts, or other methods that are similar to the condition assessment survey or life-cycle costing methods.

3.4.2.1.1. Condition assessment surveys are periodic physical inspections of assets to determine their current condition and estimated cost to correct any deficiencies. DoD Components should assess the condition of heritage assets as a function of their day-to-day operations and document condition through periodic assertion/assessment statements provided by their field office managers. Components also need to evaluate the cost and benefits of doing condition assessment surveys. Such things as cycling the assessments on a rotating basis, the frequency of assessments (i.e., every three or five years) and the criteria and methodology used for making such assessments need to be considered. SFFAS 42 rescinded the requirement to report condition information for heritage assets and stewardship land. See DoDI 4165.70 and DoDI 4715.16 for additional guidance.

3.4.2.1.2. Life-cycle costing is an acquisition or procurement technique, which considers operating, maintenance, and other costs in addition to the acquisition cost of assets. Since it results in forecasts of maintenance and repairs expense, these forecasts may serve as a basis against which to compare actual maintenance and repairs expense to arrive at an estimate of DM&R.

3.4.2.2. DoD Components should determine what condition standards are acceptable and which DM&R measurement methods to apply. Once determined, condition standards and measurement methods must be consistently applied unless the DoD Component determines that changes are necessary. Changes deemed necessary by the DoD Component must be accompanied by an explanation documenting the rationale for the change(s) and any related impact the change(s) will have on the DM&R estimates.

3.4.2.3. DM&R must be measured for capitalized and non-capitalized PP&E, and fully depreciated general PP&E. In addition, DM&R must be measured for inactive and/or excess general PP&E to the extent that it is required to maintain the general PP&E in acceptable condition (e.g., to comply with existing laws and regulations or to preserve value pending disposal) and, DM&R must measure funded maintenance and repairs that have been delayed for a future period as well as unfunded maintenance and repairs.
3.4.3. RSI

SFFAS 42 eliminated the requirement to report condition information and optional reporting of low-high DM&R estimates and critical and non-critical DM&R in the Required Supplementary Information (RSI) of the Agency Financial Report. However, DoD Components must report material amounts of DM&R as RSI to the financial statements (see Volume 6B, Chapter 12). At a minimum, the following information must be presented as RSI for all PP&E:

3.4.3.1. Estimates of the beginning and ending balances of DM&R for each major category of PP&E (i.e., heritage assets and multi-use heritage assets);

3.4.3.2. A summary of the DoD Component’s maintenance and repairs policies and a brief description of how they are applied (e.g., method of measuring DM&R);

3.4.3.3. Policies for ranking and prioritizing maintenance and repair activities;

3.4.3.4. Factors the DoD Component considers in determining acceptable condition standards;

3.4.3.5. Whether DM&R relates solely to capitalized general PP&E and non-capitalized heritage assets or also to amounts relating to non-capitalized or fully depreciated general PP&E;

3.4.3.6. Capitalized general PP&E, and non-capitalized heritage assets for which the DoD Component does not measure and/or report DM&R and the rationale for the exclusion; and

3.4.3.7. If applicable, explanation of any significant changes to DM&R amounts from the prior year and the policies and factors subject to the reporting requirements established in subparagraphs 280304.C.2 through 280304.C.6.

3.5 Reporting Requirements (280305)

3.5.1. SFFAS 29 reclassifies the reporting of all heritage assets and stewardship land from Required Supplemental Stewardship Information to basic information in the financial statements, except for DM&R which must be reported as RSI (see subparagraph 280304.C). The standard requires that entities reference a note on the balance sheet that discloses information about heritage assets and stewardship land, but does not require the reporting of acquisition cost.

3.5.2. DoD Components with heritage assets and stewardship land should reference a note on the balance sheet that discloses information about the heritage assets and stewardship land, but no asset dollar amount should be shown. Instead the minimum reporting requirements for note disclosure include a description of major categories, physical unit information for the end of the reporting period, physical units added or withdrawn during the period, and a description of the methods of acquisition and withdrawal. The DoD Components should also include in the disclosures, the entity stewardship policies and an explanation of how heritage assets and
stewardship land relate to the mission of the entity. See Volume 6B, Chapter 10, Note 10 for the specific reporting requirements. Supporting documentation requirements for financial statement disclosures is described in paragraph 280302, Supporting Documentation.

3.5.3. Multi-use heritage assets require additional descriptive information in the heritage asset note disclosure as set forth in SFFAS 29, paragraph 25, with cross references directing the reader from the balance sheet to the note disclosure. Multi-use heritage assets are to be reported in both the principal financial statements (in dollars) as general PP&E and in the heritage asset note disclosure (in physical units). This reporting and note disclosure would not be considered duplicative as each category is considered unique for this reporting purpose.

3.6 Environmental Liabilities/Cleanup Costs (280306)

The accounting policy for environmental liabilities/cleanup costs pertaining to heritage assets, multi-use heritage assets and stewardship land is contained in Chapter 13.
VOLUME 5, CHAPTER 1: “PURPOSE, ORGANIZATION, AND DUTIES”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are in bold, italic, blue, and underlined font.

The previous version dated July 2021 is archived.

CHAPTER 1

PURPOSE, ORGANIZATION, AND DUTIES

1.0 GENERAL

1.1 Purpose

The purpose of this volume is to establish disbursing requirements, principles, standards, responsibilities, and pecuniary liability standards for disbursing officers (DOs), certifying officers (COs), and other accountable officials throughout the DoD. If new legislation conflicts with Volume 5, the highest-level guidance governs.

1.2 Authoritative Guidance

This volume is issued by authority of DoD Instruction (DoDI) 7000.14, DoD Financial Management Policy; implements the Treasury Financial Manual (TFM) Volume I; and establishes policies for disbursing throughout the DoD. It applies to the Secretary of Defense (SecDef), Military Departments, Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, Combatant Commands, DoD Inspector General, Defense Agencies, and DoD Field Activities (collectively known as DoD Components).

1.3 Recommended Changes and Requests for Deviation or Exception

Recommended changes and exceptions to policy must be sent through appropriate channels to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C))/Chief Financial Officer (CFO). Coordinate requests for deviations from or exceptions to Volume 5 with Accounting and Finance Policy, Strategy, Policy and Requirements (SPR) Directorate, Defense Finance and Accounting Service (DFAS) Indianapolis (DFAS-ZPTA/IN), 8899 East 56th Street, Indianapolis, IN 46249-0050, dfas-in.disbursingpolicy@mail.mil.

1.4 Use of Volume 5

1.4.1 Volume 5 cites specific U.S. Department of the Treasury (Treasury) accounts (e.g., **F3880) where the asterisks ** represent the appropriate DoD Component designator, (i.e., 17 for Navy and Marine Corps, 21 for Army, 57 for Air Force, or 97 for Defense).
1.4.2. Volume 5 prescribes the use of specific forms (see the DoD (DD) Forms Management Program website). DoD Components using systems and producing their own forms in lieu of those prescribed that were in operation at the time of Volume 5’s initial issuance (December 16, 1993) may continue using these systems and forms until DoD implements a single standard disbursing system. A DoD Component electing to use a computer-generated version of a prescribed DD Form must use an exact replica of that form or submit a request for exception in accordance with DoD 7750.08, DoD Forms Management Program Procedures, to the address in paragraph 1.3.

1.4.3. Refer to the Definitions chapter for terms used herein.

2.0 ORGANIZATION

2.1 DFAS

DoD Directive 5118.05 established DFAS under the authority vested in the SecDef by Title 10, United States Code (U.S.C.), section 113, (10 U.S.C. § 113). DFAS is under the direction, authority, and control of the OUSD(C)/CFO. The DFAS Director is the principal DoD executive for finance and accounting requirements, procedures, functions, and the performance of the duties identified in the directive.

2.2 Disbursing Policy

DFAS-ZPTA/IN is under the direction, authority, and control of the Director, SPR. This division:

2.2.1. Develops and promulgates standard DoD disbursing policy and cash management guidance;

2.2.2. Responds to all inquiries pertaining to disbursing policy and cash management within DoD;

2.2.3. Initiates, changes, and implements DoD disbursing policy and cash management guidance according to Treasury regulations;

2.2.4. Acts as the point of contact for all non-criminal investigating officers in relation to loss of funds investigations; and

2.2.5. Performs technical reviews of relief-of-liability cases for DoD Components and activities, including the quarterly minor loss reports.
2.3 DoD Disbursing Offices and Officers

DoD Component Heads, through command channels, ensure that DOs in their commands follow this volume. Commanders monitor disbursing operations, requiring DOs and Deputy DOs (DDOs) under their purview to adhere to Volume 5. DOs, in turn, direct disbursing operations accordingly (see Chapter 2, paragraph 2.1).

2.4 COs, Departmental Accountable Officials (DAOs), and Payment Review Officials

Commanders ensure that COs, DAOs, and payment review officials in their commands follow Chapter 5, section 3.5.

3.0 ACCOUNTABILITY AND RESPONSIBILITY

3.1 Liability

Accountable individuals have personal and pecuniary liability for their acts involving the expenditure and receipt of public funds (see Chapter 5, section 7.0 and Chapter 6, section 3.0).

3.2 Knowledge of Laws Governing Disbursements

Accountable individuals whose duties pertain to the disbursement of public funds must be knowledgeable of and adhere to applicable laws.

3.3 Accountable Officials

Accountable individual, accountable official and accountable officer are used synonymously throughout Volume 5. The term “accountable official” is used in 31 U.S.C. § 3527 to refer to the class of officers or employees of an agency who are pecuniarily liable for repayment of losses or deficiencies of public money, vouchers, checks, securities, or records. Such officials are appointed using a DD Form 577, Appointment/Termination Record - Authorized Signature. Only officers and employees of an agency are eligible for appointment as accountable officials (see Chapter 2, section 3.0).

3.3.1 Disbursing Officials. These include DOs, DDOs, and subordinate disbursing agents, paying agents, cashiers, change fund custodians, collection agents, and imprest fund cashiers. Under 31 U.S.C. § 3321(c)(2), the SecDef is required to designate personnel of the agency as disbursing officials to disburse public money available for expenditure by the agency (see Chapter 2, paragraph 1.1).
3.3.2. **COs**. Under 31 U.S.C. § 3325(a)(1), “a disbursing official in the executive branch of the United States Government shall disburse money only as provided by a voucher certified by the head of the executive agency concerned, or an officer or employee of the executive agency having written authorization from the head of the agency to certify vouchers.” Thus, a DoD agency cannot disburse a payment unless it is certified by a properly appointed CO. These statutory “COs” must be officers or employees of the Federal agency concerned, and are “accountable” because unless granted relief they are pecuniarily liable under 31 U.S.C. § 3528(a) for any payments they erroneously certified. Appointment as a CO is a precondition to enforcement of pecuniary liability under 31 U.S.C. § 3528(a) (see Chapter 5, paragraph 4.1).

3.3.3. **DAOs**

3.3.3.1. In certifying payments, DoD’s statutory COs often are required to rely on information and data provided by agency systems and by other personnel. For this reason, Congress authorized DoD to impose potential pecuniary liability to an additional class of agency officers and employees: those who are formally appointed as a DAO under 10 U.S.C. § 2773a. The SecDef may designate any DoD civilian employee or member of the U.S armed forces under the Secretary’s jurisdiction as a DAO. In the performance of their duties, DAOs are responsible for providing COs with information, data, or services that are directly relied upon by the CO in the certification of vouchers for payment. Title 10 U.S.C. § 2773a does not, however, statutorily mandate that the DoD organizations appoint DAOs to perform such activities; instead, appointment of DAOs to perform any particular function or class of functions is an option available to management for inclusion in management’s internal controls program (see paragraph 3.5).

3.3.3.2. When considering whether to require that only persons appointed as DAOs perform duties that generate the information, data, or services relied upon by COs, agency managers, and appointing authorities take into account considerations that include mission requirements and functions under their responsibility, the availability of resources, the sufficiency of other internal controls, and whether or not a governing policy or directive mandates performance of some function only by a properly appointed DAO (see Chapter 5, paragraph 3.5).

3.3.3.3. **Foreign National Personnel**. A foreign national employee is an individual who is employed by or performing work for U.S. forces outside the United States, its territories, and possessions in a system of employment established in accordance with the DoDI 1400.25-V1231 or a predecessor authority. Under the direct hire arrangement, the legal employer of the foreign national assumes responsibility for all administrative and management functions related to foreign national employment. Under the indirect hire arrangement, the host government serves as the legal employer of U.S. forces’ foreign nationals. Although the host government is the official legal employer of the foreign national personnel, it grants operational control to U.S. forces for the day-to-day management of such personnel (see DoDI 1400.25-V1231).
3.3.3.1. In deciding whether to appoint foreign nationals in overseas areas as COs and DAOs, organizations should take into account whether enforcement of pecuniary liability of such individuals to the United States is precluded as a legal or practical matter by status of forces agreements, other international agreements, or local laws. If enforcement is not precluded by such agreements or local laws, foreign national direct hire employees are eligible for appointment both as COs and DAOs because the agency is the legal employer and such individuals qualify as officers or employees of the United States. If not constrained by such agreements or by local law, the DoD has the ability to enforce pecuniary liability against these employees because it has statutory authority to withhold amounts from their pay accounts.

3.3.3.2. Foreign national indirect hire employees cannot be appointed as COs or DAOs because the United States cannot enforce pecuniary liability by unilaterally setting off indebtedness against their pay accounts and because the agency is not the legal employer. However, this regulation does not prohibit organizations from assigning indirect hire employees to duties that DAOs otherwise would perform, nor does it mandate that organizations appoint DAOs to provide the information or data, or to perform services relied upon by COs to certify payment vouchers. Organizations operating in overseas areas may permit or assign foreign national indirect hire employees to perform such operational duties without appointing them as DAOs if adequate internal controls are in place to support voucher certification.

3.3.3.4. Contractors and Contractor Support Personnel. Do not appoint contractors and contractor support personnel as DAOs or COs.

3.4 Accountable Officials and Inherently Governmental Functions

The Federal Activities Inventory Reform (FAIR) Act of 1998 (Public Law 105-270), as implemented by the Office of Management and Budget (OMB) (31 U.S.C. § 501) provides that, "the making of value judgments in making decisions for the Federal Government, including judgments relating to monetary transactions and entitlements" is an inherently governmental function, i.e., "a function that is so intimately related to the public interest as to require performance by Federal Government employees." For further information regarding inherently governmental functions, see the OMB’s Office of Federal Procurement Policy Letter 11-01, Performance of Inherently Governmental and Critical Functions, which provides a single definition of an inherently governmental function built around the well-established statutory definition in the FAIR Act, as well as establishes criteria for identifying of critical functions and for ensuring sufficient levels of internal agency oversight and management of functions closely associated with inherently governmental functions.
3.5  Management Internal Controls

Management internal controls are specific policies, procedures, and/or activities an organization establishes and implements to manage risk. They are the methods by which an organization governs its activities to accomplish its mission, and are required by OMB Circular A-123, Management’s Responsibility for Internal Control, which implements 31 U.S.C. § 3512(c)(1). Consistent with the guidelines in this paragraph, DOs implement these controls to eliminate opportunities to conceal errors or irregularities and assign work so that no one individual controls multiple phases of a transaction. Inspections and audits of disbursing offices must include a review of management internal controls to determine their adequacy, compliance, and effectiveness.

3.5.1. Standards of Internal Control.  Management determines applicability of these standards at the operational level.

3.5.1.1. Control Environment.  Management and employees establish and maintain an environment throughout the organization that sets a positive and supportive attitude toward internal control and conscientious management.

3.5.1.2. Risk Assessment.  Provide for an assessment of the risks the organization faces from both external and internal sources.

3.5.1.3. Control Activities.  Internal control activities ensure the implementation of management’s directives, and should be effective and efficient in achieving an organization’s control objectives.

3.5.1.4. Information and Communications.  Record and communicate information to management and others within an organization that needs it, in a specific form and inside a time frame that enables them to carry out their internal control and other responsibilities.

3.5.1.5. Monitoring.  Assess the quality of performance over time and ensure the findings of audits and other reviews are promptly resolved.

3.5.2. Separation of Duties.  Separation of duties precludes errors or attempts at fraud or embezzlement from going undetected. Internal controls generally require a four-way separation of the contracting, receiving, voucher certification, and disbursing functions. Assign key duties such as certification of fund availability; contracting (obligating the Government); authorizing, approving, and recording transactions; issuing or receiving assets; certifying and making payments; preparing and signing checks; and reviewing or auditing payments to different individuals to minimize the risk of loss to the Government to the greatest extent possible.

3.5.2.1. Do not assign DOs duties that create potential conflicts of interest (see Chapter 2, paragraph 3.5).
3.5.2.2. Separation of duties is not always practical or possible due to time constraints, work force shortages, or the use of electronic systems. Commanders and DOs must be aware of situations where valid, long-standing separation of duties cannot be achieved, recognize that internal controls have been weakened as a result, and make every effort to mitigate the risks. For example, payments and collections through the Intra-governmental Payment and Collection system can occur outside the disbursing work center without weakening internal controls because the payee is always another Federal agency and recovery of an improper payment is assured, or financial systems which allow for adjustments to the data outside of the normal application include appropriate controls and audit trails for those adjustments. Other situations may require closer scrutiny. Report all situations of inability to separate appropriate responsibilities to the DO’s commander, with a request for a waiver and recommendations to mitigate the risks.

3.5.3. **Electronic and Digital Signatures**

3.5.3.1. **Signatures.** Personnel may use electronic and digital signatures to receive, accept, and certify financial documents processed through automated information systems.

3.5.3.2. **Requirements.** [15 U.S.C. § 7001](#) and [15 U.S.C. § 7021](#) require that either of these media used by a person to sign (e.g., certify) any type of financial document be:

3.5.3.2.1. Unique to that person;

3.5.3.2.2. Under that person’s sole control or custody;

3.5.3.2.3. Linked to the data signed throughout their processing so that if any of the data are changed, the electronic or digital signature is invalidated; and

3.5.3.2.4. Capable of being verified by the paying DO.

3.5.3.3. **Digital Signature.** A digital signature is an electronic signature (see [DoDI 8520.02](#), Public Key Infrastructure (PKI) and Public Key Enabling). Digital signature technology encrypts data; detects changes to digitally signed documents; and enables “authentication” of digital messages, assuring the recipient of a digital message of both the identity of the sender and the integrity of the message.

3.5.3.3.1. Digital signatures and certificates authenticate identity, control access through authorized user levels and PKI certificates or passwords, and provide an encryption capability for information in transit or at rest.

3.5.3.3.2. Secure digital signatures cannot be rejected. Except in a case of a compromise of system security resulting in a forged electronic signature, the signer of a document cannot later deny the validity of the signature, claiming it was forged. The recipient of a digitally signed message has the capability to verify both the document's author and that the document was not altered either intentionally or accidentally after signature.
3.6 Prohibited Payments

Personnel involved in the payment certification and disbursement processes must preclude payments to ineligible recipients. Many tools to aid in this effort are available, among them the Specially Designated Nationals List maintained by Treasury’s Office of Foreign Assets Control. This is a list of individuals and entities covered by Executive Order 13224, Blocking Property and Prohibiting Transactions with Persons Who Commit, Threaten to Commit, or Support Terrorism. Do not initiate, certify, or make payments or draw checks or warrants payable to individuals or organizations on this list (see also I TFM 4A-2030).

4.0 PUNITIVE PROVISIONS

4.1 Misuse of Public Funds

Title 18 U.S.C. § 641 governs crimes of embezzlement and theft. Individuals charged with safekeeping of public funds must handle those funds with utmost care. The loan, exchange for other funds, conversion of funds for one’s own use or that of another, or deposit of public funds except as authorized by law, may subject the individual entrusted with the funds to criminal sanctions.

4.2 Conspiracy to Defraud the Government

Any person entering into an agreement or conspiracy to defraud the U.S. by obtaining or aiding in obtaining the payment or allowance of any false, fictitious, or fraudulent claim is subject to fine, imprisonment, or both as prescribed by 18 U.S.C. § 286.

CHAPTER 2

DISBURSING OFFICES, OFFICERS, AND AGENTS

1.0 GENERAL

1.1 Overview

Title 31, United States Code (U.S.C.), section 3321(c) (2) allows the Secretary of Defense to designate personnel of DoD as disbursing officials to disburse public money available for expenditure. In order to disburse money, an activity must send a request to establish a disbursing office. When establishing disbursing offices and associated appointments of accountable positions, DoD Components must be cognizant of internal control guidelines provided in Chapter 1, paragraph 3.5.

1.2 Purpose

This chapter addresses policy on DoD’s establishment of a disbursing office. A disbursing office is considered necessary for the efficient functioning of an operating activity. This chapter also addresses the appointment of the Disbursing Officer (DO) and other agents appointed to receive and maintain the custody of public funds.

1.3 Authoritative Guidance

Official funds will be received and disbursed by order or on the authority of the commanding officer, except when directed by a superior in the chain of command or when sanctioned by the Comptroller General of the United States. Under 31 U.S.C. § 3325, DoD DOs are authorized to disburse public funds on receipt of vouchers properly certified.

2.0 POLICY

2.1 Request for Establishment of a Disbursing Office

2.1.1 An activity requesting to establish a disbursing office at a new activity, or an activity receiving disbursing services from an external source, sends a memorandum through its chain of command. Each level of command endorses the request to indicate concurrence and provides any additional information required by the approving official. The chain of command forwards the memorandum to the Defense Finance and Accounting Service, Indianapolis (DFAS-IN), ATTN: Enterprise Solutions and Standards, Disbursing (DFAS-IN/JJKDC), 8899 East 56th Street, Indianapolis, IN 46249-0500. The request must include:

2.1.1.1. A statement justifying why an office is required and why the disbursing operation cannot be conducted by an existing disbursing activity;

2.1.1.2. Anticipated workload: number of military and civilian personnel to be supported, and commercial vendor services vouchers to be settled;
2.1.1.3. Proposed date of establishment;

2.1.1.4. Name and location of the nearest Federal Reserve Bank (FRB) or branch, and its distance from the proposed disbursing office. If there is no FRB or branch within a reasonable distance, include the name and location of the nearest designated depositary, if any, and its distance from the proposed office;

2.1.1.5. An estimation of U.S. Department of the Treasury (Treasury) checks needed for the first year of operation (see Chapter 7, section 3.1);

2.1.1.6. Name, social security number, and rank or grade of the proposed DO, if known;

2.1.1.7. An estimation of monthly cash requirements (see Chapter 3, section 2.3); and

2.1.1.8. Information on plans to implement an automated disbursing system.

2.1.2. The memorandum also addresses the appointment of the DO and his or her appointed agents to regularly receive and maintain custody of public funds. The DO may appoint any officer, enlisted member, or civilian employee he or she considers satisfactory as an agent.

2.2 Disbursing Station Symbol Number (DSSN)

2.2.1. DSSN. The DFAS-IN/JFKDC obtains the DSSN from the Treasury’s Bureau of Fiscal Service (Fiscal Service). DSSNs are permanent, and are either open or closed. Open DSSNs are open for an indefinite period. Some open DSSNs may be inactive, and may be either:

2.2.1.1. Contingency, available for use in a military contingency operation;

2.2.1.2. Temporarily deactivated for a specific reason, (e.g., a ship undergoing extensive overhaul for a period of several months may arrange for disbursing service from a shore-based disbursing office or activity); or

2.2.1.3. In settlement pending closure (see section 10.0).

2.2.2. Change in Designation or Location. Coordinate proposed changes in the designation or location (mailing address) of an operating DSSN, to include tactical deployment, with DFAS-IN/JFKDC, who will advise Fiscal Service.

2.2.3. Use of DSSN. The DSSN must appear on all payments, collection vouchers, and Treasury and limited depositary account (LDA) checks processed by the disbursing activity.
2.3 Employer Identification Number (EIN)

The DO, who disburses taxable funds, should ensure payments received by entitlements’ activities have secured an EIN to report taxable income or income and withholdings.

2.4 Reporting Activation of a Disbursing Office

The DO activating a disbursing office notifies Fiscal Service, Check Reconciliation Branch, through DFAS-IN/JJKDC by memorandum immediately upon commencement of disbursing operations. Include in the memorandum: the name of the disbursing activity, DSSN assigned, DO’s name, rank or grade, the opening date of the account, and the first and last serial number of all blank Treasury checks on hand in each check range. Send a copy of the memorandum to the supporting DFAS site.

3.0 APPOINTING DOs, DEPUTY DOs (DDOs), AND OTHER ACCOUNTABLE OFFICIALS

3.1 Persons Authorized to Have Custody of Public Funds

To ensure proper security and accounting for public funds, assign responsibility to a limited number of authorized persons to receive, maintain custody, and disburse or otherwise dispose of public funds.

3.2 Accountable Officials

Accountable Officials are officers or employees of an agency who are or who may be found to be pecuniarily liable for repayment of losses or deficiencies of public money, vouchers, checks, securities, or records (see Chapter 1, section 3.0).

3.3 Appointments

Use DoD (DD) Form 577, Appointment/Termination Record-Authorized Signature, to appoint accountable officials. This form does not allow multiple appointments simultaneously. It is the only document required to support this type of appointment. Send a copy of the DD 577 and the required original specimen signature as specified in subparagraph 4.4.1 to DFAS-IN/JJKDC to be maintained in the DO’s files.

3.4 Exceptions

3.4.1 An individual who occasionally receives public funds does not need to be appointed formally as an accountable official. Funds may be received at times, at locations, and under circumstances that preclude any advance arrangement for their receipt. At some activities, collections are so infrequent that it is impractical to have a formal designation in effect. Funds received by persons other than those formally designated must promptly send funds received to their servicing disbursing office or to another person formally designated to receive them.
3.4.2. The DO at DFAS sites may hold more than one DSSN, and may serve concurrently as a DDO to other DFAS DOs. Each DDO appointed by a DFAS DO may serve under one or more of the DSSNs assigned to the appointing DO and may also serve more than one DFAS DO concurrently. DOs and DDOs at DFAS sites holding multiple DSSN appointments complete a separate DD 577 for each applicable DSSN.

3.4.3. The DO and DDOs aboard Navy vessels may serve concurrently in other accountable positions, (e.g., ship’s stores officer, food service officer) when the ship’s manpower authorization does not provide Supply Corps officers for each accountable function (see Chapter 1, subparagraph 3.5.2).

3.4.4. When directed by appropriate authority, DOs, DDOs, and their agents may accept, safeguard, account, and dispose of personal funds and valuables received for safekeeping. Where personnel resources are limited, persons serving as DOs or other accountable officials may also serve as safekeeping custodians at the commander’s discretion (see Chapter 16, paragraph 1.1).

3.5 Restrictions

Except as specifically authorized, do not assign DOs additional duties of order approving authority, certifying officer, custodian of any fund, or other conflict-of-interest assignment.

3.6 Terminations

Terminate appointments using Section IV of the appointing DD 577.

4.0 DOs

4.1 Eligibility

To be eligible for appointment as a DO, an individual must be a U.S. citizen and have previous experience as a DO or have completed (or agreed to complete) specific DO training as defined by the appointing authority.

4.2 Appointment

The commander, director, or other equivalent appoints a DO using a DD 577 (see paragraph 3.3).

4.3 Terminations

Terminate appointments using Section IV of the appointing DD 577.
4.4 Submission of DD 577 and Fiscal Service (FS) Form 3023, Specimen Signatures

4.4.1. Official Signature. Before commencing disbursing operations, a DO and all appointed DDOs determine which of their given names and/or initials will comprise their official signatures, and use them on all checks, vouchers, correspondence, and official documents pertaining to the DoD, Government Accountability Office (GAO), and Treasury. Send DD 577 and FS 3023 to DFAS-IN/JJFKDC, having used permanent dark blue, blue-black, or black fade-resistant ink that is not readily soluble in water.

4.4.2. Official Signatures to Other Depositaries. If checks will be drawn on a depositary other than the Treasury, send the DO’s official signature (as well as those of DDOs authorized to sign depositary checks) to the depositary. An officer whose signature is known to the depositary must certify the forms.

4.4.3. Change of Official Signature. A DO or DDO may change his or her official signature by submitting a new FS 3023 to DFAS-IN/JJFKDC.

4.4.4. Furnishing Additional Signatures When Transferred to a New Station. The DFAS-IN/JJFKDC files specimen signatures under each DSSN used and furnishes them to different banks upon request for use in cashing and processing checks, and may request that a DO or DDO furnish an additional FS 3023. Since an individual’s signature may change over time, DFAS-IN/JJFKDC may request additional signatures if needed.

4.5 Commencement of Disbursing Duty

Immediately upon commencement of disbursing duties, a DO activating a new disbursing office, reactivating a disbursing office, or relieving another DO, prepares a memorandum that includes: name of the disbursing activity, DSSN assigned, DO’s name, rank or grade, opening date of the account, and the beginning and ending serial number of all blank Treasury checks on hand in each check range. If applicable, also include the relieved DO’s name and rank or grade. Keep the original memorandum in the disbursing office and sends copies to DFAS-IN/JJFKDC and the supporting DFAS site.

4.6 Transfer of Disbursing Duty

4.6.1. Joint Actions by the Outgoing and Incoming DOs. The outgoing and incoming DOs establish the date to transfer accountability, subject to command approval. Since accountability is reported daily by a full Central Accounting Reporting System (CARS) daily reporter, a transfer of disbursing duty is not required to occur on the last day of the month, as required for CARS non-daily reporters. In a daily reporting environment, the Standard Form (SF) 1219, Statement of Accountability is no longer required to be submitted to the Treasury (see Chapter 15, section 6.0). When the transfer occurs, the outgoing and incoming DOs:

4.6.1.1. Verify cash on hand;

4.6.1.2. Verify all documents that support the SF 1219, as assets;
4.6.1.3. Verify and prepare a letter of transfer for all blank Treasury checks. Both DOs sign the letter. The incoming DO reports all checks issued by the outgoing DO that were not reported to the Treasury before the transfer of accountability. The Incoming DO also resubmits any rejected entries. Include the numbers of the blank checks the incoming DO receives in the commencement of disbursing duties memorandum. The first check in the series must be the next sequential number after the last check listed on the outgoing DO’s last check issue report. The last check receipted should be the same as the last check number previously ordered and received by the outgoing DO. Research any checks missing or out of sequence and void them if necessary;

4.6.1.4. Verify stored value card stock (see Chapter 10, subparagraph 2.12.1);

4.6.1.5. Verify postal money orders on hand;

4.6.1.6. Verify safekeeping deposits (see Chapter 16, paragraph 4.2);

4.6.1.7. Prepare a memorandum of relief for submission to the commander if required by local regulations;

4.6.1.8. Verify and transfer all documentation supporting balances in clearing accounts **F3880 (Unavailable Check Cancellations and Overpayments (Suspense)), **F3875 (Budget Clearing Account (Suspense)), and **F3885 (Undistributed Intra-governmental Payments). The Treasury Financial Manual (TFM), Volume 1, Part 4, Chapter 7000 (ITFM 4-7000) and I TFM 2-1500, require these accounts be cleared to proper appropriations or funds as expeditiously as possible. To clear account **F3880, the outgoing DO presents a detailed list of individual subsidiary transactions, supporting documentation, and current status. Documented evidence includes certification that the DO or designated DDO personally reviewed the balances in the account within the last month (see Chapter 7, subparagraph 11.9.5); and

4.6.1.9. Validate unreconciled differences (e.g., check issue and deposit discrepancies, Intra-governmental Payment and Collection system differences). In addition, ensure that the outgoing DO’s accountability, the balance amount on the DoD (DD) Form 2657, Daily Statement of Accountability, is reconciled with the DO Cash Treasury Account Symbol (TAS) on the daily CARS Account Statement. If the outgoing DO cannot provide documentation supporting the unreconciled items, he or she processes the discrepancies as losses (see Chapter 6, section 4.0) or overages (see Chapter 6, section 8.0) of funds.

4.6.2. Actions by Outgoing DO. Upon relief from disbursing duty:

4.6.2.1. Terminate all DDO, agent, and cashier appointments and clear all related DD 1081(s), Statement of Agent Officer’s Account;

4.6.2.2. Transfer all cash, negotiable instruments, money accounts, books, property, vouchers, and other retained records to the incoming DO;

4.6.2.3. Prepare and submit a final SF 1219. The incoming DO signs and marks it as "FINAL";
4.6.2.4. Prepare and submit a final SF 1179, Month End Check Issue Summary. The incoming DO signs and marks it as "FINAL";

4.6.2.5. Send a copy of the incoming DO’s commencement of disbursing duty memorandum, including copies of all the letters of transfer of total accountability with the final SF 1219 to the DFAS site where financial reports are submitted;

4.6.2.6. Prepare and send a memorandum to the supporting DFAS site and DFAS-IN/JFKDC advising of the date and check number of the last check issued;

4.6.2.7. Verify the destruction of signature plates or digitized signature medium being withdrawn from service (i.e., not to be used again). Follow the guidance in Chapter 7, subparagraph 5.2.6. When the medium has been destroyed, send a copy of the certificate of destruction to DFAS-IN/JFKDC; and

4.6.2.8. Transfer custody of the check-signing machine to the incoming DO, if applicable.

4.6.3. Actions by the Incoming DO. The incoming DO ensures that all actions listed in this section are accomplished, documented, and verified before signing for the accountability. The actions listed are to be taken by an incoming DO before reporting to the new disbursing office or activity.

4.6.3.1. Upon commencement to disbursing duty:

4.6.3.1.1. Send the FS 3023 and memorandum to DFAS-IN/JFKDC and the DFAS site that receives the DO’s financial reports. If signatures have been furnished previously as a DO or DDO, submission of the FS 3023 is not required unless specifically requested or a change of official signature is desired. If the outgoing DO has an LDA with check stock, send specimen signatures to the LDA;

4.6.3.1.2. Contact the disbursing office or activity to determine if a check-signing machine is in use. Obtain all necessary information about the machine (make, model and number of media required);

4.6.3.1.2.1. If the incoming DO has never had a signature medium, provide three official signature specimens in addition to those required by paragraph 4.4, and request the required medium be ordered and received before the actual transfer date.

4.6.3.1.2.2. If a signature medium cannot be received or obtained before the actual date of transfer, the incoming DO may request DFAS-IN/JFKDC to authorize the use of the outgoing DO’s until a new one arrives, to allow continued efficient operations of the disbursing office. The incoming DO is accountable and pecuniarily liable for payments made on or after the date of the transfer of accountability.
4.6.3.1.3. Appoint at least one DDO and send the DD 577 and FS 3023 to DFAS-IN/JJKDC. Appoint agents, cashiers, and other accountable officials as necessary;

4.6.3.1.4. Verify the adequacy of the safekeeping facilities for funds, blank checks, stored value cards, and other accountable documents. If the facilities are inadequate, report the deficiencies to the commander and request that proper facilities be provided (see Chapter 3, section 3.0);

4.6.3.1.5. Change all safe combinations;

4.6.3.1.6. Review cash on hand requirements. If the current cash holding authority is valid, the incoming DO may retain it until the normal resubmission date. Otherwise, the incoming DO submits a new cash holding authority request as soon as possible after assuming the account (see Chapter 3, paragraph 2.3); and

4.6.3.1.7. Notify all serviced activities, agencies, commercial concerns, and necessary stakeholders of the account holder change.

5.0 DDOs

5.1 Eligibility

An officer, enlisted member, or civilian employee acceptable to the DO and who is a U.S. citizen may be appointed as a DDO.

5.2 Appointment

DOs appoint their DDOs using the DD 577 (see paragraph 3.3).

5.3 Terminations

A DO may terminate a DDO’s appointment at any time by completing Section IV of the appointing DD 577. When a DO is relieved from disbursing duties, he or she revokes the appointments of all DDOs. In all cases, send a copy of the DD 577 to DFAS-IN/JJKDC. If another individual will succeed a DDO, send a copy of the appointing DD 577 and FS 3023 for the new DDO, with the copy of the notice of revocation to DFAS-IN/JJKDC. If a DDO appointment is terminated for cause, include the reason for termination when sending the appropriate DD 577 to DFAS-IN/JJKDC.
6.0 CHANGE IN THE STATUS OF DOs OR DDOs

6.1 Authorized Absence of DOs and DDOs

During an authorized absence, the DO remains accountable for the account unless or until it is officially transferred. Accountability does not need to be transferred unless, in the DO’s judgment, not doing so would impair proper supervision. The DO must maintain an adequate system of controls to avoid errors and ensure the implementation and effectiveness of those controls. For relief of liability to be considered, the DO must show clearly what the procedures were and how they were implemented during the absence (e.g., records must show that any loss incurred was not the result of bad faith or lack of reasonable care).

*6.2 Death, Disability, or Removal of a DO

* 6.2.1. **Death, Disability, or Removal of a DO.** When a DO dies, becomes disabled, or is removed from disbursing duty for cause (including unauthorized absence), a DDO under 10 U.S.C. § 2773, may continue to disburse under the accounts of the DO through the last day of the second month after the month of death, disability, or removal. If there is more than one DDO, the commander, DFAS Director, or designee, as appropriate, designates one DDO to disburse in the DO’s name.

6.2.2. **Responsibility of the Commander or DFAS Director.** The commander, DFAS Director, or designee:

6.2.2.1. Seizes and seals all disbursing spaces, keys, property, and safe(s) to ensure the security of the funds, property, and spaces involved;

6.2.2.2. Appoints a board of at least three disinterested but qualified persons to inventory the vouchers, funds, and property on hand (see subparagraph 6.2.3);

6.2.2.3. Appoints based on the disbursing needs of the activity:

6.2.2.3.1. A custodian of the disbursing office’s vouchers, funds, and property (see subparagraph 6.2.4); or

* 6.2.2.3.2. A qualified person (normally a DDO) to take charge of the DO’s vouchers, funds, and property involved and perform as acting DO until a regular relief reports (or is appointed), or until the last day of the second month following the date of death, disability, or removal (see subparagraph 6.2.5); and

6.2.2.4. Notifies the supporting DFAS site of all actions taken and provides an information copy to DFAS-IN/JFKDC.
6.2.3. **Responsibility of the Inventory Board.** The appointed board, as prescribed in subparagraph 6.2.2.2, inventories all public funds, including advances to deputies, agents and cashiers; vouchers evidencing receipt, transfer, or disbursement of funds; safekeeping deposits; stored value cards, if applicable; and property of the DO in the presence of the immediate custodians and the appointed custodian, acting DO, or incoming DO. In addition, the appointed board must verify the departed DO’s accountability balance on the DD 2657 is reconciled with the DO Cash TAS on the daily CARS Account Statement. If there is no documentation supporting the unreconciled items, the incoming DO processes the discrepancies as losses (Chapter 6, section 4.0) or overages (Chapter 6, section 8.0) of funds.

6.2.3.1. The board verifies all official records to determine that the cash on hand agrees with the records, verifies that all checks and stored value cards issued in the current accounting period have been properly accounted for, and inventories blank checks to determine if any are missing.

6.2.3.2. If the board discovers a shortage or deficiency, the commander takes the actions prescribed for losses of funds or deficiencies in the DO’s account as prescribed in Chapter 6, section 4.0.

6.2.3.3. All members of the board prepare and certify an original and four copies of the inventory as true and accurate. The board turns over all public funds and property certified on the inventory to the appointed custodian, acting DO, or incoming DO. The incoming DO retains a copy of the inventory report, provides the original to the commander, and a certified/notarized copy to each member of the board.

* 6.2.4. **Responsibility of the Custodian.** The custodian, on receipt of the original inventory, assumes custody of the public funds, and property held by the former DO. No transactions other than collections may be conducted. When the disabled DO returns, or a new, permanent DO reports, the custodian and the DO inventory and transfer all vouchers, funds, and property as prescribed in the relief procedures.

* 6.2.5. **Responsibility of the Acting DO.**

6.2.5.1. The DDO appointed to serve as the acting DO performs and is accountable for all official duties that would have been required of the DO, to include submitting financial reports for the DO as of the date of death, disability, or unauthorized absence. Include only those vouchers actually paid by the former DO in the reports. The DDO submits the reports in the name of the former DO.
6.2.5.2. Include in the reports: information on the date of death, disability, or unauthorized absence; and the fact that transactions included were made by the former DO. Include vouchers for which checks have been drawn but not delivered in the first reports covering transactions made by the DDO. Submit subsequent financial reports at the normally prescribed times in the name of the former DO, signed by the DDO, and include only transactions made by the DDO under authority of subparagraph 6.2.5.1. Do not merge the financial reports of transactions performed by an acting DO with those of the officer for whom he or she was appointed, or with those submitted by the regular relief after the disbursing duties are assumed.

6.2.5.3. The DDO signs all checks drawn in the manner normally used when the DDO signs checks. If the volume of checks warrants, the acting DO may use the former DO’s signature plates. The acting DO is accountable and pecuniarily liable for all payments and official acts subsequent to the death, disability, or unauthorized absence of the DO.

6.2.6. Responsibility of the Incoming DO. If the commander appoints an individual as DO to relieve the deceased, disabled, or removed DO, the incoming DO is responsible for performing all actions required in subparagraph 6.2.3, and for rendering financial reports in his or her own name.

6.2.7. Administration of the Accounts of a Deceased, Disabled, or Removed DO. The commander should strive to protect the rights of a deceased, disabled, or removed DO, as well as the custodian, acting DO, or incoming DO so that, for any differences discovered during settlement of the accounts, responsibility may be assigned to the appropriate individual. The acting or incoming DO completes the vouchers, closes the accounts, maintains custody of records, and renders the final reports of the outgoing DO. Further, the individual signs documents prepared in connection with the administration and settlement of the accounts of the outgoing DO as follows:

_______________________________
(Name of Disbursing Officer)

By _________________________
Acting (appointed per 10 U.S.C. § 2773)

The commander of an exonerated DO restored to duty, following arrest, suspension, or other disability, directs a second inventory to be taken by the restored DO and the custodian, acting DO, or incoming DO. The guidance in subparagraph 4.6.1 regarding the transfer of accountability from an outgoing to an incoming DO applies.

6.2.8. DDO at Branch Disbursing Office. Upon the death, disability, unauthorized absence, arrest, or other emergency absence of a DDO at a branch disbursing office, the local commander advises the DO as expeditiously as possible. Depending upon the circumstances, the DO requests the local commander to appoint a board to inventory the accountability and property of the DDO and appoint a suitable person to take custody of the accountability and property until the DO can take an inventory. If practical, the DO takes an inventory of the accountability and property in the presence of a competent witness.
7.0 OTHER AGENTS OF DOs

7.1 Agents

Officers, enlisted members, or civilian employees satisfactory to both the appointing officer and DO may be appointed as agents, (e.g., disbursing agents (DA), cashiers, paying agents (PA), collection agents, change fund custodians, imprest fund cashiers). No agent may be appointed or used over protest of the accountable DO, serve concurrently in any other accountable position, or be charged with the handling or custody of any other funds (see paragraph 3.5).

7.1.1. DOs’ agents are pecuniarily liable under accountable official laws for losses of public funds in their possession. When appointing agents, appointing authorities should carefully consider appointing non-U.S. citizens as accountable officials. In some instances, foreign nationals and other non-U.S. citizens may be precluded from being held pecuniarily liable for losses of funds (see Chapter 1, subparagraph 3.3.3.3).

7.1.2. From a security standpoint, do not allow an excessive number of individuals access to public funds.

7.1.3. After an individual ceases to serve in an appointed position, the DO maintains appointing documents for a retention period following the guidance in Chapter 15, section 8.0. Appointments as agents of DOs are effective only while the DO continues to serve as DO of that disbursing activity.

7.1.4. The appointing officer terminates appointments when appropriate (e.g., when the DO is relieved, when the agent ceases to perform the duties for which appointed, or for cause (see subparagraph 4.6.2.1), using Section IV of the original appointing DD 577.

7.2 Disbursing Agents

7.2.1. Duties and Responsibilities. A DA is a DO’s agent who is not a DDO. A DA’s responsibilities can include all duties, assignments, and functions of a DDO except the authority to sign Treasury checks.

7.2.2. Establishing Positions. The appropriate major command or Defense Agency establishes DA positions in writing.

7.2.3. Appointments. The DO appoints DAs following paragraph 3.3, which includes the appointee’s acknowledgement. The DO sends the original copy to the DA, a copy to the office where the duties are performed, and retains a copy on file.
7.3 Cashiers

7.3.1. Selection Criteria. An officer, enlisted member, or a civilian employee with working knowledge of the cash functions and operations, and acceptable to the DO, may be appointed as a cashier. The DO should also obtain a credit report, if access to a credit reporting service is available, charging the associated costs to the Operations and Maintenance funds available to the activity. Safeguard credit reports against unauthorized access.

7.3.2. Duties and Responsibilities. Cashiers disburse, collect, and account for cash; and perform other duties as required concerning the receipt, custody, safeguarding, and preparation of checks. A cashier may prepare DO accountability reports, but the DO, DDO, or DA must personally validate them.

7.3.3. Appointments. The DO appoints cashiers following paragraph 3.3, which includes the appointee’s acknowledgement. The DO sends the original copy to the cashier, a copy to the office where the duties are performed, and retains a copy on file.

7.3.4. Restrictions. A cashier may not:

7.3.4.1. Sign checks;

7.3.4.2. Accept checks drawn (and endorsed to the cashier) in the name of the DO, DDO, or DA to procure and disburse cash for any purpose;

7.3.4.3. Prepare billing documents and accept collections for the same items. This restriction also applies to a DA performing cashier duties;

7.3.4.4. Prepare vouchers that they will later pay; and

7.3.4.5. Prepare vouchers on days when they perform cashier functions.

7.4 PA

7.4.1. Appointments. Commanders appoint PAs only when adequate payment, check cashing, or currency conversion services are not otherwise available (see paragraph 3.3). Appointments are for a specific transaction or time period. Do not appoint PAs solely as a convenience when a DO, DDO, DA, or cashier can make the required transactions. In unusual situations (e.g., payments or currency conversions must be made at remote locations where use of checks is not feasible), the DO may request a remote location commander appoint a PA to make the necessary payments for and in the name of the DO from cash advanced for that purpose.

7.4.2. Restrictions. PAs may not act as certifying officers (see Chapter 5, section 3.4) or purchasing officers. Escort officers serving as PAs for expenses related to official travel may likewise not be purchasing officers. See Chapter 1, subparagraph 3.5.2 for guidance on separation of duties and Chapter 5, subparagraph 3.1.2 for guidance applicable to micro-purchases in contingency operations.
7.5 Collection Agents

7.5.1. Establishing Positions. Commanders may establish collection agent positions to receive funds derived from functions such as hospitalization fees and other charges at medical facilities (e.g., communication charges, rentals and other charges at housing developments, fees for research or reproduction of records, safekeeping deposits where the safekeeping function is not performed by the DO, and similar functions when appropriate).

7.5.2. Appointments. The commander appoints collection agents following paragraph 3.3. Unless revoked by the appointing authority, collection agent appointments remain in effect through succeeding appointing authorities.

7.6 Change Fund Custodians

7.6.1. Duties and Responsibilities. A change fund custodian receives a change fund from the parent DO, safeguards it, is pecuniarily liable for any loss, and makes change for sales transactions. The commander provides a detailed description of duties to be performed.

7.6.2. Establishing Positions. The sales activity commander (e.g., commissary, hospital) establishes the position.

7.6.3. Appointments. The activity commander or designee appoints a change fund custodian following paragraph 3.3 in coordination with the parent DO.

7.7 Imprest Fund Cashiers

The activity commander appoints an imprest fund cashier following paragraph 3.3 to make authorized cash payments for materials and non-personal services, maintain custody of funds, and file periodic vouchers to account for and replenish the imprest fund. An imprest fund cashier may be an officer, enlisted person, or civilian employee who is not responsible for originating, approving, or processing imprest fund requirements. An imprest fund cashier (or alternate) may not have access to or control of more than one fund. The commander keeps the appointing document and approval for establishment of the imprest fund in a permanent file, and furnishes two copies of these documents to the cashier and one copy each to the DO and installation or activity contracting office (see section 9.0).

7.8 Alternate Agents

7.8.1. Agents. When required, one or more alternate agents may be designated to serve only during the absence of an appointed primary agent. Alternate agents for DDOs are not permitted. The official authorized to appoint the primary agent also appoints alternates following paragraph 3.3. When serving in place of the primary agent, the alternate agent is subject to all regulations applicable to the primary. Alternate agents may not merge funds received with those of the primary agent, and must also maintain separate records from those of the primary agent to establish the amount for which each is responsible. Alternate agents may not conduct operations involving the handling of public funds concurrently with the primary.
7.8.2. Alternate Imprest Fund Cashier. Under paragraph 3.3, a commander may appoint an alternate imprest fund cashier to provide service during a principal’s absence. Appointment requirements for principal cashiers apply to alternate cashiers. Upon return of the principal, the alternate returns paid receipts, subvouchers, and residual cash to the DO.

7.8.2.1. Planned Absences. In planned absences of the principal cashier and with the appointing official’s written authorization, the principal may advance cash to the alternate in any amount up to the limit of the fund, using a DD 1081 for the advance.

7.8.2.2. Unforeseen Absence. In the unforeseen absence of the principal cashier, the DO may advance funds to the alternate in the normal manner; these funds are in addition to the amount advanced to the principal under the established fund, but may not exceed the authorized amount of the fund.

*7.9 Death, Disability, or Unauthorized Absence of Agents

In the event of the death, disability, or unauthorized absence of an agent, the appropriate commander follows paragraph 6.2 for deputies at branch offices, but appoints relieving agents following procedures applicable to the position involved. In the case of an imprest fund cashier, the relieving imprest fund cashier prepares the final voucher.

8.0 DEACTIVATING OR CLOSING A DSSN

8.1 Deactivation

8.1.1. DSSN Temporary Closure. To eliminate the necessity of submitting monthly financial and checking account reports during the period of inactivity, the DO deposits all currency, coin, and negotiable instruments; closes the LDA, and if applicable; properly disposes of all undeliverable checks; submits the memorandum required for closure of disbursing offices with additional information that the account is closed temporarily; and retains blank Treasury check stock for use when the disbursing operation is reactivated (see Chapter 7, section 3.7 for inventory and storage requirements). A DO preparing an office for closure ensures that the DO’s accountability balance on the DD 2657 and the DO Cash TAS in CARS are reconciled (Agency Location Code settlement). The DO may reopen that same DSSN at any time by submitting the report of commencement of disbursing operations. Note: A DO may not close a DSSN temporarily if any cash or documents representing cash are on hand. Any assets on hand, including deficiencies such as dishonored checks or losses of funds, require monthly submission of an SF 1219.

8.1.2. Designation of a Settlement Office. The supporting DFAS site designates another disbursing office as the settlement office to handle uncleared transactions for the closed office.
8.1.3. **Notification of Deactivation Pending Closure.** The DO will:

8.1.3.1. Notify all affected activities, agencies, commercial concerns (including LDAs when applicable), and individuals of the disbursing office deactivation date and the name and location of the settlement office to which all accounts will be transferred;

8.1.3.2. Notify Fiscal Service by memorandum through DFAS-IN/JFKDC that the disbursing office is being deactivated pending closure. Include the DSSN, date of deactivation, the office to which the accounts and records have been/will be forwarded for settlement, and the last check number of each check range issued by the DSSN. Also, include the date and check number of the last check signed in each check range by each DDO where separate check series are assigned to DDOs at branch offices. Send a copy of the memorandum to the supporting DFAS site. Once a disbursing office is reported to Fiscal Service as being in a settlement status, it may not be reopened or transferred to another location without Fiscal Service approval. Once the settlement office has met all requirements in section 8.0, pertaining to closing the disbursing office, Treasury will close the DSSN permanently;

8.1.3.3. Notify commanders and request termination of appointment for all agents they appointed;

8.1.3.4. Issue terminations of appointments to all DDOs, agents, and cashiers (see paragraph 3.6);

8.1.3.5. Notify commanders and request termination of the DO’s and agents’ authorities to hold cash at personal risk; and

8.1.3.6. Clear all outstanding agent advances (e.g., imprest fund cashier and change fund custodians).

8.2 **Deposits**

Deposit all currency, coin, negotiable instruments, and LDA balances to the credit of the Treasury (see Chapter 11, section 8.0).

8.3 **Deposits Fund Account Balances**

Transfer deposit fund account balances that could not be cleared to the designated settlement office. Send a detailed list of the persons owed or funds to be reimbursed with any documents or backup information with the SF 1081, Voucher and Schedule of Withdrawals and Credits, to the settlement office. The SF 1081 is the basis for adjusting the general ledger for the amounts transferred.
8.4 Undeliverable Checks

Cancel all undeliverable checks and return checks forwarded by other DOs as undeliverable to the forwarding DOs for cancellation (see Chapter 7, paragraph 10.3).

8.5 Blank Treasury Check Stock

Destroy remaining blank check stock and report them on the SF 1179 as “voids” (zero dollar value issues) (see Chapter 7, paragraph 9.3).

8.6 Stored Value Cards

Stored Value Card stock must be treated like blank check stock (see paragraph 8.5).

8.7 SF 1219

Prepare and submit an SF 1219 (marked “FINAL”) covering the period from the first day of the accounting period through the close of the last business day (see Chapter 15, section 6.0).

8.8 SF 1179

Prepare and submit an SF 1179 (marked “FINAL”) covering the period from the first day of the accounting period through the close of the last business day. Include all checks issued during the period as well as the blank check stock destroyed and reported as “voids”.

8.9 Equipment

Notify the supporting DFAS site of the availability of useable office equipment. The supporting DFAS site advises other DOs of the equipment available and facilitates transfers between disbursing offices, if requested. If no other disbursing office needs the equipment, the DO turns over the equipment to the supporting property disposal office. See Chapter 7, subparagraph 5.2.6 for disposition of signature media.

8.10 Discrepancies

A DO preparing an office for closure ensures that no discrepancies exist in his or her accountability. The supporting DFAS site reviews all accounts transferred to settlement offices and may order collection action against a relieved DO who submits a disbursing account to a settlement office with unresolved deficiencies in the accountability (e.g., dishonored personal checks, unconfirmed deposits, check issue records and reports, physical losses of funds, and unresolved open debit items in **F3875, **F3880, and **F3885 clearing accounts).
8.11 Closure

Only the Treasury may close a DSSN. Follow the policies within section 8.0 to pursue closing a disbursing office permanently. Once a disbursing office has been closed, it may be used only for settlement purposes. If the disbursing office is to be reopened, the DO must request and receive approval for reactivation from the Fiscal Service through DFAS-IN/JJKDC. The Fiscal Service also must approve a new check range.

9.0 IMPREST FUNDS

9.1 Overview

Imprest funds are generally not authorized for DoD activities. Exceptions are allowed for contingency and classified operations. Submit specific requests for exception in accordance with Chapter 1, paragraph 1.3. Include adequate justification and demonstrate that the use of a government purchase card, third party draft, purchase card convenience check, government travel card, or other reasonable alternatives are not feasible for the specific situation. Agencies granted the authority to disburse imprest funds must classify imprest fund transactions using established and appropriate TAS/Business Event Type Code (TAS/BETC). DOs advancing or receiving funds from an imprest fund cashier will treat the transactions similar to advancing other accountable agents. The Shared Accounting Module website provides Enterprise Reference Data for the TAS/BETCs. In lieu of imprest funds, use the government purchase card for micro-purchases of supplies and/or services and the government travel card for travel payments formerly made from the imprest funds. If an imprest fund is authorized, the DO and the imprest fund cashier keep a copy of the signed authorization to establish and maintain the fund. Detailed regulations concerning establishing, using, and accounting for imprest funds, including the responsibilities of designated imprest fund cashiers and alternates are in:

9.1.1. *ITFM 4A-30165*;

9.1.2. GAO Policy and Procedures Manual for Guidance of Federal Agencies, *Title 7, Fiscal Guidance, Chapter 6*; and

9.1.3. The Federal Acquisition Regulation Part 13, *subpart 13.305*.

9.2 Safeguarding Imprest Funds

Safeguard cash and disbursement documents at all times (e.g., safes, locked cash drawers) as prescribed in Chapter 3, section 3.0. The imprest fund cashier should maintain an organizationally and physically convenient location on the installation or activity to make payments to vendors or carriers. Do not commingle imprest funds with other cash funds (e.g., disbursing funds, change funds, or cash receipts for other funds). The imprest fund cashiers must be able to account for the full amount of funds being held at any given time. The responsible imprest fund cashier is accountable to the advancing DO for receipts or subvouchers supporting temporarily unreimbursed expenditures from any imprest fund, together with the cash on hand, in support of the total amount of the fund, and is subject to review by the DO at any time.
10.0 SETTLEMENT OF DO ACCOUNTS

10.1 Overview

The responsibility to clear outstanding items in the accounts of a DO relieved from disbursing duty is normally assigned to a designated settlement office (see subparagraph 8.1.2). The DO of the designated settlement office (referred to as the settlement officer), follows this guidance to resolve discrepancies in a relieved DO’s accountability. All correspondence and vouchers initiated by the settlement officer should show the name and DSSN of the accountable officer, date and number of the voucher or account, and be signed “By (name of settlement officer), Settlement Officer for (name and DSSN of accountable officer).” Normally, the settlement officer is also responsible for other residual disbursing functions, (e.g., issuance of stop payment requests, required records research pursuant to claims against the government, and clearing of all suspense accounts).

10.1.1. Deficiencies. In all instances, the relieved DO is responsible for resolving deficiencies before relief, if possible. If a deficiency exists in the account of a relieved DO and it appears that no action was taken to remove it from the accountability and no relief request is pending, the settlement officer should initiate collection action against the accountable DO.

10.1.2. Non-tactical Disbursing Stations. At non-tactical disbursing stations, settlement duties are normally the responsibility of the relieving DO. When one of these stations is closed, the supporting DFAS site designates another non-tactical disbursing station within the site’s area to assume the closed station’s disbursing operations and perform the settlement function.

10.1.3. Tactical Disbursing Stations. For naval vessels and tactical units, the servicing DFAS site performs the duties of settlement officer for relieved DOs whether or not the disbursing function of the naval vessel or unit is closed.

10.2 Responsibility of Relieved Officers

Despite the appointment of a settlement officer, the relieved DO is responsible for accounting for all funds expended while performing disbursing duties. Transfer of disbursing records under the authority of section 10.0 only relieves the DO of the paperwork incident to settlement of the account. Accountability for illegal, incorrect, or improper payments that cannot be adjusted despite the diligence of the settlement officer remains with the DO. The relieved DO should keep the settlement officer informed of his or her current mailing address at all times. The relieved officer should also answer inquiries related to settlement of outstanding items and furnish any advice or suggestions, which may be of assistance in the prompt and complete clearance thereof.
10.3 Settlement Officer Functions

The settlement officer is the incumbent DO. Subparagraphs 10.3.1 – 10.3.5 apply only to non-tactical DOs (within and outside the continental United States) performing settlement functions for previous DOs of the same disbursing activity and DSSN to which the DO performing the settlement functions is assigned. In addition to accounting for and taking settlement action on deficiencies which occurred during the incumbency of a former DO that were unresolved on the date of relief, the settlement officer may be required to establish or increase deficiencies in the account of a former DO. Most of the transactions processed to establish, increase, reduce, or remove deficiencies in the account of the former DO will be similar to the routine transactions of a DO.

10.3.1. Transactions. The transactions described in the following subparagraphs are the most common types of transactions that will be encountered. On some occasions, the servicing DFAS site may direct accomplishment of specific transactions and will provide detailed instructions for those transactions.

10.3.1.1. Settlement History. In order to have a complete history of the settlement process, the settlement officer will maintain a record of actions taken to clear deficiencies in separate settlement folders for each former DO. The settlement folders should be available for the next relieving DO.

10.3.1.2. Check Overdraft Receivables. Recording, reporting and clearing a check overdraft deficiency are prescribed in Chapter 7, section 8.0 and ITFM 4-6045.70.

10.3.1.3. Losses of Funds. Losses of funds in the account of a former DO that were unresolved on the date of relief are recorded and reported until resolved.

10.3.1.4. Other Accountability. Other accountability items are unresolved deficiencies in the account of a former DO which cannot be classified as check issue overdrafts or losses of funds. These items are reported until resolved. Overpayments caused by the negotiation of both the original and recertified check are prescribed in Chapter 7, paragraph 11.13.

10.3.1.5. Removal of a Deficiency. The settlement officer can request removal of the deficiency on behalf of the former DO. The servicing DFAS site can provide specific instructions for removal of an accountability by correction of an erroneous collection voucher. Instructions pertaining to a relief of liability item are provided in Chapter 6, section 6.0.

10.3.1.6. Negotiable Instruments. Deposit negotiable instruments received to offset a deficiency in a former DO’s account under the same guidelines as for other negotiable instruments. Document the deposit on an Optional Form (OF) 1017-G, Journal Voucher.
10.3.2. Settlement Officer is Not Incumbent DO. This subparagraph applies only to DOs designated to settle the accounts of DOs of tactical units or naval vessels relieved from disbursing duty and the accounts of former DOs of closed disbursing stations. Settlement officers perform settlement functions for a DSSN other than the one to which assigned as a DO. Transactions to the account of the former DO will be similar to routine transactions of a DO.

10.3.2.1. Relieved DO. Any transaction affecting the accountability of a relieved DO, including the initial establishment of the settlement account, requires submission of monthly financial reports by the settlement officer for the relieved DO. The financial reports are submitted to the servicing DFAS site in the same manner as other financial reports.

10.3.2.2. Settlement Folders. In order to have a complete history of the settlement process, the settlement officer will maintain a record of actions taken to clear deficiencies in separate settlement folders for each former DO. The settlement folders should be available to the next relieving DO as part of the relief process.

10.3.2.3. Initial Establishment of the Settlement Account. Upon receipt of the final SF 1219 of the relieved DO, the settlement officer reviews it to determine if any deficiencies existed on the date of relief. In the case of a closed disbursing station where the DO is transferred without a relief, the settlement officer establishes the settlement account by preparation of the necessary files to resolve the deficiencies. In the case of naval vessels and tactical units, if there is a deficiency in the account of the relieved DO, the settlement officer establishes the settlement account as of the month following the receipt of the relieved DOs final SF 1219 by preparing a supplemental SF 1219. The designated settlement officer must:

10.3.2.3.1. Compute the actual accountability of the relieving DO on the date of relief by subtracting the amount established in the settlement account from the amount reported on the relieved DOs final SF 1219; and

10.3.2.3.2. Notify the relieving DO of the naval vessel or tactical unit that the settlement account is established and direct the DO to record the dollar value of the deficiency on the next SF 1219. The relieving DO attaches a copy of the message to the SF 1219 to support the transfer of accountability.

10.3.2.4. Recording Increases to a Settlement Account. After the date of relief, it may become necessary to record a deficiency into the account of a relieved DO.

10.3.3. Removal of Deficiencies. Removal of deficiencies from the accounts of former DOs can be accomplished by collection from the responsible individual, correction of erroneous documents, or relief of liability.

10.3.3.1. If the deficiency is recovered by collection from the responsible individual, the settlement officer document the collection on an OF 1017-G.
10.3.3.2. If the deficiency is removed by correction of erroneous documents, the corrected documents are reported on the supplemental SF 1219 prepared for the month in which the transaction is processed.

10.3.3.3. If a deficiency is removed by relief of liability, the Loss of Funds Adjudication Team, DFAS/ZPTC-1N team will provide a memorandum with a complete fund site to be charged for the transaction.

10.3.4. Preparation of Disbursement and Collection Vouchers. Normally, the preparation and processing of vouchers to settle the accounts of former DOs will not affect the disbursing account of the settlement officer. The settlement officer maintains a separate series of locally assigned voucher numbers (for example, COOO1 for collections and DOOO1 for disbursements) for use in settlement transactions. Collection and disbursement voucher numbers (assigned to vouchers prepared to process settlement transactions) should not be taken from the voucher number logs of the DO at the settlement activity. In addition, the settlement officer does not maintain the DD 2657 for the former DO.

10.3.5. Financial Reports. The settlement officer submits financial reports for a former DO every month until the former DOs accountability is cleared. Normally, the documents required to be submitted are: a supplemental SF 1219; appropriate copies of deposit ticket or debit voucher; and any supporting disbursement or collection vouchers prepared. The general requirements in Chapter 15, section 7.0 pertain to preparation and submission of financial reports. In addition to the normal distribution requirements, one additional copy of each document is forwarded to the servicing DFAS site. In all cases, each document should clearly identify the name and DSSN of the former DO and the name and address of the settlement officer preparing the reports. Documents requiring a signature are signed “By (name of settlement officer), settlement officer for (name and DSSN of accountable officer).”

10.4 Settlement Procedures for Naval Vessels

10.4.1. Naval Vessels. Even though the DO assigned to naval vessels does not perform settlement functions, certain actions are required to be performed to assist the designated settlement officer. The incumbent DO follows the actions prescribed in section 10.0 for each of the transactions described which are received after the date of relief and which affect the accountability of the relieved DO.
10.4.2. **Debit Voucher.** Debit vouchers issued by a general depositary or the Treasury for dishonored personal checks, forged Treasury checks, or dual negotiation of both the original and recertified Treasury checks, are not recorded in the current DO’s accountability unless the accounts of the DO who is accountable for the deficiency are subject to the 90-day retention period described in Chapter 15, paragraph 8.4 or the person who draws the check or endorser of the dishonored check is locally available for collection action. If neither of the foregoing conditions applies, the current DO forwards the debit voucher and copies of all related documents by email to the servicing DFAS site with a cover letter indicating that the accountability should be recorded against the previous DOs account. If follow-up action previously initiated by the relieved officer results in recovery of funds, the relieving officer forwards the funds in the form of an exchange-for-cash Treasury check to the servicing DFAS site.

10.4.3. **Unconfirmed Deposits.** For unconfirmed deposits that are later confirmed by follow-up action after the date of relief, forward the confirmed copy of the deposit ticket by email to the servicing DFAS site with a cover letter indicating that the accountability should be recorded against the previous DOs account for processing.

10.4.4. **FMS 5206.** If an FMS 5206 is received during the 90-day retention period subsequent to relief, reproduce a copy of the applicable check issue record and disbursement voucher from the relieved DO’s retained records and attach to the form. Send the documents by email to the servicing DFAS site with a cover letter indicating that the accountability should be recorded against the previous DOs account for processing. If one is received after the former DO’s records have been sent to the DFAS site as prescribed in Chapter 15, paragraph 8.4, send the document with a cover letter to the servicing DFAS site for processing.

10.4.5. **Daily Advice of Status (DAS).** Upon receipt of a DAS from the Treasury indicating the original and recertified check issued by the previous DO were both negotiated and previous credit given by the Treasury or the canceled original check is being reversed, the current DO should take the same actions as prescribed in subparagraph 10.4.2 for debit vouchers.
SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

The previous version dated July 2020 is archived.

Figure 3-1. Suggested Average Daily Cash Requirement ........................................ 32
CHAPTER 3

OBTAINING AND SAFEGUARDING PUBLIC FUNDS

1.0 GENERAL

1.1 Overview

The U.S. Department of the Treasury (Treasury) holds funds appropriated by the Congress subject to disbursement by disbursing officers (DOs) of the United States. When necessary to disburse in cash, upon approval of the commander or other authority, DOs may obtain and maintain cash on hand at their personal risk (a cash holding authority (CHA)) for official disbursements and accommodation exchanges (see paragraph 2.1). The DO’s official monthly accountability is recorded and reported on the Standard Form (SF) 1219, Statement of Accountability or an electronic equivalent to account for all public funds. DoD DOs must safeguard all items identified as public funds that they receive and account for to the Treasury periodically (see Chapter 15, paragraph 1.3). DOs outside the United States may maintain official checking accounts, known as limited depositary accounts (LDAs), in foreign currency with banks approved by the Treasury (see Chapter 14, section 2.0).

1.2 Purpose

The purpose of this chapter is to provide DoD DOs’ responsibilities to obtain and safeguard cash, negotiable instruments, and other items that comprise public funds.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3302 (31 U.S.C. § 3302) authorizes DOs to have custody of public funds for disbursement purposes and requires them to safeguard the funds.

2.0 CASH OPERATIONS

2.1 Cash Held at Personal Risk

Funds that qualify as cash held at personal risk include U.S. and foreign currency and coin, imprest funds, change funds, cash with agents (e.g., paying agent (PA)), and cash on deposit in an LDA. DOs use cash to make miscellaneous cash payments, make change, conduct accommodation exchanges, and make other specifically authorized transactions.

2.2 Approving Authorities

A commander, director, equivalent civilian head, or designee has the authority to approve CHAs for DOs, Deputy DOs (DDOs), agents, and cashiers within their commands. The Defense Finance and Accounting Service (DFAS) Director or designee approves requests for DFAS DOs. DFAS DDOs, agents, and cashiers outside of the main DFAS disbursing office may hold cash at personal risk, with the amount to be held subject to the approval of the parent DO and the local
activity commander based on his/her responsibility to safeguard public funds (see section 3.0). Keep cash on hand at the minimum amount necessary to meet normal requirements. Approving authorities review each request to ensure that good cash management procedures are in effect.

2.3 Determining Cash Requirements

2.3.1. General. DOs should consider daily cash collections of all DDOs, agents, cashiers, and other custodians of public funds over a representative period of time, and average the results to determine cash requirements. If daily cash collections exceed disbursement and accommodation needs, no additional computation is necessary. If collections do not exceed disbursements, use the following table to compute the cash requirements according to the time to obtain funds from the source, weekly cash transaction volume, and the maximum amount authorized.

To preclude temporary increases due to extreme currency fluctuations, the portion of the DO’s request to hold foreign currency at personal risk may be stated in foreign currency units. See Figure 3-1 for a suggested procedure for computing average daily cash requirements. Consider the following types of disbursements:

2.3.1.1. Routine cash payments;

2.3.1.2. Emergency cash payments;

2.3.1.3. Cash travel advances for non-cardholder temporary duty and permanent change of station travelers;

2.3.1.4. Foreign currency requirements for accommodation exchanges;

2.3.1.5. Personal check cashing transactions (see Chapter 4, section 3.0);

2.3.1.6. Cash transactions of remote DDOs, cashiers, and agents; and
2.3.1.6. Cash transactions of remote DDOs, cashiers, and agents; and

2.3.1.7. Cash requirements for managing foreign government contributions (burdensharing funds).

2.3.2. Special Circumstances. When special circumstances require DOs to increase their CHA beyond the amounts discussed in subparagraph 2.3.1 (e.g., operational contingencies), describe the circumstances and duration of the expected need for increased cash in the request for approval to increase cash held at personal risk. If the circumstances are more than temporary (over 30 days) or expected to become permanent, the DO re-computes their CHA and submits a new request based on the anticipated services.

2.3.3. Cash Collections. DOs and their agents may hold cash collections for operating requirements within their CHA. Immediately deposit cash collections that increase cash on hand above the authorized limit (see Chapter 11, section 8.0).

2.4 Requests for Approval

2.4.1. A DO requests a CHA from the approving authority cited in paragraph 2.2. Do not include scheduled payday cash requirements (e.g., the amount required to cash payday paychecks) in a request. The approving authority ensures that the requested amount follows the guidance in paragraph 2.3 and that management controls exist to ensure the conduct of routine reviews of cash requirements. Submit requests semiannually allowing enough time for CHA authority to become effective on October 1 and April 1 of each year. Also, submit a request whenever a review of cash requirements results in a major change. Include in the written request:

2.4.1.1. The name, title, and duty station of the accountable requestor;

2.4.1.2. A description of the transactions requiring the use of cash;

2.4.1.3. A statement that adequate facilities are available to safeguard the cash (see section 3.0); and

2.4.1.4. A breakdown of cash by accountable position.

2.4.2. A CHA request includes the amount to be held personally by the DO and the DO’s DDOs, agents, cashiers, and other custodians of public funds, but not amounts to be held by authorized imprest fund cashiers and change fund custodians which receive separate approval. The approving authority approves all requests by an endorsement and returns them to the DO for retention. To preclude compromise of classified information, CHA requests for emergency and extraordinary expense funds may omit security items (e.g., duty station, description of payments, facility location, or other details), but keep this information on file for review by cleared personnel.
2.5 Obtaining Cash for Disbursing Purposes

Funds that qualify as cash held at personal risk, also known as DO’s cash, include U.S. and foreign currency and coin, imprest funds, change funds, cash with agents (e.g., PA), negotiable checks (not check stock), and cash on deposit in a LDA. The Central Accounting Reporting System (CARS) DO cash Treasury Account Symbol (TAS) (see paragraph 2.6) balance amount should never exceed the approved cash holding authority amount or the balance amount of the days ending cash on hand.

2.5.1. Available Procurement Methods

2.5.1.1. Exchange-for-Cash Checks. DOs may draw exchange-for-cash checks (see Chapter 7, section 7.0) payable to the DO or DDO who procures the cash. The DO or DDO endorses the check to the name of another DO or DDO, or the name of the financial institution. DOs may obtain cash from other DOs, a Federal Reserve Bank (FRB) or branch, or any commercial bank willing to provide the service, to include overseas Military Banking Facilities (MBFs). If a DO or DDO is unable to go to the bank to take possession of the funds due to excessive workload or location, he or she may arrange for the FRB or financial institution to ship the funds by registered mail or armored car. The local commander approves and funds this type of delivery.

2.5.1.2. U.S. Treasury Check/Electronic Funds Transfer (EFT) Exchange-for-Cash. DOs or DDOs may procure cash (U.S. dollars (USDs) or foreign currency) for authorized disbursements and accommodation transactions overseas using EFT. Coordinate with an authorized MBF or local LDA for an account to receive the transfer as an Automated Clearing House or International Treasury Services (ITS.gov) transaction, and determine the exchange rate on the date of crediting to the DO’s account. DOs must cite the DO Cash TAS associated with their Service on the Optional Form (OF) 1017-G Journal Voucher, as stated in the Chapter 7 when issuing a U.S. Treasury check or EFT for cash. These transactions are reported to the Payment Information Repository (PIR), which will feed the CARS daily account statement showing an increase to DO cash. Note – an issued U.S. Treasury check for cash is considered cash from a reporting standpoint regardless if negotiated.

2.5.1.3. Transfers Between DOs. DoD DOs may transfer funds among themselves following the same exchange-for-cash procedures used to procure cash. They may also accomplish these transfers utilizing the DoD (DD) Form 2657, Daily Statement of Accountability, and Standard Form (SF)1219, Statement of Accountability, but must coordinate to ensure they report this amount in the same reporting period (see Chapter 15, section 5.0 and section 6.0). For DOs on Treasury’s daily reporting, transfers must be reported by both DOs via two Classification Transactions and Accountability (CTA) transactions to reflect a decrease to the DO reducing the funds and an increase to the DO receiving the funds.

2.5.2. Notification to the Treasury. The Treasury Financial Manual, Volume I, Part 4A, Chapter 4000 identifies Treasury’s requirement to maintain and update its operating cash balance (i.e., the government’s cash flow). DOs must therefore provide the
Treasury with advance notice of their cash requirements and other related information. For additional guidance on disbursement forecasting, see Chapter 9, section 3.0.

2.5.3. Cash Held for Operating Requirements. DOs that maintain physical cash associated with a DD 1131, Cash Collection Voucher, must cite the appropriate Standard Line of Accounting, which will include the TAS/Business Event Type Code (TAS/BETC), for the collection transaction. Multiple collection vouchers may be consolidated under one transaction reported to Treasury at the end of day as long as they fall under the same program TAS/BETC and Agency Location Codes. DOs must ensure that any consolidated transactions have an audit trail that can be validated at the individual transaction level. These transactions are reported to the CTA, which will feed the CARS daily account statement showing an increase to the DO cash TAS and an increase to the TAS on the collection voucher. This will increase DO accountability to reflect the entire amount of cash collected in as being retained for operating requirements.

2.5.4. Protection of Currency in Transit

2.5.4.1. Notification to Commander. A DO or another accountable official, either leaving the disbursing activity or arriving to pick up $10,000 and above, notifies the commander and the security police through the command or other duty officer. The DO must provide the time of departure, destination, estimated time of return, amount, and the source or disposition of the funds, as appropriate, for entry in the ship or station log.

2.5.4.2. Transporting Cash. The commander of the installation requesting cash is responsible to secure that cash at all times. The decision to have an armed escort, how many, or the type of transportation to be used is a command responsibility. The commander should consider such things as the amount of cash, distance and terrain, and type of transportation and local security forces available.

2.5.4.3. Liability. An accountable official (DO, DDO, agent, cashier, or other custodian of public funds) who has signed for the cash is pecuniarily liable for it, pending its return to the DO. An accountable official who feels that the command has not provided adequate security may refuse to disburse such funds and return them to the DO.

2.5.5. Verification of Money. The accountable official verifies all cash received before acceptance. Verify unsealed money by actual count before acceptance or immediately upon receipt of shipment. The DO or DDO, at their own risk, may bundle-count sealed new money bricks presented with the FRBs packaging intact. When opening a bundle, verify it immediately upon opening with individuals present to witness both the breaking of the seal and the count. The accountable official must report discrepancies immediately by issuing a claim to Treasury via the bank that provided the money. Identify the bundle or brick in question and include a signed statement from the witnesses. For a disapproved claim, follow the request for relief of liability procedures in Chapter 6, section 6.0. Verify and accept cash shipped to the accountable official in front of witnesses immediately upon receipt following these procedures, depending upon how the money is packaged.
2.5.6. Expenses. Charge bank fees and shipping costs incurred when procuring U.S. or foreign currency to the disbursing activity’s operating fund account.

2.5.7. Accounting for Premiums on Sales of Public Moneys or Securities. Under 31 U.S.C. § 3341, DOs of the U.S. Government may sell government warrants, checks, drafts, or obligations not the property of the official at a premium, or dispose of the proceeds of the warrant, check, draft, or obligation, only if the official deposits the premium and the proceeds in the Treasury or with a depository for the credit of the government. Credit General Fund Accounts XX 3220, General Fund Proprietary Receipts, Not Otherwise Classified, All Other, for the USD equivalent (USDE).

2.5.8. Registered Mail Shipments. Send an exchange-for-cash check to an FRB or MBF by registered mail. Keep a copy of the check and report it on line 6.7, as Cash in Transit, (see Chapter 15, section 6.0) on the SF 1219 until the cash is received. When a DO is aware that the FRB or MBF has shipped the cash and has not received that cash within a reasonable period of time, contact the shipper to request the shipment be traced (see paragraph 5.5). This is the least preferred method to obtain cash. Use it only after determining that all other procurement methods are not feasible.

2.5.9. Obtaining Cash by Transfer from Officer Relieved. DOs may obtain cash funds by transfer from another DO without the issuance of an exchange-for-cash check only upon the relief of a DO and only from the DO being relieved (see Chapter 2, paragraph 4.6).

2.6 Treasury Account Symbol (TAS) for DO Cash

A TAS is established for each DoD Component to document the balance of DO cash held outside of the Treasury. The Treasury and the Office of Management and Budget determined that this fund group presents a reporting model consistent with the Statement of Federal Financial Accounting Standards 31 for unique activities for other Federal Program Agencies to record non-fiduciary, non-budgetary activities with Government (Federal) sources or Funds. DOs operating in a CARS daily reporting environment must classify each cash transaction with the DO Cash TAS. Cash funds obtained via a U.S. Treasury check or EFT are classified through PIR. Operating cash reductions and accommodation exchange transactions are reported through Collections Information Repository (CIR). Cash disbursements, cash collections, and cash transfers between DOs not deposited and/or maintained in the DOs accountability are reported through CTA. The TAS for DO cash does not impact the current DO reporting environment as referenced in Chapter 15. DFAS Accounting sites utilize monthly SF 1219 data to report the DO Cash to the proper TAS. The TASs for DO cash are:

2.6.1. 017 X 6950 DO Cash, Department of Navy;

2.6.2. 021 X 6951 DO Cash, Department of Army;

2.6.3. 057 X 6952 DO Cash, Department of Air Force;
2.6.4. 097 X 6953 DO Cash, Defense Agencies; and

2.6.5. 096 X 6954 DO Cash, Corps of Engineers, Civil.

2.7 Reconciling Disbursing Officer Cash

DOs must reconcile daily all transactions reported on the DD 2657 and DO Cash TAS reflected on the CARS daily account statement. Funds obtained for disbursing purposes are reported through and reconciled with PIR (Chapter 11, paragraph 10.4). Cash deposited and accommodation transactions are reported through and reconciled with CIR (Chapter 11, paragraphs 11.3 and 11.4). Cash disbursements, cash collections, and cash transfers between DOs not deposited and/or maintained in the DOs accountability are reported through and reconciled with CTA. To facilitate the reconciliation of cash transactions, DOs must maintain a log of all cash transactions, annotating the DO Cash TAS associated with each transaction. The log of cash transactions must include:

2.7.1. The **DD 2659**, Voucher Control Log; and

2.7.2. The detailed deposit activity report; or

2.7.3. A system generated report from the disbursing system.

3.0 SAFEGUARDING CASH AND RELATED DOCUMENTS

3.1 General

The commanders’ and DOs’ responsibilities to safeguard cash and other assets, related instruments, and supporting documents are described in paragraph 3.2. All accountable officials are responsible for safeguarding public funds. DOs should minimize the number of accountable officials required to store public funds. Use the most secure container, vault, or safe available to safeguard, in order of priority, currency, undelivered checks, negotiable instruments, paid vouchers, blank U.S. Treasury and LDA checks (see Chapter 7, paragraph 3.7), signature media, valuables (see Chapter 16, section 3.0), and other records. The command security program must consider the maximum amount of each of these items that would normally be on hand at any time. Store classified material separately from public funds and documents.

3.2 Responsibilities

3.2.1. **The Commander.** The responsibilities of the Commander include:

3.2.1.1. Approves a DO’s request to hold cash at personal risk, and is responsible for ensuring unannounced quarterly verification of cash and other assets in the disbursing office (see Appendix A);

3.2.1.2. Provides every individual entrusted with public funds with a vault, safe, or other adequate secure facility (e.g., a strong box) for the exclusive use of the assigned
individual. If it is not possible to provide separate safes, furnish separate locked compartments in a safe or separate strongboxes stored in a safe or vault. Always store public funds separately from other funds;

3.2.1.3. Develops a security program and publishes it in a command instruction or notice. The security program must provide adequate protection for the maximum amount of public funds and related documents and instruments on hand at any given time;

3.2.1.4. Ensures personnel protection is included in the overall disbursing security program. This includes the requirements for periodic review of the adequacy of the security measures in place and for testing the security equipment for proper operation on a semiannual basis;

3.2.1.5. Provides armed guards for the escort of public funds to and from the disbursing office. When necessary, acquires an armored car service using locally-available mission funds (see subparagraph 2.5.4); and

3.2.1.6. Provides fire protection of government facilities and funds.

3.2.2. DOs.

3.2.2.1. DOs safeguard all public funds they collect or otherwise have in their custody or control, and they are accountable and subject to pecuniary liability for their loss. DOs are prohibited from lending, using, depositing, or exchanging public funds in their possession for other funds except as specifically allowed by law. DOs secure public funds until ordered by proper authority to transfer or disburse them. When DOs receive orders for transfer or payment, they execute transactions and perform all other duties as imposed by law or regulations in conformity to the law. In case of disaster, DOs should secure and preserve the accounts of all personnel, public money, and other papers and property in order of their importance as circumstances permit (see section 8.0).

3.2.2.2. DOs, DDOs, agents, cashiers, custodians, or alternates with custody of public funds assign each person a separate secured container. Although all appointed or assigned accountable officials are liable for any loss of public funds in their custody, the DO holds overall responsibility and is subject to pecuniary liability, jointly or severally, for any losses associated with these personnel. Therefore, DOs ensure that all DDOs, agents, cashiers, imprest fund cashiers, and other custodians of public funds are fully aware of their responsibilities to properly handle and protect public funds. The DO or designee personally inspects office security, keeping a record of each inspection, at least semiannually to ensure that:

3.2.2.2.1. Vaults and safes are not accessible to unauthorized persons (e.g., limit access to vaults using vault day gates to which only authorized personnel have the keys);

3.2.2.2.2. Cash in excess of the amount required and authorized for official purposes is deposited promptly;
3.2.2.2.3. Windows and doors are limited and barred and/or locked at all times after business hours;

3.2.2.2.4. Access to the working area is marked conspicuously with “AUTHORIZED PERSONNEL ONLY.” Conduct transactions from a cage, room, or counter enclosure, constructed to provide a physical barrier to normal traffic with minimal interference from other activities and personnel of the office;

3.2.2.2.5. Security devices for the check signing machines, digitized signature media, meters, and plates are in the custody of the DO or authorized DDOs at all times;

3.2.2.2.6. Internal office procedures are established and implemented to provide adequate controls on all undelivered and returned checks. Assign responsibility of checks, which includes receipt, holding, and final distribution, in writing;

3.2.2.2.7. The commander is aware of any security shortfalls or breaches, and any request for adequate safeguarding facilities previously denied. Inform the supporting DFAS site of unresolved facility issues that relate to the ability to safeguard public funds;

3.2.2.2.8. All DDOs, agents, cashiers, and custodians receive written and oral instructions regarding the proper care and handling of cash and other accountable documents. The DO should keep an affidavit from each accountable individual attesting to receipt of such instructions;

3.2.2.2.9. All cash, blank Treasury and LDA checks, and related items are kept in a vault, safe, or security container that meets minimum security standards prescribed in section 3.0;

3.2.2.2.10. All safes and security containers aboard ships and on installations that are on rollers or weigh less than 750 pounds are stored in a vault or secured in such a way as to prevent movement;

3.2.2.2.11. A vault, safe, or security container visible to the exterior of the office is illuminated;

3.2.2.2.12. The combinations of all vaults, safes, and security containers are changed at least once every 6 months and upon relief, transfer, separation, or discharge of the accountable official. The accountable official is prohibited from sharing the combination or key with anyone and places the combination of each safe and duplicate key of each strong box in separate sealed, signed, and dated envelopes such that an unauthorized opening can be detected. The DO keeps the sealed envelopes of all accountable officials in his or her safe or vault and delivers the combination and/or keys to their safe or vault to the commander, security officer, or another designated official for retention. Authorized personnel access the sealed combinations only in an emergency requiring the opening of the safe or vault;
3.2.2.13. A record of combination changes, dated and signed by the accountable official, is kept inside each vault, safe, or container;

3.2.2.14. To limit the possibility of the combination being observed, the dial to the vault, safe, or container is concealed by a shield made of suitable material;

3.2.2.15. The name and phone number of the accountable official is posted on the inside of the vault, safe, or container. DOs may use an SF 701, Activity Security Checklist, or SF 702, Security Container Check Sheet, as appropriate, to assist in the control and proper safeguarding of public funds stored in vaults, safes, and/or containers. If the forms are not available, post a unique container number along with a “24 hour” duty phone number on the outside of the vault, safe, or container allowing the duty personnel to contact the accountable official;

3.2.2.16. Keys to the workspace or disbursing office are strictly controlled. Keep a record that identifies who has keys and when they were issued and surrendered; and

3.2.2.17. All security equipment is tested at least every 6 months for proper operation. Keep a record of the tests maintained.

3.3 Intrusion Detection Systems (IDS)

3.3.1. General. IDS are vital to any system that provides in-depth protection for a secure area. The DoD supports a policy on the use of IDS for resource protection purposes. The commander, in the exercise of his or her responsibility to provide security, considers components of the DoD Joint-Services Interior IDS. In special cases, components of the base and installation security system, generally used for security applications, may also be available for resource protection requirements.

3.3.2. Alarms. Consider using alarms to deter entry to the general disbursing area or actual storage container. There are three levels of alarm protection: penetration, motion, and point detection. A minimum of two levels of detection capability provides the best in-depth protection. Post conspicuous warnings of the existence of alarms and publicize the existence of alarms to gain the full benefit of psychological deterrence.

3.3.3. Maintenance. Maintain and regularly test a system maintenance program to ensure the alarm system operates properly. Protect against bypassing the alarm system consistent with DoD requirements.

3.3.4. Alarm Monitor Responsibilities. Train monitors to understand, operate, and monitor the alarm system so they may work closely with the security police and unit personnel, and act as a liaison in this special role.
3.4 Storage Containers

3.4.1 Categories

3.4.1.1 Vaults and Safes

3.4.1.1.1 Vaults. When possible, provide a disbursing office a built-in, fire-resistant vault with at least a three-position, dial-type combination lock; with the door and vault being able to resist a fire for a minimum period of two hours. Store all safes containing funds and when possible, the instruments and documents cited in subparagraph 3.4.2, in the vault. Follow the requirements of the DoD Physical Security Equipment Guide, UG-2045-SHR, when constructing new vaults, doors, and intrusion devices.

3.4.1.1.2 Safes. When vaults are not available, DOs, DDOs, agents, cashiers, and other custodians of public funds use combination three-tumbler lock, tool-resistant safes available at General Services Administration (GSA) Global Supply or GSA Federal Supply Schedules (FSS) to store public funds. If such a safe is not available, use a field safe secured properly to an immovable object. Post a guard in an unsecured building at the direction of the commander. Store irreplaceable checks, bonds, or other perishable records in combination three-position, dial-type, insulated, and built-in fire-resistant money cabinets/safes. For temporary storage, Class 5 file cabinets with three-position, dial-type, and built-in combination locks can be used to protect against forced entry. File cabinets with steel lock bars or without forced-entry protection are not adequate.

3.4.1.2 Security Containers. Class 1 and Class 5 cabinets provide the greatest protection against forced entry. GSA approved security containers have the following Federal specifications:

<table>
<thead>
<tr>
<th>Type</th>
<th>Specifications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class 1 or Class 2 Cabinet</td>
<td>AA-F-357 (GSA-FSS)</td>
</tr>
<tr>
<td>Class 4 or Class 5 Cabinet</td>
<td>AA-F-358 (GSA-FSS)</td>
</tr>
<tr>
<td>Class 5 or Class 6 Map and Plan File</td>
<td>AA-F-363 (GSA-FSS)</td>
</tr>
<tr>
<td>Class 6 Drawer File</td>
<td>AA-F-358 (GSA-FSS)</td>
</tr>
</tbody>
</table>

3.4.1.3 Burglary Resistant Safes. The intent of burglary resistant safes is to prevent forced entry. The numerical value cited represents the time in minutes that the safe will resist forced entry. These safes provide a greater degree of protection than GSA rated security containers. Commercial burglary resistant safes are certified by Underwriters Laboratories according to the following classifications:

<table>
<thead>
<tr>
<th>Type</th>
<th>Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tool-Resistant Safe (TL)</td>
<td>TL-15 or TL-30</td>
</tr>
<tr>
<td>Torch and Tool-Resistant Safe (TRTL)</td>
<td>TRTL-30 or TRTL-60</td>
</tr>
</tbody>
</table>
3.4.2. Requirements

3.4.2.1. Currency, Negotiable Instruments, and Paid Vouchers. DoD Component security and resource protection programs ensure compliance with the following minimum requirements for storing currency, negotiable instruments, and paid vouchers. Previously approved storage containers currently in use may continue to be used. The Naval Sea Systems Command may designate specific containers for use on Navy ships.

3.4.2.1.1. Under $7,500. Commanders establish these requirements. Any security container or burglary resistant safe listed in subparagraph 3.4.1.1.2 is acceptable.

3.4.2.1.2. $7,500 - $50,000. Use a security container with a Class 1 or Class 5 rating, or a burglary resistant safe with at least an Underwriters Laboratories classification of TL-15, and having a Group 1R combination lock.

3.4.2.1.3. $50,000 or more. Use a burglary resistant safe or vault with at least an Underwriters Laboratories classification of a TL-30 and having a Group 1R combination lock.

3.4.2.2. Other Items. Blank checks, signature media, and personal valuables held for safekeeping (see Chapter 16, subparagraph 1.1.1) are not part of a DO’s accountability. Store them in a security container with at least a Class 1 or Class 5 rating or a burglary resistant safe separate from the one used to store the items listed in subparagraph 3.4.2.1.

4.0 ADVANCING CASH TO AGENTS

4.1 Deputy Disbursing Officers (DDOs), Agents, and Cashiers

4.1.1. Authority. DOs advance cash for official use to their DDOs, agents, and cashiers on a DD 1081, Statement of Agent Officer’s Account, whether by cash disbursement; or by EFT; or by exchange-for-cash checks, with instructions to negotiate the checks only as funds are needed. The DO reports un-negotiated checks as funds with agents; DDOs, agents, or cashiers report them as “Cash on Hand.” On a monthly basis, the DO reports funds in the custody of DDOs, agents, and cashiers in the main disbursing office and outside the disbursing office on the SF 1219 (see Chapter 15, section 6.0).

4.1.1.1. Advance Cash From the Vault. The DO Cash TAS is not impacted when funds from the vault are advanced to an agent. The funds were previously reported to the DO Cash TAS prior to the advance taking place.

4.1.1.2. Advance With a U.S. Treasury Check or EFT. The DO Cash TAS will increase when funds are advanced to an agent utilizing either a U.S. Treasury check or EFT and are reported to the PIR, which will feed the CARS daily account statement.

4.1.2. Amount Limits. Under normal conditions, do not advance an amount of cash to a DDO, agent, or cashier that exceeds their CHA. There are occasions where cash may be entrusted
to DDOs, agents, or cashiers in other amounts when required to maintain efficient operations (e.g., during the authorized absence of the DO and on paydays). The total amount held by the DO, DDOs, agents, and cashiers may not exceed the DO’s CHA.

4.1.3. Custody. Each DDO, agent, or cashier stores entrusted cash in a safe or adequate container assigned for his or her exclusive use as specified in section 3.0. Only the assigned DDO, agent, or cashier may know the combination of the safe or container. If the commander deems it necessary to gain access to the safe or container, open it and verify the contents.

4.1.4. Balancing. DDOs, agents, and cashiers entrusted with official funds must balance the cash in their custody daily using DD 2665, Daily Agent Accountability Summary, as the permanent record of balancing (see Chapter 15, subparagraph 2.1.2). The DO ensures that each DDO, agent, or cashier is aware of the frequency for balancing and submitting the DD 1081, and uses it as a summary of cash transactions and receipt for cash and vouchers on hand. Each DO submits a DD 1081 no less frequently than monthly. A DDO, agent, or cashier who will be absent for more than 5 workdays returns all funds and accountable documents to the DO with properly executed DD 2665s and DD 1081s before departure, reporting any shortage or overage immediately (see Chapter 6, section 4.0).

4.1.5. Collections and Disbursements

4.1.5.1. DDOs, Agents, and Cashiers in the Main Disbursing Office. DDOs, agents, and cashiers account for all negotiable instruments, collection and disbursement vouchers, and other accountable documents on a DD 2665 and turn them in daily to the DO under the cover of a DD 1081. They must retain currency collected over and above the currency disbursed when authorized by the DO if the total funds held are within the limitations specified in paragraph 2.3. The DD 1081 also serves as a receipt for the funds that remain in the DDO’s, agent’s, or cashier’s custody. When additional funds are required due to disbursements greater than collections or other authorized transactions, the DO may replenish the funds in the net amount of acceptable vouchers and negotiable instruments delivered with the DD 2665s and DD 1081s. The DO prepares a DD 1081 for the amount of funds advanced (see Chapter 15, section 4.0).

4.1.5.2. DDOs, Agents, and Cashiers at Branch Disbursing Offices. When DDOs, agents, and cashiers are serving in branch offices where reporting transactions in person is impractical, the DO may authorize transmittal of the transactions by electronic or regular mail, or messenger. Account for these transactions on a DD 2665 under the cover of a DD 1081. The DDO, agent, or cashier signs the original and duplicate of the DD 1081 and sends it with the DD 2665 and substantiating vouchers, negotiable instruments, and documents to the DO. After examining and accepting the DD 1081, the DO acknowledges receipt on the duplicate copy of the form and returns it to the DDO, agent, or cashier. The DO may replenish funds following subparagraph 4.1.1.

4.1.5.3. DDOs, Agents, and Cashiers Under Other Commands. DDOs, agents, or cashiers not under the same command as the DO must deposit negotiable instruments whenever possible (e.g., an investigative service or support center, intelligence command, U.S. Defense Attaché Office). If a deposit is $5,000 or more, mail or present the deposit to the nearest FRB or...
its branch. Transmit deposit tickets, collection and disbursement vouchers, and other accountable documents electronically, or send them by mail or messenger to the DO. Account for the transactions on a DD 2665 with a cover DD 1081, preparing the latter following Chapter 15, section 3.0 and section 4.0. The DO may determine that the volume of transactions is small enough to allow submission of a single DD 1081 monthly.

4.1.6. Records. Identify transactions made by other than the DO by the name of the DDO, agent, or cashier. The DO determines the method to be used. Identify negotiable instruments cashed by someone other than the DO following Chapter 4, paragraph 2.4.3.

4.2 Cash to Paying Agents (PAs)

DOs furnish PAs written instructions to ensure they observe pertinent disbursing procedures including safeguarding funds; identifying payees and obtaining their signatures; requiring vouchers, documents, and certifications; and returning of funds and vouchers.

4.2.1. Funds Advancement. Complete a DD 1081 to document the cash entrusted to PAs authorized to make payments, currency conversions, or check cashing transactions. The DO must establish and implement controls to preclude advancing amounts in excess of requirements for the assigned mission or other anticipated valid requirements. PAs may not commingle cash advanced to them with any other funds nor advance it to any other person.

4.2.2. Funds Return. Agents returning paid vouchers and deposit tickets results in a reduction of DO accountability, which also results in a reduction in the balance of the DO Cash TAS. Returns of residual cash to the DO will not impact the DO Cash TAS since the funds were previously classified under the DO Cash TAS.

4.2.3. Advanced Cash. Normally, PAs may not retain advanced cash overnight, but must promptly return the paid vouchers, negotiable instruments, and residual cash to the DO with a properly completed DD 1081 (see Chapter 15, section 4.0). When circumstances require a PA to retain cash overnight, follow the custody requirements in subparagraph 4.1.3 and return the paid vouchers, negotiable instruments, and residual cash as soon as possible after making the authorized payments, normally within 24 hours. The DO must notify the PA’s commanders when the PA fails to make a prompt return, or if a loss of funds or vouchers occurs.

4.3 Agents of Friendly Foreign Nations

4.3.1. Authority

4.3.1.1. Basic Agreement. DoD DOs may advance cash to DOs, cashiers, or other members of a friendly foreign nation’s armed force to disburse pay and allowances to their members if the President has made an agreement with the foreign country pursuant to 10 U.S.C. § 2396(b)(2). An advance may also be used to allow that armed force to purchase necessary supplies and services under a basic intergovernmental agreement negotiated in accordance with DoD Directive 5530.03, International Agreements, to include coordination with
the Combatant Commander involved, the U.S. Ambassador or Chief of Diplomatic Mission, the DoD General Counsel, and the governments of the friendly foreign nation and the United States.

4.3.1.2. Supplemental Agreement. A supplemental agreement establishes:

4.3.1.2.1. The type of personal identification required for a DO or individual member when drawing an advance of funds;

4.3.1.2.2. The maximum amount that may be advanced to an individual;

4.3.1.2.3. Protection for the lender nation against loss from fluctuating exchange rates;

4.3.1.2.4. The address of the respective settlement offices to which the lender nation DO forwards receipts for fund advances with requests for reimbursement;

4.3.1.2.5. Procedures for local settlement when feasible or, if not feasible, between the signatory nation’s representatives in Washington, DC or another designated location;

4.3.1.2.6. That settlement may be in cash or by check, and in the type of currency used to make the advance. Make settlement in the lender nation’s medium of exchange (when possible); and

4.3.1.2.7. Other provisions local conditions may require.

4.3.2. Conditions

DO advances cash only against the signed receipt of the individual members of the armed force receiving the advance for the following purposes and under the following conditions:

4.3.2.1. To a DO of an armed force of a friendly foreign nation wanting to provide pay and allowances for troops or purchase necessary supplies and services. The DO must present proper personal identification and the unit must be serving in an area where personnel temporarily are unable to obtain funds from their own nation; or

4.3.2.2. To individual armed force members of a friendly foreign nation in need of funds, serving in an area temporarily separated from their units and the DO of that force is not available to make payments. These individuals must be identifiable as members of an armed force of a friendly foreign nation with which an intergovernmental agreement for advances exists.

4.3.3. Documentation. The receipt must include the name, rank, service number, title, organization, and country of the individual receiving the advance; purpose for which the advance is needed; type and amount of currency to be advanced; prevailing rate of exchange to one USD at the time the advance is made, if applicable; and name, rank, organization, and address of the DO making the advance.
4.3.3. **DoD Rewards Program to Assist in Combating Terrorism**

4.3.3.1. **Authority.** Payment of rewards to assist in combating terrorism is authorized by **10 U.S.C. § 127b** (also see Volume 12, Chapter 17, paragraph 1.2). When payment of these rewards by U.S. personnel is not practical, DOs may advance cash to agents of friendly foreign nations’ armed forces to make the payments. The international agreement and authorities in subparagraph 4.3.1.1 do not apply.

4.3.3.2. **Controls.** Agents of friendly foreign nations appointed under Chapter 2, section 7.0 are agents of the DOs who advance cash to them. Commanders and DOs have the same oversight and internal control responsibilities regarding these agents as they do for U.S. PAs. DOs may advance cash to properly appointed PAs only in amounts required to pay specific approved reward payments to identified payees.

4.4 **Change Funds**

4.4.1. **Authorization.** When the operation of a clothing sales store, government laundry, or other appropriated fund activity engaged in selling property or services requires cash for making change, the activity’s officer in charge requests that the commander establish a change fund. After approval, the commander or designee appoints a change fund custodian. The appointing document specifies the amount of cash to be advanced by the DO or DO’s agent, who issues written instructions to the custodian when advancing the change fund covering the custodian’s responsibilities for safeguarding the cash and their pecuniary liability for losses. The DO or agent providing disbursing service to the installation or activity where the sales activity is located provides the authorized change fund advance and records the advance in his or her accountability as cash in the custody of government cashiers.

4.4.2. **Fund Limit.** A change fund may not exceed $250 for each cash register operated in an activity. When a cash register has more than one drawer, each drawer may be considered as a register. The commander may authorize additional amounts consistent with good cash management principles. Upon approval of the commander, authorized collecting agents may also be change fund custodians to facilitate making change.

4.4.3. **Fund Increases.** A commander may authorize an additional $50 for each cash register, and an amount not to exceed $500 for each accountable medical services’ change fund custodian. For extended operations (e.g., Sunday operations), a commander may approve an additional amount up to $50 per cash register when there is limited or no banking support.

4.4.4. **Documentation.** The DO or agent prepares a DD 1081. The change fund custodian signs and returns the original to the DO or agent for the amount of funds advanced. The change fund custodian returns all cash to the DO or agent upon termination of their appointment and prepares a DD 1081 to document the return. The DO or agent acknowledges receipt of the cash by signature on the duplicate copy of the DD 1081 and returns it to the custodian. A DO or agent may recall a change fund when it is necessary to verify the DO’s or agent’s cash. On completion of such verification, the DO or agent re-advances the funds to the change fund custodian. Also,
unannounced inspections, including cash counts of change funds, are required at least quarterly by the cash verification team.

4.4.5. Change Fund Irregularities. The custodian follows Chapter 6, Table 6-1 and informs the officer who advanced the funds immediately of any fund irregularity (e.g., shortage or overage).

4.5 Imprest Fund Cashiers

Imprest funds are authorized only as an exception to this volume. See Chapter 2, section 9.0.

5.0 SHIPMENT OF PUBLIC FUNDS

5.1 General

5.1.1. Authority. Shipment of valuables is authorized by the Government Losses in Shipment Act (40 U.S.C. Chapter 173). Shipments are insured under this authority; do not purchase supplementary insurance.

5.1.2. Authorized Purposes. A DO is authorized to ship public funds to deposit into an official checking account; deliver funds to another DO as an exchange-for-cash transaction; ship damaged or mutilated currency (see subparagraph 5.7.2); and obtain funds from a bank or another DO by exchange of a check for cash.

5.1.3. Methods of Shipment. Ship public funds in a manner that provides the greatest possible protection against risk of loss, destruction, or damage to the funds:

5.1.3.1. Public funds may be shipped by registered mail or courier, office messenger, government conveyance, railway express, contract armored car service, or as cargo via Air Mobility Command (AMC) signature security service, depending upon availability of means of transit. The normal methods are registered mail and AMC cargo;

5.1.3.2. Shipment by registered or certified mail is preferred in the case of checks, drafts, and money orders. Shipment by courier is preferred in the case of currency and coin;

5.1.3.3. Do not use certified mail to ship currency and coin. Use shipment by government conveyance or railway express only in the case of currency or coin of excessive weight or bulk; and

5.1.3.4. Transfers between DOs afloat using airlift (helicopter) or high-line is also authorized during underway replenishment at sea; attach a buoy or other reliable floatation device to the container to aid in recovery that may be required.
5.1.4. **Record of Shipment.** In addition to accounting documents required in the case of transfers and deposits of public funds, and in order to provide the record required by Treasury regulations, describe each shipment of funds in detail on DD 165, Shipment of Funds.

5.2 **Shipment of Funds**

5.2.1. **General.** Use a DD 165 to ship coin or currency, regardless of the amount. This form is not required for shipments for deposit to the Treasury or to a bank if the shipment consists only of checks and money orders, and the record of instruments deposited required by Chapter 11, section 8.0 is otherwise maintained. In addition to the retained copy of the DD 165, the shipping DO keeps the registry or other carriers' receipts and any other documents incident to the shipment until assured that the shipment has been completed and no claims actions will be initiated.

5.2.2. **Distribution of DD 165**

5.2.2.1. Include the original and duplicate with the shipment.

5.2.2.2. Send a copy by mail directly to the consignee as a notice of shipment when the amount equals or exceeds $10,000.

5.2.2.3. The shipping officer keeps a copy. This copy bears the DO’s and verifying witnesses’ original signatures to substantiate any claim for loss in shipment.

5.2.3. **Shipment by Registered Mail or as Cargo via AMC.** When shipment is by registered mail or as cargo via AMC, show the registry number and the date the shipment was delivered to the post office or terminal on all copies of the DD 165. Whenever feasible, limit single shipments to $250,000. Package registered mail and AMC shipments to prevent breakage in transit. For registered mail shipments, the appropriate postal official signs the shipping officer’s copy in the space beneath the block "Delivery Date and Time." Advice as to adequate packaging is available from military post offices.

5.2.4. **Shipment by Courier.** When shipment is by courier or office messenger, the shipping DO encloses the funds in a securely sealed envelope, moneybag, or other suitable container bearing the name and address of the consignee. Any Armed Forces member on active duty, DoD civilian employee, or individual serving as a courier for the Department of State may serve as courier for delivery of funds represented by currency, checks, drafts, or money orders. The courier takes all practicable precautions to protect the shipment. The courier signs the copy of the DD 165 retained by the shipping officer in the space beneath the block "Delivery Date and Time" as a receipt for the shipment.

5.2.5. **Shipment by Office Messenger.** When shipment is through a message center, an authorized message center official enters the registry number in the “Delivery Date and Time” space on the shipping officer’s retained copy of the DD 165. Upon receipt of the shipment, the consignee, after verifying the contents of the shipment, signs the original DD 165 in the last signature block and returns it to the shipper as a receipt. The consignee also signs a copy of the DD 165 in the space beneath "Delivery Date and Time," gives it to the courier as a receipt for the
shipment, and annotates the advance copy providing notice of shipment to indicate the date of receipt and keeps in his/her retained records. If the services of an office messenger are used, the messenger also signs the consignee’s retained copy in the block for "Delivery Date and Time."

5.2.6. Shipment by Government Conveyance. When the shipment is of such weight or bulk as to make other methods of shipment impracticable, government conveyance may be used. The DO makes necessary arrangements for the shipment and receives the bill of lading for delivery with the shipment. In all cases, the DO is the shipper and the consignee is responsible for the receipt of the funds. The DO is responsible for direct delivery to the carrier and obtaining a receipt on a copy of the bill of lading.

5.2.7. Shipments by Armored Car Service

5.2.7.1. General. Shipment of funds by commercial armored car service is authorized when it is cost effective and offers the greatest protection against loss. Charge the cost to the operations and maintenance or working capital funds available to the DO.

5.2.7.2. Obtaining Funds from Banks. Since FRBs comply with Treasury regulations in making shipments of money, funds may be obtained by sending them an exchange-for-cash check with instructions for delivery of the funds in the desired denomination to an armored car carrier. When funds are obtained from a bank other than an FRB, the DO accepts the funds at the bank and turns them over to the armored car carrier for transport.

5.3 Action by Consignee

5.3.1. General. On receipt of a copy of a DD 165 as notice of shipment, the consignee is the intended recipient or authorized official designated by the activity receiving shipment and is responsible for arrangements to receive the shipment. On receipt, the consignee ensures that the shipment is opened and inspected by one or more responsible employees. The consignee signs the original DD 165 and returns it to the shipping officer as a receipt. If a courier made the shipment, the consignee signs and returns a copy of the DD 165 to the courier as an acknowledgment of receipt of the shipment.

5.3.2. Funds for Deposit. When the shipment represents funds for deposit, the consignee completes the deposit ticket and returns the required copies to the DO. The consignee immediately advises the shipping officer of any difference between the amount and quantity listed on the copy of the DD 165 and in the actual shipment at the time of opening. If the shipment fails to arrive in due course, the consignee immediately notifies the shipping officer, the post office, or office of other carrier through which delivery was arranged. The consignee also immediately notifies the shipping officer of any damage to the shipment. All findings of the consignee in such cases are a matter of record subject to inspection in connection with any necessary investigation.
5.4 Action by Consignor

The consignor (shipper) takes prompt action to trace a shipment of funds for which a signed DD 165 is not received within a reasonable time. The consignor initiates telephone or message contact with the consignee to ensure compliance with paragraph 5.3.

5.5 Losses in Shipment

Accountability for public funds rests with the consignor until the consignee has received and verified all cash listed on the DD 165. If funds shipped as prescribed are lost, destroyed, or damaged, the shipping officer sends an immediate written report to Bureau of Public Debt (BPD), Division of Financial Management, Department of the Treasury, Room 201, PO Box 1328, Parkersburg, WV 26106-1328. The shipping officer also notifies the agent in charge of the nearest U.S. Secret Service (USSS) office, the appropriate investigative service, the local post office, or local office of the carrier service used to place a tracer on the shipment, and takes such other action as may be necessary to facilitate recovery. The shipping officer sends a copy of the report to the consignee and DFAS Indianapolis, ATTN: (DFAS-ZPTA/IN), 8899 E. 56th Street, Indianapolis, IN 46249-0500 or email to dfas-in.disbursingpolicy@mail.mil. If the loss, destruction, or damage is $10,000 or more, or delay in reporting might delay the government’s recovering the shipment, the shipping officer sends the report with written confirmation that includes the:

5.5.1. Date of shipment;
5.5.2. Amount and type(s) of the valuables lost, destroyed, or damaged;
5.5.3. Name and address of the consignee;
5.5.4. Method of transportation, name of the carrier, and location of the carrier’s office from which shipment was made;
5.5.5. Registry or other receipt number; and
5.5.6. Cause of the loss, destruction, or damage, if known.

5.6 Recovery Action

5.6.1. General. Recovery action is the responsibility of the officer accountable for the lost or damaged shipment. When an exchange-for-cash check has been issued, this responsibility and accountability rests with the shipping bank or DO (consignor). Accountability for the check remains with the check-issuing DO (consignee), who reports the amount on the SF 1219 as funds in transit. The consignee determines the shipping officer’s actions and monitors the subsequent investigative process.

5.6.2. Cash Lost In Transit. For cash lost in transit to a depository, accountability rests with the shipping DO, who takes the reporting and recovery actions required following Chapter 6, section 4.0. The shipping DO records the loss of funds on 7.3, Losses of Funds, on the SF 1219.
If the DO is reassigned before recovery can be affected, the relieving DO does not take responsibility for the loss, but records it on Line 9.3, Losses of Funds, on the SF 1219. The relieving officer also ensures that necessary claims are properly filed, and that the proceeds from the claims are properly applied against the loss.

5.6.3. Checks and Money Orders. The DO acts to recover the amount of lost negotiable instruments following Chapter 11, subparagraph 8.3.8. If this recoups the full amount of a lost deposit, do not file the claims described in subparagraphs 5.6.4 or 5.6.5. If it does not result in full recovery, the DO may request relief of liability for the unrecovered portion, supported by copies of all correspondence pertaining to the unsuccessful recovery action (see Chapter 6, section 6.0).

5.6.4. Claim for $100 or Less Against U.S. Postal Service (USPS). USPS liability in the case of lost cash shipped by registered mail is generally limited to shipments of $100 or less, and only the consignor (mailer) may file a claim for a lost shipment. The consignor may file a claim for damage or partial loss using Postal Service (PS) Form 1000, Domestic or International Claim. The accountable DO obtains a copy of the form as a means of tracing the shipment; such a filing does not constitute a claim. If a DO files a claim online at the USPS website, the PS 1000 is not required.

5.6.5. Claim in Excess of $100 Against the Treasury. The DO sends claims for the value of lost currency shipments exceeding $100 to Secretary of the Treasury through the supporting DFAS site. The DO ensures:

5.6.5.1. The proof of claim includes satisfactory proof of loss, destruction, or damage. The claim must include the original DD 165, which will be returned after adjustment of the claim. The DO ensures that all applicable blocks on the form are complete and the form is signed or the BPD will not process the claim. The consignor (shipping officer) submits a statement concerning the loss, destruction, or damage to the shipment or any part thereof.

5.6.5.2. If the consignee receives a shipment with contents not intact, the statement describes the circumstances relating to the condition in which the shipment was received and the manner of inspection and verification of its contents. The claim must also include affidavits covering the loss, destruction, or damage to the shipment from the consignee and the carrier, as well as statements and recommendations of the investigating officers.

5.6.5.3. In the case of lost shipments for which an exchange-for-cash check was issued to an FRB or another DO, the check-issuing DO requests that the shipping officer provide copies of all documentation. All necessary and reasonable steps to recover the lost, destroyed, or damaged shipment must continue after filing the claim. DOs ensure that all recoveries and refunds received following favorable consideration of the claim are turned over to the Treasury. See Title 31, Code of Federal Regulations (CFR), part 361 for claims under the Government Losses in Shipment Act.

5.6.6. Restitution and Relief. The BPD grants claims for relief for lost, damaged, or destroyed shipments only if the shipping officer strictly followed prescribed procedures. If a claim is denied, the accountable DO may either make restitution of the missing funds or submit a request
for relief of liability following Chapter 6, section 6.0. The request will be adjudicated according to Chapter 6, section 7.0 and U.S. laws and regulations applicable to accountable official liability. If a claim is approved, the BPD sends a refund via the Intra-governmental Payment and Collection (IPAC) system. The DO must provide an agency location code before transmission. If no IPAC capability exists, contact the supporting DFAS site.

5.7 Unfit U.S. Currency and Coin

5.7.1. Responsibility for Cancellation and Destruction. Under 12 U.S.C. § 413, the Secretary of the Treasury is responsible for the cancellation and destruction of U.S. currency unfit for circulation. The Secretary has, under 31 U.S.C. § 321(b)(2), delegated these responsibilities to the Treasurer of the United States, who subsequently re-delegated them to the Director of the Bureau of Engraving and Printing (BEP). There are no further re-delegations.

5.7.2. Mutilated Currency

5.7.2.1. At least three disinterested persons must inventory damaged or mutilated U.S. currency or fragments thereof recovered from inadvertent wartime destruction or peacetime catastrophes affecting DoD property and personnel (e.g., aircraft crashes, ship sinking, building explosions, chemical spills). These persons normally can determine the value of the currency, but if they cannot, the DO sends the currency to the BEP for determination of value. The address is BEP, Mutilated Currency Division, Room 344A, P.O. Box 37048, Washington, DC 20013 if shipping via the USPS; or to 14th and C Streets SW, Washington, DC 20228 if shipping via other means. Insure the shipment and request a return receipt.

5.7.2.2. Package the unfit currency as follows:

5.7.2.2.1. Regardless of the condition of the currency, do not disturb the fragments more than necessary.

5.7.2.2.2. If the currency is brittle, pack it carefully in suitable cushioning material, and box it as found, without disturbing the fragments any more than necessary.

5.7.2.2.3. When possible, leave mutilated currency that was in a purse, box, or other container as is to prevent either further deterioration or loss of the fragments.

5.7.2.2.4. If it is necessary to remove the fragments from the container, send the container with the currency and any other contents found.

5.7.2.2.5. If the money was flat when mutilated, do not roll or fold it.

5.7.2.2.6. If the money was in a roll when mutilated, do not attempt to unroll or straighten it.
5.7.2.2.7. Carefully remove coins or any other metal that may be mixed with the currency. Do not send coins or other metal in the same package with mutilated currency, as it may further damage the currency.

5.7.2.2.8. Send properly packaged currency to BEP by registered mail (see subparagraph 5.7.2.1), return receipt requested, and insure the shipment. Because the BEP issues written confirmation for cases that it expects to take longer than eight weeks to process, DOs should include a specific request to receive a written confirmation. A DO not receiving confirmation during this time initiates follow-up procedures with the BEP by mail or telephone at (866) 575-2361.

5.7.3. Mutilated Coins. U.S. coins that are bent, broken, not whole, or fused and melted together are "mutilated." For additional information on mutilated coins, see the guidance under, 31 CFR 100, Subpart C. Refer questions on the disposition of mutilated or contaminated coins to the U.S. Mint’s Office at 1-800-872-6468, or contact DFAS-ZPTA/IN.

5.7.4. Worn Coins. Any FRB or branch will redeem at face value U.S. coins that are worn or reduced in weight by natural abrasion, yet are readily and clearly recognizable and machine countable.

5.7.5. Contaminated Currency

5.7.5.1. Contaminated currency is that which has been damaged by or exposed to contaminants or poses a health hazard or safety risk and cannot be processed under normal operating procedures. This does not apply to currency that has been exposed to a bio-terrorist agent (either biological or chemical). Contamination may result in currency emitting offensive odors and displaying mold-like conditions, and may be caused by the following:

5.7.5.1.1. Prolonged exposure to water or other liquids;

5.7.5.1.2. Exposure to blood, urine, other bodily fluids, or feces, including removal from any body cavity, corpse, or animal;

5.7.5.1.3. Exposure to sewage;

5.7.5.1.4. Exposure to any foreign substance or chemical, including dye-packs, which may pose a health hazard or safety risk; or

5.7.5.1.5. Mold or mildew.

5.7.5.2. The DO contacts the Office of Currency Standards, BEP at (202) 874-2361 to arrange an on-site BEP review or to obtain disposition instructions.

6.0 WEAPONS FOR CASH PROGRAM

6.1 Authorization
The weapons for cash program requires Secretary of Defense authorization. The senior operational commander provides funding authorization for weapons procurement. The total amount advanced to PAs under this program may not exceed this authorization. Before providing additional funds, the commander must adjust the authorization.

6.2 PAs

Use PAs to ensure successful operation of the program (see Chapter 2, paragraph 7.4). The DO advances cash following paragraph 4.2 in the currency of the country involved, referring to Chapter 13, section 3.0 for guidance on obtaining the required foreign currency.

6.3 Weapons Purchases

Proper accounting is required for each disbursement. Use a SF 44, Purchase Order-Invoice-Voucher, or other available chain-of-custody type receipt. Each seller’s receipt must include the seller’s name and (if possible) identification number, weapon description and serial number, and amount disbursed. The PA ensures the seller’s signature appears on the receipt. Prepare the original and three copies of the disbursement document (seller’s receipt). Provide the original and one copy to the DO, attach one copy to the weapon (for inventory control), and give one copy to the seller.

6.4 Clearing or Replenishing the PA’s Account

A PA prepares a DD 1081 for the total amount of all disbursement document vouchers turned in, which includes the original and one copy of each document (receipt), any residual cash advanced from the DO or designated representative, and a copy of the approval to establish a weapons for cash program. If replenishment of a PA’s account is necessary, the PA prepares the DD 1081 as prescribed and submits it to the supporting DO who replenishes the PA’s account for the approved amount shown on the DD 1081, subject to paragraph 4.2.

7.0 COUNTERFEIT OR ALTERED U.S. CURRENCY

7.1 Detected Before Acceptance

A DO confiscates U.S. currency presented for exchange or payment of an obligation to the United States that he or she determines is either counterfeit or altered, gives a receipt indicating the type, denomination, and amount of the confiscated currency to the person presenting it, and obtains information from that individual regarding the currency’s source. The DO delivers the currency, by letter of transmittal with all available information, to either a representative of the appropriate investigative service (if available) or the nearest military security agency, obtaining a receipt in either case. Since such currency is suspect, no entries in the DO’s accounts are required.

7.2 Detected After Acceptance
7.2.1. **Reimbursement Obtained.** Upon discovering counterfeit currency, the DO requests reimbursement from the source from which received, and follows paragraph 7.1. No loss to the DO accrues, and no entries in the DO's accounts are required.

7.2.2. **Reimbursement Not Obtained.** If the source of counterfeit currency is unknown, or is known but reimbursement is not obtained, the DO delivers the currency, with a detailed report of all known circumstances, to either a representative of the appropriate investigative service (if available), or the nearest military security agency, obtaining a receipt in either case. Send the currency receipt with a signed copy of the DO’s report by memorandum stating the reason why reimbursement was not obtained through the DO’s commander to DFAS-ZPTA/IN, and report it on the SF 1219 as a physical loss of funds.

7.3 **Detected After Depositing with Bank**

When a bank operating a Treasury General Account (TGA) notifies a DO that the currency, deposited by the DO, is suspected to be counterfeit, the DO reimburses the TGA for that currency and obtains a receipt with the currency’s description, stating that the currency is suspected to be counterfeit and has been withdrawn from circulation. The TGA surrenders any suspected counterfeit currency to the USSS, and provides depositors with a photocopy of Secret Service Form 1604, Counterfeit Note Report, and/or any other documentation. The DO contacts the USSS to ascertain if the surrendered currency is counterfeit and must ensure that the TGA processes a deposit ticket for the amount of surrendered currency that the USSS determines is not counterfeit and credit the amount of the deposit ticket to the appropriation that funded the loss. Report the amount the USSS determines as counterfeit on the SF 1219 as a physical loss of funds.

7.4 **Miscellaneous Cases**

Send a description of any unusual counterfeit currency situation not specifically covered in section 7.0 to DFAS-ZPTA/IN for disposition instructions.

8.0 **EMERGENCY DISPOSITION**

8.1 **Contingency Plans**

DoD Component heads must develop and maintain contingency plans and standby procedures to dispose of cash and other assets under emergency conditions. These plans should address emergency conditions, emergency destruction, sudden destruction, and accounting for cash and other assets destroyed. They must include internal controls to minimize the potential risks of fraud, waste, and abuse. Emergency operations include, but are not limited to, combat and peacekeeping operations, humanitarian assistance efforts, noncombatant evacuation operations, disaster relief efforts, and disposal of contaminated cash.

8.2 **Policy**

8.2.1. **Emergency Conditions.** Under conditions that may require the evacuation, disposal, or destruction of cash and other assets, commanders execute their contingency plans. DOs or their
designees will have to evacuate cash and other assets under these conditions (e.g., in anticipation of enemy action) to a designated safe haven (e.g., secured vaults or safes).

8.2.1.1. Cash and Other Assets. Upon initial notification of a threat that may require the destruction of cash and other assets, the DO, DDO, or other designee should determine cash requirements, recall or purchase excess cash, and evacuate it and other assets held at personal risk to a designated safe haven. If the DO, DDO, or commander determines that capture of these assets is possible, secure them in a manner that will minimize the risk of capture or destroy them following subparagraph 8.2.2.

8.2.1.2. Combustible Materials. If capture of funds is inevitable, burn paper currency, checks, and other burnable documents completely to ashes. If this is not possible, use chemical decomposition, shredding, or pulping. The alternative methods must render the items non-negotiable by completely destroying their original character and appearance.

8.2.1.3. Solid Substances. Dispose of coins and other valuable non-burnable items by scattering in deep bodies of water or physically destroying when possible. When no suitable bodies of water are present, discretely bury these items in the ground. Coins may also be fused or mutilated to make them unrecognizable. Fragment and scatter bars, ingots, and other units of precious or valuable substances, making their recovery impossible or at least uneconomical.

8.2.2. Emergency Destruction

8.2.2.1. Preparation

8.2.2.1.1. DOs and their Agents. If time permits, the DO/DDO prepares the following forms or documents for the various disbursing media identified.

8.2.2.1.1.1. U.S. Currency. The DO/DDO prepares an original and three copies of DD 2669, Destruction Schedule for Currency, for all U.S. currency to be destroyed, noting the reason in the space provided. For full or partial packages of new currency, note the beginning and ending serial numbers of each denomination. Destruction must be witnessed by three persons who are either U.S. commissioned or noncommissioned officers, or U.S. Government civilian employees who are U.S. citizens. The DO/DDO may serve as the third witness if one of the other two witnesses is senior in rank to the DO/DDO. Witnesses must enter their name, rank or grade, and signature in the spaces provided. A DO/DDO serving as a witness completes block 5 and the applicable section of block 8. Indicate the method of destruction in the space provided for the witnesses’ certifications.

8.2.2.1.1.2. U.S. Coin. The DO/DDO prepares a DD 2669 for U.S. coin to be destroyed, including the same type of information required for U.S. currency, but listing the denominations and value of each denomination to be destroyed. DO/DDO will cross out the preprinted denominations of paper currency, and enter the coin denominations. Also, cross out “currency” and write “U.S. coin” immediately above it in both the DO’s/DDO’s and witnesses’ certification blocks (see subparagraph 8.2.2.1.1).
8.2.2.1.3. **Check Stock.** The DO/DDO prepares a listing (original and three copies) of the U.S. Treasury and LDA check stock to be destroyed, indicating the range (from and through) of check numbers for each series of checks maintained. See subparagraph 8.2.2.1.1 for destruction guidance.

8.2.2.1.4. **Foreign Currency and Coin.** The DO/DDO prepares a DD 2669 for foreign cash to be destroyed. Modify the appropriate areas of the form to identify the different denominations, prepare separate forms for currency and coins, and separate forms for public funds and those held for safekeeping (see subparagraph 8.2.2.1.1).

8.2.2.1.5. **Signature Media.** See subparagraph 8.2.1.2.

8.2.2.1.2. **Nonappropriated Fund (NAF) Custodians and MBF and Other DoD-Sponsored Activity Managers.** These activities may periodically exchange cash that exceeds day-to-day requirements for a U.S. Treasury check to reduce currency susceptible to loss.

8.2.2.1.2.1. **U.S. Cash.** When ordered by the commander, these activities deliver their U.S. cash to the nearest DoD DO/DDO in exchange for a U.S. Treasury check. The DO is then accountable for the cash. If an exchange cannot be made, the activity custodians or managers prepare a destruction schedule similar to the DD 2669 and after verification, burn the currency to ashes in the presence of at least one activity representative and two U.S. commissioned or noncommissioned officers or U.S. Government civilian employees (see subparagraph 8.2.2.1.1).

8.2.2.1.2.2. **Foreign Cash.** If necessary to destroy foreign cash, the appropriate authority (e.g., NAF custodian, MBF, or other activity manager) transports it to the nearest DoD DO/DDO and exchanges it for a receipt stating that the foreign currency is being accepted for safekeeping and that neither the DO/DDO nor the U.S. Government is accountable for loss or destruction as a result of the existing emergency (see Chapter 16, section 2.0). A DO/DDO, having accepted the currency and coin, needing to use it to meet operational requirements, issues a U.S. Treasury exchange-for-cash check to the appropriate authority for the USDE of the foreign funds purchased. If destruction becomes necessary and time permits, the DO/DDO prepares a DD 2669. When an exchange cannot be made, the appropriate authority prepares a destruction schedule similar to the DD 2669 and after verification, burns the currency to ashes. See subparagraph 8.2.2.1.1.4 to dispose of foreign coin.

8.2.2.2. **Precedence.** DOs/DDOs in areas of elevated tension should anticipate the possibility of emergency destruction and maintain procedures to rapidly inventory and destroy their cash and other assets. If there is not enough time to destroy all funds held by the DO/DDO, prioritize the destruction as follows:

8.2.2.2.1. **U.S. and foreign cash, and negotiable instruments carried as cash in the DO’s accounts;**

8.2.2.2.2. **Blank U.S. Treasury checks;**
8.2.2.2.3. Blank LDA checks;

8.2.2.2.4. Currency, negotiable instruments, and other valuables held for safekeeping;

8.2.2.2.5. Coins; and

8.2.2.2.6. Other valuables (e.g., signature media).

8.2.3. Sudden Destruction. When currency and coins are destroyed by explosion, fire, sinking of a vessel, or aircraft accident, the accountable DO prepares a written statement identifying the circumstances under which the destruction occurred and sends it with a request for relief of liability to DFAS-ZPTA/IN. If the DO does not survive the disaster that destroyed the funds, the officer designated to settle the account acts on the DO’s behalf by reconstructing the accountability of the DO and initiating the appropriate requests for relief.

8.2.4. Accounting for Destroyed Cash and Other Assets. DOs account for destroyed currency, coin, and negotiable instruments that were held as public funds by entering on the DD 2657 and the SF 1219, and attach copies of supporting DD 2669 to both forms.

</table>
Figure 3-1. Suggested Average Daily Cash Requirement (Continued)

Notes:
1 Maintain LDAs with checkbook balances as close to zero as possible by forecasting payment requirements in enough time to order currency to correspond with the payment due date. See Chapter 14.
2 Value based on Monthly Worksheet Calculations.
3 A higher CHA will be required if collections exceed disbursements. It is generally not cost effective to reconvernt currency that may be required for disbursements in the near term.
4 When recurring variance in demand occurs due to events such as paydays, compute a separate CHA for these periods and exclude it from normal non-peak calculations.
5 Contingency requirements generally reflect emergency cash needs for operational missions or due to large fluctuations in demand that cannot be forecast in advance. Static requirements reflect subordinate agents, imprest funds, or contractual arrangements such as debit card pool accounts or community bank contingency cash. Validate agent requirements based on usage and frequency of returns/replenishment.
6 See also subparagraph 2.3.1.

CHAPTER 4

ACCOMMODATION EXCHANGE

1.0 GENERAL

1.1 Overview

If adequate banking facilities are not available to provide personal check cashing and other accommodation exchange services, DoD Disbursing Officers (DOs) may provide these services within the guidance of this chapter.

1.2 Purpose

The purpose of this chapter is to provide policy on check cashing and other accommodation exchange services. This includes exchange of cash for negotiable instruments (including personal check cashing), eligibility for check cashing services, internal controls, accountability, and removal of deficiencies.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3342 (31 U.S.C. § 3342) allows DOs to provide check cashing and accommodation exchange services when authorized by the appropriate commander (i.e., a theater commander, base or installation commander, commanding officer or officer-in-charge, director of a supporting Defense Finance and Accounting Service (DFAS) site, or equivalent civilian head in the DO’s chain of command) for eligible individuals (see paragraph 2.3).

2.0 EXCHANGE OF CASH FOR NEGOTIABLE INSTRUMENTS

2.1 Policy

2.1.1. In the United States, a commander may request the Director, DFAS or designee to authorize a DO to cash negotiable instruments. Submit requests, with justification, to DFAS, Enterprise Solutions and Standards, Disbursing (DFAS-JJFKCB/IN), 8899 E. 56th Street, Indianapolis, IN 46249-0050.

2.1.2. In overseas areas and for ships afloat, a commander may authorize the DO to cash negotiable instruments. The command must have a written check cashing policy approved by the theater commander or designee identifying the services to be offered and identifying the personnel eligible to receive them. The policy must provide that the DO may deny check cashing privileges to anyone based on the non-availability of cash or personnel resources. Resources must be available to provide these services without impacting levels of other financial services (e.g., primary disbursing and related functions).
2.2 Negotiable Instruments

A DO may cash U.S. Treasury checks, money orders, traveler’s checks, third-party checks, state and local government checks, credit card checks, business checks, and personal checks payable in U.S. dollars for eligible payees. These instruments may be processed through the Over the Counter Channel Application (OTCnet) (see Chapter 11, paragraph 8.1). The DO accountability is not affected until the checks are reported in Treasury’s OTCnet. Ensure that the appropriate DO Cash Treasury Account Symbol (TAS) is utilized along with the appropriate Business Event Type Code (BETC) when depositing accommodation exchange transactions.

2.3 Eligibility

Personnel permanently assigned to units in the area served by the DO are eligible for check cashing services. These include:

2.3.1. Members of the U.S. Armed Forces;

2.3.2. Civilian employees of the U.S. Government who are U.S. citizens;

2.3.3. A veteran hospitalized or living in an institution operated by an agency;

2.3.4. Contractors and their employees engaged in U.S. Government projects if the contractor is a U.S. firm whose employees are U.S. citizens:

2.3.4.1. The company’s on-site representative must furnish the DO with a list of employees authorized to cash personal checks, and enter into a written agreement. The agreement must stipulate that the DO will suspend check cashing privileges for that company’s employees if the DO receives a dishonored check written by a company employee and the DO cannot collect for the dishonored check; and

2.3.4.2. The DO will notify the company representative when a dishonored check is received from one of its employees and suspend check cashing services for all of the company’s employees. The suspension remains in effect until the DO collects on the dishonored check. The check cashing agreement is permanently terminated if the DO is unable to collect the dishonored check within 30 calendar days from the notification to the company representative;

2.3.5. U.S. citizens who are employees of authorized nongovernment agencies operating with U.S. Government agencies, (e.g., the American Red Cross);

2.3.6. Dependents of the personnel named in subparagraphs 2.3.1 and 2.3.2, as defined in 31 U.S.C. § 3342(b)(3)(A)-(B) and the Definitions Chapter.

2.3.6.1. At a U.S. installation at which adequate banking facilities are not available, and
2.3.6.2. Holding proper identification and powers of attorney and who possess valid DoD identification cards; or

2.3.6.3. Ordered to safe haven posts due to emergency evacuation (see Chapter 13, paragraph 3.3 for accommodation restrictions), and

2.3.6.4. In the case of negotiation of negotiable instruments, if the dependent’s sponsor (as defined in the Definitions Chapter) authorizes, in writing, the presentation of negotiable instruments to the DO for negotiation.

2.3.7. Third-country national civilian employees under contract to the U.S. Government as contractors or subcontractors employed by U.S. firms engaged in U.S. Government projects in foreign countries with U.S. Treasury checks or U.S. dollar checks issued by the contractors;

2.3.8. A Federal credit union operating on U.S. military installations in a foreign country but only if that country does not permit contractor operated military banking facilities (MBF) to operate on installations;

2.3.9. Personnel on temporary duty/temporary additional duty (TDY/TAD) when approved by a DO’s commander. These personnel must provide the DO a copy of their TDY/TAD orders and any other items of identification the DO may require; or

2.3.10. An authorized agent, authorized by a properly executed power of attorney, for personal checks drawn on the account of a member; personal checks drawn on joint accounts to which the member is a party; and other checks drawn in favor of the member. The agent must present valid identification in the course of all transactions. Restrictions that apply to benefiting members also apply to their agents under the terms of the executed (DD) Form 2761, Personal Check Cashing Agreement, which serves as a power of attorney.

2.4 Internal Controls

Commanders and other individuals in the chain of command are responsible for implementing and maintaining internal controls that preclude the fraudulent issuance and cashing of negotiable instruments. At a minimum:

2.4.1. All instruments are endorsed, “Pay to the Order of the Disbursing Officer, (name of ship, station, activity, unit, disbursing station symbol number ####, or the DFAS site),”

2.4.2. The payee(s) sign or endorse each instrument in the presence of the DO, a Deputy DO (DDO), the DO’s authorized agent, or a cashier;

2.4.3. The identity of the DDO, DO’s agent, or cashier cashing the instrument must be clearly identifiable on that instrument, and the person cashing the instrument may be held pecuniarily liable if the instrument is altered or forged. The DO may also be held pecuniarily liable if the instrument becomes nonnegotiable and their identity is not apparent; and
2.4.4. The person cashing a negotiable instrument must properly verify the identity of the person(s) presenting the instrument. Record the payee(s) or endorser(s) identification (e.g., legible name, social security number (SSN), phone number, and identification card number and duty station (if applicable)) on the negotiable instrument. This allows recovery to be made if the instrument is dishonored. A DO may institute an alternate to annotating this information on a check by the use of the DD 2761. Use of the DD 2761 would alleviate concerns of identity theft such as the SSN. Attach a photocopy of the negotiated check to the DD 2761 and file for records retention.

3.0 CASHING PERSONAL CHECKS

3.1 Check Cashing

3.1.1. All authorized military and appropriated fund civilian personnel who request check cashing privileges must consent in writing to immediate collection against their pay for the total of any dishonored check. Dishonored checks are not delinquent debts. There is no authority for the DO to assess a service charge (penalty), but recover any insufficient fund charges assessed on the DO by financial institutions. Depending on the circumstances, the DO has two options:

3.1.1.1. **Option 1.** DD 2761:

3.1.1.1.1. The DO uses this form if the individual’s payroll office is unknown or when cashing a check for a civilian employee or an authorized agent of a civilian employee or military member.

3.1.1.1.2. The term “authorized agent,” as used on this form, pertains to an individual, usually a dependent, authorized by a power of attorney to cash personal checks on behalf of a member or civilian employee as prescribed in this chapter.

3.1.1.1.3. Proper use of this form precludes the need for a separate power of attorney on behalf of the individual requesting check cashing service. The member or employee appoints an agent by providing a name(s) in the block titled “Authorized Agent,” and signs the form. The person cashing the check must verify the agent’s signature against a valid form of identification when the check is presented.

3.1.1.2. **Option 2.** Authorized Statement: A statement stamped on the front of the personal check may be used only for military members and civilian appropriated fund employees.

3.1.1.2.1. If the individual’s payroll office is known, the DO may order a rubber stamp in small type to be placed on the front of the check along the top margin or above the bank’s name and address (see Figure 4-1). The stamp must state:

“I consent to immediate collection from my pay the amount of this check plus bank charges, if this check is dishonored [individual’s initials].”
3.1.1.2.2. The DO (or authorized agent) stamps this statement on the front of the check in the presence of the individual and ensures the individual places his or her initials at the end of the statement to validate immediate collection from the individual’s pay account if the check is later dishonored.

3.1.1.2.3. If the stamp is used, record adequate payee identification (verified against a valid identification card) on the negotiable instrument to facilitate recovery if the instrument is dishonored (see section 4.0).

3.1.2. The following items are the responsibilities of DO and their authorized agents when pay account collection for dishonored personal checks becomes necessary.

3.1.2.1. When a military member is in the same DoD Component and the DO maintains the member’s account:

3.1.2.1.1. Immediate deduction from the pay account is authorized for the face value of the dishonored check(s) plus any charges assessed against the DO by a financial institution for their processing.

3.1.2.1.2. DO may not use partial payments as a means of resolving a dishonored check.

3.1.2.2. When a military member is from a different Military Service or from the same component and paragraph 3.2 does not apply (e.g., retirees, members on transfer orders, on TDY/TAD, or in any other transitory status):

3.1.2.2.1. When using the DD 2761, the DO makes copies of the form (front and back), certifies on the back that the individual consented to voluntary collection, and sends it to the appropriate component payroll office (see Table 4-1) to affect the pay account deduction and make restitution to the negotiating DO. The payroll office annotates the back of the DD 2761 specifying the action taken for each dishonored check listed:

3.1.2.2.2. When a rubber stamp is used on the face of a check, the DO prepares a DD 139, Pay Adjustment Authorization, by component as follows:

3.1.2.2.2.1. Attach a listing showing each military member’s name, DoD Component, SSN, unit or duty station, and check amount(s), along with copies of the check(s) (front and back). If the depositary adds a fee to the amount of the dishonored check, include a copy of the debit voucher to substantiate its inclusion in the total amount of the deduction. Send all required documents to the appropriate payroll office at the mailing address in Table 4-1 to accomplish pay account deduction.

3.1.2.2.2.2. Certify that the military members consented to voluntary collection by typing the following certification statement on the DD 139 in the block titled “Explanation and/or Reason for Adjustment.”
“I certify that these collections are the result of dishonored personal checks cashed by the cited individuals for the amounts stated. Each individual has consented, in writing, that in consideration for cashing the individual’s personal check(s), the amount of any check returned unpaid, plus any charges assessed against the DO by a financial institution, for any reason may be collected from the individual’s pay.”

3.1.2.3. For dishonored personal checks from authorized appropriated fund civilian employees:

3.1.2.3.1. Immediate pay account deductions are authorized for the face value of dishonored checks plus any charges assessed against the DO by financial institutions.

3.1.2.3.2. The DO prepares a DD 2481, Request for Recovery of Debt Due the United States by Salary Offset, attaching copies of the front and back of the check(s), and a copy of the DD 2761, if applicable. If the depositary adds a fee to the amount of the dishonored check, attach a copy of the debit voucher to substantiate its inclusion in the amount of the pay account deduction. Send all documents to the appropriate payroll office (see Table 4-1).

3.1.2.4. When a check is returned for a contract employee, the DO must immediately seek reimbursement from the company employee, as indicated in the employee’s company agreement.

3.1.3. When collection action becomes necessary and the payroll office receives a DD 139 or DD 2761 from the DO, the payroll office:

3.1.3.1. Processes the account deduction using normal payroll procedures;

3.1.3.2. When possible, includes a statement similar to, “Consensual collection action for a dishonored check” in the remarks column of the leave and earnings statement; and

3.1.3.3. Annotates, after collection of the debt, the DD 139 or DD 2761 with the action taken for the dishonored check(s) and returns the document together with a certified casual payment voucher. This voucher must be charged to the service member's pay account for the amount of the dishonored check to support the DO's issuance of an exchange-for-cash check payable to the disbursing office holding the dishonored check, to support the Standard Form (SF) 1219, Statement of Accountability.

3.1.4. If a military member or DoD civilian employee is separated or has resigned and cannot be located to make restitution, the DO follows section 5.0.

3.1.5. Writing checks in advance of the availability of funds (floating a check) is illegal. Deny check cashing privileges to individuals who abuse it by writing checks against insufficient funds.
3.1.6. Retain check cashing documents as follows:

3.1.6.1. The DO keeps the original signed DD 2761 for all personal checks honored. See Volume 1, Chapter 9, section 2.0 for records retention policy.

3.1.6.2. For all dishonored checks, keep the original DD 2761 with the dishonored check file until resolved. If the consent statement is stamped on the front of the check and the check is dishonored, the DO, deputies, agents, or cashiers make copies of the front and back (if applicable) of the check. Keep a copy of the check along with a copy of the agreement if the individual is a contractor until the matter is resolved.

3.2 Limitations

3.2.1. Commanders establish maximum amounts for cashing personal checks by authorized personnel and/or their agents. In overseas areas where personnel of two or more Services are operating, the senior commander ensures the existence of a uniform policy to provide check cashing privileges within sound financial management practices. The policy and applicable limits are based on the circumstances of the local economy and cost-of-living. The supporting DO should publish deviations from established command maximum limits for each exception.

3.2.2. The DO provides a copy of an authorization to exceed the established limit when requesting removal of deficiencies involving uncollectible insufficient fund checks and associated charges that may be assessed by financial institutions for personal checks they have cashed (see section 4.0). Personal checks being cashed must be drawn in multiples of 5 dollars unless local conditions make that increment impractical. U.S. Treasury checks or checks issued by banks, or other similar financial institutions may be cashed without regard to a dollar amount.

3.2.3. Checks must be drawn on U.S. financial institutions, overseas branches of U.S. banks or credit unions, or overseas MBFs operated under U.S. Government contract. Checks must also be payable in U.S. dollars through U.S. banks or credit unions, to include banks located in the Commonwealth of Puerto Rico, U.S. Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands. The DO establishes the days and hours during which check cashing service is available and makes appropriate notification of any changes.

3.2.4. Paragraph 2.3 governs suspension of check cashing privileges for contractors and their employees engaged in U.S. Government projects who have written dishonored checks.

3.3 Exceptions

A DO of a naval vessel may cash personal checks for crew members when the vessel is in a U.S. port and adequate check cashing facilities are neither available nor adequate for nonresidents of the area. A non-tactical disbursing activity in the United States may provide check cashing service when a unit, squadron, or detachment without a DO or disbursing capability is performing TDY/TAD away from its permanent station or homeport where adequate check cashing facilities are not available. This authority applies when units, squadrons, or detachments are engaged in training.
or exercises that preclude use of available check cashing facilities. For situations not described in section 2.0, a commander may request the Director, DFAS or designee authorize check cashing services. Submit the request following subparagraph 2.1.1.

4.0 ACCOUNTABILITY FOR DISHONORED CHECKS

4.1 ChecksAccepted From External Activities

DOs who accept checks from external activities for the sale or transfer of something of value (e.g., property disposal sales, clothing sales, commissary sales, ships stores, housing offices, or similar activities) which a depositary later returns unpaid on a debit voucher must record the debit voucher on the DD 2657. Daily Statement of Accountability, as a reduction of deposits, prepare a reverse collection voucher as a reduction of reimbursements, and send one copy of the collection voucher and one copy of the dishonored check to the collection activity concerned. All dishonored checks are returned by the Treasury on a debit voucher and automatically classified back to the TAS annotated on the OTCnet deposit ticket. Collection activities are responsible to pursue collection action in accordance with their regulations and Volume 16, Chapter 2. Since these checks were collected into an appropriation and subsequently reversed, there is no deficiency in the DO’s accountability.

4.2 Checks Accepted to Satisfy an Obligation (Debt) Due the United States

Checks accepted from external activities or to satisfy an obligation (debt) due the United States will not impact the DO Cash TAS and will be classified under a program TAS. DOs who accept checks to satisfy a debt to the United States (e.g., overpayment of travel allowances) which later are returned unpaid by a depositary must follow paragraph 4.1. The activity responsible for originating the charge (e.g., military pay, travel pay, or similar entitlement area) reestablishes the debt based on the dishonored check and the reverse collection voucher and pursues collection action in accordance with their regulations and Volume 16, Chapter 2. A DO who is the collecting officer for these types of dishonored checks initiates collection action following Volume 16, Chapter 2. Since these checks were collected into an appropriation and subsequently reversed, there is no deficiency in the DO’s accountability.

4.3 Checks Received as Accommodation Exchange Transactions

Checks accepted in check cashing transactions authorized by 31 U.S.C. § 3342 which are later returned unpaid by a depositary on a debit voucher must be recorded on the DD 2657 as decreases to deposits and increases to dishonored checks receivable. Dishonored checks related to accommodation exchange transactions will impact the DO Cash TAS and stay on the DO accountability until recouped or when the uncollectible receivable is processed for removal from accountability as provided in the Chapter 6, subparagraph 4.2.2.1. Unlike the checks discussed in paragraphs 4.1 and 4.2 consider these as erroneous payments because public funds have been disbursed. DOs pursue collection of these checks following section 3.0 and Volume 16, Chapter 2, section 2.0. If the checks become uncollectible, the DO reports the losses and requests removal
of the deficiencies through the Relief of Liability, Accounting and Finance Policy Division, Strategy, Policy & Requirements Directorate, DFAS Indianapolis (DFAS-ZPTA), 8899 E. 56th Street, Indianapolis, IN 46249-0050 (see section 5.0).

5.0 REMOVAL OF DEFICIENCIES

5.1 Request for Removal

5.1.1. Upon notification that a check has been dishonored, start collection action immediately and pursue it through recovery. If the DO has followed the check cashing policy and collection requirements in section 3.0 and Volume 16, Chapter 2, section 2.0, removal of deficiencies normally is authorized under 31 U.S.C. § 3342. If the debtor is no longer employed, in the military service, or is an inactive reservist, and all attempts to collect have been exhausted, the DO sends a written request for removal of the deficiency to DFAS-ZPTA (see Figure 4-2) through their command channels. The request must include:

5.1.1.1. The original or a copy of the front and back of the uncollectible check;

5.1.1.2. A copy of the related debit voucher;

5.1.1.3. Copies of the documents presented in section 3.0, to include the latest available information regarding the debtor’s location;

5.1.1.4. A copy of the command’s check cashing policy;

5.1.1.5. A copy of the one-time authority to exceed the command’s normal check amount, if applicable; and

5.1.1.6. A copy of the request for the DFAS payroll site to pursue collection action against the delinquent debtor.

5.1.2. If the DO has followed the check cashing policy and collection requirements in section 3.0 and Volume 16, Chapter 2, section 2.0, removal of deficiencies normally is authorized under 31 U.S.C. § 3342. If DFAS-ZPTA approves removal of the deficiency, it sends the requesting DO a memorandum authorizing a charge to 6763, Gains and Deficiencies on Exchange Transactions. The removal of deficiency transaction will impact the DO Cash TAS. Process the removal of deficiency with a Classification Transactions and Accountability transaction citing account 6763 and BETC and the appropriate DO Cash TAS/BETC. The DO sends a copy of the memorandum to the activity to which it submits financial reports. DFAS-ZPTA advises the Debt and Claims Management Office to continue attempts to recover the debt and, if successful, credit the appropriation charged when the deficiency is removed as a result of successful debt recovery processes. If DFAS-ZPTA does not authorize removal of the deficiency, the deficiency cannot be charged to 6763, and the DO can either repay the loss or request relief of liability as prescribed in Chapter 6, section 6.0.
5.2 Lost Dishonored Check

If a dishonored check held in the disbursing office is lost, consider it a physical loss of funds (see Chapter 6, section 4.0).

5.3 Forgeries and Other Unusual Cases

If a forged check is processed and paid, a loss of funds investigation is required (see Chapter 6, section 4.0). If the investigation is unable to identify the forger, or if recovery from this person cannot be accomplished, the DO, DDO, agent, or cashier who cashed the forged instrument will be liable for the loss but may be eligible for relief of liability (see Chapter 6, section 6.0). As such, the DO, DDO, agent, or cashier may submit a request for relief of liability to DFAS-ZPTA for the improper payment. The request should include a copy of the investigation results, all related documents, and a description of the procedures used to preclude forgery.

6.0 REDEEMING SAVINGS BONDS IN OVERSEAS AREAS

6.1 General

MBFs are authorized to redeem savings bonds in overseas areas. Where none are available, DOs may request this authorization through their chain of command. This is the only situation where DOs may redeem savings bonds. Disbursing offices with current authority to redeem savings bonds may continue this service providing no changes in area support by a local MBF has occurred.

6.2 Cashing Bonds

6.2.1 Authorized DOs. The DO authorized to redeem savings bonds must use the redemption tables found at the Treasury Direct website. Series EE and I Bonds issued after February 2003 must be at least 12 months old based on the date of issue before the DO may redeem them.

6.2.2 Redeemed Bonds. Return redeemed bonds on a separate deposit ticket following instructions provided by the servicing Federal Reserve Bank.

6.2.3 Discrepancies. Upon discovery that an amount was paid different from that authorized by the applicable redemption table, report the variance on the DD 2657, and either pay the amount of underpayment (using an SF 1034, Public Voucher for Purchases and Services Other Than Personal), or attempt to recover the overpayment from the payee. If the collection of the overpayment is made, prepare an Optional Form 1017-G, Journal Voucher, to document the collection and record the transaction as a decrease and an increase to cash. If the collection is not made, process the shortage as a physical loss of funds as prescribed in Chapter 6, section 4.0.

6.2.4 Internal Revenue Service (IRS) Form 1099-INT, Statement for Recipients of Interest Income. The DO issues an IRS 1099-INT, Interest Income, to recipients of $10 or more in interest paid on redeemed savings bonds. This form includes the amount of interest paid, name,
address, Taxpayer Identification Number (usually the bondholder’s SSN), name of the person paid, and other information needed by the IRS. DOs are prohibited from cashing bonds for individuals who refuse to furnish their SSN. Since individuals redeeming bonds may change their address without notification by calendar year-end, DOs should furnish the form to the recipient at the time of the transaction.

MEMORANDUM FOR: RELIEF OF LIABILITY SECTION, DISBURSING POLICY
DIVISION, DFAS INDIANAPOLIS (DFAS-ZPFA/IN), 8899 E.
56TH STREET, INDIANAPOLIS, IN 46249-0500

**SUBJECT:** Request for Removal of Deficiency

I request removal of deficiency under the provisions of Department of Defense Financial Management Regulation, Volume 5, Chapter 4, paragraph 5.1, for the following dishonored checks accepted as accommodation exchange transactions. This deficiency is carried on the accountability of disbursing station symbol number XXXX under the account holder Captain XXXXXXX.

This office has exhausted all means of collection. These individuals are no longer employed in an active duty, reserve, or civilian capacity for the U.S. Government. Members have been notified of their debt and have not responded to the collection letter. Attached are the dishonored check(s), copy of applicable debit voucher(s), copy of the applicable check cashing policy, and the documentation supporting attempted collections.

If you have any questions, please contact Mr. John Doe, at DSN ###-####, phone (###) ###-####, or by email: John.Doe.civ@mail.mil.

CHAPTER 5
CERTIFYING OFFICERS, DEPARTMENTAL ACCOUNTABLE OFFICIALS, AND REVIEW OFFICIALS

1.0 GENERAL

1.1 Overview

The DoD recognizes the difficulty of any single official exercising direct personal control over all aspects of each business transaction. Therefore, DoD relies on automated systems and accountable officials to ensure accountability of government funds including the accuracy, propriety, and legality of every payment.

1.1.1. An accountable official is a member of the U.S. Armed Forces or DoD civilian employee to whom public funds are entrusted or who participates in the process of certifying vouchers for payment in connection with the performance of government business. Accountable officials include disbursing officers (DOs), deputy disbursing officers (DDOs), disbursing agents, cashiers, imprest fund cashiers, change fund custodians, paying and collection agents, certifying officers (COs), and departmental accountable official (DAO).

1.1.2. This chapter addresses COs and DAOs. COs are accountable officials designated to attest to the correctness of statements, facts, accounts, and amounts appearing on a voucher, or other documents. DAOs are accountable officials that provide information, data, or services that COs rely on to certify vouchers.

1.2 Purpose

This chapter addresses the selection, appointment, responsibilities, and qualifications for COs; certification of vouchers for payment; DAOs; random review of disbursement vouchers; and pecuniary liability.

1.3 Authoritative Guidance

1.3.1. COs. Under Title 31, United States Code (U.S.C.), section 3325(a)(1) and (b), (31 U.S.C. § 3325(a)(1) and (b)), a DoD disbursing official may disburse money only as provided by a voucher certified by the Secretary of Defense (SecDef), an officer or employee of the DoD, or member of the U.S. Armed Forces having written authorization from the SecDef to certify vouchers.

1.3.2. DAOs. Under 10 U.S.C. § 2773a, the SecDef may designate any DoD civilian employee or member of the U.S. Armed Forces under the Secretary’s jurisdiction as a DAO. In the performance of their duties, DAOs are responsible for providing COs with information, data, or services that are directly relied upon by the CO in the certification of vouchers for payment.
2.0 POLICY

2.1 Authority to Appoint

The *DoD Directive 5118.03* delegates authority to appoint COs under 31 U.S.C. § 3325(a)(1) and (b), and DAOs under 10 U.S.C. § 2773a to the Under Secretary of Defense (Comptroller) (USD(C)). This volume re-delegates that authority to DoD Component Heads, who may further re-delegate that authority. See Chapter 2, paragraph 3.3 for policy on who may be appointed to positions of accountability to the U.S.

2.1.1. Based on the separation of duties principles cited in Chapter 1, subparagraph 3.5.2, DOs, their deputies, and agents may neither be appointed as, nor appoint COs for payments they will eventually make. See subparagraph 3.1.2 for conditions that may require deviation from normal separation of duties requirements.

2.1.1.1. DOs and DDOs may certify cover vouchers supported by properly certified sub-vouchers; see Chapter 9, paragraph 4.9.

2.1.1.2. Where a DO supervises separate computation and disbursing functions, persons in the computation section may be COs. In limited situations (e.g., afloat units, noncombatant evacuations, contingency operations, training exercises), disbursing office personnel may be appointed as COs. Make these appointments through command channels, excluding the DO, and describe the circumstances in Item 7 of the appointing DoD *(DD)* Form 577, Appointment/Termination Record-Authorized Signature.

2.1.2. DoD personnel who may be appointed to certify vouchers for payment include, but are not limited to, commanders, deputy commanders, resource managers and other key funds control personnel, travel authorizing officials, purchase card and centrally billed account (CBA) approving officials, and other personnel in equivalent positions. For example, a traveler’s supervisor could be a travel authorizing official and a CO. See paragraph 3.4 for CO training requirements and section 4.0 for policy on appointments.

2.1.3. The same person may not serve as both a DAO and CO for the same types of payments.

2.2 Certification of Funds Availability vs. Certification of a Payment Voucher

2.2.1. Certification of Funds Availability. As key funds control personnel, resource managers must certify funds availability before goods and/or services are ordered based on funding authorizations that allow incurrence of obligations for which the U.S. Government will make a payment at some future date (see paragraph 3.3). This does not create pecuniary liability consequences under either 31 U.S.C. § 3527 or 31 U.S.C. § 3528 (see also paragraph 7.1), but may have Antideficiency Act implications (see Volume 14, Chapter 2).
2.2.2. Certification of a Voucher for Payment. This is an attestation by a properly appointed and trained CO that a voucher is correct and proper for payment. Such a certification normally occurs before payment, but may occur simultaneously with receipt of and payment for goods and/or services, particularly in tactical situations. Only persons properly appointed on a DD 577 may make these certifications; see sections 4.0 and 5.0.

3.0 RESPONSIBILITIES

3.1 Appointing Authorities

DoD Component Heads or their designees:

3.1.1. May appoint COs and DAOs, other than themselves, and terminate appointments when required (see paragraph 4.1 and Chapter 1, paragraph 2.4);

3.1.2. Oversee the appointees and their execution of the duties described in paragraphs 3.4 and 3.5. In cases involving micro-purchases in support of contingency operations, to balance mission accomplishment with acceptable risk and cost benefit, it may be necessary to deviate from normal separation of duties and internal control principles required by Chapter 1, paragraph 3.5 and subparagraph 3.5.2, and the policy in subparagraph 2.1.3. Deviations are at the discretion of the commander, who must be aware of the increased possibility of the risk of errors, theft, and fraud that may result from the merging of payment certification responsibilities with other functions. Because such mergers may compromise internal controls, commanders must make every effort to mitigate these risks. Post-payment reviews, rotation of duties, and reviews of financial data and reports by management or external resources are tools available to mitigate these risks. The micro-purchase threshold is defined by the Federal Acquisition Regulation Subpart 2.101; and

3.1.3. Implement controls to effect timely appointment terminations.

3.2 Supervisors

Supervisors ensure that subordinate COs and DAOs are trained in their responsibilities, including initial training and refresher training annually (see subparagraph 3.4.1.2); periodically review their performance to ensure compliance with established regulations, policies, and procedures, including local standard operating procedures; review appointments annually for validity and current status, and make appropriate recommendations for change to appointing authorities.
3.3 Key Funds Control Personnel

Resource managers or other key funds personnel maintaining a system of funds control are responsible for certifying funds availability, and assignment of proper funding citations on commitment and obligating documents. Key funds control personnel should coordinate with requiring officials, such as program managers, contracting officers, and engineers, to verify that requests comply with funding statutes applicable to the assignment of funding on a commitment or obligation document and that the structure of the obligating document will support that capital and expensed items are listed on different line items. This coordination should include ensuring delivery of supplies and/or the period of performance for service aligns with the lifecycle of the associated funds such that the obligation meets the bona fide need rules as described in Volume 3, Chapter 8, subparagraph 3.4.1. A certification of funds availability is not a certification for payment (see paragraph 2.2 and Volume 14, Chapter 2).

3.4 COs

3.4.1 Qualifications. COs:

3.4.1.1. Must have knowledge of the subject matter, background, or experience in the preparation of a voucher for payment; appropriations and other funds and accounting classifications; and the payment process (e.g., location of designated paying and accounting offices). See paragraph 2.2;

3.4.1.2. Must complete an approved “Certifying Officer Legislation” training course applicable to their mission area prior to their appointment and refresher training annually, and provide proof of completion to their supervisor. Evidence of having completed this training is required prior to performing as a CO. On-the-job training is not acceptable; and

3.4.1.3. Should read the U.S. Department of the Treasury (Treasury) publication, “Now That You’re a Certifying Officer.”

3.4.2 Responsibilities. COs must ensure that the automated and manual processes supporting their voucher certifications reasonably satisfy the requirements listed under Treasury Financial Manual (TFM), Volume 1, Part 4A, Chapter 2000 (TFM 4A-2000), as well as:

3.4.2.1. Check the accuracy of facts stated on a voucher and in supporting documents and records, and may rely on data received from reliable automated systems that have been certified as compliant with the Federal Financial Management Improvement Act of 1996 (FFMIA) (see Volume 1, Chapter 3);

3.4.2.2. Verify the accuracy of computation of a voucher before certification;

3.4.2.3. Determine the legality of a proposed payment from the appropriation or fund cited on the voucher (see Chapter 1, paragraph 3.6 for policy on prohibited payments);
3.4.2.4. Ensure there is a legal obligation to pay (e.g., a contract);

3.4.2.5. Ensure the payee has fulfilled the prerequisites to payment (e.g., an invoice, receiving report, approved travel claim);

3.4.2.6. Ensure the payment is legal under the appropriation or fund involved (e.g., the correct appropriation and fiscal year);

3.4.2.7. Seek advance decisions on questionable vouchers; see Chapter 12, section 3.0;

3.4.2.8. Repay a payment:

3.4.2.8.1. Determined to be erroneous (e.g., illegal, improper, or incorrect) due to an inaccurate or misleading certification;

3.4.2.8.2. Prohibited by law; or

3.4.2.8.3. Not a legal obligation of the fund or appropriation cited; unless the payment is recovered by collection or offset from the payee or another source, (e.g., collected from a DAO or relief is granted under subsections (b) or (c) of 31 U.S.C. § 3528; also see Chapter 6, subparagraph 6.4.3);

3.4.2.9. Respond timely to a reviewing official’s questionable-payment inquiry; and

3.4.2.10. Include the payee’s Tax Identification Number (for businesses) or Social Security Number (for individuals).

3.4.3. Pecuniary Liability. See subparagraph 7.1.2.

3.4.4. DoD Employees Serving as Treasury COs. The guidance in this section applies to DoD employees appointed as Treasury COs and are delegated the authority to certify the disbursement of funds, as well as scheduling and classifying domestic and international payments that the Bureau of the Fiscal Service disburses, as authorized by the Treasury Disbursing Office. For more information on the Treasury Disbursing Office, see Chapter 9, section 6.0.

3.4.4.1. Treasury COs

COs that certify Treasury-disbursed payments must be appointed utilizing the Bureau of the Fiscal Service Form 210CO, Designation for Certifying Officer, and not the DD 577, unless also serving as a COs for DoD disbursed payments by a Non-Treasury Disbursement Offices (NTDO). Treasury appointed COs designations are valid for a period of one year from the effective date, unless revoked earlier. See **1 TFM 4A-3000** for all requirements and forms for scheduling payments disbursed by the Bureau of the Fiscal Service.
3.4.4.2. Treasury CO’s Pecuniary Liability

All accountable officials are subject to the pecuniary liability standard under Title 31 of the U.S.C. (see Chapter 6, paragraph 1.3). Treasury COs are pecuniarily liable when there is a fiscal irregularity based on the “presumption of negligence,” regardless if the payment was disbursed by the Treasury or an NTDO. See Chapter 6, sections 6.0 and 7.0 for policy concerning relief of liability of accountable officials.

3.5 Departmental Accountable Officials (DAOs)

3.5.1. DAOs are responsible in the performance of their duties to provide COs with information, data, or services to support the payment certification process. They have unique mission area responsibilities that require supervisors and appointing officials to not only decide if DAO appointments are required, but also define clearly each DAO’s functions. Appointment of DAOs is not mandatory; examples of persons whose duties could be considered as appropriate to support their being appointed as DAOs include, but are not limited to, receiving officials, contracting officers, personnel who make payment eligibility determinations, time and attendance personnel, and travel approving officials. Consider personnel in the following areas for appointment as DAOs:

3.5.1.1. Purchase Card Program. Approving officials may be appointed as COs with the additional responsibilities outlined in subparagraph 3.4.2. Other personnel involved with the purchase card program may be appointed as DAOs (see Volume 10, Chapter 23).

3.5.1.2. Contract and Vendor Pay. See Volume 10.

3.5.1.3. CBA. See DoD Instruction 5154.31, Volume 4, Government Travel Charge Card Regulations.

3.5.1.4. Personnel Programs. Personnel officers ensure accurate and timely input of personnel data supporting payments.

3.5.1.4.1. Military Pay. See Volume 7A.

3.5.1.4.2. Civilian Pay. See Volume 8.

3.5.1.4.3. Travel. See Volume 9.

3.5.2. DAOs must complete approved training applicable to their mission areas within two weeks of their appointment, refresher training annually, and provide a copy of their training completion certificate to their supervisor. Evidence of having completed this training is required prior to performing as a DAO. See subparagraph 2.1.1 for appointment eligibility, and subparagraph 7.1.3 for pecuniary liability implications.
3.6 Automated Information System (AIS) Administrators

In addition to other responsibilities, AIS administrators operate and maintain automated system(s) that support the entitlement, certifying, and disbursing processes so that these system(s) operate in accordance with prescribed functional requirements so that the integrity of the data is maintained and unauthorized access is prevented. They must also ensure that the systems they administer are certified as compliant with the FFMIA; see Volume 1, Chapter 3.

4.0 APPOINTMENT/TERMINATION RECORD-AUTHORIZED SIGNATURE (DD577)

4.1 Appointment and Termination

Appointing authorities (see paragraph 3.1) appoint and terminate the appointments of COs and DAOs using a DD 577, identifying as necessary the types of payments to be certified (e.g., vendor pay, purchase card, CBAs, travel, transportation, military and civilian pay) and, if appropriate, the entitlement system(s) involved. Avoid the term “various” and similar generalities when identifying types of vouchers to be certified. If desired, include the reviewing official’s organization on the appointment. The effective date of an Appointee Acknowledgment (Item 15 or 16a - Digital) may not be earlier than the date of the Appointing Authority (Item 12).

4.1.1. Include the appointee’s DoD Identification Number (employee number for direct-hire, non-U.S. citizen outside the U.S.), name, organization, and position. Limit the access to any personally identifiable information to only those who require it in the performance of their duties and are following the Privacy Act of 1974 (5 U.S.C. § 552).

4.1.2. When appointing employees outside the U.S. who are precluded by local law, treaty, or status of forces agreement from being held pecuniarily liable to the U.S. (see Chapter 1, subparagraph 3.3.3.3), make an appropriate comment in Item 7.

4.1.3. Appointees acknowledge their appointment in Section III; they may not re-delegate their appointed authority.

4.1.4. Appointments remain in force until terminated by an appointee’s reassignment or for cause. An appointing authority’s reassignment does not affect existing appointments.

4.1.5. COs who certify vouchers electronically, (e.g., Defense Travel System), must submit the DD 577 electronically, satisfying the requirements in Chapter 1, subparagraph 3.5.3.

4.1.6. COs who certify manual vouchers or submit manual certifications of electronic payments must submit original, manually-signed DD 577s (see subparagraph 4.2.1.1) or supplemental documents to support electronic DD 577 submissions.

4.1.7. These forms cannot be amended. Pen-and-ink changes are not authorized. Any change (e.g., to alter the types of vouchers to be certified) requires termination of the existing and preparation of a new appointment.
4.1.8. Terminate appointments using Section IV and submit the DD 577 to all recipients who received copies of the original appointment.

4.2 Distribution

4.2.1. CO Appointments. Ensure the training required by subparagraph 3.4.1.2 is complete before submission.

4.2.1.1. Payments Certified to Defense Finance and Accounting Service (DFAS) DOs. Send the form to the DFAS Indianapolis (DFAS-IN) DO (secure email: dfas.indianapolis-in.jfd.mbx.dfas-incdd577@mail.mil) following that office’s guidance. Forms sent as attachments must be copies of original DD 577s, not “copies of copies.”

4.2.1.2. Government-wide Purchase Card (GPC). DoD components that follow the guidance in the GPC Policy Guidebook for CO appointments/termination are not required to follow the submission guidance in subparagraph 4.2.1.1 for payments that are electronically certified. COs who certify manual vouchers must continue to follow the guidance outlined in subparagraph 4.1.6.

4.2.1.3. Payments Certified to non-DFAS DOs. Send the form following the paying DO’s instructions.

4.2.1.4. Immediate Payment. Fax or email a signed copy of the form to the appropriate DO. Follow up with a normal submission.

4.2.2. DAO Appointments. Appointing authorities ensure completion of the training required by subparagraph 3.5.2, keep the signed original DD 577s, and send copies to the offices that certify vouchers. Offices and organizations that rely on DAOs must establish and implement mechanisms for identifying and facilitating communication with them.

4.2.3. Appointment Terminations. See subparagraph 4.1.8.

4.3 Retention Requirements

Keep DD 577 copies after appointment termination for a retention period following the guidance in Volume 1, Chapter 9; except for transactions affecting Foreign Military Sales, use a retention period following the guidance in Volume 15, Chapter 6.
5.0 CERTIFICATION

5.1 General

All payments from appropriated funds must be certified (excludes intra-governmental); see the Government Accountability Office (GAO), Policy and Procedures Manual for Guidance of Federal Agencies, section 6.5. COs review payment vouchers before certification and submission to DOs for payment to ensure the information on the vouchers agrees with all supporting documentation. See Chapter 9, paragraph 4.3 for voucher certification requirements and Volume 1, Chapter 9 for records retention policy.

5.2 Effect of Certification

COs certify to, not “for” or “on behalf of,” DOs or their agents that vouchers are correct and proper for payment from the appropriation(s) or other funds cited on them or on supporting vouchers, and that the proposed payments are legal, proper, and correct (see subparagraph 3.4.2). They may certify either individual vouchers or a file of several vouchers; see paragraph 5.3. Manual certifications require the CO’s signature and typed or printed name, date, and dollar amount. See Chapter 1, subparagraph 3.5.3 for electronic signature requirements. Submit manually certified vouchers to the disbursing office by mail or fax.

5.3 Certification of a File of Payments (Batch Certification)

Batch certification attests that a file contains a specified number of payments that total a specific dollar amount equal to the total of vouchers contained in the file and that each voucher in the file has been certified as correct and proper for payment. Pecuniary liability attaches to the original CO for each payment. The person that certifies the file is pecuniarily liable for vouchers in that file not previously individually certified. Once a file is input, a DO processes each payment separately.

5.4 Successive Certification

More than one CO may be involved with a given payment; this is known as “successive certification.” When this occurs, the successive CO(s)’ actions do not diminish the responsibility of the officer who certified the original voucher. If the officer who certifies an additional related voucher differs from the one who certified the original, the first CO is pecuniarily liable for the correctness of the original voucher and the successive CO is pecuniarily liable only for the additional voucher(s). If a voucher is certified and then changed (e.g., to take a discount, add interest penalties), the CO certifying the legality, propriety, and correctness of the changes is pecuniarily liable for only the payments based on those changes.

5.5 Foreign Military Sales Transactions

See Volume 15, Chapter 3.
5.6 Altering a Certified Voucher

Altering a certified voucher invalidates the certification. A DO who determines that a certified payment voucher is improper must return it for correction and a new certification. However, post-payment printing and scanning of paid vouchers that were properly certified electronically do not invalidate the original certifications.

5.7 Certification and Accounting Data Translation

The translation of accounting data for a certified voucher is acceptable as long as the correct appropriation or funds involved aligns with the appropriation or funds cited on the legal obligation to make the payment (e.g., contract). The translation process must be auditable and deemed reliable to where the certified line of accounting can be mapped to the translated line of accounting. See Volume 1, Chapter 4, paragraph 2.7 for additional information regarding data translation. DOs and COs may rely on data received from reliable automated systems that have been certified as compliant with the FFMIA (see Volume 1, Chapter 3).

6.0 RANDOM REVIEW OF DISBURSEMENT VOUCHERS

6.1 Payment Review Officials

Payment review officials are not subject to pecuniary liability since they are not in accountable positions. State their responsibilities in their position descriptions and performance standards, or appoint them by means other than a DD 577.

6.2 Examination Requirements

6.2.1 General

6.2.1.1 Title 7, of the GAO Manual, which implements 31 U.S.C. § 3521(b)(1), requires pre-payment examination of payments over $2,500. For payments of $2,500 or less, statistical sampling procedures may be implemented in lieu of examining all payments (see paragraph 6.3). Various publications provide guidance on statistical sampling methods, pre-payment, and post-payment reviews. These include the report GAO/Accounting and Information Management Division 21.3.2, May 2000, Streamlining the Payment Process While Maintaining Effective Internal Control, Appendix C, Requirements for Effective Estimation and Remediation of Improper Payments, and the Office of Management and Budget Circular A-123, Management's Responsibility for Internal Control. GAO reports and publications provide examples of statistical sampling applications in the pre-payment and post-payment phases, but no single procedure is appropriate for every type of disbursing system.

6.2.1.2 The appropriateness of these reviews depends largely on the extent of automation of the system that computes and processes payments. Fully automated systems that can perform reviews of all records through extensive edit checks and balances before payment is made, replaces the need for manual invoice process and examination procedures.
6.2.2. **Pre-Payment Reviews**

6.2.2.1. Pre-payment reviews may occur any time before payment and are subject to management’s judgment of the most appropriate stage in the voucher-preparation process for their conduct. These reviews ensure that vouchers are substantiated by documentation for lawful and proper payment. Under manual processing systems, they include verification of accuracy of computation. These requirements include ensuring that:

6.2.2.1.1. Payments are allowed by law and regulation;

6.2.2.1.2. Payments are authorized and approved for payment;

6.2.2.1.3. Requests for payment are supported by basic documents;

6.2.2.1.4. Payee identification is correct;

6.2.2.1.5. Manual calculations are correct and data are input correctly to automated computation systems;

6.2.2.1.6. Proper accounting classifications are charged (e.g., supported by a proper obligating document);

6.2.2.1.7. Funds are available to support disbursements;

6.2.2.1.8. Any required special certificates or receipts are attached to the disbursement documents; and

6.2.2.1.9. Duplicate payments are prevented through proper manual or automated edits and checks.

6.2.2.2. Pre-payment review officials who determine that proposed or actual certified payments are of questionable legality, propriety, or correctness must send inquiries to the COs challenging the decision to certify these payments, and keep files of these inquiries or those received from other sources. Inquires must be resolved within 30 days.

6.2.3. **Post-Payment Reviews.** See Volume 10, Chapter 10.
6.3 Statistical Sampling Plans

6.3.1. DoD Components may use statistical sampling plans for vouchers not exceeding $2,500. Agencies must establish their own dollar limitations within that maximum based on cost/benefit analysis of their voucher examining operations. If a CO uses an approved pre-payment statistical sampling procedure and reviews only those vouchers selected in the sample as a basis for certification, he or she identifies the vouchers selected for review. If a DoD Component determines that an alternate voucher examining plan is required, it sends a written request through the Director, DFAS to the USD(C) for approval under subparagraph 6.3.3. The request must identify the reason for the alternate plan to include a description of the plan, alternate procedures for statistical sampling, and a business case that indicates savings without jeopardizing the Government’s interest.

6.3.2. Sampling plans must be statistically valid and adhere to technical guidelines in professional texts and publications (both Federal and non-Federal) on the subject. Include in the sampling plans the purpose, scope, frequency of the review, a definition of the population from which the sample will be selected, the sample size and element selection method, procedures to analyze results of the sampled records, and methods to document and report the results of the sample review. Sampling plans require review and approval (or in most cases, original preparation) by qualified statisticians before submission for final approval. Review and update them periodically to ensure they reflect the most recent occurrence rate trends and allow for population estimates within predetermined sampling probability and precision levels.

6.3.3. The Director, DFAS or designee approves statistical sampling plans for payment vouchers processed by DFAS and ensures implementation of these plans at locations for which DFAS is responsible. The USD(C) approves statistical sampling plans for other DoD Components whose officials ensure implementation of these plans.

7.0 PECUNIARY LIABILITY

7.1 Presumption of Negligence

COs and DOs, but not DAOs, are pecuniarily liable automatically when there is a fiscal irregularity based on the “presumption of negligence” under 28 U.S.C. § 2512 and 31 U.S.C. § 3527. A fiscal irregularity is either a physical loss of cash, vouchers, negotiable instruments, or supporting documents, or an erroneous (e.g., illegal, improper, or incorrect) payment. Physical losses generally apply only to DOs and their agents. To gain relief of liability, COs and DOs must prove that they were neither negligent nor the proximate cause of the irregularity. See Chapter 6, sections 6.0 and 7.0 for policy concerning relief and liability of accountable officers.

7.1.1. DOs. Under 31 U.S.C. § 3325, DOs are pecuniarily liable for payments not in accordance with the vouchers certified to them for payment, and for errors in their accounts. DOs who make payments in accordance with certifications of properly appointed COs may be relieved of their liability.
7.1.2. **COs.** Under 31 U.S.C. § 3528, COs are pecuniarily liable for payments resulting from improper certifications.

7.1.3. **DAOs.** DAOs are not subject to the presumption of negligence, but may be held pecuniarily liable under 10 U.S.C. § 2773a(c) for illegal, improper or incorrect payments resulting from information, data, or services they negligently provide to COs; and upon which the COs relied to certify payment vouchers. Any pecuniary liability of DAOs for losses to the U.S. resulting from illegal, improper, or incorrect payments may be either individual or joint and several with that of other officers or employees of the U.S. or members of the uniformed services who are also pecuniarily liable for those losses.

### 7.2 Erroneous Payments Under Random Sampling Procedures

Under *31 U.S.C. § 3521(c)* COs and DOs who pursue diligent collection action are not pecuniarily liable for payments on vouchers in a population of vouchers subject to sampling but not reviewed. See Chapter 6 in the case of a fraudulent or suspected fraudulent payment.
VOLUME 5, CHAPTER 6: “PHYSICAL LOSSES OF FUNDS, ERRONEOUS PAYMENTS, AND OVERAGES”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

PHYSICAL LOSSES OF FUNDS, ERRONEOUS PAYMENTS, AND OVERAGES

1.0 GENERAL

1.1 Overview

An accountable official is a member of the U.S. Armed Forces or a DoD civilian employee who is responsible for or has custody of government funds. Accountable officials include those defined in Chapter 5, section 3.0 as certifying officers and departmental accountable officials (DAO); and in Chapter 2 as disbursing officers (DOs), deputy DOs (DDOs), cashiers, imprest fund cashiers, change fund custodians, paying agents, and collection agents. Accountable officials are personally liable for the physical loss or improper payment of the funds for which they are accountable, unless granted relief. The decision by the Secretary of Defense to grant or deny relief is binding. The Secretary of Defense has delegated authority to the Director of the Defense Finance and Accounting Service (DFAS) to make the required determinations to grant or deny relief on all requests for relief of liability. The Director of DFAS has delegated this authority to the Director of Strategy, Policy and Requirements (DFAS-ZP).

1.2 Purpose

This chapter provides the guidance for the accountability, investigation, relief request, and funding for removal of physical losses. The chapter also provides guidance on granting or denying relief of liability, and an overview on overages of public funds. Additionally, the chapter provides the definition of physical losses, and the criteria for minor and major losses. Lastly, the chapter defines and provides examples of erroneous payments (illegal, incorrect, and improper) to include the discovery, investigation, loss of funds process, and settlement of erroneous payments.

1.3 Authoritative Guidance

All accountable officials are subject to the pecuniary liability standard under Title 31 of the United States Code (U.S.C.). Except for the DAO, the basic legal liability of an accountable official arises automatically by virtue of the loss, regardless of fault or negligence on the official’s part. Relief is a separate process that considers the lack of fault or negligence by the accountable official to the extent authorized by the following:

1.3.1. Title 31, U.S.C., section 3527, which provides general authority to relieve accountable officials and agents from liability due to physical losses;

1.3.2. Title 31, U.S.C., section 3528, which provides general authority to relieve certifying officials from liability due to erroneous payments; and/or

1.3.3. Title 10, U.S.C., section 2773a, which provides general authority to establish pecuniary liability for DAOs.
2.0 DEFINITIONS

2.1 Physical Losses of Funds

A physical loss of funds can be minor or major. A minor loss is a physical loss of less than $750 without evidence of theft or fraud within the disbursing office. A major loss must meet at least one of the following criteria:

2.1.1. Equal to or greater than $750;

2.1.2. Any loss of funds resulting from theft, regardless of the dollar amount; or

2.1.3. Any loss, regardless of the dollar amount, where there is evidence of fraud within the disbursing office (i.e. embezzlement or fraudulent acts by disbursing personnel, whether acting alone or in collusion with others). See Table 6-1 for examples of physical losses of funds.

2.2 Erroneous Payments

2.2.1. Erroneous payments include:

2.2.1.1. Any payment that should not have been made or that was made which results in an incorrect overpayment under statutory, contractual, administrative, or other legally applicable requirements; or

2.2.1.2. Any payment to an ineligible recipient or service, duplicate payment, payments for services not received, and any payment that does not account for credit for applicable discounts.

NOTE: This definition applies to accountable official liability. Improper payments under the Improper Payments Information Act differ in that they include both underpayments and overpayments. See Volume 4, Chapter 14, paragraph 2.1.

2.2.2. Examples of erroneous payments that require an investigation include:

2.2.2.1. Any payment in which the debt is delinquent for 180 days, or the loss cannot be fully recovered within the 2-year period from the time the erroneous payment was made, such as:

2.2.2.1.1. Overpayment to a payee;

2.2.2.1.2. Payment to the wrong payee;

2.2.2.1.3. Overdrafts of issued U.S. Treasury check; or

2.2.2.1.4. Negotiation of original and replacement U.S. Treasury checks;
2.2.2.2. Any payment based on fraudulent, forged, or altered documents prepared or presented by officials who were not under the direct cognizance or control of the DO; or

2.2.2.3. Payment in violation of a regulation.

2.2.3. Examples of erroneous payments that do not require an investigation include:

2.2.3.1. An erroneous payment that is not delinquent for 180 days, and can be recovered within the 2-year period from the time the erroneous payment was made;

2.2.3.2. An erroneous payment that is collectible through offset of military pay, civilian pay, retired pay, or contract debt;

2.2.3.3. A valid payment made in accordance with appropriate documentation, which through no fault of the certifying officer, becomes an overpayment, e.g.:

2.2.3.3.1. A member paid a reenlistment bonus and does not complete terms of the contract;

2.2.3.3.2. A deceased retiree who is overpaid because death notification was not provided; or

2.2.3.3.3. An overpayment on a travel advance;

2.2.3.4. A payment made based on documentation from an individual and certified to be true and correct (e.g., a payment made to the wrong bank account because the individual provided incorrect information); or

2.2.3.5. Any payment made based on vouchers not examined under an approved statistical sampling plan.

3.0 DISCOVERY OF PHYSICAL LOSS OR ERRONEOUS PAYMENT

Any person who believes that an official entrusted with public funds is misusing those funds, or who suspects an occurrence of a fraudulent erroneous payment, must notify the Commander having jurisdiction over the alleged offender within 24 hours of discovery. A physical loss of funds does not initially impact the DO’s Cash Treasury Account Symbol (TAS). The loss of funds is maintained as part of the DO’s accountability and does not affect that balance until recovery, recoupment, or relief of liability is granted. Sections 4.0 and 5.0 provide guidance on the responsibilities and actions required to process physical losses and erroneous payments.

4.0 PHYSICAL LOSSES

4.1 Responsibilities

4.1.1. **DO.** Upon notification of a possible loss, the DO must:
4.1.1. Verify that all transactions on the DoD (DD) Form 2657, Daily Statement of Accountability, and DD 2665, Daily Agent Accountability Summary, posted correctly;

4.1.1.2. Verify the accuracy of all totals from the date of the last balancing of the DD 2657 and the DD 2665 for each DDO, agent, or cashier;

4.1.1.3. Verify by actual count that the total of all cash and documents held as cash by the DO and all DDOs, agents, and cashiers are in agreement with the amount shown as on hand on the DD 2657 and DD 2665;

4.1.1.4. Report the loss in writing to the Commander if the loss is not resolved within 24 hours of discovery and is a major physical loss as defined in paragraph 2.1; and

4.1.1.5. Request the Commander to direct an immediate audit of all disbursing assets by a Cash Verification Team, as prescribed in Appendix A, to confirm that a loss has occurred.

4.1.2. Commander. Upon notification of a possible loss, the Commander must request the Cash Verification Team conduct an audit of the DO’s account. If the discrepancy is not resolved and qualifies as a major loss of funds as described in paragraph 2.1, report the loss to the DFAS Loss of Funds Adjudication Team within 24 hours. Send the report via email to the Disbursing Policy mailbox at dfas-in.disbursingpolicy@mail.mil or by mail to the Loss of Funds Adjudication Team, DFAS Accounting and Finance Policy Division, DFAS Indianapolis (DFAS-ZPTC), Location 220V, 8899 E. 56th Street, Indianapolis, IN 46249. When the Commander is in command of the DDO, agent, or cashier, a copy of the report must be provided to the DO. The report must include:

4.1.2.1. The specific type of loss; physical loss, erroneous payment, or fraudulent payment;

4.1.2.2. All known circumstances surrounding the alleged loss of funds;

4.1.2.3. The authorized amount of the imprest fund if the loss occurred in the imprest fund;

4.1.2.4. The date the irregularity occurred and/or was discovered;

4.1.2.5. The dollar amount of the loss;

4.1.2.6. The identity of the accountable official(s) by name, rank/grade, and accountable position (such as DO, DDO, agent, or cashier);

4.1.2.7. The date of the investigation or when it will convene;

4.1.2.8. The contact information of the Investigating Officer (IO); including name, email address, and phone number;
4.1.2.9. The completion date of the investigation or, if applicable, the estimated completion date; and

4.1.2.10. The status of any recovery action in progress or contemplated.

4.2 Accounting for Physical Losses of Funds

4.2.1. Recording a Physical Loss of Funds

4.2.1.1. Record All Physical Losses. All physical losses, major or minor, discovered in the DO’s account, including those incurred by deputies, agents, cashiers, imprest fund cashiers, and change fund custodians, must be recorded on the DD 2657 by using an Optional Form (OF) 1017-G, Journal Voucher, to document the repositioning or movement of money from one line to another. For example, if a cash count reveals U.S. currency on hand is short $100, prepare an OF 1017-G to document the loss. Continue to show all losses on the DD 2657 and the SF 1219 until the loss is recovered, recouped, or until relief of liability is granted.

NOTE: Foreign currency loss must be converted and recorded in U.S. Dollar equivalent using the exchange rate at the time that the loss occurred.

4.2.1.2. Cumulative Record of Physical Losses

4.2.1.2.1. Support the loss entered on the DD 2657 by annotating it on the DD 2667, Subsidiary Accountability Record. If more than one physical loss occurs during a single business day, use a separate line on the same form to account for each loss individually.

4.2.1.2.2. Complete the DD 2667.

4.2.1.2.3. Maintain separate DD 2667s for different DOs.

4.2.1.2.4. Maintain the DD 2667 on file as a subsidiary record supporting the DD 2657.

4.2.1.2.5. Forward the DD 2667 to DFAS-ZPTC within 5 calendar days after the end of each month. Send by email to the Disbursing Policy mailbox atdfas-in.disbursingpolicy@mail.mil or mail to DFAS-ZPTC.

4.2.1.3. Agent Losses. Physical losses of funds incurred by DDOs, disbursing agents, cashiers, paying agents, collection agents, imprest fund cashiers, or change fund custodians are physical losses within the official agent’s accountability documents. It is important to notify the DO of all physical losses as soon as possible. The DO then must reduce the DD 2657 for that particular agent. The DO must also record the loss on the cumulative DD 2667.

4.2.1.4. Change Fund or Imprest Fund Loss. The DO must record the amount of the loss on the DD 2667 and DD 2657.
4.2.1.5. **Counterfeit Currency Loss.** The DO must record the amount of the loss on the DD 2667 and DD 2657.

4.3 **Investigation**

An investigation is required for all physical losses of funds.

4.3.1. **Purpose of Investigation.** The purpose of the investigation is to review and document all facts leading up to and connecting with the loss, to include the:

4.3.1.1. Amount, date, time, and place of the loss;

4.3.1.2. Identification of accountable officials and others involved (name and rank);

4.3.1.3. Authenticity of documentary evidence and oral testimony;

4.3.1.4. Functional capacity of the accountable official incurring the loss and the physical location of this official, such as disbursing office and/or functional area;

4.3.1.5. Cause of loss; and

4.3.1.6. Adequacy of internal controls in place and effectively implemented.

**NOTE:** For standardized questions that the IO must use as a basis to address essential facts surrounding the loss and ensure completeness of the investigation, contact the DFAS Loss of Funds Adjudication Team (see 4.1.2.).

4.3.2. **Type of Losses.** The type of loss determines the type of investigation required.

4.3.2.1. **Minor Physical Losses**

4.3.2.1.1. **$300 or Less (No Fraud).** The DO or DDO (if the DO is not co-located with the DDO) will conduct the investigation and complete the written investigatory report. If the loss is attributable to the DO, the primary DDO will conduct the investigation along with the written investigatory report. Under no circumstances will the official incurring the loss prepare their own written investigatory report. In all cases, the written investigatory report must be completed and submitted to DFAS-ZPTC within 30 days from discovery of the loss.

4.3.2.1.2. **Over $300 (No Fraud).** The Commander must appoint an IO to conduct the investigation and complete the written investigatory report. The appointed official must be someone other than the DO or disbursing office personnel (e.g., a member of the Cash Verification Team). Furthermore, the appointed IO must have knowledge of disbursing office operations, especially knowledge of the required internal controls, pertinent laws, and applicable directives. In all cases, the written investigatory report must be completed and submitted to DFAS-ZPTC within 30 days from discovery of the loss through the Commander.
4.3.2.2. **Major Physical Losses.** An IO must be appointed to conduct a formal investigation when there is a major physical loss.

4.3.2.2.1. **Appointment Authority.** The following individuals have the authority to appoint an IO:

4.3.2.2.1.1. The Commander of the DO who incurred the loss;

4.3.2.2.1.2. For DFAS sites, the Director of the DO who incurred the loss;

4.3.2.2.1.3. When the accountable official and the DO are not in the same location, the Commander over the accountable official will appoint the IO. For example, the Commander of a disbursing agent located in Afghanistan would appoint an IO when the agent incurs a loss while the DO is located in Indianapolis; or

4.3.2.2.1.4. When the Commander is not authorized to convene an investigation, the Commander must request an investigation through the chain of command.

4.3.2.2.2. **Appointment/Order of IO.** The Commander must provide a copy of the official appointment notification to DFAS-ZPTC within 5 days of appointment. The Commander must include the following in the appointment order:

4.3.2.2.2.1. Name of the IO, telephone number, and email address;

4.3.2.2.2.2. Incident or occurrence that requires an investigation;

4.3.2.2.2.3. Citation of Volume 5 and any authorizing DoD Component regulation as the authority for the investigation;

4.3.2.2.2.4. The approximate time allowed for the investigation (the investigation must be completed and submitted to DFAS-ZPTC within 90 days from discovery of the loss); and

4.3.2.2.2.5. Instruction to include a copy of the appointment/order in the report of investigation (ROI) as an exhibit.

4.3.2.2.3. **Individuals Authorized to be IO(s).** Individuals authorized to be IO(s) include a commissioned officer (O-4 or above) or civilian employee who is senior in rank/grade to the person(s) under investigation and:

4.3.2.2.3.1. Does not have a vested interest in the outcome of the investigation;

4.3.2.2.3.2. Is not in the chain of command of the DO or accountable officials involved in the irregularity;
4.3.2.2.3.3. Is familiar with investigative techniques; and

4.3.2.2.3.4. Has knowledge of financial accounting controls and pertinent laws and directives. Only use Comptroller personnel when there is no feasible alternative to appoint an IO from another organizational element.

NOTE: The comptroller, staff judge advocate, or DFAS Office of General Counsel (DFAS-HG) must provide technical guidance to IOs who do not have extensive backgrounds in investigative or financial matters.

4.3.2.2.4. Guidance for IOs

4.3.2.2.4.1. Develop all information and documentation in connection with the loss so that higher authority may take proper action. This includes information regarding the procedures followed by all officials involved in the loss, as well as safeguards and controls instituted for the entire period in which the loss occurred.

4.3.2.2.4.2. Before interviewing the accountable official(s) for the first time, ensure that each official receives and reviews this chapter and Chapter 5, section 7.0 regarding liabilities and responsibilities of accountable officials and the authoritative guidance provided in paragraph 1.3.

4.3.2.2.4.3. Obtain statements from accountable official(s) and others involved with the loss. The IO may summarize or report the testimony verbatim. Whenever possible, ensure the witness reviews, attests, and signs the transcript or summary of testimony. If sworn testimony is not obtainable, the IO must submit a statement giving the substance of the interview and the reason for absence of attestation.

4.3.2.2.4.4. If the IO recommends denial of relief to the DO or any other accountable official(s) who are pecuniarily liable for the loss, provide a copy of the report to these officials.

4.3.2.2.4.5. Gather all records, documents, correspondence, photographs, and sworn affidavits relating to the loss. The IO may use evidence developed in investigations already conducted concerning the loss by other agencies (e.g., Federal Bureau of Investigation, U.S. Secret Service, or local authorities).

4.3.2.2.4.6. Make a determined effort to resolve or clarify all apparent discrepancies or contradictions in the evidence.

4.3.2.2.4.7. Report every 30 days on the status of the investigation. Send the report through the Commander to DFAS-ZPTC.

4.3.2.2.4.8. When extraordinary circumstances require an extension to complete the ROI, the IO may request an extension from the Commander. The Commander must notify DFAS-ZPTC of any authorized extensions.
4.3.2.2.5. Preparation of the ROI. The ROI must include the following elements.

4.3.2.2.5.1. Facts: The IO must gather all the facts of the loss by:

4.3.2.2.5.1.1. Identities of all accountable officials who are pecuniarily liable for the loss, the amount that each person is responsible for, and their involvement in the loss;

4.3.2.2.5.1.2. If any of the accountable officials involved in the loss are not physically located in the disbursing office, describe the structure of the chain of command of the activity in which the official was performing their disbursing functions. In addition, describe the financial services supplied by that official for the activity they serve;

4.3.2.2.5.1.3. Circumstances leading to and surrounding the loss, including the efforts undertaken to discover the cause of a loss that remains unexplained;

4.3.2.2.5.1.4. Description of the internal controls prescribed to prevent losses of the type experienced and the steps taken to implement those controls;

4.3.2.2.5.1.5. Other relevant information that would aid in understanding how the loss occurred and in evaluating whether relief is appropriate for the accountable officials involved;

4.3.2.2.5.1.6. Documentary evidence (such as statements, transcripts, correspondence, affidavits, investigative reports completed by other agencies, records, and photographs) as exhibits to the ROI; and/or

4.3.2.2.5.1.7. Information regarding collection activity and any possible offset relating to the loss.

4.3.2.2.5.2. Findings. The IO must make the following findings:

4.3.2.2.5.2.1. Whether there was a loss to the U.S. government and the amount of the loss;

4.3.2.2.5.2.2. Whether the loss occurred through the fault or negligence on the part of the accountable official;

4.3.2.2.5.2.3. Whether negligence, fraud, or theft was the proximate cause of the loss by an individual other than the accountable official(s);
4.3.2.2.5.2.4. The name of all official(s) involved and when the loss occurred; and

4.3.2.2.5.2.5. Whether the accountable official(s) was carrying out official duties when the loss or deficiency occurred.

NOTE: The IO must make any other findings considered necessary and appropriate. It is essential that all findings, especially those indicated in subparagraph 4.3.2.2.5.2, have supporting documentation. When applicable, reference the tab or page number of the supporting documentation after each related finding.

4.3.2.2.5.3. Recommendations. Based on the information gathered, the IO must make a recommendation on:

4.3.2.2.5.3.1. Whether the accountable official(s) should be relieved of pecuniary liability for the loss (separate recommendations are required for each accountable official);

4.3.2.2.5.3.2. Whether other person(s) should be held pecuniarily liable for the loss, in whole or in part;

4.3.2.2.5.3.3. Whether any corrective action is needed to improve controls or procedures; and/or

4.3.2.2.5.3.4. Any other recommendations that are appropriate considering the existing facts, circumstances, and conditions of the case.

4.3.2.2.5.4. Submission of ROI

4.3.2.2.5.4.1. Timeframe. Unless authorized for an extension, the IO must submit the ROI through the Commander (who appointed the IO) to DFAS-ZPTC within 90 days after discovering the loss.

4.3.2.2.5.4.2. Commander's Actions. Upon receiving the ROI from the IO, the Commander must:

4.3.2.2.5.4.2.1. Immediately review the ROI for compliance with requirements as indicated in subparagraph 4.3.2.2.5;

4.3.2.2.5.4.2.2. Determine if the ROI is complete, and if not, return it to the IO explaining the discrepancies and request further documentation or information. Notify DFAS-ZPTC if the ROI cannot be completed and submitted within 90 days from discovery of the loss;

4.3.2.2.5.4.2.3. Consider all the facts, findings, and recommendations;
4.3.2.5.4.2.4. Make additional findings and recommendations pertinent to the investigation;

4.3.2.5.4.2.5. Determine if sufficient evidence exists to support a recommendation for relief from liability or recommend denial of relief referencing all evidence supporting the denial recommendation for each accountable official involved;

4.3.2.5.4.2.6. Forward a copy of the ROI and all attachments to DFAS-ZPTC, unless the investigation is on hold for fraudulent or wrongful conduct (see note below subparagraph 4.3.2.5.4.2.10);

4.3.2.5.4.2.7. Forward a copy of the ROI to the Commander of the base, station, activity, ship, or unit where the accountable official(s) is located. For Army Finance Management Detachments, send a copy to the Finance Management Support Unit. It is the commander’s discretion whether to use the ROI for disciplinary or administrative actions;

4.3.2.5.4.2.8. Keep a copy of the ROI;

4.3.2.5.4.2.9. Submit any documentation and/or information requested by DFAS-ZPTC, due to insufficient ROI received; and

4.3.2.5.4.2.10. Forward any documentation and/or information to DFAS-ZPTC that become available after the ROI has been forwarded.

NOTE: If there is evidence of fraudulent or wrongful conduct, and the matter is under investigation by authorized law enforcement personnel, the investigative entities may request the Commander to withhold the report until completion of their investigation. If so, the Commander must continue to follow-up on the status of their investigation and advise DFAS-ZPTC of the status every 30 days. It is acceptable to add copies of the investigative reports as exhibits before forwarding the report through the chain of command to DFAS-ZPTC.

4.3.3. DFAS-ZPTC:

4.3.3.1. Review the ROI upon receipt;

4.3.3.2. If the ROI lacks sufficient information, or in the absence of compliance with the provisions for the findings and recommendations, DFAS-ZPTC may return the report for further investigation and fulfillment of the provisions as indicated in subparagraph 4.3.2.5.4.2.5; and

4.3.3.3. Forward the final decision to the appropriate individuals, and in those cases where individual(s) are held liable, inform them of their right to submit a rebuttal.
4.4 Funding for Removal of Physical Losses

In all cases, the ideal method for resolving a loss is recovery of the loss from the beneficiary. For example, 1) recovery of missing cash from the finder or, 2) collection from the accountable official.

4.4.1 Appropriated funds must be made available to remove the deficiency from the DO’s SF 1219 if the losses are not recovered. This includes instances when relief of liability has been denied and recoupment cannot be made from the accountable official or when relief of liability is granted to the accountable official.

4.4.1.1 DFAS Employee. If the accountable official responsible for the loss of funds was a DFAS employee or a military member assigned to DFAS when the loss occurred, DFAS must identify the necessary appropriation and funding to resolve the loss.

4.4.1.2 Other DoD Component Employees. If the accountable official responsible for the loss of funds was a military member or employee of another DoD Component when the loss occurred, that DoD Component must identify the necessary appropriation and funding to resolve the loss.

4.4.2 The DO must clear the loss of funds from the DD 2667 and DD 2657 (based on the instructions given by DFAS-ZPTC).

5.0 ERRONEOUS PAYMENTS (ILLEGAL, INCORRECT, AND IMPROPER)

5.1 Responsibilities

5.1.1 Fraudulent or Suspected Fraudulent Erroneous Payments

5.1.1.1 Commander. Upon notification of a fraudulent or suspected fraudulent erroneous payment, the commander must:

5.1.1.1.1 Notify DFAS-ZPTC within 24 hours of notification, through the chain of command, per subparagraph 4.1.2;

5.1.1.1.2 Appoint an IO to conduct a formal investigation. See subparagraph 4.3.2.2.2; and

5.1.1.1.3 Ensure the investigation is completed and forwarded to DFAS-ZPTC within 90 days from the appointment of the IO.

5.1.1.2 DO. Upon notification of a fraudulent or suspected fraudulent erroneous payment, the DO must:
5.1.1.2.1. Determine if the erroneous payment occurred due to fraudulent actions of accountable officials under the direct cognizance or control of the DO, and prepare a DD Form 1131, Cash Collection Voucher, transferring the amount of the fraudulent payment back into the appropriation from which the payment disbursed. The collection transaction is reported to Treasury via the Classification Transactions and Accountability (CTA), which will feed the Central Accounting Reporting System daily account statement showing an increase to DO Cash TAS and an increase to the program TAS on the collection voucher. In addition, increase DD 2657 if the loss is a predecessor loss. Record the loss on the DD 2667 as prescribed in subparagraph 4.2.1.2, if the erroneous payment occurred due to fraudulent actions of accountable officials under the direct cognizance or control of the DO;

5.1.1.2.2. Determine if the erroneous payment occurred due to fraudulent actions by individuals who were not under the direct cognizance or control of the DO; the payment(s) must remain charged to the appropriation originally charged.

5.1.2. Erroneous Payments – No Fraud

5.1.2.1. Certifying Officer: Upon notification of an erroneous payment, the certifying officer must:

5.1.2.1.1. Review the erroneous payment voucher and the supporting documentation;

5.1.2.1.2. Ensure collection action is taken against the recipient of the payment, as prescribed in Volume 16. This may require submission of the debt to the DO or other responsible area; and

5.1.2.1.3. Notify the Commander if the recipient of the erroneous payment does not voluntarily repay the amount owed and:

5.1.2.1.3.1. The debt is delinquent for 180 days; or

5.1.2.1.3.2. The full amount of the loss is not recovered within the 2-year period, which is calculated from the time the erroneous payment was made.

5.1.2.2. DO’s Responsibilities

5.1.2.2.1. The DO does not need to take any action if the erroneous payment was properly certified.

5.1.2.2.2. If the erroneous payment was not properly certified:

5.1.2.2.2.1. Report the loss to the Commander; and
5.1.2.2.2. Ensure collection action was taken against the recipient of the payment, as prescribed in Volume 16. This may require submission of the debt to another responsible area. If the erroneous payment is recouped from the recipient, collect the proceeds into the appropriation originally charged, unless the appropriation is canceled. If the appropriation is canceled, refer to Volume 4, Chapter 3, subparagraph 3.4.3 for disposition of the collection.

5.1.2.3. **Commander:** Upon notification of an erroneous payment, the commander must:

5.1.2.3.1. Determine whether a formal or an informal investigation is required;

5.1.2.3.2. Appoint an IO to conduct the appropriate investigation; and

5.1.2.3.3. Ensure the investigation is completed and submitted to DFAS-ZPTC.

5.2 Investigation of Erroneous Payments

5.2.1. **Formal Investigation Policy**

5.2.1.1. Formal investigations are required when:

5.2.1.1.1. Fraud is suspected on the part of the payee, disbursing office personnel, certifying officer, or any other accountable official; or

5.2.1.1.2. The Commander determines it to be necessary.

NOTE: Formal investigations for erroneous payments must follow the guidance outlined in paragraph 4.3.

5.2.1.2. The investigation must be submitted to DFAS-ZPTC through the Commander who appointed the IO within 90 days from the appointment of the IO.

5.2.2. **Informal Investigation Policy**

5.2.2.1. The IO must prepare investigatory comments.

5.2.2.2. The investigation must be submitted to DFAS-ZPTC within 60 days from the Commander’s notification of the erroneous payment.

5.3 Completion of Erroneous Payments Process

When feasible, all actions required to reach a determination of liability for a loss of funds due to an erroneous payment should be completed within 3 years after the date the SF 1219 is certified.
5.4 Settlement of Erroneous Payments

Generally, the DO will not carry an erroneous payment as a loss of funds on the SF 1219, since an appropriation was charged when the payment was disbursed. However, there are exceptions to this general rule. For example, an exception occurs when the Department of the Treasury issues check-issue overdrafts against a disbursing station symbol number or if an accountable official under the direct cognizance or control of the DO made a fraudulent payment.

5.4.1. If the erroneous payment is recovered from the recipient, the appropriation initially charged is credited the amount recouped or collected unless the appropriation is canceled. Refer to Volume 4, Chapter 3, subparagraph 3.4.3 for disposition of the collection of canceled appropriation.

5.4.2. If the erroneous payment cannot be recovered from the recipient and relief of liability has been denied, the loss must be collected from the DO, certifying officer, and/or accountable official(s) involved. Credit the proceeds from the collection to the appropriation originally charged, unless the appropriation is canceled. For disposition of the collection of a canceled appropriation, refer to Volume 4, Chapter 3, subparagraph 3.4.3.

5.4.3. The amount of the erroneous payment must remain charged to the appropriation that the payment originated from when:

5.4.3.1. Relief of liability is granted; or

5.4.3.2. Recovery attempts from the recipient are unsuccessful.

5.4.4. If an adjustment to the appropriation account to which the payment was charged is necessary, the amount of the erroneous payment must be charged as stated in 31 U.S.C. § 3527(d)(1).

5.5 Document Retention

The following documents and information are retained to ensure proper response to audits conducted by the Government Accountability Office:

5.5.1. Detailed statement of facts of the case, including the type of irregularity, date, amount, names and positions of the accountable official(s) involved;

5.5.2. Reference to pertinent supporting documents, such as pay records, contracts, and vouchers;

5.5.3. Description of how the irregularity occurred and how it affected the accountable official’s account;

5.5.4. Adequate description of procedural deficiencies, if known, that caused the irregularity and the corrective action taken or to be taken; and/or
5.5.5. Information on any recoupment already made or being considered.

NOTE: See subparagraph 4.1.2 for contact information for DFAS Loss of Funds Adjudication Team.

6.0 REQUEST FOR RELIEF

6.1 Request for Relief

Requests for relief must be in the form of a memorandum and submitted within 30 days after the investigation is completed. A copy of the IO’s report must be included as an attachment to the request for relief. Erroneous payments paid through the Treasury Direct Disbursing process follow the same process as erroneous payments paid through a DoD disbursing office. Accountable officials must submit their request for relief as follows.

6.1.1. DOs. Submit the request for relief through the Commander or DFAS site director to DFAS-ZPTC.

6.1.2. DOs Settling Accounts of Former DOs. Submit the request for relief on behalf of a former DO to DFAS-ZPTC.

6.1.3. DDOs, Disbursing Agents, Cashiers, Certifiers. Submit requests for relief through the DO responsible for the account to DFAS-ZPTC.

6.2 Evidence Required for Granting Relief

6.2.1. Burden of Proof. An accountable official is strictly liable for any erroneous payments or physical loss of funds placed in the official’s care, subject to relief of liability. Accordingly, if the Government can establish that a loss has occurred, strict liability applies to the accountable official involved with the loss. The accountable official bears the burden of proving that it is more likely than not that the official:

6.2.1.1. Was not negligent; or

6.2.1.2. The official’s fault or negligence is not the proximate cause of the loss.

6.2.2. Information Required. Generally, the findings of related court of inquiry, investigation, court-martial, or other proceedings (including endorsements) will provide the information required for the loss. When such information is not available, the following information must be supplied and considered in the request for relief and/or the forwarding endorsements. Failure to include all the information required could contribute to an unfavorable consideration of a request for relief. Include the following items:

6.2.2.1. The specific duty assignment of the accountable official when the loss occurred;
6.2.2. A statement showing when, how, and who discovered the loss;

6.2.2.3. A description of any actions taken to verify the loss and establish how the loss occurred;

6.2.2.4. A statement including the date of the last cash count and balancing prior to discovery of the loss;

6.2.2.5. A copy of the appropriate standard operating procedures (SOPs) in effect at the time the loss occurred. If no written procedures are available, provide a statement to explain the known and utilized procedures at the time the loss occurred;

6.2.2.6. A statement indicating pertinent regulations and instructions were followed or, if not followed, an explanation and justification for any omissions and deviations;

6.2.2.7. A statement regarding the official’s past involvement in any prior losses, if applicable;

6.2.2.8. A statement indicating whether the loss was caused by theft or some other criminal act; and

6.2.2.9. A description of the manner in which the DO is carrying the loss in their account, and the identity of that DO.

6.2.3. Forwarding Endorsements. Each addressee in the requestor’s chain of command (including the DO) must provide a forwarding endorsement that must include a specific opinion as to whether the loss occurred while the accountable official was in the line of duty and regarding fault or negligence. A specific recommendation regarding granting or denying relief is required, as a part of the forwarding endorsement.

6.3 Statutory Standards for Relief of a Physical Loss

The general authority to relieve accountable officials from liability is stipulated in 31 U.S.C. § 3527. Relief of liability may be granted when:

6.3.1. The Secretary of Defense determines that the official was carrying out official duties when the loss occurred;

6.3.2. The loss or deficiency was not the result of an illegal or incorrect payment; and

6.3.3. The loss or deficiency was not the result of fault or negligence by the official.

6.4 Statutory Standards for Relief of an Erroneous Payment

The general authority to relieve accountable officials from liability is stipulated in 31 U.S.C. § 3527(b)(1)(B), which incorporates by reference 31 U.S.C. § 3528(b)(1), as follows.
6.4.1. **DO**

6.4.1.1. The payment was not the result of bad faith or lack of reasonable care; and

6.4.1.2. The disbursing officials and the agency have made diligent collection efforts.

6.4.2. **Certifying Officer**

6.4.2.1. The certification was based on official records and the certifying officer did not know, and by reasonable diligence and inquiry could not have discovered, the correct information; or

6.4.2.2. The obligation was incurred in good faith, no law specifically prohibited the payment, the U.S. Government received value for the payment, and diligent collection efforts were made to recover the payment.

6.4.3. **DAO**. Pecuniary liability under this subsection will apply in the same manner and to the same extent as applies to an official accountable under 31 U.S.C., subtitle III.

**NOTE:** See subparagraph 4.1.2 for contact information for DFAS Loss of Funds Adjudication Team.

7.0 **DECISIONS ON LIABILITY**

7.1 **Relief Granted**

If granted relief, DFAS-ZP will provide a memorandum with instructions to remove the deficiency or authority to leave the payment charged to the original appropriation.

7.2 **Relief Denied**

If denied relief, DFAS-ZP will advise the accountable official(s) of the decision and of their right to submit a rebuttal. The rebuttal must be submitted within 30 days from the date of notification of the adverse determination to DFAS-ZPTC. Based on the additional information received, DFAS-ZPTC will make a recommendation to the Director, DFAS-ZP, through the DFAS-HG, whether to affirm or reverse the previous decision.

7.2.1. If the decision is reversed, the accountable official(s) will be advised accordingly, and the DO will be provided instructions for removal of the loss of funds or authority to leave the payment charged to the original appropriation.

7.2.2. If the decision stands, the Commander and/or DO will be advised to take immediate collection action against the accountable official(s). Cash recouped from a loss and retained for future operating use does not impact the DO cash TAS balance. Volume 16 provides guidance for completing collection of irregularities.
8.0 OVERAGES OF PUBLIC FUNDS

8.1 Overview

Overages are funds held in an amount greater than the amount shown to be on hand by the daily accountability records of the DO.

8.2 Recording Overages of Funds

Do not offset an overage of funds against a physical loss of funds unless the relation between the two is obvious (e.g., foreign currency on hand is short and U.S. currency on hand is over by equal U.S. equivalent amounts). Do not offset overages against shortages if the shortage and overage occur on different business days. An overage of funds must be collected into the DO’s accountability and reported by CTA transactions to Treasury’s Budget Clearing Account (Suspense), F3875, citing the collection Business Event Type Code (BETC) along with the DO Cash TAS/BETC. If the proper location of the overage cannot be determined, the overage must be transferred to the Department of Treasury’s Forfeiture of Unclaimed Money and Property, R1060, utilizing a CTA transaction. Track overages by recording each occurrence on a separate DD 2667, maintained specifically for overages.

NOTE: The DD 2667 is a stand-alone document for tracking overages. Start a new DD 2667 for overages at the beginning of each quarter.

8.3 Preparation of DD 2667 as a Record of Overages of Funds

List each overage occurring each day on the DD 2667.

8.4 Reporting Overages of Funds

Overages of funds that are $750 or more must be reported to the Commander. However, unless there is an indication of fraud or other criminal act, there is no requirement to report or investigate as in losses of funds. A copy of the DD 2667 must be retained with the original voucher transferring the funds to the R1060 account.

NOTE: See subparagraph 4.1.2 for contact information for DFAS Loss of Funds Adjudication Team.

CHAPTER 7

U.S. TREASURY CHECKS

1.0 GENERAL

1.1 Overview

Disbursing Officers (DOs) issue U.S. Department of the Treasury (Treasury) checks under applicable laws and regulations for military pay and allowances, civilian pay, settlement of travel claims, authorized advances to travelers and agents, exchanges-for-cash, and deposits-for-credit to the Treasury. Only multi-hued, standard size checks (7 3/8 inches in length and 3 1/4 inches in width) may be issues against the Treasury’s account. Per the Treasury Financial Manual (TFM), Volume 1, Part 4A, Chapter 4000, Section 4045 (1 TFM 4A-4045), Federal entities that issue Treasury checks will report daily through the Payment Information Repository (PIR) Standard Reporting Format. PIR files containing check payments will be consumed by both PIR and Treasury Check Information System (TCIS). All Treasury check disbursements must have a valid Treasury Account Symbol/Business Event Type Code (TAS/BETC) reported through PIR, which will feed the Central Accounting Reporting System (CARS) daily account statement.

1.2 Purpose

This chapter provides basic principles and requirements for procurement of Treasury checks, check types and features, security, storage, and signature media to include machine specifications of check-signing machines. It also provides information on the issuance of Treasury checks, exchange-for-cash checks, check issue discrepancies, spoiled and voided checks, check cancellation, and the necessity for timely and accurate reporting to Treasury.

1.3 Authoritative Guidance

2.0 POLICY

2.1 Drawing and Dating Checks

2.1.1. Drawing a Check. Inscribe checks drawn on the Treasury to the payee by name, or to a financial institution for credit to the account of the named payee, except for checks drawn as exchange-for-cash (see section 7.0). Never make a check payable to “Cash.”
2.1.2. **Dating and Mailing Checks.** DOs must not issue checks in payment of salaries before completion of the service for which the payment is being made or before the scheduled payday, unless authorized (e.g., advance pay). A DoD Component is authorized to mail checks to payees before a military or civilian payday to ensure payments are available when due. When mailing a check before payday, do not date it before the date of the scheduled payday. Agencies using this method of pay delivery must have internal controls that alert the DO when a payee becomes ineligible for scheduled pay (e.g., unauthorized absence or separation) and ensure that pay intercept procedures can be initiated.

2.1.3. **Legal Representatives**

2.1.3.1. **Legal Representative of Estate of Decedent.** A check may be drawn to the order of a legal representative of the estate of a deceased person (e.g., “John K. Smith, Executor of the estate of James R. Jones”). Do not make a check payable “to the estate of” a decedent or to a deceased person.

2.1.3.2. **Committee or Guardian.** A check may be drawn to the order of a legally appointed committee, guardian, or other legal representative of a mentally incompetent payee when specifically authorized (see Volumes 7A, Chapter 33; 7B, Chapter 16; and 8, Chapter 10).

2.1.3.3. **Power of Attorney.** The payee of a check may authorize another person to receive a Treasury check by execution of a specific power of attorney that clearly states the holder is entitled to receive the check on the payee’s behalf. The person receiving the check signs his or her own name on the voucher followed by the words “Attorney-in-Fact for” and the name of the person granting the power of attorney. The DO verifies the identity of the holder and keeps a copy of the power of attorney. Process payments made to the holder of a power of attorney that require “secret” or “confidential identity” using a cover voucher insert. Transmit a copy of the original voucher and a copy of the power of attorney to the supporting Defense Finance and Accounting Services (DFAS) site for proper handling and storage.

2.1.4. **Signing Blank Checks.** Signing blank checks is prohibited.

2.2 **Negotiability**

Effective October 1, 1989, Treasury checks are negotiable for 1 year from their issue dates. Checks presented for payment that are not negotiable must be verified for validity and replaced, if appropriate (see section 12.0).

2.3 **Evidence of Payment**

The issuance and mailing of a check to a creditor of the United States does not, by itself, constitute payment of a debt. A debt is not discharged until a creditor has received the amount of the debt in money or its equivalent in law. An acknowledgement of receipt of the check is also not evidence of payment. The endorsed and negotiated check is the receipt to the government.
2.4 Federal Nontax Payments

2.4.1. The *1 TFM 4A-2040* requires that all Federal nontax payments be made by Electronic Funds Transfer (EFT) unless a waiver applies.

2.4.2. No waivers are available for vendor payments; all must be made by EFT.

3.0 PROCUREMENT OF TREASURY CHECKS

3.1 Ordering

Order Treasury checks using the Bureau of the Fiscal Service (Fiscal Service) (*FS*) Form 2431, Appendix 1, U.S. Treasury Checks Order Form. Disbursing offices should order enough checks to last 1 year unless there is reason to request a supply for a longer or shorter period; cite this reason and the methodology used to determine the quantity of checks needed to last a year in the “Remarks” section of the form. Include in the check order the full line of accounting and the unit identification code. To ensure continuity of operations, DOs should not allow check stock to fall below a 6-month supply. Set reorder levels for when the check stock reaches the 9-month level. Send orders to:

DFAS - Indianapolis Center (DFAS – IN)
Enterprise Solutions and Standards Directorate
Tax and Disbursing Division (DFAS-IN/JJKFBCB)
8899 E. 56th Street
Indianapolis, IN 46249-2700
Email: dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil

As an exception, a DO at a newly established disbursing station symbol number (DSSN) should submit a check order at least 4 months before the planned commencement of disbursing operations. The DFAS-IN/JJKFBCB is the sole check-ordering agency for DoD activities. The DO must request cancellations of check orders in writing through DFAS-IN/JJKFBCB. There is no fee for canceling an order, but the contractor will be compensated if an order is canceled after check production operations have begun.

3.2 Check Types

3.2.1. Regular Issue Checks. Regular issue checks are standard checks with preprinted DSSNs, serial numbers, and magnetic ink character recognition (MICR) encoding.
3.2.2. **Unnumbered Checks.** Unnumbered checks are regular issue checks controlled by preprinted inventory control numbers (ICNs) rather than preprinted DSSNs, serial numbers, or MICR encoding, and are for use only by DFAS sites. Under 1 TFM 4-5045.15, systems that prepare these checks must have a post-print verification unit to read and verify certain critical data after the optical character reader-B (OCR-B) and MICR data are printed. These data elements are the OCR-B check symbol, serial number, dollar amount, and the entire MICR line. The system must internally calculate the check digits for the check symbol and serial number on the MICR line and verify correctness, compare the MICR data with the OCR-B data, and both the OCR-B and MICR data with the data from the input source. If any character fails to verify correctly, the check or checks must be rejected, marked “Void - Not Negotiable,” and then reprinted.

3.2.3. **Test Grid Checks.** Test grid checks provide the format of the check by grid lines to test or align automated check writing and bursting equipment. They are printed for government-wide use. Ignore the date and dollar boxes since they are not preprinted on checks. Test grid checks are not for issuance.

3.2.4. **Specimen Checks.** Specimen checks are identical to unnumbered checks except that they are overprinted with the words “SPECIMEN CHECK – NOT NEGOTIABLE” in black ink in a type size of at least 18 points in the signature space, with an ICN Alpha prefix of “X” in the numbering sequence. Safeguard specimen checks the same as blank checks. In the absence of a specimen check, use a blank check marked “Void - Not Negotiable, No Check Issued Under this Number,” if available; otherwise, use a piece of paper or card of check size 7 3/8 inches in length and 3 1/4 inches in width.

3.2.5. **Blank Check Formats.** See 1 TFM 4-5030.20.

3.3 **Check Features**

3.3.1. **Pre-Encoded Magnetic Ink Characters.** Certain information is encoded in MICR format along the bottom of the check. The MICR area extends across the entire length of the check from positions 14 to 54, 9/16 inches from the bottom edge of the check. The MICR line consists of a 9-digit check serial number in positions 23 through 31, a 9-digit routing transit number in positions 34 through 42, a 5-digit check symbol number in positions 49 through 53, and the appropriate MICR symbols citing preprinted symbol and serial numbers.

3.3.2. **Check Serial Numbers.** When all serial numbers of a DSSN have been used, Treasury’s Fiscal Service will assign a new DSSN for the next supply of checks. Accordingly, as serial numbers of checks issued approach 99,999,999, the DO should notify the National Payment Integrity and Resolution Center (NPIRC), through DFAS-IN/JFKCB, to facilitate assigning a new DSSN before the next supply of blank checks is ordered. In this instance, the DO should allow 30 days in addition to the time normally required to print and deliver the checks for the proof to be changed.
3.3.3. **Check Numbering.** Initial orders for serially-numbered checks must specify the numbers begin with 00001000 and end in xxxxx999. Serial numbers on subsequent orders must follow in exact sequence. On check formats K and M, agencies may order additional printing and/or numbering on the check stub. See [1 TFM 4-5030.30](#).

*3.4 Emergency Checks*

Under emergencies only, disbursing offices may use their print systems to produce pre-numbered and MICR-encoded check stock for use by other disbursing offices within that federal entity. Disbursing offices must not use the emergency check stock system to avoid ordering checks through normal channels. See [1 TFM 4-5030.60](#).

3.5 **Receipt of Treasury Checks**

3.5.1. **Receipt.** Upon receipt of a check shipment, and based on a representative sample, the DO or designee verifies that all checks have been received, examines the accuracy of the printing, and verifies the check symbol/serial numbers in the upper right corner of the checks and in the MICR field. If shipment is by means other than registered first class mail, the vendor mails an “Advice of Shipment” form with the shipment. After receipt and verification of the check order, sign the form, and send it to DFAS-IN/JFKCB.

3.5.2. **Warranty.** The vendor provides a 120-day warranty on checks it produces, beginning with the day the checks are delivered to the user. The office that receives the checks is responsible to determine any obvious defects or missing checks before the warranty period expires. Otherwise, the vendor may not be liable for making replacements.

3.5.3. **Defective Check Shipments**

3.5.3.1. If checks are missing from the shipment, or check stock is in some other way defective and replacement is warranted, contact DFAS-IN/JFKCB. If checks are damaged upon receipt, the DO should contact the trucking company; if checks were sent by registered mail, contact the U.S. Postal Service (USPS) to initiate a claim for damages.

3.5.3.2. If a check shipment is received that contains more than one check with the same check serial number, in addition to the notification to DFAS-IN/JFKCB, the DO must destroy each check bearing a duplicate number. Since the remaining checks bearing these same serial numbers may be issued in the normal manner, do not report check serial numbers of the duplicate checks as zero dollar amounts in the check issue report. Mark the checks bearing the duplicate numbers “Void - Not Negotiable” and destroy them locally within 30 days.

3.5.3.3. If checks are discovered missing in the receipt verification process, or at any time thereafter, notify both DFAS-IN/JFKCB and the nearest DoD Component investigative service for referral and liaison with the U.S. Secret Service (USSS).

3.5.3.4. If checks are received that are intended for another disbursing office, immediately contact DFAS-IN/JFKCB for instructions regarding the shipment.
3.6 Transfers Between DOs

Count checks transferred between DOs as a part of the relief from disbursing duty process by both the transferring and the receiving parties when they are not in the original packages (see Chapter 2, subparagraph 4.6.1.3).

3.7 Security, Storage, and Issuance of Blank Checks

3.7.1. Store blank Treasury checks in a secure container (see Chapter 3, paragraph 3.4). Keep them in the DO’s or deputy DO’s (DDO) safe or under lock and key. The DO or designee ensures that the condition of storage prevents any deterioration of the surface tint and design of the check, which are sensitive to moisture, light, and heat. The DO or designee may accept checks that bear printing of a satisfactory color and strength and, if subsequent deterioration occurs, obtain a replacement supply. Only one individual should be given primary responsibility for maintaining the check stock and related control records. Access by others should be limited to occasions when the designated custodian is absent.

3.7.2. The DO or designee maintains control of the check stock and is accountable for it at all times. In cases of joint custody, the DO or designee ensures that no break in accountability occurs, to provide for access to the check stock during periods of brief or unexpected absence of the single individual who exercises normal day-to-day responsibility for the check stock.

3.7.2.1. A DO or designee maintains a blank check control log for each series of checks used to maintain a perpetual inventory of checks on hand and control their release. The DO or designee must examine the blank check control log daily to ensure that all checks drawn and checks returned unused are accounted for and that no checks have been removed without authority.

3.7.2.2. Using the prescribed blank check control log:

3.7.2.2.1. The DO or designee issues blank checks to check writers from the check stock in blocks of appropriate size by serial numbers and monitors the return of blank, voided, or spoiled checks to the vault. The DO or designee also uses the control log to control issuance and return of checks between the DO and sites external to the disbursing office that prepare checks;

3.7.2.2.2. The DO or designee must obtain receipts for checks issued. The designee in charge of the working checks must keep a record of checks issued daily to each clerk, examine daily the record of checks drawn and returned unused by the clerks to account for checks issued, and ensure that no checks are removed without authority; and
3.7.2.2.3. The DO or designee must inventory the check stock not less than once every 90 days. Any open container must be inventoried by an individual count of the checks contained therein. Open all damaged cartons of checks, or those bearing evidence of tampering, and individually count the checks. Keep a record of the inventory on hand in the disbursing office and provide it to the cash verification team for attachment to the quarterly cash verification report (see Appendix A).

3.7.2.3. When blank checks are lost or stolen;

3.7.2.3.1. The DO or designee immediately notifies the Commander, the nearest office of the USSS by email or telephone, and Fiscal Service at telephone number (304) 480-7777. Confirm the notification with a letter to the Fiscal Service’s Physical Security Branch, 6505 Belcrest Road, Suite 613, Hyattsville, MD 20782, with copies to the USSS, appropriate DoD Component investigative service, DFAS-IN/JJFKCB, and appropriate local banks. Include the DSSN, ICNs or serial numbers of the checks involved, a statement giving complete information concerning the loss or theft, and the date the loss was referred to the USSS for investigation; and

3.7.2.3.2. If the loss involves a range of consecutive serially numbered checks, only the beginning and ending serial numbers of the range are required. Void all checks discovered to be missing, lost, or stolen before issuance, and report the circumstances following ITFM 4-5040.20.

4.0 ISSUANCE OF TREASURY CHECKS

4.1 Check Preparation

4.1.1. Check Issue. Issue checks in strict numeric sequence within each series. The information essential to a check includes place and date of issue, DSSN, serial number, payee, amount, signature of drawer, designation of title, and other identifying information. Do not print legends such as “Salaries and Expenses” or “Drawn for Above Object” on the face of a check. Check explanations (e.g., exchange-for-cash or salary) and other special information unique to each disbursing activity may be entered at the bottom of the check to the left of the signature area. Keep extraneous data to a minimum. Spaces allotted on the printed check form for specific information are only for their intended purposes. Do not leave any spaces unfilled in a manner that would allow or facilitate alterations and additions that could lead to forgery or fraud.

4.1.2. Check Completion. A completed check must have an orderly appearance and good legibility for accurate reading in rapid handling. Avoid overprinting, intersecting, and crowding. No check may be issued for more than $99,999,999.99. In instances when the total payment exceeds that amount, issue two or more checks that total the payment required. No deviation in the check writing procedures is permitted unless authority is first obtained from DFAS-IN/JJFKCB. See ITFM 4-5000.
4.2 Check Print Requirements

4.2.1. **Data on Checks.** Data printed or typewritten on checks will be permanent and not affected by erasure, smudging, moisture, handling, the passage of time, or by other methods that might intentionally or unintentionally be used to remove or alter the printing without affecting the check itself.

4.2.1.1. Impact printers may be used. Laser type printers where the toner fuses the print into the check may be used. Do not use laser type printers that only lay an image on the surface of the paper. Do not use correctable ribbons for manual preparation of checks, as they lack the permanence required to protect against undetectable alteration.

4.2.1.2. The physical characteristics and layout of the blank check determine the correct position of the date, amount, payee name, and DO’s signature. Avoid deviations from the normal positioning of this information. To standardize printing and facilitate accuracy verification, inscribe words on checks in all capital letters. Omit punctuation except, commas used in addresses and to set off names of two or more payees.

4.2.2. **Pay to the Order of.** Inscribe the payee’s name on a check to ensure positive identification.

4.2.2.1. To ensure correct endorsement, and for other reasons established by custom, the payee’s surname should appear last; the correct order is first name, middle name or initial, and last name. Where the payee has an often used surname (e.g., “R T Jones” or “J G Smith”), the use of initials only, instead of the full given name, is inadequate to provide positive identification of the rightful payee. An initial in lieu of a first name is permissible only in cases where the payee’s legal given names consist of initials only. In this case, show the words “Initials Only” after the initials. In instances where the length of the surname would leave insufficient space for the full first name, or where the check writing system makes the use of a first name impractical, show other positive identifying data, (e.g., the payee’s address on the check).

4.2.2.2. When entering a payee’s SSN on the check, inscribe it in a location where it will not be visible in the envelope window if the check is mailed. When checks are to be mailed, exercise care to assure that the full and complete address of the payee is entered on the checks or envelopes, including rural route numbers, box numbers, house numbers, zip codes, and any other information needed for correct delivery.

4.2.3. **Date.** Print the date on the upper right portion of the check, either above or below the check number. Check signers equipped with date bands may be used as long as the location of the stamped date does not interfere with preprinted data or other data to be printed or typed on the check.
4.2.4. **Numeric Dollar Amount.** Print the numeric dollar amount in the upper right quarter section of the check, above the signature of the DO and below the DSSN, in horizontal alignment with the name of the payee or the amount in the body. Completely fill the allotted area with the money amount, preceded by a dollar sign, (e.g., $****123.45). Leave no space unfilled that otherwise might be susceptible to use for fraudulent insertion. To reduce opportunities for amount alterations, use neither zeroes as fill-in characters preceding the money amount nor commas in the money amount.

4.2.5. **Written Dollar Amount.** Printing the amount in the body of a check in words offers greater protection against the alteration of amounts. If a disbursing activity determines that substantial savings in the cost of issuing checks would result or that space is limited, it may use figures only, without any spacing within the amount, in one of these formats: $50and75cents, $50and75/100, or $50.75.

4.2.6. **Other Special Information.** Print special information (e.g., distribution code, computer or typewritten check serial number, or explanations for check issuance) at the bottom of the check to the left of the signature area. When checks are drawn for public vouchers or payroll payments, the DO, at his or her option, may insert the disbursing office voucher number or, if applicable, the bureau voucher number.

4.2.7. **Drawer’s Signature.** Each check issued must bear either the DO’s manual or approved facsimile signature, or the manual signature of a DDO-appointed following Chapter 2, paragraph 5.2. Manual signatures should generally agree with specimens previously submitted to DFAS-IN/JJKCB. Checks drawn by a DDO are signed below the printed, typed, or stamped title of the DO for whom he or she is acting, as follows:

```
Disbursing Officer
By ____________________, Deputy
(Deputy DO’s Signature)
```

Use permanent dark blue, blue-black, or black ink for signatures on checks (whether manual or by facsimile signature). The ink should not be subject to fading and not readily soluble in water.

4.3 **Erasures and Alterations**

DOs must not release checks with erasures, alterations, overprinting, or imperfect figures or letters. Spoil or void such checks and issue replacements (see section 9.0).
4.4 Record of Checks Issued

Each DO must maintain a record of checks issued by their DSSN. The record must contain at least these data elements: payee, amount, DSSN, check serial number, and date of the check. Other information as to the purpose for which the check was issued, document number, voucher number, and local identification code or number is optional and subject to the discretion of the issuing DO. The record may be kept on paper or electronic medium designed for data processing use.

4.5 Supporting Documents

Attach documents and payroll vouchers used to support the record of checks issued to the original vouchers submitted to the supporting DFAS site. Do not transmit them to the Treasury with the check issue reports. Send requests for the Defense Check Reconciliation Module (DCRM) Users' Manual to dfas.dscmc.zte.mbx.cco-dcrm@mail.mil. Include all the necessary data for Treasury’s reporting purposes in the electronic flat file.

5.0 CHECK-SIGNING MACHINES

5.1 Machine Specifications

Select check-signing machines that meet Treasury regulations and standards (see TFM 4-5045.20). Impact check signers using rubber signature dye, or approved laser check printers containing digitized signatures, may be used. The machines should have the following features:

5.1.1. A dating device capable of placing the date either immediately above or to the right of the words "UNITED STATES." It is preferable to have the signature and date imprinted in a single operation; if the check writing equipment also imprints the date, the check-signing machine does not need to have this capability;

5.1.2. A mechanism capable of processing paper checks. Offices issuing checks with detachable stubs ensure that the mechanism’s feeding device can handle this type of check; and

5.1.3. A key-controlled DO signature feature or a removable computer chip containing the digitized signature for laser check printers with digitized facsimile signature capability. Keep the key and/or the chip controlling the signature capability in a locked safe or vault or under other equally effective safeguards when not in use.
5.2 Signature Media

5.2.1 Requisition

5.2.1.1 Request for Procurement. Upon receipt of the specimen signatures, the outgoing/relieved DO immediately prepares and forwards a request for procurement to DFAS-IN/JJFKCB for approval and forwarding to the DFAS/ZTE. DFAS-IN/JJFKCB ensures sequential numbering of the medium. The purchase order must include the statement:

“Signature plates for impact type check signers are rubber stamps containing the prescribed facsimile signature of the DO. Digitized signature media are normally Dual In-Line or Single In-Line Memory Module computer chips or computer diskettes containing the DO’s signature that is loaded to the laser printer check-signing software.”

Also, include the following information:

5.2.1.1.1 The type, manufacturer’s name, model, and serial number of the check-signing machine;

5.2.1.1.2 Whether the signature plate or digitized signature medium is for a machine currently in use;

5.2.1.1.3 If the plate or digitized signature medium is to be used on a new and undelivered machine, refer to the procurement papers for the machine including the manufacturer, type, and model; and

5.2.1.1.4 The plate number and the name of the DO.

5.2.1.2 Numbering. Treasury regulations require that the signature media of each DO be numbered in sequence in the lower left corner of the border beginning with the number one. Include on each order the next sequential number for the affected DO.

5.2.1.3 Multiple Media. Normally, a DO and authorized DDOs use only one signature medium. Multiple signature media may be obtained only upon approval of DFAS-IN/JJFKCB. Requests for additional media must include justification of the need for more than one medium. If the check-signing machine uses one set of two plates for signing, additional media may be obtained only upon approval of DFAS-IN/JJFKCB.

5.2.2 Format and Quality of Impression. DFAS-IN/JJFKCB will not accept facsimile signatures that do not meet required standards. Design facsimile signature media so that the frame or border which encloses the facsimile signature is a single wavy line that contains no identifying characteristics. Characterize the impression of the signature with sharp lines, a continuous and homogeneous deposit of ink, absence of filling, and absence of pronounced ribbon pattern.
5.2.3. **Approval.** Upon receipt of the signature media, the DO whose signature is reproduced runs 14 specimens of each facsimile signature, certifies two of the copies as true facsimiles, and mails all 14 copies to DFAS-IN/JFKCB with a memorandum requesting approval of the facsimile to sign checks. The reply of approval authorizes use of the check-signing machine. If the specimens do not match, or the medium does not meet required standards, DFAS IN/JFKCB advises DFAS-IN/ZTA and requests correction. Do not sign checks by facsimile signature before receipt of DFAS-IN/JFKCB approval.

5.2.4. **Custody.** The DO establishes and implements controls necessary to prevent unauthorized use of signature media. Maintain custody receipts for all signature media held by authorized deputies, and a record of each run of checks through the check signer, and reconcile this report with the report of checks issued. When not in use, keep signature media in an approved safe or vault. If the signature media are not removable from the check-signing machine, keep the keys to the machine in an approved safe or vault.

5.2.5. **Use.** Check signing by signature media should be performed by only the DO or designated DDOs. When considered necessary for efficient operation of the disbursing office, the DO may authorize (in writing) the holder of a specified position other than a DDO to perform this function. Do not appoint individuals as DDOs solely to sign checks by signature media.

5.2.6. **Destruction**

5.2.6.1. **Signature Medium.** If a signature medium is to be withdrawn from service (e.g., not to be used again or DO retiring from service) or is unserviceable, destroy it locally. This destruction must be by someone other than the DO and be witnessed by two individuals equal to or senior in rank to the DO.

5.2.6.1.1. Before destruction, the DO verifies the signature plate number or serial number of the digitized signature medium, and witnesses the information on the certificate of destruction.

5.2.6.1.2. Identify name, title, and grade or rank of the DO; complete mailing address of the disbursing station; date and method of destruction; DSSN; typed name, title, and grade or rank of the witnesses; the DO's signature; and a statement as to whether or not the digitized signature medium had to be loaded to a printer or check signer software.

5.2.6.1.3. **When** a signature plate is destroyed, include in the certificate of destruction the specific plate number and an inked impression of the plate.
5.2.6.2. Digitized Medium. If a digitized medium containing the DO’s signature is destroyed, and that signature had been loaded to a printer or check signer software, the DO verifies that the signature has been permanently removed from the printer or check signer software. This destruction must be by someone other than the DO and be witnessed by two individuals equal to or senior in rank to the DO. The DO signs the certificate of destruction only after the actual destruction of the signature medium. Immediately upon destruction, the certificate identifying the specific plate and date of destruction must be given to the DO and the federal entity official responsible for maintaining specimen signature files. Follow applicable federal and industry information technology regulatory requirements and standards when destroying an electronic file of a facsimile signature. See 1 TFM 4-5025.20.

6.0 PROMPT DELIVERY OF CHECKS

6.1 Delivery

Once prepared, deliver checks promptly to payees. The DoD requires participation in the direct deposit program for all newly enlisted, reenlisted, appointed (commissioned), or retired military personnel and all newly hired civilian personnel. Title 31, U.S.C. § 3332 requires that contractors be paid by EFT.

6.2 Safeguarding and Handling

6.2.1. Properly safeguard checks, handling them as few times and by as few people as practical.

6.2.2. Ensure proper custody, signing, and delivery of checks. If checks are handed to the payees, require that payees identify themselves. Utilize the payee identification process discussed in Chapter 9, paragraph 4.4.

6.2.3. Promptly return to the disbursing office checks not delivered within the time specified by the DO.

6.2.4. Keep checks in a safe, vault, or locked fireproof cabinet pending distribution or return to the DO.

6.2.5. Designate personnel engaged in pay delivery activities in writing and supervise them to help prevent any unauthorized, fraudulent, or other irregular activities.
6.3 Delivery by Mail

The normal method of check delivery is by mail through the USPS to payees’ residential mailing addresses or post office boxes. At overseas activities, payees’ organizational addresses are considered their residential mailing addresses; organizational addresses are otherwise not valid. When check delivery by mail is impractical, commanders or their designees may provide specific locations where payees may receive their checks. If checks are mailed to specific locations for delivery, the DO appoints a person in writing at each location to deliver the checks as a designated third party (see paragraph 6.5).

6.4 Outside the Continental United States (OCONUS)

6.4.1 Restrictions. Under Title 31, Code of Federal Regulations (CFR), 211.1 (31 CFR § 211.1), the Secretary of the Treasury prohibits agencies from sending checks to the Republic of Cuba (except to the Naval Base, Guantanamo Bay) and the Democratic People’s Republic of Korea (North Korea). DOs instead withhold payment and establish the liability on their books. Go to the Treasury’s Office of Foreign Assets Control website for a complete listing of designated nationals and blocked persons.

6.4.2 Exceptions. The restrictions in subparagraph 6.4.1 do not apply to checks payable to foreign governments, issued to pay salaries or wages, or for goods or services purchased by the U.S. Government. See 31 CFR § 211.3.

6.4.3 Claims for the Release of Withheld Checks or Proceeds. The agency originally responsible for authorizing the issuance of proceeds processes claims to release them (see 31 CFR § 211.2). If an agency withholding payment receives a valid claim, it issues a check and decreases the related liability. If the proceeds of withheld checks were on deposit with the Fiscal Service before April 1976, and are still in deposit fund account 20X6048 (Proceeds of Withheld Foreign Checks), submit requests for payment with an appropriate recommendation to the U.S. Department of Treasury, Fiscal Service, Budget Reports Division, Governmentwide Accounting, 3201 Pennsy Drive, Building E, Landover, MD 20785. The telephone number is (202) 874-5202.

6.5 Delivery by Designated Third Parties

Personal delivery of multiple checks may be impractical for the DO, or it may not be expedient to mail them to addresses of record. Under such circumstances, and with the guidance for delivery of checks noted in paragraph 6.2, the DO may deliver or mail checks to a designated third party for distribution. A third party is any individual authorized to distribute a quantity or bulk shipment of checks to payees. A person who maintains pay accounts or prepares checks is not authorized to distribute checks.
6.5.1. **Appointment/Termination of Designated Third Parties.** A DO may appoint individuals to serve as third parties for bulk check delivery. A FS *Form 210DA*, Designation for Agent to Receive and Deliver Checks, is available for this purpose. A DO may appoint one or more alternates to prevent distribution delays in the absence of the designee. Alternates may also assist in check distribution when conditions warrant. The DO ensures revocation of appointments upon appointee transfer, when bulk delivery is no longer needed, or as other circumstances warrant. Appointments by memorandum must include:

6.5.1.1. The name and title of the appointee,

6.5.1.2. The name and location of the DO,

6.5.1.3. The applicable DSSN(s),

6.5.1.4. The date of the appointment, and

6.5.1.5. A description of the types of checks to be delivered.

6.5.2. **Transporting Checks to Designated Third Parties.** Package bulk shipments of prepared checks separately from other correspondence and send them by registered mail. Send bulk shipments for a unit or group of units to a third party for distribution or delivery to payees, or reship them to another third party for delivery where the military unit is located. Include the checks, transmittal letter, and documentation needed for the specific payments.

6.5.3. **Release of Checks to Other Than Payee.** Designated third parties may not release checks to anyone other than designated payees. When the payees are absent at the time of delivery, see subparagraph 6.5.5 for handling checks.

6.5.4. **Judge Advocate or Investigative Agent Third Parties.** When advance payments are issued for witnesses subpoenaed for trial, a representative from a DoD Component investigative agency or a judge advocate charged with serving the subpoena delivers the checks when the payees are absent at the time of delivery.

6.5.5. **Third Party Disposition of Undelivered Checks.** Unless otherwise directed, return checks for payees not present to the DO before the close of business that day. Inform payees who were absent, to call the disbursing office to receive them. If locked fireproof file cabinets or safes are available, the DO may authorize the designated third party to hold undelivered checks for a specified short period. When payees are on extended periods of leave or absence, return their checks to the DO for disposition. Return checks found to be in error to the DO. The DO issues a new check to the payee after appropriate corrective action.
7.0 EXCHANGE-FOR-CASH CHECKS

7.1 Report

All exchange-for-cash checks must be reported through PIR citing the DO Cash TAS and the proper BETC code. Spoiled exchange-for-cash checks that have not been reported to Treasury are not impacted by daily reporting and must follow the guidance listed in paragraph 9.1. Spoiled checks that have been reported to Treasury must be resolved by one of the following methods.

7.1.1. Accommodations. Accommodation exchange-for-cash checks are allowed only when satisfactory banking facilities do not exist and are typically only OCONUS. In OCONUS areas and for ships afloat, a commander may authorize the DO to cash negotiable instruments (see Chapter 4, section 2.0). These checks may be prepared and issued by DOs for official purposes to a DDO, agent, or cashier as an advance of cash; to the USPS for remitting collections for the sale of postal money orders; or to the Western Union for remitting collections for personal messages of military personnel transmitted over DoD communications facilities to points inside the continental United States (CONUS).

7.1.2. Advance Cash. These checks are issued by the DO to advance cash to a DDO, agent, or cashier. Checks issued as advances must be endorsed to the order of the bank or other institution furnishing the cash, or when cashed by another DO, to that officer by title and activity rather than by name as, “Pay to the order of the Disbursing Officer (name of ship, station, activity, or unit).” Make checks issued to remit collections for the sale of postal money orders or personal messages payable to the DO, USPS, or Western Union, as appropriate.

7.1.3. Check Cancellation. See paragraph 10.5 for guidance on disposition of canceled available checks. Deposit exchange-for-cash checks in Over the Counter Channel Application (OTCnet) utilizing the DO Cash TAS.

7.1.4. Unavailable Check Cancellation (UCC). Exchange-for-cash checks that are lost, stolen, or destroyed should follow the guidance in paragraph 7.5. Enter a Standard Form (SF) 1184, UCC, utilizing the DCRM’s UCC subsystem with stop reason code “D” (For stop reason codes see 1 TFM 4-7055.20c, Appendix 1) and, upon receipt, process a Classification Transactions and Accountability (CTA) transaction reducing both the budget clearing account **F3880 (UCC and Overpayments, Suspense) and the DO cash account.

7.2 Preparation and Handling

Do not show the name of the remitter and identifying references to invoices on exchange-for-cash checks. DOs may draw these checks payable to themselves, a DDO, or an agent for purposes of obtaining operating cash. When authorized in writing by the DO, for purposes of obtaining operating cash, DDOs may draw these checks payable to themselves.
7.3  Cash Belonging to Deceased or Missing Persons

7.3.1. Died or Missing. Exchange cash found in the personal effects of a person who has died or is missing in action for a Treasury check. Make the Treasury check payable to the payee designated by the officer having custody of the personal effects. State the purpose for which the check is drawn as “Exchange-for-cash; personal effects of (name, rank or rate, file or service number).” Draw a separate check for safekeeping deposits of each person (see Chapter 16, paragraph 3.5).

7.3.2. Unknown Whereabouts. Collect cash found in the personal effects of a person whose whereabouts are unknown, including absentees and deserters, into a deposit fund account. Funds that have been held in a deposit fund for more than 1 year can be transferred to account 20X6133 (Payment of Unclaimed Moneys), or into account **R1060 (Forfeitures of Unclaimed Money and Property). Make a separate collection for safekeeping deposits of each person.

7.4  Exchange-for-Cash Checks Returned as Not Required

Do not cancel exchange-for-cash checks issued for advances to DDOs, agents, and/or cashiers and returned to the DO as “not required.” The payee’s endorsement on the check is not required. The DO endorses the check and deposits it as prescribed in Chapter 11, section 8.3. DDOs cannot accept the return of exchange-for-cash checks from any payee other than a DDO, agent, or cashier. Other exchange-for-cash checks are issued to the purchaser and must be negotiated by the payee.

7.5  Exchange-for-Cash Checks Lost, Stolen, or Destroyed

7.5.1. When Issued to an Individual. When the payee of an exchange-for-cash check reports the check as lost, stolen, or destroyed, the DO follows section 11.0. For UCC, the DO may not issue a recertified payment to the payee before receipt of credit for the original check from the Treasury, since the original check was issued in exchange-for-cash as opposed to any entitlement chargeable to an appropriation.

7.5.2. When Issued as an Advance of Cash to a DDO, Agent, or Cashier. For lost, stolen, or destroyed exchange-for-cash checks that were issued to advance cash, the DDO, agent, or cashier remains accountable for the cash.

7.5.2.1. Accountability. The DDO, agent, or cashier accounts for the check as a loss of funds. A DO may replace the lost check with a recertified payment check (or a new advance of cash) if he or she considers it necessary due to operational requirements.

7.5.2.2. Offset Loss of Funds. After receiving credit for the lost check, the DO prepares an SF 1080, Voucher for Transfers Between Appropriations or Funds, to transfer the credit from the **F3880 account to offset the loss of funds in the DO’s accountability (see Chapter 6). Give a copy of the SF 1080 to the DDO, agent, or cashier to document the Treasury’s cancellation of the lost check, use the credit to offset the loss of funds, and file a copy with the UCC documentation.
7.5.2.3. **Negotiated Lost Check.** If the lost check is subsequently negotiated after cancellation by the Treasury (in which case, the Treasury will reverse the previous credit), the DDO, agent, or cashier is accountable for the original lost check and must re-establish the loss of funds.

8.0 **CHECK ISSUE DISCREPANCIES**

*8.1 Adjustment of Duplicate Checks*

Treasury accepts only one issue/paid record for any given DSSN and check serial number, and will issue a debit voucher to charge the disbursing office for a second check received for payment with the same DSSN and check serial number. Should a DO receive a debit voucher for a duplicate check to which the payee is entitled, request that NPIRC reverse the debit voucher for the correct check serial number of the duplicate check. The DO must also provide a copy of the debit voucher to NPIRC. See *1 TFM 4-6040.10.*

8.2 **SF 1219, Statement of Accountability Adjustments**

8.2.1. **Prior Month Checks Issued.** A common reason for a SF 1219 adjustment made by the DO is a prior-month check issue adjustment. Do not report prior-month issue of checks as current-month checks issued, as this will cause check issue discrepancies for both issue months. An SF 1219 adjustment is necessary to realign the check issue reporting to the proper issue month of the checks.

8.2.2. **Clear Check Issue Discrepancy.** To clear check issue discrepancies resulting from erroneously reported prior month checks issued, the DO prepares a journal voucher (JV) to decrease the overstated check issues and increase the check issues for the proper month. For audit trail purposes, reference the check numbers and issue dates of the prior month checks being adjusted between months on the JV.

8.2.3. **Request for Adjustment.** If the DO’s financial records reflect the correct check issued data for the proper month, and the error is limited to the Treasury’s record of the SF 1219 check issue total identified in the check reconciliation process, the DO sends a request for adjustment to the NPIRC.

8.3 **Erroneous Information Reported on the Financial Management Service (FMS) Form 5206**

The DO reviews the FMS 5206, a copy of the check, disbursement voucher, and the check issue report data. If the DO determines the check was paid for an amount different from its original issue amount, the DO returns the FMS 5206 to the Treasury with a memorandum stating the reason for returning without action. Support the memorandum with copies of the documents used to determine that the FMS 5206 is in error. Generally, the situation described is indicative of a bank processing error or alteration of the check by the payee. In either event, the explanatory memorandum returned with the FMS 5206 is sufficiently clear to enable the Treasury to initiate reclamation action through the banking system.
8.4 Relief of Liability

Both underdrafts and overdrafts are illegal, incorrect, or improper payment irregularities in the DO’s account. The DO has the authority and the means to correct underdrafts. Overdrafts frequently are not within the power of the DO to correct. If a check issue overdraft resulted in an overpayment of a payee, the overpayment amount is an erroneous payment debt. When the DO has attempted to contact the payee and failed, or when the payee has been notified and has neither the ability nor the inclination to make restitution, the DO transfers the debt to the supporting DFAS site for further collection action. In order to meet standards for relief of liability, transfer uncollectible overdrafts to the supporting DFAS site within 180 days. After the debt has been transferred, relief of liability for the illegal, incorrect, or improper payment may be requested (see Chapter 6).

9.0 SPOILED AND VOIED CHECKS

*9.1 Spoiled and Voided Checks

When a check is spoiled during the issue process, the DO must void the check. Spoiled checks are treated as voided checks. Void a check that is misprinted or mutilated during the issue process or is determined not to be a proper payment, and has not been reported as a check issue with a dollar amount greater than zero. Report destroyed unused and lost or stolen blank checks as voids. Render checks voided by the DO non-negotiable by typing or stamping the words “Void - Not Negotiable. No Check Issued Under This Number.” If a DO cannot report the voided checks as required, it must email Fiscal Service at RRB.OSD-NPIRC-PM@fiscal.treasury.gov. See 1 TFM 4-6030.

* 9.1.1. A check reported to the Treasury as a valid check in a dollar amount greater than zero may not be voided under any circumstances. The DO stamps the check, “Not Negotiable - For Deposit Only. Credit of Agency Location Code ######.” The DO deposits the check using OTCnet, to credit the proceeds of the check to the appropriation from which it was issued and process the check as either an available or UCC, as appropriate, following section 10.0.

9.1.2. If the payment associated with the voided check is otherwise proper, replace it with the next available check in the series and in the same format used for the original voided check. Annotate on the original voucher, the copies of the voucher, and the check issue log to indicate the original check was voided and the number of the replacement check used for the payment.

9.2 Storage

The DO stores spoiled and voided checks in the vault or safe, segregated from other checks.
*9.3 Disposition

9.3.1. Destruction. The DO destroys spoiled and voided checks locally as soon as possible, by either burning or shredding. If destroyed by burning, they must be burned completely. If destroyed by shredding, the fragments may be no larger than 1/8th inch wide and 3½ inch long. Treasury requires the use of a crosscut shredder. The burning method of destruction may only be used, subject to environmental regulations, when a disbursing office does not have shredding equipment. In either event, prepare a certificate of destruction (see Figure 7-1).

9.3.2. Verification. The DO and at least one witness examine the checks to verify they are the actual checks to be destroyed, verify the check numbers and DSSN with information on the certificate of destruction, and sign the certificate only after witnessing their actual destruction.

9.3.3. Certificate of Destruction. The DO must notify the Fiscal Service of the destruction of blank check stock by emailing the certificate to RRB.OSD-NPIRC-PM@fiscal.treasury.gov. Keep a copy in the DO’s blank check inventory control records. (See 1 TFM 4-5040.50b).

10.0 AVAILABLE CHECK CANCELLATIONS

10.1 Competitive Equality Banking Act of 1987 (CEBA)

CEBA amended 31 U.S.C. § 3328 and created a new section 31 U.S.C. § 3334 that establishes time limits on the payability of Treasury checks. CEBA affects the time allowed for negotiating Treasury checks, initiating and processing claims, recovering monies from financial institutions, and requesting replacement check payments. The underlying obligations for which Treasury checks were issued are not affected. CEBA legislation does not impose the same payability restrictions on check payments made from limited depositary accounts. CEBA requires that Treasury checks be negotiated within 1 year of their issue dates. DOs may cancel checks within this 1-year period when the check is drawn under the DO's own DSSN, under the account of a predecessor DO of the same activity and DSSN, or under an account being settled by the DO. A DO may not cancel a check over 1 year old. Checks may be canceled when the disbursing account is closed or current, or the proceeds of the check are for repayment to an appropriation or fund account, which is current or expired. (See 1 TFM 4-7030).

10.2 Exceptions Include:

10.2.1. Checks recovered or returned to the possession of the DO after being submitted for a UCC are stamped with “Not Negotiable, Previously Treated as Canceled SF 1184 dated ######.” These Checks are retained for 90 days and then shredded. A DO receiving a returned check for an activity or DSSN no longer in operation stamps the check “Not Negotiable” and sends it to the successor or settlement DO;

10.2.2. Checks involving holder-in-due-course claims, see paragraph 13.2;
10.2.3. If substantial portions of mutilated checks are missing, see I TFM 4-7030; and

10.2.4. Checks that are at least 1 year from the date of issue (stale dated).

10.3 Undeliverable Checks

The DO keeps a record of undeliverable checks on the DoD (DD) Form 2658, Returned and Undeliverable Check/Bond Record. An electronic system is acceptable to record undeliverable checks if it includes all of the same information as on the DD 2658. The DO provides the information or a copy of the DD 2658 to agents, cashiers, and appropriate entitlement offices for their use. Do not remove undelivered checks from the safe or vault or allow deputies, agents, or cashiers to hold them except for immediate delivery to payees, or for cancellation and deposit.

10.3.1. Safekeeping. DOs keep undeliverable checks in a safe or vault, filing them in an order best suited for ready identification when claimed, or for mailing upon obtaining a proper address. At a minimum:

10.3.1.1. Open mail with returned Treasury checks in the presence of two people;

10.3.1.2. Limit access to the returned Treasury checks processing area; and

10.3.1.3. Secure the checks in a locked container if there is a delay between the time the checks are received and when they are defaced (see Chapter 3, paragraph 3.4).

10.3.2. Undeliverable Due to Death of the Payee

10.3.2.1. Deceased Military Members. The issuing DSSN cancels checks payable to deceased military members promptly and credits the value to the individual's pay account pending payment to a properly designated beneficiary.

10.3.2.2. Deceased Civilian Employee. See Volume 8, Chapter 10, section 5.0

10.3.2.3. Other Payees. Deposit checks drawn to other deceased payees as undeliverable checks. Obtain an SF 1055, Claim Against the United States for Amounts Due in the Case of a Deceased Creditor, see 19 CFR § 24.70

10.3.3. Checks Undelivered at Time of Relief. When a DO is relieved by another DO, or the DSSN is deactivated and disbursing for that activity is assumed by another activity due to consolidation, transfer of function, or other reason, the relieving DO or gaining activity assumes custody of and processes the undelivered checks. If the DO is transferred from disbursing duty without a relief or the disbursing function is not assumed by another activity, process the undelivered checks as collections on an SF 1098, Schedule of Canceled or Undelivered Checks, and deposit them whether or not the three-workday holding period has elapsed.
10.3.4. Special Actions on Canceled Checks Held by the Disbursing Office

10.3.4.1. Military Payrolls. When canceling a military pay and allowances check, the DO processes the adjustment to the Master Military Pay Account.

10.3.4.2. Civilian Payrolls. When canceling a check in payment of civilian pay, the DO notifies the payroll office to make the appropriate payroll adjustment.

10.4 SF 1098

10.4.1. Check Credit. Credit a check that is undelivered within three workdays of receipt in the disbursing office to the appropriation originally charged using an SF 1098 prepared in triplicate.

10.4.2. Lack of Accounting Data. If the proper appropriation to be credited cannot be determined immediately, collect the amount of the check into account **F3875 (Budget Clearing Account, Suspense). Include on the SF 1098 all information available as to the identity and location of the payee of the check. Keep a copy of the documentation in a separate file to support each item in the suspense account. The DO acts aggressively to identify the proper appropriation and removes the item from the suspense account as soon as possible. If the proper appropriation remains unknown after 60 days, transfer the funds to Treasury’s miscellaneous receipt account **R1060 on SF 1081.

10.5 Disposition of Canceled Available Checks

10.5.1. Canceled Checks. Process canceled check transactions authorized by this section in a manner similar to that for collections. Upon receipt of a check to be canceled, prepare an SF 1098 as the collection voucher and credit the appropriation originally charged for the payment. Show all lines of accounting charged and credited on the original disbursement voucher, assign a collection voucher (CV) number, and print the CV number and the date of collection on the back of the canceled check. Deposit the canceled checks for credit to the DSSN used by the DO canceling the checks. An endorsement stamp is required for canceled checks.

10.5.2. Defacing Returned Checks. Ensure that each canceled check is defaced by stamping the legend “Not-Negotiable.” The stamp is in a color other than black (preferably red) and is of prominent enough size to remove all possibility of negotiation.

10.5.3. Deposit Ticket. Deposit canceled checks on a deposit ticket separate from other negotiable instruments. DOs with OTCnet capability may deposit their canceled checks through this system.
10.5.4. Frequency of Deposits. Checks received for cancellation do not need to be deposited daily, but must be canceled within three business days of receipt. These checks may be held in the DO's safe or vault pending preparation of a consolidated deposit ticket. In situations where check deposit volume is minimal or where electronic deposits utilizing OTCnet are not available, send deposits to the FRB no later than the 25th of the month of receipt. Checks received after the 25th of the month may be retained and deposited the following month. All CONUS DOs deposit canceled Treasury checks with the nearest FRB. DOs in Alaska, Hawaii, and foreign countries deposit them with the general depository normally used for making deposits-for-credit to the Treasury's General Account. See Chapter 11, section 11.3 for deposit reconciliation requirements.

10.6 Claims for the Proceeds of Canceled Available Checks

When a claim is received for the proceeds of a canceled available check and all or a portion of the amount is due to the claimant, the disbursing office that collected and deposited the original undeliverable check pays the claim on payroll or other vouchers prepared, processed, and certified the same as a current payment. This does not preclude an undeliverable military paycheck from being canceled by the issuing DO so that the member may be paid at a new duty station. Use an SF 1034, Public Voucher for Purchases and Services Other than Personal, to make these payments and charge them to the accounting data credited on an SF 1098, referencing the original undeliverable check by serial number, amount, DSSN, month, year, and account in which the undeliverable check was collected. Pay claims received for items transferred to the **R1060 account from the 20X1807 (Refund of Moneys Erroneously Received and Covered) account.

11.0 UCC

*11.1 Unavailable Checks

Cancel unavailable Treasury checks less than 12 months old as lost, stolen, mutilated, not received by the payee, and also cancel when the DO determines that the payee is not entitled to the proceeds of the check. To file a non-receipt claim against a Treasury check, the DO must submit a UCC on-line through TCIS or via file transmission. See 1 TFM 4-7045.10. Checks canceled are credited by the Treasury to account **F3880 through the Intra-governmental Payment and Collection (IPAC) system. Utilize a CTA transaction to move the funds out of account **F3880 to the proper program TAS, deposit fund account, or DO Cash TAS along with the proper adjustment BETC code. Such situations include death of the payee before the check issue date, non-receipt of a recertified payment by the payee when the original check has been received and cashed, and receipt of a cash payment and a check payment for the same entitlement.

11.1.1. Payees have 1 year from the date of issue of the check to file a claim of non-receipt with the issuing disbursing office, which then submits an SF 1184 to the Treasury within 13 months of the issue date. The Treasury has 18 months from the date a check is paid to reclaim monies from the financial institution if the payee files a claim of forgery or unauthorized endorsement.
11.1.2. Checks unavailable to the payee and/or the DO and for which entitlement to the payment exists may be replaced by a new check called a recertified payment check. Such a payment bears a new check serial number and is vouchers, certified, and recorded as a new disbursement. The DO must control, cross-reference, and track original and recertified payments indefinitely or until both have been paid, recovered and destroyed, or canceled.

11.2 DD Form 2662, Recertified Payment Register

Maintain the **DD 2662** to provide the necessary cross-reference and control over UCCs. An electronic log is acceptable if it contains the same information as the form (see Volume 1, Chapter 9, section 2.0 for records retention).

11.3 SF 1184

11.3.1. Cancellation Form. The SF 1184 is required for all cancellations. Bulk losses of original checks require the preparation of an SF 1184 for each check.

11.3.1.1. Use this form to stop payment, obtain photocopies, or check the payment status of unavailable Treasury checks. Input stop reason codes to designate the desired action. Although this form attempts to stop payment on a check, there is no true stop payment action. The payee may still negotiate the check, and the DO is responsible to recoup the money.

11.3.1.2. If a check is presented for payment after Treasury has given the DO a credit to the **F3880 account, Treasury will reverse the credit and provide the DO the documentation, including a photocopy of the paid check. The DO must then research and take the appropriate corrective action, including collection efforts when dual negotiation has occurred. See subparagraph 11.3.2 for guidance on preparing and submitting an SF 1184, and paragraph 11.9 for guidance on handling the credits and reversals of credit in the **F3880 account.
11.3.2. Processing. Use DCRM’s UCC subsystem to enter SF 1184s, and transfer them to the Treasury biweekly. Contact the supporting DFAS site for questions on the SF 1184.

11.4 Claims of Non-receipt, Destruction, Loss, or Theft

11.4.1. Payee Request for Claim

11.4.1.1. Treasury will deny a claim of non-receipt, destruction, loss, or theft of a Treasury check issued on or after October 1, 1989, unless it is presented by the payee to the issuing disbursing office within 1 year from the date of issue.

11.4.1.2. The disbursing office will document the claim on an SF 1184 and submit through the supporting DFAS office so the Treasury receives it within 13 months of the check issue date. If Treasury denies a cancellation credit, it issues a Daily Advice of Status (DAS) with one of the status codes in 1 TFM 4-7045.20c, Appendix 6. The DO advises the payee of the check status.

11.4.1.3. Fiscal Service forwards a FS Form 3858, Claims Document, to the DO for completion by the payee/claimant. If the check has been negotiated, the payee examines the check copy; if the payee/claimant denies negotiating the check, he/she must complete and sign the FS Form 1133, Claim Against the United States for the Proceeds of a Government Check.

*  11.4.1.4. Fiscal Service forwards a FS Form 3858, Claims Document, to the DO for completion by the payee/claimant. If the check has been negotiated, the payee examines the check copy; if the payee/claimant denies negotiating the check, he/she must complete and sign the FS Form 1133, Claim Against the United States for the Proceeds of a Government Check.

11.4.2. DO’s Action. The DO sends the FMS 1133, the FMS 3858, the photocopy of the check, and any other supporting documentation for the claim to Treasury for processing. If the payee files a FMS 1133 to claim forgery or unauthorized endorsement against the check, a recertified payment is not authorized before receipt of a Claims Disposition Notice (CDN), from the Treasury (see subparagraph 11.12.4).
11.5 DD Form 2660, Statement of Claimant Requesting Replacement Check

11.5.1. Payee Request

11.5.1.1. A payee who reports the loss, theft, mutilation, or non-receipt of a Treasury check submits a written statement to the DO. The DD 2660 is the preferred form for the required statement, but a DO may accept a signed letter from the payee in lieu of the DD 2660, provided the letter contains the required information and the certification statement found on the DD 2660.

11.5.1.2. A payee who submits a statement in lieu of the DD 2660 must include the payee's name, SSN, and address; member's name and SSN if different from the payee; type of payment entitlement; whether the check was received, and if so, whether it was lost, stolen, destroyed, or mutilated; whether the check was endorsed by the payee or had a limited endorsement such as "for deposit only;" circumstances surrounding the loss, theft, destruction, or mutilation if the check was received; and the signed statement of certification of the payee. The statement must contain the signed certification statement exactly as cited above blocks 12-15 on the DD 2660. Failure to include this statement could hinder collection efforts if a dual negotiation occurs. Also, if the payee is the one that negotiated both checks, the statement could also be used to establish fraudulent intent.

11.5.2. DO’s Action

11.5.2.1. Upon receipt of the signed statement, the issuing DO or settlement officer completes the information required to identify the check (e.g., issue date, check number, amount, and voucher number). Before entering an SF 1184, the DO must verify the check has not been returned as undeliverable.

11.5.2.2. If the check was re-mailed at a later date, the DO notifies the payee of the later mailing date and allows two weeks’ delivery time before processing the claim of non-receipt. If the check has not been returned and enough time has passed to allow for mail delivery, the DO uses the information on the DD 2660 to enter an SF 1184 for the unavailable check. Do not submit an SF 1184 involving non-receipt of future dated checks, such as those issued for pay and allowance entitlements, before the date of payment.

11.5.2.3. Do not enter an SF 1184 involving non-receipt until the third working day after the check payment date.

11.5.2.4. The DO sends a copy of the claimant's DD 2660, or other written statement, and a copy of the SF 1184 documentation to the appropriate entitlement area, which must certify that the entitlement for payment still exists before the DO may issue a recertified payment.
11.6 DAS

11.6.1. **File.** With the exception of the transmittal documents, Treasury returns a DAS on every SF 1184 received. An essential control technique is for DOs to keep a complete file of submitted SF 1184s. Periodic review of the file will show, either by copy of the DAS or by copy of the agency receipt of batch transmittals, the Treasury received and processed all submissions. Follow-up incomplete file items within 30 days through the supporting DFAS site by telephone and, if necessary, by submitting a second SF 1184. (see [TFM 4-7045.20](#)).

11.6.2. **Canceled Check Status.** Once Treasury has issued a DAS with a status indicating “check canceled; crediting agency,” future requests to cancel or obtain photocopies of the canceled check will receive a response, “outstanding check was canceled; agency credited.” A photocopy of the check will not be available until the check is presented for payment through the banking system. Therefore, once a disbursing office has received a DAS with a status code of “Outstanding,” no additional SF 1184s may be submitted for that check number. If the original check is ever presented through the banking system for payment, the DO will receive notification that the Treasury has reversed the credit to the **F3880 account.** Treasury will then provide a photocopy of the original check, and the claim forms FMS 1133 and FMS 3858.

11.7 Payments, Accounting Claims, and Enhanced Reconciliation System

11.7.1. **TCIS.** Treasury’s TCIS is available to obtain digital check images and view check status on-line. TCIS has payment data and digital images of checks from 7 years ago to the present. Digital check images are in real time and available only for paid checks.

11.7.2. **Inquiries.** The inquiries on the payments and claims option in TCIS allows inquiries on the status of a single payment or multiple payments at the same time. TCIS is available for use Monday through Friday from 6 a.m. to 12 a.m. (midnight), Eastern Time. No software purchase is required to access this system. See TCIS website under Equipment Requirements for system requirements. To request access to TCIS, contact the Treasury’s Support Center at (855) 838-0743 or TCIS_TSC@stls.frb.org.

11.8 Authorization to Issue Recertified Payments

11.8.1. **Recertified Payment.** Treasury has delegated authority to DOs to replace checks originally issued by them to include checks lost, stolen, or destroyed both in transit, and after receipt, by applicable payees (see [31 CFR 245](#) and [31 CFR 248](#)). DOs may also issue a recertified payment when the SF 1184 is prepared, based on the facts available. Subject to the restrictions in the following paragraphs, DOs may issue recertified payments as replacements for original checks any time commencing with the submission of the SF 1184. The circumstances associated with each unavailable check govern this timing.
11.8.2. Limitations

11.8.2.1. Do not issue a recertified payment check if:

11.8.2.1.1. The payee of the original check is not entitled to the proceeds;

11.8.2.1.2. The payee died before the original check issue date;

11.8.2.1.3. Insufficient mail time has lapsed from the date the original check was mailed or re-mailed to allow for its delivery and possible return;

11.8.2.1.4. The payee has an outstanding obligation which the payment can offset; or

11.8.2.1.5. The original check is more than 12 months old.

11.8.2.2. Consider all circumstances of situations involving high-dollar-value unavailable checks, payees involved in adverse actions that could result in early discharge or termination, or nonpermanent employees with no vested retirement benefits or sustained work history before issuing a recertified payment. Also, consider the payee’s ability to repay in cases of double negotiation and the possibility of offsetting a double negotiation against money, other than salary, due to the payee. For deactivated and closed DSSNs:

11.8.2.2.1. The designated settlement office normally issues these payments. In some situations, (e.g., consolidation), the DO supporting the activity that assumed the disbursing and accounting responsibility for the deactivated or closed office may issue a recertified payment for the deactivated or closed office; and

11.8.2.2.2. Except as prescribed in section 9.0, issue recertified payments only as a disbursement from the appropriation charged for the original check or, if that appropriation is no longer available, a current appropriation available for the same general purpose, subject to limitations on its use.

11.8.3. Issue Before Receipt of Check Status. Delays in issuing checks may affect military and civilian employees’ personal financial affairs, DoD relations with private business, and other intangible benefits. Immediate issuance of replacement checks may thus be appropriate. DOs may use stop reason code “A” on the SF 1184 to support immediate check issuance to replace undelivered, lost, stolen, mutilated, or destroyed original checks issued under their DSSN if less than 31 days have elapsed since the check issue date. Limit this service to:

11.8.3.1. Military and civilian personnel for payment of pay and allowances;

11.8.3.2. Banks, credit unions, and other financial institutions unless the DO decides that obtaining the Treasury status is in the government’s interest before issuing a replacement;
11.8.3.3. Agencies of the U.S. Government;

11.8.3.4. Foreign governments (If doubt exists as to the status of a foreign payee, treat the payment as a foreign business transaction and issue a recertified payment only after receipt of the Treasury status as prescribed in subparagraph 11.9.4; and

11.8.3.5. Any blanket check regardless of amount.

11.8.4. Issue After Receipt of Check Status. Submit UCCs using stop reason code “D” or “G,” and issue a recertified payment only after the Treasury reports the check status as outstanding for:

11.8.4.1. Foreign businesses and contractors where the check payment is made to addresses or financial institutions OCONUS;

11.8.4.2. Payees who have previously negotiated both the original check and the replacement check issued to replace it;

11.8.4.3. Payees who have received more than three replacement check payments in the past six months or more than four in a 12-month period;

11.8.4.4. Payees who report non-receipt of a recertified payment;

11.8.4.5. Payees requesting replacement of an original check more than 30 days old; or

11.8.4.6. Payees other than a deputy, agent, or cashier requesting replacement of an exchange-for-cash check.

11.8.5. Issue When Check Status is Paid. Do not issue a recertified payment check when the DAS from the Treasury indicates the check status is paid (see paragraph 11.13).

11.9 Accounting for Recertified Payments

11.9.1. Accounting. Treasury provides credits for canceled unavailable checks and charges resulting from negotiation of previously canceled unavailable checks through budget clearing account **F3880. This account is restricted to unavailable check transactions; do not use it for any other purpose. It is available to hold credit or chargeback amounts only pending identification of the appropriation or fund charged for the original check issuance. Do not charge the **F3880 account directly for any payment, but transfer amounts in this account to the original appropriation as expeditiously as possible. Do not allow transactions in this account to become stale or unidentifiable, as an unidentifiable balance may result in a DO loss of funds and an associated pecuniary liability.
11.9.1.1. Credits Resulting From Submission of SF 1184s. If an unavailable check is outstanding, Treasury will issue a DAS indicating that the check is outstanding and that it will credit the agency with the proceeds. The Treasury will cancel the check and credit the funds derived from the cancellation to the **F3880 account. DFAS-CL and DFAS-IN receive cancellation credits electronically from Treasury daily or as needed. A hardcopy of the SF 1081 follows the electronic submission. Treasury sends these canceled check proceeds to DFAS-CL and DFAS-IN through CARS and the IPAC system. This will reflect any identifying information provided in the original check issue data submission as detail in the credit transmission.

11.9.1.2. Reversals of Cancellation Credits. If a canceled unavailable check is negotiated by a financial institution after cancellation by Treasury, Treasury will reverse the cancellation credit. The IPAC bill and detail data are available to the DO in real time on the IPAC website for current-month transactions. The detail data remains available to the DO on the IPAC website up to 15 months after the credits and charges are transferred. The detail data must equal the total dollar amount of the IPAC bill. The IPAC bill is the DO’s documentary evidence that Fiscal Service provided the credits or charges. Credits and charges are listed separately and are not commingled in the same IPAC bill document or IPAC bill data file. See 1 TFM 4-7050.60

11.9.2. Agency Reporting of Fiscal Service Transfers to the **F3880 Account. Treasury transfers to the **F3880 account via IPAC. By the end of each month, DOs must reconcile their CARS activity by TAS/BETC to their internal accounting system of record and reclassify any transactions to the correct TAS/BETC in the CARS CTA Statement, if necessary. After reporting a credit or charge to the **F3880 account on its internal accounting records, the DO must prepare a JV to clear the credit or charge from the **F3880 account. The funds are returned to the appropriation or fund account identified by the DO. Any credit or charge processed after Treasury Receivable Accounting and Collection System closes on the last business day of the month is accounted for in the subsequent accounting month.

11.9.3. Distribution. Under 31 U.S.C. § 3334(a)(2), return canceled check proceeds to the appropriation(s) charged when the check(s) were originally issued, and treat the canceled check(s) as account(s) payable. Within 15 days of receipt, DFAS-IN and DFAS-CL send the check cancellation and credit detail information to the disbursing office (except as noted in subparagraph 11.10.2) that issued the check(s) and to the disbursing offices’ supporting accounting offices. Any reversal of previous cancellation credits issued by Treasury should also be sent in the same manner to the applicable disbursing and accounting offices.

11.9.3.1. DFAS-CL and DFAS-IN send the check credit information including the details applicable to the disbursing accounts that DFAS-CO manages to DFAS-CO. DFAS-CL processes or distributes cancellation credit information for Marine Corps disbursing offices.

11.9.3.2. The net dollar amount entered by the Fiscal Service for the **F3880 account is reported on the CARS Account Statement. The ALC 20180009 is listed as the reporting entity. Statement of transaction reporting to clear **F3880 accounts are also shown on the CARS Account Statement with the DO's ALC shown as the reporting entity. The **F3880 reports are cumulative, and only the latest are accessible.
11.9.4. **Accounting Office.** When the accounting office receives canceled check credits, it transfers them from **F3880 to the original appropriations charged when the payments were made and establishes an accounts payable. If a DO replaces an unavailable check before receiving credit from Treasury, the accounting office establishes an accounts receivable in the appropriation or fund charged for the original check, removes the receivable upon receipt of the credit, and transfers the reversal of a previous credit from **F3880 to the original appropriation.

11.9.5. **Review of **F3880 Balances.** The DO reviews the **F3880 account monthly to ensure necessary actions are taken to clear these transactions. Each time the DO’s account is transferred, the incoming DO validates balances in this account (see Chapter 2, subparagraph 4.6.1.8). If the departing DO cannot provide the incumbent DO with documentation supporting the **F3880 items, the departing DO processes the unsupported items as losses of funds under Chapter 6.

11.9.6. **Research.** Upon receipt of a DAS indicating cancellation credit or reversal information from the supporting DFAS site, the DO initiates research on the check issue data submitted to Treasury to ensure the accuracy of the detailed information, (e.g., the DSSN, check serial number, date of issue, and issue amount provided in the cancellation credit or reversal), which must agree with the original check issue data reported to Treasury. Research any discrepancy in this data to determine its cause and correct it. In the case of a reversal, the DO determines if a dual negotiation occurred by verifying the status of the replacement check. The DO submits an SF 1184 on the replacement check using stop reason code “F” for non-entitlement.

11.9.6.1. If the check for the recertified payment is outstanding, the DO receives a credit to offset the charge for the reversal previously received. If the check has been paid, the DO receives a photocopy of the paid check, a claim form, and a claims document. If both the original and recertified payment checks have been negotiated, the DO begins collection action as outlined in paragraph 11.13. The disbursing office must also notify the appropriate entitlement or subject matter area (e.g., military pay, civilian pay, travel pay, or commercial accounts payable) that Treasury has returned a credit to the activity because the check was not negotiated or has reversed a credit previously received and provided a copy of the DAS.

11.9.6.2. The DO requests the accounting department re-obligate funds to cover the issuance of a recertified payment. Once assured that funds are re-obligated and available, the DO may issue a recertified payment check citing the original appropriation. If the original appropriation is closed, use a current year appropriation for the same or similar purpose.

11.9.6.3. When Treasury provides a reclamation credit, the DO requests the accounting department re-obligate funds to cover the issuance of a recertified payment.

11.9.7. **Entitlement to Payment.** When notified that an unavailable check has been canceled, the credit has been received, and a recertified payment has been requested, the appropriate entitlement or subject matter area determines if the liability for payment of the underlying obligation is valid before preparing a recertified payment, which is prohibited if the entitlement to payment no longer exists.
11.9.8. **Recertified Payments.** All recertified payments (including immediate replacements (stop reason code “A”)) must be vouchered, certified by a certifying officer, and charged to the appropriation or fund charged for the original payment. Making a recertified payment under the first two provisions listed in this paragraph requires the establishment of an accounts receivable, supported by a copy of the SF 1184 and/or the DAS, in the appropriation or fund for the amount due on cancellation of the original check. Recertified payments may be made when the disbursing office submits the SF 1184, or at any time in the claims cycle that is:

11.9.8.1. Before the status of the original check is known, when less than 31 days have elapsed from the date of the original check (see paragraph 11.8);

11.9.8.2. After the disbursing office has been advised by the DAS code that the original is outstanding and credit will be provided; or

11.9.8.3. After the credit has been received from Treasury.

11.10 Preparation and Disposition of Replacement Checks

11.10.1. **Replacement Checks.** Prepare and distribute replacement checks in the same manner as regular checks as described in section 4.0. If a payee claims non-receipt, loss, or destruction of a replacement check, the UCC procedures in section 4.0 also apply to the replacement check.

11.10.2. **Returned and Recovered Replacement Checks.** When a replacement check is returned by the payee after the original check it replaced has been found and negotiated by the payee, cancel the replacement check on an SF 1098 and credit the proceeds to the appropriation charged when it was issued. Deposit the check with the nearest FRB or branch on a deposit ticket as prescribed in paragraph 10.4. Transfer the chargeback to the **F3880 account from Treasury for the negotiated original check to the appropriation charged when the original check was issued.

11.11 Check Forgery Insurance Fund

11.11.1. **Claim Against the CFIF.** The CFIF is a revolving fund established under 31 U.S.C. § 3343 to settle payee/claimant claims of non-receipt when an original check has been fraudulently negotiated. Only Fiscal Service may adjudicate claims of forgery against Treasury checks. A claim against the CFIF is governed by the 1-year statute of limitations provided in the CEBA (see subparagraph 12.1.2). Therefore, a claim of forgery must be presented within 1 year from the date the check was issued, otherwise the claim on the check is barred and the payee is not entitled to payment from the CFIF. The DO must submit an SF 1184 on the check within 13 months from the check issue date.

11.11.2. **Statutory 1-Year Limit.** The statutory 1-year limit on the claim against the CFIF does not affect the underlying obligation of the government for the payment. If the Treasury determines a check endorsement was forged and the payee’s claim meets the statutory requirements, Treasury will institute reclamation procedures to recover the proceeds of the forged check through the banking system.
11.12 Check Forgery Claims

11.12.1. Forgery Claims. When Treasury determines that an original check was negotiated and paid by the Fiscal Service on a forged or unauthorized endorsement, a payee may have a valid claim against the CFIF (see paragraph 11.11). The NPIRC is the approval authority for settlement checks issued to replace checks paid over forged endorsements. Fiscal Service does not charge the CFIF for losses resulting from negotiation of checks issued to deceased payees or to payees who were not entitled to the payment. The address is: Department of the Treasury, Bureau of the Fiscal Service, NPIRC, Customer Service Branch, PO Box 515, Philadelphia, PA 19105-0515. Fiscal Service issues settlement checks out of the CFIF if it determines that the payee or special endorsee has established that:

11.12.1.1. The payee or special endorsee presented a timely claim of non-receipt, (e.g., filed a claim within 1 year after the date of check issue);

11.12.1.2. The original check was lost or stolen due to no fault of the payee or special endorsee;

11.12.1.3. The original check was negotiated and paid by Fiscal Service on a forged or unauthorized endorsement of the payee’s or special endorsee’s name; and

11.12.1.4. The payee or special endorsee has not participated in any part of the proceeds of the negotiation or payment of the original check.

11.12.2. DO’s Action. A payee reports the loss, theft, or non-receipt of a Treasury check, and follows paragraph 11.5. A DO whose research determines that the check was negotiated requests a digital image of the check. For checks issued on or after the date of October 1, 1997, obtain a digital check image using TCIS. For checks issued before the date of October 1, 1997, DOs must determine the check status (see paragraph 11.3).

11.12.3. Payee/Claimant’s Action. When the check status is "Paid," Treasury provides a photocopy of the original check, FMS 1133, and FMS 3858. If after examining the check copy, a payee/claimant denies having negotiated the check, the payee/claimant completes and signs the FMS 1133 and returns it along with the check copy to Fiscal Service. The FMS 1133s and FMS 3858s are a combined set of four pages. The FMS 1133 is for the payee’s declarations and information concerning the unavailable check, and the FMS 3858 is the claim reference document that contains the necessary information for the NPIRC to identify the check. Attach a copy of the FMS 3858 to any correspondence with Treasury concerning the unavailable check.
11.12.4. Fiscal Service Action. Upon receipt of the FMS 1133, the NPIRC reviews the claim form. If the FMS 1133 is not complete, it is return to the payee/claimant with a letter advising the corrections needed. If the payee/claimant admits negotiating the check or does not return the FMS 1133, take no further action. Consider an FMS 1133 complete when all questions are answered and all required signatures are present. If a payee/claimant signs by mark, the mark must be witnessed in the space provided. If the FMS 1133 is complete, the NPIRC advises the DO of the status of the claim using a CDN and begins the adjudication process. If the NPIRC determines that the payee/claimant was not involved in the negotiation of the check, and did not participate in the proceeds from the check, it settles the claim by initiating a request to issue a check to the payee/claimant or transfer the funds to the DO.

11.12.5. Appeal Process. If the NPIRC denies a claim, a payee/claimant may appeal in writing to the NPIRC. The appeal must be postmarked no later than 60 days after the date of the denial letter. The appeal must include a copy of the denial letter, a signed statement, and any additional information or documentation for further investigation. The appeal must also include the check and symbol number identified in the denial letter.

11.13 Collections of Double Negotiations

11.13.1. Collections. A double negotiation occurs when an original check and its replacement have both been reported as paid by Treasury. The loss actually occurs on negotiation of the replacement check; the order in which the checks are cashed is irrelevant. A double negotiation is an illegal or improper payment for purposes of pecuniary liability. The DO initiates collection action to recover illegal or improper payments made by his/her office. If the payee separates from government service, the DO is still responsible to pursue collection action. Normally, collections for illegal or improper payments are one-time cash refunds or lump-sum collections by salary offset and do not warrant installment liquidation. Limit installment repayments to cases of extreme personal hardship.

11.13.2. Collection Action

11.13.2.1. When Treasury notifies a DO that it has reversed a credit to the **F3880 account from a previous cancellation, the DO researches the situation to ascertain if a double negotiation has occurred by determining the payment status of the replacement check. Once a Treasury response confirms a double negotiation, the DO immediately begins collection action. Afford the payee due process rights of collection specified in Volume 16, Chapter 2, section 4.0 in each case. The most effective means of achieving expeditious recovery is to present the payee a photocopy of the paid original and replacement check and a copy of the claimant’s signed statement acknowledging he/she was not entitled to both payments. Due process rights of collection include the opportunity for the payee to contest the validity of the debt. In cases of double negotiation, the payee’s right to complete an FMS 1133 provides this opportunity.
11.13.2.2. If the payee asserts that one of the checks was negotiated over a forged endorsement, delay collection until the NPIRC adjudicates the payee’s forgery claim. If the NPIRC determines the check was forged, the payee does not owe the debt. If the NPIRC denies the payee’s claim, the full amount of the check is due and subject to immediate collection. If the payee fails to provide the properly completed FMS 1133 within the period allowed to present documentation as to why the debt is not owed, he/she is deemed to have acknowledged the debt and the DO takes immediate collection action. In either situation, complete collection action within 90 days of the receipt of the DAS from Treasury indicating the canceled unavailable original check has been paid, or within 90 days of receipt of the CDN from Fiscal Service indicating the payee’s claim of forgery is denied.

11.13.2.3. The DO documents all attempts to collect illegal or improper payments. If all reasonable steps have been taken to collect and the illegal or improper payment becomes uncollectible within the 90-day time limit, the DO transfers the debt to the appropriate office designated to pursue collection of uncollectible debts. See Volume 16, Chapter 2 for debt collection processes. Although the debt is transferred to another office for further collection action, the DO remains pecuniarily liable for the illegal or improper payment until the debt has been collected or relief has been granted; see subparagraph 11.13.1.

11.13.3. Determination of Fraud. Double negotiations could indicate fraudulent intent or misrepresentation. A DO suspecting this, reports the situation utilizing guidance in Chapter 6, section 5.0 for possible investigative and/or disciplinary action. Pursue collection action as specified in Volume 16, Chapter 2, paragraph 13.1.

11.14 Relief of Liability for Uncollectible Illegal or Improper Payments

A DO may request relief of liability under 31 U.S.C. § 3527 (see Chapter 6, section 6.0).

11.15 Separation of Duties

The payment recertification process is subject to the same management controls as other routine disbursements. The same individual may not authorize, process, and review recertified payment transactions; see Chapter 1, subparagraph 3.5.2.

11.15.1. The minimum acceptable separation of duties consists of preparation of the SF 1184 by one individual, review and approval of the DD 2660 and SF 1184 by the DO or a DDO; preparation and certification of a disbursement voucher by an individual in the appropriate entitlement area, review and approval of the voucher with supporting documentation by a first line supervisor (other than the DO or DDO authorizing the transaction), and authorization of the disbursement by the DO or a DDO.
11.15.2. When the disbursement voucher is prepared in disbursing because of limitations imposed by automated disbursing system processes, or the combination of entitlement and disbursing functions into one unit (as is the case at small activities and most tactical units), the DO ensures that the duties of preparing the SF 1184, preparing the disbursement voucher, reviewing the transaction and supporting documents, and preparing the check are performed by different individuals.

12.0 TREASURY CHECKS CANCELED UNDER LIMITED PAYABILITY

12.1 Limited Payability

Treasury automatically cancels checks issued on or after October 1, 1989 not negotiated by a financial institution within 12 months of the date of issue. This cancellation occurs in the 14th month after the date of the check.

12.1.1. Pre-CEBA. Before CEBA’s effective date, 31 U.S.C. § 3328(a) allowed a Treasury check to be paid (negotiated) any time, and 31 U.S.C. § 3328(c) provided that the limitation on claims against the Government in 31 U.S.C. § 3702 (Barring Act) did not apply to an unpaid (not negotiated) Treasury check. Under the latter, the administrative statute of limitations allows consideration of claims to those filed within 6 years after they arise. The following examples illustrate these principles.

12.1.1.1. In December 1978, an individual submitted a $1,000 claim for lump-sum leave to DFAS. In January 1979, DFAS issued a Treasury check to the claimant, who did not negotiate the check until 1986. In this example, the underlying obligation is $1,000 or the amount due to satisfy the claim for lump-sum leave. Since the claim for payment was submitted in 1978, the provisions of the Barring Act were suspended (or tolled), meaning a claim was filed within the required 6-year period. Once the Treasury check was issued (1979), the individual also became entitled to a separate claim on that check, which, in 1979, was payable in perpetuity (31 U.S.C. § 3328(a)). Thus, before CEBA, the individual’s right to obtain a replacement check based on the claim to the original unnegotiated Treasury check masked the effect of the Barring Act on the underlying obligation.

12.1.1.2. Modifying the example in subparagraph 12.1.1.1 shows the effect of the Barring Act on the underlying obligation. In addition to the earlier facts, assume further that the individual discovered that he had failed to claim all that was due in December 1978 and that the agency in fact owed him another $250. He may obtain payment for the additional amount of the underlying obligation only if he submits a new claim for the additional amount to the agency within the six-year period following the accrual of the original claim, December 1978. If in 1986, however, the individual, in addition to negotiating the check, submitted a claim for the additional $250, the claim for the additional amount would have been barred since more than six years had lapsed from the accrual of the original claim.
12.1.2. CEBA

12.1.2.1. Obligation Underlying. The CEBA does not affect the obligation underlying the check. The CEBA left the two causes of action separate, one on the underlying obligation and one on the Treasury check.

12.1.2.1.1. The CEBA imposed a statutory limitation on the period during which a Treasury check may be paid and on any claim on account of a Treasury check. It requires the negotiation of a Treasury check within 1 year of its issuance date and states that any claim on account of that check is barred, unless the agency which issued the check receives a claim within 1 year of its issue date. After this period, a request for payment based on the check is barred.

12.1.2.1.2. The payee may still be entitled to payment based on the underlying obligation subject to the six-year statute of limitations in the Barring Act. Accordingly, after the 6-year period following the accrual of the claim, a check may be issued only if the claimant has tolled the Barring Act by making a timely claim on the underlying obligation. CEBA applies to the example in subparagraph 12.1.1.2. If the individual submitted the claim in December 1989 and the check was issued January 1, 1990, a claim on the check expired 1 year after the date of issue, December 31, 1990. Thus, the individual had to complete his claim on the Treasury check before the 1-year period expired in order to obtain a replacement check.

12.1.2.1.3. The CEBA also sets an 18-month statutory time limit from the date a check is negotiated to accomplish bank reclamation. If the statutory requirements for the claim are met and the proceeds of the check cannot be recovered from the banking system through bank reclamation procedures, Treasury issues the settlement check and charges the payment to the CFIF.

12.1.2.2. Underlying Obligation. The lack of availability of a replacement check does not affect a claim on the underlying obligation.

12.1.2.2.1. As an example, because a claim for payment was submitted timely (December 1989), the period of limitation as prescribed in the Barring Act was tolled, and a check may be issued even if more than six years has passed. Conversely, if a timely claim on the underlying obligation had not been received, the claim on the underlying obligation is barred and an agency may not issue a check. Therefore, a claimant who submitted a valid claim to toll the statute of limitations on the underlying obligation may obtain a replacement check even if more than six years have passed since the claim accrued or the check was issued.
12.1.2.2.2. Tolling the Barring Act on the underlying obligation does not permit payment in perpetuity. Entitlement to payment is not unlimited; any appropriate defense remains available to the government. If a claimant waits an inordinate period of time to request payment on the underlying obligation of a Treasury check under CEBA, then Doctrine of Laches (a legal term based on neglect or omission to do what one should, thus warranting presumption that one has abandoned right or claim; e.g., if a payee neglects or fails to file a timely request), the payer can presume that the payee has abandoned the claim) may apply. Further, Treasury records show only if a check has not been presented to it for payment, not whether it was presented to and paid by an intermediary bank.

12.2 Treasury Check Payability

Treasury canceled all Treasury checks issued before October 1, 1989. Those issued on or after that date bear the legend "Void After 1-Year." Treasury will decline payment of checks not negotiated to a financial institution within 1-year from their issue dates. Financial institutions will advise a payee to contact the check-issuing agency if a check is no longer negotiable. Stamp checks returned to the disbursing office as no longer payable (negotiable) "Void - Not Negotiable" and shred them after confirming receipt of the limited payability cancellation credit. Treasury checks issued before October 1, 1989 have already been mass canceled; shred them without confirmation of receipt of a limited payability cancellation credit.

12.3 Treasury Check Claimability

Any claim on a Treasury check is barred unless it is presented to the agency that issued the check within 1 year after its issue date. Since CEBA established a 1-year statute of limitations for claims against Treasury checks, DOs must reject all claims against Treasury checks not received before the expiration of the 12-month period of negotiability of the checks as time barred. DOs should notify claimants that claims of nonpayment of the underlying obligations of the government must be filed with the appropriate entitlement office (e.g., contracting officer for vendors or commercial payees, military pay office, civilian pay office, travel office). Under 31 U.S.C. § 3702(e), the Secretary of Defense may waive this time limitation on these canceled checks for claims under $25,000.

12.4 Limited Payability Check Cancellation

12.4.1. Outstanding Checks. During the 14th month after the date of issue, Treasury will identify and cancel all checks that have not been negotiated within 12 months from their issue dates. When check issues are not reported timely and are submitted after the limited payability processing period, Treasury will cancel those that are outstanding at the end of the month in which the check issued data is submitted, and credit funds derived from these cancellations to the **F3880 account.
12.4.2. **Canceled Check Listing.** DFAS-CL and DFAS-IN will receive limited payability cancellation credits monthly from Treasury with an SF 1081 and a listing of checks canceled. Where possible, Treasury will send the proceeds of these canceled checks through the CARS and IPAC systems; the transmission will include any detailed identifying information provided in the original check issue data submission. DFAS-CL and DFAS-IN will forward check credit information including the details applicable to DFAS-CO disbursing accounts to DFAS-CO. DFAS-CL will process or distribute applicable cancellation credit information for Marine Corps disbursing offices.

12.5 **Reversals of Limited Payability Cancellation Credits**

In some cases, checks will be negotiated to financial institutions within 1 year from the date of issue, but processing in the Federal Reserve System will prevent the payment from being applied to TCIS before limited payability cancellation has occurred. In these instances, Treasury will reverse the cancellation credit previously provided to the DO by an IPAC transaction and must provide a copy of the paid item to the DO. Reversal transactions are separate from the monthly cancellation credits.

12.6 **Accounting for Limited Payability Cancellation Credits or Reversals**

12.6.1. **DFAS-IN, DFAS-CL, and DFAS-CO.** Under 31 U.S.C. § 3334(a) (2), return the proceeds from canceled checks to the appropriation from which they were paid originally and treat them as accounts payable. Within 15 days of receipt, send the check cancellation and credit detail information to both the disbursing office that issued the check and the supporting accounting office. Any Treasury reversal of previous cancellation credits also should be forwarded to the applicable disbursing and accounting offices.

12.6.2. **Accounting Adjustments.** Transfer limited payability credits or credit reversals promptly from the **F3880** account to the appropriation charged when the check was issued. For exchange-for-cash checks, post the credits or reversals to Treasury’s deposit fund account 20X6133. The accounting office should establish an accounts payable for each credit or an accounts receivable for each reversal. Account for returned canceled check credits as current liabilities, as the amounts are subject to payment on request upon establishment of a valid claim to the funds. The DO must base entries to these new accounts on the transactions recording the return of canceled check credits to an appropriations account, and reductions for replacement payments to the payee or transfers to miscellaneous receipts upon expiration of the statute of limitations.

12.6.3. **Research.** Upon receipt of the detailed limited payability cancellation credit or reversal information from DFAS-IN, DFAS-CL, and DFAS-CO, the DO initiates research on the check issue data submitted to ensure that the detailed information provided is accurate, (e.g., the DSSN, check serial number, date of issue, and issue amount provided in the cancellation credit or reversal), all of which must agree with the original check issue data reported when the check was issued. Determine the cause of any discrepancy and correct it.
12.6.3.1. The DO also researches disbursing records to determine if a claim of loss, theft, or non-receipt has been filed on the canceled check, to include a determination of whether the check was previously replaced by recertified or other type of payment. The disbursing office also should notify the appropriate entitlement area (e.g., military pay, civilian pay, travel pay or commercial accounts payable) that Treasury has returned the credit to the activity because the check was not negotiated within the prescribed period.

12.6.3.2. Upon the request of an entitlement area, DOs should accomplish the verifications described in paragraph 10.5 and advise the entitlement area whether the original Treasury check was canceled, negotiated, or previously replaced.

12.7 Claims of Nonpayment of the Underlying Obligation

See paragraphs 12.1 on limited payability and 12.3 for treasury check claimability.

12.7.1. Claim of Individual Payees

12.7.1.1. Uniformed Service Members. Submit claims for nonpayment of uniformed Service members’ (active duty, reserve, retired, and annuitant) pay, allowances, travel, transportation, unused leave, and survivor benefits to the appropriate payroll office. Submit claims by transportation carriers involving amounts collected from them, for loss or damage incurred to property incident to shipment at government expense, to the appropriate payroll office. A determination will be made of the entitlement and verification that a timely submission of the claim was made on the underlying obligation.

12.7.1.1.1. Treasury checks issued in payment of obligations relating to uniformed Service members’ pay and allowance entitlements ordinarily are not issued in response to claims. A payee will not normally present a claim before issuance of the original check, thereby tolling the Barring Act. It may be necessary for the entitlement area to consider the extent to which the Barring Act was tolled during periods of active duty performed by the claimant. Include in the package the original check or facsimile and the original documentation from the claimant. When the claim of a member of the Armed Forces accrues during war or within 5 years before war begins, the claim must be received within five years after peace is established or within 6 years after the claim accrues.

12.7.1.1.2. If the payee submitted a timely claim and has not been paid, send the claim through the appropriate Component’s Assistant Secretary for Financial Management to the General Counsel, of the DoD requesting a waiver of the statute of limitations on the claim. If the General Counsel determines that the claimant is entitled to payment of a claim and if a payment voucher is prepared and sent with supporting documentation to the disbursing office, the DO determines if a replacement check should be issued.
12.7.1.2. **Civilian Pay.** Claims of nonpayment of Federal civilian employees’ compensation, wages, and leave earned by civilian employees of the U.S. Government must be submitted to the appropriate civilian payroll office for determination of entitlement and that a timely claim on the underlying obligation was submitted. Treasury checks issued in payment of obligations relating to Federal civilian employees pay entitlements ordinarily are not issued in response to claims. If it is determined that the payee has submitted a timely claim and that the payee has not been paid, the entitlement office certifies the claim and sends it to the appropriate disbursing office for payment.

12.7.1.3. **Civilian Travel Pay.** Claims of nonpayment of Federal civilian employees’ expenses incurred for official travel and transportation, and for relocation expenses incident to transfers of official duty station must be submitted to the appropriate travel office for determination of entitlement and that a timely claim on the underlying obligation was submitted. Treasury checks issued in payment of obligations for travel pay entitlements ordinarily are issued for claims presented in the form of travel vouchers by claimants. Unlike military and civilian pay cases, the Barring Act’s limitation in travel payment cases usually will have been tolled before issuance of the original check when the claimant submitted the travel voucher. If the payee submitted a timely claim and has not been paid, the entitlement office certifies the claim and sends it to the appropriate disbursing office for payment.

12.7.1.4. **Residual Claim Categories.** Treasury checks are issued to payees to satisfy miscellaneous government obligations. Legal claims under 28 U.S.C. § 1346(b) and 28 U.S.C. §§ 2671-2680 should be asserted by claimant-payees to the entitlement area within the Military Department with tort claim settlement authority over the claim.

12.7.1.4.1. Similarly, claims for losses incurred incident to government service may be cognizable under 31 U.S.C. § 3721 and should be asserted by claimants to entitlement areas with claim settlement authority, such as the Military Department’s judge advocate general. Treasury checks for payment of these types of obligations are issued to settle claims asserted by the claimants.

12.7.1.4.2. Unlike military and civilian pay cases, the Barring Act’s statute of limitations in residual claim cases usually will have been tolled before issuance of the original check when the claimant submitted the claim. If it is determined that the payee has submitted a timely claim and has not been paid, the entitlement office certifies the claim to the appropriate disbursing office for payment.

12.7.2. **Claims of Commercial Payees.** Claims of commercial payees are from vendors, contractors, and individuals under contract for miscellaneous services. Claimants or authorized agents submit these claims to the contracting officer, who determines if the claimant is entitled to payment and then sends the claim with supporting documentation to the disbursing office for payment.
12.7.3. Upon receipt of a claim approved by the designated settlement authority, a certified payment voucher from the appropriate entitlement area, and the proper supporting documentation, the issuing DO or the officer assigned to settle accounts for the issuing DO issues a replacement check.

13.0 HOLDER-IN-DUE-COURSE

13.1 Holder-in-Due-Course

A holder-in-due-course claim occurs when a non-banking institution negotiates a Treasury check and the check is lost or stolen before being presented for cash or deposit at a financial institution. Submit holder-in-due-course claims in writing to Fiscal Service for processing.

13.2 Holder-in-Due-Course Claims

Upon receipt of a holder-in-due-course claim, Fiscal Service determines the status of the check. If the check has been negotiated, Fiscal Service returns the claim with a copy of the check advising the holder that the check has been paid and that no further action will occur. If the check has not been negotiated, Fiscal Service provides the holder with an indemnity letter to complete (see Figure 7-2). Once Fiscal Service receives the requested information, and the check is still outstanding, it issues a settlement check to the holder.

13.3 Lost-in-Transit Check

Lost-in-transit items are Treasury checks that have been negotiated and subsequently lost by a financial institution, or lost or stolen between the financial institutions and/or the financial institutions and the FRB.

13.3.1. The FRB Atlanta, Government Check Adjustment Department handles these items if the Treasury checks are less than 1-year old.

13.3.2. If a DO or Fiscal Service receives a request to reissue a check that has not been canceled and is less than 1-year old, they must return the request to the financial institution advising it to submit the request to FRB Atlanta, Government Check Adjustment Department.

14.0 CHECK ISSUE REPORTING

14.1 Issue Report

Disbursing offices must report detailed check issue transmittals in a Level 8 format to the Treasury for update to TCIS with check issue detail. The DoD uses DCRM for direct submission of the check issue detail to the Treasury.
14.1.1. DCRM sends the check issue files via Connect Direct, an encrypted electronic host-to-host file transfer process. Enter the check issue detail data files into the DCRM database, which generates a daily electronic file to transfer the detailed check issue data to the Treasury. The DFAS administers DCRM, which tracks the status of all checks on hand and provides inquiry capabilities and reports to reflect issuance discrepancies and acceptance or rejection conditions of reporting.

14.1.2. DOs who do not have direct access to DCRM submit their check issue data to their supporting DFAS site, following that site’s guidance for upload into DCRM. Submit the Level 8 check issue data in the most secure method possible, (e.g., an encrypted file). DFAS-CL and DFAS-IN have electronic mailboxes for these submissions or other check issue concerns: dfas.cleveland-oh.zte.mbx.ccl-mb-checkissues@mail.mil for DFAS-CL and dfas.dscc.zte.mbx.cco-dcrm@mail.mil for DFAS-IN. Send requests for the DCRM Users’ Manual to the latter address.

14.2 Submission Requirements

14.2.1. Report detailed check issue data in sequential groups of checks, called transmittals, which uniquely identify the DSSN, accounting month and year, and check series. Submit a new transmittal each time a break in check numbers occurs, or when the issue month changes. DOs reporting check issues for multiple DSSNs submit separate transmittals for each DSSN. A submission of detailed check issue data may consist of one or more transmittals. DCRM reports check issue detail in blocks by DSSN, check series, and issue Julian date format (YYDDD) to the Treasury.

14.2.2. If a check series will not be reported sequentially due to the splitting of a check series range between different locations, uses, or DDOs, the DO reports the split check series range to the DCRM manager at (614) 701-2109, so an adjustment can be made to record the split check series range in DCRM. If check series range splits are not noted, DCRM creates unnecessary management notices about missing and unaccounted checks on its reports. Reporting avoids the additional workload entailed in reviewing and validating these notices.

14.2.3. Submit all check issue transmittals to the Treasury no later than the close of business at the end of the week in which the issue dates occur and at month end. DOs who submit their check issue transmittals through their supporting DFAS site ensure their supporting DFAS site receives their check issue data at least weekly and at month end.
14.2.4. Failure to report check issue data timely increases the possibility for loss caused by banking system errors, check alterations, and counterfeits. If a loss results from an altered or counterfeit check as a result of delinquent check issue reporting, the DO may be held liable for the amount of the loss. If the checks issued data are not reported in TCIS, the Treasury will not recognize the check as issued and will not process any actions, such as claims or limited payability cancellation credits, against the check. Also, the Treasury cannot complete a final reconciliation and clearance of a DO’s account until all check issue data is received. If the DO is habitually delinquent for 60 days or more, the Treasury may suspend the processing of further print orders for blank Treasury check stock until all delinquent check issue reporting has been accepted into TCIS.

14.3 DO Responsibility for Quality of Data Submitted

The disbursing office is responsible for ensuring the check issue data submitted to the Treasury is accurate. DOs notify their supporting DFAS site immediately after finding an error. DCRM transmits the accepted files to the Treasury each business day but does not change the data. Once TCIS accepts an erroneous check issue transmittal, the file cannot be deleted. Correct all errors before the file transfer process. If an erroneous data file has been sent to DCRM, but has not been forwarded to the Treasury, place the whole data file containing the erroneous check information in either a “replace” or “suspended” status. Contact your local DCRM manager or supporting DFAS site immediately to change the file from the accepted status in DCRM. In addition, the DO:

14.3.1. Ensures all check issue data submitted to the supporting DFAS site for processing agree with check issue totals on the DD 2657 and the SF 1219;

14.3.2. Submits corrected transmittal(s) within 10 workdays of notification of a rejected transmittal within a file transfer;

14.3.3. Recreates the previously rejected check issue data for a period up to 180 calendar days after submission or replacement of rejected data, if needed; and

14.3.4. Contacts the DCRM manager for further details on how to put an erroneous check file into either a replace or suspended status. To request or make corrections after a TCIS acceptance, follow paragraph 8.7.
14.4 Voided Checks

14.4.1. Report voided checks as zero dollar amounts in the proper sequence with those of other checks issued in the same check range. If a DO reports the check issue detail to the Treasury by sending it to another disbursing office for conversion to data files and/or uploads to DCRM, that DO ensures the voided checks are reported and clearly marked. Stamp or mark the hardcopy check issue listing to indicate that a check is voided and the dollar amount is zero. Do not obliterate the serial number of the voided check from the check listing. If a voided check has not been dated, report a date for the check to facilitate the check issue reporting. DOs submitting their own check issue data to the Treasury ensure inclusion of serial numbers and dates of the voided checks in the transmission with zero dollar values.

14.4.2. A DO who erroneously reported a voided check with a dollar value greater than zero (and the check is under 1 year old) initiates corrective action as soon as the error is discovered without waiting to receive the FMS 5206, and sends Treasury a written request to adjust the check issue detail in TCIS.

14.4.3. If the issue date of the erroneously reported check is over 1 year old, the voided check cannot be adjusted in TCIS; Treasury will issue a limited payability credit for it. Upon receipt of the credit in the **F3880 account, the DO reports the check as a check issue on the monthly SF 1219 and debits the **F3880 account to clear the limited payability credit.

(USE APPROPRIATE LETTERHEAD)

May 12, 20XX

MEMORANDUM FOR RECORD

This memorandum certifies that on May 12, 20XX, one hundred and one (101) spoiled Treasury checks serially numbered from 70,006,499 through 70,006,599 (inclusive) and seventy six (76) voided Treasury checks serially numbered from 70,006,621 through 70,006,696 (inclusive), all bearing disbursing station symbol number 7834, were completely destroyed by shredding.

J.A. HANCOCK
LT, SC, USN
Disbursing Officer

We, the undersigned, certify by signature herein that the checks listed above were physically verified by us and that all were completely destroyed by shredding in our presence on May 12, 20XX.

Figure 7-2. Sample Affidavit and Indemnity Agreement for Lost Treasury Check

**AFFIDAVIT AND INDEMNITY AGREEMENT FOR LOST U.S. TREASURY CHECK**

I, _____________________________, [hereinafter (“indemnitor”)] the undersigned, being of sound mind and over the age of 21, capable of making this affidavit and indemnity agreement, duly sworn, state that the indemnitee is the lawful owner of the U.S. Treasury Check Number __________, Symbol ______, Payable to __________________________, issued by the U.S. Department of the Treasury for the sum of $_________. Indemnitor further states that:

1. it/he/she is not in possession of the check now;
2. it/he/she was entitled to enforce the check when the loss of possession occurred;
3. the loss of possession was not the result of a transfer by it/him/her;
4. the loss of possession was not the result of a lawful seizure; and
5. it/he/she cannot reasonably obtain possession of the check because the check was destroyed, the check’s whereabouts cannot be determined, or the check is in the wrongful possession of an unknown person or person that cannot be found or is not amenable to service of process.

NOW, THEREFORE, in consideration of payment of said check to indemnitee of the sum of $________, indemnitee promises to indemnify, defend, and protect the U.S. Treasury from any loss or harm occasioned or sustained by the U.S. Treasury of account of payment of the above described check to indemnitee. THIS AGREEMENT SHALL BE INTERPRETED ACCORDING TO FEDERAL COMMON LAW, INCLUDING APPLICABLE U.S. TREASURY REGULATIONS.

## VOLUME 5, CHAPTER 8: “COLLECTIONS”

1.0 GENERAL

1.1 Overview

1.2 Purpose

1.3 Authoritative Guidance

2.0 TYPES OF COLLECTIONS

2.1 Receipts

2.2 Reimbursements

2.3 Refunds

3.0 COLLECTION TRANSACTIONs

3.1 Collections

3.2 Method of Remittance

3.3 Collections by Remote Cashiers

3.4 Performance and Bid Bonds (Storage and Safekeeping)

3.5 Negotiable Instruments

4.0 ISSUANCE OF RECEIPTS FOR COLLECTIONS

4.1 Turning in Funds

4.2 Collections by Deductions from Vouchers

4.3 Collections by Agent Officers

5.0 RECORDING AND CONTROLLING COLLECTIONS

5.1 Pending Payment File

5.2 Collection of Accounts Receivable

5.3 Collections for Other Agencies

5.4 Overages

5.5 Collection Voucher Control Log

5.6 Collections Overpaid or Underpaid by $1.00 or Less

5.7 Collections Made at Agencies Not Having a Disbursing Office

6.0 DOCUMENTING AND PROCESSING COLLECTIONS

6.1 Verification of Funds Received

6.2 Signature on Collection Vouchers

6.3 Preparation of Documents Used to Transmit Funds

6.4 Collection Documents
CHAPTER 8

COLLECTIONS

1.0 GENERAL

1.1 Overview

Collections are transactions that increase a Disbursing Officer’s (DO) accountability, but do not apply to the acquisition of United States and foreign currencies through the purchase with dollars or accommodation exchange transactions. They may also result from transfers of funds from one appropriation or fund to another by voucher deduction or a “no check drawn” transaction using a Standard Form (SF) 1080, Voucher for Transfers Between Appropriations and/or Funds; an SF 1081, Voucher and Schedule of Withdrawals and Credits; or by the U.S. Department of the Treasury's (Treasury) Intra-governmental Payment and Collection (IPAC) System. A collection voucher may be a combination of a payment and a collection by voucher deduction, e.g., a civilian payroll voucher where federal and state taxes are deducted. Vouchers must be retained in accordance with Volume 1, Chapter 9, section 2.0 which provides record retention requirements with emphasis on supporting audit readiness and contingency operations.

1.2 Purpose

This chapter addresses the legality and propriety of collection transactions and substantiating vouchers.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3302(c) (31 U.S.C. § 3302(c)) requires DoD DOs to deposit public money not being held for current expenditure in the Treasury or with a depository designated by the Secretary of the Treasury.

2.0 TYPES OF COLLECTIONS

2.1 Receipts

Receipts are collections into a Treasury miscellaneous receipt or other legally authorized account or fund. DOs collect them into their accountability using a DoD (DD) Form 1131, Cash Collection Voucher. They are recognizable by the absence of a fiscal/program year in the accounting classification. Disbursing from a receipt account is not authorized. “Adjusting out” an over collection requires processing a collection voucher as a negative receipt.
2.2 Reimbursements

Reimbursements are amounts earned and collected for property sold or services furnished to U.S. Government agencies or to the public, amounts collected from outside sources for payments made in error, overpayments, or adjustments for previous amounts disbursed. They are recognizable by the presence of an accounts receivable sales code within the accounting classification and shown as positive amounts on the DD 1131. A “negative reimbursement” occurs when a reimbursement is over collected and requires a return of funds to the remitter and is voucheded as a bracketed (negative) amount on a DD 1131.

2.3 Refunds

Refunds are recoveries of payments collected into a DO’s accountability as positive amounts on a DD 1131 using the same accounting classification as the one on the original disbursement voucher. Refunds may also occur as offsets shown as (bracketed) amounts on disbursement vouchers. They are reductions in disbursements rather than collections. Report refunds, documented on collection vouchers, on the DD 2657, Daily Statement of Accountability separately from those occurring as negative disbursements, which are reported simply as net of disbursements. Do not report refunds separately on the SF 1219, Statement of Accountability but include them in the calculation of net disbursements.

3.0 COLLECTION TRANSACTIONS

3.1 Collections

Collections are transactions that increase a DO’s accountability, but do not apply to the acquisition of U.S. and foreign currencies through the purchase with dollars or accommodation exchange transactions. All collection vouchers reported in the DoD business systems must meet standard line of accounting requirements. Document collections received by DOs on the appropriate collection forms and verify and record them in the accounting records. Funds received that are not creditable to appropriations (e.g., recoveries of losses of funds, or dishonored checks) are not “collections” because they do not change a DO’s accountability.

3.1.1 Voucher Supported Collections

3.1.1.1 Voucher supported collections create credits to appropriations, receipt or deposit fund accounts and involve:

3.1.1.1.1 Direct receipts (e.g., cash, checks, money orders, and electronic deposits);

3.1.1.1.2 Deductions on payment vouchers to cover indebtedness to the U.S. Government;

3.1.1.1.3 Other deductions on payment vouchers (e.g., deductions for federal taxes); or
3.1.1.4. Transfers between appropriations or funds, corrections of charges against appropriations, funds, or credits to appropriations or funds. Use an SF 1080 or SF 1081. Voucher supported collections may also occur in Treasury’s IPAC System (see Chapter 11, section 4.0). In some instances, (e.g., collections from dining facilities), only one collection voucher number for the entire accounting period (e.g., month) may be assigned. In this case, prepare the formal collection voucher on the last business day of that period. DOs may record daily receipts of this nature on the DD 2657 to Other Transactions, and U.S. Currency/Coinage on Hand.

3.1.1.2. Separate negotiable instruments (checks or money orders) received as collections from accompanying accounting documents at the initial stage of processing and deposit them (see Chapter 11, subparagraph 8.3.2.1). If the identification of the appropriation account is not known at the point of origin (at time of deposit), credit either F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for IPAC, as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 - 8.10.3 for additional information. Upon determining the proper accounting classification, use an SF 1081 to charge the appropriate budget clearing account or deposit fund and credit the proper appropriation or fund. Do not issue checks for these transfers.

3.1.2. Collection Classification Transactions. Voucher supported collections create credits to appropriations, receipt or deposit fund accounts and are received on a DD 1131, recorded in the accounting records, and reported to Treasury through Collections Information Repository (CIR) citing the proper Treasury Account Symbol (TAS), Business Event Type Code (BETC) combination. Unvouchered collections occur when cash or negotiable instruments are received and not credit to an appropriation or fund or not supported with a formal collection voucher (e.g., dishonored checks cashed, losses of funds, and some check issue overdraft discrepancies). Document unvouchered collections on the Optional Form (OF) 1017-G, Journal Voucher and utilize a Classification Transactions and Accountability (CTA) transaction to credit and debit the proper program TAS.

3.1.3. Cash Collections Deposited the Same Day. If the full cash amount associated with a DD 1131 is deposited the same day and are reflected in the DO accountability, the DO Cash TAS is not impacted. DOs must utilize Over-the-Counter Channel Application (OTCnet), citing the BETC and TAS associated with the collection voucher on the deposit ticket. Deposits in OTCnet are reported through CIR, which will feed the Central Accounting Reporting System (CARS) daily account statement showing an increase to the TAS associated with the collection voucher.
3.1.4. Collections Not Deposited the Same Day. Any portion of the cash associated with a DD 1131 that is not deposited the same day and is collected into the DO’s accountability must be reported as a CTA transaction. This will feed the CARS daily account statement, showing an increase to the DO Cash TAS and an increase to the program TAS on the collection voucher. Multiple collection vouchers may be consolidated under one transaction reported to Treasury if they fall under the same TAS/BETC and agency location codes. DOs must ensure that any transactions that are consolidated have an audit trail that can be validated at the individual transaction level.

3.2 Method of Remittance

Accept cash, checks, or other recognized forms of credit instruments payable on demand. Examples include certified or uncertified personal checks, corporate checks, bank drafts, Treasury checks with issue dates less than 1 year old, postal money orders, money orders issued by banks or other financial establishments, credit union share drafts, and warrants payable on demand. Draw these negotiable instruments in favor of a DO’s official capacity (i.e., position title, not name). Visa and MasterCard credit cards and debit cards are acceptable when presented for payment at locations participating in the Card Acquiring Service (see Chapter 11, section 3.0).

3.2.1. Commissary Sales Collections. Commanders may authorize commissary officers to accept Treasury checks from authorized patrons to pay for sales when available banks and other facilities are unable to furnish check cashing services but cannot authorize or require DOs or their agents to advance additional change funds to commissary officers to cash Treasury checks they receive. Commissaries may use the cash they receive for this purpose.

3.2.2. Remittance by Mail. DOs establish procedures to control receipt and processing of checks and other negotiable instruments received by mail. An individual that is independent of the collection function must receive these remittances and must not be the same individual who maintains the accounts receivable records. DOs must establish controls using the DD 2658, Returned and Undeliverable Check/Bond Record, or another effective method to maintain a record of transmittal of the instruments between functional areas.

3.3 Collections by Remote Cashiers

DOs acknowledge collections made by remote cashiers only upon receipt of certification of the actual monetary amounts.

3.4 Performance and Bid Bonds (Storage and Safekeeping)

The Federal Acquisition Regulation, Subpart 28.2, prescribes acceptance of only cash, certificates of deposit, or irrevocable letters of credit (ILC). Only ILCs issued by federally-insured financial institutions, in the name of the contracting agencies that identify the agency and solicitations or contract numbers for which ILCs are presented are acceptable.
3.4.1. **Negotiable Instruments.** DOs receiving remittances (e.g., checks, bank drafts, and money orders) as deposits for performance or bid bonds deposit them immediately in deposit fund account X6501 to be held pending settlement with the contractor.

3.4.2. **U.S. Bonds Deposited in Lieu of a Surety.** Under Title 31, Code of Federal Regulations, part 225 ([31 CFR part 225](#)), contractors may deposit certain U.S. bonds with contracting officers instead of furnishing corporate individual sureties on performance and payment bonds. DOs may not accept these bonds (whether electronic or hardcopy) for other than temporary safekeeping (e.g., overnight or over a weekend). DOs may provide space in a safe or vault for temporary safekeeping by placing the bonds and related documentation in a sealed package indicating custodianship and giving the contracting officer a receipt for the package (see Chapter 3, section 3.0). The contracting officer is responsible for transferring the bonds to the Federal Reserve Bank (FRB).

3.5 **Negotiable Instruments**

3.5.1. **Checks.** Remitters must make checks and other negotiable instruments payable to the order of the specific organization maintaining the account to be credited and not to the Treasury. However, if a check is made payable to the Treasury, the check must be accepted and processed immediately. Do not accept checks payable to a DO or employees of the federal government, whether by checks or through electronic means.

3.5.2. **For Deposit to the Credit of the Treasury.** Deposit the negotiable instruments in an FRB or branch or an approved general depositary for credit to the Treasury. Instruments drawn payable to the remitter are acceptable as inscribed if the remitter endorses them as explained in Chapter 11, subparagraph 8.3.6.3.1. For endorsements on negotiable instruments see Chapter 11, subparagraph 8.3.6. Post inscription instructions in strategic locations at cashier cages, commissaries, and other locations receiving these instruments.

3.5.3. **For Deposit in a Limited Depositary.** Keep limited depositary accounts in the name of the activity to which the DO is assigned (see Chapter 14, section 2.0). Instruct the remitter not to inscribe instruments payable to the DO by activity name.

4.0 **ISSUANCE OF RECEIPTS FOR COLLECTIONS**

4.1 **Turning in Funds**

4.1.1. **Indirect Collections.** Individuals other than DOs, DDOs, cashiers, or agents receiving funds belonging to the United States (including those to be held in trust) promptly turn over such funds to their supporting DO or deposit them in an authorized general depositary. These individuals may work within commissary, property disposal, personnel, and other offices authorized to receive funds due the United States. They are responsible for safekeeping funds in their possession pending deposit or turn-in. Collecting officers number documents sequentially by fiscal year. The DO, DDO, or agent receiving the funds signs and returns two copies of each DD 1131 (other than the original) to the collecting officer, distributing additional copies as required.
4.1.2. Direct Collections. A DO, DDO, agent, or cashier receiving a collection directly from a remitter prepares a collection voucher for the amount collected. The supporting Defense Finance and Accounting Service (DFAS) site determines the number of copies to give the remitter. Only issue receipts for payment of bills received by mail in the disbursing office if the remitter requests it. Furnish receipts only for amounts received and verified by actual count. DOs, DDOs, or agents are prohibited from using “subject verification” to issue receipts, giving receipts “in blank,” or accepting receipts “in blank.”

4.1.3. Receipt Acknowledgement. Where an automated system is used, cashiers may sign receipts in their own name; otherwise, DOs, DDOs, or agents must personally sign the receipts. Signatures are not required for collection vouchers electronically validated by an approved public key infrastructure method. Before signing, the cashier or collecting official ensures that remittances are authorized collections in the correct amounts. The person accepting the remittance should not be the same person updating the accounts receivable record.

4.2 Collections by Deductions From Vouchers

If requested, give payees receipts for collections made by voucher deduction. This includes other divisions or activities that may require notices of collection.

4.3 Collections by Agent Officers

4.3.1. Collections. Agents of appointing DOs may sign receipts for funds.

4.3.2. Proceeds of Sales. When funds are deposited with agents, they complete receipts on the original and three copies of the DD 1131 as agents of their DO and submit the original and two signed copies of the DD 1131, together with supporting documents, with their financial reports to the DO. Return one signed copy to the appropriate collecting official as receipt for the funds. The format for the receipt is:

Richard Roe, Lt Col, (Component)

By: _________________________
Name and Type of Agent

5.0 RECORDING AND CONTROLLING COLLECTIONS

5.1 Pending Payment File

The affected functional area maintains a pending payment file and associated copy of the uncollected billing document(s) unless the supporting DFAS site directs otherwise. Send the original and duplicate copy of the documents to the customer from whom reimbursement is expected (see paragraph 2.2). Arrange the files in the order most convenient to the person maintaining the file, reconciling it quarterly to the accounts receivable subsidiary ledgers.
5.2 Collection of Accounts Receivable

5.2.1. Payment of Bills. When payment is physically presented to a cashier, the cashier annotates a copy of the bill as “Paid” and initials it. If the cashier is presented the original bill, he/she stamps or notes it “Paid” with date of payment, initials, and returns it to the remitter. Attach paid copies of bills to the DD 1131 and forward them to the affected functional area daily for recording. For automated billings, the responsible functional area prepares the DD 1131 (cash payments) or an SF 1080 (payroll deductions) as part of the automated collection posting process.

5.2.2. Clearance of Component Bills. An individual being transferred from the Component notifies the appropriate functional area and billing office to ensure settlement of all unpaid telephone bills, utilities, and similar liabilities. The responsible functional area ensures the collection of pending bills, makes any required adjustments on a new bill, marks the old bill “Void,” attaches it to the paid copy of the new bill, and completes the clearance form.

5.3 Collections for Other Agencies

5.3.1. Identifiable Collections. Issue a receipt for an identifiable collection applicable to an account maintained by another fiscal station if requested or required and process the collection as a transaction for others. Include the complete identity of the remitter, account, fiscal station, and appropriate fiscal data on the DD 1131.

5.3.2. Unidentifiable Collections. Do not process a collection for another fiscal station for which the accounting classification is not immediately identifiable as a transaction for others. Deposit the collection into F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for IPAC, as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 thru 8.10 for additional information. Upon determining the correct accounting classification, process an SF 1080 as a transaction for others to clear the suspense account.

5.4 Overages

Process an overage in a DO’s account as a collection to F3875 no later than the business day after the overage occurs. Resolve overages no later than the fifth business day after the end of each quarter or, upon the DO’s relief from disbursing duty, no later than the fifth business day following the date of relief. Consider collections and returns from agents when determining the source of the overage. When reasons for overages are explained, and there is reasonable assurance that no claim will be made against them, credit it directly to the Treasury’s receipt account R1060, Forfeiture of Unclaimed Money and Property.
5.5 Collection Voucher Control Log

Maintain a daily **DD 2659**. Voucher Control Log, for collection vouchers the disbursing office receives or prepares. The DO determines the functional areas and assigns individuals to maintain this form. Assign each functional area and/or branch disbursing office a separate series of voucher numbers. Include the collection voucher number, identification of the remitter (name of remitting individual or organization), amount, and instrument of remittance (e.g., check, cash, traveler’s check, electronic funds transfer (EFT), or a no pay adjustment). Annotate a check/EFT trace number in column d “OTHER.”

5.6 Collections Overpaid or Underpaid by $1.00 or Less

When a remitter overpays an amount due totaling $1.00 or less, collect the overpayment into receipt account 1099 (Fines, Penalties, and Forfeitures, Not Otherwise Classified). Refund it only if requested by the remitter. Also, if a payee underpays an amount due that totals $1.00 or less, prepare an SF 1080 charging the DoD Component’s Operations and Maintenance account and credit the applicable appropriation (or receivable) for the underpayment. Do not pursue collection action for underpayments totaling $1.00 or less.

5.7 Collections Made at Agencies Not Having a Disbursing Office

Agencies not co-located with or supported by a disbursing office that receive collections must:

5.7.1 Collection Control Log. Use a log to control the collections from the time of receipt until they are transmitted to the disbursing office. At a minimum, show the date of receipt, remitter, check or money order number, collection voucher number, amount of collection, and the date transmitted to the disbursing office.

5.7.2 Collection Voucher. Prepare a collection voucher the same day the DoD Component receives the collection.

5.7.3 Safeguarding the Collection. Safeguard the collection and supporting documents (see Chapter 3, section 3.0).

6.0 DOCUMENTING AND PROCESSING COLLECTIONS

6.1 Verification of Funds Received

6.1.1 Verification. Functional areas ensure that collections are proper, vouchers have complete and accurate data, and required copies are available. A disbursing office detecting an improperly prepared voucher returns it to the functional area for correction.
6.1.2. Funds Deposited by Collecting Officers. When a collecting officer deposits collections directly to a general depository, the disbursement office processes them in the DO's account upon receipt of the collection voucher (or receipts for collection). The deposit ticket and supporting collection vouchers are the basis for verification of receipt of the funds. If the collecting officer does not provide a confirmed copy of the deposit ticket, advise him/her to furnish it upon receipt.

6.1.3. Purpose of Collection. Include the purpose of a collection (e.g., contract lease, applicable regulation, schedule, cost list, or other document that authorizes the collection) on, or as an attachment to, a collection voucher. If a sales contract is involved, cite the contract in the reference information. If the purpose of a collection cannot be determined, account for it in F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for IPAC, as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 thru 8.10 for additional information.

6.1.3.1. Transfer to account 20X6133, Payment of Unclaimed Moneys, amounts of $25 or more that have been held for more than 1 year, are authorized to be refundable, but cannot be refunded because the individual’s location is unknown.

6.1.3.2. Transfer to R1060 unclaimed amounts of less than $25 or amounts of $25 or more that have been held for more than 1 year for which the rightful owner can be neither identified nor located.

6.1.4. Numbering Collection Vouchers. Assign collection voucher numbers consecutively starting at the beginning of each fiscal year based on numbering instructions provided by the DFAS site that receives the financial reports.

6.1.5. Legibility of Copies. DOs ensure the legibility of all copies of vouchers prepared for distribution.

6.1.6. Routing Original Collection Vouchers. The disbursement division of each disbursement office sends original collection vouchers to the supporting DFAS site.

6.2 Signature on Collection Vouchers

6.2.1. Responsibility. The DOs, DDOs, or agent officers sign original collection vouchers in permanent, non-erasable ink; this duty may not be delegated or reassigned. Officers using cash control machines or mechanized equipment to validate vouchers are exempt from this requirement (except when a DD 1131 is processed for further action by a disbursing office not collocated with the processing disbursing office) so long as the machines and control of them meet minimum security and audit requirements. The DO or DDO controls the keys for these machines. Digital signatures may also be used following the guidance in Chapter 1, subparagraph 3.5.3.
6.2.2. **Internal Controls.** The DO implements controls to ensure that all funds received by the cashier are accounted for properly. The DO or DDO holds copies of the vouchers bearing the cashier’s initials. In making daily settlement with the cashier at the end of the business day, these copies determine if the amounts of the collections the cashier reported were proper. The receiving officer’s signature is required where applicable (see subparagraph 4.1.3). The DO or certifying officer, as applicable, signs transfer, cancellation, or adjustment vouchers (SF 1081) and an **SF 1098**, Schedule of Canceled or Undelivered Checks. If the same voucher is both a disbursement and collection, the disbursement is the original subject to the signature requirements in paragraph 6.2; the collection is a copy and does not require a signature.

6.3 **Preparation of Documents Used to Transmit Funds**

6.3.1. **Responsibility.** An officer depositing or transmitting funds to a disbursing office prepares the forms listed in subparagraphs 6.4.1 and 6.4.4). Except for collections arising from over-the-counter sales (e.g., commissaries), include the name of the remitter, the specific authority for the collection, and information sufficient for the DO to identify the collection and determine that the correct amount is cited on each collection document. The officer preparing the form also furnishes the complete accounting classification as prescribed; fiscal code, including the Disbursing Station Symbol Number of the station maintaining the appropriation cited; and the country code when the collection is made in an overseas area.

6.3.2. **Preparation and Distribution.** Prepare each collection voucher in duplicate, with additional copies as required.

6.4 **Collection Documents**

6.4.1. **DD 1131.** Use this when governing directives do not otherwise prescribe other forms. It may serve as a cover voucher for other receipt forms.

6.4.2. **SF 1098.** Use this form to collect the proceeds of an available canceled Treasury check (see Chapter 7, paragraph 10.4).

6.4.3. **SF 1080.** Use this form to transfer amounts between appropriations and/or funds.

6.4.4. **SF 1081.** Similar to the SF 1080, this form also transfers amounts between appropriations or funds and may be used for corrections of charges and credits.

6.4.5. **DD 139.** Pay Adjustment Authorization. Use this form for salary offset collections.
VOLUME 5, CHAPTER 9: “DISBURSEMENTS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated October 2020 is archived.

CHAPTER 9

DISBURSEMENTS

1.0 GENERAL

1.1 Overview

1.1.1. Disbursement. A disbursement is a payment to an individual or organization for goods furnished or services rendered. It may also be a transfer of funds from one appropriation or fund to another by a “no check drawn” transaction using a Standard Form (SF) 1080, Voucher for Transfers Between Appropriations and/or Funds; SF 1081, Voucher and Schedule of Withdrawals and Credits; or by the U.S. Department of the Treasury's (Treasury) Intragovernmental Payment and Collection (IPAC) System. See Volume 10, Chapter 10, paragraph 2.3 for detailed guidance regarding disbursement vouchers for intragovernmental reimbursement and transfer transactions. A negative disbursement is a refund.

1.1.2. Disbursement Voucher. A disbursement voucher may be a combination of a payment and collection by voucher deduction (e.g., a civilian payroll voucher where deductions for Federal tax, U.S. savings bonds, and civil service retirement are credited to the appropriate accounts) and the net pay is disbursed to the payee. All disbursements must be supported by disbursement vouchers (e.g., SF 1080; SF 1081; SF 44, Purchase Order-Invoice-Voucher; or SF 1034, Public Voucher for Purchases and Services Other Than Personal).

* 1.1.2.1. Disbursement Voucher Certification. A disbursement voucher for payment made to a non-federal entity that creates pecuniary liability as described in either 31 United States Code (U.S.C.) § 3527 (31 U.S.C. § 3527) or 31 U.S.C. § 3528 must be certified by an appointed Certifying Officer per (31 U.S.C. § 3325(a)(1) and (b)), (see Chapter 5, section 1.3) with Certified Officer Legislation (COL). A disbursement voucher that transfers funds from one appropriation or fund to another, transfers funds between appropriations, transfers funds for payment(s) that are entirely within the Federal government, or is not in support or execution of a subsequent payment transaction does not require a Certifying Officer with COL certification.

1.1.2.2. Electronic funds transfer (EFT) and U.S. Treasury Check. Report EFT (includes International Treasury Services for payments in foreign currencies) and U.S. Treasury check disbursements to Payment Information Repository citing the proper Treasury Account Symbol (TAS)/Business Event Type Code (BETC).

1.1.2.3. No Check/Voucher for Transfer. Report no check/voucher for transfer utilizing a Classification Transactions and Accountability (CTA) citing the proper credit and debit two-sided transaction citing the proper TAS/BETC.

1.1.2.4. Cash and Limited Depositary Accounts (LDA) Checks. Report cash and LDA check disbursements utilizing a CTA transaction citing the Disbursing Officers (DOs) Cash TAS/BETC and the program TAS/BETC listed on the disbursement voucher. Multiple disbursement vouchers may be consolidated under one transaction reported to Treasury as long as
they fall under the same TAS/BETC and Agency Location Code (ALC). DOs must ensure that any transactions that are consolidated have an audit trail that can be validated at the individual transaction level.

1.1.2.5. Disbursement of Foreign Military Sales funds require the request and receipt of expenditure authority before certification of a voucher for payment (see Volume 15, Chapter 4, section 9.0). Chapter 15, section 8.0 provides record retention requirements with emphasis on supporting audit readiness and contingency operations.

1.1.3. Interagency Disbursing Support. The Enterprise Solutions and Standards, Disbursing Division of the Defense Finance and Accounting Service (DFAS) provides the DoD’s policy for interagency disbursing support and IPAC. DoD’s disbursing offices and their servicing accounting office coordinate with other U.S. Government agencies on establishing IPAC Trading Partner Agreements (see Chapter 11, subparagraph 4.3). The DFAS email address is: dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil.

1.2 Purpose

This chapter addresses the legality and propriety of payment transactions, substantiating vouchers, payment of compensation, advances, payment to third parties, equitable claims, and certified disbursement vouchers. It also addresses disbursement forecasting, processing of disbursement vouchers, disbursements from deposit fund and budget clearing accounts, and payment in support of advance payment pool agreements.

1.3 Authoritative Guidance

DoD authorizes DOs under (31 U.S.C. § 3321(c)(2)) to disburse public funds on receipt of vouchers certified by an appointed certifying officer (see 31 U.S.C. § 3325 and Chapter 5, paragraph 3.4).

2.0 POLICY

2.1 Legality and Propriety

2.1.1. Sanction of Law. Examine payment transactions for legality, propriety, limitations, and time frames under the statutes governing the various classes of expenditures and for validity under general provisions of law.

2.1.2. Decisions and Responsible Offices. A DO may request an advance decision on the propriety of any perspective payment according to the procedure outlined in each section’s standard operating procedure (see Chapter 12, section 3.0). DOs are not pecuniarily liable for payments they make based on advance decisions.
2.2 Substantiating Vouchers

2.2.1. Written Record of Transaction. Unless otherwise mandated by law, each transaction by an officer, agent, or employee of the U.S. Government that requires payment of money from the Treasury or payment by a DO or agent of the U.S. Government requires a written or approved electronically signed document or series of documents that includes a complete record of the transaction.

2.2.2. Electronic Transactions. The Federal Reserve Banks (FRBs) are Treasury’s fiscal agents. Each disbursing office processing disbursements maintains a detailed written agreement with the supporting FRB. The DO must implement internal controls to confirm that the FRB receives EFT payment files successfully.

2.2.3. Additional Evidence. A DO is not required to make payment merely on the submission of formal evidence. If the facts do not justify payment, a reasonable explanation or the submission of further evidence is required.

2.3 Payment of Expenses

Using public funds to pay the expenses of a commission, council, board, or other similar body is prohibited by 31 U.S.C. § 1346 unless the creation of the body has been specifically authorized by law.

2.4 Advances, Prepayments, and/or Overpayments

A DO generally may not make advance payments, prepayments, or overpayments of public monies, but 31 U.S.C. § 3324; Volumes 5, 7A, 8, 9, and 10; and the Joint Travel Regulations allow limited advances and prepayments.

2.5 Payments to Third Parties

2.5.1. General. Unless specifically authorized by law, monies the government owes to an individual are not subject to attachment, garnishment, or other legal processes. Do not certify or make payment to a third party even if the payee requests it. This restriction applies to all funds including those held in trust by the DoD.

2.5.2. Levy and Distraint for Delinquent Taxes. Salaries and wages of officers and employees of the U.S. Government, including members of the Armed Forces, are subject to levy and distraint (the ability to force or compel satisfaction of an obligation by means of seizure) for delinquent federal taxes in accordance with 26 U.S.C. § 6331.

2.5.3. Payments to Bankruptcy Trustees. A civilian employee or military member may file an appropriate bankruptcy petition under 11 U.S.C. § 109. During the bankruptcy proceedings, the bankruptcy court may order the individual's pay to be sent to the bankruptcy trustee. Such payments are proper and DOs incur no additional liability as a result. See Volume 8, Chapter 8, section 5.0 for civilian employees and Volume 7A, Chapter 50 for military members.
2.5.4. Successor in Interest. DOs may make payments due to contractors, court appointed trustees, receivers, or other legal representatives (see Volume 10, Chapter 3, section 5.0).

2.5.5. Assignment of Claims. A transfer by the contractor of its right to be paid by the government for contract performance to a bank, trust company, or other financing institution, as security for a loan made to the contractor. See Volume 10, Chapter 3, section 4.0, the Federal Acquisition Regulation (FAR), Part 32.8 and Defense FAR § Subpart 232.8, for more information regarding the responsibilities for assignment of claims.

2.5.6. Authorized Withholdings and Allotments of Pay. Deductions from military and civilian payrolls for specific purposes (e.g., retirement, taxes, health benefits, group life insurance, allotments, and voluntary payments for child support or alimony) are supported by statutory authority under 5 U.S.C. § 5525.

2.5.7. Payments to Financial Organizations for Credit to Persons' Accounts. Under 31 U.S.C. § 3332, Federal wage, salary, and retirement payments must be made by EFT to financial organizations for credit to payees’ accounts (e.g., Merchants National Bank, Cr: John Doe, Account Number: 346-839, Taylor, MI 04180) (see also Volume 7A, Appendix C; Volume 8, Chapter 1, section 3.0; and Volume 9, Chapter 8, paragraph 2.2).

2.5.8. Garnishment of Pay for Child Support, Alimony, and Commercial Debts. Salaries and wages of military members and civilian employees may be garnished for child support and alimony (42 U.S.C. § 659), and for commercial debts (non-child or spousal support) (5 U.S.C. § 5520a).

2.6 Equitable Claims

Claims not founded on contracts, either expressed or implied, but on merely equitable or moral grounds are permitted only after direct authorization by Congress.

2.7 Insurance Fee

The government is self-insured (or bonded). Neither a DO nor any of the DO’s agents may insure public funds or property.

2.8 Municipal Services

Absent specific statutory authority, a DO may not pay for municipal services (e.g., police and fire protection) if those services are required to be furnished to private citizens at no cost (see Volume 10, Chapter 12, paragraph 3.15).
2.9 Questionable Payments

See Chapter 12 for alternatives available in connection with questionable payments.

2.10 Certified Disbursement Vouchers

2.10.1 Authority. DoD authorizes DOs under (31 U.S.C. § 3321(c)(2)) to disburse public funds on receipt of vouchers certified by an appointed certifying officer. When the disbursement voucher is certified by someone independent of the disbursing process, the DO has the discretion to make the payment.

2.10.1.1 Certified Vouchers. Certified vouchers must contain complete and accurate data. Contents of these vouchers and supporting documents may vary slightly depending on the type of disbursement and form used. Write signatures and other information that become integral parts of original vouchers in permanent, non-erasable ink. Handwritten information must be legible. Approved electronic signatures are acceptable (see Chapter 1, subparagraph 3.5.3).

2.10.1.2 Voucher Corrections. Return certified vouchers requiring correction to the functional area. Disbursing office personnel may not make these corrections. Corrected vouchers require recertification before disbursement.

2.10.1.3 Travel Vouchers. Accept a legible copy of a signed travel voucher and its supporting documents received in lieu of the original for processing and payment as if it were the original. This includes travel vouchers and supporting documents received by facsimile transmission or scanned images forwarded via email.

2.10.2 Essential Data. Certified disbursement vouchers must contain the following minimum essential data:

2.10.2.1 Voucher Heading and Date. This includes the complete name and mailing address of the paying disbursing office, the date the voucher is prepared, the disbursing office voucher number, and the disbursing station symbol number (DSSN) in the “Paid By” (or “Brief”) block (see Table 9-1).

2.10.2.2 Accounting Classification

2.10.2.2.1 The Treasury Financial Manual (TFM), Volume I, Part 4A, Chapter 2000, section 2070 (1 TFM 4A-2070) requires that a voucher certified as correct and proper for payment include an accounting classification against which the disbursement will be charged. Code each charge to an appropriation or fund with a complete accounting classification, and country code when applicable. List the information on a continuation form if the space available is insufficient.
2.10.2.2. The type of payment or the supporting DFAS site dictates acceptable continuation forms. Do not show titles of appropriations or deposit fund accounts. Entering extraneous information (e.g., voucher collection data) may result in the inclusion of erroneous information in accounting records and reports. A certified disbursement voucher may cite more than one appropriation, deposit fund account, or subsidiary account (group two or more subsidiary accounts of the same appropriation by that appropriation).

2.10.2.3. On foreign currency disbursements, show the total amount of the foreign currency disbursement; disbursing office personnel enter the conversion rate and U.S. dollar equivalent (USDE) on vouchers certified for payment in foreign currency.

2.10.2.3. **Amount to Be Disbursed.** Cite the total amount of the disbursement on the voucher in conjunction with the related accounting classification. Any alteration invalidates the certification (see Chapter 5, paragraph 5.6).

2.10.2.4. **Method of Disbursement.** Show the method of disbursement in the space provided on the certified disbursement voucher. In order of preference, the methods are:

2.10.2.4.1. EFT (includes *International Treasury Services (ITS.gov)* for payments in foreign currencies),

2.10.2.4.2. No check/voucher for transfer,

2.10.2.4.3. Treasury check,

2.10.2.4.4. Limited Depositary Check, and

2.10.2.4.5. Cash (only if specifically authorized by the payee's commander when it is determined that no other alternatives exists due to operational conditions).

2.10.2.5. **Payee.** List only the individual or organization entitled to the proceeds of the payment on the voucher. Under 10 U.S.C. § 2785, a DO may not change the remittance address. Also, under 31 U.S.C. § 3325(d), certified vouchers must contain the payee’s taxpayer identification number (TIN), a unique nine digit identifier assigned to all individuals by the Social Security Administration and to businesses by the Internal Revenue Service (IRS). See Volume 10, Chapter 8, paragraph 2.7 for the requirement of a TIN on a certified payment voucher.

2.10.3. **Payment on Forged or Fraudulent Vouchers or Pay Receipts.** A DO is pecuniarily liable for payments based on forged or fraudulent vouchers. A DO, Deputy DO (DDO), agent, or cashier making such a payment may request relief of liability for such payments (see Chapter 6, section 6.0).

2.10.4. **Voucher Storage.** Follow Chapter 3, section 3.0 to safeguard original paid vouchers.
3.0 DISBURSEMENT FORECASTING

3.1 Daily Disbursement Forecasting

Treasury's Bureau of the Fiscal Service (Fiscal Service) manages the government's daily cash position and disbursements affecting this position. DOs must therefore report to Treasury on a daily basis their anticipated aggregate level of planned disbursements for each disbursing method (e.g., wire, Automated Clearing House (ACH), check) for the following 5-day period. Each entity that performs its own disbursing submits one consolidated report by 3:00 p.m. eastern time daily following a Fiscal Service standardized reporting process. See the reporting process at the 1 TFM 4A-4000.

3.2 Large Dollar Disbursements

The 1 TFM 6-8500 requires DOs to report, in advance, deposits and disbursements totaling $50 million or more. The deposits and disbursements reports include single transactions, multiple transactions of a common nature, or repetitive transactions. For deposits and disbursements between $50 million and $500 million, DOs are required to submit the report a minimum of 2 business days in advance of the settlement date. For deposits and disbursements of $500 million or more, DOs are required to submit the report a minimum of 5 business days in advance of the settlement date. If specific deposit or disbursement information is not final, agencies must inform Fiscal Service daily as soon as possible, but no later than 8:30 a.m. eastern time on the transaction settlement date, of the approximate amount and approximate deposit or disbursement date.

4.0 DISBURSEMENT VOUCHERS

4.1 Numbering Disbursement Vouchers

Assign disbursing voucher numbers consecutively starting at the beginning of each fiscal year based on guidance from the supporting DFAS site to which financial reports are submitted. Identify voucher numbers with the disbursing office, not the DO.

4.2 Department of Defense (DD) Form 2659, Voucher Control Log

Keep a Department of Defense DD 2659, Voucher Control Log, daily for disbursement vouchers received or prepared in the disbursing office. Include in the log the disbursement voucher number, name of the payee, amount, form of payment (e.g., EFT, check, cash), and check/EFT trace number under “other.” This log summarizes daily disbursement and collection transactions, and ensures the entering of all vouchers in the accountability records. It functions as a cross check against the DD 2657, Daily Statement of Accountability, and DD 2665, Daily Agent Accountability Summary, to summarize disbursement and collection transactions; enables comparison of vouchers paid by check to total checks written, and of vouchers paid by cash to cashier paid vouchers; associates returned and undeliverable checks with applicable vouchers; and transmits vouchers showing voucher numbers used, unused, or voided.
4.3 Certification of Vouchers

4.3.1. The applicable entitlement areas (i.e., military, civilian, travel, and vendor pay) ensure that all payments are proper, prepare the correct number of copies, and ensure that all vouchers contain complete and accurate data.

4.3.2. Certifying officers examine payment vouchers before certification to ensure that the information on vouchers agrees with all supporting documentation (see Chapter 5, section 5.0).

4.3.3. DOs must have access to the DD 577, Appointment/Termination Record - Authorized Signature, to verify that vouchers submitted to DOs for payment have been certified by persons authorized to certify vouchers, and disburse money only in accordance with vouchers certified by authorized certifying officers. A disbursing office detecting an improperly prepared voucher must return it to the functional area for correction and recertification.

4.4 Release of Cash

An individual entitled to a payment (the payee) must receive the cash and sign the voucher. All cash payments require receipts. Do not prepare duplicate receipts. DOs or their agents making cash payments must positively identify the payee using the photograph on the payee’s DoD Common Access Card. Other acceptable forms of identification include a driver's license and other identification normally acceptable in the banking community to cash checks or bonds. The responsibility for payee identification may not be delegated. In cases of cash payment, the exchange of currency and the receipt for it must be simultaneous. Requiring receipts in advance of actual cash payments is prohibited.

4.5 Cash Payment Vouchers

The responsible entitlement areas send or deliver these vouchers to the cashier area. Payees may hand carry vouchers when the distance between the entitlement area and cashier area makes this impractical, provided the total amount of the voucher is inscribed in words on the bottom of the voucher (e.g., “sixty dollars and twenty cents”). Space words or enter lines in a manner to preclude alteration by inserting additional words, particularly at the beginning of writing (e.g., prevent insertion of “one hundred” immediately preceding “sixty dollars and twenty cents”).

4.5.1. Cashier Responsibilities. If the voucher deduction block is used on a payment voucher, the cashier must verify that it contains an appropriation and the total to be paid is net of any deductions. After verification of these items, the cashier must initial the original voucher to identify who made the payment.

4.5.2. Payee Signature. Cashiers must obtain the payee's signature in the space provided, or in the case of multiple payments, on the sub-voucher or supporting documentation. The payee signs for receipt of cash using permanent, non-erasable ink. Facsimile signatures and signatures in pencil are unacceptable. When signatures of payees are on a sub-voucher or supporting documentation, annotate the “payee signature block” on the cover voucher with the words, “See attached.” Positively identify payees before making payments. Compare the signature obtained
on vouchers to signatures on identification cards or other acceptable forms of identification. The form of the signature must be the same as the payee as shown on the voucher. In the signature block, the payee must sign the first name, with additional initials, if any, followed by the surname, except as explained in the following subparagraphs.

4.5.2.1. Unable to Write. A payee unable to write may indicate receipt of payment by signing an “X.” A disinterested party, whose address must be on the form, must witness the form. If the payee is physically unable to write and asks someone to sign in his or her presence, the signature requires verification by a disinterested witness and is regarded as a signing by the payee. File a physician's note addressing the payee’s inability to sign with the original disbursement voucher.

4.5.2.2. Disability Due to Mental Disorder or Mental Health Condition. Do not pay a payee who is disabled due to a mental disorder or mental health condition and cannot comprehend a signature except in the presence of an appointed legal guardian. File certified copies of court papers appointing a legal guardian with the original disbursement voucher. The legal guardian signs the name of the payee, followed by his or her own signature as legal guardian. Refer to the first disbursement voucher by DO voucher number and date paid on future payments to substantiate the legal guardianship. If the payee is in an asylum, file the superintendent’s certificate that the payee was alive at the time payment was due with each disbursement voucher.

4.5.3. Voucher Validation. Validate the voucher by completing the “Paid By” (or “Brief”) block with the paying office location, DSSN, and business date of payment, using a typewriter, automated system, or rubber stamp. Do not show the geographical location if the disbursing office has a classified address (see Table 9-1).

4.6 Check Disbursement Vouchers, Manual Voucher Processing

Responsible entitlement areas send manual check disbursement vouchers to the check issuing area for check preparation. The check issuing area enters the check number on the voucher in the space provided. Do not enter check numbers on duplicate copies of vouchers except for payroll and group travel vouchers. When payment is by check on an SF 1034, follow subparagraphs 4.6.1. – 4.6.5. A receipt is not necessary for payments drawn by the DO except when required by law or contract.

4.6.1. Checks Drawn on the Treasury. For payments by check drawn on the Treasury, enter the check number in the block near the bottom of the form titled “Check Number on Account of U.S. Treasury.”

4.6.2. Checks Drawn on LDAs. For payments by checks drawn on LDAs, enter the check number and the name of the LDA bank on which drawn in the block near the bottom of the form titled “Check Number On (Name of bank).” If it is a “no check drawn” voucher, state “no check drawn.”

4.6.3. Check Usage. Make checks payable to the payee stated on the disbursement voucher. Number disbursing vouchers sequentially with the lowest check number used to pay the
lowest numbered disbursement voucher or the first name on a payroll. Maintaining an unbroken sequence of check numbers facilitates check issue auditing and reporting. Consolidate multiple payments to the same payee on the same day, and pay them with one check. DOs must ensure that inscribed checks duplicate the voucher information. A DO may perform this review either before or after signing the checks. The DO ensures the completion of appropriate records to provide control over check writing. Automated systems producing disbursement vouchers must contain edit and validation controls to ensure the exact information appearing on the vouchers is passed to the check printer.

4.6.4. **Paid By.** See subparagraph 4.5.3.

4.6.5. **Automated Disbursement Vouchers.** The entry of check numbers on automated disbursement vouchers is not required so long as the voucher processing system maintains complete audit trails between disbursement vouchers and hard copy records.

4.7 **Check Disbursements Overpaid or Underpaid**

Do not collect an overpayment to a payee. Prepare an SF 1080 to charge the DoD Component Operation and Maintenance account and credit the appropriation originally charged for the payment. Similarly, do not issue a supplemental payment when a payee is underpaid unless the payee requests the payment.

4.8 **Transmittal of Vouchers and Recording**

4.8.1. DDOs, agents, and cashiers must include payment vouchers on the DD 2665 as prescribed in Chapter 15, subparagraph 2.1.2, and settle with the DO at the end of each business day.

4.8.2. For midday returns of cash on hand or an additional advance of funds, use a **DD 1081**, Statement of Agent Officer’s Account (see Chapter 15, section 4.0).

4.8.3. Entitlement areas send transfer, correction, and other disbursement vouchers not for payment by cashiers directly to the accountability area.

4.8.4. Return voucher copies to the entitlement area (i.e., military, civilian, travel, and vendor pay).

4.9 **Certification Restrictions**

The disbursing office supervisor may not routinely certify vouchers for payment, but may certify cover vouchers supported with properly certified sub-vouchers. In these cases, the approving official of the supporting documentation may not be the cover voucher certifier. If an emergency exists and the deputy, who is also a supervisor of the disbursing office, must certify a voucher for payment not supported with certified sub-vouchers, the DO or another DDO dates and signs the voucher that includes a statement similar to: “Payment approved by Lieutenant John Doe, Disbursing Officer” (see Chapter 5, section 5.0). To ensure adequate internal control, neither
the supervisor of the disbursing office nor other disbursing office personnel should be able to input data into the computerized accounting system.

4.10 Documentation Supporting Delivery of Payments

Documentation that supports delivery of payments includes a copy of the payment voucher, annotated copies of invoices, or other available media that provide information on payments delivered to payees as prescribed by functional area directives. This information may be in any form (e.g., printed, electronic) but may be subject to contractual requirements.

4.11 Deferred Vouchers

Deferred vouchers are paid vouchers not recorded in an accounting system, and are usually vouchers paid by an agent that must be returned for correction. They may also be vouchers paid by an agent but not yet examined by a DO. Deferred vouchers do not impact the DO Cash TAS until the voucher is processed. Responsible entitlement areas must act promptly to clear them. Keep a chronological record of actions taken, showing the date when clearance is expected. DOs or their DDOs review those actions weekly to ensure the correction of irregularities causing deferment without delay.

4.12 Classified Payments

4.12.1 General. A DO making payments classified for security purposes prepares a covering disbursement voucher. These may not contain information that requires a security classification. On the original and all copies show only the name and address of the payee, amount, date of payment, complete accounting data, voucher number, check number, DO's name, DSSN, and disbursing office payment data in the “Paid By” (or “Brief”) block. Payments under classified contracts should include instructions requiring the supplier to limit information on invoices so that supplies or services are identifiable only by reference to the contract. The DO (for collateral classified programs) or the voucher preparing office (for special access programs) allows access to classified documents to only those persons requiring access for the performance of their official duties.

4.12.2 Preparation. Personnel who process classified documents must possess a security clearance level equal to or higher than the documents they process. DOs or voucher preparing offices must assign duties (e.g., preparation of vouchers) so that only a minimum number of persons require access to classified information. Mark and store classified documents following prescribed security regulations. Do not attach classified essential supporting documents, invoices, or certificates to the original disbursement voucher, but identify them by the name of the DO, voucher number, DSSN, and the period of the account. Retain them at the paying disbursing office (for collateral classified programs) or the voucher preparing office (for special access programs) with other classified material. Include one of the following statements on the portion of the voucher for the description of the articles or services purchased:
4.12.2.1. **For Collateral Classified Programs.** “The documents supporting this voucher are located at the payment site with other classified material in accordance with (cite the applicable security regulation).”

4.12.2.2. **For Special Access Programs.** “The documents supporting this voucher are located at the voucher preparing office with other classified material in accordance with (cite the applicable security regulation).”

4.12.3. **Declassification.** Refer to appropriate security regulations for declassifying and downgrading, and to report classification abuses and improper classifications.

4.12.4. **Distribution.** Distribute the original and required copies of the covering disbursement voucher in the normal manner. Do not attach the classified supporting documents.

4.13 **Payments from Contingency Funds**

Use a **DD 281**, Voucher for Emergency or Extraordinary Expense Expenditures, to make payments from contingency funds.

4.13.1. Prepare the form to allow it to be unclassified. Classify supporting documents based on their content. A covering disbursement voucher is not required as described in subparagraph 4.12.

4.13.2. **Transmittal of Vouchers and Recording.** See paragraph 4.8.

4.14 **Hand Carrying Disbursement Vouchers**

4.14.1. **Vouchers Prepared Outside the Disbursing Office.** Send payment vouchers prepared outside the disbursing office to the disbursing office so that the payee does not have access to them.

4.14.2. **Vouchers Prepared Within the Disbursing Office.** The responsible functional area sends or delivers these vouchers to the cashier area. Where distance between the functional area and cashier section makes this impractical, see paragraph 4.5.

4.15 **Distribution of Paid Vouchers**

The disbursing office sends the original and necessary copies of paid vouchers to the appropriate DFAS site (see Chapter 15, paragraph 8.1 for proper record retention).

4.16 **EFT Payments**

4.16.1. EFT payments are sent to the FRB on debit vouchers showing the date payment is due. The DO must implement internal controls to confirm that the FRB receives the payment files successfully and on schedule, and retain the memorandum copy of the debit voucher. DOs that transmit payment files electronically use the FRB’s summary of ACH activity report in lieu of the
debit voucher. In either case, the FRB issues a confirmation debit voucher to the DO. For an EFT transaction, record the debit voucher as a negative deposit with the payroll, travel, or vendor payment recorded as a gross disbursement.

4.16.2. Returns. When a financial institution returns one or more EFT/ACH payments to a paying office, the DO prepares and processes a collection voucher to account for the returned funds, crediting them to the appropriation from which they were originally disbursed. EFT returns will be submitted back to the originating ALC crediting the TAS from which they were originally disbursed. Record the collection on the DD 2657 with an offsetting transaction to account for the deposit ticket from the FRB in processing the returned payment. The DO notifies the appropriate entitlement area of the returned payment by providing a copy of the collection voucher and any rejection information received (e.g., the reject code). See Treasury’s Green Book, Chapter 4, for a detailed listing of payment rejection codes. The entitlement area tracks, monitors, and researches the cause of the return and provides a recertified voucher to initiate an appropriate EFT/ACH payment within 5 business days.

4.16.3. Reclamations. DFAS Cleveland (DFAS-CL) DO, when notified of the death of a military retiree or an annuitant, contacts the decedent’s bank requesting the return of all payments made since the retiree’s or annuitant’s death. The DFAS-CL DO has three years from the date of the Financial Management Service (FMS) Form 133, Notice of Reclamation, to submit FMS 135, ACH Reclams. For additional information, see Treasury’s Green Book, Chapter 5, for detailed instructions.

4.17 Retention of Records

See Volume 1, Chapter 9.

5.0 DEPOSIT FUND AND BUDGET CLEARING ACCOUNTS

5.1 Disposition of Funds in Deposit Fund Accounts

5.1.1. Method of Disposition. Applicable functional areas dispose of collections received for deposit fund accounts using one of the following methods:

5.1.1.1. Payment to Other Individuals or Organizations. Use an SF 1034;

5.1.1.2. Refund to the Remitter. Use an SF 1034; or

5.1.1.3. Withdrawal for Application to an Appropriation, Receipt Account, or Other Deposit Fund Account. Use an SF 1081 for the disbursement and collection, and submit it as substantiation for either or both. The SF 1081 cannot be used for check or cash payment.

5.1.2. Vouchering. Only one deposit fund account may be charged on a single voucher. Submit charges to accounts F0109, Federal Tax Withheld from Payments to Nonresident Aliens; and F3875, Budget Clearing Account (Suspense), on separate vouchers.
5.1.3. **Civilian Pay Deductions.** When preparing an SF 1081 for adjustment of deductions from civilian pay, show deposit fund account symbols and amounts for withheld taxes and U.S. savings bonds on the same SF 1081 containing the necessary information.

5.1.4. **Withdrawals Involving Foreign Currency.** To repay foreign currency deposits at USDEs different from those at which they were deposited, see Chapter 13.

5.2  **F3875, Budget Clearing Account (Suspense)**

5.2.1. **Transfer of Funds.** Upon determining the proper disposition of funds in this account, transfer the amount on an SF 1080 or 1081 to the proper account. Explain the charges on the SF 1080 or SF 1081. See 1 TFM 2-5135 for guidance on the use of F3875. Use this account to hold unidentifiable collections temporarily for no more than 60 days, or use other business processes approved by the Fiscal Service. Payment is prohibited from the F3875 suspense accounts.

5.2.2. **Transferring Funds Out of Clearing Accounts (Suspense).** Utilize a CTA transaction to move the (cash) funds out of the clearing account to the proper program TAS, deposit fund account, or DO Cash TAS along with the proper adjustment BETCs. Utilize an SF 1080 or SF 1081 to document the charges and report the transactions within internal DoD systems.

5.2.3. **Disbursements Representing Funds Received for Other Government Agencies.** Send an IPAC payment or check payable to the Treasury and a copy of the disbursement voucher to the official of the agency requesting collection.

5.2.3.1. **Checks Payable to the U.S. Postal Service.** If the collection is for credit to a U.S. Postal Service appropriation or receipt account citing departmental prefix “18,” send the check and a copy of disbursement voucher to the Manager, Finance Branch, Eagan Information Systems/Accounting Service Centers, U.S. Postal Service, 2825 Lone Oak Pkwy, Eagan, MN 55121-9600.

5.2.3.2. **Checks Payable to Other Government Agencies.** For a collection for another government agency, send the check to the agency with a source and reason for collection.

5.2.4. **Transactions Rejected by the Accounting System.** Accounting Offices notify the DO and request the documentation needed to process the transaction successfully. DOs send the requested documentation to the accounting office within 30 days.

5.2.4.1. **Supporting Documentation Maintained Locally.** The DO sends the requested documentation to the accounting office immediately.

5.2.4.2. **Supporting Documentation Maintained at a Remote Site**

5.2.4.2.1. The DO notifies the entitlement area of the rejected transaction immediately by telephone or email.
5.2.4.2. If the requested information is not received within five working days of the initial request, send a formal, written request to the functional area, referencing the original request.

5.2.4.2.3. If no response is received within five working days of the second request, send a copy of the request memorandum, with a cover letter, to the site director or commander, as appropriate.

5.3 Overages

5.3.1. Disbursement Action. For an overage that should not have been accounted for as a collection, the responsible functional area prepares an SF 1034 payable to “Adjustments” to reverse the erroneous collection and permit proper accounting for the funds. Do not issue a check or a cash payment for this voucher.

5.3.2. Adjustments. If an amount was recorded in error as a collection to one of the following accounting classification other than F3875; F3885, Undistributed Intra-governmental Payments; X6500, Advances Without Orders from Nonfederal sources; X6501, Small Escrow Amounts, or X6276, Other Federal Payroll Withholding, Allotments (e.g., a collection from a sales official), the responsible entitlement area initiates the adjustment by preparing an SF 1081 charging one of the cited accounts and crediting the proper appropriation or fund.

5.3.3. Removal. If every reasonable effort to discover the proper disposition of the funds is unsuccessful, prepare an SF 1081 to remove the amount from the affected deposit fund account, and credit R1060, Forfeitures of Unclaimed Money and Property.

6.0 Treasury Disbursing Office (TDO)

The TDO initiative allows Treasury to become the Federal service provider performing payment and collection functions on behalf of DoD. The program also allows an agency to send and receive financial transactions directly to Treasury systems. The TDO program provides services to facilitate various disbursement and collections including contract, vendor pay, individual reimbursement, and miscellaneous pay (e.g., utility bills, credit cards). The TDO program is also a centralized post-pay actions that works in concert with customers, partners, and stakeholders to provide customized payment solutions that are expeditious while ensuring invoices or claims are valid against the government. Once fully transitioned from the legacy disbursing systems to TDO, DoD will continue to function as a non-Treasury disbursing office and provide services related to collections, advance payments, cash disbursements, agent payment and returns, accommodation exchange, contingency (e.g., combat zone, afloat, and military in support of disaster relief), and emergency disbursing transactions under 31 U.S.C. § 3321(c)(2). For additional information on the TDO initiative, see 1 TF 4A-3000 for scheduling payments disbursed by the Fiscal Service.
7.0 PAYMENTS IN SUPPORT OF ADVANCE PAYMENT POOL AGREEMENTS

7.1 General

An advance payment pool agreement:

7.1.1. Is a means of financing the performance of more than one contract held by a single contractor. Cash advanced to a contractor must be reported on the DD 2657 and be reflected on the DO Cash TAS until the money is returned or disbursed;

7.1.2. Is convenient for the financing of cost type contracts with nonprofit educational or research institutions for experimental or research and development work when several contracts require financing by advance payments. When appropriate, pooled advance payments may also be used to finance other types of contracts held by a single contractor; and

7.1.3. May be established:

7.1.3.1. To finance contracts for one or more departments or contracting activities;

7.1.3.2. In addition to any other advance payment pool agreement at a single contractor location when it is more convenient or otherwise preferable to have more than one agreement; or

7.1.3.3. Without regard to the number of appropriations involved. Under 31 U.S.C. § 1534, one appropriation may be charged for the benefit of another any time during a fiscal year so long as:

7.1.3.3.1. Amounts are available in both the appropriation to be charged and the appropriation to be benefited subject to limitations applicable to the appropriations, and

7.1.3.3.2. Any amounts paid are charged on a final basis by the close of the fiscal year to the appropriation benefited and the appropriation originally charged is appropriately credited.

7.2 Policy

7.2.1. Allow payment in advance of receipt of goods or services to educational and research institutions under 10 U.S.C. § 2307. Payments are allowed only if the contractor gives adequate security and after a determination by the head of the agency that to do so would be in the public interest. Security may be in the form of a lien on the balance in an account in which the payments are deposited. This lien takes precedence over other liens and is effective immediately upon the first advance payment of funds without filing, notice, or any other action by the United States. The total payments made may not exceed the unpaid contract price.

7.2.2. When multiple agencies or departments are part of the advance payment pool agreement, cite their funds on contracts. When more than one contract is involved in the advance
payment pool agreement, one or more of them, normally of large dollar value, is designated as the contract to which the advance payments are to be applied. Follow Volume 10, Chapter 10, paragraph 5.4 to process advance payments.

Figure 10-1. DoD Financial Smart Card Application (Page 1 of 4)................................. 15
CHAPTER 10
SMART CARDS FOR FINANCIAL APPLICATIONS

1.0 GENERAL

1.1 Overview

The DoD utilizes several Smart Card applications to conduct financial transactions in a number of settings. Smart Cards:

1.1.2. Include Stored Value Cards (SVC), debit cards, and combination cards (hybrids that contain both SVC and debit card features);

1.1.3. Store or provide access to “electronic funds” and a more secure method of handling funds; and

1.1.4. Alleviate the need to carry cash and provide electronic payment to vendors for items purchased or services rendered.

1.2 Purpose

This chapter provides:

1.2.1. Guidance for requesting approval to begin a Smart Card pilot program or to move from pilot to full roll-out, except when provided under the General Services Administration (GSA) SmartPay Contract; and

1.2.2. High-level disbursing guidance for SVCs, combination cards, and debit cards.

1.2.2.1. SVCs

1.2.2.1.1. The basic trainee SVC program (known as EZpay) is used as an advance of pay to basic trainees of the United States Army, Air Force, Navy, and Marine Corps.

1.2.2.1.2. The SVC used for United States deployed forces, known as EagleCash, is used for electronic financial transactions in overseas contingency locations.

1.2.2.2. Debit Cards. Debit cards are used as an alternate device for payments made by DoD agencies.
1.3 Authoritative Guidance

In accordance with Title 31, Code of Federal Regulations, part 208, Electronic Funds Transfer (EFT) is mandatory within the DoD, unless a waiver has been granted. Per Treasury Financial Manual (TFM), Volume I, Part 4A, Chapter 3000 (ITFM 4A-3000), SVCs and debit cards are available mechanisms for working towards compliance with the EFT requirement.

2.0 POLICY ON SMART CARD UTILIZATION

2.1 Overview

The policy and guidance set forth in this chapter is in accordance with the Department of Treasury (Treasury), ITFM 4-9000. Treasury guidance supersedes any conflicting information provided in this chapter. The Defense Finance and Accounting Service (DFAS) is assigned management and oversight responsibility for the functional aspects and the use of financial Smart Cards within the DoD, except for GSA Smartpay products. Written approval from DFAS is required for all pilot and full rollout Smart Card usage (e.g., stored value or debit) that employ either single purpose or multifunctional applications (combined financial/non-financial applications).

2.2 Smart Card Program Approval

2.2.1 General. If a DoD agency seeks to establish a new Smart Card program, the agency must submit a request for approval to the Director, Enterprise Solutions and Standards, Disbursing (DFAS-JJFKCB/IN), 8899 East 56th Street, Indianapolis, IN 46249-0500. Separate requests are required for each financial application. Electronic submissions may be sent to dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil.

2.2.2 Program Magnitude. Requests for approval must indicate whether the program is a pilot effort or a full rollout program.

2.2.2.1 Pilot Programs. Pilot programs are temporary and must be in operation for no less than 90 days and not to exceed 180 days. Pilots should be used to test card programs prior to full rollout.

2.2.2.2 Full Roll-Out Programs. Full rollout programs are non-temporary and must be in operation longer than 180 days. Full rollout of a card program should follow a pilot.

2.2.3 Smart Card Application Package. Requests for approval must be submitted as an application package to DFAS-JJFKCB/IN. The application package must be completed before approval of any pilot or full rollout of a card program. Include the following items in the application package:

2.2.3.1 Requesting Memorandum. The agency headquarters, or designated representative, should request approval of the pilot or full rollout program via memorandum. It should be addressed to DFAS, Enterprise Solutions and Standards.
2.2.3.2. **Application.** All pilot and full rollout programs are required to submit a completed DoD Financial Smart Card Application (Figure 10-1).

2.2.3.3. **Concept of Operations (CONOPS).** The CONOPS document should contain guidance on the use of the Smart Card program by the agency.

2.2.3.4. **Coordination.** The package must contain copies of coordination documentation, including the agency or component leadership’s and servicing Disbursing Officer’s (DO) endorsement of memoranda.

2.2.3.5. **Agency Smart Card Project Manager Documentation.** A copy of the letter designating the agency Smart Card project manager must be submitted with each package. See paragraph 2.4 for information on project managers.

2.2.3.6. **Analysis for Full Rollout.** If the request is to move from a pilot Smart Card program to a full rollout, include an analysis showing:

2.2.3.6.1. Any savings realized from the pilot program;

2.2.3.6.2. How the pilot program is an improvement over the pre-pilot environment; and

2.2.3.6.3. The results of relevant performance measures used during the pilot and proposed for the full rollout.

2.3 Memorandum of Understanding

The Treasury, Bureau of the Fiscal Service (Fiscal Service) and the agency implementing the program must establish a Memorandum of Understanding (MOU) prior to the implementation of a new Smart Card program (see subparagraph 2.2.1). The MOU describes the terms of the agency’s Smart Card program and the respective responsibilities of the agency and Fiscal Service for operation of the program. In addition, the MOU specifies the type of program and Smart Card(s) implemented by the agency, the agency’s funding schedule, and the fees and costs to be paid by the agency and Fiscal Service.

2.4 Agency Smart Card Project Manager

2.4.1. **Designation.** The agency must designate a Smart Card project manager and alternate in writing before implementing a Smart Card program.

2.4.2. **Responsibilities.** The agency must specifically identify the tasks for which the Smart Card project manager is responsible. The Smart Card project manager must manage the Smart Card program and the activities described in this chapter in accordance with the MOU between the Fiscal Service and the agency, the Smart Card standard operating procedures (SOPs) and other instructional documents, and program-specific policies and procedures developed by the agency in consultation with Fiscal Service. The specific duties of the project manager include:
2.4.2.1. Acting as the agency’s liaison among Fiscal Service, the agency, and other interested stakeholders;

2.4.2.2. Provides full support for the Smart Card program within the agency;

2.4.2.3. Develops and obtains agency approval for the CONOPS, Smart Card application, and other related plans for the implementation of the agency’s Smart Card program;

2.4.2.4. Secures agency funding approvals necessary for the Smart Card program;

2.4.2.5. Coordinates the agency’s implementation of the Smart Card program to include obtaining and maintaining the Security Assessment and Authorization, the Authority to Operate or similar approval, and the SVC program to access the agency’s computer networks so that the SVC can be deployed and operate as designed;

2.4.2.6. Oversees and obtains agency approvals for changes to the program;

2.4.2.7. Transfers sufficient funds to Treasury’s financial or fiscal agent to ensure full funding for the agency’s obligations with respect to outstanding Smart Cards;

2.4.2.8. Maintains accurate, up-to-date lists of accountable officers; and

2.4.2.9. Complies with other Smart Card program policies and procedures as described in the MOU, SOPs, and other Smart Card instructional documents.

2.5 Smart Card Accountable Officers

2.5.1. Designation. The agency must designate one or more Smart Card accountable officers. If the agency Smart Card accountable officer is already appointed as a DO, Deputy DO (DDO), or Disbursing Agent and the responsibilities of the card program are covered by the current appointment, no additional documentation is necessary for appointment. However, if these requirements are not met, then the agency must provide a Letter of Appointment or appointment by DoD (DD) Form 577, Appointment/Termination Record - Authorized Signature, assigning an individual or individuals as the Smart Card accountable officer(s). The Letter of Appointment will list the individual’s responsibilities. An additional letter will be required when the individual no longer serves as the Smart Card accountable officer. In addition to this documentation, the accountable officer(s) must fill out the Fiscal Service (FS) Form 2888, Application Form for U.S. Department of the Treasury Accountable Official - Merchant Stored Value Card (SVC), when directed by the agency Smart Card project manager.

2.5.2. Responsibilities. The agency must specifically identify the tasks for which the Smart Card accountable officers are responsible. The agency should segregate the duties appropriately in accordance with the agency’s policies and procedures. As applicable and appropriate, accountable officers are responsible for the duties and responsibilities of a certifying officer or a DO, depending upon the designation of the accountable officer per Title 31, United States Code (U.S.C.), sections 3322 (31 U.S.C. § 3322), 31 U.S.C. § 3325, and 31 U.S.C. § 3528.
and other applicable laws. The Smart Card accountable officers must manage the Smart Card program and the activities described in this chapter in accordance with the MOU between Fiscal Service and the agency, the Smart Card SOPs and other instructional documents, and program-specific policies and procedures developed by the agency in consultation with Fiscal Service. The specific duties of the accountable officers may include:

2.5.2.1. Issuing Smart Cards and Personal Identification Numbers (PINs) to cardholders while following all enrollment processes;

2.5.2.2. Accounting for outstanding Smart Cards and the funds associated with each Smart Card, to the extent the Smart Cards and funds are within the control of the agency;

2.5.2.3. Providing instructions to Treasury’s financial or fiscal agent as to the proper allocation of funds among the Smart Cards that are issued, by account number and, where feasible, cardholder name;

2.5.2.4. Maintaining accurate, up-to-date inventories of Smart Card program hardware and equipment, including point-of-sale (POS) terminals, laptops, kiosks, Smart Cards, and other items associated with the Smart Card program that are delivered to agency locations;

2.5.2.5. Safeguarding Smart Cards as sensitive items, to the extent the Smart Cards are within the control of the agency (the agency is accountable for Smart Cards issued by the agency at issuance locations); and

2.5.2.6. Along with the agency’s Smart Card project manager, complying with other Smart Card program policies and procedures as described in the MOU, SOPs, and other instructional documents.

2.6 Standard Operating Procedures

This chapter contains higher-level policy and disbursing accountability requirements for the use of various card programs that have been approved. DoD Agencies, responsible for programs listed within this chapter, are required to develop and maintain detailed SOPs that comply with all current applicable regulations and cover all aspects of their card program for daily operations and/or contingencies.

2.7 Loss of Funds

The DO is accountable for physical loss of funds and for overage of Smart Card funds. Should a loss or overage occur, the DO or designated representative should follow the guidance prescribed in Chapter 6, section 4.0.
2.8 Smart Card Ordering

Smart Cards are ordered through the applicable point of contact for the program (Fiscal Service or Fiscal Service’s financial agent/fiscal agent) and delivered to the appropriate site. The point of contact and designated agency representative(s) must establish procedures to determine card usage and a secure method of card delivery.

2.9 Security and Storage

Smart Card stock must be treated like blank check stock. Storage and security requirements for blank check stock are prescribed in Chapter 7, paragraph 3.7.

2.10 Lost or Damaged Cards and Replacements

If a Smart Card is reported lost, damaged, or malfunctioning, follow procedures laid out in the applicable MOU and SOPs. For all stored value and combination cards reported lost, stolen, damaged, or malfunctioning, a locally produced list should be created for audit purposes. For the U.S. Debit Card, contact Fiscal Service’s financial agent.

2.11 Theft, Fraud, Waste, and Abuse

Agencies participating in a Smart Card program must:

2.11.1 Include a process for reporting and educating Smart Card cardholders on how to promptly report any loss, theft, fraudulent, and unauthorized use of Smart Cards, PINs, passwords, or other security breach or malfunction involving the Smart Card program to Treasury or Treasury's financial or fiscal agent, and to the agency Smart Card Project Manager;

2.11.2 Aggressively investigate and prosecute (or assist in investigations, and prosecutions of) end-user theft, fraud, unauthorized use, or improper use of the Smart Card service that occur in agencies’ areas of operation, and assist in obtaining restitution for the party suffering the loss;

2.11.3 Ensure that appropriate anti-money laundering controls and procedures are in place, in order to document the flow of monies onto or off of a Smart Card; and

2.11.4 When a funds pool is used to fund a SVC; compensate the SVC funds pool for losses that result from theft, fraud, unauthorized use or other improper use of SVC equipment or resources for which agencies are responsible; unless the funds pool has been reimbursed from other sources, or the Treasury determines that such compensation is unnecessary or does not serve the SVC program’s best interests.
2.12 Audit Requirements

2.12.1 General. An initial inventory must be completed and recorded upon receipt of Smart Cards from the Fiscal Service or other designated representatives. After the Smart Cards are inventoried, a signed receipt must be provided to the issuing representative for their records. The DO or designated representative will complete a SVC inventory log when releasing Smart Card stock to authorized personnel and to monitor returns of all unused Smart Cards. The DO or designated representative must maintain a copy of the signed receipt for his or her records.

2.12.2 Monthly Inventory. At least once every calendar month, the DO or designated representative must inventory all Smart Cards secured in the vault. Any open container must be inventoried by individual count and by unique sequential numbers of the cards. All damaged containers, or those bearing evidence of having been tampered with, must be opened, and all cards must be individually counted and unique sequential numbers verified. A detailed record of the inventory, to include total cards on hand and unique sequential numbers by card type, must be retained in the disbursing office. At least once during each calendar quarter, the agency’s cash verification team must conduct an unannounced verification of any Smart Card stock (e.g., U.S. Debit Cards, EagleCash, EZpay) to include cards received, issued, returned, and on hand. A copy of the inventory must be given to the agency’s cash verification team as an attachment to their quarterly cash verification report.

3.0 EZPAY STORED VALUE CARD

3.1 Overview

The EZpay SVC program utilizes a Smart Card with an embedded computer chip, which is preloaded with a specific amount of funds (e.g., $300, $350, $400), that provides an electronic payment method for advance of pay to trainees of the U.S. Army, Air Force, Navy, and Marine Corps. The EZpay SVC is a substitute for coin and currency transactions and is issued to alleviate cash or check payments to trainees during training. The card is designed to provide basic trainees with access to their initial advance pay, a more secure method of money handling, and electronic payments to vendors for essential items needed during the first few weeks of training (e.g., haircuts, stationery, stamps, and toiletries). Personnel involved with administering the EZpay program are encouraged to access Fiscal Service’s Ezpay website. This website provides an overview of EZpay and includes items such as: getting started, common questions, acceptance sites, SVC facts, and the EZpay User’s Guide. EZpay SVC transactions do not impact the DO Cash Treasury Account Symbol (TAS) and are reported to Treasury through PIR (similar to EFT transactions) citing the proper TAS/ Business Event Type Code (BETC). Residual values on expired/cancelled cards will follow the EFT return reporting process.

3.2 Card Issuance

The DO or designated representative must maintain a vault inventory and issuance log for each denomination (monetary amount) of EZpay SVC stock received. This log must be used to maintain an inventory of card stock on hand and to control the release of cards to the issuing section or individual. When EZpay SVCs are issued, the DO or designated representative must examine
the log to ensure that all cards issued and cards returned unused, if any, are accounted for and that
cards are not removed without authority. Use a separate log sheet for cards with different fixed
monetary amounts. Do not mix cards of different values on the same sheet. The SVC inventory
log must contain the date of inventory, beginning card unique sequential number, ending card
unique sequential number, number of cards returned, number of cards issued for the day, number
of cards remaining in inventory, and the signature of the DO or designated representative.

3.3 Activation and Accountability

Detailed procedures for activation of EZpay SVCs must be included in the agency’s SOP
for issuance. Once an EZpay SVC is activated, the DO or designated representative must ensure
that the card number is indicated on the payroll document for tracking purposes and ensure the
amount is reflected as an increase in the DO’s accountability for that day’s business. A payment
in an amount equal to the total value of all EZpay SVCs activated that day will be forwarded to
the Treasury’s fiscal agent, which is the financial institution making restitution to the vendors for
card usage. The payment will be in the form of an EFT. The fiscal agent will complete the required
settlement action with vendors who accept the EZpay SVC. The total dollar value of the EZpay
SVCs activated for that day, with the exception of replacement cards issued, will always match
the total of the daily payroll document.

3.4 Residual Value on Expired/Cancelled Cards

Unclaimed balances on a SVC at expiration are identified as residual funds and, if possible,
are returned to the cardholder systematically by Fiscal Service’s designated financial or fiscal
agent. If systematic return is not possible, the agency and Fiscal Service initiate good faith efforts
to locate and return residual funds greater than $10.00 to the authorized SVC cardholder. Should
systematic or good faith return not be possible, residual funds greater than one year old are
transferred to the Treasury trust fund receipt account “Unclaimed Moneys of Individuals Whose
Whereabouts are Unknown” (31 U.S.C. § 1322) to be claimed with supporting documentation by
contacting Fiscal Service. See I TFM 6-3000 for additional guidance on residual funds.

4.0 EAGLECASH STORED VALUE CARD

4.1 Overview

The EagleCash SVC is a reloadable plastic card embedded with a computer chip that stores
“electronic funds” in its memory. The card is issued to deployed service members, DoD civilians,
and contractors. The card is used as a substitute for coins and currency transactions at concessions
and for services at military installations overseas during contingency operations (e.g., barber and
beauty shops, food court, post office, and Base Exchange). The card can be reloaded and
continually used throughout the tour of duty. The cards are issued by a Finance Office (inside or
outside the continental United States) and may be funded through a local pay, cash, personal check,
or the EagleCash Kiosk. For more information, visit Fiscal Service’s EagleCash website. This
website provides an overview of EagleCash and includes items such as: getting started, common
4.2 Card Issuance

The DO or designated representative will issue all cards used in this program. EagleCash cards with a zero dollar value may be issued to individuals who are authorized to receive check-cashing services as prescribed in Chapter 4, paragraph 3.1. The name of the individual, appropriate identification number, length of deployment, and bank account information are all collected during the issuance process. EagleCash cards can be issued at the deployed location or in advance of deployment by the Finance Office.

4.3 Activation

4.3.1 EagleCash Kiosk. When an EagleCash card is issued, it may be loaded with funds drawn by personal check, cash, or local pay. Additionally, a self-service card-processing device called the EagleCash Kiosk may be deployed in the field for the purpose of loading, unloading, and transferring funds to the EagleCash card.

4.3.2 Application Process. Before a cardholder uses a kiosk, he or she is required to complete the FS 2887, Application Form for U.S. Department of the Treasury Stored Value Card (SVC) Program. Completion of the FS 2887 gives the Treasury’s fiscal agent access to move money from the cardholder’s financial institution to the EagleCash card.

4.3.3 PIN. Bank information (bank routing number, account number, and type of account) is captured electronically or manually and embedded in the computer chip. A PIN is assigned at the chip level for use with the kiosk or at a Finance Office. The completed and signed FS 2887 must be forwarded to the Treasury’s designated fiscal agent who is authorized to initiate debit and credit entries to the individual’s financial institution. The FS 2887 will allow the cardholder to transfer funds between his or her financial institution and the EagleCash account. The DO must retain a copy of all completed enrollment forms.

4.4 Accountability

The accounting for entries of EagleCash must be recorded on the appropriate lines of the DD 2657, Daily Statement of Accountability. On each business day, using the EagleCash laptop, DOs, DDOs, Finance Officers, or their designated representatives collect all new account transactions and create a compressed “zipped” file. Email the file to the EagleCash Customer Service Center at eagle@frb.org, transmit it on line, or deposit it at another agency-designated location.

4.5 Residual Value on Expired/Cancelled Cards

If a cardholder departs the area before cashing out their EagleCash card, the Fiscal Agent must deposit the funds to the cardholder’s account on file after the card expires. A credit must be forwarded to the cardholder’s bank account via an Automated Clearing House (ACH) credit using information provided by the cardholder when signing up for EagleCash. If systematic return is not possible, the agency and Fiscal Service initiate good faith efforts to locate and return residual funds greater than $10.00 to the authorized SVC cardholder. Should systematic or good faith
return not be possible, residual funds greater than one year old are transferred to the Treasury trust fund receipt account “Unclaimed Moneys of Individuals Whose Whereabouts are Unknown” (see 31 U.S.C. § 1322) to be claimed with supporting documentation by contacting Fiscal Service. See I TFM 6-3000 for additional guidance on residual funds.

5.0 DAILY REPORTING REQUIREMENTS FOR STORED VALUE CARD

5.1 General

Daily reporting requirements for the EagleCash and EZPay Cash card programs are the same. Scenarios below impact the DO Cash TAS and must be properly reported to the Treasury.

5.1.1. SVC Sales or Load/Chip to Cash

Issued cards may be funded by personal check, cash, split pay, or transfer of funds from the cardholder’s home financial institution. Funding through split pay and the cardholder’s home financial institution does not impact the DO’s accountability/DO Cash TAS. Funding by personal check or cash increases the DO’s accountability/DO Cash TAS.

5.1.1.1. Personal Check. Submit a debit voucher citing the DO Cash TAS and applicable BETC to the Federal Reserve Bank (FRB) via DoD business system processes. The FRB will transmit the transactions to Treasury via OTCnet/CIR reflecting the proper TAS and BETC. Deposit the personal check citing the DO Cash TAS.

5.1.1.2. Cash. Submit a debit voucher citing the DO Cash TAS and applicable BETC to the FRB via designated system processes. The FRB will transmit the transactions to Treasury via OTCnet/CIR reflecting the proper TAS and BETC.

5.1.2. SVC Sales or Sale/Cash to Chip

Prior to departing a deployed environment, ship, or being separated from active duty, a cardholder may transfer any remaining value to their home financial institution or request a cash-out from the DO paid in cash or by U.S. Treasury check. The transfer of value to a home financial institution does not impact the DO’s accountability/DO Cash TAS. Additionally, vendors utilizing a point-of-sale (POS) terminal may request a cash-out for the dollar value equal to transactions on their POS terminal. Cash-out transactions decrease the DO’s accountability/DO Cash TAS.

5.1.2.1. U.S. Treasury Check. Submit a deposit ticket citing the DO Cash TAS and applicable BETC to the FRB via designated DoD business system processes. The FRB will transmit the transactions to Treasury via OTCnet/CIR reflecting the proper TAS and BETC. Report the U.S. Treasury check to Payment Information Repository (PIR) citing the DO Cash TAS.
5.1.2.2. Cash. Submit a deposit ticket citing the DO Cash TAS and applicable BETC to the FRB via designated DoD business system processes. The FRB will transmit the transactions to Treasury via OTCnet/CIR reflecting the proper TAS and BETC.

6.0 UNITED STATES DEBIT CARD PROGRAM

6.1 General

The United States Debit Card (USDC) program provides Federal agencies with the ability to deliver Federal payments through debit cards, as an alternative to checks, drafts, cash, and other non-electronic mechanisms. The cardholder may use the USDC to access authorized Federal payments at Automated Teller Machines, POS terminals, bank tellers, and other locations where access is permitted. If the USDC is MasterCard or Visa branded, the cardholder may use the USDC anywhere the applicable brand is accepted. For more information, visit Fiscal Service’s USDC website and the USDC Program website.

6.1.1. Program Administration. The USDC program is administered by the Fiscal Service, with the assistance of Fiscal Service’s designated financial agent. The USDC is a flexible payment mechanism used to deliver miscellaneous or nonrecurring payments to individuals, or to allow government employees or military personnel access to cash during their official duties.

6.1.2. Card Funds Access. After implementation of the USDC program, the agency disburses payments to a card account and the funds are accessed via a debit card issued to a Federal payment recipient. Cards may be funded through a Card Funding Account (CFA) owned by the Agency and held by the financial agent, through EFT via the ACH network, or by utilizing the Automated Standard Application for Payments system to authorize the financial agent to draw down agency funds. Funds held in a CFA must be reflected in the DO Cash TAS. DOs establish funds in a CFA through an EFT for Cash and record the funds on the DD 2657. Disbursements out of the CFA must be reported as cash disbursements.

7.0 DIRECT EXPRESS

Direct Express Debit MasterCard is a prepaid debit card offered to Federal benefit recipients who wish to receive their benefits electronically. The debit card offers the convenience and security of using electronic transactions to spend and access money rather than using cash for purchases. Recipients do not need to have a bank account to sign up for the card. The Direct Express Debit MasterCard is available only to individual Federal benefit recipients. For more information on the Direct Express Debit MasterCard, see the website.

CHAPTER 11

ELECTRONIC COMMERCE AND DEPOSIT OF PUBLIC FUNDS

1.0 GENERAL

1.1 Overview

Government entities disburse funds to and collect funds from individuals, businesses, and other government entities via cash, negotiable instruments, and a variety of electronic mechanisms.

1.2 Purpose

This chapter provides information and guidance on several electronic disbursement and collection mechanisms that are U.S. Department of Treasury (the Treasury) programs and services.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3322 (31 U.S.C. § 3322) and 31 U.S.C. § 3302 authorizes disbursing officers (DO) to deposit public funds and draw public funds from the Treasury or a depositary only as necessary to make payments. Additional statutes, regulations, and other guidance are referenced under each section of this chapter.

2.0 ELECTRONIC FUNDS TRANSFER (EFT)

2.1 Overview

In accordance with 31 U.S.C. § 3332, EFT is mandatory within the DoD. Exceptions to this mandate are provided in the Treasury Financial Manual (TFM), Part 4A, Chapter 2000 (1 TFM 4A-2000).

2.2 Electronic File Transmission

Payment or payroll files must transmit to the Federal Reserve Bank (FRB) by electronic file transmission.

2.3 Contractor Pay Applicability

Refer to Volume 10, Chapter 3, paragraph 4.8.

2.4 Official Authorization List (OAL) for the FRB

2.4.1 Overview. The OAL identifies all individuals who are authorized to transact business and provide instructions to the FRB on behalf of a disbursing office.

11-4
2.4.2. OAL Documentation. The OAL authorization letter, form, and instructions are located on the FRB Services - Account Services Forms web page. The disbursing offices must complete the form, notarize it, complete the Certificate of Resolutions Authorizing an Institution to Open and Maintain Accounts and Use Services (BR) form, and forward the documents to Treasury’s Bureau of the Fiscal Service, 401 14th Street SW - 409D, Washington, DC 20227 (treasuryOAL@fiscal.treasury.gov).

2.4.3. OAL Change Process. Each DO must validate their respective contact form for their office at least annually. If changes are required, follow the process in the FRB Service guidance located on the FRB Services web page in Table S.4 (Sending Point and Service Provider Contact form). Once completed, send a copy to Defense Finance and Accounting Service (DFAS), Enterprise Solutions and Standards, Disbursing (DFAS-IN/JJKCD), 8899 East 56th Street, Indianapolis, IN 46249-2700 (dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil) and submit the original to the Fiscal Service, who will sign and forward to the FRB.

3.0 CARD ACQUIRING SERVICE (CAS)

3.1 Overview

The CAS is a government-wide network that allows federal agencies to receive credit and some debit card payments (e.g., Visa, MasterCard, American Express, Discover credit cards, and some debit cards) due the Federal Government. These credit or debit cards can be used to collect payments from the general public and from Government entities for a variety of reasons, including, but not limited to sales of materials, services, fees, fines, debts, customs duties, and taxes. Fiscal Service designated one financial agent to process credit and debit card collections and to provide uniform nationwide credit and debit card services for federal agencies. Credit and debit cards may be used for collections received over-the-counter, by mail, by phone, or over the Internet. If an agency wants to accept payments through the Internet, the agency should work with Pay.gov in addition to setting up a CAS account. For more information about Pay.gov, see section 7.0. Information pertaining to the CAS is available on Fiscal Service’s (CAS) website.

3.2 Card Processing Rules and Regulations

Activities participating in the CAS must comply with the ITFM 5-7000 when processing credit and debit card transactions. In order to establish a processing relationship, activities must complete and submit the Card Acquiring Service Application (CASA) to Fiscal Service for approval. Prior to submission, activities must coordinate with their servicing DO.

3.3 Transaction Dollar-Value Limit

3.3.1. Maximum Limit. Effective June 1, 2015, agencies must limit their credit card collections to ensure an individual payment transaction does not exceed $24,999.99. There should be no purchases using the credit card in excess of $24,999.99. Effective October 1, 2022, the threshold for intra-governmental card collections is further decreased so that those individual transactions may not exceed $10,000.00. An attempt to bypass these limits will result in a rejected transaction at the point of collection. Agencies will ensure controls are in place to prevent splitting.
a purchase into smaller transactions. The payment–collection process will be stopped if the maximum limit for a collection is attempted. This information can be found at ITFM 5-7055.

3.3.2. Government Purchase Card Transactions. The $10,000.00 limit in subparagraph 3.3.1 also applies to intra-governmental transactions using the government purchase card when the agency accepting the card uses Treasury’s CAS. Individual credit card transactions exceeding the maximum limit cannot be split into two or more transactions over one or multiple days. If the agency’s cash flow includes individual credit card transactions greater than the maximum limit, the agency should use another electronic collection alternative for those transactions. Available electronic alternatives include Automated Clearing House (ACH), which is the primary system for EFT, and Fedwire, which is a gross settlement funds transfer system operated by the FRB.

3.3.3. Minimum Limit. Agencies may not establish minimum transaction amounts as a condition of honoring a credit or debit card. Only the Treasury may establish minimum limits and will do so only under special circumstances.

3.3.4. Purchase Card Payments. Requirements are in Volume 10, Chapter 23.

3.4 Processing Transactions

All activities must settle (balance or reconcile) on a daily basis, regardless of the amount accumulated that day. Activities will pay the assessed non-qualifying interchange fee when they fail to settle electronically every day. The network bank will inform the activity of its particular cutoff times for deposits. In an electronic environment, settlement transactions should take place through an Electronic Data Capture/Point of Sale at various times during the day (or once at the close of business) in order to meet the cutoff time for deposits.

3.5 Reports and Reconciliation

Based on the report requirements established in the participation agreement with the network bank, reports of the merchant's credit and debit card activity will be made available electronically by the network bank to the participating DoD activity (merchant). The summary will detail dates of deposits, dollar amounts of deposits, number of transactions processed, adjustment charges, and chargebacks. This report must be used to reconcile any differences which may occur between the report and entries into the accounting system. The report must also be reconciled with the DoD (DD) Form 1131, Cash Collection Voucher, submitted to the DO or Deputy DO, and the deposit information posted in the Collection Information Repository (CIR).

3.6 Internal Controls

Internal control procedures must be established by each participating DoD activity to ensure that credit and debit card transaction documentation, to support all DD 1131s submitted to the DO, is properly safeguarded. Documentation must be available for use by the DO’s quarterly cash verification board, the collection agent audit board, and for other audit purposes.
4.0 INTRA-GOVERNMENTAL PAYMENT AND COLLECTION (IPAC) SYSTEM

4.1 Overview

4.1.1. This section covers general information on the IPAC system. General requirements and technical specifications are fully prescribed by the Treasury on the Intra-Governmental Payment and Collection (IPAC) website (see Volume 10, Chapter 10, section 2.0).

4.1.2. The IPAC system is used for buyer-seller (e.g., reimbursable) transactions between federal agencies because it accomplishes the following:

4.1.2.1. Facilitates timely posting of collections to reduce receivable balances;

4.1.2.2. Eliminates the paper flow between agencies;

4.1.2.3. Eliminates the use of Treasury checks between agencies;

4.1.2.4. Improves cash management; and

4.1.2.5. Establishes the Treasury as the collection agency.

4.2 IPAC

The IPAC system’s primary purpose is to provide an automated standardized interagency funds expenditure transfer mechanism for Federal Program Agencies (FPAs). It facilitates intra-governmental Federal e-commerce by transferring funds, with related descriptive data, from one FPA to another on a real-time basis. The IPAC system enables FPAs to exchange accounting information and to transfer funds between FPAs involved in buyer-seller relationships. It establishes standardized interagency payment, collection, and adjustment procedures through an internet-based application. The IPAC system also includes a module for transmitting Retirement Insurance Transfer System transactions to the Office of Personnel Management (also see the IPAC website).

4.3 Originating the IPAC Transactions

4.3.1. Buy-Sell Agreement. Per I TFM 2-4700, Appendix 8, Buy-Sell Agreements are required between agency location codes (ALCs) in order to help facilitate the payment/collection process. The Buy-Sell Agreement contains agreed upon terms between the ALCs that help ensure necessary transaction information is provided so that both sides will be able to reconcile their transactions (also see the IPAC website).
4.3.2. Government Invoicing Initiative. In a daily reporting environment, agencies are required to use Treasury’s government invoicing (G-Invoicing) system (formerly named the Invoice Processing Platform). G-Invoicing is used to negotiate, broker, and electronically store the General Terms and Conditions between buyers and sellers for all inter- and intra-governmental reimbursable transactions as appropriate system capabilities become available. Additional information on G-Invoicing is addressed in Volume 11A, Chapter 2, subparagraph 3.1.3.

4.3.3. Initiating the Order

4.3.3.1. The customer agency must include its ALC on all requisitions or order forms forwarded to the billing agency. This code identifies the customer agency to be billed for services or supplies. The billing agency will provide the customer agency with appropriate instructions for transmitting this information. Also, the customer agency should include sufficient descriptive information on the requisition or order form, which the billing agency will place in the description section of the bill. This will enable the customer agency to later match the bill with the originating requisition in the customer's computer system. The primary match will be on the originating document number. By design, the IPAC system is not dependent on appropriation data as criteria to match an existing obligation since the Treasury transfers funds at the ALC level.

4.3.3.2. After fulfilling the customer agency’s requisition/order, the originating agency (based on whether it is a payment or collection transaction) must input the appropriate data in all the IPAC required data fields. Also, it must input the customer agency’s special requirements and any descriptive information, supplied with the requisition/order, in the appropriate fields of the IPAC transaction.

4.3.4. Initiating the IPAC Transaction

4.3.4.1. If the billing agency initiates a collection transaction, the transaction provides essential invoice information and immediately charges the funds to the 8-digit customer ALC. Within DoD, the 8-digit ALC is the 4-digit Disbursing Station Symbol Number (DSSN) preceded by four zeros. Upon fulfilling the customer agency's order or requisition for services purchased or supplies shipped, immediate payment is accomplished by the billing agency crediting its own ALC and charging the customer agency's ALC. A payment transaction initiated by the customer agency (e.g., disbursement) credits funds of the billing ALC when a hardcopy invoice is received. A payment transaction can also transfer payroll deduction type payments (e.g., Internal Revenue Service or Veterans Education Assistance Program).

4.3.4.2. Transactions can be input manually into the on-line system or created automatically by accounting or disbursing systems for bulk data transfer or host-to-host transmissions. The IPAC system automatically will issue an IPAC Document Reference Number that is the equivalent of a U.S. Treasury check number and will ensure that no two transactions have the same number.

4.3.4.3. Bulk files are queued for processing immediately upon receipt into the IPAC system; on-line transactions transmit in “real-time.” Whether an on-line or bulk data transfer transaction, the transaction originator must include a point of contact and telephone
4.3.4.4. A collection or disbursement voucher (e.g., DD 1131, Standard Form (SF) 1080, Voucher for Transfers Between Appropriations and/or Funds, or SF 1034, Public Voucher for Purchases and Services Other than Personal) must be prepared for each bill or payment entered in the system and processed through the DO in the same manner as other vouchers, except that no check or cash payment is sent or received.

4.3.5. Required Data Elements for Initiating IPAC Transactions. There are mandatory fields in the IPAC system for specific IPAC transactions. The Treasury requires these data elements and they vary by transaction type. The mandatory fields can be found at the IPAC website.

4.3.6. Other Required Information. There are three additional required data elements for DoD IPAC transactions, in addition to the Treasury required information. When initiating a payment or collection in IPAC, the sender Business Event Type Code (BETC), receiver BETC, and the receiver Treasury Account Symbol (TAS) are required for every transaction. Also, an ALC can require specific and/or descriptive data necessary for their ALC to process the transaction completely. This specific information should be in the Buy-Sell Agreement that was agreed upon by the participating ALCs. See I TFM 2-5135 for guidance for the TAS/BETC reporting of accounts F3500, Collections and/or Payments Default, and 3502, IPAC Default. Agencies must correctly reclassify, in the Classification Transactions and Accountability, all system defaulted transactions to a valid receipt or expenditure TAS by the third business day following the close of the accounting month.

*4.4 Processing Cycle

The IPAC system is available through the last day of each month to enter bills or transfers for that month. However, unless a different cutoff date and time is in the Buy-Sell Agreements, agencies will not process any new transactions the last five business days of the month to avoid month-end accounting problems. Also, when revising Trading Partner Agreements (TPA) to incorporate the new five workday cutoff, agencies must utilize Fiscal Service Forms 7600A and 7600B as the Department continues to migrate towards G-Invoicing. I TFM 2-4700, Appendix 8 states G-Invoicing was available for government-wide use with G-Invoicing Release 2.1, which allowed users to begin brokering General Terms and Conditions (GT&Cs) within the system. Each DoD reporting entity must apply the GT&Cs for intragovernmental transaction account reconciliation, derived from I TFM 2-4700, to all transactions with internal DoD trading partners currently using G-Invoicing for GT&Cs. Cancelling year transactions must also conform to the fiscal year (FY) cutoff requirement in section 12.0.

4.5 Recording IPAC Transactions

4.5.1. Under the Central Accounting Reporting System (CARS) initiative, partial and “Full” CARS reporters will no longer report IPAC transactions to the Treasury monthly, since they provide the information daily.
4.5.2. **Reconciliation.** An organization can print out its ALC’s activity from the IPAC system to help ensure all transactions are accounted for (see the IPAC website).

4.5.3. **Reporting of Unprocessed Transactions**

4.5.3.1. Unidentified transactions between federal agencies, including IPAC transactions, will be debited or credited to account F3885 (Undistributed Intra-governmental Payments). The Treasury identified a 3-digit limit, F3885.007, specifically for the IPAC system. All new transactions that remain unclassified at month-end will be recorded in F3885.007 (see ITFM 2-5135).

4.5.3.2. The detailed transactions and the reconciliation to the Treasury will remain in the existing tool used for recording and clearing unprocessed IPAC transactions.

4.5.4. **Receipt and Acceptance Internal Controls.** DoD financial reporting entities should include IPAC in intra-governmental transactions and must develop and implement internal controls to ensure that receipt and acceptance is properly documented. Entities must make this documentation available within the timeframe prescribed by an auditor when requested during audits.

4.6 **Adjustments**

Both the billing and customer agencies should recognize that the system cannot tolerate uncontrolled charges or adjustments. The adjustment function should not be used to adjust charges that originated under other billing systems. The charge should also not be considered erroneous simply because the customer agency receives the paid billing statement before supplies are received. If the receiving agency subsequently finds that the transaction was erroneous, the adjustment should occur at that time. However, the receiving agency has only 90 days from the creation date of the transaction to process the adjustment. The sending agency also has the ability to make an adjustment to an erroneous transaction prior to or within 90 days after its submission to the receiving agency.

4.6.1. There are some situations that warrant an immediate adjustment to a transaction. Some acceptable reasons for an immediate adjustment are:

4.6.1.1. Billing the wrong ALC for the transaction;
4.6.1.2. Funds cited do not belong to the billed ALC;
4.6.1.3. Appropriation cited has expired;
4.6.1.4. Transaction exceeds authorized funding;
4.6.1.5. Duplicate transaction; or
4.6.1.6. Noncompliance with required data elements set forth in a TPA.
Anytime a transaction appears to be erroneous, there needs to be sufficient reason to adjust it back. If you can take ownership of a transaction (e.g., a valid billing that belongs to your ALC), do not reject it without sufficient research and notification. Communication between trading partners is key to resolving erroneous transactions.

4.6.2. Contact the agency representative who created the original transaction. If the transaction is erroneous, the receiving agency will access the IPAC on-line system and make the menu selection for IPAC adjustments. The IPAC system will guide the user with prompts and contains edits to ensure that the original transaction matches to the adjustment transaction. Once the data is entered correctly, the system will issue an IPAC Adjustment Voucher Number unique to each transaction. Adjustments are considered a new transaction for reporting purposes and included in the net totals for the month in which the adjustment is accepted in the IPAC system.

4.6.3. In cases where the originating agency (e.g., the ALC that created the transaction) later concludes that the adjustment (or a portion thereof) was improper, it must communicate this to the receiving agency, preferably by email or via telephone. When the parties have reached an agreement, a second IPAC transaction will be prepared for the proper amount.

*4.7 Restrictions

The Treasury reserves the right to make any adjustments centrally in CARS and to remove any agency from the IPAC system in those instances when the agency fails to comply with the rules and regulations set forth by the Treasury. For additional information see the IPAC website.

5.0 TREASURY LOCKBOX NETWORK

The Treasury Lockbox Network is comprised of financial agents that provide lockbox and remittance service to the Treasury on behalf of federal agencies. The financial agents are strategically located to minimize mail, processing, and collection float. Lockbox processing was adopted as a means of accelerating deposits to the Treasury’s General Account at the FRB of New York. The Treasury (ITFM 5-4600) has prescribed guidance on lockbox service.

6.0 CREDIT GATEWAY

6.1 Overview

The Credit Gateway is a collection program for Fedwire and ACH credit transactions. For more information about Credit Gateway, see paragraph 6.2 for the hyperlink to Fiscal Service’s Credit Gateway.

6.2 Implementation

Activities who want to use the Credit Gateway must complete the new account setup form and email it to Fiscal Service. Fiscal Service will coordinate with the financial agent to assign an account number. Upon notification that the account number is active, the activity can provide the
account number to customers and receive payments. Activities interested in creating a Credit Gateway account should review the Fiscal Service’s Credit Gateway Get Started web page.

6.3 Credit Gateway Process

6.3.1. The activity advises the customer of the obligation due the Government, either by invoice, bill, letter, or other means. The agency also supplies the customer with the appropriate information to include in the transaction.

6.3.2. When the customer sends the payment through their financial institution, the FRB receives the transaction and credits the Treasury’s account.

6.3.3. Transaction information transmits to the Treasury via the CIR. The transaction information includes both detailed and summary deposit information. The activity can download the information from CIR.

6.3.3.1. Fedwire Reporting. CIR will report deposit information for Fedwires in near real-time.

6.3.3.2. ACH Credit Reporting. CIR will report future-dated and settled ACH credit entries.

7.0 PAY.GOV

7.1 Overview

Fiscal Service developed Pay.gov to meet a commitment of processing collections electronically using internet technologies. Pay.gov satisfies agencies’ and consumers’ demands for electronic alternatives by providing the ability to electronically complete forms, make payments, and submit queries 24 hours a day. Pay.gov is a secure, government-wide collection portal and provides a suite of services allowing agencies to obtain and process collections in an efficient and timely manner.

7.2 Services

The Pay.gov application is comprised of four services: billing/notification, forms, reporting, and collections.

7.3 Collections Service

The Pay.gov collections service has credit and debit card transaction and ACH debit transaction processing options. Activities that want to accept credit and debit cards through Pay.gov must apply for an internet merchant account with the Fiscal Service CAS. Pay.gov accepts several payment options:

7.3.1. One-time Payments. The customer submits a one-time payment to the activity.
7.3.2. **Recurring Payments.** The customer sets the payment details and establishes a specific interval of time between each payment. Payments continue until all payments have been made or the payments have been canceled.

7.3.3. **Deferred Payments.** The customer can enter and schedule a payment up to 30 days in advance. Customers performing a credit or debit card transaction cannot use this option.

7.3.4. **Preauthorized ACH Debits.** The customer can authorize the activity to submit payment information, on their behalf, for regular, recurring ACH debits. The customer must provide advanced, written authorization. The activity submits the payment information to Pay.gov.

7.4 Implementation

7.4.1. Prior to implementing Pay.gov, activities must obtain the approval of the servicing DO.

7.4.2. Activities considering use of Pay.gov are directed to Fiscal Service’s Pay.gov Getting Started web page. Guides and technical information can be found at the Pay.gov Agency Documentation web page.

7.4.3. DFAS established a Pay.gov team to provide assistance with new or changing Pay.gov activities. The DFAS Pay.gov team serves as a focal point for communicating with Treasury and can review, approve, and authorize all Pay.gov initiatives. Contact the DFAS Pay.gov team at dfas.indianapolis-in.ztd.mbx.pay-gov@mail.mil.

8.0 **DEPOSITS OF FUNDS**

Under 31 U.S.C. § 3302, custodians of money (e.g., DOs) holding cash or negotiable instruments in excess of either current requirements or the amount authorized to be held at personal risk, whichever is less, must make a prompt deposit in an authorized depositary of the Treasury for credit to the Treasurer of the United States. This does not apply to instruments to be returned to remitters in the form received (e.g., deposits of unsuccessful bidders for the sale of government property). Process all physically received, negotiable instrument deposit transactions through the Over-the-Counter Channel Application (OTCnet) and cite a valid TAS and BETC at the time of the deposit.

8.0.1. **Same Day Deposit.** Cash collected and deposited prior to the end of the business day does not impact the DO Cash TAS. Deposited funds must cite the appropriate TAS/BETC that appears on the DD 1131.

8.0.2. **Deposit Operating Cash No Longer Needed.** Cash that is reflected on the DD 2657, Daily Statement of Accountability (on the ending accountability and deposited lines), must cite the DO Cash TAS/BETC at the time of the deposit.
8.1 OTCnet

8.1.1. Overview. OTCnet is a web application that lets federal agencies manage and report all check and cash deposits in one place. OTCnet automates the over-the-counter deposit process, captures detailed accounting information, and makes the classification of Treasury collections easier. It allows agency users to report receipts through a secure web-based application rather than by using paper-based credit vouchers. There are “off-line” check capture capabilities for activities operating in locations with intermittent or unavailable bandwidth and communication. For more information about OTCnet, see Fiscal Service’s OTCnet web page.

8.1.2. OTCnet Requirement. Process all physically received, negotiable instrument deposit transactions through OTCnet. Agencies unable to use OTCnet for deposits of negotiable instruments due to contingency operations must establish depositary arrangements with US Bank’s Mail-In Treasury General Account (MITGA) through the FRB of St. Louis. This includes the deposit of commercial checks and U.S. Treasury checks. For more information on MITGA, see subparagraph 8.3.1.2.

8.1.3. Deposit of Cash and Negotiable Instruments. When using the OTCnet Deposit Reporting function, the depositing agency may combine cash and negotiable instruments into one deposit.

8.1.4. Required Information in Block 6. At a minimum, Block 6 of the OTCnet deposit ticket must identify the depositing entity’s name and location, the deposit preparer’s name, email address, and the deposit preparer’s phone number. The extent of additional information required in Block 6 is at the discretion of the DO.

8.1.5. Handling of Scanned Negotiable Instruments. After scanning items in OTCnet, retain the scanned negotiable instruments until verifying that they reside within OTCnet and a good image is on file. This verification must take place within 14 calendar days. Scanned items that are awaiting approval must be secured in an approved manner (see Chapter 3, section 3.0). Once verified, destroy the negotiable instruments.

8.2 Depositaries

8.2.1. General Depositaries. III TFM 2-1000 describes general depositaries as commercial banks or other financial institutions designated specifically and authorized by the Treasury to maintain a demand account in its name to accept deposits to the TGA. These depositaries are designated only where they are needed to receive deposits of public funds for credit to the TGA or to furnish cash to DOs for official disbursements. Making deposits to a TGA eliminates processing floats. If more than one bank has been authorized at a base, station, installation, or command, the local commander must give equal recognition when recommending designation of authorized financial institutions as TGA depositaries. After Treasury approval, the commander should reasonably distribute official financial transactions among the approved depositaries. Only deposit public funds in a financial institution that is approved as a general depositary, except as shown in subparagraph 8.2.4, and only mail deposits to a TGA when given specific Treasury authorization to do so.
8.2.2. Requests to Deposit With or Change General Depository. DOs formally request authorization to deposit collections with a general depositary, or change from one authorized depositary to another, following guidance provided in the I TFM 5-2000. This requirement also includes those instances when on-base banks or credit union offices undergo changes such as acquisitions or mergers. Send the completed request, no later than 35 calendar days prior to desired deposit start date, to the DoD Banking and Credit Union Office via email to dfas.dssc.jjf.mbx.dod-financial-institutions-tga@mail.mil for review, coordination, and submission to the FRB of St. Louis.

8.2.3. Need for General Depository Ceases to Exist. The DO advises DFAS-JJF/CO of the date on which the need for a general depositary ceases to exist, and the reason therefore.

8.2.4. Limited Depositaries. Limited depositaries are designated only to receive deposits made by or on behalf of DOs for credit to their official non-symbol checking accounts maintained with such depositaries. Limited depositaries are not authorized to accept deposits for credit to the Treasury. For additional information on limited depositary accounts, see Chapter 14.

8.3 Deposit Requirements

8.3.1. Frequency. Deposit all funds received for credit to the Treasury’s account promptly.

8.3.1.1. Agencies must deposit receipts totaling $5,000 or more on the same business day received prior to depositary cutoff time. Make deposits as late as possible prior to the specified cutoff time to maximize daily deposit amounts. Collections totaling less than $5,000 may be accumulated and deposited when the total reaches $5,000. However, make deposits by Thursday of each week, regardless of the amount accumulated. For additional information, review the I TFM 5-2065.

8.3.1.2. Send mailed deposits to US Bank’s MITGA, rather than to the FRB. The MITGA will receive deposits of commercial checks, U.S. Treasury checks, and at the direction of the DO, cash. Before mailing deposits, the DO must establish depositary arrangements with US Bank’s MITGA through the FRB of St. Louis. Once approved, establish the MITGA within OTCnet, and use OTCnet in conjunction with the MITGA. When using the MITGA during contingencies (when OTCnet is not available), the DO will contact the FRB of St. Louis to obtain permission to mail in a deposit. Once approved, the requestor receives a special form to complete and mail with the deposit. The former SF 215 (manually prepared deposit ticket) cannot be used.

8.3.1.3. For Navy vessels at sea, when daily mail service is not available, receipts consisting only of personal checks, money orders, and other negotiable instrument(s) may accumulate up to $5,000 before they must be deposited, provided that a deposit of all receipts on hand is made at least once each week. The DO prepares the deposits for mailing via registered mail and delivers them to the military post office onboard. The DO may not hold negotiable instruments to be deposited pending arrival at the next scheduled port of call. Regardless of the total amount, the time interval since the last deposit, and the type of checks and negotiable
instruments on hand, DOs on board naval vessels make a deposit on the last regular business day before leaving port and on the first regular business day after returning to port for any at sea period in excess of 1 week.

8.3.2. U.S. Dollar Deposits

8.3.2.1. Negotiable Instruments. Deposit negotiable instruments (e.g., personal checks, traveler’s checks, cash, and money orders) payable in U.S. dollars for credit to the Treasury’s account at an approved general depositary. DOs may deposit Treasury Checks at Military Banking Facilities overseas.

8.3.2.2. Checks Drawn on Foreign Banks in U.S. Dollars Payable Through a Bank in the United States. Checks drawn on foreign banks in U.S. dollars, payable through a bank in the United States, must have an American Bankers Association (ABA) routing and transit number (RTN) printed on the item and a magnetic ink character recognition encoded with a U.S. bank's ABA RTN at the bottom left side of the check. Group these checks on a single deposit ticket and deposit them as described in subparagraph 8.3.2.1.

8.3.2.3. Manner of Deposit

8.3.2.3.1. In conjunction with OTCnet, deposit cash, checks, drafts, or money orders in person with an authorized TGA. If a deposit of cash in person is impracticable at an authorized TGA, the next most preferred method is by armored car. The least preferred method of depositing cash is by registered mail to the MITGA. Since the delivery confirmation may require an additional fee to request a copy of the signature record with return receipt, the DO must ensure that funding is available. Charge costs for a cashier’s check or money order to operations and maintenance or working capital funds available to the DO. If cash must be mailed, then the cash must either be double wrapped or placed in an inner and outer container. Deposit damaged or mutilated currency in accordance with Chapter 3, paragraph 5.7.

8.3.2.3.2. Agent officers or any authorized collection officer may make deposits on behalf of the DO when an approved designated depositary is available. These individuals will use OTCnet for deposits.

8.3.2.3.3. When an approved designated depositary is not available, agent officers or any authorized collecting officers may send cash to the DO by conversion to postal money order, bank money order, or cashier’s check. Pay the fee for purchase of the cashier's check or postal/bank money order in cash at the time of purchase and attach the receipt to the DD 1131. Deduct the cost of the cashier's check or postal/bank money order from the total amount collected. Show in the body of the DD 1131 the total amount collected, the fee for the cashier's check or postal/bank money order, the net collection, the bank, and the date of the money order.

8.3.3. Foreign Currency Deposit. See Chapter 13, subparagraphs 6.2.4 and 6.2.5.
8.3.4. Reporting Large Deposits. To permit Fiscal Service to manage the government’s cash position at each FRB, large deposits must be reported in advance of the transaction settlement date (ITFM 6-8500). IPAC transactions are exempt from this reporting requirement.

8.3.5. Sorting and Listing of Instruments. Include with each completed deposit ticket an adding machine tape or other listing, unless other arrangements have been made with the depositary. Sort all currency by denomination, face and top up, and deposit it in full packages (100 notes) of each denomination: $1, $2, $5, $10, $20, $50, and $100. Prepare partial packages for each denomination not containing 100 notes. Secure each package (full or partial) with a currency strap bearing no printed denomination. DOs may obtain these straps from commercial suppliers. Legibly show the total dollar amount and DSSN on each package of currency on each strap. Roll coins whenever possible. Include with each completed deposit ticket an adding machine tape or other listing reflecting, by denomination, the total of currency and coin that comprise the deposit.

8.3.6. Endorsement of Negotiable Instruments

8.3.6.1. Area for Endorsements. Endorsement of negotiable instruments must occur on the back in the 1 1/2 inch space along the "trailing edge." When viewing the face (front) of a check, the trailing edge is the left hand edge. Normally, endorsements consist of the name of the payee and other identifying information required by the activity cashing the check. When the DO is preparing checks made payable to DoD, a DoD Component, another government agency, or the DO for deposit, the endorsement stamp required by subparagraph 8.3.6.3 appears in this space.

8.3.6.2. Multiple Endorsements. When multiple endorsements occur (or the space is used by a qualified endorsement such as for checks endorsed over to the DO by the payee) and the DO's endorsement requires space beyond the first 1 1/2 inches from the trailing edge, the DO uses the assigned space for subsequent endorsers (the back of the check in the upper right hand corner, no more than 3 inches from the right hand edge (leading edge) of the check). Do not refuse a check when the area assigned for the bank of first endorsement has been used. Such checks are acceptable but may not be processed by the banking system in the prescribed time frames under the Expedited Funds Availability Act (12 U.S.C. § Chapter 41), which could hamper collection action. Blue or black ink is preferable for endorsements.

8.3.6.3. Endorsement Requirements. Activities may use stamps containing additional information if the endorsement fits within the 1 1/2 inch space assigned for payee endorsers.

8.3.6.3.1. Negotiable Instruments Deposited With a General Depositary. When using the Deposit Reporting function of OTCnet, all negotiable instruments in payment of an obligation due the United States, regardless of the payee to which drawn, must be endorsed on the back of the instrument in the 1 1/2 inch space along the trailing edge. Insert the component’s name (e.g., Army, Navy, or DFAS) first and then insert the 4-digit disbursing activity’s DSSN in the blank following “DSSN.” These may be entered manually, mechanically, or be included as a
part of the stamp itself. Enter, either manually or mechanically, the date of the deposit in the blank following “Date” to correspond with the bank’s business day. See subparagraph 8.3.1.

8.3.6.3.2. Conditional Endorsements. Do not accept checks with conditional endorsements, e.g., “Payment in Full.” Return these checks to the drawers and advise them that the DoD cannot legally accept conditional endorsements.

8.3.6.3.3. When Scanning Negotiable Instruments. If a depositing location is using the Check Capture function of OTCnet (e.g., check image scanning), there is no requirement for endorsing the negotiable instruments being scanned. The only time that a signature would be required is when scanning a Third-Party check. Acceptance of Third-Party checks is not recommended.

8.3.7. Record of Negotiable Instruments Deposited. DOs keep a complete record of negotiable instruments mailed or presented to depositaries. This should consist of scanned or photocopied images of both sides of the instruments. If scanning or photocopying is not possible, prepare a typed or written list containing the source of the instrument, name of the financial institution on which drawn, type of instrument, serial number, payee, maker, endorser (name of person from whom received when other than drawer), date drawn, and amount. Copies of collection vouchers or other documents that show the same data are acceptable as the record of instruments. If an item is lost in banking channels, the DO must be held pecuniary liable if the maker of the instrument cannot be identified in order to contact that person for a replacement. Therefore, keep photocopied, scanned, or prepared lists of instruments deposited in active files until receipt of the deposit is confirmed in CIR.

8.3.8. Lost Negotiable Instruments. When a negotiable instrument is lost, whether before or after deposit, the DO adjusts the affected accounts and immediately requests that the maker of the instrument stop payment and replace it with a new check or other form of payment. DOs must inform members of their legal obligation for the check and offer them another opportunity to replace the check. If the military member refuses, the DO may, as with any other debt, pursue involuntary collection action against the military member’s pay.

8.3.9. Disposition of Funds on Transfer or Reassignment Without Relief. A DO that is transferred or reassigned without being relieved by another DO deposits all funds prior to the transfer or reassignment occurring. This includes all funds held by deputies, agents, and/or cashiers, including imprest funds and change funds. Report each deposit made during the period including the final deposit.

8.4 Deposit Transactions

8.4.1. Distribution and Disposition. Send a copy of the deposit ticket to the depositary with the funds and/or negotiable instruments being deposited. The DO retains a copy to assure that all deposits are in fact confirmed. The DO follows up on unconfirmed deposits as required by paragraph 11.4. In instances where a deposit is not confirmed in the same month as mailed,
refer to Chapter 15, section 7.0. The supporting DFAS site may also require the DO to submit a copy in support of the reported deposit activity for that month.

8.4.2. Accounting for Deposits. After netting out all debit vouchers (except those used for EFT for the current business day), enter the total of all the deposits for the business day (including deposit tickets in OTCnet) on line 4.2A of the DD 2657. At the end of the accounting period (month), use a record of each deposit ticket (and debit voucher, including those for EFT) applicable to only the current accounting period to prepare the detailed deposit activity report to support the **SF 1219**. The total of the detailed deposit activity report must agree with the total reported on line 4.2 on the face of the SF 1219 and with the total reported in Column 5, Section II, Part B, on the reverse of the SF 1219.

8.4.3. Debit Vouchers in Relation to Deposits

8.4.3.1. General. When a check is returned unpaid to the depositary with which the check was originally deposited, the depositary may process a debit voucher to charge the depositing DSSN. The depositary may also prepare a debit voucher charging the depositing DSSN for a check lost after deposit. Debit vouchers may also be issued by depositaries and by the Treasury to establish other valid charges against a DO’s account, e.g., exchange fees and other collection charges assessed in connection with foreign instruments deposited. The DO immediately records all debit vouchers received on the DD 2657. Include the debit vouchers in the SF 1219 for the month in which received.

8.4.3.2. Action by the DO

8.4.3.2.1. Non-tactical Disbursing Activities. For debit vouchers received in connection with returned unpaid checks, see Chapter 4, section 4.0 for guidance on processing dishonored checks. For debit vouchers received in connection with checks lost after deposit, the DO follows subparagraph 8.3.8. Process new checks received pursuant to action taken by the DO as a new deposit. Process charges for handling foreign checks as prescribed in Chapter 13, paragraph 4.0.

8.4.3.2.2. Tactical Disbursing Activities. DOs must comply with debit vouchers received from a depositary whenever any one of the following conditions exist: the deposit (which included the lost or dishonored check) was made during the incumbency of the current DO; the deposit (which included the lost or dishonored check) was made during the incumbency of a DO whose account is being subjected to the 90 day local retention period; or the maker or endorser of the lost or dishonored check is locally available for collection action. If none of the foregoing conditions apply, then the current DO forwards the debit voucher, by cover letter, to the activity designated to settle the former DO’s account. **Also, send** either the original dishonored check as returned by the depositary or, in the case of lost checks, a copy of the relevant abstract from the listing of instruments deposited. Include in the cover letter the most recent information concerning the present location and status of the maker or endorser of the check in question. Send a copy of the cover letter to the issuing depositary.
8.4.3.3. Distribution. The DO sends a copy to support the monthly financial reports and retains a copy with their retained financial records.

8.4.3.4. Accounting. Account for debit vouchers as negative deposits. As noted in subparagraph 8.4.2, net all debit vouchers (except those used for EFT) in the current business day against all deposits for that business day, and record the total on line 4.2A of the DD 2657. Record EFT debit vouchers on line 4.2B. At the end of the accounting period (month), use the records of each debit voucher (including EFT debit vouchers) and each deposit ticket applicable to only the current accounting period to prepare the detailed deposit activity report to support Section II, Part B of the SF 1219. The total of the detailed deposit activity report must agree with the total reported on line 4.2 on the face of the SF 1219 and with the total reported in Column (5), Section II, Part B, on the reverse of the SF 1219.

9.0 INTERNATIONAL TREASURY SERVICES (ITS.GOV)

ITS.gov is the Treasury’s comprehensive international payment and collection system. It is the preferred payment method for foreign currency transactions. DOs are encouraged to use ITS.gov to the maximum extent possible wherever the infrastructure will support its use. Prior to using ITS.gov, a Memorandum of Understanding between the activity and the Fiscal Service is required. Activities interested in using ITS.gov should contact Fiscal Service. For ITS.gov contact information, see Fiscal Service’s website. See Chapter 13 for guidance on foreign currency payments.

10.0 PAYMENT INFORMATION REPOSITORY (PIR)

10.1 Overview

PIR is a web-based, centralized repository of payment related data. PIR increases the transparency of government payments and provides agencies with the ability to view summary and/or detail payment information as well as data analysis. PIR has replaced CASHLINK II for payment voucher information. For more information, see Fiscal Service’s PIR web page. Agencies that use the online application within CARS for interagency billings and payments for goods and services will no longer receive a statement of difference report (formerly known as the Financial Management Service (FMS) Form 6652) and are no longer required to follow the guidance related to the FMS 6652.

10.2 Standard Reporting Format (SRF)

The SRF is an input file specification that defines data elements and business rules required for reporting payment and associated TAS/BETC information to PIR. When fully implemented, DoD agencies will have to use the SRF to submit detailed payment and accounting data to PIR. For more information on the format specification, see Fiscal Service’s SRF web page. Agencies must submit the PIR/SRF one day after the date of payment. Agencies that do not submit the SRF within one day following the date of payment by 6:00 p.m. (Eastern Time) will default in CARS to the default TAS/BETC for payment transactions. Date of payment is further defined as:
10.2.1. Check Payments. The issue date of the check (date inscribed on the check).

10.2.2. ACH Payments. The settlement of the ACH transaction found in the acknowledgement received from the FRB’s ACH.

10.2.3. Wire and ITS.gov Payments. The value date specified in the payment request.

*10.3 Reconciliation of EFT Transactions

10.3.1. Confirm PIR. EFT payment transactions are recorded using debit vouchers. DOs must reconcile their EFT payment data (e.g., EFT debit vouchers) with PIR. If the purpose of an EFT transaction cannot be determined at the point of origin (time of transaction), credit either F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for Intra-Governmental Payment and Collection (IPAC), as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 - 8.10.3 for additional information.

10.3.2. Discrepancy - Over or Understated Debit Vouchers

10.3.2.1. A difference occurs when a debit voucher amount is overstated or understated.

10.3.2.1.1. An overstated debit voucher exists when the amount entered exceeds the value of the check or EFT payments it covers.

10.3.2.1.2. An understated debit voucher exists when the amount entered is less than the value of the check or EFT payments it covers.

11.0 CIR

11.1 Overview

*CIR* is a web-based, centralized repository of detailed deposit and collection transaction data from all of the Treasury’s collection systems and settlement mechanisms. CIR provides the ability for agencies to view summary and/or detail level data, extract and analyze data in various scenarios, and produce flexible, standardized reports based on agencies’ needs. CIR has replaced CA$HLINK II for deposit reconciliation.

11.2 Requirement

DOs must confirm deposits using CIR. For guidance on deposit reconciliation, see paragraphs 11.3 and 11.4.
11.3 Deposit Reconciliation – General

11.3.1. DOs or their designee(s) must reconcile DoD financial system data daily with CARS and maintain either a manual or a mechanized subsidiary record of all debit voucher differences. If the purpose of a deposit cannot be determined at the point of origin (time of transaction), credit either F3875 and F3885 (Budget Clearing Account (Suspense)) or Shared Accounting Module default clearing accounts F3500 for proprietary payments and collections, and F3502 for Intra-Governmental Payment and Collection (IPAC), as appropriate, and review the guidance in Volume 4, Chapter 2, paragraphs 8.7 - 8.10.3 for additional information.

11.3.2. CARS reporters must ensure that there are no existing uncleared statements of differences prior to becoming a “Full” CARS daily reporter. Agencies that use the online application within CARS for interagency billings and payments for goods and services will no longer receive a statement of difference report (formerly known as the Financial Management Service (FMS) Form 6652) and are no longer required to follow the guidance related to the FMS 6652. The Treasury compares the value of deposits and debit vouchers reported by DOs’ activity reports to the value of deposits and debit vouchers reported through CIR.

11.3.3. Consider all differences that have not been reconciled within 60 days of the transaction, and that have been validated as meeting the criteria of an actual physical loss of funds, as a loss or overage of funds with the associated pecuniary liability as prescribed in Chapter 6. Do not consider timing differences and/or reporting errors as a loss of funds, but the DFAS site must pursue aggressive action to clear the differences with appropriate offsetting transactions, via departmental level, Treasury, and/or agency within 60 days of the offsetting transaction.

11.3.4. DOs must strictly adhere to the preparation requirements for the deposit tickets and debit vouchers as described in paragraph 8.4. It is also imperative that DOs report promptly and properly all deposit tickets and debit vouchers.

11.3.5. Once deposit tickets are released to a depositary, the documents cannot be recalled, corrected, or resubmitted. In addition, the Treasury prescribes specific instructions to all approved depositaries regarding adjustments of errors discovered subsequent to the day of deposit. DOs must take aggressive action to reconcile and/or clear all differences as rapidly as possible after notification by the Treasury that a difference exists.

11.3.6. To maintain control, the DO or the DO’s designee(s) monitor deposit activity daily using CIR and maintain either a manual or mechanized subsidiary record of all deposit differences. The DO or the DO’s designee(s) review the record of differences at least weekly to ensure these differences clear. Retain the evidentiary documentation supporting the review process for a retention period following the guidance in Chapter 15, paragraph 8.2. These records need not be certified. Also, each time there is a change of DOs, the incoming DO validates the unresolved differences. If the departing DO cannot provide the incumbent DO with documentation supporting the unresolved items, the departing DO processes the unsupported items as a loss or overage of funds (see Chapter 6, section 4.0).
11.4 Deposit Reconciliation – Discrepancies

11.4.1. Over or Understated Deposit Tickets

11.4.1.1. A difference occurs when a deposit ticket amount is overstated or understated.

11.4.1.1.1. An overstated deposit ticket exists when the amount entered exceeds the amount of cash or negotiable instruments submitted with it.

11.4.1.1.2. An understated deposit ticket exists when the amount entered is less than the amount of cash or negotiable instruments submitted with it.

11.4.1.2. Treasury regulations for depositaries do not permit changing the amount on a deposit ticket or debit voucher. They require the depositary to confirm a deposit as presented and immediately issue either a debit voucher for the amount of the overage or an additional deposit ticket for the amount of the shortage. In either situation, the DO should discover an overage of funds for an overstated deposit or a loss of funds for an understated deposit upon the first balancing after the deposit was presented or mailed to the depositary and recorded on the DD 2657. Treasury regulations also require the depositary to confirm a debit voucher as presented and immediately issue a deposit ticket for the amount of the overage or an additional debit voucher for the amount of the shortage. In either of these situations, the DO should discover an overage of funds for an overstated debit voucher or a loss of funds for an understated debit voucher upon the first balancing after the debit voucher was presented or mailed to the depositary and recorded on the DD 2657.

11.4.1.3. Daily monitoring of deposit activity using CIR enables early detection of these differences. Upon receipt of a copy of an adjusting deposit ticket or debit voucher, the DO records the document on the DD 2657. If actions required by Chapter 6, section 8.0 occurred to record the overage or shortage of funds upon discovery, receipt of the adjusting deposit ticket or debit voucher from the depositary enables a more rapid settlement of the discrepancy in the DO's accountability. If an overage or shortage of funds is discovered after receipt of the adjusting deposit ticket or debit voucher, and recording the document creates an overage or shortage, then the DO processes the overage or shortage as prescribed in Chapter 6, paragraph 8.2.

11.4.2. Deposits Not Reported by Depositaries. Deposit tickets reported by DOs but not by the depositary do not appear in CIR. Daily monitoring of CIR alerts the DO to possible deposit differences, when a deposit does not appear in the system after a reasonable period of time, based on whether the deposit was presented to the depositary in person or by mail.

11.4.2.1. If the depositary does not confirm the deposit within a reasonable period of time for deposits presented by mail, the DO initiates follow-up action with the depositary to determine the status of the deposit. A reasonable period of time would be the normal mailing time from the date mailed to the depositary until the date the deposit is confirmed, based on past
experience. Tactical DOs consider unit movement schedules and locations when the deposit was mailed. In any event, initiate follow-up action within 30 days from the date of mailing a deposit.

11.4.2.2. Include with a follow-up request to a depositary, a copy of the applicable deposit ticket and a description or copies of the instruments included in the deposit. The depositary provides confirmation information to the DO in response to the follow-up request. If the depositary acknowledges receipt of the deposit but refuses to report the transaction to the Treasury, the DO provides written notification, with copies of all correspondence and documents involved, to DFAS-JJF/CO, which will then pursue resolution of the issue through the Treasury and provide the DO written instructions on additional actions to take.

11.4.2.3. If the follow-up action does not result in confirmation of the deposit or the depositary notifies the DO that the deposit was never received, the DO will reverse the deposit transaction in the current month's business. The DO prepares and processes an Optional Form 1017-G, Journal Voucher (JV), to document the reversal. Record the JV on the DD 2657, line 4.2A as a negative deposit and on line 7.3 as a loss of funds and include it on the corresponding lines of the SF 1219 at the end of the month. Describe the deposit reversal in Section II, Part B, Column (3) of the SF 1219, and indicate the month and year the deposit was initially reported to the Treasury. Show the amount of the reversed deposit as negative or bracketed. Reverse the deposit in the current month's detailed deposit activity report, using the actual deposit number, month, and year of the deposit (as initially reported to the Treasury). Show the amount as negative or bracketed.

11.4.2.4. The actions in subparagraph 11.4.2.3 will remove the deposit from the detailed deposit activity report and record the deposit as a loss of funds. Attach a copy of the follow-up memorandum to the depositary, and the depositary's response, as supporting documents to the JV. Report and process the resulting loss of funds as prescribed in Chapter 6, section 3.0. If there were negotiable instruments in the lost deposit, follow subparagraph 8.3.8 for those instruments.

11.4.3 Debit Vouchers Not Reported by DOs

11.4.3.1. Debit vouchers are generally prepared only by depositaries as adjustments to erroneous amounts on deposit tickets and debit vouchers to return dishonored negotiable instruments, or to adjust deposit tickets for counterfeit currency. All debit vouchers prepared by depositaries are reported automatically to the Treasury. Unless the DSSN appearing on the debit voucher is not the DSSN of the DO receiving the document, the DO records the debit voucher upon receipt and includes it in the detailed deposit activity report. This requirement applies regardless of whether the debit voucher is deemed erroneous, or the reason given for the charge needs further clarification.

11.4.3.2. Daily monitoring of CIR alerts the DO that a depositary has issued a debit voucher. The DO must confirm the information in CIR and include the debit voucher on DD 2657 and detailed deposit activity report during the month of receipt. The DO reports the debit voucher using the month and year of issue (as reported by the depositary in CIR), not the
current month and year in which the debit voucher is being recorded and reported. Section II, Part B, Column (3) of the SF 1219 must indicate the actual month and year of the debit voucher as reported by the depositary. Also include the debit voucher in the detailed deposit activity report using the actual month and year the debit voucher was issued (as reported by the depositary).

11.4.3.3. In some instances, debit vouchers for electronic payments through the Federal Reserve System are prepared by the paying DO and submitted to the depositary with the payment file. Include these debit vouchers on the DD 2657, SF 1219, and detailed deposit activity report for the month of payment. Failure to include a debit voucher electronic payment transaction on the DD 2657, SF 1219, or the detailed deposit activity report will create an out-of-balance condition on the DD 2657 and SF 1219, unless the DO also failed to record the disbursement. For example, if a DO processes and includes a disbursement voucher on DD 2657 and SF 1219, prepares and submits a debit voucher to the depositary with the electronic payment file, but does not include the debit voucher on the DD 2657, SF 1219, and detailed deposit activity report, then the DD 2657 and SF 1219 will not balance. Proper balancing procedures preclude this situation.

11.4.3.4. If the transaction occurred near the end of the month, and the DO cannot process and report the transaction in the transaction month, then a deposit difference will occur. To correct this difference, the DO must obtain the transaction documentation and process both the payment and the debit voucher on the DD 2657, SF 1219, and detailed deposit activity report during the current month. The DO must ensure the reporting of debit vouchers using the actual month and year of the payment (as reported by the depositary in CIR), not the month and year in which the debit voucher is being reported. Include the debit voucher in the detailed deposit activity report and report it using the actual month and year the debit voucher was reported by the depositary.

11.4.4. Debit Voucher Not Reported by Depositaries. Debit vouchers reported by the DO but not by the depositary will cause a difference to the depositaries. The most frequent cause of this difference occurs when a depositary receives a debit voucher and payment file for payment by EFT, but rather than processing and reporting the debit voucher given by the DO, prepares a new debit voucher and reports it to the Treasury. The depositary provides the DO with the copies of the debit voucher it prepared and reported.

11.4.4.1. Daily monitoring of CIR alerts the DO that the depositary has issued a new debit voucher. DOs using depositaries that routinely process debit vouchers in this manner should contact the depositary in writing. The DO should request an explanation for the actions and that the depositary processes the debit vouchers given by the DO with the payment files. If the depositary refuses to process the debit vouchers given by the DO, the DO must then provide written notification with copies of all correspondence and documents to DFAS-JJF/CO, which will pursue resolution of the issue through the Treasury and provide the DO written instructions on any additional actions to take.

11.4.4.2. To prevent this type of difference from occurring, the DO reports the debit voucher transaction on the detailed deposit activity report as reported by the depositary. If the DO receives the copy of the debit voucher prepared by the depositary before the end of the month in which the transaction occurred, the DO will report the debit voucher prepared by the
depositary only. The DO keeps the copy of the prepared debit voucher along with the copy of the debit voucher the depositary prepared. If the depositary routinely continues to prepare new debit vouchers, include these with the written notification.

11.4.4.3. To clear this type of difference, the DO must reverse the DO's debit voucher transaction from the current month’s detailed deposit activity report and reenter the debit voucher transaction the depositary reported, using the actual debit voucher number, month, and year as initially reported to the Treasury. Enter the debit voucher prepared and reported by the depositary exactly as reported by the depositary. Also, describe the debit voucher reversal in Section II, Part B, Column (3) of the SF 1219, and indicate the month and year the debit voucher was initially reported to the Treasury. Also, describe the debit voucher prepared and reported by the depositary in Section II, Part B, Column (3) of the SF 1219, and indicate the month and year the debit voucher was reported by the depositary. Since these actions net to a zero, they should not impact the DO's pecuniary liability.

*12.0 CLOSED/CANCELLED ACCOUNTS

On September 30 of the fifth FY after the period of availability for an obligation of a fixed appropriation account ends, the account must be closed and any remaining balance (whether obligated or unobligated) in the account must be cancelled and thereafter is not available for obligation or expenditure for any purpose, unless exempt by a provision of an appropriation law. Collections authorized or required to be credited to an appropriation account, but not received before closing of the account, must be deposited in the Treasury as miscellaneous receipts in accordance with 31 U.S.C. § 1552(a). All cancelling year transactions, e.g., transactions to be paid from an appropriation that is cancelling at the end of the current FY, must be submitted to DFAS no later than September 15 each year (or the business day prior when September 15 occurs on a weekend).

CHAPTER 12

QUESTIONABLE AND FRAUDULENT CLAIMS

1.0 GENERAL

1.1 Overview

This chapter establishes policy for processing questionable and fraudulent claims presented for certification or payment that a Certifying Officer (CO) or Disbursing Officer (DO) believes to be illegal or improper. Determination of potentially fraudulent claims is the responsibility of the CO and/or DO. The CO and/or DO must research claims and base their determinations on the criteria in this chapter and the legal opinions of the supporting Staff Judge Advocates (SJA) or other legal counsel. A fraudulent claim is any intentional deception designed to unlawfully deprive the United States of something of value or to secure from the United States a benefit, privilege, allowance, or consideration to which a claimant is not entitled. This chapter also discusses a CO’s, DO’s, and/or head of an agency’s right to request an advance decision from the appropriate authority.

1.2 Purpose

This chapter addresses the determinations of fraud, advance decisions on the propriety of any prospective payment from an authorized official, and actions required when a suspected fraudulent claim is presented for payment or upon discovery that a fraudulent claim has been paid.

1.3 Authoritative Guidance

1.3.1. Under Title 31, United States Code (U.S.C.), section 3529 (31 U.S.C. § 3529), a CO, DO, or head of an agency may request an advance decision on the propriety of any prospective payment from an authorized official (see Table 12-1). This authority does not cover the rendering of legal decisions pertaining to payments already made or for hypothetical cases.

1.3.2. See 31 U.S.C. § 3702 for the authority on settling claims against the United States.

2.0 DETERMINATIONS OF FRAUD

2.1 Discrepancies

Inaccuracy on a claim is not proof of intent to defraud the government. When minor discrepancies exist because of clerical or computation errors, misunderstanding of procedure, or failure to properly document, the intent to deceive is less likely, thus decreasing the probability of a finding of fraud without evidence. The claimant’s supervisor should discuss these errors with the claimant and require that the claimant correct them.
2.2 Claims

A claimant must complete a claim accurately to ensure proper payment. A claim may be unauthorized for payment, but not considered fraudulent. This may occur if a claim is prohibited by law, or is otherwise not authorized, and lacks willful intent by the claimant. A CO or DO may refer these claims to the appropriate authority for an advance decision (see Table 12-1). Additionally, a claim is not necessarily fraudulent if it is not prepared according to the requirements of regulations (e.g., the Joint Travel Regulations, Uniformed Service Members and DoD Civilian Employees). It may be due to claimant error, misinformation, or lack of knowledge.

3.0 ADVANCE DECISIONS

3.1 Application for Decision

The submitter of an application states the facts and evidence to support the reason(s) for the request and upon which to base the decision. An application must generally include a specific claim or voucher. Applications are sent through the Office of General Counsel (OGC) of the DoD Component or the Defense Finance and Accounting Service (DFAS) to the DoD Deputy General Counsel (Fiscal) (DoD DGC(F)) for determination. The affected Component or DFAS OGC must attach a legal memorandum that discusses the legality of the proposed payment under the circumstances. The responsible activity, DFAS site, or appropriate OGC may return cases involving entitlement questions that have been clearly decided authoritatively, with a determination that no advance decision is necessary. A submitter may resubmit such a determination through the responsible activity for reconsideration.

3.2 Decisions Rendered

An advance decision is conclusive for the specific payment involved on the question presented. Although an advance decision is conclusive for the specific payment reviewed, COs should use the principles cited in the decision when making future entitlement decisions.

4.0 FALSE, FICTITIOUS, OR FRAUDULENT CLAIMS

4.1 Fraudulent Claim Presented for Payment

If there is reason to suspect that a claim presented for certification or payment contains fraudulent information, the CO must request their commander or comparable authorized civilian to initiate an investigation into the suspected fraud. A DO that suspects that a certified voucher is fraudulent must return it to the CO. The requirement to request an investigation applies regardless of the dollar value. Once the investigation and legal review by the supporting SJA or other legal counsel are complete, the investigating officer (IO) gives a copy of the completed report of investigation (ROI) to the CO and DO. See Chapter 6, subparagraph 4.3.2.2.5 for ROI guidance.

4.1.1. If the ROI does not support a finding of fraud, the CO may certify the voucher for payment of all amounts to which the claimant is entitled. The CO documents the reasons for the determination and maintains documentation for the CO’s records.
4.1.2. If the ROI confirms that some items of the claim are fraudulent, the claimant may submit a new claim for the items that the ROI identified as not fraudulent to the CO. A claimant who protests the determination of fraud and insists on payment of the entire claim may submit a new claim for the items denied because of fraud. The CO processes the reclamation for the items disallowed as prescribed in paragraph 4.3.

4.2 Fraudulent Claim Paid

A CO or DO who suspects that a claim was paid based on fraudulent information or documents, must review the retained copy of the claim to determine if it contains false information.

4.2.1. A CO or DO who suspects that a paid claim is fraudulent must inform his or her commander or comparable authorized civilian, who then initiates an investigation of the suspected fraud regardless of the dollar value involved. See Chapter 6, subparagraph 4.3.2.2.5 for ROI guidance. Following the investigation, the supporting SJA or OGC reviews the investigation for legal sufficiency. The IO then gives the CO and DO each a copy of the final ROI.

4.2.2. Upon learning of an improper payment based on suspected fraud, the CO or DO sends an ROI to the supporting DFAS site through their commander or comparable authorized civilian equivalent. Include in the ROI a basic statement of the irregularity, the date, amount, and identification of the individual(s) involved. Upon completion of the final recovery, investigative, or other negative action, the CO or DO advises the supporting DFAS site.

4.2.3. If the CO determines that some or all of the items of a paid claim are fraudulent, the CO may not certify any of the items for repayment. The CO or DO includes in the report:

4.2.3.1. The applicable contract or travel order number,

4.2.3.2. The voucher number,

4.2.3.3. The date of payment,

4.2.3.4. The appropriation charged,

4.2.3.5. A description of the supporting documentation,

4.2.3.6. A description of how the fraud was committed,

4.2.3.7. A description of procedural deficiencies in the disbursing office,

4.2.3.8. The action taken to correct the deficiencies, and

4.2.3.9. The amounts recovered or scheduled for repayment from the recipient of the fraudulent payment.
4.2.4. Losses resulting from fraudulent acts are improper payments (except losses within the disbursing office). The DO leaves them charged to the appropriations cited on the payment vouchers (see Chapter 6, subparagraph 5.1.1.2). Any losses, regardless of the dollar amount, where there is evidence of fraud within the disbursing office (for example, embezzlement or fraudulent acts by disbursing personnel) are physical losses (see Chapter 6, subparagraph 2.1.3).

4.3 Reclamation of Items Disallowed or Recovered Due to Fraud

4.3.1. The CO sends reclaims for items disallowed or recouped due to fraud though the appropriate office in his/her chain of command to the DoD DGC(F) (see Table 12-1). For a claim denied in its entirety, submit the original claim. Send the completed claim with a cover letter or memorandum from the CO stating why the claim is fraudulent, with the statement: “I have not certified and will not certify this claim for payment unless authorized by competent authority.” Include the original and two copies of all supporting documents and the orders with all endorsements for a travel claim, and a copy of the paid voucher for the items free of fraud.

4.3.2. A CO may not certify a reclamation claim for any or all of an amount recovered by the government due to an illegal or improper payment of any voucher item obtained by fraud or misrepresentation processed under paragraph 4.3.

4.3.2.1. Civilian Employees. The CO or DO must send paid fraudulent claims to the appropriate pay office and local OGC or SJA for referral to the Defense Criminal Investigative Service or military criminal investigative organization. Recover payments based on substantiated claims of fraud by direct repayment from the employee through salary offset or by other procedures in Volume 16, Chapter 2, paragraph 3.1. The CO or DO may take no further action on the paid fraudulent claim until OGC or SJA gives the CO or DO specific processing and disposition instructions.

4.3.2.2. Military Members. Under 37 U.S.C. § 1007(c) and the guidance in this chapter, the CO or DO collects debts owed by military members. When a debtor requests reconsideration of a fraud determination, the creditor organization submits evidence or statements from the debtor to the local SJA to review.

CHAPTER 13

FOREIGN DISBURSING OPERATIONS

1.0 GENERAL

1.1 Overview

1.1.1. In areas where the use of U.S. currency is prohibited or where diplomatic or financial considerations make its use inadvisable, the senior commander consults with other U.S. military commanders and the U.S. Department of State (DoS) representatives in the area to determine the local government’s foreign currency control regulations. The commander issues instructions that conform to DoS procedures and local government foreign currency control regulations. Disbursing Officers (DOs) must follow disbursing guidance set forth in Chapter 9, section 2.0 concerning voucher certification and substantiation prior to executing payment transactions, including advances, equitable claims, and payments to third parties.

1.1.2. The same policies governing domestic disbursements also are applicable to foreign currency disbursements. Except in areas where U.S. diplomatic or financial relations make the use of the U.S. dollar (USD) inadvisable, U.S. currency or Treasury checks are the only media of exchange for:

1.1.2.1. Basic salaries, special and incentive pay, and allowances (e.g., subsistence and housing) in USDs for U.S. military personnel stationed overseas;

1.1.2.2. Salaries and differentials to similarly-situated U.S. citizen civilian personnel in fulfillment of U.S. contractual or statutory obligations in USDs;

1.1.2.3. Per diem;

1.1.2.4. Travel expenses; and

1.1.2.5. Purchases from appropriated and nonappropriated fund activities located in the foreign currency area.

1.1.3. A disbursement voucher may constitute a payment voucher and a collection voucher for transactions involving setoff or deduction to recover an amount owed by the payee, with a net amount due disbursed to the payee. All disbursements must be supported by formal disbursement vouchers (see Chapter 9, section 4.0). Requirements established in Volume 1, Chapter 9, Financial Records Retention, apply to contingency operations.
1.1.4. **International Treasury Services (ITS.gov)** is the preferred method to issue foreign currency payments electronically and to issue international USD wire transfer payments. ITS.gov is the comprehensive international payment and collection system for the Department of Treasury (Treasury).

1.2 Purpose

This chapter addresses disbursing policy that includes exchange of USDs for foreign currency, foreign exchange transactions, currency rate of exchange, use of foreign currency for transportation, disposition of foreign currency and negotiable instruments, records and reports, and contingency operations in foreign territories.

1.3 Authoritative Guidance

Title 31, United States Code (U.S.C.), section 3302 (31 U.S.C. § 3302) authorizes DOs to have custody of public funds for disbursement purposes and requires them to safeguard the funds. This chapter addresses disbursing policy in the context of foreign disbursing and cash management operations prescribed in the Treasury Financial Manual (TFM), Volume 1, Part 2, Chapter 3200 (1 TFM 2-3200) and 1 TFM 5-6000.

2.0 EXCHANGE OF U.S. DOLLARS FOR FOREIGN CURRENCY

2.1 Guidelines

When it is not practical to use ITS.gov or if the DO does not have a limited depositary account (LDA) in the currency to be paid, the DO may need to acquire foreign currency. An appointed DO may obtain foreign currency for official purposes such as making payments to U.S. Government creditors and exchanging foreign currency or other negotiable instruments for which the DO is accountable. Foreign currency obtained may be held as currency or in an LDA (see Chapter 14, section 1.0). DOs may obtain foreign currency using sources identified in paragraph 2.2 and from sources authorized by the government of the country concerned. The process by which one currency is exchanged for another is foreign exchange. When DOs exchange USDs for foreign currency, the following guidelines apply to exchanges:

2.1.1. The “spot rate” is the rate of exchange to purchase foreign currency (normally the purchase of foreign currency for delivery within two business days);

2.1.2. Exchange at the time the foreign currency is needed for immediate funding requirements. DOs should ensure that payment is made for foreign currency purchases on the value date;

2.1.3. Speculation in foreign currency is prohibited;

2.1.4. Any change in program costs resulting from the use of foreign currency in international financial arrangements is the responsibility of the involved U.S. or foreign program agencies;
2.1.5. Foreign currency may not be purchased by forward contracts directly from foreign governments, private firms, or individuals at a negotiated rate without prior Treasury authorization. Submit such requests for authorization through the Defense Finance and Accounting Service (DFAS), Disbursing Policy (DFAS-ZPTA), 8899 East 56th Street, Indianapolis, IN 46249-0500 (dfas-in.disbursingpolicy@mail.mil);

2.1.6. Limit DO foreign currency holdings in a safe, vault, or an LDA to no more than seven business days requirement, unless an increase has been authorized by the Treasury (see Chapter 14, subparagraph 3.10.2.2). This includes foreign currency held by all authorized deputies, agents, and cashiers within the disbursing office and at remote locations. Limiting foreign currency holdings may minimize deficiencies due to rate devaluations and avoid premature drawdown from the Treasury;

2.1.7. Acquire foreign coins only to fill specific needs or when received as a change incident to an official cash payment in foreign funds. Coins present problems due to weight, storage, transportation, and disposition; and

2.1.8. Prepare foreign currency reports following section 7.0.

2.2 U.S. Government Sources

Procurement of foreign currency from U.S. Government or commercial sources requires a certificate or statement showing the amount purchased, the rate of exchange, the amount of USDs paid, the date, and the source/seller. Include the certificate or statement with the monthly financial reports. DOs may use ITS.gov to acquire foreign currency via electronic funds transfer. Each exchange voucher must be submitted in support of the accounts of the disbursing office and attached to monthly Standard Form (SF) 1219, Statement of Accountability. A DO may also obtain foreign currency from the following sources:

2.2.1. U.S. Government Sources. Other U.S. government sources include DoD DOs, U.S. DOs (USDOs), cashiers at American Embassies, or the Federal Reserve Bank of New York (FRBNY). Normally, the DO draws a U.S. Treasury exchange-for-cash check (see Chapter 3, subparagraph 2.5.1.1) and endorses it to the order of the officer furnishing the foreign exchange. When foreign currency is purchased from a USDO or an American Embassy cashier, the check may be issued to the American Embassy. When foreign currency is purchased from the FRBNY, the DO makes appropriate shipping arrangements; and

2.1.2. DoD Military Banking Facility (MBF). When possible, DOs can purchase foreign currency from a MBF (includes funds for LDAs) using a U.S. Treasury exchange-for-cash check (see Chapter 3, subparagraph 2.5.1.1).

2.3 Currency Custody Accounts

Absent ready-access to the Federal Reserve System, the DO can request approval from the Treasury to establish currency custody LDAs with the government’s contractor-operated MBF.
The DO must settle daily with the MBF. The currency custody LDA assures the availability of U.S. currency to support the dollar economy created by U.S. Armed Forces stationed overseas. Report the balance held in custody accounts on the Custody or Contingency Cash of the DoD DD Form 2657, Daily Statement of Accountability, reflected in the DoD Cash Treasury Account Symbol (TAS), and the SF 1219 Chapter 15, section 6.0).

2.4 Purchase From Individuals and Collections From Foreign Vendors

Subject to the provisions outlined in subparagraph 3.3.4, DOs may purchase foreign currency from individuals. DOs may also receive foreign currency either as refunds from foreign vendors or in payment for sale of excess foreign property in accordance with the Department of Defense Manual (DoDM), 4160.21-V1. Foreign currency sales receipts from post offices, exchanges, commissaries, and other nonappropriated fund activities are not collections by the disbursing office, but may be acquired by purchase only to the extent necessary to acquire foreign exchange for the LDA.

3.0 FOREIGN EXCHANGE TRANSACTIONS

3.1 International and Foreign Exchange

International and foreign exchange includes policy on the use of U.S. Government funds in international programs and on foreign exchange and interest costs to the Treasury. These include transactions with foreign countries and international organizations involved with bilateral or multilateral programs (e.g., procurement, research, co-development, co-production, grants, or other transactions) that require the:

3.1.1. Outlay of USDs or foreign currencies;

3.1.2. Inflow of funds from foreign countries; and/or

3.1.3. Exchange of USDs and foreign currencies.

3.2 Policies for Financial Transactions

3.2.1. In addition to the foreign exchange guidelines provided in paragraph 2.1, the following general policies apply to financial transactions.

3.2.1.1. Withdraw dollars from the Treasury on behalf of any program management organization only as needed. Base withdrawal on the recipient organization’s funding requirements to carry out the project.

3.2.1.2. Negotiate to provide for dollar outlays as close as possible to their need for current program expenditure to support international programs requiring U.S. funding.
3.2.1.3. Obtain the U.S. Government share of funding required to support a program by appropriation, with no part of this funding derived from interest earned on U.S. contributions. DoD Components are responsible to ensure that any interest earned is deposited promptly to the Treasury General Fund Receipt Account 3220 (General Fund Proprietary Receipts, Not Otherwise Classified, All Other).

3.2.1.4. Consider the fiscal needs and funding policy issues or concerns of each participating country or international organization, provided that U.S. Government cash management policies are not compromised.

3.2.1.5. Arrange to accommodate the financial policies of each participating country or organization to the maximum extent feasible. Except for arrangements entered into for the sole purpose of implementing U.S. international monetary policy, retain USDs in the Treasury until actually required for immediate disbursement, to minimize interest cost on the public debt.

3.2.1.6. Act on requests from a foreign country or international organization for the temporary deposit and safekeeping of USDs in trust in a Treasury account based on their own merit. Base the decision on the reason for the request, the specific financial arrangements proposed, and the relevant U.S. Government political and general financial considerations. All requests must include a recommendation from the local commander and be submitted to the Department of the Treasury, Financial Management Service, Cash Management Improvement Act Division, Liberty Center (Room 420), Washington, D.C. 20227 through the DFAS-ZPTA/IN (dfas-in.disbursingpolicy@mail.mil).

3.2.1.7. DoD Components may not invest funds on behalf of a foreign country or international organization when receipt of such funds serves as a basis for creating contract obligation authority for the DoD Component or other U.S. Government department or agency.

3.2.1.8. Ensure that application of these general policies in negotiations with foreign countries and international organizations are not compromised by DoD Component administrative practices.

3.2.1.9. Process requests for exceptions in accordance with Chapter 1, paragraph 1.3.

3.2.2. Specific Policies. See Volume 12, Chapter 9 for financial policies related to international agreements.

3.3 Accommodation Exchange Services

3.3.1. Definition. Accommodation exchange services are the exchange of U.S. Treasury checks or other USD instruments for USDs (e.g., check cashing), the exchange of USDs or dollar instruments for foreign currency or, where permitted, the exchange of foreign currency for USD instruments. See Chapter 4, sections 2.0 and 3.0 for accommodation exchange services to include limitation, personnel eligibility, and the required internal controls for exchanging cash for negotiable instruments.
3.3.2. **Authorization**

3.3.2.1. Commanders may approve and implement accommodation exchange services only after determining that:

3.3.2.1.1. Contract MBFs, other on-base financial institutions, exchanges, commissaries, or U.S. Postal facilities cannot fulfill the needs of DoD personnel;

3.3.2.1.2. The DO or agent has an immediate need for the foreign currency repurchased; or

3.3.2.1.3. Resources are available to provide these services without impacting levels of other financial services (e.g., primary disbursing and related functions).

3.3.2.2. When satisfactory local banking facilities are not available to conduct accommodation transactions; and after the establishment of written check cashing policy approved by the commander, DOs may use official funds to:

3.3.2.2.1. Disburse foreign currency for checks, drafts, bills of exchange, and other instruments payable in USDs; and

3.3.2.2.2. Cash foreign currency checks drawn by accountable officers of the U.S. on non-symbol checking accounts for the same currency in which drawn, when the currency is needed by the officer for official purposes.

3.3.3. **Sale of Foreign Currency to Individuals.** MBFs normally make accommodation exchanges of foreign currency at installations served under the DoD MBF contract. In countries served by these MBFs, DOs providing accommodation exchange services obtain needed foreign currency from the MBF and make those exchanges at the accommodation rate. DoD personnel may not receive accommodation exchange service from USDOs or Treasury DOs in areas where those services are provided by DoD DOs. DoD personnel assigned or attached to U.S. embassy duty may use available embassy cashier services. DOs, agents, and cashiers making these accommodation exchanges maintain the [DD Form 2664](#), Currency Exchange Record, Record of Individual Exchange Transactions, daily to ensure implementation of the requirements in section 7.0.

3.3.4. **Purchase of Foreign Currency From Individuals.** By policy, DOs are prohibited from purchasing foreign currency from individuals in areas served by MBFs under DoD contract. In areas not served by contract MBFs, DOs may purchase foreign currency or instruments payable in foreign currency in exchange for USDs or dollar instruments before their departure on home leave or completion of their foreign assignment. When purchasing foreign currency or instruments payable in foreign currency for USDs or dollar instruments, DOs must comply with the following:

3.3.4.1. If the amount of foreign currency presented does not exceed the sum of the individual’s salary and allowances for two biweekly pay periods, it may be purchased without requiring documentation of any kind from the departing individual;
3.3.4.2. If the amount of foreign currency presented exceeds the amount authorized in subparagraph 3.3.4.1, the requestor must submit a written application to the commander for approval of the purchase. The application must include a statement describing the source of the currency and a statement affirming that none of the currency was acquired in violation of local regulations or exchange control laws of the country concerned; and

3.3.4.3. The purchase of the foreign currency with USDs must consider the DO’s immediate foreign currency disbursing requirements (see section 2.0). A DO may suspend making accommodation exchanges for such time and to such extent necessary to carry out his or her other responsibilities;

3.3.4.4. Purchase the foreign currency at the prevailing market rate; and

3.3.4.5. Keep a DD 2664 daily to reflect the amount and source of purchased funds.

3.3.5. Safe Haven Posts. The appropriate commander establishes foreign currency accommodation exchange services for dependents of DoD personnel at safe haven areas to which they were ordered by competent authority in the event of emergency evacuation. These services must be consistent with the amount of exchanges authorized for dependents of U.S. personnel employed by other U.S. Government agencies.

4.0 CURRENCY RATE OF EXCHANGE

4.1 Prevailing Rate of Exchange

4.1.1. Definition. The prevailing rate of exchange is the most favorable rate legally available to the U.S. Government for acquisition of foreign currency for official disbursement and accommodation exchange transactions. If the currency of any one country is obtained from more than one of the sources provided in paragraph 2.2, maintain separate accountability for exchange rate adjustments.

4.1.2. Rate of Exchange. Unless otherwise authorized by the Treasury, carry all foreign currency, including amounts held in LDAs, at the prevailing rate of exchange. Foreign currency acquired without purchase includes burdensharing contributions made in host nation currency and held in accounts authorized by 10 U.S.C. § 2350j. Compute disbursements for official expenditures or accommodation exchange transactions to avoid gains or deficiencies due to fluctuations in rates of exchange to the extent possible. If there is no rate of exchange established by agreement between the U.S. Government and the foreign country or where no MBF is available, conduct foreign currency transactions at the prevailing rate using the rate of exchange of the currency on hand as determined by the method outlined in paragraph 4.2.

4.1.3. Non-Government Sources. When purchasing from sources other than the U.S. Government, DOs should acquire foreign exchange at the best rate available (e.g., fixed or non-fixed legal rate) in which the exchange is being expended. Follow DoS regulations or the currency control laws of the country where the currency will be used. Draw Treasury checks to
obtain foreign exchange from commercial sources in favor of the DO and endorse them to the order of the banking institution or commercial enterprise providing the funds.

4.1.3.1. Fixed Legal Rate. The best fixed legal rate to the U.S. Government, depending upon the circumstances in each country, may be any officially established buying rate for dollars, including diplomatic rates or special rates established by agreement with the authorities of the country. When this type of fixed legal rate prevails, agencies should purchase foreign exchange at the best applicable rates to the particular transaction. They may affect purchases at fixed legal rates without the formality of obtaining bids, but the purchases should be evidenced by a statement over the signature of the seller setting forth the pertinent data relative to the purchase. This data includes the date, amount of purchase, and exchange rate. The DO should retain the statement as a supporting document with the SF 1219 (see Chapter 15, section 8.0).

4.1.3.2. Non-Fixed Legal Rate. When rates legally applicable to the particular transaction are not fixed, or when such rates are fixed but the use of other rates is also legal for the particular transactions, DOs should purchase foreign exchange at the best obtainable rate. When foreign exchange can be purchased at a non-fixed legal rate, DOs should solicit bids from not less than three sources if available.

4.1.3.2.1. When a DO obtains foreign currency from a commercial source in a country where the rate of exchange is not established by agreement between the U.S. and the foreign country, use DD Form 2668, Request for Bid (Purchase/Sale), in duplicate to obtain written bids from at least three legally authorized sources, when available.

4.1.3.2.2. When practical, solicit bids from sources outside the country of the currency involved. Accept the bid providing the most beneficial exchange rate to the U.S. Government. The DO includes a copy of the certified and accepted bid as a supporting document with the financial reports, and keeps a copy of it to substantiate the place of purchase if some of the currency is eventually sold through commercial channels. The DO should retain documentation stating the most beneficial bid, accepted and certified, with the SF 1219.

4.2 Recomputed Rate of Exchange

The DO will need to recompute the operating rate of exchange if the rate of exchange of the newly acquired foreign currency differs from that of the DO’s current balance. The DO then disburses from their account using the recomputed rate of exchange.

4.2.1. Determining the New Rate of Exchange. Determine the new rate of exchange by adding the USD equivalent (USDE) value of the foreign currency on hand before the new acquisition to the USDE value of the additional foreign currency purchased, and divide the total into the new total of foreign currency units on hand; round the result to five decimal places. Do not adjust the rate until new foreign currency units are acquired.
4.2.2. **Certificate of Change.** The DO or Deputy DO (DDO) prepares a certificate of change similar to the example in Figure 13-1, and submits the certificate with the next SF 1219. When possible, determine the value of foreign currency on hand (including LDAs) at the beginning of the business day. If recomputation of the rate of exchange for foreign currency on hand is required during a business day, enter the voucher number of the last disbursement or collection voucher processed under the old rate of exchange on the certificate of revaluation. If there were no vouchers processed during the current business day, so state.

4.2.3. **Adjustments Due to Rounding.** Due to the rounding on individual disbursements and collection transactions, a difference in the USD value of foreign currency on hand may occur and cause a minor gain or deficiency. The balance of foreign currency divided by the current rate of exchange (carried to five decimal places) equals the exact USD value of foreign currency on hand. To account for minor gains or deficiencies, the DO adjusts the USD value of foreign currency on hand as part of the daily balancing process. For example, the following reflects transactions occurring on January 3, 20XX:

<table>
<thead>
<tr>
<th>FOREIGN UNITS</th>
<th>USD VALUE</th>
<th>RATE OF EXCHANGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>107,275,503 (Balance)</td>
<td>$854,512.60</td>
<td>125.53999</td>
</tr>
<tr>
<td>751,883,562 (Purchased)</td>
<td>6,000,000.00</td>
<td>125.31393</td>
</tr>
<tr>
<td>859,159,065 (Balance)</td>
<td>$6,854,512.60</td>
<td>125.34211</td>
</tr>
<tr>
<td>- 9,396,641 (Disbursed)</td>
<td>74,967.95</td>
<td>125.34211</td>
</tr>
<tr>
<td>849,762,424</td>
<td>$6,779,544.65</td>
<td>125.34211</td>
</tr>
</tbody>
</table>

Actual USD Value: 849,762,424 (# of foreign units) divided by the recomputed rate of exchange (125.34211) = $6,779,544.59. The results indicate a minor deficiency of $0.06 ($6,779,544.65 less $6,779,544.59) due to rounding of individual vouchers.

4.2.4. **New Rate of Exchange.** When computing a new rate of exchange to purchase additional foreign currency, the number of foreign units divided by the rate of exchange may not always accurately reflect the USD value. The rate of exchange for newly acquired foreign currency often differs from that of the balance on hand before the purchase.

4.2.4.1. **Gains and Deficiencies Due to Rounding.** Credit gains or charge deficiencies due to rounding to account 6763 (Gains and Deficiencies on Exchange Transactions) using **DD Form 1131**, Cash Collection Voucher, or **SF 1034**, Public Voucher for Purchases and Services Other Than Personal, as appropriate. Attach a Certificate of Adjustment as prescribed in subparagraph 4.2.4.2, to the voucher to support the transaction.

4.2.4.2. **Certificate of Adjustment.** The DO or DDO prepares and signs a Certificate of Adjustment Due to Rounding (see Figure 13-2) when a minor gain or deficiency results.

4.2.5. **Foreign Currency Revaluation.** Any change in the prevailing rate of exchange causes a gain or deficiency by revaluation since there is a change in the USD value of the foreign currency, except when using the method outlined in subparagraph 4.2.4.1. Whenever possible, revalue the foreign currency on hand (including LDAs) at the beginning of the business day on
which a rate change occurs. Determine the new USD value by dividing the total foreign currency on hand (including LDAs) by the new exchange rate, and whether a gain or deficiency by revaluation has occurred by comparing the USD value at the old rate to the USD value at the new rate. Because DOs carry foreign currency held in the disbursing account at the USD value, adjust that value by the amount of the gain or deficiency (loss) by recording the gain or deficiency by revaluation as a collection or disbursement transaction in the DO’s account.

4.2.6. Gains and Deficiencies by Revaluation. Gains and deficiencies may occur due to rounding or revaluation. Except when using the method outlined in subparagraph 4.2.4.1, credit foreign currency gains utilizing a DD 1131 and charge foreign currency deficiencies utilizing a SF 1034. Gains and deficiencies are reported through Classification Transactions and Accountability (CTA) citing an increase or decrease to account 6763, and the DO Cash TAS along with the proper Business Event Type Codes (BETC). Calculate gain/deficiency values for each currency individually by DO/DDO/agent/cashier to keep personal accountability accurate. DOs may consolidate the “net” change for all currencies on a single DD 1131 or SF 1034, as appropriate.

Gains and deficiencies may occur due to rounding or revaluation. Credit foreign currency gains utilizing a DD 1131 and charge foreign currency deficiencies utilizing a SF 1034. Gains and deficiencies are reported through CTA citing an increase or decrease to account 6763, and the DO Cash TAS along with the proper BETCs.

4.2.7. Balance-of-Payments. Code all credits and charges to account 6763 as USD transactions. Use account 6763 only for gains and deficiencies due to foreign currency revaluations. Account 6763 is not related to and has no relationship with the Foreign Currency Fluctuations, Defense (FCFD) or the Foreign Currency Fluctuations, Construction, Defense (FCFCD) accounts used for differences between budgeted foreign currency rates at which obligations are recorded and the rates at which they are liquidated. Reflect the FCFD and FCFCD portions of foreign currency disbursements separately on disbursement vouchers as charges to the appropriate foreign currency centrally-managed allotment account set up for that purpose.

4.2.8. Gains or Deficiencies on Security Deposits Due to Foreign Currency Fluctuation

4.2.8.1. Policy

4.2.8.1.1. Service members stationed in overseas areas are authorized advanced overseas housing allowance for security deposits to obtain leased housing. As authorized by the Defense Travel Management Office, the supporting DO pays the necessary amount in the appropriate local currency and charges the appropriate military pay appropriation for the USDE. The preferred method for paying advanced housing allowance is a LDA check in the local currency of the area involved.

4.2.8.1.2. For disbursing offices that do not maintain an LDA in the required currency, the member presents a copy of the lease agreement containing the amount of foreign currency needed to initiate the lease contract. The disbursing office contacts the local MBF to determine the foreign currency exchange rate on the date the advance is to be paid and computes
the USD amount. The appropriate military pay entitlement office prepares and certifies the appropriate voucher for payment of the advance in USD, and charges the appropriate military pay appropriation. The service member converts the payment to local currency at the MBF.

4.2.8.1.3. The supporting finance office maintains a tracking system, either by input into the master military pay account (MMPA) or by manual methods, showing the amount of the advance paid in local currency, the USDE, and the exchange rate on the date of payment.

4.2.8.2. Lease Termination

4.2.8.2.1. At lease termination, service members return the total amount of the deposit in local currency to the supporting disbursing office in exchange for a receipt. The supporting disbursing office credits the USDE based on the rate of exchange in effect on the date of the return to the appropriation charged when the deposit was advanced; compares that rate of exchange with the rate in effect on the date of the advance; and posts any gain or deficiency (loss) due to currency fluctuation as a charge or credit, as appropriate, to the current military pay appropriation.

4.2.8.2.2. If the security deposit was paid in USD, the service member takes the full value of the security deposit in foreign currency to the MBF, converts it to U.S. currency, obtains a receipt indicating the exchange rate, and turns in the U.S. currency and receipt to the disbursing office. The disbursing office prepares a collection voucher for credit to the appropriate military pay appropriation, indicates return of the security deposit, verifies with the MMPA or local record whether a gain or deficiency has occurred for the current exchange rate, and prepares the appropriate voucher to credit or debit the gain or deficiency to the appropriate military pay appropriation. Ensure that the member does not experience any gain or deficiency due to foreign currency fluctuations.

4.3 Obtaining Weekly Foreign Currency Exchange Rates

The Federal Reserve Bank provides weekly foreign currency exchange rates at their website.

5.0 USE OF FOREIGN CURRENCIES FOR TRANSPORTATION

5.1 Transportation Payment

To the maximum extent possible, use U.S.-owned foreign currencies for transportation when certified air carriers are available and will accept such currencies in payment for U.S. Government-financed, commercial, foreign air transportation of persons or property. Review DoD Directive 4500.09E, Transportation and Traffic Management, for guidance on the use of these air carriers and determination of their availability. In issuing and exchanging Government Transportation Requests (GTRs), Government Bills of Lading (GBLs), transportation warrants, or other procurement documents, state clearly “PAYMENT IN (foreign currency)” on the form. Otherwise the carrier may demand payment in USDs.
5.2 Transportation Billing

DOs should ensure to include in the “BILL TO” portion of the GTR, GBL, transportation warrant, or other procurement document:

5.2.1. Name of the requesting agency;

5.2.2. Address to be billed; and

5.2.3. Instruction on payment in foreign currency.

6.0 DISPOSITION OF FOREIGN CURRENCY AND NEGOTIABLE INSTRUMENTS

6.1 Payments to Authorized Personnel

DOs may use foreign currency for payments to foreign personnel and vendors. For miscellaneous advance payments, see Volume 10, Chapter 4, paragraph 4.8.

6.2 Disposition of Excess Foreign Funds

When possible, transfer foreign currency excess to other DoD DOs, USDOs, U.S. Embassies, or accountable officers in a particular locality with immediate disbursing needs. When the collection of foreign currency causes a noninterest bearing LDA to exceed immediate disbursing requirements, see Chapter 14, subparagraph 3.10.2.2.

6.2.1. Sale to Another DoD Disbursing Office

6.2.1.1. Sort checks, drafts, and money orders payable in foreign currency by the geographical location of the institutions on which they were drawn and send them by registered mail or courier to a DoD DO located in the country of the monetary unit involved. Send them with a completed DD Form 165, Shipment of Funds, and a letter of transmittal addressed to “DO (activity of addressee)” (see Chapter 3, section 5.0). Include a request for a U.S. Treasury exchange-for-cash check with the letter of transmittal. Identify the country, type, amount, exchange rate, and USD value of the instruments on the DD 165. Endorse the instruments "Pay to the order of ‘Disbursing Officer, Activity of Addressee’, (Signature of sender)." When there is no DoD DO in the country involved, deposit the instruments in accordance with the 1 TFM 5-6000.

6.2.1.2. Send other than local currencies, and currencies not required for official purposes to a DoD DO that needs them, or to a DO located in the country where the currency is legal tender. Exchange the foreign currency for U.S. currency or a U.S. Treasury exchange-for-cash check. When using registered mail or courier, include a completed DD 165 and letter of transmittal requesting a U.S. Treasury exchange-for-cash check. Include the country, type, amount, exchange rate, and USD value of the foreign currency on the DD 165. Do not send foreign coins for exchange except under unusual circumstances and with the prior concurrence of the intended recipient.
6.2.1.3. Use the prevailing rate of exchange on the date of the seller’s transmittal and the prevailing rate on the date of receipt for the buyer. Since the prevailing rate is the holding rate for the receiving office, there will be no gain or deficiency in the receiving office's accounts. The selling office accounts for any gain or deficiency due to exchange rate fluctuations when it receives the U.S. Treasury exchange-for-cash check.

6.2.2. Sale to an MBF. A DO may sell excess foreign currency to an MBF whenever the currency cannot be sold to another DoD DO. The selling DO uses the MBF “buy rate” as the rate of exchange on the date it sends the currency to the MBF, and accounts for any gain or deficiency due to exchange rate fluctuations when it receives the USD from the MBF.

6.2.3. Sale Through Commercial Channels. If foreign currency cannot be sold, a DO may sell it through commercial channels. If the rate of exchange has been established by agreement between the U.S. and the foreign country, sell or otherwise dispose of foreign currency for U.S. currency or USD checks at the established rate of exchange.

6.2.3.1. For this type of sale, the bank or other entity to which the foreign currency is sold provides a statement showing the amount of USD supplied, rate of exchange, amount of foreign currency received, date, and name and address of the bank or other entity. The recipient’s representative signs the statement and the DO includes it with the financial reports. A DO may also conduct foreign currency sale transactions with a bank or entity approved by the Treasury (e.g., an MBF) to establish LDAs in the currency purchased (see Chapter 14, section 3.0).

6.2.3.2. When the rate of exchange is not established by agreement between the U.S. and the foreign country, or if there is not a bank or entity approved by the Treasury to establish LDAs, use a DD 2668 to request at least three bids from reputable banking institutions or dealers in foreign exchange, if available. Sell the foreign currency to the bidder submitting the most beneficial bid as certified by a commissioned officer other than the DO; the DO accepts it and includes it with the financial reports to support gains or deficiencies in foreign currency transactions.

6.2.4. Deposits to the Credit of the Treasury. If disposition is not possible through a DoD DO or an MBF, follow guidance in the 1 TFM 5-6000 for deposits of foreign currency and checks drawn on foreign banks.

6.2.5. Deposits. Pending receipt of the confirmed copy of the deposit ticket, record the deposit in Cash in Transit (line 6.7) of the DD 2657 at the USD value of the funds when the deposit was mailed. If the confirmed copy of the deposit ticket is not received before the end of the month of mailing, report the item on line 6.7 of the SF 1219. The depositary enters the net USD proceeds in Block 4 of the deposit ticket and distributes the copies as for any regular deposit.

6.2.5.1. Upon receipt of the confirmed deposit ticket, the DO enters the confirmed amount in Deposits Presented or Mailed to Bank (line 4.2A) of the DD 2657 as a decrease to line 6.7. Account for any difference in the amount of the confirmed deposit ticket and the amount at which carried by the DO on line 6.7 (as distinguished from exchange fees and collection charges) as either a gain or deficiency by exchange transaction as prescribed in section 3.0.
6.2.5.2. Do not report deposits of foreign negotiable instruments under the “Gross Accountability“ section as on line 4.2A until receipt of the confirmed copy of the deposit ticket because the USD value to be reported as deposited is not known to the DO until then.

6.3 Dishonored Foreign Checks, Drafts, and Money Orders

Dishonored foreign instruments received by DoD DOs are subject to the regular debt collection procedures. DOs must request removal of dishonored item deficiencies for instruments received that become uncollectible (see Chapter 4, section 5.1).

6.4 Mutilated or Unfit Foreign Currency

DOs should take every possible precaution to prevent acceptance of mutilated foreign currency as a collection, payment, or an exchange transaction. If a DO is holding mutilated foreign currency, the DO must contact local banks or fiscal authorities to arrange for the exchange of mutilated or unfit currency for fit currency.

6.5 Counterfeit or Altered Foreign Currency

DOs should take every possible precaution to prevent acceptance of counterfeit currency as a collection. If the collection is counterfeit, see section 2045 in 1 TFM 5-2000. Absent an agreement with the foreign government, ship the currency to the appropriate investigative agency or nearest military security agency. Obtain a receipt for the currency, and account for it in the DO’s records in the same manner prescribed in Chapter 3, section 7.0 for counterfeit U.S. currency. A DO considered at fault in acquiring counterfeit foreign currency is accountable for the value of the currency. Submit a request for relief of liability pursuant to the process outlined in Chapter 6, section 6.0. This is the same process that is used for accountability for receipt of counterfeit U.S. currency.

7.0 RECORDS AND REPORTS

7.1 Treatment of Transactions

Treat transactions involving foreign currency as cash transactions and follow the same principles and guidelines established for controlling U.S. currency. DOs, DDOs, agents, and cashiers who engage in foreign currency transactions (e.g., collections, disbursements, and accommodation exchanges) must document them on the DD Form 2663, Foreign Currency Control Record. This form shows current balances of foreign currency on hand (all foreign currency held by cashiers, in the vault, or by other agents of the DO) and in LDAs, as well as the detailed transactions that increase or decrease these balances.
7.2 DD Form 2663, Foreign Currency Control Record

Maintain separate DD 2663s for each type of foreign currency used (e.g., Kuwaiti Dinar, Euro, and Japanese Yen). Also maintain a separate DD 2663 for accommodation exchange foreign currency carried at an exchange rate different from that used for disbursements. DOs may maintain separate DD 2663s for foreign currency on hand and in LDAs.

7.3 Foreign Currency Reports

7.3.1. Include with the foreign currency reports a cover sheet with the following headings: Country of Currency; Monetary Unit; Number of Units Purchased; Total Dollar Outlay; and Memorandum-Dollar Outlay for Accommodation Exchanges. Reports are due within 15 calendar days after the close of each quarter to the supporting DFAS site. Reports may be combined and submitted as one report.

7.3.1.1. Cumulative Report of Foreign Currency Purchased With USD From Sources Outside the U.S. Government. This report is cumulative for the fiscal year. Include the amounts acquired through accommodation exchange transactions as well as purchases from banks and other dealers in currency exchange.

7.3.1.2. Report of the Balance of Foreign Currency Held Under Dollar Accountability. This report is due by the end of each quarter to the same DFAS site as the cumulative report. It may be combined with the cumulative report.

7.3.1.3. Report of Foreign Exchange Received by DOs and Credited Immediately to Miscellaneous Receipt Accounts of the Treasury. This report is a cumulative report of outside purchases and quarterly report of balances of foreign currency on hand. These funds are received for such things as fees and services and are immediately purchased by DOs with appropriated funds for their operating needs. Exclude repayments to appropriations.

7.3.2. Consolidated Quarterly Reports of DOs. DFAS sites will consolidate the DOs quarterly reports and forward them to DFAS, Departmental Reporting Directorate, Treasury Division, Reporting Operations Branch, Column 334Z-1, 8899 E. 56th Street, Indianapolis, IN 46249, in time to be delivered to the Treasury 45 calendar days after the close of each quarter.

7.3.3. SF 1219. Report foreign currency balances held in USDE) on the SF 1219 including those in LDAs.

8.0 CONTINGENCY OPERATIONS IN FOREIGN TERRITORIES

Information pertaining to Contingency Operations in Foreign Territories can be found in Volume 12, Chapter 29, “Administering, Using, and Accounting for Seized and/or Vested Funds and Property During Contingency Operations.”

</tbody>
</table>

420,000 Yen divided by $4,205.68 equals 99.86494, which is the new exchange rate for Japanese Yen on hand. This rate is based on the prior purchase exchange rate and the new exchange purchase rate for Yen purchased on October 4, 20XX.

No collection or disbursement vouchers processed this date prior to revaluation of Japanese Yen.

CHAPTER 14

LIMITED DEPOSITARY CHECKING ACCOUNTS

1.0 GENERAL

1.1 Overview

If the Department of the Treasury’s (Treasury) International Treasury Services (ITS.gov) will not support mission requirements, DoD disbursing officers (DOs) may maintain official limited depositary accounts (LDAs) for check or electronic funds transfer (EFT) payments in foreign currencies with banks designated by the Treasury as “Depositaries of Public Moneys of the United States.” LDAs are considered cash and investments held outside treasury funds and must be reflected in the DO Cash Treasury Account Symbol. LDA transactions follow the same reporting process to the Payment Information Repository (obtaining funds) and the Classification Transactions and Accountability (cash disbursement and collections) as U.S. dollar transactions. LDA transactions are recorded on the DoD (DD) 2657, Daily Statement of Accountability and the Standard Form (SF) 1219, Statement of Accountability.

1.2 Purpose

This chapter provides policy on the establishment and maintenance of LDAs by DoD DOs.

1.3 Authoritative Guidance

2.0 SOLICITATION

2.1 Overview

2.1.1 New LDAs. A DO (or designated deputy DO (DDO)) confers with the local U.S. Embassy or Consulate for assistance to determine which banks meet the criteria to maintain an account. When anticipating the establishment of a new LDA, a DO solicits all American-owned and leading local financial institutions in the area to determine which would offer the most beneficial arrangement. The solicitation process must be competitive to allow all banks to submit written information on identical questionnaires or requests for banking proposals. To determine the most beneficial arrangement, a DO considers, in descending order of importance, (1) standard operating services minimally required, (2) customary local banking practices (e.g., telex cost or armored car service), and (3) other special services that may be necessary in a particular country or circumstance (e.g., payment of interest on the account, waiver of miscellaneous charges). The required services must include:
2.1.1.1. Capability to honor payments to payees in outlying areas;

2.1.1.2. Processing of checks and, if possible, EFTs and deposits;

2.1.1.3. Provision of a daily or a monthly bank statement as needed; and

2.1.1.4. Acceptance of the DO’s funding procedures.

2.1.2. LDA Banks. DOs ensure that banks are valid, reflect a high level of American ownership, are financially secure, are dependable, and are reliable financial institutions to avoid losses and ensure the protection of U.S. Government funds. Unsolicited proposals from financial institutions to operate an existing LDA may be received any time, and the LDA is open to all interested financial institutions.

2.2 Requesting a Limited Depositary Account

A DO, upon selecting a reliable financial institution with beneficial banking arrangements, sends a request for approval and designation of an LDA to the Enterprise Solutions and Standards (ESS) Disbursing (Defense Finance and Accounting Service (DFAS), ESS Disbursing, Indianapolis (DFAS-JJFKCB/IN), 8899 E. 56th Street, Column 301S, Indianapolis, IN 46249 (dfas.indianapolis-in.jjf.mbx.ess-disbursing@mail.mil)). ESS Disbursing will review and send the request to the Treasury’s Bureau of the Fiscal Service before the account is established.

2.2.1. Requests for U.S. dollar (USD) accounts must include documentation indicating that the DO requested and received a commitment to pledge collateral from the bank suggested for selection. If the bank agrees to pledge collateral, the DO may request a USD operating account; otherwise, the DO may request only a USD zero-balance account.

2.2.1.1. A request for an LDA should include the:

2.2.1.2. Disbursing station symbol number (DSSN);

2.2.1.3. Justification for the account, to include the reason(s) why ITS.gov will not support mission requirements;

2.2.1.4. Location;

2.2.1.5. Name of the currency;

2.2.1.6. Criteria for determining the preferred bank and reasons for recommending its selection (e.g., results of the competitive process);

2.2.1.7. Name of proposed bank;

2.2.1.8. Bank address;
2.2.1.9. Name and title of bank official and telephone number(s);

2.2.1.10. Percentage of ownership by a U.S. bank;

2.2.1.11. Name of the correspondent bank (if any) in the United States, the account number, and a point of contact (e.g., name, title, and telephone number); and

2.2.1.12. Business need or statutory authority for any balance that may exceed the 5 to 7 day supply requirement. Note: Approved LDA requests that include requirements for balances to exceed the 5 to 7 day supply will require a waiver from Treasury as stated in subparagraph 3.10.2.2.

3.0 ESTABLISHING AND MAINTAINING A LIMITED DEPOSITARY ACCOUNT

3.1 Establishment

Once Treasury approves a request, establish the LDA in the name of the assigned DO, DDO, or other agent the DO designates. Limit authority to sign checks drawn on the LDA to the DO and other appointed DDOs or agents. A DO who transacts business in multiple foreign currencies must establish and maintain a separate LDA for each currency.

3.2 Letter of Authorization

The commander certifies by letter, the name and rank of the DO assigned to the activity, stating that the DO is authorized to maintain an LDA with official funds of the United States in the name of the activity. If the custodian of the LDA is a DDO or other agent of the DO, the commander’s letter identifies that DDO or agent and:

3.2.1. Certifies that the account is subject to checks issued by the DO, other appointed DDOs or agents, and their successors in office;

3.2.2. Includes signature specimens of the DOs and authorized DDOs and agents, and a certification that the signatures are those of the personnel authorized to transact business with the limited depositary (LD); and

3.2.3. Requests the bank acknowledge acceptance by endorsement of the letter, in triplicate. The bank should retain the original letter and return two copies to the activity.

3.3 Blank Limited Depositary Checks

3.3.1. Procurement. LD checks are not available through the Treasury check contract. Order checks from the bank maintaining the LDA, charging their procurement cost to the disbursing activity’s operating funds.

3.3.2. Print Order Requirements. Obtain LD checks in continuous form format for mechanized systems. The checks must be overprinted to provide the serial number of the check,
name of the activity, any limited-payable notices as may apply in the foreign nation, and information necessary for security and accounting for check issues.

3.3.3. Security. Control and safeguard blank LD checks in the same manner as prescribed for Treasury checks in Chapter 7, paragraph 3.7. If LD checks are lost or stolen, the DO immediately notifies the LD of the serial numbers of those checks, places stop-payments against them, and submits copies of the stop-payment requests with the next original LD reports.

3.3.4. Relief of DO. Transfer unused LDA checks to the relieving officer, with no change in serial numbers, for their use.

3.3.5. LDA No Longer Required. When an LDA is no longer required or when a disbursing office is deactivated, void all unused blank LDA checks and destroy them (see Chapter 7, paragraphs 9.2 and 9.4).

3.4 Preparation of Limited Depositary Checks

3.4.1. General. Prepare LD checks using automated check writing equipment, if available, or a typewriter, if necessary.

3.4.2. Record of Check Issues. DOs maintain a record of all LD checks issued. The record includes payee names, voucher numbers, amounts (in the currency of the check), check serial numbers, check dates, and activity name under which the account is established. Other information as to the purpose for which checks are issued and local identification codes is optional at the issuing DO’s discretion. The record may be on paper, electronic, or in media designed for data processing use. Keep a separate record for each LDA. Include records of check issues with retained disbursing records.

3.5 Disbursement Vouchers

When a payment is made with an LD check, enter the notation “LD Check No. ___,” on the disbursement voucher. Although a receipt is not generally required for a check payment, local laws may prohibit LD checks drawn outside the United States from being returned to the drawer. In these cases, show evidence of receipt of the payment on the voucher on which an LD check payment appears in one of the following two ways:

3.5.1. Signature on Original Voucher. Submit the original voucher as a part of the financial reports for the month of payment; or
3.5.2. Periodic Statements From Depositary. Periodic statements from the LD listing the paid checks by number and amount, certified by an officer of the bank and the DO, are satisfactory evidence of payment. The certificate of the bank should say, “I certify that the above is a true and correct list of all checks paid by this bank and charged to the account shown in the heading during the period covered by this statement, and that the originals of the checks are on file in this bank and will be held for ___ years.” The DO certifies to the reconciliation of the bank statement with the disbursing records.

3.6 Delivery of Checks

Before mailing any LD checks outside the country in which the LD is located, the DO verifies that such action is not prohibited by the Status of Forces Agreements or the banking laws of the countries involved (see Chapter 7, paragraph 6.4).

3.7 Irregularity After Delivery of Checks

When an irregularity occurs after check delivery and the check is still outstanding, stop payment of the check. Provide a complete report of the facts with the request for stoppage. If the irregularity is discovered after payment of the check, the DO notifies the depositary of the irregularity.

3.8 Interest on Deposits

In some cases, LDs pay interest on LDAs. When possible, the DO obtains interest on the LDA. The DO canvasses the market to obtain the highest interest rate legally available consistent with disbursing requirements and monitors the interest-bearing accounts to ensure the interest is paid timely following agreements between the DO and the banks. When notified that interest has been credited to the account, the DO prepares a (DD) Form 1131, Cash Collection Voucher, crediting 3220 (General Fund Proprietary Receipts, Not Otherwise Classified, All Other) for the U.S. dollar equivalent (USDE) of the interest and records the transaction as both a collection and an increase to the DD 2657 and on the SF 1219.

3.9 Account Balances

Keep daily LDA balances as near zero as possible, maintaining them solely to support disbursing requirements. Draw LDA checks against new deposits only after receipt of confirmation of the deposits from the LD. If foreign currency collections cause a non-interest bearing LDA to exceed a 5 to 7 business day supply and all attempts to sell the currencies to other DOs are exhausted, the DO sells the foreign currency for USDs for deposit to a bank designated as a Treasury General Depositary or requests a waiver per subparagraph 3.10.2.2. LDAs approved to hold funds beyond the 5 to 7 day supply do not require a reduction of the account balance, but they must comply with any stipulations cited in the LDA request approval (see subparagraph 2.2.1.12). Do not use LDA balances (or the forfeiture of potential interest earnings on the account) to subsidize banking services otherwise funded through the appropriation process.
3.10  Review of Limited Depositary Accounts

3.10.1. Commanders’ Review. Commanders require review of DO maintained LDAs to ensure compliance with this chapter. The cash verification team (see Appendix A) performs this unannounced review quarterly, upon transfer of accountability to a successor DO, before departure of the outgoing DO from the command, upon deactivation of the LDA, or upon a change in the designated settlement office.

3.10.2. DOs’ Review. DOs review LDAs on a continuing basis to ensure:

3.10.2.1. Maintenance of minimum account balances necessary to meet immediate disbursement needs (checks issued and in process);

3.10.2.2. Balances do not exceed immediate needs (typically a 5 to 7 business day supply). Transfer the excess funds beyond the immediate need to other DoD Disbursing Officers, State Department U.S. Disbursing Officers, or a U.S. Embassy; withdraw and deposit the funds with Treasury; or receive Treasury approval to exceed the 5 to 7 business day supply. Waivers to exceed the 5 to 7 business day supply must be requested from Treasury (see *Treasury Financial Manual, Volume I, Part 4, Chapter 3000, section 30140.20*). Contact DFAS-JJKCB/IN at the email address listed in paragraph 2.2 to obtain procedural guidance for waiver requests;

3.10.2.3. The terms negotiated with the depositary are favorable to the U.S. Government including interest on the account at the highest possible rate;

3.10.2.4. At least every three years for each account, the DO determines if it may be cost effective to solicit competitive proposals from all American-owned and leading local financial institutions in the area to secure the most beneficial banking agreement; and

3.10.2.5. There are no significant events that affect the designated bank (e.g., bank closure). Immediately notify Treasury’s Over-the-Counter Revenue Collection Division through DFAS-JJKCB/IN at the email address listed in paragraph 2.2 upon learning of a significant event that affects the designated bank.

3.11  Burdensharing and Overseas Relocation Contributions by Foreign Allies

See Volume 12, Chapter 24 for the overall policy and responsibilities for acceptance, receipt, use, and reporting of burdensharing and relocation monetary contributions to the DoD. DOs must include any burdensharing and relocation monetary contributions held in an LDA in the semiannual cash holding authority requests (see Chapter 3, paragraph 2.4). In addition, DOs must include any burdensharing and relocation monetary contributions held in an LDA in their ending accountability on the DD 2657 and in the DO Cash Treasury Account Symbol. Burdensharing and monetary contributions held in an LDA in excess of the 5 to 7 business day supply must be approved with the original LDA request (see subparagraph 2.2.2.12) or will require an approved waiver from Treasury (see subparagraph 3.10.2.2).
4.0 VOIED AND SPOILED LIMITED DEPOSITARY CHECKS

4.1 General

Treat original LD checks that are not to be issued as voided or spoiled. Void LD checks with writing errors (e.g., wrong name or amount). In addition, void checks physically damaged during preparation, or where the applicable entitlement area has withdrawn the voucher. Mark these checks conspicuously to prevent their negotiation, either in error or through fraud. Prepare separate listings of voided and spoiled checks monthly and attach them to the SF 1149, Statement of Designated Depositary Account.

4.2 Voided Checks

The functional area authorizing the payment of a voucher may request voiding of a check. The DO bases their decision on the payee’s non-entitlement to payment, or an error in the way the check was drawn. Do not report voided checks as issued in the DO’s check report. Upon determination to void a check, render the check non-negotiable. Do not store voided checks in the safe or vault of the DO or any deputies or agents. Prepare a listing of voided checks, entitled “Voided Checks,” showing the accounting month, the name of the LD, and the LDA number at the end of each month. Send the voided checks listing and the originals of all voided checks with the monthly SF 1149.

4.3 Spoiled Checks

A DO issuing a check determines when to report a check as spoiled, basing the decision on the physical appearance of the check (e.g., mutilated, torn, not whole, smudged, unreadable); or upon discovering an error in the preparation of the check, (e.g., voucher is correct but the check data does not match).

4.3.1 Preparation of Check Listing. Prepare a separate listing of spoiled checks, entitled “Spoiled Checks,” in check-number sequence at the end of each month, showing the accounting month, name of the LD, and LDA number. Send the listing and the original spoiled checks with the monthly SF 1149.

4.3.2 Spoiled Check Replacement. Replace a spoiled check with the next available serially numbered check. Enter the same information that appeared on the original check except for the check serial number and the check issue date, and date the replacement check on its issue date. Render the original check non-negotiable.
5.0 TRANSFERRING PROCEEDS OF LIMITED DEPOSITARY CHECKS

*5.1 General

An uncurrent LD check is a check that has not been negotiated through the LD for at least one full fiscal year after the fiscal year in which the check was issued, except where local laws provide that the negotiable period of a check is shorter. The amount of such checks must be transferred to Treasury or credited to the original appropriation. The transfer of LDA check proceeds may be due to undeliverable checks or checks due to payees that are deceased or have a cognitive impairment or "determined by a court to lack decision-making capacity."

5.2 Uncurrent Check Transfers

The DO who issued the original check, a successor DO, or a settlement officer designated by the supporting DFAS site transfers proceeds of uncurrent checks to Treasury each October.

5.2.1 Open LDAs

5.2.1.1 Preparation of Check Listing. Prepare an original and four copies of a separate check listing for each LDA, with a heading showing the DO’s name and location and the name and location of the LD. Include the uncurrent LD checks in ascending numerical order on each listing, showing each check’s issue date, check number, name of the payee, check amount in the check’s currency, and the USDE of the check when it was issued (as shown on the payment voucher). Show the total amount of foreign currency units and the total USDE of all checks on the listing. Transfer the total USDE when the checks were issued to Treasury account, 20X6045 (Proceeds and Payment of Certain Unpaid Checks).

5.2.1.2 Stop-Payment Notice to the LD. The DO immediately gives a copy of the uncurrent check listing to the LD, requests that it place stop-payments on all checks, and instructs the LD to advise all payees presenting checks shown on the listing to submit the checks to the disbursing office for transmittal to and settlement by the Department of the Treasury, Bureau of the Fiscal Service, Attn: Credit Accounting Branch, 3201 Pennsy Drive, Building E, Landover, MD 20785.

5.2.1.3 Method of Transfer. The DO prepares an Optional Form (OF) 1017-G, Journal Voucher (JV), to document the purchase of foreign currency represented by the outstanding checks, and completes the purchase by issuing a Treasury check payable to the Department of Treasury for the USDE shown on the check listing. Include a complete explanation of the transaction on the JV, giving the date, check serial number, and DSSN of the activity issuing the Treasury check. The JV supports the increase in the LDA checkbook balance. Report the transaction on the SF 1149. Attach a copy of the JV to the uncurrent check listing and send it with the Treasury check to the Treasury (see subparagraph 5.2.1.2 for address). Contact DFAS-JFKCB/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.
5.2.2. Closed LDAs. When outstanding (unpaid) checks become uncURRENT in a closed LDA, transfer the USDE to Treasury account 20X6045. The DO having jurisdiction over the closed account arranges with the LD for the necessary transfer of funds from the closed LDA to the DO’s current LDA. After the LD completes the transfer to the current account, the DO follows subparagraph 5.2.1. If the closed account belonged to a predecessor DO or is part of the settlement account for a closed disbursing station, prepare an additional copy of the uncURRENT check listing to file with the retained records of the closed disbursing station’s records; include a reference to the disbursing office accomplishing the transfer and the date of transfer on this copy. Notify Treasury of the closure through DFAS-JFKCB/IN at the email address in paragraph 2.2.

5.3 Transferring Proceeds of Undeliverable Checks

This paragraph relates to the proceeds of undeliverable LD checks still due the payee or the payee’s estate. Cancel LD checks returned as undeliverable and are not due the payee or payee’s estate (see section 6.0).

5.3.1. Time Limit for Holding Undeliverable Checks. Hold undeliverable LD checks only until determination that the DO cannot deliver them with the information available, but not longer than 60 days from the date of issue.

5.3.2. Record of Undeliverable Checks. Undeliverable LD checks are recorded on a DD 2658, Returned and Undeliverable Check/Bond Record. Include a complete description of the checks, the disbursing voucher numbers, dates the checks were returned, disposition of the checks, disbursing official authorizing the disposition, and disposition dates. The DO, DDO, or a third person having the DO’s written authorization approves disposition of undelivered checks.

5.3.3. Safekeeping of Undeliverable Checks. Protect undeliverable LDA checks held in the disbursing office the same as cash. File them in an order best suited for ease of retrieval and identification.

5.3.4. Disposition of the Proceeds of Undeliverable Checks Drawn on Open Accounts. Credit the proceeds of undeliverable LDA checks (current as to date of issue) drawn on an open LDA to the appropriation or fund charged for the original disbursement. Use the rate of exchange that was in effect on the date of issue, as shown by the payment voucher, and establish a payable to allow for future settlement. Schedule undeliverable LDA checks on an SF 1098, Schedule of Canceled or Undelivered Checks, showing the check number, month and year of issue, name of payee, amount (USDE on the date of issue), DSSN, and the appropriation or fund to be credited, and process the SF 1098 as a cash collection. To maintain the DO’s accountability, increase the DD 2657 and SF 1219 by the USD amount on the SF 1098, and increase the LDA checkbook balance by the total amount of foreign currency units of the listed checks.
5.3.5. Disposition of the Proceeds of Undeliverable Checks Drawn on Closed Accounts. If the LDA on which the undeliverable checks were drawn is closed, the successor DO or settlement officer notifies the LD that the checks are canceled. Transfer the proceeds of the check to the successor DO’s LDA or by a check payable to the DO (by title). Once the proceeds are transferred to the open account, the DO follows subparagraph 5.3.4 for undeliverable checks drawn. When the LD provides the proceeds by check, the DO processes a DD 1131 to credit the appropriation or fund charged when the checks were issued, and does not prepare an SF 1098. Prepare the DD 1131 at the rate of exchange in effect when the checks were issued, as shown by the related payment vouchers. Account for any difference in the USD value by comparing the current rate of exchange and the rate when the checks are collected as a gain or loss by exchange (see Chapter 13, section 4.0).

*5.4 Limited Depositary Checks Due Deceased Payees or Payees with a Cognitive Impairment or as "Determined by a Court to Lack Decision-Making Capacity"

* 5.4.1. Checks Current as to Date of Issue. Process non-negotiated LD checks returned to the disbursing office in connection with a claim for the proceeds which are still due a deceased payee or payees with a cognitive impairment or as "determined by a court to lack decision-making capacity" but still current as to date of issue under subparagraphs 5.3.4 and 5.3.5.

* 5.4.2. Checks Uncurrent as to Date of Issue. Handle non-negotiated LD checks, uncurrent as to date of issue and returned to the disbursing office in connection with a claim for the proceeds that still are due a deceased or payee or payees with a cognitive impairment or as "determined by a court to lack decision-making capacity."

5.5 Claims for the Proceeds of Undeliverable Checks

5.5.1. Claims for Settlement by the DO. Support claims for the proceeds of undeliverable checks credited to the appropriation or fund originally charged using an SF 1034, Public Voucher for Purchases and Services Other Than Personal. Cite a reference to the original undeliverable check showing its serial number, amount, and DSSN on each voucher.

5.5.2. Claims for Settlement by the DoD. When there is any question of law or fact, send claims for the proceeds of undeliverable checks to DoD, Office of the General Counsel (OGC), 1600 Defense Pentagon, Washington, DC 20301-1600.

6.0 CANCELING LIMITED DEPOSITARY CHECKS

6.1 General

Cancel LDA checks when their proceeds are not due to payees or their estates but are for credit to an appropriation or fund account. The procedure to cancel these checks depends on whether the account on which the check was written is open or closed, whether the check is current or uncurrent, and whether the check is available or unavailable to the DO maintaining the LDA. Contact DFAS-JJFKCB/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.
6.2 Checks Not Due a Payee or Payee’s Estate

If a payee or payee's estate is not entitled to a check, the functional area that submitted the certified payment is the only office that may request the DO to cancel that check. Except as provided in this paragraph, use an SF 1098 to list and report all such checks canceled. In all cases where practicable, the functional area authorizing the original payment prepares the SF 1098.

6.2.1. Checks Current as to Issue Date. The DO cancels LD checks not due a payee as quickly as possible and credits the USDE of the foreign currency amount of the checks at the rate of exchange in effect on the dates the checks were issued (as shown on the payment vouchers) to the original appropriation or fund charged for the payments.

7.0 REPLACING MISSING, MUTILATED, AND FORGED LIMITED DEPOSITARY CHECKS

7.1 General

A DO, upon receipt of a claim for a check that is reported as not received, lost, stolen, destroyed, mutilated, forged, or defaced, determines the status of the check from the LD or from retained records whether the check is outstanding. The DO issues a replacement check in accordance with this chapter when checks are reported as outstanding and unpaid before the end of the fiscal year following the fiscal year a check was issued, and such issuance does not involve a question of law or fact.

7.2 Issuing Replacement Checks

The payee or other claimant notifies the DO in writing (with signature) when a check has been lost, stolen, mutilated, or destroyed, and requests payment on the check be stopped. The notification must provide all information available on the check. When furnished by the DO, the payee or other claimant completes a Treasury Fiscal Service Form 2244, Undertaking of Indemnity - Substitute Checks, and returns it to the DO before the end of the fiscal year following the fiscal year of the check’s issuance.

7.3 Issuing Settlement Checks

This guidance for claims on paid checks applies to all LDAs. The payee immediately notifies the DO in writing (with signature) when a check has been paid on a forged endorsement, providing all available information on the identification of the forged check. The payee completes the Financial Management Service (FMS) Form 1133, Claim Against the United States for the Proceeds of a Government Check, and returns it to the DO issuing the original check within 90 days of the date on the FMS 1133.
7.4 Recovery of Original Check

If the original LD check is recovered before issuance of a replacement check, suspend the replacement check action and request that the LD remove the stop-payment against the original check, which the payee may then negotiate. If the replacement check has been released, render the original check non-negotiable.

7.5 Referral to DoD Office of General Counsel

* 7.5.1. Entitlement or Legal Representation. Send cases involving questions on a payee’s or owner’s entitlement to a substitute or settlement check, and cases where no legal representative has been appointed by the court for payees or owners who are deceased or have a cognitive impairment or "determined by a court to lack decision-making capacity", through command legal channels to the DoD OGC. Include an assessment or determination from the appropriate entitlement area concerning the underlying obligation. Before referring a case, see section 6.0.

7.5.2. Question of Law or Fact. Send cases involving any question of law or fact through command legal channels for settlement action.

7.5.3. Checks Outstanding More Than One Full Fiscal Year. Send cases involving checks outstanding more than one fiscal year after the fiscal year in which they were issued through command legal channels for settlement. Include in these cases an undertaking of indemnity for the proceeds of a lost, stolen, destroyed, mutilated, or defaced LD check; the check in question, when available, or any identifiable portions thereof; and any other supporting documentation.

7.6 Files

The DO retains approved claims and supporting documents or copies of claims where the originals have been transferred to the supporting DFAS site, as part of the retained records.

8.0 ADJUSTMENT OF CHECK-ISSUE DISCREPANCIES

Internal, Government Accountability Office, other agency audits, or DO-initiated control measures disclose LD check-issue discrepancies. These LDA differences are chargeable to DOs. The DO makes adjustments and records them immediately upon discovery. This guidance does not apply to voided, spoiled, or canceled LDA checks, which are addressed in sections 4.0 and 5.0. These discrepancies occur when the LD pays a check in an amount different from the disbursement voucher and the record of checks issued; the disbursing office draws a check to the wrong payee; the disbursing office issues a check in an amount different from that shown on the disbursement voucher; the disbursing office voids, spoils, or cancels a valid check in error while simultaneously issuing a check that was the subject of an action to void, spoil, or cancel; or the payee advises of a possible overpayment or underpayment. Contact DFAS-JFKCB/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.
9.0 LIMITED DEPOSITARY ACCOUNT TRANSACTION DOCUMENTATION

DOs implement controls to assure the drawing of LD checks in strict conformance to certified disbursement vouchers. LDAs are a part of the DO’s accountability for public funds. The DO must maintain complete and accurate records, and make them available for audit to ensure the integrity of the LDAs. Treat a loss resulting from a bank failure as a physical loss; see Chapter 6, paragraph 2.0. Contact DFAS-JJFKCB/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.

10.0 TRANSFERRING AND CLOSING A LIMITED DEPOSITARY ACCOUNT

LDAs closed or transferred require reconciliation. The DO’s agent serving as the LDA custodian contacts the LD and requests a current statement of the account and, if available, all the paid LD checks since the last regular statement before attempting to reconcile an LDA. Reconcile the account by preparing an SF 1149. Contact DFAS-JJFKCB/IN at the email address listed in paragraph 2.2 to obtain procedural guidance and processing instructions.
VOLUME 5, CHAPTER 15: “DISBURSING OFFICER ACCOUNTABILITY REPORTS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated September 2020 is archived.

CHAPTER 15

DISBURSING OFFICER ACCOUNTABILITY REPORTS

1.0 GENERAL

1.1 Overview

1.1.1. Financial Reports. All disbursing officers (DOs) are accountable to the U.S. Department of the Treasury (Treasury) for the cash and cash equivalent items (including receivables) in their possession. DOs are required to submit financial reports to support the DoD accountability to the U.S. Government for all public funds collected and disbursed. These reports are the basis for official audits and settlement of accounts by the U.S. Government Accountability Office, and provide information to maintain administrative accounting controls.

1.1.2. Accountability Reports. DOs maintain their daily accountability on the DoD (DD) Form 2657, Daily Statement of Accountability. The DO’s official monthly accountability is recorded and reported on the Standard Form (SF) 1219, Statement of Accountability. DOs report disbursement and collection transactions on both the DD 2657 and the SF 1219, with collections reported as net of disbursements on the SF 1219. Every DO must keep detailed records of all transactions. These records must be available for examination by authorized representatives. Daily reporting does not affect the use and distribution of the DD 2657, SF 1219, DD 2665, Daily Agent Accountability Summary and DD 1081, Statement of Agent Officer’s Account. DOs must continue to submit financial reports to supporting Defense Finance and Accounting Service (DFAS) sites based on each site’s instructions.

1.2 Purpose

This chapter provides the policy, guidelines, and forms to record daily and monthly accountability for cash items (and receivables) in the DO's possession. In addition, it provides requirements for submission and distribution of financial reports and retention of disbursing office records, and defines the accounting period.

1.3 Authoritative Guidance

Under Title 31, United States Code, section 3513, the Secretary of the Treasury prepares reports required to inform the President, Congress, and the public on the financial operations of the U.S. Government. The head of each executive agency must provide the Secretary of Treasury reports and information relating to the agency’s financial conditions and operations. See Treasury Financial Manual (TFM), Volume 1, Part 2, Chapter 4700.

2.0 POLICY

2.1 Balancing of Accounts

2.1.1. DOs. DOs keep documents representing cash in their vault or safe and account for them daily on the DD 2657 and monthly on the SF 1219. The DD 2657 represents the permanent written
record of the DOs daily balance of cash in their possession. When accounts are inspected, DOs must present the DD 2657 to the inspectors for examination.

2.1.2. Deputies, Cashiers, and Disbursing Agents. Deputies DOs (DDOs), cashiers, and disbursing agents perform most DO cash transactions. The DO or primary DDO balances all DDOs, cashiers, disbursing agents, paying agents, and collections agents daily, using the DD 2665. The DD 2665 represents the report of their accountability to the DO, and preparation of this form is based on a physical count of all cash and negotiable instruments in their possession.

2.2 Deputies, Cashiers, and Disbursing Agents at Remote Locations

DDOs, cashiers, and disbursing agents who are geographically distant from the DO (e.g., DO in Indiana and agent in Afghanistan) are still required to record transactions by preparing a DD 2665; however, they need not submit the DD 2665 to the DO on a daily basis. DOs will establish the timing of agent turn-ins for their operations. Agent turn-ins must include all DD 2665s, supporting documentation (e.g., collection vouchers, disbursement vouchers, and deposit tickets), and DD 1081.

2.3 Navy Vessels

DOs aboard Navy vessels balance their cash using the DD 2657. The DDOs, cashiers, and disbursing agents must use DD 2665 to balance at least weekly, immediately before and after each payday, the last day of each month, and anytime the DO suspects that an irregularity has occurred. When workload and staffing conditions allow, DOs aboard Navy vessels should balance cash accounts for all DDOs, cashiers, and disbursing agents daily.

3.0 DAILY AGENT ACCOUNTABILITY SUMMARY (DD 2665)

The DD 2665 is a stand-alone document that provides a complete picture of a DDO’s, cashier’s, or disbursing agent's accountability transactions from day to day. Each DDO, cashier, and disbursing agent prepares a DD 2665 for each day during which he/she transacts business. They must summarize that day’s business and record the transactions in U.S. dollar (USD) values. Paying agents appointed to work with contracting for contingency operations need to prepare a DD 2665 on the day they turn-in all their business to the DO. To the extent possible, avoid performing a turn-in during the middle of a business day. If a turn-in is required in the middle of the day, prepare a DD 2665 up to and including the turn-in period; prepare another DD 2665 for the portion of the business day after the turn-in.

4.0 STATEMENT OF AGENT OFFICER’S ACCOUNT (DD 1081)

4.1 Overview

Agent officers (DOs, cashiers, and disbursing agents) prepare a DD 1081, as a summary of cash transactions and receipt for cash and vouchers on hand (between DOs and their agent officers). This form is prepared when a DO is advancing funds to an agent and is also used to summarize cash transactions for the period covered by the turn-in. When the agent officers settle
their account, the DO or principal DDO verifies the DD 1081, signs the original and a copy of the form, keeps the original form and supporting documents, and returns the signed copy of the form to the agent officer. The DO or principal DDO must perform a physical count of cash at the time of the turn-in or settlement. The agent officer keeps the signed copy as a record of the opening cash balance for the next period of duty and for record purposes if the account is balanced to zero.

4.2 Electronic Submission of DD 1081s in Contingency Locations

Subject to the approval of the parent DO, paying agents in remote operational contingency locations may transmit electronically scanned or facsimile copies of the DD 1081 to the parent disbursing office. A paying agent is solely responsible to ensure that all documentation is legible and that:

4.2.1. The scanned or facsimile copies were produced from original documents and cannot be altered;

4.2.2. The copies are retained until the applicable retention period expires; and

4.2.3. Access to the images is limited to authorized personnel.

In cases of paying agents transmitting documents electronically, the DO must verify the electronic submissions are in fact from the paying agent. Further, the DO is responsible to ensure that adequate internal controls are implemented to prevent the posting of duplicate items when receiving electronic and original documents from the operational contingency location. The DO must also provide for the confirmation and acceptance of digitally signed documents, and the return of the accepted DD 1081 to the agent.

5.0 DAILY STATEMENT OF ACCOUNTABILITY (DD 2657)

The DD 2657 summarizes the total disbursements and collections made during the business day by the DO and all DDOs, cashiers, and disbursing agents. Section I of the DD 2657 reflects the total DO accountability to the Treasury at the end of each business day. If disbursing operations were to cease, the total amount listed in Section I for the last operational business day would be the amount that the Treasury would seek to recover from the DO.

6.0 STATEMENT OF ACCOUNTABILITY (SF 1219)

In a daily reporting environment, the SF 1219 is no longer required to be submitted to the Treasury. DOs may continue to complete and submit the SF 1219 at month’s end to DFAS for reporting requirements based on each site’s instructions. The SF 1219 will continue to be utilized to reconcile deposits, collections, disbursements, and cash balances with Treasury on a monthly basis. In a daily reporting environment, there is still the requirement to balance to the Treasury monthly account statement, which summarizes the financial activities of federal agencies. DoD currently has established processes for creating and reconciling the SF 1219, which reduces risk from a reconciliation and balancing standpoint as DoD transitions to daily reporting. From an accounting perspective, there is no warrant or apportionment for DO cash and no formal funds
control system documentation that legally places responsibility on the DO for the cash. Additionally, the SF 1219 is a recognized means of establishing responsibility for a specific and verified balance at a point in time. It aligns with accounting reporting cycles (the Governmentwide Treasury Account Symbol Adjusted Trial Balance System bulk file submission), which transmits the end of month balance in the DO Cash account(s) and must match the sum of the SF 1219s for each Service to facilitate reconciliation with the general ledger reporting.

7.0 FINANCIAL REPORTS

7.1 Overview

7.1.1. Accounting Period. DOs submit financial reports to the DFAS on a calendar month basis, except for months during which accountability begins or ends on other than the first or last day of a month.

7.1.1.1. For a new disbursing office, the accounting period begins on the first day official business is transacted. When one DO relieves another, the accounting period for the relieved officer ends on the date of relief. The accounting period for the relieving officer normally begins on the next calendar day. Whenever possible, relief of a DO should occur on the last day of a month to preclude the need to submit an additional set of financial reports for that month.

7.1.1.2. An accounting period may not extend beyond the end of a calendar month. Exceptions to the calendar month accounting period may occur when a DO is relieved from disbursing duty before the last day of a month or commences disbursing duty on other than the first day of a month. The first day of the accounting period coincides with the date of commencement of disbursing duty notification forwarded under Chapter 2, subparagraph 4.6.2.5. For any month during which accountability ends because of a Disbursing Station Symbol Number closing, the DO must submit the financial reports from the first day of the month through the date of closing.

7.1.2. Adjustments. DOs are allowed to submit supplemental reports to Treasury to adjust prior period reporting, make corrections to the original reporting, or report additional current month transactions.

7.1.3. Submission of DO’s Financial Reports. DOs submit financial reports to the supporting DFAS site based on each site’s instructions.

7.2 Requirement for Submission of the Subsidiary Accountability Record (DD 2667)

When a DDO, cashier, disbursing agent, paying agent, collection agent, or imprest fund cashier has a physical loss of funds, forward the DD 2667, to DFAS-ZPTC/IN within five calendar days after the end of each month (see Chapter 6, subparagraph 4.2.2.2.).
8.0 DISBURSING OFFICE RECORDS

8.1 DFAS Record Retention

The supporting DFAS site examines all financial reports and sends them to the nearest federal records center for retention based on record retention requirements and storage availability at the DFAS site.

8.2 DoD Record Retention

8.2.1. Volume I, Chapter 9, section 2.0 provides records retention requirements applicable to financial records. The retention requirements for Federal entities are further defined in the National Archives and Records Administration (NARA) General Records Schedule. The DoD has also developed supplementary guidance in DoD Instruction 5015.02, DoD Records Management Program.

8.2.2. DOs must apply the most stringent record retention requirements to support accounting records of initial entries and support records such as checks, electronic fund transfers, invoices, and maintain them until all outstanding issues are resolved. Before disposal of contingency operations documents, DOs must contact their legal counsel for document retention in excess of the NARA and DoD guidance for financial records. Records must be available and accessible to all authorized users. Additionally, a DO or designated settlement official must keep records to complete the reconciliation of payment or collection discrepancies until resolved.

8.3 Other Records

8.3.1. Original Disbursing Office Records. Original disbursing office records include, but are not limited to:

8.3.1.1. Disbursement and collection vouchers including supporting documents (e.g., invoices, receiving reports, purchase orders or contracts, and lodging receipts);

8.3.1.2. DD 2659, Voucher Control Logs;

8.3.1.3. DD 2657;

8.3.1.4. SF 1219;

8.3.1.5. DD 2665;

8.3.1.6. Check issue records and reports;

8.3.1.7. Limited Depositary Account records and reports;

8.3.1.8. Deposits of negotiable instruments;
8.3.1.9. Deposit tickets and debit vouchers;

8.3.1.10. Appointments and revocations of accountable individuals;

8.3.1.11. Payroll deposit transactions to individual service members’ local pay accounts that are accessed via shipboard cash dispensers (automated teller machines);

8.3.1.12. Any other document record, log, or electronic file that supports disbursing transactions that affects the accountability of the DO or other accountable individual; and

8.3.1.13. Local check cashing policies and agreements.

8.3.2. Other Records Retention. The requirement for retaining original records applies to any record a DO receives that accompanies payment or collection transactions, or supports financial reports. The requirement applies to both paper and electronic records kept as original supporting documents at both the functional and disbursing offices. Certifying officials send electronic payment files to only the DO and keep supporting documentation in accordance with the guidance referenced in paragraph 8.2. For Foreign Military Sales document record retention, see Volume 15, Chapter 6.

8.3.2.1. Hardcopy and electronic records storage controls must be in place by the disbursing office to ensure that only authorized personnel have access to any paper documents and electronic images.

8.3.2.2. Original disbursing office records and supporting documents in electronic format are a form of record retention. Duplicate copies of disbursement and collection vouchers and associated supporting documents may be retained as necessary at the DO’s discretion.

8.3.3. Unclassified Records. Individual records may be unclassified, but sometimes when information is aggregated, the security classification may change. Unclassified records do not require special security or storage controls and may be stored in open files or cabinets. Store these records with controls that readily identify:

8.3.1.1. Records that have been removed from the files;

8.3.1.2. The name of the individual(s) who removed the records;

8.3.1.3. The date the records were removed;

8.3.1.4. The name of the individual(s) who returned the records;

8.3.1.5. The date the records were returned; and
8.3.1.6. Other information needed to contact the responsible individual(s), (e.g., organization, address, telephone number, and email address to ensure that records are returned timely).

8.4 Transfer and Disposition of Retained Disbursing Office Records

8.4.1. Nontactical Disbursing Offices. Transfer all disbursing office records to the incoming (relieving) DO as a part of the relief process described in Chapter 2, paragraph 4.6. When a disbursing office is deactivated, package and mail all disbursing office records to the office designated to settle the accounts.

8.4.2. Tactical Units and Naval Vessels

8.4.2.1. Detachment With Relief. When a DO of a tactical unit or naval vessel is relieved from disbursing duty, the incoming DO keeps the outgoing DO’s disbursing records for 90 days from the date of relief. After the 90-day period, the incoming DO packages the disbursing records and sends them to the supporting DFAS site or alternate site designated by DFAS for retention until the expiration of the required retention period. For deployed units, the 90-day period begins after the unit or vessel returns to homeport.

8.4.2.2. Detachment Without Relief. When a DO of a tactical unit or naval vessel is relieved from disbursing duty due to deactivation of the disbursing office or when a vessel or unit is decommissioned from service, the DO must package and send all disbursing office records to the supporting DFAS site or alternate site designated for retention.

8.4.2.3. Shipment of Retained Documents. To facilitate shipment of retained records, DOs of tactical units and naval vessels file retained records in these categories:

8.4.2.3.1. Public vouchers other than payroll vouchers;

8.4.2.3.2. Payroll vouchers with supporting documents;

8.4.2.3.3. Collection vouchers and supporting documentation;

8.4.2.3.4. Checking accounts records, to include records of checks drawn. These records include Month End Check Issue Summary (SF 1179); Report 251, Advice of Check Issue Discrepancy (Fiscal Service Form 5206) (see 1_TFM_4-6040.10), with related correspondence; and Optional Form 1017-G, Journal Voucher, with related correspondence;

8.4.2.3.5. DD 2657;

8.4.2.3.6. SF 1149, Statement of Designated Depository Account (see Chapter 14);

8.4.2.3.7. SF 1219;
8.4.2.3.8. Instruments deposited;

8.4.2.3.9. *SF 1184*, Unavailable Check Cancellation;

8.4.2.3.10. Debit Vouchers;

8.4.2.3.11. Certificate of revaluation of foreign currency;

8.4.2.3.12. Quarterly reports on the status of suspense accounts; and

8.4.2.3.13. Other miscellaneous retained disbursing documents.

CHAPTER 16

SAFEKEEPING FUNDS AND VALUABLES FOR INDIVIDUALS AND MORALE, WELFARE, AND RECREATION ACTIVITIES

1.0 GENERAL

1.1 Overview

DoD disbursing officers (DOs), deputy DOs (DDOs), and agents may accept cash and checks from individuals and morale, welfare, and recreation (MWR) activities for which safe custody otherwise would not be available. When a DO, DDO, or agent is unavailable, or when it is impractical for one of them to accept and account for safekeeping deposits, a commander may appoint and terminate any military member or DoD civilian employee as a safekeeping custodian to accept and account for safekeeping deposits using a separate DoD (DD) Form 577, Appointment/Termination Record – Authorized Signature (see Chapter 2, section 3.0).

1.1.1. Safekeeping of Deposits. Keep safekeeping deposits in a secured safe and establish appropriate procedures to maintain accountability. Consider funds accepted for safekeeping as funds held in trust for which the United States is accountable, but are not within the DO’s financial accountability to be reported to the Department of the Treasury (Treasury) on the Standard Form (SF) 1219, Statement of Accountability.

1.1.2. Restrictions. Deposits and withdrawals are subject to local command regulations that establish necessary and proper restrictions as to the time, place, and frequency of deposits and withdrawals, and the types of objects classified as valuables. Impose controls to prohibit interruption of the activity’s priority fiscal operations (e.g., special and regular payroll activities). Safekeeping services should not be abused by the deposit of objects that are not usually afforded additional protection. Limit deposited valuables to funds; negotiable instruments including bonds, credit cards, travelers’ checks, and checkbooks; and objects classified as jewelry having an intrinsic value requiring additional protection. Items such as wallets, snapshots, keys, or items lacking any intrinsic value are prohibited.

1.1.3. Responsibility for Deposits

1.1.3.1. Custodians. Commanders appoint custodians to be responsible for the proper handling of and accounting for safekeeping deposits (see paragraph 3.1). Appointments must state the specific duties authorized to be performed by the custodian. Pecuniary liability does not attach to safekeeping deposits as they are not public funds. Section 2.0 applies to the safekeeping of nonappropriated funds (NAF) for MWR activities. Note that losses of NAF are not recorded on the DO’s SF 1219. If a loss occurs, notify the depositor of their right to submit a claim for reimbursement of the loss under applicable DoD Component regulations. Submission of a claim need not be deferred to await findings of any investigation initiated to determine responsibility for the loss.
1.1.3.2. **Assistant Custodians.** When the volume or nature of safekeeping deposit transactions warrants, the custodian may formally appoint an assistant custodian for initial receipt and temporary custody of safekeeping deposits pending their delivery to the designated custodian. Provide separate safekeeping facilities for the assistant custodian. Cover all custody transfers between the custodian and assistant custodian with receipt. An assistant custodian is responsible for proper accounting and handling, including receipt and delivery of safekeeping deposits to a permanent custodian. Process losses under subparagraph 1.1.3.1.

1.1.4. **Deposit of Postal Funds.** Receive and handle safekeeping deposits of postal funds under the *Military Postal Service, DoD Instruction 4525.09*, identifying these as postage stamp fund or postal money order fund, as applicable, on the safekeeping deposit receipt.

1.1.5. **Deposit of Funds Under Emergency Conditions.** Follow paragraph 2.2 to receive and handle safekeeping deposits of funds by military banking facilities, NAF custodians, and other DoD sponsored activities. Identify on the safekeeping deposit receipt the deposit, depositing agency, and the custodian making the deposit.

1.2 **Purpose**

This chapter provides DoD’s policy for appointed custodians and assistants to receive and safeguard cash and other valuables belonging to individuals or MWR activities.

1.3 **Authoritative Guidance**

*Title 31, United States Code, section 3302* authorizes DOs to have custody of public funds for disbursement purposes and requires them to safeguard the funds.

2.0 **SAFEKEEPING OF NONAPPROPRIATED FUNDS FOR MWR ACTIVITIES**

2.1 **Accounting for Separate Funds**

Place each safekeeping deposit in a separate, sealed envelope following subparagraph 2.2.1, except as provided in paragraph 2.2. Process withdrawals in accordance with the procedures provided in subparagraph 2.2.2.

2.2 **Accounting for Collocated Funds**

Custodians may collocate funds when the volume of safekeeping deposits warrants and it is desirable to accommodate more than one deposit or withdrawal transaction in (non-individual) safekeeping deposit accounts at non-tactical activities. Place the deposits in a separate container identified as safekeeping funds to prevent commingling with official funds. At activities other than Navy ships, if the total value of collocated safekeeping funds on hand is large, a bank checking account may be established (see paragraph 2.3).
2.2.1. Deposits

2.2.1.1. Receipt for Deposit. Use a DD 2674, Record and Receipt of Deposits and Withdrawals of Safekeeping Funds, for each deposit and assign a consecutive series of deposit numbers beginning with the number “1” preceded by the letter “D.” Assign each depositor a depositor’s account number using a consecutive series of numbers beginning with the number “1.” The information on the DD 2674 should identify the depositor, depositor’s account number, date of deposit, and the amount deposited. The custodian gives the signed original DD 2674 to the depositor and retains a copy.

2.2.1.2. Individual Ledger Sheets. For each depositor, the custodian keeps a separate ledger control sheet, the heading of which includes the following: depositor’s account number, name and location of the depositing MWR activity, and signature of the MWR activity representative making the deposit. The custodian enters the amount of each deposit in the debit column of the ledger sheet, the total amount on deposit in the balance column, the date of each deposit, and deposit receipt number.

2.2.1.3. Cash-On-Hand Ledger Control Sheet. In addition to the individual ledger sheets described in subparagraph 2.2.1.2, the custodian also keeps a cash-on-hand ledger control sheet entering the amount of each deposit in the debit column and the total amount on deposit by all depositors in the balance column. If preferred, a daily summary posting may be made to the ledger control sheet showing inclusive deposit numbers. The balance of the ledger control sheet must agree with the combined balances of the individual depositors’ ledger sheets.

2.2.2. Withdrawals. The depositor presents the original deposit receipt(s) to the custodian when requesting a full or partial withdrawal of the funds on deposit. The custodian confirms the depositor’s account balance and obtains a signature in the applicable section of the retained copy of the DD 2674 verifying it against the signature on the deposit record and/or the individual ledger sheet before releasing the funds requested. If the request is for a full withdrawal, the custodian voids the original DD 2674 in the presence of the depositor. A depositor may make up to three partial withdrawals of a safekeeping deposit. If the deposit is not withdrawn in full after two requests, the custodian voids the original DD 2674 and issues a new DD 2674 for the new deposit amount. The custodian enters the withdrawal as a credit in the depositor’s individual ledger sheet and the custodian’s ledger control sheet. In lieu of individual entries, the custodian may post a daily summary showing inclusive withdrawal numbers on the ledger control sheet.

2.2.2.1. Currency Withdrawals. Return the identical currency that was presented by the depositor when the deposit is withdrawn (e.g., a deposit made in Japanese Yen cannot be withdrawn in U.S. dollars).

2.2.2.2. Check Withdrawals. Enter the check number on the withdrawal request. See subparagraph 160203.A for more information regarding checks for the deposit of safekeeping funds.
2.3 Bank Accounts

2.3.1. General. Custodians of commingled safekeeping funds, with command approval, may establish and maintain a checking account in a local bank or credit union (insured by either the Federal Deposit Insurance Corporation or the National Credit Union Share Insurance Fund, as appropriate) for the deposit of safekeeping funds if the amount available for deposit is large enough to preclude the payment of service charges or other fees. The financial institution collateralizes funds in excess of the insured limits in accordance with Title 31, Code of Federal Regulations, Part 202. Establish the account in the name of the disbursing activity, the safekeeping fund, and the custodian (e.g., “U.S. Naval Activity, Boston, MA, Safekeeping Deposit Fund, Lieutenant J. A. Hancock, SC, U.S. Navy, Custodian”). Loans or investments from safekeeping deposit funds are prohibited.

2.3.2. Check Records. All checks must be serially pre-numbered. A complete record of all checks drawn, deposits made to the safekeeping checking account, and a running account balance must be maintained in the checkbook. Reconcile statements from the financial institution immediately upon receipt and file them with the bank ledger control sheet. Mark spoiled checks as “VOID” and file them in sequence.

2.3.3. Deposits to Safekeeping Fund Bank Account. Deposit checks, money orders, and cash received for safekeeping to the authorized account, except for cash required to be kept on hand to meet safekeeping withdrawal requirements. Checks and money orders may be accepted for deposit, subject to collection. Withdrawals are not authorized until sufficient time has elapsed for the checks and money orders to clear through the banking system.

2.3.4. Disbursements From Safekeeping Fund Bank Account. Draw checks for withdrawals of safekeeping funds on the safekeeping deposit fund account whenever practical. Checks may be drawn on the safekeeping fund account only for payment to a depositor for withdrawal, an authorized transfer of a depositor’s account to another activity, replenishment of cash-on-hand (through an exchange-for-cash check) needed to meet safekeeping withdrawal requirements, or transfer of unclaimed monies.

2.3.5. Cancellation of Checks. Checks drawn on the safekeeping deposit fund account must bear the following stamped endorsement on the reverse side: “This check is not valid unless presented for payment within 12 months from its date of issue.” If a check is canceled, the custodian confirms the stop payment action with the financial institution and credits the depositor’s safekeeping account for the amount of the canceled check. An effort should be made to locate the depositor and make the payment.

2.3.6. Account Closure. If the depositor cannot be located, close the account by drawing a check payable to the Treasury for deposit. The custodian prepares a DD 1131, Cash Collection Voucher, and credits account R1060 for amounts less than $25. The custodian credits account 20X6133, Payment of Unclaimed Moneys, for amounts of $25 or more. Ensure the deposit utilizes the Treasury Account Symbol that matches the DD 1131 along with the Business Event Type Code for collateral. Include all information available as to the identity and location of the depositor on the collection voucher. The custodian presents the check and DD 1131 to the DO for collection.
Send any claim subsequently received for the funds to the supporting Defense Finance and Accounting Service site for processing, with a copy of the related DD 1131.

2.3.7. Bank Ledger Control Sheet. In addition to the cash-on-hand ledger control sheet, the custodian keeps a separate ledger control sheet for cash-in-bank. When cash, checks, or money orders are deposited in the bank, the custodian debits the cash-in-bank ledger control sheet and credits the cash-on-hand ledger control sheet. Post exchange-for-cash checks as credits to the bank ledger control sheet and debits to the cash-on-hand ledger control sheet. Post withdrawals by check as credits to the bank ledger control sheet and debits to the individual ledger sheet. The sum of the cash-in-bank and cash-on-hand ledger control sheets must agree with the combined balances of the individual depositors’ ledger sheets.

3.0 SAFEKEEPING OF PERSONAL FUNDS AND VALUABLES OF INDIVIDUALS

3.1 Deposits

The custodian records all deposits on a DD 2674. Use a series of consecutive numbers beginning with the number “1” for assignment to safekeeping deposits. Assign each deposit, at the time it is made, the next number in the series. The custodian enters in the appropriate spaces of the DD 2674 the deposit number, date of deposit, description of the deposit (if money, describe the amount in figures and words), and the signature and rank of the custodian (or assistant custodian) receiving the deposit. The depositor must enter their social security number (SSN), signature, and rank or rate in the spaces provided. The custodian gives the signed original of the DD 2674 to the depositor and retains a copy.

3.2 Withdrawals

A depositor wishing to withdraw a deposit presents the original DD 2674 to the custodian, who verifies the depositor’s signature and determines that the serial number, date, and description correspond with the data appearing on the retained copy of the form. The depositor acknowledges receipt of the deposit by entering their signature and the date of withdrawal in the space provided on the retained copy of the DD 2674. The custodian destroys the original DD 2674 in the presence of the depositor. If the receipt has been lost, the deposit may be returned to the depositor only after the custodian is satisfied as to the identity of the depositor and the depositor’s entitlement to the deposit. The entries on the DD 2674 constitute the official record of the deposit. The entire deposit must be withdrawn at the time of withdrawal. Partial withdrawals are not authorized, but a new deposit in a new amount is authorized subject to any restrictions prohibiting unreasonable repeated deposits.

3.3 Withdrawal of Funds or Valuables Subsequent to Transfer of Depositor

If a depositor is transferred before withdrawing safekeeping deposits, the custodian delivers the depositor’s cash balance to the DO in exchange for a Treasury check payable to the depositor. Send the check and the depositor’s valuables (if any) with a letter of transmittal to the commander of the activity where the depositor was transferred to for delivery to the depositor.
Include in the transmittal letter all available details about the depositor and request acknowledgement of receipt. Insert data regarding the transfer on the file copy of the DD 2674.

3.4 Deposit and Withdrawal of Funds by Incapacitated Persons

To process deposits and withdrawals of funds and valuables, an officer or any other person designated by the commander must accompany an incapacitated person to witness and sign each transaction. Deliver receipts for safekeeping deposits to the commander.

3.5 Deposits of Deceased or Missing Persons

The custodian delivers cash on deposit to the DO in exchange for a Treasury check payable to the payee designated by the officer (or inventory board) appointed by the commander to take custody of the depositor’s personal effects. The Treasury check is drawn as “Exchange-for-Cash, Safekeeping Deposit No. ______, name, rank or rate, SSN.” Deliver the check and any depositor valuables to the appointed officer (or inventory board) for disposition following applicable DoD Component regulations. Obtain a receipt for the check and any valuables transferred under these instructions. Enclose a retained copy of the DD 2674 with a notation describing the disposition, and destroy the receipt portion of the DD 2674, if available.

4.0 BALANCING AND VERIFICATION OF SAFEKEEPING DEPOSITS

4.1 Balancing

The safekeeping custodian balances all safekeeping deposits on the last day of each month. The cash-on-hand and any safekeeping fund bank account balance must equal the total of the amounts credited in all of the active depositors’ accounts as shown on the retained copies of the DD 2674s, or the individual ledger sheets and ledger control sheet. The custodian certifies that balancing was accomplished on the ledger control sheet.

4.2 Verification

4.2.1. General. At unannounced intervals, at least once during each calendar quarter, a cash verification team appointed by the commander verifies safekeeping deposits in the presence of the custodian (see Appendix A “Quarterly Verification of Cash and Other Assets”). Include the results of the verification in the report of verification to the commander.

4.2.2. Separate Deposits. Separate deposits should be confirmed by verifying the contents of each envelope against the retained copies of the DD 2674s.

4.2.3. Collocated Funds. The custodial office verifies collocated funds by counting the cash held for safekeeping and comparing it with the total of the individual depositors’ ledgers and with the balance shown on the ledger control sheet. At activities maintaining a safekeeping deposit fund checking account, examine the latest statement from the financial institution and verify the amount on deposit in the checking account. The verifying officers should certify the last entry on the ledger control sheet.
4.2.4. **Reporting a Shortage or Overage.** By accepting custody of safekeeping funds, the United States is accountable for them and assumes a trust responsibility for their care and safekeeping, even though it has no beneficial interest in them. The custodian must promptly report any shortage or overage of safekeeping deposits to the commander who takes actions similar to those prescribed in Chapter 6, section 4.0 for a shortage or overage of public funds.

4.3 **Transfer of Safekeeping Deposits Upon Relief of Custodian**

In preparation for being relieved of custodial duties, the outgoing custodian must balance safekeeping deposits, prepare a duplicate list of all active deposits, and give the list and all active deposits to the relieving custodian, who must then verify all deposits and receipts. The DD 2674 and any other records of commingled deposits must be transferred to the relieving custodian. If a checking account is maintained, it must be reconciled and transferred to the relieving custodian. The outgoing custodian must arrange with the financial institution to transfer the checking account to the relieving custodian.

APPENDIX A

QUARTERLY VERIFICATION OF CASH AND OTHER ASSETS

1.0 GENERAL

1.1 Overview

Chapter 3, subparagraph 3.2.1.1, requires that a cash verification team conduct an unannounced verification of the cash and other assets under the accountability of the disbursing officer (DO) at least once during each calendar quarter. The cash verification team ensures the DO and his or her agents are given neither formal nor informal advance notification of the intent to conduct the verification. Verification scheduling should be random to ensure it does not predictably fall during a particular period each quarter. Generally, it is not practical to verify cash on days involving unusually high volumes of disbursing transactions. The commander may omit a second quarterly cash verification, if an audit of the DO’s cash and assets has been conducted as a part of a transfer of accountability, or if other official audits verifying the accountability were conducted during the same quarter. The cash verification team must prepare a written statement for the commander’s signature specifying the circumstances for omitting a cash verification.

1.2 Purpose

This appendix provides a checklist for conducting a surprise verification of the cash and other assets under the accountability of the DO.

1.3 Authoritative Guidance

Title 31, United States Code, section 3302 (31 U.S.C. § 3302) authorizes DOs to have custody of public funds for disbursement purposes and requires them to safeguard the funds.

2.0 CASH VERIFICATION CHECKLIST

2.1 Checklist

Use this checklist as a guide for the cash verification and to assist in preparing the official report of verification. The senior member of the verification team, in consultation with the DO, determines which checklist items pertain to the DO’s operations and operating environment, and explains any deviations or omissions from the checklist in the official report.

2.1.1. The senior member of the cash verification team notifies the DO’s immediate supervisor upon arrival to conduct the surprise verification of cash and other assets. The cash verification team presents a copy of the appointment memo, and with the presence of the DO or a deputy, assumes control over all cash and other assets in the DO’s accountability. If access is refused, the senior member of the verification team immediately notifies the commander.
2.1.2. Secure all accessible vaults, safes, security containers, and cash drawers housing cash or other assets holding DO cash accountability. Inventory the cash and other assets by actual count in the presence of the person accountable for their safekeeping.

2.1.3. Require the DO to prepare a **DOD (DD) Form 2657**, Daily Statement of Accountability, for that day close of business and validate amounts reported for items due the U.S. Government that are included in the balance. It is also required that the custodian of public funds prepares a DD 2665, Daily Agent Accountability Summary.

2.1.4. No custodian of public funds may conduct further business until the cash verification team has completed the count of that custodian's funds. Normally, the duty cashier's funds are verified first to minimize the impact on disbursing operations. Compare amounts of cash held at personal risk by the DO and his or her agents to the authorization to hold such cash as indicated by the approved cash holding authority (CHA) (see Chapter 3, section 2.0).

2.1.5. If the commander determines that it is not practical to inventory the funds in the possession of some of the DO’s agents because of inaccessibility or geographic separation, the cash verification team verifies the amounts shown on custody receipts either by telephone with the accountable person, examination of the permanent file of cash verifications and certification held by the disbursing office, or any other means available to complete the verification. The verification team notes actions taken and describes any limits to the verification in the report.

2.1.6. Commence the actual count of currency and other assets in the presence of the accountable individual.

2.1.6.1. **Cash**

2.1.6.1.1. Count all currency and coin;

2.1.6.1.2. Count all items representing cash, including exchange-for-cash checks;

2.1.6.1.3. Count all negotiable instruments representing cash held by the DO awaiting deposit; and

2.1.6.1.4. Verify that cash and receipts held by agents in the disbursing office equal the receipts signed by those agents and held by the DO.

2.1.6.2. **Other Assets**

2.1.6.2.1. Review and total all receipts for cash held by agents of the DO located outside the disbursing office;

2.1.6.2.2. Review and total deposit transactions via Over the Counter Channel Application and confirm deposit transactions utilizing the Collections Information Repository (see Chapter 11, section 11.0);
2.1.6.2.3. Review the debit voucher and associated dishonored checks; require the DO to initiate collection action;

2.1.6.2.4. Review exchange-for-cash checks in transit (see Chapter 7, section 7.0);

2.1.6.2.5. Review Financial Management Service Form 5206, Advice of Check Issue Discrepancy, representing overdrafts and underdrafts (see Chapter 7, section 8.3.3);

2.1.6.2.6. Review actions on previously reported losses of funds;

2.1.6.2.7. Verify bank statements and balances of foreign currency held in limited depositary checking accounts (see Chapter 14, paragraphs 3.9 and 3.10); and

2.1.6.2.8. Verify the amount of foreign currency by actual count against the subsidiary records and the foreign currency reports.

2.1.7. Immediately after verifying the DO’s cash accountability, the cash verification team verifies all safekeeping deposits and the postal stamp funds (if applicable) with procedures provided in Chapter 16, paragraph 4.2. No quarterly verification of agent cash is considered to have been made if any agent’s cash accountability is not physically verified, when the DO’s cash accountability is verified.

2.1.8. The cash verification team verifies the imprest and change funds at least once each quarter. This may be simplified by appointing an individual rather than a team. Accomplish these verifications by totaling all receipts and counting all cash to prove the total shown on the cash receipt held by the DO. Investigate any receipts for cash advanced by the imprest fund cashier more than five days old if not redeemed before the report is issued, and document on the cash verification report. Change fund custodians must certify in writing that their funds are present at the time of the cash verification. Change fund verification consists of verifying that the cash drawer contains the amount shown on the change fund documentation, after adjusting for any sales proceeds or receipts on the day of verification. Verifications of both imprest fund cashiers and change fund custodians ensure that none of the funds includes personal checks from the cashier/custodian, any of their supervisors, or the individual charged with accountability for the funds (see Chapter 2, paragraphs 7.6 and 7.7).

2.1.9. Review all vouchers supporting gains and deficiencies on foreign currency transactions (see Chapter 13, paragraph 4.2).

2.1.10. Review the DO’s compliance with the provisions for cashing personal checks and the collection of dishonored checks (see Chapter 4, section 3.0).

2.1.11. Ensure that checks representing collections are properly identified and supported by collection vouchers so that dishonored personal checks received as collections may be charged back to the receiving activity and not held as losses due to accommodation exchanges made by the DO (see Chapter 4, section 4.0).
2.1.12. Review previous cash verification reports to ensure that repeat deficiencies being reported in the current cash verification report are noted as significant and advise the commander of the action necessary to remedy the deficiencies of the DO.

2.1.13. Review maintenance of the DD 2658, Returned and Undeliverable Check/Bond Record, or automated system if used, to ensure that no undelivered checks are missing, none exceeds the time limit to be held, and all are properly safeguarded (see Chapter 7, paragraph 10.3).

2.1.14. Verify all undeposited checks in relation to the prescribed frequency and timeliness of deposits (see Chapter 11, subparagraph 8.3.1.1).

2.1.15. Examine undeposited checks to ensure that they are negotiable instruments the DO is authorized to exchange-for-cash and that checks received as collections are maintained separately from those checks received in accommodation exchange transactions.

2.1.16. Verify that the DO deposits receipts daily. If daily deposits of less than $5,000 are impractical, verify that receipts are accumulated until the total reaches $5,000 and then deposited. Also, verify that deposits are made by Thursday of each week, regardless of the amount accumulated (see Chapter 11, subparagraph 8.3.1.1).

2.1.17. Compare military payroll vouchers and money lists with related pay accounts to ensure payments are posted to the member's account.

2.1.18. Review the cash held at personal risk is commensurate with needs and in compliance with the authorized CHA (see Chapter 3, section 2.0).

2.1.19. Verify safekeeping deposits, postal funds, postage stamp stock, and postal money order stock (see Chapter 16, paragraph 4.2).

2.1.20. Inventory and verify the safekeeping of all smart cards (see Chapter 10, paragraphs 2.9 and 2.12).

2.1.21. Inventory all blank checks (both working and bulk stock), examine all voided and spoiled checks pending local destruction to ensure they are properly defaced and stored in authorized containers. Where roll stock of blank checks is used, conduct the inventory by recording the ending number from the reels rather than unrolling the reel, which could destroy the stock.

2.1.22. Finalization

2.1.22.1. Verify totals from the reviews with the amounts reported on the DD 2657.

2.1.22.2. Advise the DO of any discrepancies or deficiencies noted.

2.1.22.3. Notify the DO’s immediate superior and the commander of any deficiencies and advise them that a written report will be prepared.
2.1.22.4. Sign and certify the results of the cash verification on the DD 2657 or a paper attached to the DD 2657. Results must be signed by all members of the cash verification team.

2.1.22.5. Insert the following statement on (or attach to) the DD 2657 and ensure it is signed by the senior member of the cash verification team.

"On [date] at [time], the undersigned verified by actual cash count in the amount of $[amount], together with all documents supporting collections and disbursements, which [is/is not] in agreement with this daily statement of accountability."

Signature and Rank of Verifying Official

2.1.22.6. Distribute the cash verification report as directed in paragraph 2.2.

2.2 Report of Verification

The cash verification team reports all findings in writing to the appointing official immediately upon completion of verification of both official funds and safekeeping deposits. If the appointing official is not the DO’s commander, address the report jointly to the appointing official and the DO’s commander so both receive an original of the verification report. Where safekeeping of personal funds and valuables is authorized and the designated safekeeping custodian is not the DO, send a copy of the report to the safekeeping custodian. The senior member of the cash verification team maintains a copy of the report as a permanent part of the cash verification team’s records. Include the following in the report:

2.2.1. The date the verification was conducted;

2.2.2. The date of the preceding verification;

2.2.3. Statement as to whether or not the DO complies with the safekeeping requirements (see Chapter 3, section 3.0);

2.2.4. The identity of each person holding cash under the DO’s cash accountability that was not verified by actual count, the amount of cash each held, and the method of contact made with each custodian. If such contact was made, include a statement as to whether or not the verified cash accountability of the DO agrees with the DD 2657 cash and other asset totals;

2.2.5. A list of undeposited checks containing a description of those not handled;
2.2.6. A statement as to whether or not the DO is taking timely action to clear debit vouchers, check issue discrepancies, check issue reporting gaps, duplicate payments, forgery recoveries through the banks, and reissue of limited payability check cancellations; and

2.2.7. A statement as to whether or not safekeeping deposits amounts verified agreed with safekeeping deposit records.

DEFINITIONS

1.0 General

The following list defines general terms of significance or importance in financial accounting policies for the Federal Government or the DoD that are discussed in various chapters of this volume. These definitions are provided for general information; it is by no means an exhaustive list of all financial management terms, and it does not define terms when standard dictionary definitions apply. Authoritative guidance with more detailed explanations or nuances may be found in specific chapters. These definitions apply throughout this volume.

2.0 List of Definitions

Accommodation Exchange

The exchange of U.S. Treasury checks or other U.S. dollar instruments for U.S. dollars (i.e., check cashing) for the convenience of authorized personnel, the exchange of U.S. dollars or dollar instruments for foreign currency for the convenience of authorized personnel or, where permitted, the exchange of foreign currencies for U.S. dollars or dollar instruments.

Account Statement

The Account Statement Module is an online query driven component that provides a daily refreshed view of a Federal Program Agency’s (FPA) Fund Balance with Treasury (FBWT). The Account Statement provides FPAs with a central source for retrieving a near real-time picture of their account balances.

Accountable Officials

Accountable individual, accountable official and accountable officer are used synonymously throughout Volume 5. The term “accountable official” is used in Title 31, United States Code, section 3527 (31 U.S.C. § 3527) to refer to the class of officers or employees of an agency who are pecuniarily liable for repayment of losses or deficiencies of public money, vouchers, checks, securities, or records. Such officials are appointed using a DoD (DD) Form 577, Appointment/Termination Record - Authorized Signature. Only officers and employees of an agency are eligible for appointment as accountable officials. Accountable Officials include Certifying Officers (CO), Disbursing Officers (DO), Deputy Disbursing Officers (DDO), Disbursing Agents (DA), cashiers, Departmental Accountable Officials (DAO), and similar employees who are accountable for government funds.

Accounts Receivable Office

The Accounts Receivable Office, normally located at a Defense Finance and Accounting Service site, records and reports accounts receivable and may be responsible for debt management and collection.
Agency Location Code (ALC)

A numeric symbol identifying the agency accounting and/or reporting office. A three-digit Regional Finance Center, four-digit Non-Treasury Disbursing Officer (NTDO), or eight-digit Treasury Disbursing Office identifier assigned by the U.S. Department of Treasury, Bureau of the Fiscal Service (FS). An eight-digit ALC’s first two digits identify the department or agency, the third and fourth identify the particular bureau within the department, and the remaining four identify the particular agency account within that bureau. DoD Disbursing Station Symbol Numbers (DSSNs) are NTDOs whose ALCs begin with four zeros and include the DSSN (e.g., 00001234).

Approving Official

A person responsible for one or more Government Purchase Card (GPC) holders or for approving travel vouchers using the Defense Travel System (DTS).

Automated Information Systems (AIS) Administrator

A person who programs, schedules, or operates computerized programs, and maintains one or more AIS.

Automated Teller Machine (ATM)

An electronic machine that dispenses cash and may perform other functions such as, funds transfers among a customer's various accounts and acceptance of deposits. Equipment generally is activated by a plastic card in combination with a personal identification number. Typically, when the cardholder’s account is with a financial institution other than the one operating the ATM, its use results in the assessment of a fee from the ATM network (e.g., Armed Forces Financial Network, Cirrus, or Plus) that processes the transaction.

Basic Agreement

An intergovernmental instrument negotiated with the government of a friendly nation that states in general terms the policies of DoD Instruction 5530.03, and authorizes the implementation of those provisions by mutual consent.

Business Event Type Code (BETC)

A code consisting of up to eight characters. The code is used in combination with the Treasury Account Symbol (TAS) to determine the transaction effect on the FBWT. The code indicates the type of activity being reported (e.g., disbursements, collections).

Canceled Treasury Check

The process whereby an issued Treasury check that has not been presented for payment is put in a paid status in the Treasury’s Check Processing and Reconciliation System (CP&R).
Canceled Treasury Check Types

a. Canceled available check: A check in the possession of a DO and either canceled due
to non-entitlement, or because it is mutilated or otherwise undeliverable.

b. Canceled unavailable check: A properly vouchered and issued check not held by a
DO or payee (not received by payee, i.e., lost, stolen, or destroyed).

c. Mass-canceled check: A check issued before October 1, 1989 automatically canceled
by the Treasury if not cashed by October 1, 1990.

d. Limited-payability canceled check: A check issued on or after October 1, 1989
automatically canceled by the Treasury if not cashed within 12 months from its date of issue.

Card Acquiring Service

The government’s means of collecting debts via credit or debit card transactions, and
whose objective is to increase electronic collections received by the government and process
them in an efficient, timely and cost-effective manner.

Cardholder

A person an agency designates to be issued a GPC and/or government travel card.

Cash Holding Authority (CHA)

The authority to obtain and maintain cash on hand (upon approval of commander or other
authority) at their personal risk. DDO, agents, and cashiers outside of the main disbursing office
may hold cash at personal risk, with the amount to be held subject to the approval of the parent
DO or local activity commander.

Cash and Investments Held Outside of Treasury (CIHO)

Funds (i.e., U.S. and foreign currency and coin) under the custodial responsibility of
federal government agencies and/or their employees, officers, or agents which includes imprest
funds, change funds, cash with agents (e.g., Paying Agent), and cash on deposit in a Limited
Depositary Account (LDA).

Cashier

A military member or DoD civilian employee appointed by a DO to perform duties
involving the handling of cash. The recruitment, screening, and selection of persons for these
positions should be accomplished with primary regard to the sensitive nature of the position.
Central Accounting Reporting System (CARS)

The central accounting system of record for the FS. CARS is utilized for Treasury-level accounting and reporting for all federal agencies.

a. CARS Daily Reporter: Federal agency that submits the TAS/BETC reporting classification of each payment or collection daily to CARS via the Payment Information Repository (PIR) or Collection Information Repository (CIR). DoD DOs report cash disbursements and U.S. and foreign currency collections held for future operational needs via the Classification Transaction and Accountability (CTA) system.

b. CARS Non-Daily Reporter: Federal agency that reports disbursements and collections through monthly reporting on the Standard Form (SF) 1220, Statement of Transactions According to Appropriations, Funds and Receipt Accounts, and SF 1219, Statement of Accountability.

Certification

Certifying Officer (CO)

An individual designated to attest to the correctness of statements, facts, accounts, and amounts appearing on a voucher, or other documents. A CO is pecuniarily liable for payments in accordance with 31 U.S.C. § 3528.

Change Fund Custodian

A person who operates from an appropriated fund sales activity (e.g., dining hall, hospital, commissary), is responsible for safeguarding the cash provided, and may be held pecuniarily liable for any loss in the change fund.

Check Issue Discrepancy

Occurs when the issue amount reported by the disbursing office differs from the amount for which the check was issued as evidenced by the printed amount on the check when presented for payment.

a. Check Issue Overdraft: Occurs when the amount printed on either a Treasury or limited depositary (LD) check and paid by the Treasury or LD, as applicable, is greater than the issue amount of that check reported by a DO on the check issue report, or when the amount printed on a check and paid by the Treasury or LD is greater than the amount due shown on the payment voucher.
b. Check Issue Underdraft: Occurs when the amount printed on either a Treasury or LD check and paid by the Treasury or LD bank, as applicable, is less than the issue amount of that check as reported by a DO on the check issue report, or when the amount printed on a check and paid by the Treasury or LD bank is less than the amount due shown on the payment voucher.

Civilian Pay

Addresses entitlements to DoD civilian employees and is also a functional area within the payment process.

Classification Transactions and Accountability (CTA)

A system used by FPAs to report their monthly accounting activity to the FS.

Coalition Forces

Temporary alliances of nations or factions for a specific purpose (e.g., those engaged internationally in times of conflict or war).

Coin

Metallic specie representing either U.S. dollars and foreign currency fractional units or multiples thereof.

Collection Agent

An individual appointed by a local commander to perform duties relating to the collection of official funds, including funds held as safekeeping deposits, at a point other than a disbursing office. Performs duties under the general supervision of, and as prescribed by, the appointing officer. Should not be involved with billing or accounting for funds received, and may not be appointed from among disbursing office personnel. Responsibility for duties and functions should be segregated between receipt of funds, recordkeeping, determination of the amount owed, and making demands on the debtor to minimize opportunities for unauthorized, fraudulent, or otherwise irregular acts.

Collections Information Repository (CIR)

Formerly the Transaction Reporting System (TRS). A collections reporting tool, supplying the latest information on deposits and details of collection transactions to federal agencies. It allows financial transaction information from all collections systems and settlement mechanisms to be exchanged in a single system.
Commander/Director

A person assigned as a combatant commander, base or installation commander, commanding officer, officer-in-charge, director of a defense activity, U.S. Property and Fiscal Officer (National Guard), or equivalent civilian head.

Continental United States

The 48 contiguous states and the District of Columbia.

Contingency Operation

A military operation designated by the Secretary of Defense (SecDef) in which members of the U.S. Armed Forces are or may become involved in military actions, operations, or hostilities against an enemy of the United States or an opposing military force; or results in the call, order to, or retention of, active duty of members of the Uniformed Services under 10 U.S.C. § 688, 10 U.S.C. § 12301(a), 10 U.S.C. § 12302, 10 U.S.C. § 12304, and 10 U.S.C. § 12306, or any other law during a war or a national emergency declared by the President or the Congress. Includes, but is not limited to, a combat, peacekeeping, or noncombatant evacuation operation, or humanitarian assistance or disaster relief effort.

Contract Pay

The entitlement process to pay contractors.

Contractor

Any person, organization, or business concern engaged in a profession, trade, or business, and may also be a not-for-profit entity operating as a contractor, including state and local governments and foreign entities, but excluding federal entities and foreign governments, doing business under a contract with an element of the U.S. Government.

Credit Card Collections

A government-wide network under Treasury’s Pay.gov program enabling federal agencies to accept collections by credit card over the internet for offered products and services.

Credit Gateway

A deposit program that the FS uses for the receipt of federal agency Fedwire and Automated Clearing House (ACH) credit transactions. A component of the FS’s Collections and Cash Management Modernization initiative, a multi-year effort to simplify and modernize collections and cash management programs.
Currency

Paper money in the form of U.S. dollars and foreign banknotes.

Currency Custody Account

An arrangement approved by the Treasury allowing safety stocks of U.S. currency held as a 100% cash reserve on the books of overseas military central funding officers physically held in the government’s contractor-operated Military Banking Facility (MBF), with daily settlement between the MBF operator and central funding officer. Absent ready access to the Federal Reserve System, assures the availability of U.S. currency to support the dollar economy exported to support U.S. Armed Forces stationed overseas.

Defense Check Reconciliation Module (DCRM)

A check register that records the issuance of DoD manual checks. It includes Check Issue and Unavailable Check Cancellation subsystems.

*Dependent

The term “dependent”, with respect to a member of a uniformed service, means the following persons:

a. Spouse;

b. Unmarried child under the age of 21, including an adopted child or a stepchild, but not after the divorce of the member from the stepchild's natural parent;

c. An unmarried illegitimate child under the age of 21, provided the parentage on the part of the member is established by a birth certificate with the Service Members’ name cited, by court order, or by a signed affidavit of parentage (signed and sworn by a notary) from the Service Member;

d. An unmarried child under the age of 21 who has been placed in the member's home by a local, state, or foreign government placement agency, or a government-approved adoption agency as a part of a normal adoption process provided the member produces a document from such agency establishing the fact of relationship and the effective date of relationship;

e. An unmarried child who is at least 21 years of age, but under 23 years of age, who is enrolled in a full-time course of study at an educational institution approved by the Secretary concerned, when the member demonstrates in a statement listing the child's income and expenses that the child is in fact dependent on the member for over one-half of the child's support;
f. An unmarried child, 21 years of age or older, who is incapable of self-support because of a mental or physical incapacity and who is in fact dependent upon the member for more than one-half of the incapacitated child's support;

g. A parent, including a stepparent, parent by adoption, or any person who has stood in loco parentis at any time for a continuous period of at least five years before the member's 21st birthday, or a parent, a stepparent, or adopted parent of the member's spouse, any of whose dependency on the member has been determined in accordance with the rules and regulations established by the Secretary concerned; and

h. An unmarried person who has been placed in the Service Member’s legal custody as a result of a court of competent jurisdiction in the United States, Puerto Rico, or a possession of the United States for a period of at least 12 months.

1. The person must be under 21 years of age or at least 21 years of age, but under 23 and be enrolled in a full-time course of study at an institution of higher learning approved by the Secretary concerned, or must not be capable of self-support because of a mental or physical incapacity that occurred while the person was a dependent of the Service Member or former Service Member before age 21 or 23;

2. The person must be dependent upon the member for over one-half of the person’s support;

3. The person must reside with the member unless separated by the necessity of military service or to receive institutional care as a result of disability, incapacitation, or other circumstances as prescribed in the regulations of the Secretary concerned; and

4. The person may not be a dependent of any member under any other part of this definition.

Deputy Disbursing Officer (DDO)

A person appointed as a deputy to a DO to act in the name of and for that DO to perform any and all acts relating to the receipt, disbursement, custody, and accounting for public funds. The appointing DO may restrict the acts a deputy is authorized to perform. DDOs must be U.S. citizens.

Disbursing

The paying of public funds to entities to whom the Government is indebted; the collection and deposit of monies; the safeguarding of public funds; and the documenting, recording, and the reporting of these transactions.
Disbursing Agent (DA)

An agent of a DO, not appointed as a DDO, who generally operates a permanently-located disbursing office that is often geographically separated from the disbursing office.

Disbursing Office

An activity or the organizational unit of an activity whose principal function consists of the disbursement, collection, and reporting of public funds. Includes both tactical and non-tactical disbursing activities. Each has a DO and at least one DDO under the DO’s direct control. Disbursing offices within DoD formerly were referred to as Finance and Accounting Offices, Accounting and Finance Offices, and Finance Offices.

Disbursing Officer (DO)

An officer or employee of a Federal Department or Agency designated to disburse money and render accounts according to laws and regulations governing the disbursement of public money (see 31 U.S.C. § 3321). The term DO within Volume 5, unless otherwise stated (e.g., Treasury DO, U.S. DO (USDO)), is specific to DoD DOs. DoD DOs are considered NTDOs in Treasury terms.

Disbursing Station Symbol Number (DSSN)

A four-digit number assigned to each disbursing office by the Treasury. In addition, an identification number that indicates the authority to receive and disburse public funds and issue checks on behalf of the Treasury. See “Agency Location Code (ALC).”

Doctrine of Laches

A legal term based upon neglect or omission to do what one should do in a reasonable amount of time so as not to prejudice the adverse party. The defense can be used against an untimely claim to establish a presumption of abandonment of a right or claim (e.g., if a payee neglects or fails to file a timely request) the payer can presume that the payee has abandoned the claim.

DoD Activity

A ship, camp, post, station, base, activity, unit, installation, or facility operating within the DoD.

DoD Personnel

All DoD Active and Reserve Component military personnel, military retired members, DoD civilian employees (including foreign national direct hire and indirect hire, as well as non-appropriated fund employees), contractors and host nation support personnel.
Duplicate Check

A check issued by a DSSN with the same serial number as a previously issued check.

Electronic Commerce

A range of financial functions performed using data communication techniques.

Electronic Signature

An electronic sound, symbol, or process, attached to or logically associated with a contract or other record and executed or adopted by a person with the intent to sign the record. See 15 U.S.C. § 7006(5).

Emergency Condition

Any situation resulting from war, armed aggression, or other hostilities against U.S. personnel or interests; and sudden, extensive natural or manmade disasters.

Employee

A civilian paid from appropriated (or non-appropriated, if applicable) funds.

Erroneous Payment

A fiscal irregularity resulting from routine or non-routine processed payments that are not in strict conformity with laws and regulations, including but not limited to, an overpayment to a payee; two or more payments to a payee for the same entitlement (i.e., a duplicate payment); a payment to the wrong payee; a Treasury check issue overdraft (in some cases); a shortage caused by negotiation of both an original and a substitute Treasury check; payment based on fraudulent, forged, or altered documents; or a payment made in violation of law or regulation.

Exchange-for-Cash Check

A check issued by a DO to obtain cash funds for disbursements or in exchange-for-cash for official or accommodation purposes.

Facsimile Signature

An impression of a signature made by a rubber stamp and authenticated by the initials of the CO or the designated individual. May also be a metal plate or electronic digitized facsimile signature medium.
Federal Program Agency (FPA)

A department, instrumentality, office, commission, board, service, or other establishment of the U.S. Government.

Federal Reserve Bank (FRB)

The central bank of the United States, divided into 12 Federal district banks. Created by the Federal Reserve Act of 1913 to provide the nation with a safe, flexible and stable monetary and financial system.

Financial Services

Commonly associated with financial institutions in the United States, such as electronic banking (e.g., ATMs and personal computing banking); in-store banking; checking, share and savings accounts; funds transfers; sales of official checks, money orders, and travelers checks; loan services; safe deposit boxes; trust services; sale and redemption of U.S. Savings Bonds, and acceptance of utility payments; and any other services provided by financial institutions.

Fiscal Irregularity

Any action (or lack thereof), event, practice, or circumstance (or lack thereof) that causes an out-of-balance condition in the financial accountability of a DO, deputy, agent, and cashier entrusted with public funds. Includes irregularities resulting from physical losses of funds or erroneous payments.

Foreign Exchange

Identifies the conversion (exchange) of foreign currencies (i.e., the legal monetary unit of a foreign nation), and negotiable instruments, such as travelers checks, money orders, and bank drafts payable in such monetary units.

Foreign National Personnel

A foreign national employee is an individual who is employed by or performing work for U.S. forces outside the United States, its territories, and possessions in a system of employment. Under the direct hire arrangement, the legal employer of the foreign national assumes responsibility for all administrative and management functions related to foreign national employment. Under the indirect hire arrangement, the host government serves as the legal employer of U.S. forces foreign nationals.

Fraudulent Claim

Any claim against the government involving the presentation of false information, or misrepresentation on the part of a claimant or any other party having an interest in a claim.
Functional Area

A specialized entitlement area (also known as a subject matter area) not under the direct cognizance/control of the DO. Functional areas are responsible for specific types of transactions, e.g., accounts control, travel, military pay, commercial sales, and civilian pay. Functional areas are not considered part of the disbursing office.

Fund Balance with Treasury (FBWT)

An asset account that shows the available budget spending authority of federal agencies. Collections and disbursements increase or decrease the balance in the account.

G-Invoicing

G-Invoicing offers an online portal to support the exchange of information in Intragovernmental Transactions activity by federal trading partners. G-Invoicing will serve as an agreement broker (the mechanism by which agencies arrange and negotiate information electronically) and a data exchange platform.

General Depositary

A financial institution designated by the Treasury to accept deposits of cash and checks from specifically authorized DOs.

Governmentwide Accounting (GWA) and Reporting Modernization

A project addressing the central accounting and reporting functions and processes associated with budget execution, accountability, and cash/other asset management. Includes the collection and dissemination of financial management and accounting information from and to federal program agencies. Also includes the business processes in the FS that are related to ledger accounting for each appropriation, fund, and receipt account's FBWT, General Ledger accounting for the cash and monetary assets of the Government, and the preparation of the Monthly Treasury Statement and the U.S. Government Combined Statement and Appendix. This project improves timeliness and accuracy to support financial analysis and decision-making.

Holder-in-Due-Course

A person, financial institution, or business other than the original payee who in good faith takes possession of a check through endorsement. A claim to payment by a holder-in-due-course will be honored, even if the original payee is not due or entitled to the check.

Host Nation

A nation supported by the forces and/or supplies of allied nations; and/or coalition partners located on, operating in, or transiting through its territory.
Imprest Fund

A cash fund of a fixed amount established by an advance of funds, with or without charge to an appropriation, from a DO to a duly appointed cashier, for disbursement as needed in making cash payments for relatively small purchases.

Imprest Fund Cashier

An individual appointed by the local commander to make authorized cash payments for materials or services. An imprest fund cashier is required to maintain custody of public funds and to file periodic vouchers to account for and replenish the imprest fund. Disbursing personnel are not eligible for appointment as imprest fund cashiers.

International Treasury Services (ITS)

Treasury’s comprehensive international payment and collection system, and the preferred payment method for foreign currency transactions.

Intra-governmental Payment and Collection (IPAC) System

A Treasury automated system used for the payment and collection of intra-governmental billing services and supplies.

a. IPAC Adjustment: A reversal of a transaction by the receiving agency up to but not to exceed the amount of the original transaction reported in the accounting month in which they are processed in IPAC. Receiving agencies cannot reject IPAC transactions that have been processed by the Treasury.

b. IPAC Billing Agency: The agency originating a collection or receiving a payment transaction. In the Treasury’s Disbursing and Adjustment menu screens, the billing ALC represents the originator of the transaction.

c. IPAC Corrections: Refers to erroneous reporting on the SF 1219. The error can be caused by amounts being over or understated or by the failure of an agency to record the transaction in the proper month of accountability.

d. IPAC Customer Agency: Originates a payment or receives a collection transaction. In the Treasury's Disbursing menu screen, the customer ALC represents the agency receiving the transaction. In the Treasury's Adjustment menu screen, the Billing ALC of Original Bill field represents the agency receiving the adjustment transaction.

Limited Depositary (LD)

A U.S. or foreign commercial bank designated by the Treasury to receive deposits from DOs for credit to their official LD checking accounts.
Limited Depositary Account (LDA)

A LDA is a checking account, generally in a foreign currency, maintained in an LD by a DO, DDO, or another agent specifically designated by the DO, in his or her own name.

Lockbox Service

A collection and processing service provided by a financial institution to accelerate cash flow to Treasury’s General Account.

Member

A person appointed, enlisted, or conscripted into a Uniformed Service or a person retired from active duty (including those receiving retainer pay) or a reserve component.

Micro-purchase Threshold

See the *Federal Acquisition Regulation, Subpart 2.101*.

Military Banking Facility (MBF)

A banking office normally located on an overseas DoD installation and operated by a financial institution the Secretary of the Treasury specifically has authorized under its designation as a “Depository and Financial Agent of the U.S. Government” to provide certain banking services at the installation.

Military Pay

An entitlement and pay process for military members. Also refers to a functional pay area. Examples:

a. Armed Forces Americas (AA): Central and South America, e.g., Army Post Office (APO) and Fleet Post Office (FPO) Miami are now APO and FPO AA, respectively.

b. Armed Forces Europe (AE): Canada, Europe, Africa, and the Middle East, e.g., APO and FPO New York are now APO and FPO AE, respectively.

c. Armed Forces Pacific (AP): Pacific area, e.g., APO and FPO San Francisco, and APO and FPO Seattle are now APO and FPO AP, respectively.

National Bank

An association approved and chartered by the Comptroller of the Currency to operate a banking business.
Negligence

The failure to act as a reasonably prudent person would act under similar facts, conditions, and circumstances.

Non-tactical Disbursing Activity

Any disbursing activity permanently assigned to an installation and not subject to mobilization or deployment.

Officer or Military Officer

A commissioned or warrant officer (appointed officer) of the Uniformed Services.

Official Authorization List

Identifies all individuals who are authorized to transact business and provide instructions to the FRB on behalf of a Component.

On-base

Refers to physical presence on a domestic or overseas DoD installation.

Original Signature

A signature is in permanent dark blue, blue-black, or black ink. For electronic and digital signatures, see Chapter 1, subparagraph 3.5.3.

Outstanding Check

A check that Treasury’s CP&R system shows as issued but not paid.

Over-the-Counter Channel Application (OTCnet)

A web-based application that integrates Check Capture and Deposit Reporting functionalities in one system. Created from two legacy systems, Paper Check Conversion Over-the-Counter and Treasury General Account (TGA) Deposit Reporting Network, the Over-the-Counter Channel Application (OTCnet) application design accommodates check capture and deposit reporting using electronic collection mechanisms instead of paper based processing. The OTCnet application check capture activities are primarily performed online; however, there is an offline check capture capability for agencies operating in locations where internet connectivity and bandwidth are intermittent or unavailable.
Overage of Funds

An amount greater than the amount shown to be on hand by the daily accountability records.

Overseas

A military installation (or community) located outside the United States, the District of Columbia, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, the Commonwealth of Puerto Rico, or the U.S. Virgin Islands.

Paid Status

Identifies a Treasury check presented to the Treasury for payment through the banking system, or reported as void (zero value issue), or canceled.

Pay (Salary)

Includes basic, special, incentive, retired or retainer pay; consultant's fees; and any other authorized pay and allowances.

Pay.gov

A program developed to meet the commitment to process collections electronically using internet technologies. Satisfies agencies and consumers demands for electronic alternatives by providing the ability to complete forms, make payments, and submit queries 24 hours a day electronically.

Pay Period

Normally biweekly for civilians working for federal agencies, may be monthly or twice monthly for active duty military personnel, monthly for retirees, or periodically based on completion of active or inactive duty for training for Reserve Component personnel.

Payability

The length of time during which a Treasury check is negotiable. Also relates to “claimability,” the length of time a payee may present a claim of non-receipt, loss, or theft of a Treasury check to a government agency. Claims are valid on underlying obligations until expiration of the statute of limitations, normally six years. If a payee’s right to entitlement has expired, the claim is denied, but under 31 U.S.C. § 3702, the SecDef may waive this for claims not exceeding $25,000.
Paying Agent (PA)

PAs qualifications and responsibilities are;

a. A military member or DoD civilian employee appointed by a commander to act as an agent of a DO to make specific payments, currency conversions, or check cashing transactions from cash the DO temporarily advances to the agent;

b. An individual whose regular duties do not involve disbursing functions and who is not organizationally located in the disbursing office;

c. Appointed to the position of PA as an additional duty, is under the exclusive supervision of the DO in all matters concerning custody and disposition of cash advanced, and complies with all instructions and regulations pertaining to their PA duties issued by the DO;

d. Makes payments or currency conversions for and in the name of the DO to whom the PA is appointed; and

e. Holds the advanced cash at personal risk, and must account for them to the DO immediately upon completion of the transaction(s) for which advanced.

Payment Information Repository (PIR)

A centralized information repository for federal payment-related data to improve and increase the transparency of government payments and streamline the reporting of accounting classification information from NTDOs, e.g., DoD DOs.

Payment Review Official

A person who conducts pre-payment and post-payment reviews (not an inherently-governmental function), issues and controls inquiries regarding possible financial irregularities, but is not subject to pecuniary liability because of not being in an accountable position.

Pecuniary Liability

Personal financial liability for fiscal irregularities of accountable officials, as an incentive to guard against errors and theft by others, as well as, protect the government against errors and dishonesty by the officers themselves.

Physical Loss of Funds

A physical loss of funds includes:

a. A loss of U.S. Government cash by theft, embezzlement, unexplained disappearance, or cash handling errors;
b. A loss of paid vouchers and/or negotiable instruments from a disbursing office;

c. A loss of an official deposit in route from a disbursing office to a depositary or after confirmation by a depositary;

d. Any payment based on fraudulent, forged, or altered documents prepared or presented by individuals, both accountable and non-accountable disbursing personnel, who work in the disbursing office;

e. A loss or theft of cash from an imprest fund;

f. A failure to obtain (or loss of) official receipts and/or documents representing cash;

g. A loss or destruction by fire, accident, or natural disaster;

h. Unidentifiable DO suspense account charges; or

i. Losses associated with counterfeit currency transactions.

Presumption of Negligence

Title 31 U.S.C. § 3527, is the basis for automatically holding a CO or DO pecuniarily liable for a fiscal irregularity. The presumption of negligence established by law does not apply to DAO.

Prevailing Rate of Exchange

The most favorable rate legally available to the U.S. Government for acquisition of foreign currencies for its official expenditures and accommodation exchange transactions.

Public Funds

Cash, paid vouchers, or cash collected by a disbursing official for goods or services subject to the control or regulation of the United States or any of its officers, agents, or employees.

Receipt, Appropriation (Expenditure), and Fund Accounts

See *Treasury Financial Manual, Volume 1, Part 2, Section 1520* for complete account descriptions.

Receiving Official

A military member or DoD civilian employee authorized to substantiate the receipt, inspection, and acceptance of goods and/or services.
Recertified Payment

A replacement payment by Treasury check with a check serial number different from that of the original check. The replacement Treasury check may be issued after the presentation and review of required documentation to replace any lost, stolen, or destroyed original check (except for holder-in-due-course situations), regardless of the disbursement purpose (e.g., pay, travel, or vendor payment).

Relief from Liability

Pursuant to 31 U.S.C. § 3527, an action taken by an individual with appropriate legal authority to relieve DOs, certifying officers, or other accountable officials of pecuniary liability for a fiscal irregularity.

Replacement Check

A check issued to replace a check that is for a proper payment but has been classified as void, not been reported to the Treasury as a valid check issue, or is not cashable due to misprint or mutilation during the issue process.

Retiree

A military person retired from active duty or a Reserve Component, including those receiving retainer pay.

Review Official

A military member or DoD civilian employee appointed in writing to conduct pre-payment and post-payment reviews, to initiate and control inquiries, and to initiate investigations of possible fiscal irregularities.

Salary Offset

A deduction from a current pay account to liquidate a debt. May be from basic, special, incentive, retired, and/or retainer pay; or in the case of an individual not entitled to basic pay, other authorized pay.

Seized Funds

Cash confiscated by coalition forces during military operations and governed by the laws and usages of war. Normally captured foreign currency is delivered promptly into the custody of the State Department’s USDO supporting the particular country involved. Any DoD DO acquiring captured foreign currency safeguards and delivers it to the USDO as soon as possible, but does not collect them into his or her accountability.
Settlement Office

A disbursing office designated to clear outstanding transactions and/or deficiencies from the accounts of predecessor DOs. The DO assigned to the settlement office is referred to as a settlement officer.

Shared Accounting Module (SAM)

An FS application that carries out the process of validating or deriving the appropriate TAS and BETC combinations to assist GWA in classifying financial transactions as they occur.

Smart Cards

Includes: Stored Value Cards (SVC), debit cards and combination cards (hybrids that contain both SVC and debit card features). These cards store or provide access to “electronic money” and provide a more secure method of handling funds, alleviate the need to carry cash and provide electronic payment to vendors for items purchased or services rendered.

Spoiled Check

A check that has been reported to the Treasury as a valid issue, has been returned by the payee as not cashable due to mutilation or defect, represented a valid payment to the payee, and is less than one year old.

*Sponsor

A person who is

a. a member of the Armed Forces serving on active duty, or

b. a full-time civilian officer or employee of the DoD and a citizen or national of the United States; and

c. who is authorized to transport dependents to or from an overseas area at Government expense and is provided an allowance for living quarters in that area.

Standard Financial Information Structure (SFIS)

The SFIS is a comprehensive data structure that supports requirements for budgeting, financial accounting, cost/performance, interoperability, and external reporting needs across the DoD enterprise. It is a common business language that enables budgeting, performance-based management, and the generation of financial statements. SFIS standardizes financial reporting across DoD and allows revenues and expenses to be reported by programs that align with major goals, rather than basing reporting primarily on appropriation categories. It also enables
decision-makers to efficiently compare programs and their associated activities and costs across DoD and provides a basis for common valuation of DoD programs, assets, and liabilities. SFIS compliance is required for all target accounting systems and target financial business feeder systems (Volume 1, Chapter 4).

Standard Line of Accounting (SLOA)

The DoD SLOA is a subset of the SFIS data standard elements. The SLOA is comprised of the minimum SFIS data elements that must be exchanged for business events that have an accounting impact at any point from the initial commitment to the final posting in the appropriate general ledger. This includes commitments, obligations, expenditures, and disbursements. All collection and disbursement vouchers reported in the DoD business systems must meet SLOA requirements. The SLOA accommodates Treasury reporting requirements for daily cash reporting (Volume 1, Chapter 4).

Standard Reporting Format (SRF)

SRF is a Fiscal Service defined input file specification defining the data elements and validation rules that all NTDOs use to report issued payments and associated TAS/BETC information. Payment and accounting data are submitted to the PIR reporting tool using SRF.

Stored Value Card (SVC)

A smart card application capable of storing electronic monetary value on the card’s embedded computer chip. The SVC is used to conduct financial transactions in a number of DoD settings. These include: EagleCash, Navy Cash, Marine Cash, Ezpay, Debit cards, combination cards, and others.

Supplemental Agreement

Statement of local operating procedures formulated and used by the commanders of the Armed Forces of two friendly foreign nations, whose governments have signed a basic agreement, as contemplated under DoD Instruction 5530.03. Use these procedures in territories of mutual concern to provide each other with emergency financial support, under the policies of the basic agreement. Supplemental agreements may be entered into by commanders of unified or separate Armed Forces, as considered appropriate.

Suspense/Budget Clearing Accounts

A disbursement transaction that has been reported to the Treasury and has not been identified to a specific fund holder or is placed in a suspense account while research efforts are underway. Budget Clearing Account (suspende) F3875, temporarily credits unclassified transactions from the public when there is a reasonable presumption that the amounts belong to the agency.
Tactical Disbursing Activity

Any tactical unit (including Navy ships) authorized to provide disbursing services under an assigned DSSN and is subject to movement from one location to another. Some of these activities provide disbursing services on a full-time basis (e.g., Navy ships); others perform them only while deployed (or mobilized). When not deployed, the DSSNs are held in reserve, in an inactive status, for use on short notice as required.

Tolled

To suspend or stop temporarily, e.g., an event that suspends the running of time related to a statute of limitations.

Transaction Reporting System (TRS)

See Collections Information Repository (CIR).

Travel Authorizing Official

An individual designated in writing by organizational title having authority to issue travel orders, sign/approve travelers’ claims, verify that all transactions made were necessary expenses, and were accomplished in accordance with the *Joint Travel Regulations*.

Travel Order

A document authorizing official government travel.

Traveler

A military member, DoD civilian employee, or invitational traveler traveling in an official capacity.

Treasury Account Symbol (TAS)

An identification code assigned by the Department of the Treasury. The TAS represents individual appropriation, receipt, and other fund accounts for agencies and bureaus.

Treasury Check Information System (TCIS)

A system that records and reconciles the worldwide issuance and payment of Treasury checks. It also allows end users to query the Payments, Claims & Enhanced Reconciliation system for claim status on ACH payments.
Treasury General Account (TGA)

A demand account titled TGA in a designated commercial bank specifically authorized by the Treasury Department to maintain that account in the name of the Treasury for the purpose of accepting deposits. A non-U.S. bank located overseas (an International TGA) may also be authorized to perform this function.

Undeliverable Check

A check not delivered to the payee within 60 days after the month of issue.

Valuables

Any articles or representations of value in which the United States has any interest, or in connection with which it has any obligation or responsibility.

Vendor

See “Contractor.”

Vendor Pay

The process of computing the amount due a contractor or vendor for all contract/purchase orders, except those administered by the Defense Contract Management Agency, or a functional pay area.

Voided Check

A check pre-numbered with a serial number, invalidated for any reason before issuance by a DO, and reported with a zero dollar value.

Voucher

A document certified by a CO to a DO (under 31 U.S.C. § 3325) to make a payment.

CHAPTER 2

FINANCIAL REPORTS, ROLES AND RESPONSIBILITIES

1.0 GENERAL (0201)

1.1 Purpose (020101)

This chapter defines the roles and responsibilities in the preparation and issuance of financial reports for Department of Defense (DoD) Components. DoD Components and the Defense Finance and Accounting Service (DFAS) are responsible for the proper and consistent preparation of financial reports at the DoD Component departmental, intermediate, and installation level. In some instances, DoD Components prepare their own financial reports without accounting support from DFAS. Ultimately, each DoD Component is responsible for the accuracy and completeness of financial information in the reports that present the financial effects of its operations.

1.1.1. The policies within this chapter apply to all DoD Components and includes those entities whose departmental, intermediate, and installation level financial reports are prepared by DFAS, DoD Components and organizations operating Enterprise Resource Planning (ERP) systems under an approved agreement with DFAS, certain DoD Components which prepare their own financial reports (e.g., the U.S. Army Corps of Engineers), and organizations required to perform their own accounting due to security considerations.

1.1.2. In those instances in which DFAS does not have financial report preparation responsibility, the reporting entity must fulfill the responsibilities assigned in this chapter at both the DFAS and DoD Component level. The requirements for the audited or interim financial statements addressed in the Office of Management and Budget (OMB) Circular A-136, “Financial Reporting Requirements” are contained in Volume 6B, “Form and Content of the Department of Defense Audited Financial Statements.”

1.2 Authoritative Guidance (020102)

This chapter prescribes the roles, responsibilities, and authoritative guidance for preparation and issuance of financial reports for DoD Components in accordance with the reporting responsibilities and internal control provisions identified in:

1.2.1. Government Accountability Office (GAO) “Federal Information System Controls Audit Manual” (FISCAM);

1.2.2. GAO Financial Audit Manual (FAM);

1.2.3. OMB Circular A-123, “Management's Responsibility for Enterprise Risk Management and Internal Control;”

1.2.4. OMB Circular A-136, “Financial Reporting Requirements;”
1.2.5. Office of the Under Secretary of Defense (Comptroller) (OUSD(C))/Chief Financial Officer (CFO) “DoD Financial Statement Audit Guide;” and

1.2.6. OUSD(C)/CFO “DoD Internal Control Over Financial Reporting Guide.”

2.0 RESPONSIBILITIES (0202)

2.1 Stewardship and General Responsibilities (020201)

The U.S. Congress provides resources to finance the programs, missions, and functions of DoD and its Components. Financial reports are a tool to display the status and uses of those resources at a point in time. DoD Components and DFAS as their service provider have responsibilities to ensure that financial information is accurate and timely in order for managers to make sound decisions and exercise proper stewardship over these resources. Refer to the “DoD Internal Control Over Financial Reporting Guide” for additional information on roles and responsibilities for internal controls over financial reporting.

2.2 Internal Controls (020202)

2.2.1. DoD Components. DoD Components must create and maintain internal controls to ensure that data input in DoD Component-controlled systems, or provided to DFAS to be recorded in the accounting systems and subsequently used in financial reports, are accurate, complete, supportable, and input timely into the finance and accounting systems. Refer to the “DoD Internal Control Over Financial Reporting Guide” for additional internal controls applicable to DoD Components.

2.2.1.1. DoD Components must maintain and create controls to ensure actual or potential Antideficiency Act violations are reported, reviewed, and investigated in accordance with Volume 14, Chapter 2.

2.2.1.2. DoD Components must perform and document periodic reviews of system functionality to ensure controls are in place to verify the authorization of recorded transactions and compliance with the FISCAM framework.

2.2.1.3. DoD Components must comply with internal control policies contained in DoD Instruction (DoDI) 8510.01, “Risk Management Framework (RFM);” Volume 1, Chapter 3; and the “DoD Internal Control Over Financial Reporting Guide.”

2.2.2. DFAS. DFAS must maintain or create controls to ensure that data provided by each DoD Component is recorded accurately and processed timely for financial reporting. Refer to the “DoD Internal Control Over Financial Reporting Guide” for additional internal controls applicable to DFAS reporting.

2.2.2.1. DFAS must maintain or create controls to ensure actual or potential Antideficiency Act violations are reported to DoD Components for their review and investigation in accordance with Volume 14, Chapter 2.
2.2.2.2. DFAS must perform and document periodic reviews of DFAS system functionality to ensure controls are in place to verify the authorization of recorded transactions and compliance with the FISCAM framework.

2.2.2.3. DFAS must maintain feeder files used in financial reporting from accounting systems of record (component-controlled), in accordance with records retention guidance contained in Volume 1, Chapter 9.

2.2.2.4. DFAS must maintain supporting documentation for corrections made to DoD Component submissions in intermediate edit systems as part of the audit trail for the reporting period. DFAS must maintain records to support adjustments to DoD Component submissions and assign transactions that fail to pass edits to DFAS or the DoD Component for research and correction.

2.2.2.5. DFAS must provide any adjustments made to DoD Component submissions so they can be recorded by the DoD Component in the accounting systems of record, if not already recorded in the accounting systems of record in the current or subsequent period, before the beginning of the next reporting cycle. DFAS and the DoD Component must make every effort to resolve any discrepancies prior to the end of the reporting period. DFAS and the DoD Components must track unresolved discrepancies for research and correction as soon as possible after the end of the reporting period.

2.2.2.6. DFAS must comply with internal control policies contained in DoDI 8510.01; Volume 1, Chapter 3; and the “DoD Internal Control Over Financial Reporting Guide.”

2.3 Audit Trails (020203)

2.3.1. DoD Components. DoD Components must maintain audit trails in sufficient detail, including the rationale, justification, and approvals to permit tracing of transactions and balances from their sources to their transmission to DFAS. Audit trails are necessary to demonstrate the accuracy, completeness, and timeliness of the transaction. In addition, audit trails provide documentary support for all data generated by the DoD Component and submitted to DFAS for recording in the accounting systems and use in financial reports.

2.3.2. DFAS. DFAS must clearly document processes and internal controls and maintain a complete and documented audit trail to support the reports it prepares. The organization that translates the information into an electronic mode must retain supporting documents or images of the supporting documents. DFAS must establish documented business rules and internal controls to ensure feeder file data is received, processed, and compiled in departmental reporting system output files.

2.3.2.1. DFAS must sufficiently document adjustments to DoD Component submissions to assist approving officials and others, such as auditors, in understanding the reason for preparing the adjustment, and to support the validity of adjustments prepared during the reporting period.
2.3.2.2. DFAS must ensure documentation is readily available as part of the audit trail for the reporting period. The documentation must be readily available for assisting auditors, and those involved in financial statement preparation, to understand how feeder file records are processed.

2.4 Supporting Documentation (020204)

2.4.1. DoD Components and DFAS as their service provider must maintain supporting documentation that will support DoD’s accounting cycle. The DoD accounting cycle encompasses the processing and recording of all financial transactions in the proper period and includes the proper presentation on the financial statements and closing of the accounts.

2.4.2. DoD Components and DFAS as their service provider must also have the ability to display the rationale and justification for the adjustment, the dollar amount of errors or conditions related to the transactions or records proposed for adjustment, the date of adjustment, and the name and position of the individual(s) approving the adjustment. The documentation must be readily available in one or a combination of the following media: hardcopy, systemically stored electronic records, or electronic files maintained in an external system or location.

2.4.3. Proper documentation in hard copy, electronic form, or a combination of both is necessary to support all journal voucher (JV) entries. JV documentation must include reporting elements deemed critical to assess the accuracy and completeness of financial information, applicable criteria to support the rationale for preparing the adjustment, Treasury Account Symbols or entity codes impacted, and the calculation of the dollar amount of the adjustment. Maintain clear documentation of the JV preparer, reviewer (if used), and approver(s) with the JV documentation. Attach supporting documentation to a copy of the JV. In some cases, it may not be practical to attach all of the documentation to the JV because of the large number of detailed transactions summarized on it. In those cases, attach specific and detailed information summarizing the content and identifying the location of the supporting documentation to the JV.

2.5 Reconciliation (020205)

2.5.1. Many financial balances (e.g., general ledger (GL) proprietary and budgetary accounts, such as assets, liabilities, commitments, and undelivered orders) require supporting subsidiary records to validate the amount of the financial balance. Reconcile subsidiary records to financial balances in accordance with the policies, requirements, and frequencies prescribed in this paragraph.

2.5.1.1. DoD Components must maintain the supporting records for many financial balances. An individual authorized by each DoD Component must periodically validate the accuracy of such subsidiary records against applicable physical assets or other appropriate confirmations of the source documents. DoD Components perform periodic physical inventories in accordance with DoDI 5000.64, “Accountability and Management of DoD Equipment and Other Accountable Property,” for tangible equipment, and DoDI 4165.14, “Real Property Inventory (RPI) and Forecasting,” for real property. Validations must be documented, signed, and dated by the individual authorized by the DoD Component.
2.5.1.1. Various regulations require periodic counting, or another physical verification in the case of equipment, inventories, supplies and materials, and real property, depending upon the nature of the asset. Refer to the GAO FAM Volume 1, Section 260, “Identify Risk Factors,” for controls related to the completeness and accuracy of inventory records.

2.5.1.2. Periodic validation and/or reconciliation is required in the case of commitments, obligations, accounts receivable, and accounts payable. These validations must include the review of the documentary evidence that initiated the financial transaction to ensure the integrity of source data. For additional information, see Volume 3, Chapter 8.

2.5.1.2. DoD Components must document and provide changes in the source data to DFAS for proper recording. The reconciliation of source data with reported balances is a joint responsibility of DFAS and the DoD Component.

2.5.1.3. DFAS must establish procedures to ensure that all GL balances, and other associated financial balances, are validated and/or reconciled with supporting records, including source data, in accordance with DoD policy. See Volume 3, Chapter 8.

2.5.1.3.1. DFAS must establish and maintain supporting subsidiary detail transactions that are traceable and reconcile to reported financial statement balances. DoD Components must participate in the reconciliation process for these subsidiary records when the source documents, or transactions that require research to complete the reconciliation, are retained by the DoD Component.

2.5.1.3.2. When the DoD Component maintains accounting system and trial balance subsidiary records, DFAS must establish a reconciliation schedule, mutually agreed to by the DoD Component, and subject to approval by OUSD(C), to reconcile the subsidiary records with the financial balance. The reconciliation of such supporting records with the financial balance is a joint responsibility of DFAS and the DoD Component.

2.5.1.4. DFAS must investigate unreconciled differences and document adjustments required to balance the GL amount and the amount of the subsidiary records with the rationale, justification, and approvals.

2.5.1.5. DFAS must perform reconciliations on a monthly basis, at a minimum, to determine the cause of differences and take appropriate corrective actions to ensure the accuracy and integrity of the accounting system and monthly reports when unreconcilable differences between the GL and the subsidiary records exceed $1 million. Continue to perform monthly reconciliations until the irreconcilable difference is less than $1 million.

2.5.1.6. DFAS must reconcile changes in source data, made by the DoD Component, with reported balances. The reconciliation of source data with reported balances is a joint responsibility of DFAS and the DoD Component.
2.6 Reporting Schedules (020206)

2.6.1. DFAS must establish procedures requiring joint development of report preparation schedules with DoD Components according to the timeframes established by the U.S. Department of the Treasury (Treas), Bureau of the Fiscal Service, Governmentwide Treasury Account Symbol (GTAS). DFAS and the DoD Components must work to resolve issues identified in the report preparation process according to the GTAS schedule.

2.6.2. Reporting schedules for reports provided to external recipients must include the opportunity to present a draft of the report to the DoD Component for review and approval prior to release to the recipients.

2.7 Draft Reports (020207)

2.7.1. DoD Components. DoD Components must review DFAS reports to assess the accuracy of the financial information reported. The review must identify errors, omissions, and significant diversions from budgeted or planned amounts and levels of activity. The DoD Component must:

2.7.1.1. Research and propose adjustments to correct abnormal balances. A GL balance is abnormal when the reported balance does not comply with the normal debit or credit balance established in the DoD Standard Reporting Chart of Accounts. DoD Components must maintain supporting documentation in accordance with paragraph 020204 for requested adjustments to financial reports and provide the support to DFAS;

2.7.1.2. Research any unusual trends and comparisons with the prior year and/or prior period amounts to determine whether corrective action is required;

2.7.1.3. Ensure that the amounts in the financial reports are consistent and reconcilable with the same financial data included in management reports prepared by the DoD Component;

2.7.1.4. Not change draft reports provided by DFAS or release the reports to external recipients. For errors or omissions identified in a draft report, submit a request to DFAS to revise the report and include changes in the final report; and

2.7.1.5. Validate reports created within their ERP systems. DoD Components must perform quality reviews to confirm that:

2.7.1.5.1. Amounts on the report are mathematically correct;

2.7.1.5.2. Internal relationships of amounts included in a report that are interdependent are correct;
2.7.1.5.3. Abnormal account balances, such as negative balances or unusual amounts, are researched and resolved, if possible. If unresolved, include comprehensive explanations identifying root causes and the timeline for resolution; and

2.7.1.5.4. Unusual trends and comparison with the prior year and/or prior year amounts are identified, researched, and explained.

2.7.2. DFAS. DFAS must validate reports to ensure reported amounts agree with the official accounting records prior to release to DoD Components for review and approval or release to external recipients. DFAS must perform quality reviews to confirm that:

2.7.2.1. Amounts on the report are mathematically correct;

2.7.2.2. Internal relationships of amounts included in a report that are interdependent are correct;

2.7.2.3. Abnormal account balances, such as negative balances or unusual amounts, are researched and resolved, if possible. If unresolved, include comprehensive explanations identifying root causes and the timeline for resolution;

2.7.2.4. Reported amounts for the same data elements for the same report period are consistent across all similar financial reports; and

2.7.2.5. Unusual trends and comparisons with the prior year and/or prior period amounts are identified and called to the attention of the DoD Component.

2.7.3. OUSD(C). Refer DoD Component-proposed changes to the draft reports, with which DFAS does not concur, to the OUSD(C) Directorate with oversight responsibility for the subject matter, for adjudication before the end of the current reporting cycle. The DoD Component, or DFAS, may submit requests for adjudication through their reporting chain of command to OUSD(C).

2.8 Journal Voucher Adjustments (020208)

2.8.1. Journal Vouchers (JVs) are all adjustments recorded in system transaction registers and the GL identifying summary-level adjustments to the GL. Accounting systems generally consist of two forms of JV adjustments, manual JVs and system-generated JVs. JVs are required for several reasons, including instances when subsidiary records do not reconcile with the financial balances, transactions need correction, and adjustments are required to align obligations, accruals, or expenses with the liquidation amounts for receipts, acceptances, and/or disbursements. JVs do not include transactions and processes used to record detail amounts in subsidiary ledgers as standard business transactions.
2.8.2. Either DFAS as the service provider or the DoD Components may identify the need to make adjustments. Both DFAS and DoD Components must support adjustments with sufficiently detailed documentation to provide an audit trail to the source transaction(s) that require the adjustments. (See paragraph 020204.)

2.8.2.1. DoD Components. When, during the applicable reporting period, a DoD Component identifies an adjustment pertaining to information included in a monthly, quarterly, semiannual, or annual report, the adjustment will be included as part of the financial information used to produce final report balances.

2.8.2.1.1. DoD Components must utilize the Root Cause Indicator Codes (RCIC) when recording manual accounting adjustments in the Defense Departmental Reporting System-Budgetary (DDRS-B) and Defense Departmental Reporting System-Audited Financial Statements (DDRS-AFS). The RCIC is required to record and monitor the root causes for recording accounting adjustments. Capturing the RCIC will be used to develop action plans to address the root cause requiring the accounting adjustment and then monitor the effectiveness of those action plans.

2.8.2.2. DFAS. When DFAS identifies a required adjustment to the official accounting records of a DoD Component, it will refer the proposed adjustment to the DoD Component who must review and approve the adjustment. DFAS must document proposed adjustments to DoD Component submissions and provide supporting documentation. DoD Components must respond with approval or disapproval for proposed adjustments within reporting cutoff dates for the relevant period. The following paragraphs provide the exceptions to this policy.

2.8.2.2.1. When DFAS makes an adjustment of less than $1 billion to correct errors made by DFAS in the preparation of a report, (e.g., calculation errors and similar mistakes), they may be corrected by DFAS without prior referral to the affected DoD Component. Examples of corrections that may be made by DFAS without referral to a DoD Component are:

2.8.2.2.1.1. Adjustments to correct systems processing deficiencies;

2.8.2.2.1.2. Adjustments to correct an error made by DFAS in processing a transaction or a previous adjustment;

2.8.2.2.1.3. Adjustments to correct a financial balance to equal the sum of subsidiary records; and

2.8.2.2.1.4. Adjustments to align funding, obligation, accrual, or expense amounts with the liquidation amount for receipts, acceptances, and/or disbursements when the applicable supporting information requires such adjustments.
2.8.2.2. DFAS must notify DoD Components at least once each month of the reports impacted, total amounts, types, and categories of reasons for adjustments made without prior referral to the DoD Component under circumstances specified in the preceding paragraph and provide corrected reports if applicable. DFAS must keep adequate records of all such notifications; and DFAS and the DoD Component must work together to record adjustments made by DFAS in the accounting systems of record before the beginning of the next reporting cycle.

2.8.3. Appropriate Uses of JVs. JVs have the following primary uses within DoD.

2.8.3.1. Correcting Entries. Correcting entry JVs adjust for errors identified during the reports review process. This entry includes specific amounts, accounts, and/or transactions related to the required correction. If possible, the JV supporting documentation will note the required steps in the process to prevent the need for similar adjustments in future periods.

2.8.3.1.1. In some cases, correcting entries are required to adjust for errors on previously prepared JVs. In those instances, correcting entries will both reverse the effect of incorrect entries and record the correct amount.

2.8.3.1.2. In some cases, both entries can be made with one JV and a single set of supporting documentation. Regardless of whether a single JV or multiple JVs are prepared, the correcting JV must include a copy of the original JV, documentation supporting the correct amount, and a narrative explanation regarding how it is known that the original entry is incorrect and why the correcting entry is accurate/more accurate.

2.8.3.2. Source Entries. Source entry JVs record those accounting entries that, due to system limitations or timing differences, have not been otherwise recorded. By nature, source entry JVs are usually summarized at the entity level by GL account. The source entry accounting transaction must be supported by documentation for the summarized amounts and identify the location of the transaction level supporting detail. Source entry JVs, generally, are used for month-end closing, year-end processing and closing purposes, and also may include postings of information provided through data calls, such as those required to record values for property, plant, and equipment recognition.

2.8.3.3. Summarized Entries. Both correcting and source entry JVs will normally be summarized amounts for which documentation is required. In these situations, the summarized accounting entry represents the amount to record the effect of the detailed transactions. In all such cases, the summarized accounting entry will include documentation of the effect of the detailed transactions and identify the location of the transaction level supporting detail.

2.8.3.4. Subcategories. Further separate correcting and source entry JVs into the following subcategories:

2.8.3.4.1. Audit Recommended JVs. When auditors recommend a JV adjustment, the proper authoritative source must perform an analysis of the recommendation using the auditors’ work papers and other relevant information to determine if the recommended adjustments are valid. Any decision resulting in a determination that a JV should, or should not,
be prepared must document why the adjustment is, or is not, required; indicate how the duly authorized official determined that the audit recommendation should be, or should not be, followed; and identify the audit recommendation serving as the basis for the actions taken.

2.8.3.4.2. DoD Component Requested JVs. When a DoD Component requests an adjustment that complies with the JV definition in subparagraph 020208.A, a JV must be prepared. In addition, the JV must document why the adjustment is required, indicate how the duly authorized official determined that the entries included on the JV are correct, and identify the DoD Component’s request serving as the basis for the adjustment. The DoD Component’s JV request to DFAS must include supporting records and related analysis. A request for a JV entry that is not properly authorized or supported by accurate or proper documentation will be returned to the JV requestor with an indication of what additional information is required to process it, along with any applicable authoritative guidance.

2.8.3.4.3. Edits and Validations. Reporting entities record JVs modifying report submissions to comply with edits and validations designed to improve the accuracy of financial reporting. The Treasury Financial Manual, United States Standard General Ledger (USSGL), contains a listing of Governmentwide Treasury Account Symbol Adjusted Trial Balance System validations and edits. (See Section VII.)

*2.9 System-Generated JVs (020209)

2.9.1. For the purposes of this chapter, system-generated JVs are all automated and controlled entries included in system transaction registers identifying summary-level adjustments to the GL. Examples of system-generated entries include system-performed period-end closing entries, consolidations, and entries to bring GL accounts into balance at specified periods of times during the financial reporting process. System-generated JVs do not include the automation of JVs previously recorded manually.

2.9.2. DFAS utilizes eight types of recurring system-generated JVs in DDRS-B. These adjustments are approved by the Components for DFAS to process to ensure financial records are compliant with generally accepted accounting principles. Supporting documentation for system-generated JVs must be in accordance with paragraph 020204. The eight recurring system-generated JV types are:

2.9.2.1. Army Legacy. Adjustments processed in the first accounting period of each fiscal year to ensure prior year unobligated balances from Army legacy accounting systems, Standard Finance System (STANFINS), Standard Operations and Maintenance Army Research and Development System (SOMARDS), and Civil Engineers Financial Management System (CEFMS) are not overstated/understated in DDRS-B.

2.9.2.2. Extended Appropriation. Adjustments processed in the first accounting period of each fiscal year to execute the transfer of obligated/unobligated Shipbuilding and Conversion, Navy (SCN) appropriation balances from the expiring to the extended period of availability. Only SCN balances are in scope for the Extended Appropriation JVs.
2.9.2.3. **Flowback.** Adjustments to ensure that the impacts of select adjustments processed directly in DDRS-AFS are also reflected in DDRS-B.

2.9.2.4. **Funding.** Adjustments to guard against the misstatement of funding and ensure the funding amounts reflected in DDRS-B agree to the OMB apportionments recorded in the Program Budget and Accounting System and the Program Budget Information System.

2.9.2.5. **Pre-close Canceling Appropriation.** Adjustments processed in the last accounting period of each fiscal year to facilitate the process of cancelling appropriations that have reached the end of their fifth expired year.

2.9.2.6. **Reapportionment.** Adjustments to facilitate the process of reinstating unapportioned authority which closed during the previous fiscal year’s closing process.

2.9.2.7. **Reversal.** Adjustments posted in the first accounting period of each fiscal year to reverse manual, year-end, Permanent with Reversal or Permanent with Reversal Recurring JVs and Permanent with Reversal Feeder Trial Balance Adjustments.

2.9.2.8. **Undistributed.** Adjustments to support the monthly requirement that final appropriation-level disbursements and collections reported in DDRS-B agree to the balances reported by Treasury.

2.9.3. DFAS must create and maintain standardized narratives for recurring system-generated JVs to identify and provide a description of the predefined business rules used to execute the adjustments. In addition, DFAS must maintain evidence of review and approval of the predefined business rules executed in DDRS-B.

2.9.4. Other non-recurring system-generated JVs are recorded based on certain System Change Requests (SCRs), which are proposals to modify information in DDRS-B such as revising programming logic and coding changes. Not all SCRs result in system-generated JVs. In the event a non-recurring system-generated JV is required, the supporting documentation must be supplied and maintained by the requestor of the SCR. DDRS Program Management Office must retain supporting documentation for all non-recurring system-generated JVs to include, at a minimum, user stories, testing documentation, and the impact of the system-generated JV.

2.10 JV Preparation (020210)

2.10.1. **General.** Proper preparation of and adequate support for JVs is important to ensure they accurately record accounting, financial, or other GL-related events and that documentation for a detailed audit trail exists. Unadjusted GL account balances represent the listing of GL account balances at the end of the reporting period, before period-end adjusting JVs are recorded. In various level financial reporting systems, the unadjusted GL balances reported are summaries of transaction data used to record specific homogeneous types of transactions and balances that aggregate to specific classifications on the financial statements. Use JVs to process monthly, quarterly, and annual adjustments to unadjusted GL account balances in the field and higher-level accounting and reporting systems.
2.10.1.1. All summary-level entries included in system transaction registers identifying adjustments to the GL are considered JVs for the purposes of this chapter and must be adequately documented to support the validity of the transactions. In accounting systems of record, manual adjustments to the GL are considered JVs. Transactions and processes used to record detail amounts in subsidiary ledgers are not considered JVs.

2.10.1.2. Proper preparation of, and adequate support for, JVs is the responsibility of DFAS and the DoD Components. Memorandum-style entries to the GL, affecting neither Treasury-level reporting nor subordinate records, are not considered JVs for the purposes of this chapter.

2.10.2. Internal Controls. OMB Circular A-123 identifies operational internal controls to ensure JVs are recorded properly. These controls must be in place for all transactions included in system transaction registers identifying summary-level adjustments to the GL. These controls do not apply to transaction input or processes establishing detail amounts recorded in subsidiary ledgers.

2.10.2.1. JVs may be prepared at the installation (execution) or departmental (reporting) level and must be:

2.10.2.1.1. Systematically tracked and reflected in a JV log. Reporting entities must implement controls to ensure JVs are tracked and readily available for audit;

2.10.2.1.2. Categorized by each of the applicable categories listed in subparagraph 020210.D;

2.10.2.1.3. Reviewed and validated to ensure the transaction utilizes the correct accounts and posts correctly;

2.10.2.1.4. Documented to support the validity and the amount of the JV transaction. The documentation requirement applies to all transactions included in system transaction registers identifying summary-level adjustments to the GL;

2.10.2.1.5. Authorized, approved, and documented at the appropriate level of management or designee. The organizational level within accounting centers, accounting stations, finance offices, and other accounting locations approving JVs will vary by the dollar amount of the voucher as shown in Table 2-1. The dollar amount for each JV is the sum of the absolute value of the debit side entries on that voucher;

2.10.2.1.5.1. The approving officials listed in Table 2-1 provide a framework for approving JVs based on identified thresholds. Reporting entities may adapt the approving officials identified based on the entity’s organizational structure. Within each of the listed thresholds, other approval thresholds with lower dollar values than those specified in Table 2-1 may be established to accommodate the organizational level of those preparing the JV. In addition, unless other DoD Component approval thresholds with lower dollar values are
established in memorandums of understanding between DFAS and a DoD Component, all JVs over $1 billion must be coordinated with the affected DoD Component.

2.10.2.1.5.2. Approving officials may delegate their authority in writing to lower-level supervisors or other duly authorized officials with sufficient knowledge of the accounting matters addressed by the JV. The delegation does not relieve approving officials of their responsibilities as outlined in this chapter. See additional guidance in subparagraph 020210.B.2.

Table 2-1. JV Approval Thresholds

<table>
<thead>
<tr>
<th>Threshold</th>
<th>Dollar Amount</th>
<th>Approving Official</th>
<th>Supporting the Reporting Entity</th>

<td></td>
</tr>
</tbody>
</table>

2.10.2.1.6. Processed under procedures that ensure the separation of duties for preparing, approving, recording or posting, and validating to the maximum extent possible. The preparer and approver cannot be the same person;

2.10.2.1.7. Annotated with the name, title, and office symbol of currently authorized preparers, reviewers (if used), and approvers. In an electronic environment, the name, title, and office symbol may be represented by user identification;

2.10.2.1.8. Maintained and readily available in hard copy, electronic form, or a combination if there is a manual approval of an automated system JV. All manual JVs must be documented, approved by the appropriate level, readily available, and in compliance with published guidance. Manual JVs include the automation of JVs previously recorded manually; and

2.10.2.1.9. Retained in accordance with records retention guidance contained in Volume 1, Chapter 9.

2.10.2.2. Maintain adequate managerial internal controls at each level of management, as directed in OMB Circular A-123, to ensure there is proper oversight of JV preparation. As a minimum, such managerial internal controls require the following:

2.10.2.2.1. Within 10 workdays after the accounting centers' issuance of quarterly financial statements for the first through third quarters, approving officials, at the levels of authority designated in Table 2-1, must perform and document a high-level integrity review of all JVs for which they delegated approval authority. Integrity reviewers are required to review each delegated JV for compliance with the terms of the delegation but are not required to review all documentation supporting the JV. A fourth quarter review must take place prior to submission of the Agency Financial Report to OMB (no later than November 15). If the approving official,
at the levels of authority designated in Table 2-1, is unavailable to perform the integrity review, an individual having the appropriate accounting knowledge and expertise, and who was not a delegated approver, can perform the integrity review on behalf of the approving official. The approving official must appoint this individual in writing.

2.10.2.2.2. Within 30 calendar days of the issuance of the financial statements, whether quarterly or annually, the DFAS Director for Accounting (or designee) must perform a quarterly quality and compliance review after submission of the quarterly and annual reports to OUSD(C). Conduct the review on a random sample of all manual JVs to determine if JVs are correctly prepared and processed, adequately described and supported, and approved at the proper managerial level within the limitations set forth in subparagraph 020210.B.1.e.1. The Director of Accounting (or designee) may substitute monthly reviews in place of the quarterly review. The review must be conducted by an entity outside the immediate office that created the JV. The entity conducting the review must have sufficient auditing expertise to perform the review and must sign, date, and retain documentation to support the completed review.

2.10.2.2.2.1. DFAS must conduct the review in accordance with the GAO FAM Volume 1, Section 450, “Perform Sampling Control Tests.” The FAM provides guidance pertaining to acceptable sample sizes and error rates for typical internal control samples. The FAM Figure 450.1, “Sample Sizes and Acceptable Numbers of Deviations,” includes tables to compute the acceptable number of deviations for testing controls. Within DoD, compute the acceptable number of deviations using a 90 percent confidence level and a 5 percent tolerable error rate. When the tolerable error rate is exceeded, review current JV procedures for possible revision to ensure compliance;

2.10.2.2.2.2. DFAS must identify and correct errors and notify the affected DoD Component as necessary. Identify root causes and implement corrective actions as appropriate. If errors materially impacted the financial statements, evaluate the need to restate/reissue the financial statements;

2.10.2.2.3. The internal review office must conduct an assessment of the organization's JV processing procedures, in accordance with OMB Circular A-123, to ascertain if JVs are properly prepared and supported. Volume 1, Chapter 3, discusses the necessity and importance of independent reviews.

2.10.2.2.4. DoD Components must perform a compliance review of JVs within their accounting systems to ascertain if the JVs are correctly prepared and processed, adequately described, supported, and approved at the proper managerial level at least on a quarterly basis.

2.10.3. Critical Elements. Critical elements are items that, if reported incorrectly for financial reporting purposes, would have a direct effect on the amounts presented on the financial statements. Reporting fields deemed critical must be populated in order to provide sufficient information for the approving official and others, such as auditors, to understand the reason for preparing the JV, determine if it is proper and accurate, and identify whether the JV entries are supported or unsupported by subsidiary records. This paragraph outlines critical elements for most
JV categories and applies to JVs recorded in all systems. Additional items may be deemed critical depending on the category of adjustment being made. JVs must include items listed in paragraph 020204.

2.10.3.1. Correct Appropriation/Accounting Data. JVs must contain accurate financial information in order to populate the required input fields for entry into the accounting/financial reporting systems.

2.10.3.2. Balanced Adjustments. JV debits and credits must equal and reflect correct dollar amounts. Out of balance JV adjustments are not permitted.

2.10.3.3. Approvals. JVs must contain required approvals according to the thresholds outlined in subparagraph 020210.B.1.e.

2.10.3.4. Documentation. JVs must include adequate documentation, with cross-referencing to other documentation (hard copy or electronic form), to support the validity and amount of the transaction. Attach supporting documentation to the JV as described in paragraph 020204.

2.10.3.5. USSGL. JVs must contain valid GL accounts to record the adjustments. Approved DoD postings transactions are available at the DoD USSGL Transaction Library.

2.10.4. JV Categories. Regardless of the method of documentation used for the JVs, the dollar amount(s) on the JVs must be clearly and readily identifiable within the supporting documentation for the categories in subparagraphs 020210.D.1-11. Both manual and system-generated JVs require the use of JV categories.

2.10.4.1. Category A - Reversing Entries for Prior Reporting Period. Category A must be used when reversing JVs from a prior accounting period.

2.10.4.2. Category B - Data Call Entry. Category B must be used when recording JVs for summarized source data not included in the GL trial balance. To the maximum extent possible, reporting entities will eliminate data call JVs in the DDRS and record properly supported JVs closer to the underlying source transaction. This practice enhances accuracy and accountability, reduces errors, and places JV ownership with the organization responsible for the underlying transaction. Examples of data call entries include property, plant and equipment; operating materials and supplies; environmental liabilities; contingent liabilities; and employee benefit data.

2.10.4.3. Category C - Balancing Entries for Eliminations. Category C must be used when the duly authorized official has determined that entries are necessary to balance buyer side data with seller side data. Refer to Volume 6B, Chapter 13 for guidance on eliminations.
2.10.4.4. Category D - Recognition of Undistributed Disbursements and Collections. Category D must be used when recording undistributed disbursements and collections JVs representing the difference between the amount of disbursements and collections reported to Treasury and the amount recorded by the operating level activities.

2.10.4.5. Category E - Reconciliation of Trial Balance and Budget Execution Reports. **Category E must be used when reconciling** trial balances or other source data reported by field accounting sites and/or accounting stations to the DoD Component’s budget execution reports. Consider trial balances or other source data correct and only adjust to budget execution data in instances where budget execution data is determined to be more accurate, i.e., Tie Point reconciliation of budgetary and proprietary accounts.

2.10.4.6. Category F - Supply Management Inventory. **Category F must be used when** supply management activities adjust from the standard price to approximate historical cost.

2.10.4.7. Category G - Reclassification of Accounts. **Category G must be used when correcting erroneous USSGL accounts attributes and to adjust incorrect posting logic, aligning with the DoD Standard Reporting Chart of Accounts and Standard Financial Information Structure.**

2.10.4.8. Category H - Identified Errors and Reasonableness Checks. Category H must be used when correcting errors identified by an authorized official or auditor.

2.10.4.9. Category I - Adjustment to Balance Reports Internally. **Category I must be used when an** authorized official has determined that a reconciliation of data supporting two different reports is not possible.

2.10.4.10. Category J - Other Accruals. Category J must be used when recording accrual JVs. Accruals involve the following types of business transactions:

- Expenses, losses, and liabilities that have been incurred but are not yet recorded in the accounts,
- Revenues and assets that have been earned but are not yet recorded in the accounts, and
- Laws or Regulations specific requirements

2.10.4.11. Category M - Data Collection Module (DCM). **Category M must be used when utilizing DDRS DCM JV functionality to record data call amounts from DCM.**

2.11 Release of Reports (020211)

- **DoD Components.** DoD Components **must** approve draft annual reports and return those reports to DFAS for appropriate revision, validation, and distribution as final reports. The DoD Components **must not** release any reports, including monthly recurring reports, such as budget
execution reports, to any organization external to the DoD Components. Only DFAS may release such reports. Volume 6B, Chapter 2 contains the requirements for the audited and interim financial statements.

2.11.2. DFAS. DFAS must validate all final reports using the official accounting records prior to release to their intended recipients. The release of reports occurs only after final validation that corrections and adjustments have been made and that the report agrees with the official accounting records.

2.12 Certifications (020212)

2.12.1. DoD Component/Reporting Entity. A reporting entity is an organization represented by the financial information in a financial statement or report and may be a DoD Component or a subordinate command/organization. For example, a reporting entity may include an individual command or activity, such as a shipyard or a supply depot, or it could encompass a number of activities within a business area, such as all shipyards or aircraft depot maintenance activities in a Military Department. A reporting entity can also be at a DoD Component level.

2.12.1.1. The reporting entity, rather than DFAS, is responsible for annual certifications required in the implementation of Title 31, United States Code, section 1501(a). See Chapter 4, “Appropriations and Fund Status Reports,” for additional information related to year-end reporting.

2.12.2. DFAS. DFAS's role in processing financial data, and in preparation of financial reports for DoD Components, includes certain responsibilities. Accordingly, DFAS will provide the following to the DoD Component:

2.12.2.1. Assurances and certifications, when requested, to the reporting entity regarding the quality of accounting and report preparation services performed for the DoD Component;

2.12.2.2. Signed monthly, quarterly, and semiannual reports on behalf of the DoD Component following review and approval by the DoD Component. An exception is the AR(M) 1307, which the DoD Component is required to sign. Volume 6B, Chapter 2 contains the requirements for the audited and interim financial statements; and

2.12.2.3. A certification provided by the chief of the applicable reports section confirming accuracy of the balances reported on the AR(M) 1307.
SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated January 2018 is archived.

CHAPTER 3

REPORTING OF OUTLAYS, RECEIPTS, AND ADJUSTED TRIAL BALANCES

1.0 GENERAL (0301)

*1.1 Overview (030101)

DoD reporting entities, including DoD Components, submit monthly outlay and receipt information via the Central Accounting Reporting System (CARS). The data in CARS interfaces with trial balance data submitted through the Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) to produce the financial reports. Reporting entities, including DoD Components, are responsible for reconciling information between CARS and GTAS to ensure financial reports contain accurate information and provide an audit trail for the reporting period presented. The DoD Financial Management Regulation Glossary identifies DoD Components included as a part of DoD reporting.

1.2 Purpose (030102)

This chapter prescribes guidance for reporting outlays, receipts, and adjusted trial balances (ATBs) to the U.S. Department of the Treasury (Treasury). The policies included in this chapter apply to DoD reporting entities authorized to prepare and submit consolidated monthly reports of outlays and receipts, and reporting entities authorized to prepare and submit consolidated annual financial statements, to the Treasury, Bureau of the Fiscal Service (Fiscal Service).

1.3 Authoritative Guidance (030103)

1.3.1. The Treasury Financial Manual (TFM), Volume I, Part 2, Chapter 3300 (ITFM 2-3300) requires a monthly detailed reporting of disbursements and collections (outlays/receipts).

2.0 CARS REPORTING (0302)

*2.1 CARS (030201)

CARS handles Treasury-level accounting and reporting for all federal agencies and is the system of record for Fiscal Service. CARS captures and records Treasury Account Symbol (TAS) information for payments, deposits, and intragovernmental transactions and provides agencies a daily status of their Fund Balance with Treasury. All agencies must use the CARS Modules and submit the CARS TAS/Business Event Type Code (BETC) reporting classification for each payment, deposit, and intragovernmental transaction. The CARS Glossary identifies and defines the reporting processes and data elements used by CARS reporters.
2.2 CARS Reporting (030202)

2.2.1. CARS Daily Reporters. “CARS Daily Reporters” submit the TAS/BETC reporting classification for each payment or collection daily to CARS via the Payment Information Repository (PIR) or Collections Information Repository (CIR), respectively. DoD disbursing officers report cash disbursements via the Classification, Transactions, and Accountability system.

2.2.1.1. PIR. The PIR serves as a repository for all Government payment data and supports Government transparency initiatives by improving the way Fiscal Service collects, analyzes, and reports on payment-related data. Reporting entities submit payment and accounting data to the PIR using the Standard Reporting Format.

2.2.1.2. CIR. Reporting entities use the CIR to obtain detailed and summary-level information on collections and deposits received.

2.3 Special Reporting (030203)

* 2.3.1. Government Securities. Refer to I TFM 2-4300 for guidance on reporting the purchase and sale of U.S. Government securities, including the purchase of unrealized discount on investments. Report U.S. Government securities, purchased as an investment by a trust fund, as a disbursement at par value and the sale of securities at par value as a receipt. See the Fiscal Service BETC listing for approved TAS/BETC combinations used to report the purchase and sale of U.S. Government securities.

* 2.3.2. Borrowing Authority. Borrowing authority is statutory authority to incur obligations and make payments for specified purposes out of borrowed money. It must be established as needed by the acquisition of property subject to a mortgage, and withdrawn upon payment of the mortgage principal. When the buyer assumes the mortgage, the borrowing authority is disestablished. See the Fiscal Service BETC listing for approved TAS/BETC combinations used to report mortgage transactions.

2.3.2.1. A DoD Component becomes the mortgagor when it acquires property subject to a previous mortgage under the DoD Homeowners Assistance Program, or when it borrows money to finance, or issues a mortgage instead of immediate payment, for new construction under the DoD Family Housing Program. See Volume 3, Chapter 15 for additional guidance on borrowing authority.
2.3.2.2. Report the total acquisition cost of the property, including mortgages payable included in the sale of non-guaranteed Government agency securities, as a disbursement to liquidate the entire related obligation. Report the amount of the mortgage assumed, which is included in the sale of non-guaranteed Government agency securities, as a reimbursement.

2.3.2.3. Report payments to the mortgagee in two parts: Payments on principal, which are associated with the redemption of non-guaranteed Government agency securities, as disbursements; and the associated interest payments.

2.3.2.4. Report the sale of property subject to a previous mortgage assumed by the buyer as a reimbursement for the total sales price. Report only the portion of this balance that relates to the redemption of non-guaranteed Government agency securities. Report the amount of the existing mortgage assumed by the buyer, related to the redemption of non-guaranteed Government agency securities, as a disbursement.

* 2.3.3. Cash. I TFM 2-3400 contains guidance on reporting cash held outside of the U.S. Treasury. See Volume 4, Chapter 2 and Volume 5 for additional information on establishing financial control over fund balances with the U.S. Treasury and cash resources not part of the Fund Balance with Treasury.

2.4 Monthly Reporting Process (030204)

2.4.1. Fiscal Service coordinates with reporting entities to ensure appropriate submission and reporting procedures are in place to accomplish the monthly reporting requirements. Reporting entities compile expenditure accounting information from their reporting activities and electronically submit a monthly consolidated report to Fiscal Service in accordance with due dates established by Fiscal Service. Due dates are consistent with the requirements of the Office of the Under Secretary of Defense (Comptroller) Program/Budget, Program and Financial Control Directorate.

2.4.2. Fiscal Service uses outlay and receipt information submitted by reporting entities to produce the Monthly Treasury Statement (MTS), which summarizes the financial activities of the Federal Government and conforms to the Budget of the U.S. Government. MTS data includes information provided by federal entities, disbursing officers, and Federal Reserve Banks. It presents a summary of receipts and outlays, surplus or deficit, and means of financing on a modified cash basis.

2.5 Reconciliation of Monthly Information (030205)

2.5.1. The Defense Finance and Accounting Service (DFAS) and Components must incorporate controls into their processes to ensure amounts reported daily or monthly to Treasury reconcile to collections and disbursements processed through the disbursing systems and reflect amounts reported in the accounting systems. Treasury reporting includes SF 224 submissions by reporting entities. See Volume 1, Chapter 3 for information on providing accurate, reliable, and timely financial management information to achieve compliance with the Federal Financial
Management Improvement Act. Refer to subparagraph 030304.C for additional information on GTAS edits and validations.

2.5.2. DFAS and Components must perform timely reconciliations and implement effective and efficient reconciliation processes. Effective reconciliations serve as a detection control for identifying unauthorized and unrecorded transactions at the entities and Treasury. Volume 4, Chapter 2 prescribes DoD policy for reporting and reconciling transactions affecting an entity’s Fund Balance with Treasury. Effective reconciliations are also important in preventing entity disbursements from exceeding appropriated amounts and providing an accurate measurement of the status of available resources.

2.6 Supplemental Reporting (030206)

A supplemental report may be submitted to Fiscal Service to adjust previously submitted data. Under special circumstances, Fiscal Service may request a supplemental report from the reporting entity. The totals reported on the supplemental reports will be consistent with the summarized net disbursements submitted by the reporting entities.

3.0 GTAS REPORTING (0303)

*3.1 GTAS (030301)

Fiscal Service administers and maintains GTAS to facilitate preparation and consolidation of the FR. Within GTAS, reporting entities submit both proprietary and budgetary data simultaneously in the Bulk File Format. Systemic edits validate data across both budgetary and proprietary reporting, including the Governmentwide Accounting System Account Statement. Reporting entities reconcile GTAS data with amounts reported in CARS to verify the accuracy of reported balances.

3.2 GTAS Reporting (030302)

3.2.1. The GTAS data submitted by agencies are United States Standard General Ledger (USSGL)-based trial balances used to populate the Statement of Budgetary Resources (SBR); the SF 133, Report on Budget Execution and Budgetary Resources; and the prior-year column of the Program and Financing Schedule of the Budget. Agencies must ensure budgetary information used to prepare the SBR is consistent with budgetary information reported to GTAS during the fourth quarter reporting window. Reporting entities submit GTAS data according to the annual Fiscal Service Reporting Window Schedule. The GTAS Glossary identifies and defines the reporting processes and data elements used by GTAS reporters.

* 3.2.2. Agencies must ensure the data in their Agency Financial Reports is exactly the same as the data reported in GTAS and the Defense Departmental Reporting System-Audited Financial Statements as of the GTAS close date.
3.2.3. GTAS establishes the default Canceled ("C") TAS used to report canceled proprietary payables, receivables, and assets. Report expired obligated and unobligated balances as canceled on the final, September 30, SF 133 before closing a Treasury Appropriation Fund Symbol (TAFS). While budgetary USSGL balances are not required to be reported to Treasury and the Office of Management and Budget (OMB) after a TAFS is canceled, Section 130 of OMB Circular A-11, “Preparation, Submission, and Execution of the Budget,” requires a tracking process monitoring obligations pertaining to canceled appropriations in order to prevent overpayment.

3.2.4. The DoD Financial Reporting Guidance provides DoD processes for reporting GTAS information, in addition to the quarterly and year-end schedules.

3.3 FR (030303)

The FR provides a comprehensive view of the Federal Government’s financial position and condition, its revenues and costs, assets and liabilities, and other obligations and commitments. The FR includes consolidated financial statements and related disclosures, as well as reports on stewardship responsibilities. I TFM 2-4700 and OMB Circular A-136, “Financial Reporting Requirements,” describe how agencies provide data for the FR using GTAS.

3.4 Submission and Verification of Data (030304)

3.4.1. Reporting. DoD reporting entities will:

3.4.1.1. Comply with Fiscal Service (GTAS) reporting policies for the reconciliation and confirmation of balances;

3.4.1.2. Ensure submitted data is timely and reliable; and

3.4.1.3. Verify due dates are met according to I TFM 2-4700, DoD Financial Reporting Guidance, and this chapter, for both Significant Entities and Other Entities.

* 3.4.2. Significant Entities. I TFM 2-4700 provides a list of Significant Entities. Other Entities include all other executive branch agencies. All entities (Significant and Other) submit pre-closing GTAS ATB data and complete FR Notes and other FR data for fiscal year reporting. Significant entities will:

3.4.2.1. Submit audited financial statements in the Agency Financial Report or the Performance and Accountability Report;

3.4.2.2. Submit GTAS ATBs and provide an interim and year-end variance analysis to OMB;
3.4.2.3. Provide Fiscal Service with an electronic copy of the interim unaudited financial statements (the third-quarter financial statements), notes, required supplementary information, required supplementary stewardship information, and other information, if the information is not available in OMB MAX;

3.4.2.4. Comply with intragovernmental policies;

3.4.2.5. Review (with their auditors) the fifth quarter Scorecard to determine if a prior-year journal voucher was processed. If a prior-year journal voucher was processed, the Significant Entity must identify the reason for the journal voucher as well as how to prevent the adjustment in the current year; and

3.4.2.6. Provide Chief Financial Officer Representations for Federal intragovernmental activity and balances.

3.4.3. Edits and Validations. Reporting entities must comply with established GTAS edits and validations used to verify the integrity of data submissions. Section VII of the USSGL contains a listing of edits and validations used in GTAS. In addition to Treasury-level tie-point type edits incorporated in GTAS, reporters will perform more-detailed Component-level tie-point reconciliations before submitting finalized data through GTAS.

3.4.4. Standard Financial Information Structure (SFIS). SFIS is a comprehensive data structure that supports GTAS reporting, as well as requirements for budgeting, financial accounting, cost/performance, and external reporting needs across DoD. Entities must use the SFIS reporting elements as prescribed in the SFIS data structure.

3.5 I TFM 2-4700 Reporting Requirements (030305)

3.5.1. Intrigovernmental Requirements. DoD reporting entities comply with Fiscal Service policy for the reconciliation and confirmation of intragovernmental balances. Volume 6B, Chapter 13 contains policy for accounting and reconciling intragovernmental balances.

3.5.2. ATB Requirements. Federal entities must prepare and submit pre-closing GTAS ATBs at the TAS level using USSGL accounts and attributes. Table 3-1 contains a list of DoD reporting entities required to submit ATBs. Fiscal Service collects ATB data to aid in its analytical processes. The GTAS ATBs must include USSGL accounts with the required attributes, while USSGL account balances must reflect the pre-closing adjusting entries needed to produce financial statements. Significant Entities and Other Entities use the same USSGL data on the GTAS ATBs used to prepare the current fiscal year audited entity consolidated financial statements due to OMB.
3.6 Digital Accountability and Transparency Act (030306)

3.6.1. The Digital Accountability and Transparency Act (DATA Act) requires Federal agencies to report financial and payment information according to data standards established by Treasury and OMB. The purpose of the DATA Act is to make Federal spending data more accessible, searchable, and reliable while also serving as a tool for better oversight, data-centric decision-making, and innovation both inside and outside of government.

3.6.2. To help agencies comply with the DATA Act, OMB and Treasury created the DATA Quality Playbook identifying key steps that, if followed together, assist agencies in leveraging existing capabilities with DATA Act implementation. Accurate financial reporting through GTAS enables reporting entities to submit USSGL accounts and SFIS data elements required to comply with the DATA Act.

CHAPTER 4

APPROPRIATION AND FUND STATUS REPORTS

1.0 GENERAL (0401)

*1.1 Purpose (040101)

This chapter prescribes the reporting requirements and policy to follow when preparing appropriation and fund status reports at the departmental level. These reports identify, for the Defense Finance and Accounting Service (DFAS) and its customers, the status of accounting transactions on a monthly, quarterly, and annual basis. This chapter does not prescribe the reporting requirements of the intermediate command and installation levels. The provisions apply to all Department of Defense (DoD) Components, and cover fund types included in Section 79 of Office of Management and Budget (OMB) Circular A-11, Preparation, Submission, and Execution of the Budget.

1.2 Authoritative Guidance (040102)

1.2.1. The reports defined by this chapter fulfill the requirement in Title 31, United States Code (U.S.C.), section 1512(d) that the President review expenditures by executive agencies at least four times a year. The policy in this chapter also fulfills the requirement in 31 U.S.C. § 1554(b) to report unliquidated obligations, unobligated balances, canceled balances, and adjustments made to appropriation accounts during the fiscal year (FY).

1.2.2. The chapter supplements reporting policies required by OMB Circular A-11, which provides an overview of the budget process and instructions on budget execution, including guidance on the apportionment and reapportionment process.

2.0 REPORTING (0402)

2.1 Report Formats (040201)

The report formats for the appropriation and fund status-type reports are identified within the respective paragraphs. Figures 1 and 2 contain sample fund status reports.

2.2 Frequency and Distribution (040202)

The frequency and distribution of each report are designated within the respective paragraphs.

2.3 Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) (040203)

2.3.1. The Department of the Treasury (Treasury), Bureau of the Fiscal Service (Fiscal Service), administers and maintains GTAS to facilitate preparation and consolidation of
the *Financial Report of the U.S. Government*. Reporting Agencies submit both proprietary and budgetary data simultaneously in the *Bulk File Format*. Refer to Chapter 6 for DoD policy related to the submission of financial data using GTAS.

2.3.2. Reporting entities are required to submit requests for new Treasury symbols to be used in GTAS reporting to the Office of the Under Secretary of Defense (Comptroller), Program/Budget (OUSD(C)(P/B)), Program and Financial Control (P&FC) Directorate, along with justification that cites the specific authorizing legislation. P&FC will review requests and coordinate with OMB and the Treasury to establish new accounts when authorized.

2.4 Standard Financial Information Structure (SFIS) (040204)

Appropriation and fund status reporting utilizes the data structure and reporting elements outlined in *SFIS*. SFIS is a comprehensive data structure that supports requirements for budgeting, financial accounting, cost/performance, and external reporting needs across DoD. See *Volume 1, Chapter 4*, for additional information on SFIS reporting.

3.0 YEAR-END REPORTING (0403)

3.1 Purpose (040301)

This section contains instructions for reporting unexpended appropriation and fund balances required by Treasury Financial Manual, Volume I, Part 2, *Chapter 4200*.

3.2 Scope (040302)

This section pertains to all DoD reporting entities reporting unexpended balances of appropriation accounts to Fiscal Service through GTAS.

3.3 Reporting (040303)

Reporting entities utilize GTAS and the Fiscal Service Year-End Module to report unexpended balances of appropriation accounts. Fund holders are responsible for verifying the accuracy of reported balances and providing final confirmation of amounts reported in GTAS to DFAS Accounting Standards and Reporting, Budget Execution Analysis via signed documentation for electronic certification.

4.0 REPORT ON BUDGET EXECUTION AND BUDGETARY RESOURCES (STANDARD FORM (SF) 133) (0404)

4.1 Purpose (040401)

This section contains instructions for implementing OMB Circular A-11 for the monthly *SF 133, Report on Budget Execution and Budgetary Resources*. The SF 133 shows the status of budgetary resources and related financial data. The report is intended for use, with other available information, in reviewing apportionments and the U.S. Government’s budgetary programs, in
managing the rate of incurring obligations and outlays, and as a basis for initiating requests for reapportionments and transfers. See Section 130.1 of OMB A-11 for additional uses of SF 133 data.

* 4.2 Scope (040402)

4.2.1. Applicability. The requirements of this section apply to all DoD Components.

* 4.2.2. Basic Report. Prepare an SF 133 for each unexpired (current) or expired Treasury Appropriation Fund Symbol (TAFS) of the types identified in OMB Circular A-11, Section 130.2(a). Unless exempted by OMB, submit SF 133 information for each open TAFS. Subparagraph 040402.C contains a list of current exemptions.

4.2.3. Exemptions. Unless required by OMB, do not submit SF 133s for deposit fund accounts, receipt accounts, clearing accounts, suspense accounts, and closed TAFS (TAFS with canceled balances).

* 4.3 Frequency and Distribution (040403)

4.3.1. Fiscal Service. Fiscal Service receives monthly budget execution information via GTAS according to the Fiscal Service Reporting Window Schedule. Fiscal Service prepares the monthly SF 133 for OMB based upon GTAS United States Standard General Ledger (USSGL) information and attributes forwarded by DoD.

4.3.2. Reporting Entities. Volume 6B addresses the form and content of DoD audited financial statements. Volume 6B, Chapter 1 contains information regarding DoD Component reporting entities.

* 4.3.3. Reports on Allocation and Appropriation Transfer Accounts

4.3.3.1. Allocation (Transfer To) Account. For allocation transfers made from a parent account to allocation accounts, submit an SF 133 containing the activity for each allocation account.

4.3.3.2. Parent (Transfer From) Account. The parent agency may choose to gather information from all of the agencies that have allocation accounts and enter the information into GTAS, or require each agency with an allocation account to enter information into GTAS and provide a copy to the parent agency. See OMB Circular A-11 for additional information on allocation/parent reporting.

4.3.4. Submission Schedule

4.3.4.1. Except for reports on allocation and transfer appropriation accounts, submit reports by the departmental level reporting entities as of the end of each month. Submit regular reports in accordance with due dates established by DFAS and consistent with the timeframes established by the Fiscal Service Reporting Window Schedule.
4.3.4.2. Submit reports on allocation and transfer appropriation accounts to the
parent agency in accordance with the schedule prescribed by that agency and consistent with the
timeframe provided in OMB Circular A-11.

4.4 Preparation (040404)

4.4.1. The SF 133 is divided into four sections: Budgetary Resources; Status of Budgetary
Resources; Change in Obligated Balance; and Budget Authority and Outlays, Net. Report
cumulative amounts from the beginning of the FY to the end of the period reported and include all
footnotes at the end of the report. Forward any information used to supplement or clarify the
submitted reports directly to OMB. See OMB Circular A-11, Appendix F, “Format of SF 132,
SF 133, Schedule P, and SBR” for the format and line item descriptions for each line item on the
SF 133.

4.4.2. Section 130 of OMB Circular A-11 contains exhibits of sample SF 133 reports.

4.4.3. Volume 1, Chapter 7, contains DoD’s implementation of the USSGL. Fiscal
Service includes crosswalks from the SF 133 to the USSGL in Section V of the current FY’s
version of the USSGL.

4.4.4. OMB Circular A-136, Financial Reporting Requirements, contains information on
reconciling SF 133 information with the Statement of Budgetary Resources (SBR).

4.5 The Expired Phase: Budget Execution Reporting (040405)

Report obligated and unobligated balances on the SF 133 for each expired TAFS that has
not been canceled. Section 130 of OMB Circular A-11 contains instructions for budget execution
reporting on expired TAFS that have not been canceled, as well as instructions for reporting
upward and downward adjustments to expired TAFS.

4.6 The Expired Phase: Obligation Adjustments for Contract Changes (040406)

Upward adjustments to obligations in expired appropriation accounts, caused by contract
changes that exceed certain thresholds, are subject to additional reporting and approval
requirements. A contract change represents an order relating to an existing contract under which
a contractor is required to perform additional work. A contract change does not include
adjustments related to an escalation clause.

4.6.1. Section 130 of OMB Circular A-11 specifies the thresholds, reporting requirements,
and approval requirements for contract changes.

4.6.2. The USD(C), as the Secretary of Defense’s designee, fulfills the duties and
responsibilities designated to “the agency head” in this section of OMB Circular A-11.
4.7 The Expired Phase: Alternatives for Payment of Old Obligations (040407)

The length of the expired phase of a TAFS may only be changed by law. When DoD requires payment of obligations beyond the normal 5-year expired phase (such as the Navy Shipbuilding and Conversion appropriation), the Assistant Secretary of the Military Department Financial Management and Comptroller (FM&C) submits proposed changes to appropriation language for the budget year through OUSD(C)(P/B) to OMB for approval.

4.7.1. Request this authority only when historical outlay data indicates the payment of old balances from unexpired funds regularly exceeds the 1 percent limitation or when such payments would severely affect the current program.

4.7.2. Report such authority to Treasury to prevent premature automatic cancelation of the account. Without this authority, DoD must seek reappropriation of canceled balances and defer payment until the appropriation is available, or pay from current appropriations, as described in Volume 3, Chapter 10.

4.8 SF 133 and the SBR (040408)

The compilation of an agency’s SF 133s should generally agree with the agency’s SBR. OMB Circular A-11 identifies the few differences between the SF 133 and SBR.

4.9 Consistency of Amounts Reported (040409)

Amounts reported in the fourth quarter SF 133 must be consistent with information reported to Treasury as part of the year-end closing procedures and based on actual accounting information pursuant to 31 U.S.C. § 3512. Actuals submitted to OMB for inclusion in the President’s annual budget, which is submitted to the Congress, will agree with those submitted to Treasury and reported on the fourth quarter SF 133.

5.0 REPORT ON REIMBURSEMENTS AND REFUNDS (ACCOUNTING REPORT (MONTHLY) (AR(M)) 725) (0405)

5.1 Purpose (040501)

The AR(M) 725 identifies supplemental budget execution data with respect to reimbursements and refunds, in terms of their sources and the FY programs being executed. The AR(M) 725 identifies reimbursable activity during the reporting period and includes refunds of prior year orders from direct appropriations.
5.2 Scope (040502)

5.2.1. The provisions of this section apply to all DoD Components.

5.2.2. Reports are required electronically for the following:

5.2.2.1. All current appropriations or other fund accounts for military or civil functions of DoD reported on the SF 133;

5.2.2.2. All expired appropriations or other fund accounts;

5.2.2.3. Trust fund accounts if reimbursements or refunds are from non-Federal sources;

5.2.2.4. Trust revolving fund accounts if the reimbursements or refunds are from U.S. Government accounts; and

5.2.2.5. Allocation and transfer accounts for DoD Components from appropriations made to the Office of the Secretary of Defense (Treasury Index (TI) Code 97).

5.2.3. Unless specifically requested in writing by the OUSD(C), reports are not required for the following:

5.2.3.1. Trust fund accounts, except those in subparagraph 040502.B.3;  
5.2.3.2. Trust revolving fund accounts, except those in subparagraph 040502.B.4;  
5.2.3.3. Deposit fund accounts; 
5.2.3.4. Other Defense, civil programs; and 
5.2.3.5. Security assistance appropriation accounts.

5.3 Report Format (040503)

The AR(M) 725 will be prepared in accordance with the guidance provided in paragraph 040505. Figure 1 contains the current report format for the AR(M) 725.

5.4 Frequency and Distribution (040504)

5.4.1. **Reporting entities with reimbursable activity** electronically submit monthly reports in accordance with due dates established by DFAS and consistent with the **timeframes established by OUSD(C)**. Submit the report at the same time as the AR(M) 1002, Appropriation Status by Fiscal Year Program and Subaccounts.

5.4.2. Include the AR(M) 725 with the SF 133.
5.5 Preparation (040505)

5.5.1 Basis of Reporting. Amounts reported will agree with corresponding general ledger balances for reimbursement and refund USSGL accounts as defined in the DoD Standard Reporting Chart of Accounts.

5.5.2 Unit of Entries. Round reported amounts to the nearest thousand.

5.5.3 Description (Column A). This column identifies whether the transaction is from a “Federal” or “Non-Federal” source.

5.5.4 Reimbursements Receivable (Column B). Enter the amount of receivables brought forward from the prior year. The total of this column must agree with column I of the year-end AR(M) 725 report from the prior year.

5.5.5 Unfilled Customer Orders Without Advance (Column C). Enter the amount of unfilled orders brought forward from the prior year. The total of this column must agree with column J of the year-end AR(M) 725 report from the prior year.

5.5.6 Total Anticipated Reimbursements (Column D). Enter the estimate of reimbursements expected to be earned during the current FY, subject to OMB apportionment, other authorized reimbursements, and/or other income for which current year obligational authority is automatically established based on orders received.

5.5.7 Earned Reimbursements and Refunds (Column E). This column represents the amount recognized when a performing organization renders actual or constructive performance on a reimbursable order. Generally, reimbursements must recover the cost elements outlined in Volume 11A, Chapter 3 and Volume 11B, Chapter 3.

5.5.7.1 The SFIS reporting structure identifies approved USSGL transactions and data elements used to record transactions between buyers and sellers. This column also includes refunds of prior-year orders from direct appropriations. Refunds are the repayments of excess payments and are directly related to previous obligations incurred and outlays made against the appropriation. Process refunds received to the appropriation or fund account charged with the original obligations.

5.5.7.2 OMB Circular A-11 provides guidance for processing refunds in both current and prior years.

5.5.8 Changes in Unfilled Customer Orders (Column F). This column represents the net change in unfilled customer orders during the period. The balance in this column increases with new customer orders and decreases with earned customer orders.

5.5.9 Anticipated Orders for Rest of Year (Column G). For transactions with the public, this column represents estimated collections, including advances expected to be received and
reimbursements expected to be earned. In transactions between U.S. Government entities, this balance represents orders expected to be received, but which have not been accepted.

5.5.10. Reimbursements and Refunds Collected (Column H). This column includes collections received on a reimbursable basis for goods, services provided, and refunds of prior-year orders from direct appropriations.

5.5.11. Reimbursements Receivable (Column I). This column represents the balance of outstanding collections, for goods and services provided on a reimbursable basis, at the end of the reporting period.

5.5.12. Unfilled Customer Orders Without Advance (Column J). This column represents the balance of unfilled customer orders, at the end of the reporting period, for goods and services without an advance. This line applies only to transactions between U.S. Government entities and those entities with approved exceptions.

6.0 APPROPRIATION STATUS BY FISCAL YEAR PROGRAM AND SUBACCOUNTS (AR(M) 1002) (0406)

6.1 Purpose (040601)

This section prescribes the preparation and submission of reports on the application and status of appropriation and other fund accounts. The reports present budget execution data with respect to obligational authority in terms of the FY programs executed at budgetary subdivisions not found on the SF 133. Maintain program value, obligation, unobligated balance, unexpended balance, and expenditure balance data integrity, by line item, throughout an account’s unexpired and expired availability periods. Expired account adjustments, which move resources between Budget Line Items (BLI), must reflect the appropriate change to that line item’s program value amount, obligations, unobligated balance, unexpended balance, and expenditure data on the AR(M) 1002.

6.2 Scope (040602)

6.2.1. The provisions of this section apply to all DoD Components.

6.2.2. Reports are required for all general and special fund appropriations for military and civil functions of the Department that are reported on the SF 133, except those accounts specifically exempted in subparagraph 040602.C.

6.2.3. Reports are not required for the following, unless specifically requested in writing by the OUSD(C):

6.2.3.1. Revolving funds that do not have direct appropriation funds available, except for accounts 97 X 4555, 4090, 4965, and 0833;
6.2.3.2. Receipt accounts, clearing accounts, suspense accounts, deposit funds, and trust funds, except for 97 X 8097, 8098, and 8335;

6.2.3.3. Civil funds of the U.S. Army Corps of Engineers and the U.S. Soldiers’ and Airmen’s Home; and

6.2.3.4. Transfer appropriation accounts.

6.3 Report Format (040603)

Prepare the AR(M) 1002 in accordance with the guidance provided in paragraph 040605. Report 1002 data in accordance with the Business Enterprise Architecture included in SFIS. The AR(M) 1002 format includes budget and fiscal account classifications required to align with information included in annual DoD budget requests, as illustrated in the President’s Budget Exhibits M-1, O-1, P-1, R-1, and C-1. See the “SFIS Matrix” for business rules and examples of acceptable budgetary values. The Defense Departmental Reporting System-Budgetary contains the official report mapping for the AR(M) 1002. Figure 2 contains the current report format for the AR(M) 1002.

6.4 Frequency and Distribution (040604)

6.4.1. Electronically submit monthly reports in accordance with the due dates established by DFAS, and consistent with the timeframes established by OUSD(C).

6.4.2. Arrange the reports in the same order as the SF 133s they support.

6.5 Preparation (040605)

6.5.1. Units of Entry. Round all amounts to the nearest thousand and no attempt need be made to adjust the rounded figures so that they will add to column totals. Rounded amounts will never exceed the actual amounts by more than ± $2,000.

6.5.2. Direct Programs

6.5.2.1. Military Personnel

6.5.2.1.1. General. Report at least two classification levels for distinct sets of TI Codes 17 (Navy), 21 (Army), and 57 (Air Force); FY program; and Treasury account number (Main Account Code).

6.5.2.1.2. Level One. Budget Activity (BA) equals the M-1 (Military Personnel Programs) BA. Use the set of distinct M-1 BA records to present the BA stub entries.

6.5.2.1.3. Level Two. Budget Sub-activity (BSA) equals the M-1 BSA and is the M-1 line item detail and lowest classification level. Use the set of distinct M-1 BSA records to present the BSA stub entries. Present the BSA stub entries under their respective BA.
6.5.2.1.4. **Level Three (Optional)**. BLI equals the President’s Budget Exhibit PB-30J, Summary of Entitlements by Sub-activity, and is the lowest classification level. Use the same set of distinct entitlement stub entries on the AR(M) 1002 displayed in Budget Exhibit PB-30J. Present the BLI stub entries under their respective BA and BSA.

6.5.2.2. **Operation and Maintenance (O&M)**

6.5.2.2.1. Report the three classification levels for distinct sets of TI Codes 17, 21, and 57; FY program; and Main Account Code.

6.5.2.2.1.1. **Level One**. BA equals the O-1 (O&M Programs) BA. Use the set of distinct O-1 BA records to present the BA stub entries.

6.5.2.2.1.2. **Level Two**. BSA equals the O-1 Budget Activity Group (BAG). Use the set of distinct O-1 BAG records to present the BSA stub entries. Present the BSA stub entries under their respective BA.

6.5.2.2.1.3. **Level Three**. BLI equals the O-1 Sub-activity Group (SAG) and is the O-1 line item detail and lowest classification level. Use the set of distinct O-1 SAG line items to present the BLI stub entries. Present the BLI stub entries under their respective BA and BSA.

6.5.2.2.2. Report five classification levels for distinct sets of TI Code 97, FY program, and Main Account Code as prescribed by DFAS Manual 7097.01.

6.5.2.2.2.1. **Level One**. BA equals the O-1 BA. Use the set of distinct O-1 BA records to present the BA stub entries.

6.5.2.2.2.2. **Level Two**. Defense Level Organization (DLO) equals the O-1 Defense Agencies. Use the set of distinct O-1 Defense Agencies to present the DLO stub entries. Present the DLO stub entries under their respective BA. The DFAS Manual 7097.01 Budget Project Codes appropriation chapters identify the valid Defense Agencies. Within each chapter is a list of valid limitations where the first two digits of the limitation identify the Defense Agency allotment holder.

6.5.2.2.2.3. **Level Three**. BSA equals the O-1 BAG. Use the set of distinct O-1 BAG records to present the BSA stub entries. Present the BSA stub entries under their respective DLO.

6.5.2.2.2.4. **Level Four**. BLI equals the O-1 SAG and is the O-1 line item detail and lowest classification level. Use the set of distinct O-1 SAG line items to present the BLI stub entries. Present the BLI stub entries under their respective BSA.

6.5.2.2.2.5. **Level Five**. Budget Allotment Line Item Identifier (BALI) is a sub-set of BLIs and refers to sub-BLI codes used in original allotment and
sub-allotment funding authorization documents. Present the BALI stub entries under their respective BLI.

6.5.2.3. Procurement

6.5.2.3.1. Report the three classification levels for distinct sets of TI Code 17, 21, and 57; FY program; and Main Account Code.

6.5.2.3.1.1. Level One. BA equals the P-1 (Procurement Programs) BA and BA Title. Use the set of distinct P-1 BA records to present the BA stub entries. A subtotal at the BA level is required for Procurement Accounts.

6.5.2.3.1.2. Level Two. BSA equals the P-1 BSA and BSA Title. Use the set of distinct P-1 BSA records to present the BSA stub entries. Present the BSA stub entries under their respective BA. A subtotal at the BSA level is not required for Procurement Accounts.

6.5.2.3.1.3. Level Three. BLI equals the P-1 Line Item and Line Item Title and is the P-1 line item detail and lowest classification level. Use the set of distinct P-1 line item records to present the BLI stub entries. Present the BLI stub entries under their respective BA and BSA.

6.5.2.3.2. Report five classification levels for distinct sets of TI Code 97, FY program, and Main Account Code as prescribed by DFAS Manual 7097.01.

6.5.2.3.2.1. Level One. BA equals the P-1 BA and BA Title. Use the set of distinct P-1 BA records to present the BA stub entries.

6.5.2.3.2.2. Level Two. DLO equals the P-1 Organizational Title. Use the set of distinct P-1 Defense Agencies to present the DLO stub entries.

6.5.2.3.2.3. Level Three. BSA equals the P-1 BSA and BSA Title. Use the set of distinct P-1 BSA records to present the BSA stub entries. Present the BSA stub entries under their respective DLO. A subtotal at the BSA level is not required for Procurement Accounts.

6.5.2.3.2.4. Level Four. BLI equals the P-1 Line Item and Line Item Title and is the P-1 line item detail and the lowest classification level. The DFAS Manual 7097.01 Budget Project Codes appropriation chapters identify a valid list of line items/budget projects. Use the set of distinct P-1 line item records to present the BLI stub entries. Present the BLI stub entries under their respective BSA.

6.5.2.3.2.5. Level Five. BALI is a sub-set of BLIs and refers to sub-BLI codes used in original allotment and sub-allotment funding authorization documents. Present the BALI stub entries under their respective BLI.
6.5.2.4. **Research, Development, Test, and Evaluation (RDT&E)**

6.5.2.4.1. Report at least two classification levels for distinct sets of TI Code 17, 21, and 57; FY program; and Main Account Code.

6.5.2.4.1.1. **Level One.** BA equals the R-1 (RDT&E Programs) BA and BA Title. Use the set of distinct R-1 BA records to present the BA stub entries.

6.5.2.4.1.2. **Level Two.** BLI equals the R-1 Program Element (PE) and PE Title and is the R-1 line item detail and the lowest classification level. Use the set of distinct PE records to present the BLI stub entries under their respective BA.

6.5.2.4.2. Report five classification levels for distinct sets of TI Code 97, FY program, and Main Account Code as prescribed by DFAS Manual 7097.01.

6.5.2.4.2.1. **Level One.** BA equals the R-1 BA and BA Title. Use the set of distinct R-1 BA records to present the BA stub entries.

6.5.2.4.2.2. **Level Two.** DLO equals the R-1 Organizational Title. Use the set of distinct R-1 Defense Agencies to present the DLO stub entries.

6.5.2.4.2.3. **Level Three.** BSA equals the R-1 BSA and BSA Title. Use the set of distinct R-1 BSA records to present the BSA stub entries. Present the BSA stub entries under their respective DLO.

6.5.2.4.2.4. **Level Four.** BLI equals the R-1 Line Item and Line Item Title and is the R-1 line item detail and the lowest classification level. The DFAS Manual 7097.01 Budget Project Codes appropriation chapters identify a valid list of BAs/PEs. Use the set of distinct R-1 line item records to present the BLI stub entries. Present the BLI stub entries under their respective BSA.

6.5.2.4.2.5. **Level Five.** BALI is a sub-set of BLIs and refers to sub-BLI codes used in original allotment and sub-allotment funding authorization documents. Present the BALI stub entries under their respective BLI.

6.5.2.5. **Military Construction and Family Housing**

6.5.2.5.1. Report the three classification levels for distinct sets of TI Code 17, 21, and 57; FY program; and Main Account Code. For TI Code 97, report the three classification levels by Defense Agency as prescribed by the DFAS Manual 7097.01.

6.5.2.5.1.1. **Level One.** BA equals the C-1 (Construction Programs) BA and BA Title. Use the set of distinct C-1 BA and BA Title records to present the BA stub entries.
6.5.2.5.1.2. **Level Two.** BSA equals the C-1 Location, Location Title, and State-Country. Use the distinct sets of C-1 Location, Location Title, and State-Country record combinations to report the set of locations. Present the location stub entries under their respective BA.

6.5.2.5.1.3. **Level Three.** BLI equals the C-1 Project and Project Title. Use the distinct set of C-1 Project and Project Title record combinations to report C-1 line items. Present the C-1 line items under their respective location and BA and BSA.

6.5.2.5.2. **Report five classification levels for distinct sets of TI Code 97, FY program, and Main Account Code as prescribed by DFAS Manual 7097.01.**

6.5.2.5.2.1. **Level One.** BA equals the C-1 BA and BA Title. Use the set of distinct C-1 BA records to present the BA stub entries.

6.5.2.5.2.2. **Level Two.** DLO equals the C-1 Organizational Title. Use the set of distinct C-1 Defense Agencies to present the DLO stub entries.

6.5.2.5.2.3. **Level Three.** BSA equals the C-1 BSA and BSA Title. Use the set of distinct C-1 BSA records to present the BSA stub entries. Present the BSA stub entries under their respective DLO.

6.5.2.5.2.4. **Level Four.** BLI equals the C-1 Line Item and Line Item Title and is the C-1 line item detail and the lowest classification level. The DFAS Manual 7097.01 Budget Project Codes appropriation chapters identify a valid list of BAs/PEs. Use the set of distinct C-1 line item records to present the BLI stub entries. Present the BLI stub entries under their respective BSA.

6.5.2.5.2.5. **Level Five.** BALI is a sub-set of BLIs and refers to sub-BLI codes used in original allotment and sub-allotment funding authorization documents. Present the BALI stub entries under their respective BLI.

6.5.2.5.3. **Report one classification level for distinct sets of TI Code 17, 21, 57, and 97; FY program; Military Construction BA of Minor Construction or Planning and Design; and Family Housing Construction BA of Construction Improvements or Planning and Design.** The line item classification equals the C-1 BA and BA Title. Use the set of distinct C-1 BA records to present the BA stub entries. For TI Code 97, report the BA by Defense Agency.

6.5.2.5.4. **Report one classification level for distinct sets of TI Code 17, 21, 57, and 97; FY program; and Main Account Code for Family Housing O&M or DoD Family Housing Improvement Fund (FHIF).** The line item classification equals the C-1 BA and BA Title. Use the set of distinct C-1 BA records to present the BA stub entries.

6.5.2.5.5. **For Base Realignment and Closure (BRAC), follow the report classification levels prescribed by the DFAS Manual 7097.01 Budget Project Codes appropriation chapter guidance for BRAC Accounts.** Report the BA of Major Construction information by
location and title, and report all other BAs at the BA lump-sum level by FY and Service Component or Defense Agency.

6.5.2.5.6. For the FHIF (97 X 0834), follow the guidance in subparagraph 040605.B.5.a once project funds have transferred from Family Housing Construction to the FHIF.

6.5.2.6. Trust and Special Funds

6.5.2.6.1. Report one classification level for each trust or special fund.

6.5.2.6.2. The line item classification equals the BA as found in the President’s budget exhibits, DoD Military Programs, or Other Defense – Civil Programs, as appropriate.

6.5.3. Reimbursable Programs

6.5.3.1. Report all reimbursable program data separately from direct program data. A subtotal for the direct program will be followed by a one-line reimbursable program, followed by a “Grand Total,” which is the sum of the direct and the reimbursable programs.

6.5.3.2. For all the aforementioned appropriation functional titles, report reimbursable program data at the lump-sum level for distinct sets of TI Code 17, 21, and 57; FY program; and Main Account Code.

6.5.3.3. For TI Code 97:

6.5.3.3.1. Main Account Codes for BRAC and Procurement accounts report reimbursable program data at the lump-sum level by FY program and Defense Agency; and

6.5.3.3.2. All other Main Account Codes report reimbursable program data at the lump-sum level by FY program.

6.6 Column Descriptions (040606)

The composition and amounts in each column are detailed in subparagraphs 040606.A through 040606.D.

6.6.1. No-year accounts

6.6.1.1. No-year accounts follow the same guidance as other accounts but are individually reported by FY account. No-year accounts are tracked and reported by the FY in which the funds were appropriated. The FY in which the funds were appropriated is also known as the SFIS Program Year.

6.6.1.2. The period of availability (POA) start year for no-year accounts reflects the year money was appropriated; the POA end year reflects XXXX. For example, the POA for
no-year money appropriated in FY 2019 would be reflected as 2019/XXXX on the AR(M) 1002. Continue to report these funds separately until the account is closed.

6.6.2. General

6.6.2.1. Budget Activity (Column A). Valid values for the report stub entries are the program codes contained in the publicly published President’s Budget. The nomenclature is equal to the line items found in the President’s Budget Exhibits M-1, O-1, R-1, P-1, C-1; Family Housing and BRAC Programs; DoD Military Programs; and Other Defense – Civil Program documents. Arrange the separate FY appropriation accounts of an appropriation title in consecutive order, starting with the most current FY or multiple-year account. Arrange the FY programs within a multiple program year account in consecutive order, starting with the most current FY program. Subtotals are required for each level contained in the report.

6.6.2.2. Base for Reprogramming (Column B). The balance in this column matches the enacted amounts as published in the Department of Defense (DD) Form 1414, Base for Reprogramming Actions for most appropriation types. Once established, the dollar values in the column will not change and will continue to be reported for the life cycle of the account (until the account closes). Volume 3, Chapter 6, contains an example of the DD 1414. The exceptions to this are the Trust and Special Funds. Column B will match current year authority for these funds.

6.6.3. Cumulative Columns

6.6.3.1. Approved Program (Column C). The balance in this column shows the approved program for the FY-to-date. Column C includes the distribution of the effect of approved reprogramming actions on DD Form 1415-1, Reprogramming Action - Prior Approval, and/or DD 1415-3, Reprogramming Action - Internal; supplemental appropriations; and rescissions. The amounts in this column will change to reflect congressionally approved changes to the program. This column reflects the cumulative program-to-date, and will continue to be reported for the life cycle of the account (until the account closes). Guidance for reprogramming is contained in Volume 3, Chapters 6 and 7. Volume 3, Chapter 6, contains an example of the DD 1415-1 and DD 1415-3. The exceptions to this are the Trust and Special Funds. Column B will match current year authority for these funds.

6.6.3.2. Revised Program (Column D). The balance in this column shows the effect of below threshold reprogramming (BTR) actions initiated by a DoD Component that occur during execution.

6.6.3.2.1. Note that the grand total for column C and column D will be the same. The difference between the two columns is column D incorporates BTRs and column C does not. BTR actions provide DoD Components with the discretionary flexibility to realign funding within prescribed limits. BTR actions are minor actions not otherwise requiring congressional approval that may be accomplished within the DoD Components and are measured cumulatively over the entire obligation availability of the appropriation. The grand totals for
column C and column D will be the same; however, differences will exist below the grand total level if BTRs have been recorded which realigned previous funding levels.

6.6.3.2.2. The exceptions to this are the Trust and Special Funds. Column B will match current year authority for these funds, which report either current year authority or apportionment amount as appropriate.

6.6.3.3. **Cumulative Obligations (Column E).** Enter the amount of obligations occurring from the inception of the program to the end of the reporting period. Obligation transactions will include both obligations incurred and adjustments of prior-year obligations. The exceptions to this are the Trust and Special Funds, which report current year obligations plus unpaid obligations from prior year.

6.6.3.4. **Cumulative Unobligated Balance (Column F).** The balance shown in this column represents the difference between columns D and E.

6.6.3.5. **Cumulative Expenditures (Column G).** Enter the distribution of the gross disbursements (net of refunds) from the inception of the program to the end of the reporting period. Within an FY program, enter the difference between amounts distributed by subaccounts and total disbursements identifiable to that FY program on the line “Undistributed Disbursement.” Enter disbursements not immediately distributable by FY program, or by subaccount in accounts without FY program subdivisions, on the line “Undistributed Disbursement” immediately before the total line for the appropriation account. For expired year accounts, unless specifically exempted by the OUSD(C), report the direct and reimbursable programs at the same level of detail as they were reported as unexpired accounts. The total of column G plus the total of column H must equal column D.

6.6.3.6. **Cumulative Unexpended Balance (Column H).** Enter the distribution of the unexpended balance from the inception of the program to the end of the reporting period. Column H will equal the difference between columns D and G.

6.6.3.7. **Commitments (Column I).** The use of column I is optional for operating appropriations. Enter, by subaccount, the amount of outstanding commitments recorded. The entry in this column may properly exceed the amount of the unobligated balance in column F if a program reduction was approved in anticipation of a cancelation or downward adjustment of commitments outstanding. If there was no approved program reduction, then an excess of commitments outstanding over total unobligated balance indicates the program was implemented in excess of the approved amount.

6.6.4. **Current FY Columns**

6.6.4.1. **Amount Obligated in Current FY (Column J).** Enter the amount of obligations occurring from the beginning of the current FY to the end of the reporting period. Obligation transactions include both obligations incurred and adjustments of prior year obligations.
6.6.4.2. **Amount Expended in Current FY (Column K).** Enter the distribution of the gross disbursements (net of refunds) for the period from the beginning of the current FY to the end of the reporting period. Within an FY program, enter the difference between amounts distributed by subaccounts and total disbursements identifiable to that FY program on the line “Undistributed Disbursement.” Enter disbursements not immediately distributable by FY program, or by subaccount in accounts without FY program subdivisions, on the line “Undistributed Disbursement” immediately before the total line for the appropriation account. For expired year accounts, unless specifically exempted by the OUSD(C), report the direct and reimbursable programs at the same level of detail as they were reported as unexpired accounts.

*6.7 Reconciliation of AR(M) 1002 With the DD 1414; DD 1416, Report of Programs; and Other Reports Submitted to Congress (040607)

6.7.1. **Reconciliations**

6.7.1.1. Perform the DD 1414 and DD 1416 reconciliations described in 040607.B-C only for appropriation authority amounts.

6.7.1.2. Spending authority from offsetting collections, contract authority, and borrowing authority do not apply to these reconciliations.

6.7.2. **Military Personnel and O&M Accounts**

6.7.2.1. The DD 1414 is prepared annually directly after the DoD Appropriations Act is passed. The Base for Reprogramming column (normally the last column on the DD 1414 report) amounts must reconcile with the amounts in the AR(M) 1002 column B at the BA level. See Volume 3, Chapter 6 for additional information on the reprogramming of DoD appropriated funds and related reports.

6.7.2.2. The Selected Reserve Personnel by Reserve Component Report is prepared in accordance with the yearly appropriations acts.

6.7.3. **RDT&E and Procurement Accounts**

6.7.3.1. The Base for Reprogramming column amounts must reconcile with the amounts in the AR(M) 1002 column B at the P-1/R-1/BLI line item level.

6.7.3.2. The DD 1416 is prepared quarterly upon receipt of enactment of the DoD Appropriations Act. The net amount reported on the DD 1416 must reconcile with column D of the AR(M) 1002 by P-1/R-1/BLI. The OUSD(C) will provide guidance for reporting under continuing resolutions.
6.7.4. Military Construction Accounts

6.7.4.1. The DD 1391, Military Construction Project Data, supports each project proposed for inclusion in the Military Construction Program. This includes new authorization projects in the program or projects using emergency or contingency authorization.

6.7.4.2. Volume 2B, Chapter 6 contains a copy of the form and instructions for preparation.

6.8 Special Instructions for Selected Accounts (040608)

6.8.1. Obligation Limitation for Annual Accounts. Each year, Title VIII, “General Provisions,” of the DoD Appropriations Act requires a certification that not more than 20 percent of the appropriations in that act, which are limited for obligation during the current FY, will be obligated during the last 2 months of the FY. The exception to this policy is the Reserve Components record obligations for support of active duty training or the Reserve Officers’ Training Corps records obligations for summer camp training.

6.8.2. Certification. Each year, DoD Components must provide one of the following certifications, depending upon the level of obligations incurred, on the July AR(M) 1002 for those annual appropriations to which the limitation applies:

6.8.2.1. This certification usually is referred to as the “80/20” criterion. In determining direct obligational authority, the amount of transfers in or out within the applicable DoD Appropriations Act will be considered. If obligations are 80 percent or more of direct authority, the certification will be as follows:

“I hereby certify that direct obligations have been incurred equal to or in excess of 80 percent of the funds subject to the congressional limitation on year-end spending.”

6.8.2.2. If obligations are less than 80 percent, then the certification will be as follows:

“I hereby certify that action has been taken to assure that not more than 20 percent of the funds subject to the congressional limitation on year-end spending remain available for obligation during the remainder of the FY.”

7.0 REPORTING OBLIGATION AND OUTLAY DATA (0407)

7.1 Purpose (040701)

Reporting entities will report obligation and outlay planning and execution data to OUSD(C)(P/B) P&FC for monitoring the planned monthly execution of approved DoD programs.
7.1.1. OUSD(C) updates requirements for planning data on an annual basis. Specific report formats are updated on a yearly basis by memorandum to the Assistant Secretaries of the Military Departments’ FM&C.

7.1.2. OUSD(C) updates requirements for execution data on an annual basis. Specific report formats are updated on a yearly basis by memorandum to DFAS.

7.1.3. Report on the SF 133 monthly totals for obligation and outlay execution data. These reports, provided monthly by DFAS to OUSD(C) and the Military Departments, must be consistent with data reported to Treasury via GTAS. These reports are also to be made available to DoD reporting entities.

7.2 Scope (040702)

Planning and execution data for obligations and outlays applies to DoD Components with respect to obligations incurred for all military functions; including obligations incurred in connection with related allocation and transfer appropriation accounts. This includes all DoD Military accounts as well as related receipt accounts.

CHAPTER 7
FOREIGN CURRENCY REPORTS

1.0 GENERAL

1.1 Purpose

This chapter establishes reporting requirements for tracking all transactions that increase or decrease the foreign currency fluctuation (FCF) accounts. FCF, Defense (FCF, D) and FCF, Construction, Defense (FCF, C, D) appropriations were established by Congress to reduce the adverse impact of FCF losses on the Department of Defense (DoD) operating budget.

1.2 Authoritative Guidance

The DoD Appropriation Act of 1979, Public Law 95-457, initially established the FCF program to maintain the budgeted level of operations and eliminate substantial gains or losses caused by FCF rates that vary substantially from those used in preparation of budget submissions. Public Law 95-457 has been codified under Title 10, United States Code, section 2779 (10 U.S.C. § 2779). Additional authoritative guidance is referenced throughout the chapter.

2.0 PROGRAM MANAGEMENT

The provisions of this chapter apply to all DoD Components unless a specific written exception has been granted by the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)).

*2.1 Definitions

2.1.1. FCF Account. An FCF account allows service components to manage realized gains and losses in direct programs due to fluctuation in foreign exchange rates. Funding is normally provided as a budgetary line item as part of a component’s annual funding authorization. The service components maintain FCF accounts at various budgetary levels.

2.1.2. Centrally Managed Allotment (CMA). A CMA is used by DoD to manage budgetary authority provided by the FCF accounts. Funding transfers from the FCF account line within the appropriation to cover realized losses are contingent on funds availability in the CMA. When FCF budget authority is insufficient, component level operating funds are required to cover any realized losses. Net gains due to currency fluctuation are returned by the component operating appropriations through the FCF account line for reallocation and distribution by the CMA in subsequent years based on approved FCF budget authority (see subparagraph 3.2.4.). CMAs are managed at the DoD level.

2.1.3. Budget Rate. Budget rates are OUSD(C) published foreign currency exchange rates for use during the formulation, preparation, and submission of DoD’s operating budgets. These published budget rates will also be used as the basis for recording budgetary obligations that are
associated with approved overseas programs into the accounting systems of DoD. Do not use internal or unapproved exchange rates on official accounting or disbursing records.

2.1.4. Foreign Currency Liquidated Obligations. Foreign currency liquidated obligations are paid obligations liquidated in the accounting system at the budget rate of the foreign currency cited within the obligating document. These liquidated obligations represent a key component of the monthly reporting process and are required to compute the realized variance.

2.1.5. Realized Variance. A realized variance is the calculated difference between obligations recorded at the budget rate and liquidated at the foreign currency exchange rate in effect at the time of payment. When the budget rate used in recording the original obligation is less than the current exchange rate, transfer the realized variance (loss) from the applicable FCF account if funds are available. When the budget rate used in recording the original obligation is more than the current foreign currency exchange rate, transfer the realized variance (gain) into the applicable FCF account.

2.1.6. Foreign Currency Unliquidated Obligations. Foreign currency unliquidated obligations are unpaid obligations recorded in the accounting system at the budget rate of the foreign currency cited within the obligating document. These unpaid obligations represent a key component of the monthly reporting process and are required to compute the accrued variance. At time of disbursement, foreign currency unliquidated obligations in excess of the outlay amount must be adjusted to the actual outlay amount and net gains transferred to the applicable FCF Account.

2.1.7. Accrued Variance. An accrued variance is the difference between the value of unliquidated obligations recorded at the budget rate and the value of those same unliquidated obligations calculated at the current foreign currency exchange rate. The computed accrued variance provides DoD decision makers a monthly estimate of the net gains or losses that would be realized if payment had to be made as of the report date.

2.2 FCF, D

Congress authorized the FCF, D appropriation (Department of the Treasury Account Symbol (TAS) 97X0801) to manage foreign currency net gains and losses in the DoD Operation and Maintenance (O&M) and Military Personnel (MILPERS) appropriations. As net gains from O&M and MILPERS are realized by de-obligation of the unneeded portion of the direct program, transfer the gains to FCF, D. Funds held in FCF, D will be transferred to O&M and MILPERS to cover net losses. Charge net gains or losses from foreign currency exchange rate fluctuation funded by FCF, D to the same FY as the underlying obligation. In areas participating in the FCF program, the occurrence of a gain or loss on an FCF transaction is an expected, normal component of an obligation; therefore, treat as an ordinary event. Record the gain or loss on an FCF transaction using current United States Standard General Ledger (USSGL) accounts for Other Gains (USSGL account 719000) and Other Losses (USSGL account 729000).
2.2.1. 10 U.S.C. § 2779(a) allows previously transferred FCF, D funds to be transferred back to the FCF, D appropriation so long as the transfer is made no later than the end of the second FY after the FY that the appropriation to which the funds were originally transferred is available for obligation. This is allowed only if the funds are not needed to finance increased obligations due to fluctuation in currency exchange rates because of subsequent favorable fluctuation in currency exchange rates or because other funds are, or become, available to finance these cost increases.

2.2.2. 10 U.S.C. § 2779(d) states any transfer made pursuant to the authority provided in this subsection must be limited such that the balance in the appropriation FCF, D does not exceed $970 million at the time of the unobligated balance transfer.

2.3 FCF, C, D

In FY 1987, Congress enacted the current authority for an FCF appropriation to protect DoD Military Construction, Family Housing, and North Atlantic Treaty Organization (NATO) infrastructure programs from substantial gains or losses resulting from foreign currency fluctuation. The title of this appropriation is FCF, C, D TAS 97X0803.

2.3.1. The FCF, C, D appropriation was initially capitalized by transferring unobligated balances from the family housing and military construction appropriations. Pursuant to authority conferred by recurring annual Military Construction Appropriations Act general provisions, unobligated balances from family housing and military construction appropriation accounts may be transferred into FCF, C, D during the 5-year period after the appropriations expire for original obligation purposes. As FCF gains are realized by de-obligation of the unneeded portion of the direct program, transfer the gains to FCF, C, D. Funds held in FCF, C, D will be transferred to family housing and military construction to cover net losses. Charge net gains or losses from foreign currency exchange rate fluctuation funded by FCF, C, D to the same FY as the underlying obligation. In areas participating in the FCF program, the occurrence of a gain or loss on an FCF transaction is an expected, normal component of an obligation; therefore, treat as an ordinary event. Record the gain or loss on an FCF transaction using current USSGL accounts for Other Gains (USSGL account 719000) and Other Losses (USSGL account 729000).

2.3.2. OUSD(C) must approve all amounts transferred from this appropriation to other appropriations available for construction.

2.4 Standards

2.4.1. The FCF, D and FCF, C, D appropriations are not available to finance cost increases resulting from changes in the scope of programs, inflation increases, or other such changes, nor to finance Prompt Payment Act interest payments. Other important provisions of the FCF appropriations relate to obligation/expenditure limitations and financial accounting requirements related to foreign currency exchange fluctuation.

2.4.1.1. Authorizations or limitations now or hereafter contained within appropriations or other provisions of law limiting the amounts that may be obligated or expended
will be increased to the extent necessary to reflect fluctuation in foreign currency exchange rates from those used in preparing the applicable budget submission.

2.4.1.2. Contracts or other obligations entered into that are payable in foreign currencies may be recorded as obligations based on currency exchange rates used in preparing budget submissions, as amended by Congress, and adjustments to reflect fluctuation in such rates will be recorded as disbursements are made.

2.4.2. Funds transferred from the FCF appropriation CMAs will be available for funding accounts established within the applicable O&M, construction, family housing, or NATO infrastructure appropriations to cover losses or account for gains in direct programs due to fluctuation in foreign exchange rates. Base these transfers on need, funds available to cover such losses DoD-wide, and other budgetary considerations. Consequently, such losses may not be fully funded.

2.4.3. The DoD Components will record foreign currency obligations at the installation level in dollars, at the budgeted rate, or at the congressionally established budget exchange rate for direct program of affected appropriations as reflected in applicable committee reports or the appropriate appropriation acts.

2.4.3.1. OUSD(C) will provide these rates to the DoD Components.

2.4.3.2. Foreign currency obligations are those obligations that are either payable in specified foreign currency or payable in dollars, the amount of which is determined by the rate of exchange.

2.4.3.3. When payment is made, charge the variance between the budget rate and the current rate directly to the applicable FCF account. If the transaction results in a gain, credit the FCF account in the amount de-obligated from the original FCF, C, D obligation. For example, a military construction project was included in the FY 2017 President’s Budget (PB). Funds for the project were obligated in FY 2018 using FY 2017 funds, and all the project expenditures disbursed in FY 2019. In this example, record the obligations in the accounting system using the FY 2017 budget rates. There would be no effect on the military construction FCF account prior to FY 2019 since no disbursements were made until FY 2019. The foreign currency reports in each of those years, however, would identify accrued variances, i.e., the differences between the project obligations carried at the FY 2017 budget rate and the project obligations valued at the current exchange rate. Use this accrued variance to identify the projected disbursement requirements of the component FCF account. The realized foreign currency variance would be recorded against the military construction FCF account for FY 2017 at the time of the actual disbursements.

2.4.4. The Defense Finance and Accounting Service (DFAS) Service Component central accounting activities will determine the total foreign currency unliquidated obligations at the budget exchange rate provided by OUSD(C) for each appropriation, and identify and accumulate both favorable and unfavorable variances. The supporting activity will also determine the “accrued variance” at the end of each month based on the difference between unliquidated
obligations at the budget rate and unliquidated obligations at the current rate, using the exchange rate on the last day of the month. The accrued variance will never be obligated in the official accounting documents.

2.4.5. Each DoD Component holding an FCF account is responsible to establish internal controls and carefully monitor funds availability at all times, as Antideficiency Act provisions apply to each FCF account. Establish controls to reserve sufficient funds within the appropriation’s availability to finance projected disbursement requirements for the FCF account. For family housing and construction, a 6-month requirement is recommended. Should FCF account funding availability drop below that level, take immediate action to avoid over-obligation. Such action will include providing additional funds from current accounts and, if necessary, advising all disbursing officers to cease payments from the FCF account without prior certification until funding is obtained. Do not take any action that presumes relief through a transfer of funds from the FCF appropriations because of the limited capital available in these accounts.

2.4.6. OUSD(C) publishes a monthly report of specific currencies in the FCF program and associated exchange rates. OUSD(C) may add and remove currencies as conditions warrant. The OUSD(C) Financial Management Reports site provides FCF reports that contain the list of currencies, the applicable budget rate, and the current period adjusting rate.

3.0 REPORTING REQUIREMENTS

3.1 Appropriation Transfers

OUSD(C) manages the FCF, D and FCF, C, D appropriations and instructs the DFAS Departmental Reporting Directorate-Indianapolis on the amount of the funds to transfer to and from the applicable appropriations. DFAS-Indianapolis transfers the designated amounts by means of a Standard Form 1151, Nonexpenditure Transfer Authorization.

3.2 General Reporting Guidance

3.2.1. Other than calculating the monthly accrued variance described in subparagraph 2.4.4., no further adjustment to the original obligation is necessary until disbursement is made or until the appropriation is closed.

3.2.2. FCF requirements described in this chapter do not apply to reimbursable programs. The performing activity will continue to accept reimbursable orders, incur obligations, and bill for reimbursement at the current foreign currency exchange rate using the requirements found in Volume 11A, Chapter 1. However, when the performing activity and the benefiting activity are DoD organizations, the performing activity will notify the benefiting activity of the amounts obligated that require payment in foreign currency. The benefiting activity will record that portion of its obligation for direct programs at the budget rate in the manner prescribed in subparagraph 2.4.3. Record the realized variance determined at the time of the disbursement in the respective FCF account of the benefiting activity.
3.2.3. Do not adjust normal operating budgets or other funding documents issued for the affected appropriations by DoD Components for foreign currency exchange rate fluctuation.

3.2.4. Prior to closing the financial records at year-end, each component holding an FCF account will review the status of that account. Transfer net gains in an FCF account to the applicable FCF appropriation. Components will also determine the portion of the losses that the FCF account can absorb and transfer to the FCF appropriation any remaining balances that are not required.

3.2.5. FCF requirements described in this chapter do not apply to Gains and Deficiencies on Exchange Transactions, Army (TAS 21 6763 and TAS 021 6763); Gains and Deficiencies on Exchange Transactions, Navy (TAS 17 6763 and TAS 017 6763); Gains and Deficiencies on Exchange Transactions, Air Force (TAS 57 6763 and TAS 057 6763); and Gains and Deficiencies on Exchange Transactions, Treasury (TAS 20 6763 and TAS 020 6763). Volume 5, Chapter 4 provides guidance regarding deficiencies. See Volume 5, Chapter 13 for guidance regarding gains and losses by revaluation.

3.2.6. FCF requirements described in this chapter do not apply to Burdensharing funds received from other countries. See Volume 12, Chapter 24 for guidance regarding Burdensharing funds.

3.3 Report Error Correction

Service components and OUSD (Personnel & Readiness) (OUSD(P&R)) Military Compensation Policy are responsible for ensuring the completeness and accuracy of monthly report submissions to DFAS Departmental Reporting Directorate-Indianapolis. DFAS forwards the consolidated reports to the Office of the Deputy Comptroller (Program/Budget) (ODC(P/B)), OUSD(C), which also conducts a review of submitted reports for completeness and accuracy. ODC(P/B), OUSD(C) will notify the applicable data submitter if data correction is required. The applicable data submitter is responsible for data correction and resubmission through DFAS Departmental Reporting Directorate-Indianapolis to ODC(P/B), OUSD(C).

4.0 REPORTING FORMATS

4.1 Department of Defense Comptroller (Monthly) (DD-COMP (M)) 1506 – Foreign Currency Fluctuations, Defense Report (O&M)

4.1.1. DFAS Departmental Reporting Directorate-Indianapolis is responsible for submitting the consolidated monthly report to the ODC(P/B), OUSD(C).

4.1.2. The DFAS Service Component central accounting activities, DoD Education Activity (DoDEA), Defense Security Cooperation Agency, Defense Health Agency (DHA), and Defense Media Activity will provide a monthly report to DFAS Departmental Reporting Directorate-Indianapolis using the format in Figure 7-1.
4.1.2.1. Submit the report in accordance with due dates established by DFAS-Indianapolis and consistent with the requirements of OUSD(C).

4.1.2.2. The report will include the following:

4.1.2.2.1. **Column 1 – Currency/Submitter.** Alphabetically list the specified country. Include the official currency (monetary unit) next to each country.

4.1.2.2.2. **Column 2 – Unliquidated Obligations.** Enter the dollar amount of foreign currency unliquidated obligations at the budget rate. Derive this amount by taking the obligations incurred at the budget rate less the disbursements at the budget rate.

4.1.2.2.3. **Column 3 – Accrued Variances.** Enter the accrued variances for the unliquidated obligations shown in column 2. This amount may change from month to month as the current foreign currency exchange rate changes and/or as the amount of unliquidated obligations changes.

4.1.2.2.4. **Column 4 – Liquidated Obligations.** Enter the dollar amount of foreign currency obligations liquidated in the accounting system at the budget rate of the foreign currency cited within the obligating document.

4.1.2.2.5. **Column 5 – Realized Variances.** Enter the actual dollar amount of the variance resulting from liquidated obligations to date. This amount represents the variance (difference) between obligations at the budget rate and amounts actually disbursed.

4.1.2.2.6. **Column 6 – Obligations Incurred.** Enter the dollar amount of total foreign currency obligations incurred to date at the budget rate. Compute this amount from actual accounting data of obligations incurred at the budget rate. It will not be a derived number.

4.1.2.2.7. **Column 7 – Planned Overseas Program.** The planned overseas program for execution at the budget rate should agree with the current year (CY) column of the Exhibit PB-18 (Foreign Currency Exchange Data). Volume 2B, Chapter 19 contains the format for Exhibit PB-18, which is required to support the PB request for the budget year. Explain any increases or decreases to the planned overseas program during the execution of the CY by country in the monthly report.

4.1.2.3. The report will also include footnotes showing:

4.1.2.3.1. The total funding provided to the FCF account by source including:

4.1.2.3.1.1. Transfers from the FCF, D appropriation;

4.1.2.3.1.2. Transfers from the component's O&M availability; and

4.1.2.3.1.3. Total FCF account funding;
4.1.2.3.2. The anticipated gains or losses for the remainder of the FY. Estimate the anticipated gains or losses on projected disbursements to the end of the year by computing the variance that would occur if the current foreign currency exchange rates were to remain in effect during the remainder of the year;

4.1.2.3.3. Transfers to FCF, D due to favorable realized variances;

4.1.2.3.4. Projected liquidations (budget rate) for the FY. Estimate the obligations (budget rate) that will be disbursed during the FY; and

4.1.2.3.5. An explanation of deviations from planned overseas program by country. This is required when substantial variances from the “obligations incurred” column exist. This explanation can occur any time prior to the canceling of funds.

4.2 FCF, D Report (MILPERS)

4.2.1. Foreign currency rate variances increase or decrease the value of allowances paid to service members. To maintain the value of that portion of allowances members receive to purchase foreign currency, adjust allowances to offset increases or decreases in foreign currency rates. For purposes of FCF, D transfers, the calculated effect on MILPERS disbursements that result from changes in foreign currency rates (foreign currency variance) is the difference in dollars required for the allowance at budget exchange rates and the current allowance rates. However, FCF, D transfers are approved only for Cost-of-Living Allowances (COLA) and Overseas Housing Allowances (OHA).

4.2.2. DFAS Departmental Reporting Directorate-Indianapolis is responsible for submitting this consolidated monthly report to the ODC(P/B), OUSD(C).

4.2.3. The process for identifying the foreign currency impact on COLA and OHA is as follows:

4.2.3.1. Identify total expenditures by the Military Departments for COLA and OHA by officer and enlisted for the country currencies included in the FCF, D account.

4.2.3.2. OUSD(P&R) Military Compensation Policy will report to the DFAS Service Component central accounting activities the appropriate COLA and OHA index based on current exchange rates. For FCF, D, OUSD(P&R) Military Compensation Policy will also report COLA and OHA indices based on the budget exchange rates.

4.2.3.3. DFAS Service Component central accounting activities will access affected personnel pay accounts and identify the COLA and OHA disbursements, by officer and enlisted, according to designated location codes.

4.2.3.4. DFAS Service Component central accounting activities will calculate the foreign currency impact by estimating the differences between budget exchange rates and current exchange rates applied to the total expenditures for COLA and OHA.
4.2.3.5. Consolidate foreign currency amounts and identify the remaining expenditures for the end-of-month recorded disbursements.

4.2.4. The COLA foreign currency report format structure is:

4.2.4.1. Service,

4.2.4.2. Country (FCF, D country),

4.2.4.3. Budget Rate,

4.2.4.4. COLA Rate,

4.2.4.5. COLA Code,

4.2.4.6. COLA Code Change Indicator,

4.2.4.7. Budget Index,

4.2.4.8. Allowance Index,

4.2.4.9. COLA Factor,

4.2.4.10. Actual COLA Enlisted Disbursement,

4.2.4.11. Budgeted COLA Enlisted Amount MILPERS Appropriation,

4.2.4.12. COLA Realized Variance Enlisted,

4.2.4.13. Actual COLA Officer Disbursement,

4.2.4.14. Budgeted COLA Officer Amount MILPERS Appropriation,

4.2.4.15. COLA Realized Variance Officer,

4.2.4.16. Actual COLA Officer/Enlisted Disbursement Total,

4.2.4.17. Budgeted COLA Officer/Enlisted Amount MILPERS Appropriation Total, and

4.2.4.18. COLA Realized Variance Officer/Enlisted Total.

4.2.5. The OHA foreign currency report format structure is:

4.2.5.1. Service,
4.2.5.2. Country (FCF, D country),

4.2.5.3. Budget Rate,

4.2.5.4. OHA Rate,

4.2.5.5. OHA Factor,

4.2.5.6. Actual OHA Enlisted Disbursement,

4.2.5.7. Budgeted OHA Enlisted Amount MILPERS Appropriation,

4.2.5.8. OHA Realized Variance Enlisted,

4.2.5.9. Actual OHA Officer Disbursement,

4.2.5.10. Budgeted OHA Officer Amount MILPERS Appropriation,

4.2.5.11. OHA Realized Variance Officer,

4.2.5.12. Actual OHA Officer/Enlisted Disbursement Total,

4.2.5.13. Budgeted OHA Officer/Enlisted Amount MILPERS Appropriation Total, and

4.2.5.14. OHA Realized Variance Officer/Enlisted Total.

4.2.6. Report the following information by OUSD(P&R) Military Compensation Policy and use it to prepare the monthly COLA and OHA foreign currency execution reports:

4.2.6.1. **Column A – Country.** This column lists the budget countries subject to FCF, D requirements.

4.2.6.2. **Column B – Budget Rate.** This column identifies the FY budget exchange rates as set by OUSD(C).

4.2.6.3. Column C – COLA Rate. This column identifies the current market exchange rate upon which both COLA and OHA are set (allowance rate).

4.2.6.4. **Column D – COLA Code.** For countries with multiple COLAs, many locations are linked and receive the same index. This code identifies linked locations for COLA purposes.

4.2.6.5. **Column E – COLA Code Change Identifier.** This column identifies whether a change has been made this period to the COLA Code.
4.2.6.6. **Column F – Budget Index.** This column represents the COLA index based on budget rate.

4.2.6.7. **Column G – Allowance Index.** This column represents the COLA index based on allowance rate.

4.2.6.8. **Column H – COLA Factor.** This column represents the multiplication factor for COLA disbursements based on budget and allowance indices.

4.2.6.9. **Column I – OHA Factor.** Compute the balance for this column by taking the budget rate minus the OHA rate divided by OHA rate.

4.3  **DD-COMP (M) 1761 – Foreign Currency Fluctuation, Construction, Defense Report**

4.3.1. DFAS Departmental Reporting Directorate-Indianapolis is responsible for submitting this consolidated monthly report to ODC(P/B), OUSD(C).

4.3.2. The DFAS Service Component central accounting activities, DoDEA, DHA, Defense Logistics Agency, and U.S. Special Operations Command will provide a monthly report to the DFAS Departmental Reporting Directorate-Indianapolis using the format in Figure 7-2.

4.3.2.1. Submit the reports in accordance with due dates established by DFAS-Indianapolis and consistent with the requirements of OUSD(C).

4.3.2.2. The report will include the following:

   4.3.2.2.1. **Column 1 – Country.** Alphabetically list the specified country.

   4.3.2.2.2. **Column 2 – Monetary Unit.** Enter the monetary unit of the country.

   4.3.2.2.3. **Column 3 – Foreign Currency Unliquidated Obligations.** Enter the dollar amount of unliquidated obligations at the budget rate. Report unliquidated obligations by FY.

   4.3.2.2.4. **Column 4 – Accrued Variance.** Enter the accrued variance for the unliquidated obligations in column 4. This amount may change from month to month as the current foreign currency exchange rate changes. Report accrued variances by FY.

   4.3.2.2.5. **Column 5 – Foreign Currency Liquidated Obligations.** Enter the dollar amount of total obligations liquidated for the report month at the budget rate.

   4.3.2.2.6. **Column 6 – Realized Variance.** Enter the actual dollar amount of the variance resulting from liquidated obligations for the month. This amount represents the variance (difference) between obligations at the budget rate and the amount actually disbursed. Charge all realized variances against the applicable FCF accounts for construction, military family housing operations and maintenance, and military family housing construction.
4.3.2.7. **Column 7 – FCF Account Projected 6-Month Disbursements.** Enter the projected 6-month disbursements from the FCF accounts based on historical outlay data, contract requirements, and payment schedules.

4.3.2.3. The report will also include footnotes showing:

4.3.2.3.1. The anticipated gains or losses for the rest of the FY (estimate this figure by computing the variance that would occur if the present currency exchange rates were to remain unchanged during the remainder of the FY); and

4.3.2.3.2. The total amount of funding transferred to the FCF accounts from the FCF, C, D appropriation.

CHAPTER 9
ACCOUNTING AND REPORTING FOR OPERATION AND MAINTENANCE OF THE FAMILY HOUSING PROGRAM

1.0 GENERAL (0901)

1.1 Overview (090101)

This chapter provides accounting support for Family Housing Operation and Maintenance (O&M) requirements and prescribes an accounting structure that accumulates Family Housing O&M costs consistent with guidance set forth in Volume 2B, Chapter 6. Congress established the Family Housing O&M appropriation to separate the funding of Family Housing O&M from other O&M programs. Charge all obligations incurred for O&M to support the military Family Housing Program to the Family Housing O&M appropriation.

1.2 Purpose (090102)

The purpose of the account structure is to provide uniform procedures for consistently identifying, accumulating, and reporting family housing program costs. It is important that methods for computing costs for the Family Housing Program are as uniform as practicable among the Department of Defense (DoD) Components. Such uniformity is essential to permit intra-DoD and inter-DoD Component program, budget, and cost comparison, irrespective of the management service, the agency, or the accounting system used at the installation. Cost identification and computation methods specified herein should minimize the accounting effort and detail required to compute costs. Costs for operating and maintaining family housing facilities must be identified as prescribed in this chapter and are the basis for reports referenced herein.

1.3 Authoritative Guidance (090103)

The Family Housing Program encompasses Military Family Housing, as defined and authorized by the provisions of Title 10, United States Code (U.S.C.), Chapter 169, and includes all DoD Component family housing in the Defense Family Housing Property Account, leases of real property utilized by DoD Components for family housing, and associated family housing support services programs. The policies prescribed throughout this chapter, pertaining to the accounting and reporting for O&M costs of the Family Housing Program, are based upon 10 U.S.C., Chapter 169 and the laws and regulations cited herein.

*2.0 SCOPE (0902)

This policy applies to all DoD Components that support military family housing under the Family Housing Program. Military Departments’ Housing Privatization support costs associated with the Military Housing Privatization Initiative (MHPI) Program, such as assessments/studies; portfolio, program, and asset management; construction oversight; consultant fees; and other administrative costs, are funded by the Family Housing O&M appropriation and fall within the
parameters of this policy. The Office of the Assistant Secretary of Defense for Sustainment (OASD(S)) and Defense Finance and Accounting Service (DFAS) MHPI Program administrative support costs are separately budgeted, accounted for, and reported in the Defense-wide Family Housing Improvement Fund (FHIF) and Military Unaccompanied Housing Improvement Fund (MUHIF) Program accounts.

3.0 ACCOUNT STRUCTURE AND CONTENT (0903)

3.1 Accounts Used for Accumulating Costs (090301)

A series of accounts has been established and maintained for accumulating Family Housing O&M costs incurred and reimbursements earned through the Family Housing Program. Compute and identify costs and reimbursements to the accounts in accordance with the guidance herein. Use the accumulated costs and reimbursements in the accounts to support budget exhibits and budget execution reports.

3.2 Required Summary and Subordinate Accounts (090302)

The following is a list of required summary and subordinate accounts.

3.2.1 Operations Account

3.2.1. Management Account. This account accumulates costs of management, administrative, and support-type services at the installation level involving:

3.2.1.1. Administration costs for installation housing offices, including management office personnel, supplies, equipment, and utilities pertaining to the functions of a family housing office. These costs also include administrative support services provided in supply, comptroller, maintenance, and other installation offices when the costs for such services are attributable to family housing;

3.2.1.2. Costs for administering and providing housing referral services and assistance in locating and inspecting privately-owned family housing for DoD personnel;

3.2.1.3. Costs for requirements surveys and preliminary studies, including Family Housing market analyses, condition assessments, survey requirements for construction plans, and concept development. This account also includes community liaison and planning for improvement and rental guarantee projects and inspection; and

3.2.1.4. Other identifiable management costs that directly support the Family Housing Program.

3.2.1.2. Services Account. This account accumulates costs for authorized services for Government-owned family housing units. For privatized housing, the developers are financially responsible for the reimbursement or payment of services provided.
3.2.1.2.1. Refuse Collection and Disposal. These services include collecting garbage, trash, ashes, debris, and refuse disposal for family housing, such as the O&M of incinerators, sanitary fills, and regulated dumps. These services also include acquisition, maintenance, and repair of garbage and trash containers, and operation of can-washing facilities.

3.2.1.2.2. Fire Protection. This service includes costs for protection and fire prevention efforts for family housing facilities.

3.2.1.2.3. Police Protection. This service includes the costs for law enforcement, traffic control, and protection of family housing facilities.

3.2.1.2.4. Entomological Services. These services include costs of all control measures against fungi, insects, and rodents within family housing dwellings, facilities, and areas.

3.2.1.2.5. Custodial Services. These services include costs of janitorial and custodial services performed in common service areas and the cost of elevator operation in family housing facilities.

3.2.1.2.6. Snow Removal. This service includes the costs of removing, hauling, and disposing of snow; ice alleviation; and erection, maintenance, repairs, and removal of snow fences for family housing areas.

3.2.1.2.7. Street Cleaning. This service includes the costs of cleaning streets comprised of sweeping, flushing, and picking up litter.

3.2.1.2.8. Municipal Type Services. These services include costs of miscellaneous municipal type services not identifiable to other listed accounts.

3.2.1.2.9. Other Services. The costs of all other authorized services for family housing fall into this category.

3.2.1.3. Furnishings Account. This account accumulates costs for initial acquisition, maintenance, repair, and replacement of furnishings, furniture, movable household equipment, and authorized miscellaneous items. This account also includes costs of controlling, handling, record keeping, and moving of Government-owned furnishings into and out of dwelling units; charges for connecting and disconnecting equipment; and handling costs incident to storage. Also included are furnishings for Special Command Positions and Senior Leadership as prescribed in DoD Manual 4165.63, “DoD Housing Management.”

3.2.1.4. Miscellaneous Account. This account accumulates costs of operational items that do not fall into management, services, or furnishings accounts. This account includes:

3.2.1.4.1. Lease, rents, and permit payments for housing and trailer spaces leased by the Government from private sources or provided by the Federal Housing Administration (FHA) or the U.S. Department of Veterans Affairs (VA);
3.2.1.4.2. Reimbursement costs for dwellings provided by State (e.g., International Cooperative Administrative Support Services), municipal, or foreign governments, or by Federal agencies other than the FHA or VA. This includes payments from the Military Departments to the U.S. Coast Guard for family housing provided to their military personnel;

3.2.1.4.3. German land taxes paid to the Federal Republic of Germany under the North Atlantic Treaty Organization Status of Forces Agreement for local taxes on land and improvements of family housing property;

3.2.1.4.4. Fire insurance charges paid to the Federal Republic of Germany to cover fire damage to family housing dwelling units;

3.2.1.4.5. United Kingdom accommodation charges paid in accordance with the country-to-country agreement for housing provided to U.S. Forces; and

3.2.1.4.6. Other miscellaneous operations costs not covered elsewhere.

3.2.2. Utility Account. This is a summary account for accumulating costs for utilities consumed in family housing, including electricity, water, sewage, natural gas, fuel oil, or other heating fuels. This account excludes the costs of maintenance and repair of utility systems identified to the family housing property covered under the Maintenance Account. Exclude other costs reported as “Services” from the utility operations account.

3.2.3. Maintenance Account

3.2.3.1. Dwellings Account. This account accumulates costs of maintenance and repair, including all interior utilities and installed equipment, of all family housing buildings in real property category codes 711, 712, and 714, as defined in the DoD Real Property Categorization System, which is established by DoD Instruction 4165.03, “DoD Real Property Categorization.” Typically, accumulating costs for this account involves:

3.2.3.1.1. Service calls for minor work, including emergency and temporary repairs normally not in excess of 16 work hours;

3.2.3.1.2. Routine maintenance for occupancy work and other maintenance usually scheduled annually or more frequently;

3.2.3.1.3. Repairs and replacements for rehabilitations and replacement of major components and installed equipment;

3.2.3.1.4. Interior and exterior painting and the necessary preparation; and

3.2.3.1.5. Contract cleaning between occupancy, where authorized.
3.2.3.2. Exterior Utilities Account. This account accumulates costs of maintenance and repair of electric, gas, water, sewage, and other utility distribution, collection, or service systems assigned to family housing. Street and area lighting systems are included in exterior utilities beginning at a point 5 feet from the house line and ending at a point where the utility system joins a common use main or terminates.

3.2.3.3. Other Real Property Account. This account accumulates costs for maintenance other than to dwellings and exterior utilities, including:

- 3.2.3.3.1. Maintenance, care, and repair of improved and unimproved grounds, storm sewerage, and drainage structures; and costs of acquisition, maintenance, and repair of Government-owned minor equipment, such as hand-operated lawnmowers used for grounds maintenance by occupants;

- 3.2.3.3.2. Maintenance and repair of paved or stabilized streets, roads, walks, and driveways; utility, service, and parking areas, as well as curbs, gutters, signs, and other road appurtenances; and

- 3.2.3.3.3. Maintenance and repair of facilities other than dwellings, such as fences when the facility is dedicated to housing, athletic and recreation facilities, community buildings, service facilities, and the costs of maintenance of trailer sites including outlets.

3.2.3.4. Alterations and Additions Account. This account accumulates costs for incidental additions, expansions, extensions, and alterations to existing real property. These costs include payments made to military personnel for telephone reconnection charges when maintenance or repair work necessitates Government-directed, nonpermanent change-of-station moves, and charges resulting from improvement or repair projects funded in part from the family housing construction account.

3.2.4. Leasing Account

3.2.4.1. Lease Cost – Foreign Account. This account accumulates costs for charges and other payments specified in the lease agreement for housing in foreign countries under 10 U.S.C., section 2828.

3.2.4.2. Lease Cost – Foreign Account Government Rental Guarantee Program (GRGP). This account accumulates costs for charges and other payments specified in the lease agreement for housing in foreign GRGPs (e.g., Europe under the Army GRGP programs).

3.2.4.3. Lease Cost – Domestic Account. This account accumulates costs for charges and other payments specified in the lease agreement for housing in the United States, including U.S. possessions and territories, as specified in 10 U.S.C. § 2828.

3.2.4.4. Lease Cost – Section 2835 Account. This account accumulates costs for charges and other payments specified in the lease agreement for 10 U.S.C. § 2835 housing contracts
for the lease of facilities on or near military installations, essentially a build-to-lease guarantee to a local property developer.

3.2.4.5. Rental Guarantee – Section 2836 Account. This account accumulates costs accounted for under rental guarantees for a minimal occupancy rate or rental income for 10 U.S.C. § 2836 housing. This program allows the DoD Components to enter into lease agreements guaranteeing that tenants occupy rental housing on or near installations.

3.2.4.6. Other O&M Cost. This series of accounts accumulates costs for maintenance, utilities, and contracted services not provided by the lessor for foreign, GRGP, domestic, and 10 U.S.C. § 2835 and § 2836 housing. They include initial make-ready costs, costs of Government-owned furnishings, any pro rata share of the costs of installation services, and administrative costs, such as assignment, travel, and inspection by installation personnel. Reimbursements to the Department of State for foreign affairs administrative support costs are also included.

3.2.5. Mortgage Insurance Premiums Account. This is a summary account for accumulating the costs for service members’ mortgage insurance premium payments pursuant to 12 U.S.C. § 1701, also referred to as the “National Housing Act.” See Volume 2B, Chapter 6 for more guidance.

3.2.6. Foreign Currency Fluctuations Account. This is a summary account for accumulating the gains or losses arising from foreign currency exchange rate fluctuations in accordance with the requirements in Chapter 7.

3.2.7. Reimbursements Account. This is a summary account for accumulating reimbursements collected during the current fiscal year for Family Housing O&M rental and service charges billed to occupants and for proceeds from handling or disposing of excess housing property. Identify reimbursements for Foreign Military Sales (FMS)-funded and Non-FMS-funded accounts separately.

3.2.7.1. FMS-Funded Account. This account accumulates all reimbursements from FMS-funded activities or sources. Identify the amounts within the account as to the nature of the reimbursements, for example, recovery of the costs of operations, utility operation, maintenance of real property facilities, or proceeds from property handling or disposal.

3.2.7.2. Non-FMS-Funded Account. This account accumulates reimbursements from other than FMS-funded activities or sources. Identify the amounts within the account as to the nature of the reimbursements, for example, recovery of the costs of operations, utility operation, maintenance of real property facilities, or proceeds from property handling or disposal.

3.2.8. Housing Privatization Support Account. Use this account for accumulating costs the Government incurs in direct support of the MHPI program with the exception of the costs included as part of the privatization project. These costs are associated with the support of the MHPI program and specifically for:
3.2.8.1. Site assessment costs, including environmental baseline assessments, environmental assessments, environmental impact statements, and any efforts required by the Government prior to privatization for environmental mitigation, site surveys, or real estate costs;

3.2.8.2. Project costs, including project feasibility studies, concept development, consultant fees, solicitation, procurement, contracting, execution, transition, construction management, post-award management and monitoring, and portfolio management; and

3.2.8.3. Administrative costs, including civilian pay, travel, training, supplies, equipment, and services provided by a Defense agency in support of the privatization program.

4.0 COST IDENTIFICATION PROCEDURES (0904)

4.1 Obligations Incurred (090401)

The DoD Components must identify the obligations incurred, both in-house and by contract, to operate and maintain family housing programs.

4.2 Identifiable and Measurable Costs (090402)

Charge costs to the applicable family housing account to the extent they are reasonably identifiable and measurable to the housing program. This practice does not prevent the use of engineered standards or estimates in charging utilities when metering devices are not used.

4.3 Obligations for Administrative Costs (090403)

Limit obligations incurred for administrative support and supervision efforts to those incurred at installation level and do not include those incurred at echelons of command above the installation. An exception is made when amounts for administrative support and supervision are included in charges assessed by a field office of a construction agent.

4.4 Criteria for Support Costs (090404)

Assign other efforts, goods, or services provided to family housing programs to appropriate family housing accounts based on relative workload, benefit, or other measurement. Use the following general criteria in assigning support costs to the Family Housing Program:

4.4.1. When the support provided is predominantly personnel-intensive, costs must be allocated based on a pro rata basis of workload or actual costs, whenever possible. This would include collateral duty management assignments involving command or policy determinations related to personnel, financial management, legal, procurement, or similar areas;

4.4.2. When the support provided has a mix of personnel, equipment, materials, or supplies, allocate costs based on workload (e.g., printing or reproduction services or computer support involving a mix of resources) or actual costs, whenever possible. Use the proportion of workload...
for the Family Housing Program to the total workload to compute the portion of the total costs identified to the Family Housing Program; and

4.4.3. When the support provided predominantly involves specific goods or services (e.g., electricity, gas, water, or sewer), allocate costs based on the relative amount consumed or quantity used or actual costs, whenever possible.

4.5 General or Flag Officers Costs (090405)

When a set of quarters is intended for or occupied by officers of General or Flag rank, identify the costs accumulated for the O&M of each set of quarters within the accounts specified in this chapter and reported in accordance with the requirements prescribed by the OASD(S).

4.6 Costs Identified to the Family Housing Program (090406)

When identifying Family Housing O&M costs to the program, the general premise is to assign all applicable costs. When an incidental level of effort, supplies, or services are provided on a nonrecurring basis, costs need not be identified to the program if they are insignificant and it is not cost effective to measure and assign the costs. As a general rule, cost identification is necessary when the support is more than incidental.

4.7 Installation Managers Responsibility (090407)

Installation management officials, such as the installation commander, public works officer, housing director, or comptroller, are responsible for identifying the O&M costs for the Family Housing Program, whether funded by Family Housing O&M or other appropriations. Installation managers must periodically review manning standards, workload and consumption methods, and other factors used to identify efforts in support of the program. When variances occur in efforts, workload, or other resources consumed, reset the basis of allocating such costs to the program. Management must also review charges to the accounts specified herein to ensure that none have been inadvertently omitted or erroneously included.

5.0 COST ELEMENTS AND COMPUTATION OF CHARGES (0905)

5.1 Full Absorption Basis (090501)

Charge costs to the program in proportion to the actual efforts used, goods consumed, or services received by the Family Housing Program. Fully charge dedicated efforts or responsibilities for the program. For example, charge total costs for full-time management and staff to the Family Housing Program. Compute and expense all costs of providing program support to the program on a full absorption basis, i.e., full cost for dedicated support and pro rata cost for other support.

5.1.1. Apply the normal business fund overhead rates to family housing support for Defense Working Capital Fund (DWCF) real property maintenance activities, which have a primary mission of facility maintenance.
5.1.2. Apply the applicable rate to direct work or service in support of family housing for other funded real property maintenance activities with established shop or productive expense rates.

5.2 Labor Costs (090502)

Compute the labor effort of military or civilian personnel assigned and identified to family housing for pay and benefits using a labor distribution system, if available, or the guidance in Volume 11A, Chapter 1. Review and validate personnel efforts annually to support charges to family housing. Accumulate and classify military labor as an unfunded cost within the account structure since the cost is not a reimbursable charge to the program.

5.3 Material and Supplies Costs (090503)

Compute costs for material and supplies based upon the relative or actual amount consumed, or the quantity used. Compute material and supplies at acquisition price if directly (locally) purchased or at standard inventory price if issued through the supply system.

5.4 Costs of Services (090504)

Compute and charge, upon receipt, services provided by Government forces or contractors, such as refuse collection and disposal, entomological, and custodial activities. Family housing must bear the full cost of these services when it is the sole customer. Charge a partial cost to family housing when the family housing portion of such services is readily separable and distinct. When the service operation is too intertwined or complex to enable ready identification of proper family housing costs, charge costs to family housing based on the proportionate amount of service received on a unit-of-service basis, such as number of refuse pickups or square feet of floor area receiving custodial service.

5.5 Utility Costs (090505)

Compute utility costs based upon consumption. All DWCF-funded activities providing utilities must compute the charges consistent with their normal procedures. All other activities must compute the charge to family housing at the rate the utility is purchased from the supplier. If not metered, then base consumption on documented engineering estimates.

5.6 Equipment Usage Costs (090506)

Compute equipment usage costs for rented property at the lease or rental rate. Limit cost computation in the case of Government-owned equipment to the expenses of operating and maintaining the equipment and charges for the operator’s time when provided by other than family housing. Do not compute acquisition costs or periodic depreciation charges.
5.7 Unfunded Costs (090507)

Treat military labor and headquarters costs, included in construction agent administrative support and supervision effort above the installation level, as unfunded costs in computing Family Housing O&M costs.

6.0 REIMBURSEMENTS (0906)

6.1 FMS-Funded and Non-FMS-Funded Accounts (090601)

Use FMS-funded and non-FMS-funded accounts to accumulate reimbursements for charges initially financed by the Family Housing O&M appropriation for the Family Housing Program or proceeds from handling or disposing of family housing property. Record all reimbursements in the family housing reimbursement accounts.

6.2 Reimbursements (090602)

Ordinarily, reimbursements are for rental and service charges paid by occupants or users of family housing facilities. Some collections are refunds that include the costs of repairing damages and replacement of items to family housing facilities.

6.3 Reimbursements for Recovery of Expenses (090603)

Reimbursements involve the recovery of expenses for handling and disposing of excess family housing property as well as the proceeds from sales of such property. Collections are used for various purposes, such as defraying O&M expenses or the payment of debt. Volume 2B, Chapter 6 provides policy guidance governing such collections, use, and reporting.

7.0 INTERNAL CONTROL (0907)

Management must develop and implement internal control techniques to ensure effective control over and accountability for the resources charged to this program and for the full and prompt receipt of all proceeds from reimbursements for rents, service charges, and disposal or handling of excess family housing property.

8.0 REPORTING (0908)

*8.1 Responsibility of DoD Components (090801)

The DoD Components responsible for operating and maintaining family housing facilities are required to prepare the reports described in this chapter. Administrators of Housing programs under MHPI are required to prepare these reports for the FHIF and MUHIF program accounts. The FHIF and MUHIF Financing accounts, however, require only the Standard Form (SF) 133, Report on Budget Execution and Budgetary Resources.
8.2 Reports (090802)

Data derived from the uniform account structure identified in this chapter must be used when preparing and submitting the following reports.

8.2.1. Appropriation Status by Fiscal Year Program and Subaccounts Report (Accounting Report (Monthly) 1002). The DoD Components must prepare and distribute the report in accordance with the guidance contained in Chapter 4.

8.2.2. SF 133. The DoD Components must prepare and distribute the monthly report for the annual portion of the Family Housing O&M category of the family housing appropriation in accordance with the guidance prescribed in Chapter 4.

8.3 Military Departments/DFAS and Intermediate/Installation-Level Report Requirements (090803)

Reporting requirements for family housing reports at the center/service and intermediate/installation-level are addressed in manuals and instructions published by the individual Services or DFAS central accounting activities.

CHAPTER 13

INTERNATIONAL BALANCE OF PAYMENTS
REPORTING AND ESTIMATING

1.0 GENERAL

Department of Defense (DoD) Components are required to report expenditures and receipts that affect the U.S. International Balance of Payments (IBOP). The IBOP report provides information required by the Department of Commerce and the Department of the Treasury (Treasury) for control of IBOP financial transactions.

1.1 Purpose

This chapter establishes the policies and requirements for the accounting and reporting of DoD international transactions related to U.S. balance of payments data, including grants and credits extended to foreign countries.

1.2 Authoritative Guidance

Authoritative guidance for this chapter is derived from Office of Management and Budget (OMB) Statistical Directive 19: “Reports of the Department of Commerce on International Transactions” (Directive 19). Directive 19 established the IBOP transaction reporting requirements to the Department of Commerce. Reported information is used by the United States in managing balance of trade with foreign nations.

2.0 REPORTING OVERVIEW

2.1 Applicability and Scope

2.1.1. These requirements apply to the OSD, the Military Departments (Army, Navy, Air Force, Marine Corps), Defense Agencies (including the Military Postal Service Agency (MPSA) and nonappropriated fund activities), and DoD Field Activities (hereafter referred to collectively as “DoD Components”). DoD Components are responsible for reporting transactions affecting the IBOP. Each Defense Finance and Accounting Service (DFAS) main site (Indianapolis, Columbus, and Cleveland) is responsible for consolidating the data for the DoD Components and submitting a final report to the Department of Commerce. While DFAS reports a majority of the IBOP data, the Department of Commerce may identify specific information to be reported directly by select DoD components.

2.1.2. The requirements cover all transactions that relate to the IBOP report, including specified data on DoD assets and liabilities abroad and foreign currency transactions, DoD international investments, Foreign Military Sales, transfers of property and services abroad, and foreign grants and credits. This chapter’s requirements apply to all transactions, regardless of payment method (e.g., U.S. dollars, foreign currency, and purchase card) accounted for in any of the following:
2.1.2.1. Expenditures from or reimbursements to U.S. dollar appropriation and fund accounts (general and special funds, public enterprise funds, deposit funds, and trust fund accounts for military and civilian functions);

2.1.2.2. Transfer appropriation accounts including Foreign Military Sales;

2.1.2.3. General fund receipt accounts established by the Treasury for collection of miscellaneous receipts for which the DoD has billing and collecting responsibility;

2.1.2.4. Expenditures or receipts of foreign currencies charged or credited to other than U.S. dollar appropriation and fund accounts (such as DoD Foreign Currency (Foreign Transaction (FT) accounts));

2.1.2.5. Receipts or donations of commodities or services;

2.1.2.6. Transfers under special drawdown authority of the President, Excess Defense Articles (EDA) program, or international treaties;

2.1.2.7. Nonappropriated fund activities, such as commissaries, post exchanges, and officers’ clubs; and

2.1.2.8. All MPSA transactions, such as meters (including Postage Validation Imprinters Sales), stamps, and money orders.

2.2 Report Formats and Rules

The report formats and edit and validation rules for submission are provided in Tables 13-1 through 13-4. Sample formats are shown in Tables 13-5 through 13-7.

2.3 Definitions

2.3.1. Abroad. The term abroad includes all foreign countries and the Panama Canal Commission, but excludes the United States, its possessions, Puerto Rico, Guam, and the U.S. Virgin Islands.

2.3.2. Accommodation Sales. Accommodation sales represent the sale of foreign currencies for dollars to U.S. personnel for their personal use in a foreign country.

2.3.3. Collections. Collections are receipts in currencies (both foreign and U.S.), checks, or other negotiable instruments and net of repayments.

2.3.4. Constructive Delivery. Constructive delivery is the delivery of materiel to a carrier for transportation to the consignee; the delivery of materiel to the customer or the designated forwarder at point of production, testing, or storage; delivery at dockside, at airports, or to a U.S. post office for shipment to the consignee. Completed shipping documents or listings of delivery to the U.S. Post Office provide evidence of delivery.
2.3.5. **Contract.** A contract is any type of agreement or order for procurement of materiel, supplies, and services of any amount including purchase orders, delivery orders, service orders, and similar authorizations.

2.3.6. **Delivery.** Delivery is the performance of services for the customer or requisitioner; the constructive delivery of materiel as defined in subparagraph 2.3.4; or collections for services, transportation, and materiel when they are normally recorded in the billing and collection cycle immediately following performance.

2.3.7. **Foreign Military Sales.** Foreign military sales represent the sale of materiel, supplies, equipment, services, and any other support for cash or credit by a DoD Component to a foreign government or international organization as authorized by the Arms Export Control Act (AECA) of 1976, as amended.

2.3.8. **Foreign Resident.** The term foreign resident is comprised of the government of a foreign country and all its agencies and subdivisions, corporations, and any individuals residing in a foreign country, except for those defined as follows.

2.3.8.1. Consider a corporation a resident of the country in which it is incorporated. Count a subsidiary as a separate corporation and as a resident in the country where it is incorporated. Business offices and branches of U.S. corporations are residents of the countries where they are located. A corporation operating in a foreign country without a subsidiary or foreign business office or branch is a resident of the country in which it is incorporated. A business representative, however, such as the ticket office of a U.S. transportation company or a sales agent, is not considered a foreign business office.

2.3.8.2. An individual, including a retired U.S. citizen, is a resident of the country in which he or she resides, and not the country of his or her citizenship.

2.3.8.3. An international organization with multi-governmental members is not considered a resident of any particular country.

2.3.9. **Gross Pay Foreign Nationals.** The term gross pay foreign nationals is the amount paid to or on behalf of a foreign national citizen or organization, including U.S. contributions to the foreign government, and fees charged by a foreign government under contracts for indirect hire.

2.3.10. **Guaranty Financing.** Guaranty financing includes items associated with the guaranty of private credit by the U.S. Government under the AECA of 1976, as amended.

2.3.11. **Interest.** The term interest includes interest collected on military assistance or foreign military long-term credit, interest collected by finance and accounting officers for short-term deposits made in financial institutions that share in interest remitted to a DoD Component under Guaranty Financing arrangements, and interest on advances to foreign residents.
2.3.12. **Joint Weapons Production and Exchange Agreements.** Joint weapons production and exchange agreements includes both production of military end items by a foreign country or resident with participation by a DoD Component through payment of cash, or the provision in kind of materiel, assemblies, components, or services, and a joint sharing of the end items as determined by the agreement. This includes co-production, cost sharing, exchange agreements, joint production, North Atlantic Treaty Organization (NATO) consortiums, and others as authorized by the AECA of 1976, as amended.

2.3.13. **Military Assistance Grant Aid.** Military assistance grant aid is the provision of any type of assistance in the form of materiel, supplies, equipment, facilities, training, transportation and services, or otherwise by a DoD Component to a foreign government or international organization. The AECA of 1976 and the Foreign Assistance Act (FAA) of 1961 authorize such assistance. These provisions include Foreign Military Financing (FMF), International Military Education and Training (IMET), the Military-to-Military Contact Program, Special Drawdown Authority, the EDA Program, and Building Partnership Capacity (BPC) programs.

2.3.14. **MPSA.** The MPSA is the single DoD point of contact with the U.S. Postal Service (USPS). An agreement between the DoD and the USPS establishes the MPSA as an extension of the USPS abroad and in the continental United States, as applicable.

2.3.15. **Net Pay.** Net pay is the part of gross pay that is given, mailed, or electronically transferred directly to the individual by cash, check, or electronic transfers. This can include paychecks mailed or transferred by a disbursing officer (DO) to any bank or financial institution for credit to the individual account of U.S. personnel stationed abroad. Net pay includes allotment checks for U.S. personnel stationed abroad or in the United States (for dependent support, personal accounts) mailed to a foreign address (including Army Post Offices), Fleet Post Offices (FPOs), and Diplomatic Post Offices (for foreign addressees), but excludes allotment checks mailed to a U.S. address.

2.3.16. **Net Pay U.S. Personnel.** The term net pay U.S. personnel includes earned entitlements (pay and allowances) for U.S. military forces, allowances to enlisted personnel for subsistence, and amounts earned or otherwise payable to U.S. civilian employees. Net pay excludes U.S. contributions (e.g., life insurance, retirement, health benefits, and social security), but includes amounts that may be withheld from personnel for these items or that are allotted to designated individuals or institutions.

2.3.17. **Other Assistance Grant Aid.** The DoD outlays from appropriations or sections of appropriations that specifically support U.S. foreign assistance (as authorized under the FAA as amended and other legislation) are IBOP assistance grant aid. These DoD outlays represent the value of goods and services delivered to foreign individuals, governments, or international organizations under specific U.S. foreign assistance programs that include, but are not limited to: Overseas Humanitarian, Disaster, and Civic Aid, Defense (97X0819); Cooperative Threat Reduction Account, Defense (97X0134); Drug Interdiction and Counter-Drug Activities, Defense (in-country support only of 97X0105); and Overseas Costs for Contingency Operations under section 607 of the FAA (reimbursed by special supplement appropriations).
2.3.18. **Payment.** The term payment includes payment in currencies (both foreign and U.S.), checks, or other negotiable instruments, after net of all refunds.

2.3.19. **Personnel Afloat.** The term personnel afloat includes U.S. personnel whose duty station is aboard ship.

2.3.20. **Progress Payments.** Progress payments are payments made by a DoD Component to a contractor or other supplier on contractual procurement of goods or services as work progresses for delivery on a foreign military sale.

2.3.21. **Real Property Transfer.** Real property transfers are items associated with the conveyance of military real property by a Military Department to a foreign resident or international organization.

2.3.22. **Returns to the United States.** Returns to the United States are the portion of payments to contractors or suppliers that is remitted to the United States, or spent or held in the United States, as the result of procurement of U.S. end products, U.S. services, and transportation on U.S. flag carriers for supply, service, or construction contracts. For rules applicable to the identification and reporting of returns to the United States, see the Defense Federal Acquisition Regulation Supplement (DFARS), section 225.1103(1) and the clause at 252.225-7005.

2.3.23. **U.S. Personnel.** U.S. personnel includes U.S. military forces (active duty and Reserve Components, but excludes retired military personnel) and U.S. civilian employees (civil service, nonappropriated fund, and individual contract hire).

2.4 **Frequency and Distribution**

The IBOP report must be prepared, at a minimum, quarterly and is due to the Department of Commerce no later than 45 calendar days following the end of the quarter. The report may be prepared and submitted monthly if desired based upon system capability. DFAS Operations Directorates will provide specific due dates to their respective DFAS Sites.

2.5 **Policy**

It is DoD policy to operate overseas activities efficiently and effectively, and to reduce the balance of payments impact of these activities, when such reduction is consistent with U.S. national security goals and objectives. To support this policy, the Department maintains a mechanism to manage and control DoD transactions that enter the IBOP. This system provides for:

2.5.1. DoD-wide accounting for and reporting of IBOP transactions;

2.5.2. Evaluation and explanation of DoD IBOP transactions;

2.5.3. Use of uniform criteria, definitions, and requirements to report IBOP transactions; and
2.5.4. Integration of IBOP management and the overall system of management within the Department.

2.6 Responsibilities

2.6.1. Heads of the DoD Components, must:

2.6.1.1. Develop procedures for implementing the reporting requirements;

2.6.1.2. Ensure reports and required data are submitted on time and are complete and accurate; and

2.6.1.3. Identify, for the Department of Commerce, the office responsible for submitting required data and points of contact within respective organizations that can both provide supplemental information on specific IBOP transactions and resolve problems associated with collecting and processing data.

2.6.2. The DFAS Site Directors must:

2.6.2.1. Administer and monitor, as necessary, the reporting requirements for their field reporting offices;

2.6.2.2. Ensure the requirements prescribed are uniformly implemented;

2.6.2.3. Work with other DFAS Sites to provide technical assistance on collecting required data and preparing reports. Each DFAS Site acts as the focal point for the assigned reporting organizations (sites) in providing technical assistance; and

2.6.2.4. Ensure reports are submitted directly to the Bureau of Economic Analysis, U.S. Department of Commerce, and include all data required by Directive 19.

2.7 Reporting Guidelines

2.7.1. Finance and Accounting Data

2.7.1.1. Installation-Level Procedures. The DoD Components and supporting DFAS Sites must accumulate the data on payments and collections made by their respective disbursing activities as an integral part of installation-level requirements. The IBOP reports must include all collection and disbursement data for the period covered by the report.

2.7.1.2. Nonappropriated Funds and MPSA. Accumulate data on nonappropriated funds and MPSA accounts and include them in the quarterly reports.
2.7.2. Codes on Vouchers

2.7.2.1. Codes. Code all payment and collection vouchers processed overseas with the appropriate foreign country or international organization code, as prescribed in Table 13-8 and on the Central Intelligence Agency (CIA) website (see Geopolitical Entities, Names and Codes (GENC) Standard), prior to time of payment or collection. Vouchers processed overseas not entering the IBOP must be coded with the “U.S.” country code.

2.7.2.2. Country Codes. Input country codes on vouchers processed in the United States only for those transactions entering the IBOP. A current list of country codes is available on the GENC Standard (formerly “Federal Information Processing Standards (FIPS) Publication (PUB) 10-4”). Country codes must not be confused with Defense Security Cooperation Agency (DSCA) customer codes. The two codes are not interchangeable.

2.7.3. Coded Authorizations. To ensure that payment vouchers are coded properly to indicate category, procurement of U.S. end products, transportation or services, and country or international organization, authorizations such as purchase orders, delivery orders, and contracts that result in expenditures entering the IBOP must be coded at the time of preparation whenever possible. Enter these same codes on the payment vouchers. When the authorization covers procurements of U.S. end products, transportation, or services, enter the percentage or amounts applicable to each procurement return category. Enter codes on all authorizations for the following types of transactions.

2.7.3.1. Construction and Other Service Contracts, Including Contracts for Scientific and Technical Knowledge to Be Performed Abroad. In all cases where the contract, delivery order, or other procurement document is issued to a U.S. resident, appropriate codes that identify returns to the United States must be included in the accounting classification.

2.7.3.2. Contracts for Procurement of Materiel, Supplies, and Equipment Abroad. When the terms of the contract require the use of U.S. end products, appropriate codes that identify returns to the United States must be included in the accounting classification on all contracts or other procurement documents issued to U.S. residents.

2.7.4. New or Discontinued Appropriations. Each DFAS Site is responsible for modifying their associated tables to reflect new or discontinued accounts that affect IBOP. The Treasury’s Federal Account Symbols and Titles (FAST) Book lists receipt, appropriation, and other fund account symbols and titles assigned by the Department. The FAST Book lists accounts separately that were created or discontinued since the previous revision.

2.7.5. Transaction Review. Review IBOP transactions prior to submission for accuracy to ensure the final report is complete and includes all of the required data elements for submission to the Department of Commerce. The DoD Components, accounting activities, and other reporting entities in the United States and at overseas locations must ensure that reported IBOP transactions are consistent with total transactions reported on the Standard Form (SF) 1220, Statement of Transactions According to Appropriations, Funds, and Receipt Accounts, and supporting SF 1219, Statement of Accountability, including FT accounts.
2.7.6. **Cross-Disbursing.** Under cross-disbursing requirements, the appropriate disbursing office must provide data on payment and receipt transactions to the DoD Component assigned reporting responsibility. Under these procedures, reports must include all of the data necessary for the DoD Component to report balance of payment expenditures and receipts for its accounts in accordance with the requirements of this chapter. The data must include all supplementary information that is necessary to identify returns to the United States as stated in subparagraph 2.8.2.1.3. The DoD Component having management control of the funds must include these transactions in its IBOP report. Subparagraph 2.7.14.4 identifies cross-disbursing reporting requirements for each Military Department.

2.7.7. **Appropriation Reimbursements.** Enter appropriation reimbursements from foreign entities on the appropriate Collections lines in the Accounting Report (AR)-1, as shown in Table 13-5. Enter collections from U.S. personnel abroad in the appropriate “Less Receipts from U.S. Personnel” lines (i.e., “Payments”).

2.7.8. **Delivery Data.** As outlined in DSCA 5105.38-M, Security Assistance Management Manual (SAMM), data regarding Foreign Military Sale deliveries (Chapter 7), FMF grant aid deliveries (Chapter 9), IMET Program (Chapter 10), transfers under Special Drawdown Authority and the EDA program (Chapter 11), Military-to-Military Contact Program (Chapter 11), BPC deliveries (Chapter 15), and transfers of real property (Chapter 15) must be prepared by the appropriate agencies.

2.7.9. **Loans of Property.** For any defense item loaned to a foreign government, central offices in each DoD Component must maintain a record as outlined in the SAMM, Chapter 11.

2.7.10. **Advances to Foreign Residents or Countries.** Report advances made to foreign residents or countries by a DoD Component as payments on the same lines in AR-1, as shown in Table 13-5, for future contract payments. Use Line Item 190000 of AR-1 to report interest collections for advances.

2.7.11. **Other Foreign Aid under FAA.** Report data on DoD outlays resulting from serving as the executive agent for other U.S. foreign assistance programs (as authorized by the FAA) as IBOP Other Assistance Grant Aid by the appropriate DoD Component assigned the responsibility for those programs. Such assistance includes, but is not limited to, the following programs: Overseas Humanitarian, Disaster, and Civic Aid Defense; Cooperative Threat Reduction Account, Defense; Drug Interdiction and Counter-Drug Activities, Defense (In-Country Support only); and Overseas Costs for Contingency Operations under section 607 of the FAA.

2.7.12. **Records Retention.** Maintain records reflecting balance of payments transactions at each DFAS Site consolidation point for 2 years following the end of the reporting period.
2.7.13. **Foreign Currencies**

2.7.13.1. Report data on foreign currencies in dollar equivalents.

2.7.13.2. The DSCA must report expenditures and collections for all FT accounts under its control, including those for which the DSCA has financial management responsibility in connection with Foreign Military Sales currencies, as well as those provided under joint weapons production and exchange agreements.

2.7.13.3. Use the respective reporting system utilized by each DoD Component to provide data on accommodation sales to individuals by military DOs.

2.7.14. **Submission of Reports**

2.7.14.1. Prepare reports of performance and transactions, using the current automated technology, entering the IBOP by DoD Components as outlined in the detailed instructions provided in Tables 13-1 through 13-4. Sample formats are shown in Tables 13-5 through 13-7.

2.7.14.2. Submit ARs to the Department of Commerce through DFAS as follows:

2.7.14.2.1. Department of the Army – ARs-1 and 2;

2.7.14.2.2. Department of the Navy (including U.S. Marine Corps) – ARs-1 and 2;

2.7.14.2.3. Department of the Air Force – ARs-1 and 2;

2.7.14.2.4. MPSA - AR-3; and

2.7.14.2.5. All other Defense Agencies, such as the DSCA and Defense Intelligence Agency - AR-1.

2.7.14.3. The DSCA must report all Foreign Military Sales and BPC delivery data.

2.7.14.4. Submit cross-disbursing data submitted by the DoD Component as follows:

2.7.14.4.1. Forward IBOP transactions between the Air Force and the Army no later than 32 calendar days following the end of the quarter to their corresponding offices. Each Service will send its IBOP files to the other Services.
2.7.14.4.2. Forward vouchers and control listings of IBOP transactions of the Navy for the Army and the Air Force, the Army for the Air Force and the Navy, and the Air Force for the Navy and the Army to the designated accounting and finance offices quarterly.

2.7.14.4.3. Forward electronic transmissions of Army, Navy, Air Force, and Marine Corps IBOP transactions for the Defense Agencies and OSD no later than 45 calendar days following the end of the quarter to the Department of Commerce.

2.7.14.4.4. Report salary payments to U.S. personnel as the net amount paid to individuals, excluding all deductions, such as amounts withheld for taxes, contributions, allotments, or savings bonds.

2.7.14.5. Complete the headings on each report as indicated in Tables 13-5 through 13-7. Round dollar amounts to the nearest $1,000. Round amounts from $1 to $499 downward; amounts from $500 to $999 are rounded upward.

2.8 Criteria for Determining and Identifying IBOP Transactions

2.8.1. Introduction. In establishing a basis for reporting IBOP transactions, assume that purchases of materiel and services are equal to related disbursements, since payments by DoD Components normally are made within the month following receipt of the materiel and services. Similarly, report DoD outlays from appropriations supporting various U.S. foreign assistance programs to signify the delivery of that assistance to foreign entities. It is necessary, however, to report Foreign Military Sales on a delivery basis. State collections separately to reflect the changes in financial status. Accounting reports prescribed by this chapter reflect these reporting concepts. Table 13-9 contains a glossary of automated data processing (ADP) terms.

2.8.2. Transactions Entering the IBOP. The following transactions enter the DoD IBOP for reporting purposes.

2.8.2.1. Payments

2.8.2.1.1. Inclusion of all payments is required, including advance and progress payments by DOs (whether located abroad or in the United States, its territories and possessions, or Puerto Rico) from their accounts and all payments from the accounts of nonappropriated funds and the MPSA to:

2.8.2.1.1. Foreign residents, including all amounts deposited in foreign or U.S. banks to their credit (e.g., a deposit to the account of a foreign entity maintained in a U.S. bank). Foreign residents include foreign governments, corporations, contractors, and individuals;
2.8.2.1.2. U.S. personnel stationed, or employed, or who live abroad, or on ships homeported abroad, for pay disbursed or mailed abroad when on temporary duty (TDY) abroad and per diem for TDY abroad;

2.8.2.1.3. International organizations, including all amounts deposited to their credit in foreign or U.S. banks;

2.8.2.1.4. U.S. corporations for materiel, supplies (excluding petroleum products), and equipment, title to which is acquired by the U.S. Government abroad as evidenced by an accomplished materiel inspection and receiving report;

2.8.2.1.5. U.S. contractors for construction or services performed abroad, except for travel and transportation as described in subparagraph 2.8.4.2.7; and

2.8.2.1.6. U.S. and foreign corporations for petroleum products that will be identified to the country shown as the product source as described in subparagraph 2.8.4.2.8.2.

2.8.2.1.2. Inclusion of foreign currency payments is required, including counterpart foreign currency payments by a foreign government held by the foreign government for U.S. uses under special arrangements such as Euros disbursed by the Spanish Government for constructing and maintaining U.S. facilities.

2.8.2.1.3. Included are all Returns to the United States resulting from contracts or other procurement documents for procurement of supplies and services for use outside the United States. Also included are all Returns to the United States from contracts for construction, maintenance, and repair of real property facilities that require U.S. end products, or that specify certain services be performed in the U.S. Additionally, U.S. contractors performing construction and service contracts overseas may acquire, on their own initiative, certain U.S. end products, services, or transportation on U.S. flag carriers in fulfillment of construction or service contracts. Identify and report the amount of such procurements of U.S. end products, services, and transportation on U.S. flag carriers in AR-1, as shown in Table 13-5. The following rules apply only to contractors who are U.S. residents.

2.8.2.1.3.1. The amounts remitted by a supplier to the United States for procurement of U.S. end products and the amounts paid by the supplier to a U.S. transportation company for transportation of goods on U.S. flag carriers must be identified and reported as reductions to procurement payments.

2.8.2.1.3.2. Identify and report the following amounts as reductions to contractual service payments:

2.8.2.1.3.2.1. The amount of U.S. end products procured from the United States by the contractor for incorporation in the project (whether required by the terms of the contract or voluntarily procured from the United States without contractual requirements);
2.8.2.1.3.2.2. The amount remitted to or retained in the United States by the contractor for services performed in the United States and for profit, overhead, amortization costs, employee tax withholdings, and other indirect expenses, including that portion of the salaries of contractor personnel remitted to or retained in the United States; and

2.8.2.1.3.2.3. The amount paid to transportation companies in the United States by the contractor for transportation provided on U.S. flag carriers.

2.8.2.1.3.3. Reporting requirements and requirements for contracts exceeding the simplified acquisition threshold are set forth in DFARS 225.1103(1) and the clause at 252.225-7005.

2.8.2.1.3.4. The amounts reported as returns under subparagraph 2.8.2.1.3 must exclude:

2.8.2.1.3.4.1. Payments by the contractor to a DoD Component for supplies or services such as utilities and telephone services; and

2.8.2.1.3.4.2. Returns to the United States by foreign residents who use U.S. end products or services to fulfill DoD contracts.

2.8.2.2. Collections

2.8.2.2.1. Report all collections by DOs credited to their accounts or to Treasury accounts (for which the Department has billing and collection responsibility) and all receipts in nonappropriated funds and the MPSA from the following:

2.8.2.2.1.1. Foreign residents;

2.8.2.2.1.2. U.S. personnel who are stationed, employed, residing, or traveling abroad, or on ships homeported abroad (for reporting purposes, however, these collections are treated as a reduction to pay of personnel);

2.8.2.2.1.3. International Organizations;

2.8.2.2.1.4. U.S. contractors in connection with their performance of contracts with the U.S. Government or private firms abroad; and

2.8.2.2.1.5. Foreign governments or other foreign entities for goods and services sold for delivery or use under the Foreign Military Sales program, other sales programs, and the Defense Logistics Agency Disposition Services.

2.8.2.2.2. Report all collections of foreign currency contributed by foreign governments for the support of U.S. Military Assistance Advisory Groups (MAAGs) and Missions.
2.8.2.2.3. Do not deposit FMF receipts into the U.S. Treasury. The FMF receipts are recorded in successor account 11*1082 (Foreign Military Financing Program, Funds Appropriated to the President), via a Treasury SF 133, Report on Budget Execution and Budgetary Resources, allocation by the Department of State in the year received, and finally apportioned in the same year on an SF 132, OMB Apportionment And Reapportionment Schedule as found in OMB Circular A-11, “Preparation, Submission, and Execution of the Budget,” Appendix F.

2.8.2.3. Deliveries

2.8.2.3.1. All deliveries of materiel, supplies, equipment, and services to foreign countries and international organizations must be reported to include the following:

2.8.2.3.1.1. Foreign Military Sales deliveries outlined in the AECA of 1976, as amended;

2.8.2.3.1.2. Sales by property disposal officers as represented by collections;

2.8.2.3.1.3. Loans and leases of aircraft, vessels, and other equipment to foreign entities;

2.8.2.3.1.4. Transfers of real property and deliveries of materiel and services under logistical support agreements and otherwise; and

2.8.2.3.1.5. Deliveries of goods and services for foreign assistance reimbursed by the Agency for International Development (AID), Department of State, or from Funds Appropriated to the President.

2.8.2.3.2. This chapter requires that delivery data pertaining to Military Assistance Grant Aid be reported.

2.8.2.4. Special Transactions

2.8.2.4.1. Transfers. Transfers from Deposit Account 6500 (Advances Without Orders from Non-Federal Sources) and Clearing Account 3875 (Budget Clearing Account (suspense)) to other accounts must be included when recorded as a collection in deposit fund accounts or in applicable receipt (including miscellaneous receipt), appropriation, or other fund accounts. For example, a bid deposit of a successful purchaser of surplus, excess, foreign excess, scrap, or salvage will be recorded in IBOP at the time transferred to account 3845 (Proceeds of Sales, Personal Property). Treat returns of deposits to depositors as IBOP transactions. Exclude amounts initially recorded in these suspense accounts from IBOP reporting requirements.

2.8.2.4.2. Settlements. Treat offsetting settlements between DoD accounts made in place of payments to, and collections from, a foreign government as IBOP transactions as if the transaction had been carried out with the foreign government.
2.8.2.4.3. **Outlays.** Report DoD outlays in support of Other Assistance Grant Aid.

2.8.3. **Transactions Not Entering the IBOP.** The following transactions do not enter the DoD reporting of IBOP:

2.8.3.1. Payments to and receipts from any DoD or other U.S. Government agency or activity, including any DoD nonappropriated fund or postal service activity, except special transactions noted in subparagraph 2.8.2.4;

2.8.3.2. All transfers between the DoD or other U.S. Government accounts, except those from Deposit Account 6500 and Clearing Account 3875, as noted in subparagraph 2.8.2.4.1;

2.8.3.3. Payments to foreign residents for goods produced in the United States if title is transferred within the United States. Include payments to the foreign resident when title is transferred to the United States if the goods were originally delivered to the foreign resident under the Foreign Military Sales program; and

2.8.3.4. Payments to foreign residents for goods produced abroad and imported into the United States when title is transferred to the U.S. Government after the goods are imported. Consider goods imported when they clear the U.S. Customs Service.

2.8.4. **Identification of Transactions to Country or International Organizations**

2.8.4.1. **General.** Identify transactions, except those relating to international organizations designated in [SAMM Table C4.T2B](#), generally to the country of residence of the payee or remitter, rather than the location of the DO. Identify transactions with international organizations not listed in SAMM Table C4.T2B to the country to which payment is sent or from which payment is received. In cases where country of residence cannot be determined, identify transactions as follows.

2.8.4.1.1. **Cash.** Code payments or collections by cash to the country in which disbursed or collected.

2.8.4.1.2. **Check.** Code payments or collections by check to the country to which check is sent or from which check is received.

2.8.4.1.3. **Electronic.** Code payments or collections by electronic transfer to the country to which transfer is sent or from which transfer is received.

2.8.4.2. **Payments.** Identify payments to the designated international organization or country of residence of the payee. More specifically, identify payments as follows.

2.8.4.2.1. **Government-to-Government Payments.** Identify all government-to-government payments to the country of the foreign government involved.
2.8.4.2.2. **Foreign Corporations.** Identify payments to foreign corporations and individuals to the country of residence.

2.8.4.2.3. **U.S. Personnel Payments**

2.8.4.2.3.1. **U.S. Personnel Ashore.** Code net pay to the foreign country to which payment is made or the check is addressed.

2.8.4.2.3.2. **U.S. Personnel Afloat (Homeported Abroad).** Code net pay to the foreign country to which payment is made or the check is addressed.

2.8.4.2.3.3. **U.S. Personnel Afloat (U.S. Homeported).** Code net pay as a U.S. payment. A statistical determination will be made, by country, of the expenditures ashore by these individuals.

2.8.4.2.3.4. **Allotments of Pay.** Allotments to individual persons will be identified to the country to which addressed. Identify all other allotments to the country of residence of the allottee.

2.8.4.2.3.5. **Contributions.** Identify U.S. Government and service member contributions (Federal Insurance Contributions Act, retirement, and health benefits) to the United States.

2.8.4.2.4. **Retired and Survivors Pay.** Identify the amount of the payment to the foreign country to which the check is mailed or payment is electronically transferred.

2.8.4.2.5. **Foreign Nationals**

2.8.4.2.5.1. **Direct Hire of Foreign Nationals.** Identify net pay to the foreign country, which employs the individual. In addition, identify the payment of all U.S. Government contributions, and the payments of all amounts withheld from the employee's pay, at the time of payment, to the country addressed.

2.8.4.2.5.2. **Indirect Hire of Foreign Nationals.** Identify payments under contracts for indirect hire of foreign nationals, including retirement accruals or separation allowances when paid, to the country addressed.

2.8.4.2.5.3. **Foreign Nationals Aboard Ships.** Identify net pay to the country in which the individual maintains his or her “home of record.” In addition, the payment of all U.S. Government contributions and payments of all amounts withheld from the employee's pay must be identified, at the time of payment, to the country to which addressed.

2.8.4.2.6. **Construction and Services Performed Abroad Other Than Travel and Transportation.** Identify payments for construction or services performed abroad to the country in which construction or service is performed, regardless of where the check is mailed.
2.8.4.2.7. Travel and Transportation

2.8.4.2.7.1. Transportation. Code payments for transportation of persons or things (trip requests, bills of lading, warrants, or cash) paid to a transportation company to the country of residence of the transportation company.

2.8.4.2.7.2. Travel Allowances. Code payments for per diem allowances, relocation allowances, and other incidental travel expenses, including transportation expenses or mileage allowances paid to individuals, according to the following guidance.

2.8.4.2.7.2.1. For permanent change of station (PCS), code to the country in which the greater part of the allowances was earned or expenses incurred. Code relocation allowances to the country to which the individual's family moves.

2.8.4.2.7.2.2. For TDY, code to the country in which the TDY was performed, except TDY performed aboard ship that must be coded to the United States. Where TDY is performed in several countries and it is not feasible to identify the per diem to each country, code the payment to the country in which the greater part of the allowances was earned.

2.8.4.2.8. Materiel, Supplies, and Equipment

2.8.4.2.8.1. Payments to a U.S. corporation for materiel, supplies (excluding petroleum products), and equipment acquired by a DoD Component abroad must be coded to the country where it is delivered or accepted by the DoD Component. Code payments to foreign contractors (excluding petroleum products) to the country of residence of the payee.

2.8.4.2.8.2. Identify payments to a U.S. or foreign corporation for petroleum products according to the following guidance.

2.8.4.2.8.2.1. Code the payment to the country shown as the product source in the “product source” clause of the contract under which the payment is made. If a region (e.g., the Caribbean or Persian Gulf) is shown rather than a country, code the payment to the country shown in section 9 of the DoD Form 250-1, Tanker/Barge-Material Inspection and Receiving Report. If the product source cannot be established, it will be coded to the country where acquired by the DoD Component.

2.8.4.2.8.2.2. When the product source for petroleum is the United States, and the petroleum has been transported by the Military Sealift Command, or transported by commercial vessels directly to a DoD Component abroad, code the payment to the United States. If the petroleum is not consigned directly to a DoD Component, code the payment to the country where it is delivered and code the amount of the petroleum product and the transportation furnished by U.S. flag carriers as a return to the United States.

2.8.4.2.8.2.3. Code petroleum services, other than ocean transportation, to the country in which the service is performed.
2.8.4.2.9. **NATO Infrastructure.** In processing NATO Infrastructure and International Military Headquarters Payments for NATO infrastructure, refer to Enclosure 2 of *DoD Directive 2010.5*, “The NATO Security Investment Program,” for eligible project types. Code such payments to the country or to the appropriate NATO command that is the recipient of the payment. Code payments to international military headquarters, including those located in the United States.

2.8.4.3. **Deliveries and Collections**

2.8.4.3.1. **Materiel or Services.** Code deliveries of materiel or services to the country or international organization to which the collection for that delivery must be identified. Code collections to the countries making payments. Code collections from international organizations to the international organization making payment.

2.8.4.3.2. **Recipient Country.** Code delivery transactions involving Military Assistance Grant Aid and reimbursement from AID, Department of State, or Funds Appropriated to the President to the recipient country or international organization.

2.8.4.4. **Special Transactions**

2.8.4.4.1. **Balance of Payment Transactions.** Transactions for Guam, Puerto Rico, the Commonwealth of the Northern Marianas, and the U.S. Virgin Islands must not be included in any summary totals of balance of payments transactions since transactions involving these areas do not enter the United States balance of payments. If a special report is requested for these areas, then apply country codes as appropriate.

2.8.4.4.2. **Guantanamo Bay.** Code transactions at Guantanamo Bay, other than pay of foreign nationals, as U.S. transactions not entering the IBOP. However, treat the pay of foreign nationals employed at Guantanamo Bay as IBOP transactions and code to their country of residence.

2.9 Entries for DoD Transactions Entering the IBOP – AR-1

2.9.1. **Purpose.** This format prescribes line items, columnar data, and line item identification (ID) codes used for reporting IBOP transactions in AR-1. This submission provides for summarizing DoD IBOP transactions under appropriation and category groupings.

2.9.2. **General**

2.9.2.1. **Separate AR-1.** Prepare a separate AR-1 for each foreign country and international organization listed in the GENC Standard and SAMM Table C4.T2B, as applicable, and for each foreign area grouping shown in Table 13-8. In addition, submit a separate AR-1 (a sample format of AR-1 is shown in Table 13-5; change “Quarter” to “Month” if reporting monthly) for Guam, Puerto Rico, the Commonwealth of the Northern Marianas, and the U.S. Virgin Islands. However, these transactions, and those for other U.S. possessions, must not be included in the subtotals for foreign area groupings or worldwide totals.
2.9.2.2. **DoD Component.** Each DoD Component must submit AR-1 electronically. Data on the electronic transfer submissions must carry the line item numbers for AR-1 precisely as shown in Table 13-10.

2.9.2.3. **Assemble Reports.** Documentation for countries without transaction data is not required when assembling supporting documentation for IBOP reporting.

2.9.2.4. **Report Data.** Report data for each line item entry listed in Table 13-10. To facilitate summarizing data, each line item entry must be identified by the same line ID Code shown in Table 13-10. Line items for which no amount is reported for the current quarter or cumulative columns must not be shown on the report.

2.9.2.5. **Reporting Responsibilities.** Data reported for all lines for transactions involving the FMF, Foreign Military Sales Program, BPC Program, IMET, Drawdowns, EDAs, and Military-to-Military Contact Programs are established under the SAMM, Chapter 1.

2.9.2.6. **Dollar Collections.** Report as dollar collections all collections of foreign currency not obtained by purchase with U.S. dollars, used for authorized expenditure purposes rather than deposited to Treasury FT accounts.

2.9.2.7. **Trust Fund Expenditures.** Treat refunds to foreign governments for Foreign Military Sales as trust fund expenditures. In the DoD balance of payment presentations, net such refunds against receipts rather than treated as expenditures on AR-1.

2.9.3. **Line Entries - Descriptions and Codes.** Line item ID codes, line item captions, and descriptions for AR-1 are shown in Table 13-10.

2.10 Entries for DoD Transactions Entering the IBOP – AR-2

2.10.1. **Purpose.** This format prescribes line items, columnar data, and line ID codes for reporting IBOP transactions in AR-2, i.e., financial data relating to DoD nonappropriated fund activities abroad. Use these data to develop amounts available for spending abroad by U.S. personnel.

2.10.2. **General**

2.10.2.1. **Nonappropriated Fund Activities.** Each reporting activity must include all nonappropriated fund activities under its command jurisdiction. When one activity serves more than one command in a given area, make local arrangements to have the data submitted through only one command, thus avoiding duplications (e.g., the Army and Air Force Exchange Service). Nonappropriated fund activities aboard ship must include only receipt and payment transactions abroad, which are included with activities ashore and enter the IBOP.
2.10.2.2. Submit Separate Reports. The reporting activities must submit separate reports for the following:

2.10.2.2.1. Exchange Service Operations, and

2.10.2.2.2. Other Nonappropriated Fund Activities.

2.10.2.3. Payments and Receipts. These reports must include only payments and receipts affecting nonappropriated funds. Exclude payments and receipts from appropriated funds used in operating a nonappropriated fund activity.

2.10.2.4. Reported Quarter. Amounts shown in the report must cover the reported quarter. Change “Quarter” to “Month” if reporting monthly.

2.10.2.5. Schedules. Submit separate schedules for the Navy and Marine Corps.

2.10.3. Line Entries - Descriptions and Codes. Line ID codes, line item captions, and descriptions for AR-2 are shown in Table 13-11.

2.11 Entries for DoD Transactions Entering the IBOP - AR-3

2.11.1. Purpose. This format prescribes line items, columnar data, and line ID codes used for reporting IBOP transactions in AR-3, i.e., financial data relating to military postal services to individuals. Use these data to develop the amounts available for spending abroad by U.S. personnel.

2.11.2. General

2.11.2.1. MPSA. Submit one report to cover all MPSA operations, excluding FPO operations aboard ship.

2.11.2.2. Payments and Receipts. Exclude from the report payments and receipts of appropriated funds used for operating expenses of MPSA facilities.

2.11.2.3. Agencies and Activities. Exclude sales to or receipts from federal agencies and activities and DoD-sponsored nonappropriated fund activities.

2.11.2.4. Reported Quarter. The amounts shown in the report must cover the reported quarter only and will be noncumulative. Change “Quarter” to “Month” if reporting monthly.

2.11.3. Line Entries – Description and Codes. Line ID codes, line item captions, and descriptions for AR-3 are shown in Table 13-12.
3.0 INTERMEDIATE/INSTALLATION-LEVEL REPORTING REQUIREMENTS

Each DFAS site develops and monitors the reporting requirements, at the intermediate or installation level, for its IBOP reporting. Consistently apply reporting formats for the intermediate or installation levels in accordance with the requirements outlined in paragraphs 2.1 through 2.11.
Table 13-1. Edit and Validation Rules for Submitting IBOP Data to the Department of Commerce

The following includes the record edit and validation rules that apply to all transaction data records submitted on IBOP transactions.
