INTRODUCTION

The Department of Defense (DoD) 7000.14-R, DoD Financial Management Regulation (FMR) is issued under the authority of DoD Instruction 7000.14, “DoD Financial Management Policy.” The DoD FMR directs statutory and regulatory financial management requirements, systems, and functions for all appropriated and nonappropriated, working capital, revolving, and trust fund activities.

APPLICABILITY

The DoD FMR applies to the Office of the Secretary of Defense, the Military Departments, the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the DoD Office of the Inspector General, the Defense Agencies, the DoD Field Activities, and all other organizational entities within the DoD (hereinafter referred to collectively as “DoD Components”).
PARAGRAPH STRUCTURE

The paragraph numbering system is consistent across the Regulation. The section and paragraph levels are 2-digits, and there are five additional subparagraph level designators formulated as follows:

INFORMATION REQUIREMENTS

DoD Components should forward recommended changes to this Regulation through appropriate channels to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), Office of the Deputy Chief Financial Officer (ODCFO). Requests for deviations from or exceptions to this Regulation must be submitted via formal memorandum through your organization’s appropriate coordination and approval process to the OUSD(C), ODCFO. The memorandum must provide justification and supporting documentation as applicable. Mailing address:

CHAPTER 1

CHIEF FINANCIAL OFFICER OF THE DEPARTMENT OF DEFENSE

1.0 GENERAL

1.1 Purpose

This chapter describes the establishment, roles, responsibilities, and authority of the Department of Defense (DoD) Chief Financial Officer (CFO) as established by the CFO Act of 1990. The DoD CFO is also the Under Secretary of Defense (Comptroller) (USD(C). The USD(C)/CFO is responsible for developing and implementing DoD-wide financial management systems and overseeing financial management activities relating to CFO programs and operations.

1.2 Authoritative Guidance

The CFO establishment, roles, responsibilities, and authority prescribed are in accordance with the applicable provisions of the following sources:

1.2.2. 10 U.S.C. § 2222, “Defense business systems: business process reengineering; enterprise architecture; management”;

1.2.3. 31 U.S.C. § 3515, “Financial statements of agencies”;

1.2.4. 31 U.S.C. § 901, “Establishment of agency Chief Financial Officers”;

1.2.5. 31 U.S.C. § 902, “Authority and functions of agency Chief Financial Officers”;

1.2.8. DoDD 5118.03, “Under Secretary of Defense (Comptroller)/Chief Financial Officer, Department of Defense (USD(C)/CFO)”;

1.2.9. DoDD 5118.05, "Defense Finance and Accounting Service (DFAS)"; and

2.0 CHIEF FINANCIAL OFFICER APPOINTMENT

The CFO Act designates DoD as an agency whose CFO is either appointed by the President, by and with the advice and consent of the U.S. Senate; or designated by the President, in consultation
with the head of the agency, from among officials of the agency who are required by law to be so appointed. The USD(C), who is appointed by the President and confirmed by the U.S. Senate, is also the DoD CFO. The USD(C)/CFO must be appointed or designated, as applicable, from among individuals who possess demonstrated ability in general management of, knowledge of, and extensive practical experience in financial management practices in large governmental or business entities.

3.0 ROLES AND RESPONSIBILITIES

The USD(C)/CFO is the Principal Staff Assistant and advisor to the Secretary of Defense for budgetary and fiscal matters including financial management, accounting policy and systems, managers’ internal control systems, budget formulation and execution, contract audit administration and organization, and general management improvement programs. See Figure 1-1 for the DoD Chief Financial Officer Structure. Consistent with the CFO Act, the following roles and responsibilities are assigned to the USD(C)/CFO:

3.1 Financial Management

Direct, manage, and provide policy guidance and oversight of DoD financial management activities, personnel, and operations, including:

3.1.1. Establish DoD policies including its component parts. Ensure compliance with applicable accounting policy and standards.

3.1.2. Establish, review, and enforce internal controls, standards, and compliance guidelines.

3.1.3. Provide oversight of activities and operations including: (a) preparation and annual revision of the Financial Improvement and Audit Remediation (FIAR) plan and (b) development of financial management budgets.

3.1.4. Prepare and annually revise the DoD plan to implement the 5-year financial management plan prepared by the Director of the Office of Management and Budget (OMB) and to comply with the audited financial statements provisions of the CFO Act.

3.1.5. Recruit, select, and train personnel to execute financial management functions.

3.2 Financial Management Systems

Develop and maintain an integrated agency accounting and financial management system, including but not limited to financial reporting, internal controls, cash management, credit management, debt collection, and property and inventory management. In coordination with the Director of Administration and Management (DA&M), provide for the design, development, and installation of financial systems (as defined in the Glossary) and for management improvement programs, especially those related to financial management. Ensure system:
3.2.1. Compliance with applicable accounting principles, standards and requirements, and internal control standards.

3.2.2. Compliance with Director of OMB policies and requirements.

3.2.3. Provides for:

3.2.3.1. Complete, reliable, consistent, and timely budgetary and proprietary transaction-level information in accordance with the Standard Financial Information Structure; and recorded in general ledgers of the accounting systems of record to produce auditable budgetary, proprietary, and managerial cost accounting reports for external and internal stakeholder use, and which is responsive to DoD management information needs. All such financial management systems must establish an Advancing Analytics (Advana) data sharing agreement, see Chapter 10.

3.2.3.2. Development and reporting of cost information.

3.2.3.3. Integration of accounting and budgeting information.

3.2.3.4. Financial and/or program performance data used in budget and financial statement preparation.

3.2.3.5. Adequate controls over real property, equipment, and inventories.

3.2.3.6. Systematic measurement of performance.

3.3 Agency Financial Report

As required by OMB Circular A-136, DoD must prepare and transmit an Agency Financial Report (AFR) to the Secretary of Defense, OMB, U.S. Department of the Treasury (Treasury), the Government Accountability Office, and the Congress. The Department’s AFR preparation and reporting requirements are identified in Volume 6B.

3.4 Budget Execution

3.4.1. Monitor the financial execution of the DoD budget in relation to actual expenditures, and prepare and submit to the Secretary of Defense timely performance reports.

3.4.2. Administer and provide analysis and recommendations for the budgeting and execution phases of the DoD Planning, Programing, Budgeting, and Execution process, utilizing advice from the Director, Cost Assessment and Program Evaluation and the DA&M.

3.4.3. Direct the formulation and presentation of DoD budgets, the interactions with the OMB and Congress on budgetary and fiscal matters, and the execution and control of approved budgets. Maintain effective control and accountability over the use of all DoD financial resources. In coordination with the DA&M, conduct analyses to increase the efficiency of defense spending.
3.5 Biennial Review

Review, on a biennial basis, the fees, royalties, rents, and other charges imposed by the Department for services and things of value it provides, and make recommendations on revising those charges to reflect costs incurred in providing those services and things of value.

4.0 CHIEF FINANCIAL OFFICER AUTHORITY

4.1 Title 10 United States Code

In accordance with 10 U.S.C. § 2222, the USD(C) in conjunction with the DA&M must, in consultation with the Defense Business Council (DBC), document and maintain any common enterprise data for their respective areas of authority. Under this authority, they may also:

4.1.1. Participate in any related data governance process;

4.1.2. Extract defense business systems data as needed for priority activities and analyses;

4.1.3. When appropriate, ensure the source data is the same as that used to produce the financial statements subject to annual audit;

4.1.4. Provide access, except as otherwise provided by law or regulation, to such data to the Office of the Secretary of Defense, the Joint Staff, the military departments, the combatant commands, the Defense Agencies, the DoD Field Activities, and all other DoD offices, agencies, activities, and commands; and

4.1.5. Maintain consistent common enterprise data of their respective organizations.

4.2 Title 31 United States Code

To carry out CFO duties and responsibilities, the USD(C)/CFO has the authority to:

4.2.1. Access all records, reports, audits, reviews, documents, papers, recommendations, or other material that are DoD property, are available to the DoD, and which relate to programs and operations with respect to DoD CFO responsibilities.

4.2.2. Request such information or assistance from any Federal, State, or local governmental entity as may be necessary.

4.2.3. To the extent and in such amounts as may be provided in advance by appropriations Acts, the USD(C)/CFO may enter into contracts and other arrangements with public agencies and with private persons for the preparation of financial statements, studies, analyses, and other services; and make such payments as may be necessary.
5.0 CHIEF FINANCIAL OFFICERS COUNCIL

The DoD CFO is a member of the Chief Financial Officers Council (CFOC) consisting of the Deputy Director for Management of OMB, the Controller of the Office of Federal Financial Management of OMB, the Fiscal Assistant Secretary of the Treasury, and agency CFOs. The CFOC meets periodically to advise and coordinate the activities of its agency members on such matters as consolidation and modernization of financial systems, improved quality of financial information, financial data and information standards, internal controls, legislation affecting financial operations and organizations, and other financial management matters.

6.0 ESTABLISHMENT OF THE DEPUTY CHIEF FINANCIAL OFFICER

The CFO Act requires the establishment of DoD Deputy Chief Financial Officer (DCFO), who must report directly to the DoD CFO on financial management matters. The position of DCFO must be a career-reserved position in the Senior Executive Service. Consistent with qualification standards developed by, and in consultation with, the DoD CFO and the Director of OMB, the Secretary of Defense must appoint as DoD DCFO an individual with demonstrated ability and experience in accounting, budget execution, financial and management analysis, systems development, and not less than 6 years practical experience in financial management at large governmental entities.

7.0 DEPARTMENT OF DEFENSE STAFF ORGANIZATIONS

*7.1 Deputy Comptroller (Program/Budget)

The Deputy Comptroller (Program/Budget) is responsible for overseeing and implementing budgetary functions within the DoD on a day-to-day basis. The Office of the Deputy Comptroller (Program/Budget) is organized into four directorates:

7.1.1. The Directorate for Investment is responsible for advising the Deputy Comptroller (Program/Budget) on all matters pertaining to: Procurement; Research, Development, Test, and Evaluation; the National Intelligence Program; and for the Defense Acquisition Board program.

7.1.2. The Directorate for Military Personnel and Construction is responsible for advising the Deputy Comptroller (Program/Budget) on all matters pertaining to operating and maintaining the U.S. military force structure to include active, reserve, and retired military; Defense Health Program; military construction; family housing; homeowners assistance; North Atlantic Treaty Organization infrastructure; Base Realignment and Closure; and Real Property Maintenance.

7.1.3. The Directorate for Operations is responsible for advising the Deputy Comptroller (Program/Budget) on all matters pertaining to operating and maintaining the U.S. military force structure to include active and reserve military personnel and civilian personnel. This directorate is also responsible for advising on all matters pertaining to Contingency and International programs.

7.1.4. The Directorate for Program and Financial Control is responsible for budget review tracking, the submission of the automated defense budget for the President’s budget, maintenance of
the budget databases, apportionment of funds, reprogramming and transfer of funds, obligation and outlay forecasting and tracking, budget concepts and scorekeeping, and information system support.

*7.2 Deputy Comptroller for Enterprise Financial Transformation*

The Deputy Comptroller for Enterprise Financial Transformation (EFT) is responsible for improving enterprise-wide performance and data-driven decision making by accelerating digital transformation, process improvement, and the use of data and analytics. The Office for EFT is organized into two directorates:

7.2.1. The Directorate for Digital Transformation (DT) is responsible for the oversight and management of DoD’s financial management systems environment, including system audit compliance, and other digital transformation efforts which leverage data, data standards, technology, and analytics to automate and improve business processes. In alignment to the National Defense Strategy, DT also leads the development and implementation of DoD CFO’s Financial Management Functional Strategy to drive alignment with 21st century mission requirements and re-investment of savings to core DoD missions.

7.2.2. The Directorate for Financial Management Operations and Analysis is responsible for Defense-wide Working Capital Funds, the Pentagon Reservation Maintenance Revolving Fund, the Building Maintenance Fund, the Conventional Ammunition Working Capital Fund, the National Defense Stockpile Transaction Fund, and the Military Services' Management and Trust Funds. The directorate also supports the migration of all legacy DoD Fund Balance with Treasury (FBwT) reconciliations into the Advana platform, the ongoing development, operation, and maintenance of the Department’s FBwT reconciliations with Advana, developing, implementing, and sustaining the Dormant Account Review Quarterly process, producing a supportable Universe of Transactions for financial statement line-item balances, analysis and reporting on budgetary and financial execution data, and executing other Financial Management Analytics missions as needed.

7.3 Deputy Chief Financial Officer

The DCFO is responsible for overseeing and implementing accounting policy, improvements in financial management, as well as other financial management functions for the DoD on a day-to-day basis. The Office of the DCFO is organized into two directorates:

7.3.1. The Directorate for FIAR is responsible for audit oversight, management, and liaison functions; supporting Components to remediate findings and achieve post-audit sustainment. FIAR develops and annually revises a detailed FIAR Plan that identifies financial process, system, and statement deficiencies and provides detailed corrective actions to address those deficiencies. Additionally, FIAR manages the Defense-wide Statement of Assurance process by monitoring and reporting the status of auditor and manager-identified material weaknesses and corrective action plans; implementing the Federal Manager’s Financial Integrity Act program for DoD to include OMB Circular A-123, Appendix A, “Management of Reporting and Data Integrity Risk;” managing the Improving Financial Performance Initiative of the President’s Management Agenda; and advocating for the USD(C)/CFO on various interagency forums and internal DoD councils, boards, committees, and external organizations as required.
7.3.2. The Directorate for Financial Management Policy and Reporting (FMPR) is responsible for developing, promulgating, implementing, and interpreting DoD-wide accounting and finance policies; supporting the USD(C)/CFO and DCFO on various interagency forums; advocating for the USD(C)/CFO on various interagency organizations, and representing the USD(C)/CFO on various internal DoD councils, boards and committees pertaining to financial management policy. In addition, FMPR provides oversight of and liaisons with DoD Components on financial management operations, systems, responses to audit reports, policy clarifications, and other financial matters; and administers this Regulation. The Directorate develops and issues the DoD AFR (see Volume 6B), oversees the DoD-wide consolidated financial statements and notes—to include Component Level Account transactions—and manages the DoD Payment Integrity and Antideficiency Act programs, and other external financial reporting. Additionally, the Directorate supports the CFO and DCFO’s strategic vision for a strong internal control environment by facilitating DoD implementation of large-scale, end-to-end financial and business process and/or system adoption, and removing barriers from DoD, other federal, and industry stakeholders for more efficient interoperable systems, data standards, and Government-wide accounting best practices.

7.4 Director, Defense Finance and Accounting Service

The Director of DFAS is the principal DoD executive for finance and accounting requirements, systems, and functions under the authority and direction of the USD(C). DFAS:

7.4.1. Directs and oversees finance and accounting requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities, including security assistance.

7.4.2. Establishes and enforces requirements, principles, standards, systems, procedures, processes, and practices necessary to comply with finance and accounting statutory and regulatory requirements applicable to the DoD.

7.4.3. Provides professional finance and accounting services for DoD Components and other Federal agencies, as designated by the USD(C)/CFO.

7.4.4. Directs the consolidation, standardization, and integration of finance and accounting requirements, functions, procedures, operations, and systems and ensures proper relationship with other DoD functional areas (e.g., budget, personnel, logistics, acquisition, and civil engineering).

7.4.5. Executes statutory and regulatory financial reporting requirements and provides financial statements, pursuant to 31 U.S.C. § 3515, to include supporting customers’ audit assertions and audit execution.

7.4.6. Provides advice and recommendations to the USD(C)/CFO on finance and accounting matters and provides documentation that discloses the internal controls within DFAS-assigned systems that may impact customers’ control environment in supporting auditability.
7.4.7. Coordinates on the establishment of all DoD finance and accounting activities independent of the DFAS and supports the development and implementation of a compliant business solution with common business processes and data standards for horizontal end-to-end processes in the Business Enterprise Architecture.

7.5 Director, Defense Contract Audit Agency

The Director of Defense Contract Audit Agency (DCAA) is under the authority, direction, and control of the USD(C)/CFO, pursuant to 10 U.S.C. § 192, DoDD 5118.03, and DoDD 5105.36. The Director exercises authority, direction, and control over DCAA and all assigned resources. DCAA performs all necessary DoD contract audits and provides accounting and financial advisory services regarding contracts and subcontracts. DCAA executes the following:

7.5.1. Assists procurement and contract administration officials in achieving the objective of prudent contracting by providing financial information and advice on proposed or existing contracts and contractors, as appropriate.

7.5.2. In accordance with Government Auditing Standards, the Federal Acquisition Regulation, the Defense Federal Acquisition Regulation Supplement (DFARS), and other applicable laws and regulations, to the extent and manner considered necessary, to permit proper performance of the other functions; DCAA audits, examines, and reviews:

7.5.2.1. Contractors’ and subcontractors’ records, documents, and other evidence;

7.5.2.2. Systems of internal control;

7.5.2.3. Compliance with regulations; and

7.5.2.4. Accounting, costing and general business practices and procedures.

7.5.3. Audits compliance with DFARS Contractor Business Systems Clauses for contractors' accounting, material management and accounting, and estimating systems.

7.5.4. Directs audit reports to the Government management level having authority and responsibility to act on the audit findings and recommendations.

7.5.5. As an advisor, attends and participates, as appropriate, in contract negotiation and other meetings where contract costs, audit reports, or related financial matters are under consideration.

8.0 DEPARTMENT OF DEFENSE COMPONENTS

The Heads of the DoD Components must direct and manage financial management activities within their respective Components, consistent with the policies, requirements, principles, standards, procedures, and practices prescribed by the USD(C)/CFO, and other internal policies as prescribed by the Heads of the other DoD Components.

CHAPTER 2

FEDERAL ACCOUNTING STANDARDS HIERARCHY

1.0 GENERAL

1.1 Overview

The Federal Accounting Standards Advisory Board (FASAB) is the body designated by the American Institute of Certified Public Accountants (AICPA) as the source of generally accepted accounting principles (GAAP) for federal reporting entities. As such, the FASAB is responsible for identifying the sources of accounting principles and providing federal entities with a framework for selecting the principles used in the preparation of general purpose financial reports that are presented in conformity with GAAP. FASAB promulgates accounting standards for U.S. government agencies after considering financial and budgetary information needs of Congress, executive agencies, and other users of federal financial information. FASAB considers comments from the public on its proposed Statements, which are widely distributed as “exposure drafts.” FASAB publishes adopted statements as Statement of Federal Financial Accounting Standards (SFFAS) that become GAAP for federal government entities. FASAB Standards and other FASAB authoritative publications, including FASAB Interpretations, Technical Bulletins, and Technical Releases are published on the FASAB website. Documents recently issued and not yet codified are also presented at this location.

1.2 Purpose

1.2.1. This chapter includes the FASAB hierarchy of accounting principles and standards. These standards are used to promulgate accounting and financial reporting policy within the Department of Defense (DoD) Financial Management Regulation (FMR). The purpose of these principles and standards is to improve the usefulness of federal financial reports.

1.2.2. The provisions of this chapter apply to all DoD Components, including the Defense Working Capital Fund activities. However, this chapter does not apply to Nonappropriated Fund (NAF) accounting. NAF accounting policies are in Volume 13.

1.2.3. Interim policies and guidance issued by the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) through various memoranda can be found on the OUSD(C) DoD FMR website. Such interim guidance will be incorporated into the DoD FMR once it is finalized.

1.3 Authoritative Guidance

1.3.2. FASAB develops accounting standards and principles for the United States Government.

1.3.3. The *AICPA Code of Professional Conduct*, Part 1.320.020 recognized FASAB as the board that promulgates GAAP for federal entities.

1.3.4. *SFFAS 34* “The Hierarchy of Generally Accepted Accounting Principles, Including the Application of Standards Issued by the Financial Accounting Standards Board” identifies the GAAP hierarchy for federal reporting entities.

1.3.5. The *Government Management Reform Act of 1994 (GMRA)* mandates executive agencies prepare their financial statement in accordance with GAAP.

2.0 HIERARCHY

2.1 Hierarchy of Accounting Standards

2.1.1. The SFFASs are GAAP applicable to the federal government and must be followed by all federal agencies in reporting under the GMRA. DoD Components must adhere to the GAAP hierarchy prescribed in SFFAS 34. The sources of accounting principles that are generally accepted are categorized in descending order of authority as follows:

2.1.1.1. FASAB SFFAS and Interpretations;

2.1.1.2. FASAB Technical Bulletins and, if specifically made applicable to federal reporting entities by the AICPA and cleared by FASAB, AICPA Industry Audit and Accounting Guides. Such pronouncements specifically made applicable to federal reporting entities are presumed to have been cleared by FASAB, unless the pronouncement indicates otherwise;

2.1.1.3. Technical Releases of the Accounting and Auditing Policy Committee (AAPC) of the FASAB; and

2.1.1.4. Implementation guides published by FASAB staff, as well as practices that are widely recognized and prevalent in the federal government.

2.1.2. If the accounting treatment for a transaction or event is not specified by a pronouncement or established in practice as described in subparagraph 2.1.1., a federal reporting entity should first consider accounting principles for similar transactions or events within categories in subparagraphs 2.1.1 before considering Other Accounting Literature discussed in paragraph 2.2.

2.1.3. A federal reporting entity should not follow the accounting treatment specified in accounting principles for similar transactions or events in cases in which those accounting principles either, (a) specifically prohibit the application of the accounting treatment to the particular transaction or event or (b) indicate that the accounting treatment should not be applied to other transactions or events by analogy.
2.2 Other Pronouncements and Practices

2.2.1 Other Accounting Literature includes

2.2.1.1. FASAB Concepts Statements;

2.2.1.2. AICPA Industry Audit and Accounting Guides that have not specifically been made applicable to federal reporting entities by FASAB;

2.2.1.3. Pronouncements of other accounting and financial reporting standards-setting bodies, such as Financial Accounting Standards Board, Governmental Accounting Standards Board, the International Accounting Standards Board, and the International Public Sector Accounting Standards Board;

2.2.1.4. Publications of professional associations or regulatory agencies; and

2.2.1.5. Accounting textbooks, handbooks, and articles.

2.2.2. The appropriateness of other accounting literature depends on its relevance to particular circumstances, the specificity of the guidance, and the general recognition of the issuer or author as an authority. FASAB Concepts Statements would normally be more influential than other sources in this category.

3.0 COMMUNICATION AND COORDINATION

3.1 Guidance and Clarification

To ensure the consistent application of SFFAS throughout DoD, the OUSD(C), Office of the Deputy Chief Financial Officer (ODCFO), Financial Management Policy and Reporting (FMPR) Directorate must be contacted when clarification, technical guidance, implementation guidance or other information regarding federal accounting standards is needed.

3.2 Correspondence

3.2.1. Formal and informal requests addressed to FASAB or the AAPC for an interpretation, clarification, technical guidance, implementation guidance or other information regarding SFFAS must be submitted through the OUSD(C), ODCFO, FMPR Directorate.

3.2.2. All correspondence presenting a DoD position on FASAB Exposure Drafts and on any other matters before FASAB or the AAPC will be signed by either the DoD CFO, DCFO or ADCFO.

3.2.3. Individuals submitting responses to exposure drafts will clearly indicate in the correspondence that the opinions expressed are those of the individual and do not represent the official position of DoD.
3.2.4. The Office of the Director of National Intelligence (ODNI) is not a component of DoD and, accordingly, may communicate with accounting standards-setting bodies in the same manner as other federal agencies. DoD components, including the Defense Intelligence Agency, the National Geospatial-Intelligence Agency, and the National Security Agency, provide input into ODNI correspondence with accounting standards-setting bodies. DoD Components should ensure that ODNI communications are not presented as official DoD positions. Further, to ensure the completeness of DoD communications, any DoD component input into ODNI correspondence with accounting standards-setting bodies should be coordinated with the ODCFO.

3.3 Task Force Participation

3.3.1. Full participation by DoD in Task Forces sponsored by FASAB and the AAPC is critical to ensuring that DoD’s views are considered as accounting standards and guidance are formulated. This participation includes Task Force membership, meeting attendance, participation in group discussions, preparing draft documents, and commenting on draft Task Force documents.

3.3.2. To ensure complete coverage by DoD, Task Force participants should notify the OUSD(C), ODCFO, Financial Improvement and Audit Remediation, and FMPR Directorates of membership in FASAB and AAPC Task Forces. Task Force participants should also remain alert to the fact that many issues will impact multiple DoD Components. Coordination with the FMPR Directorate and other DoD components will ensure that DoD is properly represented as government-wide accounting standards are formulated.

CHAPTER 3

FEDERAL FINANCIAL MANAGEMENT IMPROVEMENT ACT COMPLIANCE

1.0 GENERAL

*1.1 Overview

The Federal Financial Management Improvement Act of 1996 (FFMIA) is intended to ensure Federal financial systems provide reliable, consistent and uniform disclosure of financial data using accounting standards. FFMIA requires the Department of Defense (DoD or Department) to implement and maintain financial systems that comply with Federal Financial Management System Requirements (FFMSR), applicable Federal accounting standards, and the United States Standard General Ledger (USSGL) at the transaction level. FFMIA requires DoD management to annually assess and DoD auditors to report on the Department’s compliance as part of financial statement audit reports; and determine, based on the audit report and other information, whether the Department’s financial management systems substantially comply with FFMIA and, if not, to develop remediation plans as applicable.

While FFMIA compliance centers on these three standards, it is not limited to them. For example, certain FFMSR are interrelated to and depend on other standards and requirements underpinning the Federal Managers' Financial Integrity Act, the Agency Chief Financial Officers (CFO) Act, the Federal Information Security Management Act of 2002 (FISMA), and Office of Management and Budget (OMB) Circular A-123 requirements.

1.2 Purpose

This chapter prescribes the Department’s policy for achieving compliance with FFMIA. It provides the basis for the implementation of FFMIA in order for the Department to generate timely, accurate, and useful financial information with which the Department leadership can make informed decisions and to ensure accountability on an ongoing basis.

1.3 Authoritative Guidance

The requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.1. Title 10, United States Code, section 2223(a)(5) (10 U.S.C. § 2223(a)(5)) “Information technology: additional responsibilities of Chief Information Officers”

1.3.2. 31 U.S.C § 1115 “Federal Government and agency performance plans.”

1.3.3. 31 U.S.C. § 3512, “Executive agency accounting and other financial management reports and plans”; with emphasis on sections 801 – 807 (FFMIA).

1.3.4. 31 U.S.C. Chapter 9 “Agency Chief Financial Officers.”

3-3

1.3.7. *OMB Bulletin No. 22-01*, “Audit Requirements for Federal Financial Statements.”

1.3.10. Statement on Standards for Attestation Engagements No. 18, *(SSAE 18, AT-C Section 320)* “Reporting on an Examination of Controls at a Service Organization Relevant to User Entities’ Internal Control Over Financial Reporting.”

1.3.13. *DoD Instruction (DoDI) 8510.01*, ”Risk Management Framework (RMF) for DoD Systems”

*2.0 DEFINITIONS

2.1 Financial Management System

Financial management systems include the financial systems and the financial portions of mixed systems necessary to support financial management, including automated and manual processes, procedures, controls, data hardware, software, and support personnel dedicated to the operation and maintenance of system functions. Both financial systems and mixed systems may directly or indirectly trigger a financial event within the system itself or in another system, and may be required to comply with some or all FFMSR.

2.2 Core Financial System

Core financial systems and financial systems are synonymous terms and consist of six functional areas: general ledger management, funds management, payment management, receivable management, cost management, and financial reporting. Core financial systems are comprised of one or more software programs (commonly referred to as applications), that are used for:
2.2.1. Collecting, processing, maintaining, transmitting, or reporting data about financial events;

2.2.2. Supporting financial planning or budgeting activities;

2.2.3. Accumulating and reporting costs information; or

2.2.4. Supporting the preparation of financial statements.

3.0 ACCOUNTING STANDARDS

3.1 System Transactions

3.1.1. The Department’s financial management systems must maintain accounting data at the transaction level. Financial management systems include both financial and mixed systems. All DoD financial events (budgetary and proprietary) must be recorded applying the requirements of the USSGL guidance in the TFM, and DoD USSGL transaction library (See Chapters 4 and 7 for additional guidance).

3.1.2. Every financial relevant business event that results in an automated transaction in a core financial system must general accurate and compliant postings to all relevant budgetary and proprietary general ledger accounts according to the rules defined in the DoD USSGL transaction library guidance.

3.2 FFMIA Compliance

In determining whether the Department’s financial management systems substantially comply with FFMIA, management and auditors must consider the degree to which a system’s performance prevents the Department from meeting the specific requirements of FFMIA as listed in paragraph 1.1. A system may be determined to be substantially compliant with FFMIA when it meets the requirements described in OMB Circular A-123, Appendix D, Attachment 1.

3.2.1. The DoD strategy for FFMIA compliance is integrated with related efforts to achieve auditability and maintain effective Internal Control over Reporting (ICOR) including Internal Control over Financial Reporting (ICOFR). Documentation that supports these related requirements also support FFMIA compliance and may be used to avoid duplication of efforts.

3.2.2. The DoD ICOFR Guide serves as a standard reference for users involved in financial reporting internal control activities within the DoD. This includes the annual requirements prescribed in the OMB Circular A-123, the FFMIA, and other applicable laws, regulations, and guidance. Its companion, the DoD Financial Statement Audit Guide is a reference for supporting internal controls based financial statement audits. A system is subject to FFMIA if it is determined to be ICOFR relevant as defined in the DoD ICOFR Guide and performs any business functions aligned to FFMIA compliance requirements, including the FFMSR.
3.2.3. The DoD ICOFR Guide identifies the specific Federal Information System Controls Audit Manual (FISCAM) control activities and techniques needed to address the key ICOR risk areas most likely to impact financial reporting based on the DoD’s experience. The remaining FISCAM control activities (identified as “Other Control Techniques for Consideration in a Financial Statement Audit”) should be considered by Components when evaluating federal financial systems’ compliance with laws and regulations, such as FFMIA and FISMA.

*3.3 Compliance Determination Framework

FFMIA Compliance Determination Framework (Framework) assists in providing incremental steps and is designed to walk the user from goal through risk assessment, to conclusion. The risk-based Framework assesses the financial systems integrity risk to comply substantially with FFMIA Section 803(a) requirements. The Framework includes performance results based on annual financial statements, the "Federal Financial Management System Requirements" contained in 1 TFM 6-9500, and other information considered relevant and appropriate. The Framework goals and compliance indicators must to be used during the ongoing operation of the Department’s financial management systems. (See OMB Circular A-123, Appendix D, Attachment 1 for additional guidance). The DoD ICOFR Guide defines mandatory practices for maintaining auditability subsequent to assertion and validation. These same practices must be applied to maintain compliance with FFMIA requirements.

*4.0 RESPONSIBILITIES

The responsibilities identified in this section are limited to those specific to FFMIA compliance and are not meant to be an exhaustive list of all of the responsibilities of these entities. This includes the authorities and framework that the Department employs to monitor, analyze, validate, integrate, and control FFMIA compliance requirements.

4.1 Office of the Under Secretary of Defense (Comptroller)

4.1.1. The Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) is supported by the Enterprise Financial Transformation (EFT), the Financial Improvement and Audit Remediation (FIAR) Directorate and the Financial Management Policy and Reporting (FMPR) Directorate. OUSD(C) is responsible for providing a Department-wide assessment of compliance with the requirements of FFMIA.

4.1.1.1. If the Component financial management systems do not substantially comply with the requirements of Section 803(c), the FFMIA requires that a remediation plan be developed, in consultation with OMB that describes the resources, remedies, and milestones for achieving substantial compliance.
4.1.1.2. OUSD(C) must annually report to OMB the progress made towards resolving identified deficiencies and such progress must be discussed in the Components remediation plan, capital planning and investment control plans, and other planning documents, when applicable. The findings or analysis of noncompliance must be included with a discussion of ongoing remediation activities. Progress towards resolving the deficiencies must not be construed as compliance with FFMIA.

4.1.1.3. Remediation plans are expected to bring the Department’s financial management systems into substantial compliance no later than three years after the date a non-compliance determination is made by OUSD(C) or its auditors. However, if OUSD(C), with the concurrence of OMB, determines that the Department’s financial management systems cannot be brought into substantial compliance within three years, the Component (in consultation with OUSD(C)) may specify a longer period. In either case, the Component must designate a Component official responsible for bringing the Component’s financial management systems into substantial compliance by the date specified and for reporting progress to EFT (acting on behalf of the Defense Business Systems Committee) on a scheduled basis.

4.1.2. EFT:

The Organization of EFT governs the DoD Advancing Analytics (Advana) repository of common enterprise data. See Chapter 10 for additional information about how EFT uses Advana to support FFMIA compliance activities. EFT also acquires, incorporates, and standardizes data to support the business domain areas that align with the organizational structure of the Department. As a result, EFT provides reasonable assurance to consumers that data controls are clearly defined and executed in accordance with FFMIA.

4.1.3. FIAR Directorate

The FIAR Directorate develops, publishes, and issues detailed financial improvement audit strategies, methodologies, and implementation guidance. The FIAR Director, monitors reporting entity FFMIA assertions made and provides internal control training to reporting entities on improving compliance with FFMIA. As a result, the FIAR Directorate, improves the quality of the financial information, with a positive audit opinion as the desired outcome.

4.1.4. FMPR Directorate

The FMPR Directorate develops, publishes, implements, and interprets DoD-wide accounting and finance policies; ensures the DoD Financial Management Regulation (DoD 7000.14-R) is consistent with laws and other applicable guidance. The FMPR Directorate, leads and oversees DoD financial integrity. As a result, FMPR develops, publishes, and interprets DoD-wide financial management improvements and guidance that supports statutory requirements for the Department to audit its full set of financial statements.
4.2 Director of Administration and Management

The Director of Administration and Management (DA&M) is the principal management office for the Secretary of Defense responsible for optimizing the business environment across the DoD enterprise. The DA&M delivers premier program management and oversight, security services, and support functions that enable uninterrupted operations of the Department Headquarters.

4.3 Components

4.3.1. Components must establish and maintain financial management systems that substantially comply with FFMIA Section 803(c) requirements. Component systems must be developed to generate reliable, timely and consistent information necessary for the Department to comply with FFMIA requirements. DoD systems must have the ability to prepare accurate, reliable, and timely financial statements and other required financial and budget reports using information generated by the financial management systems. Component management must annually test financial management systems for FFMIA compliance as required by OMB Circular A-123, Appendix D.

4.3.2. Components must maintain records of systems and transactional data to comply with FFMIA, financial statement audits, ICOFR, and Internal Control over Financial Systems in:

4.3.2.1. DoD Information Technology Portfolio Repository (DITPR). Components must ensure their financial system portfolio is accurately reported in DITPR. DoD financial systems must review, report, and update appropriately all DITPR FFMIA reporting requirements and DoD business enterprise architecture operational activity assertions that align to federal financial management functions on an annual bases in accordance with 10 U.S.C. § 2223(a)(5).

4.3.2.2. FIAR Systems Database (FSD). Components must utilize FSD to identify, capture, and report on the universe of financially-relevant systems for audits, executive leadership, and Congressional reporting requirements. Owners of each system must maintain the current status of FFMIA compliance in FSD to support annual FFMIA compliance and Department’s Annual SOA reporting.

4.3.2.3. Advana. Components must provide EFT with periodic (minimum quarterly) budgetary and proprietary transactional data for uploading to Advana. See Chapter 10 for additional information.

4.3.3. Components must use 1 TFM 6-9500 in the pre-acquisition, acquisition, and implementation of new financial management solutions (manual or automated). These federal financial management system requirements establish uniform financial systems, standards, and reporting that support the achievement of the DoD financial reporting objectives. In addition, Components must use the Federal Financial Management System Requirements in accordance with OMB Circular A-123.
4.3.3.1. Develop a plan in accordance with OMB Circular A-130, Appendix I.

4.3.3.2. Ensure the system portfolio and remediation plans are consistent with modernization priorities identified in 44 U.S.C. §3601.

4.3.4. Assess internal controls over business processes as well as Information Technology General Controls (ITGC) and IT Application Controls.

4.4 Service Organizations

Service Organizations must develop and maintain FFMIA compliance remediation plan in coordination with DoD Components. For each financial system and mixed system managed by Service Organizations a Memorandum of Agreement (MOA) must be established with each DoD Component. As part of the MOA, compliance testing must be conducted to support Component end-to-end business process testing. Service Organizations must provide Components with a Report on Controls at a Service Organization Relevant to User Entities' Internal Control over Financial Reporting and also known as a System and Organizational Controls 1 (SOC 1 Report). The SOC 1 Report evaluates the effect of the controls at the service organization on the user entities' controls for financial reporting.

4.5 Inspector General

The Office of the Inspector General performs FFMIA compliance evaluations as part of financial statement audits and/or oversees evaluations performed by independent public accounting firms during financial statement audits. This includes identifying in writing the nature and extent of non-compliance when appropriate. Inspector General reports to Congress instances and reasons when the Department has not met the intermediate target dates established in the remediation plan required under FFMIA Section 803(c).

4.6 Hosting Organizations

Hosting Organizations provide application hosting services for the DoDs service providers. As a result, hosting organizations are responsible for most of the ITGC over the computing environment in which many financial, personnel, and logistics applications reside. In order for service providers and components to rely on automated controls and documentation within these applications, controls must be appropriately and effectively designed.

CHAPTER 4
STANDARD FINANCIAL INFORMATION STRUCTURE

1.0 GENERAL

1.1 Overview

The Standard Financial Information Structure (SFIS) is a comprehensive data structure that supports requirements for budgeting, financial accounting, cost/performance, interoperability, and external reporting needs across the Department of Defense (DoD) enterprise. It is a common business language that enables budgeting, performance-based management, and the generation of financial statements. SFIS standardizes financial reporting across DoD and allows revenues and expenses to be reported by programs that align with major goals, rather than basing reporting primarily on appropriation categories. It also enables decision-makers to efficiently compare programs and their associated activities and costs across DoD and provides a basis for common valuation of DoD programs, assets, and liabilities. The SFIS matrix that defines each data element is available on the SFIS resources web page.

1.2 Purpose

This chapter prescribes the requirements for SFIS and Standard Line of Accounting (SLOA)/Accounting Classification compliance for DoD business systems. SFIS and SLOA/Accounting Classification compliance provides a means for DoD business systems to meet statutory requirements and additional requirements implemented by the Office of Management and Budget (OMB), and the United States Department of the Treasury (Treasury).

1.3 Authoritative Guidance

1.3.1 Title 10, United States Code (U.S.C.), section 2222(e)(3) (10 U.S.C. § 2222(e)(3)), Defense business systems: business process reengineering; enterprise architecture; management, requires the DoD Business Enterprise Architecture (BEA) include an information infrastructure that, at a minimum, enables DoD to:

1.3.1.1 Comply with all applicable law, including Federal accounting, financial management, and reporting requirements;

1.3.1.2 Routinely produce verifiable, timely, accurate, and reliable business and financial information for management purposes;

1.3.1.3 Integrate budget, accounting, and program information and systems; and

1.3.1.4 Identify whether each existing business system is a part of the business system environment outlined by the Defense BEA, will become a part of that environment with appropriate modification, or is not a part of that environment.
1.3.2. 10 U.S.C. § 2222(e)(3)(A) requires establishment of policies, procedures, business data standards, business performance measures, and business system interface requirements that are applied uniformly throughout DoD.

1.3.3. 31 U.S.C. § 902(a)(3), Authority and functions of agency Chief Financial Officer, requires agencies to develop and maintain an integrated agency accounting and financial management system, including financial reporting and internal controls that:

1.3.3.1. Complies with applicable accounting principles standards and requirements, and internal control standards;

1.3.3.2. Complies with such policies and requirements as may be prescribed by the Director of OMB;

1.3.3.3. Complies with any other requirements applicable to such systems; and

1.3.3.4. Provides for:

1.3.3.4.1. Complete, reliable, consistent, and timely information which is prepared on a uniform basis and which is responsive to the financial information needs of agency management;

1.3.3.4.2. The development and reporting of cost information;

1.3.3.4.3. The integration of accounting and budgeting information; and

1.3.3.4.4. The systematic measurement of performance.

1.3.4. The Federal Financial Management Improvement Act of 1996 (FFMIA) requires agencies to incorporate accounting standards and reporting objectives established for the Federal Government into financial management systems so that all the assets and liabilities, revenues, expenditures or expenses, and the full costs of programs and activities of the Federal Government are consistently and accurately recorded, monitored, and uniformly reported throughout the Federal Government.

1.3.5. The Government Performance and Results Act of 1993 (GPRA), as amended by the GPRA Modernization Act of 2010, requires annual performance reporting that links performance planned to performance achieved.

1.3.6. The OMB Circular A-123, Appendix D, provides FFMIA compliance guidance including the requirement for agencies’ financial management systems to reflect an agency-wide financial information classification structure that is consistent with the United States Standard General Ledger (USSGL). Application of the USSGL at the transaction level means that each time an approved transaction is recorded in a financial management system, it must generate the appropriate general ledger accounts for posting the transaction according to the rules defined in the USSGL guidance. OMB Circular 123, Appendix D was incorporated into Chapter 3.
1.3.7. The OMB, Office of Federal Financial Management requires, within each department or agency, standard accounting classification elements and definitions to ensure uniform and efficient accounting treatment, classification, and reporting.

2.0 DEFINITIONS

2.1 Business Enterprise Architecture

The BEA is the enterprise architecture for the DoD business mission area that guides and constrains implementation of interoperable Defense business system solutions as required by 10 U.S.C. § 2222. The BEA defines the DoD business transformation priorities, the business capabilities required to support those priorities, and the combinations of enterprise systems and initiatives that enable those capabilities. It is used to determine compliance for systems reviewed by the Defense Business Council (DBC) and includes the SFIS requirements. The BEA structure/framework was developed using a set of integrated DoD Architecture Framework products to include the All View, Operational View, Systems and Services View, and Technical Standards View. It includes activities, processes, data, information exchanges, business rules, system functions, system data exchanges, terms, and linkages to laws, regulations, and policies.

2.2 Financial Management System Types

This paragraph defines DoD financial management system types in the current environment for purposes of SFIS and SLOA/Accounting Classification compliance. See the Glossary for a complete definition of a financial management system and Chapter 3 for definitions of a financial system and a mixed system.

2.2.1. Target Accounting System. A target accounting system is configured to post transactions to an internal USSGL compliant subsidiary or general ledger and does not have a system retirement plan and date.

2.2.2. Target Financial Business Feeder System. A target financial business feeder system creates or processes transactions with financial impacts and exchanges accounting data with another business feeder system(s) and/or accounting system(s). This type of system does not qualify as a target accounting system and does not have a retirement plan and date.
2.2.3. **Legacy Accounting System.** Same definition as paragraph 2.2.1 except it has a retirement plan and date.

2.2.4. **Legacy Financial Business Feeder System.** Same definition as paragraph 2.2.2 except it has a retirement plan and date.

2.3 **Investment Review Process**

DoD implemented a business systems investment review process through the DBC. The DBC is the principal subsidiary governance body to the Deputy's Management Action Group (DMAG) for defense business operations. The DBC also assumes the role of the Department's Investment Review Board (IRB) for Defense Business Systems investments. A primary goal of the IRB process is to facilitate development and implementation of integrated business systems across DoD business functions and capabilities; thereby providing a framework for effective investment decision-making and enabling the Department’s senior leadership to guide investments to maximize the impact to the warfighter. SFIS/SLOA is a critical part of this process.

2.4 **SFIS Business Rules**

The SFIS business rules specify how SFIS data elements must be implemented and are the primary mechanism that drives SFIS compliance. The SFIS business rules dictate compliance requirements such as syntax, storage, derivation and usage.

2.5 **SFIS Compliance Checklist**

The SFIS Compliance Checklist is based on the SFIS business rules. DoD Components use the Checklist to document financial system compliance with the SFIS business rules. The Checklist provides the Office of the Secretary of Defense leadership, DoD Component program managers, and other financial and operations managers with a means for determining whether their accounting and financial business feeder systems comply with SFIS requirements.

2.6 **SFIS Values Library Service**

The SFIS Values Library Service houses allowable SFIS values for specific SFIS data elements. Systems must be compliant with the value lists as outlined in the data elements authoritative source. The SFIS Values Library Service is located on the OUSD(C)/Chief Financial Officer SFIS webpage.

2.7 **Standard Data**

Standard data relates to information that is transmitted, processed, maintained, and/or accessed in a standard format. It is a structured communication medium that is exchanged within and between entities and other groups for business transactions. The standards describe structures that emulate documents; e.g., purchase orders to automate purchasing. The standard data is also used to refer to the implementation and operation of systems and processes for creating,
transmitting, and receiving information. It simplifies the aggregation of data, limiting crosswalks and mapping procedures.

2.8 SLOA/Accounting Classification

The DoD SLOA/Accounting Classification is a subset of the SFIS data standard elements. The SLOA/Accounting Classification is comprised of the minimum SFIS data elements that must be exchanged for business events that have an accounting impact at any point from the initial commitment to the final posting in the appropriate general ledger. This includes commitments, obligations, expenditures, and disbursements. The SLOA accommodates Treasury reporting requirements for daily cash reporting.

3.0 COMPLIANCE REQUIREMENTS

3.1 SFIS

3.1.1. SFIS compliance is required for all target accounting systems and target financial business feeder systems that comprise the target environment, as identified in the Component’s Functional Strategy and Organization Execution Plan that support financial transactions. SFIS is also considered for legacy accounting systems and legacy financial business feeder systems on a case-by-case basis. SFIS provides an enterprise-wide standard for categorizing financial information along several dimensions to support financial management and financial reporting functions; enable decision-makers to efficiently compare similar programs and activities across DoD; and provide a level of detail required for information retrieval and auditability. SFIS is aligned to federal-wide standards, at summary levels, for federal-level financial statements.

3.1.2. Systems must meet all applicable SFIS Business Rules. SFIS data element transactions are required to be posted to the financial accounting system using the required USSGL accounts and accounting standards. DoD Component program managers are required to use the SFIS checklist to determine SFIS compliance and to guide implementation and configuration efforts.

3.2 SLOA/Accounting Classification

3.2.1. The DoD SLOA/Accounting Classification is a subset of SFIS data elements that is used to ensure accurate accounting transactions and interoperability between systems. The SLOA/Accounting Classification requirement is applicable for all systems that process business events with accounting impacts between the time of commitment through disbursement. This includes, but is not limited to, accounting, contract writing, logistics, civilian pay, military pay, travel, medical, and transportation. Target systems must send, receive, capture, store, and maintain the SLOA/Accounting Classification data constructed as discrete data. Further, systems must meet all applicable SFIS Business Rules.

3.2.2. For legacy accounting systems and legacy financial business feeder systems that have a retirement plan and date, the implementation of SFIS and SLOA/Accounting Classification is considered on a case-by-case basis depending upon its impact on audit readiness.
3.3 Interoperability of Data between Systems

Systems that support the financial management purchasing process such as contracts, intergovernmental orders, and payroll for audit readiness purposes must be interoperable with SLOA/Accounting Classification data elements. Supporting transactions are required to be posted to the target accounting system using proper USSGL accounts and accounting standards. A transaction broker and translation service may be used for legacy systems with a retirement plan and date to translate non-SFIS data elements to SFIS data elements.

3.4 Defense Departmental Reporting System SFIS Trial Balance

Target accounting systems must interface with the Defense Departmental Reporting System using an SFIS Compliant Trial Balance. The SFIS Compliant Trial Balance must meet all necessary USSGL and DoD financial reporting requirements.

4.0 ROLES AND RESPONSIBILITIES

4.1 Office of the Under Secretary of Defense (Comptroller)

The Office of the Under Secretary of Defense (Comptroller) (OUSD(C)):

4.1.1. Serves in a leadership role and establishes policy for the development of DoD enterprise business and financial systems to include SFIS implementation across DoD.

4.1.2. Is responsible for providing stewardship for SFIS financial data elements, and serves as a primary representative on the DMAG and DBC (reference paragraph 2.3).

4.1.3. Provides business and financial system insight on all issues presented at committee/board meetings and serves as the primary office of responsibility for actions stemming from the DMAG and the IRB.

4.1.4. Is responsible for publishing and maintaining the SFIS resources repository.

4.1.5. Works with DoD Components and Enterprise Resource Planning (ERP) integration teams to properly implement SFIS.

4.2 Office of the Chief Information Officer

The Office of the Chief Information Officer leads the extraction and analysis of data to support business reform as well as lead the operation of a DoD-wide data governance body to oversee the preparation, extraction, and provision of common, transparent enterprise data throughout the business enterprise, including coordination on all data standards, to include SFIS, cost management, and overall data management.
4.3 DoD Components

DoD Components are responsible for:

4.3.1. Implementing SFIS for all applicable systems and ensuring interoperability between systems that have a financial impact. This includes asserting compliance with SFIS by using the Compliance Checklist for SFIS and maintaining their systems consistent with SFIS requirements.

4.3.2. Ensuring that all financial management systems (as defined in the Glossary) provide complete, reliable, consistent and timely budgetary and proprietary transaction-level information in accordance with SFIS; and are recorded in general ledgers of the accounting systems of record to produce auditable budgetary, proprietary, and managerial cost accounting reports for use by external and internal stakeholders.

4.4 Defense Finance and Accounting Service

The Defense Finance and Accounting Service is responsible for maintaining the SFIS values library and ensuring all service provider applications and enterprise systems are compliant with SFIS.

5.0 SFIS RESOURCES

The SFIS web page contains several resources that define the SFIS requirements and provides tools to assist with compliance including the following:

5.0.1. SFIS Matrix (SFIS data elements, definitions, examples, business rules, syntaxes, primary stewards, authoritative sources, required reports, and Extensible Markup Language Schemas).

5.0.2. SFIS Compliance Checklist.

5.0.3. SFIS/Standard Line of Account/Accounting Classification.

5.0.4. SFIS Values Library Service.

5.0.5. SFIS Enterprise Resource Planning Standard Configurations.

5.0.6. DoD Accounting Scenarios.

5.0.7. DoD USSGL Transaction Library.

5.0.9. DoD Chart of Accounts Tie-Points Standard.
5.0.10. Defense Departmental Reporting System Chart of Account Guidance and Account Attribute Alignment Guidance

5.0.11. Archived DoD Chart of Account Guidance.

5.0.12. Authoritative Guidance Pertaining to SFIS (External Links).

CHAPTER 6

UNDER SECRETARY OF DEFENSE (COMPTROLLER) FINANCIAL MANAGEMENT AWARDS PROGRAM

1.0 GENERAL

1.1 Overview

The Under Secretary of Defense (Comptroller) (USD(C)) Financial Management Awards Program is a respected program that recognizes and acknowledges the significant contributions of both civilian and military members of the financial management (FM) community. This chapter outlines award categories and descriptions, award criteria, and individual responsibilities associated with the program.

1.2 Purpose

The purpose of the USD(C) Financial Management Awards Program is to recognize significant contributions of individuals or teams to financial management improvement.

1.3 Authoritative Guidance

1.3.1 The Government Employees Incentive Awards Act at Title 5, United States Code, section 4503 5 U.S.C. § 4503 authorizes agency heads to award an honorary recognition to an employee who contributes to the efficiency, economy, or other improvement of government operations or achieves a significant reduction in paperwork or performs a special act or service in the public interest in connection with or related to his official employment. 10 U.S.C. § 1125 authorizes the Secretary of Defense to award medals, trophies, badges, and similar devices to members, units, or agencies of an armed force under his jurisdiction for excellence in accomplishments.

1.3.2 10 U.S.C. § 240b (Statutory Notes and Related Subsidiaries) provides that “the Under Secretary of Defense (Comptroller), acting through the Deputy Chief Financial Officer of the Department of Defense, will develop and issue guidance to provide incentives for the achievement by each department, agency, and other Component of the Department of Defense of unqualified audit opinions on their financial statements”.

2.0 POLICY

2.1 Military and Civilian Members

Military and civilian members who make outstanding contributions to the improvement of DoD FM may be recognized.
2.2. Awards

Recognition for their significant contribution(s) during the preceding calendar year, in the form of a memento such as an engraved plaque, **will** be presented to, and retained by, the individual and team within each award category. Awards are conferred in the following **categories**:

2.2.1. Contributions to Workforce Development:

   2.2.1.1. Individual at Headquarters and Major Command Level
   2.2.1.2. Individual below Headquarters and Major Command Level
   2.2.1.3. Team at Headquarters and Major Command Level
   2.2.1.4. Team below Headquarters and Major Command Level

2.2.2. Contributions to Taxpayer Dollar Optimization:

   2.2.2.1. Individual at Headquarters and Major Command Level
   2.2.2.2. Individual below Headquarters and Major Command Level
   2.2.2.3. Team at Headquarters and Major Command Level
   2.2.2.4. Team below Headquarters and Major Command Level

2.2.3. Contributions to Financial Integrity and Audit Results:

   2.2.3.1. Individual at Headquarters and Major Command Level
   2.2.3.2. Individual below Headquarters and Major Command Level
   2.2.3.3. Team at Headquarters and Major Command Level
   2.2.3.4. Team below Headquarters and Major Command Level

2.2.4. Contributions to End-to-End Business Environment Optimization:

   2.2.4.1. Individual at Headquarters and Major Command Level
   2.2.4.2. Individual below Headquarters and Major Command Level
   2.2.4.3. Team at Headquarters and Major Command Level
   2.2.4.4. Team below Headquarters and Major Command Level
2.2.5. Contributions to Data-Driven Decision-Making:

2.2.5.1. Individual at Headquarters and Major Command Level

2.2.5.2. Individual below Headquarters and Major Command Level

2.2.5.3. Team at Headquarters and Major Command Level

2.2.5.4. Team below Headquarters and Major Command Level

2.2.6. Contributions to Financial Management in a Contingency Operation:

2.2.6.1. Individual at any level

2.2.6.2. Team at any level

2.3. USD(C) Salute to Excellence in Government Service

These awards specifically allow the USD(C) to recognize an individual or team whose efforts throughout the past calendar year have made exceptional contributions in Savings and Innovation. The Board members will recommend to USD(C) for selection winners of these awards from among the nominations submitted in the categories in subparagraphs 2.2.1 through 2.2.6.

2.3.1. USD(C) Salute to Excellence in Government Service – Exceptional Savings. This category recognizes either an individual or team whose actions have resulted in a significant savings to the taxpayer.

2.3.2. USD(C) Salute to Excellence in Government Service – Exceptional Innovation. This category recognizes either an individual or team whose actions have resulted in significant innovations in Financial Management.

2.4. Program Applicability

The Program applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Combatant Commands, the Office of the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities, and all other organizational entities within the DoD (hereafter referred to collectively as “the DoD Components”). The individual or team’s accomplishment must have occurred within the preceding calendar year.

2.5. Nomination Categories

Any military member or DoD civilian employee (to include Reserve Components) is eligible for nomination. General/Flag Officers, Senior Executive Service, and contractors cannot be nominated for individual awards, but can be named and recognized as members of team awards.
3.0 AWARD LEVELS, TYPES, AND CATEGORIES

3.1 Award Levels

The two award levels in the USD(C) Financial Management Awards Program are:

3.1.1 Headquarters level and Major Command level.

3.1.1.1 Headquarters level is defined as the headquarters of a Military Service Department, Defense Agency, or Field Activity.

3.1.1.2 Major Command Level is defined as the highest level of command below headquarters level within the Military Department. For the Defense Agencies and Field Activities, Major Command level is based on the organization’s structure, not the nature of the work covered by the award. Major Command level refers to the next level of subordinate organizations to the Headquarters location. Table 6-1 provides examples.

3.1.2 Below Major Command level includes any organization not meeting the requirements to be considered Headquarters and Major Command level. For Defense Agencies and Field Activities, this includes regional offices or other organizations subordinate to the Headquarters or Major Command level. Table 6-1 provides examples.

3.2. Award Types

The two award types in the USD(C) Financial Management Awards Program are:

3.2.1. Individual awards: Given to one person at the Headquarters and Major Command level and Below Major Command level as listed in subparagraphs 2.2.1 through 2.2.6.

3.2.2. Team awards: Given to one team at the Headquarters and Major Command level and the Below Major Command level as listed in subparagraphs 2.2.1 through 2.2.6. Teams are made up of 2 to 20 individuals brought together to perform a specific task within a specific time frame. Teams of greater than 20 individuals are not eligible for these awards. The team lead must be one of the 20 members of the team. Contractors cannot comprise more than 20 percent of the team. Contractors cannot use these awards as support for performance clauses in contracts.

3.3. Award Categories

The award categories in the USD(C) Financial Management Awards Program are:

3.3.1. Contributions to Workforce Development. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions to building and maintaining a premier FM workforce; optimizing and evolving FM training solutions: or fostering an FM community of practice. Improvements may be in areas such as workforce development, innovative practices in recruiting and retention, and training and information sharing. Examples of appropriate efforts include:

   3.3.1.1. Establishing an innovative training program to improve workforce proficiency in a key area of critical competencies.

   3.3.1.2. Establishing a program to improve recruiting, employee engagement, satisfaction, and retention.

   3.3.1.3. Establishing forums to implement best practices and accomplishments.

   3.3.1.4. Instituting a mentorship or partnership program to help guide the future development of workforce members.

3.3.2. Contributions to Taxpayer Dollar Optimization. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions to optimizing support to the budget and execution process; innovating cost, performance, and risk management; or fostering a high integrity funds control environment. Improvements may be in areas such as budget formulation, budget execution, cost management, or accountable financial stewardship. Examples of appropriate efforts include:

   3.3.2.1. Refining the budget to execution process to optimize mission capability with agility.
3.3.2.2. Creating efficiencies through new guidance and/or reducing outdated regulations, processes, and policies.

3.3.2.3. Delivering innovative financial cost, performance, and enterprise risk management insights to improve resource budgeting and forecasting activity.

3.3.2.4. Improving fiscal control over assets, dissemination of funds, budget execution tracking, and funds realignment through innovative solutions.

3.3.3. Contributions to Financial Integrity and Audit Results. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions toward remediating material weaknesses aligned with the Department’s audit priorities to accelerate its path to an unmodified audit opinion. Improvements may be in areas such as increasing the number of favorable (unmodified or qualified) financial statement or Statement on Standards for Attestation Engagements No. 18 audit opinions, implementing end-to-end business process reengineering efforts leading to improved auditability for a priority area, innovating processes and improving controls to reduce undistributed disbursements and or collections in a timely manner, and developing innovations to achieve unmodified audit opinions. When considering this category, reference 10 U.S.C. § 240b “Incentives for the Achievement by the Components of the Department of Defense of Unqualified Audit Opinions on the Financial Statements.” Examples of appropriate efforts include:

3.3.3.1. Developing innovations to support achieving unmodified audit opinions.

3.3.3.2. Closing a notice of finding and recommendation related to a priority area.

3.3.3.3. Closing or downgrading a material weakness related to a priority area.

3.3.3.4. Implementing effective improvements to controls over financial reporting for a priority area.

3.3.4. Contributions to End-to-End Business Environment Optimization. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions to automating FM operations and the identification of business processes that will form tomorrow’s environment. Improvements may be in areas such as system security, leveraging innovative digital and automation solutions, or simplifying FM regulation and policy. Examples of appropriate efforts include:

3.3.4.1. Retiring legacy systems and accelerating optimization of modern enterprise solutions.

3.3.4.2. Increasing automation of repeatable processes and interfaces between enduring systems.
3.3.4.3. Simplifying regulations or policies that address barriers to fully enable standardization.

3.3.5. Contributions to Data-Driven Decision-Making. This category recognizes one individual and one team, at each of the two award levels, who have made significant contributions to innovating and empowering data-driven, fiscally informed decision-making; driving universal use of secure, single-source reporting; or instilling confidence in FM data for decision-making. Improvements may be in areas such as improving financial data management standards, increasing data analytics capabilities, and enhancing the usage of real-time data to support decision-making through innovative practices. Examples of appropriate efforts include:

3.3.5.1. Improving the quality of data and universal data management and modeling standards.

3.3.5.2. Developing innovative methods to increase access to real-time data.

3.3.5.3. Supporting a Universe of Transaction balance as a percentage of financial statement balances.

3.3.6. Contributions to Financial Management in a Contingency Operation. This category recognizes one individual and one team, at any level, who have made significant contributions to modernize and improve financial management while in support of a contingency operation. Improvements can be in auditing, accounting, budget, cost analysis, workforce development, and other Financial Management fields. Examples of appropriate efforts include:

3.3.6.1. Implementing controls that improve auditability of funds managed in the contingency operation.

3.3.6.2. Changing and/or reengineering a process or steps of a process to make the process better, faster, and/or less expensive by using technology as an enabler in a contingency operation.

3.3.6.3. Identifying, proposing, and implementing an improvement to a problem, project, or effort using analysis to better utilize resources and improve mission effectiveness in a contingency operation.

3.3.7. USD(C) Salute to Excellence in Government Service. These awards specifically allow the USD(C) to recognize an individual or team whose efforts throughout the past calendar year have made exceptional contributions in Savings and Innovation. The Board members will recommend to USD(C) for selection winners of these awards from among the nominations submitted in the categories in paragraphs 2.3.

3.3.7.1. USD(C) Salute to Excellence in Government Service - Exceptional Savings. This category recognizes either an individual or team whose actions have resulted in a significant savings to the taxpayer.
3.3.7.2. USD(C) Salute to Excellence in Government Service - Exceptional Innovation. This category recognizes either an individual or team whose actions have resulted in significant innovations in Financial Management.

4.0 RESPONSIBILITIES

4.1 The USD(C):

4.1.1. Will select awards recipients for each category, type, and level.

4.1.2. May select one or more recipients for the USD(C) Salute to Savings Award from among the pool of nominations submitted in the other six categories.

4.1.3. Will present awards to each recipient.

4.1.4. Will release an annual memorandum announcing any changes to this regulation, call for the submission of nominations for this awards program, and delineate the nomination and review timeline.

4.2 The OUSD(C) Human Capital Resource Management Director (HCRM):

4.2.1. Will annually convene a Financial Management Awards Program Board to review nominations from the DoD Components.

4.2.2. Will make award recommendations to the USD(C).

4.2.3. Will appoint a representative from among the Defense Agencies and DoD Field Activities (other than the Defense Finance and Accounting Service (DFAS)) to the FM Awards Program Board.

4.2.4. Will ensure OUSD(C) Financial Improvement and Audit Remediation Director (FIAR) is represented on the FM Awards Program Board.

4.3 Heads of the Military Departments and DFAS

Will each select a representative to the Financial Management Awards Program Board and notify the Director, HCRM in accordance with the annual USD(C) memorandum, of the representative selected from their Component.

4.4 DoD Component Heads

4.4.1. Will encourage the nomination of individuals and teams for the Financial Management Awards in accordance with the procedures and criteria in Section 5.0.

4.4.2. Will appoint a Final Reviewer by email for all nominations submitted by members of their Component in accordance with the annual call memorandum.
4.5 The Financial Management Awards Program Board

4.5.1. Is chaired by the OUSD(C) HCRM Director, or designee.

4.5.2. Is comprised of one voting representative from each of the Military Departments, DFAS, one from the Defense-wide community, which encompasses all other Defense Agencies and DoD Field Activities, and the OUSD(C) FIAR Director. Members will not delegate attendance of the Board Member meeting. Members will not serve more than two consecutive terms with exception of the OUSD(C) FIAR Director.

4.5.3. Is comprised of members of the Senior Executive Service, general/flag officers, and/or E-9s.

4.5.4. Members must not be the Nominating Officials for any of the award nominations submitted.

4.5.5. Is convened annually to evaluate nominations and make recommendations for winners in each award category based on the criteria in paragraph 5.1.

4.6 Final Reviewers

4.6.1. Are responsible for vetting the nominations prior to submission to the Board. Nominations must be examined for duplications, incomplete submissions, and noncompliance with instructions.

4.6.2. May not be a Nominating Official.

4.6.3. Are responsible for approving or denying each nomination submitted for their Component before all nominations are due to OUSD(C). Only approved nominations will go before the Board.

4.7 The Nominating Official:

4.7.1. Will review each one of their nominations ensuring nominee names and contact information are correct and accurate.

4.7.2. Will certify, by electronic signature, that each submission complies with the nomination submission instructions outlined on FM Online.

4.8 The Supervisor:

4.8.1. Will consider members of their workforce whose achievements merit recognition in the USD(C) FM Awards Program.

4.8.2. Will serve as the Nominating Official for appropriate nominations.
4.9 The Submitter:

4.9.1. Will input all data into the nomination template for the appropriate nomination in accordance with the procedures and criteria in this chapter and on FM Online as directed by the Nominating Official.

4.9.2. May be the same person as the Nominating Official.

5.0 AWARD CRITERIA AND NOMINATION INFORMATION

The award criteria and nomination information for the DoD Financial Management Awards are as follows:

5.1 Award Criteria

Nominations for DoD Financial Management Awards must be based on individual or team achievements during the preceding calendar year. Board Members will evaluate nominations, assigning a numeric score, after considering the following criteria:

5.1.1. Scope and Significance, examples include:

5.1.1.1. DoD Enterprise / Warfighter / Mission Impact

5.1.1.2. Fiscal Stewardship (cost/manpower savings, cost avoidance)

5.1.1.3. Results were Actionable and Repeatable

5.1.1.4. FM Workforce Development and or Strategic Partnering Improvement

5.1.1.5. Focused on Outcomes – maximizing dollars spent and funding priorities

5.1.1.6. Embraced innovation by streamlining automation solutions

5.2 Nomination Information

For specifics on procedures for submitting nominations refer to FM Online. Information included in the nominations is used for formal recognition.

5.2.1. Nominations should be written to a broad and diverse audience.

5.2.2. Nominations should be written in a concise manner that clearly describes the impact. Limit use of acronyms or superlative wording.

5.2.3. DoD Components may not submit more than one nomination for the same achievements. For example:
5.2.3.1. A DoD Component may not submit a team nomination and an individual nomination for the same achievements.

5.2.3.2. A DoD Component may not submit a nomination, either team or individual, with the same achievements, for different award categories, types, or levels.

5.2.4. For Team awards, DoD Components may identify additional personnel from other DoD Components who participated in the actions leading to the recognized achievements. The addition of other DoD Components to an award does not affect the nomination restrictions set in paragraph 5.3.

5.3 Submission of Nominations

5.3.1. Heads of DoD Components must submit nominations to the OUSD(C) HCRM Director via the OUSD(C) awards nomination site.

5.3.2. OUSD(C) HCRM must receive nominations by the date designated in the memorandum sent to the Components.

5.3.3. Final Reviewers must review nominations by the date designated in the memorandum sent to the Components. OUSD(C) HCRM will not accept nomination edits after the end of the review period.

5.3.4. Heads of DoD Components are restricted in the number of nominations they can submit for consideration in each Category, Type, and Level:

5.3.4.1. DoD Components with an FM workforce of at least 1,000 personnel can submit up to two nominations per Category, Type, and Level; allowing a maximum of 44 nominations.

5.3.4.2. DoD Components with an FM workforce of fewer than 1,000 personnel can submit up to one nomination per Category, Type, and Level; allowing a maximum of 22 nominations.

5.3.4.3. Combatant Command Support Agents may submit one nomination per Category, Type, and Level for personnel serving in the Headquarters of a Unified Combatant Command. These nominations will compete as Combatant Command nominations.

5.3.5. Components may not submit nominations for the USD(C) Salute to Savings award category. The USD(C) will select winners for this category from among the pool of nominations submitted in the other six award categories.

5.4 Nomination Responsibilities

Responsibility for individual and team award nominations is vested with the DoD Component owning the position of the person being nominated.
5.5 Individual and Team Awards

Each individual award recipient will receive a memento such as an engraved plaque. Each team will receive a single memento such as an engraved plaque, while team members will each receive a memento such as a certificate.

CHAPTER 7

DEPARTMENT OF DEFENSE STANDARD CHART OF ACCOUNTS

1.0 GENERAL

1.1 Purpose

This chapter prescribes the Department of Defense (DoD) Standard Chart of Accounts (SCOA) requirements that are based on United States Standard General Ledger (USSGL) general requirements. The SCOA prescribes the mandatory general ledger accounts for all DoD accounting systems and all budgetary and proprietary transactions.

1.2 Authoritative Guidance

1.2.1. The Federal Financial Management Improvement Act of 1996 (FFMIA) requires agencies to implement and maintain financial management systems that comply with the USSGL at the transaction-level. See Chapter 3 for FFMIA compliance information.

1.2.2. The United States Department of the Treasury (Treasury) Financial Manual (TFM) prescribes the USSGL requirements. The USSGL is a TFM Supplement that prescribes the structure for budgetary and proprietary accounts at the 6-digit USSGL account level. Because central agency reporting requires a lower level of detail, the USSGL Board developed attributes containing domain values that, when added to a basic 6-digit USSGL account, provide the appropriate level of detail needed for central agency reporting. Treasury issues bulletins at least annually notifying agencies of changes to the USSGL Supplements that are effective immediately and later codified in the TFM. As part of the overall Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS) reporting requirements, the USSGL guidance contains seven major sections:

I. Chart of Accounts,
II. Accounts and Definitions,
III. Account Transactions,
IV. Account Attributes for USSGL Proprietary Account and Budgetary Account Reporting,
V. Crosswalks to Standard External Reports for FY 20XX\(^1\) GTAS Reporting,
VI. Crosswalks to Reclassified Statements for FY 20XX Reporting, and
VII. GTAS Validations and Edits for FY 20XX Reporting.

1.2.3. Office of Management and Budget (OMB) Circular A-123 Appendix D, “Compliance with the Federal Financial Management Improvement Act,” requires that agencies record financial events in the core accounting systems, applying the requirements of the USSGL.

\(^{1}\) “XX” represents the applicable fiscal year.
2.0 DEFINITIONS

2.1 Standard Financial Information Structure

2.1.1. The **Standard Financial Information Structure** (SFIS) is a comprehensive data structure that supports requirements for budgeting, financial accounting, cost/performance, and external reporting needs. The SCOA is a key element in the SFIS data structure. The SCOA and other SFIS products are published on the SFIS web page. **Also**, see Chapter 4.

2.2 DoD Standard Chart of Accounts SFIS Attribute Alignment File

The SFIS Attribute Alignment File (“FY20XX DoD SCOA Account Attribute Alignment File”) identifies standard interface file format requirements for the Defense Departmental Reporting System (DDRS), providing a means to determine which SFIS data element and value combinations are necessary for consistent financial reporting. For each Standard General Ledger (SGL) account, the Attribute Alignment File identifies additional SFIS data elements required for financial reporting **and** which value combinations are permissible for SFIS attributes. The file and corresponding instructions are available on the SFIS web page.

2.3 Tie-Point Reconciliations

Tie-Point Reconciliations, also referred to as “Tie-Points,” are a series of standard USSGL accounting relationships, i.e., financial management equations that facilitates the validation of trial balance data. The SCOA Tie-Points are revised annually and published on the SFIS web page. Tie-Points indicate whether certain account balances within a general ledger trial balance are consistent with other account balances. Components and accounting service providers must combine budgetary and proprietary general ledgers to a self-balancing trial balance and conduct edits and Tie-Point validations prior to reporting data in the DDRS. **Components** must expeditiously resolve unreconciled Tie-Points **in** support of accurate and reliable agency-wide trial balances to Treasury via GTAS for consolidation into the Governmentwide financial statements.

2.4 Financial System

A financial system is an information system or set of applications that maintains all summary and detailed financial events resulting from budgetary and proprietary activity. The system must record at the transaction-level to the appropriate general ledger accounts. See FFMIA section 803(a) and OMB Circular A-123, Appendix D.

3.0 ACCOUNT DESIGN

3.1 DoD SCOA

The SCOA is comprised of budgetary and proprietary USSGL accounts and related DoD standard account extensions required **for** consistent USSGL implementation, Component trial balance consolidation, and compliance with OMB and Treasury budgetary and financial reporting
requirements. The Office of the Under Secretary of Defense (Comptroller)/Chief Financial Officer (OUSD(C)/CFO) issues enterprise-wide implementation guidance to:

3.1.1. Reduce customization of accounting systems,

3.1.2. Eliminate departmental reporting system translations and account value crosswalks,

3.1.3. Improve comparability of data across accounting systems, and

3.1.4. Improve consolidation of data across accounting systems for DoD-wide reporting.

3.2 Account Structure

The basic COA structure consists of a 6-digit USSGL account number followed by a period and a 4-digit DoD account extension. SGL accounts with an extension of “.9000” (e.g., 101000.9000, 211000.9000) are identified as Treasury level USSGL accounts. SGL accounts with extensions other than .9000 are DoD specified accounts. The basic structure of the DoD SCOA follows that of the USSGL. The basic 6-digit structure of the USSGL consists of:

100000 Assets
200000 Liabilities
300000 Net Position
400000 Budgetary
500000 Revenue and Other Financing Sources
600000 Expenses
700000 Gains/Losses/Miscellaneous Items
800000 Memorandum

3.3 DoD USSGL Transaction Library

3.3.1. The Library establishes enterprise-wide implementation requirements and provides a framework with detailed transaction and posting rules for updating existing financial systems and deploying new accounting systems.

3.3.2. The Library is a decomposition of the accounting transactions from the TFM, Part 1, Section III USSGL Supplement, that provides both budgetary and proprietary accounting entries for events occurring throughout the federal government. The Library organizes generalized Treasury USSGL business event transactions into appropriate pairings of budgetary, proprietary, and memorandum accounts uniquely identified by DoD Transaction Codes (DTCs).

3.3.3. **Components** must not group multiple DTCs into one transactional posting, so that the individual transaction posts separately and supports each business event and is uniquely identified in the business process. While Component financial systems are not required to store and maintain the exact DTC reference used in the Library for each posted transaction, Component or agency financial systems must maintain a chart of accounts and utilize general ledger posting logic that produces the same business event result as the DoD USSGL Transaction Library.
3.3.4. The SCOA, USSGL Transaction Library, Account Attribute Alignment File, and Tie-Points are updated as applicable following each corresponding Treasury update to ensure DoD policy aligns with the current USSGL Supplement.

3.4 Reporting

3.4.1. All DoD accounting systems must report financial transactions to DDRS using the account structure of the SCOA. Detailed attribute alignment at the SGL account level is updated concurrently with the SCOA.

3.4.2. Components must implement the SCOA to satisfy both internal and external reporting requirements. For external reporting, all budgetary and proprietary financial reporting data are summarized in DDRS into the six-digit USSGL accounts and GTAS standard attributes.

3.4.3. Components must ensure systems provide complete, reliable, consistent, and timely budgetary and proprietary transaction-level information and are recorded in accounting systems of record general ledgers to produce auditable budgetary, proprietary, and managerial cost accounting reports for internal and external stakeholders.

4.0 ACCOUNT RELATIONSHIPS

4.1 Budgetary and Proprietary Accounts

4.1.1. The SGL account structure provides a self-balancing set of budgetary accounts to record the appropriation, apportionment, allotment, allocation, commitment, obligation, and expenditure process. The SCOA is driven by debit and credit normal balance indicators, so debits should always equal credits. The budgetary total and budgetary resources accounts should always equal the total status of budgetary resources accounts.

4.1.2. The SGL account structure provides a self-balancing set of proprietary accounts to report the results of operations and net position. Proprietary asset and liability accounts cover the collection and disbursement of funds, the proper classification of assets (e.g., Fund Balance with Treasury, receivables, advances and prepayments, inventory, and fixed assets), and the recognition and proper classification of liabilities. Revenue and expense accounts measure the realization of revenues from the sale of goods and services, and the recognition of costs, including gains and losses through the use and consumption of assets. Total asset accounts should always equal total liability accounts plus net position.

4.1.3. Accurate posting of budgetary and proprietary transactions to the SGL enables budgetary, proprietary, and managerial cost accounting essential for good stewardship, proper financial control over resources, and financial reporting.

4.2 Accounts Applicable to Fund Type

4.2.1. The SCOA identifies SGL accounts applicable to General Fund, Working Capital Fund (WCF), and Special and Trust Funds. The SCOA also identifies those USSGL accounts that are not applicable to the DoD.
4.2.2. Component accounting systems must incorporate, at a minimum, those SGL accounts and posting logic for applicable business processes and transactions. For example, general fund accounting systems must include, at a minimum, accounts designated as applicable to general funds, and not those restricted to working capital or special/trust fund systems. Similarly, WCF accounting systems must include accounts designated as applicable to WCF but not those accounts restricted to general or special/trust fund systems. Combined systems handling both general and WCF must include both general and working capital general ledger accounts, but not those accounts restricted to special/trust fund systems. Components are not required to add accounts designated as not applicable for DoD.

4.3 Account Attributes

4.3.1. The account attributes required for Treasury reporting of both budgetary and proprietary account information are defined in the TFM USSGL Supplement, Section IV, USSGL Account Attributes.

4.3.2. The data structure for each SGL account attribute is defined in the SFIS Matrix, to include syntax and allowable values. The SFIS Matrix and the SFIS Values Library are located on the SFIS web page.

4.3.3. When including specific general ledger accounts in an accounting system, all attributes assigned to the specific general ledger accounts must also be included and correctly aligned to those accounts.

4.3.4. Allowable values for each SGL account attribute are identified and defined at the SGL account level in the SCOA Attribute Alignment File published on the SFIS web page.

4.4 Request for Account Exemption

4.4.1. A Component’s specific mission area may allow for an accounting system exemption to certain SGL accounts. Components must request an exemption from standard DoD account alignment based on business processes and transactions within a specific fund type.

* 4.4.2. The SCOA is re-published annually with updates. Component system owners must review existing accounts and submit any changes or revisions to the OUSD(C)/CFO) within 30 days of the SCOA update.
4.5 DoD Assigned USSGL Accounts

The SCOA includes five specific accounts for recording internal fund distributions within direct program authority (see Figure 7-1). Refer to Volume 3, Chapters 13, 14, and 15 for policy on the use and application of these accounts at the Department and execution levels. Funds distribution guidance for the Military Services and Office of the Secretary of Defense Treasury Index-97 organizations is located at SFIS under the “DoD Accounting Scenarios” section.

Figure 7-1. DoD Assigned Accounts for Internal Fund Distributions

Account Number: 454000.9000
Account Title: Internal Fund Distributions Issued
Normal Balance: Credit

Definition: The amount of direct budgetary authority allotted from department, headquarters, or Office of the Secretary of Defense (OSD) level to intermediate or execution level, as determined by organizational funding structure.

Account Number: 455000.9000
Account Title: Internal Fund Distributions Received
Normal Balance: Debit

Definition: The amount of direct budgetary authority received from department, headquarters, or OSD level by an intermediate level component.

Account Number: 456000.9000
Account Title: Funds Available for Allotment
Normal Balance: Credit

Definition: The amount of direct budgetary authority available at an intermediate level component for allotment to execution level component(s) or for suballotment to other intermediate level component(s).

Account Number: 457000.9000
Account Title: Allotments Issued
Normal Balance: Credit

Definition: The amount of direct budgetary authority either allotted by an intermediate level component to an execution level component(s), or suballotted between two or more intermediate or execution level components.

Account Number: 458000.9000
Account Title: Allotments Received
Normal Balance: Debit

Definition: The amount of direct budgetary authority received by an execution level component through either allotment or suballotment of authority.

FIGURE 9-1. MINIMUM RETENTION PERIODS ......................................................... 6
CHAPTER 9

FINANCIAL RECORDS RETENTION

1.0 GENERAL

1.1 Purpose

This chapter identifies the proper retention period for financial records. This policy applies only to the records supporting financial transactions and financial statement balances or necessary to document evidence of effective internal controls over financial reporting (e.g., reviews and approvals). This policy does not apply to related management records, such as maintenance logs, and other documents important for proper management of Department of Defense (DoD) operations but incidental to the support of financial transactions and balances, unless the records are being used as secondary evidence to support financial transactions and balances.

1.2 Authoritative Guidance

1.2.1. The National Archives and Records Administration (NARA) promulgates requirements for the management and disposal of all United States (U.S.) Government records.

1.2.1.2. NARA’s disposal guidance for administrative records are outlined in General Records Schedule (GRS) 5.7, “Administrative Management and Oversight Records.”

1.2.2. Federal Acquisition Regulations (FAR), Part 4.805 provides procedures and schedules for storage, handling, and disposal of contracting office records.

1.2.3. The DoD records management policy and responsibilities are outlined in DoD Instruction 5015.02, “DoD Records Management Program.”

1.2.3.1. Within DoD, there are several Records Management Programs, each with an appointed Federal Agency Records Officer; Records Management Manual, Instruction, or Regulation; and Records Disposition Schedules (RDS). NARA approves all records identified in DoD’s RDS, which can contain additional financial records used in DoD business operations that are not listed in the NARA GRS.

1.2.3.2. The DoD Directive 3210.06, “Defense Grant and Agreement Regulatory System,” provides for the collection, retention, and dissemination of management and fiscal data related to grants activities.

1.2.3.3. The DoD Guidebook for Miscellaneous Payments provides guidance on supporting financial documentation for miscellaneous transactions.
2.0    RETENTION REQUIREMENTS

2.1    Record Retention Requirements

2.1.1.    Title 44 United States Code Section 3301 defines the term “records” to include all recorded information, regardless of form or characteristics, made or received by a Federal agency under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the U.S. Government or because of the informational value of data in them. Records do not include library and museum material made or acquired and preserved solely for reference or exhibition purposes; or duplicate copies of records preserved only for convenience.

2.1.2.    NARA GRS 1.1, “Financial Management and Reporting Records”

2.1.2.1.    GRS 1.1 provides disposition authority for records created and received in the course of carrying out an agency’s financial management and reporting responsibilities. Financial management includes procuring goods and services, paying bills, collecting debts, accounting for all financial transactions, and monitoring net worth.

2.1.2.1.1.    GRS 1.1 covers financial records of grants and cooperative agreements. The administrative records of grants and agreements are covered in GRS 1.2.

2.1.2.1.2.    GRS 1.1 covers financial transactions and reporting records. Records for financial planning (i.e., budgeting records) are covered under GRS 1.3.

2.1.2.1.3.    GRS 1.1 covers contract records maintained by Federal agencies. Contractor-maintained contract records are governed by FAR, Part 4, Subpart 4.7.

2.1.2.1.4.    GRS 1.1 covers financial transactions as an administrative function common to all agencies, but not administrative records documenting unique agency missions, such as student loan collection or seeking reimbursement for Superfund cleanups.

2.1.2.2.    Each record noted within the GRS includes the item number, the records description, the disposition instructions that describe the point at which an item can be destroyed (unless longer retention is authorized and required for “business use”), and the disposition authority for records created and received in the course of carrying out an agency’s financial management and reporting responsibilities.
2.1.3. Figure 9-1 provides general guidelines for minimum retention periods by assessable unit in support of the DoD-wide financial statement audit. Supporting a financial statement audit is an example of “business use” where documentation must be retained for a longer period of time than required by NARA in order to preclude a scope limitation. During an audit, management must furnish a written representation as to the availability of all financial records and related data and the auditors must obtain a reasonable basis for an opinion. These guidelines must be supplemented by professional judgment that considers the specific circumstances related to each financial transaction. For records supporting financial statement audits and held for purposes other than a financial statement audit that require a longer retention period, continue to follow appropriate document retention guidance. At a minimum, Components must comply with NARA and the DoD Records Management Program requirements.

2.1.4. Consult your DoD appointed Federal Records Officer for additional guidance regarding record retention.

2.2 Documentation Requirements

Component financial transaction records must be prepared, retained, and, at a minimum, support the following:

2.2.1. Authority. Evidence the transaction was approved and/or certified in accordance with established requirements.

2.2.2. Amount. Evidence of transactions dollar values.

2.2.3. Date. Evidence of transaction dates to ensure transactions are recorded in the proper accounting period.

CHAPTER 10

ADVANA – COMMON ENTERPRISE DATA REPOSITORY FOR THE
DEPARTMENT OF DEFENSE

1.0 GENERAL

1.1 Overview

Advana (derived from the term “Advancing Analytics”) is a common enterprise data repository for the Department of Defense (DoD), required by the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2018. Advana is a centralized data and analytics platform that provides DoD users with common business data, decision support analytics, and data tools. It was developed by the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), through the Directorate for Enterprise Financial Transformation (EFT), and is now maintained by the Chief Digital and Artificial Intelligence Office. The Advana platform and program supports the National Defense Strategy by amassing data that is accessible, understandable, and usable across the Defense enterprise, and by advancing analytic capabilities to address the complex challenges of the Department.

1.2 Purpose

This chapter establishes Advana as an official DoD repository of common enterprise data and the roles and responsibilities of OUSD(C) and DoD Components in the development, maintenance, and use of Advana within the supported business domain areas. The use of Advana will ensure that any performance measure or data product that relies on DoD data originates from an authoritative source of transaction-level detail.

1.3 Authoritative Guidance

The policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.1. Title 10, United States Code, sections 135 and 2222 as amended by the NDAA for FY 2018 (sections 911 – 913).

1.3.4. DoD National Defense Strategy, issued by the Secretary of Defense.

1.3.5. DoD Annual Performance Plan, issued by the Director of Administration and Management.

1.3.6. OUSD(C), Financial Management Strategy.

2.0 ROLES AND RESPONSIBILITIES

2.1 OUSD(C) Responsibilities

The Department’s vision of “Financial Management (FM) Analytics” outlines the expectations of tomorrow’s financial management professionals, leveraging the foundation of auditable data to drive more meaningful, data-informed decisions of the future. Using Advana as an enabler and accelerator for FM Analytics, OUSD(C) will:

2.1.1. Leverage data as a strategic asset, connecting it with advancing technology to continuously advance analytic capabilities across the Department. Any data contained in a Defense business system related to business operations and management is an asset of the Department, and a strategy must be developed for making the data discoverable in Advana.

2.1.2. Maintain alignment of Advana capabilities and products with the functional requirements of its customers by communicating and validating regularly with the user community as continuous development occurs, partnering with the appropriate officials to establish enterprise standards.

2.1.3. Acquire, incorporate, and standardize data to support the business domain areas that align with the organizational structure of the Department and the responsibilities of DoD Components.

2.1.4. Manage data sharing agreements with system owners to ensure data is timely and accurate. Extract data from the relevant systems to facilitate DoD-wide analysis and management of business operations, and execute controls over data management.

2.1.5. Provide reasonable assurance to data consumers that data controls are clearly defined and executed in accordance with control objectives.

2.1.6. Maintain regulated security over the system and its data and ensure compliance with user access security requirements and DoD continuity of operations policy and planning.

2.1.7. Ensure sensitive activity data is secure and comply with DoD security classification guidance.

*2.2 DoD Component Responsibilities

DoD Components (i.e., the Office of the Secretary of Defense, the Military Departments, the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the Defense Agencies and DoD Field Activities, and all other organizational entities within DoD with the exception of the DoD Office of Inspector General) must:
2.2.1. Provide authoritative source-level transactional data to Advana from all DoD business systems daily, using the most cost effective and secure methods available. The authoritative source-level transactional data must be obtained and imported by Advana from the business system in which the data originated (i.e., not a separate data warehouse or data lake but the system that originated the transaction). Where a strategy does not exist to provide such data, one must be developed in partnership with OUSD(C) EFT.

2.2.2. Sign agreements that govern accurate and timely transmission of data. DoD Components are responsible for defining business rules that map source data elements to the Advana common data model. The Advana common data model includes but is not limited to the Standard Financial Information Structure, Procurement Data Standard, and subsequent domain-specific data models under development.

2.2.3. Use Advana for delivery of their Universe of Transactions to any entity that issues an audit request, data call request, or other bona fide requirement for reconciled transaction details.

2.2.4. Use the Advana Feeder to General Ledger Reconciliations Audit Workbooks – Monthly reconciliations between disbursing, obligation, funding, and entitlement financial management systems to general ledger accounting systems.

2.2.5. Use the General Ledger to Unadjusted Trial Balance Reconciliations Audit Workbooks – Quarterly reconciliations between general ledger accounting systems and their unadjusted trial balance.

2.2.6. Use the Unadjusted Trial Balance to Adjusted Trial Balance Reconciliations Audit Workbooks – Quarterly reconciliations between the unadjusted trial balance and the adjusted trial balance within the Defense Departmental Reporting System.

2.2.7. Use Advana to reconcile Fund Balance with Treasury and retire all legacy micro-applications no later than December 2024.

2.2.8. Use the Advana Dormant Account Review – Quarterly tool to conduct all DoD dormant account reviews unless otherwise approved by OUSD(C) EFT and DCFO.

2.2.9. Provide functional assistance to the Advana program, when necessary, to reconcile DoD Components’ general ledger data to outputs from the Defense Departmental Reporting System and other required data reconciliations.

3.0 BUSINESS DOMAIN AREAS

A business domain represents a line of business for DoD and its corresponding business events. Advana will acquire, incorporate, and standardize data to support the various business domain areas across the Department including, but not limited to:

3.0.1. Acquisition Analytics
3.0.2. Budget Analytics
3.0.3. Cost Management Analytics
3.0.4. Executive Analytics
3.0.5. Financial Management, Reporting, and Accounting Analytics
3.0.6. Health Analytics
3.0.7. Information Technology Analytics
3.0.8. Logistics and Supply Chain Analytics
3.0.9. People Analytics
3.0.10. Policy Analytics
3.0.11. Procurement Analytics
3.0.12. Readiness Analytics
3.0.13. Real Property Analytics

APPENDIX A

OBJECT CLASSIFICATION

1.0 GENERAL

1.1 Purpose

The purpose of this appendix is to provide necessary information on the object classes that are used as a uniform classification for identifying the transactions of the Federal Government by the nature of the goods or services purchased. Every obligation recorded by the Department of Defense (DoD) must be coded with an object class. Every purchase requisition and commitment recorded by the DoD must be coded with an object class code and product service code.

1.2 Basic Concepts

1.2.1. Obligations incurred are the amounts of orders placed, contracts awarded, services received, and similar transactions during an accounting period that will require payment during the same or a future period. Such amounts include payments for which obligations have not been previously recorded, along with adjustments for differences between obligations previously recorded and actual payments to liquidate those obligations. The installation-level budgetary account structure requires that the amount of obligations incurred be segregated into undelivered orders and accrued expenditures - unpaid or paid.

1.2.2. Obligations are classified by the initial purpose for which they are incurred, rather than for the end product or service provided. For example, if payments are made directly for personal services or supplies used in the construction of a building, the amounts should be classified as obligations for personnel compensation or supplies rather than for land and structures. Conversely, if contracts are awarded for the construction of a building, the amounts should be classified in the object class for lands and structures rather than in the object class used to report individual types of materials and services required to construct the building.

1.2.3. Object class information is incorporated into DoD accounting systems, or derived from applicable expense and asset accounts, to allow for reporting by object class. Object Class Code is a required data element in the DoD Standard Financial Information Structure (SFIS), as defined in Volume 1, Chapter 4. Based on the Office of Management and Budget (OMB) Circular A-11, the specific values for Object Class Code and all other SFIS data elements are documented in the SFIS Values Library Service on the SFIS web page.
2.0 MAJOR OBJECT CLASSIFICATION

All Federal Government object classifications are defined in the *OMB Circular No. A-11*, Part 2, III, Section 83, Schedule O. These are the major object classes:

2.01. 10 Personnel compensation and benefits

2.02. 20 Contractual services and supplies

2.03. 30 Acquisition of assets

2.04. 40 Grants and fixed charges

2.05. 90 Other

Volume 2 has been divided into two books for the convenience of the user because of the Volume size. Volume 2A and 2B are both necessary for the formulation and preparation of the budget. Chapter detailed Table of Contents provided at the beginning of each chapter. Chapter page numbers are preceded by the number of the chapter (e.g., 9-2 and 19-5).
VOLUME 2A, CHAPTER 1: “GENERAL INFORMATION”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated August 2007 is archived.

CHAPTER 1

GENERAL INFORMATION

1.0 GENERAL POLICIES (0101)

1.1 Purpose (010101)

1.1.1. Volume 2 of the Financial Management Regulation (FMR) provides general guidance on the formulation and submission of the budget requests to the Office of the Secretary of Defense for the program and budget review submission and the presentation and justification of the budget requests to the Congress. This volume is established under the authority of DoD Instruction 7000.14.

1.1.2. Volume 2 is intended as a comprehensive reference book on budget matters of the Department of Defense. Budget policy memoranda issued throughout the year will provide any necessary changes or revisions to this standing document, as well as special instructions and nonrecurring requirements unique to that year’s budget cycle.

1.1.3. The provisions of Volume 2 apply to all military and specified civil functions of the Department of Defense.

1.1.4. An introduction to the total Financial Management Regulation, DoD 7000.14-R can be found in Volume 1.

1.2 Organization (010102)

Volume 2B is organized into 19 chapters that provide specific guidance, required budget exhibits and formats along with instructions for their preparation, and automated submission requirements.

1.3 Changes to Volume 2 (010103)

1.3.1. Changes to Volume 2 will be issued biennially, prior to the program and budget review of the initial biennial budget cycle. Pen and ink changes will not be issued.

1.3.2. Generally, significant changes on a page will be indicated by ★ preceding the paragraph or section containing a change and the changed material will be printed in blue ink.

1.4 Reports Control Symbol (010104)

Data requirements established by this volume are exempt from the requirement for assignment of a Report Control Symbol.

1.5 Requests for Exceptions to **OMB Circular A-11** (010105)

1.5.1. Each year the Office of Management and Budget (OMB) issues Circular No. A-11, which addresses the preparation and submission of budget estimates for all Federal agencies.
1.5.2. Federal agencies are allowed to request exceptions to the requirements of Circular A-11 by submitting in writing to OMB all required exceptions by August 1. Exceptions approved by OMB are valid only for 1 year.

1.5.3. Each year the USD(Comptroller) requests certain exceptions to OMB Circular A-11. Generally, these exceptions concern special situations that are unique to the Department of Defense.

    1.5.3.1. Subsequent to the issuance of Circular A-11 by OMB each year, any DoD Component requiring an exception to the requirements of Circular A-11 should submit in writing the specific section for which an exception is required and provide adequate rationale to justify the exception. The memorandum addressing the requested exceptions should be submitted directly to the Office of the USD(Comptroller), Program/Budget, Program and Financial Control Directorate (Room 3C689, telephone (703) 697-0021) no later than July 15 of each year.

    1.5.3.2. If the requested exception is acceptable to the USD(Comptroller), these proposals will be consolidated and forwarded to OMB for approval. Components will be advised of any exceptions approved by OMB.

    1.5.3.3. All DoD Components are required to comply with any requested exceptions not approved and to properly reflect the information in the budget submissions.

1.6 Proposed Changes in Budget Structure and Appropriation Language (010106)

    1.6.1. Under the provisions of OMB Circular A-11, the following types of changes must be cleared with OMB:

        1.6.1.1. Changes in the appropriation pattern, including proposed new accounts and changes in the titles and sequence of existing accounts.

        1.6.1.2. Changes in the methods of funding a program.

        1.6.1.3. Changes in program or budget activity classifications for the program and financing schedules for all appropriation accounts and funds.

    1.6.2. Any proposed changes on the items listed above must be submitted by memorandum to the Office of the USD(Comptroller) that explains the proposal and the rationale for the changes. If acceptable to the USD(Comptroller), these proposals will be forwarded to OMB for approval.

    1.6.3. Proposed changes in the wording of appropriation language should be submitted to the Office of the Deputy General Counsel (Fiscal) (Room 3B688, telephone (703) 697-7228) as soon as possible after the passage of the current year’s appropriations acts. ODGC(Fiscal) will coordinate changes with OMB.
1.7 Budget Terminology/Definitions (010107)

1.7.1. Standard Government-wide definitions of budget terminology are provided in the Office of Management and Budget’s issuances, most notably Circular A-11 (Section 20).

1.7.2. For the Department of Defense, some of the more common budget concepts applicable to budget formulation follow:

1.7.2.1. **Accrual Basis of Accounting.** A method of accounting in which revenues are recognized in the period earned and costs are recognized in the period incurred, regardless of when payment is received or made. There have been many initiatives over the years to convert the Federal Budget to an accrual accounting basis. Although the budget is on a cash basis, DoD accounting is on the accrual basis.

1.7.2.2. **Advance Procurement.** Authority provided in an appropriations act to obligate and disburse during a fiscal year before that in which the related end item is procured. The funds are added to the budget authority for the fiscal year and deducted from the budget authority of the succeeding fiscal year. Used in major acquisition programs for advance procurement of components whose long-lead-times require purchase early in order to reduce the overall procurement lead-time of the major end item. Advance procurement of long lead components is an exception to the DoD “full funding” policy and must be part of the President’s budget request.

1.7.2.3. **Appeal.** A request for reconsideration of an action taken to adjust, reduce, or delete funding for an item during the congressional review of the Defense budget (authorization and appropriation). This process is discussed in Section 4.6.

1.7.2.4. **Apportionment.** A distribution by the Office of Management and Budget of amounts available for obligation in appropriation or fund accounts of the Executive Branch. The distribution makes amounts available on the basis of specified time periods, programs, activities, projects, or combinations thereof. The apportionment system is intended to achieve an effective and orderly use of funds. The amounts so apportioned limit the obligations that may be incurred.

1.7.2.5. **Appropriations.** A provision of legal authority by an act of the Congress that permits Federal agencies to incur obligations and to make payments out of the Treasury for specified purposes. An appropriation usually follows enactment of authorizing legislation. An appropriation act is the most common means of providing budget authority (see Budget Authority). Appropriations do not represent cash actually set aside in the Treasury for purposes specified in the appropriation act; they represent limitations of amounts which agencies may obligate during the time period specified in the respective appropriation acts.
1.7.2.6. **Authorization (Authorizing Legislation).** Basic substantive legislation enacted by the Congress which sets up or continues the legal operation of a Federal program or agency either indefinitely or for a specific period of time or sanctions a particular type of obligation or expenditure within a program. Such legislation is normally a prerequisite for subsequent appropriations or other kinds of budget authority to be contained in appropriation acts. It may limit the amount of budget authority to be provided subsequently or may authorize the appropriation of “such sums as may be necessary.”

1.7.2.7. **Biennial Budget.** The FY 1986 Department of Defense Authorization Act required the submission of two-year budgets for the Department of Defense and related agencies beginning with FY 1988/FY 1989. The Department has fully institutionalized a biennial cycle for the Planning, Programming, Budgeting and Execution (PPBE) Process, including the Strategic Planning Guidance (SPG), the Program Objective Memorandum (POM), Volume 2 of the Financial Management Regulation (FMR) and budget formulation memoranda. A biennial budget, as currently structured, represents program budget estimates for a two-year period in which fiscal year requirements remain separate and distinct.

1.7.2.8. **Budget Activity.** Categories within each appropriation and fund account which identify the purposes, projects, or types of activities financed by the appropriation or fund.

1.7.2.9. **Budget Amendment.** A formal request submitted to the Congress by the President, after his formal budget transmittal but prior to completion of appropriation action by the Congress, that revises previous requests, such as the amount of budget authority.

1.7.2.10. **Budget Authority.** The authority becoming available during the year to enter into obligations that result in immediate or future outlays of Government funds.

1.7.2.11. **Budget Deficit.** The amount by which the Government’s budget outlays exceed its budget receipts for any given period. Deficits are financed primarily by Treasury borrowing from the public.

1.7.2.12. **Budget Receipts.** Amounts received by the Federal Government from the public that arise from the exercise of governmental or sovereign power (primarily tax revenues, but also receipts from premiums of compulsory social insurance programs, court fines, license fees, etc.); premiums from voluntary participants in Federal social insurance programs; and gifts and contributions. Excluded from budget receipts are collections resulting from business-type transactions and payments between government accounts as a result of intragovernmental transactions.

1.7.2.13. **Change Proposal.** Components use this mechanism to revise programs and approved budgets in the second year of the 2-year program and budget cycle, in lieu of submitting a Program Objective Memorandum and a Budget Estimate Submission with complete documentation. A format will be provided with the annual program and budget guidance. See “Two-year Program and Budget Cycle.”
1.7.2.14. **Closed (Canceled) Appropriations.** An appropriation that is no longer available for the adjustment or payment of obligations. Appropriation accounts are closed (canceled) after being in the expired status for five years. A Comptroller General opinion has provided the DoD with authority to make disbursement adjustments to closed appropriations to correct errors only. (See Expired Appropriation.)

1.7.2.15. **Concurrent Resolution.** A resolution passed by both Houses of Congress, but not requiring the signature of the President, setting forth, reaffirming, or revising the congressional budget for the United States Government for a fiscal year. A concurrent resolution on the budget, due by April 15, must be adopted before legislation providing new budget authority, new spending authority, new credit authority or changes in revenues or the public debt limit is considered. Other concurrent resolutions for a fiscal year may be adopted at any time following the first required concurrent resolution for that fiscal year.

1.7.2.16. **Constant Dollars.** A dollar value adjusted for changes in prices. Constant dollar series are derived by dividing current dollar estimates by appropriate price indices, a process generally known as deflating. The result is a time series as it would presumably exist if prices were the same throughout as in the base year - in other words, as if the dollar had constant purchasing power. Any changes in such a series would reflect only changes in the real (physical) volume of output. Constant dollar figures are commonly used for gross national product and its components.

1.7.2.17. **Continuing Resolution.** Legislation enacted by the Congress to provide budget authority for specific ongoing activities in cases where the regular fiscal year appropriation for such activities has not been enacted by the beginning of the fiscal year. The continuing resolution usually provides formulas which the agency uses to compute amounts available for continuing programs at minimum levels. Formulas typically include obligation rates of the prior year, the President’s budget request, or an appropriation bill passed by either or both Houses of the Congress.

1.7.2.18. **Current Services Estimates.** Estimated budget authority and outlays for the upcoming fiscal year based on continuation of existing levels of service, i.e., assuming that all programs and activities will be carried on at the same level as in the fiscal year in progress and without policy changes in such programs and activities. These estimates of budget authority and outlays, accompanied by the underlying economic and programmatic assumptions upon which they are based (such as the rate of inflation, the rate of real economic growth, pay increases, etc.), are required to be transmitted by the President to the Congress.

1.7.2.19. **Deferral of Budget Authority.** Any action or inaction by any officer or employee of the United States that withholds, delays, or effectively precludes the obligation or expenditure of budgetary resources, including the establishment of reserves under the Antideficiency Act, as amended by the Impoundment and Control Act. Section 1013 of the Impoundment Control Act of 1974 requires a special message from the President to the Congress reporting a proposed deferral of budget authority. Deferrals may not extend beyond the end of the fiscal year in which the message reporting the deferral is transmitted and may be overturned by the passage of an impoundment resolution by either House of Congress.
1.7.2.20. **Disbursements.** In budgetary usage, gross disbursements represent the amount of checks issued, cash, or other payments made, less refunds received. Net disbursements represent gross disbursements less income collected and credited to the appropriation or fund account, such as amounts received for goods and services provided.

1.7.2.21. **Discretionary Authority.** Budgetary resources (except those provided to fund mandatory spending) provided in appropriations acts.

1.7.2.22. **Emergency Appropriations.** Appropriations that have been designated by the Congress and the President as an emergency requirement under the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.

1.7.2.23. **End Strength.** In general, strength at the end of a fiscal year. Single point strengths for other points in time must be specified, such as end first-quarter strength.

1.7.2.24. **Expenditures/Disbursements.** A term generally used interchangeably with outlays (See outlays).

1.7.2.25. **Expired Appropriation.** An appropriation whose period of availability for incurring new obligations has expired but the appropriation is not closed (canceled). During this period, the appropriation is available for adjustment to, or payment of, existing obligations. Appropriations remain in an expired status for 5-years as shown in the table below. At the end of the five-year expiration period, the appropriation is closed (canceled) and is no longer available for the payment of unliquidated obligations. (See Closed (Canceled) Appropriations.)

Normal Life Cycle of Appropriations:

* Extended to 15-years under certain circumstances.

1.7.2.26. **Federal Debt.** Federal debt consists of public debt and agency debt. Public debt is that portion of the Federal debt incurred when the Treasury Department or Federal Financing Bank (FFB) borrows funds directly from the public or another fund or account. Agency debt is that portion of the Federal debt incurred when a Federal agency authorized by law, other than Treasury or the Federal Financing Bank, borrows funds directly from the public or another fund or account.
1.7.2.27. Fiscal Year. Any yearly accounting period without regard to its relationship to a calendar year. The fiscal year for the Federal Government begins on October 1 and ends on September 30. The fiscal year is designated by the calendar year in which it ends. Fiscal years are further designated as follows:

Past Year-1: Also referred to as Prior Year-1, the fiscal year immediately preceding the past year

Past Year (PY): Also referred to as Prior Year, the fiscal year immediately preceding the current year; the last completed fiscal year.

Current Year (CY): The fiscal year in progress. Immediately precedes the budget year.

Budget Year (BY): The next fiscal year for which estimates are submitted if not a biennial budget.

Budget Year 1 (BY1): In a biennial budget submission (Department of Defense), the first fiscal year of a 2-year period for which the budget is being considered.

Budget Year 2 (BY2): In a biennial budget submission (Department of Defense), the second fiscal year of a 2-year period for which the budget is being considered.

Budget Year(s)+1 (BY(s)+1): The fiscal year immediately following the budget year(s). This format continues through Budget Year +5 (BY+5), the fifth fiscal year following the budget year(s).

* 1.7.2.28. Full Funding Policy. The practice of funding the total cost of major procurement and construction projects in the fiscal year in which they will be initiated. The full funding policy requires the total estimated cost of a complete, military useable end item or construction project funded in the year in which the item is procured. If a future year’s appropriation is required for delivery of an end item, the end item is not fully funded. It prevents funding programs incrementally and provides a disciplined approach for program managers to execute their programs within cost. See Section 2.2 for further information.

1.7.2.29. Full-time Equivalent (FTE). Reflects the total number of regular straight-time hours (i.e., not including overtime or holiday hours) worked by employees divided by the number of compensable hours applicable to each fiscal year. Annual leave, sick leave and compensatory time off and other approved leave categories are considered to be “hours worked” for purposes of defining full-time equivalent employment.
1.7.2.30. Future Years Defense Program (FYDP). The Future Years Defense Program is the program and financial plan for the Department of Defense as approved by the Secretary of Defense. The FYDP arrays cost data, manpower and force structure over a 6-year period (force structure for an additional 3 years), portraying this data by major force program for DoD internal review for the program and budget review submission. It is also provided to the Congress in conjunction with the President’s budget.

1.7.2.31. Impoundment. Any action or inaction by an officer or employee of the United States that precludes the obligation or expenditure of budget authority provided by the Congress.

1.7.2.32. Impoundment Resolution. A resolution of the House of Representatives or the Senate disapproving a deferral of budget authority set forth in a special message ordinarily transmitted by the President under section 1013 of the Impoundment Control Act of 1974. Passage of an impoundment resolution by either House of Congress has the effect of overturning the deferral and requires that such budget authority be made available for obligation.

1.7.2.33. Incremental Funding. The phasing of total funding of programs or projects over two or more fiscal years based upon levels and timing of obligational requirements for the funds. Differs from full funding concept where total funds for an end item, program or project are provided in the fiscal year of program or project initiation, regardless of the obligational requirement for the funds.

1.7.2.34. Mandatory Authority. (Also known as Entitlement Authority) Authority controlled by laws other than appropriations.

1.7.2.35. Management Initiative Decision (MID). A decision document similar to a Program Budget Decision, but designed to institutionalize management reform decisions. A MID may be issued at any time during the year. The Comptroller will incorporate any funding adjustments into the next President’s Budget.

1.7.2.36. Multiyear Procurement. Procurement of a particular end item or system under a multiyear contract approved by specific provision of law. For the Department of Defense, multiyear procurement contracting of military hardware or systems must generally be specifically, and individually, approved by the Congress (see 10 U.S.C. 2306b(1).

1.7.2.37. Object Classification. A uniform classification identifying the transactions of the Federal Government by the nature of the goods or services purchased without regard to the agency involved or the purpose of the programs for which they are used.

1.7.2.38. Obligations. Binding agreement that will result in outlays immediately or in the future.
1.7.2.39. **Offsetting Collections.** Payments to the Government that are credited directly to the expenditure account and deducted from gross budget authority and outlays of the expenditure account. They result from business-type or market oriented activities with the public and intragovernmental transactions with other government accounts (commonly called reimbursable transactions).

1.7.2.40. **Outlays.** The amount of checks issued or other payments made (including advances to others), net of refunds and reimbursements collected. Outlays are net of amounts that are adjustments to obligational authority. The terms “expenditure” and “net disbursement” are frequently used interchangeably with the term “outlay.” Gross outlays are disbursements and net outlays are disbursements (net of refunds) minus reimbursements collected.

1.7.2.41. **President’s Budget.** The budget for a particular fiscal year transmitted to the Congress by the President in accordance with the Budget and Accounting Act of 1921, as amended. Some elements of the budget, such as the estimates for the legislative branch and the judiciary, are required to be included without review by the Office of Management and Budget or approval by the President.

1.7.2.42. **Program Budget Decision (PBD).** A budget decision document issued during the joint review of Service budget submissions by analysts of the Office of the Secretary of Defense (OSD) and the Office of Management and Budget (OMB). PBDs reflect the decisions of the Secretary of Defense as to appropriate program and funding to be included in the annual Defense budget request which, in turn, is included in the President’s Budget.

1.7.2.43. **Program Decision Memorandum (PDM).** A document containing the decisions by the Secretary of Defense reflecting broad strategic trades related to the program and resource levels identified in the Program Objectives Memorandum.

1.7.2.44. **Program Objectives Memorandum (POM).** The final product of the programming process within the Department of Defense, the Components Program Objectives Memorandum (POM) displays the resource allocation decisions of the Military Departments in response to and in accordance with Strategic Planning Guidance (SPG) and Joint Programming Guidance (JPG).

1.7.2.45. **Program Year.** The fiscal year in which authorization was provided and in which funds were appropriated for a particular program, regardless of the fiscal year in which funds for that program might be obligated.

1.7.2.46. **Reapportionment.** A revision by the Office of Management and Budget of a previous apportionment of budgetary resources for an appropriation or fund account. A revision would ordinarily cover the same period, project, or activity covered in the original apportionment.
1.7.2.47. **Reappropriation.** Congressional action to restore the obligational availability, whether for the same or different purposes, of all or part of the unobligated portion of budget authority that has expired or would otherwise expire in an annual or multi-year account. Obligational authority in a current appropriation may also be extended by a subsequent appropriation act.

1.7.2.48. **Reconciliation Process.** A process used by the Congress to reconcile amounts determined by tax, spending, and debt legislation for a given fiscal year with the ceilings enacted in the second and required concurrent resolution on the budget for that year. Section 310 of the Congressional Budget and Impoundment Control Act of 1974 provides that the second required concurrent resolution on the budget, which sets binding totals for the budget, may direct committees to determine and recommend changes to laws, bills, and resolutions, as required to conform with the binding totals for budget authority, revenues, and the public debt.

1.7.2.49. **Recovery of Prior Year Obligations.** Amounts made available for obligation in no-year and unexpired multi-year accounts through downward adjustment of prior year obligations.

1.7.2.50. **Reimbursable Obligation.** Obligation financed by offsetting collections credited to an expenditure account in payment for goods and services provided by that account. See Offsetting Collection.

1.7.2.51. **Reprogramming.** Utilization of funds in an appropriation account for purposes other than those contemplated at the time of appropriation. Reprogramming is generally accomplished pursuant to consultation with and approval by appropriate congressional committees. Instructions are contained in Volume 3.

1.7.2.52. **Rescission.** The consequence of enacted legislation which cancels budgetary resources previously provided by the Congress prior to the time when the authority would otherwise lapse. Section 1012 of the Impoundment Control Act of 1974 requires a special message from the President to the Congress reporting any proposed rescission of budgetary resources. These proposals may be accepted in whole or in part through the passage of a rescission bill by both Houses of the Congress.

1.7.2.53. **Rescission Bill.** A bill or joint resolution that provides for cancellation, in whole or in part, of budgetary resources previously granted by the Congress. Under Section 1012 of the Impoundment Control Act of 1974, unless Congress approves a rescission bill within 45 days of continuous session after receipt of the proposal, the budgetary resources must be made available for obligation.

1.7.2.54. **Revolving Fund.** A fund established to finance a cycle of operations through amounts received by the fund. Within the Department of Defense, such funds include the Defense Working Capital Fund, as well as other working capital funds.
1.7.2.55. **Sequestration.** The reduction or cancellation of new budget authority; unobligated balances, new loan guarantee commitments or limitations; new direct loan obligations, commitments, or limitations; spending authority; and obligation limitations. OMB Circular A-11, section 20 provides additional information on sequestration rules of the Budget Enforcement Act of 1990 (BEA).

1.7.2.56. **Supplemental Appropriation.** An act appropriating funds in addition to those in an annual appropriation act. Supplemental appropriations provide additional budget authority beyond original estimates for programs or activities (including new programs authorized after the date of the original appropriation act) for which the need for funds is too urgent to be postponed until enactment of the next regular appropriation act.

1.7.2.57. **Total Obligational Authority (TOA) Availability.** The sum of (1) all budget authority granted (or requested) from the Congress in a given year, (2) amounts authorized to be credited to a specific fund, (3) budget authority transferred from another appropriation, and (4) unobligated balances of budget authority from previous years which remain available for obligation. In practice, this term is used primarily in discussing the Department of Defense budget, and most often refers to TOA as “direct program” which equates to only (1) and (2) above.

1.7.2.58. **Transfer Authorities.** Annual authorities provided by the Congress via annual appropriations and authorization acts to transfer budget authority from one appropriation or fund account to another.

1.7.2.59. **Two-year Program and Budget Cycle.** For the budget review, this cycle coincides with the biennial budget process required by law. It is part of the Department’s internal 2-year Planning, Programming, Budgeting, and Execution (PPBE) process. The first year of the cycle includes a full review of the budget for the following two years. Full budget documentation is required. The end result is a budget baseline for the next two years. The second year of the cycle limits changes to the baseline program. It focuses on fact-of-life changes to include congressional action and program execution. Components will request adjustments to the baseline through Change Proposals (CP). However, while the second year of the process will require only limited budget documentation for the internal review, full budget documentation is still required for the President’s budget submission.

1.7.2.60. **User Fee.** A fee, charge, or assessment levied on those directly benefiting from, or subject to regulation by, a Federal government program or activity, to be utilized solely to support the program or activity. Collections from other Federal accounts are not user fees. (See OMB Circular A-11, section 20.7)
1.8 Security Classifications (010108)

1.8.1. General

1.8.1.1. Instructions concerning premature disclosure of budget information prior to presentation to the Congress are contained in OMB Circular A-11.

1.8.1.2. Instructions concerning security classification of the program and budget review submissions to OSD are contained in Section 3.5.

1.8.1.3. Paper copies of the P-1 and R-1 exhibits must be submitted by DoD Components with a certification signed by the Security Office confirming that all line items are classified properly.

1.8.1.4. Instructions concerning security classification of congressional justification material are contained in Section 4.1.

1.8.2. Classification of Military Personnel M-1 line items, Operation and Maintenance O-1 line items, Procurement Exhibit P-1 line items, RDT&E Exhibit R-1 line items, and the Construction Programs (C-1):

1.8.2.1. The Military Personnel Programs (M-1) is designed to be an unclassified document. See Section 5.1 for instructions.

1.8.2.2. The Operation and Maintenance Exhibit O-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program’s Security Classification Guide so dictates or when conditions in paragraph C. (below) apply.

1.8.2.3. Procurement Exhibit P-1 line items: P-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program’s Security Classification Guide so dictates or when conditions in paragraph C. (below) apply.

1.8.2.4. RDT&E Exhibit R-1 line items: R-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program’s Security Classification Guide so dictates or when conditions in paragraph C. (below) apply.

1.8.2.5. The Construction Programs (C-1) is designed to be an unclassified document. See Section 5.5 for instructions.

1.8.3. Security classification instructions for Intelligence Programs/Activities Resource Information are contained in Chapter 16.
1.9 Budget and Performance Integration (010109)

1.9.1. The President’s Management Agenda (PMA) targets the most apparent deficiencies in the government where the opportunity to improve performance is the greatest. The Office of Management and Budget (OMB) developed standards for success in the government-wide Budget and Performance Integration Initiative of the PMA. As a result, the OMB requires federal agencies to use performance measures in managing and justifying program resources.

1.9.2. Components shall use performance measures to justify 100 percent of the resources requested in the Budget Year. The Components shall comply with the performance measure requirements that are included in other chapters. Additionally, OMB has directed the use of the Program Assessment Rating Tool (PART) for some programs. The PART is a diagnostic tool that formalizes performance evaluation. The Components shall comply with PART taskings and suspense dates. For those programs that have been assessed using the PART, the Components shall include OMB’s PART Summary (published in February each year) in congressional budget justification materials, press releases, testimony, and briefings to congressional committee staffs. OMB Circular A-11, section 26 – Summary of Performance Information Requirements, and the OMB PART Web site (www.whitehouse.gov/omb/part), provide additional information about the PART and the PART process. Absent a PART or performance measures prescribed in other chapters, the Components may use existing, or create new, performance measures.

1.10 Combatant Command Business Rules (Joint Task Assignment Process (JTAP)) (010110)

1.10.1. The following business rules will be followed to govern the financial management arrangements between Combatant Command Support Agents (CCSAs) and Combatant Commands (COCOM). The CCSA assignments are as follows:

1.10.1.1. Initial funding for new COCOM missions will be established by OSD. Funding for new missions assigned by the Secretary or Deputy Secretary will be established and provided for by OSD as part of the JTAP process and in conjunction with the Planning, Programming, Budgeting and Execution (PPBE) processes.

1.10.1.2. It is the responsibility of the Combatant Command Support Agent (CCSA) to maintain funding for the directed COCOM missions.

1.10.1.2.1. CCSAs will adjust COCOM accounts across the FYDP consistent with the OSD/OMB approved inflation indices.

1.10.1.2.2. COCOMs will be subjected to a proportionate share (on a percentage basis) of total CCSA reductions from undistributed congressional and/or OSD general reductions.
1.10.1.3. All Service business and efficiency reductions require prior COCOM or OSD approval to ensure they do not impede the conduct of directed missions.

CCSAs will pre-coordinate any Service-initiated reductions to COCOM resources with the COCOMs during each phase of the PPBE process for all years in the FYDP, and Service-initiated reductions will not be applied to any COCOM funds without the prior approval of the COCOM or the OSD staff.

1.10.1.4. OUSD(C), PA&E, Joint Staff, Combatant Commands and Combatant Command Support Agents will meet annually to validate, and adjudicate as necessary, all adjustments to COCOM resources.

OUSD(C) will review and coordinate CCSA budget exhibits that specifically pertain to COCOM resources with COCOMS prior to approval and publication to ensure that CCSA’s have fully complied with Program Budget Decision or Program Decision Memorandum direction.

1.10.2. Combatant Command Support Agents must ensure adequate visibility of COCOM directed missions and other costs for each O&M funded COCOM. A minimum of two Sub Activity Groups (SAG)s within each Military Department’s active components’ Operation and Maintenance Appropriation will be established as follows:

1.10.2.1. Mission Funding (one or more SAGs);

1.10.2.2. Headquarters (HQ) and Headquarters Support Funding: (single SAG)

1.10.3. Budget and execution structure for USTRANSCOM will continue to follow the normal Working Capital Fund business area structure.

1.10.4. USSOCOM budget structure is not governed by this guidance as USSOCOM resources are already visible in Major Force Program-11 (MPF-11).

2.0 FUNDING POLICIES (0102)

2.1 Criteria for Determining Expense and Investment Costs (010201)

2.1.1. Appropriation accounts form the structure for the President’s budget request and are the basis for congressional action. The appropriations are further organized into budget activities of appropriations with programs, projects or activities of similar purposes. To support management of the Department of Defense’s programs, projects or activities, resource requirements should be organized and categorized consistently within the appropriation and budget activity structure. The following sections provide guidance for categorizing resource requirements into the various appropriations.
2.1.2. Basic Distinctions Between Expense and Investment Costs. The criteria for cost definitions consider the intrinsic or innate qualities of the item such as durability in the case of an investment cost or consumability in the case of an operating cost and the conditional circumstances under which an item is used or the way it is managed. In all cases where the definitions appear to conflict, the conditional circumstances will prevail. The following guidance is provided to determine whether a cost is either an expense or an investment. All costs are classified as either an expense or an investment.

2.1.2.1. Expenses are the costs incurred to operate and maintain the organization, such as personal services, supplies, and utilities.

2.1.2.2. Investments are the costs that result in the acquisition of, or an addition to, end items. These costs benefit future periods and generally are of a long-term character such as real property and personal property.

2.1.3. Policy for Expense and Investment Costs

2.1.3.1. DoD policy requires cost definition criteria that can be used in determining the content of the programs and activities that comprise the Defense budget. The primary reasons for these distinctions are to allow for more informed resource allocation decisions and to establish criteria for determining which costs are appropriate to the various defense appropriations.

2.1.3.2. The cost definition criteria contained in this policy are only applicable to the determination of the appropriation to be used for budgeting and execution. Cost definitions for accounting purposes are contained in Volume 1.

2.1.3.3. Costs budgeted in the Operation and Maintenance (O&M) and Military Personnel appropriations are considered expenses. Costs budgeted in the Procurement and Military Construction appropriations are considered investments. Costs budgeted in the Research, Development, Test and Evaluation (RDT&E), Base Realignment and Closure (BRAC), and Family Housing appropriations include both expenses and investments. Definitions for costs within the Defense Working Capital Funds are provided in Chapter 9 and in Section 2.14.

2.1.3.4. Items procured from the Defense Working Capital Funds will be treated as expenses in all cases except when intended for use in weapon system outfitting, government furnished material (GFM) on new procurement contracts, or for installation as part of a weapon system modification, major reactivation, or major service life extension.
2.1.4. Procedures for Determining Expenses Versus Investments. The following criteria will be used to distinguish those types of costs to be classified as expenses from those to be classified as investments for budgeting purposes:

2.1.4.1. Expenses. Expenses are costs of resources consumed in operating and maintaining the Department of Defense. When costs generally considered as expenses are included in the production or construction of an investment item, they shall be classified as investment costs. Military personnel costs are an exception to this rule. The following guidelines shall be used to determine expense costs:

- 2.1.4.1.1. Labor of civilian, military, or contractor personnel.
- 2.1.4.1.2. Rental charges for equipment and facilities.
- 2.1.4.1.3. Food, clothing, and fuel.
- 2.1.4.1.4. Supplies and materials designated for supply management of the Defense Working Capital Funds.
- 2.1.4.1.5. Maintenance, repair, overhaul, rework of equipment.
- 2.1.4.1.6. Assemblies, spares and repair parts, and other items of equipment that are not designated for centralized item management and asset control and which have a system unit cost less than the currently approved dollar threshold of $250,000 for expense and investment determinations. This criterion is applied on the basis of the unit cost of a complete system rather than on individual items of equipment or components that, when aggregated, become a system. The concept of a system must be considered in evaluating the procurement of an individual end item. A system is comprised of a number of components that are part of and function within the context of a whole to satisfy a documented requirement. In this case, system unit cost applies to the aggregate cost of all components being acquired as a new system.
- 2.1.4.1.7. Cost of incidental material and items that are not known until the end item is being modified are conditional requirements and are considered expenses because the material is needed to sustain or repair the end item.
- 2.1.4.1.8. Engineering efforts to determine what a modification will ultimately be or to determine how to satisfy a deficiency are expenses.
- 2.1.4.1.9. Facilities sustainment, O&M-funded restoration and modernization projects. Planning and design costs are excluded from the cost determination for purposes of determining compliance with the amounts established in 10 U.S.C. 2805 for minor construction projects; however, design costs are not excluded from capitalization.
2.1.4.2. **Investments.** Investments are costs to acquire capital assets such as real property and equipment. The following criteria shall be used to determine those costs to be classified as investments:

2.1.4.2.1. All items of equipment, including assemblies, ammunition and explosives, modification kits (the components of which are known at the outset of the modification), spares and repair parts not managed by the Defense Working Capital Funds, that are subject to centralized item management and asset control.

2.1.4.2.2. All equipment items that are not subject to centralized item management and asset control and have a system unit cost equal to or greater than the currently approved expense and investment dollar threshold of $250,000 (for working capital funds investment criteria see Volume 2B, Chapter 9, Section 090103C). The validated requirement may not be fragmented or acquired in a piecemeal fashion in order to circumvent the expense and investment criteria policy.

2.1.4.2.3. Construction, including the cost of land and rights therein (other than leasehold). Construction includes real property equipment installed and made an integral part of such facilities, related site preparation, and other land improvements. (See paragraph 2.1.4.2.6 below for special guidance concerning real property facilities.)

2.1.4.2.4. The costs of modification kits, assemblies, equipment, and material for modernization programs, ship conversions, major reactivations, major remanufacture programs, major service life extension programs, and the labor associated with incorporating these efforts into or as part of the end item are considered investments. All items included in the modification kit are considered investment even though some of the individual items may otherwise be considered as an expense. Components that were not part of the modification content at the outset and which are subsequently needed for repair are expenses. The cost of labor for the installation of modification kits and assemblies is an investment.

2.1.4.2.5. Supply management items of the Defense Working Capital Funds designated for weapon system outfitting, government-furnished material on new procurement contracts, or for installation as part of a weapon system modification or modernization, major reactivation or major service life extension.

2.1.4.2.6. Also considered as investments are support elements such as data, factory training, support equipment and interim contractor support (ICS), which are required to support the procurement of a new weapon system or modification.

2.1.4.3. **Conditional Cases.** The following are conditional cases that take precedence over the criteria contained in paragraphs 2.1.4.1 and 2.1.4.2 above:

2.1.4.3.1. A major service-life extension program, financed in procurement, extends the life of a weapon system beyond its designed service life through large-scale redesign or other alteration of the weapon system.
2.1.4.3.2. Depot and field level maintenance is the routine, recurring effort conducted to sustain the operational availability of an end item. Depot and field level maintenance includes refurbishment and overhaul of end items, removal and replacement of secondary items and components, as well as repair and remanufacturing of reparable components. The maintenance effort may be performed by a depot maintenance activity in the Defense Working Capital Fund, by a direct funded DoD activity, by another government agency, or by a contractor.

2.1.4.3.3. Maintenance, repair, overhaul, and rework of equipment are funded in the operation and maintenance appropriations. However, maintenance of equipment used exclusively for research, development, test, and evaluation efforts will be funded by the RDT&E appropriations.

Continuous technology refreshment is the intentional, incremental insertion of newer technology to improve reliability, improve maintainability, reduce cost, and/or add minor performance enhancement, typically in conjunction with depot or field level maintenance. The insertion of such technology into end items as part of maintenance is funded by the operation and maintenance appropriations. However, technology refreshment that significantly changes the performance envelope of the end item is considered a modification and, therefore, an investment (See section on “Product Improvement” 2.13.3.7). This definition applies equally to technology insertion by commercial firms as part of contractor logistics support, prime vendor, and similar arrangements and to technology insertion that is performed internally by the Department.

2.1.4.3.4. Initial outfitting of an end item of investment equipment, such as a ship or aircraft, with the furnishings, fixtures, and equipment necessary to make it complete and ready to operate is a part of the initial investment cost. Material procured through the Defense Working Capital Funds for initial outfitting will be financed by procurement appropriations when drawn from the supply system. This concept includes changes to the allowance lists of ships, vehicles, and other equipment. Changes to allowance lists will be budgeted as investment costs. Procurement appropriations are not required to satisfy initial outfitting requirements if assets are available for issue through reuse/redistribution programs, such as the Navy's Consumable Asset Reutilization Program.

2.1.4.3.5. Initial outfitting of a facility construction project financed by a Military Construction appropriation is financed as either expense or investment based on the general criteria. Collateral equipment and furnishings are not considered construction costs since these items are movable and are not installed as an integral part of the facility.

2.1.4.3.6. When family housing is initially outfitted with kitchen equipment to include refrigerator, shades, carpeting, etc., these items are considered part of the construction costs.

2.1.4.3.7. Construction program costs, associated with construction management in general, as distinguished from supervision of specific construction projects, are expenses. Costs incident to the acquisition (i.e., design, direct engineering, technical specifications) and construction of a specific project are investments. The cost of administering the facilities sustainment program is an expense at all levels.
2.1.4.3.8. Costs of facilities restoration and modernization projects, not financed by Military Construction appropriations, meeting the current criterion for funding from appropriations available for operation and maintenance are considered expenses. However, this definition does not abrogate the prohibition against the planned acquisition of, or improvements to, a real property facility through a series of minor construction projects (i.e., incremental construction).

2.1.4.3.9. The cost of civilian personnel compensation and other direct costs (i.e., travel, office equipment leasing, maintenance, printing and reproduction) incurred in support of procurement and/or production programs by departmental headquarters staff, contracting offices, contract audit offices, system project offices, and acquisition managers are expenses. Procurement and/or production direct support costs such as production testing, quality assurance, production engineering, and equipment assembly, whether performed under contract or by in-house personnel funded on a reimbursable basis are investments.

2.1.4.3.10. When investment equipment is to be installed in a real property facility, the costs of both the equipment and its installation are considered investments.

2.1.5. Special Guidance Concerning Real Property Facilities

2.1.5.1. Construction includes real property equipment (often called installed equipment) which is affixed and built into a facility as an integral part of a facility. The cost of this equipment and its installation is part of the construction cost.

2.1.5.2. Items of equipment that are movable in nature and not affixed as an integral part of a facility are not normally considered construction costs, except for initial outfitting of family housing, as detailed in paragraph D3 above. This equipment includes all types of production, processing, technical, information systems, communications, training, servicing and RDT&E equipment. The cost of this equipment is an expense or an investment according to the policy criteria above. In addition, modifications to an existing facility required to support the installation of movable equipment, such as the installation of false floors or platforms, prefabricated clean rooms, or utilities, will be considered an integral part of the equipment costs. As such, the costs are either expense or investment, as long as the modifications do not include structural changes to the building. If the modifications include structural changes, they will be considered investment costs and budgeted as construction.
2.1.6. Expense/Investment Cost Determination

* When intended for use in weapon system outfitting, government furnished material on new procurement contracts or for installation as part of a weapon as part of a weapon system modification, major reactivation or major service life extension.

*2.2 Full Funding of Procurement Programs (010202)

2.2.1. General. A budgeting rule that requires the total estimated cost of a, military useable end item, be funded in the fiscal year in which the item is procured. Under the full funding policy, the entire procurement cost of a weapon or piece of military equipment is to be funded in the year in which the item is budgeted. An end item budgeted in a fiscal year cannot depend upon a future years funding to complete the procurement. Regulations governing the full funding policy are found in Office of Management and Budget (OMB) Circular A-11 and DoD Directive 7000.14-R.

2.2.1.1. The full funding policy is intended to prevent the use of incremental funding, under which the cost of a weapon system is divided into two or more annual portions or increments. Thus, full funding provides disciplined approach for program managers to execute their programs within cost and available funding.

2.2.1.2. There are two general exceptions to the full funding policy: one permits the use of Advance Procurement (AP) funding for components or parts of an item that have long production lead times; the other permits advance procurement funding for economic order quantity (EOQ) procurement, which normally occurs in programs that have been approved for multiyear
procurements (MYP). Advance Procurement funding is used routinely and extensively in the procurement of components for major end items due to manufacturing and production lead times. The use of MYP has to be approved by the Congress on a program-by-program basis. Congressional approval permits DoD to use a single contract to procure multiple copies of a given item that are scheduled to be procured across a series of years. MYP arrangements are governed by 10 USC 2306(b). EOQ procurement involves procuring multiple copies of a key component of a weapon covered by an MYP at the start of the MYP period in order to achieve significantly reduced costs on that component.

2.2.2. Policy for Full Funding. The total estimated cost of a complete, military useable end item or construction project must be fully funded in the year it is procured. There are 2 basic policies concerning full funding.

2.2.2.1. To provide funds in the budget for the total estimated cost of a complete, military useable end item to document the dimensions and cost of a program.

2.2.2.2. Exceptions to this policy are advance procurement for long lead-time items and advance economic order quantity (EOQ) procurement. EOQ may be used only in connection with multiyear procurements. Both efforts must be identified in an Exhibit P-10, Advance Procurement, for the Budget Estimate Submission and the President’s Budget request.

2.2.3. Procedures for Full Funding

2.2.3.1. Cost Estimates. Full funding applies to an initial estimate and can exist only at a point in time because estimates change. However, the Future Years Defense Program (FYDP) shall be a consistently reliable foundation for stating the total cost of acquiring defense systems. Thus, the FYDP shall reflect a DoD Component’s best estimate at completion of the program. The estimate should reflect the most likely cost of a procurement. Program estimates shall be kept current and fully financed through the Planning, Programming, Budgeting and Execution (PPBE) System process and established reprogramming procedures.

2.2.3.2. Time-Phased Procurement. Within defense system acquisition programs, nonrecurring costs and costs of certain production items related to, but not integral to, the end item of equipment are considered part of the overall acquisition cost. DoD Components shall plan and budget in a manner to ensure completion of the nonrecurring effort or delivery of such production items consistent with the planned delivery of the associated end items. That is, the programming and budgeting shall be on a time-phased "lead-time away" or "need to commit" basis. The Funded Delivery Period is part of the process to determine the quantities required to be budgeted in a particular fiscal year. DoD Components may not budget funds for obligation for items such as support, trainers, or data before the design or specifications of such items are essentially complete. These items shall be budgeted on an "ability to contract" basis as well as on a "lead-time away" basis.

2.2.3.3. Advance Procurement (Long Lead-time Items). Advance procurement requests for long lead-time items shall be limited to the end items in major procurement appropriations. Long lead-time procurements shall be for components, parts, and material whose
lead-times are greater than the life of the appropriation (3-5 years). In some circumstances, Advance Procurement is also warranted when items have significantly longer lead-times than other components, parts, and material of the same end item or when efforts must be funded in an advance procurement timeframe in order to maintain a planned production schedule. For new development programs, the planned production schedule should be based on a full funding basis without the use of long lead material. Planning the program content this way provides additional flexibility should development delays arise. When advance procurement is part of the program, however, the cost of components, material, parts, and effort budgeted for advance procurement shall be relatively low compared to the remaining portion of the cost of the end item. Each budget request for advance procurement shall represent, at a minimum, the termination liability associated with the total cost of the long lead-time components, material, parts, and effort for which the advance procurement request is being made. The termination liability should not cover the cost of the end item budgeted in the following fiscal year(s). The full cost of components, material, parts, and effort included in the advance procurement request should be budgeted in the FYDP consistent with full funding procedures. The budget requests will properly debit and credit advance procurement budget requests as defined in Exhibits P-1, P-5, P-10 and P-40 instructions.

2.2.3.4. Economic Order Quantity (EOQ) Procurement. EOQ may be used only in connection with multiyear procurement. It is the general policy of the Department of Defense not to create unfunded contract liabilities for EOQ procurements. Rather, funding for EOQ procurements shall be included in advance procurement budget requests unless an exception to the general policy is granted by the USD(Comptroller). The EOQ procurement may satisfy procurement requirements for no more than the number of program years covered by the multiyear procurement contract. Unless it would be more effective to fully fund the EOQ, or the USD(Comptroller) has granted an exception to the general policy to allow inclusion of EOQ costs in a cancellation clause, the advance procurement funding for an EOQ procurement shall cover, at a minimum, the estimated termination liability of the EOQ procurement.

2.2.3.5. Relationship of Budgeting and Contracting. An end item is fully funded only when funds are budgeted, programmed and available to cover the total estimated cost of the item at the time the procurement action is begun. Contracting, on the other hand, is a part of the execution phase or acquisition process within the framework of a program. The number of contracts required to procure a defense system, the type of contract awarded, and the timing of the award have no bearing upon whether or not an item is fully funded. In executing a program, no procurement of material or equipment, or work or services, therefore, shall be directed or implemented unless the full program amount is available, except for authorized economical order quantity (EOQ) and advance procurement. Similarly, the value of existing contracts for the procurement of material or equipment shall not be increased (through contract modifications) unless the funds are available to fully fund the new contract price. Limitations of funds clauses shall not be used as a mean of avoiding the requirement to fully fund procurement programs. (Note that this guidance does not affect the proper use of limitations of funds clauses in incrementally funded development contracts.) For multiyear contracts, the test of full funding does not include the cancellation ceiling associated with items in the FYDP to be procured in fiscal years not yet funded (that is, beyond the budget year). Multiyear contracts may not be awarded unless the contract and the multiyear program are fully funded within the approved FYDP funding.
2.3 Multiyear Procurement (010203)

2.3.1. **Multiyear procurement (MYP).** This is a generic term describing the process, planning, and contract under which the government may contract for the purchase of supplies or services for more than one, but not more than five, program years. Such a contract may provide that performance during the second and subsequent years of the contract is contingent upon the appropriation of funds, and may provide for a cancellation payment to be made to the contractor if such appropriations are not made. Multiyear procurements are budgeted and funded annually.

2.3.2. **Statutory Requirements.** Section 2306b of title 10 of the United States Code and section 8008 of the annual DoD Appropriations Act, require that approval, initiation, and execution of a multiyear contract follow certain guidelines.

- **2.3.2.1.** MYP approval is predicated on:
  
  - **2.3.2.1.1. Substantial Savings.** The use of a multiyear contract will result in substantial savings of the total anticipated costs of carrying out the program through annual contracts.
  
  - **2.3.2.1.2. Stability of Requirement.** The minimum need for the property to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, procurement rate, and total quantities.
  
  - **2.3.2.1.3. Stability of Funding.** There is a reasonable expectation that throughout the contemplation contract period, the head of the agency will request funding for the contract at the level required to avoid contract cancellation.
  
  - **2.3.2.1.4. Stable Design.** There is a stable design for the property to be acquired and the technical risks associated with such property are not excessive.
  
  - **2.3.2.1.5. Realistic Cost Estimates.** The estimates of the cost of the contract and the anticipated cost avoidance through the use of a multiyear contract are realistic.
  
  - **2.3.2.1.6. National Security.** Use of a multiyear contract will promote the national security of the United States.

- **2.3.2.2.** In addition to the approval criteria, Congress requires that:
  
  - **2.3.2.2.1.** MYP contracts cannot be initiated for any system or component thereof if the value of the MYP contract would exceed $500.0 million unless specifically provided for in an Appropriations Act and an Act other than an Appropriations Act.
  
  - **2.3.2.2.2.** Proposed legislation and funding must accompany the MYP request in the President's budget submission; or the MYP request must be formally submitted as a budget amendment.
2.3.2.2.3. Funds appropriated for the purchase of an end item under a multi-year contract may only be used for a complete and usable end item.

2.3.2.2.4. Funds appropriated for advanced procurement under a multi-year contract may only be used to fund the long lead items necessary for a complete and usable end item planned and budgeted for a subsequent fiscal year. Advanced procurement funds may also be used for economic order quantity procurements in connection with a multi-year contract when authorized by law.

2.3.2.2.5. Congressional defense committees must be notified at least 30 days in advance of a proposed contract award that: employs economic order quantity procurements in excess of $20.0 million in any one year of the contract; employs advance procurement leading to a multi-year procurement contract that employs economic order quantity procurement in excess of $20.0 million in any one year; or includes an unfunded contingent liability in excess of $20.0 million.

2.3.2.2.6. A multi-year procurement contract cannot be initiated for which the economic order quantity advance procurement is not funded at least to the limits of the government’s liability.

2.3.2.2.7. A multi-year procurement contract must provide for production at not less than the minimum economic rate given the existing tooling and facilities.

2.3.2.2.8. A present value analysis must be used to determine the present value, or real worth, of the multi-year savings. Comparing the multi-year contracting approach to a conventional annual-buy approach derives the savings (see section 8008 for additional (new) requirements.

2.3.2.2.9. The Secretary of Defense must certify to the Congress that the support costs associated with the multiyear procurement with a value greater than $500 million are fully funded within the Future Years Defense Program (FYDP). The Secretary of Defense in a March 23, 1998 memorandum delegated this certification to the USD Comptroller. Components must submit the certification letter to the USD Comptroller at least 30 days prior to the anticipated contract award for approval, signature, and transmittal to the congressional defense committees.

2.3.2.2.10. Multi-year procurement contracts may provide for cancellation provisions to the extent that such provisions are necessary and in the best interests of the United States. The cancellation provisions may include consideration of both recurring and nonrecurring costs of the contractor associated with the production of the items to be delivered under the contract, but may not include recurring costs associated with unfunded units. The Agency Head and the USD(C) must approve the inclusion of recurring costs in a cancellation ceiling (see paragraph 2.2.3 below).

2.3.2.2.11. Before any multiyear procurement contract that contains a clause setting forth a cancellation ceiling in excess of $100.0 million may be awarded, the head of the agency concerned shall give written notification of the proposed contract and of the proposed
cancellation ceiling for that contract to the congressional defense committees. The contract may not be awarded until the end of a 30-day waiting period beginning on the date of such notification.

2.3.2.11. MYP contracts cannot be terminated without a 10-day prior notification to the congressional defense committees.

2.3.3. DoD Requirements.

2.3.3.1. The item should be technically mature, normally having completed RDT&E (including development testing, or equivalent) and Initial Operational, Test and Evaluation (IOT&E), with relatively few changes in item design anticipated. Deliveries of production items will indicate that the underlying technology is stable. This does not mean that changes will not occur but that the estimated cost of such changes is not anticipated to drive total costs beyond the proposed funding profile.

2.3.3.2. Estimates should be based on prior cost history for the same or similar items or proven cost estimating techniques. Normally, production assets should have been delivered in order to obtain actual costs for the comparisons (exceptions include satellites and ships).

2.3.3.3. With the exception of funding for economic order quantity (EOQ) procurement and advance procurement for long lead-time items as defined in section 2.2, multi-year procurement contracts will comply with full funding. The full funding policy shall apply to each individual year of the multiyear contract. Multi-year contracts shall not be used as a vehicle for incrementally funding the items across the fiscal years covered by the contract. The production lots on the contract shall be the same as those described in the budget and advance procurement shall not be used to achieve a higher production rate for the end item. Funds shall not be "borrowed" from the amounts budgeted for items in the early fiscal years of a multi-year contract to begin work on items not budgeted until later fiscal years of the contract.

2.3.3.4. The inclusion of recurring costs in cancellation ceilings is an exception to normal contract financing arrangements and requires approval by the Agency Head (FAR 17.106-3(e)) and the USD Comptroller.

2.3.3.5. An exception, to be approved by the USD Comptroller, is needed to structure a contract with an unfunded cancellation ceiling. Justification explaining why an unfunded cancellation ceiling is the chosen acquisition strategy should be provided. This justification should specify what costs comprise the unfunded cancellation ceiling and why these costs are not funded under the full funding policy.

2.3.3.6. In keeping with the DoD policy of not relying upon industry to finance the cost of Defense programs, even on a temporary basis, the use of unfunded cancellation ceilings on multi-year contracts shall be rare and shall not be unreasonably large relative to the total budget for any individual fiscal year.
2.3.3.7. Funds obligated for multiyear contracts must be sufficient to cover any potential termination costs. The costs of cancellation or termination may be paid from (1) appropriations originally available for the performance of the contract concerned; (2) appropriations currently available for procurement of the type of property concerned, and not otherwise obligated; or (3) funds appropriated for those payments.

2.4 Buy-to-Budget for Acquisition of End Items (010204)

2.4.1. In accordance with United States Code Title 10, Section 2308, the head of an agency making the acquisition may acquire a higher quantity of the end item than the quantity specified in applicable Appropriations Acts if the following conditions are met:

2.4.1.1. The agency has an established requirement for the end item that is expected to remain substantially unchanged throughout the period of the acquisition.

2.4.1.2. It is possible to acquire the higher quantity of the end item without additional funding because of production efficiencies or other cost reductions.

2.4.1.3. The amount of the funds used for the acquisition of the higher quantity of the end item will not exceed the amount provided under that law for the acquisition of the end item.

2.4.1.4. The amount provided is sufficient to ensure that each unit of the end item acquired within the higher quantity is fully funded as a complete end item.

2.4.2. For noncompetitive acquisitions, the acquisition of additional quantities is limited to not more than 10 percent of the quantity approved in the justification and approval prepared in accordance with United States Code Title 10, Section 2304, and Federal Acquisition Regulation Part 6.

2.4.3. The agency head must notify the congressional defense committees of a decision to buy more items than specified in an Appropriations Act not later than 30 days after the date of the decision.

2.5 Transportation (010205)

2.5.1. First Destination Transportation (FDT) is that transportation required to deliver new, an upgraded model, or recapitalized production items from the manufacturer’s plant or source of procurement to the first point of delivery where the Military Service or Defense Agency takes possession and/or ownership of that item. The procurement source, as used herein, is any supplier outside the DoD supply system or any DoD industrial activity that fabricates new materiel. The procurement source or the first point of delivery may be in the Continental United States (CONUS) or overseas. FDT is not applicable to components or items reworked by an industrial activity. In the case where the Government accepts the production item at the manufacturer’s plant or source of production and legally owns the item, FDT extends to the first point of delivery for either use or storage by the Military Service or Defense Agency. For shipments destined to overseas
locations that will enter the Defense Transportation System, FDT terminates at the port of embarkation (CONUS or overseas).

2.5.2. Second Destination Transportation (SDT) is any transportation other than FDT

2.5.3. Budgeting Responsibilities for Transportation

2.5.3.1. Transportation of Supply Management Materiel of the Defense Working Capital Funds. Transportation among the 50 states is financed by the supply management business area responsible for the shipment. Transportation of supply management standard items overseas is financed by the appropriation or fund ordering the materiel if within the definition of FDT, otherwise it is financed as SDT. Transportation of DWCF nonstandard items overseas is financed in the same manner as transportation of standard items overseas except for items that are shipped on a free-on-board (FOB) destination basis. In this case, the overseas shipment transportation cost is included in the cost of the nonstandard item and no additional transportation charges should be incurred for the overseas shipment.

2.5.3.2. Transportation of Items Procured by Other Than Procurement and O&M Appropriations, or Defense Working Capital Funds. In general, FDT is financed by the appropriation, which financed acquisition of the item, i.e., RDT&E appropriations for RDT&E materiel and Military Construction appropriations for items that are shipped to support such construction projects. All over-ocean shipment of subsistence items financed by the Military Personnel appropriations is considered as an exception and is financed as SDT.

2.5.3.3. Transportation of Items Procured by Procurement Appropriations. FDT is normally financed by the Procurement appropriation that financed acquisition of the item. SDT is normally financed by the Operation & Maintenance (O&M) appropriations. The following additional guidance applies:

2.5.3.3.1. Transportation costs integral to production contract price such as FOB destination charges are considered part of the end item unit price and are financed by the procurement appropriation that financed acquisition of the item.

2.5.3.3.2. All transportation of government furnished equipment (GFE) and government furnished materiel (GFM) prior to installation into an end item is considered FDT and is financed by the procurement appropriation that financed acquisition of the item.

2.5.3.3.3. The transportation of items that are not owned by DoD - such as nuclear materials and warheads that DOE provides to DoD but DOE retains ownership - is considered FDT and is financed by the procurement appropriation that financed the acquisition of the end item into which the item will be incorporated.

2.5.3.4. Transportation of Items Procured by O&M Appropriations. Transportation is financed by the O&M appropriation according to the FDT and SDT definitions.
2.6 Engineering Change Orders (010206)

Engineering change orders should be funded commensurate with the level of risk in the program.

2.7 Factory Training (010207)

Factory training course costs for initial cadre training are considered investment costs and should be budgeted and funded in the investment appropriation and the specific program used to procure the development, acquisition, or modification of the related end item. Temporary Duty (TDY) travel costs of military or civilian personnel attending factory training courses are funded in the Operation and Maintenance appropriations. Factory training courses acquired for end items no longer in production are to be funded in the Operation and Maintenance appropriations.

2.8 Interim Contractor Support (010208)

Interim contractor support (ICS) is the maintenance and support of a new weapon system provided by a commercial vendor pending transition to organic support. Because ICS is a major component of the initial logistics support of a newly fielded system and integral to program acquisition, ICS funding requirements should be budgeted in the Procurement appropriations. However, ICS is intended to provide support for the brief period between initial item deployment and the permanent organic support. All acquisition strategies should attempt to minimize ICS requirements and duration. ICS will only be funded in Procurement appropriations until the organic support date specified in the acquisition program baseline is achieved. Continued funding of ICS after the baseline support transition date will be approved on an exception basis.

2.9 Commercial Off-the-Shelf (COTS) and Non-Developmental Item (NDI) Procurement (010209)

Items purchased directly from a commercial source that can be utilized without alteration or modification are classified as COTS or NDI. All COTS and NDIs, including the first article and associated first article acceptance testing should be funded in the Procurement or O&M appropriations, as determined by the Expense and Investment criteria. If an end item requires design and development in order to accept the COTS or NDI, or if Operational Test & Evaluation (OT&E) is required to determine military suitability and effectiveness; or if Live Fire Test & Evaluation (LFT&E) is required to determine whether the COT/NDI possesses survivability and lethality characteristics needed by operational forces, then the entire effort is not COTS or NDI, and funding for that effort should be budgeted in RDT&E. If a COTS or NDI is required for RDT&E test purposes, the cost is funded in RDT&E.
2.10 Spares and Repair Parts (010210)

2.10.1. This Section provides instructions applicable to funding requests for spares and repair parts procured with direct appropriations in the Procurement Title.

2.10.1.1. Initial Spares and Repair Parts. Initial spares and repair parts will include those repairable components, assemblies, and subassemblies required as initial stockage at all levels including the pipeline to permit fielding of new end items. Whole spare engines will be classified as initial spares through the life of system. Funding will be budgeted based on a first year obligation rate of 92 percent.

2.10.1.2. War Reserve Spares and Repair Parts. War reserve material (WRM) spares and repair parts for initial stockage will be budgeted in replenishment except for whole spare engines in accordance with the above definitions. See Section 2.17, Defense Working Capital Funds - War Reserve Materiel, for additional budgeting WRM policies.

2.10.2. The Operation and Maintenance (O&M) accounts will finance the purchase of depot level repairables (DLRs) and consumable repair parts, primarily through the Defense Working Capital Fund (DWCF), for maintenance of all Class IX equipment (excluding medical peculiar repair parts).

2.10.3. Spares budgeting can be aggregated by weapon system except for Selected Acquisition Report (SAR) systems.

2.11 Direct and Reimbursable Budget Plans (010211)

2.11.1. Direct Budget Plan. This plan includes those items of materiel to be purchased for delivery to service inventory and those procurement programs that support the acquisition of materiel for US forces. Financing for the direct budget plan is derived from: new budget authority provided by the Congress, the transfer of resources from other appropriations, and reimbursements. When dealing with reimbursements involving the sale of materiel, three situations can arise:

2.11.1.1. Replacement-in-Kind. In this situation an item of materiel is sold and will require replacement with an item of the identical type, model, and series or modified version of the same basic model (i.e., the sale of C-130E aircraft and purchase of C-130E aircraft). In this situation the reimbursement from the sale will be included in reimbursable financing and the buy-back of the item in the reimbursable program. There will be no reflection of this transaction in the Direct Budget Plan. For an ammunition item, the replacement-in-kind policy permits replacement of a round with any round that provides the same warfighting mission capability, providing the round to be purchased has been previously approved by the Congress for procurement, and the inventory objective presented to the Congress is not exceeded.
2.11.1.2. **Replacement.** In this situation an item of materiel is sold and will require replacement to compensate DoD inventories for the resultant loss of capability or readiness. Because of one or more circumstances, the replacement item will not be identical to the item sold. It must, however, be a later series or modified version of the same basic model (e.g., sale of a C-130A aircraft and purchase of a C-130E aircraft) or an acceptable substitute item used in the requirements computations (e.g. sale of an M-48 tank and purchase of an M-60 tank). In this situation the reimbursement from the sale will be included under reimbursable financing but the buy-back of the replacement item must be shown under the Direct Budget Plan and must comply with reprogramming requirements.

2.11.1.2.1. Items sold from inventory with a unit cost less than $5,000 will be treated as a replacement-in-kind if an improved model of the same end item is being procured, it provides the same warfighting capability, and the inventory objective presented to Congress is not exceeded.

2.11.1.2.2. If an item is eligible for replacement or replacement-in-kind and is not replaced, the reimbursement should be treated as a "free asset."

2.11.1.3. **Free Assets.** In this situation an item of materiel is sold and will not require replacement. All free assets from FMS transactions are required to be deposited into the Miscellaneous Receipts of the US Treasury in accordance with 10 U.S.C. 114(c)(2).

2.11.2. **Reimbursable Budget Plan.** This plan includes those items of materiel to be purchased for delivery to and use by customers. Financing for the reimbursable budget plan is derived from:

2.11.2.1. Anticipated reimbursement based upon customer orders received for items (not stocked by or purchased for procuring service use) to be purchased for direct delivery to a customer. (Direct citation of customer funds for procurement against this type of order is encouraged where common components and/or common assembly with service production of similar items are not involved.)

2.11.2.2. Anticipated reimbursement based upon customer orders received or to be received for items common to the procuring service and customer, for direct delivery to the customer.

2.11.2.3. Where the materiel item is to be made available from on-order quantities under an existing contract of a Military Department, the sales transactions will be reflected as reimbursable transactions. The quantities and costs of the replacement procurement will be included in the reimbursable program.

2.11.2.4. Where the materiel item is to be made available directly from a contract awarded after the date of the sales agreement and the contract includes a particular quantity of the item to fulfill the sales agreement, the transaction will be reflected as a direct cite transaction.
2.11.2.5. In "Replacement-in-Kind" situations, the proceeds from the sale will be included under reimbursable financing and the buy-back program will be included in the Reimbursable Budget Plan.

2.11.2.6. In "Replacement" situations, the proceeds from the sale will be included under reimbursable financing but the buy-back program will be included under the Direct Budget Plan (not the Reimbursable Budget Plan).

2.11.2.7. Reimbursements from customer orders for secondary items, because of the nature of such commodities and the way they must be managed, will always be treated as a generic category requiring, by definition, "replacement-in-kind." Accordingly, the proceeds from such transactions will be included under reimbursable financing and the buy-back of an equivalent value of such commodities will be included in the Reimbursable Budget Plan.

2.12 Budgeting for Information Technology and Automated Information Systems (010212)

2.12.1. Information Technology and Automated Information Systems that are not embedded in weapons systems and/or major end item procurements are budgeted according to the investment and expense criteria (see 2.1) and the appropriation or fund’s purpose.

2.12.2. The correct appropriation for budgeting an IT effort is dependent on the activity and the underlying tasks that make up the IT effort. RDT&E activities and Working Capital Fund activities follow unique procedures as noted in the following paragraphs. All other activities budget for IT efforts based solely on the underlying purpose for the IT effort.

2.12.2.1. An IT effort may require funding for more than one appropriation. The underlying purpose for each discrete task within an IT effort determines the correct appropriation for budgeting of that task. An effort that is so broadly defined that it contains separate tasks appropriate to budgeting in different appropriations should be separated into discrete tasks, each of which is budgeted in the correct appropriation.

2.12.2.2. The following guidelines are provided to help determine which appropriation to use:

2.12.2.3. RDT&E appropriations: Development, test and evaluation requirements, including designing prototypes and processes, should be budgeted in the RDT&E appropriations. The RDT&E funds should be used to develop major upgrades increasing the performance envelope of existing systems, purchase test articles, and conduct developmental testing and/or initial operational test and evaluation prior to system acceptance. In general, all developmental activities involved in bringing a program to its objective system are to be budgeted in RDT&E.

2.12.2.3.1. Reaching the objective system, as defined in the requirements documents, is a critical determinate. Some software programs, particularly those following a spiral or incremental development pattern, may be approved for initial fielding even though the early capability is below the objective system requirements. The follow-on development and test activities required to reach the objective system performance will be budgeted in RDT&E.
2.12.2.3.2. Commercial-off-the-shelf (COTS) systems that require engineering design, integration, test, and evaluation to achieve the objective performance will be budgeted in RDT&E.

2.12.2.3.3. The acquisition, operation and maintenance of IT systems that are used exclusively to support RDT&E activities will be budgeted and funded within an RDT&E appropriation.

2.12.2.4. Procurement appropriations: Acquiring and deploying a complete system with a cost of $250,000 or more is an investment and should be budgeted in a Procurement appropriation. Complete system cost is the aggregate cost of all components (e.g., equipment, integration, engineering support and software) that are part of, and function together, as a system to meet an approved documented requirement. For modification efforts, only the cost of the upgrade (e.g., new software, hardware, and technical assistance) is counted towards the investment threshold. The total cumulative cost of the system is not considered when deciding what appropriation to use to fund modernization.

2.12.2.4.1. Procurement of fully developed and tested modification kits and associated installation, including technical assistance is financed from Procurement appropriations. Equipment purchased after successful system testing and a favorable fielding decisions is funded with procurement dollars.

2.12.2.4.2. Proprietary software carries a copyright from the vendor that prohibits duplication or modification. Essentially, the purchaser is buying a license from the vendor to use the software on a particular system. Proprietary software is an investment, subject to the expense-investment criteria, unless it is financed on an "annual fee" basis. In the latter case, it is an expense item properly financed in RDT&E or O&M.

2.12.2.5. O&M appropriations: Expenses incurred in continuing operations and current services are budgeted in the O&M appropriations. Modernization costs under $250,000 are considered expenses, as are one-time projects such as developing planning documents and studies.

2.12.2.5.1. Software releases categorized as iterations on the basic release and not involving significant performance improvements or extensive testing are considered a maintenance effort. Minor improvements in software functionality which are accomplished during routine maintenance may also be O&M funded.

2.12.2.5.2. Items purchased from a commercial source that can be used without modification (e.g., COTS and nondevelopmental items) will be funded in either the Procurement or O&M appropriations, as determined by the expense and investment criterion.

2.12.2.6. The IT systems developed and acquired through the Defense Working Capital fund will be reflected in the Capital Budget if the system is $100,000 or more. Systems costing less than $100,000 are funded through the Operating Budget.
2.12.2.7. Capitalization of Software Cost. For accounting purposes, the total cost of software should be capitalized when the total cost of the system exceeds the Department’s capitalization threshold amount, which is currently $100,000. Capitalization of software is not dependent on the appropriation used to fund its purchase or development. Further information on capitalization may be found in the DoD FMR, Volume 4, Chapter 6, paragraph 060210.

2.13 Research, Development, Test and Evaluation (RDT&E) - Definitions and Criteria (010213)

2.13.1 Definitions. The term "research and development (R&D)" is intended broadly to include the work performed by a government agency or by private individuals or organizations under a contractual or grant arrangement with the government. It includes R&D in all fields, including the physical sciences, engineering, etc.

2.13.1.1. Research is systematic study directed toward fuller scientific knowledge or understanding of the subject studied.

2.13.1.2. Development is systematic use of the knowledge and understanding gained from research, for the production of useful materials, devices, systems, or methods, including the design and development of prototypes and processes.

2.13.2. General Criteria. When, after consideration of the following criteria, there is doubt as to the proper assignment of costs between appropriations, the issue should be resolved in favor of using RDT&E funding. In general, the types of costs to be financed by RDT&E and related appropriations are:

2.13.2.1. RDT&E Appropriations.

2.13.2.1.1. RDT&E will finance research, development, test and evaluation efforts performed by contractors and government installations, including procurement of end items, weapons, equipment, components, materials and services required for development of equipment, material, or computer application software; its Development Test and Evaluation (DT&E); and its Operational Test and Evaluation (OT&E) as provided for in paragraph 2.13.3.5 (Test Articles and Test Support) below.

2.13.2.1.2. The operation of R&D installations and activities engaged in the conduct of R&D programs, including direct and indirect efforts, expense and investment costs.

2.13.2.1.3. The acquisition or construction of industrial facilities costing less than $750,000 at government owned, government operated (GOGO) facilities under the criteria of DoD Directive 4275.5 as provided for under 10 U.S.C. 2805 (unspecified minor construction). Use of RDT&E funds for acquisition and construction at contractor owned or contractor operated government facilities is authorized under 10 U.S.C. 2353, Contracts; Acquisition, Construction, or Furnishings of Test Facilities and Equipment.
2.13.2.2. Related Appropriations

2.13.2.2.1. All construction at R&D installations and activities other than that covered above will be funded in the Military Construction appropriations.

2.13.2.2.2. Equipment and material approved for production and intended for operational use or inventory upon delivery will be funded in the Procurement appropriations. Product improvement within the current performance envelope on systems in production, will be funded in the Procurement appropriations as long as no development or operational tests by an independent operational test agency are required.

2.13.2.2.3. Family housing construction, operation and maintenance at R&D installations and activities will be funded in the Family Housing appropriations.

2.13.2.2.4. Expenses of Headquarters R&D management, organizational management analyses, test and evaluation for system sustainment personnel and command support, and product improvement within the current performance envelope for systems out of production will be funded in the Operation and Maintenance (O&M) appropriations.

2.13.3. Specific Determinations. Additional details on the determination of proper funding for specific items or efforts are provided in the following paragraphs.

2.13.3.1. Organizational Funding Criteria.

2.13.3.1.1. The RDT&E appropriation will finance expenses and investments for the operation and maintenance of R&D organizations, equipment (including R&D aircraft, ships and ship-type vehicles), installations and activities (including those operated by contract).

2.13.3.1.2. Expenses for the support of tenant activities will be funded in accordance with the following:

2.13.3.1.2.1. Expenses for the support of tenant activities at R&D installations and activities will be RDT&E funded by the host activity, pending the establishment of reimbursable arrangements. Subsequent to the establishment of reimbursable arrangements, expenses for the support of the tenant will be funded by the tenant or as mutually agreed with the host.

2.13.3.1.2.2. Where reimbursable arrangements exist, expenses for the support of R&D activities or organizations that are tenant activities at installations having a primary function other than research, development, test and evaluation will be funded by RDT&E.

2.13.3.1.2.3. Expenses for the support of R&D activities or organizations which are tenant activities at installations having a primary function other than R&D will be funded by the host, pending the establishment of reimbursable arrangements.
2.13.3.1.3. Expenses of R&D management and administrative organizations at major systems commands, headquarters organizations and administrative organizations at DoD component departmental headquarters levels (except for the Defense Advanced Research Projects Agency and the Missile Defense Agency) will be financed in the Operation and Maintenance (O&M) appropriations.

2.13.3.1.4. Expenses and investments for the operation and maintenance of major range and test facilities, as defined under DoD Directive 3200.11, that conduct developmental and operational testing as a primary mission as determined by workload, will be financed by the RDT&E appropriation. Major range and test facilities that primarily support testing after system acceptance for operational use or training exercises will be financed in the O&M appropriations.

2.13.3.1.5. Costs of evaluating organizational structure and distribution of function, administrative operating policies, procedures, methods and systems (management studies) and applications of the management sciences to improve effectiveness in carrying out assigned functions are financed in the O&M appropriations.

2.13.3.1.6. Expenses of operational military forces having a primary mission other than R&D and not specifically assigned to R&D that may, from time to time, be engaged in or support R&D activities, will be funded in the O&M appropriations.

2.13.3.2. Facilities Construction and Modification. When it is determined that DoD financing of real property projects is required, the projects shall be programmed, budgeted, and financed as follows:

2.13.3.2.1. Government-Owned, Government-Operated (GOGO) Facility on Government Land. When GOGO property is to be constructed on government-owned land, such construction will normally be financed as a Military Construction project. Construction of facilities for RDT&E costing $750,000 or less may be funded with RDT&E appropriations. Such expenditures are authorized under 10 U.S.C. 2805 (unspecified minor construction). All minor construction must result in a complete and usable facility. In no event are two or more construction projects or minor and major construction projects to be contrived to be a usable facility. Construction projects at R&D installations and activities whose costs are greater than $750,000 will be financed by the Military Construction appropriation in accordance with Chapter 6.

2.13.3.2.2. Government-Owned, Contractor-Operated (GOCO) Facility

2.13.3.2.2.1. When the GOCO facility is on a military installation (post, camp or station) the primary funding is the Military Construction appropriation. However, if the facilities are contractor-operated, and the contractor is solely responsible for the complete and total operation and maintenance of the facility complex, construction may be financed in Procurement or RDT&E in accordance with DoD Directive (DoDD) 4275.5 and 10 U.S.C. 2353 criteria. New construction or improvements having general utility are not authorized under 10 U.S.C. 2353.
2.13.3.2.2. When GOCO facilities are constructed on government property other than a military installation, the Procurement or RDT&E appropriation will finance the construction in accordance with DoDD 4275.5 criteria.

2.13.3.2.3. Contractor-Owned, Contractor-Operated Facility. Under 10 U.S.C. 2353, a research or development contract may provide for the acquisition, construction, or furnishing of facilities and equipment that are necessary for the performance of the contract to the contractor. Improvements having general utility or new construction are not authorized under 10 U.S.C. 2353. Facilities that would not be readily removable or separable without unreasonable expense may not be installed or constructed on property not owned by the government, unless the contract contains:

2.13.3.2.3.1. A provision to reimburse the government for the fair value of the facilities;

2.13.3.2.3.2. An option for the government to acquire the underlying land; or

2.13.3.2.3.3. An alternative provision that protects the interests of the United States in the facilities.

2.13.3.2.4. All proposed RDT&E real property facilities will be identified to Congress in accordance with Chapter 5, Section 050402.

2.13.3.2.5. The Family Housing appropriation will provide for Family Housing construction and Family Housing O&M at R&D installations and activities.

2.13.3.3. Equipment. RDT&E appropriations will finance the development, design, purchase, installation, and acceptance testing of equipment or instrumentation required to support RDT&E activities. Costs of specialized equipment and instrumentation required for the support of research, development, test and evaluation contractor effort at government-owned, contractor-operated (GOCO) activities will be financed in RDT&E.  DoD Directive 4275.5 applies. Installation costs include directly related foundations, shielding, environmental control, weather protection, structural adjustments, utilities and assets. Installation costs are excluded from RDT&E financing if the effort is accomplished concurrently with a military construction project, and in these instances, the military construction appropriation finances the installation cost. To the extent that the equipment installation occurs at a government activity and the cost exceeds $500,000, no new facility or physical outer dimension expansion to an existing facility shall result from an RDT&E-funded equipment installation project.
2.13.3.4. Establishment of Pilot Line and Tooling Requirements

2.13.3.4.1. The costs associated with establishing an initial pilot line, which are necessary to acquire a limited number of representative items for test purposes, including the test items, will be financed by RDT&E. All items and costs associated with maintaining the initial pilot line beyond the quantity sufficient to test for operational acceptability will be financed from other appropriations.

2.13.3.4.2. When an end item under development has also been approved for procurement, operational use, or included in the force structure, then hard tooling requirements common to both the development and procurement phases will be financed by Procurement appropriations. When an end item under development has not been approved for procurement, operational use, or included in the force structure, then tooling and other preliminary production facilities required to produce realistic development items for test and evaluation will be financed by RDT&E, even though such tooling and facilities might later be used for production.

2.13.3.5. Test Articles and Test Support

2.13.3.5.1. As a general rule, the procurement of test articles and test support, including "Special Support" costs and "Command Support" costs (see Glossary), for all RDT&E tests preceding and leading to acceptance for operational use will be RDT&E funded. Test articles and components or materials to be assembled into test articles shall be budgeted in accordance with the need for them in the development and test program. Purchases of fully configured or near fully configured test articles (e.g., off-the-shelf drones) should be budgeted in accordance with the need for full units to test.

2.13.3.5.1.1. Development and preproduction prototypes (RDT&E financed) will be used for Developmental Test and Evaluation (DT&E), including scientific, technical and weapons effects tests. DT&E programs must provide complete and reliable data that can be used to estimate the military utility of new items as a basis for considering decisions to continue engineering development. To this end, it is essential to plan, program, budget and fund for an adequate number of R&D articles for development, test and evaluation that will be fabricated, manufactured or produced in a realistic preliminary production manner and thus provide such data.

2.13.3.5.1.2. Development and preproduction prototypes (RDT&E financed) will be used for OT&E. When so used, they must be sufficiently representative of the expected production items’ to provide from OT&E a valid estimate of production items operational effectiveness and suitability (including compatibility, interoperability, reliability, maintainability, and logistic and training requirements).
2.13.3.5.1.3. Low Rate Initial Production (LRIP) assets. LRIP, as defined in DoD 5000.2-R, is to provide production configured or representative articles for operational test (RDT&E funded, see paragraph (2)); establish an initial production base for the system (procurement funded); and permit an orderly increase in production rate for the system (procurement funded). If the asset will be used for developmental or operational testing by an independent operational test agency, then it should be procured with RDT&E funds. The LRIP quantity will be determined as part of the Production and Deployment approval (Milestone C). RDT&E funds will be budgeted to procure the items required for operational test to facilitate the testing of LRIP assets. LRIP test articles must be specifically identified in the budget documentation. Should LRIP items beyond the test quantity be required, they would need to be included in the Milestone C decision and a determination made at that time. Ships and space systems do not have LRIP periods like other systems. Special guidance relating to the transition of ships and space systems from RDT&E to Procurement is provided in paragraph 2.13.3.9 of this section.

2.13.3.5.2. Conduct of testing that is not associated with RDT&E, or testing conducted after fielding or acceptance for operational use, such as the examples noted below, will be financed in the Procurement or O&M appropriations, as appropriate.

2.13.3.5.2.1. Acceptance, quality control and surveillance testing of articles obtained for other than RDT&E purposes.

2.13.3.5.2.2. Routine testing in connection with logistic support.

2.13.3.5.2.3. Testing related to the operation and maintenance of equipment and material acquired for use under appropriations other than RDT&E.

2.13.3.5.2.4. Testing required to prove the capability of facilities to produce items which have been approved for production will be funded by procurement as part of the initial acquisition cost.

2.13.3.5.3. The acquisition of commercial or nondevelopmental items for testing and operational evaluation that do not require RDT&E engineering, design or integration effort will be financed by O&M or Procurement appropriations (as determined by the Expense and Investment criteria). O&M appropriations will finance personnel and command support costs for test and evaluation of commercial and nondevelopmental items by field units for doctrine, operational, or organizational purposes. If the commercially available item is modified and requires testing prior to approval for service use or inventory it is to be funded in RDT&E as are all developmental items.
2.13.3.5.4. Articles (including end items, weapons, equipment, major test vehicles such as ballistic missile boosters or upper stages, components and materials) of types regularly procured to meet established general requirements such as operational training, operational use, or inventory which are assigned or allocated on a priority basis for use in support of approved R&D programs and which are not consumed in testing, may be financed by Procurement or O&M appropriations using the expense and investment criteria. In addition, excess items that can be made available on a priority basis from existing inventory will be reassigned for use in R&D test and evaluation programs without reimbursement. However, all items, expected to be consumed in R&D test and evaluation will be financed by RDT&E appropriations.

2.13.3.5.5. Consumable rounds of ammunition or rounds of similar tactical missiles otherwise procured in quantity for inventory under existing procedures, may be issued on a priority basis for use in R&D testing without reimbursement.

2.13.3.5.6. The acquisition of test articles will be financed by O&M or Procurement appropriations (as determined by the Expense and Investment criteria), and personnel and command support costs will be financed by O&M appropriations for all test and evaluation (T&E) subsequent to acceptance for operational use and T&E to demonstrate the operational employment or develop operational tactics (i.e., subsequent to RDT&E efforts).

2.13.3.6. **Modification and Refurbishment of Test Articles.**

2.13.3.6.1. Costs associated with modifying or reconfiguring an existing item for R&D test purposes will be funded in RDT&E. When an item that has been diverted from another use is not consumed in R&D testing, any costs necessary to return the item to serviceable condition or to its pre-existent configuration will be financed in RDT&E.

2.13.3.6.2. If an article initially acquired with RDT&E funds as part of an RDT&E test effort is still available at the completion of the test program, it may be reassigned for operational use or inventory. The cost to modify such an article for operational use would be borne by the Procurement and O&M appropriations, as appropriate.

2.13.3.7. **Product Improvement.**

2.13.3.7.1. "Product improvement" of major end items and major components of major end items currently in production or in the operational inventory, is subject to the following:

2.13.3.7.1.1. Redesign of an item to increase the current performance envelope, including related development, test and evaluation effort, will be financed in RDT&E.
2.13.3.7.1.2. Engineering services or related manufacturing efforts applied to an item currently in production to extend its useful military life within the current performance envelope should be funded by Procurement appropriations as long as no developmental testing (DT) or operational test and evaluation (OT&E) by an independent operational test agency is required. If DT or OT&E by an independent operational test agency is required, RDT&E finances the improvement. The phrase "an item currently in production" implies that the item has end item procurement funding in the year the product improvement effort is to take place.

2.13.3.7.1.3. Engineering services or related manufacturing efforts applied to an out-of-production, but still operational item to extend its useful military life within the current performance envelope should be financed by O&M appropriations as long as no developmental testing (DT) or operational test and evaluation (OT&E) by an independent operational test agency is required. If DT or OT&E is required by an independent operational test agency, RDT&E finances the improvement.

2.13.3.7.1.4. In both cases (2) and (3) above, the determination that the improvement is “within the current performance envelope” and that “no development testing (DT) or operational test and evaluation (OT&E) by an independent operational test and evaluation agency is required” should be determined after formal coordination with the Director, Operational Test and Evaluation.

2.13.3.7.2. While existing off-the-shelf equipment may be procured with Procurement funds, items that require engineering design, integration, test, or evaluation effort shall be procured with RDT&E funds in sufficient numbers to support such effort.

2.13.3.7.3. Costs of fully developed and tested modification kits and associated installation costs should be financed from Procurement appropriations. If DT or OT&E by an independent operational test agency is required, RDT&E finances the RDT&E effort and the kits required for RDT&E testing. Procurement funds would then be used to procure the follow-on kits.

2.13.3.7.4. Aircraft engine component improvement costs are budgeted in the RDT&E appropriations to provide for continuing improvements in the aircraft engines in the areas of reliability, maintainability, durability, correction of Service-revealed deficiencies, safety of flight, time-between-overhaul, etc. "Component Improvement" is established at the point in time when:

2.13.3.7.4.1. There has been a Government acceptance of the first procurement funded engine, and
2.13.3.7.4.2. The engine has successfully completed stringent qualification or verification testing to demonstrate initial production suitability subject to:

2.13.3.7.4.2.1. Compliance with contractual specifications, performance guarantees and military specifications, as applicable to individual Service requirements;

2.13.3.7.4.2.2. Completion of endurance testing representative of the anticipated Service use to include completion of specified post test inspections, certification, and penalty runs;

2.13.3.7.4.2.3. Demonstration of prescribed performance capability; and

2.13.3.7.4.2.4. Accomplishment of prescribed durability, reliability, and environmental testing.

2.13.3.8. Ships and Ship-type Vehicles.

2.13.3.8.1. An experimental test bed type of ship or an experimental ship will be financed by RDT&E appropriations. This will include all such experimental ships required to support an approved R&D program or for the purpose of experimenting with new or radical ship concepts or to demonstrate the military usefulness of new ship designs, configurations or fabrication techniques, when the ship-type test vehicle itself can be predicted to be consumed or expended in testing, or to have little or no operational usefulness in the force structure. Prototype ships, when designated by the Secretary of Defense, are included.

2.13.3.8.2. A ship of demonstrated, conventional concept and design having a high probability of military usefulness and inclusion in the force structure, even though first of a class, will be constructed using procurement funds. A ship of demonstrated conventional concept and design temporarily or permanently assigned from inventory to support R&D effort will be furnished without reimbursement, but the cost of providing all R&D types of equipment or instrumentation, the cost of "nonstandard" modifications of the ship required to make the ship suitable for R&D support, as well as the cost of any related restoration to conventional or operational ship conditions upon release from assignment to R&D, will be financed by RDT&E appropriations.

2.13.3.8.3. Preliminary or contract design for new ship construction will be financed by RDT&E appropriations, including contractor and "field activity" effort costs. Detail design for ships appropriate for procurement funding will be funded by procurement accounts.

2.13.3.8.4. Land-based or sea-based combat system test installations will be financed by RDT&E appropriations.
2.13.3.9. **Space Systems.** The following guidance describes the circumstances in which RDT&E funds may be used for the acquisition of operational space systems.

2.13.3.9.1. **Expendable launch vehicles.** The first rocket of a new design is normally used to launch an operational satellite into orbit. This rocket may be financed with either RDT&E or Procurement appropriations. The second and subsequent expendable launch vehicles shall in all cases be financed with Procurement appropriations. The full funding policy shall apply to all expendable launch vehicles budgeted in Procurement appropriations.

2.13.3.9.2. **Satellites.** The first satellite of a new design is normally placed into operational use. For programs in which satellites are launched individually, the first two satellites may be financed with either RDT&E or Procurement appropriations. The third and subsequent satellites shall in all cases be financed with Procurement appropriations. For programs in which multiple satellites are launched with a single rocket, the satellites comprising the first launch may be financed with either RDT&E or Procurement appropriations depending upon which budgetary approach is most consistent with the contract structure. Satellites for the second and subsequent launches shall in all cases be financed with Procurement appropriations. The full funding policy shall apply to all satellites budgeted in Procurement appropriations. It is expected that satellite programs will make frequent use of advance procurement, combined parts buys, and multiyear contracts to efficiently use funds within the context of the full funding policy. To achieve these efficiencies, advance procurement funding may be budgeted two years (and, in rare instances, three years) prior to the year of full funding. The total advance procurement funding for a satellite should not exceed 20 percent of the unit cost of the satellite.

2.13.3.9.3. **Ground Control and Ground Processing Systems.** The design and implementation of ground control and ground processing systems is an integral part of the development of new satellite systems. The entire cost of the primary ground system (including off-the-shelf workstations, power supplies, etc., but not including military construction) shall normally be financed with RDT&E appropriations. The cost of backup ground systems shall be financed with Procurement appropriations, and the full funding policy shall apply.

2.13.3.9.4. **User Terminals.** User terminals for space systems shall transition from RDT&E to Procurement in the same manner as non-space-related communications and electronics equipment.

2.13.3.10. **Training Devices.** A training device is composed of components and software that have been designed or modified to demonstrate or illustrate a concept or simulate an operational circumstance or environment. The initial or prototype training device and all its support costs through service acceptance for operational use will be funded in RDT&E. RDT&E will not fund beyond the initial system unless more than one full system is required to demonstrate the training device performance. The initial or prototype training device that employs new or off-the-shelf computers and system components, but has training system unique software and interface components, will be developed and procured with RDT&E funds. Typically, these training devices have small quantity requirements and the initial or prototype device is used for operational training. Modifications or updates to existing training devices will normally be funded in the applicable Procurement or O&M appropriation, subject to the expense and investment
2.13.3.11. Joint Test and Evaluation.

2.13.3.11.1. The Joint Test and Evaluation (JT&E) program provides quantitative information used for analyses of joint military capabilities and to develop potential options for increasing military effectiveness. The program is complimentary to, rather than part of the acquisition process. A JT&E project brings two or more Military Services or other Components together to: assess Service system interoperability in joint operations; evaluate joint technical and operational concepts, and recommend improvements; increase joint mission capability, using quantitative data for analysis; validate testing methodologies that have joint applications; improve modeling and simulation validity with field exercise data; provide feedback to the acquisition and joint operations communities; and improve joint tactics, techniques, and procedures. JT&E projects focus on improving the warfighter’s capability to conduct joint military operations with existing equipment. DOT&E manages the JT&E program and coordinates with Combatant Commanders, the Joint Staff, and the Services to ensure warfighter involvement.

2.13.3.11.2. The JT&E program is financed in the Operational Test and Evaluation (OT&E), Defense appropriation (program element 0605804D). DOT&E funds the costs incurred for the direction, supervision, and performance of activities that are unique to the needs of the JT&E projects. When directed as Executive Agent for a particular JT&E project, the Component, Service or COCOM is responsible for ensuring that all resources necessary for the successful accomplishment of the JT&E project are available to the Joint Test Director (JTD). This includes administrative, management and facilities support for the JTD. The Executive Agent support costs (O&M, Procurement, and RDT&E) are to be programmed and budgeted in accordance with established procedures.

2.13.3.12. Manufacturing Technology. The Department of Defense Manufacturing Technology program, which demonstrates factory application of new or improved technology in producing defense items, will be financed in the RDT&E appropriations.

2.13.3.13. Development Efforts Related to Future Leased Services. When the provider of a leased service that will ultimately be financed in O&M requires initial funding in order to design or develop major changes or improvements to meet the government’s requirement for that service, then the costs of such development efforts will be financed in RDT&E.

2.13.3.14. Subsystem Integration into Weapon Systems. Research and development necessary for the integration of subsystems into weapon systems should be financed from the weapon system program. For example, the R&D cost of integrating an electronic warfare black box into an aircraft should be borne by the aircraft R&D program.

2.13.3.15. Engineering change orders should be funded commensurate with the level of risk in the program.
2.14 RDT&E - Incremental Programming and Budgeting Basis (010214)

2.14.1 Purpose.

This Chapter specifies the principles to be followed, and establishes the criteria and definitions to be used, in the preparation of the annual Research, Development, Test and Evaluation (RDT&E) budget estimates on an incrementally funded basis. The incremental budgeting policy provides that only those funds required for work in a given fiscal year shall be included in the RDT&E budget request for that fiscal year for most classes of effort.

2.14.2 Policy.

The annual budget estimates for Research, Development, Test and Evaluation (RDT&E) projects and programs, including developmental and operational test and evaluation programs, are to be prepared on an incrementally programmed basis (as opposed to the fully funded program basis used in preparing procurement budget estimates.)

2.14.3 Guidance.

2.14.3.1 The budget request for DoD projects and programs will be developed and presented in accordance with the following principles:

2.14.3.1.1 Annual estimates of initial financing needed for new major weapon systems and other development programs and projects requiring several years to complete, and which involve contracts spanning more than one year, should be formulated to cover costs expected to be incurred during each fiscal year. Generally this will represent a 9-month or lesser period for the initial, first year increment of a new start program due to the nature and timing of the congressional budget approval. The second and succeeding increments will be programmed and financed for the entire fiscal year. However, the Service or Defense Agency Comptroller must approve extensions of up to 3 months beyond the end of the fiscal year for which funds are requested. In this regard, DoD components should make every effort to align subsequent years’ funding requirements on an annual basis coincident with the fiscal year, although it is recognized that there may be circumstances where this will not be feasible. The estimate of the financing required in the budget year to continue development projects must always take into account any changes (such as slippage’s) that have occurred. RDT&E funding requirements should be based on forecasted obligations that consider costs and timelines for each milestone and other programmatic event.

2.14.3.1.2 There are requirements in which there is no logical way to divide the work; it is clearly unfeasible to limit the contract to a shorter period; or the planned technical effort is such that no responsible contractor can be found who will accept a contract for a less-than-completion increment. For these type efforts that take longer than 12 months but less than 18 months, the Service or Defense Agency Comptroller may approve financing the total requirement in one fiscal year.
2.14.3.1.3. While it is intended that the foregoing guidelines will be applicable to program execution as well as program formulation, there may be circumstances that could delay the start of an annual increment (such as legal, administrative, or technical problems). The 2-year availability of funds authorized for the Research, Development, Test and Evaluation appropriation provides the necessary flexibility for program execution in those circumstances.

2.14.3.1.4. Engineering change orders should be funded commensurate with the level of risk in the program.

2.14.3.2. Budgeting for Termination Liability on Incrementally Funded RDT&E Contracts. The legal requirements of the Anti-Deficiency Act and the long-standing policy of not committing a successor Congress to a course of action both make it necessary that the unliquidated obligation for an incrementally-funded, multiple-year contract be sufficient at all times to cover the cost of terminating that contract for the convenience of the Government. Budgeting to cover termination liability will not increase the total amount budgeted for the program. It will require that the distribution of funds by fiscal year be shifted more towards the earlier years of the contract than if funds had been budgeted only to cover the actual bill to be paid in each year. The distribution of funds by fiscal year shall be such that, if a contract is terminated at any point during the fiscal year, all termination costs can be financed from the unliquidated obligation on the contract without recourse to reprogramming of funds, supplemental appropriations, or awaiting the appropriation of funds for the succeeding fiscal year’s funding increment. All programs shall adhere to this policy with the following two exceptions, both of which are to be used rarely.

2.14.3.2.1. Special Termination Cost Clause (STCC). DoD FAR Parts 249.50170 and 252.249-7000 permit the use of STCC in fixed-price incentive contracts and incrementally funded cost reimbursement contracts. If contracts containing an STCC are terminated before completion, the special termination charges are covered by the unobligated balance of the applicable appropriation, subject to any congressional approval required for reprogramming. The extent to which the STCC can be used is limited to the ability of the Service or Agency to cover expected termination costs from unobligated balances. A recordable obligation under the STCC arises when the contract is actually terminated. If a proposed STCC would require an above threshold reprogramming action when a program is terminated, the approval to use the STCC shall be obtained from the USD (Comptroller) before the contract or contract modification is awarded. All STCCs, regardless of dollar amount, require prior notification of the House and Senate Appropriations Committees.

2.14.3.2.2. Statutory Waivers. The Department is not required to budget for, or obligate funds sufficient to cover, termination liability in connection with an incrementally-funded RDT&E contract if Congress has expressed exempted the program or contract from that requirement. When this situation arises, however, the budget exhibits for the program shall clearly indicate the value of the unfunded termination liability by year for the current year, budget year, and the outyears covered by the FYDP.
2.15 Defense Working Capital Funds - Operating Budget (010215)

The operating budget represents the annual operating costs of an Activity or Component, including depreciation and amortization expenses. Detailed requirements and guidance can be found in Chapter 9.

2.16 Defense Working Capital Funds - Mobilization/Surge Costs (010216)

2.16.1. Separate funding is provided for those costs related to mobilization and wartime surge capacity that would not otherwise be incurred to meet peacetime requirements. The prices of services and products provided to peacetime customers exclude these costs to more appropriately reflect consistent pricing between competing activities. Similarly, better visibility of surge or readiness requirements is provided to decision makers at every level. These “mobilization” costs, although funded and justified as direct appropriations to Component budgets, are elements of business area costs and must be fully justified on the SM-3 and/or Fund-30 schedules. Detailed requirements and guidance can be found in Chapter 9, section 090103.

2.16.2. Unutilized capacity that is associated with the ability to satisfy a projected surge capability is considered a mobilization requirement that is to be funded by appropriated funds provided by the DoD Component having management responsibility for the Fund activity. Costs applicable to unutilized plant and equipment, such as depreciation, or maintenance, are not to be charged to the customers of the Fund activity.

2.16.3. The justification for costs related to mobilization and wartime surge capacity must identify the scenario assumptions or other basis for the requirement under which these costs were calculated. Additionally, a description of how these costs will be collected and accounted for in execution must be provided. The UPC Funding Exhibit Fund-30 will be used to support the request for UPC Funding.

2.16.4. Chapter 9 provides additional guidance and instructions associated with mobilization/surge requirements.

War reserves are procured and maintained to meet wartime requirements as determined by the Strategic Planning Guidance (SPG). These costs will be funded with direct Working Capital Fund appropriations in the Components’ budgets, not through customer rates. However, since the war reserve materiel will be under the management of supply management businesses, war reserve requirements will also be described and justified on the SM-3. In addition, exhibit SM-6 War Reserve Material, will be prepared by the Components to justify WRM Requirements. Detailed requirements and guidance can be found in Chapter 9.

2.18 Defense Working Capital Funds - Military Personnel Costs (010218)

2.18.1. Military personnel costs have been included in revolving funds since FY 1991. This change was made to ensure that the total costs of the business were being captured. The cost
of military personnel assigned to DWCF activities will be included in the total cost of operations of DWCF activities at civilian equivalent rates and reflected in the stabilized rates charged to customers. This policy is based on the concept of total costing, which is designed to ensure that the total cost of producing products and services is being identified to both DWCF activities and customers.

2.18.2. The amount expensed for military personnel by DWCF activities and the amount reimbursed to the appropriate military personnel will be the same as the amount budgeted. The budget amount will equal the average end strength multiplied by the civilian equivalency rate for each grade. The average end strength for the budget year(s) will be calculated using the average fill rate for the three prior years. The fill rate is calculated by dividing actual average strength by the authorized end strength for each grade. No adjustments will be made to the DWCF cost of operations to reflect the actual cost of military personnel employed by DWCF activities.

2.18.3. See Chapter 9; section 090103G, for budget formulation, execution, and reimbursement procedures.

2.19 Defense Working Capital Funds - Full Recovery of Costs/Setting Prices (010219)

2.19.1. General Guidelines

2.19.1.1. All business areas in the Fund are required to set their prices based upon full cost recovery, including all general and administrative support provided by others. Prices are established through the budget process. Except for Depot Maintenance Groups, and under special circumstances as specified in Volume 2B, Chapter 9, 090103H, prices remain fixed during the year of execution; actual costs are evaluated against revenue generated by workload at established prices; and the financial condition of the business assessed accordingly. Volume 2B, Chapter 9, paragraph 090105, specifies pricing guidance for sales by DoD depot maintenance activities to private sector entities as part of depot maintenance public-private partnership agreements. Subparagraph C. below summarizes that guidance. Profits or losses will be determined at the end of the year and will be employed as a basis for evaluating operating efficiency.

2.19.1.2. Prices for every Defense Component business activity are established for each fiscal year. Once established, these prices are held constant (stabilized) through program execution unless fund balances require an out-of-cycle rate change. This stabilized rate policy serves to protect customers from unforeseen inflationary increases and other cost uncertainties and better assures customers that they will not have to reduce programs to pay for potentially higher than anticipated prices. In turn, this policy allows activities to execute the budgeted program level and permits a more effective utilization of Fund resources.

2.19.1.3. Prices for the budget year(s) will be set to recover costs over the long run. This means that prices will be set to achieve an Accumulated Operating Result (AOR) of zero. During budget execution, business areas will have either a positive or negative Net Operating Result. Accordingly, prices in the budget year will be set to either make up actual/projected losses or to give back actual/projected gains in the budget year(s).
2.19.1.4. An activity group may request that AOR variances be recovered outside the budget year. This request must be included in the budget submission, and must demonstrate that the delay in the recovery of variances will not adversely affect the cash balance of the activity group. A phased recovery schedule must be provided with the budget. The Director for Revolving Funds will provide final approval for any extended AOR variances recovery plans.

2.19.1.5. In the supply management businesses, the price setting process will be consistent with the rate changes approved during the budget review.

2.19.2. Unplanned Gains/Losses.

2.19.2.1. Under Special Circumstances the DWCF rules for pricing and operating loss recovery or gain distribution may be waived if one or more of the following conditions exist.

2.19.2.1.1. Fund Liquidity. Fund managers are expected to maintain a monthly total fund cash balance between 7-10 days of operations (plus 6 months outlay for capital purchases). However, several factors could cause the Funds to operate outside the target area. Therefore, in order to prevent the build-up of excess cash balances, or ensure fund solvency the Director for Revolving Funds or Fund Managers, with the written permission of the Director for Revolving Funds, may direct out of cycle rate adjustments at any time during the fiscal year.

2.19.2.1.2. Depot Maintenance Additional Requirements. As long as Fund cash balances are within 10% of targeted levels depot maintenance activities will recoup losses and return gains in the budget year. However, if cash balances are outside the target areas the Director for Revolving Funds or Service Fund Managers, with the written permission of the Director for Revolving Funds, may direct out of cycle rate adjustments or surcharges at any time during the fiscal year to restore cash to the targeted levels. Also unplanned depot losses recouped in subsequent years may be financed with prior year funds provided all other criteria associated with prior year upward obligations are met.

2.19.2.1.3. Contingency or Emergency Operations. DWCF pricing and financing requirements may be waived by Fund managers in order to facilitate Department operations during times of war or other national emergencies. Notification of Fund Managers actions must be provided in writing to the Director for Revolving Funds within 30 days of the event.

2.19.3.1. Pricing guidance for sales of goods and services by DoD depot maintenance activities to private entities engaged in public-private partnerships is set forth in Volume 2B, Chapter 9, paragraph 090105. In general, such prices are subject to the requirements of Chapter 9, with the exception that the prices may be based upon the most recent actual and projected costs applicable to the workload, rather than upon approved stabilized billing rates. Rates and prices to private entity partners may also be tailored to include only those direct and
indirect production overhead costs that contribute to the finished product or service. However, full General and Administrative (G&A) costs shall continue to be allocated on the same basis as for DoD customers.

2.19.3.2. Fixed pricing of sales to private party entity partners, including multiyear fixed price agreements, is authorized when production costs can be reasonably predicted and the risk of future operating losses is not significant. Such fixed prices may include provisions for adjustments to accommodate the effect of scope-of-work changes, annual inflation, and specified contingencies. When future production costs or risks cannot be reasonably predicted, cost reimbursable pricing is more appropriate.

2.19.4. Detailed requirements and guidance can be found in Chapter 9.

2.20 Defense Working Capital Funds - Capital Budgeting (010220)

2.20.1. Budgetary resources for capital investments will be separately identified in an approved capital budget. Beginning in FY 2007, the Capital Budget will have two thresholds. For Real Property (Land, Buildings, and Minor Construction), capital assets with a useful life of two years or more, the capital threshold is $100,000 and above. For all other capital assets including depreciable plant, equipment, and software developed, manufactured, transferred or acquired during a fiscal year with a useful life of two years or more, the capital threshold is $250,000 or more. Once assets are capitalized by the DWCF activity, they will continue to be reported as a capital asset and depreciated until the book value of the asset reaches zero or its salvage value, as appropriate. Changes in the capitalization threshold will not impact assets already capitalized unless directed by higher authority. These limits are consistent with accounting guidance published in Volume 4, Chapter 6.

2.20.2. Minor Construction.

2.20.2.1. Minor Construction projects costing $100,000 but less than or equal to $750,000 will be funded through the capital budget and depreciated.

2.20.2.2. In the year of execution the Director of OUSD (Comptroller) Revolving Funds may approve a capital investment reprogram request for Minor Construction projects costing up to $1,500,000 if the project is required to correct a deficiency that is life-threatening, health threatening, or safety threatening.

2.20.2.3. Project planning and design costs are considered a capital investment cost that is capitalized by the DWCF activity and financed in the minor construction portion of the capital budget. Planning and design costs are not included as part of the statutory threshold for minor construction projects.

2.20.2.4. See Chapter 9, section 090103, for budget formulation and execution procedures.
2.20.3. Depreciation.

All capital assets owned by activities in the Fund will be depreciated or amortized by the individual Component business area. Depreciation will be on a straight-line basis and based on the acquisition cost, less residual value when residual value is expected to be 10 percent or more of the acquisition cost, including installation and related costs. Depreciation schedules may be found in Volume 4, Chapter 6, paragraph 0602061.

2.21 Defense Working Capital Funds - Base Support (010221)

2.21.1. Interservice and intragovernmental support, as identified in DoDI 4000.19, is reimbursable by the DWCF activity to the extent that the specified support for the DWCF activity increases the host activity’s direct costs (i.e., incremental direct cost). Costs associated with common use infrastructure are non-reimbursable, except for support provided solely for the benefit of one or more tenants. Support costs that are charged to a tenant DWCF activity (i.e., reimbursable cost) must be measurable and directly attributable to the DWCF activity. Indirect costs will not be included in reimbursement charges, except those included in stabilized rates charged for DWCF mission products and services. Host activities (suppliers of base support) are permitted to waive reimbursement from tenants who use or benefit from available support without appreciably increasing the host activities’ costs (i.e., revenues would be less than the anticipated expense of billing and disbursing funds).

2.21.2. DWCF activities that use any of the common base support functions identified in DoDI 4000.19 (Interservice and Intragovernmental Support) are to reimburse host activities for this support. Reimbursement for DWCF mission products and services (e.g., depot supply, depot maintenance, public works center services, information processing, communications, and software development) shall be based on the approved stabilized rate. Other support incidental to the DWCF activity’s primary mission or purpose is to be budgeted and reimbursed based on direct costs measurable and directly attributable to the DWCF activity. Only the incremental change in cost attributable to the DWCF activity (incremental direct cost) shall be chargeable to the DWCF activity. Indirect costs are not to be included as a cost to the DWCF activity.

2.21.3. Chapter 9 provides budget formulation and execution procedures.

2.22 Defense Working Capital Funds - Dual Funded Organizations (010222)

2.22.1. A dual funded organization is an organization that is funded (including reimbursable funding) by both the DWCF and other appropriations or accounts. In those instances where a function is funded with a combination of both DWCF and appropriated funds, the function initially will be funded in its entirety either by the DWCF or by appropriated funds. The determination of whether the particular function initially is to be funded by the DWCF or appropriated funds will be based on the predominance of definable units of measure for the function. Examples of definable units of measure include work load, productive hours, outputs, or ultimate use. The appropriation or account initially funding the function shall be reimbursed by the other account(s) at the same unit of measure as was used to determine the initial funding source.
The amount of reimbursement shall be determined based on the relative portion of that unit of measure attributable to each part of the organization (or funding source) involved.

2.22.2. This policy does not change the policy for reimbursement for base support services provided by the DWCF to tenant activities. The DoDI 4000.19 and sections 0102021 and 090103K provide guidance for funding base support services.

2.23 Defense Working Capital Funds - Customer Mandated Schedule (010223)

2.23.1. When a job order is canceled or reduced in scope, after a DWCF activity has commenced work or incurred costs on the order, the costs incurred plus the applied overhead (that is indirect and other normally allocated overhead (G&A) costs)) plus costs associated with the cancellation or reduction shall be charged to the customer.

2.23.2. Examples of directly associated cancellation or reduction costs to be charged to customers are advance planning costs, non-creditable direct material, special test equipment, necessary preservation and/or shipment effort, and any additional effort necessitated by the cancellation and/or reduction (e.g., salvaging of material). In addition, costs charged to customers should include the costs of salaries payable to employees hired specifically to work on the canceled order until the employees are or could have been separated through a reduction in force or other appropriate action (taking into account appropriate administrative lead time), or reassigned to other direct jobs. Costs which are indirectly associated with the cancellation or reduced customer orders, under-applied overhead costs that may result in a DWCF activity as a whole from a reduced work load base shall not be charged to the customer canceling or reducing their order but shall be recorded against the net operating results of the performing DWCF activity.

2.24 Glossary of Terms – Procurement (010224)

<table>
<thead>
<tr>
<th>Term</th>
<th>Meaning/Funding Connotation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Advance Procurement (Long Lead Items)</td>
<td>A pre-approved exception to the full funding policy that allows procurement of long lead-time components, material, parts, and effort in a fiscal year before that in which the related end item is to be procured.</td>
</tr>
<tr>
<td>Cancellation</td>
<td>Cancellation means the cancellation (within a contractually specified time) of the total requirements of all remaining program years. Cancellation results when the contracting officer notifies the contractor of nonavailability of funds for contract performance for any subsequent program year or fails to notify the contractor that funds are available for performance of the succeeding program year requirement.</td>
</tr>
<tr>
<td>Cancellation Ceiling</td>
<td>The maximum cancellation charge that the contractor can receive in the event of cancellation (reference Federal Acquisition Regulation (FAR) 17.103).</td>
</tr>
<tr>
<td>Cancellation Charge</td>
<td>The amount of unrecovered costs that would have been recouped through amortization over the full term of the contract, including the term canceled.</td>
</tr>
<tr>
<td>Contingent Liability</td>
<td>As a budgetary term, contingent liability represents variables that cannot be recorded as valid obligations. Such variables include: (1) outstanding fixed price contracts containing escalation, price redetermination, potential liability under incentive clause; or (2) contracts authorizing variations on quantities to be delivered; or (3) contracts where allowable interest may possibly be recovered.</td>
</tr>
<tr>
<td>Term</td>
<td>Meaning/Funding Connotation</td>
</tr>
<tr>
<td>-------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Construction</td>
<td>The erection, installation, or assembly of a new facility; the addition, expansion, extension, alteration, conversion, or replacement of an existing facility; the acquisition of a facility; or the relocation of a facility from one installation to another.</td>
</tr>
<tr>
<td>Detail Design Costs</td>
<td>The final design effort on ships normally performed in conjunction with lead ship construction, is called &quot;detail design.&quot; This effort is procurement funded (SCN).</td>
</tr>
<tr>
<td>Economic Order Quantity (EOQ) Procurement</td>
<td>An exception to the full funding policy that allows the use of advance procurement to purchase more than one fiscal year’s program increment of components, materials, and parts in order to obtain the economical advantages, sustain a production line, etc.</td>
</tr>
<tr>
<td>Facility Modernization</td>
<td>The alteration or replacement of facilities solely to implement new or higher standards, to accommodate new functions, or to replace building components that typically last more than 50 years (such as the framework or foundation).</td>
</tr>
<tr>
<td>Facility Restoration</td>
<td>The restoration of real property to such a condition that it may be used for its designated purpose. Restoration includes repair or replacement work to restore facilities damaged by inadequate sustainment, excessive age, natural disaster, fire accident, or other causes</td>
</tr>
<tr>
<td>Facility Sustainment</td>
<td>The maintenance and repair activities necessary to keep an inventory of facilities in good working order. Examples include regular roof replacement, refinishing of wall surfaces, repair and replacement of heating and cooling systems, and replacement of tile and carpeting.</td>
</tr>
<tr>
<td>Full Funding</td>
<td>Requires the total estimated cost of a complete, military useable end item or construction project funded in the year in which the item is procured. If a future year’s appropriation is required for delivery of an end item, the end item is not fully funded. It prevents funding programs incrementally and provides a disciplined approach for program managers to execute their programs within cost.</td>
</tr>
<tr>
<td>Funded Delivery Period (FDP)</td>
<td>A funded delivery period encompasses a 12-month period that begins when the contractor delivers the first item of a fiscal year procurement. Confusion exists regarding this time period because, in many instances, accurate administrative and production lead-times (ALT/PLT) have not been included in the calculation. The calculation should begin with October 1. From this point in time, the ALT and PLT should be added. This amount of time plus the next 12 months are included in the funded delivery period. When excessive lead-times are included in the calculation, additional quantities are procured that could have been funded in the following fiscal year with no change in the delivery schedule.</td>
</tr>
<tr>
<td>Maintenance</td>
<td>The routine, recurring effort conducted to maintain an end item of investment equipment at its intended capability or designed performance level.</td>
</tr>
<tr>
<td>Nonrecurring Costs</td>
<td>Nonrecurring costs are generally incurred on a one-time basis. Costs may include: plant or equipment relocation; plant rearrangement; special tooling and test equipment; preproduction engineering; initial spoilage and rework; pilot runs; allocable portions of the costs of facilities acquired or established to conduct the work; costs incurred for the assembly, training, and</td>
</tr>
<tr>
<td>Term</td>
<td>Meaning/Funding Connotation</td>
</tr>
<tr>
<td>------</td>
<td>-----------------------------</td>
</tr>
<tr>
<td>transportation of a specialized work force to and from the job site; and unrealized labor learning.</td>
<td></td>
</tr>
<tr>
<td>Production Rates</td>
<td>Minimum Sustaining Rate is the production rate for each budget year that is necessary to keep production lines open while maintaining a base of responsive vendors and suppliers; the quantity that will preclude start-up costs in the case of a production break; or the quantity that the contractor is willing to accept and produce at a reasonable cost. Economical Production Rate is the most efficient production rate for each budget year at which the item can be produced with existing or planned plant capacity and tooling, with one shift a day running for eight hours a day and five days a week (1-8-5). Maximum Production Rate is the maximum capacity rate that a contractor can produce with extant or prior year funded tooling.</td>
</tr>
<tr>
<td>Recurring Costs</td>
<td>Production costs that vary with the quantity being produced, such as labor and materials.</td>
</tr>
<tr>
<td>System</td>
<td>The combination of a number of components that are functioning with the context of a whole to satisfy a documented requirement.</td>
</tr>
<tr>
<td>Termination</td>
<td>The right of the government to terminate the performance of work in whole or part under a contract as specified by the contract's Termination for Convenience or Default provisions. Unlike cancellation, which is effected between fiscal years and must apply to all subsequent fiscal years' quantities of items, termination may be effected at any time during the life of a contract and may apply to the total quantity or to a partial quantity of items.</td>
</tr>
</tbody>
</table>

2.25 Glossary of Terms – RDT&E (010225)

<table>
<thead>
<tr>
<th>Term</th>
<th>Meaning/Funding Connotation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accepted for Service Use</td>
<td>This is the major milestone in a development program that represents the formal acceptance of an item for operational use by the Service. In some instances items are approved for Service use with qualifying restrictions or provisions pending completion of specific development deficiencies. In such instances the appropriation to fund the correction and test must be determined on a case-by-case basis, according to the expense and investment criteria. Typically, all post-Service acceptance effort will be funded in Procurement appropriations.</td>
</tr>
<tr>
<td>Command Support Costs</td>
<td>This term also is used in the context of the T&amp;E programs. It refers to the &quot;people-related&quot; costs of the command and operational units providing collateral support to the T&amp;E effort. These are additional costs incurred because of this test support. Examples are per diem pay, travel allowances, overtime, etc.</td>
</tr>
<tr>
<td>Contract Design Costs</td>
<td>The contract design phase of shipbuilding programs follows the preliminary design phase and results in a design that carries the equipment specifications necessary to meet the Navy requirements. These costs are RDT&amp;E-funded.</td>
</tr>
<tr>
<td>Developmental Test and Evaluation (DT&amp;E)</td>
<td>DT&amp;E is that test and evaluation conducted to assist the engineering design and development process and to verify attainment of technical performance specifications and objectives.</td>
</tr>
<tr>
<td>Government Acceptance of the First Procurement-Funded Engine</td>
<td>This term, which is one of the two minimum requirements for initiation of engine component improvement funding, refers to the date the Government formally accepts delivery (DD Form 250) of the first engine funded under procurement appropriations.</td>
</tr>
<tr>
<td>Term</td>
<td>Meaning/Funding Connotation</td>
</tr>
<tr>
<td>------</td>
<td>-----------------------------</td>
</tr>
<tr>
<td>Initial Operational Test and Evaluation (IOT&amp;E)</td>
<td>It is DoD policy that there shall be conducted, before commitment of a system to production, at least an initial phase of operational test and evaluation (OT&amp;E) adequate to provide a valid estimate of expected system operational effectiveness and suitability (including compatibility, interoperability, reliability, maintainability, and logistic and training requirements). This early phase of the normally longer, overall OT&amp;E program is known as IOT&amp;E.</td>
</tr>
<tr>
<td>Operational Test and Evaluation (OT&amp;E)</td>
<td>OT&amp;E is that test and evaluation conducted to estimate a system’s operational suitability, identify needed modifications, and provide information on tactics, doctrine, organization, and personnel requirements.</td>
</tr>
<tr>
<td>Performance Envelop</td>
<td>The demonstrated capability of a system, system components, and special purpose software to perform its mission in relation to essential characteristics such as: speed, range, payload, altitude, rate of fire, etc.</td>
</tr>
<tr>
<td>Preliminary Design Costs</td>
<td>This term refers to those costs incurred in shipbuilding programs in the early stages of the cycle. They should result in a design that, on a performance or requirement basis, approaches the Navy’s goal. These costs are RDT&amp;E funded.</td>
</tr>
<tr>
<td>Product Improvement</td>
<td>This term embraces all efforts of a research, development, design, or engineering nature that have the objective of improving major end items or major components of major end items. The improvement may involve expanding the useful life of the end item or component, or it may increase the performance capability.</td>
</tr>
<tr>
<td>Prototype</td>
<td>This term connotes an item from an R&amp;D program and also connotes RDT&amp;E financing.</td>
</tr>
<tr>
<td>R&amp;D Installation or Activity</td>
<td>This term refers to those installations or activities whose support and operating costs are financed predominantly with RDT&amp;E funds.</td>
</tr>
<tr>
<td>Special Support Costs</td>
<td>This term, as used in the context of test and evaluation programs, refers to those acquisition or hardware costs, other than those associated with the item that is the subject of the test, which are incurred in direct support of the T&amp;E effort. A good example would be special range instrumentation costs.</td>
</tr>
<tr>
<td>Test Article</td>
<td>A system representative prototype designed to obtain, verify or provide data for the evaluation of research and development or evaluate progress in accomplishing development objectives.</td>
</tr>
<tr>
<td>Unique Joint Test and Evaluation (JT&amp;E) Costs</td>
<td>This refers to costs such as: feasibility determinations of proposed joint tests; the provision for test design and planning support for joint tests selected; the development, procurement, installation, and operation of special instrumentation; transportation, travel, and per diem costs for the Test Director’s staff; the modification of test articles as surrogates and to permit obtaining test data; transportation of equipment from permanent bases to the test site and return; and the provision for data collection_collectors, data reduction, analysis, and test reporting services. Transportation and per diem of participating personnel and maintenance and supply costs are not considered unique.</td>
</tr>
</tbody>
</table>

2.26 Prohibition on Parking of Funds (010226)

Section 1053 of the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2007, to be codified in title 10, United States Code, specifically prohibits an officer or employee of the Department of Defense (DoD) from directing the designation of funds for a particular purpose in the President’s budget submission, or in the budget justification materials.
submitted in support of the budget, with the knowledge or intent that such funds will not be used for the designated purpose. Further, violation of this prohibition will be treated as a violation of the Anti-Deficiency Act (section 1341(a)(1)(A) of title 31, United States Code).

2.27 Use of Operation and Maintenance Funds under Contingency Construction Authority (CCA) (010227)

The criteria and procedures for the use of O&M funds under CCA (also known as Section 2808 Authority) are listed in Volume 3, Chapter 17, Section 170102(L).

3.0 PROGRAM AND BUDGET REVIEW SUBMISSION (0103)

3.1 General (010301)

3.1.1. This section provides guidance for the development and submission of the biennial budget estimates to OSD as part of the program and budget review process. The internal 2-year Planning, Programming, Budgeting, and Execution (PPBE) process will guide the Department’s strategy development, identification of needs for military capabilities, program planning, resource estimation and allocation, acquisition, and other decision processes. The Quadrennial Defense Review (QDR) will continue to serve as the department’s major statement of defense strategy and business policy. It also will continue to be the single link throughout DoD that integrates and influences all internal decision processes.

3.1.1.1. The first year of the 2-year cycle will include the Strategic Planning Guidance (SPG), a Joint Programming Guidance (JPG), a Program Objective Memorandum (POM), and a Budget Estimate Submission (BES). Program Decision Memoranda (PDMs) will implement POM decisions; Program Budget Decisions (PBDs) will implement BES decisions.

3.1.1.2. The second year of the internal Defense Department 2-year cycle, or the off-year, will include an SPG, if the Secretary of Defense decides an SPG is necessary. If an off-year SPG is issued, it will not introduce major changes to the defense program, except as specifically directed by the Secretary or Deputy Secretary of Defense. Rather than a POM during the off-year, the Components will submit Change Proposals to accommodate real world changes, and as part of the continuing need to align the defense program with the defense strategy. Instead of full budget documentation, the change proposals will accommodate fact-of-life changes (e.g., cost increases, schedule delays, management reform savings, workload changes, etc.) as well as changes resulting from congressional actions. The off-year also includes execution reviews that will provide the opportunity to make assessments concerning current and previous resource allocations and whether the Department achieved its planned performance goals. Performance metrics will be the analytical underpinning to ascertain whether an appropriate allocation of resources exists in current budgets.

3.1.2. The USD(Comptroller) guidance memorandum, transmitted in June of each year will provide specialized instructions such as program basis for the estimates, key assumptions to be used, and special supporting material requirements. In addition, "supplementary instructions" memoranda issued on an "as needed" basis (usually in July/August) will be limited to specific
instructions which amplify guidance included in the OUSD (Comptroller) memorandum and in this volume. The use of other memoranda to transmit program and budget guidance will be restricted to new or nonrecurring requirements.

3.1.3. Guidance for development of the National Intelligence Program and budget review submission will be issued by the Director of National Intelligence. Additional detail is found in Chapter 16.

3.1.4. The instructions for submitting certain summary schedules are provided in Section 3.5. The instructions for back-up material tailored to each appropriation or fund category are provided in subsequent chapters. Materials required by OMB Circular A-11, which are not otherwise required by this manual, will be submitted in accordance with that Circular, unless specific exception is granted by the OMB. This is covered in Section 1.5.

3.1.5. A budget work schedule will be forwarded by a separate memorandum at the beginning of each budget formulation cycle. This schedule will show the dates to be used for planning the various phases involved in the formulation process.

3.1.6. Common Program and Budget Review Exhibits – a number of exhibits will be identified subsequent chapters and in the annual call memorandum that will be common to both the program and budget review. In most cases this will involve Web based input through the Select and Native Programming (SNaP) data Input System. The process is addressed in section 9.0.

3.1.7. Budget Material

3.1.7.1. As stated in section 3.2, limited paper copies of unclassified budget documents will be provided to the primary OUSD (Comptroller) reviewing Directorate and to OMB. This section also provides detailed distribution guidance on classified material as well as certain summary material.

3.1.7.2. All budget material required in a paper format for the budget submission will be prepared in the formats prescribed in this section. Also, while the unclassified material is to be posted on the Internet, the format size/margins described below should be adhered to. Material submitted in accordance with OMB Circular A-11 will follow the format prescribed by that Circular. All material, with the exception of fold-in charts and tables which may be included, will be prepared on 8.5” x 11” paper. Material fulfilling Circular A-11 requirements will be bound on the left side. All exhibit books, except for Military Construction, Family Housing, Base Closure, and Information Technology, will be printed horizontally (landscape) on 11” x 8½” paper. Addressees will reduce all larger pages to the standard 11” x 8.5” size. All pages in each book are to be consistent in size. The following identifies specific requirements:

3.1.7.2.1. Military Personnel - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. Use at least font size 10. All material will be printed head to toe
with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

3.1.7.2.2. **Operation and Maintenance (to include the Defense Health Program)** - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. Use at least font size 10. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

3.1.7.2.3. **Research, Development, Test and Evaluation** - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Begin each program element on a facing page. Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

3.1.7.2.4. **Procurement**. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

3.1.7.2.5. **Military Construction**. The justification material for Military Construction will be provided on 8.5” x 11” paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1” margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

3.1.7.2.6. **Family Housing**. The justification material for Family Housing will be provided on 8.5” x 11” paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1” margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

3.1.7.2.7. **Base Closure**. The justification material for Base Closure will be provided on 8.5” x 11” paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1” margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

3.1.7.2.8. **Facility Sustainment, Restoration and Modernization (FSRM)**. Provide justification material in accordance with Chapter 8.
3.1.7.2.9. Revolving Funds. Material submitted for the budget estimate submission for revolving funds is to be submitted by business area on 8.5”x 11” paper, with 3 holes punched along the 11 inch side to fit standard three-hole binders. Capital Investment Program exhibits will be prepared in landscape format. Budget submitting offices should ensure that all narrative type is consistent. Revolving funds justification books prepared by the Components are to be unclassified. Classified exhibits will be submitted under separate cover.

3.1.7.2.10. Information Technology. Provide justification material in accordance with Chapter 18, Section 180202.

3.1.7.3. Whenever revisions or correction sheets are necessary, the revised pages showing the date of the change will be inserted in each budget book by a staff member of the DoD Component submitting the change. OUSD (Comptroller) Program/Budget staff will instruct the DoD Component’s staff member as to the location of the budget books. Corrections should be held to a minimum and are not necessary for minor typographical errors which make no material difference in the analysis and evaluation of the estimates.

3.1.8. Second Year of the Department’s Two-year Budget Review Cycle - Budget Material. Budget documentation will be limited in the second year of the 2-year cycle. The primary budget document is the Change Proposal. Other budget exhibit requirements will be determined as this review process evolves. The specific requirements will be identified in the annual Program and Budget Review call memorandum.

3.2 Distribution (010302)

Limited paper copies of unclassified budget documents will be provided to the primary OUSD (Comptroller) reviewing Directorate and to OMB. Additionally, classified budget exhibits, the transmittal memorandum with attachments to the Secretary of Defense, and the budget overview booklets, will be provided in paper format. Submitting Components will also post all unclassified budget material to an access controlled Internet site unless provided for otherwise in the annual budget call memorandum. This will allow all OSD staff offices access to Component budgets while minimizing the need for hard copies of the submissions. Under current procedures, each submitting Component will individually post unclassified budget justification material on an OUSD (Comptroller) hosted NIPRNET site. Additional guidance on accessing this site and content guidance and restrictions will be provided annually. Paper copy distribution of classified/unclassified program and budget review submission material will be made in accordance with the charts on the following pages for the first year of the 2-year budget cycle. Guidance for distribution of paper copies of Component BCPs in the second year of the 2-year budget review cycle will be provided in the annual call memorandum. All required copies will be delivered directly by each Military Department/Defense Agency to the appropriate offices at the room numbers listed on the following page unless guidance elsewhere in this volume or in the annual call memorandum indicates otherwise. However, because of numerous room changes during the Pentagon Renovation and building access changes at non-Pentagon locations, call the listed office prior to delivery of budget material:

3.3 Preparation of the Biennial Budget Estimates (010303)

3.3.1. General Guidance

3.3.1.1. The Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) will send, in June or July, a budget guidance memorandum establishing submission requirements not included in this volume. Included in this guidance will be budget material due dates and instructions for preparing estimates for the prior year (PY), current year (CY), budget years BY1, and BY2 (in the biennial budget year), and the outyears.

3.3.1.2. Estimates for the biennial budget years and outyears will be based upon the force levels, program decisions, and the TOA levels contained in the Program Objective Memorandums (POMs). The current review schedule provides for concurrent program and budget reviews. If the program review ever precedes the budget review, the TOA levels should reflect the POM levels as modified by any Program Decision Memorandums (PDMs).

3.3.1.3. At various organizational levels throughout the Department of Defense, a systematic cost-benefit analysis of proposed expenditures can be of significant value in program formulation. Investments and expenditures in each appropriation category will normally be supported by an analysis which matches estimated costs with benefits (outputs), subject to the following criteria:

3.3.1.3.1. Funding is, for the first time, shown as required in the period covered by the fiscal guidance, or

3.3.1.3.2. Previously established funding requirements in these years are significantly altered by changed program or project plans.

3.3.1.3.3. The criteria in DoDI 7041.3, "Economic Analysis for Decisionmaking," will apply. Budget submissions will, as a minimum, be accompanied by a statement that (1) the submission is supported by an economic analysis, or (2) an economic analysis is not required, citing the reason. Submission of detailed backup information to OSD will be on "as requested" basis.

3.3.1.4. Transfers of functions between DoD Components will not be reflected in the program and budget review submissions unless they have been approved by the Component Head and the dollar amounts and personnel spaces to be transferred in the current year are fully decided upon by all DoD Components concerned when the estimates are prepared. Under these circumstances, both the gaining and losing Components will reflect the decisions in their estimates with equal and offsetting manpower and dollar amounts. The gaining DoD Component is responsible to confirm that this is the case. If this cannot be confirmed, then neither Component will reflect the transfer in their budget estimates. The exhibit PB-14, Functional Transfers, found in Chapter 19 will identify all functional transfers included in the budget. Each Component will also notify OUSD (Comptroller) Program/Budget of the planned functional transfers not reflected in the budget.
3.3.1.5. Adjustments necessary to properly reflect functional transfers agreed upon by the parties, but not included in the Program and budget review submission, may be accomplished in the budget review process. Functional transfers not submitted in the program and budget review submission or incorporated during the budget review process will be financed by transfer in the current year and the budget year. Necessary exceptions to this general rule will be authorized on a case-by-case basis. Functional transfers during the budget review process should be kept to a minimum.

3.3.1.6. Material should be “Unclassified” and “For Official Use Only” unless contents otherwise require a higher classification. All Program and budget review submission material is subject to DoD 5400.7-R, DoD Freedom of Information Act Program, Chapter II, Exemptions and in particular exemption number 5. Hard copy revised Procurement (P-1 exhibit) and RDT&E Program (R-1 exhibit) must be submitted by the DoD Components with a certification, signed by the Security Officer, confirming that all line items are classified properly.

3.3.2. Pricing in the Biennial Budget Estimates

3.3.2.1. It is DoD policy to reflect the most likely or expected full costs (including military and civilian personnel pay) for the current year, the biennial budget years, and outyear estimates for all appropriations.

3.3.2.2. Estimated price level changes will be based on data provided by OUSD (Comptroller). These indices, which will be updated as economic conditions warrant, will be used to (1) determine the amount of price escalation for a procurement line item, major RDT&E system, or construction item over a given time period, and (2) project inflation in other noncompensation areas of all other appropriations.

3.3.2.3. Military and civilian personnel compensation will be fully funded in the biennial budget estimates using the rates provided by the OUSD (Comptroller).

3.3.2.4. Biennial budget estimates for goods and services will in all cases reflect the following considerations:

3.3.2.4.1. Cost-quantity relationships as they affect unit prices -- e.g., the unit price forecast in the biennial budget estimates will be higher or lower than the unit price current when the estimates are prepared, if differences in the quantities involved are price-significant.

3.3.2.4.2. The state of development or production and the learning curve.

3.3.2.4.3. Specific price changes, to take effect at a future date -- e.g., a specific and authoritative rate or tariff schedule to take effect on a definite future date, which may involve higher or lower prices than those in effect at the time estimates are prepared.
3.3.2.4.4. Predictable cost increases due to risk.

3.3.3. Preparation of Biennial Budget Estimates - Multiple Appropriations

3.3.3.1. Section 10.0 contains formats for those exhibits applicable to more than one appropriation.

3.3.3.2. In addition to those exhibits identified in Section 10.0, there are exhibits required by other chapters which require identification of budget estimates/requirements for more than one appropriation. This is particularly true of requirements discussed in Chapter 19 and personnel exhibits required in Chapter 3. Offices responsible for budget submissions must ensure that all such exhibits reflect total requirements for all appropriations.

3.3.4. Preparation of Biennial Budget Estimates - Operations

3.3.4.1. Separate identification and justification (including cost-benefit studies) is required for management actions such as data automation and systems engineering. The development, implementation, and expansion of automated data systems will be based on an economic analysis which should show that the proposed management action will produce an early and demonstrably high return on investment or result in substantial increases in mission performance and effectiveness. Savings from previously approved investments and management actions will be separately identified.

3.3.4.2. The Dependents’ Education Program in the budget years would be based on the best estimate of student load and planned at the current year program level in accordance with the criteria for the regular school program established by USD(P&R).

3.3.5. Preparation of Biennial Budget Estimates - Procurement

3.3.5.1. In development of requirements for procurement of modern equipment to offset consumption or attrition of older items, all assets of the older items, as well as acceptable substitutes, will be applied against gross requirements in determining net procurement requirements.

3.3.5.2. Administrative lead-time requirements in the budget years for any principal item should not exceed the lead-time used in the development of the current year budget program.

3.3.5.3. Production lead-times utilized in preparation of estimates for the budget years should be based on the latest contract experience and current conditions, and generally should not be greater than those used for the same item in the development of the current year budget program. Any increases should be clearly identified and accompanied by an explanation of the reason along with an identification of the pricing components/manufacturers used causing the increase.
3.3.5.4. Use of long lead-time component procurement will be consistent with the full funding policy expressed in OMB Circular A-11. In this regard, long lead-time component procurement will be limited to those few critical components whose lead-times exceed the obligation availability of the appropriation or are significantly longer than other components of the same end item.

3.3.5.5. Budget estimates will reflect economic production rates, unless there is strong justification (other than funding constraints) for the use of other rates.

3.3.6. Preparation of Biennial Budget Estimates - Research, Development, Test and Evaluation

3.3.6.1. In the development and review of RDT&E programs, special attention will be devoted to the numbers of civilian and military personnel required for support of those programs.

3.3.6.2. Increased emphasis will be placed on application of standards and austere limitations to housekeeping and support activities including facilities sustainment, facilities operations, equipment replacement and maintenance, and supply inventory levels.

3.3.7. Preparation of Biennial Budget Estimates - Revolving Funds

3.3.7.1. Revolving fund programs and biennial budget estimates will be consistent with, and justified by, related support requirements; that is, program and budget estimates will be based on anticipated customer needs for associated supplies, equipment, and services, loan purchase requirements for production guarantee accounts, scope of operations to be financed through management funds, etc. Biennial budget estimates will be consistent with the anticipated customer needs that can be financed by the related program included in the customers’ budget estimates. Increased emphasis should be directed toward assuring that customers are getting maximum value for their appropriated funds.

3.3.7.2. Appropriations funded requirements for the Defense Working Capital Fund will be computed under the same guidance as outlined above for the specific appropriations.

3.4 Second Year of the Department’s Two-year Budget Review Cycle - Budget Material. (010304)

Budget documentation will be limited in the second year of the 2-year cycle. The specific requirements will be identified in the annual Program and Budget Review call memorandum.
3.5 Budget Estimates Summaries and Transmittal (010305)

3.5.1 Budget Estimates Transmittal

3.5.1.1 The budget estimates will be transmitted by memorandum to the Secretary of Defense from the Secretary of each Military Department, the Director of each Defense Agency, the Under Secretary, Assistant Secretary or Deputy Assistant Secretary of Defense submitting a Defense-wide budget estimate, and the Director, The Joint Staff. While it is mandatory that the exhibits below be submitted in the precise formats specified, any explanations or highlight information that the submitting official considers appropriate may accompany the transmittal. Exhibits PB-1A, PB-3, PB-4, and PB-8 include budget estimates summary data and will be “Unclassified” “For Official Use Only” unless the contents otherwise require a higher classification.

PB-1A. Fiscal Guidance Track – TOA in Millions of Dollars. (FY 20BY1 thru 20BY2+4) [Section 10.0]

PB-3. Current Year Reprogramming/Transfers Between Appropriations – TOA in Thousands of Dollars [Section 10.0]

PB-4. FY 20BY1 and 20BY2 Budget Estimates – Schedule of Civilian and Military Personnel (FY 20PY through 20BY2+4) [Section 10.0]

PB-8. FY 20CY Supplemental Appropriation Requirements (Described in Section 3.6) [Section 10.0]

3.5.1.2 The specified exhibits, transmittal memorandum to the Secretary of Defense, and other explanatory or highlight information will be submitted as follows:

3.5.1.2.1 Secretary of Defense transmittal memorandum, with exhibits PB-1A, PB-3, PB-4, and PB-8 attached. Deliver six copies to OSD Correspondence Control, Room 3A948. Other copy requirements are identified in Section 3.2.

3.5.1.2.2 Overview booklets, such as the Air Force "Highlights," Navy "Blue Book," etc. Copy requirements are identified in Section 3.2.

3.5.1.3 Budget estimates for the Defense portion of the National Intelligence Program will be submitted as prescribed by the Director of National Intelligence (DNI). In addition to budget exhibits specified by the DCI, the Office of the Secretary of Defense requires certain other materials as outlined in Chapter 16.

3.5.1.4 Electronic data will be submitted to support Exhibit PB-4 (see Section 5.5). Extreme care must be exercised to assure that the submission and the exhibits are identical in data content. As described in Section 5.6, the electronic data submissions are the basis for the OSD budget review.
3.5.2. Program and Financing (P&F) Schedules

3.5.2.1. The P&F schedule consists of a budget plan, obligations by object class, and an expenditure tail. For multi-year accounts, the P&F schedule will also include an obligation plan. See Section 5.6, CIS Automation Requirements for the Biennial Budget Submission, for guidance on submitting a P&F schedule.

3.5.2.2. Program data will be presented in the Program and Financing schedule on an obligation basis consistent with the presentation in the President’s Budget of previous years, unless other directions are transmitted by separate memorandum.

3.5.2.3. Components will not submit prior year data in the program and budget review submission. Components will submit an actual prior year object class and manpower data update when available in accordance with specific update instructions issued separately.

3.5.2.4. Special Program Categories will be shown on Program and Financing schedules in all cases as they appear in the CIS Budget Structure Listing referenced in Section 5.7.

3.5.2.5. Special care should be taken to assure that data presented in the object classification schedule (Section 5.7) is consistent with information required on special exhibits. For example, object class data provided for advisory and assistance services (CIS Object Class Direct/Reimb. 25110) is the basis for Exhibit PB-15 (Chapter 19).

*3.6 Supplemental Appropriations Submissions (010306)

3.6.1. Budget Estimates Transmittal

3.6.1.1. Supplemental appropriations are normally allowed to meet unforeseen contingencies or national emergencies of a magnitude that cannot be absorbed or accommodated through reprogrammings and transfers. Specific guidance on this will be provided on a case-by-case basis.

3.6.1.2. OMB Circular A-11 provides additional policy guidance on supplemental estimates.

3.6.2. Supplemental appropriation requirements will be submitted on a schedule in the format of Exhibit PB-8, provided in Section 10.0 or as prescribed in specific or separate guidance. This exhibit will be transmitted in the same manner as the budget estimate summaries (see Section 3.5).
3.6.3. Material Included for Informational Purposes

3.6.3.1. Under the 41 U.S. Code authorizations (formerly Section 3732 of the revised statute), the law provides that the President may exempt appropriations, funds, and contract authorizations which are available for military functions under the Department of Defense from the antideficiency provisions of 31 U.S. Code 1517 (formerly Section 3679 of the revised statute) whenever he deems such action necessary in the interests of national defense. Upon determination by the President, that such action is necessary, the Secretary of Defense is authorized to provide for the cost as an accepted expense. For example, if the President determines that it is necessary to increase the number of military personnel on active duty beyond the number for which funds are provided in the annual appropriation act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel as an accepted expense. Obligations are then authorized to be incurred in excess of amounts appropriated. After substantially all obligations have been liquidated, an appropriation is requested to liquidate any unfinanced balances.

3.6.3.2. The law provides essentially that, notwithstanding the balances available, revolving funds may incur obligations to provide for making issues through the production lead-time period (10 U.S.C. 2210(b)). As a technical matter, this constitutes a form of contract authority, and is so displayed in the President’s Budget.

3.6.4. Disaster Situations and Management of Disaster/Contingency Supplemental Funds

3.6.4.1. In the event of a disaster or emergency situation, Components will notify OUSD(C), as soon as possible, of needs resulting from the event. Components must be able to quantify the need for disaster relief by providing the OUSD(C) with adequate information for determining that funds are needed to protect people, restore facilities, and/or save lives. If required, OUSD(C) will issue specific guidance and instruction for collecting requirements information. OUSD(C) will review cost and requirements data submitted by the Components to determine if the Department requires additional funding and/or if the appropriate spending authorities are available to support the emergency situation.

3.6.4.2. Supplemental appropriations provided to the Department for war-related costs, and/or costs associated with international or domestic disasters will often have unusual periods of availability for a particular appropriation (for example, Operation and Maintenance appropriations may have a period of availability of more than one year). The emergency funds may be provided in a transfer account that would have an extended period of availability (for example, a three year transfer account). Funds control issuing agents and appropriation managers should ensure that the period of availability of the funds is optimized, to include obligating the amounts in a timely manner, and returning unused or unneeded funds to a transfer account immediately upon becoming available. For example, funds transferred from a three year transfer account to an Operation and Maintenance appropriation will take on the period of availability of the account where transferred, which is one year for Operation and Maintenance. If the funds are not used before the end of the period of availability and if statutory transfer authority is available, the Component’s funds control agent should initiate a reprogramming action to transfer those funds back to the transfer account where they, once again, take on the remainder of the three-year period of availability. This practice ensures the funds provided by the Congress are optimized and are...
available to support the disaster or emergency event in subsequent years in accordance with Congressional intent.

3.7 Additional Budget Submissions (ABS) (010307)

3.7.1 General Guidance. Following the initial program and budget review submission (initial submit), Additional Budget Submissions may be made, where warranted by specific changes in circumstances, within approved TOA control totals established by the USD(Comptroller) and under the following restrictions:

3.7.1.1. Additional Budget Submissions must be submitted as adjustments to, not substitutes for, the initial submit.

3.7.1.2. Unless otherwise directed by the USD(Comptroller), Additional Budget Submissions must be offset with equal or greater cost tradeoffs, and must clearly indicate the areas of increase and decrease consistent with the justifications submitted as part of the initial submit.

3.7.1.3. Proposed decreases may not consist of reductions already effected or imminently planned to be effected as part of the budget review.

3.7.1.4. Additional Budget Submissions may not be used to compensate for incomplete or inadequate initial submits.

3.7.1.5. Additional Budget Submissions may not be used to appeal budget decisions.

3.7.1.6. If an additional budget submission results in an impact on revolving funds, those related requirements must be incorporated in the additional budget submission.

3.7.2 Submission Requirements. In order to be considered during the budget review, all additional budget submissions must be received no later than the date specified in the annual guidance. Additional budget estimates for the biennial years 1 and 2 will be accompanied by Exhibit PB-10, provided in Section 10.2, plus the necessary justification material. This should take the form of a complete narrative justification and may be included on the transmittal memorandum or as an attachment to Exhibit PB-10. The applicable out-year impact of the Additional Budget Submission will also be shown on Exhibit PB-10. The additional estimates will be transmitted in two copies (plus two additional copies for each appropriation affected) by memorandum to the USD(Comptroller) and signed by the same official who submitted the initial budget estimates or his appointed deputy. All Additional Budget Submissions will be hand carried to the Office of the USD(Comptroller), Directorate for Program and Financial Control, Room 3C689, for OSD processing. The Additional Budget Submission will be addressed in subsequent budget decision document(s).
3.8 Major Budget Issues (MBIs) (010308)

Near the end of the budget review process, the Secretary of Defense and the Deputy Secretary of Defense may provide for the review of Component major policy or budget issues that have not yet been resolved. Resolution of these issues may displace other programs within the fixed DoD topline. Copy requirements of Component issues will be provided if an MBI review is scheduled. A general format is provided in Section 10.2.

3.9 Budget Review Procedures (010309)

3.9.1 Comptroller Information System (CIS). The automated CIS is the official OSD record of the budget estimates as submitted by the DoD Components and adjusted by Secretary of Defense decisions known as Program Decision Memorandums (PDMs) and Program Budget Decisions (PBDs). The data contained in the CIS is the base for data required for the OMB MAX Budget System, as required by OMB Circular No. A-11. CIS data is electronically transmitted to OMB for preparation of the President’s Budget. In addition, CIS is used to prepare a comprehensive set of management information summaries to support the budget press release, statements to the Congress and other information requirements. Financial data, military end strength, and civilian full time equivalent (FTE) data are provided. Program and Budget Review Submissions are entered into the system through electronic submissions from the DoD Components or through on-line interaction with the system. During the joint OMB/OSD Program and Budget Review, program and budget decision documents are recorded into CIS and the current status of the program and budget review is readily available soon after the data are processed.

3.9.2 Development of Out-year Data During the Program and Budget Review

3.9.2.1 Throughout the Program and Budget Review a continuing update of the out-year TOA and manpower is performed to reflect the extension of CY, BY1, and BY2 decisions made during the budget review.

3.9.2.2 TOA, military end strength and civilian FTE data for the initial out-year database are provided by each of the DoD Components. During the program and budget review, as program and budget decision documents are approved and recorded into CIS, the TOA and manpower out-year impact of each decision is addressed on the decision document and is also entered into CIS. The program and budget decision document will contain one of the following descriptors of out-year impact:

3.9.2.2.1 The estimated out-year impact for each year in thousands of dollars and full-time equivalents/end strength.

3.9.2.2.2 Substantive program direction for the out-years as a basis for DoD Component determination of dollar amounts and manpower involved (to be used if out-years are not specifically addressed in a budget decision document).

3.9.2.2.3 No known out-year impact
3.9.2.3. As with the CY, BY1, and BY2 decisions, the out-year adjustments approved in the Secretary of Defense decisions are entered into the CIS. TOA adjustments are recorded at the appropriation account level, Budget Activity/Special Program Category, and by Program Budget Decision number. Manpower data is recorded at the appropriation account level, by Program Budget Decision number and special program code with active military manpower detailed by officer, enlisted and cadets; selected reserve manpower detailed by officer and enlisted personnel category; and civilian FTE detailed by U.S. direct hire (direct and reimbursable), foreign national direct hire (direct and reimbursable), and foreign national indirect hire (direct and reimbursable).

3.9.2.4. The CIS produces Out-year Impact Status Reports on a recurring basis throughout the program and budget review. These reports, which are available to the applicable DoD Components, show TOA & manpower data by appropriation, special program code and personnel category for the budget submission base and all adjustments to the base resulting from decisions made during the budget review. The final reports at the conclusion of the budget review reflect the out-year numbers (TOA and manpower) which are the control numbers for the President’s Budget update of the Future Years Defense Program (FYDP). It is essential that the Out-year Impact Status Reports be reviewed by the DoD Components on a recurring basis during the budget review so the out-year numbers are under continuous scrutiny and the President’s Budget update for the FYDP may proceed in a timely manner.

3.9.3. Printing Schedule for Budget Material

3.9.3.1. OMB Circular No. A-11 prescribes the requirements for materials to be included in the President’s Budget document. Annually, the ODC(P/B), OUSD (Comptroller) publishes instructions on the procedures to be followed during the budget review. These instructions detail the sequence of events necessary to finalize the budget review and complete the printing phase of the budget. All actions concerning printing of budget material will be accomplished in accordance with these references and the following paragraphs.

3.9.3.2. Electronic galleys

3.9.3.2.1. The OMB will provide OUSD (Comptroller) and Office of the Deputy General Counsel (Fiscal) within the OSD, General Counsel with an electronic copy of the galleys based on the previous year’s President’s Budget document. The OMB electronic galley version is divided into two parts, Appropriation Language and Narrative Language. The OSD, General Counsel is responsible for all Appropriation Language galleys (except for the dollar amounts); the OUSD (Comptroller) is responsible for all Narrative Language galleys. The Narrative Language galleys include any “text tables” such as Active/Reserve End Strength Forces tables and Defense Health Program Eligible Beneficiary Category tables.

3.9.3.2.2. The dollar amounts contained in the Appropriation Language galleys such as the amount to be appropriated are the responsibility of the OUSD (Comptroller), Program and Financial Control Directorate. In most cases, these dollar amounts are generated electronically from the Comptroller Information System (CIS) and loaded directly into OMB budget system. However, amounts for Emergencies and Extraordinary Expenses need to be posted

1-83
to the electronic galleys. The Program and Financial Control Directorate (P&FC) will identify these items, coordinate with other OUSD (Comptroller) Directorates, and ensure that accurate dollar amounts are reflected in the OSD, General Counsel version submitted to OMB.

3.9.3.2.3. Both Appropriation Language and Narrative Language galleys are updated and submitted electronically to OMB. The Appropriation Language galleys will be electronically updated by the OSD, General Counsel and coordinated with the OUSD (Comptroller) around mid-December. The Narrative Language galleys are updated within OUSD (Comptroller) in the same timeframe. New accounts, accounts with supplementals requiring separate schedules, rescission proposals and other material to be presented in the President’s Budget document will also be accomplished electronically. The submission of electronic galleys is intended to fill technical budget preparation needs (i.e., determine that all lines, account titles, text, and appropriation language are correct and that all required schedules are in print). The OMB will post the electronic submission along with OMB-initiated changes for OSD, General Counsel, and OUSD (Comptroller) review until the Department has made the final submission to OMB’s MAX system in early January.

4.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (0104)

4.1 General (010401)

4.1.1. Purpose

4.1.1.1. This section provides instructions for the preparation of justification material for presentation to congressional committees. Justification material should be developed using the guidelines established herein as the minimum requirements to be included in the Justification Books. Any exception to these minimum requirements must be cleared with OUSD (Comptroller) Program/Budget.

4.1.1.2. Justification of proposed supplemental appropriations and budget amendments are covered in OMB Circular A-11 and Section 4.2; however, separate instructions will be issued by OUSD (Comptroller) Program/Budget as the need arises.

4.1.1.3. General preparation and submission instructions pertaining to individual appropriations, Intelligence Programs and Communications, Command and Control (C^3) Programs are contained in Chapters 2 thru 7, 9, 10, 12, 13, 16 and 19.

4.1.1.4. All congressional budget/presentation material is subject to DoD 5400.7-R, DoD Freedom of Information Act (FOIA) Program requirements. Chapter 3, Exemptions, should be reviewed carefully before denial of any FOIA request. Exemptions will generally fall into exemption 5. Use of For Official Use Only (FOUO) must meet the requirements of DoD 5400.7-R, Chapter 4.
4.1.2. Preparation of Material

4.1.2.1. Separate Justification Books will be furnished for each appropriation relating to each Military Department. Material prepared by individual Defense Agencies and Office of the Secretary of Defense organizations will be consolidated by OUSD (Comptroller) Program/Budget into a single Justification Book for each appropriation. Material for the Operation and Maintenance, Defense-wide; U.S. Court of Appeals for the Armed Forces, Defense; Environmental Restoration, Defense; Office of the Inspector General; Overseas Humanitarian Disaster and Civic Aid; and other operation and maintenance type appropriations will be consolidated into a single Justification Book. The OUSD (Comptroller) Program/Budget will also develop an O&M Overview book as well as a consolidated overview of Multiyear Procurement programs based on submissions of the Military Departments and Defense-wide components. Additionally, information technology budget material prepared by the Military Departments and other DoD Components will be consolidated by the Office of the ASD(NII)/DoD CIO Resource Management Directorate into a single Justification Book. Combating Terrorism budget material prepared by DoD Components will be consolidated into a single justification book by the assistant secretary of Defense for Special Operations and Low Intensity Conflict (SO/LIC). The Department of the Army will prepare a justification book for Chemical Demilitarization programs and will consolidate material for the Army Family Housing and Homeowners’ Assistance Fund, Defense appropriations into a single Justification Book. Each Department will prepare a Justification Book for each Base Closure Account. In addition, separate Justification Books will be prepared for Intelligence-Related Activities and the Defense portion of the National Intelligence Program, the latter as prescribed by the Director of National Intelligence. All other Justification Books will be annotated as appropriate to indicate items and resources supported in Intelligence Program Justification Books. Also, separate Justification Books will be prepared for NIP/MIP program aggregations as prescribed in Chapter 16.

4.1.2.2. Classified and unclassified data will be included in the single volume or set of volumes for each appropriation with the classified pages bearing the appropriate security classification, except that all materials contained in the Military Personnel and Operation and Maintenance justification books will be unclassified. Classified exhibits will be submitted separately and explanation provided for their being classified. Fiscal data pertaining to explicitly identified portions of the National Intelligence Program shall be classified in accordance with instructions in Chapter 16.

4.1.2.3. The highest security classification of data included in Justification Books will be SECRET. Information requiring a higher classification will be discussed with OUSD (Comptroller) Program/Budget on an individual situation basis. All classified data will be bracketed by pencil [ ] to permit the congressional committees to publish an unclassified version. Data not bracketed will be assumed to be unclassified. In bracketing classified columnar data, each column will be individually bracketed. Care must be taken to assure that unclassified data are not bracketed. Security classification markings should be centered at the top and bottom of applicable pages to assure clarity. The appropriate automatic downgrading notation will be used in accordance with DoD 5200.1-R, Information Security Regulation. The appropriate classification cover sheet must be utilized.
4.1.2.4. Military Departments and Defense Agencies will be responsible for clearing the justification material with the Washington Headquarters Services, Directorate for Freedom of Information and Security Review, prior to transmittal to OMB and the congressional committees.

4.1.2.5. The Program and Financing, Object Classification and Personnel Summary schedules will reflect current year program supplemental appropriation requirements as directed by OMB.

4.1.2.6. Reports of the Program and Financing and Object Classification Schedules will be available from OUSD (Comptroller) Comptroller Information System (CIS) and will be used in the Justification and Backup Books as specified for each appropriation title in the following chapters.

4.1.2.7. Printing of Congressional Budget Material:

4.1.2.7.1. General. Tabs will be used only where specified by OSD; McCall (edge) indexing will be used as appropriate. Justification material should be printed on both sides of the page wherever feasible. Headings for an appropriation or budget activity will appear on the initial page of the subdivision and will not be repeated on subsequent pages, except RDT&E Program Element Listings. The Components will work with Defense Automation and Production Service (DAPS) to determine the most appropriate and quickest method of printing and fastening each of the books subject to the guidance by appropriation title below.

4.1.2.7.2. Military Personnel. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling. Font size must be at least size 10.

4.1.2.7.3. Operation and Maintenance. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling. Font size must be at least size 10.

4.1.2.7.4. Research, Development, Test and Evaluation. Material is to be printed horizontally (landscape) on both sides of the page on 11" x 8.5" paper using a 1” margin on the side to be bound and 1/2” for other edges. Components will request DAPS to reduce all larger pages to the standard 11" x 8.5" size so that all of the pages in each book are consistent in size. The material will be printed head to toe with 3 holes punched across the top margin. The following is the fastening preference: staples, screw posts, ACCO fasteners, etc. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling. Books are to be a
maximum range of about 600-650 pages where possible (300-325 sheets of paper printed both sides).

4.1.2.7.4.1. Since the justification material is printed double sided, then each PE package must begin on the front side of a new page. When the last page of a PE package does not end on the backside of the paper, then a blank page must be inserted with the wording “This page intentionally left blank” in bold letters, centered on the page. The reason for this is so that the justification material can be easily broken apart and sorted by PE with all of the pertinent exhibits.

4.1.2.7.4.2. For those Components that have a large number of PEs and printing the material all in one volume is impractical, it is preferred that the justification material be submitted by budget activity with the Science and Technology budget activities (BA 1 through BA 3) printed in one volume and the remaining budget activities printed in a separate volume or in individual volumes. Each separate book should include an R-1 listing and a table of content indicating which volume and page the applicable program element can be found.

4.1.2.7.5. Procurement. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

4.1.2.7.6. Military Construction. The justification material for Military Construction will be provided on 8.5” x 11” paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1” margins. All exhibits will be printed utilizing white paper. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

4.1.2.7.7. Family Housing. The justification material for Family Housing will be provided on 8.5” x 11” paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1” margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

4.1.2.7.8. Base Closure. The justification material for Base Closure will be provided on 8.5” x 11” paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1” margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

4.1.2.7.9. Revolving Funds. Justification books for revolving funds are to be submitted in one volume with 3 sections: Component Overview; Operating Budget and Capital Budget. Component Overview and Operating Budget sections are to be printed in portrait format
(vertically) on 8.5” x 11” paper head to head on 2 sides. Capital budget exhibits are to be printed in landscape format (horizontally) on 11” x 8.5” paper head to toe on 2 sides. Budget submitting offices should ensure that all narrative type is consistent. All justification material will be punched to fit standard three-hole binders. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

4.1.2.7.10. **Intelligence Programs.** Instructions for these books are contained in Chapter 16.

4.1.2.7.11. **Information Technology.** Provide material in accordance with guidance contained in Chapter 18.

4.1.2.8. Justification book cover inserts will be 220 index stock using the following colors: *Army - green; Navy - buff; Air Force - blue; Defense-wide justification material (Agencies, Office of the Secretary of Defense, Defense Health Program, and Commander In Chiefs to include the U.S. Special Operations Command) - white.* Covers will bear the appropriate security markings, title of the volume as specified herein, the phrase "Submitted to Congress February 20...," and the appropriations included.

4.1.2.9. The use of acronyms and abbreviations in the justification material should be held to a minimum. However, where acronyms and abbreviations are used, they must be identified on the page on which they appear.

4.1.2.10. The exhibit numbers used in this section are for reference purposes only and should not be used in the Justification Books.

4.1.3. **Submission of Justification Books for Review**

4.1.3.1. Before the justification material can be released to the Congress, it must be reviewed by the appropriate OUSD (Comptroller) or OASD(NII) /DoD CIO to ensure that policies and decisions made by the President and Secretary of Defense are fully reflected. Accordingly, three advance sets of Justification Books will be forwarded to the appropriate OUSD (Comptroller) Directorate for review or for Information Technology exhibits as directed by OASD(NII)/DoD CIO. The following is a list of the directorates:

<table>

4.1.3.1.1. In addition, one set of the Military Personnel and Operation and Maintenance Justification Books for the Reserve Components will be delivered to OASD(RA), Room 2E195.

4.1.3.1.2. The Military Departments should also send two copies of advance sets of justification books to Washington Headquarters Services, Directorate for Freedom of Information and Security Review ((703) 696-4538) for clearance. Clearing material through this Directorate should be accomplished piecemeal to expedite the final review. Clearance by OUSD (Comptroller) P/B will be evidenced by an approval from the applicable Program/Budget Directorate designated official, initialed on one of the advance copies of each Justification Book and returned to the applicable service. The OUSD (Comptroller) Directorate having cognizance over the budget material will obtain any necessary clearance from the Office of Management and Budget (OMB). Upon advice from OUSD (Comptroller) P/B and Washington Headquarters Services, Directorate for Freedom of Information and Security Review that the advance sets of justification books are acceptable, the DoD Components will complete preparation and assembly of Justification Books.

4.1.3.1.3. Under no circumstances will justification material be released to congressional committees or the public prior to receipt of these clearances.

4.1.3.2. Except as specified herein, submission dates will be provided in separate correspondence from OUSD (Comptroller) Program/Budget.

4.2 Supplemental and Amended Appropriations Requests (010402)

4.2.1. Organization of Supplemental Appropriations Requests Justification Books

4.2.1.1. Justification Books in support of supplemental appropriations requests will be prepared by OUSD (Comptroller) P/B, based on material furnished by the DoD Components. Justification materials will be addressed in separate correspondence from OUSD (Comptroller) P/B.

4.2.1.2. The Justification Book will generally be arranged as follows:

4.2.1.2.1. Table of Contents and Summaries. These items will be prepared by OUSD (Comptroller), P/B.

4.2.1.2.2. Section 1 – Narrative Justification. This section will contain narrative justifications, and any special exhibits in support of program supplemental requests. Supplemental appropriation requests related to all program supplementals will be supported by a narrative justification.

4.2.1.2.3. Section 2 – Appropriation Act language. This section will contain required appropriation act language. The appropriation language will be extracted by OUSD (Comptroller) P/B from the Budget Appendix.
4.2.2. Organization of Amended Appropriations Requests Justification Books

4.2.2.1. A separate abbreviated Justification Book will be prepared by OUSD (Comptroller) and/or each Military Department for each affected appropriation title; e.g., Operation and Maintenance; Procurement; RDT&E; etc. (Additional justification materials required of Defense Agencies and for Defense-wide accounts will be identified in separate correspondence from OUSD (Comptroller). Related Justification Books will be prepared by OUSD (Comptroller) P/B.) Justification books will be organized by supplemental category (e.g., contingencies, natural disasters, etc.) Each Book should be stapled but must contain holes punched to fit existing Justification Book binders. (NOTE: Depending on the magnitude of a particular budget amendment; i.e., number of DoD components and appropriation accounts affected, single Justification Books may be prescribed for each DoD Component, or a single Justification Book may be prepared by OUSD (Comptroller) P/B with input from the affected DoD Components.)

4.2.2.2. Each Justification Book will contain the following, as a minimum:

4.2.2.2.1. A single Table of Contents

4.2.2.2.2. By individual appropriation account:

4.2.2.2.2.1. Revised appropriation language (retyped from Budget Appendix to reflect revised request).

4.2.2.2.2.2. Budget Amendment Summary, in the format of Exhibit PB-37R (see Section 10.0), highlighting changes to the pending request.

4.2.2.2.2.3. Program and Financing Schedule (abbreviated) in the format of Exhibit PB-37S (see Section 10.0). Both the Budget Plan and Obligation Plan will be shown for multi-year accounts.

4.2.2.2.2.4. Narrative Justification by Budget Activity in the format of Exhibit PB-37T (see Section 10.0). Narrative will discuss dollar, quantity, personnel changes, etc., at least at the level of changes indicated on the Budget Amendment Summary (Exhibit PB-37R).

4.2.2.2.2.5. Existing P-1 and R-1 Exhibits will be marked up to indicate changes resulting from the proposed amendment.

4.2.2.2.2.6. Procurement and RDT&E Justification material will be retyped, where applicable, to encompass changes resulting from the proposed amendment.

4.2.2.3. When prepared by a Military department, three advance sets of materials will be forwarded to the Directorate for Budget and Appropriations Affairs, OUSD (Comptroller), Room 3D755. Two copies should also be submitted at that time to Washington Headquarters Services, Directorate for Freedom of Information and Security Review, (703) 696-4538, for
security clearance. Other appropriate provisions of Section 4.1 pertain. Military Departments will make the same distribution of above Books as for regular congressional justification materials.

4.2.3. References. Additional instructions are contained in OMB Circular A-11.

4.3 Distribution/Internet Posting of Budget Material (010403)

4.3.1. Copies of OSD-generated justification materials for congressional distribution will be delivered to OUSD (Comptroller), Budget & Appropriations Affairs, Room 3D755 for delivery to the congressional committees.

4.3.2. Each Military Department will deliver copies of its justification material to congressional committees, GAO, Library of Congress, CBO, and OMB, etc. The OUSD (Comptroller) (P/B) will distribute copies of the consolidated Defense-wide justification material unless assigned to a Military Department. The Office of the ASD(NII)/DoD CIO Resource Management Directorate will distribute copies of the consolidated Information Technology Justification.

4.3.3. Copies of classified material and other backup documentation for OSD will be delivered directly by each Military Department to the offices listed. Total distribution including the number of copies is also provided on the following tables. Advance books (40) are required to be produced by the due dates so that immediate distribution may be made to the congressional committees. The remaining quantities will be delivered/distributed 3 to 5 days thereafter.

4.3.4. Internet Posting of Unclassified Budget Justification Material

4.3.4.1. Justification material for the President’s budget will have limited paper copy distribution as shown on the distribution charts. No internal DoD distribution will be made of unclassified justification material that is provided to the Congress, OMB and other non-DoD organizations. This justification material will be available solely through posting to Component Internet sites.

4.3.4.2. However, classified budget justification and budget backup material as identified in the distribution tables will be provided in paper copy to the organizations listed. Appropriate OUSD (Comptroller) directors should be consulted prior to distribution of material not listed.

4.3.4.3. Internet posting on Component Web Sites.

4.3.4.3.1. Web pages presenting Defense budget documents must be designed to facilitate user discovery of the information. These pages will be used extensively by Congressional staffs, the media, and the public, and the presentation of material reflects upon the organization sponsoring the site. Budget documentation should be logically grouped, and link names should be clear and concise, to allow the user to rapidly navigate to the document of interest. Graphical content should be limited, to allow reasonable download times when accessed via modem. The Military Departments must ensure that established web pages meet these criteria.
4.3.4.3.2. Defense Agencies and managers of Defense-wide accounts will be provided separate guidance for the submission of budget justification in an electronic format. OUSD (Comptroller) will consolidate Defense-wide justification and distribute/post to the Comptroller Internet site.

4.3.4.3.3. Posting of justification material on Component web pages should occur no later than 5 working days after delivery of the paper copies to the Congress, but not prior to delivery to the Congress.

4.3.4.3.4. As a reminder, for Freedom of Information requests received prior to posting the unclassified budget material on the Internet, it is the responsibility of the DoD component to comply with the request in accordance with DoD 5400.7-R.

4.3.5. CD-ROM Production. Upon completion of the posting of budget justification material to the Component Internet site, a CD-ROM containing all of this material will be produced and distributed in accordance with the distribution tables that follow. This CD-ROM should be distributed not later than 45 days after the Budget of the United States Government is presented to the Congress. This process will make budget material available for those that lack Internet access and for historical purposes.

Because of numerous room changes during the Pentagon Renovation, call the listed office prior to delivery of budget material.

Because of mail handling procedures, many offices require courier delivery/pickup in lieu of U.S. Postal Service delivery. Please call offices prior to mailing any material to the above organizations.

4.4 Witness Statements (010404)

4.4.1. Purpose. This section provides instructions for preparation of witness statements for testimony at hearings before congressional committees.

4.4.2. Preparation

4.4.2.1. Each witness statement should contain a cover page that includes the name, grade/rank, and position title of the witness; the full title of the congressional committee or subcommittee before which the witness is to appear; the date the witness is to testify; the subject of the hearing; and an embargo statement “Not for Publication Until Released by the Committee” (or Subcommittee, if applicable).

4.4.2.2. The various congressional committees publish instructions for preparation of witness statements for their committee. These instructions, unique to each committee, are available from the following offices:

4.4.2.2.1. House and Senate Defense, House Military Quality of Life and Veterans Affairs and Related Agencies, and Senate Military Construction Appropriations Subcommittees – Budget and Appropriations Affairs Directorate, USD(Comptroller) and Service Budget Liaison offices.

4.4.2.2.2. House and Senate Armed Services Committees and House and Senate Budget Committees - Office of the Assistant Secretary of Defense (Legislative Affairs) and Service Legislative Affairs offices.

4.4.2.2.3. Other congressional committees - Instructions are normally included in the letter requesting the hearing. First time before the committee.

4.4.3. Security Review

4.4.3.1. DoD Directive 5400.4 calls for DoD witnesses to submit their prepared statements to Washington Headquarters Services, Office of Security Review, (703) 696-4538, for clearance.

4.4.3.2. This should be done as far in advance of the required date of transmittal to a congressional committee as possible, usually 5 or more working days prior to the date clearance is desired.
4.4.4. Number of Copies

4.4.4.1. Upon completion of the security review process, the originating office should ensure that 75 copies of unclassified statements are delivered to the Directorate for Defense Information, Office of the Assistant to the Secretary of Defense (Public Affairs), Room 2E565, Pentagon. This should be done at least 24 hours in advance of the scheduled appearance of the witness before the congressional committee. Be prepared to provide additional copies on short notice.

4.4.4.2. These procedures will allow the Office of the Assistant Secretary of Defense (Public Affairs) to meet news media requirements as soon as statements are released by the congressional committee or subcommittee.

4.4.4.3. A chart identifying the various oversight committees’ copy requirements for witness statements and the date that the statements are due to the committee is republished periodically by the Budget and Appropriations Affairs Directorate, USD(Comptroller), as committee requirements change. Be careful to use the most recent chart.

4.4.4.4. Special care should be exercised to ensure that specified due dates are met. The committees use the witness statement in preparing for the hearing and so suspense dates are important. Committees will routinely predicate cooperation in discussing or releasing possible hearing questions or topics on the timely delivery of these statements.

4.4.4.5. Offices responsible for arranging the attendance of principal and supporting witnesses at a hearing normally prepare a listing of witnesses known as the Witness List. These offices will contact all involved parties to obtain the names and positions of the witnesses for the Witness List.

4.5 Transcript Processing (010405)

4.5.1. Purpose. This section provides instructions for processing transcripts of witness testimony at hearings before congressional committees.

4.5.2. Initial Receipt

4.5.2.1. The House and Senate Appropriations Subcommittees on Defense, the House Subcommittee on Military Quality of Life and Veterans Affairs and Related Agencies, and the Senate Military Construction Appropriations Subcommittee provide hearing transcripts directly to Budget Liaison offices of the Services and to the Director for Budget and Appropriations Affairs, Under Secretary of Defense (Comptroller). All other hearing transcripts are provided directly to the Legislative Affairs office of the Services and to the Office of the Assistant Secretary of Defense (Legislative Affairs).
4.5.2.2. The original copy of the transcript is then provided to the office of the principal witness utilizing DD Form 1587, Record of Congressional Transcript Review, as the transmittal document. To meet committee requirements and allow time for final review by Washington Headquarters Services, Security Review, each element in the review process must give cooperative consideration to the time requirements of all elements in meeting due out dates. DoD Directive 5400.4 provides guidance in utilizing DD Form 1587. Instructions are also printed on DD Form 1587.

4.5.2.3. The various committees publish instructions for processing transcripts for their committee hearings. These instructions, unique to each committee, are available from the following offices:

4.5.2.3.1. House and Senate Defense, House Military Quality of Life and Veterans Affairs and Related Agencies, and Senate Military Construction Appropriations Subcommittees - Directorate for Budget and Appropriations Affairs, USD(Comptroller) and Service Budget Liaison offices.

4.5.2.3.2. House and Senate Armed Services Committees and House and Senate Budget Committees - Office of the Assistant Secretary of Defense (Legislative Affairs) and Service Legislative Affairs offices.

4.5.2.3.3. Other congressional committees - Instructions are normally included in the letter requesting the hearing.

4.5.3. Processing Procedures

4.5.3.1. Upon receipt of the transcript in the office of the primary witness, that office will review and edit the transcript and prepare the necessary inserts including questions for the record. At the same time, those staff offices required to provide input to the transcript should be tasked, in writing, for their specific portion. Page and line number/question number should be referenced when tasking inserts for the record.

4.5.3.2. Offices providing input to transcripts should clear their internal security review office prior to providing their input to the principal witness' office. After consolidation of the edit review of the transcript and inclusion of necessary inserts, the office of the principal witness will then need to obtain the proper security clearance for the transcript and inserts from Washington Headquarters Services, Directorate for Freedom of Information and Security Review. A DD 1790, Prepared Testimony Review must be used. DoD Directive 5400.4 provides instructions to be followed in processing the transcript through the security review process.

4.5.3.3. Plain bond (8.5” x 11.0” with left and right margins of 1.5”) Insert for the Record, will be utilized for all inserts to congressional testimony and questions/answers for the record. Formats for completing these for the four oversight committees are provided in Section 10.0.
4.5.3.4. After completing the security review process and required coordination’s, the completed transcript should be returned to the office from which the transcript was received (Transcript Action Monitor) for final review and delivery to the congressional committee.

4.5.3.5. Special care should be exercised to ensure that transcript processing suspense dates are met. The committees emphasize that the deadline dates imposed by them must be met. As the committees approach mark-up, the importance of meeting deadlines becomes even more critical. Transcripts should not be unduly delayed while gathering information for the record. If a delay is encountered, a note that the data will be furnished at some specified date should accompany the transcript and processing should proceed.

4.5.4. Congressional Hearings and Reporting Requirements Tracking System (CHARRTS). CHARRTS is an OUSD (Comptroller) web based application for tasking Hearing transcripts, inserts for the record, and questions for the record. Components will be notified by email for each tasking for which they are responsible to complete. CHARRTS is a controlled site accessed through https://charrts.osd.mil/ and requires an access password for each user. Components will input all responses to both inserts and questions for the record directly into CHARRTS. Formats have been established within CHARRTS for each Committee for these responses and must be used. Input that does not follow the established standards will be rejected by the system. Contact the OUSD (Comptroller), Budget and Appropriations Affairs Directorate at (703) 697-1101 for all questions related to CHARRTS.

4.5.5. Page Proofs/Galleys. Often committees allow DoD to review page proof/galleys of congressional testimony to ensure that changes have been incorporated and that if classified data has been included that it be deleted from the version that will be made public. Extreme care must be exercised to ensure that all classified data have been excised.

4.6 Appeal Process on Congressional Actions (010406)

4.6.1. Purpose. Each year the actions taken by congressional committees during consideration of the DoD authorization and appropriation bills are reviewed by DoD components. This Section provides policy guidance and procedures for appealing such congressional actions.

4.6.2. Scope of Material

4.6.2.1. DoD appeals to congressional committees may be in the form of a letter to the appropriate committee chairman (or chairmen in the case of appeals to joint conferees), which sets forth the Department’s position on the most significant programs/items impacted by congressional actions. This letter is prepared for the signature of the Secretary of Defense. Only the Secretary will provide the Department’s position on appeal items.

4.6.2.2. DoD appeals also may be in the form of an appeal package consisting of one page for each action being appealed. This package is submitted to the appropriate committee by the USD(Comptroller). It is not submitted as an enclosure to an appeal letter, but may be referred to in the letter.
4.6.2.3. The submission of appeal material can vary each year and is primarily
dependent upon the timing of each committee’s actions on the budget request. The preparation of
appeal items begins when the actions of the committees become known, usually with release of
the committee’s report. Normally, appeal material will be modified to reflect final floor action
since amendments adopted on the floor can significantly change positions reported out by the
committees. In most cases, the process is as follows:

4.6.2.3.1. To Authorization Conferees. This appeal is based on the actions
of both the House and Senate Armed Services Committees, as modified by House and Senate floor
action.

4.6.2.3.2. To Appropriations Conferees. This appeal is based on the actions
of both the House and Senate Appropriations Committees, as modified by House and Senate floor
actions.

4.6.3. Preparation of Appeals

4.6.3.1. Once the actions of an oversight committee become known, DoD
components normally will be requested to provide input on high priority items for incorporation
into the Secretary’s appeal letter or appeal package. Appeal input will be submitted in the general
format of Exhibit PB-39A-1 and PB-39A-2 (provided in Section 10.0) in both hard copy and by
e-mail in Microsoft Word format (with no graphics). Components may be asked to assign a
priority to the actions they want appealed.

4.6.3.2. All appeal materials must be unclassified. Verification that materials are
entirely unclassified must be obtained by the DoD component from the component’s security
review prior to submission to OSD. USD(Comptroller) will obtain clearance of the consolidated
appeal package from the Washington Headquarters Services, Directorate for Freedom of

4.6.4. Policy Guidance, Preparation and Coordination of Budget Appeals

4.6.4.1. By memorandum of May 27, 1983, Subject: "Congressional Justification
of the President’s Annual Defense Budget," the Secretary of Defense charged the Comptroller with
the responsibility to coordinate all justification actions for his consideration that may be interpreted
as reprogramming, supplementals, amendments, or appeals to the Defense budget. Therefore, in
order to ensure that the Department speaks to the Congress in this area with one voice and remains
consistent with the Secretary’s policy direction, all appeals to congressional committees will be
prepared by the USD(Comptroller).

4.6.4.2. The Directorate for Budget and Appropriations Affairs, within the Office
of the USD(Comptroller) (Program/Budget), will issue instructions for submission of appeal input.
Along with other Comptroller directorates, Budget and Appropriations Affairs will review the
input and prepare a draft appeal letter and appeal package. Normally, these drafts will be sent for
comments to the appropriate DoD offices. Clearance on all appeal materials will be requested
from the Office of Management and Budget.
4.6.4.3. While responsibility for consolidation and coordination of appeal materials resides with the USD(Comptroller), all offices are responsible for ensuring that the materials they submit remain up to date. Submitting components, e.g. The Joint Staff, should provide only one position on each issue submitted.

4.6.5. Classified Appeals. Actions of congressional committees documented in classified annexes (such as by the Intelligence Committees) to reports or classified letters may be addressed in classified appeals prepared by the OUSD(I). Further guidance is contained in Chapter 16.

5.0 BUDGET AUTOMATION REQUIREMENTS (0105)

5.1 Automated Military Personnel Programs Database (010501)

5.1.1. Purpose and Objectives. The purpose of the Military Personnel Programs database is to provide supporting budgetary documentation to the Congress, OMB and the public with each year’s President’s Budget. Data submission is through the Program Resources Collection Process (PRCP) System. The Military Personnel Programs database supports, and must be consistent with, other budgetary data in the Comptroller Information System (CIS). This section provides for the maintenance of the Military Personnel Programs as an automated database that is the primary structure for budget activity and budget subactivity level of detail. The Military Personnel Programs (M-1) (unclassified) is produced from the Military Personnel Programs database.

5.1.2. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD) and the Military Departments.

5.1.3. Reporting Requirements. The automated database was established for the FY 2005 President’s budget. Subsequent updates will be required coincident with the (1) Program and Budget Review and (2) the President’s Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

5.1.4. General Instructions - Preparing the Detailed Military Personnel Programs (M-1). The Military Personnel Programs provide resources in a budget activity and budget subactivity line item level of detail with appropriation identification consistent with other budgetary data in the CIS database. A detailed description of line item entries is listed in Volume 2A, Chapter 2. The minimum information required in the Military Personnel Programs is as follows:

5.1.4.1. A summary by appropriation account with subtotals for DOD Components.

5.1.4.2. A summary of each appropriation account by budget activity/budget subactivity with budget activity subtotals and an appropriation total.

5.1.4.3. Entries for the individual line items should be on the same basis as that used for program and budget submissions.
5.1.4.4. Costs of prior year programs will be adjusted annually to reflect actual obligations, including deobligations, recoveries of prior year obligations, upward obligation adjustments, transfers, and rescissions, as appropriate, and must match prior year values in the Comptroller Information System.

5.1.4.5. The OUSD(C) P/B Military Personnel and Construction Directorate will obtain the Security classification review certification.

5.1.5. General Instructions - Preparing the Military Personnel Programs (M-1). The M-1 document is derived from and consistent with other budgetary data in the CIS database. The M-1 is provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President’s Budget. The minimum information required in the M-1 is as follows:

5.1.5.1. Identification codes and a detailed description of line item entries are explained in paragraph F below.

5.1.5.2. The line item data provided is PY, CY, BY1 (and BY2 if biennial submission).

5.1.5.3. The security classification will be in accordance with the criteria set forth in Section 1.8.

5.1.6. Military Personnel Data Elements and Record Formats

5.1.6.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.1.6.2. Other Military Personnel Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the Military Personnel Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).

5.2 Automated Operation and Maintenance Programs Databases (010502)

5.2.1. Purpose and Objectives. The purpose of the Operation and Maintenance Programs databases are to provide supporting budgetary documentation to the Congress, OMB and the public with each year’s President’s Budget. Data submission is through the Program Resources Collection Process (PRCP) System. The Operation and Maintenance Programs databases support, and must be consistent with, other budgetary data in the Comptroller Information System (CIS). This section provides for the maintenance of the Operation and Maintenance Programs as an automated database that is the primary structure for budget activity and activity group cost at the Program Element and expense aggregate level of detail. The O-1 reports are produced from the Operation and Maintenance Programs database. Operation and Maintenance Programs data extracts are provided to the Office of the Director, Program Analysis and Evaluation (hereafter referred to as "OD,PA&E") to update the Future Years Defense Program database. In addition,
the Civilian Personnel Costs and O&M Summary of Price and Program Changes automated exhibits are processed through this system. The Civilian Personnel Costs exhibit is required for each appropriation/fund, not limited to O&M appropriations, in which civilian personnel are funded. Updates and documents produced include:

5.2.1.1. Operation and Maintenance Programs (O-1) (classified)

5.2.1.2. Operation and Maintenance Programs (O-1) (unclassified)

5.2.1.3. Future Years Defense Program Update Data for OD,PA&E

5.2.1.4. Civilian Personnel Costs (OP-8) (classified)

5.2.1.5. Civilian Personnel Costs (OP-8) (unclassified)

5.2.1.6. Summary of Price and Program Changes (OP-32) (classified)

5.2.1.7. Summary of Price and Program Changes (OP-32) (unclassified)

5.2.2. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Defense Agencies, and any other DoD Component that contribute data to the Operation and Maintenance Programs.

5.2.3. Reporting Requirements. The initial Operation and Maintenance Programs automated database was established for the FY 2005 President’s budget. Subsequent updates will be required coincident with the (1) Program and Budget Review and (2) the President’s Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

5.2.4. General Instructions - Preparing the Detailed Operation and Maintenance Programs. The Operation and Maintenance Programs provide resources in a budget activity and activity group line item level of detail with appropriation identification consistent with other budgetary data in the CIS database. A detailed description of line item entries is listed in Volume 2B, Chapter 3, Section 030402. The minimum information required in the Operation and Maintenance Programs is as follows:

5.2.4.1. A summary by appropriation account with subtotals for DOD Components.

5.2.4.2. A summary of each appropriation account by budget activity/activity group/sub-activity group with budget activity/activity group subtotals and an appropriation total.

5.2.4.3. A detailed sub-activity group by program element and expense aggregate listing in budget activity/activity group sequence.
5.2.4.4. Entries for the individual line items should be on the same basis as that used for program and budget submissions.

5.2.4.5. Costs of prior year programs will be adjusted annually to reflect actual obligations, including deobligations, recoveries of prior year obligations, upward obligation adjustments, transfers, and rescissions, as appropriate, and must match prior year values in the Comptroller Information System.

5.2.4.6. Security classification of line items is determined by the submitting Component subject to OSD Security review. DoD Components must provide a security classification review certification to OUSD(C) P/B P&FC. Except for information published in the unclassified version of the O-1 Report, data contained in the Operation and Maintenance Programs may not be released outside the DoD without the expressed written consent of the Under Secretary of Defense (Comptroller).

5.2.5. General Instructions - Preparing the Operation and Maintenance Programs (O-1). The O-1 document is derived from and consistent with other budgetary data in the CIS database. The O-1 is provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President’s Budget. An unclassified version is provided to OASD(PA) for use by non-DoD activities. The minimum information required in the O-1 is as follows:

5.2.5.1. Identification codes and a detailed description of line item entries are explained in paragraph 5.2.6 below.

5.2.5.2. The line item data provided is PY, CY, BY1 (and BY2 if biennial submission) for the O-1 production, and outyears for the FYDP update.

5.2.5.3. The security classification will be in accordance with the criteria set forth in Section 1.8.

5.2.6. Operation and Maintenance Data Elements and Record Formats

5.2.6.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.2.6.2. Program element codes and titles are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook. This publication is available at http://www.dtic.mil/whs/directives under “Publications,” and in approved decision documents posted to the FYDP Resource Structure Management (RSM) web site (see Section 7.2) but not yet reflected in DoD 7045.7-H. A listing of expense aggregate codes is available at the SIPRNET home pages of the OUSD (Comptroller) and OD, PA&E.
5.2.6.3. Other Operation and Maintenance Program Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the Operation and Maintenance Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).

5.2.7. Instructions on OP-32 and OP-8 are at Section 030201.G. Automated Submission and 0304 Operation and Maintenance Appropriation Submission Formats. Detailed guidance on the automated submission is provided on the OUSD (Comptroller) home page of the SIPRNET at http://cisweb.ousdc.osd.smil.mil.

5.3 Automated Procurement Programs Database (010503)

5.3.1. Purpose and Objectives. The purpose of the Procurement Programs database is to provide supporting budgetary documentation to the Congress, OMB and the public with each year’s President’s Budget. Data submission is through the Program Resources Collection Process (PRCP) System. The Procurement Programs database supports, and must be consistent with, other budgetary data in the Comptroller Information System (CIS). This section provides for the maintenance of the Procurement Programs as an automated database that is the primary structure for quantity and program cost at the line item and Program Element level of detail for a number of related Procurement Program documents. The following are produced from the Procurement Programs database:

5.3.1.1. Detailed Procurement Programs (classified)

5.3.1.2. Procurement Programs (P-1) (classified)

5.3.1.3. Procurement Programs (P-1/P-1R) (unclassified)

5.3.1.4. Program Acquisition Costs by Weapon System (unclassified)

5.3.1.5. P-1/P-1R database for the Senate Appropriations Committee, the House Appropriations Committee, the Senate Armed Services Committee, and the House Armed Services Committee.

5.3.1.6. Future Years Defense Program Update Data for OD, PA&E

5.3.1.7. Data for USD(AT&L), USD(I), ASD(NII)/DoD CIO, Director, PA&E, The Joint Staff, OMB, and GAO.

5.3.2. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Defense Agencies, and any other DoD Component that contribute data to the Procurement Programs.
5.3.3. Reporting Requirements. The initial automated database was established consistent with the procurement data submitted to the Congress in support of the FY 1974 Budget. Since that time subsequent updates have been required coincident with submission of the (1) Program and Budget Review and (2) the President’s Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

5.3.4. General Instructions - Preparing the Detailed Procurement Programs. The Procurement Programs provide resources in a line item level of detail with appropriation identification consistent with other budgetary data in the CIS database. A detailed description of line item entries is listed in Volume 2B, Chapter 4, Section 0402. The minimum information required in the Procurement Programs is as follows:

5.3.4.1. A summary by appropriation account with subtotals for DOD Components.

5.3.4.2. A summary of each appropriation account by budget activity with an appropriation total.

5.3.4.3. A detailed line item listing in budget activity/budget subactivity sequence.

5.3.4.4. Entries for the individual line items should be on the same basis as that used for budget submissions. Multiyear procurements (MYP) are identified for P-1 line items with MYP as defined in Section 2.3. Advance procurement entries should be used as specified in Volume 2B, Section 040502. Initial spares listed with the procurement item (post-delivery and outfitting costs for Shipbuilding and Conversion, Navy) should be shown immediately following the line as a memorandum entry--non-add to the budget activity total.

5.3.4.5. Costs of prior year programs will be adjusted annually to reflect actual obligations, including deobligations, recoveries of prior year obligations, upward obligation adjustments, transfers, and rescissions, as appropriate.

5.3.4.6. The cost to complete column provides the data necessary to obtain the total procurement cost for acquisition of weapon items. It is necessary to estimate the cost of completing the approved program for major weapon systems included in the Selected Acquisition Report (SAR) reporting system and for multiyear contracts utilizing economic order quantity advance procurement. Such costs will be entered in the “cost to complete” column of the Procurement Programs. Entries in the “cost to complete” column are not required for other procurement line entries. The “cost to complete” estimate will include: (1) the portion of the “approved quantity” to be procured beyond the FYDP, and (2) costs to complete acquisition of units procured in prior years such as outfitting and post-delivery requirements for ships which will not deliver during the FYDP.
5.3.4.7. Security classification of line items is determined by the submitting Component subject to OSD Security review. DoD Components must provide a security classification review certification to OUSD(C) P/B P&FC. Except for information published in the unclassified version of the P-1 Report, data contained in the Procurement Programs may not be released outside the DoD without the expressed written consent of the Under Secretary of Defense (Comptroller).

5.3.5. General Instructions - Preparing the Procurement Programs (P-1). The P-1 document is derived from and consistent with other budgetary data in the CIS database. The P-1 is provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President’s Budget. An unclassified version is provided to OASD(PA) for use by non-DoD activities. The minimum information required in the P-1 is as follows:

5.3.5.1. Identification codes and a detailed description of line item entries are explained in paragraph 5.3.6 below.

5.3.5.2. The line item data provided is PY, CY, BY1 (and BY2 if biennial submission).

5.3.5.3. The security classification will be in accordance with the criteria set forth in Section 1.8.

5.3.6. Procurement Data Elements and Record Formats

5.3.6.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.3.6.2. Program element codes and titles are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook. This publication is available at http://www.dtic.mil/whs/directives under “Publications,” and in approved decision documents posted to the FYDP Resource Structure Management (RSM) web site (see Section 7.2) but not yet reflected in DoD 7045.7-H.

5.3.6.3. Other Procurement Program Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the Procurement Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).
5.4 Automated RDT&E Programs Database (010504)

5.4.1. Purpose and Objectives. The purpose of the RDT&E Programs database is to provide supporting budgetary documentation to the Congress, OMB and the public with each year’s President’s Budget. Data submission is through the Program Resources Collection Process (PRCP) System. The RDT&E Programs database supports, and must be consistent with, other budgetary data in the Comptroller Information System (CIS). This section provides for the maintenance of the RDT&E Programs as an automated database that will be the primary structure for program element and project level detail for a number of related RDT&E Program documents. The following are produced from the RDT&E Programs database:

5.4.1.1. Detailed RDT&E Programs (classified)

5.4.1.2. RDT&E Programs (R-1) (classified)

5.4.1.3. RDT&E Programs (R-1) (unclassified)

5.4.1.4. R-1 database for the Senate Appropriations Committee, the House Appropriations Committee, the Senate Armed Services Committee, and the House Armed Services Committee.

5.4.1.5. Future Years Defense Program Update Data for OD, PA&E

5.4.1.6. Data for USD (AT&L), USD(I), ASD (NII)/DoD CIO, Director, PA&E, The Joint Staff, OMB, and GAO.

5.4.2. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Defense Agencies, and any other DoD Component that contribute data to the Procurement Programs.

5.4.3. Reporting Requirements. The initial automated database was established consistent with the RDT&E data submitted to the Congress in support of the FY 1976/1977 Budget. Since that time subsequent updates have been required coincident with submission of the (1) Program and Budget Review, and (2) President’s Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

5.4.4. General Instructions - Preparing the Detailed RDT&E Programs. The RDT&E Programs is consistent with the program element identification of resources contained in the Future Years Defense Program Summary and Program Element Detail. Data in the RDT&E Programs is summarized by appropriation account with recaps by budget activity and FYDP programs. Security classification of line items is determined by the submitting Component subject to OSD Security review. DoD Components must provide a security classification review certification to OUSD(C) P/B P&FC.
5.4.5. **General Instructions - Preparing the R-1 Document.** The R-1 document is derived from, and consistent with, other budgetary data in the CIS database. The R-1 is provided annually to the DoD Oversight Committees of the Congress coincident with the transmittal of the President’s Budget. An unclassified version is provided to OASD(PA) for use by non-DoD activities. The unclassified R-1 is the only document from the RDT&E Programs database available for public distribution. The minimum information required in the R-1 is as follows:

5.4.5.1. The program element line item data provided is PY, CY, BY1 (and BY2 if biennial submission).

5.4.5.2. The security classification shall be in accordance with the criteria set forth in Section 1.8.

5.4.5.3. A detailed program element listing in budget activity sequence.

5.4.6. **RDT&E Data Elements and Record Formats**

5.4.6.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.4.6.2. Other RDT&E Program Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the RDT&E Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).

5.5 **Automated Construction Program Database (010505)**

5.5.1. **Purpose and Objectives.** This section provides guidelines for the Automated Construction Program Database to supplement the Defense Components’ military construction justification materials. Data submission is through the Program Resources Collection Process (PRCP) System. The Construction Program also will be used to track Program Budget Decisions at the project level, track congressional action on the President’s Budget submission, and provide the baseline data required for special analysis such as the facilities recapitalization metric.

5.5.2. **Applicability.** The provisions of this section apply to all requirements financed by the Military Construction, NATO Security Investment Program, Base Realignment and Closure, Family Housing, DoD Family Housing Improvement Fund and Homeowners Assistance appropriations of the DoD Components as applicable.

5.5.3. **Responsibilities.** The DoD Components will submit Construction Program data for their Active, Guard and Reserve Forces construction projects, their portions of the Family Housing, DoD Family Housing Improvement Fund and Homeowners Assistance programs. DoD Components will also submit Construction Programs data for multi-service or national level projects for which they are the executive agent as described in Volume 2B, Chapter 6, Section 060301.
5.5.4. Reporting Requirements. Update submissions will coincide with the Program and Budget Review submissions and the January budget presentation. Detailed requirements not contained herein will be specified by memorandum for all update submissions. Data will be consistent with budgetary data in the CIS database.

5.5.5. Construction Data Elements and Record Formats

5.5.5.1. Appropriation codes, Component codes, and budget activity codes are as specified in the Budget Structure Listing which can be viewed on the SIPRNet home page of the OUSD (Comptroller).

5.5.5.2. Program element codes and titles are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook. This publication is available at http://www.dtic.mil/whs/directives under “Publications,” and in approved decision documents posted to the FYDP Resource Structure Management (RSM) web site (see Section 7.2) but not yet reflected in DoD 7045.7-H.

5.5.5.3. Other Construction Program Data Elements and Record Formats. Components must follow the guidance and use the data elements and record layouts for submission of updates to the Construction Programs database as prescribed in the instructions on the SIPRNet home page of the OUSD (Comptroller).

5.5.6. Level of Detail

5.5.6.1. Data will be reported at the level specified for the justification material [(DD Form 1391) in Volume 2B, Chapters 6 and 7]. A summary of the levels required follows:

5.5.6.2. Military Construction 1

5.5.6.2.1. Major Construction - project detail

5.5.6.2.2. Minor Construction - lump-sum for exigent minor construction

5.5.6.2.3. Planning and Design - lump-sum

5.5.6.2.4. Supporting Activities - project detail

5.5.6.2.5. Program Element

5.5.6.3. NATO Security Investment Program - lump-sum 1

5.5.6.4. Base Realignment and Closure - lump-sum 1

5.5.6.5. Family Housing Construction 1
5.5.6.5.1. Construction of new housing - project detail. A separate data element will be used to identify the number of units being constructed for each project.

5.5.6.5.2. Construction Improvements - lump-sum.

5.5.6.5.3. Planning and Design - lump-sum.

5.5.6.6. Family Housing, Operation & Maintenance 1/ Lump-sum for each budget activity except the Operating Expenses budget activity will be reported by subaccount. The Family Housing Operation and Maintenance entries are shown below:

5.5.6.6.1. Management Account

5.5.6.6.2. Services Account

5.5.6.6.3. Furnishings Account

5.5.6.6.4. Miscellaneous Account

5.5.6.6.5. Utilities Account

5.5.6.6.6. Leasing

5.5.6.6.7. Maintenance of Real Property

5.5.6.6.8. Interest Payments

5.5.6.6.9. Mortgage Insurance Premiums

5.5.6.6.10. Housing Privatization Support

5.5.6.7. Homeowners Assistance Fund 1/

5.5.6.7.1. Payment to Homeowners

5.5.6.7.2. Other Operating Costs

5.5.6.7.3. Acquisition of Real Property

5.5.6.7.4. Mortgages Assumed

5.5.6.8. DoD Family Housing Improvement Fund - lump sum 1/

5.5.6.8.1. Nomenclature records for all lump-sum values will be generated by the automated Construction Programs database system; DoD Components should not submit nomenclature records for lump-sum values.
5.5.7. Security Classification. A project may be classified due to the nature of the project, the location of the project, or both. Since the Construction Programs (C-1) is an unclassified document generated from an unclassified database, use the conventions provided in the instructions for submission of updates to the Construction Programs database on the SIPRNet home page of the OUSD (Comptroller).

5.6 CIS Automation Requirements for the Biennial Program and Budget Review Submission (010506)

5.6.1. Purpose. Electronic data are the basis for the OSD budget review. Components’ program and budget review submission form the baseline from which all Program Budget Decision dollar and manpower deltas are made. The program and budget review submission is entered into Comptroller Information System (CIS) by the Military Departments and Defense Agencies. This chapter outlines the requirements for submission of the data.

5.6.2. Requirement for the CIS Budget Structure. DoD must comply with the budget submission requirements in OMB Circular A-11, “Preparation, Submission, and Execution of the Budget,” which applies to all Executive Branch agencies. OMB’s MAX budget system provides the structure for the data that must be submitted to OMB for each appropriation and receipt account. The data is published annually in the Budget of the United States Government, commonly referred to as the President’s Budget. OMB publishes detailed account data for each Federal agency in a separate “Appendix” of the Budget. The OUSD (Comptroller)’s CIS database is designed to satisfy the annual submission of Defense Budget data to OMB’s automated MAX budget system. The CIS budget structure for an account is the Program and Financing (P&F) Schedule. The P&F Schedule consists of a budget plan, object class, and expenditure tail for all accounts, except for multi-year accounts that also have a separate obligation plan in addition to the budget plan.

5.6.3. Submission Requirements:

5.6.3.1. Submission of Budget Estimates for Budget Years (BY1) and BY2:

5.6.3.1.1. Budget Submission (Dollars). Military Departments and Defense Agencies, as applicable, will submit budget plan, and object class data entries for all applicable appropriation and receipt accounts which are consistent with and reconcilable to hard copy submission of budget estimates exhibits required by other sections of the Financial Management Regulation. Budget plan data must be submitted for all years by period of obligational availability. Object class entries will be at the summary level (not by period of obligational availability) and exclude the outyears. Detailed data entries only will be submitted since subtotals and summary totals are CIS computer generated. All TOA values by Component by fiscal year will agree with budget submission TOA dollars on Exhibit PB-1A.

5.6.3.1.2. Budget Submission (Personnel Data). Budget submission of on-board year end personnel data entries for military end strength and civilian full-time equivalents (FTEs) will be in exact agreement with the PB-4 exhibit.
5.6.3.1.3. **Budget Submission for Prior Year (PY).** The Directorate for Program and Financial Control, OUSD (Comptroller)(P/B) will replicate PY from the CY column of the previous year’s budget. Components may make limited changes as part of the program and budget review submission. The PY will be updated once accounting and manpower actuals are available.

5.6.3.1.4. **Obligation Plan Data for Multi-Year Accounts.** Obligation plans for the program and budget review submissions will be computer generated in CIS once PY accounting actuals are input and as budget adjustments are recorded in CIS. Components will be asked to review obligations by budget activity after the updated rates have been implemented in CIS.

5.6.3.1.5. **Expenditure Tail Data.** Components are not required to submit expenditure tail data. Expenditure tail data for the program and budget review submissions will be computer generated in CIS. Outlay rates used in the previous year’s Defense Budget will generate outlays as part of the baseline submission. The Directorate for Program and Financial Control will adjust outlay rates later in the budget review process once PY accounting actuals are available.

5.6.3.2. **Submission of Outyear Estimates:**

5.6.3.2.1. **Budget Submission (Dollars).** The submission of TOA (Direct Program) for appropriation accounts (general fund and revolving fund) and concept obligations for trust revolving fund, trust fund, special fund, and receipt accounts for BY2+1 through BY2+4 will be made at the same time as the budget submission. Input to the database for the outyears will be formatted in accordance with the CIS Budget Structure, by appropriation account at the budget activity/special program category level. Budget plan outyear entries for TOA for applicable appropriation accounts and concept obligations for trust revolving fund, trust fund, special fund, and receipt accounts are the only dollar data to be submitted by Components for the outyears. TOA dollars must agree with Exhibit PB-1A.

5.6.3.2.2. **Budget Submission (Personnel Data).** Budget estimates for BY2+1 through BY2+4 military end strength and civilian full-time equivalents (FTEs) will be made coincident with the budget submission. Input to the database for the outyears will be formatted in accordance with the CIS Budget Structure Listing and will be in exact agreement with the PB-4 exhibit.

5.6.3.3. **Account Data Elements and Account Structure.** Program and budget review submissions will be in thousands of dollars for all data elements for each account’s budget plan, obligation plan, and object classification schedules and must be submitted in accordance with the CIS Budget Structure Listing. (Expenditure tail for CY through the outyears will be computer generated in CIS.) Personnel data for applicable accounts will be submitted for all years in accordance with the detail prescribed by the CIS Budget Structure Listing. The Budget Structure Listing may be generated by running the BATF1 through BATF6 reports from the CIS Report Processor subsystem. Questions and changes to the CIS Budget Structure Listing should be
directed to the Directorate for Program and Financial Control, OUSD (Comptroller)(P/B), phone 703-697-7564.

5.6.3.4. **Data Submission.** Guidance is provided on the SIPRNET home page of the OUSD (Comptroller) on “Coding CIS Transactions for FY BY1/BY2 Budget.” Components must use the record layouts and file formats prescribed in this guidance.

5.7 **CIS Budget Structure Listing (BSL) (010507)**

5.7.1. **Purpose.** The BSL reflects the official Department of Defense budget account structure for Component submission of the budget estimates in machine readable form. The BSL contains the following sections:

5.7.1.1. **Appropriation Account Names/Codes.** This section lists all the valid and active codes in the CIS database. Appropriation accounts have four-digit to six-digit numeric plus one-digit Treasury agency alpha account code. Receipt accounts have six-digit numeric plus one-digit Treasury agency alpha account code. Account coding in CIS agrees with codes used in OMB’s MAX automated budget system for compatibility in the Department’s electronic submission of the Defense Budget to OMB.

5.7.1.2. **Budget Plan and Obligation Plan Name Codes.** This section provides the detailed budget structure for data elements in the budget plan and obligation plan of all appropriation and receipt accounts in CIS. In this section of the BSL, the presence of a “P” and/or “$” in the “PER/$$ Inputs” column indicates those budget activities/special program codes against which resources ($ or personnel) may be entered in the CIS database. Requests to add “P” or a “$” to an existing line may be made to the Directorate for Program and Financial Control, OUSD (Comptroller)(P/B), through the respective Program/Budget Directorate responsible for that appropriation.

5.7.1.3. **Financing, Budget Authority, and Expenditure Tail Name/Codes.** This section lists the financing (FIN), budget authority breakout (BAB), and expenditure tail (EXP) codes used in the Program and Financing Schedule for each appropriation and receipt account.

5.7.1.4. **Object Classification Codes.** OMB Circular A-11 requires agencies to report account obligations by object class for PY, CY, BY1 and BY2. This section aligns Program and Financing Schedule obligations with the object class codes in OMB Circular A-11.
5.7.2. Input Requirements

5.7.2.1. Input coding for all budget estimates will be entered in accordance with guidance provided on the SIPRNET OUSD (Comptroller) home page. Features that should be considered in the preparation of data are:

5.7.2.1.1. Military Personnel Accounts:

5.7.2.1.1.1. The Military Departments will prepare and submit the military personnel account data (see Budget Structure Listing on the SIPRNET home page of the OUSD (Comptroller)). Input for military personnel dollars should not be submitted by Defense Agencies.

5.7.2.1.1.2. The Military Departments will prepare and submit end strength data on a Component basis; i.e., Army submits data on personnel assigned to Army as well as Army personnel assigned to each Defense Agency (see Budget Structure Listing on the SIPRNet home page of the OUSD (Comptroller)). The Defense Agencies must coordinate their end strength requirements with the Military Departments prior to the Military Departments’ data submissions.

5.7.2.1.2. Input coding for Working Capital Fund must include the appropriate three-position special program code assigned to each business area for operating and capital expenses, civilian full-time equivalents (FTEs), and military end strengths.

5.7.3. Object Classification Schedules

5.7.3.1. Object class definitions are provided in OMB Circular A-11, Section 83. The major object class categories are:

5.7.3.1.1. 10 Personnel compensation and benefits
5.7.3.1.2. 20 Contractual services and supplies
5.7.3.1.3. 30 Acquisition of assets
5.7.3.1.4. 40 Grants and fixed charges
5.7.3.1.5. 90 Other
5.7.3.2. DoD-unique object class major/minor codes include:

5.7.3.2.1. 12.210 Military – accrued retirement benefits

5.7.3.2.2. 12.220 Military – other personnel benefits

5.7.3.2.3. 12.230 Military – accrued health care Military benefit categorization guidance for the three above is provided in Chapter 2, Section 020202.

5.7.3.2.4. 25.320 Payments to foreign national indirect hire

5.7.3.2.5. 25.330 Purchases from revolving funds. Obligations for purchases from Defense Working Capital Funds and other DoD revolving and management accounts. Differentiate from object class 25.310 purchases of goods and services from other government agencies (examples include non-revolving fund support agreement obligations).

5.7.3.3. The object classification codes specified in OMB Circular A-11 are augmented in CIS by type that identifies Direct Obligations (type = “1”), Reimbursable Obligations (type = “2”), Allocation Accounts (type = “3”), and Receipt Obligations (type = “4”).

5.7.3.4. All revolving and management accounts will be coded in the reimbursable (type = “2”) object class series followed by the appropriate object class number.

5.7.3.5. Object class data will be submitted for all accounts (including concept obligations) in the Program and Financing schedules in the PY, CY, BY1 or BY2.

5.7.3.6. Object Class Default Major/Minor Codes. When an obligation adjustment occurs in CIS and an object class is not specified for the obligation change, CIS will automatically make an adjustment in the amount of the obligation to the default object class for the account. For example, if a TOA delta is made to an annual account in a Program Budget Decision (PBD) and if an object class obligation delta is not coded and included as part of the PBD transaction, CIS will automatically generate an object class delta in the default object class code for the account. Components must redistribute obligations by object class for each of their accounts after PY actuals are available, and before the budget review process has been completed, to provide consistent and explainable object class amounts from PY through BY2. A chart displaying CIS object class default Major/Minor code for each account is available on the SIPRNet home page of the OUSD (Comptroller).

5.7.4. CIS P&F Schedule Diagnostics Rules and Report. CIS Report 22 has been developed to provide diagnostic and balancing checks for appropriation and receipt accounts. Report 22 provides a listing of balance diagnostic errors and warnings for each appropriation account and supplemental account as well as for each defense agency within a defense-wide account where appropriate. An example of a balancing requirement checked in this report is: Total Direct Program (Total Obligational Authority (TOA)) in the P&F section must equal total Direct Obligations in the Object Classification section for each year within a defense agency or appropriation account (for annual accounts).
5.7.5. Update of the PY Column

5.7.5.1. OMB Circular A-11 requires agencies to submit PY data to OMB’s MAX budget system which is based on Treasury certified accounting actuals. The update of PY dollars in CIS is accomplished using data from the SF Form 133 and the DD Comp 1002 plus AR 1307 for Revolving Funds. PY amounts must reconcile to Treasury’s yearend annual report called the Treasury Alignment Statement.

5.7.5.2. Components will be requested to validate budget activity data and update object class obligations and manpower actuals once accounting data has been certified by Treasury for each Defense account. All PY actuals updates for budget plans, obligations plans and expenditure tail data will be done electronically by the Directorate for Program and Financial Control. Business rules used by CIS for updating PY actuals for an account’s budget plan, obligation plan and expenditure tail are available on the SIPRNet home page of the OUSD (Comptroller).

6.0 UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATIONS (0106)

6.1 General (010601)

6.1.1. This Section establishes the functional title classifications and subdivisions by which appropriation and fund accounts of the Department of Defense are required to be arranged, grouped, or classified in budgetary and fiscal presentations. These classifications are designed to permit consolidation of budget and fiscal data for the several Components of the Department of Defense into over-all Departmental summaries.

6.1.2. These instructions cover all appropriation and receipt accounts for military functions of the Department of Defense. Detailed DoD budget account structure used in the Comptroller Information System is displayed in the Budget Structure Listing available on the SIPRNet home page of the OUSD (Comptroller).

6.2 Functional Titles – Military Functions (010602)

The following functional titles are to be used in appropriate budgetary and fiscal presentations:

6.2.1. Military Personnel

6.2.2. Operation and Maintenance

6.2.3. Procurement

6.2.4. Research, Development, Test, and Evaluation

6.2.5. Military Construction
6.2.6. Family Housing

6.2.7. Revolving and Management Funds

6.2.8. Defense-Wide Contingencies

6.2.9. Offsetting Receipts

6.2.10. Trust and Trust Revolving Funds

6.2.11. Interfund Transactions

6.3 Definitions of Functional Titles and Subdivisions – Military (010603)

This Section lists currently active appropriations within each functional title. Budget activities for Procurement and RDT&E titles are also listed. Budget activities for other appropriations are displayed in the Budget Structure Listing available on the SIPRNet home page of the OUSD (Comptroller).

6.3.1. Functional Title - Military Personnel

6.3.1.1. The functional title "Military Personnel" for military functions is defined as comprising the accounts listed below.

6.3.1.1.1. Active Forces

- 21_2010 Military Personnel, Army
- 21_1004 Medicare-Eligible Retiree Health Fund Contribution, Army
- 17_1453 Military Personnel, Navy
- 17_1000 Medicare-Eligible Retiree Health Fund Contribution, Navy
- 17_1105 Military Personnel, Marine Corps
- 17_1001 Medicare-Eligible Retiree Health Fund Contribution, Marine Corps
- 57_3500 Military Personnel, Air Force
- 57_1007 Medicare-Eligible Retiree Health Fund Contribution, Air Force

6.3.1.1.2. Reserve and Guard Forces

- 21_2070 Reserve Personnel, Army
- 21_1005 Medicare-Eligible Retiree Health Fund Contribution, Reserve Personnel, Army
- 17_1405 Reserve Personnel, Navy
- 17_1002 Medicare-Eligible Retiree Health Fund Contribution, Reserve Personnel, Navy
- 17_1108 Reserve Personnel, Marine Corps
6.3.1.2. Lower level subdivisions susceptible to consolidation are available under the uniform budget and accounting structure prescribed for these appropriations in Chapter 2 of Volume 2A.

6.3.2. Functional Title - Operation and Maintenance

The functional title "Operation and Maintenance" for military functions is defined as comprising the accounts listed below:

<table>
<thead>
<tr>

6.3.3. Functional Title - Procurement

The functional title "Procurement" for military functions is defined as comprising the following appropriations and budget activities:

21 / 2031 Aircraft Procurement, Army
- Aircraft
- Modification of Aircraft
- Spares and Repair Parts
- Support Equipment and Facilities

21 / 2032 Missile Procurement, Army
- Other Missiles
- Modification of Missiles
- Spares and Repair Parts
- Support Equipment and Facilities
21_/_2033 Procurement of Weapons and Tracked Combat Vehicles, Army
   - Tracked Combat Vehicles
   - Weapons and Other Combat Vehicles
   - Spares and Repair Parts

21_/_2034 Procurement of Ammunition, Army
   - Ammunition
   - Ammunition Production Base Support

21_/_2035 Other Procurement, Army
   - Tactical and Support Vehicles
   - Communications and Electronics Equipment
   - Other Support Equipment
   - Spares and Repair Parts

6.3.5. Functional Title – Research, Development, Test and Evaluation

The functional title "Research, Development, Test and Evaluation" for military functions is defined as comprising the following accounts and budget activities:

- 21_/_2040 Research, Development, Test, and Evaluation, Army
- 17_/_1319 Research, Development, Test, and Evaluation, Navy
- 57_/_3600 Research, Development, Test, and Evaluation, Air Force
- 97_/_0400 Research, Development, Test, and Evaluation, Defense-Wide
- 97_/_0460 Operational Test and Evaluation, Defense
- 57_/_3024 Tanker Replacement Transfer Fund, Air Force
Budget Activities for RDT&E Accounts

01 - Basic Research
02 - Applied Research
03 - Advanced Technology Development
04 - Advanced Component Development and Prototypes
05 - System Development and Demonstration
06 - RDT&E Management Support
07 - Operational System Development

6.3.6. Functional Title – Military Construction

6.3.6.1. The functional title "Military Construction" for military functions is defined as comprising the accounts listed below.

21_/2050 Military Construction, Army
17_/1205 Military Construction, Navy
57_/3300 Military Construction, Air Force
97_/0500 Military Construction, Defense-Wide
97X0510 Base Realignment and Closure Account, Part II, Defense
051001 Base Realignment and Closure Account, Army
051002 Base Realignment and Closure Account, Navy
051003 Base Realignment and Closure Account, Air Force
051004 Base Realignment and Closure Account, Defense
97X0512 Base Realignment and Closure Account, 2005
051201 Base Realignment and Closure Account, 2005, Army
051202 Base Realignment and Closure Account, 2005, Navy
051203 Base Realignment and Closure Account, 2005, Air Force
051204 Base Realignment and Closure Account, 2005, Defense
97X0803 Foreign Currency Fluctuations, Construction, Defense
97X0804 North Atlantic Treaty Organization Security Investment Program
21_/2085 Military Construction, Army National Guard
57_/3830 Military Construction, Air National Guard
21_/2086 Military Construction, Army Reserve
17_/1235 Military Construction, Naval Reserve
57_/3730 Military Construction, Air Force Reserve
97_/0391 Chemical Demilitarization Construction, Defense

6.3.6.2. Lower level subdivisions susceptible to consolidation are available under the uniform accounting classifications prescribed for these appropriations in Chapter 6, Section 0602, and Chapter 7, Section 0702.
FUNCTIONAL TITLE - FAMILY HOUSING

The functional title "Family Housing" for military functions is defined as comprising the accounts listed below:

- 97X0834 Department of Defense Family Housing Improvement Fund
- 97X0836 Department of Defense Military Unaccompanied Housing Improvement Fund
- 21_/_.0720 Family Housing, Construction, Army
- 21_0725 Family Housing, Operation and Maintenance, Army
- 17_/_.0730 Family Housing, Construction, Navy and Marine Corps
- 17_0735 Family Housing, Operation and Maintenance, Navy and Marine Corps
- 57_/_.0740 Family Housing, Construction, Air Force
- 57_0745 Family Housing, Operation and Maintenance, Air Force
- 97_/_.0760 Family Housing, Construction, Defense-Wide
- 97_0765 Family Housing, Operation and Maintenance, Defense-Wide
- 97X4090 Homeowners’ Assistance Fund, Defense
- 97X4166 Family Housing Improvement Fund, Direct Loan, Financing Account
- 97X4167 Family Housing Improvement Fund, Guaranteed Loan, Financing Account

FUNCTIONAL TITLE - REVOLVING AND MANAGEMENT FUNDS

The functional title "Revolving and Management Funds" for military functions is defined as comprising the accounts listed below. Since each account, in its entirety, is classified within a single first level subdivision of the functional title, the accounts are grouped by the subdivisions.

Public Enterprise Funds

- 97X4555 National Defense Stockpile Transaction Fund
- 97X4950 Pentagon Reservation Maintenance Revolving Fund
- 17X4557 National Defense Sealift Fund
- 21X4275 Arms Initiative, Guaranteed Loan Financing Account, Army
- 97X4282 Defense Coalition Support Fund
Intragovernmental Funds

97X493001 Defense Working Capital Fund, Army
97X493002 Defense Working Capital Fund, Navy
97X493003 Defense Working Capital Fund, Air Force
97X493004 Defense Working Capital Fund, Defense Agencies
97X493005 Defense Working Capital Fund, Defense Commissary Agency
97X44179 Reserve Mobilization Income Insurance Fund
21X4528 Army Conventional Ammunition Working Capital Fund *
97X4931 Buildings Maintenance Fund

*Closing after existing orders are completed

**FUNCTIONAL TITLE - DEFENSE-WIDE CONTINGENCIES**

The functional title "Defense-Wide Contingencies" for military functions is defined as comprising the accounts listed below:

97 9912 Other Legislation (including Management Improvements)
97 9918 General Transfer Authority Outlay Allowance

**FUNCTIONAL TITLE - OFFSETTING RECEIPTS**

The functional title "Offsetting Receipts" for military functions is defined as comprising the accounts listed below:

General Fund Proprietary Offsetting Receipts

184000A Offsetting Receipts, Rent of Equipment and Other Personal Property, Army
184000N Offsetting Receipts, Rent of Equipment and Other Personal Property, Navy
184000F Offsetting Receipts, Rent of Equipment and Other Personal Property, Air Force
184000D Offsetting Receipts, Rent of Equipment and Other Personal Property, Defense
246200A Offsetting Receipts, Deposits for Survivors Annuity Benefits, Army
246200N Offsetting Receipts, Deposits for Survivors Annuity Benefits, Navy
246200F Offsetting Receipts, Deposits for Survivors Annuity Benefits, Air Force
246200D Offsetting Receipts, Deposits for Survivors Annuity Benefits, Defense
223600D Sales of Certain Material in National Defense Stockpile
264400D Defense Vessels Transfer Receipt Account
265100D Sale of Scrap and Salvaged Materials, Defense
262100D Sale of Lands, Etc., Mil Post Construction Fund
301900A  Offsetting Receipts, Recoveries for Government Property Lost or Damaged, Army
301900N  Offsetting Receipts, Recoveries for Government Property Lost or Damaged, Navy
301900F  Offsetting Receipts, Recoveries for Government Property Lost or Damaged, Air Force
301900D  Offsetting Receipts, Recoveries for Government Property Lost or Damaged, Defense
304100A  Offsetting Receipts, Recoveries Under FMS Program, Army
304100N  Offsetting Receipts, Recoveries Under FMS Program, Navy
304100F  Offsetting Receipts, Recoveries Under FMS Program, Air Force
304100D  Offsetting Receipts, Recoveries Under FMS Program, Defense
321000A  Offsetting Receipts, General Fund Propriety Receipts, Army
321000N  Offsetting Receipts, General Fund Propriety Receipts, Navy
321000F  Offsetting Receipts, General Fund Propriety Receipts, Air Force

FUNCTIONAL TITLE - TRUST AND TRUST REVOLVING FUNDS

The functional title "Trust Funds" for military functions is defined as comprising the accounts listed below:

21X8063  Ainsworth Library (Trust)
97X8335  Voluntary Separation Incentive Fund
21X8927  Army General Gift Fund
17X8733  USN Academy Gift and Museum Fund
17X8716  Navy General Gift Fund
17X8723  Ships Stores Profit, Navy
57X8928  Air Force General Gift Fund
17X8423  Midshipmen’s Store, USN Academy (Trust Revolving)
57X8418  Air Force Cadet Fund (Trust Revolving)
97X8164  Surcharge Collections, Sales of Commissary Stores, Defense (Trust Revolving)
97X8165  Foreign National Employees Separation Pay, Defense
97X8168  National Security Education Trust Fund, Defense
21X8174  National Science Center Gift Fund, Army
97X8337  Host Nation Support for U.S. Relocation Activities, Defense
97X8163  Department of Defense General Gift Fund
97X8358  Support for U.S. Relocation to Guam Activities

FUNCTIONAL TITLE - INTERFUND TRANSACTIONS

The functional title "Interfund Transactions" for military functions is defined as comprising the accounts listed below:

872310N  Interfund Transactions, Profits from Sales of Ship Stores, Navy
816810D  Interfund Transactions, Payment from General Fund, National Security Education Trust Fund, Defense
816820D  Interfund Transactions, Earnings on Investments, National Security Education Trust Fund, Defense (Non-051)
816830D  Interfund Transactions, Recoveries, National Security Education Trust Fund, Defense
816510D  Interfund Transactions, Employing Agency Contributions, Foreign National Employee Separation Pay, Defense
833510D  Interfund Transactions, Employing Agency Contributions, Voluntary Separation Incentive, Defense
833520D  Interfund Transactions, Earnings on Investments, Voluntary Separation Incentive Trust Fund, Defense (Non-051)
6.4 Functional Titles and Definitions – Other Defense Civil Programs (010604)

**FUNCTIONAL TITLE – OTHER DEFENSE CIVIL PROGRAMS**

The function title “Other Defense Civil Programs” is defined as comprising the accounts listed below:

- 97X8097 Military Retirement Fund
- 97 0040 Payments to Military Retirement Fund, Defense
- 97 0041 Concurrent Receipt Accrual Payments to the Military Retirement Fund
- 97X8098 Education Benefits Fund
- 97X5472 Uniformed Services Retiree Health Care Fund
- 97 0850 Payment to DoD Medicare Eligible
- 21X5095 Wildlife Conservation, etc., Military Reservation, Army
- 17X5095 Wildlife Conservation, etc., Military Reservation, Navy
- 57X5095 Wildlife Conservation, etc., Military Reservation, Air Force
- 21X5285 Department of Defense, Forest Products Program, Army

Trust Fund Receipts and Special Fund Offsetting Receipts include:

- 809710D Employing Agency Contributions, DoD Military Retirement Fund
- 809720D Earnings on Investments, DoD Military Retirement Fund
- 809730D Federal Contribution, DoD Military Retirement Fund
- 809740D Offsetting Receipts, Payment to Military Retirement Fund
- 809810D Employing Agency Contribution, DoD Education Benefits Fund
- 809820D Earnings on Investments, DoD Education Benefits Fund
- 547210D Employing Agency Contributions, DoD Retiree Health Care Fund
- 547220D Earnings on Investment, DoD Retiree Health Care Fund
- 547230D Federal Contribution, DoD Retiree Health Care Fund
- 509510A Sale of Hunting and Fishing Permits, Military Reservations, Army
- 509510N Sale of Hunting and Fishing Permits, Military Reservations, Navy
- 509510F Sale of Hunting and Fishing Permits, Military Reservations, Air Force
- 528510A Reserve Account, Department of Defense, Forest Products Program, Army
7.0 AUTOMATED FUTURE YEARS DEFENSE PROGRAM (FYDP) DATABASES (0107)

7.1 Standard Data Collection System (SDCS) (010701)

7.1.1 Purpose and Objectives.

7.1.1.1. This Section provides for the maintenance of the FYDP. The FYDP is a series of reports that record and display resource decisions made during the biennial Planning, Programming, Budgeting and Execution (PPBE) cycle. The FYDP contains defense resources—people, forces (equipment and organizations), and dollars—categorized by programs and related to the budget’s appropriation structure. The FYDP provides a record of past decisions that assists senior leaders in deciding on future issues such as operations tempo, force structure size and composition, and investment strategies.

7.1.1.2. Data are entered into the FYDP through the SDCS system. SDCS allows all DoD organizations to submit FYDP data electronically, receiving real-time feedback on their inputs. SDCS is a web-based application hosted on the Secret Internet Protocol Router Network (SIPRNet). It allows users to update, correct, and view their organization’s portion of the FYDP.

7.1.1.3. The OUSD (Comptroller) maintains databases consisting of Operation and Maintenance TOA data, Procurement TOA data, RDT&E TOA data and Military Construction TOA data at a more detailed level than used in the FYDP. All DoD organizations reporting FYDP data will submit these appropriations through the OUSD (Comptroller) automated programs databases as outlined in sections 5.2, 5.3, 5.4, and 5.5. The SDCS will rollup these appropriations to the proper level for inclusion in the FYDP report. Formats for Operation and Maintenance TOA, Procurement TOA data, RDT&E TOA data and Military Construction TOA data are the same as required for the automated programs databases, covered in sections 5.2, 5.3, 5.4, and 5.5.

7.1.1.4. Amounts entered for TOA, military endstrength, and civilian Full-Time Equivalents (FTE’s) by Program Element must agree with the amounts submitted for the budget. POM submissions for TOA must adhere to controls established by Fiscal Guidance or other controls as announced in subsequent guidance.

7.1.2. Applicability and Scope.

The provisions of this Section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Combatant Commands and the Defense Agencies/Field Activities (hereafter referred to as “DoD Components”) that contribute data to the FYDP. The Office of the Director, Program Analysis and Evaluation (hereafter referred to as “OD, PA&E”) administers updating and general management of the FYDP. OD, PA&E controls access to SDCS, for the purpose of providing data.
7.1.3. Reporting Requirements.

Updates to the FYDP are required coincident with the (1) Program and Budget Review and (2) the President’s Budget (PB), and (3) for major restructures of the FYDP itself when directed by the OD, PA&E. Specific guidance relative to approved changes, due dates, and special requirements is provided in a memorandum from OD, PA&E announcing each update. In the Program and Budget Review FYDP submissions, acceptable update years are normally limited to the budget years and programming years (generally six years for TOA and manpower, and nine years for forces). In the PB FYDP submission, acceptable update years include the most recent prior year of the budget cycle to the end of the programming cycle (generally eight years for TOA and manpower, and 11 years for forces). Since some appropriations—procurement, RDT&E, and military construction—are authorized for obligation over multiple years, it is periodically necessary to update historical years (the years prior to the first year of a PB FYDP update). Historical changes will be accepted once during the PPBE cycle—usually during the President's Budget FYDP update—but only when explicitly directed by OD, PA&E. These updates enable the FYDP to reflect transfers, rescissions, supplemental appropriations, reappropriations, and other authorized adjustments to total obligational authority, which might occur in multi-year appropriations, as well as to reflect actual accounting data. Particular instructions for conducting historical-year updates will be issued by OD, PA&E as required.

7.1.4. Publication of FYDP Related-Information.

7.1.4.1. Section 221 of Title 10 of the United States Code (U.S.C.) requires that:

7.1.4.2. “The Secretary of Defense shall submit to Congress each year, at or about the time that the President’s budget is submitted to Congress that year under section 1105(a) of title 31, a future-years defense program (including associated annexes [now called "programs"])) reflecting the estimated expenditures and proposed appropriations included in that budget.”

7.1.4.3. In accordance with the U.S.C., OD, PA&E will prepare the President's Budget FYDP Summary and Program Element Detail for transmission to the Congress. In addition, OD PA&E will provide FYDP-related information at all other updates for within DoD. Historical updates, if collected at the time of the President's Budget FYDP update, will be issued with the subsequent PPBE cycle.

7.1.5. Other Databases Related to the FYDP. Consistent with the FYDP are separate but related databases and documents constituting, the Operation and Maintenance Program, the Procurement Program, the RDT&E Program and the Military Construction Program. These databases produce the Operation and Maintenance programs Report (O-1), the Procurement Programs Report (P-1), the RDT&E Programs Report (R-1) and the Military Construction Programs report (C-1). Detailed information regarding these databases is provided in section 5.0. The FYDP Resource Structure Management (RSM) database maintains information about the program elements and other related attributes critical to the production of the FYDP. Detailed information regarding this database is provided in Section 7.2.
7.1.6. **Instructions for Updating the FYDP.**

7.1.6.1. **General.**

7.1.6.1.1. FYDP Forces, Manpower, Military Pay Rates, and remaining appropriations data not elsewhere submitted shall be submitted by DoD Components to the Programming and Fiscal Economics Division, OD, PA&E, over the SIPRNet, as directed.

7.1.6.1.1.1. Operation and Maintenance, Procurement, RDT&E, and Military Construction appropriations data included in the FYDP will be submitted to OUSD (Comptroller) and forwarded to OD, PA&E for inclusion in the FYDP. Reference section 5.0 for further instructions.

7.1.6.1.1.2. All FYDP data provided directly to OD, PA&E will be input into the SDCS system on the SIPRNet. The following file formats may be used to submit data to SDCS. Specific information and examples of these formats may be found on the SDCS web page located on the SIPRNet at https://dpd.pae.osd.smil.mil.

7.1.6.1.1.2.1. Standard ASCII text file, fixed record length, with either single year per row or multiple years per row.

7.1.6.1.1.2.2. Excel spreadsheet file with either single year per row or multiple years per row.

7.1.6.1.2. All resource changes to the data file shall be on a net change basis; that is, data currently in the file shall be revised (plus or minus) by an incremental amount to reflect the new approved position.

7.1.6.1.3. Program element codes and titles, resource identification codes, and DoD Component identifier codes are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook). This publication is available at http://www.dtic.mil/whs/directives under “Publications,” and in approved decision documents posted to the FYDP Resource Structure Management (RSM) web site (see Section 7.2) but not yet reflected in DoD 7045.7-H.

7.1.6.2. Submission of Changes. Changes submitted for net change/add record resource data (Data Format as prescribed in Section 7.1.6.1) must provide specific identification of quantitative resource information by program element, resource identification code, and fiscal year.

7.1.6.3. Military Pay Rates. Submission of each FYDP update should include average annual military pay rates which shall include permanent change of station (PCS) data, rounded to the nearest dollar for each fiscal year for each military personnel end-strength category identified in the FYDP. Pay rates are used in updating the FYDP, and are also a FYDP data end-product in their own right. It is the intent of OD, PA&E to reflect the most accurate pay rates available in each update to the FYDP.
7.2 FYDP Resource Structure Management (RSM) System (010702)

7.2.1. Purpose and Objectives. This section provides for the maintenance of the automated database of the FYDP’s structure, and describes the procedures used for requesting changes to the FYDP’s structure, such as establishing new program element codes and definitions or changing program element titles and definitions. The primary information resource in the DoD for FYDP structure is the FYDP Resource Structure Management (RSM) website https://rsm.pae.osd.mil/RSM located on the SIPRNet.

7.2.2. Applicability and Scope. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Combatant Commands and the Defense Agencies/Field Activities (hereafter referred to as "DoD Components") that contribute data to the FYDP. Updating and general management of the FYDP structure is administered by OD, PA&E.

7.2.3. Reporting Requirements. New program elements must be created when PPBE decisions shift resources among DoD Components or fund new programs. It is the responsibility of the DoD Components and the OUSD (Comptroller), Program/Budget to recommend changes to the FYDP structure via the RSM web site as the need arises. In addition, OUSD (Comptroller), Program/Budget will work with OD, PA&E in the establishment of new TOA Resource Identification Codes (RICs) to coincide with new Treasury Codes created by the Office of Management and Budget, or as otherwise required by PPBE decisions.

7.2.4. Update and Publication of FYDP Structure Management Handbook, DoD 7045.7-H. DoD 7045.7-H will be revised periodically (typically two times a year or with each update of the FYDP), as specified in DoDI 7045.7, Implementation of the Planning, Programming, and Budgeting System (PPBS), May 23, 1984. The RSM and DefenseLink web site will contain the most recent version to 7045.7-H, updated to reflect the Program and Budget Review, and President’s Budget phases of the PPBE. FYDP Structure Coordination Documents (which are approved and placed on the RSM web site) should be used to supplement the most recent version of DoD 7045.7-H; they reflect the latest approved changes to the FYDP’s structure.

7.2.5. Other Databases Related to RSM. The FYDP report, which is managed by OD, PA&E and updated by the components via the SDCS system, is referenced in Section 7.1. The Operation and Maintenance Program, the Procurement Program, the RDT&E Program and the Military Construction Program are referenced in Section 5.0.

7.2.6. Instructions for Making Changes to the FYDP Structure on RSM. Requests for changes to the FYDP's program structure, such as establishing new program element codes and definitions or clarifying program element titles and definitions, shall be submitted to OD, PA&E for coordination with the DoD Components. The primary instrument for submitting change requests is the RSM web site. The RSM web site provides instructions for formatting and submitting change requests. Each DoD Component has a designated representative authorized to submit change requests. Coordination cycles run continually throughout the year. Approved changes are reported periodically in the FYDP Structure Coordination Documents. These
documents are posted on the RSM web site, and the approved structure changes are incorporated in the RSM database.

8.0 AUTOMATED BUDGET, INTELLIGENCE, AND RELATED DATABASE (BIRD) (0108)

The Budget, Intelligence, and Related database (BIRD) maintained by OUSD(I) is the most complete, automated source of resource data for Intelligence and related activities for use by the Office of the Secretary of Defense and the Joint Staff. The BIRD database is essential to the preparation of the Military Intelligence Program (MIP) justification books. It facilitates functional analyses for OSD and the Joint Staff, and is compatible with the NIP resources database used by the Director of National Intelligence. It is also fully consistent with data contained in the FYDP, R&D and Procurement Annexes, and budget databases, and is electronically matched to relevant data in these databases prior to use. OUSD(I) collects MIP narrative data to support Program Budget Review and publication of the MIP Congressional Justification Book (CJB). Specific instructions for the update of the BIRD database are contained in Chapter 16, Volume 2B.

9.0 SELECT AND NATIVE PROGRAMMING (SNaP) DATA INPUT SYSTEM (0109)

Basic guidance for input through SNaP of programming detail data and selected budget exhibits for joint use of the program and budget review.

9.1 Select and Native Programming (SNaP) Data Collection System (010901)

9.1.1. Purpose. This section provides the instructions for electronic submission of all programming detail data; and certain budget data requirements that have been combined with the corollary programming requirement. The combined program/budget requirements are identified in the FMR issued by the OUSD (Comptroller), and the Programming and Budgeting Data Requirements (PBDR) instruction issued by the Office of the Director, Program Analysis and Evaluation, (OD, PA&E). SNaP is a web based data collection and review system designed to collect and validate designated data for the combined Program and Budget review, and in some cases it is used to update the program and budget detail for the President’s Budget. SNaP is available on the SIPPNet at https://SNaP.pae.osd.smil.mil; and the unclassified NIPRNet at https://SNaP.pae.osd.mil.
9.1.2. Applicability and Scope. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, the Combatant Commands, and the Defense Agencies/Field Activities (hereafter referred to as “DoD Components”) that provide either a POM or a Budget to OSD. Updating and general management of the data collected through SNaP is administered by the OD, PA&E. OD, PA&E, Program Resources and Information Systems Management (PRISM) Division controls access to SNaP, for the purpose of submitting data.

9.1.3. Reporting Requirements. Updates to SNaP are required coincident with the Program and Budget Review, and for some requirements the President’s Budget (PB). Specific guidance relative to approved changes, due dates, and special requirements is provided in a memorandum announcing each update. In all submissions, acceptable update years may include the two most recent prior years of the budget cycle to the end of the programming cycle (generally nine years for TOA and manpower, and 12 years for forces).

9.1.4. Instructions for submitting designated programming and budgeting data in SNaP.

9.1.4.1. System and Software Requirements. To interface with SNaP, users must have access to the NIPRNet and the SIPRNet (if the DoD Components’ submission is classified). Windows 95 or higher, and either the Microsoft Internet Explorer 4.x or Netscape Communicator 4.x or higher browser. All narrative files must be in Microsoft Word format. Any supporting files such as the cover letter or executive summary must be in Microsoft Word, Excel, or PowerPoint.

9.1.4.2. Submission. SNaP will be available through password and user id to all those designated by the Primary Point of Contact (POC) from your organization. You may submit, edit, and share your data with other members of your organization for a set period of time prior to the Program/Budget due date. Once your data requirements are complete, (or by the due date) the Primary POC for your organization is responsible for making the submission official. This action is completed on-line.

9.1.4.3. Your work-in-progress. Your work-in-progress is only available to your organization. Programming and Budgeting Data requiring edits after the official due date will occur through permission granted by the system administrator.

9.1.4.4. Preparing Data Structure and Format. SNaP provides preformatted Microsoft Excel data files and on-line standard formats to assist you in building your data submission. Wherever possible you are given a standard option menu to describe the data you are providing. Each SNaP data requirement outlined in the PBDR and FMR identifies the data elements, and provides data definitions, instructions and business rules that will assist you in filling out the data tables accurately. All required narrative is submitted as Microsoft Word documents, unless an alternative is specified in the specific data requirement.

9.1.4.5. Each of the data requirements collected. SNaP has specific formats that will be used throughout this information management process. Use of the pre-formatted data tables and on-line upload minimizes error. Data ownership is created as soon as you log in and upload a file or submit data on-line.
9.1.4.6. **Review & Edit.** SNaP validates and verifies the information and rejects incorrect records. A transaction summary is available for each batch upload submitted and an instant message is provided for each on-line transaction. Once data is submitted it is instantly available for review in the format in which it will be displayed. This may include any necessary data calculations or regroupings. Users can go back and edit any part of their submission prior to official submission, and other members of the organization can also review it.

9.1.4.7. **Final Displays.** Official Program/Budget submissions through SNaP are available for the Program and Budget Review in the password protected Defense Programming Database Warehouse (DPD DW).

10.0 **GENERAL GUIDANCE SUBMISSION FORMATS (0110)**

10.1 **Purpose (011001)**

The formats provided on the following pages reflect guidance presented in previous sections. Unless modified in a submission budget call, these formats should be adhered to.

10.2 **Exhibits in Support of Section 3.0 – Program and Budget Review Submission (011002)**

- Exhibit PB-1A. Fiscal Guidance Track ................................................................. 163

1. Must be identified by appropriation and totals must agree with PB-14.
2. Use of this entry must be fully explained. Use “Other” to identify Military Personnel Appropriations.
3. Totals must agree with TOA in PB-1 Exhibit. Totals should be separately displayed by Appropriation.
4. This exhibit not required for President’s Budget submission.
Exhibit PB-3. Reprogramming/Transfers Between Appropriations

FY CY REPROGRAMMING/TRANSFERS BETWEEN APPROPRIATIONS
FY BV Program and Budget Review Submission

Component: ____________________________

PROPOSED REPROGRAMMING INCREASES*:

Appropriation

Program (Identify each program by P-1, R-1, O-1, M-1, C-1 line item. For Procurement programs identify the applicable quantities; for the RDT&E programs identify the applicable project; for personnel programs include military and civilian end strength, military average strength, and civilian full-time equivalents; for O&M programs include applicable force data, etc.)

Justification for Increase: Provide a detailed explanation as to why the increase is required and include an impact statement on the program if reprogramming is not approved.

- **Military**: Pay, Earnings, and other benefits for military personnel.
- **Civilian**: Pay, Earnings, and other benefits for civilian personnel.
- **Other**: Any other supplemental budget authority.

#### Instructions

- **Column (1)**: Stub lines will be the same as those on Exhibit PB-1 on a budget basis. Three lines of data (BA, outlays and military/civilian personnel impacts) are required for each account included in the supplemental proposal.

- **Column (2)**: The dollar amounts in this column for BA and outlays must agree with FY 20CY amounts submitted in the automated Comptroller Information System (CIS) database for the Program and budget review submission. Likewise, civilian FTE and Military E/S data must agree with amounts reported in the Component’s automated CIS for the Program and budget review submission.
Exhibit PB-8. FY 20CY Supplemental Appropriation Requirements (Continued)

Columns (3), (4) and (5): Show supplemental requirements (BA, military E/S, and civilian FTE) by program.
Column (6): Represents the sum of Columns (3), (4) and (5). The BA, outlay, military E/S and civilian FTE amounts in these columns represent the total supplemental request impacting FY 20CY.

</tbody>
</table>

**Notes:**
- ES = Military end-strengths
- FTE = Civilian full time equivalents
- $ = Dollars in thousands
The following instructions apply to all appropriations and funds:

Indicate in the heading the name of the submitting component, subject, date, and component submission control number. Leave "USD (Comptroller) Serial No." blank.

Column (1): List the appropriation or fund and the Budget Subactivity Number. For the procurement appropriations, P-1 line items will be shown. For the RDT&E appropriations, program elements will be shown.

Columns (2), (3) and (4): List the TOA changes. If there are also changes in financing adjustments, show these separately and then show the change in budget authority. The military personnel amount to be used here will be the sum of the products of the workyears/$ rates shown to the right, using the standard rate.

Column (5): List the military or civilian personnel categories affected by the change. Military personnel change will be in end-strength (E/S) and civilian personnel change in full time equivalent (FTE). Use the categories illustrated in Exhibit PB-4.

Columns (6), (7), (9), (10), (12) and (13): List the military end strength and workyear changes, by activity. Likewise, list civilian FTE changes by activity.

Columns (8), (11) and (14): Show the average salary at which these changes were priced.

If there are no personnel changes, Columns (5) through (14) will be left blank.

Show a total for increases and decreases.

The outyear impact of the additional budget submission will be included at the end of Exhibit PB-10. This will show the net change by appropriation budget subactivity number for each of the applicable outyears.

Narrative justification must also accompany Exhibit PB-10.

AGM-69B SRAM. Deletes the $xx,xxx,xxx FY BY requirement. Due to the recent evolution of the Air Launch Cruise Missile (ALCM) as an effect weapon system and the continued ability to use the B-52 bomber well into the 1980’s, the President directed the B-1 production be halted. With the decision to not deploy the B-1, the Air Force requirement for the SRAM-B which was to be used on the B-1 is no longer valid.

Air Launched Cruise Missile. The Air Launched Cruise Missile (ALCM) is an aerodynamic air-to-ground strategic missile propelled by a turbo-fan engine. It has a high degree of accuracy through the combination of inertial guidance and terrain correlation update. The missile is designed to be carried internally and/or externally on the B-52. The ALCM is to be employed from a stand-off position against a wide variety of pre-selected lightly or undefended ground hard targets. This budget amendment requests an additional $xx,xxx,xxx to accelerate the ALCM Initial Operating Capability (IOC).

The attached transcript of testimony is forwarded for editorial and security review in accordance with DoD Directive 5400.4. To meet committee requirements and allow time for final review by the Directorate for Freedom of Information and Security Review, OASD(PA), your action must be completed as indicated. Each element in the review process must give cooperative consideration to the time requirements of all elements in meeting due out dates. An advance copy of this DD Form has been sent to DFOISR, OASD(PA).

GUIDELINES

I. SECURITY

A. GENERAL. Review must be accomplished by officials competent to judge the security aspects of the subjects involved and to provide a consistent and defensible security position.

B. MARKING
   1. Use black lead pencil.
   2. Enclose with brackets [ ] information to be deleted.
   3. Make deletions as limited as possible, considering whether the total context may contain clues to the information deleted.

II. EDITORIAL

A. GENERAL. Edit to correct inaccuracies.

B. MARKING.
   1. Use black lead pencil.
   2. Line through all words or figures for which substitute language or figures are entered. Do not use brackets.
   3. Print or write all entries legibly.
   4. Use standard proofreaders markings.
   5. Do not change statements by committee members. Note inaccuracies in the margin.

CHAPTER 2

MILITARY PERSONNEL APPROPRIATIONS

1.0 GENERAL (0201)

1.1 Purpose (020101)

1.1.1. This Chapter prescribes the justification materials required for the Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations for both the Active and the Reserve Forces to support the program and budget review submission and the presentation of the President’s budget submission to the Congress.

1.1.2. The following appropriations and accounts are covered:

1.1.2.1. In Section 2.0: Active Personnel, Army, Navy, Marine Corps, Air Force and Medicare-Eligible Retiree Health Fund Contribution, Army, Navy, Marine Corps, Air Force.

1.1.2.3. In Section 4.0: Military Personnel Retirement Requirements.

1.1.2.4. In Section 5.0: Military Retirement Fund, Education Benefits Fund, and Retiree Health Care Fund.

1.1.3. Fund requirements for the Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations will be presented using the budget and fiscal accounting classifications as set forth below in sections 2.0 and 3.0. Program and Budget estimates will be based upon approved military personnel/strength programs as contained in the exhibits required in this Chapter, and in accordance with such special instructions as may be issued by the Office of the Under Secretary of Defense (P&R) as part of the call for the services’ military strength programs.

1.1.4. Budgeting for Inflation. Anticipated inflation will be included in the Program and Budget Review Submission for clothing, subsistence-in-kind, basic allowances for housing and subsistence, the commercial portions of permanent change of station travel, and temporary lodging allowances overseas. The inflation rates to be used will be based upon approved price escalation indices provided as an enclosure to the annual FY 20CY revised and FY 20BY Program and Budget Review Guidance memorandum.
2.0 ACTIVE MILITARY PERSONNEL AND MEDICARE-ELIGIBLE RETIREE HEALTH FUND CONTRIBUTION APPROPRIATIONS (0202)

2.1. General (020201)

2.1.1. The purpose of this section is to provide general information applicable to the Active Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations including funding policies, classifications, and definitions unique to these accounts. Generic policies and requirements are addressed in Volume 2A, Chapter 1. The Military Components should consult all of the other chapters for exhibit requirements that are not specifically addressed in this chapter including the Other Special Analysis chapter (See Volume 2A, Chapter 1 and Volume 2B, Chapter 19).

2.1.2. This section provides the budget and fiscal accounting classifications for the military personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of Title 10, United States Code (U.S.C.), section 115. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification, which shall be used on a uniform basis for the military personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds for the Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations.

*2.2 Uniform Budget and Fiscal Accounting Classification (020202)

2.2.1. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in paragraph 1.1, above. Variations in the activity and subactivity classification and titles shall not be made, except that additional accounts consistent with this budget and accounting classification may be established in order to meet administration requirements of the various elements of the Military Departments. The scope of each account is described below.

2.2.2. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and the same sequence and will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

2.2.3. Chart of Accounts - The chart of accounts that follows represents a summary of the accounting and reporting structure under the Active Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations. However, for purposes of presentation of budget estimates, as distinguished from monthly reporting, additional statistical breakdown will be required as shown in paragraph 2.3, below.

BA/BSA – Medicare-Eligible Retiree Health Fund Contribution Appropriations

1    Officers
2    Enlisted

a/  Proper coding will be assigned to each Military Department in accordance with fiscal
codes for all appropriation activities.

2.2.4. Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions are
provided on the following pages.

2.2.5. Object Classification - The object classifications that follow the Chart of Accounts
Budget Activities and Subactivities Definitions/Descriptions shall be the official classifications for
use in preparing budget estimates, accounting for budgetary and financial transactions, and in
submitting reports on the applicable appropriation accounts.

BA/BSA – Active Military Personnel Appropriations

1.  Pay and Allowances of Officers - For the pay and allowances authorized by law to be paid
to officers, including commissioned and warrant of the Regular Forces and officers of the Reserve
Components on extended active duty. In accordance with the provisions of 31 U.S.C. 371(b),
officers may not receive a bonus or incentive pay under both subchapter I and subchapter II of
Chapter 5 of title 37, USC (37 U.S.C. §§301-330 and 31 U.S.C. §§331-355, respectively) for the
same activity, skill, or period of service.

1-A.  Basic Pay: For basic compensation of officers, including length of service increments,
under provisions of Title 37, United States Code (U.S.C.), sections 201, 203 and 205.

1-B.  Retired Pay Accrual: For the Department of Defense’s Contribution to its Military
Retirement Fund under provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be
precisely the specified percent of basic pay. Retired pay accrual does not apply to academy cadets
or midshipmen.

1-C.  Thrift Savings Plan (TSP) Matching Contributions: For the Department of Defense’s
contribution to the Thrift Savings Fund for the benefit of the member under provisions of
5 U.S.C. 8432. For those member’s participating in the blended retirement plan, the amount
contributed shall not be more than 5 percent of the member’s basic pay for such pay period.

1-D-1. Incentive Pay for Hazardous Duty: For pay of officers for performance of hazardous duty required by competent authority under provisions of 37 U.S.C. 301 or 37 U.S.C. 351. Includes:

   a. Duty as a crew member as determined by the Secretary concerned, involving frequent and regular participation in aerial flight.
   
   b. Duty involving frequent and regular participation in aerial flights not as a crew member pursuant to paragraph a, above.
   
   c. Duty involving parachute jumping as an essential part of military duty.
   
   d. Duty involving the demolition of explosives as a primary duty, including training for such duty.
   
   e. Duty inside a high or low pressure chamber.
   
   f. Duty as a human acceleration or deceleration experimental subject.
   
   g. Duty as human test subject in thermal stress experiments.
   
   h. Duty involving frequent and regular participation in flight operations on the flight deck of an aircraft carrier or of a ship other than an aircraft carrier from which aircraft are launched.
   
   i. Duty involving service as an air weapons controller.
   
   j. Duty involving use of toxic fuel or waste.
   
   k. Duty involving highly toxic pesticides or live, hazardous organisms.
   
   l. Duty involving visit, board, search and seizure.

1-D-2. Incentive and Special Pay for Aviation Career Duty: For pay of officers for performance of aviation duty required by competent authority under provisions of 37 USC 301a, 301b, and 334. Includes:

   a. For the frequent and regular performance of operational or proficiency flying duty required by orders.
   
   b. For the written agreement to remain on active duty in aviation service for at least 1 year in an aviation specialty designated as critical.

1-D-3. Incentive Pay for Submarine Duty: For pay of officers for performance of duty required by competent authority under provision of 37 USC 301c. while attached under competent orders to a submarine, while serving as an operator or crew member of an operational submersible (including an undersea exploration or research vehicle), while undergoing training preliminary to assignment to a nuclear-powered submarine, while undergoing rehabilitation after assignment to a nuclear-powered submarine, or, in the case of a member qualified in submarines, while
attached as a member of a submarine operational command staff whose duties require serving on a submarine during underway operations.

1-E. Special Pay: For special and incentive pay to officers on active duty as physicians, dentists, optometrists, pharmacists, veterinarians, nurses and psychologists under the provisions of 37 U.S.C. 301d, 301e, 302, 302a, 302b, 302c, 302c-1, 302d, 302e, 302h, 302i, 302j, 302k, 302l, 303, and 335; certain designated officers in positions of unusual responsibility which are of a critical nature to the Service concerned under provisions of 37 U.S.C. 306; officers on duty subject to hostile fire or imminent danger under provisions of 37 U.S.C. 310 or 37 U.S.C. 351; personal money allowance to certain Generals and Admirals under provisions of 37 U.S.C. 414; for diving duty pay under the provisions of 37 U.S.C. 304; for hardship duty pay while assigned to locations or duties designated by the Secretary of Defense under the provisions of 37 U.S.C. 305; for career sea pay under the provisions of 37 U.S.C. 305a; for nuclear officer incentive pay under the provisions of 37 U.S.C. 312, 312b, 312c, or 333; for members extending duty at designated overseas locations under the provisions of 37 U.S.C. 314; for engineering and scientific duty performed by officers under the provisions of 37 U.S.C. 315; for foreign language proficiency under the provisions of 37 U.S.C. 316 or 353; for special warfare officers extending period of active duty under the provisions of 37 U.S.C. 318; for surface warfare continuation pay under the provisions of 37 U.S.C. 319; for judge advocate continuation pay under the provisions of 37 U.S.C. 321; for assignment incentive pay under the provisions of 37 U.S.C. 307a or 352; for skill incentive pay or skill proficiency bonus under the provisions of 37 U.S.C. 353; for retention incentives for members qualified in critical military skills under the provisions of 37 U.S.C. 332 or 355; for accession bonus for new officers in critical skills under the provisions of 37 U.S.C. 324, 330, 332, or 336; for incentive bonuses to transfer between armed forces under the provisions of 37 U.S.C. 327 or 332; for continuation of pays during hospitalization and rehabilitation under the provisions of 37 U.S.C. 372; and for continuation pay authorized under the provisions of 37 U.S.C. 356.

1-F. Basic Allowance for Housing: For housing allowances payable to officers under the provisions of 37 U.S.C. 403. BAH is comprised of BAH-Domestic and BAH-Overseas.

1-G. Basic Allowance for Subsistence: For subsistence allowances payable to officers under the provisions of 37 U.S.C. 402.

1-H. Station Allowances, Overseas: For per diem allowances payable to officers stationed outside the Continental United States or in Hawaii or Alaska based on cost of living for members stationed outside the United States as prescribed by Joint Federal Travel Regulations and authorized under the provisions of 37 U.S.C. 475.

1-I. CONUS Cost of Living Allowance: For payments to eligible officers assigned to high cost areas under the provisions of 37 U.S.C. 403b.

1-J. Clothing Allowances: For payments to officers for purchase of required uniform under the provisions of 37 U.S.C. 415 - 419

1-K. Family Separation Allowances: For family separation allowances payable to officers under the provision of 37 U.S.C. 427.

1-L. Separation Payments:

a. For payments to officers for accumulated annual leave under the provisions of 37 U.S.C. 501.
b. For severance pay to officers, including elimination severance pay to officers not eligible for retirement under any provision of law on the date of elimination by promotion list passover, under the provisions of 10 U.S.C. 1174; elimination severance pay for cause under the provisions of 10 U.S.C. 1181; disability severance pay under the provisions of 10 U.S.C. 1212.

c. For lump sum readjustment payments to Reserve officers under the provisions of 10 U.S.C. 12312.

d. Voluntary Separation Incentive (VSI) - For payment of an annuity to officers voluntarily separating from active duty during the drawdown under the provisions of 10 U.S.C. 1175.

e. Voluntary Separation Pay (VSP) – For a lump sum payment to officers who have served on active duty or full-time National Guard duty for more than 6 years but not more than 12 years and voluntarily separate under the provisions of 10 U.S.C. 1175a.

f. Special Separation Benefit (SSB) - For a lump sum payment to officers separating from active duty during the drawdown under the provisions of 10 U.S.C. 1174a.

g. Temporary Early Retirement Authority (TERA) - For payment of retired pay to selected active duty officers who retire with between 15 and 20 years of service under the provisions of 10 U.S.C. 1293, 3911, 3914, 6323, 6330, 8911 and 8914. Section 504(b) of the FY 2012 National Defense Authorization Act (NDAA), P.L. 112-81, reinstates temporary retirement authorities in section 4403 of the FY 1993 NDAA (P.L. 102-484) from fiscal year 2012 to December 31, 2018.

h. $30,000 Lump Sum Bonus – For payment to service members who entered the uniformed service on or after August 1, 1986, who opt to retire under the Redux retirement plan (40 percent retirement benefit at 20 years of service with partial COLA) under the provisions of 37 U.S.C. 354.

1 -M. Special Compensation for Assistance with Activities of Daily Living – Officer: For payment of monthly compensation to an officer with catastrophic injuries or illnesses requiring assistance in everyday living under the terms and conditions specified by 37 U.S.C. 439.

1 -N. Social Security Tax Employer’s Contribution: For payment of tax of employer to Social Security Administration as provided by Federal Insurance Contributions Act (FICA).

2. Pay and Allowances of Enlisted Personnel - For the pay and allowances authorized by law to be paid to enlisted personnel of the Regular forces and enlisted members of the Reserve Components on extended active duty. In accordance with the provisions of 31 U.S.C. 371(b), enlisted members may not receive a bonus or incentive pay under both subchapter I and subchapter II of Chapter 5 of title 37, USC (37 U.S.C. §§301-330 and 31 U.S.C. §§331-355, respectively) for the same activity, skill, or period of service.

2 -A. Basic Pay: For basic compensation of enlisted personnel, including length of service increments, under the provisions of 37 U.S.C. 201, 203 and 205.

2 -B. Retired Pay Accrual: For the Department of Defense’s Contribution to its Military Retirement Fund, under provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.
2-C. Thrift Savings Plan (TSP) Matching Contributions: For the Department of Defense’s contribution to the Thrift Savings Fund for the benefit of the member under provisions of 5 U.S.C. 8432. For those member’s participating in the blended retirement plan, the amount contributed shall not be more than 5 percent of the member’s basic pay for such pay period.

2-D-1. Incentive Pay for Hazardous Duty: For pay of enlisted personnel for performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 and 37 U.S.C. 351. Includes:

a. Duty as a crew member as determined by the Secretary concerned, involving frequent and regular participation in aerial flight.

b. Duty involving frequent and regular participation in aerial flights not as a crew member pursuant to paragraph a, above.

c. Duty involving parachute jumping as an essential part of military duty.

d. Duty involving the demolition of explosives as a primary duty, including training for such duty.

e. Duty inside a high or low pressure chamber.

f. Duty as a human acceleration or deceleration experimental subject.

g. Duty as human test subject in thermal stress experiments.

h. Duty involving frequent and regular participation in flight operations on the flight deck of an aircraft carrier or of a ship other than an aircraft carrier from which aircraft are launched.

i. Duty involving service as an air weapons controller.

j. Duty involving use of toxic fuel or waste.

k. Duty involving highly toxic pesticides or live, hazardous organisms.

l. Duty involving Visit, Board, Search and Seizure.

2-D-2. Career Enlisted Flyer Incentive Pay: For career enlisted flyer pay under the provisions of 37 U.S.C. 320. To be paid to an enlisted member of the armed forces who holds an enlisted military occupational specialty or enlisted military rating designated as career enlisted flyer specialty or rating by the Secretary concerned, performs duty as a dropsonde system operator, or is in training leading to qualification and designation of such a specialty or rating or the performance of such duty and meets the other requirements as designated in 37 U.S.C. 320 or 353 outlined in DoD Instruction 7730.67.

2-D-3. Incentive Pay for Submarine Duty: For enlisted submarine pay under provision of 37 USC 301c. for performance of duty while attached under competent orders to a submarine, while serving as an operator or crew member of an operational submersible (including an undersea exploration or research vehicle), while undergoing training preliminary to assignment to a nuclear-powered submarine, while undergoing rehabilitation after assignment to a nuclear-powered submarine, or, in the case of a member qualified in submarines, while attached as a member of a submarine operational command staff whose duties require serving on a submarine during underway operations.
2-E. Special Pay: For hardship duty pay while assigned to locations or duties designated by the Secretary of Defense under the provisions of 37 U.S.C. 305; for career sea pay under the provisions of 37 U.S.C. 305a; for diving duty pay under the provisions of 37 U.S.C. 304; for assignment incentive pay under the provisions of 37 U.S.C. 307a; for duty subject to hostile fire or imminent danger under the provisions of 37 U.S.C. 310 or 37 U.S.C. 351; for nuclear-trained and qualified, and for nuclear career accession and annual incentive bonuses under the provisions of 37 U.S.C. 312b; for qualified enlisted members extending duty at designated locations overseas under the provisions of 37 U.S.C. 314; for foreign language proficiency under the provisions of 37 U.S.C. 316 or 353; for retention incentives for members qualified in a critical military skill under the provisions of 37 U.S.C. 355; for conversion to military occupational specialty to ease personnel shortage under the provisions of 37 U.S.C. 326; for transfer between armed forces under the provisions of 37 U.S.C. 327; for continuation of pays during hospitalization and rehabilitation under the provisions of 37 U.S.C. 372; and for continuation pay authorized under the provisions of 37 U.S.C. 356.

2-F. Special Duty Assignment Pay: For pay to enlisted personnel for possessing special proficiency in a military skill, under the provisions of 37 U.S.C. 307 or 352.

2-G. Reenlistment Bonus: For payment to enlisted personnel of a bonus for reenlistment, under the provisions of 37 U.S.C. 308 or 331.

2-H. Enlistment Bonus: For payment to enlisted personnel of a bonus for enlistment (or extension) in a skill designated as critical, in accordance with the provisions of 37 U.S.C. 309 or 331.

2-I. Education Benefits: For payment to the Department of Defense Education Benefits Fund, a trust fund, in accordance with 38 U.S.C. Chapter 30. This program funds the additional and supplemental benefit payments above a basic benefit (the Montgomery GI Bill) to be budgeted by the Department of Veteran Affairs (DVA). The program is budgeted on an accrual basis by the Department of Defense.

2-J. Loan Repayment Program: For payment to enlisted personnel to repay education loans, in accordance with the provisions of 10 U.S.C. 2171.

2-K. Basic Allowance for Housing: For housing allowances payable to enlisted personnel under the provisions of 37 U.S.C. 403. BAH is comprised of BAH-Domestic and BAH-Overseas.

2-L. Station Allowances, Overseas: For per diem allowances payable to enlisted personnel stationed outside the United States or in Hawaii or Alaska based on cost of living for members stationed outside the Continental United States as prescribed by Joint Federal Travel Regulations and authorized under the provisions of 37 U.S.C. 475.

2-M. CONUS Cost of Living Allowance: For payments to eligible members assigned to high cost areas under the provisions of 37 U.S.C. section 403b.

2-N. Clothing Allowances: For payment to enlisted personnel of cash allowance for purchase of prescribed clothing, for cost of clothing issued in kind, and for cash payment of maintenance allowances for clothing under the provisions of 37 U.S.C. 418. (Excludes replacement of clothing lost, damaged, or destroyed.)

2 -P. Separation Payments:

   a. For payments to enlisted personnel for accumulated unused annual leave under the provisions of 37 U.S.C. 501.

   b. For severance pay to enlisted personnel who are denied retention or continuation for non-disability reasons under the provisions of 10 U.S.C. 1174; for disability severance pay under the provisions of 10 U.S.C. 1212.

   c. For authorized donations for discharge under certain conditions under the provisions of 10 U.S.C. 1048.

   d. Voluntary Separation Incentive (VSI) - For payment of an annuity to enlisted members voluntarily separating from active duty under the provisions of 10 U.S.C. 1175.

   e. Special Separation Benefit (SSB) - For a lump sum payment to enlisted members separating from active duty under the provisions of 10 U.S.C. 1174a.

   f. Temporary Early Retirement Authority (TERA) - For payment of retired pay to selected active duty enlisted members who retire with between 15 and 20 years of service under the provisions of 10 U.S.C. 1293, 3911, 3914, 6323, 6330, 8911 and 8914. Section 504(b) of the FY 2012 National Defense Authorization Act (NDAA), P.L. 112-81, reinstates temporary retirement authorities in section 4403 of the FY 1993 NDAA (P.L. 102-484) from fiscal year 2012 to December 31, 2018.

   g. $30,000 Lump Sum Bonus – For payment to service members who entered the uniformed service on or after August 1, 1986 who opt to retire under the Redux retirement plan (40 percent retirement benefit at 20 years of service with partial COLA) under the provisions of 37 U.S.C. 354.

2 -Q. Special Compensation for Assistance with Activities of Daily Living – Enlisted: For payment of monthly compensation to an enlisted service member with catastrophic injuries or illnesses requiring assistance in everyday living under the terms and conditions specified by 37 U.S.C. 439.

2 -R. Social Security Tax - Employer’s Contribution: For payment of tax on employer to Social Security Administration as provided by Federal Insurance Contributions Act (FICA).

3. Pay and Allowances of Cadets and Midshipmen - For the pay and allowances of cadets and midshipmen at the United States Military Academy, United States Naval Academy, and the United States Air Force Academy.

3 -A. Academy Cadets and Midshipmen: For basic pay, commuted ration allowance, and employer’s share of FICA tax for cadets and midshipmen appointed to the United States Military Academy, United States Naval Academy, and United States Air Force Academy, under the provisions of 37 U.S.C. 203 and 422.

   a. For payment of nuclear accession bonus under the provisions of 37 U.S.C. 312b.

   b. For the difference between the value of the commuted ration allowance and the cost of operational rations.
4. **Subsistence of Enlisted Personnel** - For the payment of authorized basic allowances for subsistence to enlisted personnel and for the cost of procuring food and beverage supplies for issue as rations to enlisted personnel on extended active duty, including emergency and operational rations; also includes the payment of meals furnished under contract (when approved by competent authority) at commercial facilities where the payment of commuted rations would create an individual hardship and/or the costs for establishment of a Government mess facility are prohibitive or the contract feeding of enlisted personnel is determined to be more economical or advantageous.

4-A. **Basic Allowance for Subsistence:** For subsistence allowances payable to enlisted personnel under the provisions of 37 U.S.C. 402.

4-B. **Subsistence in Kind:** For cost of subsistence issued as rations to enlisted personnel, including emergency and operational rations, and for payment of meals furnished under contract by commercial facilities under the provisions of 10 U.S.C. 4561, 6081 and 9561.

4-C. **Family Subsistence Supplemental Allowance (FSSA):** For members eligible for food stamps, a supplemental allowance is provided not to exceed $500 per month under the provisions of 37 U.S.C. 402a.

5. **Permanent Change of Station (PCS) Travel** - For expenses incident to permanent change of station travel of military personnel, individually or as part of organized units. The PCS travel costs include mileage; monetary allowance in lieu of transportation; transportation by common carrier (rail, bus, air, or water, including Air Mobility Command and Military Sealift Command); per diem allowances, actual and necessary expenses and cost of subsistence while in a PCS travel status; issue of meal tickets in lieu of subsistence; temporary lodging expense; travel of dependents and transportation of baggage and household goods, port handling charges for personnel, their household goods, baggage and privately owned automobiles passing through CONUS MTMC terminals; payments of dislocation allowances; authorized transportation of dependents and personal and household effects of deceased military personnel; costs of contract packing, crating, handling and temporary storage of household goods; cost of non-temporary storage of household goods; cost of trailer allowances; travel incident to organizational movements on permanent change of station whether for training or non-training purposes; expenses incident to PCS movement of any military group traveling under one order from the same point of origin to the same destination; minor supplies and services incident to troop or organizational PCS movements; expenses and allowances incident to separation travel, discharge or release. Also included are all authorized Temporary Duty Travel directly related to and an integral part of PCS movement of individuals or organizational units. Excludes Temporary Duty Travel other than that directly related to and an integral part of PCS movements. All authorized PCS travel expenses provided for under this budget program account shall be charged to the same subprogram account cited in PCS travel order of the military member. The term “CONUS” (Continental United States) referred to herein applies to the United States Territory, “including the adjacent territorial waters located within the North American Continent between Canada and Mexico.”

5-A. **Accession Travel:**

   a. **Officers.** Covers PCS movements of (1) officers appointed to a commissioned grade from civil life, military academies or ROTC/NROTC, Reserve and National Guard officers called or recalled to extended active duty from home or a point where orders were received to first permanent duty station or training school of 20 weeks or more duration and (2) officers or warrant officers appointed or recalled from enlisted status from station where they served as enlisted to new permanent duty station or training school of 20 weeks or more duration. (Includes officers appointed from enlisted status upon graduation from Officer Candidate School (OCS), Officer Training School (OTS), or basic flying training.) (Marine Corps basic military training for officers
will be a part of an accession move; this is the only exception to the 20-week rule.)

b. **Enlisted.** Covers PCS movements of (1) enlistees, reenlistees, and prior service personnel from recruiting station or place of enlistment to first permanent duty station or training school of 20 weeks or more duration and (2) recalled enlisted reservists from home to first permanent duty station or training school of 20 weeks or more.

c. **Cadets and Midshipmen.** Covers PCS movements of (1) individuals selected as academy cadets or midshipmen upon entry into the academies and (2) individuals who travel to the academies but fail to pass the entrance physical examinations and are required to return home.

5 -B. Training Travel:

a. **Officers.** Covers PCS movements of (1) officers and warrant officers from previous CONUS permanent duty station to formal service or civilian schools, including technical schools, flying training schools, factory training, and other approved courses of instruction of 20 weeks’ duration or more; and (2) officer and warrant officer school graduates and eliminates from school to their next permanent CONUS duty station. (Excludes academy graduates, OCS or OTC graduates, flying training graduates, ROTC graduates and others chargeable to Accession Travel.)

b. **Enlisted.** Covers PCS movements of (1) enlisted personnel from previous CONUS permanent duty station to formal service or civilian schools, including technical schools, flying training schools, factory training, and other approved courses of instruction, of 20 weeks duration or more; (2) enlisted school graduates and eliminates from school to their next CONUS permanent duty station; and (3) enlisted personnel ordered to training leading to a commission if such training period is of 20 weeks duration or more.

5 -C. Operational Travel: Between Duty Stations (within CONUS and within Overseas):

a. **Officers.** Covers PCS movements of (1) officers, and warrant officers to and from permanent duty stations located within the United States; (2) officers and warrant officers to and from permanent duty stations located within an overseas area when no transoceanic travel is involved; and (3) dependents, household goods, personal effects and privately owned vehicles of officers and warrant officers who are interned, missing, or captured when no transoceanic travel is involved.

b. **Enlisted.** Covers PCS movements of (1) enlisted personnel to and from permanent duty stations located within the United States; (2) enlisted personnel to and from permanent duty stations located within an overseas area when no transoceanic travel is involved; and (3) dependents, household goods, personal effects and privately owned vehicles of enlisted personnel who are interned, missing, or captured when no transoceanic travel is involved.

5 -D. Rotational Travel to and from Overseas:

a. **Officers.** Covers PCS movements of (1) officers and warrant officers from permanent duty stations in CONUS, or training of 20 weeks or more duration, to permanent duty stations overseas; (2) officers and warrant officers from permanent duty stations overseas to permanent duty stations in CONUS, or training of 20 weeks or more duration; (3) officers and warrant officers from permanent duty stations in one overseas area to permanent duty stations in another overseas area when transoceanic travel is involved; and (4) dependents, household goods, personal effects and privately owned vehicles of officers and warrant officers who are interned, missing or captured when transoceanic travel is involved.

b. **Enlisted.** Covers PCS movements of (1) enlisted personnel from permanent duty stations
in CONUS, or training of 20 weeks or more duration, to permanent duty stations overseas; (2) enlisted personnel from permanent duty stations overseas to permanent duty stations in CONUS, or training of 20 weeks or more duration; (3) enlisted personnel from permanent duty stations in one overseas area to permanent duty stations in another overseas area when transoceanic travel is involved; and (4) dependents, household goods, personal effects, and privately owned vehicles of enlisted personnel who are interned, missing, or captured when transoceanic travel is involved.

5 -E. Separation Travel:

a. **Officers.** Covers PCS movements of (1) officers and warrant officers upon release or separation from the Service from last permanent duty station to home of record or point of entry into service, or to home of selection when authorized by law; and (2) dependents, household goods, trailer allowances, and personal effects of officers and warrant officers who are deceased.

b. **Enlisted.** Covers PCS movements of (1) enlisted personnel upon release or separation from the Service from last permanent duty station to home of record or point of entry into service or to home of selection when authorized by law; and (2) dependents, household goods, trailer allowances, and personal effects of enlisted personnel who are deceased.

c. **Cadets and Midshipmen.** Covers PCS movements of eliminated academy cadets/midshipmen to home of record or point of entry into service.

5 -F. Travel of Organized Units:

a. **Officers.** Covers PCS movements of (1) officers and warrant officers directed to move as members of an organized unit movement; and (2) officer and warrant officer fillers and replacements directed to move as part of the unit move.

b. **Enlisted.** Covers PCS movements of (1) enlisted personnel directed to move as members of an organized unit movement; and (2) enlisted fillers and replacements directed to move as part of the unit move.

6. **Other Military Personnel Costs** - For costs incident to the apprehension of military deserters, absentees, and escaped prisoners; interest on uniformed services savings deposits; death gratuities; unemployment benefits; education benefits; adoption expenses; mass transportation benefits; partial dislocation allowance payments; servicemembers’ group life insurance; reserve officer training corps; and junior reserve officer training corps.

6.-A. **Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners:** For the expenses of apprehension and delivery of military deserters, absentees, and escaped military prisoners, including the payment for travel of guards; payment of rewards or reimbursement of reasonable and actual expenses to persons or agencies apprehending and detaining or delivering absentees or deserters to military control.

6.-B. **Interest on Uniformed Services Savings Deposits:** For the payment of interest at a rate not to exceed 10 percent per annum on any sum of not less than $5 deposited by members of the uniformed services under the provisions of 10 U.S.C. 1035.

6.-C. **Death Gratuities:** For the payment of death gratuities to beneficiaries of military personnel under the provisions of 10 U.S.C. 1475-80.
6.-D. Unemployment Benefits: For the payment of unemployment benefits to ex-service members who are discharged or released under honorable conditions under the provisions of Title 5, United States Code (U.S.C.), section 8521.

6.-E. Education Benefits: For amortization payments to the DoD Education Benefits Fund, a trust fund, as prescribed by 10, U.S.C., 2006. This program is governed by 38 U.S.C. Chapter 30 and is budgeted on an accrual basis by the Department of Defense.

6.-F. Adoption Expenses: To provide reimbursement for qualifying adoption expenses under the provisions of 10 U.S.C. 1052.

6.-G. Mass Transportation Benefit: For payment of mass transportation benefits as required by Executive Order 13150 on federal workforce transportation, dated April 21, 2000.

6.-H. Partial Dislocation Allowance: To provide payment for either vacating or moving into quarters for renovation purposes under the provision of the FY 2002 National Defense Authorization Act, Section 636.

6.-I. Reserve Income Replacement: For the payment of monthly active-duty income differential of a Reserve Component member when the total monthly military compensation of the member is less than the average monthly civilian income of the member under the provisions of 37 U.S.C 910.

6.-K. ROTC: All the military personnel-type costs associated with the Senior Reserve Officers’ Training Corps (except the scholarship program) of an armed force, provided for in 10 U.S.C. 2101-2111. All the military personnel costs associated with the financial assistance program for specially selected members of the Senior R.O.T.C. program. This program is intended to offer regular commissions to cadets and midshipmen successfully completing the academic and military requirements of the 4-year program. Authority for the program is contained in 10 U.S.C. 2107. Retired pay accrual does not apply to R.O.T.C. personnel. Costs include the subsistence allowance per month authorized by 37 U.S.C. 209, costs of uniform clothing authorized by 10 U.S.C. 2109-2110, pay and allowances authorized by 37 U.S.C. 209, incentive pay for members of precommissioning programs pursuing foreign language proficiency under the provisions of 37 U.S.C. 316a, and the cost of subsistence issued as rations to enlisted personnel including emergency and operational rations authorized by 10 U.S.C. 2109-2110.

6.-L. JROTC: All the military personnel costs associated with the Junior R.O.T.C. units at public and private secondary educational institutions provided for in 10 U.S.C. 2031. Retired pay accrual does not apply to J.R.O.T.C. personnel.
BA/BSA – Medicare-Eligible Retiree Health Fund Contribution Appropriations

1. Officers - For the Department of Defense’s contribution to the Medicare-Eligible Retiree Health Care Fund for the future Medicare-Eligible health care costs for current military officers in accordance with 10 U.S.C. Chapter 56. Defense Health Care Accrual amounts are to be paid into the fund based upon approved actuarial rate multiplied by the expected average force strength for each fiscal year. The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108-375) provided permanent, indefinite appropriations to finance the cost of accruing TRICARE benefits for uniformed service member. These costs are included in the DoD discretionary total.

2. Enlisted - For the Department of Defense’s contribution to the Medicare-Eligible Retiree Health Care Fund for the future Medicare-Eligible health care costs for current military enlisted personnel in accordance with 10 U.S.C. Chapter 56. Defense Health Care Accrual amounts are to be paid into the fund based upon approved actuarial rate multiplied by the expected average force strength for each fiscal year. The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108-375) provided permanent, indefinite appropriations to finance the cost of accruing TRICARE benefits for uniformed service member. These costs are included in the DoD discretionary total.

**2.3** Budget Presentation Structure Requirements (020203)

2.3.1. For purposes of preparing certain material for presentation and justification of program and budget estimates, the following budget activities will be used for the Active Military Personnel Appropriations:

2.3.1.1. Pay and Allowances of Officers

2.3.1.2. Pay and Allowances of Enlisted

2.3.1.3. Pay and Allowances of Cadets and Midshipmen

2.3.1.4. Subsistence of Enlisted Personnel

2.3.1.5. Permanent Change of Station Travel

2.3.1.6. Other Military Personnel Costs

2.3.2. The following additional breakdown of each budget activity is required to be shown in the applicable justification exhibits:

**BA/BSA**

1. **Pay and Allowances of Officers:**
   
   a. Basic Pay
   
   b. Retired Pay Accrual
   
   c. **Thrift Savings Plan – Matching Contributions**
   
   d. Incentive Pay for Hazardous Duty
      
      (1) Flying Duty
         
         (a) Crew
         
         (b) Noncrew
         
         (c) Aviation Continuation Pay
         
         (d) Crew (Nonrated)
      
      (2) **Submarine Duty**
      
      (3) Parachute Jumping
         
         (a) Parachute Jumping (regular)
         
         (b) Parachute Jumping (High Altitude/Low Opening)
         
         (c) Other Incentive Pay
      
      (4) Duty inside a high or low pressure chamber inside observer, human acceleration or deceleration, experimental subject and test subject in thermal stress
experiments

(5) Demolition Duty
(6) Flight Deck Duty
(7) Air Weapons Controller Duty
(8) Duty Involving Toxic Fuel/Waste
(9) Duty Involving Live/Hazardous Biological Organisms
(10) Visit, Board, Search and Seizure

e. Special Pay
(1) Medical Pay
   (a) Variable Special Pay
   (b) Additional Special Pay
   (c) Board Certified Pay
   (d) Medical Incentive Pay
   (e) Multi-Year Retention Bonus
   (f) Critically Short Wartime Specialties Accession Bonus

(2) Dental Pay
   (a) Variable Special Pay
   (b) Additional Special Pay
   (c) Board Certified Pay
   (d) Accession Bonus
   (e) Multi-Year Retention Bonus
   (f) Dental Critical Skills Retention Bonus

(3) Nurse Pay
   (a) Accession Bonus
   (b) Anesthetist Pay

(4) Special Pay for Optometrists
(5) Special Pay for Pharmacists
   (a) Accession Bonus
   (b) Special Pay

(6) Special Pay for Veterinarians
(7) Board Certified Pay for Non-Physician Health Care Providers

(8) Personal Money Allowances - General/Flag Officers
(9) Responsibility Pay
(10) Diving Duty
(11) Special Pay - Nuclear Officer Incentive Pay
(12) Scientific/Engineering Bonus
(13) Sea Duty Pay
   (a) Career Sea Pay
   (b) Premium Sea Pay
(14) Overseas Extension Pay
(15) Foreign Language Proficiency Pay
(16a) Hostile Fire Pay
(16b) Imminent Danger Pay
(17) Hardship Duty Pay
(18) Judge Advocate Continuation Pay
(19) Special Warfare Officer Pay (extend period of active duty)
(20) Surface Warfare Officer Continuation Pay
(21) Critical Skills Retention Bonus
(22) New Officers in Critical Skills Accession Bonus
(23) Transfer between Armed Forces Incentive Bonus
(24) Hospitalization and Rehabilitation Pay
(25) Assignment Incentive Pay
(26) **Continuation Pay**

f. **Basic Allowance for Housing**
   (1) With Dependents – Domestic
   (2) Without Dependents – Domestic
   (3) Partial Allowance – Bachelor – Domestic
   (4) Substandard Housing - Domestic
   (5) With Dependents – Overseas
   (6) Without Dependents – Overseas

g. **Basic Allowance for Subsistence**

h. **Station Allowances, Overseas**
   (1) Cost of Living
   (2) Temporary Lodging

i. **CONUS Cost of Living Allowances**

j. **Clothing Allowances**
   (1) Initial Military Allowance
   (2) Additional Military Allowance
   (3) Civilian Clothing Allowance

k. **Family Separation Allowances**
   (1) On permanent change of station with dependents not authorized, Government quarters not available.
   (2) On permanent change of station with dependents not authorized.
   (3) On board ship for more than 30 days.
   (4) On temporary duty for more than 30 days with dependents not residing near temporary duty station.

l. **Separation Payments**
   (1) Lump sum terminal leave payments.
   (2) Lump sum readjustment payments.
   (3) Lump sum payments to reservists
   (4) Severance pay, failure of promotion.
   (5) Severance pay, disability.
   (6) Severance pay, non-disability
   (7) Voluntary Separation Incentive (VSI)
   (8) Voluntary Separation Pay (VSP)
   (9) Special Separation Benefit (SSB)
   (10) 15 Year Temporary Early Retirement Authority
   (11) $30,000 Lump Sum Bonus

m. **Special Compensation for Assistance with Activities of Daily Living**

n. **Social Security Tax - Employer’s Contribution**

2. **Pay and Allowances of Enlisted Personnel:**

   a. **Basic Pay**
   b. **Retired Pay Accrual**
   c. **Thrift Savings Plan – Matching Contribution**
   d. **Incentive Pay for Hazardous Duty**
      (1) **Flying Duty**
         (a) Crew
         (b) Noncrew
      (2) **Submarine Duty**
      (3) **Parachute Jumping**
         (a) Parachute Jumping (regular)
         (b) Parachute Jumping (High Altitude/Low Opening)
         (c) Other Incentive Pay
(4) Duty inside a high or low pressure chamber inside observer, human acceleration or deceleration, experimental subject and test subject in thermal stress experiments

(5) Demolition Duty
(6) Flight Deck Duty
(7) Air Weapons Controller Duty
(8) Duty Involving Toxic Fuel/Waste
(9) Duty Involving Live/Hazardous Biological Organisms
(10) Visit, Board, Search, and Seizure

d-2. Career Enlisted Flyer Pay

e. Special Pay
   (1) Diving Duty
   (2) Sea Duty Pay
      (a) Career Sea Pay
      (b) Premium Sea Pay
   (3) Overseas Extension Pay
   (4) Nuclear Accession Bonus
   (5) Foreign Language Proficiency Pay
   (6a) Hostile Fire Pay
   (6b) Imminent Danger Pay
   (7) Hardship Duty Pay
   (8) Critical Skill Retention Bonus
   (9) Conversion to Military Occupational Specialty to ease personnel shortage
   (10) Transfer Between Armed Forces Incentive Bonus
   (11) Hospitalization and Rehabilitation Pay
   (12) Assignment Incentive Pay
   (13) Continuation Pay

f. Special Duty Assignment Pay

6. Mileage and Per Diem - The costs of travel relating to use of privately owned vehicle or commercial modes other than air or sea. Includes per diem paid to the individual member. It excludes movement of mobile trailers even if the trailer is moved by the member. The unit of measurement is number of member moves.

7. Air Mobility Command (AMC) - The costs of travel for movement of an
8. Commercial Air - The costs for movement of an individual member paid directly to a commercial company. (Excludes any costs paid to AMC.) The unit of measurement is number of member moves.

9. Mileage - The costs of travel relating to the use of privately owned vehicles or commercial modes other than air or sea for the dependents of an individual member. Includes per diem paid to dependents. The unit of measurement is number of family moves.

10. Air Mobility Command (AMC) - The costs of travel for movement of dependents reimbursed to AMC. The unit of measurement is number of dependents.

11. Commercial Air - The costs for movement of dependents paid directly to a commercial company (excludes any costs paid to AMC). The unit of measurement is number of dependents.

12. For each permanent change of station travel account, the following data will be shown, as applicable, for officers, enlisted and cadets/midshipmen:

   a. Member Travel - Costs related to the movement of each member of a military service making a permanent change of station move.

   b. Dependent Travel - Costs related to the movement of dependents when authorized as part of a permanent change of station of a member of a military service. The number of dependent moves should reflect the number of families moved as a unit of measure.

   c. Transportation of Household Goods - Costs related to movement of household goods as authorized by Joint Federal Travel Regulations including shipment of unaccompanied baggage.

      (1) Land Shipments, CONUS and Overseas - The costs of shipment of goods for the portion in CONUS and overseas of shipments other than International Through Government Bill of Lading (ITGBL). The unit of measurement is member move.

      (2) ITGBL - The costs of shipment from point of origin to destination on ITGBL. Includes both land and overwater portion of the movement. The unit of measurement is member move.

      (3) Overseas - The costs of shipments, including unaccompanied and excess baggage, either reimbursed to the Military Sealift Command (MSC), Air Mobility Command (AMC), or paid directly to a commercial company.

   d. Dislocation Allowance - The costs of dislocation allowance as authorized in the JTR. The unit of measurement is number of members paid.

   e. Trailer Allowance - The costs of movement of mobile trailers whether moved by commercial contract or moved by the individual member. The unit of measurement is number of trailer moves.

   f. Privately Owned Vehicles (POV) - The costs to the Government of transporting or storing a POV to or from overseas.

      (1) Military Sealift Command (MSC) - The cost of shipping POVs reimbursed to MSC. The unit of measurement is number of POVs shipped. If number of
POVs shipped is not available, use 11.2 measurement tons per vehicle to convert measurement tons to vehicles.

(2) Military Traffic Management Command (MTMC) – The cost of storing POVs reimbursed to MTMC. The unit of measurement is number of POVs stored.

(3) Port Handling (Military Traffic Management Command) - The cost of port processing of vehicles reimbursed to MTMC. The unit of measurement is number of POVs processed. If number of POVs processed is not available, use 11.2 measurement tons per vehicle to convert measurement tons to vehicles.

g. Port Handling Costs (HHGs) - The port handling costs for household goods and unaccompanied baggage reimbursed to MTMC. The unit of measure is measurement tons.

h. Non-temporary Storage - The costs to the government of placing goods in storage or moving them to another specified destination under the provisions of 37 U.S.C. 476 when a member entitled to a PCS move is ordered to a duty station to which the shipment of household goods is not authorized. No unit of measure will be shown for non-temporary storage, only costs.

i. Temporary Lodging Expense (TLE) - The cost of reimbursing the member for expenses incurred as a result of a PCS move, not to exceed $290 per day for up to 10 days under the provisions of 37 U.S.C. 474a. TLE requirements should reflect members paid as the unit of measure.

j. Pet Quarantine Fees – The cost of reimbursing the member for mandatory pet quarantine fees incident to a Permanent Change of Station under the provisions of 37 U.S.C. 476(a)(1).

13. Other Military Personnel Costs:
   a. Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners
   b. Interest on Uniformed Services Savings Deposits
   c. Death Gratuities
      (1) Officers
      (2) Enlisted
      (3) Cadets and Midshipmen
   d. Unemployment Benefits
   e. Education Benefits (Amortization Payments)
   f. Adoption Expenses
   g. Mass Transportation Benefit
   h. Partial Dislocation Allowance
   i. Reserve Income Replacement
   j. SGLI/T-SGLI
      (1) SGLI Extra Hazard Payments
      (2) Traumatic Injury Protection Coverage (T-SGLI)
      (3) SGLI/T-SGLI Insurance Premium Allowance
   k. ROTC
   l. JROTC

*2.4 Program and Budget Review Submission (020204)

2.4.1. This section prescribes the justification materials required for the Active Military
Personnel appropriations to support budget estimates. Fund requirements for these appropriations will be presented using those budget and accounting classifications set forth in paragraphs 2.2 and 2.3, above.

2.4.2. Exhibits in Support of Program and Budget Estimates - The following justification exhibits will be prepared and submitted in support of the program and budget review for the OSD/OMB program and budget review submission. These exhibits will be organized by Service military personnel account. Examples of the required exhibits are provided in paragraph 6.2. The required justification material will be organized in a single unclassified volume with the unclassified data displayed in the sequence shown below:

Table of Contents

Section 1 - Summary of Requirements by Budget Program (PB-30A)

The Summary of Requirements will include a Medicare-Eligible Retiree Health Fund Contribution Appropriation line displaying the total amounts budgeted as shown in section 6.2 of this chapter. These amounts will be supported by detailed calculations provided in the MP-13 Exhibit included in the separate backup justification book.

Section 2 – Introduction, Summary of Economic Assumptions, and Performance Measures

1. The Introduction will include an Introductory Statement that should provide the highlights of the budget submission and a general discussion of the relationship of the resources requested to the proposed military strength program. This should include a discussion of the military strength characteristics in terms of gains and losses and promotion and assignments policies. It also should address strength changes in programmatic terms such as force structure gains and losses and other matters of an overall nature as considered appropriate by the Service. For those Services ordering Selected Reserve members to active duty for preplanned missions in support of Combatant Commands (12304b authority), active Military Personnel budget justification material must include a description of the mission for which such units are anticipated to be ordered to active duty and the anticipated length of time of the order of such units to active duty on an involuntary basis. Finally, the Introduction will include the following statement:

“The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108-375) provided permanent, indefinite appropriations to finance the cost of TRICARE benefits accrued by uniformed service members. Since these costs are actually borne in support of the Department of Defense, they will be shown as part of the DoD discretionary total. The appropriations requested for the military personnel accounts exclude retiree health accrual funding. Total obligations on behalf of military personnel include both the amounts requested for appropriation and amounts paid from the permanent, indefinite authority.”

2. Economic Assumptions will summarize funding projections, end strength, average strength, retired pay accrual (full-time and part-time), military pay raise, and inflation rates assumed for Basic Allowance for Housing (BAH), Basic Allowance for Subsistence (BAS), and non-pay funding items. This summary can be formatted to summarize by fiscal year or by element of expense as preferred by the Service.

3. The Dwell Time Assessment directed by the FY 2013 NDAA should include a statement
on the estimated dwell time for both the active and reserve components in the prior year (PY), current year (CY), and budget year (BY). The assessment should identify military occupational specialties and types of units that did not achieve the Service’s dwell time goals. In addition, the assessment should include a statement of whether requested reductions in active duty end-strength are reversible within 1 year. This section of the Introductory Statement is required through the FY 2017 President’s Budget.

4. Performance Measures and Evaluation Summary (PB-30Y) (example provided in paragraph 6.2).

Section 3 - Summary Tables (examples provided in paragraph 6.2, below)

1. Personnel Summaries (PB-30B through PB-30F)
2. Summary of Entitlements by Subactivity (PB-30J)
3. Analysis of Appropriation Changes and Supplemental Requirements (PB-30K)
4. Schedule of Increases and Decreases Summary (PB-30Q)

Section 4 - Detail of Military Personnel Entitlements

Justification materials will be provided for each entitlement as prescribed in paragraphs 2.2 and 2.3, above for each of the following six budget activities for military personnel:

1. Pay and Allowances of Officers
2. Pay and Allowances of Enlisted Personnel
3. Pay and Allowances of Cadets/Midshipmen
4. Subsistence of Enlisted Personnel
5. Permanent Change of Station Travel
6. Other Military Personnel Costs

Each of the military personnel budget activities above will be introduced by a schedule of increases and decreases (PB-30P). The Incentive/Bonus Payment Stream exhibit (PB-30V) will be included in Section 4, Detail of Military Personnel Entitlements (See paragraph 6.2, below for format).

Section 5 - Special Analyses (examples provided in paragraph 6.2, below)

1. Schedule of Military Assigned Outside DoD (PB-30Q)
2. Reimbursable Programs (PB-30R)
3. Reserve Officer Training Corps Enrollment (PB-30S)
4. Reserve Officer Training Corps Program (PB-30T)
5. Monthly End Strength by Pay Grade (PB-30Z)

2.4.3. Justification material for each subactivity will contain a purpose and scope as well as a justification of funds requested. The requirements for each entitlement under each military personnel category will be justified on a gross basis to include total obligations for both direct and reimbursable personnel. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory, program enhancements, solving deficiencies, etc.). Also provide a general explanation for each type of entitlement. The computation for each entitlement will display data for the prior year (PY), current year (CY), and budget year (BY). An example of the exhibit to meet this requirement is Exhibit PB-30X in section 6.2.

2.4.4. The following exhibits will be provided in a separate backup justification book in support of the budget estimate. Examples of these exhibits are provided in paragraph 6.2, below:

- MP-2 Basic Allowance for Housing Costs Summary
- MP-3 Summary of Outyear Data
- MP-4 Military Personnel by Region and Country
- MP-9 Summary of Basic Pay and Retired Pay Accrual Costs
- MP-11 Gains Phased by Month
- MP-12 Pay Raise Data
- MP-13 Medicare-Eligible Retiree Health Fund Contributions

For the Department of Defense’s contribution to the Medicare-Eligible Retiree Health Care Fund for the future Medicare-Eligible health care costs for current military personnel in accordance with 10 U.S.C. Chapter 56. Defense Health Care Accrual amounts are to be paid into the fund based upon approved actuarial rates.

- MP-15 Monthly Obligation Phasing Plan
- MP-16 Summary of Recruiting and Retention Data
- MP-17 Reimbursable Program (Reimbursing Customers)
- PB-16 Legislative Proposals (See Volume 2B, Chapter 19, paragraph 191205 for format)
- PB-18 Foreign Currency Exchange Data (See Volume 2B, Chapter 19, paragraph 191205 for format)

A submission is **required** for all components approved to participate in the foreign currency account. These components must submit a PB-18 for all appropriations to include an estimate of military spendable income, COLA and OHA estimates, and troop strength. It is submitted in conjunction with and in support of the OSD Program and Budget Review Submission and the President’s Budget submission for the four active military personnel appropriations.
2.5 Congressional Justification/Presentation (020205)

2.5.1. Justification books will be organized by Service military personnel account.

2.5.2. Justification Book, other exhibit requirements, and electronic data submissions in support of the congressional submission are identical to what is shown in paragraph 2.4, Program and Budget Review Submission. Exhibits provided to OUSD(C), consistent with subparagraph 2.4.4, above will not be provided to Congress but will be provided under separate cover to OUSD(C) at the time of the President’s budget submission.

2.5.3. M-1 Exhibit. Since FY 1998, appropriations language has required the submission of an M-1 exhibit in support of the President’s budget. The Military Departments are required to submit M-1 data through the Program Resources Collection Process (PRCP) system consistent with paragraph 010501 of Chapter 1.

3.0 RESERVE MILITARY PERSONNEL AND MEDICARE-ELIGIBLE RETIREE HEALTH FUND CONTRIBUTION APPROPRIATIONS (0203)

3.1 General (020301)

3.1.1. The purpose of this chapter is to provide general information applicable to the Reserve Military Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations including funding policies, classifications, and definitions unique to these accounts. Generic policies and requirements are addressed in Chapter 1. The Military Components should consult all of the other chapters for exhibit requirements that are not specifically addressed in this chapter including the Other Special Analysis chapter (See Volume 2B, Chapter 19).

3.1.2. This section provides the budget and fiscal accounting classifications for the Reserve and National Guard Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 U.S.C. 115. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification, which shall be used on a uniform basis for the Reserve Component personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds for the Reserve and National Guard Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations.

3.2 Uniform Budget and Fiscal Accounting Classification (020302)

3.2.1. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in this section. Variations in the budget program, activity, and subactivity classification and titles shall not be made, except that additional accounts consistent with this budget and accounting classification may be established in order to meet administration requirements of the various elements of the Military Departments. The scope of each account is described below.

3.2.2. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same sequence and will be consistent with the fiscal
codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

3.2.3. Chart of Accounts - The chart of accounts represents a summary of the accounting and reporting structure under the Reserve Components’ Personnel and Medicare-Eligible Retiree Health Fund Contribution appropriations. Obligations and disbursements for individual clothing and uniform allowances, and for subsistence of enlisted personnel may be allocated by activity on a statistical basis if not reported by the different types of training. Subactivities may be combined in reporting on the status of funds, provided the subactivity is maintained for program and budget review and presentation purposes:

**CHART OF ACCOUNTS DEFINITIONS/DESCRIPTIONS**
*Budget Activity (BA) and Budget Subactivity (BSA)*

**BA/BSA – Reserve and National Guard Personnel Appropriations**

The joint explanatory statement accompanying the DoD Appropriations Act, 2009 (P.L. 110-329, Division C) requested that the DoD make permanent the consolidated budget structure for Reserve and Guard personnel appropriations; therefore, the budget justification material shall reflect only one budget activity.

1. Reserve Component Training and Support

1-A Training - Pay Group A

- 1-A-1 Basic pay, active duty for training, officers
- 1-A-2 Other pay and allowances, active duty for training, officers
- 1-A-3 Basic pay, active duty for training, enlisted
- 1-A-4 Other pay and allowances, active duty for training, enlisted
- 1-A-5 Basic pay, inactive duty training, officers
- 1-A-6 Basic pay, inactive duty training, enlisted
- 1-A-7 Individual clothing and uniform allowances, officers
- 1-A-8 Individual clothing and uniform allowances, enlisted
- 1-A-9 Subsistence of enlisted personnel
- 1-A-10 Travel, active duty for training, officers
- 1-A-11 Travel, active duty for training, enlisted
- 1-A-12 Retired pay accrual, officers
- 1-A-13 Retired pay accrual, enlisted

1-B Training - Pay Group B

- 1-B-1 Basic pay, active duty for training, officers
- 1-B-2 Other pay and allowances, active duty for training, officers
- 1-B-3 Basic pay, active duty for training, enlisted
- 1-B-4 Other pay and allowances, active duty for training, enlisted
- 1-B-5 Basic pay, inactive duty training, officers
- 1-B-6 Basic pay, inactive duty training, enlisted
- 1-B-7 Individual clothing and uniform allowances, officers
- 1-B-8 Individual clothing and uniform allowances, enlisted
- 1-B-9 Subsistence of enlisted personnel
- 1-B-10 Travel, active duty for training, officers
- 1-B-11 Travel, active duty for training, enlisted
- 1-B-12 Retired pay accrual, officers
- 1-B-13 Retired pay accrual, enlisted

2-33
1-C  Training - Pay Group F

1-C-1  Basic pay, active duty for training, enlisted
1-C-2  Other pay and allowances, active duty for training, enlisted
1-C-3  Individual clothing and uniform allowances, enlisted
1-C-4  Subsistence of enlisted personnel
1-C-5  Travel, active duty for training, enlisted
1-C-6  Retired pay accrual, enlisted

1-D  Training - Pay Group P

1-D-1  Basic pay, inactive duty training, enlisted
1-D-2  Individual clothing and uniform allowances, enlisted
1-D-3  Subsistence of enlisted personnel
1-D-4  Retired pay accrual, enlisted

1-E  Mobilization Training

1-E-1  Basic pay, active duty for training, officers
1-E-2  Other pay and allowances, active duty for training, officers
1-E-3  Basic pay, active duty for training, enlisted
1-E-4  Other pay and allowances, active duty for training, enlisted
1-E-5  Individual clothing and uniform allowances, officers
1-E-6  Individual clothing and uniform allowances, enlisted
1-E-7  Subsistence of enlisted personnel
1-E-8  Travel, active duty for training, officers
1-E-9  Travel, active duty for training, enlisted
1-E-10 Retired pay accrual, officers
1-E-11 Retired pay accrual, enlisted
1-E-12 Muster pay stipend, officers
1-E-13 Muster pay stipend, enlisted

1-F  School Training

1-F-1  Basic pay, active duty for training, officers
1-F-2  Other pay and allowances, active duty for training, officers
1-F-3  Basic pay, active duty for training, enlisted
1-F-4  Other pay and allowances, active duty for training, enlisted
1-F-5  Individual clothing and uniform allowances, officers
1-F-6  Individual clothing and uniform allowances, enlisted
1-F-7  Subsistence of enlisted personnel
1-F-8  Travel, active duty for training, officers
1-F-9  Travel, active duty for training, enlisted
1-F-10 Retired pay accrual, officers
1-F-11 Retired pay accrual, enlisted

1-G  Special Training

1-G-1  Basic pay, active duty for training, officers
1-G-2  Other pay and allowances, active duty for training, officers
1-G-3  Basic pay, active duty for training, enlisted
1-G-4  Other pay and allowances, active duty for training, enlisted
1-G-5  Individual clothing and uniform allowances, officers
1-G-6 Individual clothing and uniform allowances, enlisted
1-G-7 Subsistence of enlisted personnel
1-G-8 Travel, active duty for training, officers
1-G-9 Travel, active duty for training, enlisted
1-G-10 Retired pay accrual, officers
1-G-11 Retired pay accrual, enlisted

1-H Administration and Support

1-H-1 Basic pay of officers
1-H-2 Other pay and allowances of officers
1-H-3 Basic pay of enlisted
1-H-4 Other pay and allowances of enlisted

1-H-34 Continuation Pay, Enlisted

1-I Education Benefits

1-I-1 MGIB-SR (Chap 1606), Per Capita Normal Cost
1-I-2 MGIB-SR (Chap 1606), Critical Skill or Critical Unit Benefit
1-I-3 MGIB-SR (Chap 1606), Amortization
1-I-4 Reserve Educational Assistance Program (REAP) (Chap 1607), Per Capita Normal
1-I-5 REAP (Chap 1607), Amortization
1-J  Platoon Leaders Class or Reserve Officer Candidates

   1-J-1  Uniforms -- issue in kind
   1-J-2  Basic pay (Summer training camp)
   1-J-3  Other pay and allowances (Summer training camp)
   1-J-4  Subsistence of reserve officer candidates
   1-J-5  Travel of reserve officer candidates
   1-J-6  Retired pay accrual

1-K  Branch Officer Basic Course

   1-K-1  Basic pay, active duty for training
   1-K-2  Other pay and allowances, active duty for training
   1-K-3  Uniform allowances
   1-K-4  Travel and per diem
   1-K-5  Retired pay accrual

1-L  Armed Forces Health Professions Scholarship/Financial Assistance Program

   1-L-1  Stipend
   1-L-2  Individual clothing and uniform allowances, officers
   1-L-3  Basic pay, active duty for training, officers
   1-L-4  Other pay and allowances, active duty for training, officers
   1-L-5  Travel, active duty for training, officers
   1-L-6  Retired pay accrual, officers
   1-L-7  Financial Assistance Grant
   1-L-8  Nurse Candidate Bonus
   1-L-9  Accession Bonus

1-M  Chaplain Candidate Program

   1-M-1  Basic pay, active duty for training
   1-M-2  Other pay and allowances, active duty for training
   1-M-3  Uniform allowances
   1-M-4  Travel
   1-M-5  Retired pay accrual

1-N  Thrift Savings Plan (TSP) Matching Contributions

   1-N-1  TSP Matching Contributions, Officer
   1-N-2  TSP Matching Contributions, Enlisted

BA/BSA – Medicare-Eligible Retiree Health Fund Contribution Appropriations

1.  Reserve Component Training and Support

   A.  Chart of Accounts, Budget Activities, and Subactivities Definitions/Descriptions are provided on the following pages.

   B.  Object Classification - The object classifications that follow the Chart of Accounts, Budget Activities, and Subactivities Definitions/Descriptions shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts.
A. **Budget Program**

There will be a separate budget program for each Reserve Component of the Department of Defense and for each military service having those programs listed in paragraph 3.2, as appropriate.

B. **Budget Activities**

The budget activities are established to present all of the military type costs associated with a particular type of training within the unit and individual training or other training and support programs. The following descriptions are for the chart of accounts listed in paragraph 3.2.

**BA/BSA – Reserve and National Guard Personnel Appropriations**

The joint explanatory statement accompanying the DoD Appropriations Act, 2009 (P.L. 110-329, Division C) requested that the DoD make permanent the consolidated budget structure for Reserve and Guard personnel appropriations; therefore, the budget justification material shall reflect only one budget activity.

1. **Reserve Component Training and Support**
   
   a. **Training, Pay Groups A, B, F and P**

   The Pay Group activities contained in paragraph 3.2 are for costs, including retired pay accrual associated with the uniform training/pay categories within the National Guard and Reserve Personnel programs as defined in DoD Instruction 1215.06, “Uniform Reserve, Training and Retirement Categories.”

   b. **Mobilization Training**

   Costs, including retired pay accrual, associated with the readiness training and mission support training of the Individual Ready Reserve (IRR) and Merchant Marine Training. Also included are costs associated with the allowance for annual muster duty as provided by 37 U.S.C. 433.

   c. **School Training**

   Include tours of paid active duty for training as students at regular, refresher and technical courses of service schools, area schools, unit schools, officer candidate schools, and other schools that provide training. Retired pay accrual costs are included.

   d. **Special Training**

   Include all authorized paid active duty for training, other than those covered by pay groups, mobilization, and school training. These include the staff and faculty for schools; special field, fleet and joint exercises; indoctrination training; promoting or policy boards; administrative support of training programs; and tours of not more than 45 days for failure to perform reserve training duty satisfactorily. Retired pay accrual costs are included.

   e. **Administration and Support**

   Include the costs, including retired pay accrual, of active duty military
personnel authorized to be funded in the Reserve Component personnel appropriations, death and disability gratuities for officer and enlisted Reserve Component personnel injured or killed while in a Reserve or Guard training status, **continuation pays**, and reserve incentive and bonus programs.

f. **Platoon Leaders Class (PLC)**

All military personnel costs, including retired pay accrual, associated with the Marine Corps Reserve PLC.

g. **Branch Officer Basic Course**

Costs associated with ROTC graduates designated for Reserve Forces Duty, including retired pay accrual, to attend full-length resident Branch Officer Basic Courses of the active components.

h. **Armed Forces Health Profession Scholarship and Financial Assistance Program**

All the military personnel costs, including retired pay accrual, associated with the financial assistance program to obtain adequate numbers of officers for the active forces who are qualified in various health professions. Qualifications are that the candidate be a citizen of the United States, be accepted for or be enrolled in an accredited institution in a course of study designated for a health profession, and meet moral and physical qualifications for an officer. Such recipients are commissioned as a Second Lieutenant and remain in that grade for the duration of the scholarship program. Authority for the program is contained in 10 U.S.C. 2120-2128. In addition to the stipend, also provides for the annual grant authorized under 10 U.S.C. 2121 and financial assistance to nurse officer candidates under 10 U.S.C. 2130a.

i. **Chaplain Candidate Program**

All military personnel costs, including retired pay accrual, for the Chaplain Officer Basic Course and Chaplain Active Duty for Training Practicum to qualify officers commissioned as Chaplain Candidates for future service as chaplains in either the Active or Reserve Component.

j. **Education Benefits (New G.I. Bill)**

Includes funds for payment to the DoD Education Benefits Fund, a trust fund, as prescribed by 10 U.S.C. 2006. The program is governed by 10 U.S.C. Chapter 1606 and 1607 and is budgeted on an accrual basis. Also includes payments for vocational/technical training under the Reserve Compensation G.I. Bill as provided by 10 U.S.C. 2131.

k. **Thrift Savings Plan (TSP) Matching Contributions**

Includes costs associated with the blended retirement system, to include an automatic 1 percent of basic pay government contribution to a member’s TSP account beginning 60 days following entry, and Department of Defense’s matching contributions up to 4 percent from the 3rd through the 26th year of service. Authority for the program is contained in 5 U.S.C. 8432. For those member’s participating in the blended retirement plan, the amount contributed shall not be more than 5 percent of the member’s basic pay for such pay period.

C. **Budget Subactivities**

The budget subactivities are grouped to present all of the military personnel-type costs for...
the particular activity. Rather than repeat the same definitions for each activity, the descriptions of the subactivities are shown below by their various titles:

1. **Pay and Allowances, Active Duty for Training, Officers**

   For the pay and allowances of commissioned and warrant officers of the Reserve Components on active duty for training. These include:

   a. **Basic Pay**

   For basic compensation, including length of service increments, under the provision of 37 U.S.C. 201 and 203-205.

   b. **Retired Pay Accrual**

   For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

   c. **Incentive Pay for Hazardous Duty**

   Refer to the descriptions of the subactivities in paragraph 2.2, 1-C, as applicable, as well as involving use of ski-equipped aircraft on the ground in Antarctica or the Arctic ice-pack. Also includes incentive pay for hazardous duty for members of a Weapons of Mass Destruction Civil Support Team under the provisions of 37 U.S.C. 305b.

   d. **Special Pay**

   Refer to the descriptions of the subactivities in paragraph 2.2, 1-D as applicable. Includes selected reserve officers receiving an affiliation bonus under the provisions of 37 U.S.C. 308j and 332; also includes selected reserve health care professionals in critically short wartime specialties under provisions of 37 U.S.C. 302g.

   e. **Basic Allowance for Housing**

   For housing allowances payable to officers under the provisions of 37 U.S.C. 403.

   f. **Family Separation Allowances**

   For family separation allowances payable to officers under the provisions of 37 U.S.C. 427.

   g. **Basic Allowance for Subsistence**

   For subsistence allowances payable to officers under the provisions of 37 U.S.C. 402.
h. **Separation Payments**

Payments for accumulated annual leave under the provisions of 37 U.S.C. 501.

i. **Social Security (FICA Tax) -- Employers’ Share**

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

2. **Pay and Allowances, Active Duty for Training, Enlisted**

For the pay and allowances of enlisted personnel of the Reserve Components on active duty for training. These include:

a. **Basic Pay**

For basic compensation, including length of service increments, under the provision of 37 U.S.C. 203-205.

b. **Retired Pay Accrual**

For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. **Incentive Pay for Hazardous Duty**

Refer to the descriptions of the subactivities in paragraph 2.2, 2-C-1 and 2-C-2 as applicable as well as involving use of ski-equipped aircraft on the ground in Antarctica or the Arctic ice-pack. Also includes incentive pay for hazardous duty for members of a Weapons of Mass Destruction Civil Support Team under the provisions of 37 U.S.C. 305b.

d. **Special Pay**

Refer to the descriptions of the subactivities in paragraph 2.2, 2-D and 2-E, as applicable. Includes affiliation, enlistment, and reenlistment bonuses for selected reserve enlisted members under the provisions of 37 U.S.C. 308b, 308c, 308d, 308g, 308h, 308i, and 331.

e. **Basic Allowance for Housing**

For housing allowances payable to enlisted personnel under the provisions of 37 U.S.C. 403.

f. **Family Separation Allowances**

For family separation allowances payable to enlisted personnel under the provisions of 37 U.S.C. 427.

g. **Separation Payments**

For accumulated unused annual leave under the provisions of 37 U.S.C. 501.
3. Pay, Inactive Duty Training, Officers
   a. Basic Pay
      For basic compensation, including length of service increments, under the provisions of 37 U.S.C. 201-203, 205, and 206.
   b. Retired Pay Accrual
      For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.
   c. Incentive Pay for Hazardous Duty
      For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 or 37 U.S.C. 351. Also includes incentive pay for hazardous duty for members of a Weapons of Mass Destruction Civil Support Team under the provisions of 37 U.S.C. 305b.
   d. Social Security (FICA Tax) -- Employers’ Share
      For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

4. Pay, Inactive Duty Training, Enlisted
   a. Basic Pay
      For basic compensation, including length of service increments, under the provisions of 37 U.S.C. 203 and 206.
   b. Retired Pay Accrual
      For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.
   c. Incentive Pay for Hazardous Duty
      For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 or 37 U.S.C. 351. Also includes incentive pay for hazardous duty for members of a Weapons of Mass Destruction Civil Support Team under the provisions of 37 U.S.C. 305b.
   d. Social Security (FICA Tax) -- Employers’ Share
      For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

5. Individual Clothing and Uniform Allowances, Officers
   Payments of allowances to officers for the purchase of required uniforms under the
provisions of 37 U.S.C 415-417.

6. Individual Clothing and Uniform Allowances, Enlisted

For the costs of uniform clothing authorized to be issued in kind to enlisted personnel under the provisions of 37 U.S.C. 418.

7. Subsistence of Enlisted Personnel

For the cost of subsistence issued as rations to enlisted personnel including emergency and operational rations under the provisions of 37 U.S.C. 402.

8. Travel, Active Duty Training, Officers, and Travel, Active Duty for Training, Enlisted

For expenses incident to training travel of Reserve Component officer or enlisted member, individually or as an organized unit. Travel costs include mileage; per diem; transportation by common carrier (rail, bus, air, water including Air Mobility Command and Military Sealift Command); actual and necessary expenses and costs of subsistence while in a travel status; issue of meal tickets; transportation of baggage; port handling charges; and expenses incident to movement of any military group traveling under one order from the same point of origin to the same destination.

9. Pay and Allowances of Officers, Enlisted and Permanent Change of Station Travel for Active Guard and Reserve (AGR)

These subactivities are to provide for the AGR military personnel expenses financed from the Reserve Components personnel appropriations. The descriptions of these subactivities are identical to those shown for the activities with the same titles in paragraph 2.2, above.

10. Death Gratuities, Officers, and Death Gratuities, Enlisted

For the payment of death gratuities to beneficiaries of Reserve Component personnel under the provisions of 10 U.S.C. 1475-1480.

11. Disability and Hospitalization Benefits, Officers, and Disability and Hospitalization Benefits, Enlisted

For payment of disability and hospitalization benefits for Reserve Component personnel, except for costs covered by orders to active duty for training or inactive duty training under the provisions of 37 U.S.C. 204 and 206.
12. **Reserve Incentives**

For Reenlistment Bonus for Selected Reserves under the provisions of 37 U.S.C. 308b; Affiliation or Enlistment in the Selected Reserves under the provisions of 37 U.S.C. 308c; Non-Prior Service Enlistment Bonus for the Individual Ready Reserve under the provisions of 37 U.S.C. 308g; Individual Ready Reserve Enlistment, Reenlistment or Extension Bonus under the provisions of 37 U.S.C 308h; Prior Service Enlistment Bonus under the provisions of 37 U.S.C 308i; Accession or Affiliation Bonus for New Reserve Component Officers under the provisions of 37 U.S.C 308j; **Continuation Pay for Reserve Component personnel under the provisions of 37 U.S.C. 356**; and any other bonus incentive listed in section 2.2, as applicable.

13. **Other**

Items that are not accounted for in numbers 1 through 12.

14. **Health Professions Scholarship Program**

a. **Stipend**

For the allowances of commissioned officers while attending school under the Armed Forces Health Professions Scholarship Program under the provisions of 10 U.S.C. 2120-2122. This includes a monthly allowance (stipend) as authorized by 10 U.S.C. 2121 and payment of FICA tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

b. **Financial Assistance Grant**

For an annual grant for persons participating in specialized training under the provisions of 10 U.S.C. 2127.

c. **Accession Bonus**

Bonus to persons entering into an agreement under 10 U.S.C. 2122(a)(2).

d. **Nurse Candidate Bonus Program**

For an accession bonus paid in periodic installments and a monthly stipend for nurse officer candidates under the provisions of 10 U.S.C. 2130a.

e. **Individual Clothing and Uniform Allowances, Officers**

Payments of allowances for the purchase of required uniforms under the provisions of 37 U.S.C. 415-417.

f. **Pay and Allowances, Active Duty for Training, Officers**

For the pay and allowances of commissioned officers of the Reserve Components on active duty for training.

g. **Travel, Active Duty Training, Officers**

For expenses incident to travel of Reserve Component officers.
BA/BSA – Medicare-Eligible Retiree Health Fund Contribution Appropriations

1. **Reserve Component Training and Support** - For the Department of Defense’s contribution to the Medicare-Eligible Retiree Health Care Fund for the future Medicare-Eligible health care costs for current military personnel in accordance with 10 U.S.C. Chapter 56. Defense Health Care Accrual amounts are to be paid into the fund based upon approved actuarial rate multiplied by the expected average force strength for each fiscal year. The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108-375) provided permanent, indefinite appropriations to finance the cost of accruing TRICARE benefits for uniformed service member. These costs are included in the DoD discretionary total.
In addition to the object classifications prescribed in paragraph 2.2, above, the object classifications prescribed herein shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts:

*3.3 Program and Budget Review Submission (020303)*

3.3.1. This section prescribes the justification materials required for the Reserve Components’ Military Personnel appropriations to support budget estimates. Fund requirements for these appropriations will be presented using those budget and accounting classifications set forth in paragraph 3.2, above.

3.3.2. Exhibits in Support of Budget Estimates - The following justification exhibits will be prepared and submitted in support of program and budget review submission for the OSD/OMB program and budget review. These exhibits will be organized by Service military personnel account. Examples of the required exhibits are provided in paragraph 6.2 and 6.3, below. The required justification material will be organized in a single unclassified volume with the unclassified data displayed in the sequence shown below:

**Table of Contents**

**Section 1 - Summary of Requirements by Budget Program (PB-30A)**

The Summary of Requirements will include a Medicare-Eligible Retiree Health Fund Contribution Appropriation line displaying the total amounts budgeted as shown in section 6.2 of this chapter. These amounts will be supported by detailed calculations provided in the
Section 2 - Introduction and Performance Measures.

1. The statement should provide the highlights of the budget submission and a general discussion of the relationship of the resources requested to the proposed military strength program. This should include a discussion of the military strength characteristics in terms of gains and losses and promotion and assignment policies. It also should address strength changes in programmatic terms such as force structure and other matters of an overall nature as considered appropriate by the Service.

2. Performance Measures and Evaluation Summary (PB-30Y) (example provided in paragraph 6.3)

Section 3 - Summary Tables (examples provided paragraphs 6.2 and 6.3, below)

2. Summary of Entitlements by Subactivity (PB-30J)
3. Analysis of Appropriation Changes and Supplemental Requirements (PB-30K)
4. Summary of Basic Pay and Retired Pay Accrual Costs (Reserve Components Only) (PB-30L)
5. Summary of Basic Allowance for Housing (BAH) Costs (Reserve Components Only) (PB-30M)
6. Summary of Travel Costs (Reserve Components Only) (PB-30N)
7. Schedule of Increases and Decreases (PB-30O)

Section 4 - Detail of Reserve Personnel Entitlements

Justification materials will be provided in support of entitlements for each of the following applicable Reserve Component activities:

1. Training - Pay Group A
2. Training - Pay Group B
3. Training - Pay Group F
4. Training - Pay Group P
5. Mobilization Training
6. School Training
7. Special Training
8. Administration and Support
9. AGR Personnel
10. Death and Disability Gratuities
11. Reserve Incentives and Bonuses
12. Education Benefits
13. Platoon Leaders Class
14. Reserve Officer Candidates
15. Branch Officers Basic Course
16. Health Professions Scholarship
17. Chaplain Candidate Program
18. TSP Matching Contributions

Justification material for each activity will contain a purpose and scope section, a schedule of increases and decreases (PB-30P), as well as data in support of the funds requested. Generally, this data will include appropriate narrative comments relative to program/pricing as well as supporting computational data. For each subactivity/entitlement, include an
explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory change, program enhancements, solving deficiencies, etc.) and should also explain decreases programmatically. Also provide a general explanation for each type of entitlement. Data should be shown for the prior year (PY), current year (CY), and budget year (BY). School, Special, and Mobilization Training data will be grouped by similar types of training and will be fully explained and justified. At the end of each section for School, Special, and Mobilization Training provide a total that summarizes the training categories. Within the Administration and Support subactivity, subtotals are required for AGR personnel and for total incentives and bonuses. See paragraph 6.3, below for format.

Section 5 - Special Analyses (examples provided in paragraph 6.2 and 6.3, below)

1. Reimbursable Programs (PB-30R)

2. Selective Reenlistment Bonuses (PB-30V) Use this form for other applicable bonus programs.

3. Full-Time Support Personnel (PB-30W)

3.3.3. Justification material for each subactivity will contain a purpose and scope section as well as a justification of funds requested. The requirements for each entitlement under each military personnel category will be justified on a gross basis to include total obligations for both direct and reimbursable personnel. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for, i.e., statutory, program enhancements, solving deficiencies, etc. and should also explain decreases programmatically. Also provide a general explanation for each type of entitlement. The computation for each entitlement will display data for the prior year (PY), current year (CY), and budget year (BY). An example of the exhibit to meet this requirement is Exhibit PB-30X in section 6.3.

3.3.4. The following exhibits will be provided in a separate backup justification book in support of the budget estimate. Examples of these exhibits are provided in paragraph 6.3, below:

MPR-2 Basic Allowance for Housing Costs
MPR-3 Summary of Outyear Data
MPR-4 Education Benefits (Title 10 USC, Chapter 1606 and 1607)
MPR-5 Retired Pay Accrual Costs
MPR-6 Active Guard and Reserve (AGR) Costs
MPR-7 Pay Raise Data
MPR-8 Medicare-Eligible Retiree Health Fund Contributions
MPR-10 Monthly Obligation Phasing Plan
MPR-11 Summary of Recruiting and Retention Data
MPR-12 Reimbursable Program (Reimbursing Customers)
PB-16 Legislative Proposals (See Volume 2B, Chapter 19, paragraph 191205 for format)

3.4 Congressional Justification/Presentation (020304)

3.4.1. Justification books will be organized by Service military personnel account.
3.4.2. Justification Book and other exhibit requirements in support of the congressional submission are identical to those shown above in paragraph 3.2 and 3.3, Program and Budget Review Submission. Exhibits provided to OUSD(C), consistent with paragraph 3.3.4. will **not** be provided to Congress but will be provided under separate cover to OUSD(C) at the time of the President’s budget submission.

3.4.3. M-1 Exhibit. Since FY 1998, appropriations language has required the submission of an M-1 exhibit in support of the President’s budget. The Military Departments are required to submit M-1 data through the Program Resources Collection Process (PRCP) system consistent with paragraph 010501, above.

4.0 DoD MILITARY PERSONNEL RETIREMENT REQUIREMENTS (0204)

4.1 Uniform Budget and Fiscal Accounting Classifications (020401)

4.1.1. This Section prescribes the budget and fiscal accounting classifications for the Military Retirement Fund for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 U.S.C. 1461-1467.

4.1.2. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification which shall be used on a uniform basis for military retired pay throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds under this Trust Fund as required by Volume 4, of this Regulation.

4.1.3. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in paragraph 4.1.5 below. Variations in the activity and subactivity classification and titles shall not be made except that additional accounts consistent with this budget and accounting classification may be established in order to meet administrative requirements of the various elements of the Military Departments. The scope of each account is described in later in this section.

4.1.4. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same sequence as will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

4.1.5. The chart of accounts represents a summary of the accounting and reporting structure under the Military Retirement Fund arranged in the order and in the detail for which reporting in accordance with DoD 7000.14R, Financial Management Regulation, is required.

**Budget Activity and Subactivity**

1. **Nondisability**

   1-A - Regular Officers
   1-B - Regular Enlisted
   1-C - Nonregular Officers
   1-D - Nonregular Enlisted
2. Temporary Disability

- 2-A - Regular Officers
- 2-B - Regular Enlisted
- 2-C - Nonregular Officers
- 2-D - Nonregular Enlisted

3. Permanent Disability

- 3-A - Regular Officers
- 3-B - Regular Enlisted
- 3-C - Nonregular Officers
- 3-D - Nonregular Enlisted

4. Fleet Reserve

- 4-A - Regular Enlisted
- 4-B - Nonregular Enlisted

5. Survivors’ Benefits

- 5-A - Old Plan, Retired Servicemen’s Family Protection Plan (RSFPP)
- 5-B - New Plan, Survivor Benefits Plan (SBP)
- 5-C - Guaranteed Minimum Income
- 5-D – Dependence and Indemnity Compensation (DIC) Supplemental Payments

BA/BSA

4.1.6. Budget Activities. The budget activities are established to present the retirement benefits associated with a particular type of retirement. The following descriptions are for the chart of accounts as listed above.

4.1.6.1. Nondisability retirements, under applicable statutes, are given on the following basis:

4.1.6.1.1. Voluntarily on or after completion of the required length of service.

4.1.6.1.2. Involuntarily because of attainment of statutory age or completion of the maximum length of service authorized by law for the several grades.

4.1.6.1.3. Automatically upon completion of 30 years of combined active service and service in the Fleet Reserve.

4.1.6.2. Temporary Disability retirements, under Title IV of the Career Compensation Act of 1949 (10, U.S.C., 1201-1221), are given on the following basis:

Interim classification in cases where there is doubt as to the degree or permanence of disability. Persons on temporary disability rolls are given periodic physical examinations at least once every 18 months and may be:

4.1.6.2.1. Restored to active duty.
4.1.6.2.2. Separated from the service with severance pay.

4.1.6.2.3. Transferred to permanent disability retired list.

4.1.6.2.4. Continued on temporary list for another 18-month period.

4.1.7. Final determination is required within 5 years of initial classification and temporary disability retirement.

4.1.7.1. Permanent Disability retirements, under Title IV of the Career Compensation Act of 1949 (10 U.S.C., 1201-1221), are given when:

4.1.7.1.1. There is no doubt as to the degree or permanence of the disability at the time of initial retirement.

4.1.7.1.2. By periodic examination of temporary disability and Fleet Reserve rolls, it is determined that permanent disability exists.

4.1.7.2. Fleet Reserve status, under Title II of the Naval Reserve Act of 1938, as amended (10 U.S.C., 6330, 6331), is given when: Enlisted personnel of the Navy and Marine Corps having 20 but less than 30 years’ service may be transferred to the inactive Fleet Reserve with retainer pay at rates prescribed by law. They remain in the Fleet Reserve until their status is changed by reason of:

4.1.7.2.1. Completion of 30 years’ service.

4.1.7.2.2. Recall to active duty.

4.1.7.2.3. Physical unfitness for further military service.

4.1.7.2.4. Death.

4.1.7.3. Survivors’ Benefits payments, under the old Retired Serviceman’s Family Protection Plan, and the new Survivor Benefit Plan (SBP), are provided on the following basis:

4.1.7.3.1. Two of the benefits are contributory: the old Serviceman’s Family Protection Plan and the new Survivor Benefit Plan (SBP). Under both of the contributory benefits, a member of the uniformed services may elect to receive a reduced amount of any retired pay that may be awarded him/her in order to provide one or more annuities to his/her survivors, as specified by law. The basic options include the choice of annuities to provide for (1) surviving spouse, (2) surviving children, (3) surviving family, including both spouse and children, or (4) other persons with insurable interest (under the new plan only).

4.1.7.3.2. The other two benefits are noncontributory, both the Guaranteed Minimum Income and the Dependency and Indemnity Compensation (DIC) Supplemental Payments. The Guaranteed Minimum Income has a special provision benefiting women who are now widows of deceased members of the Uniformed Services who were receiving, or were entitled to receive, retired pay. The provision that guarantees these widows annual incomes will not fall below a certain amount. The DIC Supplemental Payments provide supplemental payments to widows of retirement-eligible members who die on active duty if DIC payments (by VA) are less than the maximum payments that the widow would have received if the member had been retired. The SBP payments covering the difference between the two will be paid.

4.1.8. Budget Subactivities. The budget subactivities are established to show the
retirement benefits associated with a particular personnel classification. Subactivities for Regular Officers, Regular Enlisted, Nonregular Officers, and Nonregular Enlisted are used for Budget Activities 1, 2 and 3; Budget Activity 4 has only the two enlisted classifications; and Budget Activity 5 now has four subactivities showing survivors covered under (1) the Old Plan (RSFPP), (2) the New Plan (SBP), (3) Guaranteed Minimum Income (to current widows), and (4) DIC Supplemental Payments (to future widows).

5.0 DoD MILITARY PERSONNEL - CIVIL FUNCTIONS (0205)

5.1 Purpose (020501)

This Section prescribes the justification material required for the Military Personnel civil function trust fund accounts.

5.2 Military Retirement Fund/Education Benefits Fund/Retiree Health Care Fund (020502)

5.2.1. Appropriate exhibits and schedules will be prepared by OUSD(C) P/B, Military Personnel and Construction Directorate unless specified otherwise in the annual OUSD(C) guidance memorandum.

5.2.2. Unless otherwise specified, exhibit requirements will only include the Program and Financing Schedule and a Status of Fund for the Military Retirement Fund, the Education Benefits Fund, and the Uniformed Services Retiree Health Care Fund.

6.0 BASELINE MILITARY PERSONNEL APPROPRIATION SUBMISSION FORMATS (0206)

6.1 Purpose (020601)

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

INSTRUCTIONS FOR COMPLETION OF EXHIBIT
ANALYSIS OF APPROPRIATION CHANGES AND SUPPLEMENTAL REQUIREMENTS

FY 20CY President’s Budget - Show costs as included in the original FY 20CY President’s Budget request. The total of all such costs should equal the FY 20CY appropriation request.

Congressional Action - Show the delta(s) associated with final congressional action on the FY 20CY appropriations request.

Appropriation – Show the final funding level appropriated by Congress for the FYCY. This value should tie explicitly by budget activity and total to the values reported on the DD 1414 Base for Reprogramming.

Internal Realignment/Reprogramming - Include those adjustments, which are necessary to align the amounts shown in the appropriation column of this exhibit with the FY 20CY column of the FY 20BY President’s Budget exclusive of other price/program changes described below.

Subtotal – Should include the appropriated amount plus or minus internal realignments/reprogrammings.

Proposed DD 1415 Actions - Amounts shown in this column would include approved reprogrammings/transfers.

FY 20CY Column of FY 20BY President’s Budget - Show amounts as included in the FY 20BY President’s Budget request. These amounts should be equal to the sum of the amounts shown in the preceding two columns.

NOTE: An explanation should be provided for each adjustment in excess of $1 million included in the column showing realignments and reprogramming. Such explanation should not be included as part of this exhibit, but rather should be submitted separately to the OUSD(C) (P/B) Military Personnel and Construction Directorate, Room 3C654, Pentagon.

* A separate similar exhibit must be prepared for enlistment bonuses and other incentive/bonuses not covered by other formats (i.e., Active bonuses exceeding $5,000 and Reserve component incentives and bonuses addressed in the Administration and Support subactivity).

**Examples:** Enlistment Bonus (EB), Critical Skills Retention Bonus (CSRB), Assignment Incentive Pay (AIP), Loan Repayment Program (LRP)

* This exhibit should be incorporated into the detailed justification material within the appropriate subactivity detail (i.e., Active within BA 2, Pay and Allowances of Enlisted, and Reserve Component within BA 2, Administration and Support subactivity).

* Additional columns must show thru FY 20BY+4 so that the outyear payment stream of bonus contracts granted in FY 20PY thru FY 20BY is shown.
NOTE: 1. Prior obligations are only anniversary payments associated with contracts entered into during preceding years.
2. Number of bonus recipients (initial or anniversary payments) must be entered in any year funds are entered.
3. Add additional BY columns as required for the total bonus contract period.
4. Initial payments are not to be shown in the outyears.
5. Accelerated payments are the remainder of entitlements due to enlisted personnel when separating early (not due to voluntary reasons or misconduct) and for advance payments related to financial hardship.
Exhibit PB-30X  Subactivity Detailed Justification (Active)

Program: *(e.g., Basic Pay)*  

<table>
<thead>
<tr>

<td>$xxxx,xxx</td>
<td>$xxxx,xxx</td>
</tr>
</tbody>
</table>

*A separate exhibit must be prepared for each M-1 line item reflecting subactivity detail. See sections 2.4.3 and 3.3.3 for more guidance.*

**Part I – Purpose and Scope**

Include a description of what the funds requested are for to include any references to legislative authorities.

**Part II – Justification of Funds Required**

Include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory, program enhancements, solving deficiencies, etc.).

<table>
<thead>
<tr>
<th>FY 20PY</th>
<th>FY 20CY Est</th>
<th>FY 20BY Est</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number Rate Amount</td>
<td>Number Rate Amount</td>
<td>Number Rate Amount</td>
</tr>
</tbody>
</table>

Program (e.g., Basic Pay)  

**Total**

Note: Average number may represent the number of workyears or average number of personnel budgeted to receive a particular type of pay.

For the Retired Pay Accrual (RPA) exhibit, each active military personnel account must include a breakout of the RPA costs by Active Duty Component (Full-Time) soldiers and Reserve Component (Part-time) soldiers who are mobilized or on active duty for operational support.
Exhibit PB-30Y Performance Measures and Evaluation Summary

**MILITARY PERSONNEL, ________ Performance Measures and Evaluation Summary**

**Activity:** Active Military Personnel

**Activity Goal:** Maintain the correct Active Military Personnel to execute the National Strategy.

**Description of Activity:** The Active Military Personnel appropriations provide resources necessary to compensate military personnel required to man approved force structure and support infrastructure, which include pay, allowances, individual clothing, subsistence, and permanent change of station.

### PERFORMANCE MEASURES:

<table>
<thead>
<tr>
<th>Measure</th>
<th>PY Actual</th>
<th>CY Planned</th>
<th>BY Planned</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Average Strength</strong></td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
</tr>
<tr>
<td><strong>End Strength</strong></td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
</tr>
</tbody>
</table>

**Authorized End Strength**

xxx,xxx

Include a narrative section after each measure to provide any important information concerning the data reflected, explanations for variances from targets, and a subjective assessment of the program’s performance and outlook. The narrative should also explain any differences in how the Services define these items. Include a statement referencing that this display provides the information to meet the Office of Management and Budget requirement for PART - Program Assessment Rating Tool.

**Recruiting**

1. **Numeric goals**
   - Total recruiting mission is compared to actual accessions for the fiscal year. The percent of goal accomplished is the measurement.
   - Actual
     - Total recruiting mission
     - xx,xxx

2. **Quality goals**
   - **HSDG percent**
     - Actual
       - xx%
   - **Test Score Category I-IIIA percent**
     - Actual
       - xx%

   a. The percent Tier 1 High School Degree Graduate (HSDG) is the measure, which is a measure of educational achievement - Total number of Tier 1 HSDG non-prior service accessions + Delayed Entry Program (DEP) is compared to total number of non-prior service accessions + DEP for the fiscal year. (DoD target is 90%)
b. The percent CAT I-IIIA is the measure - Total number of non-prior service accessions + DEP who scored at or above 50th percentile (CAT I-IIIA) is compared to total number of non-prior service accessions + DEP for the fiscal year. (DoD target is 60%. CAT I-IIIA - scores at or above 50 on the Armed Forces Qualification Test (measure of aptitude). CAT IV - percentages are not shown as the Services historically have no difficulty meeting the 4% limitation.)

The narrative for recruiting should explain that the numeric goals will change between budget and fiscal year completion and why Services resource to quality levels while the DoD benchmarks are lower.

(Page 1 of 2)
Main Category: This should list either Recruiting or Retention.

Appropriation: MPA, MPN, MPMC or MPAF

Officer/Enlisted: This should list the applicable personnel receiving the recruiting/retention funding – Officer, Enlisted or Cadets/Midshipmen

Entitlement: The following is a list of recruiting and retention programs previously reported to OUSD(C) Military Personnel and Construction Directorate (MPC). Please use this list and include any additional programs not identified that should be captured under recruiting and retention. These additional items should be highlighted to the OSD analyst for future inclusion.

| College First                                                                 | Loan Repayment Program |
| College Fund                                                                | Matching Thrift Saving Plan |
| Critical Skills Accession Bonus                                             | Montgomery GI Bill (MGIB) |
| Critical Skills Retention Bonus                                             | National Call to Service |
| Enlistment Bonus                                                            | Recruitment Referral Bonus |
| Health Profession (HP) Accession Bonus                                      | Selective Reenlistment Bonus |

Entitlement Sub-Categories: The following is a list of examples of further breakout of specific entitlements previously reported to OUSD(C) Military Personnel and Construction Directorate (MPC). Please use this list and include any additional breakouts not identified that should be captured under each entitlement.

| Critical Skills Accession Bonus | Critical Skills Retention Bonus | HP Accession Bonus | HP Retention Bonus |
| Dentist                        | Medical CSRB                   | Dentist Accession Bonus | Dental Multi-Year Retention Bonus |
| Nuclear Accession Bonus         | Dental CSRB                   | Nurse Accession Bonus | Optometrist Multi-Year Retention Bonus |
| SPECWAR                        | Physician Asst CSRB           | Pharmacy Accession Bonus | Optometry Retention |
| Warrant Officers, CID           | Psych Diplomate & Non-Physician | Physician Accession Bonus | Physician Multi-Year Special Pay |
| Warrant Officers, Military Intel | Company Grade/Captain CSRB    | Physician – Critical War Skills Accession Bonus | |
| Warrant Officers, Special Forces | Enlisted Supervisor Retention Pay | Psychologist Accession Bonus | |
|                                 | EOD/Seal/Master Diver          | Public Health Officer Accession Bonus | |
|                                 | Intel                         |                           | |
|                                 | NSW                           |                           | |

Additional Instructions: This exhibit is to be included in the backup justification book. Additionally, OSD(C) will provide each Component with their specific MP-16 spreadsheet and each Component must submit it electronically to OUSD(C) Military Personnel and Construction Directorate.

Examples

Pay and Allowances Army Working Capital Fund

Pay and Allowances DIA

Subsistence-in-Kind Dept of State

Total 3/

1/ Mission Description must be unclassified. For intelligence related activities, the mission description should simply state “Intelligence Related”.

2/ Only specify account if within DoD (e.g., Army Working Capital Fund), otherwise specify reimbursing organization.

3/ Total must match CIS controls and Justification Book amounts for reimbursable authority.

A direct appropriation is provided for paying military personnel; therefore, the cost of military labor shall not be charged to another DoD entity except for:

- Military personnel assigned to the Defense Working Capital Fund activities;
- If provided in the annual DoD Appropriations Act, National Guard and Reserve members who provide intelligence or counterintelligence support to Combatant Commands, Defense Agencies and Joint Intelligence Activities, including the activities and programs included within the National Intelligence Program and the Military Intelligence Program; and
- National Guard and Reserve personnel conducting military-to-military contacts as authorized in 10 U.S.C. 168 and utilizing funds specifically appropriated for that purpose.

Military labor shall be charged to non-DoD organizations on the basis of the actual hours worked or assigned.

**Exhibit PB-30K Analysis of Appropriation Changes (Reserves) Continued**

*Page 4 of 5*
INSTRUCTIONS FOR COMPLETION OF EXHIBIT
ANALYSIS OF APPROPRIATION CHANGES AND SUPPLEMENTAL REQUIREMENTS

FY 20CY President’s Budget - Show costs as included in the original FY 20CY President’s Budget request. The total of all such costs should equal the FY 20CY appropriation request for each line item.

Congressional Action - Show the delta(s) associated with final congressional action on the FY 20CY appropriations request.

Appropriation – Show the final funding level appropriated by Congress for the FY CY. This value should tie explicitly by budget activity and total to the values reported on the DD 1414 Base for Reprogramming.

Internal Realignment/Reprogramming - Include those adjustments, which are necessary to align the amounts shown in the appropriation column of this exhibit with the FY 20CY column of the FY 20BY President’s Budget exclusive of other price/program changes described below.

Subtotal – Should include the appropriated amount plus or minus internal realignments/reprogrammings.

Proposed DD 1415 Actions - Amounts shown in this column would include approved reprogrammings/transfers.

FY 20CY Column of FY 20BY President’s Budget - Show amounts as included in the FY 20BY President’s Budget request. These amounts should be equal to the sum of the amounts shown in the preceding two columns.

NOTE: An explanation should be provided for each adjustment in excess of $1 million included in the column showing realignments and reprogramming. Such explanation should not be included as part of this exhibit, but rather should be submitted separately to the OUSD(C) (P/B) Military Personnel and Construction Directorate, Room 3C654, Pentagon.

<td>$xxxx,xxx</td>
</tr>
</tbody>
</table>

*A separate exhibit must be prepared for each M-1 line item reflecting subactivity detail. See section 3.3.3 for more guidance.*

**Part I – Purpose and Scope**

Include a description of what the funds requested are for to include any references to legislative authorities.

**Part II – Justification of Funds Required**

Include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory, program enhancements, solving deficiencies, etc.).

</tbody>
</table>

Note: Average number may represent the number of workyears or average number of personnel budgeted to receive a particular type of pay.
Exhibit PB-30Y Performance Measures and Evaluation Summary (Reserves)

**RESERVE PERSONNEL, __________________**

**Performance Measures and Evaluation Summary**

**Activity:** Active Reserve/Guard Military Personnel

**Activity Goal:** Maintain the correct Reserve/Guard Active Military Personnel to execute the National Strategy.

**Description of Activity:** The Reserve/Guard Active Military Personnel appropriations provide resources necessary to compensate military personnel required to provide trained units and qualified personnel in the Armed Forces in time of war, or national emergency, and at such other times as the national security requires. The Reserve/Guard also fills the needs of the Armed Forces whenever more units and persons are needed than are in the Active component to achieve the planned mobilization.

### PERFORMANCE MEASURES:

<table>
<thead>
<tr>
<th>Measure</th>
<th>FY 20xx Actual</th>
<th>FY 20xx Planned</th>
<th>FY 20xx Planned</th>
</tr>
</thead>
<tbody>
<tr>
<td>Average Strength</td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
</tr>
<tr>
<td>End Strength</td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
</tr>
<tr>
<td>Authorized End Strength</td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
<td>xxx,xxx</td>
</tr>
</tbody>
</table>

Include a narrative section after each measure to provide any important information concerning the data reflected, explanations for variances from targets, and a subjective assessment of the program’s performance and outlook. The narrative should also explain any differences in how the Services define these items. Include a statement referencing that this display provides the information to meet the Office of Management and Budget requirement for PART - Program Assessment Rating Tool.

Directions:
- For each military personnel appropriation, provide estimated monthly direct obligations for the current year by each budget subactivity.
- Include lines for both incremental monthly obligations and cumulative (Cum.) obligations year-to-date for each budget subactivity.
- Include a monthly phasing of reimbursable obligations and a total gross program at the bottom of the phasing.
- Budget activity totals must match the current year (CY) amounts reflected in the Comptroller Information System (CIS).

Main Category: This should list either Recruiting or Retention.

Appropriation: RPA, RPN, RPMC, RPAF, NGPA, or NGPAF

Officer/Enlisted: This should list the applicable personnel receiving the recruiting/retention funding – Officer or Enlisted

Entitlement: The following is a list of recruiting and retention programs previously reported to OUSD(C) Military Personnel and Construction Directorate (MPC). Please use this list and include any additional programs not identified that should be captured under recruiting and retention. These additional items should be highlighted to the OSD analyst for future inclusion.

- Accession Bonus
- Affiliation Bonus
- AFHPSP Critical Skills Accession Bonus (CSAB)
- College First
- College Fund
- Critical Skill Retention Bonus (CSRB)
- Critically Short Wartime Health Specialist
- Reserve Educational Assistance Program (REAP) (Chapter 1607)
- Enlistment Bonus (EB)
- Health Professional (HP) Cash Bonus
- Health Professional (HP) Loan Repayment Program
- Health Professional Medical Officer Recruiting Program (HPMORP)
- Health Professional (HP) Stipend Bonus
- IRR Bonus
- Loan Repayment Program
- Medical Recruiting Bonus
- Medical Stipend/Recruiting Bonus Test
- Montgomery GI Bill Selected Reserve (MGIB-SR) (Chapter 1606)
- MOS Conversion Bonus
- Nurse Candidate Program (Bonus & Stipend)
- Nurse Candidate Program Accession Bonus
- Officer Deferment Bonus
- Prior Service Bonus (new payments)
- Prior Service Bonus (anniversary payments)
- Recruitment Referral Bonus
- Specialized Training Assistance Program
- Selective Reenlistment Bonus (SRB)
- Tuition Assistance

Entitlement Sub-Categories: The following is a list of examples of further breakout of specific entitlements previously reported to OUSD(C) Military Personnel and Construction Directorate (MPC). Please use this list and include any additional breakouts not identified that should be captured under each entitlement.

- Critical Skills Accession Bonus
- Enlistment Bonus
- Selective Reenlistment Bonus (SRB)
- Chapter 1606/1607

</tbody>
</table>

¹/ Mission Description must be unclassified. For intelligence related activities, the mission description should simply state “Intelligence Related”.

²/ Only specify account if within DoD, otherwise specify reimbursing organization.

³/ Total must match CIS controls and Justification Book amounts for reimbursable authority.

A direct appropriation is provided for paying military personnel; therefore, the cost of military labor shall not be charged to another DoD entity except for:

- Military personnel assigned to the Defense Working Capital Fund activities;
- If provided in the annual DoD Appropriations Act, National Guard and Reserve members who provide intelligence or counterintelligence support to Combatant Commands, Defense Agencies and Joint Intelligence Activities, including the activities and programs included within the National Intelligence Program and the Military Intelligence Program; and
- National Guard and Reserve personnel conducting military-to-military contacts as authorized in 10 U.S.C. 168 and utilizing funds specifically appropriated for that purpose. Military labor shall be charged to non-DoD organizations on the basis of the actual hours worked or assigned.
7.0 OVERSEAS CONTINGENCY OPERATIONS (OCO) MILITARY PERSONNEL APPROPRIATION SUBMISSION FORMATS (0207)

7.1 Purpose (020701)

7.1.1. The formats provided on the following pages reflect required exhibits for the Overseas Contingency Operations (OCO) justification book. Unless modified in a submission budget call, these formats should be adhered to. Justification material for the OCO Request is to be submitted under separate cover.

7.1.2. In addition to deployed strength, estimates should include required levels of Reserve Component personnel who are called to active duty in support of approved contingency operations, but not deployed OCONUS. This includes not only those preparing for deployment (e.g., training) but personnel in a leave status upon return.

7.1.3. Operational changes driving force level changes from the current year budgeted OCO level to the budget year OCO estimate must be fully explained and consistent with the approved troop strength planning assumptions (provided in separate guidance).

7.1.4. Each Service is required to provide a single justification book, with sections for the Active, Reserve, and National Guard appropriations. The M-1 exhibits and overview explanations must include all Components (i.e., Active, Reserve, and National Guard).

7.1.5. Microsoft Excel tables reflecting all of the tables in the submission must be provided for OSD analysts review. The justification books must include the following:

7.1.5.1. Table of Contents

7.1.5.2. Overview

7.1.5.3. M-1 Detail

7.1.5.4. Detailed exhibits by the following major categories in the order of the M-1 line items.

7.1.5.4.1. Reserve and Guard Mobilization

7.1.5.4.2. Active Deployment Costs

7.1.5.4.3. Overstrength Costs

7.1.5.4.4. Subsistence-in-Kind

7.1.5.4.5. Permanent Change of Station (PCS)

7.1.5.4.6. Casualty and Disability Benefits

7.1.5.4.7. Additional Mobilization/Deployment Costs
7.1.5.4.8. Pre and Post Mobilization Training

7.1.5.5. The justification material for the OCO estimate must be presented at the M-1 line item level and further broken down by major category such as mobilization, active deployment, and overstrength. Generally, the exhibits will mirror the regular justification book submission for the Active Components. One exception is that by-grade-level detail will not be required.

7.1.5.6. Costs for mobilization, Active deployment, and overstrength must be separately identified on each exhibit as applicable (e.g., basic pay, retired pay accrual, basic allowance for housing, etc.). All Active special pays will be categorized as active deployment costs in the summary tables.

7.1.5.7. For the Reserve Components, the level of detail is also at the M-1 level. For all budget line items, Part II, Justification of Funds Required, must describe specific details of the OCO requirements and should not be general in nature.

7.1.5.8. Each OCO exhibit will reflect prior year, current year, and budget year. The prior year amount should match projected obligations that will be reported on the Cost of War report for the Program/Budget submission (BES) and actual obligations on the Cost of War report for the President’s Budget submission. The current year column will reflect total projected obligations in support of approved contingency operations. The budget year column will reflect the total requested amount for approved contingency operations. The budget year request must display total requirements for approved contingency operations consistent with the Program Resources Collection Process (PRCP) system.

7.2 Exhibits in support of Military Personnel OCO Request. (020702)

The following exhibit formats are provided for the combined Active Military Personnel and Reserve Component Personnel Appropriations justification book.

- Exhibit OCO-1 – OCO Military Personnel Overview
- Exhibit OCO-2 – OCO M-1 Exhibit
- Exhibit OCO-3 – OCO Subactivity Detailed Justification
Exhibit OCO-1 – OCO Military Personnel Overview

MILITARY PERSONNEL OVERVIEW

Introduction
Provide explanation of why this request is necessary.

The FY 20BY request includes $x,xxx million for the (Service) military personnel costs as shown in the following table:

FY 20BY Request Summary
The FY 20BY military personnel request of $x,xxx million is comprised of the following major costs:

**Reserve & Guard Mobilization ($x,xxx million)**
Provide explanation of why this request is necessary.

**AC Deployment Costs ($x,xxx million)**
Provide explanation of why this request is necessary.

**Other Mobilization and Deployment Costs ($x,xxx million)**
Provide explanation of why this request is necessary.

**Active Component Overstrength ($x,xxx million)**
Provide explanation of why this request is necessary.

**Subsistence-in-Kind (SIK) ($x,xxx million)**
Provide explanation of why this request is necessary.

**Permanent Change of Station ($x,xxx million)**
Provide explanation of why this request is necessary.

**Casualty and Disability ($x,xxx million)**
Provide explanation of why this request is necessary.

**Pre and Post Mobilization Training ($x,xxx million)**
Provide explanation of why this request is necessary.

Exhibit OCO-3 – OCO Subactivity Detailed Justification

**Appropriation:**

Budget Activity x:  Title (e.g. Budget Activity 1: Pay and Allowance of Officers)

Budget Line Item: * (e.g., Basic Pay)

FY 20BY
($ in Thousands)
Sxxx,xxx

*A separate exhibit must be prepared for each M-1 line item. See M-1 exhibit (Exhibit OCO-2)*

**Part I – Purpose and Scope**

Include a description of what the funds requested are for to include any references to legislative authorities.

**Part II – Justification of Funds Required**

Include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory, program enhancements, solving deficiencies, etc.).

Note: Average number may represent the number of workyears or average number of personnel budgeted to receive a particular type of pay.
VOLUME 2A, CHAPTER 3: “OPERATION AND MAINTENANCE APPROPRIATIONS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated June 2007 is archived.

CHAPTER 3

OPERATION AND MAINTENANCE APPROPRIATIONS

1.0 GENERAL (0301)

1.1 Purpose (030101)

1.1.1. This Chapter covers the budget formulation and congressional justification requirements for operation and maintenance appropriations for the baseline and overseas contingency operations (OCO) requirements. Volume 12 chapter 23 section 2309 provides the guidelines for determining war/overseas contingency operations costs.

1.1.2. The following appropriations and accounts are covered:

Paragraph 2.1

Operation and Maintenance, Army
Operation and Maintenance, Army Reserve
Operation and Maintenance, Army National Guard
Operation and Maintenance, Navy
Operation and Maintenance, Navy Reserve
Operation and Maintenance, Marine Corps
Operation and Maintenance, Marine Corps Reserve
Operation and Maintenance, Air Force
Operation and Maintenance, Air Force Reserve
Operation and Maintenance, Air National Guard
Operation and Maintenance, Defense-Wide
Office of the Inspector General
Defense Health Program
Former Soviet Union Threat Reduction
Overseas Contingency Operations Transfer Fund
Overseas Humanitarian, Disaster Assistance, and Civic Aid
Support of International Sporting Competition, Defense

Paragraph 2.2

United States Court of Military Appeals for the Armed Forces

1.2 Submission Requirements (030102)

1.2.1. General guidance with regard to submission requirements is presented in Chapter 1. Chapter 3 covers specific back-up material requirements for the above accounts. The Components should also consult all of the other chapters for exhibit requirements for the above appropriations/accounts that are not specifically addressed in this chapter including Chapter 19-Other Special Analyses. (See Volume 2A, Chapter 1, and Volume 2B, Chapter 19)
1.2.2. For designated exhibits, the Department will collect both POM and budget data through the SNaP (Select & Native Programming Data Input System) process. In addition, the Military Departments and applicable Defense Agencies shall develop and submit to the Comptroller separate narrative justification material (including any program increases and decreases) for their respective programs as part of their Program and Budget Review Submission.

1.3 Preparation of Material (030103)

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapters 8 (Facilities Sustainment and Restoration/Modernization), 12 (Defense Health Program), and 19 provide additional specific guidance with regard to the back-up material required in this section of the manual. (See Volume 2A, Chapter 1 and Volume 2B, Chapters 8, 12 and 19).

1.4 References (030104)

Paragraph 010212 provides policies and definitions concerning costs that are to be financed by the O&M appropriations as opposed to other appropriations in the Research, Development, Test and Evaluation (RDT&E) area. Paragraph 010201 provides policies and definitions regarding the application of expense and investment criteria for budgetary purposes.

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION (0302)

2.1 Operations Accounts (030201)

2.1.1 Purpose. This Section prescribes justification materials required to support the budget estimates for the following operations accounts:

- Operation and Maintenance, Army; Army Reserve; and Army National Guard
- Operation and Maintenance, Navy and Navy Reserve
- Operation and Maintenance, Marine Corps and Marine Corps Reserve
- Operation and Maintenance, Air Force; Air Force Reserve; and Air National Guard
- Operation and Maintenance, Defense-Wide
- Office of the Inspector General
- Defense Health Program
- Former Soviet Union Threat Reduction
- Support for International Sporting Competitions, Defense
- U.S. Court of Appeals for the Armed Forces
- Overseas Contingency Operations Transfer Fund
- Overseas Humanitarian, Disaster Assistance, and Civic Aid

2.1.2 Submission Requirements. All Operation and Maintenance appropriations are required to submit the back-up exhibits listed in the following table, if appropriate. An exception is that the OP 50 and OP 78 exhibits will be submitted on an as needed basis. Examples of these exhibits, along with instructions for their preparation, are provided in Section 4.0. The Components should also consult all of the other chapters for exhibit requirements which are not specifically addressed in this chapter including Chapter 19 - Other Special Analyses. (See section 4.0, below and Chapter 19)

* December 2010
2.1.3. Preparation of Material. The following instructions pertain to the back-up material required by this Section.

2.1.3.1. The information will cover the prior year (PY), current year (CY), and budget year (BY), unless otherwise indicated.

2.1.3.2. Operation and Maintenance data will be submitted in terms of obligations.

2.1.3.3. Additional data may be provided by expanding the prescribed formats and exhibits, or by cross-referencing to additional exhibits, where prescribed material is considered inadequate to justify requested programs or estimates. No prescribed material may be omitted unless inapplicable or unless the omission is specifically approved by the OUSD (Comptroller) P/B. The inapplicable stubs and column headings may be omitted but will not be redesignated when completing standard exhibits.

2.1.3.4. The purpose of the back-up exhibits is to describe the program and justify the estimates. If the data collection systems or management systems utilized provide for cost accounts or program units or workload indicators different from those specified in this section, Components should request OUSD (Comptroller) P/B to change the provisions of this regulation.

2.1.3.5. The use of annex exhibits to reduce bulk is encouraged providing the required material is fully covered and presented in a logical manner. Machine printouts of required data will be accepted but should be designed to minimize bulk. Narrative data related to machine printouts should be assembled with the most appropriate page of the printout in a consistent manner.

2.1.4. OMB Circular No. A-11

2.1.5. Facilities Sustainment and Restoration/Modernization (FSRM) and Demolition

Each Component must ensure that the OP-5, Attachment 4 (Facilities Sustainment and Restoration/Modernization (SRM), and Demolition) and PBA-7 FSRM and Demolition in section 4.2 of this chapter are submitted to the Military Personnel and Construction Directorate (Room 3C654) on the same date as all other submissions required under this chapter. (See Volume 2B, Chapter 8) Each Defense Agency is required to complete these exhibits. Data used to
develop estimates should be consistent with data identified in the automated OP-32 for the Facilities Sustainment, Restoration & Modernization subactivity and data contained in the Facilities Data Quality Assurance.

2.1.6. Copies of back-up material in support of budget estimates will be submitted as identified in Section 3.2. Two additional copies of the OP-5 exhibits for Security Programs will be delivered to Director for Military Personnel and Construction, OUSD (COMPTROLLER) P/B, Room 3C654, Pentagon, on the same date as all other submissions required under this Chapter.

2.1.7. Automated Submissions

2.1.7.1. Automated submissions are required for the following exhibits for both the OSD/OMB Budget Estimate Submission and the President’s budget request:

<table>
<thead>
<tr>
<th>Group/Subactivity Group (PRCP)</th>
<th>O&amp;M Funding by Budget Activity/Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>O-1</td>
<td>OP-8 Civilian Personnel Costs (PRCP)</td>
</tr>
<tr>
<td></td>
<td>OP-20 Flying Hours Program (SNaP)</td>
</tr>
<tr>
<td></td>
<td>OP-30 Depot Maintenance Program (SNaP)</td>
</tr>
<tr>
<td></td>
<td>OP-32 Price and Program Growth by Subactivity Group (PRCP)</td>
</tr>
<tr>
<td></td>
<td>OP-41 Ship Operating Cost Data (SNaP)</td>
</tr>
<tr>
<td></td>
<td>PB-20 Aircraft Inventory (Excel Spreadsheet)</td>
</tr>
</tbody>
</table>

Additional guidance on the automated submission requirements is provided in Chapter 1, sections 010502 and 0109 and in this chapter, section 4.0.

2.1.7.2. In addition to the appropriations and accounts listed in paragraph 2.1, an OP-32, Price and Program Growth Exhibit for BOTH the OSD/OMB submission and the President’s budget request will be submitted for the following appropriations and accounts with the Program Managers annotated in parentheses:

- Environmental Restoration, Army (Department of Army)
- Environmental Restoration, Navy (Department of Navy)
- Environmental Restoration, Air Force (Department of Air Force)
- Environmental Restoration, Defense-Wide (ODASD(ES), OUSD(AT&L))
- Environmental Restoration, Formerly Used Defense Sites (Department of Army)
- Defense Against Weapons of Mass Destruction (OUSD(C)/PB/O&P)
- Emergency Response Fund, Defense (OUSD(C)/PB/O&P)
- OPPLAN 34 A-35 P.O.W. (OUSD(C)/PB/O&P)
- Special Olympics World Games (Department of Army)
- Quality-of-Life Enhancements, Defense (OUSD(C)/PB/MILCON)
- Drug Interdiction/Counterdrug Activities, Defense
- Payment to Kaho’Olawe (Department of Navy)
- Pentagon Renovation Transfer Fund (Washington Headquarters Service)
2.1.7.3. The electronic submission will be the official submission of these exhibits. Hard copies of the exhibits should be generated from the PRCP or SNaP electronic database.

2.2 U.S. Court of Military Appeals for the Armed Forces (030202)

2.2.1. **Purpose.** This Chapter prescribes budget justification backup requirements for the appropriation “United States Court of Appeals for the Armed Forces.”

2.2.2. **Submission Requirements**

2.2.2.1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following: (See Volume 2A, Chapter 1)

- **Appropriation Language.** Submit justification for proposed changes.

- **Purpose and Scope.** Describe the missions and functions of the Court of Military Appeals.

- **Summary of Obligations by Object Classification.**

- **Summary of Personnel by Grades.** Show the number of civilian positions in each grade, the number of statutory positions, total permanent positions, lapse, and workyears.

- **Summary of Price and Program Changes.**

- **Explanation of Estimate.** Explain changes in costs and provide a statement of case workload and opinions rendered.

Also include applicable exhibits required by Section 2.1 and any of the other chapters of this regulation including Chapter 19 – Other Special Analyses. (See Volume 2B, Chapter 19)

2.2.2.2. Chapter 1 identifies copies of the above material required.

2.3 Civil Functions-Operation and Maintenance (030203)

2.3.1. **Purpose.** This Chapter prescribes budget justification backup requirements for the civil functions appropriations.

2.3.2. **Cemeterial Expenses (Department of the Army).**

2.3.2.1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following. All data will be provided for the past (PY), current (CY), and budget year (BY) fiscal years. (See Volume 2A, Chapter 1)

2.3.2.1.1. **Appropriation Language.** Submit justification for proposed changes.
2.3.2.1.2. **Multiyear Financial Plans.** Show budget authority and outlays by budget project and in total for the past (PY), current (CY), and budget year (BY) fiscal years and for 4 subsequent fiscal years. Also show planned end-of-year employment (permanent positions and other positions) by budget project and in total for the same years.

2.3.2.1.3. **Analysis of Budget Authority (BA) and Outlays.** Show BA and outlays by budget project and in total. Also show the difference between the budget year (BY) and the current year (CY) and the outlays in the budget year (BY) resulting from BA in the budget year (BY).

2.3.2.1.4. **Program and Performance.** Describe the major workload considerations and activity factors on which the estimates for each budget project have been based.

2.3.2.1.5. **Summary of Obligations by Object Classification.**

2.3.2.1.6. **Statement Relating Past Year (PY), Current Year (CY), Budget Year (BY) Programs.** List the increases and decreases necessary to reconcile the obligations incurred in each year with an analysis by budget project showing the obligations for each year and the related increases and decreases between each year.

2.3.2.1.7. **Project 0861 - Operation and Maintenance.** Provide narrative justification and amounts for each project classification within the project. Separately identify yearend employment (end strength) and workyears for supervisory, interment and maintenance categories.

2.3.2.1.8. **Project 0864 - Administration.** Provide narrative justification and amounts for each object classification within the project. Separately identify yearend employment (end strength) and workyears for National Cemetery activities, headstone activities, and administrative services and staff planning.

2.3.2.1.9. **Project 0865 - Special Construction, Arlington National Cemetery.**

2.3.2.1.9.1. Provide amounts by each object classification within the project. Separately identify yearend employment (end strength) and workyears.

2.3.2.1.9.2. List and provide a narrative justification and amount for each planned construction or development project.

2.3.2.1.10. **Report of Motor Vehicle Data.** Provide the following summary:

2.3.2.1.10.1. Fleet as of October 1.

2.3.2.1.10.2. Acquisitions:

2.3.2.1.10.2.1. New orders placed
2.3.2.1.10.2.2. By forfeiture

2.3.2.1.10.2.3. By transfer

2.3.2.1.10.3. Number disposed of (deduct):

2.3.2.1.10.3.1. Disposals accomplished (carryover)

2.3.2.1.10.3.2. Disposals accomplished (newly scheduled)

2.3.2.1.10.4. Vehicles replaced (newly scheduled).

2.3.2.1.10.5. Active fleet, September 30 \((a + b + c)\).

2.3.2.1.10.6. Vehicles unused on a term basis (add).

2.3.2.1.10.7. Total vehicles available full-time \((e + f)\).

2.3.2.1.10.8. Obligations for vehicles ordered.

**Personnel Justification.** Submit Exhibit OP-8 and OP-9 which are described in Section 2.1 and an example of which is found in Section 4.0. (See section 2.1, above and section 4.0, below)

2.3.2.2. Chapter 1 identifies copies required of the above material.

2.3.3. Wildlife Conservation, Etc., Military Reservations; Forestry Program (Department of Army).

2.3.3.1. In addition to the Program and Financing Schedule and Personnel Summary, submit an Exhibit OP-5 prescribed in Section 2.1 and an example of which is provided in Section 4.0. (See section 2.1, above and section 4.0, below)

2.3.3.2. Chapter 1 identifies copies required of the above material.
3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (0303)

3.1 Purpose (030301)

This Section presents the justification book organization and the exhibit requirements for submission to Congress. Examples of budget exhibits can be found in Section 4.0.

3.2 Submission Requirements (030302)

For designated exhibits, the Military Departments and applicable Defense Agencies will update the SNaP immediately upon completion of the Program Budget Decisions and budget lock by the Department. In addition, the Military Departments and applicable Defense Agencies shall provide the USD(Comptroller) with a revised narrative justification for their respective programs reflecting any changes from the program and budget review. The SNaP system will reformat the data into congressional justification exhibits, which can be printed out by the respective Components and included in their justification materials.

All O&M overview exhibits are to be submitted via email to OPSMAIL@osd.mil in a MICROSOFT WORD format. Submit each Overview exhibit as a separate file. Embedded Excel Spreadsheets should be used for tables included in the Word document as required.

*3.3 Organization of Justification Books (030303)

3.3.1. Justification Books will be organized into separate books for each appropriation. The only exceptions to organizing justification books into separate books for each appropriation are for the United States Court of Military Appeals for the Armed Forces and the Office of the Inspector General appropriations. These should be included in the same book as the Defense-Wide. The Defense Health Program (DHP) will be a separate justification book. The procurement and RDT&E DHP budget activities will follow the organization prescribed for the procurement and RDT&E appropriations in Chapters 4 and 5, respectively. (See Volume 2B, Chapters 4 and 5)

3.3.2. Justification books for the Active Component of each Military Service should be organized into three volumes (in separate books) as follows:

3.3.2.1. Volume I - “Justification of Estimates”

3.3.2.2. Volume II - “Data Book”

3.3.2.4. Reserve and National Guard Components should combine the above volumes into one book for each Component.

3.3.3. The justification books for the Operation and Maintenance, Defense-Wide appropriation will include a Volume III classified volume in addition to the volumes for “Justification of Estimates” and “Data Book”.

3-14
3.3.4. Volume I - Justification of O&M Estimates. The Operation and Maintenance (O&M) Justification Books will be submitted on an operations basis to include active military force personnel strength, Reserve and National Guard personnel strength, and civilian personnel. (Related dollars financed from the active and Reserve military personnel appropriations, however, should not be included.) The content and arrangement of exhibits for the operations accounts are indicated at the end of this section. Applicable exhibits for the Reserve and Guard Component operations accounts will be consistent with the active operations accounts. Exhibit formats are provided in Section 4.0. Separate volumes for active and reserve component operation appropriations will be submitted. Funds for the National Intelligence Program (NIP) or Military Intelligence Program (MIP) will be specifically identified. Justification classification will not exceed that required for other operations funds. (See section 4.0, below)

3.3.5. Volume II - Data Book. The Data Book will include summary and special interest exhibits as well as the Facilities Sustainment and Restoration/Modernization (FSRM), and Demolition exhibits. The content and arrangement of exhibits for the operations accounts are included at the end of this section.

Two copies of the FSRM OP-5 and FSRM PBA-7 exhibits will be submitted to the Directorate for Military Personnel and Construction, OUSD (COMPTROLLER), P/B, Pentagon, Room 3C654 for review and approval.

3.3.6. Volume III – Overseas Contingency Operation (OCO). The OCO request will include the O-1 Line Item Summary, the OP-32 Price and Program Growth by Appropriation summary, the OCO OP-5, performance criteria, and the OP-32 Price and Program Growth by Subactivity Group for the operations defined in Volume 12 Chapter 23 Section 2309 or in the budget guidance.

3.3.7. Additional Accompanying Exhibits. Although not to be included in any of the Justification Books submitted to Congress, the exhibits at the end of this section are required to be submitted to the OUSD (Comptroller) P/B Directorate for Operations, Pentagon, Room 3C749, simultaneously with the submission of the other budget justification material. THESE EXHIBITS ARE NOT TO BE INCLUDED IN JUSTIFICATION BOOKS SUBMITTED TO THE CONGRESS. Examples are provided in Section 4.0 (O&M), Chapter 13 (Defense Environmental Restoration Program), or Chapter 19 (Other Special Analyses). (See Volume 2B, Chapters 13 and 19) (See section 4.0, below)

3.3.8. O&M Overview. The Operation and Maintenance Overview exhibits (PBA-xx) are required for submission to the OUSD (Comptroller) P/B Directorate for Operations, Pentagon, Room 3C749, and the OUSD (Comptroller) P/B Military Personnel and Construction Directorate, Pentagon, Room 3C654. Specific suspense dates will be furnished in the annual budget justification call memorandum supporting the President’s budget request. The parent service is responsible for ensuring that ALL required data including Reserve Component appropriations are submitted.

3.3.8.1. Exhibit formats are provided in Section 4.0. Each exhibit must provide narrative data to explain price and program changes between all fiscal years displayed. In addition, Components are responsible for cross checking data among the exhibits to ensure data provided is consistent among all PBA exhibits and all other exhibits supporting the President’s budget request, including the backup exhibits. (See section 4.0, below)
3.3.8.2. Two copies of each exhibit are required and will identify the Component, exhibit number and title, date prepared, and name/telephone number of the responsible point of contact for the exhibit. The exhibits will be consolidated at the Operation & Maintenance title level for printing and submission to the Congress. The Defense Agencies should provide as a minimum the PBA-7, PBA-19 and the PBA-20 exhibits and address resource requirements in one or more of the major mission categories as appropriate.

**ORGANIZATION/EXHIBIT REQUIREMENTS**
(Exhibits should be ordered as shown below)

**VOLUME I - JUSTIFICATION OF O&M ESTIMATES**

Table of Contents

Introductory Statement (use the PBA 19 exhibit - Appropriation Highlights)
O-1* O&M Funding by Budget Activity/Activity Group/Subactivity Group
OP-32* Appropriation Summary of Price/Program Growth
PB-31R Personnel Summary
PB-31D Summary of Funding Increases and Decreases
OP-5 Operation and Maintenance Detail by Subactivity Group (Exhibit formats are provided in Section 4.0)
PB-58 Combatant Command Direct Funding (Only submit if unable to provide OP-5).

**VOLUME II - DATA BOOK**

Table of Contents

PB-31Q** Manpower Changes in FTEs
PB-55 International Military Headquarters (CH. 19)
PB-24 Professional Military Education (CH. 19)
PB-15 Advisory and Assistance Services (CH. 19)
OP-34 Appropriated Fund Support for MWR Activities (SNaP Budget Years only)
OP-30* Depot Maintenance Program (SNaP Summary exhibit only)
Env-30A-C Defense Environmental Restoration Program (CH. 13)
PB-28/28A Summary of Budgeted Environmental Projects (CH. 19)
OP-31 Spares and Repair Parts
PB-34A Revenue from Leasing Out DoD Assets (CH. 8)
PB-34B Proceeds from Transfer or Disposal of DoD Real Property (CH. 8)

* Automated submission is also required.
** Input from Reserve and Guard organizations are to be consolidated by the parent Component (i.e., Army, Navy, Air Force) for submission to OSD. Guard and Reserve organizations should not include these exhibits in their submission.

Provide Budget Activity, Activity Group, and Subactivity subtotals funding levels.

All O&M Components including Defense Agencies must submit an automated O-1 for both the OSD/OMB and congressional submissions through the Program Resources Collection Process (PRCP). Components will submit data that shows the prior year (PY) through budget year +4 (BY+4). Automated submission requirements for the PCRP are provided in Chapter 1, section 5.2.
Exhibit OP-5 Instructions

INSTRUCTIONS FOR PREPARATION OF OP-5

1. Agencies/Activities are required to submit this exhibit at the lowest level of their budget structure. The purpose of the OP-5 is to provide a summary of and justification for changes in the level of resources required for each SAG.

2. The Combat Support Agent will submit an OP-5 for the new SAGs created by the Military Service, in accordance with the Joint Task Assignment Process business rules, for its Combatant Commands. Each Combat Support Agent will create two new SAGs, one SAG for Combatant Command Headquarters Functions and one for Combatant Command Missions. These SAGs will include only Combatant Command justification data and will include all Combatant Commands under the purview of the Combat Support Agent. Do not create separate SAGs for each Combatant Command. Price and Program changes will be reported separately by COCOM.

3. Each of the O&M appropriations listed below, will be supported by OP-5 Exhibits.

   Operation & Maintenance, Army, Army Reserve, and Army National Guard
   Operation & Maintenance, Navy and Navy Reserve
   Operation & Maintenance, Marine Corps and Marine Corps Reserve
   Operation & Maintenance, Air Force, Air Force Reserve, and Air National Guard
   Operation & Maintenance, Defense-Wide
   Defense Health Program
   Former Soviet Union Threat Reduction
   Office of the Inspector General
   United States Court of Military Appeals for the Armed Forces
   Wildlife Conservation, Etc., Military Reservations
   Overseas Humanitarian, Disaster, and Civic Aid
   Support of International Sporting Competition, Defense

4. The OP-5 provides essential information for justification of the OSD and President’s budget estimates. The "Reconciliation of Increases and Decreases" portions of Section III should identify what changes are occurring and provide programmatic reason for the changes and explain why they are necessary.

5. The FY PY estimate column of the OSD submit should reflect actual data through the first three quarters plus a realistic projection for the remaining quarter. For the PB submit, the FY PY column will reflect actuals and agree with the data reflected in the certified DD Comp 1002 report for September.

6. The “Reconciliation of Increases and Decreases” section will be included in the OP-5 for both the OSD budget submission and the President’s budget submission. Reconciliations will show all changes from fiscal year to fiscal year and, for the current year, a track from the estimate requested in the previous President's budget. Specifically display:

   • The FY BY estimate included in the previous President’s budget submission to the current FY CY estimate included in this submission,
   • The current FY CY estimate to FY BY estimate reflected in this submission.
INSTRUCTIONS FOR PREPARATION OF OP-5

7. Performance criteria must be provided for each OP-5 at the subactivity level and should support the dollar amounts being requested in the subactivity. Performance criteria for some subactivity groups are specified in the attachments to the OP-5 but additional criteria and metrics are encouraged. These data and metrics are critical to the successful defense of the budget request.

8. Personnel summaries are required for each subactivity group and for each Defense Agency.

9. With the exception of selected Defense Agencies, all Components will submit unclassified O&M justification materials.
Exhibit OP-5 Detail by Subactivity Group

Operation and Maintenance, 
Budget Activity 
Activity Group 
Detail by Subactivity Group 

I. **Description of Operations Financed:** Provide a narrative explanation characterizing the mission and major functions funded in the subactivity group. Include a separate explanation for each subactivity shown in Section IIIA, below. These explanations should address significant program initiatives/actions included in the budget.

II. **Force Structure Summary:** Provide a narrative explanation and identification of force structure supported by funding in this subactivity group.

III. **Financial Summary ($ in Thousand)**

**Reconciliation Summary Instructions:** For the changes in the Current Fiscal Year (FY CY), provide information from the President’s budget request for that fiscal year to the current estimate in this submission for that same fiscal year. For the changes from the FY CY to the FY BY, use the current estimate in this submission.

* The O&M budget is generally stratified into three levels: Level 1, Budget Activity (BA); Level 2, Budget Activity Group (BAG); and Level 3, Subactivity Group (SAG) (also referred to as O-1 line items). The O&M budget structure for some Defense Agencies/Activities stops at the BA or BAG level. The Defense Agencies/Activities are required to submit this exhibit at the lowest level of their budget structure.
C. Reconciliation of Increases And Decreases: Provide a trail of changes from the previous President’s budget request for the current fiscal year in this submission to the appropriated amount for the current FY CY in this submission to the current estimate for FY CY in this submission; and from the FY CY current estimate to the FY BY estimate. Provide a single entry in each year for price changes. Itemize and justify the major program changes in each year (provide the baseline in dollars to which the increase or decrease applies). Such justification should clearly explain programmatic changes in resource levels including why increases are required or decreases occur. Additionally, the narrative justification should relate cost to force structure changes, performance criteria, workload and manpower data, as well as identify the impact if requested changes are not funded. The DoD Components should report in thousands.

In the reconciliation of changes from the previous President’s budget request for the FY CY to the estimate for FY CY in the current submission, the DoD Components should include the following adjustments:

- Distributed Congressional Adjustments: Adjustments that Congress specifically makes to the President’s budget request. These adjustments must match the Appropriation Conference Report table and the FY CY Rebaseline Report (for Active Military Components only) at the subactivity group level.
- Undistributed Congressional Adjustments: Adjustments outlined on the tables contained in the statement of managers accompanying the appropriations conference report. The Components must use discretion as to how these adjustments are applied to minimize negative impacts on force readiness. These adjustments must match the Appropriation Conference Report table and the FY CY Rebaseline Report at the appropriation level and subactivity group level, respectively.
- Adjustments to Meet Congressional Intent: Adjustments that are required in order to align funding for a congressionally approved program into the proper budget activity and subactivity in order to carry out the intent of the Congress. These adjustments must match the FY CY Rebaseline Report at the subactivity group level.
- General Provisions: Adjustments directed by the Congress in appropriations law, the distribution of which is not explicitly stated. The OP-5 should separately display each General Provision adjustment. These adjustments must match the FY CY Rebaseline Report at the subactivity group level.
- Fact-of-Life Changes: The Operation and Maintenance (O&M) fact of life changes are programmatic, intra-appropriation adjustments made by DoD Components to address significant, unforeseen operational readiness issues within the following categories:
  1. Functional Transfers – Funding realignments to reflect a transfer of function, responsibility, or duty from one major command to another within each Military Department or Defense Agency. These adjustments do not change the purpose for which the funds were appropriated.
  2. Technical Adjustments – Accounting adjustments to properly align funding with the appropriate O&M subactivity group (SAG) where costs are actually accrued and executed. These adjustments do not change the purpose for which the funds were appropriated.

Exhibit OP-5 Detail by Subactivity Group
(Page 2 of 9)
3. Emergent Requirements – Adjustments to funding requirements resulting from changes in policy, legal direction, or other unforeseen (e.g., operational readiness, health or safety, etc. related) events that occurred after the submission of the President’s Budget.

These adjustments must not change the congressional priorities and are subject to congressional review as reported in the Rebaseline Report. The Rebaseline Report, as amended by any congressional action, will be used to develop the DD 1414, Base for Reprogramming Actions. See Volume 3, Chapter 6 regarding the policies for the reprogramming of O&M funds subsequent to the establishment of the base for reprogramming actions.
C. Reconciliation of Increases and Decreases:

FY CY President’s Budget Request (Amended, if applicable)

1. Congressional Adjustment (List Items) (Provide the baseline amount for each programmatic change.) (Separate amounts for Combatant Commands.)
   a) Distributed Adjustments (List Items)
   b) Undistributed Adjustments (List Items)
   c) Adjustments to Meet Congressional Intent (List Items)
   d) General Provisions (List Items)

Appropriated Amount (subtotal)  (Must agree with the “Revised Baseline” column of the FY CY Rebaseline Report.)

2. Fact-of-Life Changes (Note: Specify each item separately. For each adjustment, identify the sources (at the subactivity group level) from which funds were transferred into that activity, and identify the recipients (at the subactivity group level) of the funds transferred out of that activity. See previous instructions for a definition of the type of changes (emergent requirements, functional transfers, and technical adjustment) included in this section.)
   a) Functional Transfers
      i) Transfers In (List and explain the reason for each functional transfer.)
      ii) Transfers Out (List and explain the reason for each functional transfer.)
   b) Emergent Requirements
      i) One-Time Costs (List and provide complete and sufficiently detailed programmatic justification for each item.)
      ii) Program Growth (List and provide complete and sufficiently detailed programmatic justification for each item.)
      iii) Program Reductions (List and provide complete and sufficiently detailed programmatic justification for each item.)

Baseline Funding (subtotal) (Must agree with the “Revised Baseline” column of the FY CY Rebaseline Report.)

3. Reprogrammings/Overseas Contingency Operations
   a) Anticipated Overseas Contingency Operations
   b) Reprogrammings (Requiring 1415 Actions)
      i) Increases
      ii) Decreases

Revised FY CY Estimate  (Must agree with the CY column of the FY BY President's budget.)

Exhibit OP-5 Detail by Subactivity Group

(Page 4 of 9)
C. Reconciliation of Increases and Decreases:

4. Price Change

5. Transfers (Note: Must explain the reason for each transfer in and out.)
   a) Transfers In
      i) 
      ii) 
      iii) etc.
   b) Transfers Out
      i) 
      ii) 
      iii) etc.

6. Program Increases (Note: Each change must show the CY baseline and include complete and sufficiently detailed, programmatic explanation.)
   a) Annualization of New FY CY Program
      i) 
      ii) 
      iii) etc.
   b) One-Time FY BY Costs
      i) 
      ii) 
      iii) etc.
   c) Program Growth in FY BY
      i) 
      ii) 
      iii) etc.

7. Program Decreases (Note: Each change must show the CY baseline and include complete and sufficiently detailed, programmatic explanation.)
   a) One-Time FY CY Costs
      i) 
      ii) 
      iii) etc.
C. Reconciliation of Increases and Decreases:
   b) Annualization of FY CY Program Decreases
      i) __________________________
      ii) __________________________
      iii) etc.
   c) Program Decreases in FY BY
      i) __________________________
      ii) __________________________
      iii) etc.

FY BY Budget Request

NOTE: Substitute appropriate fiscal years to show current year (CY) and budget year (BY).
3-31

Performance Criteria and Evaluation Summary: The Performance Criteria and Evaluation Summary (OP-5, Part IV) must provide supporting detail sufficient to demonstrate how the budgeted resources for each subactivity group contribute to the Department’s mission. The Components must provide meaningful performance and work load data by SAG for each year FY PY, FY CY, and FY BY, where appropriate. Performance criteria must be displayed for each subactivity group. The goal is for the performance criteria to justify the budget request. If no performance criteria are provided, then a statement must be included explaining why there is no performance criteria.

The House of Representatives Report (Report 108-106, page 303) on the National Defense Authorization Act for Fiscal Year 2004 directed the Office of the Secretary of Defense (Comptroller) and the service’s assistant secretaries of financial management to improve the current performance criteria to reflect measurable metrics. In response, the Department modified the performance criteria for some SAGs supporting the O&M and DHP justification materials and reported the improvements in a report to the Congress in January 2004 and the FY 2005 President’s Budget submission in February 2004. The Components must continue to report these improved performance measures in the Performance Criteria section of the OP-5 justification book. The following subactivity groups have specific performance criteria required.

- Flying Hour Program (Attachment 1)
- Ship Operations (Attachment 2)
- Land Forces (Attachment 3)
- FSRM (Attachment 4)
- Depot Maintenance (Attachment 5)
- Defense Health Program (Attachment 6)

The following programs also have specific performance criteria required (See attachments 1-4 to the OP-5 in the FMR):

- JCS Exercise Program (Attachment 7)
- Base Operations Support (Attachment 8)
- Transportation (Attachment 9)
- Training (includes multiple subactivity groups) (Attachment 10)

Prior Year:

Current Year:

Instructions and Definitions

Exhibit Scope:
Report detailed information only on major end items of equipment. Use the other category for minor items. Fill in only the area for funding for the other category.

Definitions:
Budget Qty (Columns B, H, M and O): The quantities contained in the President's budget submission for the fiscal year indicated. Info for the Prior Year will reflect the amount requested in the President’s Budget for that fiscal year, not the updated column reflecting congressional adjustments.
Budget $ (Columns C, I, N and P): The funding requested in the President's Budget submission for the fiscal year indicated. Info for the Prior Year will reflect the amount requested in the President’s Budget for that fiscal year, not the updated column reflecting congressional adjustments.
Actual Inductions Qty (Column D): The number of units actually funded for induction during the Prior Year.
Actual Inductions $ (Column E): The cost of the items contained in Column D.
Completions Prior Year (Column F): Items completed during the Prior Year that were funded in a previous fiscal year.
Completions Current Year (Column G): Items in Column D that were completed during the Prior Year.
Estimated Inductions Qty (Column J): Revised Current Year quantity estimate.
Estimated Inductions $ (Column K): The cost of the items contained in Column J.
Carry-In QTY (Column L): The number of items funded in prior years that have not been delivered.

**Beneficiary Satisfaction with Health Plan**

- Inpatient Production Targets (Relative Weighted Products) *
- Outpatient Production Targets (Relative Value Units)
- Primary Care Productivity
- Medical Per Member Per Year - Annual Cost Growth*

Information for the Prior Year (FY PY) Budgeted will reflect the amount requested in the President’s Budget for that fiscal year, not the updated column reflecting congressional adjustments.

* As compared with private sector health care plan increases

**Variance Reporting:** Describe all variances in quantities and dollars from the original President’s Budget submission for both the Prior Year and the Current Year. In addition to the explanations as to the reasons for the variances, this area should also be used to discuss how the variances contributed to/hindered achievement of activity goal.

**Explanation of Performance Variances**

Prior Year:

Current Year:
These performance metrics will be used to focus on the overall performance of the health benefit plan offered to DoD beneficiaries. Measuring performance to goals allows the DHP to track internal effectiveness as well as effectiveness relative to other health plan benefits in the private sector. Results of these performance metrics will be reported annually in Defense Health Program O&M Overview Exhibit.

<table>
<thead>
<tr>
<th>Questions</th>
<th>Ans.</th>
<th>Explanation</th>
<th>Evidence/Data</th>
</tr>
</thead>
<tbody>
<tr>
<td>Is the satisfaction with the TRICARE Health Plan increasing, decreasing, or staying the same?</td>
<td>Increasing = 10, Steady = 5, Decreasing = 0</td>
<td>An increase in the satisfaction with the TRICARE Health Plan indicates that actions being taken are improving the overall functioning of the plan from the beneficiaries perspective. Goal is to improve overall satisfaction level to that of civilian plans using a standardized survey instrument.</td>
<td>Satisfaction with the TRICARE Health Plan is related to two primary functional areas: timeliness of claims adjudication and access to medical services for beneficiaries. Improvements in either of these functions generally improves the measures, whereas problems will cause a decline.</td>
</tr>
<tr>
<td>Did the DHP achieve its inpatient production targets (number of Relative Weighted Products (RWPs))?</td>
<td>At or above target = 10, (\geq 95%) target = 5, Below 95% target = 0</td>
<td>Achieving the production targets ensures that the initial plans for allocation of personnel and resources are used appropriately in the production of inpatient workload.</td>
<td>Failing to achieve production target suggests that facilities may not be appropriately using their resources and may signal need to align assets to other areas within the facility or other facilities that are not at capacity. Surpassing the target signifies opportunities to achieve saving through recapture of purchased care workload.</td>
</tr>
<tr>
<td>Did the DHP achieve its outpatient production targets (number of Relative Value Units (RVU's))?</td>
<td>At or above target = 10, (\geq 95%) target = 5, Below 95% target = 0</td>
<td>Achieving the production targets ensures that the initial plans for allocation of personnel and resources are used appropriately in the production of outpatient workload.</td>
<td>Failing to achieve production target suggests that facilities may not be appropriately using their resources and may signal need to align assets to other areas within the facility or other facilities that are not at capacity. Surpassing the target signifies opportunities to achieve saving through recapture of purchased care workload.</td>
</tr>
<tr>
<td>Questions</td>
<td>Ans.</td>
<td>Explanation</td>
<td>Evidence/Data</td>
</tr>
<tr>
<td>-----------</td>
<td>------</td>
<td>-------------</td>
<td>---------------</td>
</tr>
<tr>
<td>Is the productivity of the Primary Care Providers increasing, decreasing, or staying the same?</td>
<td>Increasing = 10, Steady = 5, Decreasing = 0</td>
<td>In order to run a premier Health Maintenance Organization (HMO), the critical focus area is primary care. The primary care provider frequently represents the first medical interaction between the beneficiary and the HMO. In this role the primary care provider is responsible for the majority of the preventive care to keep beneficiaries healthy and away from more costly specialty care.</td>
<td>This metric looks at the complexity of care and the number of patients seen by the primary care providers each day, with a goal of increasing the complexity and/or number of patients seen each day by the provider. As more care is provided by the direct care facilities, there is better utilization of the assets, and the average cost per encounter will decrease. Goal is to increase productivity to levels comparable to the civilian sector while still maintaining readiness.</td>
</tr>
<tr>
<td>Is the Medical Per Member Per Year (PMPY) cost growth rate at or below private sector health care plan rate increases?</td>
<td>At or below Nat'l Rate = 10, Up to 105% of Nat'l Rate = 5, Above 105% of Nat'l Rate = 0</td>
<td>The medical cost per member per year looks at the overall cost of the Prime enrollees for the DHP. This tracks all costs related to care delivered to enrollees. The objective is to keep the rate of cost growth for the treatment of TRICARE enrollees to a level at or below the civilian health care plan rate increases at the national level.</td>
<td>The cost has multiple components that all must be operating properly to effectively deliver the appropriate health care services to the enrollee. This measure incorporates the cost of producing the care in the direct care facilities, as well as issues of utilization for both direct care and purchased care. If the cost to produce the individual units of care in the direct care system is high, then the cost per enrollee will increase. Similarly, if the enrollees receive high numbers of encounters, then the cost will also increase. The objective is to properly manage both the production of care in the direct care facilities, and the utilization of health care services for the enrollees to effectively keep the enrollee healthy.</td>
</tr>

## Additional Instructions

- This schedule should exclude those funds supporting maintenance and repair of real property and minor construction (which should be reported on Attachment 4).
- Additional performance criteria and work load indicators may be included for any of the above functional categories as applicable. Additional criteria/indicators are especially encouraged for “Other Base Services” and “Other Personnel Support” categories as they relate to more important or unique support functions.
- Include direct Operation and Maintenance funds only. (Exclude amounts funded from Military Personnel appropriations.)
- This format should be followed in preparing an OP-5 Exhibits for Base Support.

### NOTE: Information on this exhibit must be consistent with information on Exhibit PBA-10, Base Support.

IV. **Performance Criteria and Evaluation (Transportation)**

First Destination Transportation (FDT) (by Mode of Shipment): This should include only FDT supporting O&M purchases.

Military Traffic Management Command:
- Port Handling (MT)

Military Sealift Command:
- Regular Routes (MT)
- Per Diem (SD)

Air Mobility Command:
- Regular Channel (ST)
- SAAM (MSN)

Commercial:
- Air (ST)
- Surface (ST)

NOTE: Abbreviate units of measure as follows:
- Short Tons = ST
- Measurement Tons = MT
- Missions = MSN
- Ship Days = SD

Provide **subtotals** for all modes of shipment (MTMC, MSC, AMC & Commercial)

Amounts should be consistent with amounts shown in applicable OP-5 Exhibits in each Service’s/Components budget justification books and agree with amounts provided in PBA-13, Transportation.

TOTAL FDT

---

Exhibit OP-5 Transportation Program (Attachment 9) (Page 1 of 2)
IV. Performance Criteria and Evaluation (continued)

**Second Destination Transportation (SDT) (by Mode of Shipment):**

Military Traffic Management Command: Provide **subtotals** for all modes of shipment (MTMC, MSC, AMC & Commercial)
- Port Handling (MT)

Military Sealift Command:
- Regular Routes (MT)
- Per Diem (SD)

Air Mobility Command:
- Regular Channel (ST)
- SAAM (MSN)

Commercial:
- Air (ST)
- Surface (ST)

**TOTAL SDT**

**Second Destination Transportation by Selected Commodities:**

- Cargo (Military Supplies and Equipment)
- Base Exchanges
- Subsistence
- Overseas Mail

For each commodity, show amounts separately by Short Tons (ST), Measurement Tons (MT), Missions (MSN), or Ship Days of Per Diem (SD), as applicable.

**TOTAL FDT AND SDT**

Exhibit OP-5 Navy Shipyards (Attachment 11)
Performance Metrics:

Schedule Adherence: Two metrics, Average Percentage Late and Maximum Percentage Late. The percentage late is calculated by dividing the availability actual duration by the scheduled duration (as stated in the last Presidential Budget).

Manday Budget Performance: Two metrics, Average Percentage Over Manday Budget and Maximum Percentage Over Manday Budget. The percentage over manday budget is calculated by dividing the availability actual mandays by the budgeted mandays (as stated in the last Presidential Budget).

Quality of Work: This metric reports the number of post-delivery discrepancies per 1,000 mandays of actual expenditures.

Unit Cost: This metric reports the total cost less direct material, direct contract, other direct, and MILCON per direct labor manday delivered. CY and BY reflect the budgeted values.

Administrative Efficiency: This metric reports the total cost less direct material and direct labor divided by total cost less direct material. CY and BY reflect the budgeted values.

CNO Availabilities Complete: This metric reports the total number of CNO availabilities completed during the PY.

CNO Availabilities in Progress at end of FY: The metric reports the number of CNO availabilities in progress at the end of the PY.

Homeported Aircraft Carriers Supported: Number of homeported aircraft carriers supported by activity. Determines activities non-depot workload.

Homeported Submarines Supported: Number of homeported submarines supported by activity. Determines activities non-depot workload.

Homeported Surface Ships Supported: Number of homeported surface ships supported by activity. Determines activities non-depot workload.

Shipyard Capacity Utilization: This metric reports the total workload compared to the modified dry-dock capacity index. CY and BY reflect the budgeted values.
Navy Shipyards (Direct Funded)
Integrated Intermediate & Depot Level Maintenance

**Performance Information:**

Direct Civilian Labor: Includes actual direct civilian labor cost (accelerated by benefits) plus direct overtime cost.

Direct Military Labor: Total military salary cost times percentage of military mandays spent on direct work.

Direct Material: Actual material (piece-part) costs.

Direct Contracts: Includes all contract labor costs.

Other Direct Costs: Includes direct costs not included in direct material and direct contracts. Examples include travel costs and equipment rental costs.

Overhead Civilian Labor: Includes actual overhead civilian labor cost (accelerated by benefits), overhead overtime, differential costs, bonuses, lump sum leave costs, and transportation incentive program costs.

Overhead Military Labor: Total military salary cost less that reported as direct military labor.

Overhead Non-Labor: Includes such non-labor costs as overhead travel, telecommunications, office, shop, and furniture purchases less than OPN $250,000 threshold, crane maintenance, and Janitorial services.

**Infrastructure Accounts:** These accounts provide the funding for infrastructure operation, maintenance, and replacement as follows:

Base Operating Support (OMN): Base Operating Support finances utilities, maintenance, security, transportation, and port operations costs required to support industrial operations.

Capital Expenditures (OPN): The Capital Budget Authority reflects the financing of essential fleet support equipment and other capital improvements critical to sustaining shipyard operations, improving productivity, meeting health, safety and environmental requirements and lowering production costs.

Facilities Sustainment, Restoration, & Modernization (OMN): The Sustainment, Restoration, and Modernization Budget Authority reflect the financing of essential infrastructure maintenance and modernization.

Military Construction (MILCON): Budget Authority reflects the financing of essential infrastructure replacement critical to sustaining shipyard operations, improving productivity, meeting health, safety and environmental requirements and lowering production costs.

Volume 2A, Chapter 3

* December 2010

### CIVILIAN PERSONNEL COSTS

3-74
CIVILIAN PERSONNEL COSTS
OP-8 Instructions

All Components, to include the classified components, must submit an automated OP 8 Civilian Personnel Costs exhibit for all appropriations that fund civilian personnel (e.g., RDT&E appropriations, DWCF). For this year's budget submission, funding requirements related to personnel under the National Security Personnel System (NSPS) must be identified. Therefore, separate OP-8 data must be submitted for the NSPS and non-NSPS personnel and the PRCP system will create the Component appropriation total OP-8.

Separate OP-8 exhibits must be prepared for PY, CY, BY for each Military Department in total and for each appropriation/fund in which civilian personnel are funded. Each Defense Agency, including those Defense Agencies that have only RDT&E funded civilian personnel must also provide a separate exhibit. If a Defense Agency has civilian personnel financed in more than one appropriation/fund, then a total for the Defense Agency must be provided.

The same level of detail will be reflected for direct funded and reimbursable funded civilian personnel. For each fiscal year covered by the budget submission, a “direct funded” section, a “reimbursable funded” section, and a “total (direct + reimbursable)” funded section will be included.

OP-8 Automated Exhibit. The Program Resources Collection Process (PRCP) System is used as the central collection point for the OP-8. Submission of the OP-8 will be through the PRCP System.

To calculate the required rate data, use the formulas displayed on the OP-8 exhibit. Show the average rates for Basic Compensation, Total Compensation, and Compensation and Benefits. Also show rates reflecting total variables and benefits as a percentage of basic compensation.

End strength onboard as of September 30 vice end strength authorizations will be displayed for all beginning and ending end strengths. The beginning end strength must agree with previous FY’s September 30 end strength. For the PY supporting the FY BY President’s budget request, the end strength data must agree with the SF-113A, Monthly Report of Federal Civilian Employment, provided to OPM to report military functions employment levels as of September 30.

In accordance with OMB Circular A-11, full-time equivalent (FTE) employment is the total number of hours (worked or to be worked) divided by the number of compensable hours applicable to each fiscal year. FTE is synonymous with workyear.

Total full-time equivalents must agree with the amounts reflected in the Comptroller Information System (CIS).

Exhibit OP-8 Part 1, Civilian Personnel Costs

(Please note: This page is part of a multi-page document and the text continues on the next page.)
In accordance with the Federal Employees Part-time Career Employment Act of 1978 (Public Law 95-437), part-time permanent employees are counted on a full time equivalent basis, i.e., an individual working 30 hours a week becomes .75 of an FTE. There is no adjustment for other part-time or intermittent employees - these employees would be counted on an individual basis not on a fractional basis.

All Benefits for Former Employees must be reported under the Object Class 13 sections (D5. for direct funded and R5. for reimbursable funded). Voluntary separation incentives must be reported in Benefits for Former Employees (Object Class 13).

Do not include overtime workyears in FTE totals. The FTEs on the OP-8 are for straight time workyears only.

FTEs (direct and reimbursable) in the OP-8 exhibits must agree with the FTEs reported in the OMB galleys used for the printed budget. (OMB Circular A-11.)

Direct hire end strength data on the OP-8 must agree with data provided on the September 30th supplement to the SF-113A report. This supplement is entitled, Report of Part-Time Permanent Employees on a Fractional Basis. Indirect hire end strength data must agree with the Indirect Hire supplement to the September 30th SF-113A report.

The OP-8, Part 2, Reimbursable Civilian Personnel Costs will provide reimbursable sources by appropriation, and by Component/Agency.

Department of Defense Education Activity (DoDEA) will submit separate OP-8 exhibits for: Department of Defense Dependents Schools (DoDDS) and DoD Domestic Dependent Elementary and secondary Schools (DDESS), in addition to providing a consolidated OP-8 exhibit for the total Department of Defense Dependents Education (DoDDE) program. For the required automated submission, DoDEA is only required to submit the consolidated DoDDE OP-8 exhibit, not individual exhibits for DoDDS and DDESS.

Reimbursable Civilian Personnel Costs, Part 2

Instructions for Preparation of the OP-8 Part 2 Reimbursable Pay

This is mandatory for the Military Departments and the Defense Agencies. If a Service shows that civilian pay is to be reimbursed from a Defense Agency that does not submit this form, then the agency coordination must be shown on this form. This is required only for the Program and Budget Review Submission (BES).

Each appropriation account in the prior year (PY), current year (CY), and budget year (BY) for which civilian pay is reimbursed must identify the following in thousands of dollars:

On line 1, total civilian pay *.
On line 2, total reimbursable pay *.
On line 3, the amount of line 2 that is reimbursed within the account.
On line 4, the amount by account of line 2 that is reimbursed from accounts within the Service or Defense Agency. The sum of all accounts must equal the total intra service.
On line 5, the amount by account of line 2 that is reimbursed from other Services or Defense Agency accounts. The sum of all accounts must equal the total inter service.
On line 6, the amount of line 2 that is reimbursed from all other sources. The sum from all accounts must equal the total all other.
On line 7, the total civilian pay that is reimbursed to other Services or Defense Agencies **.

Notes:
* Lines 1 and 2 MUST agree with the totals reported by the Service or Defense Agency on the OP-8 and the sum of lines 3 through 6 of this must equal line 2.
** Any amounts identified on line 5 MUST appear on line 7 of the reimbursing Service or Defense Agency submission of this exhibit.

Exhibit OP-8 Part 1, Civilian Personnel Costs
(Page 5 of 6)
Exhibit OP-8 Part 2, Reimbursable Civilian Personnel Costs (Continued)

**Reimbursable Civilian Personnel Costs, Part 2**

**SAMPLE**

**Fiscal Year: FY 20XX**

**Appropriation Account: Operation & Maintenance, Army**

A. SUMMARY OF CIVILIAN PAY:

1. Total Civilian Pay 7,599,374
2. Reimbursable Civilian Pay 2,086,470

B. REIMBURSABLE CIVILIAN PAY DISTRIBUTION BY SOURCE:

3. INTRA ACCOUNT 1,500,000
4. INTRA SERVICE 286,470
   - 4a. O&M, Army Reserve 135,470
   - 4b. O&M, Army Guard 50,000
   - 4c. RDT&E, Army 50,000
   - 4d. Mil Con, Army 50,000
5. INTER SERVICE 200,000
   - 5a. Defense Health Program (DHP) 50,000
   - 5b. RDT&E, Navy 50,000
   - 5c. Mil Con, Air Force 50,000
   - 5d. USSOCOM 50,000
6. ALL OTHER 100,000
   - 6a. GSA 50,000
   - 6b. OPM 50,000

C. CIVILIAN PAY REIMBURSED TO OTHER SERVICES/DEFENSE AGENCIES:

7. Civilian Pay REIMBURSED from O&M Army to 650,000
   - 7a. O&M, Navy Reserve 200,000
   - 7b. O&M, Air Force Guard 250,000
   - 7c. RDT&E, Defense Mapping Agency 150,000
   - 7d. OMB 50,000

Exhibit OP 9 Analysis of Changes in FTE Costs
(Page 4 of 5)
ANALYSIS OF CHANGES IN FULL-TIME EQUIVALENT (FTE) COST

INSTRUCTIONS

1. The intent of the OP-9 is to identify the factors that have an impact on changes in average salary and average FTE cost from fiscal year to fiscal year.
2. Prepare separately for each appropriation and Fund account for U.S. direct hire, classified and wage system, and Foreign National Direct Hire (FNDH).
   Complete amounts and rates for WS, etc., as in SES/GS column.
3. All end strength will be displayed as actual or planned to be onboard as of September 30. Do not use end strength authorizations.
4. Cost, FTEs, and end strength should be consistent with those shown on OP-8, Analysis of Civilian Personnel Costs.
5. Show each classified pay raise in separate stub.
6. Data is to be reflected at appropriation or account.
7. The “Average Basic Annual Salary” for a FY is computed by dividing the “Basic Compensation” total by the number of straight time workyears.
8. The “Overall Average Annual Salary” for a FY is computed by dividing the “Total Compensation” (Object Class 11) by the number of straight time workyears.
9. The “Average FTE Cost” for a FY is computed by dividing “Total Compensation and Benefits” (Object Class 11 and 12) by the number of straight time FTEs.
10. The OP-9 will be prepared for both the Budget Submission and the President’s budget. However, for the latter, the OP-9 will be submitted separately to OSD and will not be included in the congressional justification material.

Footnotes

1/ Reflect as % rate of basic compensation.
2/ Express as decimal to five places. Develop effective pay raise as ratio of No. of applicable days to total compensable days in year times pay raise percentage. Identify computation in footnote.
3/ Show computation - derivation of rate.
4/ Provide an explanation if the rate is different from the previous fiscal year rate, e.g. changes in overtime rate, changes in health benefits, FERS, etc.

</tbody>
</table>

NOTE: Carryover is to be calculated as of graduation (unless another time is specified uniformly for an academy).
"Graduation Load" is the sum of carryover for each class plus graduates,
"Autumn Load" is the sum of carryover for each class plus net new entrants at the beginning of the autumn term.
Reconcile and explain in footnotes differences between Autumn Load and "Cadet/Midshipman End Strength" reflected here and in the FYDP update.
"Prep School Load" is to be a forecast of average onboard students on a "best estimate" basis (specify formula).
If this table is presented on an academic year basis, so state.

Undergraduate Pilot Training (UPT)/Undergraduate Navigator Training (UNT) Graduates of Year Included in Inventory

1/ Based upon aircraft x pilots per crew x crew ratio.
2/ Other operational flying includes overhead operational flying, miscellaneous support logistics, and research and development (R&D).
3/ Includes instructor and staff positions in undergraduate and advanced flight training.
4/ Includes non-flying billets requiring aviation expertise in administration, command/control and operational supervision/staff above the squadron level.
5/ Include advance flight students only.
INDIVIDUAL TRAINING DATA FOR FY ___ BUDGET (SERVICE)

PART C-2: FLIGHT TRAINING

| Syllabus Course Length (In calendar days) | Number of Flight Instructors | Output | Other (Specify) |
|-----------------------------------------|------------------------------|--------|-----------------
|                                         | Mil  | Cty | Contractor | Active Duty | Reserve | Guard |

A. Undergraduate Training
   - Jet
   - Propeller (including turbo prop)
   - Rotary Wing
   - TOTAL

B. Advanced Training
   - First Seat (i.e., post-UFT training prior to first operational unit assignment)
   - Transition (i.e., conversion from one aircraft type to another or upgrading of skills in the same aircraft type)
   - Instructor Training Course
   - Other (Specify)
   - TOTAL

Notes:
1. Display pilot and navigator/NFO training separately.
2. Submit data for PY, CY, BY.
3. If instructors for any course are other than U.S. active duty military, so indicate.
4. Separately indicate output of another Service’s personnel or foreign military. For the Navy and Marine Corps, this should be on consolidated undergraduate flight training displays. "Instructor" means instructor pilots and navigator/NFO instructors only.
5. For advanced training, show a weighted average syllabus course length for each subcategory (first seat, transition, etc.)

Exhibit OP-14 Part D: ROTC Program Data
(Page 8 of 16)
INDIVIDUAL TRAINING DATA FOR FY ___ BUDGET (SERVICE)

PART D: ROTC PROGRAM DATA (PE 847230)

Instructions for Completion of Preceding

1. Enter Army, Navy, or Air Force, as applicable.
2. Enter the appropriate fiscal year (data should be shown for the Prior, Current, and Budget fiscal years).
3. Enter the average number (average strength) of officers, enlisted personnel, civilians (Full-Time Equivalents), and combined total, respectively, assigned to ROTC units and ROTC command level staffs, respectively. The ROTC command level staff should include all personnel up to the departmental level who are associated with the ROTC program but are not assigned to a ROTC unit.
4. Enter the total costs of pay and allowances/salary of military and civilian personnel, as applicable, plus any related O&M support costs. Pay and allowances/salaries will be determined through the use of standard rates for military and civilian personnel, respectively.
5. Enter the average staff and the average cost of the staff per unit. Average staff will be determined by dividing the applicable total staff (unit or command level) by the number of units shown in item C (see paragraph 6, below). The average cost of staff per unit will be arrived at by dividing the applicable total costs for the unit and command level staffs, respectively, by the number of units shown in item C.
6. Enter the applicable number of operating units.
7. Enter the total ROTC costs, other than those shown in A or B, included in the Service’s O&M appropriation(s). (This should be equal to the sum of D.1.a and b discussed below in paragraphs 8 and 9.)
8. Show in parenthesis () the total applicable costs of ROTC scholarships (include only tuition, fees, books, and other related student expenses).
9. Show in parenthesis () the applicable O&M administrative costs, by categories shown, related to the ROTC program.

Exhibit OP-14 Part D: ROTC Program Data

(Page 9 of 16)
INDIVIDUAL TRAINING DATA FOR FY __ BUDGET (SERVICE)

PART D: ROTC PROGRAM DATA (PE 847230)
(Continued)

10. Enter the total ROTC costs included in the Service’s applicable Reserve Component appropriations. This should be equal to the sum of D.2.a, b, and c, as discussed in paragraphs. 11, 12, and 13 below.

11. Enter in parenthesis ( ) the total costs relative to the monthly subsistence allowance paid to college freshmen and sophomores who are recipients of ROTC scholarships.

12. Enter in parenthesis ( ) the aggregate sum included in the Service’s applicable Reserve Component appropriations for ROTC Pay and Allowance (Summer Training), Subsistence of Reserve Officer Candidates (Summer Training), and Travel of Reserve Officer Candidates (Summer Training).

13. Enter in parenthesis ( ) all costs of the ROTC program, other than those discussed in paragraphs. 11 and 12, above, included in the Service’s Reserve Component appropriations.

14. Enter and detail by appropriation, and explain by footnote, any costs attributable to the ROTC program which have not been included in either A, B, or D (1 and 2).

15. Enter the total cost data shown in D.1, 2, and 3.

16. Enter in parenthesis ( ) the number of candidates participating in and total costs of Flight Instruction Program and the Aviation Indoctrination Program, respectively, included in the above data.

17. Enter by the scholarship and non-scholarship programs, respectively, the average number of candidates participating in MS I, II, III, IV, and applicable totals, respectively. Leave dollar columns blank.

18. Enter the total costs of the ROTC program. Total costs should be equal to the aggregate sum of A, B, and D, above.

**Instructions for Completion of Preceding**

1. Enter Army, Navy, Marine Corps, or Air Force, as applicable.
2. Enter the appropriate fiscal year (data should be shown for the Prior-1, Prior, Current, and Budget years).
3. Enter the average enrollment during the year by year (of high school) and in total.
4. Enter the number of JROTC units.
5. Enter by appropriation, and in the total, the costs to DoD of the JROTC program.
6. Enter the average costs per JROTC unit. (Total costs in 5 divided by units in 4.)

Instructions for creating the display

The OP-20 data will be submitted via the Select and Native Programming Data Input System (SNaP) located at [https://snap.cape.osd.mil](https://snap.cape.osd.mil). The most current version of this exhibit will be found at this site. Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-20 should be referred to (703) 697-3248. Questions about the SNaP interface should be referred to the Office of the Director (Program Analysis & Evaluation) Programming and Fiscal Economics Division (703) 693-0223.

1) Display the Organization and Component under the report title
2) For each Weapon System display the weapon system detail as organized above
3) Sum all weapon detail reported by SAG and PE at weapon system level

**Data Center:** Operations and Support, Program/Budget

**Display Variations for Warehouse:** In addition to Organization breaks create one Department wide Display including all organizations, no grand totals.

**Database Requirement:** One XLS of all data for all organizations as provided-- no calculations

### Instructions for Completing the Weapon Systems Readiness-Flying Hour Summary

1) For Army, Navy and Air Force, provide the funding level--by Active, Reserve, and Guard--for the Flying Hour Program (FHP) by SAG, PE, Treasury Code and weapon system type. The funding levels reported here should be the same as those reported in Budget Exhibit OP-20.

2) Provide Narrative in a Word Document that discusses reasons for cost growth from the PB 03 position for any major weapons systems whose cost per flying hour increased more than 10 percent. Discuss any accounting changes in the flying hour program made since the PB 03 position.

3) For Navy, provide a list of Program Elements included in each of the following: TACAIR/ASW, Fleet Training, and Fleet Air Support

### Definitions:
- **Organization**: The Military Departments, All components
- ** Appropriation**: Treasury Code, Defined set of four-digit numeric codes from the Comptroller that identifies resources by type, organization and component.

---

Exhibit OP-20 Flying Hours Program
(Page 2 of 3)
OP-20 Flying Hours Summary (Continued)

SAG: Sub-Activity Group, budget term denoting groupings of resources
   Navy SAGs: 1A1A, 1A2A, and 1C1C
   Air Force SAGs: By appropriate SAGs.

Program Element: Identify the PE containing the weapon system described by the detail.

Weapon System Type: Provide Type/Model/Series detail for the weapon system described by the detail.

Weapon System Detail:
   Quantity: Identify the number of weapon system type used to determine flying hour program funding
   Flying Hours: - flying hour per Aircraft per Month, required and funded
   Utilization Rate:
   Crew Ratio: - number of crews funded per weapon system
   Funded: Identify direct funding level for Fuel, DLRs, Consumables, and Indirect funding for Contract, Maintenance and Other OPTEMPO.
      Army -- See definition of indirect OPTEMPO in Notes section below.
      Navy--Special Interest Codes
      Air Force--Consumables (General Support (GS) + System Support (SS))
   Total TOA Required: Provide total TOA required to meet the flying hour requirement

Notes:
1) Indirect OPTEMPO is the portion of the Army’s total OPTEMPO that is structure based, or those costs that are based on the number of personnel supported rather than the costs that vary directly with training activities/events (called Direct OPTEMPO). Some examples of Indirect OPTEMPO costs include organizational clothing and equipment, civilian pay, and contract logistic support. If it is not possible to report Indirect OPTEMPO costs by PE and weapon system, report total Indirect OPTEMPO costs for the Army flying hour program and include a narrative in a word document explaining how this number is achieved and what steps will be taken to provide more detailed data in the next POM submission.
2) For each PE/Treasury Code/SAG combination, the sum of DLRs and Consumables will be compared with the O&M FYDP Expense Aggregate, Repair Parts, for the same combination.
3) For each PE/Treasury Code/SAG combination, the Fuel entered will be compared with the O&M FYDP Expense Aggregate, Fuel, for the same combination.

Technical Issues: If you are having difficulty with the data collection system—SNaP, contact the SNaP administrators via the email link at the web site.
Exhibit OP-24 Emergency and Extraordinary Expense Limitation

Emergency and Extraordinary Expense Limitation

INSTRUCTIONS FOR OP-24

A. Purpose

1. This section provides guidance for the submission of Exhibit OP-24 (Emergency and Extraordinary Expense Limitation) and the quarterly emergency and extraordinary expenses expenditure report required by section 127 of Title 10, United States Code.

2. This section supersedes OASD(C) memorandum, 14 August 1975, subject: Quarterly Reporting of Emergency and Extraordinary Expenses, and OASD(C) memorandum, 6 August 1976, subject: Quarterly Reporting of Emergency and Extraordinary Expenses.

B. Submission Requirements

1. General. In the annual DoD appropriations acts, Congress provides the Secretary of Defense, secretaries of the military departments, DoD Inspector General, and the US Court of Appeals for the Armed Forces, the authority to make obligations and expenditures for emergency and extraordinary expenses. These authorities are provided in terms of dollar limitations and are available for the fiscal year in which they are provided in the DoD appropriations act. Defense agencies, the office of the Secretary of Defense, the office of the Joint Chiefs of Staff, and Combatant Commands are allocated (usually via a Deputy Secretary of Defense memorandum) a portion of the Secretary of Defense’s annual emergency and extraordinary expenses authority.

   The use of emergency and extraordinary expenses authority is limited to those expenditures which cannot be anticipated or classified, or are not specifically appropriated for such purposes, and includes expenditures for emergent confidential military requirements and official representation activities.

   In order to strengthen the management of, and budgeting for, emergency and extraordinary expense authority, and continue to comply with 10 USC 127 for the submission of required reports to Congress, it is necessary to improve the emergency and extraordinary expense data collection process. Therefore, the following guidance is provided:

   2. OP-24

      a. This exhibit will be submitted by each military department and Defense activity that require emergency and extraordinary expense authority, or authority to expend funds for official representation activities, for both the OSD budget review and the President’s budget submit. In addition to the budgetary data, the OP-24 must include a full and complete narrative justification to support the request.

      b. If more space is required, the justification material may be continued on a second page, or additional information may be attached to OP-24, as appropriate.
c. The Defense components that submit an OP-24 with only the budgetary data, but inadequate or no narrative justification risk not receiving any, or significantly reduced, emergency and extraordinary expense authority.

d. For the President’s budget submission, the OP-24 should be submitted concurrently but separately to OUSD (Comptroller) Operations Directorate (Pentagon, Room 3C749).

3. Quarterly Reports

a. 10 USC 127 requires the Secretary of Defense to submit an annual report of expenditures made under the authority of this statute. (Although Congress requires an annual submission, quarterly inputs are required for management purposes.)

b. The categories of expenditure for reporting the quarterly emergency and extraordinary expenses were defined in the 14 August 1975 ASD(Comptroller) memorandum, and are shown below (Mapping and Charting Activity has been changed to Geospatial Intelligence):

<table>
<thead>
<tr>
<th>Emergency and Extraordinary Expenses</th>
<th>Expenditure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Obligation</td>
<td>Expenditure</td>
</tr>
<tr>
<td>1. Cryptologic Intelligence</td>
<td>x</td>
</tr>
<tr>
<td>2. HUMINT</td>
<td>x</td>
</tr>
<tr>
<td>3. Counterintelligence and Investigative Activities</td>
<td>x</td>
</tr>
<tr>

<td>x</td>
</tr>
<tr>
<td>12. Other Non-Intelligence Activities *</td>
<td>x</td>
</tr>
<tr>
<td>Total</td>
<td>xx</td>
</tr>
</tbody>
</table>

* “Other” categories should be specifically identified with their related expenditures in separate lines below lines 9 and/or 12.

c. The quarterly expenditure amounts reported are expenditures made against recorded obligations for the fiscal year being reported. If current fiscal year expenditures being reported are expenditures made against prior year obligations, provide a separate expenditure listing for each fiscal year for which expenditures in the current fiscal year are being reported. The quarterly expenditure amounts will be on a cumulative basis for the fiscal year for which the expenditures are being reported.

Exhibit OP-24 Emergency and Extraordinary Expense Limitation

(Page 2 of 4)
d. In addition, the Defense components shall also report to the Office of the Under Secretary of Defense (Comptroller) the obligation amounts made against the emergency and extraordinary expense authority for the fiscal year being reported.

e. The military departments, DoD Inspector General, and the US Court of Appeals for the Armed Forces shall submit quarterly reports of all emergency and extraordinary expense obligation and expenditures to the Office of the Under Secretary of Defense (Comptroller) no later than 31 days following the close of the quarter being reported.

f. Defense agencies and other DoD activities that receive their emergency and extraordinary expense authority from the Secretary of Defense (usually via a Deputy Secretary of Defense memorandum) shall continue to submit their quarterly expenditure data for official representation activities to the Director of Administration and Management no later than 25 days following the close of the quarter, in accordance with DoD Directive 7250.13 (Official Representation Funds). Defense agencies and DoD activities must also include their obligation data for official representation activities, in addition to the expenditure data, in their quarterly submissions to the Director of Administration and Management.

g. Relative to the emergency and extraordinary expense expenditures for confidential military purposes, Defense agencies and other DoD activities, including the Washington Headquarters Services, that receive their emergency and extraordinary expense authority from the Secretary of Defense, shall submit their quarterly obligation and expenditure report for confidential military purposes directly to the Office of the Under Secretary of Defense (Comptroller) no later than 31 days following the close of the quarter being reported.
**EMERGENCY AND EXTRAORDINARY EXPENSE LIMITATION**

Scope: Covers all expenses subject to the congressional limitation on "Emergency and Extraordinary Expenses"

**Instructions for creating the display**

The OP-25 data will be submitted via the Select and Native Programming Data Input System (SNaP) located at [https://snap.cape.osd.mil](https://snap.cape.osd.mil). The most current version of this exhibit will be found at this site. Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-20 should be referred to the Operations Directorate at OPSDirectorate@osd.mil. Questions about the SNaP interface should be referred to the Office of the Director (Program Analysis & Evaluation) Programming and Fiscal Economics Division (703) 693-7825. Technical questions regarding SNaP should be referred to the Information Management and Analysis Group (703) 604-6349.

1) Display the Organization and Component under the report title
2) For each Weapon System display the weapon system detail as organized above
3) Sum all weapon detail reported by SAG and PE at weapon system level

**Data Center:** Operations and Support, Program/Budget

**Data Source:** SNaP

Display Variations for Warehouse: In addition to Organization breaks create one Department wide Display including all organizations, no grand totals.

**Database Requirement:** One XLS of all data for all organizations as provided-- no calculations

Exhibit OP-25 Ground Vehicle Operations
Page 1 of 3
**Instructions for Completing the Weapon Systems Ground Vehicle Operations Summary**

1) For Army, Marine Corps and SOCOM, provide the funding level--by Active, Reserve, and Guard--for Ground Vehicle Operations. Provide as much of the PE, Treasury Code, SAG and Weapon System Type information as possible.

2) Provide a list of Weapon Systems and the type of OPTEMPO miles (Tank, Battalion, etc.). Include a definition for each type of OPTEMPO mile with the derivation/calculations used. Can be in either Word or Excel.

**Definitions:**

- **Organization:** The POM reporting entities directed to submit this data requirement. For a complete list of organizations by data requirement see Appendix A of the PDR.
- **Appropriation:** Treasury Code, Defined set of four-digit numeric codes from the Comptroller that identifies resources by type, organization and component.
- **SAG:** Sub-Activity Group, budget term denoting groupings of resources.
- **Program Element:** Identify the PE containing the weapon system described by the detail.

**Exhibit OP-25 Ground Vehicle Operations**

(Page 2 of 3)
Weapon System Type: Provide Major Fighting Vehicles by type for the weapon system described by the detail. For each type of major combat vehicle in an Excel document, provide the average number of annual tank miles budgeted and executed, and cost per average tank mile for Fuel, DLRs and Consumables by the warfighting units in the following training/operational categories:

- Combatants (exclude CCTT, CTCs & Contingency Operations)
- Close Combat Tactical Training (CCTT)
- National Training Center (NTC)
- Other Combat Training Centers (CTCs)
- Contingency Operations (i.e., Bosnia)
- Other (Please specify)
- Total Ground OPTEMPO (should be consistent with Weapon System Readiness total)

Include direct Operation and Maintenance funds only. (Exclude amounts funded from other appropriations or other source of funding (e.g. reimbursement from foreign government).

Weapon System Detail:
- Quantity-Identify the number of major fighting vehicle weapon systems by type used to determine the tank miles program funding
- OPTEMPO Miles: -Annual number of OPTEMPO Miles driven for Major Fighting Vehicles, required and funded
- Funded: Identify funding level for Fuel, DLRs, Consumables, and Contract Funding and Indirect OPTEMPO costs (Army only).
- Total TOA Required: Provide total TOA required to meet the ground vehicle operations requirement

Business Rules:
For Ground Vehicles only, for each PE/Treasury Code/SAG combination, include vehicles not on the starter list or considered major combat vehicles in Weapon System Type = Other Vehicles.

Notes:
1) Indirect OPTEMPO is the portion of the total OPTEMPO that is structure based, or those costs that are based on the number of personnel supported rather than the costs that vary directly with training activities/events (called Direct OPTEMPO). Some examples of Indirect OPTEMPO costs include organizational clothing and equipment, civilian pay, and contract logistic support. If it is not possible to report Indirect OPTEMPO costs by PE and weapon system, report Indirect OPTEMPO costs for the Army ground operations program by cost category and include a narrative in a word document explaining how this number is achieved and what steps will be taken to provide more detailed data in the next POM submission.
2) For each PE/Treasury Code/SAG combination, the sum of DLRs and Consumables will be compared with the O&M FYDP Expense Aggregate, Repair Parts, for the same combination.
3) For each PE/Treasury Code/SAG combination, the Fuel entered will be compared with the O&M FYDP Expense Aggregate, Fuel, for the same combination.

Technical Issues: If you are having difficulty with the data collection system – SNAP, contact the SNAP administrators via the email link at the web site.

**Instructions:** This exhibit will be submitted by each Military Department and Defense Agency. Complete for each appropriation and fund, including the Defense Working Capital Fund, family housing, and RDT&E accounts. Customer accounts should include direct consumption only and should not include Working Capital Fund (WCF) consumption. Provide for each type of petroleum product consumed (for example: JP-4, MOGAS, Leaded, Navy Reclalm, distillate, etc.). Provide for each of the following appropriations/funds and when more than one appropriation/fund provides a total for the Component.

1. Subtotals
   a. Operation and Maintenance Appropriations
   b. Research, Development, Test and Evaluation Appropriations
   c. Family Housing Appropriations
   d. Defense Working Capital Fund (Provide a breakout for each Working Capital Fund activity group and a total for the Working Capital Fund.)
      (1) Depot Maintenance
      (2) MSC
      (3) Other Working Capital Fund Activities (Separately identify each Defense Working Capital Fund activity group.)
2. Total Military Service or Defense Agency

The OP-26A exhibit will also be submitted by each Military Department and Defense Agency concurrently with the submission of congressional justification materials. The OP-26A exhibit will not be included in justification material forwarded to the Congress.

### Instructions for creating the display

The OP-30 data will be submitted via the Select and Native Programming Data Input System (SNaP) located at [https://snap.cape.osd.mil](https://snap.cape.osd.mil). The most current version of this exhibit will be found at this site. Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-30 should be referred to (703) 697-3248. Questions about the SNaP interface should be referred to the Office of the Director (Program Analysis & Evaluation) Programming and Fiscal Economics Division (703) 693-0223.

1. Display the Organization and Component under the report title
2. For each Maintenance Activity report Resource Type and Maintenance Types by Weapon System
3. Display Units as reported
4. Display TOA as follows—Programmed then Required, and a delta line (Programmed less Required)

**Data Center:** Operations and Support, Program/Budget  
**Data Source:** SNaP  
**Display Variations for Warehouse:** In addition to Organization breaks create one Department wide Display, do not break on Organization, no grand totals  
**Database Requirement:** One XLS of all data for all organizations as provided-- no calculations

**Instructions for Completing the Depot Level Maintenance Database**

1) For each component provide resource type for each maintenance type within each maintenance activity.

**Definitions**

**Organization:** The POM reporting entities directed to submit this data requirement. For a complete list of organizations by data requirement see Appendix A of the PDR.

**Component:** Identify Active, Guard or Reserve

**Resource Level**

- **Required:** The portion of the total requirement that could be executed if funds were available. Do not include work that cannot be performed due to operational commitments, capacity constraints, or any other constraints except funding.
- **Funded:** This reflects funding, by appropriation, for work that is programmed to be available. Includes both contract orders and organic maintenance activities.
- **Units:** Number of systems being overhauled

**Business Rules:**

- Where Maintenance Activity = Aircraft, Maintenance Type = Airframe, Engine, Software and Other
- Where Maintenance Activity = Combat Vehicles, Maintenance Type = Vehicle, Software and Other
- Where Maintenance Activity = Ships, Maintenance Type = Overhauls, Selected Restricted Availability, Phased Maintenance Availability, Software and Other
- Where Maintenance Activity = Missiles, Maintenance Type = Strategic Missiles, Tactical Missiles, Software and Other
- Where Maintenance Activity = Ordnance, Maintenance Type = Ordnance, Engine, Software and Other
- Where Maintenance Activity = Other, Maintenance Type = Other End-item, Software, Other, Missiles, Non-DWCF Exchangeables

**Instructions for creating the display**
The OP-30S data will be submitted via the Select and Native Programming Data Input System (SNaP) located at [https://snap.cape.osd.mil](https://snap.cape.osd.mil). The most current version of this exhibit will be found at this site. Once loaded, the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-30S should be referred to (703) 697-3248. Questions about the SNaP interface should be referred to the Office of the Director (Program Analysis & Evaluation) Programming and Fiscal Economics Division (703) 693-0223.
1) Display the Organization and Component under the report title
2) For each Weapon System display the weapon system detail as organized above
3) Sum all weapon detail reported by SAG and PE at weapon system level

**Data Center:** Operations and Support, Program/Budget

**Data Source:** SNaP

**Display Variations for Warehouse:** In addition to Organization breaks create one Department wide Display including all organizations, no grand totals.

**Database Requirement:** One XLS of all data for all organizations as provided-- no calculations

**Definitions**

**Organization:** The POM reporting entities directed to submit this data requirement. For a complete list of organizations by data requirement see Appendix A of the PDR.

**Component:** Identify Active, Guard or Reserve

**Resource Level Definitions (All funding in $ thousands except Manday Rate in dollars, Manyears in thousands)**

- **APPN:** OMN or OMNR
- **FY:** Fiscal Year of ship induction
- **Ship Type:** Ship class
- **Hull:** Ship hull number
- **Availability Type:** SRA, PMA, PIA, Overhaul, Other (Describe)
- **Start Date:** Induction date
- **End Date:** Completion date
- **Previous Availability End date:**
- **Previous Availability Type:** SRA, PMA, PIA, Overhaul, Other (Describe)
- **Yard:** Public/Private Shipyard where availability is accomplished (Abbreviation)
- **Repair Activity:** As appropriate
- **Total Mandays:** Total number of required mandays (in thousands) to accomplish availability
- **Unfunded Mandays:** Total number of mandays (in thousands) not funded in current request
- **Funded Mandays:** Total Mandays minus Unfunded Mandays
- **Manday Rate:** Budgeted manday rate
- **Labor Costs:** Total Mandays times Manday Rate
- **Material Costs:**
- **Other Costs:**
- **Advanced Planning:** Design and other costs associated with preparations for availability
- **Total Requirement:** Labor Costs + Material Costs + Other Costs + Advanced Planning
- **PY Funding:** Sum of prior year funds expended in support of availability (Including advanced planning)
- **Induction Year Requirement:** Total funding required in induction FY (equals budget request amount)
- **Unfunded:** Total unfunded requirement in induction FY

The FY PB estimate column of the OSD submit should reflect actual data through the first three quarters plus a realistic projection for the remaining quarter. For the PB submit, the FY PY column will reflect actuals as of September 30th. Include an explanation of changes in quantity and funding between years and deviations between actual and program data.

Provide the quantity and funding for each commodity group within each O&M appropriation used to purchase depot level reparables and consumable supplies from the Defense Working Capital Fund.

| Cost Reimbursable Purchases | (27) 679 |
| Purchases from the Buildings Maintenance Fund | (27) 680 |
| Other Activity Groups (List) | 680-689 |

* These lines should include only Defense Working Capital Fund purchases made at stabilized rates. Cost reimbursable purchases should be included in line 679.
INSTRUCTIONS FOR COMPLETION OF OP-32

(1) Enter the applicable component, i.e., Army, Navy, Marine Corps Reserve, Air National Guard, etc.

(2) Enter the fiscal year for which this exhibit is being prepared.

NOTE: A separate exhibit should be submitted for each O&M appropriation at the total appropriation level for the President’s Budget

(3) Enter the prior year (PY), current year (CY), and budget year (BY), as applicable.

(4) For the CY exhibit, amounts entered in this column should agree with the prior year actual costs as shown in the prior year column of the applicable budget submission. For the BY exhibit, these amounts should agree with the far right hand column of the CY exhibit.

(5) This column should show the rate (percent) of price growth for various items. The price escalation indices prescribed by OSD (and rates provided by OMB) should be used for all lines, particularly fuel and civilian pay. Other price growth rates may be used for other items when actual experience supports a rate of increase different from that prescribed for the OSD/OMB submit. In those instances, supporting documentation for the rate used should be provided. If the rate is approved during the budget review, the revised rate may be used in the President’s budget. To the extent that a separate rate of increase is used for any portion of a line item, for example, Equipment Maintenance by Contract, the applicable item should be subdivided into appropriate subcategories for each separate rate of increase used. The rate of price change for lines 401, 402, 411-415, 502-506, 601-693, and 701-721 should agree with applicable rates approved by OSD. Applicable rates of price growth, as prescribed by OSD, or as estimated and justified, as appropriate, should be shown for all items where there is a price change. The rate of price growth included in the President’s budget will in all instances reflect the rate of increase approved during the OSD budget review.

(6) The amount shown for each appropriate line (exclusive of line 991), the Foreign Currency Rate Difference column will reflect the difference in the budgeted foreign currency exchange rates between the two years. For the prior and current years, the budgeted foreign currency exchange rates are the exchange rates that have been approved for recording obligations during execution. If the current year execution rates have not yet been established by the Congress in time for the budget submission, the foreign currency exchange rates reflected in that fiscal year’s President’s budget request will be used – unless changed by subsequent guidance from the OUSD (COMPTROLLER). For the biennial budget years, the budgeted foreign currency exchange rates are the exchange rates reflected in the OUSD (C) budget call memorandum for the budget submission or in the PBD issued during the budget review in the formulation of the President’s budget request. (Note: Variances from the budgeted rates will be reflected only on line 991. These variances do not enter into the calculation on any of the other lines.) The column total, including line 991, will reflect (1) for the PY to the CY: the difference between prior year actuals and the current year budgeted rates, and (2) for the CY to the BY: the difference between budgeted rates in each year. If transfers are approved for the current year, the column total will reflect (1) for the PY to the CY: the difference between PY actuals and CY anticipated expenditures and (2) for the CY to the BY: the difference between the CY anticipated expenditures and the BY budgeted rates. No foreign currency rate difference will be shown for Defense Working Capital Fund Purchases and Travel or Transportation for AMC, MSC or MTMC. Only in unusual circumstances should an amount for foreign currency rate difference shown for other travel and/or transportation costs. (See end notes for further discussion of foreign currency entries.)
INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

(7) The price growth column should show the amount of price growth for various items. **Where a percent increase by line item is shown in column 6, the amount included in column 7 will be the sum/difference of the previous fiscal year’s program amount (column 4) and the foreign currency rate difference amount (column 5) times the percent shown in column 6.** The amount of the price growth will be consistent with the rate of change prescribed by OSD. The price increase for all items should be the additional/reduced funds, as a result of price changes, that would be required to accomplish the previous year’s program at applicable fiscal year rates.

(8) Enter the amount of program growth for each item. Program growth is to be priced in current year dollars for the current year exhibit, biennial budget year 1 dollars for the biennial budget year 1 exhibit, and biennial budget year 2 dollars for the biennial budget year 2 exhibit.

(9) Enter the sum of (4), (5), (7) and (8) for each item.

(10) Subtotals should be included in (4), (5), (7), (8) and (9) for Civilian Personnel, Travel, Defense Working Capital Fund Supplies and Materials Purchases, Defense Working Capital Fund Equipment Purchases, Other Defense Working Capital Fund Purchases, Transportation, and Other Purchases, as applicable.

(11) Program amounts for Civilian Personnel compensation should be consistent with amounts shown in both the object class distribution reflected in the Program and Financing Schedules for Object Classes 11, 12 and 13 (Direct Obligations only) and in the OP-8 Exhibit, Civilian Personnel Costs (Direct Funded), Chapter 3 of the Financial Management Regulation for the applicable fiscal year. Payments made to the Department of Labor for expenses associated with employee’s disability compensation are included in Object Class 12. Change in the number of compensable days per fiscal year will be reflected as program growth, not price growth. The annualization of the prior year’s pricing changes (i.e., the previous fiscal year’s pay raise), merit pay, bonuses, FERS participation, etc. will be reflected as changes in price growth. (See Volume 2A, Chapter 3)

(12) Program amounts for travel should be consistent with amounts shown in Object Class 21 (including subclasses), for the applicable fiscal year.

(13) AMC, MSC, and MTMC costs displayed for items; 701, 702, 703, 705, 706, 707, 708, 711, 714, 715, 716, 717, 718, 719, 720, 721, 725, and 771 should include all purchases from these transportation funds. These amounts should exclude all non-Defense Working Capital Fund purchases such as reimbursement to MTMC of non-Defense Working Capital Fund (overseas) port operations.

(15) Line 703 JCS Exercises includes only those services in support of JCS exercises and paid only by The Joint Staff (TJS).

Exhibit OP-32 Summary of Price and Program Change

(Page 8 of 13)
INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

(17) Include Object Class 26 supplies and materials purchased from each Defense Working Capital Fund, including DLA.

(18) Include Object Class 26 supplies and materials purchased from GSA.

(19) Include all equipment (including furniture) purchased from Defense Working Capital Fund, including DLA.

(20) Include all equipment (including furniture) purchased from GSA.

(21) Include amounts to be paid for motor vehicles leased from both commercial services and the General Services Administration (GSA) Interagency Fleet Management System (IFMS).

(22) Includes centrally managed items procured by the Defense Working Capital Fund from sources other than Defense Working Capital Fund or non-Defense Stock Funds.

(23) Include purchases of MTMC services for non-Fund services such as overseas port terminal operations.

(24) Program amounts should be consistent with Fund purchases included in Object Class 25.3.

(25) Budget year (BY) program amounts should reflect stabilized rates as requested by the Service (OSD submission) or as approved by OSD (President’s Budget), as applicable, to include the impact of biennial budget years’ pay raises. Cost reimbursable purchases should be included on line 679. Separate elements of expense for each Defense Working Capital Fund activity group are shown on page 3. Include only those elements of expense for Defense Working Capital Fund activity groups from which purchases were made or are planned, as applicable.

(26) Includes the Aerospace Maintenance & Regeneration Center (AMARC).

(27) Line 653, Airlift Services, Other AMC Purchases, includes Medical Evacuation Operations, Training, Search and Rescue, and other AMC costs not provided for in lines 701, or 702.

(28) Includes all Defense Working Capital Fund purchases made on a cost reimbursable (rather than stabilized rate) basis.
INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

(29) Includes contractual charges for transportation of things via commercial air, sea, or surface mode and payments for commercial port operations and other transportation services exclusive of payments to the Defense Working Capital Fund.

(30) Program amounts should be consistent with direct obligation amounts shown in the OP-8 Exhibit, Civilian Personnel Costs, Chapter 3. (See Volume 2A, Chapter 3)

(31) Charges for rental of space and related services assessed by GSA as Standard Level User Charge (SLUC) charges. Program amounts will be consistent with the amount shown in Object Class 23.1.

(32) Program amounts included for items 913-915 and 917 will be consistent with the amounts shown in Object Class 23.

(33) Purchases from non-Defense Working Capital Fund sources heat, light, power, water, gas, electricity and other utility services, exclusive of transportation and communication services.

(34) Purchases of communication services from non-Defense Working Capital Fund sources.

(35) Payments for possession and use of land, structures, and equipment (other than transportation equipment) owned by another, except for SLUC charges assessed by GSA.

(36) Purchases from the U.S. Postal Service including postage (other than Parcel Post), rental of post office boxes, postage meter machines and mailing machines. Also includes payments made to the U.S. Postal Service for handling of officially franked mail (i.e., Indicia Mail).

(37) Includes supplies and materials purchased from other than Defense and non-Defense Working Capital Fund.

(38) Program amounts should be consistent with the amounts shown in Object Class 24.

(39) Covers contractual equipment maintenance other than depot level (e.g., ADP/office equipment, etc.) not otherwise covered under IT Contract Support Services.

(40) Includes costs for sustainment and restoration/modernization of buildings, facilities, pavement, airfields and like items when done by contracts with the private sector.

(41) Equipment purchased from the private sector, including equipment included in Federal Supply Group 71, Furniture. Program amounts should be consistent with amounts reported under Object Class 31.01.

Exhibit OP-32 Summary of Price and Program Change
(Page 10 of 13)
INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

(42) Covers overseas contractor operated installation costs when covered in a single contractual agreement or when service is provided by a single contractor (excludes separate contracts for specific, limited services such as contract ADP services).

(43) Covers contracted service cost of Air Force Air Defense Systems (e.g., BMEWS, DEW Line, Spacetrack, Thule AFB base maintenance contracts, DSP) and Space Support programs.

(44) Includes the cost of ship related repair and the performance of regularly scheduled ship overhauls at commercial shipyards.

(45) Includes the cost to Depot Maintenance to purchase aircraft maintenance from commercial sources.

(46) Includes payments for all other non-Defense Working Capital Fund depot maintenance costs whether performed in-house or by contracts which have not been reported under lines 928 or 929.

(47) Program amounts should be consistent with Exhibit PB-15, (Advisory and Assistance Services), Chapter 19 of the Financial Management Regulation). The amounts reflected should agree with Object Class 25.1.

(48) Program amounts should be consistent with the amounts shown in Object Class 41.

(49) Charges for contractual services not otherwise reported elsewhere and consistent with amounts shown in Object Class 25.2.

(50) Amounts on line 991 will reflect variances from budgeted rates, as prescribed by OUSD (COMPTROLLER) guidance, which have actually occurred in the prior year or which have been approved (by DD-1415 or PBD) for the current year. There will be no amounts reflected on line 991 in the price and program growth columns. For the President’s budget, the amount in the prior year column will be the realized variance on the 30 Sep DD Comp(M) 1506 report. Under no circumstances will there be an entry on line 991 in the biennial budget year. (For a further discussion, see Foreign Currency notes at the end of these instructions).

(51) Total program amounts, in (4) and (9), will be equal to the total direct program for prior year (PY), current year (CY), and budget year (BY), as applicable.

(52) Includes fuel purchased from sources other than the Defense Working Capital Fund.

(53) Includes funds for the purchase of pharmaceutical drugs budgeted in the Defense Health Program.

(54) Usage of long distance communications comparable to commercial services.

Exhibit OP-32 Summary of Price and Program Change

(Page 11 of 13)
INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

(55) Include costs of long distance communications mandated by military readiness, security and interoperability.

(56) Funding supports critical Army production capabilities and maintains essential infrastructure to meet mobilization surge requirements for ammunitions processing, ordnance, and depot maintenance activities during national emergencies.

(57) Other Intra-government purchase includes purchases between other Components not already included in another OP-32 line item.

(58) Program amounts should be consistent with the amounts shown in Object Class 25.6

(59) Program amounts should be consistent with Section 803 of Public Law 111-84 (FY 2010 National Defense Authorization Act).

(60) Program amounts should reflect reimbursements to the Defense Security Service for personal security investigations.

(61) Includes amounts reported, respectively, under Object Classes: 25.6, 25.8; 32.0; 42.0; 43.0; and 91.0.

(62) For use by SOCOM only to record MFP-11 civilian pay reimbursements.

**Note:** In order to be consistent with the OMB A-11, all Components are required to comply with the Crosswalk of OP-32 Line Items to CIS Object Classes.
INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

Foreign Currency Notes

A. The Total for Foreign Currency Rate Difference (Column 2) must reflect the difference between:

1. PY to CY: Prior year actuals and current year budgeted rates or anticipated expenditures in the current year if transfers have also been approved for the Current Year. (For the latter, individual line items in column 2 (except for line 991) will reflect the difference in budgeted rates and line 991 in column 2 will reflect the transfer amount.)

2. CY to BY: Current year budgeted rates or anticipated expenditures in the current year if transfers have also been approved for the current year, and biennial budget year 1 budgeted rates.

B. Individual line items in Column 2 (except for line 991) must reflect the difference in program costs that are caused only by a difference in budgeted foreign currency exchange rates between fiscal years.

C. Line 991 - Foreign Currency Variance

1. Prior Year (PY) to Current Year (CY)
   a. PY column equal Realized variance (DD Comp (M) 1506 Report 30 Sep). Column 2 equal Reverse the realized variance amount in the PY column. CY column equal zero
   b. If transfers have been approved in the CY, PY column equal Realized variance (DD Comp (M) 1506 Report 30 Sep). Column 2 equal Reverse the realized variance amount in the PY column and add the transfer amount approved for the CY to determine the total. CY column equal the transfer amount approved for the CY.

2. Current Year (CY) to Budget Year (BY)
   a. If the budgeted rates change between the CY and the BY and transfers from the Foreign Currency Fluctuations, Defense (FCF, D) appropriation are not reflected in the budget, then the CY column, Column 2, and the BY column for line 991 are all zero.
   b. If budgeted rates change between the CY and the BY and the FCF,D transfers have been reflected in the budget for the CY, then the CY column for line 991 will reflect the value of the transfers and Column 2 for line 991 will reflect the reversal of the transfers. The BY column for line 991 will be zero.

**Definitions**

**Component:** All DoD Military Departments, active and reserve components, including the Defense Activities and Agencies that have Selected Quality of Life resources, are to submit the OP-34 Exhibit each year.

**Programs:**

- Military MWR Program -- as defined in DoDI 1015.10, “Programs for Military Morale, Welfare, and Recreation (MWR)”
- Civilian MWR Program -- as defined in DoDD 1015.8, “DoD Civilian Employee Morale, Welfare, and Recreation (MWR) Activities and Supporting Non-Appropriated Fund Instrumentalities (NAFIs)”
- Lodging Program -- as defined in DoDI 1015.12, “Lodging Program Resource Management”
- Overseas Contingency Operations Mission NAFI -- as defined in DoDD 1015.1, "Establishment, Management and Control of NAFIs"
- Armed Services Exchange -- as defined in DoDD 1015.1, "Establishment, Management and Control of NAFIs" and DoDD 1330.9, “Armed Services Exchanges”
- Family Support -- as defined in DoDI 1342.22, “Family Centers”
- Off Duty and Voluntary Education -- as defined in DoDI 1322.25, “Voluntary Education Programs” includes tuition assistance and other voluntary education programs.

**Exhibit OP-34 Fund Support for Selected Quality of Life Activities**

*(Page 1 of 7)*
Exhibit OP-34 Fund Support for Selected Quality of Life Activities (Continued)

Category:
- Military MWR Category A -- Mission Sustaining Programs
- Military MWR Category B -- Basic Community Support Programs
- Military MWR Category C -- Revenue-Generating Programs
- TDY Lodging -- Temporary Duty (TDY) Lodging is official travel quarters for TDY personnel
- PCS Lodging -- Permanent Change of Station (PCS) Lodging is official travel quarters for PCS personnel and their families and normally provides some type of kitchen facilities.
- Tuition Assistance -- Funds provided solely for direct, enrollment-related military tuition assistance
- Other Voluntary Education -- Other costs not identified or captured under the tuition assistance category above; voluntary education-related personnel, equipment, supplies, travel and conference attendance should be included here. PACE, DANTES, VEAP, eArmyU and any other similar programs not paid for directly from tuition assistance funding should be included here.

Fund Source: Direct Support is direct program operation and direct overhead as defined below.
- Direct Program Operation: All appropriated fund costs (in-house and contract) provided to directly operate an individual MWR program, such as physical fitness, libraries, or recreation (as defined in enclosure 4 of DoDI 1015.10 for military MWR programs). Costs include military and civilian personnel including benefits; travel; training; supplies; equipment (includes rental and maintenance); contracted services; and Family Child Care subsidy. For Overseas Contingency Operations Mission NAFIs include only the appropriated funds related directly to the operation of the NAFI. Do not include appropriated fund costs of the mission program.
- Direct Overhead: At installation and headquarters, overhead is appropriated fund direct costs that are attributable to more than one MWR program and are associated with the general management or administrative support of MWR programs. Overhead costs include military and civilian personnel including benefits; travel; training; supplies; equipment (includes rental and maintenance); contracted services; and other support related to all levels of managerial staff functions and positions located above the direct program managerial and operational level of individual MWR programs. These resources support planning, organizing, directing, coordinating, and controlling the overall operations of MWR programs. It consists of program, fiscal, logistical, and other managerial functions that are required to ensure oversight.
- Indirect Support: All appropriated fund Base Operations support costs to MWR programs and activities. Base Operation costs are budgeted and executed by a non-MWR activity that supports installation-wide services. Costs include military personnel support; civilian personnel services; facility and infrastructure support (including fire, health, safety); equipment operation; financial and accounting services; installation procurement and common warehousing; communication; installation information systems; legal services; transportation services; second destination transportation; utilities and real property rents; refuse collection; custodial and janitorial services.

Activity: Individual MWR programs within Military MWR Categories listed above.
Appropriation: Treasury Code, defined set of four-digit numeric codes from the Comptroller that identifies funding resources by type, organization and components.
Resource Type: Identify Funding by Appropriation (i.e., O&M and dollars in thousands) or Appropriation and Manpower type (i.e., O&M and Civilian FTE and number)
Exhibit OP-34 Fund Support for Selected Quality of Life Activities (Continued)

Instructions for Completing the Quality of Life Resources Database

1) For PY-1 through BY provide direct funding for Fund Source=Direct Program Operation by QOL Category, Activity, Appropriation and Resource Type. Provide funding for all other Fund Sources where specified in the matrix below by QOL Category, Appropriation and Resource Type. Provide Manpower using Fund Source= Direct Program Operation by QOL Category, Appropriation and Resource Type. Do not enter any cost more than once.

2) For BY+1 through BY+4 provide direct funding for Fund Source=Direct Program Operation by Appropriation and Resource Type rolled up at the QOL Category level except for the following Activities in the matrix below—A.3, and B.1.1 through B.1.5. Provide funding for all other Fund Sources where specified in the matrix below by QOL Category, Appropriation, and Resource Type. Provide Manpower using Fund Source= Direct Program Operation, by QOL Category, Appropriation and Resource Type. Do not enter any cost more than once.

3) Choose an appropriation with each resource type reported on— for example O&M and funding for dollars or O&M and Civilian FTES, and Military Personnel and Officer and Military Personnel and TOA for funding.

4) Provide Indirect Support at the MWR Category level for PY-1 to BY.

5) Provide URD Practice and USA Practice (considered memo entries) dollars at the MWR Category level for PY-1 to BY.

7) MWR only: Provide in Microsoft Word document a short narrative description of resource changes between CY, and BY, identified separately by MWR category, if 10 percent above or below inflation.

The OP-34 Budget Exhibit must be included in the Budget Estimates Submission and the Congressional justification book each year. The OP-34 data will be submitted via the Select and Native Programming Data Input System (SNaP) located at https://snap.cape.osd.mil. The most current version of this exhibit will be found at this site. Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions regarding the OP-20 should be referred to (703) 697-3101. The SNaP system will generate this display from the data provided for MWR programs (military, civilian, lodging, Overseas Contingency Operations mission NAFIs, and armed services exchanges) that includes a title page with the following description of the exhibit: “The Exhibit OP-34 displays total appropriated fund support for the Department of _____ managed Morale, Welfare, and Recreation (MWR) programs.” The title page will also include the following definition of MWR programs (from DoDI 1015.10): “The MWR programs are vital to mission accomplishment and form an integral part of the non-pay compensation system. These programs provide a sense of community among patrons and provide support services commonly furnished by other employers, or other State and local governments to their employees and citizens. The MWR programs encourage positive individual values, and aid in recruitment and retention of personnel. They provide the physical, cultural, and social needs, and general well-being of Service members and their families, providing community support systems that make DoD bases temporary hometowns for a mobile military population.”

Business Rules

Refer to the table below to identify Program, Category, Fund Source, and Activity Relationships

Indirect Support, URD Practice (memo), and USA Practice (memo) are reported at the MWR Category level only

Subject Matter Experts: Questions regarding this data requirement should be directed to Ms. Carol Potter 703-602-4997 and Major Greg Wise 703-692-8046.

Technical Issues: If you are having difficulty with the data collection system—SNaP, contact the SNaP administrators via the email link at the Web site: https://snap.cape.osd.mil

INSTRUCTIONS:

1. The OP-34 must contain a title page that includes the following description of the exhibit: “The Exhibit OP-34 displays total appropriated fund support (APF) for Dept. of the _____ managed Morale, Welfare, and Recreation (MWR) programs and joint services managed programs.”

The title page must also include the following definition of MWR programs (from DoDI 1015.10): “The MWR programs are vital to mission accomplishment and form an integral part of the non-pay compensation system. These programs provide a sense of community among patrons and provide support services commonly furnished by other employers, or other State and local governments to their employees and citizens. The MWR programs encourage positive individual values, and aid in recruitment and retention of personnel. They provide for the physical, cultural, and social needs, and general well-being of Service members and their families, providing community support systems that make DoD bases temporary hometowns for a mobile military population.”

The title page must also include a short narrative description of all major program changes, identified separately by MWR category.

2. In preparing the OP-34 Exhibit, the Services/Defense Agencies must use the program definitions contained in the DoD Directive 1015.10, subject: Programs for Military Morale, Welfare, and Recreation (MWR), DoDI 1015.12, subject: Lodging Program Resource Management; and DoDD 1015.8, subject: DoD Civilian Employee Morale, Welfare, and Recreation (MWR) and Supporting Nonappropriated Fund Instrumentalities (NAFIs).

3. APF support should include both direct and indirect APF support provided to MWR activities and should include the cost categories reported on the Appropriated and Nonappropriated Fund Expense Summary required by DoDI 7000.12. Direct costs include those costs that can be directly attributable to the activity and include civilian and military pay and benefits, travel, training, supplies and equipment, contracts, and Family Child Care subsidy. Indirect costs include costs that are attributed to more than one activity and include rents, utilities, communications, minor construction, repair and maintenance, contracts, engineering support, etc.

4. APF Common Support - That appropriated fund support, identified as APF support used in the management, administration and operation of more than one MWR program, however, that support or cost is not easily nor readily identifiable to a specific MWR program.

Some examples of APF common support would include: managerial operational functions and positions at an installation, major command or Service, executive and upper management supervision that is functionally located above the operating program manager level and having responsibility for several MWR programs; an installation’s civilian personnel functions; and central accounting office functions.

5. The OP-34 Exhibits must be submitted for the OSD/OMB budget submission each year. The OP-34 exhibit should also be included in the congressional justification books (Volume II - Data Book) each year.

Total Requirement

Instructions for creating the display

1) Display the Organization and Component under the report title
2) For each Weapon System display the weapon system detail as organized above
3) Sum all weapon detail reported by SAG and PE at weapon system level

Crystal Reports Sort Order: Organization, Component then Weapon System

Data Center: Operations and Support, Program/Budget

Data Source: SNaP

Database Requirement: One XLS of all data for all organizations as provided-- no calculations

Instructions for Completing the Weapon Systems Readiness Database--Ship Operations

1) For Navy only, provide the funding level--by Active and Reserve--for Ship Operations as defined by the Budget Exhibit OP-41 (described in the DoD Financial Management Regulation). Identify the relevant Navy SAG for Ship Operations.

2) If OPTEMPO Types are constant for all ships across the program, provide narrative in a word document explaining why.

Definitions:

**Organization:** The POM reporting entities directed to submit this data requirement. For a complete list of organizations see by data requirement see Appendix A of the PDR.

**Component:** Active, Guard, and Reserve

**SAG:** Sub-Activity Group, budget term denoting groupings of resources e.g., Navy SAG: 1B1B.

**Program Element:** Identify the PE containing the weapon system described by the detail.

**Weapon System Type:** Provide Ship Type detail for the weapon system described by the detail.
OP-41 Ship Operations Program (Continued)

Weapon System Detail:
Quantity-Identify the number of ships per Ship Type used to determine the steaming days program funding
Steaming Days: -This OPTEMPO Type is the number of steaming days per Ship per Quarter for Deployed and Non-Deployed for both required and funded. For inventory, PEs will be pulled from the Forces FYDP and compared to the Inventory values provided by the Navy.
Ship Operational (Op) Months - This OPTEMPO Type is the number of months a ship is “operational” (i.e., not in a major repair period)
Funded: Identify funding level for Repair Parts (including reparable parts), Fuel, Consumables, Utilities, Nuclear Fuel, Charter and Other using the OP-41 guidelines, generally defined by Navy Special Interest Codes
Total TOA Required: Provide total TOA required to meet the funded steaming days.

Technical Issues: If you are having difficulty with the data collection system—SNaP, contact the SNaP administrators via the email link at the web site.

Exhibit OP-73 Repair Parts, Army Reserve Components

(Page 1 of 2)
INSTRUCTIONS FOR COMPLETION OF OP-73

1. Backlog carried forward from prior years - unfunded requirements at the end of the previous fiscal year.

2. Backlog of obsolete parts - backlog of repair parts associated with equipment that is being retired from the Reserve Forces.

3. Inflation - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces times the OSD rate for “general purchases inflation--O&M” or the Defense Working Capital Fund, whichever is applicable.

4. Adjusted prior year backlog - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces plus inflation (1-2+3)

5. Recurring requirements - annual repair parts requirements to support equipment fielded in previous years.
   a. Annual consumption - those parts consumed annually to support weapons systems fielded in previous years.
   b. Change in equipment inventories - increases or decreases in annual consumption requirements necessary to reflect changes in equipment inventory levels (e.g., retirement of equipment).
   c. Change in stockage levels - increases or decreases in requirements due to changes in the level of repair parts support required annually for a particular equipment.

6. Nonrecurring requirements - one time requirements associated with introduction of new equipment to the Reserve Force.
   a. Force modernization initiatives - initial inventory of repair parts associated with fielding of force modernization systems.
   b. Introduction of other new equipment - introduction of other equipment not previously provided to the Reserve Force.

7. Total funding required - adjusted prior year backlog plus recurring requirements and nonrecurring requirements.

8. Funds budgeted for repair parts - amount budgeted for repair parts each year.

9. Backlog, end of year - “total funding required” less “funds budgeted for repair parts”.

INSTRUCTIONS

Report force structure for each model/design/series (MDS) aircraft within each program element. Also identify the command to which the equipment is assigned and the purpose code for the equipment. The force structure should be reported at end of year for the prior year and the outyears and at the end of each quarter for the current year and the budget year (BY). Totals should be provided for MDS and each PE.

Separate exhibits are required for Active Air Force, Air Force Reserve, and Air National Guard.

Directions: For each appropriation in the Operation and Maintenance Title, submit a monthly phased obligation plan by Subactivity Group.
Definitions:

**Appropriation**: Submit a separate exhibit for each appropriation in the O&M Title. Enter the name of the appropriation in this line.

**Component**: DoD Component that is the holder of the appropriation.

**Total Obligation Authority (TOA)**: Provide the phased obligation plan for anticipated current year (CY) obligation authority using the TOA as shown in the Comptroller Information System (CIS).

**Budget Activity**: The phased monthly obligation plan by Budget Activity matching the Budget Activity TOA shown in CIS.

**Subactivity Group**: Provide all phased monthly obligation plans by relevant Subactivity Group. Totals for Subactivity Groups should reconcile to the phased monthly obligation plan by Budget Activity matching the Budget Activity TOA shown in CIS.

**Month**: Enter the estimated monthly obligations.

**Cum.**: Enter the cumulative obligations (current month’s obligations plus the sum of previous month’s obligations).

(Report on this exhibit all flying hours costs direct funded in the O&M appropriations including those funded in the Air Operations Activity Groups as well as those funded in the flying hour programs of the Army, USSOCOM, and the Defense Health Program. Include all other direct funded flying hour-related costs (fuel, supplies/DLRs, consumables). Do not include indirect support costs such as Base Operations, Facilities Sustainment Repair and Modernization etc. Price and Program changes should agree with those on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5.)

**Description of Operations Financed:** (Provide an explanation of the air operations financed by each Component. Break out each component by Budget Activity, Activity Group, and Subactivity Group. List each subactivity group for Air Operations Activity Groups and include separate lines for Mobility Operations, Training Operations, and Other to identify all the flying hour-related costs (fuel, supplies/DLRs, depot maintenance) included in all other Activity Groups that are direct funded in the O&M appropriation. See example below.)

**Budget Activity 1**
- Activity Group: Air Operations
  - Mission/Flight Operations
  - Intermediate Maintenance

**Budget Activity 3**
- Activity Group: Basic Skills and Advance Training
  - Flight Training
  - Training Support

*Exhibit PBA-2 Air Operations (Page 2 of 3)*
**Narrative Explanation of Changes:** (Explain/describe/narrate by subactivity, the major program changes reflected in the budget (for $ provide in nearest tenths of millions). Separately identify major transfers among appropriations, budget activities, activity groups, and subactivity groups. Explain changes in price and program from the current estimate (CY) to the BY, as appropriate. The narrative should agree with the explanation of changes and functional transfers shown in the (OP-5). Identify on the bottom of the exhibit the preparation date and a point of contact (with telephone number) who is knowledgeable about the content of the data reflected on the exhibit. Data entered on this exhibit must match the corresponding data entered on the Reserve Components (PBA-11), Appropriation Highlights (PBA-19), Key Activity Indicators (PBA-21), and Special Operations Forces (PBA-26) Exhibits. In addition, the data contained in the O&M Overview should match the data reported in other budget justification material such as the performance criterias of the Detail by Budget Activity and Activity Group (OP-5), Analysis of Flying Hour Program (OP-20), Funding for Depot Level Reparables (OP-31), and Special Operations Forces (OP 52).)

(Page 3 of 4)
Instructions

Reflect program data under “Description of Operations Financed” and “Program Data” sections.

Narrative Explanation of Changes: Provide a succinct narrative explanation of total resource changes (for $ provide in nearest tenth of a million) between the Current Year (CY) and Budget Year 1 (BY) by relating it to program changes (force structure, end strength, etc.) for the period. Also, identify any applicable major pricing changes between years. Explanation of price and program changes should be provided separately for the Active Fleet as well as the Reserve Fleet. Include all other direct ship operations related costs (fuel, supplies/DLRs, consumables). Do not include indirect support costs such as Base Operations, Facilities Sustainment Repair and Modernization etc.

Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits. Data entered on this exhibit must match the corresponding data entered on the Reserve Components (PBA-11), Appropriation Highlights (PBA-19), Key Activity Indicators (PBA-21), and Special Operations Forces (PBA-26) Exhibits. In addition, the data contained in the O&M Overview should match the data reported in other budget justification material such as the OP-5 (performance criteria), Ship Fuel Data and OPTEMPO Data (OP-40), Ship Operating Cost Data (OP-4), Funding for Depot Level Reparables (OP-31), and Special Operations Forces (OP-52).

Identify on the bottom of the exhibit the preparation date and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

(Page 4 of 5)
1/ Should include Overseas Contingency Operations (OCO) funding and Title IX funds.

2/ Memo entry which reflects any Overseas Contingency Operations funding received or requested. Metric data does not need to be provided for this entry, only provide funding levels.

3/ Use 49% of any military pay appropriations programmed in the facilities sustainment FYDP program elements.

4/ Total funding for Facilities Sustainment and Restoration/Modernization must be consistent with estimates identified for the Facilities Sustainment and Restoration/Modernization subactivity group in the automated OP-32 submit.

5/ Include any sustainment funding received or expected from foreign governments or international organizations.

6/ Include any sustainment funding received or expected from state governments or other domestic entity.

7/ Should reflect requirement generated from the Facility Sustainment Model.

8/ Displayed as percent of requirement funded. Component must provide explanation for variances greater or less than 5% from the Department goals for sustainment and recapitalization. Definitions for sustainment and recapitalization metrics can be found in Chapter 8, Facilities Sustainment and Restoration/Modernization.

9/ Should match appropriation summary. Must also be consistent with information contained within the Facilities Data Quality Assurance application.

TRAINING AND EDUCATION
COMPONENT TITLE

1. Training workload should agree with the Military Manpower Training Report (MMTR) and reflect direct and reimbursable workload associated with the dollars reported under training and education.

2. Specialized skill includes initial skill, skill progression, and functional training for both officer and enlisted.

3. Officer Acquisition includes Service academies, Platoon Leaders Course, Officer Candidate/Training Schools, and other enlisted commissioning programs. Also includes USUHS and the Health Professional Scholarship Program.

Narrative Explanation of Changes: Provide a succinct narrative explanation of total resource changes (for $ provide in nearest tenth of a million) between the current year (CY) and budget year (BY) by relating it to program changes (force structure, end strength, etc.) and pricing changes for the period. Also, identify any applicable major pricing changes between years. Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits and with the corresponding data entered on the Appropriation Highlights (PBA-19). Identify on the bottom of the exhibit the preparation date and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

Exhibit PBA-9 Defense Health Program
(Page 3 of 4)
PROGRAM NARRATIVE EXPLANATION OF CHANGES. For all DHP, O&M programs, provide a succinct narrative explanation of total resource changes (for $ provide in nearest tenth of a million) between the current year and biennial budget year 1 and between biennial budget year 1 and biennial budget year 2 by relating it to program changes (force structure, end strength, etc.) and pricing changes for the period. Also, identify any applicable major pricing changes between years. Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and OP-5 exhibits and with data included in other justification material. Identify on the bottom of the exhibit the preparation date and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

NOTE: Procurement, RDT&E and Major OT&E justification material should be presented in accordance with the requirements in the applicable chapters of the Financial Management Regulation.

NOTE: Information on this exhibit must be consistent with information on PB 11, PB 11A, and PB 11B (Defense Health Program Summary Data).

**Narrative Explanation of Changes:** Provide succinct narrative explanation of the changes in the number of personnel between fiscal years.
BASE OPERATION SUPPORT (BOS)

Narrative Explanation of Changes: Explain/describe/narrate by functional category of Base Support and provide succinct narrative explanation of total resource changes reflected in the budget (for $ provide in nearest tenths of millions). Separately identify major transfers among appropriations, budget activities, activity groups, and subactivity groups and provide programmatic reason for each transfer. Specifically identify by base, name and location, any change in the number of installations. Explain changes in price and program from the current estimate (CY) to the budget year (BY) as appropriate. The narrative should agree with the explanation of changes and functional transfers shown in the OP-5 exhibit. Data entered on this exhibit must match the corresponding data entered on the Reserve Components (PBA-11), Appropriation Highlights (PBA-19), Key Activity Indicators (PBA-21), and Special Operations Forces (PBA-26) Exhibits. In addition, the data contained in the O&M Overview should match the data reported in the performance criteria of the Detail by Subactivity Group (OP-5). The total price and program changes must match the sum of Base Support subactivity groups (O-1 line items). Identify on the bottom of the exhibit the preparation date and a point of contact (POC) (with telephone number) who is knowledgeable about the content of the data reflected on the exhibit.

1/ This category includes those Operation and Maintenance program elements normally ending as follows: “95”, Base Communications; “96”, Base Operating Support; “19”, Child Development Centers; “20”, Family Centers; “90”, Visual Information Activities; “53”, Environmental Conservation; and “54” Pollution Prevention. This includes those costs associated with utility operations and Other Engineering Support. This category specifically excludes those activities associated with FSRM, as reported in the PBA-7, FSRM exhibit.

RECRUITING, ADVERTISING, AND EXAMINING  
COMPONENT TITLE

**Narrative Explanation of Changes:** Provide narrative explanation of total resource change (tenths of $ millions) between the current year (CY) and budget year (BY) by relating it to program changes (force structure, average strength, etc.) for the period. Also identify any applicable major pricing changes between years. The discussion of program growth should address recruiting, advertising and examining separately. Financial data excludes Command, Control, Communications; Real Property Maintenance; and Base Operations costs that are reflected separately in the overview. Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits. Identify on the bottom of the exhibit the preparation date and a point of contact (POC) who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.
Appropriation Summary
Operation and Maintenance, ______________

A separate exhibit must be provided for each appropriation included in the O&M Title.

Description of Operations Financed: Provide a narrative description of the type of functions financed by the Appropriation, explain the major reasons for price growth, and separately identify significant inter-appropriation transfers-in and transfers-out of program growth.

Budget Activity 1: Operating Forces

Budget Activity 2: Mobilization

Budget Activity 3: Training and Recruiting

Budget Activity 4: Administration and Servicewide Activities

Narrative Explanation of Changes: For each budget activity, provide a succinct narrative explanation of total resource change (for $ provide in nearest tenth of a million) between the current year (CY) and budget year (BY) by relating it to program changes (force structure, average strength/FTEs, etc.) for the period. Also, identify any applicable major pricing changes between years. Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32), O&M Funding by Budget Activity/Activity Group/Subactivity Group (O-1), and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits.

Identify on the bottom of the exhibit the preparation date and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

NOTE: Every Component is required to submit the PBA-19 Exhibit.

This exhibit includes all of Budget Activity 2, Mobilization plus the Marine Corps Prepositioning activity group included in Budget Activity 1. Dollar amounts for Army, Navy, and Air Force shown in this table should match the total of Budget Activity 2.

**Narrative Description:** Provide a succinct narrative explanation of total resource changes (for $ provide in nearest tenth of a million) between the current year (CY) and budget year (BY) by relating it to program changes (force structure, end strength, etc.) for the period. Also, identify any applicable major pricing changes between years. For personnel data, explain the changes in terms of programs affected and identify changes in functional requirements.

Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Subactivity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits). Data entered on this exhibit must match the corresponding data entered on the Reserve Components (PBA-11), Appropriation Highlights (PBA-19), Key Activity Indicators (PBA-21), and Special Operations Forces (PBA-26) Exhibits as appropriate. In addition, the data contained in the O&M Overview should match the data reported in other budget justification material such as the OP-5 performance criteria.

**Airlift and Sealift Programs**

**Airlift Forces:**

AIR FORCE:

Show the amount of the direct payment (subsidy) made for airlift to the U.S. Transportation Command.

**Sealift Forces:**

ARMY:

(Page 4 of 5)
MOBILIZATION
COMPONENT TITLE
Operation and Maintenance, (Service)

Footnotes/Additional Guidance:

1/ Show the total number of ships (at the end of the fiscal year) for this category and the total amount of per diem payments made to the National Defense Sealift Fund (NDSF) or the U.S. Transportation Command. The Defense Logistics Agency (DLA) should report the cost of afloat prepositioned tankers used by the Defense Fuel Supply Center.

2/ Show the number of planned exercises and the total amount budgeted. Do not include JCS funded exercises in the Service submissions. JCS exercises and funding will be reported as Defense-Wide.

3/ Show Service-funded costs not included as part of the per diem payment to the NDSF but which are directly related to the sealift program. This would include enhancements and modifications to on-board systems.

Identify on the bottom of the exhibit the preparation date and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

Exhibit PBA-27 Psychological Operations

Instructions
Exhibit PBA-27 Psychological Operations (Information Operations)

1. Purpose. This exhibit identifies funding for Psychological Operations (Information Operations) programs. The data is used to prepare the overall Psychological Operations (Information Operations) budget exhibit for the O&M Overview Book.

2. Submission.
   a. Exhibit PBA-27 should identify all Psychological Operations (Information Operations) funding by Combatant Command for all PSYOP activities. PSYOPS are planned operations to convey selected information and indicators to foreign audiences to influence their emotions, motives, objective reasoning, and ultimately the behavior of foreign governments, organizations, groups, and individuals. The execution of the PSYOP includes conducting research on various foreign audiences; developing, producing, and disseminating products to influence these audiences; and conducting evaluations to determine the effectiveness of the PSYOPS activities.
   
   b. Data are to be provided in millions of dollars, using 3 decimal points and will include both Baseline and Overseas Contingency Operation funding for all appropriations.
   
   c. Submission of the required exhibit will be made in hard paper copy and in an Excel format.
   
   d. The submission of the completed exhibit is required for both the Program Budget Review and with the President’s Budget submissions. Both submissions must be provided and emailed to the OUSD(Comptroller), Operations Directorate, at OPSMAIL@OSD.MIL. The President’s Budget Submit must be submitted no later than January 15 in order to be included in the “Operations and Maintenance Overview” Justification Book.

3. Entries.
Exhibit PB-27 Psychological Operations (Information Operations)
   
   a. Header: Classification of the Document: Unclassified, if at all possible keep the information unclassified if not indicate what portions of the document is classified.
   
   b. Description of Operations Financed. Brief description of items funded, i.e., COCOM Voice Programs, MIST, Media/Video Print Production, Web initiatives, surveys, audience/media analysis, radio broadcasting.
   
   c. Appropriation/COCOM. List the COCOM that has oversight of the funding and the appropriation. Also indicate if the funds are budgeted in OCO or Baseline programs.
d. **Sub Activity Group (SAG)**: List the SAG where the funding is budgeted.

e. **Comments**: Provide detail explanations of the changes from FY CY to FY BY1 and FY BY1 to FY2 for each COCOM.

*(Include Outyear Summary in the OSD/OMB submission only)*

Exhibit PB-31R Personnel Summary (Page 2 of 2)
Exhibit PB-58 COCOM Direct Funding

Combatant Command Direct Funding
Instructions for completing the PB-58 Exhibit

The PB-58 will not be required for either the Budget Estimate Submission or the President’s Budget if the Joint Task Assignment Process Business Rules have been incorporated to include the Military Service’s creation of a SAG for the Combatant Commands headquarters functions and a SAG for the mission set.

Component/Aencies are required to submit this exhibit for programs funded in Operation and Maintenance appropriations and obligated by the Commanders of the Combatant Command (COCOMs). The purpose of the PB-58 is to provide program and budget justification and visibility for changes in the level of resources required for each COCOM.

The PB-58 provides essential information for justification of the OSD/OMB Program and Budget Review Submission and the President’s budget. Section III; The "Reconciliation of Increases and Decreases" should identify changes that are occurring. Each change must be explained with programmatic reasons and an explanation as to why the change is necessary.

The PY column of the OSD/OMB Program and Budget Review submission should reflect actual data through the first three quarters plus a realistic projection for the remaining quarter. For the PB submission, the PY column will reflect actuals and agree with the data reflected in the certified annual yearend DD Comp 1002 report.

The “Reconciliation of Increases and Decreases” section will be included in the PB-58 for both the OSD/OMB Program and Budget Review Submission and the President’s budget submission. Reconciliations will show all changes from fiscal year to fiscal year and, for the current year, a track from the estimate requested in the previous President's budget. Specifically display:

- The BY estimate included in the previous President’s budget submission to the current CY estimate included in this submission,
- The current FY CY estimate to BY estimate reflected in this submission.

Personnel summaries are required for each subactivity group and for each Defense Agency.

Copy requirements are identified in Chapter 1. In addition, one electronic copy (each) of the PB-58 Exhibit is to be provided to the OUSD(C) P/B Operations directorate, (OPSMAIL@osd.mil).

This exhibit includes five sections:
I. Financial Summary: (O&M and Other Appropriations)
II. Individual COCOM Financial/Program Data

Exhibit PB-58 COCOM Direct Funding

COMPONENT/AGENCY NAME ______________________
Operation and Maintenance, _____________

I. Reconciliation of Increases And Decreases (O&M only): (Provide Section IIIA as a total summary of all COCOMs supported, and a separate one for each COCOM)

Provide a trail of changes from the previous President’s budget request for the current fiscal year in this submission to the appropriated amount for the CY in this submission to the CY in this submission; and from the CY current estimate to the FY BY estimate. Provide a single entry in each year for price changes. Itemize and justify the major program changes in each year (provide the baseline in dollars to which the increase or decrease applies). Such justification should clearly explain programmatic changes in resource levels including why increases are required or decreases occur. The DoD Components should report in thousands.

In the reconciliation of changes from the previous President’s budget request for the CY to the estimate for CY in the current submission, the DoD Components should include the following adjustments:

- Distributed Congressional Adjustments: Adjustments that Congress specifically makes to the President’s budget request.
- Undistributed Congressional Adjustments: Adjustments outlined on the tables contained in the statement of managers accompanying the appropriations conference report. The Components must use discretion as to how these adjustments are applied to minimize negative impacts on force readiness.
- Adjustments to Meet Congressional Intent: Adjustments that are required in order to align funding for a congressionally approved program into the proper budget activity and subactivity to carry out the intent of the Congress.
- General Provisions: Adjustments directed by the Congress in appropriations law, the distribution of which is not explicitly stated. The PB-58 should separately display each General Provision adjustment.
- Program Increases and Decreases: The Operation and Maintenance (O&M) fact of life changes (functional transfers and emergent requirements) are programmatic, intra-appropriation adjustments made by DoD Components to address significant, unforeseen operational readiness issues.

This section needs to be provided by Military Department for each COCOM supported.

## VOLUME 2B, CHAPTER 4: “PROCUREMENT APPROPRIATIONS”

### SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue and underlined font**.

The previous version dated December 2016 is archived.

CHAPTER 4

PROCUREMENT APPROPRIATIONS

1.0 GENERAL (0401)

1.1 Purpose (040101)

This chapter provides instructions applicable to budget formulation and congressional justification for procurement and production activities. Unless otherwise specified, these instructions apply to all procurement appropriations and to all budgets.

1.2 References (040102)

Volume 2A, Chapter 1, Section 0102, provides policies and definitions concerning costs that are to be financed by the procurement appropriations.

1.3 Submission Requirements (040103)

1.3.1. General guidance with regard to submission requirements is presented in Volume 2A, Chapter 1. This chapter provides guidance for the preparation of procurement appropriation backup material required to support the Budget Estimates Submission (BES) and the President’s budget request. The procurement accounts should also submit applicable exhibits required by other chapters in the Financial Management Regulation. The Components will also submit any exhibits required by the Office of Management and Budget (OMB) Circular A-11, Preparation and Submission of Budget Estimates.

1.3.2. Military Departments and Defense Agencies are responsible for clearing the justification material with the Washington Headquarters Services, Directorate for Freedom of Information and Security Review, prior to transmittal to OMB and the congressional committees.

1.4 Classification (040104)

The budget justification material should be unclassified. All classified material shall be submitted separately. Components must include a P-40 Budget Justification exhibit for special access programs (SAPs) that are not labeled as secret. The P-40 exhibits for SAPs must only include funding streams and cite the following justification: “This program is reported in accordance with Title 10, United States Code, Section 119(a)(1) in the Special Access Program Annual Report to Congress.” All other (non-intel and non-SAP) classified funding requests must be identified (submit a one page P-40 exhibit) within unclassified justification budget materials.
2.0 PROCUREMENT EXHIBIT REQUIREMENTS (0402)

2.1 Purpose (040201)

This section prescribes instructions for the preparation and submission of procurement appropriations budget material to support the BES and the President’s budget request. See Volume 2A, Chapter 1, Section 0104, for specific printing requirements.

</table>

2.2 Submission Requirements (040202)

2.2.1 Extensible Markup Language (XML) Exhibits. All Components must submit required budget exhibits as PDFs with the source XML file embedded. These PDFs will be generated by one of the following two processes:

2.2.1.1. Submit an XML file to the XML Tools section of the Comptroller XML Exhibits web site, https://exhibits.dtic.mil/r2/app (for Components capable of building an XML file from an internal system). The XML files submitted through the XML Tools section must be compliant with the latest Procurement XML schema, located within the same section of the web site; or,

2.2.1.2. Create a Procurement exhibit manually within the “Create New P-40” section of the Comptroller XML Exhibits web site, https://exhibits.dtic.mil/p40.
2.2.1.3. The result of either process will be a PDF file with an XML file embedded. All Procurement exhibit PDFs/XMLs must be assembled into a Justification Book(s) within the same website using one of the Justification Book tools and posted to the SIPRNET website https://cisweb.ousdc.osd.smil.mil/.

2.2.1.4. Formats and examples of the exhibits are contained in Section 3.0.

2.2.2. Each backup book will include an Exhibit P-1, Procurement Program, an index of procurement lines (including P-1 line number, line item title, line item number, and backup book page number), and specific exhibits for those items covered by the backup book.

* 2.2.3. All applicable budget exhibits will be prepared for those programs with a budget year (BY) funding value of $5 million or greater. For non-Major Defense Acquisition Programs (MDAPs)/Major Automated Information Systems (MAIS) programs with a BY funding value less than $5 million, only the P-40 exhibit is required. No other subordinate exhibits will be submitted for those programs with a total BY funding value less than $5 million. MDAP/MAIS programs must submit all required budget exhibits regardless of BY funding value.

2.2.4. Periodically, changes to standard budget exhibit formats may be directed through separate guidance (for example, through the Budget Estimates Submission guidance). This guidance may precede formal adoption of exhibit changes into the Financial Management Regulation, or direct temporary exhibit changes, such as including funding for Overseas Contingency Operations (OCO). These changes will be incorporated into the applicable XML exhibit templates.

2.2.5. The exhibits will be aggregated in the following order for each P-1 line item, as applicable to that line item and submitted in P-1 line item order.

Arrangement of Exhibits – General (except as noted below)
P-1 Procurement Program
P-40 Budget Item Justification
P-40a Budget Item Just for Aggregated Items
MYP 1-4 Multiyear Procurement
P-10 Advance Procurement Requirements Analysis
P-5 Cost Analysis
P-5a Procurement History and Planning
P-21 Production Schedule
P-25 Production Support and Industrial Facilities Cost Analysis
P-18 Initial and Replenishment Spares Requirements
P-20 Requirements Study (BES only, as applicable)

Arrangement of Exhibits for Modifications
P-1 Procurement Program
P-1M Modification Summary
P-40 Budget Item Justification
MYP 1-4 Multiyear Procurement
P-3a Individual Modification Program
P-40a Budget Item Just for Aggregated Items
Arrangement for Ship Procurement Accounts
P-1 Procurement Program
P-40 Budget Item Justification
MYP 1-4 Multiyear Procurement
P-10 Advance Procurement Requirements Analysis
P-5 Cost Analysis
P-27 Ship Production Schedule
P-8a Analysis of Ship Cost Estimates - Major Equipment
P-29 Outfitting Costs
P-30 Post Delivery Estimates
P-35 Major Ship Component Fact Sheet

Arrangement for Ammunition Accounts
P-1 Procurement Program
P-40 Budget Item Justification
P-40a Budget Item Just for Aggregated Items
P-5 Cost Analysis
P-5a Procurement History and Planning
P-21 Production Schedule
MYP 1-4 Multiyear Procurement
P-18 Initial and Replenishment Spares Requirements
P-20 Requirements Study (BES only, as applicable)

Chemical Agents and Munitions Destruction

The Chemical Agents and Munitions Destruction, Defense appropriation contains multiple types of funds (Operation and Maintenance (O&M), Research, Development, Test and Evaluation (RDT&E), and Procurement) in separate budget activities. While the RDT&E and O&M efforts may be incrementally funded, the Procurement program must comply with the full funding policy. The Army is required to provide the justification book in the following order:

Table of Contents
Appropriation Language
Appropriation Justification
Part I Purpose and Scope
Part II Justification of Funds Required
Part III Milestones

Budget Activity 1: Operation and Maintenance
Part I Purpose and Scope
Part II Justification of Funds Required
Part III Financial Summary

Budget Activity 2: Research, Development, Test and Evaluation
Part I Purpose and Scope
Part II Justification of Funds Required
Part III Financial Summary
RDT&E RDT&E Exhibits (See Chapter 5)
Budget Activity 3: Procurement

Part I Purpose and Scope
Part II Justification of Funds Required
Part III Financial Summary
P-40 Budget Item Justification
P-5 Cost Analysis
P-5a Procurement History & Planning

OP-5 (Pt 1) Budget Activity Summary (See Volume 2A, Chapter 3)
OP-5 (Pt 2) Activity Group Detail, Including a Reconciliation of Increases and Decreases (See Volume 2A, Chapter 3)
OP-32 Summary of Price and Program Changes (See Volume 2A, Chapter 3)

2.2.6. P-Series Major Platform Quantities

Congress requires that all Major Platform end items, including Service Life Extension Programs, Major Defense Acquisition Programs (MDAPs), and Major Automated Information Systems (MAIS), reflect quantities on all P-series (i.e., P-1, P-40, P-5, etc.) budget exhibits. For those Major Platform end items where there are different variants being procured (e.g., Family of Medium Tactical Vehicles), total quantities should not be entered on the P-1 exhibit or in the Program Resources Collection Process (PRCP) database, but specific quantities by variant must be provided on all other P-series documents. Major Platform end items are defined as the new procurement of:

- Aircraft
- Unmanned Air Vehicles
- Ships
- Missiles
- Tanks
- Combat and Tactical Vehicles
- Satellites

For programs that are not considered Major Platforms, quantities are to be included in all P-series exhibits (e.g., P-40, P-5, P-5a, etc.) with the exception of the P-1 exhibit.

2.2.7. Major Defense Acquisition Programs (MDAPs)/Major Automated Information Systems (MAIS)

2.2.7.1. Joint budget guidance from the Under Secretaries of Defense for Acquisition, Technology & Logistics (AT&L) and Comptroller directs that all MDAPs or MAIS will be budgeted in separate, dedicated Procurement (P-1) line items, and associate all of the funding for a given MDAP/MAIS with a PRCP Program Number (PNO).

2.2.7.2. For all MDAP/MAIS programs, the P-40 Budget Item Justification exhibit must include the PNO. Components must also ensure that all applicable years of the PRCP and FYDP annex databases are updated to reflect the program budget estimates for all MDAP/MAIS programs, including all prior years and cost-to-complete columns. Each MDAP/MAIS subprogram is a component that will be identified by appropriation, budget line item, and budget activity under the End Item P-1 Line Item header.
2.2.8. Multiyear Procurements (MYP)

2.2.8.1. Volume 2A, Chapter 1, section 010203, provides guidance for MYP programs. The MYP exhibits are required for new candidate systems seeking MYP funding in the budget year (BY); multiyear contracts approved in prior years that have been significantly restructured; and MYP candidates that are requesting BY advance procurement funding in support of a later year MYP contract. Any changes to the MYP budget justification and backup materials, as approved by OUSD(C), must be re-submitted via SNaP. The approved MYP exhibits must be included in the Justification book along with the other procurement exhibits for that program.

2.2.8.2. Annual Congressional Multiyear Reporting Requirement. Section 2306b(l) of Title 10, United States Code (Multiyear Contracts) directs the Secretary of Defense to submit an annual report to the congressional defense committees regarding multiyear contracts. The OUSD(C) is responsible for coordinating the consolidated report.

2.2.9. Subsystem Budget Estimates

Any platform that includes funding for subsystems that are designated as Defense Acquisition Executive Summary or Selected Acquisition Reporting programs must identify the specific subsystem funding by fiscal year and by subsystem on the P-5 exhibits (or P-35 exhibit for SCN). The program must be labeled “MDAP/MAIS Subprogram: Program Name” and include the associated PNO. For example, “MDAP/MAIS Subprogram: Air Missile Defense Radar (AMDR), PNO: 384.”

2.2.10. Congressionally authorized and requested Advance Procurement funds for major end items must be clearly identified on all P-series exhibits for each end item by fiscal year for the program. Programs authorized to execute advance construction labor within their advance procurement must cite in the P-10 Exhibits description that “advance procurement items, including advance construction labor, is limited to components whose long-lead times require purchase early in order to reduce the overall procurement leadtime of the major end item.”

2.2.11. If an amended budget is submitted, applicable revised budget exhibits are required.

2.2.12. Guard and Reserve Procurement

2.2.12.1. Exhibit P-1R, Procurement Program - Reserve Components, shows all investment funding allocated for National Guard and Reserve Component equipment, to include quantities and costs of procurement items. The Military Departments are required to identify the applicable memo entries by P-1 Budget Line Item those lines that include quantity and funding for the National Guard and Reserve Components for each fiscal year (PY, CY, BY, BY+1 through BY+4, To Complete). The Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) generates the P-1R based on the FYDP data in PRCP.

2.2.12.2. All supporting procurement justification documentation must clearly annotate equipment allocated to the National Guard and Reserves. Specifically, the P-40 Budget Item Justification exhibit and the P-21 Production Schedule exhibit must contain a non-add memo entry indicating the funding and delivery schedule for all of the items being procured for allocation.
to the National Guard and Reserve Components. This data must balance to the data in the PRCP database.

2.2.13. Dual-Use Equipment

All Components must include the following statement on their P-40 exhibit for all Army, Navy, Marine Corps, and Air Force Active and Reserve dual-use equipment items: “In accordance with section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.”

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (0403)

This Section presents the backup book organization and the exhibit requirements for submission to Congress. See Volume 2A, Chapter 1, Section 0104 for specific printing requirements. Justification material will be organized into a Committee Staff Procurement Backup Book. Volume 2A, Chapter 1, Section 010403 provides a detailed distribution schedule for the procurement backup books. A separate congressional committee backup book will be prepared for the President’s budget request for each procurement appropriation.

Section 1 - Summary Material
Table of Contents
P-1 listing (P-1 Exhibits will be prepared using the OUSD(C) automated system with input from the Services and Defense Agencies)

Section 2 - Budget Appendix Extract Language

Section 3 - P-1 Line Item Detail. Procurement budget exhibits will be organized as discussed in paragraph 040203.D.

4.0 PROCUREMENT APPROPRIATION BUDGET EXHIBIT FORMATS (0404)

4.1 Standardized budget exhibit formats. (040401)

Section 4.2 describes the use of XML budget exhibits for procurement appropriations. In addition to the key attribute of making budget exhibit data electronically searchable, the XML exhibits standardize the various budget displays, enabling more effective and efficient budget formulation, review, analysis, and submission.
4.1.1. The exhibit formats provided on the following pages reflect guidance presented in previous sections.

4.1.2. The use of XML exhibits is mandatory for BES and President’s budget request backup justification material.

4.1.3. XML exhibits will automatically standardize formatting, to include:

4.1.3.1. Exhibits displayed on 8 1/2 inch by 11 inch paper in landscape format.

4.1.3.2. Actual fiscal years (e.g., FY 2016, FY 2017, etc.) rather than the template entries (i.e., Prior Years (PYs), Prior Year (PY), Current Year (CY), Budget Year (BY), BY+1, BY+2, BY+3, and BY+4 and “to complete” where applicable).

4.1.3.3. Annotating the applicable P-1 line item number (using the number shown on the OSD-generated P-1 exhibit from PRCP) and page number within the line item (e.g., Item 1-1 of 5, 2-1 of 1, 3-1 of 20, etc.) at the bottom center of each exhibit page.

4.1.3.4. Properly paginate the backup book.

*4.2 Procurement exhibit formats (040402)

There are 22 procurement exhibits that support the formulation and submission of the BES and the President’s budget request. The exhibits provide data and information that justifies budgetary requirements for the various procurement appropriations. The exhibit formats follow. Volume 2B, Chapter 19, Other Special Analyses, also identifies budget exhibits that may be required.

Exhibit P-1R, Procurement Program- Reserve Components

(Exhibit P-1, page 3 of 6)
General.

A. A summary by budget project/activity will be prepared for each appropriation, showing the amount for each project/activity and the total program for each appropriation. The detail of the consolidated line items in this entry should be available upon request. There should be no consolidation into a "Less than $5.0 million" line item for any line item requiring specific quantity authorization and for any Code B item (i.e., items not approved for Service use).

B. Unless otherwise prescribed for a specific commodity area, only procurement line items with funding of $5.0 million or more in the Prior Year (PY), Current Year (CY) or Budget Year (BY) will be listed individually. Items less than $5.0 million should be consolidated into a single line item entry, "Items less than $5.0 million," under each budget activity.

Exhibit P-1, Procurement Program Instructions. Provide funding and applicable quantities by budget activity and line item. Data must match submission to the PRCP data base.

Advance Procurement. Advance procurement should be debited and credited according to the lead-times of the advance procurement. For instance, if FY 2015 and FY 2016 Advance Procurement funds are required for a FY 2017 procurement, the FY 2015 Advance Procurement funds would be debited in FY 2015, the FY 2016 Advance Procurement funds would be debited in FY 2016, and the total of the FY 2015 and FY 2016 Advance Procurement funds would be credited in FY 2017.

</table>
List each aircraft and missile type and model separately, for both new procurement and modifications. Each ship type, Outfitting, Post Delivery, Cost Growth, Escalation, Service Craft, and Landing Craft will be listed as separate line items.

Include initial and replenishment spares financed in procurement appropriations in a single line item. Indicate the amounts included for initial and replenishment spares separately as subentries. For this purpose, all spare aircraft engines shall be considered initial spares.

All line items will be double spaced.

Costs will be expressed in millions of dollars using one decimal place, i.e.:

\[
\text{($ in Millions)} \\
15.6
\]

List the following Support Equipment and Facilities as separate line items:

- Common Ground Equipment
- Industrial Facilities
- War Consumables
- Other Production Charges
- Classified Projects
- Production Base Support
- Space Programs (list separately)
- Astronautics

Specific instructions.

**Appropriation.** Include the title and number of the appropriation, i.e., 2034A, Procurement of Ammunition, Army.

**Budget Activity.** Include the number and title of the budget activity, i.e., Budget Activity 04, Spare and Repair Parts.

**Column 1:** Include the P-1 line item number (generated from the OSD PRCP database).

**Column 2:** Item Nomenclature. Identify the name of the program. This must match what is shown in PRCP.
**Exhibit P-1 Instructions (Continued)**

Column 3: Identification Code. The letter "A" or "B" will be entered in this column. Line items will be appropriately coded according to the status of the item at the time the exhibit is prepared as follows:

- **Code "A".** Line items of material that have been approved for Service use. The term "approved for service use" means that:
  - **Army.** The item has been type-classified as Standard (STD) and excludes Limited Procurement (LP) type-classification that is included in the development category.
  - **Navy.** The item has been approved for full rate production.
  - **Air Force.** The item has been approved for full rate production.
  - **USSOCOM.** The system is effective, suitable, safe, and logistically supportable. Release for Special Operations Forces is in conjunction with full rate production decision.

- **Code "B".** Line items or material that has not been approved for Service use.

Columns 4-11: Self-explanatory.

**Exhibit P-1M, Procurement Program - Modification Summary Instructions**

This exhibit will be prepared for all years reflected on the sample P-1M exhibit and will represent a summary by weapon system of all individual modifications that are requested for that weapon system.

Show the total procurement cost in millions using at least one decimal place for each individual modification and total cost for that weapon system or family of models of that weapon system. For example, all models of the F-4 aircraft would be included in the F-4 line (e.g., RF-4B, F-4B, F-4E, F-4G, etc.), and all models of the AIM-7 missile would be included in the AIM-7 line (e.g. AIM-7E, AIM-7F, AIM-7M, etc.). Total modification cost will include only those costs budgeted in the individual P-1 line item, including installation costs.

**Exhibit P-1R, Procurement Program - Reserve Components Instructions**

In addition to the instructions for the P-1, Procurement Program, the P-1R line item entries will be exactly the same line item entries as the P-1. The Exhibit P-1R line items will include 2 sub-line items. One is for the National Guard and one is for the Reserve. Subtotal of the two lines is not required, but the total for the Reserve Components cannot exceed the amount of funding included in the P-1 line item. All procurement line items having funding for National Guard and Reserve requirements, including advance procurement, ammunition, and spares and repair parts, will be included in the P-1R exhibit and be provided for all years (i.e., for PY, BY, BY+1 – BY+4). Each Military Department is required to update the PRCP database for this information supporting the National Guard and Reserve for both the BES and the President’s Budget submissions.

Instructions - Exhibit P-3a, Individual Modification

* This exhibit will be submitted for all individual modifications whose costs are greater than $5.0 million in the budget year. Except as noted, individual modifications whose costs are less than $5.0 million in the budget year will not submit this exhibit.

For Other Procurement appropriations, when only a simple modification kit is being procured and installation is being performed at the organizational level, there is no need to submit an Exhibit P-3a as long as the P-5 and P-21 include the necessary information.

The sample exhibit displays additional line items for equipment and Group A installation kits. Tailor line item entries to the modification content. Use additional lines when quantities for these components differ from the quantity of end items being procured or when a unit cost comparison between years cannot be performed.

**Model.** Enter the model and series designation (e.g., A-10, AGM-86, F/A-18, etc.).

**Classification.** Enter the modification classification or type (e.g., safety, reliability, added capability, etc.), as applicable.

**Modification No. And Title:** Identify the modification number and title.

**Description/Justification:** Provide a description of what additional capability is added to the system by this modification, and why the modification is necessary (i.e., to increase reliability, maintainability, or mission capability). If the modification is related to reliability and maintainability, indicate the current Mean-Time Between Failure (MTBF) rate of the system, what MTBF will be specified in the development/production contract, and the estimated annual savings. Identify all engineering change proposals included in the modification and provide a brief description of each and how they relate to the particular overall effort. Identify the operational requirement document (ORD) that validates the modification. Identify the quantity of aircraft in the inventory and the quantity that will receive the modification, as identified in the ORD. For example, the total objective for a radar modification might be 75 units at an estimated unit cost of $300,000 each or total cost of $23.5 million. Twenty units have been procured in prior years, 10 units are included in the budget year leaving 45 units to be procured in subsequent years. Identify when a different number of Group A and Group B kits are being procured (the ORD should also include this information). Identify the applicable quantity of National Guard and Reserve end items ensuring quantities and costs match the P-1R. Do not use abbreviations or acronyms of a highly technical nature. Spell the acronyms the first time and abbreviate thereafter.

**Development Status/Major Development Milestones:** Provide status of engineering effort testing and data package availability as of the budget submission date. Provide significant accomplished and planned milestone dates such as Preliminary Design Review (PDR), Critical Design Review

(Exhibit P-3a, page 3 of 5)
Exhibit P-3a Instructions (Continued)

(CDR), completion of Contractor Test and Evaluation (CTE), completion of Development Test and Evaluation (DTE), completion of Initial Operational Test and Evaluation (IOT&E), etc.

Financial Plan:

Note: Prior year column includes all funding from beginning of program through the Prior Year-2 (PY-2). Quantities and costs should be provided for all applicable line items. PY-1, PY, and CY are the fiscal years currently available for obligation.

RDT&E: Enter programmed RDT&E resources by fiscal year. These resources should be consistent with the Program Element Summary Data Sheets for RDT&E programs.

* Procurement: Categories of cost shall be tailored to the individual system consistent with the program’s approved work breakdown structure (WBS) elements or modification content. Use as many line items as necessary to show this data. Enter the recurring and nonrecurring cost of the installation kits. Installation kits (Group A kits) are the provisions (e.g., cables, brackets, interface devices) necessary to prepare the system to accept the new equipment. Enter the recurring and nonrecurring cost of the equipment (Group B kits) to be installed (e.g., radar, ECM, engine etc.). If different quantities of kits are being procured for various engineering change proposals within a modification (or operational system improvement program), list the ECP A kit and ECP B kit as separate line item entries (i.e., a line item for the A kit and a line item for the B kit). Do not use an asterisk to indicate that the quantity cannot be shown because a mix of end items with different procurement quantities is being procured. This precludes the need for an addendum and presents all cost information together. Exhibits should reflect all costs and quantities from prior years (PYs) through To Complete (TC).

Installation. The installation costs should be portrayed in the year of actual installation so that the total cost of the installation is portrayed for each year’s procurement of end items. Procurement quantities and installation quantities reflected in the procurement detail should equal the quantity displayed in the installation schedule.

Method of Implementation: Indicate how installation will be accomplished (e.g., Contractor, Depot field team, Depot modification line, etc.).

Contract Date: Enter the actual/estimated contract date (month/year, not quarter) for the item with the longest lead time.

Production Delivery Date: Enter the actual/estimated production delivery dates (month/year, not quarter) for the initial item of installed equipment for the current year and budget year.

(Exhibit P-3a, page 4 of 5)
Exhibit P-3a Instructions (Continued)

Installation Schedule: For modifications procured through the Budget Year (BY), show system inductions and modification completions by quarter. An installation schedule is required for all programs requiring installation funds. However, if the modification is being installed organically (i.e., by service managed and operated depots or field activities) and no installation funds are required, then no schedule is required. The schedule will include completed inductions for total Prior Years, Prior Year, and planned inductions for all uninstalled equipment for CY, BY, BY+1, BY+2, BY+3, and BY+4, and To Complete, as necessary, to account for installation of all modifications procured through the BY. Input and output must equal each other, as well as equal the total quantity of kits procured. Input and output refer to the start and end date of the modification into the aircraft (or end item). This information is required to determine when kits need to be procured. The input and output date is used as a barometer to determine the feasibility of the schedule (and thus, the procurement profile). For ongoing programs, identify the separate program using alpha or alpha-numeric suffixes to the current modification number. Include separate installation schedules for those items that have more than one method of implementation.

(P-1 Line Item No X)
Instructions - Exhibit P-5, Cost Analysis

Purpose. The purpose of this exhibit is to provide detailed cost information in support of Exhibit P-1 line items consistent with the appropriate work breakdown structure (WBS) elements for the program. It is essential that this exhibit be complete and accurate, as it is the most important exhibit in the backup book. Requirement exhibits and production schedules are related to the entries on this exhibit, and it is used as the framework for line item review. The program and budget review submission will include P-5 exhibits containing detailed cost element data for fiscal years (FYs) from prior years (PYs) through the Budget Year (BY). Out-year cost element data is no longer required and will not be submitted.

General. This exhibit will be prepared for all procurement programs for which funds are requested in the P-1 exhibit. If two or more Services procure the same system, the P-5 exhibit cost elements should be as identical as possible except for Service unique requirements. A P-5 exhibit is not required for those programs that use a P-40a exhibit to display items included in an aggregated line item or if an Exhibit P-3a Modification Summary, has been prepared for a line item.

Entries:

Heading. Insert Appropriation, Budget Activity, and identification code (as identified on the Exhibit P-1 generated from the OSD PRCP database) in the appropriate block. Insert the Exhibit P-1 line item title and add after the title the subhead number for the line item in parenthesis.

Elements of Cost. Categories of cost shall be tailored to the individual system consistent with the program’s approved work breakdown structure (WBS) elements. Standard categories are to be used for similar type systems (i.e. aircraft, ships, missiles, tanks, satellites, ammunition, etc.).

Production Support Services. Use generic entries such as Production Engineering, Engineering Services, Quality Assurance, Acceptance Testing, Product Improvement, etc. Include the name of the performing activity (for example, Production Support - NOP Indian Head, or Material Handling - Iowa AAP) only when needed to further clarify the generic categories.

Quantity/Total Cost entries. The quantity related to any cost element will be stated in units (not thousands). Only those entries where quantitative measurement is applicable should have entries in the quantity column. For example, the term "1 set" should not be used for publications, entries, documentation, etc. If the item is not subject to quantitative measurement, leave the column blank. The total cost for a cost element entry will be shown in millions, using 3 decimal places, i.e., 1.225. All cost columns will be totaled.

Advance Procurement Funding. Add (debit) the advance procurement funding in each fiscal year and subtract the advance procurement funding (credit) from the fiscal year the advance procurement supports. Ensure the credit is against the correct fiscal year (check lead times). Generally, Advance Procurement debits and credits will net to zero in the “total costs” column. If they do not net to zero, Components must provide rational why they do not.

Initial Spares. Separately identify initial spares funding and include in the total for the net weapon system/end item cost.

(Exhibit P-5, page 2 of 8)
Unit Cost. The unit cost should be displayed for each flyaway cost element on the P-5 exhibit. This should be a manual entry, not computed. Otherwise, there could be lost budget authority if a reviewer (OSD, GAO, or congressional staff) asks to see the unit cost for a particular item from the contract. The last entry line, or overall weapon system unit cost, for each FY is the procurement unit cost.

**Aircraft Cost Element Categories.**

Airframes/Contractor Furnished Equipment (CFE): Enter estimate for recurring airframe cost, airframe contractor furnished equipment, and engineering changes.

Engine/Accessories: Enter total engine cost including accessories. As part of stub entry, enter quantity of engines per aircraft and indicate model designation including all “dash” designators (example: Engines (4) 53-L-13). Engine unit cost column will reflect the cost of one engine.

Avionics: Separately identify CFE and Government Furnished Equipment (GFE) avionics equipment.

Armament: Enter costs for all armament.

Software: Software costs are to be separately identified.

Other GFE: Enter costs for all Other GFE.

Engineering Change Orders (ECOs) - Flyaway: Include cost of anticipated, but unknown ECOs and value engineering changes for all installed aircraft components (CFE or GFE). Engineering Change Orders should be funded commensurate with the level of risk in the program.

Nonrecurring Costs: Enter total nonrecurring costs associated with production of the flyaway article. Identify and separately display funds budgeted for production tooling in the nonrecurring cost category.

Other Costs: Use as many line items as necessary to identify elements and associated costs.

Airframe Peculiar Ground Support Equipment (PGSE): Enter cost of peculiar airframe ground support equipment.

Engine PGSE: Enter cost of peculiar engine ground support equipment.

Peculiar Training Equipment: Enter cost of all peculiar training equipment.

Publications/Technical Data: Enter cost of all CFE/GFE publications and technical data.

ECOs - All Support Items. Enter cost of ECOs anticipated but unknown for all support and training equipment.

Other: Use as many line items as necessary (example: aerial cameras, or jammer transmitter sets, receiver sets or sensor sets for special mission aircraft). These items are not necessarily procured on a one-for-one basis with aircraft.

(Exhibit P-5, page 3 of 8)
Exhibit P-5 Instructions (Continued) Missile Cost Analysis

A missile P-5 exhibit will be submitted by all Services for each missile/drone type and model. If more than one model or configuration is procured in the same P-1 line item, then individual P-5 exhibits will be prepared for each model or configuration and a summary P-5 exhibit will also be prepared for the P-1 line item. Weapon systems that are composed of fire units or launchers that are procured in the same P-1 line item as the missile will provide separate cost identification for each vehicle of the fire unit or launching system (launcher, launch control center, radar set, vehicle, etc.). The cost categories on the P-5 exhibit represent a number of elements and the list should be tailored as appropriate to adequately depict the missile system cost. The flexibility exists to revise the elements to depict unique system characteristics, but a comparable cost detail to that shown in the P-5 exhibit format should be maintained.

**Missile P-5 Cost Element Categories**

**Missile Hardware - Recurring**
- Airframe
- Propulsion (By stage, where applicable)
- Target Detection Device
- Guidance & Control
- Warhead
- Fuze
- Safe & Arm
- Engineering Change Orders
- (Value Engineering)
- Government Costs
  - Integration & Assembly (Labs, etc.)
  - Acceptance Test Program
- Other (Specify)
- Subtotal Missile Hardware

**Nonrecurring and Ancillary Equipment**
- Tooling and Test Equipment
- Missile Ancillary Hardware
  - (Containers, etc.)
- Total Missile Flyaway

**Command and Launch Hardware**
- Launcher
- Launch Control Center
- Radar Set
- Platform/Track Vehicle
- Engineering Change Orders
- Other (Specify)
- Subtotal Command and Launch Equipment

(Exhibit P-5, page 4 of 8)
Exhibit P-5 Instructions (Continued)

Support Costs
- Peculiar Support Equipment (Specify, e.g., test, handling, etc.)
- Special Handling Equipment
- Training Equipment
- Publications/Technical Data
- Engineering Change Orders
- Other (Specify)

Subtotal Support
- Gross P-1 End Cost
- Less: Prior Year Adv. Procurement (Breakout by Prior FY of funding)
- Net P-1 Full Funding Cost (Must equal FY amount displayed on the P-40 exhibit)
- Plus Current Year Advance Procurement.
- Other Non-P-1 Weapon System Costs
- Initial Spares

Ship Cost Element Categories
Include the following format for every year from construction inception for which there are undelivered ships through the end of the FYDP:

- Plan Costs
- Basic Construction/Conversion
- Change Orders
- Electronics
- Propulsion Equipment
- HM&E
- Other Cost
- Ordnance
- Escalation
- Project Manager’s Growth
- Total Ship Estimate
- Less: Advance Procurement FY (specify by individual fiscal year)
- Net P-1 Line Item
- Ship/Unit Cost

Space System Cost Analysis,
A P-5 exhibit is required for each space weapon system employing a launch vehicle or satellite.
Exhibit P-5 Instructions (Continued)

Satellite Cost Element Categories

Launch Vehicle:
- Airframe/Integ & Assembly
- Stage I
- Stage II
- Stage III
- Stage IV
- Guidance and Control
- Other (specify)
- Nonrecurring (specify)

Stage Vehicle:
- Airframe/Integ & Assembly
- Propulsion
- Guidance and Control
- Other (specify)
- Nonrecurring (specify)

Space Vehicle:
- Integration & Assembly
- Spacecraft
- Payload
- Reentry Vehicle
- Other (specify)
- Nonrecurring (specify)
- Engineering Change Orders (ECO)
- In-House Production Support
- Total Flyaway Cost

Checkout and Launch:
- Storage, Reactivation, and Transport
- Integration and Checkout
- Propellants
- Orbital Incentives
- Other (specify)
- Total Checkout and Launch

Support:
- Technical Support
- On-Orbit Support
- Flight Support
- Other Support (specify)
- Total Support

Total Systems Cost
Less Advance Procurement, Prior Year
Net P-1 Line Item Cost

(Exhibit P-5, page 6 of 8)
Exhibit P-5 Instructions (Continued)

Other Procurement Cost Analysis.

A. Unique entries will vary depending on the nature of the procurement item. Most line items require more than one procurement action to complete the program. If only one contract is involved, the line item is composed of several separate cost elements such as the end item itself, publications, engineering services, production support, etc. Each of these elements (called "building blocks" for simplicity) carries its own dollar value. The sum of the building block values equals the line item value. In general, entries on this form should be structured in the same way that procurement has been accomplished (or is planned) and/or the way that the cost estimate for the line item was derived. For new programs, it is not always possible to predict exactly how procurement will be accomplished but the cost estimate for the line item is built up through price out of separate cost elements that are known to be required.

B. Care should be taken to ensure that the building block title accurately describes the effort. Frequently, attempts are made to use the same building block entry for more than one year when the program effort in the following year is not exactly the same. For example, Model A of particular equipment is procured in one year and an improved Model B version planned for the following year. Separate stub entries should be used to avoid comparisons of unlike items.

Ammunition Procurement Cost Analysis.

A. For items to be procured through the Single Manager for Conventional Ammunition (SMCA), the P-5 will be used to display the program cost breakdown. The Service is responsible for justifying and defending its budget request for ammunition even if the item has transitioned to the SMCA for procurement. The production support section should depict the cost of production support materials and services that are included in the P-1 line item. When the developing Service retains configuration management responsibility for a SMCA-procured item, the developing Service will formulate the production engineering cost estimate, but all other estimates will be formulated by the SMCA.

B. Actual ammunition quantities will be displayed unless the quantities being procured are in the millions (the quantities will then be displayed in thousands). Dollars will be displayed in millions, using 3 decimal places, i.e., 1.225. Normal rounding methodology will be utilized.

C. The hardware section should include the full cost of hardware incorporated into the round or item that is included in the P-1 item line. The hardware section entries should be tailored to match the major components of the ammunition item and should reflect the acquisition strategy. If two or more Services procure the same ammunition/ordnance round, the P-5 Exhibit should be as identical as possible except for Service-unique requirements. If the round is to be procured using a component breakout strategy, the entries should include, as applicable, the following: load-assemble-pack, major metal parts, fuzes, explosives, propellants and shipping containers.
Exhibit P-5 Instructions (Continued)

Any small-dollar value components that are non-significant/non-problem can be rolled up into an Other, Miscellaneous line (the dollar amount of this line will not exceed 20 percent of the program value). Where an all-up round is to be delivered under a systems contract, the cost of the all-up round may be displayed as a single entry.

D. The production support section should depict the cost of production support materials and services that are included in the P-1 line item. The following standard entries should be used as applicable: production engineering, quality assurance, proof and acceptance testing, interim transportation and industrial stock support. Any other categories should be added as required and identified accordingly (e.g., special testing). When configuration management responsibility is retained by the Navy or Air Force as developing Service, the production engineering cost estimate will be formulated by the developing Service, but all other estimates will be formulated by the SMCA.

E. The nonrecurring cost section should depict the cost of such items as first article testing, product improvement, value engineering, tooling and test equipment, procurement technical data package updates, start-up/layaway costs and/or other special requirements identified accordingly. In the event that applying government-furnished material or components can reduce the cost of the round, the negative entry will be shown in this section.

F. Each section’s subtotal should be displayed at the end of the subentries listing.

G. The total P-1 line item is equal to the sum of subtotal cost of hardware, procurement support and nonrecurring less the Government Furnished Material (GFM) applications. This entry must agree with the P-1 value for the ammunition item.

P-1 Line Item No X
Instructions - Exhibit P-5a, Procurement History and Planning

1. **Purpose.** This exhibit provides detailed information on the P-5 entries regarding all prior years having contracts with undelivered assets, current year (CY) and budget year (BY). Contract information is used to compare cost estimates between fiscal years by comparing unit costs on previous contracts. For example, if an item was awarded in FY 2015 using FY 2014 funding, is the FY 2017 cost based on an FY 2014 cost inflated 3 years, or to an FY 2016 cost inflated one year? The contract information is used to determine if there has been a problem awarding the contract early or late in the fiscal year and if it occurred as planned. The contract information also is used to identify potential current year assets and to answer congressional inquiries.

2. **Submission.** Exhibit P-5a will be submitted for all P-5 elements of cost (building block) entries involving quantities in the current or budget year. Information for PY, CY, and BY will be updated for each succeeding submission.

3. **Entries.**

   **Cost Elements (Building Blocks)/Fiscal Year.** The cost element/building block title is to be taken from the Exhibit P-5 Cost Analysis for items meeting the criteria of paragraph 2. For each cost element, provide information for the PY, CY, and BY. The first fiscal year line will provide information on the last buy prior to the current year (if the item was procured in a fiscal year that is no longer available for obligation, identify the fiscal year for which the item was last procured. Update CY and PY entries to show actual contractor and contract award dates. For the BY, use best estimates.

   If Advance Procurement funding is part of the program, then provide contract data for each subsequent year to support the leadtime of the advance procurement. For example, if advance procurement is required 2 years in advance of BY, then provide contract data through BY+2.

   **Quantity and Unit Cost.** Insert PY actual quantity procured and actual unit cost. For the CY and BY lines, insert actual or estimated unit costs. The quantities and unit costs should agree with entries on the Exhibit P-5 Cost Analysis exhibit, except for the ammunition items that are fixed standard priced. For these ammunition items, the entries should be the actual unit costs that were negotiated and/or estimated. This update is necessary for the initial starting point for computing future fixed standard prices. Provide an explanation in the remarks block for all items for which the actual unit costs vary significantly with the forecasted unit costs.

   **Procurement Contracting Office (PCO) Location.** Identify the organization that will award the contract. Also identify the organization preparing the purchase request, if different.

   **Contractor.** For each fiscal year, insert actual contractor name, and facility or plant location (city and state). For the current year, insert contractor name if item is to be sole source or if procurement has been accomplished; otherwise insert "Unknown". For budget year, insert contractor name if sole source; otherwise use "Unknown". Identify the city/state location of the contractor plant.

(Exhibit P-5a, page 3 of 5)
Instructions - Exhibit P-5a, Procurement History and Planning (Continued)

Contract Method/Type. The following codes will be used to identify the "Contract Method/Type":

<table>
<thead>
<tr>
<th>Contract Method</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS</td>
<td>Sole Source</td>
</tr>
<tr>
<td>C</td>
<td>Competitive</td>
</tr>
<tr>
<td>MIPR</td>
<td>Military Interdepartmental Purchase Request</td>
</tr>
<tr>
<td></td>
<td>(use only if MIPR obligates funding)</td>
</tr>
<tr>
<td>PO</td>
<td>Project Order</td>
</tr>
<tr>
<td>WR</td>
<td>Work Request</td>
</tr>
<tr>
<td>Allot</td>
<td>Allotment</td>
</tr>
<tr>
<td>Reqn</td>
<td>Requisition</td>
</tr>
<tr>
<td>Other</td>
<td>Explain by footnote</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Contract Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FP</td>
<td>Fixed Price</td>
</tr>
<tr>
<td>CPIF</td>
<td>Cost Plus Incentive Fee</td>
</tr>
<tr>
<td>CPAF</td>
<td>Cost Plus Award Fee</td>
</tr>
<tr>
<td>FPI</td>
<td>Fixed Price Incentive</td>
</tr>
<tr>
<td>Option</td>
<td>Option to prior year contract</td>
</tr>
<tr>
<td>Other</td>
<td>Explain by footnote</td>
</tr>
</tbody>
</table>

Additionally, indicate those contracts that are multiyear procurements by placing the code “MYP” and a corresponding number to indicate the year of the MYP after the Contract Method/ Contract Type as in the following 5-year MYP example:

SS/FPIF/MYP-1 (indicates this is the first year of the MYP)
SS/FPIF/MYP-2
SS/FPIF/MYP-3
SS/FPIF/MYP-4
SS/FPIF/MYP-5

Follow the pattern of the "Contractor" block in displaying actual and estimated contract method and type. "Option" refers to an existing contract that contains an option clause for future procurement. Identify whether the option is priced (already negotiated) or unpriced.

Award Date. For the last actual buy, provide the date that the contract was awarded. For the current year, provide the actual or estimated date. Provide estimated contract award dates for the BY. If the contract is a multiyear contract or a contract with options, identify the date that the option will be exercised.

Date of First Delivery. Same basis as Award Date.

Technical Data Package Available Now. Answer "yes" or "no" for the current year and budget year. No entry is required for prior year. The answer is to be provided as of the time the exhibit is prepared. The term “specifications” refers to full competitive specifications (or their equivalent in the case of a sole source contract).
Instructions - Exhibit P-5a, Procurement History and Planning (Continued)

Date Revisions Available. No entry is required for the prior year line if the contract has been awarded. If revisions are required, provide in last column the date or estimated date when they will be available.

Use Footnotes to provide reasons for Sole Source procurement; to provide reasons for use of letter contracts; to provide reasons why a multiyear contract cannot be used; to explain significant variations in unit cost from year to year, etc.
Exhibit P-8a, Analysis of Ship Cost Estimate - Major Equipment

Instructions: List the major equipment for each of these cost codes shown on the P-35 exhibit and include the next 10 high dollar value items. All other items can be summarized in one line item. System engineering, spares, documentation, and other equipment costs should be included in the equipment estimate. Value engineering changes should be included in the change order cost category.

Description:

*When the advance procurement funding supports more than one subsequent program year end item, then the funding for each line item entry must be separately identified for each applicable end item fiscal year (i.e., when lead-times are greater than one year).

(Use continuation pages, as necessary)
Instructions - Exhibit P-10, Advance Procurement Requirements Analysis

Page 1 - Budget Justification entries.

This format will include funding for all Prior Years through the Budget Year (BY). Out-year data is not required and will not be submitted.

Appropriation (Treasury) Code/CC/BA/BSA/Item Control Number. This entry should match the procurement annex.

P-1 Line Item Nomenclature: Self-explanatory.

Weapon System Type: End item for which advance procurement is required.

First System Award and Completion Date: Enter the month/year (do not use quarters) of the projected contract award for the end item for which the funds in the budget year supports. For example: FY 2017 advance procurement funds are required in support of an FY 2018 procurement. The FY 2017 AP supporting the FY 2018 end item procurement will be awarded in March 2017 and the FY 2018 procurement will be awarded in January 2018. Enter March 2017. If the manufacturing processes require 24 months, then the item will be delivered in March 2019. Enter March 2019.

Interval Between Systems: Enter the time between end item deliveries.

Column 1. The first entry should be the procurement quantity budgeted for each year (specify the actual fiscal year rather than showing the template years) for the end item for which the advance procurement is requested. In addition, list the items that are required to be purchased ahead of the end item. Be specific as possible. Some examples are:

Contractor Furnished Equipment (CFE): This entry includes all advance procurement funding associated with effort accomplished by the prime weapon system contractor (e.g. airframe contractor for aircraft; guidance and control contractor for missiles, satellites; chassis contractor for tanks, engines, nuclear propulsion equipment for ships).

Government Furnished Equipment (GFE): This entry should include a separate entry for each major subcomponent furnished by the government (e.g. engines and radars for ships and aircraft; warhead, fuzes, and rocket motors for missiles; engines and major electronic subsystems for tanks, satellites).

Economic Order Quantity (EOQ): This entry includes items for which an economic order is justified. List each item separately. The entry will require additional justification showing the analysis that supports an EOQ procurement in an advance procurement line.

(Exhibit P-10, page 3 of 4)
Other Advance Funding. This would normally include non-EOQ funding that is requested in advance of authorization of the end item and is not based on leadtime considerations but based on price/cost considerations only.

Column 2. Production Leadtime (PLT). Enter the number of months required to manufacture the end item.

Column 3. Enter the number of months after the manufacturing process begins that the item is required for incorporation into the end item.

Columns 4-15. Enter the approved funding for all years of the program.

Page 2 Entries:

Column 1. List the items that need to be purchased ahead of the end item. This column should match the entries in column 1 on page 1.

Column 2. Production Leadtime (PLT): Enter the production leadtime of this particular item.

Column 3. Quantity Per Assembly (QPA): Indicate the quantity of the item required for each end item.

Column 4. Unit Cost: Enter the unit cost in tenths of millions.

Column 5. BY Qty: Enter the total quantity being procured in the BY. For the end item enter the quantity (qty) of end items being procured in subsequent years and identify by qty and year for which the advance procurement in the BY supports.

Column 6. BY Contract Forecast Date: Enter the date of the planned contract award for each of the items listed in column 1. For the end item enter the date of planned contract award of the end items being procured in subsequent years for which the advance procurement in the BY supports.

Column 7. Cost: Enter the cost in millions with one decimal place.

Description. Describe the technique used to estimate the termination liability request. If advance procurement funding is to be applied to years beyond the immediately succeeding year, the amounts and quantities by year should be specified and explained.

(Page X of X)

Exhibit P-18, Initial and Replenishment Spares and Repair Parts Justification
(Exhibit P-18, page 1 of 2)
Instructions - Exhibit P-18, Initial/Replenishment Spares Requirements

The purpose of this exhibit is to provide the funding requirements for the procurement of initial and replenishment spares and repair parts in support of end items of equipment and in support of modifications to existing end items of equipment where end items of equipment are being supported by procurement appropriations. A copy of this exhibit will be included in the budget justification book for the end item for the Budget Estimates Submission only.

Entries:

Column 1. Enter the budget Exhibit P 1 line item and end items of equipment for which the initial spares and repair parts are required.

Columns 3 through 13. Enter the total cost of the initial or replenishment spares and repair parts for each fiscal year displayed in support of the end items procured. Funding must be consistent with the P-1 and P-40 exhibits.

If some of the initial spares and repair parts are to be financed by the DWCF or for buy-out by a procurement appropriation, provide a memorandum entry to indicate the DWCF-financed portion or footnote accordingly.

Include the following information in the remarks block.

Procurement Requirement:
- Funded Initial Spares.
- Funded Replenishment Spares.
- Funded Mobilization (War Reserve) Spares.
- Total Funded.
- Repair Turnaround time.

**REMARKS:** For ammunition items, list all substitute items for the round.

P-1 Line Item No X
(Page X of X)

Exhibit P-20, Requirements Study
(Exhibit P-20, page 1 of 4)
Instructions - Exhibit P-20, Requirements Study

1. **Purpose.** The purpose of this form is to provide detailed information with regard to the determination of asset availability and requirements.

2. **Submission.** The P-20 exhibit is required only for the Budget Estimates Submission (BES) for ammunition and weapons procurement accounts but can be used for other procurement accounts as determined by the Services and Defense Agencies. The P-20 exhibit is required for only those items costing $20.0 million or more in the budget year (BY).

3. **Entries.**

   **Leadtimes:** Administrative leadtime is the amount of time after October 1 that is required to award a contract. Procurement leadtime is the amount of time from contract award until delivery of the first unit.

   **Quantity Budgeted.** Show the quantities, unit cost, and funding approved for this program.

   **Asset Dynamics.** This section will reflect the changing asset position starting with the assets on hand and adjusting for gains and losses. Tailor the entries to the program being represented.

   **Beginning Asset Position.** Use the inventory position as of the end of the prior fiscal year or specify other date. As a memo entry in the remarks section, identify assets that are not in a serviceable condition.

   **Deliveries from all prior year funding and deliveries from CY and BY funding.** Enter the quantity funded during all prior years that are not yet delivered. Show the deliveries or other gains in the fiscal year in which they will be received. The analyst can then compare these entries to the P-21 Production Schedule (deliveries and leadtimes).

   **Deliveries from subsequent years’ funding.** Enter the quantity in the appropriate fiscal year. The due-ins should match the P-21 Production Schedule and be reflective of the procurement leadtimes and planned delivery schedules to be included on the contract.

   **Other Gains.** Quantity due in for loans to other Services, other receipts, etc.

   **Usage.** Identify projected annual usage, disposals, retirements, etc. that are projected for each fiscal year. There should be some correlation of the projected usage to actual expenditures. For aircraft, usage equates to attrition, retirement, FMS sales, etc. For vehicles, usage equates to disposals (quantity of vehicles scheduled for disposal through sale, salvage or transfer to another agency).

   **End of Year Asset Position.** Add the gains and subtract the losses from the beginning of the year asset position.
Inventory Objective (IO). Identify the elements of the IO and the Approved Acquisition Objective, as applicable and approved through the Program Objective Memorandum process. For missiles, munitions, and munitions-related items, use the capabilities based munitions requirements process. Annotate in the Remarks block if the IO is different for any of the FYDP years. Cite the document and the date of the document that established the IO.

Actual Expenditures (for ammunition items). Identify actual expenditures for training and other than training for at least 3 years. For example, for the FY 2018 submission, FY 2017 will be the current year but no usage will have occurred. FY 2016 would be the Prior Year but data will probably not be available for the entire fiscal year prior to the submission. Therefore, show actual usage for FY 2016 through June 30, 2016 and the usage for 3 fiscal years (FY 2015 (Prior Year minus one, PY-1), FY 2014 (Prior Year minus two, PY-2), and FY 2013 (Prior Year minus three, PY-3)).

Authorized Allowances. Enter the authorized Vehicle allowances for units, installations, and activities supported by the appropriations of the service preparing the form. Replacement requirements will be excluded.

Vehicles Eligible for Replacement: Enter the quantity of vehicles eligible for replacement during the budget year funded leadtime based upon the age, repair limits and mileage criteria of DoD 4500.36-R, Acquisition, Management, and Use of DoD Non-Tactical Vehicles.

Vehicle Augmentation. Enter the quantity that represents an augmentation to the inventory. On a separate sheet, list the organizational units and quantities for each unit involved in the augmentation and include a full justification for the augmentation.

Aircraft. Include memo entries for each configuration of aircraft. Identify the acquisition objective determined by The Joint Staff (TJS) inventory category (see Chairman of the Joint Chiefs of Staff Instruction (CJCSI) 4410.01G, Standardized Terminology for Aircraft Inventory Management) for each FY. Explain the basis for the approved acquisition objective and identify the applicable requirements document and approval authority (e.g., TJS/Service) that provides the basis for the approved acquisition objective number.

Also each Service should submit documentation, by aircraft type, that provides the average age and average hours projected for the aircraft and the current age and hours. This documentation is required for all aircraft being procured and modified, as well as for the aircraft that are being replaced. Identify Active, National Guard and Reserve aircraft. Each Service may submit this documentation in formats currently used by each Service, as long as the above information is incorporated.

Entries should include: (1) total overall aircraft inventory; (2) active aircraft inventory, including primary aircraft inventory (with appropriate subcategories for mission aircraft, training aircraft, dedicated test aircraft, etc.), backup aircraft inventory, and attrition/reconstitution reserve; (3) inactive aircraft inventory, including bailment’s, drones, foreign military sales or other transfers, leases, loans, maintenance training, reclamation, and storage; and (4) the Joint Staff approved inventory requirements.
Not Installed Nonconsumables. Tailor the asset position to elements that pertain to this category. Include a brief explanation in the remarks block to explain why the entire quantity to meet the IO is not being procured. Include memo entries for those items that total to the entire program inventory objective. Where applicable, the IO will be supported by showing the number of units or activities, by type and quantity required per unit or activity. Example:

<table>
<thead>
<tr>
<th>Required</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>20 Units</td>
<td>40</td>
</tr>
<tr>
<td>30 Activities</td>
<td>60</td>
</tr>
<tr>
<td>Spares</td>
<td>10</td>
</tr>
<tr>
<td>Total IO</td>
<td>110</td>
</tr>
</tbody>
</table>

REMARKS: Identify any items that can be substituted and explain why substitutes cannot be used to satisfy the IO, why expenditures do not represent an accurate portrayal of usage, and any other anomalies.

REMARKS: Use continuation pages as necessary to complete all procurements. If only one component or item is being delivered, show deliveries on one page.

P-1 Line Item No X

Exhibit P-21, Production Schedule  
(Exhibit P-21, page 1 of 3)
Instructions - Exhibit P-21, Production Schedule

1. **Purpose.** The purpose of this exhibit is to provide detailed information with regard to the monthly production of all applicable items.

   *2. **Submission.** Exhibit P-21 will be submitted to show the planned contractual production deliveries for Exhibit P-5 cost elements that have a value of $5.0 million or more in the budget year (BY). Exhibit P-5 cost elements that have a value of less than $5.0 million in the BY will not submit Exhibit P-21. Each Service, whether a leader or follower, is to provide the delivery schedule for the entire program. This ensures that each Service has the opportunity to adjust procurement quantities in terms of contractor capability to deliver all assets during the funded delivery period.

3. **Entries.**

   a. Entries will be displayed in the same order as they appear on the Exhibit P-5 Cost Analysis.

   b. Use "E" for "each," "M" for "millions" and "K" for "thousands" for unit of measure.

   c. Production rates should be yearly rates. The following definitions apply.

      - **Minimum Sustaining Rate.** This is the production rate that is necessary to keep production lines open while maintaining a base of responsive vendors and suppliers; the quantity that will preclude start-up costs in the case of a production break; or the quantity that the contractor is willing to accept and produce at a reasonable cost.

      - **Economical Production Rate.** This is the most efficient production rate for each budget year at which the item can be produced with existing or planned plant capacity and tooling, with 1 shift a day running for 8 hours a day and 5 days a week (1-8-5).

      - **Maximum Production Rate.** This is the maximum capacity rate that a contractor can produce with extant or PY planned tooling. Indicate the number of shifts.

   d. The following leadtime definitions apply.

      - **Administrative Leadtime (ALT).** This is the amount of time required to complete the administrative actions leading to contract award. Since these actions do not require funding, the ALT can be separately identified into prior to October 1 and after October 1. The ALT is used to forecast contract awards. Longer leadtimes require that a larger quantity be purchased to support yearly requirements. Leadtimes should therefore reflect an accurate assessment of the time required to process the administrative actions.

      - **Production Leadtime (PLT).** This is the amount of time required by a contractor to produce an item once a contract is awarded. Leadtimes should be based on a realistic projection of a contractor’s capability.
Exhibit P-21 Instructions (Continued)

Procurement Leadtime. This is the total of ALT (post October 1) and PLT.

e. Where procurements are being made for customers such as the FMS program or another Service, a separate line will be used to reflect each customer’s planned buy and phased deliveries with a total provided by item by manufacturer. Use A for Army, N for Navy, AF for Air Force, F for FMS, and O for Other (and explain in the remarks section).

f. Enter respective schedules for all prior fiscal years with undelivered assets, for CY, and BY. Show detail of production by month so that analysis can be accurately performed.

g. Missile Delivery Schedule. A separate P-21 exhibit will be prepared for each missile system reflecting the latest actual deliveries and scheduled outyear requirements. When the missile system includes the procurement of fire units or launching systems within the P-1 line item, the missiles and the major components of the fire unit or launching system (launcher, launch control center, radar set, track vehicle) will be depicted on the P-21 exhibit.

h. Ammunition. The total production plan for hardware items should be displayed to include time-phased schedules for LAP and the major limiting or pacing component as applicable. For Improved Conventional Munitions, display schedules for all major components. Provide separate information in those cases where procurement leadtimes for LAP and major components differ.

Narrative Explanation

P-1 Shopping List - Item No 20-1 of 20-20

Exhibit P-25, Production Support and Industrial Facilities Cost Analysis
(Exhibit P-25, page 1 of 2)
Instructions - Exhibit P-25 Production Support and Industrial Facilities Cost Analysis

The P-25 exhibit will be used to display costs for each funded production facilities project at all government owned, government operated (GOGO) and government owned, contractor operated (GOCO) facilities. In addition the exhibit will display the costs associated with a facilities project for those government owned lines that are located at contractor owned, contractor operated (COCO) facilities. The cost categories on the P-25 exhibit represent a number of elements and the list should be tailored to adequately depict the production facility project cost. This exhibit is to be submitted only when funding for production support and facilities is part of the current year budget or requested for the budget year. The sections on the P-25 exhibit are to be completed as follows.

Entries:

Construction Cost. The Construction Cost depicts the cost for construction that is funded in this line. If construction funds are required that are programmed in another appropriation, these funds and the associated amount should be identified in the Other Costs section.

Equipment Cost. The Equipment Cost identifies the cost for individual equipment (list separately) costing more than $0.5 million and a cumulative cost line for all equipment costing less than $0.5 million.

Equipment Installation Cost. The Equipment Installation Cost identifies the cost to install all the equipment listed.

Contractor Support Cost. The Contractor Support Cost identifies any cost for contractor support included in the production facility project.

Corps of Engineers Support Cost. The Corps of Engineers Support Cost identifies any cost for the Corps of Engineers support included in the production facility project.

Other In-house Support Cost. Should identify any cost for other in-house support (excluding the Corps of Engineers support costs) included in the production facility project.

Other Cost. The Other Cost reflects other costs associated with the project such as facility prove-out cost, military construction appropriation costs, etc.

Facility. The Facility specifies the name, location, and type of facility.

Related Projects. The Related Projects include prior year and outyear funding required to complete the project.

Industrial Facilities - Provide specific line item identification for each project. Group projects under each appropriate subclassification, such as facility expansion, machine tool replacement, etc.

A DD Form 1391, Military Construction Project Data, is required for each project for proposed construction, alteration, expansion, or modernization of government owned facilities.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

Description
Instructions - Exhibit P-27, SCN – Ship Production Schedule

Purpose. The purpose of this exhibit is to provide information concerning production of ships authorized for construction, but not yet delivered, and for each ship programmed for construction in the Future Years Defense Program (FYDP).

General. This exhibit will be prepared for all Ship Construction, Navy (SCN) programs for which ship construction funds are requested in the P-1 exhibit. Ships will be listed in chronological order by the year authorized, then date of contract award, and then by start of construction.

Entries:

Heading. Insert Appropriation, Budget Activity, and identification code (as identified on the Exhibit P-1 generated from the OSD PRCP database) in the appropriate block. Insert the Exhibit P-1 line item title and add after the title the subhead number for the line item in parenthesis.

Ship. Identify each individual ship by Ship Class and hull number (e.g., SSN 792, CVN 79) that has previously been authorized for construction, but has not yet delivered, and each ship that is programmed for construction in the FYDP.

Shipbuilder. Identify the shipbuilder(s) for each ship.

Fiscal Year. List the year funds were appropriated or are programmed for each ship.

Contract Award. Enter the month and year of the shipbuilding contract award (actual or planned) using “MMM YYYY” format (e.g., Dec 2017).

Start of Construction. Enter the month and year that construction began/is scheduled to begin using “MMM YYYY” format.

Delivery Date. Enter the month and year each ship is planned to deliver using “MMM YYYY” format.

P-1 Line Item No X
Instructions - Exhibit P-29, SCN – Outfitting Costs

Purpose. The purpose of this exhibit is to provide detailed information concerning Outfitting funds for ships authorized for construction, but not yet delivered, and for each ship programmed for construction in the Future Years Defense Program (FYDP).

General. This exhibit will be prepared for all Ship Construction, Navy (SCN) programs for which ship Outfitting funds are requested. Outfitting funds are used to acquire on board repair parts, other secondary items, equipage, recreation items, pre-commissioning crew support and general use consumables furnished to the shipbuilder or the fitting-out activity to fill the ship's initial allowances as defined by the baseline coordinated shipboard allowance list (COSAL). Outfitting funds are also budgeted for contractor-furnished spares, at lead-time away from delivery. The SCN funding for the initial fill of allowance list items are limited to those items on the COSAL and authorized requirements through the Obligation Work Limiting Date (OWL). While most outfitting funds are executed prior to ships' completion of fitting out dates, some outfitting funding may be required in the fiscal year following the scheduled Delivery Date.

Ships will be listed by Ship Class, then in chronological order by the year authorized, then date of contract award, and then by start of construction.

Entries:

Heading. Insert Appropriation, Budget Activity, and identification code (as identified on the Exhibit P-1 generated from the OSD PRCP database) in the appropriate block. Insert the Exhibit P-1 line item title and add after the title the subhead number for the line item in parenthesis.

Ship Class and Hull Number. Identify each individual ship by Ship Class and hull number (e.g., SSN 792, CVN 79) that has previously been authorized for construction, but has not yet delivered, and each ship that is programmed for construction in the FYDP.

Program Year. List the year ship construction funds were appropriated or are programmed for each ship.

Contract Award. Enter the month and year of the shipbuilding contract award (actual or planned) using “MMM YYYY” format (e.g., Dec 2017).

Start of Construction. Enter the month and year that construction began/is scheduled to begin using “MMM YYYY” format.

Delivery Date. Enter the month and year each ship is planned to deliver using “MMM YYYY” format.

Completion of Fitting Out (CFO). Enter the month and year each ship is planned to complete fitting out using “MMM YYYY” format.

Post-Shakedown Availability (PSA) Start. Enter the month and year each ship is planned to begin PSA using “MMM YYYY” format.

PSA Finish. Enter the month and year each ship is planned to finish PSA using “MMM YYYY” format.
Obligation Work Limiting (OWL) Date. Enter the OWLD for each ship using “MMM YYYYY” format.

Funding. Enter Outfitting funding for each ship. Annual funding will be provided in the Prior Year (PY), Current Year (CY) and Budget Year (BY) columns only. Total Outfitting funding received in all fiscal years before the Prior Year (PY) will be entered in the Prior Years column. All Outfitting funds programmed in the FYDP years (i.e., BY+1 through BY+4) will be entered in the To Complete column. The total Outfitting cost for each ship will be entered in the Total column.

P-1 Line Item No X

Exhibit P-30, SCN Post Delivery Costs
(Exhibit P-30, page 1 of 3)
Purpose. The purpose of this exhibit is to provide detailed information concerning Post Delivery funds for ships authorized for construction, but not yet delivered, and for each ship programmed for construction in the Future Years Defense Program (FYDP).

General. This exhibit will be prepared for all Ship Construction, Navy (SCN) programs for which ship Post Delivery funds are requested. Post Delivery funding covers the fixing of government-responsible items which were believed to have been complete to standard and/or operable at delivery, as well as funding to conduct tests and trials after delivery. The Post Shakedown Availability (PSA) is a shipyard availability assigned to commence after delivery and to be completed prior to the expiration of the SCN Obligation Work Limiting Date (OWLDD). Funding is used for corrections authorized by the ship's Program Manager as a result of builders' trials (pre-delivery), acceptance or underway trials, final contract trials, trial board items, and correction of production-related defects or deficiencies which develop during the post delivery period. Although the majority of post-delivery funding occurs after ships' delivery dates, some funding is required prior to the delivery date in preparation for post-delivery events.

Ships will be listed by Ship Class, then in chronological order by the year authorized, then date of contract award, and then by start of construction.

Entries:

Heading. Insert Appropriation, Budget Activity, and identification code (as identified on the Exhibit P-1 generated from the OSD PRCP database) in the appropriate block. Insert the Exhibit P-1 line item title and add after the title the subhead number for the line item in parenthesis.

Ship Class and Hull Number. Identify each individual ship by Ship Class and hull number (e.g., SSN 792, CVN 79) that has previously been authorized for construction, but has not yet delivered, and each ship that is programmed for construction in the FYDP.

Program Year. List the year ship construction funds were appropriated or are programmed for each ship.

Contract Award. Enter the month and year of the shipbuilding contract award (actual or planned) using “MMM YYYY” format (e.g., Dec 2017).

Start of Construction. Enter the month and year that construction began/is scheduled to begin using “MMM YYYY” format.

Delivery Date. Enter the month and year each ship is planned to deliver using “MMM YYYY” format.

Completion of Fitting Out (CFO). Enter the month and year each ship is planned to complete fitting out using “MMM YYYY” format.

Post-Shakedown Availability (PSA) Start. Enter the month and year each ship is planned to begin PSA using “MMM YYYY” format.

PSA Finish. Enter the month and year each ship is planned to finish PSA using “MMM YYYY” format.
Obligation Work Limiting (OWL) Date. Enter the OWLD for each ship using “MMM YYYY” format.

Funding. Enter Post Delivery funding for each ship. Annual funding will be provided in the Prior Year (PY), Current Year (CY) and Budget Year (BY) columns only. Total Post Delivery funding received in all fiscal years before the Prior Year (PY) will be entered in the Prior Years column. All Post Delivery funds programmed in the FYDP years (i.e., BY+1 through BY+4) will be entered in the To Complete column. The total Post Delivery cost for each ship will be entered in the Total column.

V.  Competition/Second-Source Initiatives:

P-1 Line Item No X

(Exhibit P-35, page 1 of 2)
Instructions - Exhibit P-35, Major Ship Component Fact Sheet

Item: A separate sheet is to be submitted for each component having a unit cost of $3.0 million or more.

Description/Characteristics/Purpose. Self-explanatory.

Current Funding. The cost details will be provided for each ship type for which equipment is being procured on a hull basis for the prior year (PY), current year (CY), and budget year (BY).

Identify estimates on an end item cost basis. If equipment was procured in a prior year with advance procurement funds, it should be reflected on the exhibit next to the end cost estimates in parenthesis. The equipment costs in this section of the exhibit will include the building block elements listed below:

- Major Hardware
- Ancillary Equipment
- Technical Data and Documentation
- Spares
- System Engineering
- Technical Engineering Services
- Other Costs

Major hardware costs in excess of $20 million must be broken down into sub-element hardware components that comprise the equipment cost estimate included on the P-5a cost analysis.

Contract Data. This section will be prepared for major hardware procurement. The exhibit will include the contract plans for the BY, the planned or actual contract information for the current year (CY) and the actual information for the last buy prior to the current year. The last buy should be included even though it is two or more years prior to the current year. The following codes should be used for indicating contract types: Fixed Price Incentive (FPI); Cost Plus Incentive Fee (CPIF); Fixed Price (FP); Sole Source (SS); and Competitive (C). Indicate whether it is a new contract or an option to an existing contract. Also indicate estimated or actual award dates and item delivery dates. List quantities for each fiscal year and the production leadtime associated for each type of equipment.

Delivery Data. This section should indicate delivery plans for BY, CY and Prior Year (PY) programs contained in Section II of this exhibit. The required award date entry is determined by subtracting the months required before delivery and production leadtime from the earliest ship delivery date.

Competition/Second Source Initiatives. Describe any competition or second source initiatives associated with major hardware items.

Exhibit P-40, Budget Item Justification
(Exhibit P-40, page 1 of 4)
Instructions - Exhibit P-40, Budget Item Justification

1. **Purpose.** The purpose of this exhibit is to provide overall narrative justification and total procurement costs for each P-1 line item. Include all advance procurement, initial spares and repair parts for acquisition category 1 programs.

2. **Submission.** A separate P-40 exhibit will be submitted to support each P-1 line item with funding of $5.0 million or more in the budget year (BY) or $5.0 million or more in either the Prior Year (PY) or Current Year (CY). Funding will be provided for all years displayed on the P-40 exhibit for all programs for both the program and budget review submission and the President's budget submission. If the prior years and to complete data are not relevant (i.e., items have a continuing requirement such as vehicles or ammunition), then leave those fields blank. In order to ensure compliance with the Department's policy to fully fund procurement programs, exhibits must reflect all costs and quantities from prior years through to complete for those programs buying a finite quantity. Note: for non-Major Defense Acquisition Programs (MDAPs)/Major Automated Information Systems (MAIS) programs with a funding value less than $5.0 million, only the P-40 exhibit is required. No other budget exhibits will be submitted for programs with a funding level less than $5.0 million in the BY. MDAP/MAIS programs must submit all required budget exhibits if a P-40 exhibit is required.

3. **Entries.**
   
   a. Enter the applicable information that identifies the appropriation number and title, budget activity, procurement line item number, and serial number (the combination of these codes should match the procurement annex). Include the P-1 line item title (must be identical to what is shown in PRCP for that line item) and identify nicknames in parenthesis. Identify the program element for all Code B items shown on the P-5. Also list all other Program Elements associated with this procurement.

   b. Funding will be presented for all Prior Years before the current prior year (i.e., PY-1, PY-2, PY-3, etc.), the Prior Year, the Current Year, the Budget Year, the FYDP years, to complete, and total on all line items having a finite quantity requirement. It is not relevant to show funding or quantities for items that are continuing requirements such as ammunition or non-tactical vehicles. It is relevant to show funding for all fiscal years for items being procured to specified quantity, such as aircraft, missiles, tactical vehicles, or modifications. The funding should agree with the funding approved in the FYDP Procurement Annex. Omit line items that do not apply (for example, ammunition items would not include an initial spares line).

   c. Procurement programs that include funding for National Guard and Reserve Components will list Secondary Distribution to Active, National Guard, and Reserve Components, as applicable. Secondary Distribution will include quantity and funding for each component for the Prior Year, the Current Year, the Budget Year, and the FYDP years. This data must match submission to the PRCP database.

   d. A complete narrative description of the line item will be provided. The description will include, but not be limited to, the nature, purpose and intended use of the item with sufficient depth of information to serve as a justification for funding.
e. If the item is a Code B item, provide the month and calendar year, actual or projected, for each applicable Developmental Test & Evaluation (DTE), Initial Operational Test & Evaluation (IOT&E), Operational Test & Evaluation (OTE), and technical data package (TDP) or performance specification milestone date. The TDP is assumed to be the date when all data necessary to initiate the procurement is available. Also provide the planned date for type classification as Standard or Alternate Standard (Army and Air Force) or approved by the Chief of Naval Operations (CNO) or other responsible official (Navy). Provide the nomenclature and model number of each item (as applicable) that will be replaced, as well as the comparative information in definitive terms with units of measure such as range, speed, cycle rate, meantime before failure, useful life, etc. Enter a brief but specific discussion of pertinent test results and development effort to date (i.e., successful firings, slippages, test failures, cost overruns, etc.).

f. For those programs that include advance procurement funds that support more than just the next or one subsequent FY program, specific FY detail needs to be provided to identify which FY programs are supported by prior year advance procurement. Advance procurement should be debited and credited according to the leadtimes of the advance procurement. For instance, if FY 2015 and FY 2016 Advance Procurement funds are required for a FY 2017 procurement, the FY 2015 Advance Procurement funds would be debited in FY 2015, the FY 2016 Advance Procurement funds would be debited in FY 2016, and the total of the FY 2015 and FY 2016 Advance Procurement funds would be credited in FY 2017.

   Delivery Date
   Completion of Fitting Out
   Obligation Work Limiting Date (OWLD)

   The P-40 exhibit must list all Service and Other Small Craft Items by types and provide funding for all years still being executed.

   b. Modification Programs. For procurement modification programs the P-40 exhibit shall include the following information; a complete narrative description of the weapon system, its overall mission, number of aircraft in the inventory (include a breakout by Active, National Guard and Reserve), the designed service life, and the average service life remaining. The exhibit will, just below the narrative, include the specific modifications budgeted and programmed displayed in the format provided below:

<table>

(Exhibit P-40a, page 1 of 2)
Instructions - Exhibit P-40a, Budget Item Justification for Aggregated Items

1. **Purpose.** The purpose of this exhibit is to provide the quantities and funding covering the procurement programs included in aggregated P-1 line items such as "Items Less Than $5.0 million." A P-5 exhibit is not required for items included on a P-40a exhibit.

2. **Entries.**

   a. Enter the applicable information that identifies the appropriation, budget activity, and title. There should be no Code B (not approved for service use) items on the P-40a exhibit. If an item is a Code B item, however, the item must be listed as separate line items in the P-1, P-5 and P-40 exhibits.

   b. Unit Cost, Quantity and Total Cost will be presented for all Prior Years, Prior Year (PY), Current Year (CY), Budget Year (BY). The funding should agree with the funding approved in the FYDP Procurement Annex.

Exhibit MYP-4, Present Value Analysis

MYP, page 5 of 8
Instructions - Exhibit Multiyear Procurement

1. Provide a narrative justification (MYP-1 Multiyear Procurement Criteria) for all proposed multiyear procurements candidates regardless of costs. Exhibits MYP-1, MYP-2 Total Program Funding, MYP-3 Total Contract Funding and MYP-4 Present Value Analysis will be included for all MYP candidate systems in the Program Budget Review submission. The President’s Budget request will include a P-5a MYP-annotated entry for those multiyear programs not requiring congressional authorization and appropriation language and exhibits. Exhibits MYP-1 through MYP-4 are required for all multiyear candidate systems for which any of the following is true:

   a. The anticipated multiyear procurement contract is $500 million or greater.

   b. There are economic order quantity (EOQ) procurements in excess of $20 million in any one year.

   c. There are EOQ procurements in advance of an MYP contract in excess of $20 million in any one year.

   d. There will be an unfunded contingent liability in excess of $20 million in any one year.

   e. The procurement quantities of a previously approved MYP have been adjusted.

2. Detailed instructions for filling out MYP exhibits are published in SNaP on the home page of the SNaP-Multiyear Procurement (MYP) application.

3. If a system proposed for a multiyear contract includes more than one P-1 line item, prepare combined MYP-1 and MYP-2 exhibits. Prepare separate exhibits for the remaining MYP exhibit formats. All the exhibits associated with the system will be combined in one package, and submitted in numerical order MYP-1, MYP-2, MYP-3, MYP-3², etc.

4. If multiple MYPs are proposed for components of the same P-1 line item, prepare a separate set of exhibits for each component. Note that the MYP-3 will be the same in each package.

5. If a joint Service program is proposed for multiyear procurement, the executive Service is responsible for submission of all multiyear exhibits and the congressional authorization language.

6. Provide the narrative description in sufficient detail to define the multiyear procurement, i.e., this multiyear procurement will procure “x” number of units over “x” number of fiscal years by using one (or more) multiyear contract.
7. Describe in detail the benefit to the government of the MYP. The process of deciding to use or not to use a multiyear procurement (MYP) for production programs as well as how best to tailor and structure the MYP requires management judgment. A MYP should yield substantial cost avoidance or other benefits when compared to conventional annual contracting methods. Any MYP alternatives with greater risk to the government should demonstrate increased cost avoidance or other benefits over those with lower risk. Savings can be defined as significant either in terms of dollars or percentage of total costs. Detailed descriptions of benefits justifying the MYP should cover the following: Substantial Savings, Stability of Requirements, Stability of Funding, Stable Design, Realistic Cost Estimates, and National Security.

8. Identify the Substantial Savings detailing the sources of savings to include, as appropriate, inflation, vendor procurement, manufacturing, design/engineering, tool design, and support equipment. Each identified source of savings must include a narrative description of the specific savings, an estimate for that specific source and how the estimate was derived. The sum of the detailed sources should equal the total savings.

9. The narrative justification for Stability of Requirement must contain the statement that “the minimum need for the property to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, procurement rate, and total quantities.” The item should be technically mature, have completed RDT&E (including development testing, or equivalent) and Initial Operational, Test and Evaluation (IOT&E), with relatively few changes in item design anticipated. Deliveries of production items will indicate that the underlying technology is stable. This does not mean that changes will not occur but that the estimated cost of such changes is not anticipated to drive total costs beyond the proposed funding profile.

10. Identify the advantages the MYP will achieve and how they will achieve them. These advantages include: production of items in economic order quantities, thereby resulting in lower costs; enhancement of standardization; reduction of administrative burden in the placement and administration of contracts; substantial continuity of production or performance, thus avoiding annual startup costs, pre-production testing costs, make-ready expenses, and phase-out costs; stabilization of contractor and subcontractor work forces; avoiding the need to establish quality control techniques and procedures for a new contractor each year; broadening the competitive base with opportunity for participation by firms not otherwise willing or able to compete for lesser quantities, particularly in cases involving high startup costs; providing incentives to contractors to improve productivity through investment in capital facilities, equipment, and advanced technology; enhancing partnering efforts between contractors/government and prime contractor/subcontractor; providing stable environment; and enhancing best commercial practices.
11. Exhibit MYP-2, Total Program Funding Plan, will compare the funding for the annual proposal and the multiyear proposal and Exhibit MYP-3, Total Contract Funding Plan, will compare the funding for the annual proposal and the multiyear proposal for the multiyear contract.

12. All multiyear procurements (MYP), regardless of cost, require the use of a present value analysis to determine lowest cost compared to an annual procurement. This analysis will be completed by the SNaP based on funding plans provided and results displayed as Exhibit MYP-4, Present Value Analysis. Present value analysis will be calculated in accordance with DoD Instruction 7041.3, Economic Analysis for Decision Making, and OMB Circular A-94.
SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue and underlined font.

The previous version dated November 2017 is archived.

CHAPTER 5

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION APPROPRIATIONS

1.0 GENERAL

1.1 Purpose

This chapter provides instructions applicable to budget formulation and congressional justification for Research, Development, Test, and Evaluation (RDT&E) appropriations. Unless otherwise specified, these instructions apply to all RDT&E appropriations and to all budgets.

*1.2 Authoritative Guidance

1.2.1. The instructions and related requirements prescribed in this chapter are derived primarily from, and in accordance with Title 10, United States Code, section 113 (10 U.S.C. §113).

1.2.2. The Office of Management and Budget (OMB) Circular A-11 is the governing document for preparation, submission and execution of the budget.

1.2.3. Volume 2A, Chapter 1, Section 2.13 provides policies and definitions concerning costs that are to be financed in RDT&E appropriations.

1.3 Submission Requirements

1.3.1. General guidance on submission requirements is in Volume 2A, Chapter 1. This chapter provides guidance for the preparation of RDT&E appropriation backup material required to support the Budget Estimates Submission (BES) and the President’s budget request. Other chapters in the Financial Management Regulation require additional exhibits. The Components will also submit any exhibits required by the Office of Management and Budget (OMB) Circular A-11, Preparation and Submission of Budget Estimates.

1.3.2. Military Departments and Defense Agencies will be responsible for clearing the justification material with the Washington Headquarters Services, Directorate for Office of Security Review, prior to transmittal to the OMB, the Office of the Secretary of Defense (OSD), and the congressional committees.

1.4 Classification

The budget justification material should be unclassified. All classified material must be submitted separately. Components must include a R-2 RDT&E Budget Justification exhibit for special access programs (SAPs) that are not labeled as secret. The R-2 exhibits for SAPs must only include funding streams and cite the following justification: “This program is reported in accordance with Title 10, United States Code, Section 119(a)(1) in the Special Access Program Annual Report to Congress.” All other (non-intel and non-SAP) classified funding requests must be identified (i.e., submit a one page R-2 exhibit) within unclassified justification budget materials.
1.5 RDT&E Budget Activities

The RDT&E budget activities are broad categories reflecting different types of RDT&E efforts. The definitions are provided in section 1.5.1 through 1.5.8 below. The acquisition milestones identified in the definitions are established by Department of Defense Instruction 5000.02, “Operation of the Defense Acquisition System.” Acquisition program developmental criteria and administrative requirements for each milestone are set forth in this instruction.

1.5.1. Budget Activity 1, Basic Research. Basic research is systematic study directed toward greater knowledge or understanding of the fundamental aspects of phenomena and of observable facts without specific applications towards processes or products in mind. It includes all scientific study and experimentation directed toward increasing fundamental knowledge and understanding in those fields of the physical, engineering, environmental, and life sciences related to long-term national security needs. It is farsighted high payoff research that provides the basis for technological progress. Basic research may lead to: (a) subsequent applied research and advanced technology developments in Defense-related technologies, and (b) new and improved military functional capabilities in areas such as communications, detection, tracking, surveillance, propulsion, mobility, guidance and control, navigation, energy conversion, materials and structures, and personnel support. Program elements in this category involve pre-Milestone A efforts.

1.5.2. Budget Activity 2, Applied Research. Applied research is systematic study to understand the means to meet a recognized and specific need. It is a systematic expansion and application of knowledge to develop useful materials, devices, and systems or methods. It may be oriented, ultimately, toward the design, development, and improvement of prototypes and new processes to meet general mission area requirements. Applied research may translate promising basic research into solutions for broadly defined military needs, short of system development. This type of effort may vary from systematic mission-directed research beyond that in Budget Activity 1 to sophisticated breadboard hardware, study, programming and planning efforts that establish the initial feasibility and practicality of proposed solutions to technological challenges. It includes studies, investigations, and non-system specific technology efforts. The dominant characteristic is that applied research is directed toward general military needs with a view toward developing and evaluating the feasibility and practicality of proposed solutions and determining their parameters. Applied Research precedes system specific technology investigations or development. Program control of the Applied Research program element is normally exercised by general level of effort. Program elements in this category involve pre-Milestone B efforts, also known as Concept and Technology Development phase tasks, such as concept exploration efforts and paper studies of alternative concepts for meeting a mission need.

1.5.3. Budget Activity 3, Advanced Technology Development (ATD). This budget activity includes development of subsystems and components and efforts to integrate subsystems and components into system prototypes for field experiments and/or tests in a simulated environment. Budget Activity 3 includes concept and technology demonstrations of components and subsystems or system models. The models may be form, fit, and function prototypes or scaled models that serve the same demonstration purpose. The results of this type of effort are proof of technological feasibility and assessment of subsystem and component operability and producibility.
rather than the development of hardware for service use. Projects in this category have a direct relevance to identified military needs. Advanced Technology Development demonstrates the general military utility or cost reduction potential of technology when applied to different types of military equipment or techniques. Program elements in this category involve pre-Milestone B efforts, such as system concept demonstration, joint and Service-specific experiments or Technology Demonstrations and generally have Technology Readiness Levels of 4, 5, or 6. (For further discussion on Technology Readiness Levels, see the Assistant Secretary of Defense for Research and Engineering’s Technology Readiness Assessment (TRA) Guidance.) Projects in this category do not necessarily lead to subsequent development or procurement phases but should have the goal of moving out of Science and Technology (S&T) and into the acquisition process within the Future Years Defense Program (FYDP). Upon successful completion of projects that have military utility, the technology should be available for transition.

1.5.4. Budget Activity 4, Advanced Component Development and Prototypes (ACD&P). Efforts necessary to evaluate integrated technologies, representative modes, or prototype systems in a high fidelity and realistic operating environment are funded in this budget activity. The ACD&P phase includes system specific efforts that help expedite technology transition from the laboratory to operational use. Emphasis is on proving component and subsystem maturity prior to integration in major and complex systems and may involve risk reduction initiatives. Program elements in this category involve efforts prior to Milestone B and are referred to as advanced component development activities and include technology demonstrations. Completion of Technology Readiness Levels 6 and 7 should be achieved for major programs. Program control is exercised at the program and project level. A logical progression of program phases and development and/or production funding must be evident in the FYDP.

1.5.5. Budget Activity 5, System Development and Demonstration (SDD). System Development and Demonstration (SDD) programs have passed Milestone B approval and are conducting engineering and manufacturing development tasks aimed at meeting validated requirements prior to full-rate production. This budget activity is characterized by major line item projects, and program control is exercised by review of individual programs and projects. Prototype performance is near or at planned operational system levels. Characteristics of this budget activity involve mature system development, integration, demonstration to support Milestone C decisions, conducting live fire test and evaluation, and initial operational test and evaluation of production representative articles. A logical progression of program phases and development and production funding must be evident in the FYDP consistent with the Department’s full funding policy.

1.5.6. Budget Activity 6, RDT&E Management Support. This budget activity includes management support for research, development, test, and evaluation efforts and funds to sustain and/or modernize the installations or operations required for general research, development, test, and evaluation. Test ranges, military construction, maintenance support of laboratories, operation and maintenance of test aircraft and ships, and studies and analyses in support of the RDT&E program are funded in this budget activity. Costs of laboratory personnel, either in-house or contractor operated, would be assigned to appropriate projects or as a line item in the Basic Research, Applied Research, or ATD program areas, as appropriate. Military construction costs directly related to major development programs are included in this budget activity.
1.5.7. Budget Activity 7, Operational System Development. This budget activity includes development efforts to upgrade systems that have been fielded or have received approval for full rate production and anticipate production funding in the current or subsequent fiscal year. All items are major line item projects that appear as RDT&E Costs of Weapon System Elements in other programs. Program control is exercised by review of individual projects. Programs in this category involve systems that have received approval for Low Rate Initial Production (LRIP). A logical progression of program phases and development and production funding must be evident in the FYDP, consistent with the Department’s full funding policy.

* 1.5.8. Budget Activity 8, Software and Digital Technology Pilot Programs.

1.5.8.1. Software and Digital Technology Pilot Program requirements for funding in BA 8 includes software, electronic tools, systems, applications, resources, acquisition of services, business process re-engineering activities, functional requirements development, technical evaluations, and other activities in direct support of acquiring, developing, deploying, sustaining, enhancing, and modernizing Software Digital Technology Pilot Programs.

1.5.8.2. Pilot programs may purchase Commercial off the Shelf (COTS) software, tools, and services necessary to meet the program’s requirements.

1.5.8.3. Software and Digital Technology Pilot Programs may be nominated to Under Secretary of Defense (Acquisition & Sustainment). Approved pilot program nominations will be submitted with the President’s Budget request.

1.5.8.4. A system project participating in the Pilot Program may be removed from BA 8 if the project has not been successful in meeting criteria established for the Pilot Program by the Secretary of Defense.

1.6 Establishing RDT&E Program Elements

1.6.1. The program element is the primary data element in the FYDP and is the major aggregation, at which RDT&E efforts are organized, budgeted, and reviewed. All funding associated with a major system new start must be identified in a unique program element. Requests to establish program elements should be forwarded to Office of the Secretary of Defense (OSD) Cost Assessment and Program Evaluation (CAPE) for coordination and approval.

1.6.2. In general, the coding symbology identifies the RDT&E budget activity for the program element. Program elements in RDT&E budget activities 1 through 6 will have “06” in the first two positions; “06” indicates it is part of Major Force Program 6, Research and Development. The third and fourth position will identify the specific budget activity (e.g., 0602 is an RDT&E budget activity 2 program element). Program elements in RDT&E budget activity 7 reflect the Major Program of the fielded system in the first two positions (e.g., “01” indicates a strategic system).
2.0 RDT&E EXHIBIT REQUIREMENTS

2.1 Purpose

This section prescribes instructions for the preparation and submission of RDT&E appropriations budget material to support the BES and the President’s budget request. See Volume 2A, Chapter 1, Section 4.0, for specific printing requirements.

2.2 Submission Requirements

2.2.1 Extensible Markup Language (XML) Exhibits. All Components must submit required budget exhibits as PDFs with the source XML file embedded. These PDFs will be generated by one of the following two processes:

2.2.1.1. Submit an XML file to the XML Tools section of the Comptroller XML Exhibits web site, [https://exhibits.dtic.mil/r2/app](https://exhibits.dtic.mil/r2/app) (for Components capable of building an XML file from an internal system). The XML files submitted through the XML Tools section must be compliant with the latest RDT&E XML schema, located within the same section of the website; or

2.2.1.2. Create a RDT&E exhibit manually within the “Create New R-2” section of the Comptroller XML Exhibits web site, [https://exhibits.dtic.mil/r2](https://exhibits.dtic.mil/r2).

2.2.1.3. The result of either process will be a PDF file with an XML file embedded. All RDT&E exhibit PDFs/XMLs must be assembled into a Justification Book(s) within the same website using one of the Justification Book tools and posted to the SIPRNET website [https://cisweb.ousdc.osd.smil.mil/](https://cisweb.ousdc.osd.smil.mil/).

2.2.1.4. Formats and examples of the exhibits are contained in Section 3.0.

2.2.2. Each backup book will include an Exhibit R-1, RDT&E Program, two indices of program elements (including R-1 line number, program element title, program element number, and backup book page number), one alphabetically by program element title and one by budget activity and R-1 line number, and specific exhibits for those items covered by the backup book.
2.2.3. The exhibits will be aggregated in the following order for each R-1 line item, as applicable to that line item and submitted in R-1 line item order.

Arrangement of Exhibits – General

R-1   RDT&E Programs
R-2   RDT&E Budget Item Justification
R-2a  RDT&E Project Justification
R-3   RDT&E Project Cost Analysis
R-4   RDT&E Program Schedule Profile
R-4a  RDT&E Program Schedule Detail

Note: The R-3/R-4/R-4a supporting each R-2a Project Justification will be arranged immediately following the R-2a.

2.2.4. Major Defense Acquisition Programs (MDAPs)/Major Automated Information Systems (MAIS)

2.2.4.1. Joint budget guidance from the Under Secretaries of Defense for Acquisition, Technology & Logistics (AT&L) and Comptroller directs that all MDAPs or MAIS will be budgeted in separate, dedicated Program Elements (R-1 line items), and associate all of the funding for a given MDAP/MAIS with a PRCP Program Number (PNO).

2.2.4.2. For all MDAP/MAIS programs, the R-2 RDT&E Budget Item Justification exhibit must include the PNO. Components must also ensure that all applicable fiscal years of the PRCP and FYDP annex data bases are updated to reflect the program budget estimates for all MDAP/MAIS programs, including all prior years and cost-to-complete columns. Each MDAP/MAIS subprogram is a component that will be identified by appropriation, budget line item, and budget activity under the End Item R-1 Line Item header.

2.2.5. If an amended budget is submitted, identify the revised budget exhibits accordingly.

2.2.6. Facilities Exhibit. For improvements to and construction of government-owned facilities funded in the RDT&E appropriation, a DD Form 1391, Military Construction Project Data, must be provided separately for each Budget Year (BY) project and any Prior Year (PY) or Current Year (CY) projects not previously reported. These exhibits will be included with the program element justification. In addition, a copy of all DD Forms 1391 should be packaged together and a copy provided to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) Program/Budget (P/B) Investment Directorate and to the Military Personnel and Construction Directorate. A copy of the form and the instructions are in Chapter 6.
3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION

This Section presents the backup book organization and the exhibit requirements for submission to Congress. See Volume 2A, Chapter 1, Section 4.0 for specific printing requirements. Justification material will be organized into a Committee Staff Procurement Backup Book. Volume 2A, Chapter 1, Section 4.3 provides a detailed distribution schedule for the procurement backup books. A separate congressional committee backup book will be prepared for the President’s budget request for each RDT&E appropriation.

Section 2 - Budget Appendix Extract Appropriation Language

Section 3 - R-1 Line Item Detail. RDT&E budget exhibits will be organized as discussed in paragraph 2.2.3.

4.0 RDT&E APPROPRIATION BUDGET EXHIBIT FORMATS

4.1 Standardized budget exhibit formats

Section 2.2 describes the use of XML budget exhibits for RDT&E appropriations. In addition to the key attribute of making budget exhibit data electronically searchable, the XML exhibits standardize the various budget displays, enabling more effective and efficient budget formulation, review, analysis, and submission.

4.1.1. The exhibit formats provided on the following pages reflect guidance presented in previous sections.

4.1.2. The use of XML exhibits is mandatory for BES and President’s budget request backup justification material.

4.1.3. XML exhibits will automatically standardize formatting, to include:

4.1.3.1. Exhibits displayed on 8 1/2 inch by 11 inch paper in landscape format.
4.1.3.2. Actual fiscal years (e.g., FY 2016, FY 2017, etc.) rather than the template entries (i.e., Prior Years (PYs), Prior Year (PY), Current Year (CY), Budget Year (BY), BY+1, BY+2, BY+3, and BY+4).

4.1.3.3. Annotating the applicable R-1 line item number and page number within the line item (e.g., Item 1-1 of 5, 2-1 of 1, 3-1 of 20, etc.) at the bottom center of each exhibit page.

4.1.3.4. Properly paginate the backup book.

4.2 RDT&E exhibit formats

There are six RDT&E exhibits that support the formulation and submission of the BES and the President’s budget request. The exhibits provide data and information that justifies budgetary requirements for the various RDT&E appropriations. The exhibit formats follow. Volume 2B, Chapter 19, Other Special Analyses, also identifies budget exhibits that may be required.

Exhibit R-1, RDT&E Programs
Exhibit R-1: RDT&E Programs (Continued)

**Exhibit R-1: RDT&E Programs**

A. General Instructions:

Unless otherwise specified, this format will be used to present the Research, Development, Test and Evaluation (RDT&E) program to:

1. The Office of the Under Secretary of Defense (Comptroller) in support of the OSD/OMB budget review and,

2. The Congress in support of the President’s budget request.

B. RDT&E Line Item Content:

The basic document for presenting RDT&E requirements is the Exhibit R-1, RDT&E Programs. The R-1 line items are program elements, which define a development effort with specific design, cost, schedule and capability parameters. All costs of basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, and lease/operation of facilities and equipment will be included in appropriate R-1 line items. The R-1 exhibit will contain the following information:

1. Program element title and number. Appropriate security classification coding should be included as part of each program element title listed. All classified material should be bracketed.

2. Line items will be arranged in ascending program element order within each budget activity.

3. Approved funding for the Prior Year (PY), the Current Year (CY), and Budget Year (BY).

4. Subtotals by Budget Activity and total funding for the appropriation for the Prior Year (PY), the Current Year (CY), and Budget Year (BY).

**Note**
Identify when a Program Element or a Project: 1) is a new start, 2) was terminated/completed, 3) was previously funded, or will be funded, in a different Program Element, or 4) has had a Title change.
For Program Element or Project transfers, include the current and previous Program Element number and title, and Project number and title, if applicable.

**A. Mission Description and Budget Item Justification**
The R-2 shall include a general description and justification of the efforts included in the program element. Every Project shall include an R-2A exhibit, including where a Project is an aggregate of Congressional Adds.
An exception may be to create an R-2 without an R-2A for Single Project PEs.
For ACAT 1D programs, identify Cost to Complete and Total Cost for the program and all projects; otherwise, the appropriate value shall be "Continuing".

**Remarks**
Discuss Acquisition Strategy and items of interest. Acquisition Strategy is NOT required for BA 1, 2, 3, or 6.
A. General Instructions:

1. An Exhibit R-2 must be prepared for each program element. An Exhibit R-2a must be prepared for each RDT&E project, even if there is only one project and even if a project is funded only in a Prior Year (PY) and/or a Current Year (CY), regardless of funding amount. To provide full-funding visibility, every program, project, and activity specifically added by Congress to the President’s Budget Request (a.k.a. Congressional Adds) must be identified within an Exhibit R-2a. The programs, projects, and activities may be treated as individual projects, grouped, but separately identified, in one or more “Congressional Adds” projects, and/or included within “core” projects. Classified material will be submitted separately.

2. All funding within any R-exhibit will be expressed in millions, with three decimal places, unless specifically noted otherwise.

3. Care should be taken to see that exhibits are clear and concise. Abbreviations must be identified on the page on which they occur.

B. Exhibit Instructions:

1. Date. Include the month and year of submission of the exhibit. If an Amended Budget is submitted, identify the date of the revised submission.

2. Exhibit R-2 RDT&E Budget Item Justification. Identify the Budget Cycle/Budget Year/Service Agency Name. Identify BES (Budget Estimates Submission) or PB (President’s Budget) for Budget Cycle, the Budget Year, and the Service Agency Name. Information must match the Program Resources Collection Process (PRCP) (R-1) database lock position.

3. Appropriation/Budget Activity. Identify Appropriation Code (Treasury Account Symbol) and Name/Budget Activity Number and Title. Identify the appropriation and budget activity. Information must match the RDT&E PRCP (R-1) database lock position.

4. R-1 Item Nomenclature/Title (Program Element Name). Identify the name of the R-1 line item. Information must match the RDT&E PRCP (R-1) database lock position.

5. Program Element Number. Identify the program element. Information must match the RDT&E PRCP (R-1) database lock position.

6. Project Number and Nomenclature. Identify the project number and nomenclature.
Exhibit R-2a: RDT&E Budget Item Justification (Project) (Continued)

7. Resource Summary. The Exhibit R-2 must include a fiscal resource summary total for the total program element and, if there is more than one project in that program element, a fiscal resource summary for each project in that program element. Ensure the total funding for the program element matches the RDT&E PRCP (R-1) data base lock position by budget line item and that total costs for Acquisition Category 1 (ACAT) programs are consistent with Selected Acquisition Reports.

8. For ACAT 1 programs, identify Cost-to-Complete and Total Cost for the program and all projects; otherwise, the appropriate value must be “Continuing”. The XML process will automatically insert “Continuing” if no data is submitted.

9. RDT&E Articles (R-2a only). Identify the test articles (engineering development models, test articles, low rate initial production test article, government furnished equipment articles) that are being procured and why. Test Articles can be identified for a project and/or for activities identified in Accomplishments/Planned Programs.

10. Program Element and Project Notes. Identify when a program element or project is: (1) a new start, (2) was terminated/completed, (3) was previously funded, or (4) will be funded in a different program element, or Title changes.

11. For program element or project transfers, include the current and previous program element number and names, and projected number and name if applicable.

12. Mission Description and Budget Item Justification. The R-2 will include a description and justification of the efforts included in the program element. The R-2a will include a description and justification of the efforts included in the specific project.

13. Program Change Summary. If there have been changes to the total funding, schedule, or technical parameters since the previous President’s budget submission, the Exhibit R-2 must include a concise narrative summary explaining the changes in the total program element for the PY, CY, and BY. Further adjustments will be broken out into the following categories:

   Congressional General Reductions
   Congressional Directed Reductions
   Congressional Rescissions
   Congressional Adds
   Congressional Directed Transfers
   Reprogrammings
   SBIR/STTR* Transfers
   Total Other Adjustments – (unique titles may be added to describe the change)
   Small Business Innovation Research (SBIR)/Small Business Technology Transfer (STTR)
Exhibit R-2a: RDT&E Budget Item Justification (Project) (Continued)

14. Congressional Add Details (Exhibit R-2). Each “Congressional Add” will be identified separately by project and may be included as: (1) an individual project, (2) as groups in one or more “Congressional Add” projects, and/or (3) within “core” projects. The title (provided by Congress) and the funding for PY and CY will be listed in a bullet format. Congressional Adds should include only the funding provided by Congress.

15. Change Summary Explanation. Provide a separate, concise narrative summary explaining the changes in the total program element in the Prior Year, the Current Year, and the Budget Year, as applicable.

* 16. Accomplishments/Planned Programs (Exhibit R-2a). Provide a concise narrative summary and associated funding for each project for CY, and BY in a bullet format. The PY narrative summary is deleted. The total funding reflected should match the total project funding. Briefly discuss why project funding changed from the CY to the BY in the Increase/Decrease Statement. The explanation must be sufficient to justify the BY request but should not be a restatement of Planned Program in the BY. (For example: “Funding increases $30 million due to procurement of 2 System Development Test Articles (STDA).”) MINOR changes in funding from CY to BY need not be addressed. Each Software and Digital Technology Pilot Program will specifically identify Operation & Maintenance (O&M) efforts and Procurement efforts as separate entries.

17. Other Program Funding Summary (Exhibit R-2a). Development projects often lead to subsequent development phases, production, and military construction. Also, some projects may depend on concurrent development in other projects. These related efforts and the funding profiles for other appropriation efforts must be identified by appropriation, budget activity, R-1 line item and program element, and P-1 line item title and number. If there are funding dependencies among related research, development, test, and evaluation programs, then the funding profiles for these related programs must be included.

18. Acquisition Strategy (Exhibit R-2a). An explanation of acquisition, management, and contracting strategies must be provided for each project in the Remarks section. This section is not required for the program element budget line items in Budget Activities 1 (Basic Research), 2 (Applied Research), 3 (Advanced Technology Development) and 6 (RDT&E Management Support).

Exhibit R-3: RDT&E Project Cost Analysis (Continued)

Exhibit R-3: RDT&E Project Cost Analysis

A. General Instructions:

1. The R-3 exhibit is required for programs funded in budget activities 4 (Advanced Component Development and Prototypes), 5 (System Development and Demonstration), and 7 (Operational System Development) only. A separate R-3 exhibit must be prepared for each project in an applicable R-1 line item.

2. These exhibits must be printed on 8 1/2 by 11 inch paper in landscape format. Classified material must be submitted separately.

3. All funding within any R-exhibit will be expressed in millions, with three decimal places.

B. Exhibit Instructions:

1. Identify the month and year of submission of the exhibit. If an Amended Budget is submitted, identify the date of the revised submission.

2. Appropriation Code (Treasury Account Symbol)/ and Name/Budget Activity Number and Title. Identify the appropriation and budget activity. This information must match the PRCP (R-1) lock position.

3. R-1 Item Nomenclature/Title (Program Element Name): Identify the name of the R-1 line item as identified in PRCP (R-1) lock position. This information must match the PRCP (R-1) lock position.

4. Program Element Number: The Program Element must be unique. An R-2 Exhibit with a Budget Activity Number that is different from the previous years should include PY and CY information within the current R-2 Exhibit.

5. Project Number and Nomenclature: Identify the project number and nomenclature as identified in PRCP (R-1) lock position.

6. Project Cost Categories. Cost information must be provided for each project regardless of funding amount, with project costs broken down into cost categories. Total of all project costs must equal the project funding for any funding years. Sample cost categories shown are typical of various types of defense research and development efforts. Costs must be distributed among categories in accordance with the project work breakdown structure (WBS) or other categories used by the project office in project execution.
Exhibit R-3: RDT&E Project Cost Analysis (Continued)

* a. For the T&E information category, the Project Cost Categories must be Developmental Test & Evaluation (DT&E), Operational Test & Evaluation (OT&E), and Live Fire Test & Evaluation (LFT&E).

* b. For the other information categories (Product Development, Support Costs, and Management Services), the illustrated sample cost categories may be used if they correspond to the project’s work breakdown structure. There is no requirement to use Project Cost Categories other than those used by the project office in project execution.

Sample cost categories not used in project execution need not be included in the exhibit for that project.

7. If the program office tracks efforts by major contract, then display the information accordingly. The cost categories must be separated into 4 information categories as follows:

a. Product Development. Efforts associated with the delivery of a fully integrated system that are in direct support of the system and essential to the development, training, operation, and maintenance of the system. Include all efforts directly supporting system development and delivery to include primary contracts, major component contracts, contracted services, in-house support, and government furnished property. Contracts or government efforts greater than $1 million in any displayed budget year must be reported individually.

b. Support Costs. Efforts not directly associated with the delivery of the primary product, including technical engineering services, research studies, and technical support not related directly to product development or to testing and evaluation. Contracts or government efforts greater than $1 million in any displayed budget year must be reported individually.

c. Test and Evaluation. Efforts (other than those included within contracts or government efforts) associated with engineering or support activities to determine the acceptability of a system, subsystem, or component. Contracts or government efforts greater than $1 million in any displayed budget year must be reported individually. For the T&E information category, the Project Cost Categories must be Developmental Test & Evaluation (DT&E), Operational Test & Evaluation (OT&E), and Live Fire Test & Evaluation (LFT&E).

d. Management Services. Efforts associated with services provided in support of program office management and administration processes such as: program oversight, resource justification, budget and programming, milestone and schedule tracking. Federally Funded Research and Development Centers (FFRDCs) are in this category. Contracts or government efforts greater than $1 million in any displayed budget year must be reported individually.
Exhibit R-3: RDT&E Project Cost Analysis (Continued)

8. Government Furnished Property. Property, such as hardware, software, or information, which the government is contractually obligated to furnish a contractor or government performing activity must be identified. Provide a brief identification of the item to be provided, and the contractor or government activity providing the item. Provide the estimated date that the government furnished property will be provided to the requiring contractor or activity. Provide the name of the requiring contractor or activity.

9. Award Fees. Identify amounts budgeted for award fees and indicate contractor performance and percentage of award fees actually awarded in past award fee periods.

10. Contract Method/Type or Funding Vehicle. The following codes must be used to identify the contract method, contract type, and funding vehicle:

<table>
<thead>
<tr>
<th>Contract Type</th>
<th>Contract Method</th>
</tr>
</thead>

BPA     Blanket Purchase Agreement
FFDC    Federally Funded Research and Development Center
VAR     Various

11. Performing Organizations. Identify each contractor and government or performing activity and the location for each effort greater than $1 million in any of the displayed years.

12. Total Prior Year (PY) Cost. Provide actual amounts for the total of all years before the Current Year (CY).

13. CY - BY. Provide actual or budget amounts for each year for the Current Year (CY) and the Budget Year (BY).
Exhibit R-3: RDT&E Project Cost Analysis (Continued)

14. Award or Obligation Date. Provide actual or estimated date of contract award or the estimated date that funds will be obligated to government performing activities.

15. To Complete. Provide the amount required to complete this effort beyond.

16. Total Cost. Provide the cumulative total of all budgeted funds for the program (including funds obligated/budgeted for PY, CY, BY and to complete). Provide a comment in the Remarks section when the Project Office Estimate at Completion (EAC) differs from the total cost. Also provide a comment when the Performing Activity EAC differs from the Project Office EAC.

17. Target Value of Contract. Identify the target value of the contract and explain those cases where total cost differs significantly. For example, if the budget is at ceiling value of the contract vice target value or if budget is "program manager's best estimate" vice target value, then explain.

Within a Schedule Detail, the Start and End elements must be chronologically correct (value of Start <= value of End).
Within a Schedule Detail, the Start and End elements cannot refer to years before the PriorYear and after the last budget year (BudgetYear 5).
Exhibit R-4a: RDT&E Schedule Detail (Continued)

A. General Instructions:

1. The R-4 and R-4a exhibits are required for programs or projects funded in budget activities 4 (Advanced Component Development and Prototypes), 5 (System Development and Demonstration), and 7 (Operational System Development) only. Separate R-4 and R-4a exhibits must be prepared for each project in an applicable R-1 line item.

2. These exhibits must be printed on 8 1/2 by 11 inch paper in landscape format. If a program element is not divided into projects, then the program element itself is defined as a project for purposes of submitting R-4 and R-4a exhibits, and the exhibits and instructions apply to the entire program element. Classified material must be submitted separately.

B. Detail Instructions:

1. Date: Identify the month and year of submission of the exhibit. If an Amended Budget is submitted, identify the date of the revised submission.

2. Appropriation Code (Treasury Account Symbol) and Name/Budget Activity Number and Title. Identify the appropriation and budget activity. The budget activity title must match the RDT&E annex and the Program Resources Collection Process (PRCP) (R-1) locked position.

3. R-1 Item Nomenclature: Identify the name of the R-1 line item as identified in PRCP (R-1) locked position.

4. Program Element Number and Name: Identify the number and nomenclature of the program element as identified in PRCP (R-1) locked position.

5. Project Number and Nomenclature: Identify the project number and nomenclature on each page as identified in PRCP (R-1) locked position.

6. For the R-4, Schedule Profile, provide a schematic display (in image file format: tif, jpeg, gif, bmp, or png) of major program milestones that reflect engineering milestones, acquisition approvals, test and evaluation events, and other key milestones for the program events. Cover the program years, not just the budget year. Stub entries should be tailored to the events and activities of the reported program. Congressional “staffer day” briefing schematics are desired to minimize potential schedule display inconsistencies. However, the option to build the Schedule Profile using XML software is still available.

7. For the R-4a, Schedule Detail, provide a tabular display of the major program milestones identified on the R-4 as well as any additional programmatic events that contribute to and support the schedule profile identified on the R-4.
SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by a * preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue and underlined font.

The previous version dated December 2010 is archived.

CHAPTER 6

MILITARY CONSTRUCTION/FAMILY HOUSING APPROPRIATIONS

1.0 GENERAL (0601)

1.1 Purpose (060101)

1.1.1. This chapter provides instructions applicable to budget formulation and congressional justification for Military Construction, Family Housing, Homeowners Assistance and North Atlantic Treaty Organization (NATO) Security Investment Program appropriations.

1.1.2. The following appropriations and accounts are covered:

Paragraph
2.1: Military Construction
Military Construction, Army
Military Construction, Navy and Marine Corps
Military Construction, Air Force
Military Construction, Defense-Wide
Military Construction, Army National Guard
Military Construction, Air National Guard
Military Construction, Army Reserve
Military Construction, Navy Reserve
Military Construction, Air Force Reserve
Chemical Demilitarization Construction, Defense

2.2: Family Housing
Family Housing, Army
Family Housing, Navy and Marine Corps
Family Housing, Air Force
Family Housing, Defense-Wide

2.3: Homeowners’ Assistance
Homeowners’ Assistance Fund, Defense

3.4: NATO Security Investment Program

3.5: NATO Security Investment Program
NATO Enlargement

3.6: Family Housing Improvement Fund

1.2 Submission Requirements (060102)

General guidance with regard to submission requirements is presented in Volume 2A, Chapter 1. This chapter covers specific back-up material requirements for the above
accounts. The above appropriations/accounts should also submit any applicable exhibits required in Volume 2B, Chapter 19 – Other Special Analyses.

1.3 Preparation of Material (060103)

General guidance with regard to format and preparation of material is presented in Volume 2A, Chapter 1. This chapter provides additional specific guidance with regard to the back-up material required for Military Construction, Family Housing Homeowners Assistance and NATO Security Investment Program appropriations.

1.4 References (060104)

Volume 2A, Chapter 1, section 010212 provides policies and definitions concerning costs that are to be financed by the Military Construction appropriations as opposed to other appropriations for Research and Development facilities.

1.5 Family Housing Program Policies and Guidelines (060105)

1.5.1 Purpose

1.5.1.1 This section outlines the service aspects of the Family Housing Program; establishes policies and guidelines for program financial management, budgeting, accounting, and reporting; and assigns responsibilities for executing the program. Specific procedures for the administration and management of program funds are set forth in section 1.6, below.

1.5.1.2 The Family Housing Program encompasses Military Family Housing as defined and authorized by the provisions of Title 10, United States Code (U.S.C.), Chapter 169, and includes all Department of Defense (DoD) Component family housing in the Defense Family Housing Property Account, leases of real property utilized by DoD Components for family housing, and associated family housing support services programs.

1.5.2 Policy

1.5.2.1 It is DoD Policy: 1) to provide Military Family Housing for military families and for eligible civilian families only when suitable housing in the community does not exist; 2) to provide for the housing and support services, as authorized by law, that are necessary to meet the requirements of the DoD; 3) that the program shall be financed and managed in the most cost effective and efficient manner possible in order to support these requirements and to maximize the use of available program resources; 4) that the program shall include the provision of assistance to all military personnel and certain eligible civilians in locating and utilizing privately owned housing including leasing; 5) that the program shall include, within available resources, the provision of Government-owned or leased family housing and furnishings (referred to as Defense Family Housing Property); and 6) that the program shall include the efficient and effective financial and program management of Defense Family Housing Property, including acquisition, privatization, operation, improvement, maintenance, debt financing, leasing, and family housing support programs.
1.5.3. Responsibilities

1.5.3.1. The Under Secretary of Defense for Acquisition, Technology and Logistics (USD (AT&L)) is responsible for program management as set forth in DoD Instruction 4165.63, “DoD Housing,” dated July 21, 2008, and DoD 4165.63-M, “DoD Housing Management,” manual dated October 28, 2010, which also addresses Unaccompanied Housing. Effective June 6, 2011, Family Housing oversight responsibilities were realigned, with the Facilities Energy and Privatization Directorate (FE&P) within the Office of the Deputy Under Secretary of Defense (ODUSD) (Installations and Environment) (I&E) retaining oversight of privatization initiatives, including family and unaccompanied housing privatization; and Facilities Investment & Management Directorate (FIM) within I&E assuming oversight responsibilities of government-owned family and unaccompanied housing, including housing leasing authorities and Homeowner’s Assistance Program (HAP). The Under Secretary of Defense (Comptroller) (USD(Comptroller)) is responsible for financial management, program budget policies, program accounting policies, and financial reporting. As prescribed by the USD (Comptroller), the Director, Defense Finance and Accounting Service, is responsible for central accounting and financial reporting for the program. The Secretaries of the Military Departments and the Directors of the Defense Agencies, as prescribed by DoD Directive 4165.63, are responsible for execution of the program for personnel under their respective jurisdictions, including program and financial management, accounting and reporting.

1.5.3.2. In the financial management and execution of the program, DoD Components shall conduct program budget formulation, presentation, and execution in accordance with the guidance and provisions contained in this chapter and adhere to the program accounting and financial reporting guidance and provisions contained in Volume 4.

1.5.4. Objectives and Procedures

1.5.4.1. This section outlines the objectives and procedures of the Family Housing Program and is divided into the following subsections: assistance in locating and utilizing privately owned family housing; Defense Family Housing Property; and management of Defense Family Housing Property.

1.5.4.1.1. Assistance in Locating and Utilizing Privately Owned Family Housing. Assistance provided to DoD personnel to obtain privately owned family housing under the program includes privatized housing referral service including administration of private rental housing for DoD personnel overseas; DoD leasing of private housing; rental guarantee payments pursuant to Public Law 88-174, section 507, Military Construction Authorization Act, 1964 as amended and; service members’ mortgage insurance payments on their privately owned housing made pursuant to Title 12, United States Code (U.S.C.), Chapter 13, section 1701, the National Housing Act, as amended.

1.5.4.1.2. Defense Family Housing Property. All DoD-owned or DoD-controlled physical property described below will be managed and controlled under the Family Housing Program. The properties will be recorded in a property account entitled the Defense Family Housing Property Account, which should be fully consistent with the DoD Real Property Inventory and Select & Native Programming (SNaP) databases. Guidance for the maintenance of property accounting records is contained in Volume 4. A continuing permanent accounting record
will be maintained of the real property included in each installation’s Family Housing Property Account. Appropriate classifications will be entered on the records to distinguish between real and personal property. Property will be removed from the Defense Family Housing Property account when the property is disposed of as (DoD property), when it is transferred to DoD non-family housing use. The Report Control Symbol assigned to the special record keeping requirements is DD-COMP (AR)1501.

1.5.4.1.2.1. The Defense Family Housing Property Account includes the following properties, under the jurisdiction of the DoD, to which the Government has a right, title, or interest, with exceptions noted in paragraph 1.5.4.1.2.2 below.

1.5.4.1.2.1.1. All types of family dwelling units and mobile home park facilities, without regard to the military status of the occupant and including housing that is: located on or off station, owned or leased, occupied or unoccupied; situated in dispersed locations or in community-type areas; located at an active, inactive, standby, or reserve facility; or, operated or maintained by the Government, directly or by contract.

1.5.4.1.2.1.2. Non-dwelling buildings directly associated with family dwelling units or a family housing area, including structures outside the housing area required solely for family housing support.

1.5.4.1.2.1.3. Roads, driveways, walks, and utility systems which primarily serve family housing units or areas.

1.5.4.1.2.1.4. The grounds area of a group of family housing units and the yards of dispersed family housing units or areas.

1.5.4.1.2.1.5. Community facilities which are integral to a family housing area and are available for use only by family housing area residents and their house guests.

1.5.4.1.2.1.6. Fixtures and other appliances or equipment in a housing unit that are either integral components or movable items, such as: refrigerators, kitchen ranges and, when authorized, food freezers, room air-conditioners, washing machines, clothes dryers, dishwashing machines, garbage disposals, exhaust fans, roof or attic television antennas; and those appliances provided for family housing rented privately by DoD personnel in areas outside the conterminous United States, pursuant to DoD 4165.63-M.

1.5.4.1.2.1.7. Furniture, furnishings, and other personal property that are directly associated with providing and supporting family housing units, including personal property provided for use outside the conterminous United States, pursuant to DoD 4165.63-M.

1.5.4.1.2.2. The Defense Family Housing Property Account excludes the following properties, irrespective of the Government’s right, title, or interest therein:
1.5.4.1.2.2.1. Aerial roads, public walks, utility lines, and utility mains that may pass through or in front of family housing locations but serve those locations as an incidental or secondary purpose to other station requirements.

1.5.4.1.2.2.2. Facilities similar to hotels or motels, which are provided for temporary family occupancy.

1.5.4.1.2.2.3. Community facilities which are not integral to a family housing area or are available for use by other than family housing area residents and their house guests.

1.5.4.1.2.2.4. Educational facilities.

1.5.4.1.2.2.5. Telephone and other communication facilities for official use, and telephone facilities for unofficial use, installed in a family housing unit.

1.5.4.1.2.2.6. Community Antenna Television distribution service by other Government agency, commercial cooperative, or private enterprise.

1.5.4.1.2.2.7. Properties financed by and supporting the Defense Security Assistance Program.

1.5.4.1.2.2.8. Food service facilities.

1.5.4.1.2.2.9. Facilities used primarily for religious services or religious activities.

1.5.4.1.3. Management of Defense Family Housing Property. Management undertakings, which arise in connection with the DoD responsibility for and jurisdiction over Defense Family Housing Property, include:

1.5.4.1.3.1. The acquisition, privatization, construction, and replacement of family housing facilities and the preliminary planning and design studies on prospective projects, including housing requirement surveys.

1.5.4.1.3.2. The conversion of other real property facilities to family housing quarters.

1.5.4.1.3.3. The upgrading to “adequate public quarters” of those family dwelling units designated as rental, substandard, or inadequate.

1.5.4.1.3.4. The alteration of, or addition, expansion, or extension to, family housing facilities.
1.5.4.1.3.5. The outfitting of family housing facilities, as defined in paragraph 1.5.4.1.2 above, with fixtures and other equipment that are either integral components or movable items of major equipment of a housing unit, including major appliances; and furniture, furnishings, and other personal property. This function includes maintenance and repair.

1.5.4.1.3.6. The maintenance and repair of family housing facilities.

1.5.4.1.3.7. The furnishing of the following services to family housing facilities: utilities services, except telephone service and cable television; refuse collection and disposal; insect and rodent control; snow removal; handling and moving Government-owned furnishings; police and fire protection; and administrative, supervisory and clerical services related to the performance of services rendered the family housing facilities.

1.5.4.1.3.8. The maintenance and security of family housing property declared excess to DoD needs, which rests with the DoD Component until the Department of Defense is relieved of this responsibility. The following rules and principles apply:

1.5.4.1.3.8.1. If the property is being disposed of by the General Services Administration (GSA), the transfer of financial responsibility to GSA will be in accordance with Federal Property Management Regulations, Part 101-47, 402.

1.5.4.1.3.8.2. When the Department of Defense recommends to GSA that disposal of excess property be delayed because of economic considerations and a contract has been made with a local agency to rent the property and to protect and maintain it, the residual financial responsibility for maintenance and security rests with the Department of Defense.

1.5.4.1.3.8.3. It has been agreed with the GSA that, in interpreting property disposal regulations, the Department of Defense will be deemed to have declared the property excess to GSA on the date that the protection and maintenance contact is discontinued.

1.6 Family Housing Procedures for Administration and Management of Program Funds (060106)

1.6.1. Purpose

This section outlines the procedures for the administration and management of funds appropriated or otherwise made available to the DoD for the Family Housing Program including: authorized reimbursements; application of proceeds from sales or handling of excess family housing for debt service; administration of separate “fixed year” and “annual” accounts; and clarification and amplification of certain financial administration procedures.

1.6.2. Treasury Accounts

For Family Housing Construction, funds are appropriated to remain available for five years. For Family Housing Operation and Maintenance (O&M), funds are appropriated with annual account limitations. For the Department of Defense Family Housing Improvement Fund (FHIF), funds are appropriated to support Military Housing Privatization Initiative (MHPI) administrative
program expenses, including accounting and financial reporting services, and remain available until expended. These and other funds made available for family housing are administered under the Treasury accounts outlined in Volume 2A, Chapter 1, section 010603 of this Regulation.

1.6.3. Funding the Family Housing Program

1.6.3.1. The Family Housing Program will be financed from:

1.6.3.1.1. Those funds primarily appropriated for family housing purposes.

1.6.3.1.2. Authorized reimbursements and collections from housing rentals and services furnished as set forth below:

1.6.3.1.2.1. Charges will be made for rentals and services furnished certain occupants or users of family housing facilities. The amount of rent charged shall be determined in accordance with the provisions of DoD 4165.63-M. Disposition of the proceeds of handling or disposal of excess family housing property is treated in subparagraph 1.6.3.1.3, below.

1.6.3.1.2.2. Those collections for rents and services which will be utilized to finance family housing expenses in accordance with applicable statutes are listed below. Such reimbursements will be utilized within the financial authority issued by the Office of the Under Secretary of Defense (Comptroller) OUSD (Comptroller) but limited to the amount of reimbursements earned.

1.6.3.1.2.3. Collections received for rental of Defense housing shall be utilized within the applicable DoD Component family housing account to defray O&M expenses. If the housing is rented with Government furniture provided, the combined total charge for shelter rent and furniture rent shall be treated as indicated above.

1.6.3.1.2.4. Collections from the sale of utilities and services will be utilized within the appropriation currently available for the supply of that utility or service in accordance with the authority set forth in Title 10, United States Code (U.S.C.), section 2686.

1.6.3.1.2.5. Collections from other agencies related to O&M charges pursuant to Title 31 United States Code, section 686 will be effected.

1.6.3.1.2.6. When nonexcess family housing property is leased, pursuant to Title 10 United States Code (U.S.C.), section 2667, rental moneys received will be deposited in a special account in the U.S. Treasury established for DoD Components for allocation as prescribed in Title 10 United States Code (U.S.C), section 2667. Moneys received for utilities or services will be deposited to the applicable DoD Component family housing account.

1.6.3.1.2.7. For accounting purposes, those reimbursements described above to be used for O&M purposes will be identified as financing the operations portion of the O&M expenses.
Miscellaneous Receipt Account 1830, “Rent of Real Property not Otherwise Classified,” under a citation which includes the appropriate DoD Component two-digit prefix symbol. Such collections include those to cover costs of repairing damages to family housing facilities (including replacement of items) caused by family housing occupants.

1.6.3.1.3. Other funds which are available from disposal of excess family housing property as set forth below:

1.6.3.1.3.1. In the case of family housing in the United States disposed of pursuant to Public Law (P.L.) 101-526, Title II, the Defense Authorization Amendments and Base Closure and Realignment Act or Public Law 101-510, Defense Base Closure and Realignment Act of 1990, the proceeds should be deposited in the Department of Defense Base Closure Account 1990.

1.6.3.1.3.2. In the case of family housing disposed of under authorities contained in Title 10 United States Code (U.S.C.), section 2871-2885, as added by section 2801 of the National Defense Authorization Act for FY 1996, for purposes of using the proceeds to carry out activities authorized under those provisions, the proceeds should be deposited in the DoD Family Housing Improvement Fund (FHIF). Section 2883(d) limits the funds that can be expended from the account to such amounts as provided in the appropriations act. Therefore, non-appropriated proceeds deposited into the FHIF account cannot be used to fund privatization projects, without it being appropriated, first.

1.6.3.1.3.3. In the case of family housing overseas disposed of under circumstances which fall within the provisions of Public Law 101-510, section 2921 as amended, the proceeds should be deposited in the Defense Overseas Military Facility Investment Account.

1.6.3.1.3.4. In the case of family housing disposed of under other circumstances, the proceeds should be deposited in the appropriate military family housing account.

1.6.3.2. Family Housing Program costs will be programmed, budgeted and accounted for by the DoD Component having responsibility for the Defense installation or housing area, regardless of the DoD Component of the housing occupant. Reimbursement for such costs will not be made between DoD Components.
1.6.3.3. **Funding** will be on a program-year basis. The detailed program-year criteria for the major functional categories and for the immediate subordinate accounts is set forth below:

1.6.3.3.1. The program year for the undertakings (projects for new construction, acquisition of housing, construction improvements, and minor construction) shall be the same as the year of the applicable annual Military Construction Authorization Act.

1.6.3.3.2. After the program year for a specific project is established as provided above, the related appropriation for that project will be administered under the designated program year, irrespective of when the work is undertaken. In the event there are savings due to lower bids, change in scope, etc., these savings may be reprogrammed for projects authorized in different program years in accordance with guidance provided in Volume 3, Chapter 5, “Reprogramming of Military Construction and Family Housing Appropriated Funds”.

1.6.3.3.3. For planning and design, which is a “level of effort” type activity, the following program year concept applies:

1.6.3.3.3.1. Budget estimates for the budget year and each future year will include the planning and design work programmed to be placed on contract or intragovernmental order during the program year and the planning and design work expected to be performed with in-house capabilities during the program year. The dollar value of a planned program will be determined on the basis of estimated obligations to be incurred during the program year for the program scope embraced by subparagraphs 1.6.3.3.1 and 2, above.

1.6.3.3.3.2. Obligation authorities will be requested and issued by program year on the basis of obligations estimated to be incurred as a result of the issuance during the program year of contracts or other orders which constitute valid obligations pursuant to Volume 4 for planning and design work, irrespective of when the work is to be performed and the accomplishment during the program year of planning and design work with in-house capability. Obligations will be charged by program year on these same bases.

1.6.3.3.3.3. Adjustments to obligations charged against a prior program year will be made only to the extent of an adjustment in the amount of an obligation recorded for specific work ordered in that prior program year or deobligations to reflect cancellation of work ordered in that prior year. New obligations for planning and design work for a particular project which are in addition to that ordered in prior program years for that project are charges against the program year in which those new obligations are incurred.

1.6.3.3.4. For rental guarantee payments, the program year shall be the fiscal year in which the rental guarantee payments are obligated. No new obligations may be incurred under a program year obligation authority after the close of that program fiscal year. Adjustments to obligations for rental guarantee payments may be made as necessary to reflect actual obligations incurred during the fiscal program year in accordance with existing procedures covering adjustment to annual accounts.

1.6.3.3.5. The major functional categories of O&M and debt payment are considered “level of effort” type activities. Program planning and budget estimates
for these categories will be developed in accordance with that concept. Obligational authority for O&M and debt payment will be requested and issued by program year and will not be available for new obligations after the close of the fiscal year for which such authority is issued. Adjustments to obligations for O&M and debt payment may be made as necessary to reflect actual obligations incurred during the fiscal program year in accordance with existing procedures covering adjustment to annual accounts.

1.6.3.4. Economic analysis will be applied to all program investment proposals in accordance with this manual which sets forth budget submission requirements.

1.6.3.5. Apportionment of funds and issuance of financial authorities will be obtained as follows: each DoD Component (except Defense Agencies) shall submit to the OUSD (Comptroller) an apportionment request, as prescribed in DoD FMR Volume 3, Chapter 2, “Apportionments and Reapportionments,” then the OUSD (Comptroller) will issue specific financial authority to the DoD Components concerned in such amounts and at such levels as appropriate for efficient and economical administration of the Family Housing Program.

1.6.3.6. For the Construction category, Office of the Secretary of Defense (OSD) program approval and obligating authority will be provided by fiscal year, generally at the construction element level (immediate subordinate account level) or at project level where circumstances warrant. Volume 3 defines the scope of realignment authority delegated to the DoD Components. All program/fund realignments will be reported in accordance with Volumes 2 and 4 of this Regulation.

1.6.3.7. Obligations, incurred costs, accrued expenditures, accrued revenues, disbursements and receipts will be recorded and reported in accordance with Volume 4. When another appropriation, e.g., O&M, initially incurs a funded cost, the applicable DoD Component family housing account will be billed at least monthly. Obligations, incurred costs, accrued expenditures and disbursements will be charged to the applicable accounts.

1.6.3.8. The balance due on indebtedness previously assumed should be in a “Borrowing Account” in conformance with Federal budget concepts.

The acquisition of property will be recorded in accordance with Volume 4 of this Regulation. The amount of the mortgage assumed will be recorded as an increase in the “Borrowing Account” and will be reported to the Treasury under Code (97).

1.7 Use of O&M Funds under Contingency Construction Authority (060107)

The criteria and procedures for the use of O&M funds under Contingency Construction Authority (also known as Section 2808 Authority) are listed in Volume 3, Chapter 17, Section 170102(L).
2.0 UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATION (0602)

2.1 Military Construction Appropriations (060201)

Programming, budgeting, financing and accounting for the Military Construction Program will be accomplished under an account structure uniformly used for these purposes by all DoD Components. The uniform account structure and scope of each account prescribed for the administration of the Military Construction Program are as follows:

2.1.1. Major Functional Category: Construction

2.1.1.1. Immediate Subordinate Account: Major Construction. Includes construction projects authorized under Title 10 United States Code (U.S.C.), section 2802 for the purposes of erection, installation, or assembly of a new facility; the addition, expansion, extension, alteration, conversion, or replacement of an existing facility; or the relocation of a facility from one installation to another. Includes equipment installed and made a part of such facilities, and related site preparation, demolition, excavation, filling and landscaping, or other land improvements.

2.1.1.2. Immediate Subordinate Account: Minor Construction. Includes any urgently required construction project not otherwise authorized by law having a cost equal to or less than $2,000,000. However, if the military construction project is intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening, a minor military construction project may have an approved cost equal to or less than $3,000,000. Minor construction projects costing more than $750,000 may not be carried out unless Title 10 United States Code (U.S.C.), section 2805 requirements are met. This includes advance approval by the Secretary concerned and notification to the Congress. An unspecified military construction project costing not more than $750,000 may be funded from appropriations available for O&M. However, if the project is intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening, up to $1,500,000 may be funded from O&M accounts.

2.1.1.3. Immediate Subordinate Account: Planning and Design. Includes architectural and engineering services, construction design, planning, study, working drawings, specifications and estimates for construction projects. Title 10 United States Code (U.S.C.), section 2807 pertains to architectural and engineering services and construction design.

2.1.1.3.1. Design Status. Projects with parametric cost estimates and supporting documentation, e.g. site plan, economic analysis, and National Environment Policy Act (NEPA) documentation, will be considered at the 15 percent design level. Projects using the traditional method of design, being designed in-house, using a standardized design, or site adapting a previous design should use the milestone chart below to gauge their design status.
**Design Milestone** | **Design Status**
--- | ---
1% Design Complete: | Design instructions issued to major command.
2% Design Complete: | Major command design instructions issued to design agent.
3% Design Complete | Notice to proceed issued to architect/engineering firm (A&E) by the design agent.
30% Design Complete | Concept plan, early preliminary working drawings, design analyses, and outline specifications issued by the designer.
5% Design Complete | Concept or early preliminary review comments forwarded to the design agent.
60% Design Complete | Regular preliminary working drawings, design analyses, and updated cost estimate and outline specifications issued by the designer.
65% Design Complete | Regular preliminary review comments forwarded to the designer.
90% Design Complete: | Final design (working drawings, design analyses, cost estimates, and specifications) completed by the designer.
95% Design Complete | Final design review comments forwarded to the design agent.
100% Design Complete | Corrected final design accepted by the DoD Component.

2.1.1.4. Immediate Subordinate Account: Supporting Programs. Includes Defense access roads and land acquisitions.

Includes contributions for the United States share of the cost of multilateral programs for the acquisition and construction of military facilities and installations (including international military headquarters) and for the related expenses for the collective defense of the North Atlantic Treaty Area. *Title 10 United States Code (U.S.C.), section 2806* pertains to contributions for (NATO) Security Investment Program.

2.2 Family Housing (060202)

DoD Components will use the uniform account structure established for programming, budgeting, financing and accounting for the family housing program. The account structure will be administered so as to provide program and financial control of the family housing program consistent with applicable statutes. The uniform account structure and scope of each account for the family housing program are as follows:

2.2.1. Major Functional Category: Construction

2.2.1.1. Immediate Subordinate Account: New Construction (by Installation and Project). Includes the erection, installation, assembly, relocation or replacement of single or multifamily dwelling units; related land acquisition, site preparation, excavation, filling and landscaping, or other land improvements. Also included are the initial outfitting during construction of a dwelling unit with fixtures and other requirements which are either integral components or movable items of major equipment thereof, including major appliances; and
architectural and engineering supervision and inspection of construction. Includes design costs of contractor to perform a turnkey contract. New construction also includes the construction of items included in subparagraphs 1.5.4.1.2.1.1, 2, 3, and 5, above.

* 2.2.1.2. Immediate Subordinate Account: Construction Improvements (formerly Post Acquisition Construction). Includes major construction projects (projects beyond those authorized under the minor construction program) for the following (by installation and project): upgrading inadequate public quarters, rental housing and acquired units to produce adequate public quarters; conversion of existing facilities to public quarters; alterations, additions-expansions-extensions; construction of family housing real property, other than dwelling units required subsequent to and because of previously acquired dwelling units; and the payments made to military personnel for telephone reconnection charges shall be included in project costs under this subaccount when a construction project involves relocation, alteration, improvement, or other work necessitating Government directed, non-Permanent Change of Station moves between Government quarters. However, in cases where concurrent maintenance/repair work is involved, telephone reconnection costs shall be charged to the maintenance account.

2.2.1.3. Immediate Subordinate Account: Planning and Design. Includes the design, working drawings, specifications and estimates for construction projects approved by the Secretary of Defense for inclusion in the President’s Budget. Also includes consolidated DoD guide drawings, specifications, and planning and design efforts on projects which are not subsequently constructed.

2.2.2. Major Functional Category: O&M

2.2.2.1. Immediate Subordinate Account: Operation. This account includes the costs associated with Management, Services, Furnishing, and Miscellaneous subaccount categories identified below:

2.2.2.1.1. Management. This account includes costs for management, administrative, and support-type services at the installation level, such as, inspection of construction and administration of rental guarantee projects, housing referral administration, housing office base support costs, surveys, engineering studies, and other identifiable management costs.

2.2.2.1.2. Services. This account includes cost associated with refuse collection and disposal, fire protection, police protection, entomological services, custodial services, snow removal, street cleaning, and other municipal-type services.

2.2.2.1.3. Furnishings. This account includes initial acquisition, maintenance, repair and replacement of furniture, furnishings and other personal property (see subparagraph 1.5.4.1.2.1.7 above); the furnishing of services included in subparagraph 1.5.4.1.3.7.

2.2.2.1.4. Miscellaneous. This account includes other family housing program operational costs that do not fall into the other Operation categories.
2.2.2.2. **Immediate Subordinate Account: Housing Privatization Support.** Includes the costs that the government incurs in direct support of the family housing privatization program under the authorities of *Title 10 United States Code (U.S.C.), Chapter 169, Subchapter IV* (Alternative Authority for Acquisition and Improvement of Military Housing) with the exception of those costs that will be included as part of the privatization project. These costs include all administrative, planning, development, solicitation, award, transition, construction oversight, and portfolio management activities associated with military housing privatization and specifically for:

2.2.2.2.1. **Site Assessment Costs.** Includes all costs in direct support of the family housing privatization program for environmental baseline assessments, environmental assessments, environmental impact statements, and any efforts required to be accomplished by the government prior to privatization for, environmental mitigation, site surveys, or real estate costs.

2.2.2.2.2. **Project Costs.** Includes all costs in direct support of the family housing privatization program for project feasibility studies, concept development, consultant fees, solicitation, procurement, contracting, execution, transition, construction management (supervision, inspection and overhead), post award management/monitoring, and portfolio management.

2.2.2.2.3. **Administrative Costs.** Includes all costs in direct support of the family housing privatization program for civilian pay, travel, training, supplies, equipment, and for any services provided by a Component in support of the privatization program.

2.2.2.3. **Immediate Subordinate Account: Maintenance of Real Property Facilities.** This account includes maintenance and repair of buildings, roads, driveways, walks, exterior and interior utility systems and grounds care; and maintenance, repair and replacement of fixtures and other equipment which are integral components of a housing unit. This account also finances the costs of reimbursements made to military personnel for telephone reconnection charges when maintenance or repair work necessitates Government-directed, non-PCS moves. This includes such charges resulting from improvement/repair projects funded in part from the family housing construction account.

2.2.2.4. **Immediate Subordinate Account: Leasing:** This account includes leasing of family housing facilities by the Government as outlined in subparagraph 1.5.4.1.1.

2.2.2.5. **Immediate Subordinate Account: Utilities:** This account includes costs for utilities consumed in government-owned family housing, including electricity, water, sewage, natural gas, fuel oil, or other heating fuels. It excludes the costs associated with the maintenance and repair of utility systems covered under the Maintenance of Real Property Facilities Account.

* 2.2.2.6. **Immediate Subordinate Account: Mortgage Insurance Premiums (or also known as Servicemen’s Mortgage Insurance Premiums).** This account includes payments of servicemen’s mortgage insurance premiums pursuant to *Title 12 United States Code (U.S.C.), Chapter 13, section 1701*, the National Housing Act as amended.
2.2.3. **Major Functional Category: DoD Family Housing Improvement Fund:** Includes activities required in connection with the Military Housing Privatization Initiative (MHPI) program planning, execution, accounting and financial reporting, and administration of contracts entered into under the authorities of *Title 10 United States Code (U.S.C.), Chapter 169, Subchapter IV* (Alternative Authority for Acquisition and Improvement of Military Housing).

2.3 **Homeowners’ Assistance Fund, Defense (060203)**

The program/budget account classification structure for the Homeowners’ Assistance program is prescribed in Exhibits HA-1 through HA-4, found in Section 5.4.

3.0 **PROGRAM AND BUDGET REVIEW SUBMISSION (0603)**

3.1 **Military Construction (060301)**

3.1.1. **Purpose**

3.1.1.1. This Section prescribes instructions for the preparation and submission of program and budget estimates for the Military Construction appropriations.

3.1.1.2. Unless otherwise specified, these instructions apply to all Military Construction appropriations and to all program and budget estimates. Data submitted must be consistent with the program and budget estimate being supported.

3.1.2. **Submission Requirements**

3.1.2.1. **General Guidance.** Supporting data for each of the military construction appropriation requests will be submitted concurrently with all other Department of Defense appropriation requests. To facilitate the review and decision making process, it is essential that the packaging of justification materials conform to the uniform facility category structure established by DoD Instruction 4165.3, “DoD Facility Classes and Construction Categories.”

3.1.2.1.1. Construction requirements will be determined in consonance with Program Decision Memorandum (PDM) guidance and with applicable Executive Orders, Office of Management and Budget (OMB) Circulars, and DoD 4270.1-M, “Policy Guidelines for Installation Planning, Design, Construction and Upkeep.”

3.1.2.1.2. Each proposed construction project will be supported by DD Form 1391/1391C, Military Construction Project Data. These will be prepared in accordance with guidance contained in Section 5.2, below. Projects associated with intelligence or intelligence-related operations will be so identified. Block 5, Program Element, DD Form 1391, will include the annotation National Intelligence Program (NIP) or Military Intelligence Program (MIP) as appropriate. DD Form 1390, Military Construction Program, will be prepared for each installation at which major construction is planned, utilizing the format prescribed in Section 5.2. DD Form 1390S, Guard and Reserve Forces Military Construction, will be utilized by the Guard and Reserve Components.
3.1.2.1.3. Each Component will also submit a Major Initiatives exhibit which must include a general description of each of its major initiatives for the budget year and what the Component plans to accomplish in the budget year to support that initiative. Be specific, including the impact on force structure. This exhibit will be prepared in accordance with the format contained in Section 5.2, below.

3.1.2.1.4. Lump sum requests for a number of construction projects at a single location or for related projects at several locations will not be considered.

3.1.2.1.5. OMB is strictly enforcing the full funding policy contained in OMB Circular A-11. The Components are required to ensure that all projects are fully funded in compliance with OMB Circular A-11. For large projects that formally would have been considered for incremental funding over multiple years (an increment is not a complete and usable facility), the Components may break projects down into complete and usable phases, with phases in multiple years. OMB’s intent is that incremental funding for construction will be for rare and exceptional cases only.

3.1.2.1.6. In the rare case that OMB grants a waiver to allow for budgeting for the incremental funding of a project, the Components have the flexibility to move funding between increment/years to allow for flexibility but only if there is no increase in the total cost of the project or number of increments. Additional increments or an increase in the total cost of the project requires another waiver request to and approval from OMB. When projects fully funded in a given year’s President’s Budget request are incrementally funded by Congress, the Components should not infer that OMB has agreed to continued incremental funding of the remainder of the project. The Components’ subsequent budget submission should request funding for the full cost of completing the project. Budget justification materials (1391/1391C) should include a chart depicting all outyear liabilities resulting from incremental funding decisions.

3.1.2.1.7. In order to ensure prudent and economic investments a life-cycle, net present value economic cost analysis is required to support all new construction or renovation projects estimated to cost in excess of $2 million dollars. Copies of these studies are to be retained by the DoD Components and must be available, when requested, during the OSD - OMB program and budget review. In accordance with Chapter 1, section 010303, components are required to indicate on the justification page for each individual construction project whether or not an economic analysis is applicable or pertinent. If not applicable, a statement is required indicating why.

3.1.2.1.8. In accordance with guidance provided under Section VI.D. of DoD Directive 2010.5, “DoD Participation in the NATO Infrastructure Program,” components are required to indicate on the justification page for each individual construction project for U.S. forces committed to NATO a statement whether or not the project is planned for prefinancing, with appropriate explanation as to: (a) why U.S. unilateral financing is being proposed; and (b) as appropriate, follow-on actions planned to seek reimbursement through NATO channels. A similar statement is required for any other overseas construction, describing why the project is not eligible for host nation funding. More specific guidance is provided in DoD Directive 2010.5.
3.1.2.1.9. Justification materials DD Forms 1390/1391/1391C will be submitted in book form, with appropriate cover, bound on the left margin. Classified materials are to be submitted in separate volumes, with appropriate security classification markings on covers.

3.1.2.1.10. The following sections outline the specific materials to be provided including special guidance as to formats to be followed. The numbers of copies required are identified in Volume 2A, Chapter 1. Other special materials required for intelligence activities are outlined in Volume 2B, Chapter 16.

3.1.2.1.11. It is recognized that it may be necessary to revise construction project costs subsequent to the budget submission which have changed significantly because of Congressional action, design changes, etc. Such changes will be considered as an additional budget submission and all ground rules, including cut-off dates, will apply.

3.1.2.1.12. All budget submissions for military construction and family housing programs should include outyear project level detail in the format specified in Section 5.2, below.

3.1.2.1.13. If a military construction project is associated with global defense posture initiatives, it should be identified at the end of the Requirements section under Item 11 of the DD Form 1391.

*   3.1.2.1.14. For any joint funded Guard or Reserve military construction project, the lead component is required to submit a DD Form 1391 for the complete joint facility and a signed Memorandum of Agreement (MOA). Additionally, the lead component will submit the Guard and Reserve Joint Military Construction Project Exhibit, MC-2, in accordance with the format contained in Section 5.2, below.

3.1.2.2. Construction Programs for the Active Forces and Defense Agencies. The books containing the DD Forms 1391/1391C will be arranged by facility category, following the guidelines established by DoD Instruction 4165.3. For each project, the DD Form 1390 will immediately precede the DD Form 1391/1391C. In each DD Form 1391/1391C provided for the OSD submission, the following design status is required: (1) date of design or parametric cost estimate initiation; (2) percentage of design complete on the OSD submission date; (3) date on which 35 percent design or a parametric cost estimate (15 percent design level) will be or has been completed (including review and approval of 35 percent drawings); (4) projected or actual date of design completion; (5) percentage of design utilizing standard design, (6) if the project cost is based on parametric estimates, include the annotation “Parametric estimates have been used to develop project costs”; and (7) type of design contract, i.e. design-build, design-bid-build, or other, if other, provide a brief explanation of the design contract. Projects proposed for alternative construction methods such as turnkey, or private financing alternatives, for which percent design is not appropriate, should be noted in place of the design status required for normal projects. Prior to the submission of the President’ Budget to Congress, the OUSD(Comptroller) Military Personnel and Construction Directorate shall be notified of any projects in the request where the cost estimate is not based on either 35 percent design or a parametric cost estimate (15 percent design level).

3.1.2.2.1. Major Construction. For purposes of the OSD and OMB review:
3.1.2.2.1.1. No project will be identified or listed under more than one facility category.

3.1.2.2.1.2. The "Operation and Training Facilities" category is to be packaged in the justification books as two separate categories, i.e., "Operation Facilities" followed by "Training Facilities."

3.1.2.2.1.3. Books containing the DD Forms 1391/1391C are to include omnibus packages for the energy conservation investment, and air and water pollution abatement programs. The total requested for each of these programs will be identified separately on single DD Form 1391’s with the detail of program (installation, location, cost, and project description) provided on continuation pages DD Form 1391C. None of the projects included in these categories are to be listed under any other facility category.

3.1.2.2.1.4. Each DD Form 1391 for a major construction project must show the construction contract award date (indicate month and year the contract is planned to be awarded to the construction firm), the construction start date (indicate month and year construction is planned to start), and construction completion date (indicate month and year construction is planned to be completed). The information should be displayed on the DD Form 1391, section 12, Supplemental Data.

3.1.2.2.1.5. All DD Forms 1391 must include a name and phone number of the civil engineer at the installation responsible for the requested project. This information should be displayed in the bottom left hand corner on the last page of the DD Form 1391.

3.1.2.2.2. Minor Construction. The total minor construction program request should be submitted as an omnibus package on a single Form DD Form 1391, specifying the lump-sum amount proposed for unspecified (unforeseen) minor construction projects costing up to $2.0 million per project.

3.1.2.2.3. Supporting Activities. The funding request for Supporting Activities will continue to be reflected as a lump sum amount on DD Form 1391. Supporting detail (location/cost) will be shown parenthetically following the lump sum estimate. While this item will be addressed for decision making purposes in the document covering Utilities and Real Estate, it should be listed separately and not included in the indexes for either Utilities or Real Estate, which fall under different facility category codes.

3.1.2.2.4. Restrictions on Omnibus Construction Packages. Apart from the specific exceptions noted for the pollution abatement, energy conservation, and minor construction programs, which are discrete decisions, there are to be no other omnibus packages or breakouts in the DD Form 1391 justification books. All other projects are to be listed under the appropriate facility category. In this respect, the Marine Corps facilities program is to be integrated with the Navy facilities program so that all Navy and Marine facilities are included in a single Department of Navy facility category listing covering the entire "Military Construction, Navy and Marine Corps" appropriation request. However, a separate "non-add" listing or index of all Marine Corps unique facilities, similar to those provided in the past, is both useful and desired.
3.1.2.2.5. **Budget Summary and Indexing.** Each Component will provide a one-page Budget Summary at the front of the justification book that provides a summary of the total construction program request. The summary will show, by column, the Total Obligation Authority (TOA), Budget Authority (BA), and authorization requested with subtotals by budget activity. Additionally, the books containing the DD Forms 1391/1391C should provide, immediately preceding each category section, an index showing facility category code numbers, installation and location, project number and title, cost, and DD Forms 1391 page number. The index should also identify each project as either new mission or current mission.

3.1.2.2.6. **Multi-service and National Level Support Programs.** Projects providing multi-service or national level support are to be programmed/budgeted under the appropriation, "Military Construction, Defense-Wide", or, in the case of NATO Security Investment Program, under the appropriation "NATO Investment Program." These are to be determined on a case-by-case basis and should be identified as early as possible in the program planning phase. Such items will be identified in the Program Objective Memorandum (POM) and PDM process with appropriate programmatic adjustment or treatment during that phase of the review.

3.1.2.2.7. Should, on rare occasions, other candidates surface outside of the POM/PDM process, they will require review in the budget review process. The following guidelines apply:

3.1.2.2.7.1. The individual military departments will serve in an executive agency capacity for support of those construction items. The military department assigned executive agency responsibility will continue to provide all necessary and appropriate management support for such projects, including preparation of budget justification materials, and will continue to fully manage and execute the program including the preparation of all budget justification materials and defense of estimates submitted to Congress.

3.1.2.2.7.2. For those projects which have been identified and programmed as multi-service or national level support programs during the POM and PDM process, the executive agent will provide, at the time of its own budget submission, a separate submission consisting of all justification materials (DD Forms 1391/1391C) necessary for OSD and OMB review. Such projects are not to be reflected (duplicated) in the submission covering the department’s own program (i.e., financial program, facility category listings, etc.).

3.1.2.2.7.3. For those projects which may surface outside the POM and PDM process as possible additional candidates, the sponsoring military departments will include these in their own construction program submissions as outlined earlier in this chapter, within their own fiscal levels, and separately highlight such items, providing a narrative explaining the basis for change.

3.1.2.3. **Construction Programs for the Guard and Reserve Forces.** Justification materials for the Guard and Reserve construction programs will be submitted on DD Forms 1391/1391C (Project Data). A separate justification book is required for each of the five Guard and Reserve appropriations.
3.1.2.3.1. The DD Forms 1391/1391C will be in a single volume covering total requirements for each appropriation. The materials will be sequenced in alphabetical order, by state and by installation within state. The justification pages covering the lump-sum amount requested for minor construction will appear last. The DD Form 1390S will be in a separate section following the DD Forms 1391/1391C. Each book is to include an index in the front, showing the installation and location, project title, project cost, DD Form 1391 page number, and arranged in alphabetical order by state.

3.1.2.3.2. Each Guard and Reserve program submission is to include separate listings identifying amounts requested in the budget year for: (a) air and water pollution abatement; and (b) energy conservation investment programs. Each listing is to show the installation and location, project title, project cost, and DD Form 1391 page number. "Negative response" listings are required to assure complete coverage.

3.1.2.4. Construction Planning and Design. The annual estimates for planning and design are to be identified and justified on DD Form 1391. In preparing the annual estimates, full consideration should be given to the lead-time required to meet the objective of having each construction project at the 35 percent design stage at the time the Budget is submitted to OSD. Guard and Reserve component construction projects will meet the design criteria established in DoDI 1225.8, “Programs and Procedures for Reserve Component Facilities and Unit Stationing,” at the time the budget request is submitted to OSD.

3.1.2.4.1. The Military Departments will develop and submit planning estimates in support of the construction programs for the individual Active Forces, Guard and Reserve programs.

3.1.2.4.2. OSD will prepare a DD Form 1391, consolidating estimates to be submitted by the Defense Components having justified requirements for Defense Agencies planning and design funds.

3.1.2.4.2.1. Each Defense Agency having a requirement for planning funds during the current and budget years is to submit its estimates on a DD Form 1391.

3.1.2.4.2.2. The individual Military Departments may have a justified requirement for use of Defense-Wide planning funds under circumstances where the Military Departments serve as executive agents for certain multi-service or national-level support projects if funding is required to design a project which will be constructed using Military Construction, Defense-Wide funds. Under such circumstances, the Military Department should submit its estimates on a separate DD Form 1391.

3.1.2.5. Automated Data Requirement. All Military Construction estimates for the Active Forces, Defense Agencies, Guard and Reserve Components shall be addressed in the Exhibit C-1 Construction Annex input prescribed in Volume 2A, Chapter 1.

3.1.2.6. Long-Term Facilities Contracts. DD Forms 1390 and 1391 must be submitted for each project proposed under the authorities of Title 10 U. S. C., Chapter 169. All additional supporting justification should be included in the DD Form 1390 and DD Form 1391 Justifications. These include Section 2809 ("Long-term facilities contracts for certain activities and
services”), Section 2812 (“Lease-Purchase of Facilities”), Section 2835 (Long-term leasing of military family housing to be constructed”), Section 2836 (“Military housing rental guarantee program”), and other third party financed construction authorities. Private financing initiatives will be closely reviewed to ensure their programmatic and budgetary viability. So that an informed decision regarding inclusion of the project in the budget may be made during the program and budget review, proposed projects must be supported by an economic analysis. In addition, to establish a reasonable expectation that the long-term facility project meets Congressional guidance that all third party financed projects, including proposed childcare facilities, be at least five percent less expensive than regular military construction appropriation, a lease-versus-buy analysis conducted in accordance with the provisions of OMB Circular A-94 must also be submitted as backup documentation for the DD Form 1391.

3.1.2.6.1. In development of cost estimates, military construction alternatives should not exceed the published DoD pricing guidance. Private sector construction estimates should be fully supported by documentation and include all pertinent cost factors.

3.1.2.6.2. Guidance for development of the basic economic analysis required to support these long-term facility contracts is contained in DoDI 7041.3, “Economic Analysis for Decision Making.” The separate lease-versus-buy analysis must conform with OMB Circular A-104 and include full life-cycle costs and net present value discounting of each alternative.

3.1.2.6.3. Proposed childcare facilities should also include in their justification the results of a market survey of childcare services available in the local community, and the results of a need assessment and installation interest survey that documents and supports the need for the proposed project.

3.1.2.6.4. Authorization and appropriation procedures for long-term lease and lease-purchase contracts are special cases and may not be treated as regular military construction in some respects. General guidance for the treatment of budget authority, outlays, and scorekeeping guidelines for lease-purchase and capital lease contracts is contained in OMB Circular A-11.

3.1.2.6.4.1. Under the provisions of public law these contracts may, depending on the authority used, be for periods of up to thirty-two years exclusive of the period of construction. However, for projects proposed under the authority of Title 10 United States Code (U.S.C.), Sections 2809, 2835, and 2836 the obligation of the United States to make payments under the contract in any fiscal year is subject to appropriations being provided specifically for that fiscal year and specifically for that project.

3.1.2.6.4.2. Annual lease or annual lease-purchase payments commence at the time of beneficial occupancy, usually after the budget year in which the project is proposed for authorization.

3.1.2.6.4.3. Components will request authorization for the full asset value of the contract (the estimated construction or acquisition cost, the differential cost of financing, and any contract termination liability costs). Components will request budget authority for each project in the amount equal to the full extent of the Government’s first year liability under...
the contract (the sum of all cost and contract termination liability costs), in the budget year the project is submitted for approval.

3.1.2.6.5. Components shall submit proposals for long-term facilities contracts in a separate section in the OSD/OMB Justification books. The section shall be entitled “Long-Term Facilities Contracts.” The section will include all DD Form 1390 and DD Form 1391’s for newly proposed projects and be preceded with an index showing facility category code numbers, installation and location, project number and title, estimated military construction cost and DD Form 1391 page number. Long-term leases and lease-purchases will be separately summarized in the index. In order to assess the long term financial impact of these proposals the section should also include a financial table that provides project data and cumulative totals for; total estimated project authorization, estimated annual lease payment, and year of planned beneficial occupancy.

3.1.2.6.6. Congressional budget presentation Justification Book guidance is provided in section 4.0, below.

3.1.2.6.7. Following approval of projects for inclusion in the President’s Budget, Components may then proceed with project development.

3.1.2.6.8. In accordance with Title 10 United States Code (U. S. C.) these projects must be submitted to Congress for final review or approval 21 days in advance of contract award. Unless denied by Congress, Components may make contract award following the 21-day notification period.

3.1.2.6.8.1. Components will submit these projects for approval to the Under Secretary of Defense for Acquisition, Technology, and Logistics, and the OUSD (Comptroller), prior to congressional notification, and again prior to the final submission to Congress.

3.1.2.6.8.2. In order to ensure that only economical investments are approved, and that budget requests are sufficient to cover the full financing of the contract, only those projects demonstrated to be more cost effective than regular Military Construction will be approved for submission to Congress.

3.1.2.7. Construction Programs for Working Capital Funds

The Working Capital Funds related capital construction projects costing over $750,000 will be included in the component military construction appropriation (including budget authority) program and budget estimates submission for review.

3.1.2.7.1. Military construction projects supporting the Working Capital Funds must be clearly labeled as Working Capital Fund projects. The C-1 Annex will include the Working Capital Fund projects (annotated as such) with their associated budget authority.
3.1.2.7.2. A separate copy of military construction projects supporting the Working Capital Funds will be provided to the Directorate for Revolving Funds, OUSD (Comptroller) (Pentagon, room 3D755).

3.1.2.7.3. Copies of associated economic analysis studies supporting the construction requirements for Fund projects will be separately provided to the Directorate for Military Personnel and Construction, OUSD(Comptroller) (Pentagon, room 3C654).

3.1.2.8. Facilities Programming and Financing at DoD Installations Utilized by Two or More DoD Components. This section establishes the policy for programming and financing facilities at DoD installations where utilization by more than one DoD Component is involved, including host-tenant relationships.

3.1.2.8.1. Responsibilities

3.1.2.8.1.1. To ensure joint use construction is considered when assessing the Department’s facilities needs, each DD Form 1391 must include a certification by the Secretary of Defense Agency Director concerned that the proposed project has been considered for joint use potential; a recommendation for either joint use or unilateral construction; and the reason(s) for that recommendation if joint use is not recommended. The certification may be delegated not lower than the Assistant Secretary responsible for the project. This certification is not required for family housing construction and improvement projects.

3.1.2.8.1.2. Single-Use Facilities. The DoD Component requiring a facility for its own use shall program and budget for the construction project involved.

3.1.2.8.1.3. Joint-Use Facilities. The DoD Component which has jurisdiction over the host command shall program and budget for a facility which is planned for the joint use or joint occupancy of two or more DoD Components.

3.1.2.8.1.4. Common-Purpose Facilities. On a case-by-case basis, the individual DoD Components shall function as executive agents for programs whose output directly and uniquely operates to the benefit of two or more DoD Components. The executive agent shall be responsible for planning and programming all facilities.

3.1.2.8.1.5. Required Facilities. Generally, the host Military Department will program and budget an extension, expansion, and/or increase the capacity of the main utilities and communications or transportation systems, consistent with the master plan of the installation, to support any required facilities, including those required by a tenant. However, programming and budgeting for such connecting utilities and communications or transportation systems as an integral part of any single-use facility are the responsibilities of the DoD Components requiring the facility.

3.1.2.8.1.6. Siting Facilities. Siting of any facility for a tenant will conform to the master plan of the installation or will be in accordance with an agreed-upon location by the DoD Components concerned.
3.1.2.8.1.7. Design. Standards of design and construction will conform to those of the host Military Department, consistent with the master plan of the installation; however, exceptions will be made in those instances where tactical or other operational considerations requiring limited duration of occupancy economically would not justify construction of facilities to higher standards.

3.1.2.8.2. Utilization

3.1.2.8.2.1. The tenant DoD Component will have exclusive use of any facility constructed for the duration of the tenant’s requirement. Upon termination of tenancy or use by the tenant, the facility will revert to the host Military Department for utilization without fee.

3.1.2.8.2.2. Should the tenant DoD Component, at a later date have a requirement for use of the same facility, the host Military Department will make the facility, or an acceptable existing facility, available within a reasonable time period to the tenant. The host Military Department will not reconstruct or acquire a new facility for the tenant instead of returning the original facility or an acceptable existing substitute. If the host Military Department is not able to make a facility available to the tenant without creating unacceptable conditions for the host, the tenant will be responsible for obtaining a new facility.

3.1.2.8.2.3. Maintenance and Service Support. Determination as to the levels of maintenance and service support and reimbursement therefore will be made by the DoD Components concerned consistent with DoD policies for host-tenant agreements.

3.1.2.9. Energy Conservation Investment Program (ECIP). DD Forms 1390’s and 1391’s should be submitted for each ECIP project requested in the budget. These forms should include the location, the nature or category of the project, the cost and the expected payback using the most current technological and economic information available, and the name and telephone number of a point of contact. The Components should submit these forms to the OUSD (Acquisition, Technology, and Logistics) ECIP Program Manager 7 days prior to the OUSD (Comptroller) budget due date to allow sufficient time for the ECIP Program Manager to review them prior to transmittal to OUSD (Comptroller).

3.2 Family Housing (060302)

3.2.1. Purpose

3.2.1.1. This Section prescribes instructions for the preparation and submission of budget estimates for the Services’ and Defense-Wide Family Housing, appropriations.

3.2.1.2. Budget estimates will be submitted by the Services and Defense Agencies, which have requirements for financing the Family Housing Program as defined in Section 1.6.
3.2.2. Submission Requirements

3.2.2.1. Budget Estimates. Each DoD Component is to submit data to support the budget requirement for Family Housing on the basis of the accounts and account structure set forth in the detail prescribed in Section 3.2.2.3, below (Preparation of Material). In addition, each DoD Component will address Family Housing estimates in the Exhibit C-1 Construction Annex input prescribed in Volume 2A, Chapter 1, section 010504.

3.2.2.2. General

3.2.2.2.1. All data (including the OP-5 exhibit) will be provided on 8-1/2 inch by 11 inch size paper, typed across the short dimension of the paper, except for the formal exhibits contained in Section 5.0. All pages will be bound on the 11 inch side.

3.2.2.2.2. The family housing budget data will be bound in separate books for the Army, Navy (including Marine Corps, with O&M Cost and Debt Payment for Marine Corps shown separately), Air Force, and Defense Agencies.

3.2.2.2.3. The number of required copies of the above material is specified in Volume 2A, Chapter 1, section 010302.

3.2.2.3. Preparation of Material. Submit data using forms and formats as indicated below. Separate tabbed sections will be submitted for each of the categories below (a, b, and 4-18).

3.2.2.3.1. Index. Provide a detailed index to the submission.

3.2.2.3.2. Summary

3.2.2.3.2.1. Provide a narrative summary describing the most significant features of the request. This summary need not cover every facet of the request and is intended to highlight those items of special significance.

3.2.2.3.2.2. Provide a one-page financial summary of the entire request. This should include, as a minimum, the amounts requested for authorization and appropriation for the major programs and their immediate subordinate accounts (Construction: New Construction, Post Acquisition Construction, Planning and Design; O&M: Operating Expenses, Utilities, Maintenance, Leasing, Housing Privatization Support, Debt Payment, Servicemen’s Mortgage Insurance Premium and Reimbursable Program).

3.2.2.3.2.3. Provide the summary metric tables, Exhibit FH-11, Inventory and Condition of Government-owned Family Housing Units, (which replaced the Summary of Inadequate Unit Elimination, FH-7 Exhibit) and Exhibit FH-8, Annual Inadequate Family Housing Elimination.
3.2.2.3.2.3.1. These exhibits support the measures and targets developed in the DoD Performance Budget, which are based on the condition of the facilities (Q-Ratings) and maintaining a minimum specified percentage level of adequate housing units.

3.2.2.3.2.3.2. All government-owned Family Housing inventory should be reflected in these exhibits, including transitional units. Inventory should be consistent with number of units and Q-Ratings contained in the Real Property Inventory database. Additional information on Q-Ratings is available in OSD (AT&L) Facility Quality Rating Memorandum of September 5, 2007 and the GSA Guidance for Real Property Inventory Reporting.

3.2.2.4. Legislative Language. Provide the required authorization and appropriation language for the budget year. The current year language should serve as the base, with changes and omissions bracketed.

3.2.2.5. New Construction

3.2.2.5.1. Summary. Provide a brief summary of the New Construction program. The summary should include, as a minimum: a short narrative highlighting the most significant features of the request, a comparison of the prior year program with the request, and a listing of each project requested showing new construction or replacement, location, number of units and the estimated cost. The listing should also identify each project as either new mission or current mission requirement, as well as provide the major initiative category.

3.2.2.5.2. Project Justification. For each New Construction project, including the construction of mobile home spaces, the following forms and exhibits are required. Additionally, in accordance with *Title 10 United States Code (U.S.C.), Sections 2823 and 2824* provide documentation of consultations with the Department of Housing and Urban Development on the availability of suitable alternative housing at each construction location.

3.2.2.5.2.1. Military Construction Project Data –DD Form 1391. Form will be prepared in accordance with the instructions contained in Section 5.0, below. It is important to avoid the use of “boiler-plate” justification. Cost estimates for new construction projects will include the maximum level of detail practicable, including construction contract award date (indicate month and year the contract is planned to be awarded to the construction firm), the construction start date (include month and year construction is planned to start), and construction completion date (indicate month and year construction is planned to be completed). Any unusual features impacting on the cost of the project must be identified and fully justified. In order to ensure prudent and economic investments, a life-cycle net present value economic cost analysis is required to support all new construction projects estimated to cost in excess of $2 million. Copies of these analyses are to be provided with the Family Housing budget estimates. Each DD Form 1391 will (1) state if an economic analysis has been prepared and provide a summary of the results of that analysis, including the calculated savings-to-investment ratio, or (2) provide the specific reasons why an economic analysis is not required. Assemble the DD Form 1391’s in the same sequence as the listing of projects on the summary page.

3.2.2.5.2.2. DD Form 1523, Military Family Housing Justification. Form will be prepared in accordance with DoD 4165.63-M, “DoD Housing Management” manual. Data supplied should be in agreement with the latest formal housing survey for the location, and
with the information provided on the DD Form 1390. The date of the survey should be specified. The form must include a statement indicating whether a private sector housing market analysis has been conducted and the date the market analysis was completed. When a market analysis has been conducted and is used as justification for new construction, a copy of the analysis must be available for review upon request. Since this form deals with housing deficit calculations, the DD Form 1523 is needed only for new requirements.

3.2.2.5.2.3. **Tri-Service Family Housing Cost Model.** Provide, for each housing project, the calculations on which the budget estimate is based, using Exhibit FH-1, the “Tri-Service Family Housing Cost Model”. The appropriate DoD cost factors must be used in the calculations. In addition, Tri-Service Family Housing Cost Models should be prepared using metric units of measure.

* 3.2.2.6. **Construction Improvements**

3.2.2.6.1. **Summary.** Provide a general summary of the Construction Improvements program being requested. The summary should include, as a minimum, a short narrative highlighting the most significant features of the request, and a comparison of the prior year program with the request. For consistency, the program should be referred to as “Construction Improvements” rather than “Post Acquisition Construction” or any other title.

3.2.2.6.2. **Project Justification.** Provide a DD Form 1391 covering the entire Construction Improvements program and DD Form 1391C listing each project requested. Project description should be specific with regard to the work which is to be done (specify the number of units to be improved by intended occupant grade -- senior officer, junior officer, or enlisted), and show any planned concurrent, non-routine, maintenance costs, including construction contract award date (indicate month and year the contract is planned to be awarded to the construction firm), the construction start date (include month and year construction is planned to start), and construction completion date (indicate month and year construction is planned to be completed). Projects should be arranged alphabetically by state and country. Federal Energy Management Program funding, if any, must be separately totaled. Projects, or portions of projects, for General and Flag Officer Quarters (GFOQ) must be identified separately. For improvement projects, where the unit improvement cost exceed seventy percent of the replacement cost, the project must be supported by a life-cycle economic analysis which demonstrates that renovation is more cost effective than replacement construction or other available alternatives, such as demolition and reliance on housing allowances.

3.2.2.6.3. **Projects in Excess of $50,000 Per Unit.** A separate DD Form 1391 is required for each project for which the per unit cost exceeds $50,000, taking into consideration the applicable area cost factor. If the improvement is required to make the unit suitable for habitation by a handicapped person, the threshold is $60,000 multiplied by the applicable area cost factor. The cost estimate should also include concurrent repair to be funded...
under O&M. The justification for the project must detail the findings of an economic analysis and the resulting savings-to-investment ratio. Any unusual features impacting on the cost of the project must be clearly cited. Additionally, note the total Construction Improvements and non-routine maintenance for the unit or set of units over the past five years.

3.2.2.6.4. Restriction on the Amount Invested in Improving Foreign Source Housing Units. The three-year limitation on overseas units is $35,000. If the Services intend to program improvements to specific units which exceed $35,000 over a period of three years, total funding should be requested in one year. The justification for each unit should identify all improvements and major maintenance work done in the past three years, and all improvements and major maintenance planned in the following three years.

3.2.2.7. Rental Guarantee Housing. For each rental guarantee housing project, both foreign and domestic, provide a listing showing: (1) location, (2) number of units (by intended occupants (senior officer, junior officer, enlisted), (3) term of contract, (4) FY and month of contract renewal, and (5) maximum termination costs.

3.2.2.8. Advance Planning and Design. All requirements for Advance Planning and Design should be submitted in the format prescribed for military construction in Volume 2B, Chapter 6, section 060301.

3.2.2.9. O&M Summary

3.2.2.9.1. Narrative Summary. Provide a general summary of the entire O&M program being requested, excluding leasing, housing privatization support, debt, and servicemen’s mortgage insurance premium, which are to be addressed elsewhere in the budget submission. The summary should include, as a minimum, a succinct narrative highlighting the significant features of the request and a comparison of the prior year program with the budget request, particularly the reasons for any significant upward or downward shifts in funding levels.

3.2.2.9.2. Inventory and Funding Summary

3.2.2.9.2.1. Provide the data called for in Exhibit FH-2, Family Housing O&M Summary. Include for each fiscal year, as a subset of "Average Inventory for Year," the total number of units that are classified as historic (units that DoD must manage in accordance with the National Historic Preservation Act of 1966). Display the historic figures in parenthesis immediately below the Average Inventory line.

3.2.2.9.2.2. Provide the total civilian personnel compensation for all U.S. Direct Hires, Foreign National Direct Hires and Foreign National Indirect Hires. This information should be provided for the prior year, current year and budget years in the format of Exhibit OP-8, Civilian Personnel Costs, shown in Volume 2A, Chapter 3, section 030402. This exhibit is only required for inclusion in the OMB and OSD review but should be provided separately for the President’s Budget submission.

3.2.2.10. Operations. The sub-accounts of Operations are Management, Services, Furnishings and Miscellaneous. For each of these provide:
3.2.2.10.1. **Summary.** Provide a short narrative describing what the funds will be used for, how the budget was developed, major assumptions made, and highlighting the most significant features of the request. The summary should also explain the effect that the housing privatization program has on the budget estimates for each of the O&M accounts and subaccounts. For the Furnishings program only, provide additional information in the format of Exhibit FH-3, “Furnishings Summary”.

3.2.2.10.2. **Reconciliation of Increases and Decreases.** A reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President’s Budget for the current year and budget years. The format of this reconciliation is to be identical to the Exhibit OP-5 shown in section 5.0, below. For each program increase or decrease, quantitative and qualitative information relative to the proposed change must be provided. Increases and decreases should be supported by specific reasons why these adjustments in the program are necessary, particularly changes in the number of family housing units being supported, changes in the FH-2 and FH-3 exhibits, etc.

3.2.2.11. **Utilities.** For the Utilities program, separate from Operations, provide the following:

3.2.2.11.1. Provide a short narrative describing what the funds will be used for, how the budget was developed, major assumptions made, and highlighting the most significant features of the request. The summary should also explain the effect that the housing privatization program has on the budget estimates for the account. This section must address energy consumption reductions accomplished and progress made towards meeting Congressional and Defense energy conservation goals.

3.2.2.11.2. Include a table that breaks out, for each FY reflected in the budget submission, kilowatt hour of electricity, tons of coal, cubic feet of gas, barrels of oil, and other forms of energy that support the utilities budget request.

3.2.2.11.3. **Reconciliation of Increases and Decreases.** A reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President’s Budget for the current year and budget years. The format of this reconciliation is to be identical to the Exhibit OP-5 shown in Section 5.0, below. For each program increase or decrease, quantitative and qualitative information relative to the proposed change must be provided. Increases and decreases should be supported by specific reasons why these adjustments in the program are necessary, particularly changes in the number of family housing units being supported, changes in the FH-2 exhibit, etc.

3.2.2.12. **Maintenance**

3.2.2.12.1. Provide a short narrative describing what the funds will be used for, how the budget was developed, major assumptions made, and highlighting the most significant features of the request. The summary should also explain the effect that the housing privatization program has on the budget estimates for the account.
3.2.2.12.2. Reconciliation of Increases and Decreases. A reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President’s Budget for the current year and budget years. The format of this reconciliation is to be identical to the Exhibit OP-5 shown in Section 5.0 of this manual. For each program increase or decrease, quantitative and qualitative information relative to the proposed change must be provided. Increases and decreases should be supported by specific reasons why these adjustments in the program are necessary, particularly changes in the number of family housing units being supported, changes in the FH-2 exhibit, etc.

3.2.2.12.3. Provide a summary on the backlog of deferred maintenance. Describe the plans for reducing the backlog to a manageable level. Provide an analysis of types of projects, type and accuracy of reporting and special efforts to reduce the backlog. Provide a table covering the Future Years Defense Program (FYDP) including: (1) backlog at beginning of year, (2) recurring maintenance arising during the year, (3) maintenance funds approved or planned, (4) backlog at end of year, and (5) backlog reduction (-) or growth (+) during the FY.

3.2.2.13. Maintenance and Repair Cost Over $20,000 Per Unit

3.2.2.13.1. Using DD Forms 1391 and 1391C, provide data on maintenance and repair projects for which the per-unit cost exceeds $20,000. As a minimum, the 1391C should provide, for each project: (1) location, (2) number of units, (3) age of units, (4) per unit cost, (5) total square footage of unit and square footage of project, (6) total cost, and (7) short narrative description and justification of the work, including results of economic analysis and savings-to-investment ratio. Projects should be listed alphabetically by state and country, as displayed for the Post Acquisition Construction projects.

3.2.2.13.2. Projects which appear as concurrent maintenance and repair on the 1391’s for Post-Acquisition Construction (see Section 3.2.2.7 above) will be shown here if they exceed the $20,000 per unit threshold, with a notation stating that the project is also shown in the post-acquisition construction section.

* 3.2.2.14. GFOQ Maintenance and Repair Cost Over $35,000 Per Unit

3.2.2.14.1. Provide a narrative summary, detailing efforts to control and reduce expenditures for the “high-cost” GFOQ units.

3.2.2.14.2. Provide a listing of all GFOQ for which total maintenance and repair cost per unit exceeds $35,000 for the Budget Year. Listing should include, for each unit: (1) state/country/location, (2) quarters identification, (3) size of unit, (4) age of unit, (5) total operations cost, (6) total utilities cost, (7) total maintenance and repair cost, (8) total O&M cost, and (9) a short narrative description and justification of the work, including results of economic analysis and savings-to-investment ratio. In addition, identify any Construction Improvements project and funding requested for any GFOQ in the listing.

3.2.2.14.3. This listing will include all GFOQ projects for which total maintenance and repair cost exceeds $35,000, including those listed in other sections of the submission.
3.2.2.14.4. Provide a similar listing for the Prior Year and Current Year units with M&R over $35,000 and which were not included in the previous budget request.

3.2.2.14.5. To satisfy Congressional reporting requirements, provide:

3.2.2.14.5.1. A report identifying each family housing unit used, or intended for use, as a quarters for a general officer or flag officer for which the total operations, utilities, leasing, maintenance, and repair costs are anticipated to exceed $35,000 in the next fiscal year. For each family housing unit so identified specify the total of such anticipated operation, utilities, leasing, maintenance, and repair costs for the unit. This shall be reported in the format of Exhibit FH-5 General and Flag Officers Quarters (Anticipated expenditures for O&M exceeding $35,000).

3.2.2.14.5.2. A report specifying for each family housing unit used as quarters for a general officer or flag officer at any time during the most recently completed fiscal year, the total expenditures for O&M, utilities, leasing, maintenance, and repair costs of the unit during that fiscal year. This shall be reported in the format of Exhibit FH-9 GFOQ (O&M Expenditures for FY 2XXX). This report should also be provided to the Military Personnel and Construction Directorate in electronic excel format, no later than December 1.

3.2.2.14.5.3. A report identifying each family housing unit used or intended for use, as a quarters for a general officer or flag officer which is in excess of 6,000 square feet (SF). For each unit over 6,000SF specify any alternative and more efficient use to which the unit could be converted (including cost of conversion) and an explanation as to why the unit is not being converted to the alternative use. For each unit identified whose annual O&M costs are greater than $35,000 or if new construction costs are anticipated to exceed $100,000 in the next FY, specify any alternative use (including cost of conversion) and an estimate of the costs to demolish and rebuild the unit to private sector standards. This shall be reported in the format of Exhibit FH-10, GFOQ 6,000NSF Units for FY 2XXX.

3.2.2.14.5.4. As amended by section 2805 of the FY 2009 National Defense Authorization Act (NDAA), 10 USC 2884 requires annual reporting of privatized GFOQ units and the total operation, maintenance, and repair costs incurred by private sector developer/partners that exceed $50,000 per housing unit. Therefore, the Components are required to complete the Exhibit FH-12, Privatized GFOQ Operation, Maintenance and Repair Costs Incurred by Private Sector Developer/Partner/Owner Exceeding $50K per Housing Unit, annually.

3.2.2.15. **Reimbursable Program.** Provide a detailed justification for the Reimbursable Authority requested. Include information on what precisely is funded through the reimbursable program and details on the sources of receipts for the prior year, current year and budget year.

3.2.2.16. **Leasing**

3.2.2.16.1. Provide a short narrative describing what the funds will be used for, how the budget was developed, major assumptions made, and highlighting the most significant features of the request. The summary should also explain the effect that the housing privatization program has on the budget estimates for the account. The summary shall include a table reflecting...
the authorized number of leases, average number of leases supported and costs for each of the PY, CY and BY, for Domestic Leasing, Section 801 and Section 802 leases, and foreign leasing.

3.2.2.16.2. For both domestic and foreign leases, provide a summary justification statement. Also provide data on the leasing program in the format of Exhibit FH-4, "Analysis of Leased Units." Information should be provided at the installation or community level, whichever is most applicable. For each new project requested, include a full justification and description, in the same format as for a New Construction project (see Section 3.2.2.6 above).

3.2.2.16.3. Reconciliation of Increases and Decreases. A reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President’s Budget for the current year and budget years. The format of this reconciliation is to be identical to the Exhibit OP-5 shown in Section 5.0, below. For each program increase or decrease, quantitative and qualitative information relative to the proposed change should be provided. Increases and decreases should be supported by specific reasons why these adjustments in the program are necessary, particularly changes in the number of family housing units being supported.

3.2.2.16.4. For each new Public Law 98-115, section 801 lease project requested, include a full justification and description, in the same format as for a New Construction project (see Section 3.2.2.6 above), including the results of the economic analysis.

3.2.2.16.5. Under Section Title 10 United States Code (U.S.C.), section 2828, the Components are allowed not more than 10,000 domestic (United States, Puerto Rico, or Guam) leased family housing units. The cost of domestic leases may not exceed $12,000 (including the cost of utilities, maintenance, and operation) per unit per year.

3.2.2.16.5.1. Section 2828 permits an exception for 500 of these domestic leased units that may exceed $12,000 per unit per year but cannot exceed $14,000 per unit per year as adjusted from time to time. At the beginning of each fiscal year, the Secretary concerned shall adjust the maximum lease amount for domestic leases for the previous fiscal year by the percentage (if any) by which the national average monthly cost of housing (as calculated for purposes of determining rates of Basic Allowance for Housing under section 403 of title 37) for the preceding fiscal year exceeds the national average monthly cost of housing (as so calculated) for the fiscal year before such preceding fiscal year.

3.2.2.16.5.2. The Army has authority to lease eight units in Miami, Florida for key and essential personnel, as designated by the Secretary, for the United States Southern Command. Total lease cost for all eight units may not exceed $280,000 per year as adjusted from time to time. The terms of any lease under this paragraph may not exceed 5 years. At the beginning of each FY the Secretary of the Army shall adjust the maximum aggregate amount for these leases for the previous FY by the percentage (if any) by which the annual average cost of housing for the Miami Military Housing Area (as calculated for purposes of determining Basic Allowance for Housing under Section 403 of Title 37) for the preceding FY exceeds the annual average cost of housing for the Miami Military Housing Area (as so calculated) for the FY before such preceding FY. Additionally, not more than 600 domestic housing units may be leased by the Secretary of the Army for which the expenditure for the rental of such units does not exceed $35,000 per unit per year, as adjusted from time to time.
3.2.2.16.6. Also under Title 10 United States Code (U.S.C.), section 2828, the Components are allowed not more than 55,775 foreign leased units. Foreign leases may not exceed $20,000 per unit per year (including the cost of utilities, maintenance, and operation). Section 2828 permits exceptions for 450 leased units that may exceed $20,000 but that cannot exceed $25,000 per unit per year and for 350 leases that may exceed $25,000 per unit per year.

3.2.2.16.6.1. In addition to the 450 units:

3.2.2.16.6.1.1. The Secretaries of the military departments may lease not more than 3,300 units of family housing in Italy that may not exceed $25,000 per unit per year.

3.2.2.16.6.1.2. The Army may lease not more than 1,175 units in Korea that may exceed $25,000. Also, the Army may lease not more than 2,800 units of family housing in Korea subject to a maximum lease amount of $35,000.

3.2.2.16.6.2. The maximum lease amounts for the previous FY will be adjusted at the beginning of each FY, by the percentage (if any) by which the Consumer Price Index (CPI) for all Urban Consumers, published by the Bureau of Labor Statistics, during the preceding FY exceeds such CPI for the FY before such preceding FY and for foreign currency fluctuations from October 1, 1987. To determine the impact of foreign currency fluctuation on the rental rate, these high cost “cap” rental rates must be computed for each foreign country, each year to adjust for the impact of foreign currency fluctuation. After the caps of $20,000, $25,000 and $35,000 U.S. dollars are adjusted by country, the adjusted rates become the new cap for determining whether a lease must be counted against the exception limits for a given budget year. Then, if a rental exceeds the adjusted maximum costs, it counts against the high cost ceiling limitations of 450 and 350, units, respectively, DoD-wide. For each country the formula that is to be applied is: $20,000 adjusted for CPI changes or $25,000 adjusted for CPI changes or $35,000 adjusted for CPI changes * [FY 1988 exchange rate / current budget exchange rate] = new cap limit.
3.2.2.16.6.2.1. Where the “FY 1988 exchange rate” is the exchange rate that was published by the USD (Comptroller) for use in preparing the FY 1988 budget estimates, stated in units of foreign currency for one (1) U.S. dollar:

</table>

For countries not listed, use the October 1, 1987 exchange rate.

3.2.2.16.6.2.2. Where the “current budget exchange rate” is the rate published by the USD (Comptroller) for use in preparing the fiscal year budget estimates for which the lease funds are being requested, stated in units of foreign currency for one (1) U.S. dollar.

3.2.2.16.6.2.3. The new cap limit is the maximum amount in dollars that a lease may cost per unit per annum for each nation before that unit must count against the worldwide 350 and 450 unit limits on exceptions for high cost leases for the fiscal year for which the budget resources are being requested.

3.2.2.16.6.2.4. Provide a summary table showing application of the above formula for each nation where high cost leases exist or are proposed, and the total number of such leases.

3.2.2.17. Mortgage Insurance Premium (also known as Servicemen’s Mortgage Insurance Premium).

3.2.2.17.1. Provide a brief justification statement describing the requested program.

3.2.2.17.2. Provide a table identifying separately the total of the principal payments, and interest charges, and the totals for the Servicemen’s Mortgage Insurance Premium program for the prior, current, and budget years.

3.2.2.17.3. For the Servicemen’s Mortgage Insurance Premium program provide a listing for each fiscal year, showing: the number of terminations, the number of
mortgages on which payments are to be made, the average payment per mortgage, and the estimated payments for the year. This table should start with the prior year, and end with BY+1.

3.2.2.18. Foreign Currency Exchange Data. All Family Housing O&M appropriations that participate in the Foreign Currency Fluctuations, Construction, Defense appropriation are required to prepare and submit a PB-18 Exhibit using the approved foreign currency exchange rates. The format for the PB-18 Exhibit is in Volume 2B, Chapter 19, section 191204.

3.2.2.19. Each Component will also submit a Major Initiatives exhibit which must include a general description of each of its major initiatives for the budget year and what the Component plans to accomplish in the budget year to support that initiative. Be specific, including the impact on force structure. This exhibit will be prepared in accordance with the format contained in Section 5.2.

3.2.2.20. Housing Privatization Support. The Components shall add a separate tab and section called “Housing Privatization Support” (after the Leasing section) in the family housing justification book, and include, as a minimum, the following information in the new section:

3.2.2.20.1. A narrative summary of the Component's overall family housing privatization efforts and accomplishments/progress to date.

3.2.2.20.2. A summary list of privatization projects and associated funding requested in the Construction portion of the program and budget submission. (DD Form 1391 for New Construction and Construction Improvement projects should indicate which projects are intended as a source of funding for privatization initiatives.)

3.2.2.20.3. Detailed of Awarded Privatization Projects (FH-13). This new exhibit formalizes previously provided information in the President’s Budget and shall be prepared to include a list of all awarded projects, including: award date; types of financing (direct loan, loan guarantee, investment, differential lease payments, etc.); scored amounts for each type of financing used in the deal; term of the deal in years; status of IDP; and total number of end-state units in the privatized project (breakout total units conveyed, renovated, replaced, and/or new/added units).

3.2.2.20.4. Family Housing Privatization (FH-6). This exhibit shall be prepared for the President’s Budget to include the all privatization projects (past, current and future); type of investment or financing; funding sources for financing and investments by appropriation, fiscal year and project (include project number); number of units conveyed; number of end-state number of units, etc. For grouped projects, the first line should be the grouped project name with lines below for each installation and state in the grouped project. This exhibit shall reflect the actual or current project scoring information.

3.2.2.20.5. Housing Privatization Comparison (FH-6-BES). This new exhibit shall be prepared for the Budget Review, and shall not be included as part of the President’s Budget. For the President’s Budget, use the FH-6 Exhibit (mentioned above). This exhibit compares the OSD/OMB approved project scoring with the actual/current project scoring. Information provided should be consistent or similar with data to be submitted for the Military
Housing Privatization Initiative (MHPI) Program Evaluation Plan Executive Report to Congress for September, which also incorporates a similar comparison.

3.2.2.20.6. Reconciliation of Increases and Decreases (OP-5). This exhibit shall be prepared for the Housing Privatization Support (as defined previously in 2.2.2.1) budget and must include detailed explanation/justification for the request, and explanation for all increases and decreases from prior budget request. See section 3.6 below.

3.3 Homeowners’ Assistance Fund, Defense (060303)

3.3.1. Purpose

3.3.1.1. This Section provides guidance for the preparation and submission of Homeowners’ Assistance Fund, Defense budget estimates under the Department of the Army allocation account.

3.3.1.2. Budget estimates will be submitted only by the Department of the Army, which has been assigned the overall responsibility for the administration and management of the Department of Defense Homeowners’ Assistance program by DoD Directive 4165.50 “Homeowners Assistance Program (HAP).”

3.3.1.3. Each Component is responsible for including sufficient resources in its budget to fund HAP costs related to the Component’s actions associated with base closures, realignments, and force reductions. The level of resources required to fund HAP costs shall be developed in consultation with the Army, as the HAP executive agent. Budget estimates for HAP costs shall be separately identified and submitted in the Component's Base Realignment and Closure (BRAC) submissions for HAP costs associated with realignments and closures and in the O&M submission for non-BRAC related HAP costs.

3.3.2. Submission Requirements

3.3.2.1. The following exhibits, provided in Section 0605, below will be submitted:

HA-1 Workload and Obligation Data  
HA-2 Status of Accounts  
HA-3 Work Unit Data  
HA-4 Program and Financing

In addition, the Army will input Homeowners’ Assistance Fund estimates for the C-1 Construction Annex input prescribed in Volume 2A, Chapter 1, section 010504.

3.3.2.2. Required copies of the above material are identified in Volume 2A, Chapter 1, section 010302 of this Regulation.

3.3.2.3. For the biennial budget, separate sections or volumes will be provided for BY1 and BY2. For the BY2 section, BY1 will be considered as the prior year and BY2 as the budget year.
3.3.3. Preparation of Material. All material will be provided on 8-1/2 inch by 11 inch size paper and bound on the long side. All narrative data will be typed across the short dimension of the paper, while Exhibits HA-1, 2, 3 and 4 will be typed across the long dimension.

3.4. NATO Security Investment Program (060304)

3.4.1. Purpose

3.4.1.1. This section provides guidance for preparation and submission of the NATO Security Investment Program budget estimates.

3.4.1.2. Budget estimates will be submitted by the OUSD (AT&L) since that office has been assigned the overall responsibility for the oversight and management of the NATO Security Investment Program by DoDD 2010.5, “DoD Participation in the NATO Infrastructure Program.”

3.4.2. Submission Requirements. Submit a detailed exhibit, NATO Security Investment Program-1 (NSIP-1), listing requirements at the project level for both construction and procurement requirements. The listing should be sufficiently detailed to identify discrete projects and initiatives. Aggregations at the capability package level i.e., Defense of the Mediterranean, are not sufficiently detailed and should be broken down further to show the individual projects/initiatives comprising the capability packages. A narrative explanation and description of each of the requirements for the current and budget years should be provided. The NSIP-1 exhibit is provided in section 5.5, below for the NATO Security Investment Program to identify the following information: Location, Installation, Project Title, Description of Project, Budget Scheme (how many NATO Nations participating in the funding of the project), Project Cost, U.S. Cost Share, Other Nations Cost Share. This will be provided for both the current year and budget year.

Submit a detailed exhibit, NSIP-2, listing each NSIP major construction project that are eligible for recoupment (reimbursement by other member countries for eligible costs). The NSIP-2 exhibit is provided in section 5.5, below for the NATO Security Investment Program to identify the following information: Component, Appropriation, FY, Location, Installation, Project Title, Slice/Serial (if known), Recoupment Budget Estimate, and Rate of Conversion.

3.4.3. Preparation of Material. All material will be provided on 8-1/2 inch by 11 inch size paper and bound on the long side. All narrative data will be typed across the short dimension of the paper.
3.5 NATO Security Investment Program Expansion Costs (060305)

Expansion Costs. Submit a list of all requirements, construction and procurement, associated with NATO expansion. The listing should be sufficiently detailed to identify discrete projects and initiatives. Aggregations at the capability package level i.e., Defense of the Southern Region, are not sufficiently detailed and should be broken down further to show the individual projects/initiatives comprising the capability packages. The NSIP-1 exhibit is provided in section 5.5, below for the NATO Security Investment Program to identify the following information of projects associated with NATO Expansion: Location, Installation, Project Title, Description of Project, Budget Scheme (how many NATO Nations participating in the funding of the project), Total Project Cost, U.S. Cost Share, Other Nations Cost Share. This will be provided for both the current year and budget year. A narrative explanation and description of each of the requirements for the budget years should be provided. The budget estimate for NATO Expansion Costs should be identified in BA 02 as presented in Volume 2A, Chapter 1.

3.6 Family Housing Improvement Fund (FHIF) Program (060306)

3.6.1 Purpose

This section prescribes instructions for the preparation and submission of budget estimates for the DoD Family Housing Improvement Fund (FHIF) and related requirements, to include Military Housing Privatization Initiative (MHPI) administrative program expenses for accounting and financial reporting services.

3.6.2 Submission Requirements

3.6.2.1 The Facilities Energy and Privatization (FE&P) Directorate of the Office of the Deputy Under Secretary of Defense (ODUSD) (Installation and Environment (I&E)), shall submit to the OUSD (Comptroller), Military Personnel and Construction (MPC) Directorate a memorandum which includes a narrative overview of the Military Housing Privatization Initiative (MHPI), current status of the MHPI, and future plans for the program. In addition, the FE&P memorandum shall include funds required for the budget year for administration and oversight of the MHPI program, including for accounting and financial reporting services from DFAS, and detailed justification for these funds. The new FHIF Admin Requirements Exhibit (FH-14) shall also be completed and provided electronically to OUSD (Comptroller) MPC, Family Housing.

*3.7 MHPI Investments and Credit Financing (060307)

3.7.1 The Federal Credit Reform Act of 1990 and OMB Circular A-11 require credit financing and investment information for privatization projects to be reflected in the President’s budget. Credit financing information required for the President’s budget is explained in OMB Circular A-11, Part 5, Section 85 (Federal Credit). On an annual basis, OMB sends out Budget Data Requests (BDR) for Credit Reestimates, MAX Schedule updates, and Credit Supplemental Reporting information for the President’s Budget (for Prior Year (PY), Current Year (CY), and Budget Year (BY)).

3.7.2 OUSD (Comptroller) MPC directorate is leading a business process improvement effort focusing on current MHPI and credit related processes, which could result in future changes
3.7.3. **Credit Reestimates.** Reestimates are performed throughout the life of each cohort of direct loans or loan guarantees to account for differences between the original assumptions of cash flow and the actual cash flow or revised assumptions about future cash flow. There are two types of Reestimates, Interest Rate Reestimates and Technical Reestimates.

3.7.3.1. Interest Rate Reestimates (IRR) adjust for the effect on the subsidy of differences between the actual interest rate and the discount rates assumed when the estimates were made for budget formulation and obligation. IRR are performed once, in the fiscal year following the fiscal year in which the direct or guaranteed loan was “originally” estimated to be at least 90 percent disbursed.

3.7.3.2. Technical Reestimates adjust for revised assumptions about loan performance, such as differences between assumed and actual default rates or new projections of repayments; and are performed annually for outstanding direct and guaranteed loans.

3.7.3.3. Reestimates are used for yearend financial reporting and for the President’s Budget.

3.7.3.4. In July, OUSD(C) MPC Directorate will send out the Reestimate Data Call and forward the associated direct loan and loan guarantee cash flow files and reestimate timeline to the Services for review and completion by mid-August, and coordination with DFAS. The FH-15 Reestimate Cash Flow Status questionnaire format has been incorporated into the DoD FMR. All files and completed questionnaire should be forwarded, electronically, to Evelyn Roll, OUSD (Comptroller) MPC Family Housing Budget Analyst by the August deadline.

3.7.3.4.1. The Services are required to prepare cash flow files for new direct loans and loan guarantees, as needed; review all risk factors; substitute reamortization schedules in the files for existing loans after coordination with DFAS, as needed; and complete the Reestimate Questionnaire on the status of the cash flows.

3.7.3.4.2. DFAS is required to enter transactions with Treasury into the new and existing cash flow files and coordinate any reamortization schedules with the Services before substitution into the cash flow files.

3.7.4. **Federal Credit Budget (OMB MAX Schedules).** For all privatization projects that have been awarded and those planned for award in the President’s Budget, the Components shall provide the relevant investment and credit financing data required for the preparation of credit financing schedules.

In October, OUSD (Comptroller) MPC Directorate will forward the annual Federal Credit Budget Data Call and template to the Services for review and completion by early November. This data will be used to update the MAX schedules for the FHIF Program, FHIF Financing for Direct Loan, and FHIF Financing for Loan Guarantee accounts.

3.7.4.1. A separate list by Component and FY will include, the installation name, state, type of financing, total number of end-state units in the privatized project (breakout total units
conveyed, renovated, replaced, and/or new/added units, total scored amount for each type of financing, and source of funds. The source of funds will be broken out by FY of funds, account (new construction or construction improvements, etc.), project name and amount.

3.7.4.2. Cash flows for future new direct or guaranteed loans will also be required. The completed template and cash flows should be provided, electronically, to OUSD(C) MPC Family Housing by the November deadline.

3.7.5. Credit Supplemental Reporting (CSR). In October, OUSD (Comptroller) MPC Directorate will forward the annual Credit Supplemental Reporting Data Call and template to the Services for completion by early November.

3.7.5.1. Additional project information, such as, subsidy percentage, financing, defaults, average contractual loan maturity (in years), average contractual loan interest rate, maximum grace period (in years) and other data is required to update the CSR for the President’s Budget.

3.7.5.2. The completed template shall be provided, electronically, to OUSD (Comptroller) MPC Family Housing by the November deadline.

3.8 Unaccompanied Housing (060308)

3.8.1. Purpose

3.8.1.1. This section prescribes instructions for the preparation and submission of budget exhibits related to Unaccompanied Housing (UH). These exhibits are to be included in the unaccompanied housing section of the Military Construction Budget Estimates for OSD and OMB. They are not required to be included in the President’s Budget justification books for Congress but will still need to be updated and provided to OUSD (Comptroller), Directorate for Military Personnel and Construction, separately.

3.8.1.2. Similar to Family Housing, the ultimate goal is to have UH at 90% Q1/Q2 adequacy for U.S. and Foreign. As such, UH exhibits have been developed to support the two UH performance goal and targets, one for U.S. and the other for Foreign.

3.8.2. Submission Requirements

3.8.2.1. The UH-1a/1b Exhibits – “Inventory and Condition of Government-owned Unaccompanied Housing (UH).” These budget exhibits are based on facility condition (Q-Ratings). Additional information on Q-Ratings is available in OSD AT&L memorandum of September 5, 2007, “Facility Quality Rating Guidance”; and the GSA Guidance for Real Property Inventory Reporting. All Government-owned UH inventory should be reflected in this exhibit, including transitional UH.

3.8.2.1.1. UH-1a Exhibit - “Inventory and Condition of Permanent Party, Government-owned Unaccompanied Housing (UH)”. The two DoD Performance Goals are to have 90% of Government-owned, Permanent Party UH bedrooms: 1) in the United States (CONUS plus Hawaii and Alaska) at Q1-Q2 adequate levels by FY 2017, and 2) for the foreign locations (includes
U.S. Territories) at Q1-Q2 adequate levels by the end of FY 2017. Inventory counts and Q-Ratings should be consistent with the SNaP and Real Property Inventory databases. This includes Facilities Analysis Categories, 7210 – Enlisted UH, and 7240 – Officer UH.

3.8.2.1.2. UH-1b Exhibit – “Inventory and Condition of Training/Mobilization, Government-owned Unaccompanied Housing (UH).” At this time, there are no DoD Performance Goals associated with Training and Mobilization UH. This includes Facilities Analysis Categories, 7213 – Student UH, 7214 – Annual Training/Mobilization UH, and 7218 - Recruit/Trainee UH.

3.8.3. UH-2 Exhibit – “Configuration and Privacy of Permanent Party Unaccompanied Housing (UH).” This budget exhibit was created to capture the Services’ configuration standard design, their range of various configurations in use, the privacy of assigned members (number of personnel who are sharing a bedroom or living on ship), and the Services’ plans for improvement in these areas. At this time, there are no DoD Performance Goals associated with configuration and privacy. However, the Services are requested to provide their own specific configuration and privacy standards and goals, and implementation plans, including timelines.

3.8.4. UH-3 Exhibit – “Summary of Military Construction Unaccompanied Housing Projects”. This UH project list should match information already provided in Program/Budget submissions and related DD Form 1391s (Military Construction Project Detail).

4.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (0604)

4.1 Purpose (060401)

This Section presents the justification book organization and the exhibit requirement for submission to Congress. Examples of budget exhibits can be found in Section 5.0, below.

4.2 Organization of Justification Book (060402)

4.2.1. Justification material will be entitled:

   Supporting Data for Fiscal Year
   20BY Budget Estimates
   Descriptive Summaries

4.2.2. The budget justification book will be divided into sections, organized as shown on the following pages.

   1. Organization

   2. Table of Contents and Summary Data

   3. The summary data will include a state list of all major, minor and family housing construction projects.
Section 1 Special Program Considerations

This section will include the following topics with a short narrative or summary table, and other special interest items as applicable.

- Facilities Funded Through Other Than Military Construction
- Pollution Abatement Program
- Energy Conservation Program
- Drug Interdiction Program

Section 2 Budget Appendix Extract

Legislative Language

Section 3 Installation and Project Justification Data

DD Forms 1390 and 1391

Section 4 Architectural and Engineering Services and Construction Design

Section 5 Unspecified Minor Construction

Section 6 Defense Access Roads

Section 7 Family Housing

Section 8 Homeowners’ Assistance (Army Only)

Section 9 Long-Term Facilities Contracts

Section 10 Working Capital Fund Capital Construction

4.2.3. The volume will be organized by state/country and location. Projects should be shown in precisely the same order as they appear in the State List portion of the Construction Annex (C-1).

4.2.4. All construction line items included in the funding program in support of the total obligational authority for the Military Construction appropriations in the President’s Budget will be summarized on Installation and Project Justification Data, DD Forms 1390 and 1391/1391C. In addition to data provided on DD Forms 1390 and 1391, justification books submitted to the House and Senate Appropriations, the House Armed Services Committee, and the Senate Armed Services Committees in support of Military Construction Program requests will contain supplemental data prepared in the formats prescribed below on the reverse of DD Form 1391. The Guard and Reserve Forces will use a DD Form 1390S continuation page in lieu of DD Form 1390. All forms required for a project will be grouped and combined in the same book arranged in category code order within state and station.
4.2.5. Section 5 will include an exhibit entitled “Long-Term Facilities Contracts,” separately listing projects proposed under *Title 10 United States (U. S. C.), Sections 2809 and 2812* authorities, arranged in the same order as they would appear in the State list portion of the Construction Annex (C-1). This exhibit will be followed by the DD Forms 1390 and 1391 for each new project proposed. The section will also include a special financing table reflecting both prior approved long-term facility contracts and new requests, as specified in Section 3.1.2.7, above.

4.2.6. Section 5.2 contains detailed instructions for preparation of DD Forms 1390 and 1391/1391C. Detailed instructions for preparation of the supplementary justification material are given in Section 4.5, below. The following additional instructions apply:

4.2.6.1. In addition to other data requirements, components are required to indicate on the DD Form 1391C for each individual project a statement indicating whether or not an economic analysis has been utilized in evaluating the project. In those instances where an economic analysis has not been prepared, a statement is required indicating why such analysis is not applicable or pertinent.

4.2.6.2. Lump-sum requests for a number of construction projects at a single location or for related projects at several locations will not be considered.

4.2.6.3. Projects associated with intelligence or intelligence-related operations will be so identified. Block 5, Program Element, DD Form 1391, will include the annotation NIP or MIP as appropriate.

4.2.6.4. All DD Forms 1391 should include a name and phone number of the civil engineer at the installation responsible for the requested project. This information should be displayed in the bottom left hand corner on the last page of the 1391.

4.2.6.5. The budget submission should include the Restoration and Modernization (R&M) unfunded requirement at all installations for which there is a requested construction project. This information is to be provided as subsection c. in block 9 of the DD Form 1390 (Block 10 for the Guard and Reserve 1390s) under the heading, “R&M Unfunded Requirement.” In addition, for all unaccompanied housing project requests, the DD Form 1391 is to show all unaccompanied housing R&M conducted in the past 2 years (BY-2 and BY-1) and all future R&M requirements (defined as R&M funding for unaccompanied housing included in the FY DP years) for unaccompanied housing at that installation. This information should appear as the last data in the DD Form 1391 under the heading “BY-2 Unaccompanied Housing R&M Conducted," "BY-1 Unaccompanied Housing R&M Conducted," and "Future Unaccompanied Housing R&M Requirements."

4.2.7. *Justification Book Covers and Binding of Data*

4.2.7.1. Justification materials will be provided on 8-1/2” x 11” white paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with Acco fasteners. Material is to be printed on both sides of the page using 1” margins. The DD Form 1390 should be printed on white paper, not on yellow paper as previously required.
4.2.7.2. Separate justification books will be prepared for those projects which require classified information on the DD Forms 1390 and 1391/1391C.

4.2.7.3. The individual Defense Agencies will submit either originals of DD Forms 1390 and 1391/1391C, or copies of a quality suitable for printing. These are to be used for preparation of consolidated justification books for submission to congress. These submissions are not to be punched or bound. Pages are not to be numbered. Covers are not required. One complete set of each is to be delivered to the OUSD (Comptroller), Directorate for Military Personnel and Construction; and the ODUSD/Installations and Environment.

4.2.7.4. Each justification book (and each submission of the Defense Agencies described in paragraph 4.2.7.3, above) is to include an index of installations and projects by state and country, arranged alphabetically, in precisely the same order as the projects appear in the State List portion of the Construction Annex (C-1).

4.3 Submission of Military Construction Justification Books (060403)

4.3.1. Review by OSD. Before the justification material can be released by the Military Departments to the Congress, it must be reviewed by USD (Comptroller) to assure that policies and decisions made by the President and Secretary of Defense are fully reflected. Justification material prepared by the individual Defense Agencies will be submitted to USD(Comptroller) as requested for preparation of consolidated justification books for submission to the Committees on Appropriations.

4.3.2. Security Clearances. Each Military Department will be responsible for the clearance of its justification books through OSD Security Review. OUSD(Comptroller) will be responsible for the clearance of the Defense Agencies justification books through OSD Security Review.

4.3.3. Number of Copies. Three advance sets of justification books will be forwarded for review to the Directorate for Military Personnel and Construction, OUSD(Comptroller), Room 3C654, Pentagon. See Volume 2A, Chapter 1 for the detailed instructions on number of copies and distribution of printed material.

4.3.4. Instructions for Preparation of Supplemental Justification Data in Support of Annual Military Construction Programs. Each data requirement shall be filled in as appropriate including negative responses to indicate that the item has been addressed.

4.3.4.1. Instructions for Preparation of Summary Lists. Each Military Service and Defense Agency shall prepare a State List and an Installation List. These lists shall include every project for which funds have been requested.

4.3.4.2. Instructions for Preparation of DD Form 1390 Supplemental Installation Data. The following data shall be provided in an appropriate place on DD Form 1390:

4.3.4.2.1. Outstanding Pollution and Safety (OSHA) Deficiencies
4.3.4.2.1.1. Air Pollution. Enter cost of all air pollution abatement projects for the out years. Do not include cost of budget year projects.

4.3.4.2.1.2. Water Pollution. Follow instructions for Air Pollution, 4.3.4.2.1.1., above.

4.3.4.2.1.3. Safety and Occupational Health Deficiencies. Follow instructions for a.1 above and use definitions cited in Section 060403 above for this data.

4.3.4.3. Instructions for Preparation of DD Form 1391 Supplemental (Facility) Data. The following data shall be provided for each facility in the program using the back of standard DD Form 1391.

4.3.4.3.1. Design Data (Estimates)

4.3.4.3.1.1. Status

4.3.4.3.1.1.1. Enter date design was started (i.e., date when all appropriate design contracting procedures have been completed and the designer directed to proceed with design).

4.3.4.3.1.1.2. Enter the percent of design completed as of January 1, of the year in which the budget is submitted to the Congress (e.g., January 2, 2000, for FY 2001 projects).

4.3.4.3.1.1.3. Enter date design expected to be 35% completed.

4.3.4.3.1.1.4. Enter date design will be completed (i.e., date when all reviews will be completed and construction contract ready for advertising).

4.3.4.3.1.1.5. Include the annotation “parametric estimates have been used to develop project cost” if the cost estimate is based on parametric estimates in lieu of the traditional 35% design.

4.3.4.3.1.1.6. Enter the type of design contract (design-bid, design-bid-build, or other, if other, provide a brief description of the design contract.

4.3.4.3.1.1.7. Indicate whether an energy study and a life-cycle analysis was performed in support of the design of the proposed facility.

4.3.4.3.1.2. Basis

4.3.4.3.1.2.1. Indicate whether or not design is based on a standard or definitive design.
4.3.4.3.2. If answer to (a) is affirmative, indicate where design was previously used.

4.3.4.3.1.3. **Total Design Cost.** Indicate total federal cost (all costs to be charged to planning and design accounts) as follows:

- **4.3.4.3.1.3.1.** Cost of the production of plans and specifications (those costs included within the 6 percent statutory cost limitations).
- **4.3.4.3.1.3.2.** All other costs of design.
- **4.3.4.3.1.3.3.** Total Cost (a + b or d + e).
- **4.3.4.3.1.3.4.** Amount of cost estimated to be spent on contracts.
- **4.3.4.3.1.3.5.** Amount of cost to be spent in-house (total cost if design is all within house; overhead and administration costs if design is contracted out, or other breakout).

4.3.4.3.1.4. **Construction Contract Award Date.** Indicate month and year the contract is planned to be awarded to the construction firm.

4.3.4.3.1.5. **Construction Start Date.** Indicate month and year construction is planned to start.

4.3.4.3.1.6. **Construction Completion Date.** Indicate month and year construction is planned to be completed.

4.3.4.3.2. **Equipment Associated with This Project Which Will be Provided From Other Appropriations**

List only those items which support the cost shown in Block 9 of the DD Form 1391, for Equipment Provided from Other Appropriations. Enter the equipment nomenclature, procuring appropriation, fiscal year in which the equipment was appropriated or is to be requested and the cost in thousands of dollars.

4.3.4.3.3. **Working Capital Fund Projects.** DD Form 1391’s submitted in support of Working Capital Fund Capital Budget requirements will be labeled as such in Block 4, above the project title.
4.3.5. FYDP Project Listing. Military Construction/Family Housing Outyear Project Data will be submitted via the Automated Construction Program (C-1 Annex) at the time program and budget submissions are due to OSD for review. Additional guidance on the Automated Construction Program is provided in Volume 2A, Chapter 1, section 010504. Construction data elements and record formats for the Automated Construction Database are prescribed on the Secret Internet Protocol Router Network (SIPRNET) of the OUSD (Comptroller). The out year project data exhibits for the Active Forces will not be included in the justification books provided to Congress. However, the justification book for each component of the National Guard and Reserve, as well as the Defense Agencies will contain a listing of all projects that are funded in the FYDP.

4.4 Submission of Family Housing Justification Books (060404)

4.4.1. Family Housing Justification, Military Departments. The format for the Congressional justification books for Family Housing will be identical to that detailed in Section 060302, above for the budget estimates, with the following exceptions:

4.4.1.1. Submission Requirements. Family Housing Congressional justification material will be submitted with the Military Construction justification books for each military department. The Family Housing material should follow that provided for Military Construction. (See Section 03.2.2.2.2, above)

4.4.1.2. DD Form 1390, Military Construction Program. Form will be prepared in accordance with section 5.2, below. One form is required for each location. Personnel data should be based on latest approved totals for the installation or area. Inventory data should include only Family Housing assets. The form should be printed on white paper and should precede the DD Form 1391.

4.4.1.3. Tri-Service Family Housing Cost Model. This form is not required. (See subparagraph 3.2.2.5.2.3, above).

4.4.1.4. Civilian Personnel Costs -- Exhibit OP-8. This form is not required. (See subparagraph 060302B.9.b.(2), above).

4.4.1.5. Furnishings Summary -- Exhibit FH-3. This form is not required. (See subparagraph 3.2.2.10.1, above)

4.4.1.6. Family Housing Privatization Comparison – Exhibit FH-6-BES. This exhibit shall not be included in the President’s Budget. Instead, include the FH-6 Family Housing Privatization exhibit.

4.4.1.7. Submission by Department of the Army Only. Since the Department of the Army has been designated as the executive agent to execute the Homeowners’ Assistance Program for the DoD, only the Department of the Army will submit justification material as described in Section 3.3, above.
4.4.2. Family Housing Justification, Defense Agencies

4.4.2.1. Component Responsibilities. Separate justification material, in the format described in Section 3.2, above and similar to that specified above for the Military Departments, will be provided by the individual Defense Agencies. The submissions will provide separate Construction, O&M, and Leasing exhibits, as appropriate, for Defense Intelligence Agency, Defense Logistics Agency, and National Security Agency.

4.4.2.2. Consolidation and Review by OSD. Original pages of justification material prepared by the individual Defense Agencies will be submitted to the Directorate for Military Personnel and Construction, OUSD (Comptroller) Program/Budget, Room 3C654, as requested by the call letter for the preparation of consolidated justification books for submission to the Congress. One copy of the justification material should be submitted concurrently to the ODUSD (Installations and Environment).

4.4.2.3. Justification Material Format. Justification material submitted by the Defense Agencies will be unbound. Covers are not required. Pages will not be numbered. All data will be provided on 8-1/2 inch by 11 inch paper, typed across the short dimension of the paper with 1 inch margins, except for the FH-2, and FH-4 exhibits, which will be typed across the long dimension.

4.4.2.4. Classification. All justification material will be unclassified.

4.5 Submission of Justification Books for the Homeowners’ Assistance Fund, Defense Appropriation (060405)

4.5.1. Organization of Justification Books. Justification data will include items detailed in Section 3.3, above for the budget estimates. Material will be incorporated as the final section of the Army’s military construction/family housing justification book.

4.5.2. Submission by Department of the Army Only. Since the Department of the Army has been designated as the executive agent to execute the Homeowners’ Assistance Program for the Department of Defense, only the Department of the Army will submit justification data.

4.5.3. Review by OSD. Before the justification material can be released to the Congress, it must be reviewed by the USD(Comptroller) to assure that policies and decisions made by the President and Secretary of Defense are fully reflected.

4.5.4. Security Clearances. The Department of the Army will be responsible for obtaining clearance of the justification book through OSD Security Review.

4.5.5. Number of Copies. See Volume 2A, Chapter 1, section 010401 for instructions on the number of copies required and the distribution.
5.0 MILITARY CONSTRUCTION/FAMILY HOUSING APPROPRIATION SUBMISSION FORMATS (0605)

5.1 Purpose (060501)

The formats provided on the following pages reflect guidance presented in previous sections of the chapter. Unless modified in a submission budget call, these formats should be adhered to.

5.2 Exhibits in Support of Section 3.1 - Budget Estimates Submission/ Military Construction (060502)

- DD 1390 Military Construction Program ................................................................. 56
- DD1390S/1 Guard and Reserve Military Construction .............................................. 59
- DD 1391/1391C Military Construction Project Data ............................................... 63
- MC-1 Implementation of Major Initiatives ............................................................. 72
- MC-2 Guard and Reserve Joint Military Construction Project ............................. 73

5.3 Exhibits in Support of Section 3.2 - Budget Estimates Submission/ Family Housing (060503)

- DD 1390 Military Construction Program ................................................................. 56
- DD1390S/1 Guard and Reserve Military Construction .............................................. 59
- DD 1391/1391C Military Construction Project Data ............................................... 63
- MC-1 Implementation of Major Initiatives ............................................................. 72
- Exhibit FH-1 Tri-Service Family Housing Cost Model ........................................ 74
- Exhibit FH-2 Family Housing O&M ....................................................................... 75
- Exhibit FH-3 Furnishings Summary ....................................................................... 76
- Exhibit FH-4 Analysis of Leased Units ................................................................... 78
- Exhibit FH-5 General and Flag Officer Anticipated Expenditures ........................ 79
- Exhibit FH-6 Family Housing Privatization ............................................................ 80
- Exhibit FH-6 BES Family Housing Privatization Comparison .............................. 81
- Exhibit FH-8 Inadequate Family Housing Elimination ........................................ 82
- Exhibit FH-9 General and Flag Officers Expenditures .......................................... 83
- Exhibit FH-10 GFOQ 6,000 NSF Units for FY 2XXX ............................................ 84
- FH 11 Inventory and Condition Gov’t-Owned, Family Housing ....................... 85
- FH-12 Privatized GFOQ O&M Cost Incurred Exceeding $50K ........................... 88
- FH-13 Detail of Awarded Family Housing Privation Projects ................................ 89
- FH-14 FHF Admin Requirements ........................................................................ 90
- FH-15 Reestimate Cash Flow ............................................................................... 93
- OP-5 (Part 2) Attachment 1: Reconciliation of Increases and Decreases .......... 94

5.4 Exhibits in Support of Section 3.3 - Budget Estimates Submission/ Homeowners Assistance (060504)

- Exhibit HA-1 Homeowners Assistance - Workload and Obligation Data ........ 97
- Exhibit HA-2 Homeowners Assistance Status of Accounts .............................. 99
- Exhibit HA-3 Homeowners Assistance Work Unit Data ..................................... 100
- Exhibit HA-4 Homeowners Assistance Program and Financing ....................... 100

6-53
5.5 Exhibits in Support of Section 3.4 - Budget Estimates Submission/ NATO Security Investment Program (060505)

NSIP -1 NSIP Project Data ........................................................................................................101
NSIP-2 Recoupment Estimates ..............................................................................................102

5.6 Exhibits in Support of Section 3.7 - Budget Estimates Submission/Unaccompanied Housing (060506)

UH-1a Inventory and Condition of Permanent Party, Government-owned, UH .....103
UH-1b Inventory and Condition of Training/Mobilization ..............................................106
UH-2 Configuration and Privacy of Permanent Party (UPH) .................................109
UH-3 Summary of Military Construction UH Projects.................................................110

---

DD 1390 Military Construction Program

(Page 1 of 4)
Instructions for Preparation of DD Form 1390, “FY Military Construction Program”

The DD Form 1390 will be used by the active services to list the projects proposed for inclusion in the Military Construction Program, including requests for (1) new authorization; (2) funding of new authorization; and (3) funding of prior years’ authorization. The Guard and Reserve Forces will use a DD Form 1390s instead of the DD Form 1390.

Instructions for preparation of DD Form 1390 follow:

**Items 1 and 2 - Component and Date:** Self-explanatory. Date prepared or the date the budget justification material is due to OSD.

**Item 3 - Installation and Location:** Enter the official name of the installation. Enter the name of the state if within the United States or the name of the country or island chain if outside the United States. In the case of Guard and Reserve facilities, enter the city and state if the facility is not to be constructed on a military installation. Use “classified location” only when necessary to meet security classification guidelines.

**Item 4 - Command:** Enter the name of the host major command responsible for management control of the installation.

**Item 5 - Area Construction Cost Index:** Enter the construction cost index used in estimating the cost of the project(s). Consult the latest guidance published by DUSD(I).

**Item 6 - Personnel Strength:** Enter personnel strengths for permanent, student, and support activities. Include transient personnel where applicable.

a. As of: Enter September 30 of the year of submittal to OSD.

b. End FY 20__: Enter end of the budget year, plus 5 years.

**Item 7 - Inventory Data ($000):**

a. Total Acreage: Enter the number of acres owned and/or leased by the Government, under accountability of the Military Department concerned, as shown in the latest Inventory of Military Real Property.

b. Inventory Total As Of September 30 __: Enter the date and the current real property inventory total (except land rent). These totals should include inventory amounts for family housing.

c. Authorization Not Yet In Inventory: Enter the amount of funded and unfunded authorization for the construction of facilities or acquisition of land which have not been included in the September 30 Inventory of Real Property. This amount will include only such authorization as is related to either the Military Construction Program or the Family Housing Program as the case may be.
Instructions for Preparation of DD Form 1390 (Continued)

d. **Authorization Requested In This Program:** Enter the total cost for construction and land acquisition being requested for authorization in the budget year.

e. **Authorization Included in Following Program:** Enter the total estimated cost of construction and land acquisition required for authorization for the program year following the budget year.

f. **Planned in Next Three Program Years:** Enter the total estimated cost of construction and land acquisition required for the three years beyond the budget year and following year programs (i.e., second, third, and fourth years beyond the budget year). This amount should agree with the data used in the preparation of the military construction or family housing estimates contained in the Future Years Defense Program.

g. **Remaining Deficiency:** Enter the total estimated cost of construction and land acquisition required for existing facilities deficiencies remaining beyond the three program years covered in 7.f., above.

h. **Grand Total:** Enter the total of items 7.b. through 7.g.

**Item 8 - Projects Requested In This Program:** Installation or activity projects for the budget year shall be listed individually with attendant information provided in the appropriate column. Both major and minor construction projects are to be included as shown on the sample form.

a. **Column 1 - Category Code:** Enter the applicable category code consistent with the category code shown in Item 6 of the DD Form 1391 for the project.

b. **Column 2 - Projects Title:** Enter the project title consistent with the title shown in Item 4 of the DD Form 1391.

c. **Column 3 - Scope:** Enter the same quantity shown in Item 9 of the DD Form 1391, “Cost Estimates,” and include the unit of measure (e.g., SM, SY, LF, PR, EA, CY, etc.). Immediately following or directly beneath the metric quantity and unit of measure, parenthetically include the English quantity and measurement. In those instances where a specific quantity cannot be satisfactorily identified, enter LS for lump sum.

d. **Column 4 - Cost ($000):** Enter the project cost consistent with the cost shown in Item 8 of the DD Form 1391. If two or more projects are listed, enter the total in this column, and use this figure in Item 7.d., above.

e. **Column 5 - Design Status:** Enter the most accurate possible dates for the start and completion of design using numerals (e.g., 6/94, 11/95).

**Item 9 - Future Projects:**

a. **Included in Following Program (FY__)**: List all installation projects regardless of the number and include columnar data comparable to that provided in Item 8 but leave design status blank.
Instructions for Preparation of DD Form 1390 (Continued)

b. Planned Next Three Years: List projects planned for next three years in 9.b. and include columnar data comparable to that provided in Item 8 but leave design status blank. The total costs of the projects listed under Items 9.a. and 9.b. should be identical to the entries under Items 7.e. and 7.f., respectively. If additional space is required to list all projects under Items 9.a. and 9.b., a separate sheet of paper should be utilized.

c. Also include the R&M unfunded requirement in this block under the heading “R&M Unfunded Requirement.”

**Item 10 - Mission or Major Functions:** Enter the principal types of peacetime units and/or functions assigned or scheduled for assignment to the installation that require facilities or substantially contribute to the base population. Also enter the current mission stating precisely what the activity will do and list the major functions performed. All entries should address the time period shown in Items 6.a. and 6.b.

**Item 11 - Outstanding Pollution and Safety Deficiencies ($000):** List all projects included in the budget request and planned for the next three years that are programmed for outstanding pollution and safety deficiencies. Use the format in Item 8.

**Notes:**

1. Space requirements for Items 8, 9, 10, and 11 may vary. Therefore, remaining space on the DD Form 1390 may be utilized as necessary for the specific entries and continued on a separate sheet of paper. A solid black line should be used to set Items 8, 9, 10, and 11 apart and individual item titles and subheadings should be added.

2. Projects that were authorized (but not appropriated) in prior years will be listed in the same manner as projects for which new authorization is requested. The fiscal year in which the project was authorized will be shown after the project title in Item 8.

DD FORM 1390s, 1 DEC 76 Previous editions may be used.  Page No DD1390S/2 Guard and Reserve Military Construction
Instructions for Preparation of DD Form 1390s, “FY__ Guard and Reserve Forces Military Construction”

The DD Form 1390 will be used by the Guard and Reserve Forces to supplement the data entered in the DD Form 1391, FY 19__ Military Construction Program.

Instructions for preparation of DD Form 1390s follow:

**Item 1 - Component:** Enter the specific Guard or Reserve Forces component of the active services. Recognized abbreviations such as ARNG (Army National Guard); ANG (Air National Guard); etc., are acceptable.

**Item 2 - Date:** Date prepared or the date to OSD.

**Item 3 - Installation and Location:** For facilities not located at DoD installations or commercial airfields, enter the name of the city and State in which the projects are located. For other facilities, enter the name of the DoD installation and its geographical location to the extent that it is not included in the installation name.

**Item 4 - Area Construction Cost Index:** Enter the construction cost index used in estimating the cost of the project(s). Consult the latest guidance published by DUSD(IA&I).

**Item 5 - Frequency And Type Of Utilization:** Enter the type of utilization (e.g., weekend drill, weeknight drill, unit training activities, annual active duty for training, etc.) and indicate number of days the installation is used per month/year, as appropriate.

**Item 6 - Other Active/Guard/Reserve Installations Within 15 Mile Radius:** List the nearest six existing Active and existing or programmed (within the next five years) Reserve component facilities and their distances, within a fifteen mile radius of the proposed construction site. If no facilities exist within the fifteen mile radius, identify the three closest installations. Indicate the year the facilities were constructed and the size of the facility.

**Item 7 - Projects Requested In This Program:** Installation or activity projects for the budget year shall be listed individually with attendant information provided in the appropriate column. Both major and minor construction projects are to be included.

a. **Column 1 - Category Code:** Enter the applicable category code consistent with the category code shown in Item 6 of the DD Form 1391.

b. **Column 2 - Project Title:** Enter the project title consistent with the title shown in Item 4 of the DD Form 1391.

c. **Column 3 - Scope:** Enter the same quantity shown in Item 9 of the DD Form 1391, Cost Estimates, and include the unit of measure (e.g., SM, SY, LF, PR, EA, CY, etc.). Immediately following or directly beneath the metric quantity and unit of measure, parenthetically include the English quantity and measurement. In those instances where a specific quantity cannot be satisfactorily identified, enter LS for lump sum.
Instructions for Preparation of DD Form 1390s, “FY__ Guard and Reserve Forces Military
Construction” (Continued)

d. Column 4 - Cost ($000): Enter the project cost consistent with the cost shown in Item 8 of
the DD Form 1391. If two or more projects are listed, enter the total in this column. In the
case of Army National Guard projects where part of the financing is from other than Federal
sources, enter only the Federal share.

e. Column 5 - Design Status: Enter the most accurate possible dates for the start and
completion of design using numerals (e.g., 6/94, 11/95).

Item 8 - State Guard/Reserve Forces Facilities Board Recommendations (Date): Enter the
following statement “facilities identified in Item 6 have been examined by the State Reserve
Forces Facilities Board for possible joint use/expansion. The Board recommendations are
." (Note: Project folders will contain justification data to support the recommendation.)

Item 9 - Land Acquisition Required (Number of Acres): Enter the acreage required for the
project and the method of acquisition (e.g., fee, title, donation, lease, etc.). For all projects
involving land acquisition, a site survey must be conducted in accordance with DoD Directive
1225.5 and the following statement must be entered, either in Item 9 or Item 10: “Site survey
has been completed and site is suitable for constructing the proposed project at the estimated
cost indicated.”

Item 10 - Projects Planned In Next Four Years: Enter the Project Title and Estimated Cost for
projects planned at the installation identified in Item 3 for the next four years beyond this
program year. A maximum of five projects should be identified. For armory-type projects,
list those facilities which are programmed for replacement within the next four years within a
fifteen mile radius of the proposed project as well as the year the facilities were constructed.
If none are planned, so indicate. Items shall contain columnar data comparable to that
provided in Item 7 with the exception of design status which should be left blank. Also include
the restoration and modernization (R&M) unfunded requirement in this block under the
heading “R&M Unfunded Requirement.”

Item 11 - Personnel Strength As Of _____: In the appropriate columns, enter the number of
authorized and actual personnel at this facility as of six months prior to project submission.

Item 12 - Reserve Unit Data: List the designated units assigned and/or scheduled to be trained
in the requested facilities. Enter the corresponding authorized and actual strengths of each
unit, indicating actual strength as of the date listed in Item 11.

Item 13 - Major Equipment and Aircraft: List the vehicular and/or other large equipment and
aircraft which are to be accommodated at the installation and which have a bearing on the type
and/or scope of the facility requirement. When vehicle maintenance shops are being
requested, the Weighted Equipment Density (WED) for the vehicles to be maintained will be
included in this item.

Instructions for Preparation of DD Form 1391/1391C “FY _Military Construction Project Data”

1. The DD Form 1391 will be used, as applicable, by the Active, Guard, and Reserve Forces to support each project proposed for inclusion in the Military Construction Program. This includes both new authorization projects in the program as well as urgent unforeseen projects using emergency or contingency authorization. This form will also be used to transmit supporting data for the following types of projects:
   b. O&M type projects required to be submitted to OSD in accordance with the provisions of DoD Directives 4270.36, 1225.7 and 4165.6.
   c. Nonappropriated fund construction projects requiring OSD concurrence or approval.
   d. Family housing projects.

2. The continuation sheet (DD Form 1391c) will be used as required for explanation of the requirement for the project (item 11.) and other mandatory statements concerning flood plains and wetlands environmental impact, accessibility to the handicapped, fallout shelters, etc. However, when submitting an annual Military Construction Program, these mandatory statements may be included in the front of the program book.

3. Instructions for preparation of DD Form 1391 are outlined below:
   a. ITEMS 1 and 2 - COMPONENT AND DATE: Self-evident.
   b. ITEM 3 - INSTALLATION AND LOCATION: Enter the official name of the installation. Use code name or designations only when necessary to preclude security classification or when an official name is not available. Enter the name of the State if within the United States or the name of the country or island chain if outside the United States. In the case of Guard and Reserve Forces facilities, enter the city and State if the facility is not to be constructed on a military installation.
   c. ITEM 4 - PROJECT TITLE: Enter the title used in item 8, column 2 of the DD Form 1390, assuring that it corresponds to the category code in item 6.
      
      (1) Except for new construction, the type of work, such as “addition,” “conversion,” “alteration,” or “modernization” shall be used in the title.
      
      (2) Where a single structure is to serve more than one purpose, the title should reflect the predominate use.
      
      (3) The scope of a project or number of buildings involved will not be shown in the title (i.e., and “Enlisted Quarters” project will not be shown as “Two 250 Man Enlisted Quarters.”)
      
      (4) Avoid the inclusion of acronyms.
Instructions for Preparation of DD Form 1391/1391C (Continued)

(5) If a project requires land acquisition estimated to cost in excess of $50,000, the project title will be suffixed with “With Land Acquisition”. Land to be acquired for the construction of several projects or for other purposes shall be programmed as a separate project and identified on a separate DD Form 1391.

d. ITEM 5 - PROGRAM ELEMENT: Enter the appropriate number as it relates to the “Future Years Defense Program,” except when inclusion of this number would require classification of an otherwise unclassified form.

e. ITEM 6 - CATEGORY CODE: Enter the applicable category code using no less than three or more than six digits consistent with item 8, column 1 on DD Form 1390.

f. ITEM 7 - PROJECT NUMBER: Enter the number of the project assigned by the Component concerned. If no number has been assigned, indicate N/A (not applicable).

g. ITEM 8 - PROJECT COST: Enter the estimated cost in thousands of dollars (excluding design except for family housing) for which funding is being requested. The amount indicated should be identical to that shown in item 8, column 4, of the DD Form 1390 and should include the costs of the primary facilities, supporting facilities, contingencies, supervision, inspection, and overhead. Figure will be the Total Request entered in item 9, and will not include the figure entered for “Equipment Provided From Other Appropriations.”

h. ITEM 9 - COST ESTIMATES: This portion of the DD Form 1391 is comprised of several elements which collectively comprise the Total Request. Each element will be identified, quantified, and costed in a series of five column entries as follows:

   (1) Item: Identity of the Primary or Supporting Facility, etc. After each “Item” entry where the metric measurement (square meters) is used in the Unit of Measure column, include in parenthesis the size of the facility in the English measurement (Square Feet).

   (2) U/M (unit of Measure): Each entry in the “item” column will be followed in the “U/M” column by the accepted two-character abbreviation for the unit of measure associated with the quantity of the item concerned (e.g., SM, SY, LF, KV, etc.). Where it is not feasible to show a specific unit of measure, use LS (Lump Sum).

   (3) Quantity: Enter the required number of units of measure comprising the “item” entry. Where “LS” is the unit of measure, enter a dash (-).

   (4) Unit Cost: Enter the appropriate unit cost for each “item” entry where a unit of measure is indicated. Where the unit of measure is “LS” enter a dash in the unit cost column.

   (5) COST ($000):

      (a) Enter the cost, in thousands of dollars, represented by the product of the “Quantity” and “Unit Cost” entries.
Instructions for Preparation of DD Form 1391/1391C (Continued)

(b) When a single primary facility is listed enter the cost of the facility without parentheses. If unusual features or functional areas of the primary facility are listed, the cost of each shall be enclosed with parentheses. The sum total cost of these features shall equal the figure entered for the primary facility.

(c) When more than one primary facility is listed, the cost of each facility will be entered in the cost column without parentheses.

(d) The cost entry for the item “Supporting Facilities” shall be entered without parentheses and shall be the total of the various supporting facilities listed. However, each of the individual supporting facility costs shall be enclosed by parentheses.

(e) The cost entered for items such as “Subtotal,” “Contingency,” “Contract Cost,” “SIOH,” and “Total Request” shall be entered without parentheses. However, the cost for Equipment Provided From Other Appropriations” shall be entered as a nonadd item.

(f) Projects in category Code 500 will have separately identified the equipment purchased for the Surgeons General as “Category Equipment” showing the total cost of such equipment added to the “Total Request”. Labor cost for installation of “Category E” equipment should be included in the unit cost for the primary facility because it is part of the “Total Contract Cost.”

(6) PRIMARY FACILITY: Enter the identity and required columnar data for the primary facility. When the primary facility consists of two or more components the cost of the primary facility will be the sum of the costs of the individual components. In addition, subordinate components will be entered under the primary facility after indenting two spaces.

(a) Normally, the cost of fixed equipment provided as part of the construction contract (e.g., cooling, heating, and electrical systems, etc.) will be included in the cost of the primary facility. However, when the primary facility includes unusual features of significant cost, such as hyperbaric vessels and standby cooling, such features should be identified under the primary facility.

(b) Land acquisition required specifically for the project and estimated to cost $50,000 or more shall be listed in the same manner as an unusual feature. Conversely, land acquisitions estimated to cost less than $50,000 are to be accomplished under 10 U.S.C. 2672 and should not be listed.

(c) For family housing new construction, the entry under primary facility will show the total number of units in the project. As subordinate components to the primary facility “Units to 5’ line,” “GFE,” and “Land Acquisition” will be shown in parentheses in the cost column to add up to the cost of the primary facility shown. “Item 10 will be used to show the numbers and cost computations for the various types of living units which comprise the primary facility.

(d) “Lump-sum” funding requests are prohibited. The only instance for which separate construction projects can be combined under a single DD Form1391 is when each
Instructions for Preparation of DD Form 1391/1391C (Continued)

of the projects is in the same general facility category (i.e., supply facilities, maintenance and production facilities, unaccompanied housing, etc.). Programs such as “facility upgrades,” “ATB Beddown Facilities,” and others combining a number of disparate construction efforts must be justified as separate projects. If it is planned, in execution, to construct several of these projects at a single location under one contract, a statement to that effect should be included in the “Additional” section of Item 10.

(e) Antiterrorism Force Protection/physical security measures: the entry under primary facility will show physical security improvements (e.g. special structural improvements, ballistic glass, etc.). Where land acquisition serves a specific purpose such as stand-off distance for force protection, the acquisition shall be listed as an antiterrorism force protection subordinate component to the primary facility.

(7) SUPPORTING FACILITIES: List those items of construction directly related to and required for the support of the primary facility. Such items should include (a) special construction features (piles, spread footings, seismic, fill, etc.); (b) utilities (gas, oil, steam, electric, and water supply lines as well as sanitary and storm sewers); (c) site preparation; (d) roads, sidewalks, and parking; (e) site improvements (seeding, sodding, landscaping, etc.); (f) antiterrorism force protection/physical security measures such as physical security site improvements (e.g. fencing, perimeter/area lighting, blast mitigation barriers, berms and landscaping, etc.); and (g) demolition. All supporting facility items should be listed in terms of accepted units of measure and quantity whenever practicable. For family housing, design cost will be identified under “Supporting Facilities.”

(8) SUBTOTAL: Enter the sum of the costs shown for all primary and supporting facilities.

(9) CONTINGENCY: Enter the appropriate contingency rate, in parentheses, immediately following the item designation in column 1, and enter the cost equivalent in the proper column.

(10) TOTAL CONTRACT COST: Enter the sum of the “Subtotal” and the “Contingency” costs. In the case of Army National Guard, armory projects which are funded, in part, from other than Federal funds, enter the Federal costs on the first line and the State or other cost on the next line below.

(11) SUPERVISION, INSPECTION, AND OVERHEAD (SIOH): Enter the appropriate SIOH rate in column 1 after the item designation and reflect the cost equivalent in the proper column.

(12) DESIGN/BUILD: For major construction projects where the Design/Build contracting method is planned to be used, the design cost associated with the contract should be included in the Cost Estimates (Block 9) section of the DD Form 1391. The entry “Design/Build – Design Cost” will be used and should appear after the “SIOH” entry and before the “Total Request” entry with the associated cost in the proper column.
Instructions for Preparation of DD Form 1391/1391C (Continued)

(13) TOTAL REQUEST: Enter the sum of the “Total Contract Cost” and the “SIOH”. This figure should be identical to the entry in item 8, “Project Cost ($1000)”. Total request should be rounded-off to provide a more realistic approach to the presentation of MILCON programs. The following guidance is provided for “rounding-off” a projects’ total request:

<table>
<thead>
<tr>
<th>Project (P) Estimate ($000)</th>
<th>Rounding Guidance ($000)</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt; 1,000</td>
<td>Nearest $ 10K</td>
</tr>
<tr>
<td>1,000 to 5,000</td>
<td>Nearest $ 50K</td>
</tr>
<tr>
<td>5,000 to 10,000</td>
<td>Nearest $ 100K</td>
</tr>
<tr>
<td>10,000 to 15,000</td>
<td>Nearest $ 200K</td>
</tr>
<tr>
<td>15,000 to 20,000</td>
<td>Nearest $ 500K</td>
</tr>
<tr>
<td>&gt; 20,000</td>
<td>Nearest $ 1,000K</td>
</tr>
</tbody>
</table>

(14) EQUIPMENT PROVIDED FROM OTHER APPROPRIATIONS: Enter the total cost of equipment which is procured with other than MILCON funds and which is essential to the mission of the facility. DD Form 1391 should reflect only the cost of equipment identified in the Associated Equipment Report. If no such major equipment is associated with the project, enter a “zero” in the appropriate space. Note that this figure is not included in the “Total Request” above. This excludes minor items procured with O&M funds, and in the case of Army National Guard, excludes equipment provided from other then Federal appropriations.

i. ITEM 10 - DESCRIPTION OF PROPOSED CONSTRUCTION:

(1) In a clear and concise manner, provide a complete outline of all principal features of the work and its correlation with the various data entered in item 9.

(2) State whether or not the proposed construction is in compliance with applicable antiterrorism force protection measures and antiterrorism force protection standards.

(3) Begin with an accurate description of the primary facility. For buildings, indicate the materials planned to be used for the frame, walls, roof, and foundations, and identify the major functions for which space is being provided. For structures other than buildings, describe each major element required to produce a complete and usable facility. Avoid the use of generalities such as “most economical means” or “modern methods and materials.”

(4) Provide only such additional descriptive details as are necessary for clarity.

(5) Identify and list the buildings or structures to be demolished in connection with the proposed construction, if applicable.

(6) For single person quarters projects, indicate the grade mix of personnel, officer or enlisted, who will occupy the facilities.
Instructions for Preparation of DD Form 1391/1391C (Continued)

(7) For projects involving additions, alterations, or conversions, describe the changes to be made.

(8) At the last entry in item 10, indicate the amount of air conditioning required (e.g., air conditioning - 15 tons).

j. ITEM 11 - REQUIREMENT: This portion of the DD Form 1391 is comprised of seven elements which are to be set forth in the following format:

(1) Immediately after the item title “Requirement” indicate, in appropriate units of measure, the total facility requirement (e.g., 5,500 SM), followed by two additional entries giving the status of the existing facility (e.g., adequate: 66,134 SF; substandard: -0-).

(2) PROJECT: Provide a one-sentence statement indicating what this project provides.

(3) REQUIREMENT: Provide detailed, informative statements as to precisely why the project is needed. Use positive statements to support the requirement and avoid the use of such words as “inadequate,” “uneconomical,” and “necessary” unless they are fully explained. Similarly, when identifying contributing factors, assure that the presentation leaves no pertinent questions unanswered (e.g., vulnerability to terrorist threats (reference threat/vulnerability assessment); excessive maintenance (show cost comparison); self-liquidation (show amortization); or advanced deterioration (describe effects)). The requirements must establish maximum utilization of existing facilities and identify alternatives considered, along with reasons for their rejection. If the project is a result of the Integrated Global Posture and Basing study, include the phrase, “This project is associated with the global Defense posture changes”.

(4) CURRENT SITUATION. Describe how and under what conditions the requirement is presently being met. Comments should support the stated requirement and include the identity and description of current assets as well as the reason they are considered unsuitable for continued use. For Guard and Reserve Forces projects which are to replace existing facilities, identify and describe the disposition to be made of them. Similarly, for Guard and Reserve Forces facilities to be constructed and/or utilized jointly with other Guard/Reserve components, include pertinent information and status of coordination or negotiations.

(5) IMPACT IF NOT PROVIDED. Describe the manner and extent to which mission accomplishment would be affected if the project were not approved.

(6) ADDITIONAL. If the project is justified on an economic basis (primary economic analysis), so state and indicate the projected payback period. As a minimum, all renovation, upgrade, and replacement projects must be supported by an economic analysis. For all other projects, state precisely why a primary economic analysis cannot be applied to the project. When providing supporting documentation for the OSD budget submission, enter appropriate statements on commercial/industrial operations in accordance with the DD OMB Circular A-76 and as required by applicable DoD Instruction. Entry of this information on the DD 1391 or on a separate DD 1391c is optional. For all overseas projects, state whether or not the project is eligible for NATO Infrastructure or other host nation funding.

1391/1391C (Page 8 of 9)
Instructions for Preparation of DD Form 1391/1391C (Continued)

(7) JOINT USE CERTIFICATION. Include the following certification: “The (enter the title of the certifying official) certifies that this project has been considered for joint use potential. Joint use construction is recommended.” Or “The (enter the title of the certifying official) certifies that this project has been considered for joint use potential. Unilateral construction is recommended. The reasons for this recommendation are…” The Joint Use Certification is not required for family housing construction projects.

(8) For all unaccompanied housing project requests, the DD Form 1391 is to show all unaccompanied housing restoration and modernization conducted in the past 2 years (BY-2 and BY-1) and all future R&M requirements (defined as R&M funding for unaccompanied housing included in the FYPD years) for unaccompanied housing at that installation. This information should appear as the last data in the DD Form 1391 under the heading “BY-2 Unaccompanied Housing R&M Conducted,” “BY-1 Unaccompanied Housing R&M Conducted,” and “Future Unaccompanied Housing R&M Requirements.”

NOTE: Space requirements for items 10 and 11 will vary. Therefore, remaining space on the DD Form 1391 may be used as necessary for the specific entries and continued on a DD Form 1391c as appropriate. A solid, black line should be used to set items 10 and 11 apart, and individual item titles and subheadings should be added.
MC-1 Implementation of Major Initiatives

Implementation of Major Initiatives

Appropriation: ______________________

Major Initiative #: _______(choose from the list below)
Major Initiative Title: _____(should correspond to the number chosen above)

General Description of Major Initiative: (Explain the overall strategic goal.)

Total Budget Year Funding Obligation Plan ($000): ______________________

Budget Year Implementation Plan: Explain what will be accomplished in the budget year to support the initiative. Be specific, including the impact on force structure.

- 001 - Modularity
- 002 – Global Defense Posture (Discontinued)
- 003 – New Mission
- 004 – BRAC - Global Defense Posture (Discontinued)
- 005 – BRAC – Army Modularity (Discontinued)
- 006 – BRAC
- 007 – Family Housing - Global Defense Posture
- 008 – Family Housing – Army Modularity
- 009 – Family Housing - Privatization
- 010 – Family Housing - Other
- 011 – Improve Quality of Life (e.g. Child Care Centers but excluding housing/barracks)
- 012 – Barracks Initiative
- 013 – Replace Aging Facilities
- 014 – Growing the Force – Military Construction

- 035 – Homeport Ashore Barracks Initiative
- 036 – Dorms for Airmen

MC-1 Implementation of Major Initiatives
Instructions:

1. For each joint project, fill in the information above (each project should be identified separately).

2. In the “Funding Requirement” section, enter the amounts that each Component is expected to contribute to the joint project.

3. In the Budgeted Amount” section, enter the amount that has been included in the FY_______ - FY_______ budget submission.

4. All dollars should be in thousands.

Instructions for Preparation of Family Housing Furnishings Summary Exhibit FH-3

**General.** Furnishings to be included in Exhibit FH-3 are defined in Enclosure 6 to DoD Instruction 4165.43. For Unaccompanied Personnel Housing furnishings, see Exhibit OP-21, Chapter 232, this Manual.

**Prior Year Data.** For the prior year, enter estimated end year obligations.

**Current and Budget Year Data.** Estimates should be based on requirements determined to be in accordance with Section XI of DoD Instruction 4165.43 and applicable experience data. Provide an explanation for differences of more than $1 million or 10%, whichever is less, between the total amount shown for furnishings in the current year and the budget year.

**Moving and Handling.** All identifiable transportation, handling and storage costs should be included here.

**Initial Issue.** Certain initial issue movable equipment, such as stoves and refrigerators, is usually procured as part of a construction project with construction funds, instead of operation funds. Likewise, in some circumstances leasing funds are utilized for furnishings in leased quarters. The FH-3 should reflect all family housing resources applied to furnishings, with memo entries to indicate the amounts funded from accounts other than the Furnishings portion of Operations and Maintenance.

**Total GFOQ Costs**

**Total GFOQ # Units**

Footnotes:\footnote{13}:

**Instruction Notes:**

1. Service name.
2. Budget year.
3. State name or foreign country.
4. Installation name.
5. Specific quarters address or unit identification.
6. Calendar year in which the dwelling unit or building (in case of multiple units) was built. Identify with an asterisk (*) next to the year built those units that are on the national, state and/or local historic registry.
7. Total net square footage of the dwelling unit.
8. Total operations (BA6) anticipated for the fiscal year.
9. Total utilities (BA5) anticipated for the fiscal year.
10. Total maintenance (BA10) expenditure anticipated for the fiscal year.
11. Total Leasing (BA7) expenditure for the fiscal year, if applicable.
12. Total Family Housing Operations and Maintenance expenditures anticipated for the GFOQ unit for the fiscal year.
13. Include any non-Family Housing O&M expenditures anticipated and a short description of these expenditures in a footnote.

* Show these cost figures in thousands of dollars, carried out to no more than one decimal place.

</tr>
</tbody>
</table>

Instructions:
1. Provide the aware date of the project (annotate with “E” if not awarded).
2. Installation name and state.
3. Number of unites conveyed to the developer.
4. Number of end state units.
5. Identify the amount of funds to be used for the Government’s cost of the project.
6. Identify the fiscal year(s) of funding source to be used for the Government’s cost of the project.
7. Identify the type of funds (e.g. new construction, post-acquisition construction, etc.) to be used for the Government’s cost of the project.
8. Identify the project(s) that are used to source the Government’s cost of the privatized project.
9. Indicate which authorities provided in subchapter IV of Chapter 169 in title 10 U.S.C. will be used for each project (e.g., Sec 2873, Sec 2875, etc.).
10. Total unit conveyed, end state units, and amounts.

Note: Use this format for the President’s Budget.
### Exhibit FH-6-BES Family Housing Privatization Comparison

**NOTES:**

1. The date real property is transferred (land and housing units) to private ownership/developer, and when service members become entitled to receive a basic allowance for housing.
2. For grouped projects, the first line should be the grouped project name with lines below for each installation and state in the grouped project.
3. The latest scope and funding amount approved by OSD and OMB in a scoring package, which should be consistent with the latest Transfer of Funds into the FHIF Notifications to Congress.
4. The actual/current scope and funding, as of 30 Sept 2011, corresponding to the end state that the owner is obligated to provide, subsequent to OSD/OMB approval, based on changes due to local market conditions and operational transformations. These definitions are consistent with those in the semi-annual MHPI Program Evaluation Plan Report.
5. Show the total conveyed and end-state units for a grouped project, and for each installation within a grouped project.
6. Provide all funding sources.
7. **AUTHORITIES**
   
   1. 10 USC 2873 “Direct Loans and Loan Guarantees”
   2. 10 USC 2875 “Investments in Nongovernmental Entities”
   3. 10 USC 2877 “Different Lease Payments”
   4. 10 USC 2878 “Conveyance or Lease of Existing Property and Facilities”

**NOTE:**

1 - Condition Index (CI) is a general measure at a specific point in time with respect to physical condition and ability to support the current occupant or mission. CI is calculated as the ratio of Plant Replacement Value (PRV) minus the estimated cost of maintenance and repair requirements, divided by PRV. This provides a CI, or Q-rating (Q1 to Q4), from 0% to 100%, with 100% representing excellent condition.

**NOTES:**

1. For grouped projects, the first line should be the grouped project name with lines below for each installation and state in the grouped project.
2. Award date for the Air Force and Dept of Navy is the effective date of the ground lease and operating agreement, and usually coincides with Privatization date (transfer of operations). For the Army, Award date is when a contract is awarded to the winning offeror to produce a Community Development Plan.
3. Privatization date is when real property is transferred (land and housing units) to private ownership/developer, and when service members become entitled to receive a basic allowance for housing. Same as "Operationally Closed".
4. Financial Closing date is when financial documents are signed, loans are obtained, and the government provides an investment (equity, direct loan or loan guarantee), as required/agreed.
5. Types of Financing: Direct Loan (DL), Loan Guarantee (LG), Equity Investment (EQ) or Differential Lease Payments (DLP).
6. The actual/current scope and funding, as of 30 Sep 2011, corresponding to the end state that the owner is obligated to provide, subsequent to OSD/OMB approval, based on changes due to local market conditions and operational transformations. These definitions are consistent with those in the semi-annual MHP1 Program Evaluation Plan Report.
7. Show the total conveyed and end state units for a grouped project, and for each installation within a grouped project.

2/ DoD and FHA expenses. Work unit, "total number of applications processed, including rejections."
3/ Payments to homeowners for equity in properties acquired by the Government. Work unit, "number of properties."
4/ Value of mortgage balances assumed by the Government on properties acquired. Work unit "number of mortgages assumed."
5/ Recovery of Government’s investment by the sale of properties. Work unit, "number of properties sold."
Exhibit NSIP -1 NSIP Project Data

### NATO Security Investment Program (NSIP) Project Data

<table>
<thead>
<tr>
<th>Location</th>
<th>Installation</th>
<th>Project Title</th>
<th>Project Description</th>
<th>Budget Scheme</th>
<th>Project Cost</th>
<th>U. S. Cost Share</th>
<th>Other Nation Cost Share</th>
</tr>
</thead>
</table>

Instructions:

1. This exhibit will identify the NSIP requirements, both military construction and procurement, at the project level detail. The exhibit should be completed for both the normal NSIP requirements and NATO Expansion requirements. The listing should be sufficiently detailed to identify discrete projects and initiative; aggregation at the capability package level i.e., Defense of the Mediterranean, is NOT sufficiently detailed.

2. Data should be submitted in hard copy and on a disk in a Microsoft Access format or in Microsoft Excel format.

3. Location: State or country where the project will be executed, i.e. Alaska, Turkey, or Italy.

4. Installation: Base where the project will be executed, i.e. Aviano AB.

5. Project Title.

6. Project Description: Explanation and description of each project.

7. Budgeted Scheme: Identify the number of NATO nations sharing in the cost of the project.

8. Project Cost: The total cost for the NSIP project. The projects cost should be displayed in thousands.

9. U.S. Cost Share: Identify the estimated U.S. share of the project cost. The U.S. share should be displayed in thousands.

10. Other NATO Cost Share: Identify the estimated share of the other NATO nations. The cost should be displayed in thousands.

11. This exhibit should be completed for the current year and budget year, i.e., current year FY 2001; budget Year FY 2002.

12. The hard copy and electronic submission should include a total that reflects the cost of normal NSIP requirements and NSIP Expansion requirements by fiscal year.
Exhibit NSIP-2 NSIP Recoupment Estimates

**North Atlantic Treaty Organization Security Investment Program Recoupment Estimates**

<table>
<thead>
<tr>
<th>Component</th>
<th>Appropriation</th>
<th>Fiscal Year</th>
<th>Location</th>
<th>Installation</th>
<th>Project Title</th>
<th>Slice/Serial (if known)</th>
<th>Recoupment Budget Estimate</th>
<th>Rate of Conversion</th>
</tr>
</thead>
</table>

Instructions:

1. This exhibit will be executed at the project level for each NSIP major construction project that is eligible for recoupment (reimbursement by other member countries for eligible costs). No project level detail is required for minor construction, planning and design, family housing improvement or BRAC.

2. Data should be submitted in hard copy and on a disk in a Microsoft Excel format.

3. Component should be the specific Service Active, Guard or Reserve Force component or Defense Agency. Recognized abbreviations such as ARNG (Army National Guard), etc. are acceptable.

4. Appropriation should be a four digit number (treasury code).

5. Fiscal year should be a four-digit number.

6. Location is the two digit state or country code.

7. Installation is the military base where the project is being built.

8. Slice/Serial, if known, or pre-financing notification reference number.

9. Recoupment budget estimate amount is in thousands.

10. The estimated budget recoupment should reflect the rate of conversion at the time of estimate.

11. For the hard copy, the data should be sorted by fiscal year, location and then by installation. The hard copy and should also include a total for each fiscal year.

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

The previous version dated December 2010 is archived.

CHAPTER 7

BASE REALIGNMENT AND CLOSURE APPROPRIATIONS

1.0 GENERAL (0701)

1.1 Purpose (070101)

1.1.1. This chapter provides instructions applicable to budget formulation and congressional justification for Base Realignment and Closure (BRAC) appropriations.

1.1.2. The following appropriations and accounts are covered in Section 2.1:

- DoD Base Closure Account (1988 Commission)
- DoD Base Closure Account 2005 (2005 Commission)
- DoD Base Closure Account (Consolidated)

1.2 Submission Requirements (070102)

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 7 covers specific back-up material requirements for the above accounts. Components should also submit any applicable exhibits required in Volume 2, Chapter 19 for the above appropriations/accounts, as applicable.

1.3 Preparation of Material (070103)

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 7 provides additional specific guidance with regard to the back-up material required for the Base Realignment and Closure appropriations.

1.4 References (070104)

Chapter 3 provides guidance related to Operation and Maintenance costs and Chapter 6 provides guidance and formats related to Military Construction and Family Housing costs.
2.0 UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATION (0702)

2.1 Base Closure Account, Defense Appropriations (070201)

2.1.1. Overview

Defense Authorization Amendments and Base Closure and Realignment Act, Public Law 100-526, established the Defense Base Closure Account (Part I) as a mechanism to provide the required funding to implement the approved recommendations of the Base Closure and Realignment Commissions. Public Law 101-510, Title XXIX, Defense Base Closure and Realignment Act of 1990, established Base Closure Account 1990 (Part II), the FY 2002 National Defense Authorization Act established the DoD Base Closure Account 2005 (BRAC 2005), and Section 2711 of the FY 2013 National Defense Authorization Act established the DoD Base Closure Account, which directed the transfer of remaining balances from all three previous BRAC accounts. Funding approved by Congress in these Accounts is appropriated and authorized in a lump sum amount and may be spent for construction, planning and design, civilian severance pay, civilian permanent change in station, transportation of things, and other costs related to the realignment or closure of the subject bases. The management structure of the program is described below.

2.1.2. Guidance

2.1.2.1. The Assistant Secretary of Defense (Sustainment) is responsible for issuing policy for management of the BRAC program and overseeing the DoD Components’ execution of the program.

2.1.2.2. To properly account for and manage appropriated fund resources, the DoD Base Closure Accounts were established on the books of the Treasury to aid the DoD Components in the closure and realignment of certain military installations. Treasury has assigned account symbol 097-0103 to identify the DoD Base Closure Account - Part I, 097X0510 to identify DoD Base Closure Account 1990 - Part II, Part III, and Part IV, 097X0512 to identify DoD Base Closure Account 2005, and 097X0516 to identify DoD Base Closure Account (consolidated).

2.1.2.3. Funds made available to the DoD Components are subdivided and distributed to the activities responsible for base closure actions. Separate allocations are made for each of the accounts by program year. Each DoD Component distributes the base closure funds in accordance with its normal fund distribution procedures. The applicable reporting requirements include:

- Military Construction
- Construction
- Planning and Design
- Family Housing
- Construction
- Operations
- Environmental
Operation and Maintenance
Homeowner’s Assistance
Civilian Severance Pay
Civilian Permanent Change of Station (PCS) costs
Transportation of things
Facilities Maintenance
Program Management (civilian work years, TDY travel, and related support dedicated to implementation efforts)
Military Personnel (limited to PCS expenses dedicated to implementation efforts)
Other (including procurement type items)

2.1.2.4. The Under Secretary of Defense (Comptroller) makes funds available to the DoD Components based on their official financial plans. Financial plans are prepared by the DoD Components in cooperation with and at the direction of the program manager, the Assistant Secretary of Defense (Sustainment). The DoD Components’ financial plans and the subsequent allocation of funds are supported by detailed, line-item military and family housing construction justification. Separate narrative explanations for other planned expenditures are also submitted to the Under Secretary of Defense (Comptroller) in sufficient detail to support the DoD Component’s financial plan. Each DoD Component is allocated funds based upon its official budget justification and financial plan.

2.1.2.5. All closures and realignments must be completed no later than the end of the six-year implementation period beginning on the date on which the President transmitted to Congress the report containing the recommendations of such closures or realignments.

2.1.2.6. Section 2711 of the National Defense Authorization Act (NDAA) for FY 2013 established a new appropriation (097X0516) as DoD Base Closure Account. Funds in this account shall be available only to incur new obligations for environmental restoration, property management and disposal, and other caretaker costs at closed or realigned installations and for the purpose of recording, adjusting and liquidating obligations properly chargeable to the account under Title 31, United States Code, section 1553. With the enactment of the FY 2014 NDAA (Public Law 113-66, dated December 26, 2013), the previous DoD BRAC accounts (097X0510 and 097X0512) remain as no-year accounts, and must be accounted for similarly to an expired appropriation. Unobligated balances from the 0510 and 0512 accounts were transferred to the new BRAC account (0516) in January 2014.

2.1.3. Fiscal Accounting Classification

The account classification structure for the Base Closure Account, Defense is prescribed in Volume 12, Chapter 13. Treasury Code 097X0516 has been established as a single account on the books of the Treasury to execute actions for environmental restoration, property management and disposal, and other caretaker costs for all BRAC installations.
3.0 PROGRAM AND BUDGET REVIEW SUBMISSION (0703)

3.1 Purpose (070301)

3.1.1. This Section prescribes instructions for the preparation and submission of budget estimates for the Base Realignment and Closure appropriation.

3.1.2. Data submitted must be consistent with the budget estimate being supported.

3.1.3. Examples of budget exhibits can be found in Section 5.0.

3.2 Submission Requirements (070302)

3.2.1. General Guidance. Each Service will prepare a Base Closure justification book. The justification book will include a summary BC-02 exhibit showing cost and savings data for each prior round (BRAC Parts I, II, III, IV, V) covering the six-year implementation period for that respective closure round. The Services will also prepare a continuing environmental restoration and caretaker cost exhibit (BC-04) for funds requested in the budget year. The justification book will include BC-01, BC-02, BC-03 and BC-04 exhibits organized alphabetically by state only for those recommendations requesting budget year funding. Environmental Exhibits, BRAC ENV-30 will be submitted separately and not included in the bound justification book. These exhibits will be included in the Component’s Environmental Summary justification material as mentioned in Chapter 13. For Base Closure Account-Part I, the summary BC-02 will include cost and savings data for FY 1990 through FY 1995. For Base Closure Account-Part II, the summary BC-02 will include cost and savings data for FY 1992 through FY 1997. For Base Closure Account-Part III, the summary BC-02 will include cost and savings data for FY 1994 through FY 1999. For Base Closure Account-Part IV, the summary BC-02 will include cost and savings data for FY 1996 through FY 2001. For Base Closure Account-Part V, the summary BC-02 will include cost and savings data for FY 2006 through FY 2011. Section 5.0 contains sample exhibits BC 01 through BC 04 and ENV-30 for use in preparing justification material. Included in the sample exhibits are instructions pertaining to the substance and format of the information to be displayed.

3.2.2. Base Realignment and Closure Service Overview Exhibit (BC-01). Each Service will prepare an overview exhibit (BC-01), as described in section 5.2, for the Base Closure-Account summarizing by fiscal year, the names and locations of the affected bases, and how much funding in the DoD Base Closure Account will be requested in that fiscal year. The BC-01 should separately identify the amount of funds expended for environmental restoration and caretaker functions at installation closed under prior rounds of base closure. The overview will also address mission impact and environmental considerations affecting closures and realignments.

3.2.3. Base Realignment and Closure Cost and Saving Exhibit (BC-02). Each Service will prepare a summary BC-02 Exhibit, as described in section 5.2, showing costs and savings data for each round of closure. Continuing environmental restoration and caretaker costs after the implementation period for all BRAC rounds will be separately displayed on the BC-04 exhibit as described below. BRAC saving estimates reported in Exhibit BC-02 must be based on the best
projection of what savings will actually accrue from approved realignments and closures. Prior year estimated savings must be updated to reflect actual savings when available.

3.2.4. **Base Realignment and Closure Package Description Exhibit (BC-03).** Each Service will prepare a short narrative exhibit (BC-03), as described in section 5.2, for each recommendation, for which funding is requested, describing the actions necessary to complete the realignment or closure at that location.

3.2.5. **Continuing BRAC Environmental Restoration and Caretaker Cost Exhibit (BC-04).** Each Service will prepare a summary continuing environmental and caretaker cost exhibit for all BRAC funding as well as a recommendation specific exhibit (for recommendations requiring funding in the budget year), as described in Section 5.0.

3.2.6. **Base Realignment and Closure Environmental Exhibits.** Each service will prepare environmental progress and funding by priority exhibits BRAC ENV-30 as provided in section 5.2 below. These BRAC environmental exhibits include requirements by relative risk category and each phase of environmental restoration, as well as requirements for environmental compliance and planning. These exhibits will be prepared for the President’s Budget and included in the Component’s justification material for Environmental Restoration as provided in Chapter 13. The totals for these exhibits will match the Environmental totals submitted in the BC-01.

3.2.7. **Budget Submission.** Coincident with the hard copy submission of the Base Closure budget estimates, Military Departments and Defense Agencies, as applicable, will submit budgetary data via the Automated Construction Program Database as described in Volume 2, Chapter 1, paragraph 010504.

4.0 **CONGRESSIONAL JUSTIFICATION/PRESENTATION FOR BRAC (0704)**

4.1 **Purpose (070401)**

This Section presents the justification book organization and the exhibit requirements for submission to Congress for the BRAC account. Examples of budget exhibits can be found in Section 5.0, below and reflect those addressed in Section 3.0, above.

4.2 **Organization of Justification Books for BRAC (Incorporating Prior Rounds of BRAC, Parts I, II, III, IV, V) (070402)**

4.2.1. Justification material consolidated into a single volume entitled:

Department of Defense Base Closure Account

4.2.2. The justification book will be organized as shown below.
ORGANIZATION/EXHIBIT REQUIREMENTS FOR PRIOR ROUND BRACS

Organization

I. Table of Contents

INSTRUCTIONS FOR PREPARATION OF EXHIBIT BC-01
“FY ____ BASE REALIGNMENT AND CLOSURE DATA”
19__ COMMISSION

Service Overview

Plan: Summarize by fiscal year, the names and locations of the affected bases, and how much of the DoD Base Closure Account will be expended in the fiscal year. Discuss possible problems in meeting the schedule.

Mission Impact: Describe possible mission impact in completing the realignment/closure.

Environmental Considerations: Describe potential problems in closing an installation due to the complexity in cleaning up environmental wastes and hazards.

Address any other items/issues appropriate for the overview section.

EXHIBIT BC-02 BRAC Implementation Costs
(Page 2 of 2)
Exhibit BC-03 BRAC Package Description

BASE REALIGNMENT AND CLOSURE
19__ COMMISSION
PACKAGE DESCRIPTION

Service/Location/Package: Cross-reference to standard terminology employed in the Commission’s report.

Closure/Realignment Package: Brief description of the actions necessary to complete the realignment or closure at this location. A package is defined as all actions, costs and savings associated with the closing or realignment of a base or installation as recommended by the Commissions. Include how the physical plant will be affected and the missions that must be terminated or transferred to other locations. Reflect planning and design and management overhead costs in a separate package covering, overall one-time implementation cost. All military construction savings should also be addressed in this same package.

Costs:

Military Construction: New facilities that must be constructed to accommodate a realignment or closure action. List the construction projects associated with the package as follows:

<table>
<thead>
<tr>
<th>Location/Project Title</th>
<th>Fiscal Year of Award ($ in 000)</th>
</tr>
</thead>
</table>

Subtotal for Each Fiscal Year

Family Housing Construction: Specify the number of units and location. As with military construction, list each family housing construction project.

Family Housing Operations: The one-time family housing operations costs associated with package implementation.

Operation and Maintenance: Includes PCS of civilian personnel, civilian severance costs, transportation of things, RPM and other one-time implementation costs as a result of closure or realignment. Program management costs should also be addressed, but only in the separate package covering overall one-time implementation costs.

EXHIBIT BC-03 BRAC Package Description
(Page 1 of 2)
Exhibit BC-03 BRAC Package Description (Continued)

**Procurement Items:** Items normally funded from procurement appropriations.

**Revenues From Land Sales:** Provide statistics and narrative to adequately describe the land being proposed for sale. Describe the method and date of appraisal.

**Environmental:** Indicate the environmental restoration actions that will occur at both the losing and gaining locations, the funding requirements and status of all such restoration actions.

**Savings:** Demonstrated savings that will accrue from the partial or complete closure of the base.

**Military Construction:** To be addressed in the single package addressing overall/program management costs.

**Family Housing Construction:** Self-explanatory.

**Family Housing Operations:** Savings (offset by increased recurring costs).

**Operation and Maintenance:** One-time and recurring savings (offset by increased recurring costs) in civilian personnel, base operations, and other costs as a result of closure or realignment. Be specific as to the category.

**Military Personnel:** One-time and recurring savings (offset by increased recurring costs) in military personnel as a result of closure or realignment. Be specific as to the category.

**Other:** Self-explanatory.

**Instructions**

1) The new ENV 30 exhibit replaces the former ENV 30 Part 1 DERA and BRAC Funds Budgeted for Environmental Clean-Up Program Management and Support and the former ENV 30 Part 2 DERA and BRAC Funds for Environmental Clean-Up Project Management. The new ENV 30 captures funding for DERP-eligible activities at IRP sites, MRSs, and BD/DR sites, including site-specific requirements and program management; funding for BRAC Planning and Compliance activities; funds generated from the sale of real property; obligations of prior year BRAC funds; and the number sites funded or to be funded with the total obligational authority (TOA) for the activity in the applicable fiscal year.

2) Provide by DoD Component (Active, Defense Agency/Defense Wide, and BRAC), the total costs (TOA) and total number of sites funded or to be funded with TOA by Fund Source, Activity Category and Activity for fiscal years 20XX (budget year) through 20XX (end of FYDP) and the balance to completion (i.e., beyond the FYDP).

3) Report TOA in $K (thousands) and the total number of sites in actual numbers. DO NOT report sites in thousands.

4) Only the Army will report Formerly Used Defense Sites (FUDS) data.

5) For Fund Sources "BRAC Planning" and "BRAC Compliance", provide the number of installations in lieu of the number of sites. For Fund Sources "Environmental Restoration-Management", "BRAC-Management", "BRAC-Land Sale Revenue", and "BRAC-Prior Year Funds", the reporting of the total number of sites is not required.

6) BRAC funding sources include both Legacy BRAC (BRAC Rounds I through IV) and BRAC 2005. For the POM/budget estimate and President’s Budget submissions, provide separate breakouts of the funding for Legacy BRAC and BRAC 2005 in a Word document accompanying the ENV 30 exhibit (see #11 in the Instructions section for more information about the Word document).

7) Include land sale revenue and prior year BRAC funds applied to each applicable activity in the TOA. Report the total amount of land sale revenue and prior year BRAC funds applied to all activities against the “Land Sale Revenue” and “Prior Year Funds” Fund Sources; SNaP will deduct these amounts from the BRAC totals to calculate the BRAC appropriated funding.

8) Program adequate resources in each year of the FYDP to achieve program goals.

9) Provide to the DUSD(I&E) (in accordance with DUSD(I&E) data call schedules) updated DERP data for each site regarding status, schedule, and CTC, as required by DoDI 4715.07.

10) Ensure the Program/budget estimate and President’s Budget submissions contain sufficient funding to annually update the inventory of defense sites that are known or suspected to contain UXO, DMM, or MC, as required by section 2710(a) of title 10 U.S.C. and as specified in DoDM 4715.20.

11) Provide a narrative in a Word document that includes the following information:
   a) A list of installations at which the Agency for Toxic Substances and Disease Registry (ATSDR) performed/will perform health assessments or health studies for fiscal years fiscal years 20XX (budget year) through 20XX (end of FYDP) and the balance to completion. Include the number of health assessments and health studies planned each year.
   b) The number of installations by state that received/will receive funding for the Defense State Memorandum of Agreement (DSMOA) program for fiscal years 20XX (budget year) through 20XX (FYDP) and the balance to completion. Include the amount of funding planned for each year.
c) An explanation of any significant fluctuations (i.e., 25% or more) in the funding for current year and budget year as compared to the funding for budget year in the previous year’s Program/budget estimate and Presidents Budget submissions.

d) An explanation of any significant program increases or decreases (i.e., 25% or more) from current year to budget year.

e) An itemized list of “Other” program management requirements and funding amounts by fiscal year.

f) A list of sites where the CTC estimate is truncated at 30 years.

g) An explanation of program increases and decreases; reprogramming actions; cost recovery; and the use of prior year funds for cleanup work at BRAC installations.

12) See Appendix A on the SNaP Web site for reporting requirements for your organization.

Definitions

**Class:** System Field: Classification

C: CONFIDENTIAL
C/NF: CONFIDENTIAL//NOFORN
F: FOR OFFICIAL USE ONLY
S: SECRET
S/NF: SECRET//NOFORN
U: UNCLASSIFIED

**FUDS:** Closed List. Used by Army to identify FUDS data.

No:
Yes:

**DoDComponent:** Closed List. Identifies the Military Department or Defense Agency whose data are presented on the exhibit. For the Military Departments, report by Active (including Guard and Reserve) and BRAC. The Defense Agencies should select “Defense Agency/Defense Wide.” The Army will report FUDS.

Active: Used by the Military Departments and includes Active Guard and Reserve Components

BRAC: Used by Military Departments to report BRAC

**FundSource:**

**BRAC-Compliance:** Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. See DoDI 4715.6.

**BRAC-IRP:** Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Identifies funding associated with sites that require response actions to address releases of hazardous substances and pollutants or contaminants; POLs (subject to the exception in subparagraph 2.a.(2)(b) of DoDM 4715.20); hazardous wastes or hazardous waste constituents; and explosive compounds released to soil, surface water, sediment, or groundwater as a result of ammunition or explosives production or manufacturing at ammunition plants; as well as response activities to address UXO, DMM, or MC posing an explosive, human health, or environmental hazard that are incidental to an existing IRP site.

**BRAC-Land Sale Revenue:** Identifies funds recovered from the sale of real property and used to offset cleanup funding requirements.

**BRAC-Management:** Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Identifies administrative and overhead funding associated with the DERP that cannot be attributed to individual sites (e.g., manpower).

**BRAC-MMRP:** Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON
appropriation. Identifies funding associated with sites (referred to as MRSs) that are known or suspected to contain UXO, DMM, or MC. This sub-element does not include funding for operational ranges, operating storage and manufacturing facilities, and munitions resulting from combat.

**BRAC-Planning:** Funded by the Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. See DoDI 4715.9.

**BRAC-Prior Year Funds:** Identifies funds obligated/to be obligated from prior year BRAC appropriations.

**Environmental Restoration-IRP:** Funded by Environmental Restoration appropriations. Identifies funding associated with sites that require response actions to address releases of hazardous substances and pollutants or contaminants; POLs (subject to the exception in subparagraph 2.a.(2)(b) of DoDM 4715.20); hazardous wastes or hazardous waste constituents; and explosive compounds released to soil, surface water, sediment, or groundwater as a result of ammunition or explosives production or manufacturing at ammunition plants; as well as response activities to address UXO, DMM, or MC posing an explosive, human health, or environmental hazard that are incidental to an existing IRP site. Also identifies funding associated with the demolition and removal of unsafe buildings and structures and the removal of unsafe debris in accordance with the DERP general eligibility requirements in subparagraph 2.a.(2)(f) of DoDM 4715.20.

**Environmental Restoration-Management:** Funded by Environmental Restoration appropriations. Identifies administrative and overhead funding associated with the DERP that cannot be attributed to individual sites (e.g., manpower).

**Environmental Restoration-MMRP:** Funded by Environmental Restoration appropriations. Identifies funding associated with sites (referred to as MRSs) that are known or suspected to contain UXO, DMM, or MC. This sub-element does not include funding for operational ranges, operating storage and manufacturing facilities, and munitions resulting from combat.

**Activity/Category:** Closed List. The environmental activity category supporting the fund source.

**Compliance:**

**Investigation:**

**Land Sale Revenue:**

**Management:**

**Planning:**

**Post RA:**

**Prior Year Funds:**

**Remedial Action (RA):**

**Activity:** Closed List. The environmental activity associated to the activity category.

**ATSDR:** Captures funding requirements for ATSDR.

**Building Demolition/Debris Removal:** Refers to the demolition and removal of unsafe buildings and structures and the removal of unsafe debris in accordance with the DERP general eligibility requirements in subparagraph 2.a.(2)(f) of DoDM 4715.20.

**Compliance:** Refers to activities associated with closure-related procedures necessary to achieve compliance with applicable Executive Orders and Federal, State, interstate, regional, and local statutory and regulatory environmental requirements at BRAC installations.

**DSMOA:** Captures funding requirements for the DSMOA program.

**EPA Funding:** Captures requirements for payments to the U.S. Environmental Protection Agency (EPA) for support at Legacy BRAC installations per the memorandum of understanding with EPA.

**Interim Remedial Actions:** Refers to the interim remedial action (IRA) phase of cleanup. The IRA is a remedial action undertaken prior to the selection of the final remedy as a part of a larger remedy.

**Land Sale Revenue:** Identifies funds recovered from the sale of real property and used to offset cleanup funding requirements.
**Long-Term Management:** Refers to the long-term management (LTM) phase of cleanup. LTM involves environmental monitoring, review of site conditions, and maintenance of a remedial action to ensure continued protection as designed once a site achieves RC. LTM includes the operations and maintenance measures required to maintain the effectiveness of response actions. LTM should be used until no further environmental restoration response actions are appropriate or anticipated.

**Manpower:** Captures funding requirements for all recurring government (civilian and military manpower costs) and contractor costs applicable to the management of the environmental cleanup program but not directly attributable to sites.

**Other:** Captures all other administrative and overhead funding associated with the DERP that cannot be attributed to individual sites.

**Planning:** Refers to activities associated with the process of identifying and considering environmental factors that impact on, or are impacted by, planned DoD activities or operations at BRAC installations.

**Potentially Responsible Parties:** Refers to a site where DoD pursues a potentially responsible party when associated with the Investigation activity category. Refers to activities at a site where DoD may bear potential liability for hazards or hazardous substance releases along with other parties when associated with the RA activity category.

**Preliminary Assessment/Site Inspection:** Refers to the preliminary assessment (PA) and site inspection (SI) phases of cleanup. The PA is a review of existing information about a release such as information on pathways of exposure, exposure targets, and source and nature of release. The SI builds upon the PA and involves, as appropriate, on- and off-site field investigatory efforts including sampling.

**Prior Year Funds:** Identifies funds obligated/to be obligated from prior year BRAC appropriations.

**Project Closeout:** Refers to project closeout (PCO). PCO involves the shutting down/dismantling of remedial actions, seeking regulator concurrence, and closeout reports.

**RABs/Community Relations:** Captures funding requirements for support to restoration advisory boards and other community relations activities.

**Remedial Action Construction:** Refers to the remedial action construction (RA-C) phase of cleanup. The RA-C represents the period of time during which a response action is being implemented, but is not yet operating as designed. At the end of this phase of work, a remedy is in place.

**Remedial Action Operations:** Refers to the remedial action operation (RA-O) phase of cleanup. The RA-O represents the period of time that a selected remedy must operate before achieving remedial action objectives. At the end of this phase of work, the response is complete.

**Remedial Design (including Records of Decision/Decision Documents):** Refers to the remedial design (RD) phase of cleanup. The RD involves the development of the actual design of the selected remedy.

**Remedial Investigation/Feasibility Study:** Refers to the remedial investigation (RI) and feasibility study (FS) phases of cleanup. The RI involves collecting data to characterize site conditions, determine the nature of the waste, assess risk to human health and the environment, and conduct treatability testing to evaluate the potential performance and cost of the treatment technologies that are being considered. The FS is the mechanism for the development, screening, and detailed evaluation of alternative remedial actions.

**Resource Type:** Closed List. The type or resources (TOA or Number of Sites/Installations) associated to the Fund Source.

**Sites:** Total number of sites funded or to be funded for the activity with the TOA.

**TOA:** Total funding required to complete the activity.
**Business Rules**

1) For Fund Sources "Environmental Restoration-Management", "BRAC-Management", "BRAC-Land Sale Revenue", and "BRAC-Prior Year Funds", the reporting of the total number of sites is not required.

2) Only Army will provide "FUDS" data.

3) For DoDComponent "Active" the activity "EPA Funding" is not required when Funding Source Environmental Restoration-Management and Activity Category "Management" are selected.

**Data Matrix: DoDComponent, FundSource, ResourceType Relationship**

**Subject Matter Experts:** For questions regarding this exhibit, please submit a SIRS Functional issue in SNaP, or contact the Subject Matter Expert. A list of SMEs is available in SNaP by clicking the SME link on the Instructions/Data Requirements page.

**Technical Issues:** To report technical issues with the SNaP web site, please submit a SIRS Technical issue in SNaP, or contact the Technical Staff. A list of the SNaP Technical personnel is available on the SNaP Home page.
VOLUME 2B, CHAPTER 8 “FACILITIES SUSTAINMENT AND RESTORATION/MODERNIZATION”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated June 2013 is archived.

CHAPTER 8
FACILITIES SUSTAINMENT AND RESTORATION/MODERNIZATION

1.0 GENERAL (0801)

1.1 Purpose (080101)

1.1.1. This chapter provides instructions applicable to budget formulation and congressional justification for Facilities Sustainment and Restoration/Modernization (FSRM).

1.1.2. The following appropriations and accounts are covered:

Section 2.0
- Operation and Maintenance Appropriations
- Research, Development, Test, and Evaluation Appropriations
- Defense Working Capital Funds
- Military Construction
- Other Funds

Section 4.0
- Transfer or Disposal of DoD Real Property
- Lease of DoD Real Property

Section 5.0
- DoD Overseas Military Facility Investment Recovery Account

1.2 Submission Requirements (080102)

Volume 2, Chapter 1 provides general guidance on the formulation and submission of the budget requests to the Office of the Secretary of Defense for the program and budget review submission and the presentation and justification of the budget requests to Congress. Chapter 8 provides specific additional back-up material requirements for the above Facilities Sustainment and Restoration/Modernization accounts.
1.3 Preparation of Material (080103)

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 8 provides additional specific guidance with regard to the back-up material required for Facilities Sustainment, Restoration and Modernization.

1.4 References (080104)

Chapter 3 provides guidance related to Operation and Maintenance costs and O&M exhibits. Chapter 5 provides guidance related to Research, Development, Test, and Evaluation appropriations, Chapter 6 provides guidance related to Military Construction, and Chapter 9 provides guidance related to the Defense Working Capital Fund.

1.5 Definition of Sustainment and Restoration/Modernization (080105)

1.5.1. Sustainment means the maintenance and repair activities necessary to keep an inventory of facilities in good working order. It includes regularly scheduled adjustments and inspections, preventive maintenance tasks, and emergency response and service calls for minor repairs. It also includes major repairs or replacement of facility components (usually accomplished by contract) that are expected to occur periodically throughout the life cycle of facilities. This work includes regular roof replacement, refinishing of wall surfaces, repairing and replacement of heating and cooling systems, replacing tile and carpeting, and similar types of work. It does not include environmental compliance costs, facility leases, or other tasks associated with facilities operations (such as custodial services, grounds services, waste disposal, and the provision of central utilities).

The DoD facilities sustainment model (FSM) is used as the standardized model for forecasting facilities sustainment resource requirements. The FSM uses the following formula to develop the sustainment requirement:

\[
1.5.1.1. \quad \text{Annual sustainment requirement} = \text{facility quantity} \times \text{sustainment unit cost} \times \text{location factor} \times \text{inflation}.
\]

1.5.1.2. Facility quantity – the facility size expressed in the Facility Analysis Category (FAC) unit of measure (such as square feet).

1.5.1.3. Sustainment unit cost – the average annual unit cost (in current year dollars) for sustaining the average size facility in the given FAC.

1.5.1.4. Location factor – a location adjustment based upon the local costs for labor, equipment, materials, and currency exchange rates (overseas) compared with an overall base-city average.

1.5.1.5. Inflation – factor to adjust current year prices to the target future year.
The Department uses a sustainment metric which is the comparison of sustainment funding to the requirement for a given year, expressed as a rate.

1.5.1.6. **Sustainment rate (%)** = sustainment funding/FSM requirement:

1.5.2. Restoration means the restoration of real property to such a condition that it may be used for its designated purpose. Restoration includes repair or replacement work to restore facilities damaged by inadequate sustainment, excessive age, natural disaster, fire, accident, or other causes.

1.5.3. Modernization means the alteration or replacement of facilities solely to implement new or higher standards, to accommodate new functions, or to replace building components that typically last more than 50 years (such as the framework or foundation).

1.5.4. Recapitalization means the major renovation or reconstruction activities (including facility replacements) needed to keep existing facilities modern and relevant in an environment of changing standards and missions. Recapitalization extends the service life of facilities or restores lost service life. It includes restoration and modernization of existing facilities, as well as replacement of existing facilities with new.

Plant replacement value (PRV) is used as a common measure of facility and inventory size, as well as the basis for generating facility condition index (FCI) values and estimating recapitalization requirements. The DoD standardized formula for calculating PRV is:

1.5.4.1. **Plant Replacement Value** = facility quantity x replacement unit cost x location factor x planning & design (P&D) factor x historical factor x contingency factor x SIOH x inflation

1.5.4.2. **Facility quantity** – the facility size expressed in the FAC unit of measure (such as square feet)

1.5.4.3. **Replacement unit cost** – the average annual unit cost (in current year dollars) for constructing the average size facility to current standards in the given FAC

1.5.4.4. **Location factor** – a location adjustment based upon the local costs for labor, equipment, materials, and currency exchange rates (overseas) compared with an overall base-city average

1.5.4.5. **P&D factor** – an adjustment to account for typical project planning and design costs

1.5.4.6. **Historical factor** – an adjustment for historical architecture and materials (when applicable)

1.5.4.7. **Contingency factor** – an adjustment for typical contingency costs during construction
1.5.4.8. **Supervision, Inspection, and Overhead (SIOH)** – an adjustment for supervision, inspection, and overhead costs associated with construction management

1.5.4.9. **Inflation** – factor to adjust current year prices to the target future year

1.6 Facilities Data Quality Assurance (FDQA) (080106)

1.6.1. The Facilities Data Quality Assurance website was implemented to improve the quality of facilities data used by the Department in its PPBE process, and it displays the data sources of record for all facilities data reporting. This application integrates and displays facilities data submitted by the Components to OSD via Program Resources Collection Process (PRCP), the Standard Data Collection System (SDCS), and Select and Native Programming (SNaP) systems. The data within the FDQAW subsequently produce facilities sustainment metric displays which are displayed in the performance criteria of the OP-5, Detail by Subactivity Group.

1.6.2. Components must ensure O&M exhibits are consistent with the PRCP and SDCS data submissions. Verification of the accuracy of the data contained within the FDQA application must be completed PRIOR to the final lock of these databases for preparation of the Program/Budget Review and President’s Budget materials.

1.6.3. Standard operating procedures for the FDQA can be found at https://dpd.pae.osd.smil.mil.

1.7. Data Displays (080107)

Facility Sustainment, Restoration and Modernization exhibits must be consistent. The following list should be used as a reference for validating data:

- OP-5 Detail by Subactivity Group (Facility Sustainment, Restoration and Modernization)
- OP-32 Automated submission
- O-1 O&M funding by Budget Activity/Activity Group/Subactivity Group
- Facilities Data Quality Assurance application

To the extent a Component submits different estimates in any of the preceding displays; the automated OP-32 will serve as the prevailing display for O&M resources. For Defense Agencies, the object sub-class 923 will serve as the prevailing estimate.
2.0 PROGRAM AND BUDGET REVIEW SUBMISSION (0802)

2.1 Purpose (080201)

2.1.1. This Section prescribes instructions for the preparation and submission of budget estimates for Facilities Sustainment, Restoration and Modernization requirements.

2.1.2. Guidance covers all Facilities Sustainment and Restoration/Modernization (FSRM) costs. Facilities Sustainment and Restoration/Modernization include all recurring maintenance and repair projects costs, real property renovation project costs, and planning and design costs associated with projects; providing funding support to maintain, repair, and modernize buildings, structures, roadways, aprons, railway trackage, utility plants, distribution systems, and other real property.

2.1.3. Program funding submitted in Component justification materials must correspond to funding levels identified in the Facilities Sustainment and Restoration/Modernization Program Elements.

2.1.4. When budgeting for facilities sustainment and restoration/modernization, Components will consider the anticipated levels of military personnel monies that fund part of the labor for facilities sustainment and restoration/modernization. As appropriate, components will adjust the levels of either operations and maintenance or military construction funding for either facilities sustainment or facilities restoration/modernization to recognize the contribution of military personnel funds that help maintain the Department’s facilities. When determining the military personnel contribution Components must use the method documented on page 12 of the Facilities Recapitalization Metric Front-End Assessment Report, dated August 2002. Additionally components must, for considering the effect of military personnel funds on operation and maintenance and military construction accounts, use the same personnel allocation information and cost rates they provide for the FYDP.

2.1.5. When budgeting for facilities sustainment, Components will consider the anticipated levels of Host Nation Support monies and Non-Federal Domestic Facilities Contributions that will be available to reduce the need for appropriated facilities sustainment funding. Components must identify in the FYDP the anticipated levels of both Host Nation Support monies and Non-Federal Domestic Facilities Contributions that are expected to fund facilities sustainment. Specifically, these funds must be booked in the appropriate FYDP facilities sustainment program elements using Resource Identification Code 0800.

2.1.6. When budgeting for facilities sustainment and restoration/modernization, Components will consider the anticipated levels of Defense Working Capital Fund (DWCF) monies that fund facilities sustainment and restoration and modernization. Components must identify DWCF facilities sustainment and facilities restoration/modernization funds in the appropriate FYDP facilities sustainment and facilities restoration/modernization program elements. Additionally, as appropriate, Components will adjust the levels of appropriated funding for either facilities sustainment or facilities restoration/modernization to recognize the contributions of DWCF monies that help maintain the Department’s facilities.
2.1.7. When budgeting for facilities sustainment and restoration/modernization, Components will consider the anticipated levels of RDT&E monies that fund facilities sustainment and restoration/modernization. Components must identify RDT&E facilities sustainment and facilities restoration/modernization funds in the appropriate FYDP facilities sustainment and facilities restoration/modernization program elements. Additionally, as appropriate, components will adjust the levels of either operations and maintenance or military construction funding for either facilities sustainment or facilities restoration/modernization to recognize the contribution of RDT&E funds that help maintain the Department’s facilities.

2.2 Submission Requirements (080202)

2.2.1. General Guidance: All Components (i.e., active forces, defense agencies, National Guard and reserve forces) shall submit the OP-5 Attachment 4: Facilities Sustainment, Restoration and Modernization (FSRM), and Demolition justification data to support budget estimates for Facilities Sustainment, Restoration and Modernization, in a separate bound attachment (see Chapter 3, Section 030201). Two copies of this attachment will be delivered to: Military Personnel & Construction Directorate, Program/Budget, OUSD(Comptroller) Room 3C654, Pentagon, on the same date as all other submissions required for O&M Appropriations. The OP-5 subtotal levels for a) sustainment, b) restoration and modernization, and c) demolition must correspond to funding levels identified in the Facilities Data Quality Assurance website.

NOTE: As demolition can be identified separately by program element, it should be broken out as such whenever the other two elements are separated, and it should be noted that it’s included when it’s part of the total.

2.2.2. Military and civilian personnel costs will include only those personnel assigned in support of FSRM accounts. It will include those personnel performing planning and design functions for both projects and installation FSRM surveys and FSRM master planning, but will exclude those involved in other base operating services or support services.

2.2.3. The format for the OP-5 exhibit is in Volume 2A, Chapter 3, section 0304 of this regulation.

2.3 Preparation of Material (080203)

All material will be provided on 8-1/2 inch by 11 inch size paper, and bound on the long side. All narrative data will be typed across the short dimension of the paper, while exhibits will be typed across the long dimension.

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (0803)

3.1 General (080301)

Components are required to conform to the PBD approved funding levels when submitting final budget exhibits to Congress.
3.2 Organization of Justification Books (080302)

See chapters covering specific appropriation (Operation and Maintenance - Chapter 3, RDT&E Chapter 5).

4.0 REVENUE FROM TRANSFER OR DISPOSAL OF DoD REAL PROPERTY AND REVENUE FROM LEASING OUT OF DOD ASSETS (0804)

4.1 General (080401)

Section 572 of 40 U.S.C. and Section 2667 of 10 U.S.C. provide for the receipt of proceeds from the disposal or lease of DoD real property and prescribe the use of these funds.

4.2 Revenue From Transfer or Disposal of DoD Real Property (40 U.S.C. 572) (080402)

When revenue from the transfer or disposal of DoD Real property is received, there is a statutory requirement to identify each transfer and disposal made during the fiscal year, including a detailed explanation of each such transfer and disposal and of the use of the proceeds received. An estimate for the current and budget year transfers or disposals should also be included.

4.3 Revenue From Leasing Out of DoD Assets (10 U.S.C. 2667) (080403)

The identification of each lease entered into during the fiscal year, including a detailed explanation of each lease and amendments, and of the use of the lease proceeds that were expended is no longer required by 10 U.S.C. 2667. However, the Military Departments will still provide the total actual receipts for the prior year, and an estimate of total receipts for the current year and budget year.

4.4 Deposit and Accounting Procedures (080404)

Cash receipts obtained from the transfer or disposal of real property will be deposited into the Disposal of DoD Real Property Account, 97X5188. Cash receipts obtained from leasing out of DoD assets will be deposited into the Lease of DoD Real Property, 97X5189. Accounting instructions are included in Volume 12, Chapter 14.

4.5 Funds Release Procedures (080405)

Funds deposited into the Disposal of DoD Real Property Account, 97X5188, are available only for purposes of maintenance and repair and environmental restoration at U.S. facilities as specified in 40 U.S.C. 572. Funds deposited into the Lease of DoD Real Property Account, 97X5189, are available for: A) maintenance, protection, alteration, repair, improvement or restoration (including environmental restoration) of facilities; B) construction or acquisition of new facilities; C) lease of facilities; and/or D) facilities operation Support. The Components may request release of funding, based on verifiable deposits, by memorandum to the USD Comptroller, Director for Military Personnel & Construction.
4.6 Budget Exhibits for Congressional Submission (080406)

The Military Departments will be complete a PB-34A Exhibit (Revenue from Leasing of DoD Real Property) and a PB-34B Exhibit (Proceeds from Disposal of DoD Real Property). Both the PB-34A and PB-34B will be included in the O&M Justification Book (Volume II) as described in Chapter 3 of Volume 2A of this regulation.

5.0 DOD OVERSEAS MILITARY FACILITY INVESTMENT RECOVERY ACCOUNT (0805)

5.1 General (080501)

Section 2921 of P.L. 101-510, FY 1991 National Defense Authorizations Act, established the Department of Defense Overseas Military Facilities Investment Recovery account. The purpose of the account is to collect payments from host nations for the value of new construction and improvements made by the United States at overseas military installations being returned.

5.2 Deposit and Accounting Procedures (080502)

Cash receipts obtained from return of overseas real property and improvements to host nations will be deposited into the DoD Overseas Military Facility Investment Recovery Account, 97X5193. For accounting instructions see Volume 12, Chapter 13.

5.3 Funds Release Procedures (080503)

Funds deposited into the DoD Overseas Military Facility Investment Recovery Account are available only for purposes of maintenance and repair and environmental restoration at U.S. facilities and maintenance and repair and environmental compliance at military facilities outside the U.S. that are anticipated to be occupied by U.S. Forces for an extended period of time. The Components may request release of funding, based on verifiable deposits, by memorandum to the USD (Comptroller), Director for Military Personnel & Construction.

5.4 Budget Estimate Submission Exhibit (080504)

Components returning overseas military facilities to host nations that have resulted in collections to this account must complete an OP-29 exhibit. This exhibit provides information on the cost and improvements, depreciation, residual value, and amount collected from the host nation that is necessary in accomplishing an annual report to the Congress. It also documents proposed sustainment, restoration and modernization or environmental restoration/compliance projects at military installations to be financed from the proceeds deposited into this account.

5.5 Budget Execution Oversight (080505)

In accordance with paragraph 080401 of Volume 3, Chapter 8, the Military Departments and designated fund holders are required to periodically review DoD Overseas Military Facility Investment Recovery Account (DOMFIRA) commitments and obligations, whether current or
dormant. Appropriate action should be taken to resolve any DOMFIRA unliquidated commitments and obligations, and minimize DOMFIRA unobligated balances resulting from prior year carryover funds.

6.0 FACILITIES SUSTAINMENT and RESTORATION/MODERNIZATION FORMATS (0806)

6.1 Purpose (080601)

The special formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

6.2 Exhibits in Support of Section 0802 - Program and Budget Review Submission (080602)

The format for the FSRM OP-5 exhibit is in Volume 2A, Chapter 3, Section 0304.

6.3 Exhibit in Support of Section 0804 - Revenue From Transfer or Disposal of DoD Real Property and Revenue from Leasing out DoD Assets: Congressional Justification/Presentation (080603)

PB-34A Revenue from Leasing Out of Department of Defense Assets
PB-34B Proceeds from Disposal of Department of Defense Real Property

6.4 Exhibit in Support of Section 0805 - DoD Overseas Military Facility Investment Recovery Account: Program and Budget Review Submission (080604)

CHAPTER 9

DEFENSE WORKING CAPITAL FUND BUDGET JUSTIFICATION ANALYSIS

1.0 GENERAL

1.1 Purpose

This chapter describes and documents the policies and procedures for budget formulation and justification of the Department of Defense (DoD) Working Capital Funds (WCFs), the Defense Working Capital Fund (DWCF), Building Maintenance Fund (BMF), and the Defense Counterintelligence and Security Agency (DCSA) WCF. In addition, this chapter provides guidance for the National Defense Stockpile Fund and Pentagon Reservation Maintenance Revolving Fund (PRMRF), where applicable. The DWCF is also referred to as the “Fund” in this chapter.

1.2 Authoritative Guidance

The National Security Act of 1947, as amended Title 10 United States Code, section 2208 (10 U.S.C. § 2208), and other provisions of 10 U.S.C. § 131 provide the Department’s revolving fund authority. The BMF, and DCSA WCF were also established under 10 U.S.C. § 2208 as separate and distinct revolving funds and therefore are not part of the DWCF. The PRMRF was established by the 1991 National Defense Authorization Act (NDAA) and codified in 10 U.S.C. § 2674.

1.3 Background

1.3.1. The DWCF was established to satisfy recurring DoD requirements using a buyer-and-seller approach. The customers of the DWCF are the generators of requirements. Federal customers which operate using appropriated funds justify their budget requests to the Congress. The requiring activities (i.e. customers) place orders with DoD WCF organizations that have expertise in the service or product required, and operate under business management principles. Unlike profit-oriented commercial businesses, the WCF goal is to break even over the long term. The WCF establishes selling prices in the budget that are normally stabilized or fixed during execution to mitigate the impact of unforeseen fluctuations that would impact on customers’ ability to execute the programs approved by the Congress. Exceptions to stabilized prices are listed in section 1.8 of this document.

1.3.2. The intent of the WCF is to operate as a self-supporting entity to fund business-like activities. The basic principle of the WCF structure is to create a customer-provider relationship between military operating units and other federal and non-federal customers and support organizations. This relationship is designed to make managers of support organizations funded through WCF and decision-makers at all levels more cost conscious.

1.3.3. Prior to the establishment of an activity as a WCF, the Secretary or Assistant Secretary of the Military Department or the Director for a Defense Agency, as applicable, must
prepare, sign, and submit a charter that sets forth the scope of the activity to the Under Secretary of Defense (Comptroller) (USD(C)) for approval. Four criteria are used in evaluating potential activities for inclusion into the Fund. The four criteria are: 1) identification of outputs that relate to products or services provided by the business to customers; 2) establishment of a cost accounting system to collect costs of producing outputs; 3) identification of customers so that resources can be aligned with the requirements; and 4) evaluation of buyer-seller advantages and disadvantages to include assessment of the customers’ ability to influence cost by changing demand.

1.3.4. The DWCF evolved from two distinct types of activities. The first type, the Stock Funds that procured materiel from commercial sources and held an inventory, are now known as Supply activities. These activities sell the materiel to authorized customers who need the materiel to achieve weapon systems readiness or provide required personnel support items. The second type, known then and now as Industrial Funds, provide industrial and commercial goods and services such as depot maintenance, transportation, and research and development. Although both types of revolving funds are financed primarily by reimbursements from customers’ appropriated accounts, Supply activities use contract authority (CA) and Industrial Funds use reimbursable authority.

1.3.5. The DoD expanded the use of business-like financial management practices through the establishment of the Defense Business Operations Fund (DBOF) on October 1, 1991. Building on Stock and Industrial Fund principles, cost and performance are linked and the Fund’s managers are expected to operate within cost goals established in operating and capital budgets.

1.3.6. The DBOF combined existing operations that were previously managed as individual funds into a single Treasury account. On December 11, 1996, the USD(C) reorganized the DBOF, retaining the numerous benefits and improvements resulting from the implementation of DBOF while clearly establishing each DoD Component’s responsibility for managing the functional and financial aspects of their respective WCF activities, by creating four DoD Component WCFs: Army, Navy, Air Force, and Defense-Wide. On December 16, 1997, a separate DoD Component WCF was established to consolidate the separate Military Departments’ commissaries into the Defense Commissary Agency effective in FY 1999.

1.3.7. Prior to FY 1992, industrially-funded activities did not receive Annual Operating Budget (AOB) funding documents. All funding authority was provided through customer orders. With the implementation of the DBOF, the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) began to issue AOBs that provide official and administrative management cost goals and contract authority for the Capital Investment Program (CIP) for each WCF activity within a DoD Component. The Department has retained this process for the WCFs.

*1.4 Cash Management Policy

1.4.1. The Components will maintain a positive, daily cash balance at levels exceeding the minimum necessary to meet operating, capital investment, and other justified requirements throughout the year and to support continuing requirements into the subsequent year. Cash generated from operations is the primary means of maintaining adequate cash levels. The ability to maintain sufficient, appropriate cash levels is dependent on setting rates to recover full costs to
include prior year losses, projecting workload accurately, and meeting established operational goals.

1.4.2. Cash management and accountability are integral parts of operational and cost management. Each DoD Component is responsible for managing its cash at the activity group level and in compliance with applicable laws and guidelines. Components must manage cash at each subordinate DWCF sub-account, organization, and activity, since most cash transactions occur and cash is most effectively controlled at these levels. Components must submit budget exhibits (Fund-13, and Fund-13b) for each activity group that displays plans to maintain cash balances within the lower and upper operating range. The ending cash balance must be above the lower operating range at the end of each budget year. Decentralizing cash management to the activity group level provides the DoD Components with additional control, because each level of management becomes an accountable participant in the execution of the cash plan or policy.

1.4.3. In addition to proper rate setting, cash managers at all levels should employ the management mitigation strategies available to control cash flows and cash balances to the full extent possible. These cash management tools include, but are not limited to:

1.4.3.1. Negotiating the timing of customer order receipt, completion and the related collections;

1.4.3.2. Controlling the timing of delivered goods/services from the supplier/service provider and the related disbursements;

1.4.3.3. Requesting policy waivers when necessary from the OUSD(C) Program/Budget (P/B) Director or Deputy Director for Revolving Funds, for example: an approval for an out-of-cycle rate adjustment, or non-recoverable costs to maintain/reduce cash.

1.4.4. The DoD Components and cash managers at all levels should consider the following when determining appropriate levels of cash to budget and maintain.

1.4.4.1. Effective cash management is dependent on the availability of accurate and timely data on cash activity, demand planning, rate setting, and operational results.

1.4.4.2. Activities must budget to achieve an operating cash level that will maintain a positive cash balance throughout the year within the upper and lower operating range, and an adequate ending balance to support continuing operations into the subsequent year. In determining required cash levels, activities will document average disbursements and the expected range of cash balances, adjusted to accommodate seasonality, known changes in the business environment, and the inherent risk associated with estimation error and unplanned events outside management’s control.

1.4.4.3. Each DoD Component and subordinate activity, command, or business line must establish a cash requirement based on business events, trends, activities, and risks relevant to its operations. The cash requirement will be developed based on four primary elements: 1) the rate of disbursements, 2) the range of operations, 3) risk mitigation, and 4) reserves. The
amount of cash needed for each of the four cash requirement elements will be determined by the DoD Component and presented by activity in the exhibit, Fund-13b, Cash Requirements, which will be reviewed and approved by Revolving Funds Directorate during the Program and Budget Review (PBR). The four cash requirement elements are explained further in the instructions to the Fund 13b and also in the following four paragraphs.

1.4.4.4. Rate of Disbursement. The rate of disbursement is the average amount disbursed between collection cycles. It is calculated by dividing the total amount of disbursements planned for the year by the number of collection cycles planned for the year. The rate describes the average amount of cash needed to cover disbursements from one collection cycle to the next. Changing the number of collection cycles can influence the amount of cash needed to cover the volatility created by cyclical collections. Both the average disbursements and the number of collection cycles will be based on authoritative, auditable data.

1.4.4.5. Range of Operations. The range of operations is the difference between the highest and lowest cash level required based on budget assumptions and past experience. Cash balances are not static and volatility can be expected due to annual, quarterly, and more frequent seasonal trends and significant one-time events. Historical trends should be normalized for such factors as Annual Operating Result (AOR) return/recovery, capital investments, the amount of work, and changes in operations, and used to estimate future fluctuations in cash flows and balances. Studying the causes of cash volatility enables the development of strategies for reducing the range of operation and the amount of cash required for normal operations.

1.4.4.6. Risk Mitigation. Some amount of cash is required, beyond the range of operation, to mitigate the inherent risk of unplanned and uncontrollable events. Examples of these risks are budget estimation error, commodity price fluctuation, and other contingency or response missions. The amount of cash held for risk mitigation will depend on the activity’s sensitivity to anticipated types of risk, the effectiveness of other cash management and risk mitigation tools, and management’s level of risk tolerance.

1.4.4.7. Reserves. Cash reserves are funds held for known future requirements. This element identifies cash on hand that must be kept for specific requirements that are not expected to disburse until subsequent fiscal years. Examples of reserve requirements include return of AOR, advances/pre-payments received, liquidation of unexpended appropriations, liquidation of unpaid obligations, and planned capital investments. Since reserves are only for specific known requirements, they may not be needed every year.
1.4.4.8. The following figure depicts how the four elements (rate, range, risk mitigation, and reserves) come together to build the complete cash requirement.

1.4.4.9. Components will develop monthly phased cash plans, incorporating collections, disbursements, appropriations, and other cash transactions based on Component estimates, to facilitate the cash management process. The plans will be initially developed during the budget process and will be an integral part of the budget document (Fund-13).

1.4.4.10. Components will monitor and control to the extent possible execution of collections and disbursements to ensure a sufficient cash balance is maintained throughout the year. Components will also monitor execution against monthly phased plans to increase management attention on reducing costs, emphasizing timely billing, collecting revenue, and disbursing. Components should consider leveraging the aforementioned available cash management tools when cash execution is trending below/above plan for more than three consecutive months of execution.

1.4.4.11. Components must be able to reconcile and explain variances between cash balances and AOR. In addition to explaining variances based on operations, components must also explain events that affect cash but not revenues and expenses.

1.4.5. Transfers of cash between DWCF activities, whether directed internally by the Components or as the result of audit, Departmental guidance, or Congressional direction, will be included in all the affected activities’ budgets (Fund-13). Transfers between DoD Component WCFs (e.g., Army to Air Force) or between the DWCF and appropriation-funded activities require Congressional approval.

1.4.6. Advance Billings.

1.4.6.1. The term “advance billing” means a billing to a customer by the fund, or a requirement for a customer to reimburse or otherwise credit the fund, for the cost of goods or services provided (or for other expenses incurred) on behalf of the customer. The term “customer” means a requisitioning component or agency.
1.4.6.2. Except as provided in paragraph f, the total amount of advance billings executed by the Department for a fiscal year may not exceed the amount specified in 10 U.S.C. § 2208 (l) or as amended by public law.

1.4.6.3. Components may use advance billings of customers as a cash mitigation strategy. The OUSD(C) or the Military Department, as applicable, must submit written notification to Congress within 30 days after the end of the month in which the advance billing is made. The notification must include the reasons for the advance billing, an analysis of the effects of the advance billing on military readiness, and an analysis of the effects of the advance billing on the customer. Military Departments must provide the Revolving Fund Directorate copies of all advance billing notification letters provided to Congress. Defense agencies will submit their requests to the Revolving Fund Directorate, who will notify Congress on their behalf.

1.4.6.4. Advance billing requires authorization within the activity’s Annual Operating Budget (AOB). Components will request this authority and, if approved, the Advanced Billing Authority will be added to their AOB.

1.4.6.5. Advance payments received from non-federal entities are not subject to 10 U.S.C. § 2208, advance billing limitations, and are required by Volume 11B, Chapter 11. The billing of customers by Supply Management Activities upon shipment rather than delivery also is not subject to paragraph (l) advance billing limitations.

1.4.6.5.1. 10 U.S.C. § 2208, paragraph (l)(4) provides that advance billing for background investigations and related services performed by the Defense Counterintelligence and Security Agency is not subject to section 2208’s congressional notification requirements and dollar limitations.

*1.5 Capital Investment Program (CIP) Policy

These policy statements address preparation of the PBR submission.

1.5.1. The legal requirements related to the CIP are found in 10 U.S.C. § 2208, paragraphs (k), (m), and (o). The legal requirements for unspecified minor military construction projects are found in 10 U.S.C. § 2805.

1.5.2. The CIP may be used by WCF activities to purchase capital assets meeting the criteria in 10 U.S.C. § 2208, paragraph (k).

1.5.3. With the exception of major military construction and items listed in paragraphs 1.5.6 and 1.5.9 below, acquisition of all capital assets for use by activities within the Fund will be financed through the Fund using contract authority. Components may not use the CIP to establish a new or expand an existing organic capability except as specifically justified in the President’s Budget Request (Exhibit Fund-9b, “Capital Investment Justification”).
1.5.4. Revolving Fund activities outside the DWCF that are not authorized contract authority (e.g. the PRMRF) must build the full cost of capital investments into their rate structure to ensure funds are available prior to obligation.

1.5.5. The CIP consists of the following four major categories of assets: 1) Automated Data Processing Equipment (ADPE); 2) Non-ADPE Equipment; 3) Software Development, whether internally or externally developed; and 4) Minor Construction.

1.5.6. The WCF Capital Budget specifically excludes the following items, which must be financed by appropriated funds.

1.5.6.1. Major Range and Test Facility (MRTF) installations (equipment and minor construction) that meet the DoD Investment capitalization criteria in accordance with 10 U.S.C. § 2208, paragraph (k).

1.5.6.2. Military and tenant support functions

1.5.6.3. Major weapons systems (such as aircraft, ships, tanks, barges, etc.), and general-purpose passenger type vehicles

1.5.6.4. Equipment and minor construction projects for mobilization requirements, but not used during peacetime operations

1.5.6.5. Equipment initially procured and usually furnished as part of a weapons system and/or support system including modifications (includes initial common support equipment for depot maintenance support of new weapons systems)

1.5.6.6. Materiel normally funded by appropriated funds and provided to contractors as Government-Furnished Materiel (GFM). The GFM is incorporated into, used in conjunction with, or consumed in the production of an end product. The customer must use appropriated funds to purchase the GFM and provide it at no cost to the WCF

1.5.6.7. Minor construction projects for non-WCF activity or military support functions

1.5.6.8. Construction and facility investment projects that exceed the amount specified in 10 U.S.C. § 2805 for funding under Operation and Maintenance appropriations

1.5.6.9. Environmental projects financed or submitted for funding by the applicable Environmental Restoration Transfer appropriation

1.5.6.10. Capital Investments for morale, welfare, and recreation activities

1.5.6.11. Such other exclusions as may be approved by the USD(C).

1.5.7. The AOB permits a WCF activity to obligate contract authority to purchase capital assets prior to receiving funded customer orders and collecting cash from customers. Those
obligations must be funded by offsetting collections since cash does not come with contract authority.

1.5.8. As an administrative control of resources subject to the rules of 31 U.S.C. § 1517, the Anti-Deficiency Act, the AOBs provide a specific amount of CIP contract authority. Therefore, obligations may not exceed the amount provided on the AOB.

1.5.9. The WCF customers may procure capital assets through direct appropriations for use by a WCF activity. However, these assets remain the property of the customer and will not be recorded as Property, Plant and Equipment assets on revolving fund financial statements unless the asset is transferred to WCF ownership.

1.5.9.1. At the time of transfer, the WCF activity will record the asset at its net book value and depreciate it for accounting purposes over the remaining useful life. Depreciation does not have to be incorporated into the WCF rate structure if the WCF did not outlay any cash resources. If the asset is expected to be replaced at the end of its useful life, then a capital surcharge may be collected prior to the acquisition of the replacement asset.

1.5.9.2. The appropriate procurement account will continue to fund the purchase and installation costs for the initial procurement of depot maintenance capital equipment unique to newly introduced platforms or weapon systems (this includes modifications). The capital equipment becomes the property of the depot when it is transferred to or otherwise capitalized by the depot. The depot will treat the equipment as a capital asset and depreciate it for accounting purposes. Funding of subsequent replacement and maintenance of the equipment in the DWCF should be included in the DWCF capital and operating budgets.

1.5.10. WCF activities must recover costs to purchase capital assets by including a Capital Investment Recovery (CIR) factor in rates billed to customers. The CIR factor is the amount added to the rate to substitute and then liquidate contract authority obligated to purchase capital assets. To do this, the Component will allocate a portion of the collections from revenue on customer orders to liquidate the contract authority. This process allocates cash (i.e. FBwT) from the operating program to the capital program. The amount of collections used to liquidate contract authority will equal the amount of obligated contract authority at the end of each FY, net of any decreases to contract authority or contract authority withdrawn. If there are insufficient budgetary resources to liquidate the full amount of contract authority obligated, then at a minimum, the Activities must liquidate enough to cover outlays associated with CIP. This will ensure there is sufficient cash in the capital program to fund outlays associated with the obligated contract authority. The CIR factor will differ from the depreciation expense. Collections associated with the CIR fund capital outlays while depreciation expense is an allocation of costs over an asset’s useful life.

1.5.10.1. In addition to the CIR, a capital surcharge may be used to collect cash for the capital outlay if minimum balances are not sufficient to provide adequate budgetary resources to offset budgetary claims (See Volume 3, Chapter 19).
1.5.11.  Guidance on accounting for capital assets is contained in Volume 4, Chapter 24, Chapter 25, Chapter 26, and Chapter 27.

1.5.12.  The following budget exhibits are required to document an activity’s capital budget request.

1.5.12.1.  Exhibit Fund-9a, “Capital Investment Summary,” represents the summary data of the four asset categories (ADPE, Non-ADPE, Software, and Minor Construction) at the approved DoD Component aggregate project line item level. The exhibit displays data on annual capital obligations, cash outlays, and budgeted CIR. The prior-year column on the Exhibit Fund-9a will show all amounts approved in the most recent President’s Budget, adjusted for actual project year obligations, additional authorizations and all reprogramming (as depicted on the Exhibit Fund-9c, “Capital Budget Execution”).

1.5.12.2.  Exhibit Fund-9b, “Capital Investment Justification,” provides detailed cost data and narrative justification for each approved DoD Component aggregate project line item level. Components will provide a corresponding Exhibit Fund-9b for each aggregate project line item on the Fund-9a exhibit. The exhibit displays the Benefit to Investment Ratio, Savings to Investment Ratio and/or the Payback period. Exhibits Fund-9a and Fund-9b data should agree with, and also should be used for cross-referencing, Exhibit 53 of the Information Technology budget.

1.5.12.3.  Exhibit Fund-9c, “Capital Budget Execution” compares and explains the differences between the most recent President’s Budget and the current submission by the DWCF activity for the four asset categories (ADPE, Non-ADPE, Software, and Minor Construction). This includes prior year (PY) execution adjustments and adjustments to the current year (CY) due to unexecuted programs or new emerging requirements. Adjustments to project years not displayed in the budget submission are not recorded on the Fund-9c.

1.5.13.  Each proposed CIP project must be reviewed to ensure that it satisfies the following criteria for justification and backup:

1.5.13.1.  The acquisition of a capital asset meets the Department’s long-range planning and programming objectives and satisfies a documented need for capability to perform valid operations, functions, or services that cannot be performed as effectively or economically by the use of existing equipment and facilities or by contract.

1.5.13.2.  The acquisition of a capital asset complies with policies and regulations governing the acquisition and management of facilities, special tooling, and special test equipment as established by DoD Directive 4275.5, “Acquisition and Management of Industrial Resources,” as well as other applicable policies and regulations governing the lease and acquisition of equipment and facilities.

1.5.13.3.  The workload projections used to justify capital purchases take into account the results of inter-service decisions, workload posture planning decisions, readily
available commercial alternatives, and other reasonable options available for accomplishing applicable work load.

1.5.13.4. The acquisition of a capital asset efficiently and effectively accomplishes the objective for which it is justified. The criteria are: improved efficiency (savings) or effectiveness of operations; replacement of unsafe (locally determined by an authorized safety representative), beyond economical repair, or inoperative and unusable assets; and environmental, hazardous waste reduction, or regulatory agency (state, local, or Federal) mandated requirements.

1.5.14. A formal pre investment analysis or a cost comparison is required to justify investment projects for capital budget submissions in the four investment categories (ADPE, Non-ADPE, Software, and Minor Construction).

1.5.14.1. Either an economic analysis or cost comparison will be used to support a project substitution or accomplish a reprogramming request. An economic analysis will be used for all projects with a cost of $5,000,000 or more. A cost analysis will be used for projects under $5,000,000.

1.5.14.2. Activities must complete this pre-investment analysis prior to including the capital asset in the capital budget submission, a reprogramming action, or a project substitution. The originating office of the DoD Component will maintain these analyses as project documentation support for the capital budget submission and program execution.

1.5.14.3. A cost comparison for investment projects under $5,000,000 will be prepared in constant base year dollars and present a differential cost display by year for up to a 6-year evaluation period, beginning with the budget year for which investment funds are requested.

1.5.14.3.1. Documentation for a cost comparison should describe the functional process performed; define the need/requirement/objective; present and explain workload projections; address feasible alternatives; present total costs attributed to each alternative and the differential costs/monetary benefits expected in constant and current dollars over the 6-year evaluation period; and provide significant assumptions, constraints, estimating methods, rationale, data sources.

1.5.14.3.2. The payback period should be the primary economic indicator used for cost comparisons to rank order within the investment categories of each activity.

1.5.14.4. A pre-investment economic analysis should be prepared to justify capital investment projects of $5,000,000 or more. The economic analysis should be prepared on a net present value (NPV) basis and must comply with applicable DoD or Component guidance and functional program guidance. The economic analysis initially should be prepared in constant base year dollars and should present a differential cost display by year over the project’s expected economic life, beginning with the budget year of the investment fund request.

1.5.14.4.1. Documentation should describe the functional process performed; define the need/requirement/objective; present and explain workload projections;
identify feasible alternatives; present total costs and the differential costs/monetary benefits in constant, discounted, and current dollars over the expected economic life of the project; present estimating methods/relationships, and data sources; identify significant constraints, assumptions, and variables; treat sensitivity and uncertainty of key parameters; and address all other quantifiable benefits as well as any intangible benefits influencing the recommended course of action.

1.5.14.4.2. Quantifiable benefits are all outputs/results achieved in return for investment dollars associated with an alternative.

1.5.14.4.3. Benefit-to-Investment Ratio (BIR) should be the primary indicator used to rank order projects of $5,000,000 or more within the investment categories of each activity. Also consider the payback period in the ranking process.

1.5.14.4.4. Automated economic analysis programs and reports may be used if the programs provide comparable information to that of standard economic analysis reports.

1.5.14.5. Compute the payback period to compare the period of time, in years, necessary for an alternative to repay its investment cost based on the monetary benefits expected. Present this metric in tenths of years (for example, 7.2 years.)

1.5.14.6. Use the BIR to compare project alternatives in terms of all expected monetary benefits, inclusive of whole and partial manpower productivity savings resulting from increased efficiency and other cost avoidance achieved over the total project life under evaluation. Calculate the BIR using discounted constant dollars, as an index value and rounded to two decimal places. A BIR of greater than one indicates the project is cost-beneficial; the larger the ratio, the greater the advantage of the project.

1.5.14.7. Calculate the Savings-to-Investment Ratio (SIR) between actual savings in terms of funds no longer required and the investment cost for Automated Information Systems, using discounted dollars.

1.5.14.8. A post-investment analysis should also be done after project completion to assess the actual costs and benefits and inform future investments.

1.5.14.9. Exemptions to the investment analysis include environmental, hazardous waste reduction, or regulatory agency (state, local, or Federal) mandated requirements. This includes action directed by a higher DoD or Component authority that precludes a choice among alternatives, and DoD instruction or other directive that waives the requirement (e.g., equipment age or condition replacement criteria).

1.5.15. Internal Use Software as defined in DoDI 5000.76 is: Acquired or developed to meet the entity’s internal or operational needs (intended purpose); A standalone application, or the combined software components of an IT system that can consist of multiple applications, modules, or other software components integrated and used to fulfill the entity’s internal or operational needs (software type); Used to operate an entity’s programs (e.g. financial and administrative software, including that used for project management); Used to produce the entity’s goods and to
provide services (e.g., maintenance work order management, loan servicing); or Developed or obtained for internal use and subsequently provided to other federal entities with or without reimbursement. This excludes software that is integrated into and necessary to operate general property, plant, and equipment.

1.5.15.1. Software that is integrated into hardware and is necessary to operate the hardware, rather than to perform an application, should be budgeted with and capitalized as part of the hardware. Systems application software, however, should be budgeted separately as either an expense or a capital investment, depending on whether it meets the criteria for a capital asset.

1.5.15.2. Budget for new acquisitions of and improvements to software by project. The full scope of a software development project may consist of costs incurred in: 1) Preliminary Design, 2) Software Development, and 3) Post Implementation. While all of these costs are part of the project, only the software development phase is capitalized. Refer to Volume 4, Chapter 27 for more information on the accounting requirements.

1.5.15.2.1. The preliminary design phase consists of conceptual formulation of alternatives, evaluation and testing of alternatives, determining the existence of needed technology, and final selection of an alternative. This phase consists of all functional actions, including source selection for COTS and all actions prior to Systems Requirements Specification for internally developed software. Expense the preliminary design phase costs as part of the operating budget and identify them on the Exhibit Fund-1a, “Details of Price and Program Changes - Costs.”

1.5.15.2.2. Capitalize the software development phase consisting of the design of a chosen alternative including software configuration and interfaces, coding, installation of software and related hardware, and testing, which may include parallel processing development of user manuals and training.

1.5.15.2.3. Expense the post implementation/operational phase costs of data conversion and application maintenance, including functional training and documentation, operational testing, and evaluations conducted after technical acceptance of the software.

1.5.15.3. Exclude from the capital budget all costs incurred prior to Milestone 0, Concept Exploration and Definition. Expense costs such as basic research, study, exploratory development establishing feasibility and practicality of proposed solutions and rough order of magnitude estimates. Also expense costs for technical software support and maintenance software support occurring after system installation.

1.5.15.4. Only include those software development or acquisition efforts for the benefit of the activity in the DWCF capital budget submissions. Software developed or acquired for a specific customer order should be charged to and reimbursed by the requesting customer. Types of cost to be included in a software development project include total labor and non-labor costs such as: 1) all direct costs for civilian and military personnel; 2) contractor labor; 3) supplies; 4) travel; 5) processing support for testing; 6) indirect production costs; and 7) general and
administrative (overhead) costs (e.g., base operations support, higher headquarters, and costs for central design activity-owned assets).

1.5.15.5. Software projects may be accomplished in modules. A module is an application that may be operated or used independent of other modules within a system. Where an entire system consists of more than one severable module, request funding for each severable module in the year that the module is started. Funding requests must be sufficient to complete the module. If several modules make up a complete ADP system, show the cost of all modules related to the system.

1.5.15.6. Separately identify ADP equipment and ADP software in the capital budget.

1.5.15.7. In accordance with 10 U.S.C. § 2222, paragraph (c) and DoDI 5000.75, current services (CS), development and modernization (DevMod) to a business system with budget authority and/or spending of $250 million or more over the Future Years Defense Program (FYDP) for Priority Defense Business Systems or $25 million or more for Fourth Estate Defense Business Systems over the FYDP must be approved by the Defense Business Council (DBC) tri-chaired by the Director, Administration and Management (DA&M), OUSD (C), and DoD CIO for certification prior to obligating funds.

1.5.16. Unspecified minor military construction projects costing more than the threshold established in 10 U.S.C. § 2805 must be funded within the DoD Component’s Military Construction appropriation. Exceptions to this limitation are noted below in 1.5.16.1.

1.5.16.1. Authority provided by 10 U.S.C. § 2805, paragraph (c) to use funds available for operation and maintenance for unspecified minor construction projects costing not more than the threshold established therein is available for DWCF-funded unspecified minor construction. However, projects that have an estimated cost that exceed the thresholds established in 10 U.S.C. § 2208 that have not been documented in a corresponding budget exhibit (Exhibit Fund-9b, “Activity Capital Investment Summary”) must be approved through the Congressional notification process or in a subsequent budget and displayed as an adjustment on the Exhibit Fund-9c, “Capital Budget Execution.” The approval will be reflected in the Component’s Annual Operating Budget.

1.5.16.2. In 10 U.S.C. § 2805, paragraph (d), Congress authorized a DoD Laboratory Revitalization Program that increases to the upper ceiling threshold for certain minor construction projects at DoD laboratories. The authority is not permanent, but is subject to periodic congressional extension. Laboratory Revitalization Program projects must be for the revitalization and recapitalization of Defense laboratories owned by the U.S. and under the jurisdiction of the Secretary of Defense or a Military Department. In accordance with 10 U.S.C. § 2805, paragraph (d)(3) any projects using the Laboratory Revitalization Program requires the concerned Secretary to provide the appropriate Congressional committees a 14 day notification prior to obligation of funds. Fund activities designated to participate in the DoD Laboratory Revitalization Program must obtain prior approval from the Director or Deputy Director for Revolving Funds for all
projects estimated to exceed the thresholds established in 10 U.S.C. § 2208 so that those projects can be specifically identified in the capital program within the AOB prior to project execution.

1.5.16.3. Capital investment costs financed in the minor construction portion of the capital budget include project planning and design costs associated with minor construction projects. Planning and design costs are not included as part of the statutory threshold for minor construction projects.

1.5.17. DoD Components may reprogram capital funds between DWCF activities, or categories or projects within a DWCF activity. There is no minimum or maximum limit on this type of reprogramming. Except as noted below, capital reprogramming does not require the written approval of the Director or Deputy Director for Revolving Funds in the form of a signed AOB. The following approval levels and dollar threshold apply to changes to projects approved in the capital budget including reprogramming, substitutions, cancellations, and additions:

1.5.17.1. Obtain certification from the approval authority as directed in the guidance displayed in DoDI 5000.75. All transfers between information technology capital projects (ADP Equipment and Software) must be documented in the Activity’s next AOB, but will not require a new AOB solely for such documentation.

1.5.17.2. Fund managers may approve transfers between the Non-ADP Equipment and Minor Construction categories or among their individual projects. Components are required to document the transfers in the activity’s next AOB, but will not require a new AOB solely for such documentation. CIP transfers between DWCF activities within a DoD Component (e.g., supply to non-supply) must be approved by the Director or Deputy Director for Revolving Funds, in the form of a signed AOB, before the transfer is executed.

1.5.17.3. Components must charge capital obligation adjustments to the program year cited in the President’s Budget for the original project. The prior year capital investment program limitation is equal to actual obligations on September 30 of that fiscal year plus adjustments approved by the Director or Deputy Director for Revolving Funds to the prior year program. Fund managers may request approval to carry over authority for any unobligated capital projects before the end of the fiscal year.

1.5.17.4. Capital obligation authority may be adjusted for prior year within-scope increases provided that there is contract authority available to finance the increase. Before making such increases, the Component must have equal off reductions (deobligations) of current year capital authority to finance the prior year increase. Prior approval from the Director or Deputy Director for Revolving Funds is only required if cumulative adjustments exceed 20 percent of the total CIP budget of the current fiscal year. All adjustments should be documented in the activity’s next AOB, but will not require a new AOB solely for such documentation.

1.5.17.5. For current fiscal year capital projects that will not obligate by September 30, components must request in writing permission to carry over these projects via a memo to the Director or Deputy Director for Revolving Funds. If the Director or Deputy Director for Revolving Funds approves the request in a signed memorandum, the approved carry over
amounts for projects not obligated by the end of the fiscal year will be carried forward to the next fiscal year’s AOB.

1.6 Mobilization/Surge Costs and War Reserve Materiel

1.6.1. Mobilization capability costs include the costs to maintain a surge capacity; procure and maintain approved war reserve materiel levels; and/or maintain other assets, functions, or capabilities required to meet an operational contingency as documented in Defense planning guidance or operational plans.

1.6.2. The DWCF activities should identify all costs related to maintaining a capacity to meet mobilization requirements. These costs are not considered normal operating costs and may be reimbursed by direct appropriations so that customer rates are not burdened by contingency requirements.

1.6.2.1. War Reserve Materiel. Obligations for the procurement of war reserve materiel must be funded by a direct appropriation to the Fund with one exception; if Congress is notified, and a cost recovery rate is included in the rates, contract authority may be used. Such appropriated amounts for secondary items must be reflected as a separate goal within the applicable Supply Management or Commissary Resale activity AOB. Use the SM-6 “War Reserve Materiel” exhibit to justify War Reserve Materiel Requirements.

1.6.2.2. Unutilized and Underutilized Plant Capacity.

1.6.2.2.1. Unutilized/Underutilized Plant Capacity (UPC) represents costs associated with maintaining facilities to meet surge capacity needed for mobilization or war. The UPC is a mobilization requirement budgeted in and funded by Operation and Maintenance appropriated funds of the DoD Component responsible for the activity’s management. Do not include UPC costs in the DWCF rate structure. As a general rule, UPC funding includes the prorata facilities support costs for any month in which 1) mobilization facilities are not used or 2) facilities are used 20 percent or less of available work days.

1.6.2.2.2. Mobilization expenses related to UPC may include both maintenance and labor costs related to mobilization.

1.6.2.2.3. Each non-supply DWCF activity should prepare a UPC Budget Exhibit (Fund-30). This exhibit documents total capacity, Unutilized Capacity Index, justification, and cost used in developing the request for UPC. All non-supply DWCF activities should complete the three capacity-index metrics found in Part I of the exhibit. Any non-supply activity requesting UPC funding will also complete the funded UPC line in Part I and the UPC justification in Part II of the exhibit.

1.6.3. Industrial Mobilization Costs. The Army established a category of costs that includes both UPC and underutilized facilities cost called “Industrial Mobilization Cost.” The Army will use the Exhibit Fund-30, “Underutilized Plant Capacity” to justify their IMC costs.
1.6.4. Airlift Readiness Account (ARA). The U.S. Transportation Command (USTRANSCOM) must maintain sufficient airlift capability to respond to transportation requirements for a wide variety of mobilization conditions. This requirement exists in both peacetime and contingency environments. To the extent customer revenue is insufficient to support the costs of maintaining this capability; the Air Force must provide appropriated funds from the ARA. USTRANSCOM will coordinate with military services and Combatant Commanders to understand airlift workload requirements and adjustments to workload projections on a routine basis. USTRANSCOM must provide the Air Force with the budgeted ARA amount that will be part of the Transportation Working Capital Fund Budget Estimate Submission (BES) and President’s Budget with enough lead time for the Air Force to incorporate in its budget submissions. The Air Force must submit a matching amount in its BES and President’s Budget submission within its Operation & Maintenance account. USTRANSCOM must submit the Fund-8, “Air Mobility Command Common User Services” exhibit to justify the ARA requirement. The USTRANSCOM will record as a funded order and revenue.

1.7 Military Personnel

1.7.1. Components will use the civilian-equivalent rates provided by the OUSD(C) to price military labor at DWCF activities. The difference between the civilian-equivalent costs, included in the DWCF budget, and the actual military personnel cost will be budgeted directly in the appropriate military personnel appropriation. The number of military included in the budget should be the average strength of military assigned to the DWCF business, using the average fill rate for the 3 prior fiscal years, unless there is a significant change projected in the budget year. The fill rate is calculated by dividing actual average strength by the authorized strength for each grade. The budget amount will equal the average strength for each grade multiplied by the applicable civilian-equivalency rate.

1.7.2. The amount expensed for military personnel by DWCF activities and the amount reimbursed to the appropriate military personnel appropriation will equal the amount budgeted. No adjustments will be made to the DWCF cost of operations to reflect the actual cost of military personnel employed by DWCF activities. Military Departments having military personnel assigned to other Components will provide to each Component the number of work years that should be included in the DWCF budget submission. The DWCF activities that augment their manpower requirements with National Guard or Reserve personnel, to include those participating in the Personnel Force Innovation (PFI) program, will reimburse the appropriate military personnel appropriation at the DWCF civilian-equivalency rates.

1.7.3. The civilian-equivalent costs are provided by the OUSD(C) and are calculated in accordance with Volume 11A, Chapter 6.

1.7.4. See Volume 2A, Chapter 1 for active duty military personnel pricing policy.

*1.8 Full Recovery of Costs and the Setting of Prices

1.8.1. Managers of DWCF activities within each Component will set their prices based on full cost recovery, including all general and administrative support. Prices are established by the
budget process and are represented at the aggregate level in the form of a composite rate. Prices and corresponding rates should remain fixed during the year of execution (exceptions are listed in Volume 11B, Chapter 15). This stabilized price policy serves to protect customers from unforeseen inflationary increases and other cost uncertainties and better assures customers that they will not have to reduce programs to pay for potentially higher-than-anticipated prices. In turn, this policy allows activities to execute the budgeted program level and permits a more effective use of DWCF resources.

1.8.2. Except in unusual circumstances, prices for the budget year will be set to break even over the long run at the activity level. This means that prices will be set to achieve an AOR of zero in the budget year, provided that cash and budgetary resources are available to support AOR returns. In budget execution, activities will incur either a positive or negative operating result. Accordingly, activities will increase their budget year prices to make up actual or projected losses of budgetary resources or reduce their budget year prices to return actual excess cash resources or projected budgetary gains to customers.

1.8.3. An activity may request recovery of AOR outside the budget year. This request must be included in the budget submission, and must demonstrate that the alternative recovery period will not adversely affect the cash balance of the activity. A phased recovery schedule must be provided with the budget.

1.8.4. Special Circumstances: DWCF rules for pricing and operating loss recovery or gain distribution may be waived or deferred if one or more of the following conditions exist.

1.8.4.1. Fund Liquidity: Component fund managers must maintain a positive cash balance throughout the year. The cash requirement developed on the exhibit, Fund 13b, Cash Requirements, provides a management guide for maintaining cash sufficiency. Several factors, however, could cause activities to operate outside the requirement range. To prevent the buildup of excess cash balances, or to ensure fund solvency, the Director or Deputy Director for Revolving Funds may direct out-of-cycle rate adjustments at any time during the fiscal year.

1.8.4.2. Depot Maintenance Additional Requirements: If Component cash balances are projected to be sufficient (see paragraph 1.4) by the end of the budget year, depot maintenance activities will recoup losses and return gains in the budget year. However, if cash balances will be outside the cash requirement range, an out-of-cycle rate adjustment or surcharges may be directed, to restore cash to appropriate levels, at any time in accordance with paragraph 1 above. Also, unplanned depot losses recouped in subsequent years may be financed with prior year resources, provided all other criteria associated with prior year upward obligations are met.

1.8.4.3. Contingency or Emergency Operations: Fund managers may waive DWCF pricing and financing requirements to facilitate Department operations during times of war or other national emergencies. The DWCF activity must notify the Director and Deputy Director for Revolving Funds in writing within 30 days of this action.
1.8.4.4. Impact of Foreign Currency Exchange Rates: A DWCF activity operating overseas may experience significant operating losses or gains due to changes in foreign currency exchange rates.

1.8.4.4.1. While these operating losses and gains are normally recovered or returned through stabilized rate adjustments in budget years, fund managers may propose out-of-cycle rate adjustments to the Director and Deputy Director for Revolving Funds to address such losses and gains in execution. In calculating any gain or loss from foreign currency fluctuations, the DWCF must use the foreign currency exchange rates published as part of the Department’s budget justification materials submitted to Congress in support of the President’s budget request and follow applicable procedures in Volume 6A, Chapter 7.

1.8.4.4.2. The DWCF activities are not eligible to participate directly in the Foreign Currency Fluctuations, Defense (FCF,D) (97-X-0803) and the Foreign Currency Fluctuations – Construction, Defense (FCF-C,D) (97-X-0801) accounts.

1.8.4.5. In addition to spreading contract costs when developing rates for all customers, the DWCF activities may incur and recover costs for contracts awarded specifically to fill the requirements of one customer by charging that customer an amount equivalent to the DWCF activity’s expense in funding, awarding, and administering the contract.

1.8.4.6. Unbillable costs and operational losses that cannot be billed to an identifiable customer or that were generated from unforeseen cost overruns are to be treated as costs in the fiscal year in which the costs were incurred. The resulting operating losses must be included in calculating net and accumulated operating results.

1.8.4.7. Unless approved in writing by the Director or Deputy Director for Revolving Funds as an out-of-cycle rate adjustment, the prices must be consistent with the rates set for all activity products, goods, or services approved during the budget review and documented in a memorandum signed by the USD(C), or designated representative.

1.8.4.8. Reimbursement procedures humanitarian efforts are as follows:

1.8.4.8.1. Users must pay for the goods and services provided by all DWCF activities, including deployment or other emergency response for military or humanitarian assistance.

1.8.4.8.2. See Volume 11B, Chapter 11, Section 2.7 for guidance.

1.8.4.8.3. Consistent with this policy, third party collections for transportation provided in response to a Request-for-Assistance (RFA) from another government agency are prohibited. The Military Department that controls the equipment or personnel is responsible for reimbursing USTRANSCOM. It is then the responsibility of the Military Department that accepted the RFA to collect any required reimbursements due that Military Department by the requesting government agency.
1.8.4.8.4. The sole exception to this policy occurs when the USTRANSCOM receives an order from the Joint Chiefs of Staff requiring transportation of non-U.S. owned equipment and/or non-U.S. personnel such as non-reimbursed efforts in support of the United Nations. In those instances, the Army will pay Surface Deployment and Distribution Command (SDDC) costs, the Navy will pay Military Sealift Command (MSC) costs, and the Air Force will pay Air Mobility Command (AMC) costs. Bills may be centralized for more convenient processing if appropriate; however, billings must be forwarded to the appropriate Military Department within 30 days from the commencement of service or humanitarian effort. The Military Departments must pay these bills, including transportation bills, in a timely manner.

1.8.4.8.5. This guidance does not address any contingency operation designated by the Secretary of Defense as a “National Contingency Operation” under the provision of the 10 U.S.C. § 127. Special rules apply for such an operation and those rules should be promulgated separately in conjunction with any designation by the Secretary under the provisions of that section.

1.8.4.9. Base Realignment and Closure (BRAC) cost reimbursement policies are as follows:

1.8.4.9.1. **BRAC-Related Costs.** Costs incurred in implementing the recommendations of the BRAC Commissions will be funded by the appropriate BRAC account and are not to be included in the rates and costs of businesses within the Fund. The DWCF activities may incur BRAC expenses prior to receiving an allocation of BRAC funding; however, all costs properly charged against the BRAC account must be reimbursed with BRAC funds. The DWCF activities may not expend funds prior to complying with the notification requirements imposed by law with respect to the obligation of BRAC funds. The BRAC account must reimburse all costs incurred by DWCF activities to carry out BRAC prior to the end of the fiscal year in which costs were incurred. Prior year, current year, or budget year operating losses in DWCF are not to be budgeted in the base closure accounts. Costs attributable to base closure actions at DWCF activities to be budgeted in BRAC may include:

1.8.4.9.1.1. BRAC directed reductions-in-force, separation incentives, plant closures, plant layaway or custody costs, or other BRAC-related expenses, such as all costs not associated with a valid work order during the year of closure

1.8.4.9.1.2. Environmental restoration and mitigation, to include reducing, removing, and recycling hazardous waste, and removing unsafe building debris

1.8.4.9.1.3. Planning, to include conducting such advance planning and design as may be required to transfer from an activity being closed to another military installation

1.8.4.9.1.4. Outplacement assistance in relocating, training, or providing other necessary assistance to civilian employees employed by the Department at installations being closed
1.8.4.9.1.5. Community programs, to include economic adjustment assistance to a community in which the closed base is located, or community planning assistance to the community to which functions will be transferred as a result of closure of a military installation.

1.8.4.9.2. BRAC and DWCF Rates. Overhead, not specific to BRAC and not in support of producing goods or services for customers, will be financed in the year the costs are incurred with the Components’ Operation and Maintenance (O&M) appropriations. The DWCF losses occurring in years prior to closure will be recovered through the rate structure to the extent that there are new customer orders. When there are no new customer orders in the budget year, the Component responsible for the activity incurring the loss will finance, as a pass through from O&M appropriations to the DWCF, all overhead not included in rates supported by ongoing work or prior year losses to be recovered in the budget year. All costs at a closing activity in the year of closure that are not associated with a valid work order or are not valid BRAC costs are O&M costs and must be budgeted in the fiscal year when they will be incurred.

1.8.4.9.3. BRAC-Related Permanent Change of Station (PCS) Moves for DWCF Activities. Costs incurred to recruit and hire civilian personnel (including associated PCS costs) to fill vacant positions at an activity that is being transferred from a closing or realigning installation to another military installation in accordance with a BRAC recommendation may properly be considered BRAC costs under the Base Closure and Realignment Act of 1990. As a matter of Department policy, however, BRAC funds will not be used for such costs except in the case of DWCF activities, which may temporarily charge such costs against the DWCF, provided the DWCF is reimbursed with BRAC or O&M funds by the end of the fiscal year in which the costs are incurred.

1.8.4.10. Funding of Civilian Voluntary Separation Incentive Program will be financed and included in stabilized rates for civilian separation incentive requirements of assigned employees unless they must be offered as a result of directed BRAC action, in which case the appropriate BRAC account will fund the civilian separation incentive.

1.8.4.11. Any DWCF activities that use any of the services as listed in Exhibit Fund-22, “Summary of Base Support” as tenants must reimburse installation host activities in accordance with DoDI 4000.19 (Support Agreements) to the extent that the specified support for the DWCF activity increases the host activity’s direct costs. Costs for DWCF mission products and services (e.g., depot supply, depot maintenance, facility engineering services, information processing, communications, and software development) should be based on the approved stabilized rate. Other support incidental to the DWCF activity’s primary mission or purpose must be budgeted based on direct costs measurable and directly attributable to the DWCF activity (e.g., incremental direct cost). Only the incremental direct cost attributable to the DWCF activity may be chargeable to the DWCF activity. Overhead costs are not to be included as a cost to the DWCF activity. The cost of operations budgeted for these services either as a host or tenant activity should be noted on Exhibit Fund-22, “Summary of Base Support” in the fall budget submission.
1.8.4.12. First line supervision is that position level immediately over non-supervisory workers. First line supervisors and above occupy an official supervisory designated position, and when acting in a supervisory capacity, should have their labor costs charged by the DWCF activity as an indirect production cost of the cost center supervised, unless all the supervisor’s time is in direct support of a single project. First line supervisors may be borrowed and when used as direct labor, DWCF activities must classify the time of the first line supervisor as direct labor and charge it to the applicable job order rather than as an indirect production cost. “Crew chiefs,” “snappers,” “team leaders,” and other subordinate job leaders are not first line supervisors. Volume 11B, Chapter 13 contains additional information related to charging labor costs.

1.8.4.13. Management Headquarters Costs for DWCF activities may be allocated using the following guidance:

1.8.4.13.1. A management headquarters is a discrete organization or part of an organization that has authority over the management of the DWCF activity. The OSD and Service Departmental activities normally do not have this direct responsibility. All the major systems/logistics organizations in the Services include headquarters elements directly supporting DWCF activities that should be funded or reimbursed by the DWCF activities.

1.8.4.13.2. Costs for discrete DWCF management headquarters organizations and parts of organizations that perform direct DWCF management headquarters functions can be financed directly in the DWCF or reimbursed by the DWCF activity (whichever is more practical). In addition, Components may allocate significant costs for common support functions, such as counsel or personnel services, at DWCF management headquarters to other users based on workload percentages in those functions.

1.8.4.14. Dual-Funded Organizations are organizations that are funded (including reimbursable funding) by both the DWCF and other appropriations or accounts.

1.8.4.14.1. Functions. In instances where a non-management headquarters function is funded with a combination of WCF and General Funds, the function initially will be funded in its entirety by either the DWCF or General Funds, based on the preponderance of definable units of measure for the function (e.g., workload, productive hours, outputs, or ultimate use).

1.8.4.14.1.1. The part of the organization (or funding source provided) initially funding the function should be reimbursed for appropriate amounts by other parts of the organization (or financing sources or customers) involved, based on the unit of measure that was used to determine which organization or funding source would provide initial funding; and the amount of reimbursement should be based on the relative portion of that unit of measure attributable to each part of the organization or funding source involved. If the part of an organization that is within the WCF accounts for more than 50 percent (e.g., 60 percent) of the unit of measure for a function shared with the part of the organization funded through appropriated funds, then the WCF portion of the organization initially would fund all of the costs of performing
that function. However, the applicable part of the organization funded through General Funds would reimburse the WCF for, and be allocated, the remainder of the costs (e.g., 40 percent).

1.8.4.14.1.2. Notwithstanding this policy, the amount of reimbursement for base support services provided by the DWCF to tenant activities must be determined in accordance with the policies in DoDI 4000.19 (Support Agreements).

1.8.4.14.2. Capital Investments. When a capital asset purchased by a WCF activity is also used by the part of the organization financed by appropriated funds, the Fund activity will capitalize the asset and bill the appropriated fund customer for the use of the capital asset. Such billings will use a rate that recoups both the CIR and operating costs. When a capital asset is financed by General Funds and also used by the DWCF part of the organization, the General Funds will capitalize the asset and may bill the DWCF for operating costs. General Funds activities do not bill DWCF activities for depreciation of capital assets.

1.8.4.15. Revenue Recognition Procedures for DWCF activities.

1.8.4.15.1. The DWCF activities must recognize revenue and associated costs in the same accounting period. There are two types of customer orders: (1) end-product (end-item) type orders which, at the completion of the customer order, produce a usable end-product (i.e., overhaul, repair, manufacture, construction, modification, supply transactions, etc.); and (2) service type orders that provide a service over a specified period of time. Revenue must be recognized in the same manner (that is, a standard policy for recognizing and reporting revenue must apply) for all activities within a DWCF activity. The policy varies based on the type of customer order, the length of time necessary to complete the order, and the value of the order; however, non-supply DWCF activities must use the “Percentage of Completion Method” for revenue recognition. The amount of revenue recognized cannot exceed the amount specified in the order.

1.8.4.15.2. Revenue recognition procedures must include gain and loss recognition in the same period in order for the activity managers to evaluate the performance of an organization. The revenue recognition policy does not encompass or establish policies for billings to customers or payments from customers.

1.8.4.15.3. Volume 11B, Chapter 11 provides specific revenue recognition guidance by DWCF activity.

1.8.4.16. Customer Workload Changes.

1.8.4.16.1. When a work order or project is canceled or reduced in scope after a DWCF activity has commenced work or incurred costs, the DWCF activity should charge the customer for the direct and indirect production costs incurred, plus the applied overhead plus costs associated with the cancellation or reduction.

1.8.4.16.2. Volume 11B, Chapter 11 provides specific guidance for the types of directly associated cancellation or reduction costs that can be charged to customers.
1.8.4.17. Write-offs of unusual or infrequently occurring losses are not chargeable against Accumulated Operating Results and should not be recovered through increases in customer rates unless recovery of a cash loss or outlays is required and in accordance with accounting policies. Examples of unusual or infrequently occurring losses not recovered in rates include losses resulting from the disposal or divestiture of capital budget items that have not been fully depreciated at the time they are taken out of service due to BRAC action; or losses associated with systematic inventory reductions by disposal of assets associated with force drawdowns. Only unusual or infrequently occurring write-offs that require a cash resource will be separately identified in the Component’s budget submission using the Fund-14, “Revenue and Expenses” exhibit.

1.8.4.18. Net Operating Results (NOR) Adjustments. There are instances where additional adjustments to the Fund-14 and NOR are required. For example: Cash Transfers in and out of the fund not directly related to operational performance (Direct Appropriations associated with natural disasters, humanitarian relief, pandemics, cash infusions, and reprogramming actions e.g., transfers in/out) may use below-the-line adjustments to the NOR to adjust for transfers that are not directly related to operational performance and subsequently does not support returning or collecting AOR.

1.9 Rate Setting for DWCF Activities

1.9.1. In accordance with paragraph 1.8 above, stabilized rates reflecting full cost will be set during the budget process for all individual DWCF activities. The DWCF uses four methods for rate setting purposes based on the nature of an activity.

1.9.1.1. Percentage Markup on Cost. A cost recovery percentage is applied to the purchase or repair cost of secondary supply items to recover overhead costs and other pricing adjustments. This method is typically used for supply management DWCF activities.

1.9.1.2. Direct Labor Hour (DLH). A specific dollar value, including all direct costs, overhead, and other pricing adjustments, is charged per DLH associated with the completion of a customer order. This method is typically used for industrial DWCF activities (i.e., depot maintenance, ordnance, and research and development).

1.9.1.3. Specific Unit of Output. The DWCF activities that provide services via numerous outputs that do not have a common measure for calculation will establish separate rates for each output. When multiplied by projected customer workload for each output, the rates will produce revenue that approximates, to the extent possible, recovery of the full cost, including approved adjustments, of providing the specific outputs (e.g., transportation, finance and accounting, information systems, and base support). This includes direct systems reimbursement.

1.9.1.4. Standard Fuel Price (SFP). During the budget development cycle, the Revolving Funds Directorate will establish the standard fuel price (SFP) for use by the Defense agencies and military departments to develop their fuel estimates for the budget. The Revolving Funds Directorate will use the Office of Management and Budget (OMB) economic assumptions (EA) and the refined product costs experienced by the department to develop the SFP. The SFP
consists of the refined fuel cost and the non-product cost, which includes cost for Sustainment, Restoration and Modernization (SRM), terminal operations, transportation, operations and product losses. During the year of execution, the SFP may be set at the budgeted rate or may be adjusted due to updated economic assumptions from OMB, the latest refined product cost experienced by the Department, changes in projected product costs, or the DLA Energy cash balance. The OUSD(C) must approve the SFP that will be used for the budget and changes thereafter.

1.9.2. Definitions and Procedures

1.9.2.1. Stabilized Price. Under the stabilized price recovery method, customers are charged for products and services provided by a DWCF activity. Activities establish stabilized prices for the budget year that are adjusted and approved during the budget review process. The stabilized rate is determined by projecting workload and costs, including return/recovery of prior year AOR gains/losses. DWCF activities will charge this annual stabilized rate for all new customer orders received and accepted during that specific fiscal year, regardless of when the work is actually executed and billed.

1.9.2.2. Stabilized Price Exceptions. See paragraph 1.10 for guidance applicable to the sale of goods and services to public-private partnerships by DoD depot maintenance activities. In the Supply activities, customers are charged the price in effect when the item is dropped from inventory.

1.9.2.3. OP-32/PB-32 Rate Change. The annually published rate change for DWCF activities is the percentage change of prices between fiscal years.
