1.9.3. Budgeted Rates. The OUSD(C) or designee will review and approve all final composite rates and prices developed for the President’s budget and documented subsequent in the OUSD(C) Rates Memo.

1.9.4. Alternative Rate Development. Components may propose methods other than the standardized rates for recovering the cost of operations so long as they are mathematically equivalent to the standardized rate. Any alternative pricing methods must be fully documented and justified in the DoD Components’ PBR. Any method (such as percentage of sales instead of markup on cost) must demonstrate recovery of all operating costs, provide a comparison of the current method to the method proposed, show the impact to customer funding requirements, and provide a timeline for implementation. Any change in the presentation of standardized rates for budget purposes must be approved in advance by the Director or Deputy Director for Revolving Funds and documented in the appropriate decision document.

1.9.5. Budget Formulation Rates and Prices. All DWCF activities will establish rates using the following multiple step process:

1.9.5.1. Each DoD Component must carefully review all projected costs for its projected operations for the fiscal year, and propose the most cost-efficient operation possible.
1.9.5.2. Customer requirements must be projected to include all anticipated workload programmed for accomplishment during the budget year based on identified outputs such as DLHs by product, tons shipped, line items received, and all other approved output measures for each activity. Prior year execution must also be factored into the projection of anticipated customer orders and overhead costs and significant deviations from prior year workload must be fully explained in both the activity’s and the customer’s budget justification materials.

1.9.5.3. Components will include adjustments required to comply with OSD and OMB guidance on the impact of inflation, projected pay changes, and other programmatic and policy changes in developing proposed rates.

1.9.5.4. Components will propose costs, program levels, and rate changes by DWCF activity in their Program/Budget estimate submissions. Components may propose exclusion of customer unique, non-labor direct costs from the stabilized rates, and charge these costs on an actual cost reimbursable basis. Components must show the impact the change in rates structure would have on overall stabilized rates. In other words, all costs must be accounted for and reconciled on the corresponding budget exhibit. Final composite rate and price adjustments will be documented in a memorandum signed by the USD(C), or designated representative, at the completion of the budget review. Afterward, any internal realignment of rates within the composite rate structure must be approved as an out-of-cycle rate adjustment by the Director or Deputy Director for Revolving Funds.

1.9.5.5. Final approved costs, program levels, and rate changes will be established by decision documents, after adjustments required to balance changes to customer funding with anticipated Fund costs, inter-Fund sales and transactions, and adjustments for NOR to bring the AOR to zero for the budget year for each DWCF activity.

1.9.6. Financing of Unusual or Infrequently Occurring Losses. Alternatives exist for financing sunk costs when activities terminate capital investments before a project is completed. These costs may be funded through one-time capital surcharges to operating costs or through the normal budgeted CIR previously established. If charged to operating costs through a capital surcharge and depending on the size of the charge, the loss may be recovered through rates over a 2-year period. If a usable product is produced, even though it is less than the planned product, costs may be reasonably assigned to that product and those costs may be appropriately recovered through the CIR.

* 1.9.7. Direct Reimbursable Work, Service Level Billings and Other Income. Work performed may be billable outside the rate structure as approved in the President’s budget. In these cases, revenue generated by direct reimbursable work, service level billings and any additional form of “other income” is subtracted from total revenue before the rates are developed. Forms of direct reimbursable work may include materiel purchases for non-supply activities, provisioning purchases for supply activities, work performed outside the mission scope of the activity, or if the customer has a centralized billing process to pay for a significant number of multiple outputs.
1.10 Public-Private Partnerships at Depot Maintenance Activities

1.10.1. Public-private partnerships are agreements between organic depot maintenance activities and private industry or other entities to perform work and/or to utilize facilities and equipment. Partnerships improve utilization of DoD facilities, equipment, and personnel and enhance support to the warfighter. To advance the goal of increased partnering between DoD and private industry, this section provides guidance for the pricing of DWCF depot maintenance goods and services to private sector entities in partnering arrangements. Conditions for the sale of goods and services to non-DoD entities must be based on specific statutory authority.

1.10.2. In accordance with the authority granted to the Secretary of Defense by 10 U.S.C. § 2208, paragraph (h) to prescribe regulations governing the operation of DWCF activities and the use of inventories, this guidance is intended to clarify existing legal authority applicable in certain specific circumstances. The guidance set forth in this section:

1.10.2.1. May not be used to compete for non-defense related work.

1.10.2.2. Does not apply when otherwise precluded by public law.

1.10.2.3. Does not apply to products or services produced under work-share arrangements in which a DoD sponsor assigns work and separately funds the DoD depot maintenance activity and the private sector entity.

1.10.2.4. May be used for sales to private sector entities only when the transaction is part of an arrangement that is officially recognized as a depot maintenance public-private partnership.

1.10.3. Sales Prices

1.10.3.1. In order to minimize potential DoD operating losses or gains, sales prices to private sector entities in depot maintenance public-private partnership relationships may be tailored to the most recent actual and projected costs, rather than the approved stabilized billing rates charged to DoD customers (10 U.S.C. § 2474).

1.10.3.2. Tailored rates or prices charged for sales to private sector partners, if used, must ensure full cost recovery for the work involved in producing the specific products and services. Such tailored rates and prices must include: (a) all direct costs, (b) production or shop overhead costs that contribute to the final product and (c) a full allocation of General and Administrative (G&A) overhead costs, distributed on the same basis as for DoD customers. (Since G&A overhead costs cannot be attributed to specific products or services, there is no basis to include or exclude specific items of cost from prices charged to customers.)

1.10.3.3. Exceptions to WCF pricing policy for sales to private sector parties in depot maintenance partnership arrangements, as addressed in subparagraphs 1 and 2 above, do not change the requirement that sales prices include unfunded costs, as prescribed in Volume 11B, Chapter 11.
1.10.4. Fixed Pricing

1.10.4.1. Sales of DoD goods and services to private sector entities on a fixed price basis are authorized when the work is well defined and there is a reasonable basis upon which to predict costs. This mirrors private sector practice, improves the ability of private sector partners to predict production costs, and serves to constrain unit cost by more fully utilizing the production capacity of DoD maintenance depots. Cost reimbursable pricing is appropriate when future production costs cannot be reasonably predicted.

1.10.4.2. Multiyear fixed price agreements are authorized when future production costs can be reasonably predicted and the potential for future operating losses and gains are minimal. Prices may be fixed at a predetermined level taking into account future year escalation factors like pay rate changes, general inflation, and the number of units produced. Multiyear fixed price agreements may also incorporate other pricing techniques such as establishment of a base price with provisions for economic price adjustments to accommodate inflation.

1.10.5. Advance Payment. When appropriate to the scope of, and risks associated with, a prospective contract, the DoD partner may elect to accept incremental advance payments.

1.11 Military Clothing Items and Individual Equipment

1.11.1. The Defense Logistics Agency (DLA) Supply Management Activity procures military clothing requirements and bills users at standard prices. This includes uniforms, combat equipment, tents, tool sets and kits, hand tools, and cleaning equipment and supplies. The Military Services must include the costs of new clothing bag items in the Military Personnel appropriation budget request and new organizational items in the Operation and Maintenance appropriation budget request. A replacement item must be deemed a new item for the purposes of this policy if the cost of a replacement item exceeds the cost of the prior item by more than 10 percent in constant dollars.

1.11.2. The Military Personnel appropriation budget and the Operation and Maintenance appropriation budget should be sufficient to fund the quantity of the initial buy of an item of clothing including the establishment of wholesale inventory levels. New clothing items required prior to receipt of appropriated funds may be funded in these same accounts by reprogramming action.

*2.0 BUDGET JUSTIFICATION PRESENTATION

2.1 Purpose

This section provides guidance for preparation and submission of budget justification material and execution review estimates for the DWCF activities.
2.2 Preparation of Materials

General guidance with regard to format and preparation of material is presented in Volume 2A, Chapter 1. This chapter provides specific guidance with regard to the back-up material required for the DWCF and other unit cost budget areas.

2.3 References

Volume 2A, Chapter 1 provides funding policies to include those that impact other appropriations and accounts. Volume 2A, Chapter 2 provides guidance related to military personnel costs. Chapter 8 provides guidance related to Real Property Maintenance and Minor Construction and Volume 2A, Chapter 3 provides guidance related to Operation and Maintenance costs.

2.4 General

2.4.1. Each DoD Component will submit operating and CIP budget justification material to the OUSD(C), Revolving Funds Directorate, in preparation for submitting the President’s budget request to the Congress following a review and approval by the OUSD(C) and the Office of Management and Budget. Each Defense Agency will prepare and submit their portion of the Defense-wide volume material to OUSD(C), Revolving Funds Directorate, for review and approval prior to submission to DLA for incorporation into the Defense-wide justification book. The DLA may require support from the submitting organizations to assemble the final justification book containing the Defense-wide DWCF activities. The DLA will supervise printing and distribution of the Defense-wide justification book for the President’s budget.

2.4.1.1. The DWCF Program Budget/Review focuses on an integrated set of budgetary schedules for evaluating progress towards meeting cost and productivity targets. Unit cost goals and customer prices are set for each DWCF activity for the budget year to ensure resources are available to finance all costs.

2.4.1.2. The Budget Call letter may request updates for selected schedules that have not yet been documented in this regulation.

2.4.1.3. The documentation supporting the President’s budget should be consistent with approved costs, work load and productivity assumptions.

2.4.1.4. The DWCF justification books submitted to Congress will be unclassified, in one volume organized into three sections: Component Overview, Operating Budget, and Capital Budget. All congressional budget material will be submitted electronically and posted on the respective Service’s unclassified web site.

2.4.2. The following table lists all required budget justification exhibits.

2.4.2.1. The “Exhibit Requirements” column lists the universe of budget exhibits for DWCF activities.
2.4.2.2. The “WCF Activity” column identifies, for each exhibit, which activities are required to submit the exhibit. Activities must provide the exhibits as follows: “All” indicates all DWCF activities; “S” indicates Supply activities; “NS” indicates non-Supply activities; “I” indicates industrial activities; and “D” indicates depot maintenance activities.

2.4.2.3. The remaining three columns are marked “Y” or “N” to indicate that submission of the exhibit is required (“Y”) or not required (“N”), respectively, to support the PBR, for the Revolving Funds Directorate’s internal use (the exhibit will not be published) to support the President’s budget (“Backup to PB”) request, and for publication as part of the congressional justification materials for the President’s budget request (“President’s Budget”). The single exception is the Fund-28 Execution Performance Analysis, which must be submitted for budget execution reviews only.

</table>

1/ OUSD(C) RF electronic format required.
2/ USTRANSCOM must submit separate Fund-15 exhibits for its Commercial and Military airlift augmentation efforts.
2.4.3. **Component Narrative.** A component narrative is required for the President’s budget submission to the Congress. Each DoD Component will provide a Summary by Component in table form consisting of cash and net outlays; revenue, expenses, and operating results; civilian full-time equivalents and military end strength; unit costs, rates, and other key indicators. In addition, each Component will provide a summary table for each of its DWCF activities. Discuss any planned changes in DWCF activity make up, location, or product lines. Provide short explanatory bullets where significant changes occur.

2.4.4. **WCF Activity Narrative.** For each DWCF activity, the DoD Component will submit a narrative analysis that, as a minimum, addresses the following areas:

2.4.4.1. A general description of the DWCF activity to include names and locations of subordinate commands, its outputs and customers, and performance and quality metrics. Discuss any planned changes in the DWCF activity make up, location, or product lines. Display cash and net outlays, revenue and expenses, operating results, civilian full-time equivalents and military end strength, unit costs and rates and other key indicators in tabular form. If a section of the narrative, an exhibit or set of exhibits is not required by a specific activity, please provide an explanatory statement. Provide short explanatory bullets where significant changes occur.

2.4.4.2. The analysis should focus on the changes from year to year and how these changes are related to work load and productivity trends; an analysis of any special business-type schedules requested in the Budget Call letter; and a discussion of work load and manpower trends, productivity initiatives/cost reductions, unit costs, and customer prices incorporated in the DWCF activity budget.

2.4.5. **Copies.** Numbers of copies of the required materials to be submitted with the annual budget estimates are identified in Volume 2A, Chapter 1. In addition, for the PBR, an electronic copy of the justification material for each DWCF activity will be provided to the respective Revolving Fund analyst and an electronic copy will be made available to the OUSD(C) Program and Financial Control Directorate on the SIPRNET. The OUSD(C) will notify Fund Managers if additional copies are required. The Budget Call Letter will provide any additional submission instructions, such as posting of the electronic copy to the internet.

2.4.6. **Classification.** The DWCF justification books prepared by the Components are to be unclassified. Submit any classified exhibits under separate cover.

2.4.7. **Formats.** Paper copies of justification material will be submitted on 8-1/2 x 11-inch paper. Variations in format to facilitate printing are permissible. Additionally, modifications may be made to exhibit formats with the approval of the respective Revolving Fund analyst to eliminate redundant information or provide further clarification.

2.4.8. **Database Requirements.** Consistent with the guidance contained in Volume 2A, Chapter 1, the DWCF budget estimates for financing and civilians will be entered into the Comptroller Information System (CIS). The CIS is typically loaded in August before the review of the justification material. The CIS entries are in obligations, as opposed to expenses. The financing entries for federal and non-federal orders correspond to new orders displayed on the Fund-11 and must be entered. System requirements may affect the minimum amount of required
financing entered into the database. Specific instructions on entering CIS data can be found on the SIPRNET CIS website.

2.4.8.1. The DWCF Operating Budgets will be entered into the CIS as new obligations. However, certain budget exhibits may reflect expense rates where applicable. Each component is responsible for ensuring that expenses and obligations reconcile in the budget justification and that each depicts a reasonable estimate of costs. For non-supply activities, inconsistencies will become apparent in the final rate worksheet reconciliation to CIS entries.

2.4.8.2. The DWCF Capital Budgets will be entered into the CIS as the amount of contract authority expected to be obligated in that fiscal year. This amount should be equal to the program totals displayed on the Fund-9c “Capital Budget Execution” exhibit. The CIP prior year carryover request amounts are not entered into CIS for the CY. The actuals for CIP PY Obligations in CIS must reflect the total obligations from AR(M) 1307 Statement of Operations, Part VI – Capital Program, Obligations This Fiscal Year Column, inclusive of all program years.

2.4.8.3. Enter estimates of civilian full-time equivalents (FTEs) for civilian personnel data and military end strength for military personnel data.

2.4.8.4. Changes to CIS data submitted by the DoD Components will be recorded in a decision document or technical adjustment. Technical adjustments may be used when a DoD Component requests minor changes due to new information or correction of errors during the PBR. The changes to the budget reflected in the final decision document will be expressed as obligations, FTEs for civilian personnel, and end strength for military personnel, and adjusting entries will be generated. Final composite rate and price adjustments will be documented in a memorandum signed by the USD(C), or designee, at the completion of the PBR.

2.4.9. Special Schedules - For the Supply Management activities, the narrative must include a section on workload and economic assumptions. These assumptions must include the following data for the prior, current, and budget fiscal years: items managed (#), requisitions received (#), receipts (#), issues (#), contracts executed (#), and supply materiel availability (%).

2.5 DWCF Application of Commonly Used Financial Management Terms

2.5.1. Commitment. A firm administrative reservation of funds, based on firm procurement directives, orders, requisitions, authorizations to issue travel orders, or requests which authorize the recipient to create obligations without further recourse to the official responsible for certifying the availability of funds. The recording of a commitment reserves funds for future obligations. The DWCF activities are not limited to the amount of commitments that can be incurred in the course of operations (unlike other DoD appropriations). Annual Operating Budgets (AOBs) provide legal and administrative restrictions only on the amount of contract authority that may be obligated in a given fiscal year.

2.5.2. Direct Appropriations. Amounts appropriated by the Congress to the DWCF for war reserve materiel, Defense Commissary Agency, or other purposes.
2.5.3. **End of Period (EOP).** The last day of a specified fiscal year, normally September 30, used to determine the closing status of resources.

2.5.4. **Outlays.** Disbursements issued from the U.S. Treasury for goods and services received. Gross outlays are equal to the cumulative amount of disbursements made for the fiscal period to date. Net outlays are equal to gross outlays less the cumulative amount of collections received for the fiscal period to date, plus/minus transfers out/in, minus Direct Appropriations received.

2.6 **Supply Management DWCF Activity Definitions**

2.6.1. This section provides standard definitions to Supply Management terminology associated with the development of budget justification material. The category of the term, Financial Management (FM), Logistics, or both is indicated in parenthesis.

2.6.2. **Definition of Terms Used in Supply Management DWCF Activities**

2.6.2.1. **Acquisition Leadtime (Logistics).** The interval in months between the initiation of procurement action and the receipt into the supply system of the production model (excludes prototypes) purchased as the result of such actions. Acquisition Leadtime is composed of two elements, production leadtime and administrative leadtime.

2.6.2.2. **Administrative Leadtime (Logistics).** That portion of the Acquisition Leadtime that begins with the identification of the need to buy and the contract award. The time between the initiation of paperwork and contract.

2.6.2.3. **Allocation (FM).** Following approval of apportionment / reapportionment requests by OMB, OUSD(C) P/B allocates funds to the Military Services and Defense Agencies. Funds distributed by OUSD(C)/PB may be further subdivided through sub-allocation and sub-allotment to lower levels within the organizations or across organizations for execution.

2.6.2.4. **Beginning of Period (BOP) (both).** The start of a specified fiscal year, normally on October 1, used to determine the opening “snapshot” status of resources. Typically, the end of period accounting balances from the previous fiscal year become the BOP balances of the current FY; BOP balances may be adjusted for price changes.

2.6.2.5. **Capitalized Inventory (Both).** On-hand and on-order inventories of supplies funded by other appropriations and funds are considered as contributed capital as of the date when management responsibility for the items is undertaken (see Provisioning).

2.6.2.6. **Capitalization (Both).** The process whereby the Fund assumes management responsibility and ownership of assets (such as inventory) without reimbursing other DoD appropriations or funds.

2.6.2.7. **Contingency Retention Stock (Logistics).** That portion of the quantity of an item excess to the Approved Acquisition Objective for which there is no predictable demand or
quantifiable requirement and that normally would be allocated as potential reutilization stock, except for a determination that the quantity will be retained for possible contingencies. This is a budget stratification category and is not the same as “War Reserve Materiel,” which is held for immediate use of military deployments.

2.6.2.8. Cost of Goods (Materiel) Sold (COGS) (FM). The COGS is the expensed value of the items sold at the standard or exchange price, respectively. The COGS cannot be recorded until a sale occurs even though the purchase and cash outlay occurred in a previous fiscal year. The COGS is based on inventory valuation that may not be directly related to actual cash required to purchase inventory for the continuity of operations (see Materiel Cost Adjustment).

2.6.2.9. Cost Recovery Elements/Surcharges (FM). Factors added to the acquisition cost or repair cost price of an item to arrive at the customer’s standard or exchange price. Cost Recovery Elements/Surcharges include: (1) transportation deliveries from production site to points of use or storage (Second Destination Transportation (SDT)); (2) inventory obsolescence and loss, for the costs of pilferage, damage, deterioration, physical inventory shortages and excess; (3) inventory maintenance; (4) supply operations support costs; (5) inventory augmentation; (6) CIR factor; (7) cash surcharge; and (8) Depot Level Reparable (DLR) carcass attrition costs, if applicable.

2.6.2.10. Decapitalization (Both). The transfer of DWCF assets (such as inventory) to other appropriations or funds without reimbursement. Transfers of on order inventory between DWCF DoD Components are not considered de-capitalizations. Gains and losses of cash, relative to continuing operations at the DWCF activity level, should be taken into consideration to establish an acceptable reimbursement process based on validated undelivered orders (dues in).

2.6.2.11. Demand (Customer Order) (Both). Demand is an indication of a requirement (i.e., requisition, request, issue, reparable generation, etc.) for issue of serviceable materiel. Demands are categorized as either recurring or nonrecurring and are also referred to as funded orders. Demands for reparable items should indicate whether or not a carcass will be returned.

2.6.2.12. Economic Retention Stock (Logistics). That portion of the quantity of an item greater than the Approved Acquisition Objective determined to be more economical to retain for future peacetime issue than to dispose and satisfy projected future requirements through procurement or repair. To warrant economic retention, items must have a reasonably predictable demand rate. The use of available resources for replenishment and growth of economic retention stock should be evaluated relative to the need to reduce potential inventory shortages in other commodities that have higher reoccurring demands.

2.6.2.13. Exchange Price (EP) (FM). In a system that supports exchange pricing, this is the price charged to customers returning a DLR part that needs repair and purchasing a serviceable one (new or repaired). Equates to the latest repair price plus wash out costs (condemnations) per item plus pricing elements necessary to recover other operating costs. (Note: If no carcass (unserviceable item) is returned, the customer must be charged the full standard
The discount the customer receives for exchanging a DLR part that needs repair will be the same for all items in the same Interchangeable and Substitutable (I&S) family, with the exception of any obsolete items that are no longer suitable substitutes in an I&S family. This applies to both exchange sales and primary inventory control activity (PICA) / secondary inventory control activity (SICA) transactions where the customer pays full price and then receives a payment for returning the DLR.

2.6.2.14. Expendable Supplies and Materiel (Logistics). Supplies, sometimes referred to as consumable supplies and materiel, that are consumed (e.g., paint, fuel, cleaning, preserving materiel, surgical dressings, drugs, and medicines) or lose their identity in use.

2.6.2.15. Initial Spare and Repair Parts (both). Those spares and repair parts introduced through the provisioning process to establish inventory levels prior to reoccurring demands for that item. These inventory levels must be provided or funded by other DoD appropriations (see Volume 4, Chapter 4). Components may request, subject to approval by the Director or Deputy Director for Revolving Funds a cost recovery element in the pricing structure to cover these requirements (See Volume 11B Chapter 15).

2.6.2.16. Insurance Item (Logistics). A non-demand-based stocked essential item for which no failure is predicted through normal usage. However, if a failure were to be experienced or a loss occur through accident, abnormal equipment or system failure, or other unexpected occurrence, lack of replacement would seriously hamper the operational capability of a weapon system.

2.6.2.17. Inventory (Supply) (both). Materiel titled to the U.S. Government, held for sale or issue, held for repair, or held pending transfer to disposal.

2.6.2.17.1. Consumer Level of Materiel and Supplies: Materiel and Supplies, usually of limited range and depth, held only by the final element in an established supply distribution system for the sole purpose of internal consumption. Materiel and Supplies at the consumer level is normally no longer considered DWCF inventory.

2.6.2.17.2. Intermediate Level of Inventory (Local): Materiel and Supplies held between the wholesale and consumer levels, regardless of funding source.

2.6.2.17.3. Wholesale Level of Inventory (National): Inventory, regardless of funding sources, over which the inventory manager at the inventory control point level has asset knowledge and exercises unrestricted asset control to meet worldwide inventory management responsibilities.

2.6.2.17.4. Inventory Augmentation (Both). A growth in inventory beyond initial stockage levels that is not demand based. This includes changes in engineering estimates resulting in higher stockage levels. Costs may be recouped by direct appropriation or a cost recovery element in the pricing structure to cover these requirements (See Volume 11B, Chapter 15).
2.6.2.17.5. Retail Inventory. Supplies/materiel held at a second point of sale below the wholesale level (e.g., management of DLA inventory purchases within a specific Military Department).

2.6.2.18. Inventory Cost Categories (FM)

2.6.2.18.1. Operating Costs. All costs not associated with the purchase or repair of materiel that must be incurred in order for the DoD Components to manage a supply DWCF activity. Does not include materiel-related costs, which constitute the basis for cost of goods sold.

2.6.2.18.2. War Reserves. Direct appropriation funding is required to procure items for war reserve stocks. These materiels are required to support approved force mobilization objectives. The approved force mobilization objective is the quantity required, in addition to peacetime assets normally available on any given date, to equip and support the approved force structure.

2.6.2.18.3. Historic Cost. The price paid for an item at the time it was purchased from a supplier.

2.6.2.18.4. Moving Average Cost (MAC): A historical cost method of valuing inventory. Each time a new quantity is purchased, the average value of all items on hand is recalculated. This value is used for accounting purposes including the COGS value on the Fund-14 “Revenue and Costs.”

2.6.2.18.5. Replenishment Cost. The current price of an item from a vendor that will result in a cash outlay resulting from an obligation in the current fiscal year.

2.6.2.19. Numeric Stockage Objective (NSO) Item (Logistics). A non-demand-based, stocked, essential item for which, although failure may be predicted, the probability of demand is so low that it does not meet the stockage criteria at a given activity and, as a demand-based item, would not be stocked. Since the lack of a replacement item would seriously hamper the operational capability of a weapon or weapon systems, the item is therefore stocked; using direct appropriations, as non-demand-based. Also included in this category are:

2.6.2.19.1. Items needed to support particular programs of a nonrecurring or sporadic nature (e.g., set assembly, non-repetitive overhaul programs) where re-procurement is not required once the particular program has been completed.

2.6.2.19.2. Items that are procured on a life-of-type basis or which are “bought out” at the termination of a production program.

2.6.2.19.3. Items that are not fully consumed during a one-time or non-repetitive program but which should be retained for possible future need on a similar program.
2.6.2.20. Inventory on Order (Logistics). The quantities of materiel required to sustain operations in the interval between requisitions and the arrival of successive shipments; the amount of inventory required to satisfy current demands when leadtimes are taken into account. These quantities should be based on the established replenishment period (i.e., monthly, quarterly, etc.). This is also referred to as the “Pipeline,” “Undelivered Orders,” or “Due ins from Procurement and Repair.”

2.6.2.21. Other War Reserve Materiel Requirements (Logistics). The total war reserve materiel requirement less the sum of the pre-positioned war reserve requirements. These are also known as non-prepositioned requirements.

2.6.2.22. Pre-positioned War Reserve Materiel Requirement (PWRMR) (Logistics). That portion of the war reserve stocks required to be on hand on M-Day which approved Defense Guidance dictates be reserved and/or positioned at or near the point of planned use or issued to the user prior to hostilities, to reduce reaction time and to assure timely support of a specific force/project until replenishment can be effected.

2.6.2.23. Price Stabilization (FM). The Department’s policy that requires components to maintain the standard price of each cataloged supply item throughout each fiscal year except for correction of errors (See Volume 11B Chapter 15).

2.6.2.24. Materiel Cost Adjustment (MCA) (FM). The amount of cost increase realized from suppliers above the MAC, used on the SM-5b “OP-32 Price Change.” (MAC + Inflation + MCA = Replenishment Costs.) This amount is typically above the standard rate of inflation. Standard inflation should be accounted for in the “Materiel Inflation Adjustment” recovery element; it should not be double counted in the MCA. For example, if a new part has been upgraded by the manufacturer, the price may increase by 10 percent. In this case, 2 percent may be “normal inflation” and 8 percent can be attributable to the MCA. In some cases, normal inflation may be the only recovery element required. For pricing purposes, inflation and an MCA may have to be applied as a cost recovery element to ensure receipt of sufficient budgetary resources to support the cash outlays required for replenishment.

2.6.2.25. Production Lead Time (Logistics). The time interval between the letting of a contract or the placing of an order and the first significant receipt into the supply system of materiel purchased as a result of such action.

2.6.2.26. Provisioning Item (Logistics). Spares and repair parts required as both demand and non-demand-based levels in the supply system to support new fielding of end items. Typically, these are new inventory requirements or increased requirements for system modifications or service life extensions (including clothing and textiles) that require direct appropriations by other DoD Components to establish the supply chain. This includes required safety stocks and other inventory stratification categories. In some cases, upon approval by the Director or Deputy Director for Revolving Funds, customers may be charged for the establishment of new inventory as a recovery element. An agreement between the program manager and the DWCF activity should be made prior to the obligation of any DWCF resources (See Volume 11B, Chapter 15).
2.6.2.27. Provisioning Item (Outfitting) (Both). That portion of Provisioning consisting of items for which a sale is anticipated to an appropriated outfitting (buy-out) account. Direct appropriations are required to establish inventory levels for these items until requirements can be forecast based on actual demands for their replenishment using obligation authority.

2.6.2.28. Reclassification (Logistics). The logistics term referring to the transfer of assets between inventory strata (e.g., from Economic Retention to Contingency), used on the SM-4 “Inventory Status.

2.6.2.29. Repair Cycle Level (Logistics). The quantity of reparable items required to sustain operations during the repair cycle that commences when a maintenance replacement takes place and ends when the unserviceable asset is returned to stock in a serviceable condition. This includes such stages as removed, awaiting shipment, in transit, in pre-repair screening, in process of repair, and being returned to serviceable stock. Any extraordinary awaiting-parts delays and any intentional extended-transit, storage, or repair-process delays should be excluded from the repair cycle.

2.6.2.30. Reparable Item (Logistics). An item of supply subject to economical repair and for which the repair (at either depot or field level) is considered in satisfying computed requirements at any inventory level.

2.6.2.31. Replenishment Spare and Repair Parts (Logistics). Demand-based spare and repair parts required for re-supplying current inventory levels. Inventory levels may increase above initial stockage when there is a concurrent increase in customer orders. Fewer inventories will be required when there is a decrease in customer orders. These include both reparable and consumable parts in support of fielded items.

2.6.2.32. Requisitioning Objective (also known as the “Authorized Acquisition Objective”) (Logistics). The maximum quantities of materiel to be maintained on hand and on order to sustain current operations and core war reserve. It will consist of the sum of stocks represented by the operating level, safety level, and the order and shipping time or procurement time, as appropriate.

2.6.2.33. Safety Level of Supply (Logistics). The quantity of materiel required to be on hand to permit continuous operations in the event of minor interruption of normal replenishment or unpredictable fluctuations in demand.

2.6.2.34. Standard Price (both). The price that customers are charged for DoD Inventory Control Point (ICP)-managed items (excluding subsistence). The standard price remains constant (stabilized price) throughout a fiscal year except for the correction of significant errors. The standard price is computed based on various factors, including the replenishment cost of the item plus surcharges to recover costs for transportation; inventory loss, obsolescence and maintenance; CIR; and supply operations. (Note: See Exchange Price for prices of Depot Level Reparables in systems that support exchange prices.)
2.6.2.35. **Stockage Objective (Logistics).** The maximum authorized quantity of materiel on hand to sustain current operations. It consists of the sum of stock represented by the operating level, the safety level, the repair cycle level, and authorized additive levels.

2.6.2.36. **Stratification Process (Both).** A uniform portrayal of requirements and asset application that is a computer-generated simulation of actions causing changes in the supply position, e.g., procurement, repair, receipt, issue, terminations, and disposal of materiel.

2.6.2.37. **Unfunded Requirement for Spares (both).** The difference between the spare and/or repair parts requirement computed in accordance with DoD Policy (e.g., DoDI 4140.01, “DoD Supply Chain Materiel Management Policy”) and the amount of that requirement that is funded.

2.6.2.38. **Unobligated Commitments (FM).** Amount of commitments incurred this fiscal year to date that have not resulted in obligation at the end of the report period.

2.6.2.39. **Variability Target (FM).** The projected amount of additional contract authority reflected on the SM-1 “Supply Management Summary” exhibit to allow supply activities to respond to variances in costs and/or unexpected changes in recurring customer demands during the execution year. The release of the variability target is associated with increased mission requirements due to the operating tempo of the military departments. Budgetary resources are provided by increased sales associated with customer purchases and the accompanying cash flow. The variability target may not be used as a source for inventory augmentation or provisioning because these requirements should be supported by appropriated funds or a cash surcharge element of the cost recovery rate in follow-on years, to ensure the needed balance between budgetary and proprietary resources.

2.6.2.40. **Anticipated Recoveries of Prior Year Contract Authority**. Components must estimate additional contract authority requirements and include on SM-1 Supply Management Summary by Division exhibit.

2.6.2.41. **War Reserves (both).** Stocks of materiel amassed in peacetime to meet the increase in military requirements forecasts contingent on an outbreak of war. War reserves are intended to provide the interim support essential to sustain operations until re-supply can be effected.

2.7 **Non-Supply Definitions**

* 2.7.1. **Definitions Used in Non-Supply Activities**

2.7.1.1. **Maintenance Depot.** Industrial DWCF facilities whose primary missions are to overhaul, manufacture, and re-manufacture weapon systems, ordnance, or other forms of equipment. These activities include Army and Marine Corps Maintenance Depots, Ordnance Depots, arsenals, Navy Fleet Readiness Centers, and Air Force Aviation Depots.

2.7.1.2. **DLH Rate.** The stabilized rate method that assigns revenue per DLH. The DLH rate is computed by dividing the sum of all direct and indirect production labor, non-labor,
and materiel, and general and administrative expenses, adjusted for direct reimbursements, NOR, and Capital Investment Program (CIP) or Cash surcharges, by the total number of DLHs (or other outputs) anticipated to be accomplished during the fiscal year.

2.7.1.3. DLH. The DLHs, sometimes referred to as Direct Product Standard Hours, are the hours required to perform the direct work on a product, or to perform a billable service for customers. The DLHs generally include the hands-on maintenance, repair, overhaul, test, and related direct production effort that follows the established sequence and content of work necessary to accomplish the billable job. The DLHs do not include the support work or man-hours identified as either indirect production (such as supervisory) or general and administrative in nature. The DLHs are estimated for budget purposes by product or service, based on industrial or management engineering standards developed using time, method, and motion studies, historical usage averages, or professional estimating and evaluation (E&E) techniques.

2.7.1.4. Fixed Price Catalogs. Depot Maintenance activities may maintain a catalog of products and services (major end items, componentry, depot level reparable, modification kits, etc.) with their associated rework, repair, overhaul, installation, etc., based on the Standard Depot Level Maintenance (SDLM) or Planned Depot Maintenance (PDM) work package DLHs. The DLHs associated with the product or service multiplied by the stabilized composite rate for a fiscal year constitutes the firm fixed price for the catalog item. Catalogs may be maintained in hard copy or in electronic databases accessible to customers.

2.7.1.5. Total Cost of Goods Sold. The total expenses incurred in the operating budget of the activity associated with the revenue planned to be recognized for the budgeted fiscal year.

2.7.1.6. Carryover. The dollar value of work that has been ordered and funded (obligated) by customers, typically using other DoD appropriations, but not yet completed by DWCF activities at the end of the fiscal year. Carryover consists of the unfinished portion of work accepted but not yet completed.

2.7.1.7. Mission Costs. Total costs incurred to support the mission (repair of end items; selling of inventory; providing payroll services) of the DWCF activity.

2.7.1.8. Non-mission Costs. Additional costs incurred to provide services related to, but not essential to, the function of the DWCF activity. Income associated with these additional costs should be recognized as “Other Income” (Installation services; system implementation; other supply reimbursable operations).

2.7.2. Clarification of Rate Estimation. During the budget review process, each non-supply DWCF activity will use proposed new customer orders for each budget year to establish rates that will remain stabilized through the execution year. Accurate customer order projections are essential in determining the annual increase or decrease in rates.

2.7.2.1. Industrial activities (to include the maintenance and repair function of base support activities) will identify total DLHs required to accomplish the budget year’s work
program. The work program is the total number of DLHs planned to be executed in support of known and projected customer requirements during execution of the budget. All DLHs should be identified in the budget, even though some workload may be direct reimbursable rather than rate based.

2.7.2.2. Total costs estimated to be incurred in execution of this workload will be projected. This process should include application of general inflation, pay raise, and other inflation or OUSD(C)-directed price adjustments, as specified in the OUSD (Comptroller) budget formulation Budget Guidance. The sum of all these costs (including supplies, materiel, pay, CIR, and other charges, etc.) is the estimate of the total costs.

2.7.2.3. Customer requirements must be projected and separately identified to include: current (on hand) unfilled customers’ orders expected to be executed during the budget year (carry-in or backlog), and work in process that will be completed; new orders anticipated to be accepted and executed during the budget year; and orders anticipated to be accepted but not executed during the year (anticipated carry-over).

2.7.2.4. Workload mix (outputs), availabilities, and production schedules must be assessed, along with any other factors that may impact program outputs such as policy changes, productivity initiatives, planned workload competitions, plant capacity, and other factors. Based on these factors, the work counts associated with each major workload category (output or product) will be identified and reported.

2.7.2.5. Total costs required to execute the planned program to produce the outputs in the approved execution program will be identified and reported in budget exhibits, with significant changes from the prior year highlighted in the Exhibit Fund-2, “Changes in the Costs of Operations.”

*3.0 DWCF ACTIVITY EXHIBIT FORMATS

3.1 Purpose

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Adhere to these formats unless they are modified in a submission budget guidance. Modifications may be made to exhibit formats with the approval of the respective Revolving Fund analyst to eliminate redundant information or provide further clarification.

Exhibit SM-1 Supply Management Summary (Continued)

INSTRUCTIONS FOR PREPARATION OF SUPPLY MANAGEMENT SUMMARY (EXHIBIT SM-1)

The purpose of the SM-1, Supply Management Summary by Activity Division exhibit, is to provide summary obligation justification for the DoD Component DWCF activity. This exhibit is also used to reconcile CIS data for supply activities. Instructions for preparation of SM-1 exhibit follow:

1. Prepare the SM-1 exhibit for each year being reviewed (i.e., prior year, current year, and budget year).

2. Present dollars in millions to the third decimal place for CIS reconciliation.

3. The current year request should represent current identified requirements and may not be equal to previous amounts approved in prior year budget submissions. The minimum information required for each activity division is as follows:

   Net Customer Orders (New orders from Fund-11 less Credit Returns)

   Net Sales

   Operating Obligations

   Mobilization Obligations

   Direct Appropriations

   Total Operating Obligations- This amount is entered into the program line in the CIS.

   Total Capital Obligations- This amount is entered into the capital line in CIS.

   Variability Target- This amount is not entered into CIS but is documented on the budget exhibit for inclusion in the apportionment from OMB.

   Anticipated recoveries of prior year contract authority

   Target Total

The purpose of the SM-3a Requirements to Budget exhibit provides backup information to support obligations based on inventory requirements determined by customer demand. That is, the SM-3a Requirements to Budget exhibit identifies resources required to replenish sales of inventory for each fiscal year (i.e., prior year, current year, budget year).

1. Prepare an SM-3a exhibit for each DWCF Supply activity (not each division). Non-inventory costs, as reflected on the Fund-1/1a Summary/Details of Price, Program and Other Changes exhibits, are considered “Overhead and Other Management Costs”. Total obligations reported on this exhibit represent obligations for inventory procurement and repair. Present dollars in millions to the third decimal place.

2. Use the latest inventory cycle available since the exhibit is due in September. Instead of using the standard price, it is recommended that MAC value be used and the MCA applied as a growth factor to the MAC for each fiscal year. This will represent the projected price change over time. If a standard price is used, the overhead costs (surcharge) must be removed as part of this exhibit to get to a more representative cost of inventory and the MCA will not be added.

3. The exhibit does not reconcile to the total inventory; rather, it will focus on the time-phased customer demands (sales or exchanges) including any backorders. Inventory available (i.e., on hand and projected serviceable deliveries from buy or repair), that will satisfy those demands will be applied against the customer requirements. Finally, the portion of the customer demands that will not be satisfied with the current projected funded deliveries will be calculated so they can be satisfied through funding for new purchases or repairs. Documented unfunded requirements will also include the other projected funding needs (e.g., first destination transportation and projected repair cost increases). This exhibit will only reflect mobilization requirements to reconcile to the SM-1 exhibit; it will not include unfunded WRM demands.

4. The exhibit will include new requirements (e.g., initial provision and establishing a new stock number to replace an existing one) paid through the DWCF and reimbursed by including a cost recovery element in prices. It will also require all DoD Components to show (as a memo entry) other requirements (sponsor-owned stock, BP 28, etc.) not in the DWCF. Note: the memo entry on this exhibit provides reconciliation for other inventory purchased outside of the DWCF that may later migrate into DWCF.

5. Section A of the exhibit will reflect the Customer Demands (historical & projected for the first fiscal year and projected for the following 2 fiscal years). Section B of the exhibit will reflect the inventory (serviceable on hand and projected deliveries from buy or repair) for each of the 3 fiscal years. Section C of the exhibit will reflect the funding requirements (part of the budget) and any other unfunded (deferred) requirements. Section D of the exhibit will reflect the initial provision (memo entry) that is not funded through the DWCF. It is the total initial provisioning dollar value not under DWCF that is on hand or projected to be delivered by the BOP.

Exhibit SM-3b By Weapon System Requirements (Continued)

INSTRUCTIONS FOR PREPARATION OF
WEAPON SYSTEM REQUIREMENTS (EXHIBIT SM-3B)

The SM-3B Weapon System Requirements exhibit provides a breakout of the operating obligation request by type of supply system action (procurement versus repair) and by weapon system or category.

1. For the OSD/OMB budget review, prepare the SM-3B for each DWCF Supply activity (wholesale division) that provides military spare parts (excludes fuel, medical/dental, subsistence, etc.). For each division, prepare one Exhibit SM-3B for each fiscal year (CY, BY).

2. Definitions.

   a. **Special Purchases** column includes outfitting, special programs and any initial spares financed through a cost recovery element on the SM-5a Markup on Materiel Cost exhibit.

   b. **Basic Purchases** column consists of replacement spares *based on demands*.

   c. **Basic Rework** column is repair obligations for sales replacement.

   d. **Initial Spares** column includes any new inventory levels financed through other DoD appropriations in this column. In theory, this column should reconcile with the P-18 exhibits provided with the Initial Spares Budget Activity of the DoD Component’s procurement appropriations.

   e. **Total Program** column shows the total operating obligation request for each weapon system.

   f. **Non-MCRS Percent** (Non-Mission Capable Rate Supply) column shows the percentage, by weapon system, that is not mission capable due to the lack of spare parts. Report this rate target for each budgeted fiscal year.

3. Present dollars in millions to the third decimal place. Weapon systems, as defined by the applicable Service, may be aggregated into categories when individual systems are less than $25 million. The Director or Deputy Director for Revolving Funds will approve appropriate levels of aggregation. Common parts may be grouped by category such as radios or may be allocated to specific systems such as F-16 aircraft. Obligation authority requests for non-weapon system-related requirements, such as reverse engineering and forging & casting, must be separately identified.

4. Estimated data may be used and noted as such until accurate systems can be developed to provide accurate data.

5. This form will be prepared at replenishment cost or repair cost as appropriate.

Exhibit SM-4 Inventory Status (Continued)

The SM-4 Inventory Status exhibit shows estimated inventory levels that will result from the proposed budgets and operating levels. Prepare the SM-4 at the MAC value for the prior fiscal year, current year, and budget year for each supply management DWCF activity for each Program/Budget and President’s Budget submission. A consolidated summary for the total Supply activity will be prepared for the OSD/OMB Review. The TOTAL column in the prior fiscal year exhibit must reflect the amount from supply management general ledgers used in preparation of fiscal and accounting reports. Amounts in the DEMAND BASED, MOBILIZATION, and NON-DEMAND BASED columns may be statistically derived from related inventory reports. Instructions for preparation of SM-4 Inventory Status are as follows:

1. **Inventory, BOP.** Amounts of inventory on hand and in transit reported must equal amounts reported as of the end of the prior year. If not, explain any difference in a footnote. The DoD Component must have title to all inventory listed here.

2. **BOP Inventory Adjustments.** Enter any adjustments required to the beginning position.

3. **Purchases.** Add the amount of inventory value on which title has passed or will pass to the reporting supply management division during the period of the report.

4. **Gross Sales at MAC value.** Materiel sold to customer during the period of the report. Should match the Cost of Goods Sold base value.

5. **Inventory Adjustments.**
   a. **Capitalizations (Net).** Report the inventory value of materiel capitalized or de-capitalized during the period of the report. Show a net de-capitalization with (-) preceding value.
   b. **Returns from Customers for Credit.** Show the cumulative amount of materiel returned from customers on which title has passed to the reporting supply management division during the period of the report for which credit has been given. *For fuel returns, show the cumulative amount of fuel returned based on market price valuation of current inventory.*
   c. **Returns from Customers without Credit.** Show the cumulative amount of materiel returned from customers on which title has passed to the reporting supply management division during the period of the report for which credit was not given.
   d. **Returns to Suppliers.** Show as a negative number the cumulative amount of materiel returned to supplier during the period of the report.
   e. **Transfers to Property Disposal.** Show the net amount of materiel transferred to/from the DLA Disposition Service on which title has been passed to DLA.
Exhibit SM-4 Inventory Status (Continued)

   f. Issues/Receipts without Reimbursement. Show the net cumulative amount of materiel issued or received without reimbursement during the period of the report. This item could include transfers from other divisions or materiel categories, etc., as required. Show net issued with (-) preceding value.

   g. Other. Identify and report the amounts of other adjustments to inventory. Include all other adjustments to inventory such as adjustments for physical inventory count and unusual or infrequently occurring losses (fire, weather). Explain with footnotes if necessary. Show (+) or (-) as appropriate.

   h. Total Adjustments. Add 5a through 5g.

6. Inventory EOP. Report the amount of inventory available at the end of the reporting period, including all on hand, in transit, work-in-process, and other stocks to which the reporting stock fund division holds title.

7. Inventory EOP, Revalued (MAC, Discounted). Enter any adjustments required to the ending position.

8. Inventory on Order, EOP (memo). Report the amount of demand based and mobilization undelivered orders (excluding in transit) for materiel outstanding at the end of the period.

9. Narrative. Provide additional information and description as needed.

Exhibit SM-5a Markup on Materiel Cost (Continued)

INSTRUCTIONS FOR PREPARATION OF EXHIBIT SM-5a
MARKUP ON MATERIEL COST

The SM-5a Markup on Materiel Cost exhibit shows how to calculate the Standardized Rate for Supply DWCF activities. Each Service/Agency will provide a consolidated exhibit for the sum of all wholesale divisions managed by that Service/Agency. All Components will report expenses. The CY requested on this exhibit will match all CY data represented on all other reconciling budget exhibits (Fund-14, Fund-1). The CY approved represents what was submitted in previous budgets; in theory, all adjustments from previous budgets will be reflected in the AOR adjustment line of the budget year (BY).

Materiel Costs Section. There are three factors that make up materiel costs. Total Materiel Costs is the denominator in the Markup on Materiel Cost calculation.

a. Materiel Costs without Inflation. This is a representation of the historic value of inventory (and repair costs). The official valuation methodology for the DWCF is MAC, based on proprietary accounting. However, valuing inventory solely at the MAC value for budget purposes will not generate sufficient resources for cash outlays to maintain current inventory levels.

b. Materiel Inflation (normal inflation). This line represents the amount of “normal inflation” as approved by OMB and OUSD(C) in published memoranda. The line must be used by the DoD Component to break out this normal inflation separately from any other materiel cost growth for reconciliation purposes; it is a mandatory line and these costs must not be included in line C as part of the “MCA”. Do not double count “normal inflation” on both lines.

c. Materiel Cost Adjustments (MCAs) (includes obsolescence, losses and washouts). All other adjustments involving the actual purchase or repair of inventory above that of the previous year. This line must not include normal inflation. Materiel costs associated with losses, obsolescence and wash out (condemnation) of reparable are also included in this line.

Overhead Costs (Fund-1/1a) Section. Total overhead costs should reconcile to the Fund-1 Summary of Price, Program and Other Changes exhibit less the amount displayed (if any) on the Fund-14 Revenue and Costs exhibit for direct reimbursable revenue. In theory, direct reimbursable revenue should not include a cost recovery rate and should cover all costs involved for the work performed. CIR is shown as a price adjustment instead of an overhead cost because it is a cash recovery element for capital obligations. Overhead categories directly relate to the corresponding line on the Fund-1/1a Summary/Detail of Price, Program and Other Changes exhibit.
Exhibit SM-5a Markup on Materiel Cost (Continued)

**Pricing Adjustments Section.** Pricing adjustments increase or decrease budgetary resources but are not related to Materiel or Overhead costs. There are three types of price adjustments.

Exhibit SM-5a Markup on Materiel Cost (Continued)

a. Capital Investments. Represents the amount of cost incurred to purchase capital assets through the CIP. This is a mandatory line.

b. AOR Recovery. This amount should be equal to the NOR for the respective year on the Fund-14. This is a mandatory line.

c. Cash Adjustment. May be used to adjust the cash resources available to that specific DWCF activity (not as an adjustment to the cash available at the DoD Component level). All cash adjustments at the DWCF activity level should reconcile to the Fund-13, Cash Management Plan. This is not a mandatory line.

**Markup on Materiel Cost Section.** Line 4. Total Markup on Materiel Cost (Standardized Rate (a/b) equals (Line 2. Total Overhead Costs + Line 3. Total Pricing Adjustments) divided by Line 1. Total Materiel Costs, displayed as a percentage. Adding Materiel Costs, Total Overhead Costs, and Total Pricing Adjustment equals total wholesale revenue as displayed on the SM-16 Unit Cost Summary exhibit. Total wholesale revenue, retail revenue and direct reimbursables equals total Gross Sales as displayed on the Fund-14 Revenue and Costs and SM-16 Unit Cost Summary exhibits.

Exhibit SM-5b OP-32 Price Change to Customers (Continued)

INSTRUCTIONS FOR PREPARATION OF EXHIBIT SM-5b
OP-32 PRICE CHANGE TO CUSTOMERS

The OP-32 Price Change to Customers exhibit may be presented on the same page as the SM-5a Markup on Materiel Cost exhibit. For the President’s Budget Justification Book, the published OP-32 Price Change to Customers exhibit for the PY, CY, and BY will be presented in the narrative section with a brief explanation of the change from the previous year. The SM-5b OP-32 Price Change to Customers exhibit will be required as a backup exhibit to the President’s Budget. All figures for the OP-32 Price Change are depicted in the SM-5a Markup on Materiel Cost exhibit.

A. **Total Materiel Costs without Inflation (Line 1a).** These are the amounts displayed on the SM-5a Markup on Materiel Cost exhibit that represent changes in purchases without inflation or pricing factors.

B. **Total Additional Price to Customer.**

   **Materiel Inflation plus MCA.** The amount of “normal inflation” (SM-5a Line 1b) plus other Materiel Costs not accounted for by “normal inflation” (SM-5a Line 1c).

   **Total Overhead Costs plus Pricing Adjustments.** This should be equal to the SM-5a Markup on Materiel Cost exhibit Line 4a.

C. **Additional Price Percentage.** This represents the composite cost recovery rate (CRR) for the activity, this divides the Total Additional Price to Customer (B) by the Total Materiel Costs without Inflation (A) and is displayed as a percentage.

D. **OP-32 Price Change.** The OP-32 price change is the percentage of change from the prior year approved CRR to the current budget year’s CRR. The formula for the percentage change to customers is: \((1+\text{BY Line C})/ (1+ \text{CY (Approved) Line C}) - 1\).

This change represents the change in price at the item level that were affected by both price and program changes in the customer budget.

Exhibit SM-6 War Reserve Materiel (Continued)

WAR RESERVE MATERIEL (WRM)
EXHIBIT SM-6

The purpose of the WRM exhibit is to notify Congress of the Department’s intentions regarding the management of secondary item war reserves. Stockpile status and costs sections show the current and budgeted amounts for the inventory and the costs associated with maintaining these levels. The budget request section notifies Congress of the amounts of obligations to be used to acquire or maintain war reserve items and quantities. “Protected status” applies to items that may not be sold. “Other” applies to WRM that must be sold and replenished due to stock rotation or shelf-life issues. Exhibit instructions are as follows:

1. **Stockpile Status** (Same instructions as the SM-4 Inventory Status exhibit). Components should use the “reclassification” line to transfer inventory into the “protected” WRM category from “WRM Other,” if desired.

2. **Stockpile Costs.** The WRM stockpile costs are those incurred in the WCF to store WRM materiel, to manage WRM stocks to include a portion of total Inventory Control Point costs (normally based on surcharges for purchased/repaired items funded with the obligations identified below), and any other DWCF costs to maintain the WRM inventory.

3. **WRM Budget Request.** This area addresses the amounts of obligation authority to be used specifically for WRM items or WRM quantities, whether from an appropriation, from cash balances, or from future sales.
   a. **Additional WRM Investment.** (Normally reimbursed or funded by an appropriation.) The amount of obligations to purchase or repair new or additional items that will increase the value of the total WRM inventory.
   b. **Replenishment/Repair WRM Reinvestment.** The amount of obligation authority to be used to replenish or repair WRM inventory that is sold, and the amount to be used to reinvest in new inventory with the funds from the sale of old inventory. Should normally be a one for one or dollar for dollar (excluding surcharges) replacement.
   c. **Stock Rotation/Obsolescence.** (Separate from the stock replenishment from sales above). This is to replace stocks that are not sold but must be rotated or replaced periodically because of shelf life or obsolescence (can be related to an appropriation, if required, but normally maintains, and not increases, the value of the WRM inventory).
   d. **Assemble/Disassemble.** The amount of obligations to be used to change the configuration of WRM inventory items.
   e. **Other.** As appropriate.

Exhibit Fund-1 Summary of Price and Program Changes – Costs (Continued)

Instructions for Preparation of Exhibit Fund-1
Summary of Price, Program, and Other Changes

This exhibit reflects the total obligations (including direct reimbursements from non-rate based work) to accomplish the DWCF activity mission. The Fund-1 is the Summary Exhibit that consolidates the information from the Fund-1A Details of Price, Program and Other Changes exhibit. The Components are required to address changes in cost between fiscal years as either price or program. Price changes are restricted by the inflation index published in OUSD(C) guidance with the exception of price increase resulting from another DWCF activity’s rate changes.

Exhibit Fund-1a Details in Price and Program Changes – Costs (Continued)

Definitions of Fund-1a Categories - Cost
Details of Price, Program, and Other Changes (Operating Budget)

General. The Fund-1a exhibit reflects the total costs of supporting the applicable activity for each fiscal year PY, CY, and BY. Components must address changes in cost between years as price- or program-driven for each line item. All entries are expenses. Round data to at least the nearest tenth of a million (e.g., show $10.4 million, not $10 million).

Military Personnel Compensation - Chapter 26 depicts cost elements for Military Personnel.

Civilian Personnel Compensation - The cost elements include VERA and RIF as well as the costs to offset the short-term costs of buyouts. Line 112 Retirement Fund Offset (15 percent of Employee’s final basic pay) applies to employees who take a buyout and voluntary early retirement under the Civil Service Retirement System (CSRS).

Cost of Goods Sold – This element represent the cost of goods sold for Supply Activities

Travel – These elements represent the cost of transportation of people.

Materiel & Supplies - These elements support internal materiel, equipment, and supply costs associated with operations. Distinguish between costs associated with materiel purchased from Fund businesses and that purchased from non-Fund businesses.

General Property, Plant & Equipment non-capital – These elements are for equipment purchases made with operating funds for non-capital assets.

Other Revolving Fund Purchases - Purchases from other DoD WCF activities (to include the PRMRF and BMF) to support the internal operations of the activity. Include purchases by supply activities from depot maintenance activities in the respective 600 Other Revolving Fund Purchases category. Report purchases from the DWCF supply activities to support internal General and Administrative operations (not consumed as part of direct or indirect business operations) in category 400. Lines 601-675 should include purchases made at stabilized rates.

Transportation – These elements represent the transportation of things.

Other Purchased Services

Line 941 Technical Drawings (Supply Operations only) - The amount entered for Technical Drawings represent purchases from contractors.

Line 942 Forgings & Castings (Supply Operations only)- The amount entered for Forgings and Castings represent purchases from contractors.

Purchases of engineering services, other than those shown on lines 932-934, should be included on line 969, Other Engineering Services and Support. Delete lines for which there are no costs, for any of the included years (PY, CY, BY), from the submitted exhibit (rather than including them with an amount of zero).

Exhibit Fund-2 Changes in Costs of Operations (Continued)

Instruction for the Preparation of the Fund-2 Exhibit
Changes in the Cost of Operations

The Fund-2 exhibit will explain the changes in the operating budget (costs) from one fiscal year to the next (i.e., FY to CY to BY) at a meaningful level of detail, relating program changes to changes in the level of work load (Unit Cost outputs) to the maximum extent possible. A Fund-2 exhibit for each non-supply DWCF activity is required. Strategies and plans to improve activity productivity and quality are of particular interest. Reform initiatives which impact changes in costs and rates should also be documented. Accordingly, the cost impacts of productivity initiatives should be separately identified on this schedule. Each DWCF activity should include a paragraph outlining major productivity improvement plans and associated resources including but not limited to capital investment, education and training initiatives, process improvements, consolidation and streamlining, work force motivations, and incentives.

Provide a narrative explanation for changes. Round data to at least the nearest tenth of a million (e.g., show $ 10.4 million, not $ 10 million).

For changes in cost due to productivity initiatives, list the detailed initiatives and amounts for each. Distinguish the cost reductions associated by individual productivity initiatives.

Exhibit Fund-3 Labor and Manpower Breakdown (Continued)

Instruction for the Preparation of Exhibit Fund-3
Labor and Manpower Breakout

The Fund-3 exhibit stratifies, by fiscal year (i.e., PY, CY, BY), the total DWCF activity costs in the operating budget by Direct, Indirect Production, and General and Administrative (G&A) (overhead) categories. For the G&A category, only the military and civilian personnel carried in and paid for by the DWCF activity should be reflected in the personnel FTE and end strength numbers. This includes personnel paid from the activity payroll such as assigned security guards and personnel working in the office of the DWCF activity director. However, this does not include the personnel assigned to a general & administrative activity that provides base operations support to the activity unless they are carried in the end strength of the DWCF activity.

For installations owned and operated by a DWCF activity whose primary mission is other than installation management, costs associated specifically with installation management should be identified as G&A Other. These costs will be considered separate and distinct from mission G&A costs.

Compute FTEs by dividing the applicable total number of hours by the number of hours in a work year (e.g., 2080; see OMB Circular A-11 for the correct hours for each year).

9-81
Exhibit Fund-5 Total Cost Per Output Summary (Continued)

Instruction for the Preparation of Exhibit Fund-5
Total Cost Per Output Summary

The Fund-5 is required for all activities except supply activities. Only a single line is required for industrial activities summarizing the cost rate (not the standardized rate for revenue collection) per DLH for the PY, CY and BY. Activities that have multiple outputs and use a standardized rate based on a revenue per specific unit of output (Transportation, Base Support, DFAS, DISA) should report the cost per specific unit of output (not revenue rate) as depicted on the DWCF activity’s respective annual operating budget (AOB).

Narrative:
Exhibit Fund-6 Depot Maintenance -6 Percent Capital Investment Plan (Continued)

Instructions for the Preparation of Exhibit Fund-6, Depot Maintenance –6 Percent Capital Investment Plan

Minimum Capital investment for certain depots is required in accordance with 10 U.S.C. § 2476. Instructions for preparation of Exhibit Fund-6 are as follows:

A. Prepare a Summary Exhibit Fund-6 that provides the total for the activity and a separate Fund-6 for each maintenance depot to include Army Depots, Navy Aviation Depots, Navy Shipyards, Marine Corps Depots, and Air Force Depots.

B. Dollars in millions and tenths of a million.

C. The following will be defined:

   1. Revenue (Avg): Only revenue for Maintenance, Repair and Overall will be included in accordance with amendment (1).

   2. Revenue (3 Year Average): The preceding 3 years of actual or estimated revenue divided by three for Prior Year, Current Year, and Budget Year columns.

   3. Categories of applicable capital investment:

      a. Modernization. Typically refers to upgrades associated with the available current technology.

      b. Efficiency. Typically refers to efforts to improve workflow and increase throughput while maintaining or reducing current costs. Also may refer to improved quality of work performed.

      c. If a modernization leads to an efficiency, then the investment is still considered a modernization. An efficiency not dependent on a modernization is classified an efficiency. If an investment has elements of both, the DoD Component should record the best representation that can be determined.

      d. A narrative should be included with the Exhibit Fund-6 to address the following:

         1. A specification of any statutory, regulatory, or operational impediments to achieving the minimum percentage requirement.

         2. A description of the benchmarks for capital investment established for each covered depot and military department and the relationship of the benchmarks to applicable performance measurement methods used in the private sector.
3. If the minimum percentage requirement is not met for a military department for the fiscal year covered by the report, a statement of the reasons why the requirement was not met and a plan of actions for meeting the requirement for the fiscal year beginning in the year in which the report is submitted.

e. The legislation provides waiver authority for the Secretary of Defense if the Secretary determines that the waiver is necessary for reasons of national security and notifies congressional defense committees.

Exhibit Fund-7 Customer Rate Computations (Continued)

Instructions for the Preparation of Exhibit Fund-7, Customer Rate Computations

The purpose of this exhibit is to establish a standardized rate to customers that reconciles Revenue, Total Costs, and NOR for industrial DWCF activities using DLHs.

For industrial activities, program financing (revenue) is a function of the estimated total cost of goods sold (total expenses) adjusted for NOR, Capital Requirements and other surcharges, divided by the programmed output (total DLHs), to identify an initial revenue rate per DLH.

The number of military and civilian DLHs associated with carry-in workload (unfilled customer orders on hand at the start of the current year) times the prior year stabilized rate (rate in effect when the carry-in orders were accepted) will be identified as revenue earned in the current fiscal year. The DLHs and associated dollars will be subtracted from the BY total DLHs and revenue as identified above.

Part I: All revenue associated with direct reimbursable costs (non-rate based workload) and orders received in the current year must be removed with the associated DLHs in order to forecast a BY Revenue Rate for new orders. Total revenue must cover all projected costs and NOR adjustments as depicted on the Fund-14. The BY revenue rate is the revenue expected from new orders divided by the DLHs associated with that workload.

Part II: The NOR adjustment must be subtracted from the total rate based revenue (not just the new order revenue) because total expenses in the BY will be a combination of CY and BY workload. Subtracting a negative NOR will add to the costs reflecting costs greater than revenue as depicted on the Fund-14. The BY cost rate is total rate based costs divided by total rate based DLHs (not just new order revenue DLHs). The BY cost rate, total rate based costs, and total rate based DLHs should reconcile to the Fund-5.

Part III: Total Fund-1 Summary of Price, Program, and Other Changes costs should reconcile with total rate based costs and direct reimbursables.

Exhibit Fund-8 Air Mobility Command Common User Services (Continued)

**Instruction for the Preparation of Exhibit Fund-8**

**Common User Transportation Services**

This exhibit displays the costs, revenues, NOR, and AOR of USTRANSCOM’s operations, with emphasis on the explanation of item 3B, Total Airlift Readiness Revenue. The USTRANSCOM must include a narrative outlining reasons for variances greater than 20 percent for each line of Airlift Readiness Revenue from one year to the next.

For changes in Airlift Readiness Revenue, distinguish the factor(s) that causes the change (e.g., utilization factors, airlift rates set to compete with private sector rates, commercial transportation prices, aircraft maintenance prices).

Round data to the nearest tenth of a million.

*Fund 9a Summary exhibit must reconcile to the Fund 9b project justification.
Exhibit Fund-9a Activity Capital Investment Summary (Continued)

Instructions for the Fund-9a Exhibit
Capital Investment Summary

General - The aggregate project line items listed for each major category are the minimum submission requirements. Projects may be added or modified to meet the specific requirements of the DWCF activity as long as there is a corresponding Fund-9b that describes what is being purchased and the reason for the requirement. The summary item description and the aggregate project amounts on the Fund-9a must correspond to the individual Fund-9b. All Prior Year projects will be shown by line item detail cross-referenced to the corresponding Fund-9b. In addition, the ADPE and Telecommunications equipment and software development Fund-9b Exhibit line number assigned should also be used for cross-referencing within the Information Technology Exhibits as outlined in Chapter 18 of this regulation. Use the approved DWCF activity name. The four major categories for Capital Investment Programs are as follows:

1. Non-ADPE & Telecommunication Equipment > $250K: Equipment, other than ADPE and Telecommunications Resources. A separate Fund-9b will be provided for each aggregate project. Each project will include cost estimates for at least the subcategories shown above (unless no equipment of that kind is purchased). Other project categories may be added.

2. ADPE & Telecommunications > $250K: ADPE and Telecommunications Equipment Component will provide a Fund-9b for each of the aggregate projects listed above (unless no equipment of that kind is being purchased). Other project categories may be added. One Fund-9b narrative may address all projects under $5,000,000 by category (e.g. “Other ADPE Support Equipment under $5,000,000”). Items that exceed $5,000,000 will be addressed separately in the narrative.

3. Software Development > $250K
   a. Software Development must be shown on a separate Fund-9b by item detail for projects equal to or greater than $5,000,000. All software projections must comply with DoD Chief Information Officer (CIO) requirements/approvals.
   b. One Fund-9b may be submitted for software development under $5,000,000 that does not need DoD CIO approval. This Fund-9b may be submitted with a general statement of the enhancements that will be provided. In addition, the Fund-9bs must include a system delivery date/s. If it is a spiral development, all delivery dates and amounts to be capitalized will be included in the Fund-9bs.

   a. Minor Construction may be combined into one Fund-9b as long as each project listed is below the threshold. The Fund-9b must contain a statement that no Minor Construction project exceeds the current MILCON threshold.
b. All special categories of minor construction will be listed and justified separately (such as Navy R&D). 10 U.S.C. § 2805, paragraph (d) authorizes activities to use up to of funds available for operation and maintenance for unspecified minor construction projects for laboratory revitalization and recapitalization. However, Congressional notification is still required for projects exceeding the threshold.

1. Section 1.4, Policy, provides specific guidelines for inclusion or exclusion of an item in the capital budget, and the necessary analysis required to substantiate a capital budget request.

2. Definitions for these capital budget categories are provided below:

A. **Non-ADPE Equipment exceeding the capitalization threshold** will be capitalized and depreciated. Equipment should be aggregated into projects by like-types. There is no limit on the number of projects that may be used.

B. **ADPE and Telecommunications Equipment** having a system unit cost exceeding the capitalization threshold will be capitalized and depreciated.

   (1) ADPE and telecommunications resources consist of computer hardware, operating system software (including utility and communications software) and telecommunications equipment as defined in OMB Circular A-11.

   (2) ADPE costs will be displayed in five parts: (1) Computer Hardware (Production), (2) Computer Hardware (Network) (3) Computer Software (Operating System), (4) Telecommunications, and (4) Other Support Equipment. The last category includes investments such as uninterrupted power sources and air conditioning that must be purchased to support computer and telecommunications resources.

C. **Software Development/Modernization** with a system unit or lifecycle cost exceeding the capitalization threshold will be capitalized and depreciated. Internally developed software and externally developed Software will be listed separately.

   (1) Software development includes the actual development and acquisition of the information system as defined in OMB circular A-11. This category does not include software developed for a customer for use in a weapon system.

   (2) Software development/modernization will be budgeted by project. A project is defined as any change, modernization, or improvement to a system, subsystem or severable module of a system that by itself will provide an economic benefit or improvement in a business process. This must include all changes or improvements needed to interface or integrate with other ancillary systems. A project has a start and stop date, a specific amount of funds, and results in a usable end product.
Exhibit Fund-9a Activity Capital Investment Summary (Continued)

(3) Software development/modernization projects will exclude CIP ADPE investments. These will be identified separately in the ADPE and telecommunications section of the Fund-9a and Fund-9b.

D. **Minor Construction** projects financed by the activity and exceeding the capitalization threshold will be capitalized and depreciated.

E. **Column Entries**

   (1) **Item Description**. Enter the projects/item descriptive title of Software projects to be procured.

   (2) **Quantity**. As applicable, enter the quantity of items procured/estimated to be procured during, as FY PY, FY CY, and FY BY.

   (3) Amount should reflect all costs associated with program changes through the date of preparation of the exhibit regardless of whether such changes have been previously reported. Costs will be expressed in millions of dollars to at least the nearest tenth (i.e., $2.6 million).

F. **Capital Outlays** – For each fiscal year, indicate the estimated total cash outlays for all capital budgeted items (above and below threshold) expended in that fiscal year regardless of the year in which the project was originally obligated.

G. **Capital Investment Recovery (CIR)** – For each fiscal year, show the estimated budget CIR that will be included in customer rates for all capital assets in that year. This amount will agree with the CIR reported on the Revenue and Expense Statement (Fund-14) and in the CIR Section of the Fund-1a.

**Narrative Justification:**

This exhibit will provide detailed justification by line item in support of summary capital investment purchases shown on the Fund-9a Exhibit.

- Describe the enhancement afforded by the existing equipment/ADPE and telecommunications resources/software development facility and the shortcomings inherent in the current situation.
- Describe the benefits to be realized from the proposed capital investment.
- Indicate whether an economic analysis or cost analysis has been performed and, if not, why not. Summarize the net present value advantages of the proposed investment over alternatives considered and discarded. Be prepared to provide a copy of supporting economic analysis upon request.
- For MILCON projects, provide a copy of the supporting Form 1391 for new projects not previously submitted or identified.
- Describe the impact of not making the proposed capital investment.
- For computer software, separately identify license fees.
- Alternatively, dollars in millions may be used out to three decimal places.
Exhibit Fund-9b Activity Capital Investment Justification (Continued)

Instructions for the Preparation of Exhibit Fund-9b
Capital Investment Justification

I. General

A. The purpose of this exhibit is to provide narrative justification in support of each project/line item detailed on the Fund-9a. A separate Fund-9b justification is required for each applicable software investments. For ADPE Telecommunication Equipment items that are equal to or greater than $5,000,000, a separate Fund-9b is not required and may be summarized into the categories displayed in the Fund-9a. Software projects over $5,000,000 and/or that need DoD CIO approval must be line itemed with individual Fund-9bs. It is important that the Fund-9b be completed and accurate as it is the primary justification for activity’s capital purchases.

B. Separate Fund-9b exhibits will be submitted for each project/line item on the Fund-9a where there is an entry in either the current year or budget year(s) columns. Prior year capital investments do not require Fund-9bs for projects with only a PY entry.

II. Headings

A. For the PBR, insert “FY XX OSD/OMB submission” (XX is used for illustration purposes only. Insert the applicable fiscal year in lieu of XX).

B. Identify the applicable DoD Component/DWCF activity for the proposed capital investment. Use the approved DWCF activity name. Identify the activity that will benefit from the capital item, if possible.

C. For each project/line item (e.g., forklifts), indicate the item description contained in Exhibit Fund-9a.

D. Project/Item Description. Enter a line item identification number to cross-reference the corresponding entry on the Fund-9a along with a description of the investment.

III. Column Entries

A. Element of Cost. For items purchased under the Project/Line Item, provide applicable subcategories (i.e., vehicles may be broken down into cars, trucks, buses, etc.). For Software provide the item, and if applicable, break into module delivery subcategories.

B. Quantity. Provide the approximate number of items to be purchased under the subcategory or as applicable for software.

C. Per Unit Cost. Enter the actual or estimated unit cost, when appropriate, for each element listed. Express unit costs in thousands of dollars, to the nearest tenth (i.e., $20.1 thousand). Unit costs should be expressed in terms of “the year” costs.
Exhibit Fund-9b Activity Capital Investment Justification (Continued)

D. **Total Costs.** Enter the total cost of Element of Cost and where applicable, taking into consideration the quantity to be estimated to be procured and the unit costs.

IV. **Narrative Justification**

A. Provide complete narrative description for each applicable project/line item. This narrative justification should include sufficient information to serve as the sole justification for funding the project/line item. Include a brief description for special interest items such as ADPE Equipment equal to or greater than $5,000,000. The narrative description should include, but not be limited to:

1. The nature, purpose, and intended use of the project or item(s).

2. Indicate whether an economic analysis was performed (all items within a project require the appropriate analysis).

3. Indicate the dollar value of estimated savings/cost avoidance after the equipment is installed or the project is complete and the fiscal year when the savings/cost avoidance should begin. If no savings/cost avoidance should result from the purchase, an explanation must be provided to indicate why.

**Total FY ___**

Instructions:

Complete for each fiscal year required in the Program/Budget Submission (i.e., PY, CY, and FY preferably all on one page), summarized by major category. The “Current Projected Column” is the program approved in the current President’s Budget submission.

**Initial Request.** For the PY, this will be the CY column of the previous year’s President’s Budget. For the CY, this will be the BY column of the previous year’s President’s Budget. For the BY, only the “Initial Request Column” will be filled in (the BY will be displayed for comparison purposes).

**Current Projected Costs.** For the PY, this is the amount approved at the end of the fiscal year. For the CY, this is the amount in the current President’s budget. The delta between the Initial Request and Current Projected Costs will be displayed in the “Approved Change” column. The BY is only used for display purposes.

**Explanation.** Provide a brief and concise explanation why the changes needed to occur.
ACTIVITY ANALYSIS

6. Credit (-)

7. Net Sales
Exhibit Fund-11 Source of New Orders & Revenue (Continued)

Instructions for the Preparation of Exhibit Fund-11
Source of New Orders & Revenue

This Exhibit will identify the customers of each DWCF activity by DoD Component and the appropriation level. Be specific as to the source of funding by listing the appropriation name. Entries such as OSD or Army are not acceptable on this Exhibit. Lack of specificity will indicate that the funding source is unknown and may not be considered as a legitimate source of funding. The identification will be on the basis of funded orders so that DWCF activity may be linked to the appropriations for goods and services.

For line 1.a (Orders from DoD Components), show the amounts by appropriation (i.e., Operation and Maintenance, Army National Guard; RDT&E, Army; etc.) for orders accepted within the submitting Service/Component. For orders accepted from other DoD Components, show the appropriation detail for significant customers.

For line 1.b (Orders from Other Fund Activities), show the orders accepted from other Defense WCF activities. Be specific as to the activity.

The Total for New Orders on Line 1 must match data provided on other reconciling exhibits.

For line 2, Carry-In Orders, display the carry-in orders from prior fiscal years. For the Supply Management activities, carry-in orders represent back orders. This is line 3090 on the SF-133 “Uncollected Federal Payments” less accounts receivable. Accounts receivable is typically displayed on the sub-activity SF-133 as supplemental information.

For line 3, Total Gross Orders, add the sum of lines 1, Total for New Orders, and line 2, Carry-In Orders.

Line 4, Revenue, will equal total gross sales shown on the Revenue and Expense Statement.

Line 5, End of Year Work-in-Process, should equal orders from line 3, Total Gross Orders that will not be sold in the current year. For Supply Management activities, this line should equal backorders.

Components will submit summary Fund-11 exhibits for activities that have subdivisions and will submit a summary Fund 11 at the Component level.

Exhibit Fund-11a Carryover Reconciliation (Continued)

Instructions for Carryover Calculations
for the Preparation of Exhibit Fund-11a, Carryover Reconciliation

The reporting of carryover will be accomplished on the Fund 11a exhibit, Carryover Reconciliation. The Fund-11a exhibit, Carryover Outlay Calculation, displays and reconciles the detail of the Fund-11 exhibit by providing revenue, customer orders, and months of carryover by fiscal year, appropriation.

**Carryover calculation.** All DoD Components should pay close attention to their carryover amounts as reported on the AR(M) 1307 as “unfilled customer orders”. Components must budget to end each fiscal year with between five and seven months of carryover. The following metrics will be used to assess each fiscal year in the budget exhibit: ≥5 and <7 of carryover is green (within range); >3 and <5 and ≥7 and <8 months of carryover is yellow (at risk); ≤3 or ≥ 8 months of carryover is red (out of range). Components must include justification for carryover that is rated yellow or red. The justification for a yellow or red rating for each year must include the mitigating actions that will be taken to get to green including a timeline for when that will occur.

**PART A - Carryover Calculation Categories.**
- Line 1 (Total New Orders) displays the new orders projected to be received during the fiscal year.
- Line 2 (Net Carry-in Orders) displays the orders projected to be carried into the fiscal year from the prior fiscal year.
- Line 3 (Total Gross Orders) is the sum of lines 1 and 2.
- Line 4 (Revenue) displays the revenue projected to be earned during the fiscal year.
- Line 5 (Carryout) equals line 3 minus line 4 and displays the carryout projected at the end of the fiscal year.
- Line 6 (Workload Completed Per Month) equals line 4 divided by 12 and calculates the average revenue per month.
- Line 7 (Months of Carryover)

**PART B. - Carryover $ Value & Months by Location Activity**
- Line 1 (Activity 1) Enter the Fund-11 projected dollar value of carryover and months of carryover for Activity 1
- Line 2 (Activity 2) Enter the Fund-11 projected dollar value of carryover and months of carryover for Activity 2
- Line 3 (Activity 3) Enter the Fund-11 projected dollar value of carryover and months of carryover for Activity 3
- Continue with as many Activities that are within your Component.
- Total. Sum the projected dollar value of carryover for all Activities

**PART C. - Carryover $ Value by Appropriation & Service**
- On each line, enter the projected dollar value of carryover for the appropriation.
- Total. Sum the projected dollar value of carryover for all appropriations.
- The total value of carryover from Part C and Part B must equal the total value of carryout from Line 5 of Part A.

Exhibit Fund-12 Customer Orders to Customer Funding Reconciliation (Continued)

Instructions for the Preparation of Exhibit Fund-12

The source of new orders section displays data directly from the Fund-11. The customer funding section displays data from the Program Resources Collection Process (PRCP) system entered by the DoD Components consisting of funding levels for each sub-object class related to each Component’s Working Capital Fund Activity Group. The delta section displays the value and percentage difference between the source of new orders section and the customer funding section. Customer funding – source of new orders = delta ($). Delta ($) / customer funding = delta (%).
Provide a monthly and cumulative phasing for each and every activity group displaying disbursements, collections, transfers in, transfers out, appropriations, net outlays, and beginning and ending cash balances for the prior, current, and budget year(s). Put each year on a separate page.

Cash balance at the beginning of the FY (+/-) Total Change in Cash = Cash Balance at the end of the FY.

Submit Excel workbook (by activity including total fund roll up) to the OUSD(C) Revolving Funds Directorate’s cash manager.
The Fund 13b exhibit provides each activity group’s average rate of disbursement and stratifies its cash requirement based on the amount of cash held for current year operations, subsequent operations and risk mitigation.

Submit Excel workbook to the OUSD(C) Revolving Funds Directorate’s cash manager.
Exhibit Fund-13b Cash Requirements (Continued)

Instructions for Cash Requirements

1. Rate of Disbursement (Average Amount Disbursed per Collection Cycle) = Result of dividing Line 1a divided by Line 1b.
   
1a. Total Disbursements – total amount budgeted for disbursement from the exhibit Fund-13.
   
1a. Number of Collection Cycles – the total number of collections cycles planned for the year.

2. Range of Operation – header, no entry required
   

2b. Lower Estimate of Expected Operating Range – The lowest cash level expected based on budgeted assumptions and historical trends. Provide an explanation if the lower bound does not equal the sum of Line 3 and Line 4.

3. Risk Mitigation (Cash held to mitigate specified risks) – Total amount of cash held for risk mitigation. The specific risks for which cash is being reserved should be provided along with amounts on lines 3a., 3b., etc. Examples of specified risks include, but are not limited to, items such as budget estimation error and commodity price fluctuation.

4. Reserves (Cash held to meet specified future requirements) – Total amount of cash held through the fiscal year to meet specified requirements in subsequent years. A description of the requirements for which cash is being held should be provided along with amounts on lines 4a., 4b., etc. Examples include, but are not limited to, unexpended appropriations, planned capital investments, and funds retained to support the return of accumulated operating results (AOR) in subsequent fiscal years.

5. For further explanation of each of the four major elements of the cash requirement, see paragraphs 090103.A.4.d-g.

6. A narrative is required describing the methodology and makeup of 1 through 4 above as appropriate.

Note: A graphic display of the elements included in the exhibit, Fund-13b, Cash Requirements, is provided on the following page.

Exhibit Fund-14 Revenue and Expenses (Continued)

Instructions for Statement of Revenue and Costs
Keyed to Statement Footnotes

Note: Information on this exhibit should reconcile to other exhibits that display Revenue and Costs (Fund-7, Customer Rate Computations; SM-5a, OP-32 Price Change; Fund-11, Source of Revenue; Fund-1/1a, Summary/Details of Price, Program, and Other Changes).

A. For supply management activities, the line should reflect Gross sales. Credit returns should be displayed in the Refunds/Discounts line.

B. Capital Surcharge represents the increase in prices (and projected revenue) due to surcharging the capital budget requirement to provide sufficient cash to support the capital budget. This line is blank if a capital surcharge is not included in price (also see note F).

C. Other income is to include pass-through revenue such as direct reimbursable.

D. Cost of materiel sold from inventory includes the MAC value of materiel sold from inventory and the cost of repair. Both wholesale and retail costs should be included. For Supply activities, this figure does not represent required budgetary resources for inventory. If additional resources are required, a surcharge pricing element should be added on the SM-5a and an “Inventory Retention” category as an operating adjustment should be identified on the Fund-14. At the discretion of the Supply activity, “Inventory Retention” may also be used to display the difference of Total Materiel Costs on the SM-5a and Materiel Costs without inflation. In either case, the final NOR should be the same.

E. Capital Investment Recovery (CIR) reflects the estimated recoupment of all assets defined by the capital program in terms of recoupment of outlays.

F. This represents the “gross” result from operations, prior to adjustments.

G. Includes all “Other Adjustments” to NOR; multiple lines may be used. For example, Capital Surcharge reservation here should offset capital surcharge in revenue. Include any appropriations realized to offset current period costs (e.g., pass-through appropriations to cover underutilized plant capacity). Appropriations for war reserve materiel do not offset current period expenses, do not affect NOR, and should be subtracted if reported as part of revenue or be reported as an adjustment below NOR. This includes:

Transfers to correct for prior period over- or under-pricing:
1. Other approved transfers for collections from customers for which an expense has not been recorded;
2. Other collections (that are not transferred out, but placed in some sort of reserve) from customers for which an expense has not been recorded; or,
3. Unfunded expenses resulting from a policy change, which must be deleted prior to determining NOR.
H. The NOR is the fiscal year gain or loss from operations. The NOR will be carried into Accumulated Operating Results (inception to date) in the equity portion of the balance sheet. NOR and AOR are key performance indicators. Sufficient unobligated and cash resources must be available to return AOR. If not, then the minimum cash retention becomes a non-recoverable adjustment. Likewise, non-supply activities must have sufficient PY unobligated balances to return AOR. If not, then AOR must be retained and a non-recoverable cash surcharge may be required in order to generate sufficient budgetary resources. In addition, CIR for DWCF activities do not typically represent the total CIP cash requirement.

I. The Deferred AOR are revenue, expenses, gains, or loss transactions that impact WCF cash and are temporarily deferred in the budget to be recovered/returned in a future year.

J. The Non-Recoverable AOR are revenue, expenses, gains, or loss transactions that do not impact WCF cash and are permanent (though they could be reversed if necessary). Common examples of non-recoverable is the depreciation of real property purchased with MILCON and reported by the WCF activity or equipment purchased with appropriated funds and then transferred without reimbursement to a Depot for use. The Depot records the depreciation but does not include those costs when developing their rates.

Exhibit Fund-15 Fuel Data (Continued)

Instructions for the Preparation of Exhibit Fund-15 Fuel Data

The purpose of Fund-15, Fuel Data, exhibit is to provide reconciliation between the Defense Logistics Agency (DLA) Energy activity, and the customer budgets. Prepare the Fund-15 exhibit for the prior year actual, current year, and budget year. The DLA Energy activity will prepare the exhibits for both petroleum and aerospace fuel products. Prepare the exhibit for each division that procures petroleum fuel products and a consolidated exhibit. Instructions for preparation of Fund-15, Fuel Data:

1. **Barrels.** Use 42 gallons per barrel. Show barrels in nearest tenth of million barrels.

2. **Cost per Barrel.** Use cost in dollars and cents per barrel.

3. **Extended Price.** Multiply number of barrels by cost per barrel. Use dollars in millions and display results in tenths of a million.

4. **Product.** List by product.

5. **Stabilized Price.** Show current approved stabilized price.

The USTRANSCOM must submit separate Fund 15 exhibits for its Organic, Commercial and Military airlift missions.
Exhibit Fund-16 Materiel Inventory Data

Materiel Inventory EOP

Materiel inventory for the purposes of this exhibit is inventory that will be consumed in production to complete a finished product (i.e., bolts, screws, clamps, metal plates, etc.). It does not include operating materiels such as pens, pencils, paper, staples and toner cartridges.

Complete one exhibit for each fiscal year (i.e., PY, CY, and BY) for the non-supply activities (i.e., depot maintenance, etc.). Inventory pricing will be based on current policy on inventory valuation.

*This would also include reductions due to obsolescence. All other reasons for inventory reductions would be listed in item C.

Exhibit Fund-28 Execution Performance Analysis (Continued)

Instructions for the Preparation of Exhibit Fund-28 Execution Performance Analysis

The OUSD(C) P/B Revolving Funds Directorate conducts first, second, and third quarter Budget Execution Reviews (BERs) each fiscal year for the DWCF, PRMRF/BMF, and DCSA WCF. Each Component is required to complete the Fund-28, Execution Performance Analysis, for each of their business areas and is expected to be prepared to discuss, by separate business areas on the items presented in the Fund-28. An official BER announcement memorandum is sent out each of the three quarters with instructions, suspense dates, and any changes to the list.

All Components must complete a Fund-28 Execution Performance Analysis, for each of their activity groups. The Accounting Report (Monthly) 1307 or Standard Form (SF) 133, Report on Budget Execution and Budgetary Resources, should be the source for the financial data. If another source is used, identify the source and provide the actual documents as supplemental information. Components will also identify any areas of concern and examples of improving efficiency or effectiveness of operations, either realized or planned. Use the narrative tab for your write-up.

BER Reporting will include the following:

1. The FY CY phasing plans for cash and NOR found in the FY BY President’s Budget.
2. Must utilize the SF-133 and 1307 report data for the reporting periods December (Q1) /March (Q2)/June (Q3) for the FY.
3. Cash levels by business activity, and EOY projections as for the reporting period.
4. Total New Orders vs. Plan and EOY projections.
5. Financial data variances from plan and EOY projections.
6. Obligations, Revenues, Costs, Collections, Disbursement, Net Operating Result (NOR), and Accumulated Operating Result (AOR) actual data for the reporting period.

Exhibit Fund-30 Underutilized Plant Capacity (Continued)

Instructions for the Preparation of Exhibit Fund-30
Unutilized and Underutilized Plant Capacity (UPC)

**PART I.**

The purpose of this exhibit is to determine capacity indices and mobilization funding requirements for DWCF industrial activities. Unutilized (Reserve), Underutilized Plant Capacity and Industrial Mobilization Capacity costs should be excluded from the DWCF rate structure. Overburdening the customer for costs associated with idle expansion capability is not a fair reflection of operating costs associated with workload. In many cases, these costs must be incurred by a federal facility where the private sector can choose to downsize its operations.

Appropriated funding supports equipment that is utilized 20 percent or less of capacity (hereafter referred to as “unutilized”) and has a requirement to support surge and/or replenishment. It is not excess capacity; it is necessary to support core industrial maintenance requirements.

This exhibit may apply to all industrial activities (mostly Depots and Ordnance activities) whether or not the respective Service is identifying UPC funding as part of the topline submission in the O&M budget submission. Thus, at a minimum, the capacity-related indices for items numbered one through three should be completed for each industrial activity.

There are four types of facilities that may qualify:

1. Ammunition Storage
2. Ammunition Production
3. Maintenance
4. Manufacturing

Each qualifying facility must be identified and listed separately.

**PART II.**

For each activity with an amount in the Funded UPC (i.e., 1.F., 2.J., 3.F., 4.F.) category identified in the exhibit Fund 30 format, the following is required:

A. Narrative describing the nature of these UPC costs being incurred at the activity. Provide justification as to what is being accomplished with these funds.

B. Breakdown of costs by element.
INSTRUCTIONS FOR PREPARATION OF
THE SUMMARY OF PRICE AND PROGRAM CHANGES (EXHIBIT PB-32)

The PB-32 Rates Changes exhibit provides a breakout of the detailed price and program that drive the rate changes from prior year (PY), current year (CY), and budget year (BY), by sub-object classification, as applicable.

1. For the OSD/OMB budget review, prepare the PB-32 to show the rate (percent) of price and program growth for the various object sub classifications.

2. The price growth column should show the amount of price growth for various object sub-classifications. The rate of price change for lines 401, 411-415, 502-506, 601-693, and 701-721 should agree with applicable rates approved by OSD.

3. Program amounts should be consistent with Fund purchases included in Object Class 25.3. For, AMC, MSC, and MTMC costs displayed for items; 702, 703, 705, 706, 707, 708, 711, 714, 718, 719, 720, and 771 should include all purchases from these transportation funds. These amounts should exclude all non-Defense Working Capital Fund purchases such as reimbursement to MTMC of non-Defense Working Capital Fund (overseas) port operations.

4. Line 703 JCS Exercises includes only those services in support of JCS exercises and paid only by The Joint Staff (TJS).

5. Includes centrally managed items procured by the Defense Working Capital Fund from sources other than Defense Working Capital Fund or non-Defense Stock Funds.

6. Budget year (BY program amounts should reflect stabilized rates as requested by the Service (OSD submission) or as approved by OSD (President’s Budget), as applicable, to include the impact of biennial budget years’ pay raises.

VOLUME 2B, CHAPTER 10: “PUBLIC ENTERPRISE, MANAGEMENT, AND TRUST FUNDS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue and underlined font.

The previous version dated June 2010 is archived.

CHAPTER 10

PUBLIC ENTERPRISE, MANAGEMENT, AND TRUST FUNDS

1.0 GENERAL (1001)

1.1 Purpose (100101)

1.1.2. The following accounts are covered:

Public Enterprise Funds
- National Defense Stockpile Transaction Fund
- Pentagon Reservation Maintenance Revolving Fund
- National Defense Sealift Fund
- Buildings Maintenance Fund

Management Funds
- None

Trust Funds
- National Security Education Trust Fund
- Surcharge Collections, Sales of Commissary Stores, Defense
  (see Volume 2A, Chapter 1, Section 010603 for listing of all current trust fund accounts)

1.2 Background (100102)

1.2.1. Public Enterprise Funds are expenditure accounts authorized by Congress to be credited with collections, primarily from the public, that are generated by, and earmarked to finance, a continuing cycle of business-type operations.

1.2.2. The Pentagon Reservation Maintenance Revolving Fund and Buildings Maintenance Funds are Enterprise Funds that operate in accordance with the provisions of Volume 11B of the DoD FMR “Reimbursable Operations Policy – Working Capital Funds (WCF)” and of Volume 2B, Chapter 9, “Defense Working Capital Funds Activity Group Analysis”. These Funds satisfy recurring Department of Defense requirements by using a businesslike buyer-and-seller approach. Unlike profit-oriented commercial businesses, these activities budget to break even over the long term. Selling prices established in the budget are stabilized or fixed during execution to protect customers from unforeseen rate and price fluctuations that would impact customer ability to execute the programs approved by the Congress.

1.2.3. A basic principle of the enterprise fund structure is to create a customer-provider relationship designed to make activity managers and decision-makers at all levels more concerned
with the costs of goods and services. Requiring customers to pay for support they receive provides increased assurance that services supplied and paid for are actually needed.

1.2.4. Trust Funds. The following definitions apply to trust fund accounts.

1.2.4.1. Trust fund receipt account. Trust fund receipt accounts are credited with receipts generated by the terms of a trust agreement or statute. At the point of collection, these receipts are available for transfer to a trust fund expenditure account or are not available for transfer depending upon the terms of the trust agreement or statutory authority.

1.2.4.2. Trust fund expenditure account. Trust fund expenditure accounts are established to record amounts appropriated or otherwise made available by transfer from a trust fund receipt account to be obligated and expended in carrying out the specific purposes or programs in accordance with the terms of the trust agreement or statute. Funds transferred or appropriated to a trust fund expenditure account are normally available for obligation and expenditure within the limits imposed by the trust agreement or authorizing statute.

1.2.4.3. Trust revolving fund account. A trust revolving fund is a single account that is authorized to be credited with receipts and incur obligations and expenditures in support of a continuing cycle of business-type operations in accordance with the provisions of the trust agreement or statute. Trust revolving fund receipts are available for obligation and expenditure without further action by Congress.

1.2.4.4. Unavailable collections are either (1) unappropriated receipts or receipts that are precluded from obligation because of a provision of law, such as a benefit formula or limitation on obligations in PY, CY, or BY, or (2) collections unavailable for obligation because of limitations on obligations in PY, CY, or BY. Section 36.6 of OMB Circular A-11 provides instructions on MAX Schedule N on unavailable collections for trust funds and O&M special funds which Federal agencies must include in their annual budget submission to OMB.

1.3 General (100103)

1.3.1. In general, DoD trust funds authorized to incur obligations and expend receipts have been exempted from apportionment by OMB. However, the Surcharge Collections, Sales of Commissary Stores, Defense trust revolving fund, and the National Security Education Trust Fund are subject to apportionment by OMB. Each trust fund must be viewed as a unique fund in light of any special provisions in the trust agreement or the enabling legislation.
1.3.2. Trust funds have been assigned account symbols between 8000 and 8999. Within this range trust revolving funds have been assigned symbols between 8400 and 8499. Some trust funds used by DoD are:

- Surcharge Collections, Sales of Commissary Stores, Defense National Security Education Trust Fund

1.4 Submission Requirements (100104)

General guidance with regard to submission requirements is presented in the DoD Financial Management Regulation (DOD 7000.14-R), Volume 2A, Chapter 1. Volume 2B, Chapters 9 and 19 cover specific back-up material requirements for the above areas.

1.5 Preparation of Material (100105)

General guidance with regard to format and preparation of material is presented in the DoD Financial Management Regulation (DOD 7000.14-R), Volume 2A, Chapter 1. Volume 2B, Chapters 9 and 19 provide additional specific guidance with regard to the back-up material required for Public Enterprise, Management Fund and Trust Fund accounts.

1.6 References (100106)

The DoD Financial Management Regulation (DOD 7000.14-R), Volume 2A, Chapter 1 provides funding policies, including those that impact other appropriations/accounts. Volume 2B, Chapter 9 provides guidance related to Defense Working Capital Fund accounts. Certain exhibits required by this chapter are found in Volume 2B, Chapters 9 and 19.

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION (1002)

2.1 Purpose (100201)

This section highlights the policies and justification procedures underlying budget formulation for Public Enterprise, Management Fund, and Trust Fund accounts.

2.2 Submission Requirements (100202)

2.2.1. Public Enterprise Funds

- National Defense Stockpile Transaction Fund
  - Exhibits Fund-1, 1a, 2, 4, 11, 14, 17, 21, & 23.
Pentagon Reservation Maintenance Revolving Fund  
Exhibits Fund-1, 1a, 2, 3, 9a, 9b, 9c, 11, 13, 13b, 13c, 14, and 26.  
OP-8 and PB-22.

Building Maintenance Fund  
Exhibits Fund-1, 1a, 2, 3, 9a, 9b, 9c, 11, 13, 13b, 13c, 14, and 26.  
OP-8 and PB-22.

National Defense Sealift Fund (NDSF)  
Exhibits Fund-1a, 2, 11, & 12.

2.2.1.2. The instructions and formats for the preparation of the NDSF required procurement and RDT&E exhibits are included in the DoD Financial Management Regulation (DoD 7000.14-R), Chapters 4 and 5, respectively.

Procurement/Ship Acquisition:

Budget Item Justification Sheet (P-40)  
Weapon System Cost Analysis (P-5)  
Analysis of Ship Cost Estimates (P-8a/8b)  
Advance Procurement Analysis (P-10/10a)  
Ship Production Schedule (P-27)  
Ship Outfitting Costs (P-29)  
Ship Post Delivery Estimates (P-30)

National Defense Features (NDF):

Budget Item Justification Sheet (P-40)

RDT&E:

Budget Item Justification Sheet (R-2)  
Program Element/Project Cost Breakdown (R-3)  
Program Schedule Profile (R-4)  
Program Schedule Detail (R-4a)

2.2.1.3. Additional data required by OMB Circular A-11 will be submitted in accordance with annual USD (Comptroller) budget guidance.

2.2.2. Management and Trust Funds - For Trust Funds, Trust Revolving Funds and other Management Funds, program and financing, and object classification schedules will be submitted for each account. The budget authority for each trust fund account must agree with the amounts reported against the applicable receipt accounts as required by DoD accounting guidance related to offsetting receipts. The receipt accounts are published in Treasury’s Federal Account Symbols and Titles. For the Defense Commissary Agency, a footnote to the program and financing schedule will show the value of the obligations for renovation/construction of commissaries included in total obligations of the trust revolving fund.
2.2.3. Special Budget Exhibits - Unique data pertaining to a particular fund are required as follows:

National Defense Stockpile

Stockpile Financial Status Report (SP-1)

Pentagon Reservation Maintenance Revolving Fund

Cost of Services (PR-1)
Summary Statement (PR-2)

Buildings Maintenance Fund

Cost of Services (PR-1)
Summary Statement (PR-2)

Surcharge Collections, Sales of Commissary Stores, Defense

Summary (CT-1)
Facility Programs Justification (CT-2)

National Defense Sealift Fund (NDSF)

Ready Reserve Force (RRF):

Budget Item Justification Sheet (RRF-1)
Ship Composition Funding Requirements (RRF-2)
Ship Readiness Operational Status (ROS) Composition (RRF-3)

2.2.4. Budget exhibits will be submitted in accordance with the schedule published annually in DoD Comptroller budget guidance. Formats and instructions for preparation of the Special Exhibits are provided Section 4.0.

2.2.5. All NDSF related budget justification materials should be submitted directly to the Director for Investment, room 3C749. In addition to the DWCF schedules, procurement, and RDT&E exhibits referenced in paragraph 2.2 above, the special exhibits identified above must be included in the NDSF justification budget backup book for both the OSD and Congressional submissions. The backup book should include a table of contents, a computer generated FYDP funding report identifying each business area, and each business area/section should be tabbed.
3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (1003)

3.1 Purpose (100301)

This chapter provides the policies and procedures to guide the development of budget justification and supporting narrative to be submitted by Components to the OUSD (Comptroller) in development of congressional justification material.

3.2 Submission Requirements (100302)

3.2.1 Guidance is applicable to the following DoD Public Enterprise, Management Funds, and Trust Funds:

**Public Enterprise Funds**

(1) National Defense Stockpile Transaction Fund
(2) Buildings Maintenance Fund
(3) Pentagon Reservation Maintenance Revolving Fund
(4) National Defense Sealift Fund

**Management Funds**

**Trust Funds**

(5) National Security Education Trust Fund
(6) Surcharge Collections, Sales of Commissary Stores, Defense

3.2.2 The following table presents the exhibit requirements to be submitted as part of the President’s budget for the funds identified in paragraph 3.2.1, above. Additional budget justification material to accompany the President’s budget may be prescribed by separate USD (Comptroller) budget guidance.

CHAPTER 11

OFFSETTING RECEIPTS

1.0 GENERAL (1101)

1.1 Purpose (110101)

This chapter prescribes budget justification requirements for offsetting receipts consistent with the provisions of the Office of Management and Budget (OMB) Circular No. A-11.

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION (1102)

2.1 General Instructions (110201)

2.1.1. Each Military Department will include offsetting receipts in their annual program and budget submission. See Volume 2A, Chapter 1, for general guidance on submission requirements. Receipt accounts are listed in Volume 2A, Chapter 1, Section 0106 Uniform Budget and Fiscal Accounting Classifications. Department of Defense (DoD) receipt account structures are reported in the Budget Structure Listing of the Comptroller Information System which is available on the Secret Internet Protocol Router Network (SIPRNET) home page of the Office of the Under Secretary of Defense (Comptroller) (OUSD (C)).

2.1.2. Each Military Department will also submit estimated receipts in thousands of dollars for the current year, budget year, and the outyears. These estimates will include the impact of all proposed legislation. Upon OUSD(C)’s completion of the prior year update within the Comptroller Information System (CIS), each Military Department will update their CIS current year, budget year and outyear Budget Authority (BA) and outlay estimates for receipt and any receipt-related (special and trust fund) expenditure accounts. The Military Departments will upload the required transactions in CIS. The due date will be established by OUSD(C) based on certification to the Treasury of actual execution data for the prior fiscal year.

2.1.3. Amounts reported should include all collections credited to the component’s receipt accounts, including “F” (clearing) accounts if applicable. Prior year clearing (“F”) accounts except the undistributed intragovernmental payment account (3885) will be merged with the Military Department’s General Fund Proprietary Receipts (3210). Exclude collections credited to receipt accounts of other DoD components. Receipts will be reported on the basis of collections credited to receipt accounts during the year, plus or minus any adjustments during the year. Amounts for the prior year will agree with receipts reported to Treasury on the Treasury Combined Statement. Only zero (0) estimates are permitted in the current year, budget year, and the outyears for "F" accounts. For indefinite appropriations of receipts (Wildlife Conservation, Military Reservations; special fund accounts; and trust fund accounts), the amount of estimated collections will be equal to the related estimates of appropriations BA.
2.1.4. Receipts data are required for DoD-Military as well as DoD-Civil accounts.

NOTE: Components should refer to the Treasury Federal Accounts Symbols and Titles (FAST) book for any changes to the account listing.

CHAPTER 12
DEFENSE HEALTH PROGRAM

1.0 GENERAL

1.1 Purpose

1.1.1. This chapter provides instructions applicable to budget formulation and congressional justification for the Defense Health Program (DHP).

1.1.2. The following appropriations are covered as subsections of the DHP appropriation:

1.1.2.1. Operation and Maintenance (O&M)

1.1.2.2. Procurement

1.1.2.3. Research, Development, Test and Evaluation (RDT&E)

*1.2 Authoritative Guidance

1.2.1. Title 10, United States Code, Section 1100 (10 U.S.C. §1100)

1.2.2. Department of Defense Directive (DoDD) 5136.01 Assistant Secretary of Defense for Health Affairs (ASD(HA))

1.2.3. DoDD 5136.13 Defense Health Agency

1.2.4. DoD Financial Management Regulation (FMR), Volume 2A, Chapter 1 provides general funding and appropriation policies.

1.3 Submission Requirements

General guidance about submission requirements is in Volume 2A, Chapter 1. This chapter covers specific backup material requirements for the above accounts. The Assistant Secretary of Defense (Health Affairs) (ASD(HA)) should also consult all of the other chapters of this Regulation for exhibit requirements that are not specifically addressed in this chapter including Volume 2B, Chapter 19 – Other Special Analyses. The ASD(HA) is also responsible for providing data to update the Program and Budget data system and the Future Years Defense Program (FYDP) automated systems for the DHP appropriation. The Military Components must reconcile all DHP personnel data and submit all proposed military and civilian medical personnel changes to the
Defense Health Agency Financial Operations Directorate, DHP Programming Division before these changes will be accepted in these automated systems.

1.4 Preparation of Material

General guidance about the format and preparation of material is presented in Volume 2A, Chapter 1. Volume 2B, Chapter 12 provides additional specific guidance concerning the back-up material required for the DHP.

1.5 References

Volume 2A, Chapter 3 provides guidance related to O&M costs. Chapter 4 provides guidance and formats related to Procurement appropriations, and Chapter 5 provides guidance and templates related to RDT&E appropriations.

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION

2.1 Purpose

This Section guides the preparation and submission of budget estimates for the DHP. The budget estimates consist of all O&M, procurement, and RDT&E resources that support the medical activities that were consolidated into the DHP.

2.2 Submission Requirements

2.2.1. The ASD(HA) is responsible for submitting all exhibits required for the O&M, procurement, and RDT&E appropriations as specified in Volume 2A, Chapter 3, and Chapters 4, and 5 respectively. The ASD(HA) is also responsible for submitting exhibit requirements specified in the other chapters of this Regulation including Chapter 19 – Other Special Analyses.

2.2.2. In addition, the Cost of Medical Activities Exhibit (PB-11, PB-11A, PB-11B) will be prepared and submitted to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) concurrent with the program and budget review submission. Formats for these exhibits are provided at the end of this chapter. Two printed copies and one electronic copy of each exhibit should be provided to the OUSD(C) Program/Budget (P/B) Military Personnel & Construction Directorate, Room 3C654, Washington, DC 20301-1100.

2.2.3. For all updates of the OUSD(C) automated budget system databases, DoD Components must reconcile all DHP personnel data with, and submit all proposed military and civilian medical personnel changes through the Defense Health Agency Financial Operations Directorate, DHP Programming Division.
3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION

3.1 Purpose

This section presents the exhibit requirements for submission to Congress. Examples of budget exhibits are in Section 4.0.

3.2 Submission Requirements

3.2.1. The ASD(HA) is responsible for submitting all exhibits required for the O&M, procurement, and RDT&E appropriation as specified in Volume 2A, Chapter 3, and Chapters 4, and 5 respectively. The ASD(HA) is also responsible for submitting exhibit requirements specified in the other chapters of this regulation including Chapter 19-Other Special Analyses.

3.2.2. In addition, the cost of Medical Activities Exhibit (PB-11, PB-11A, PB-11B) will be prepared and submitted to the OUSD (C) for the DHP. Formats for these exhibits are provided at the end of this chapter. Two printed copies and one electronic copy of each exhibit should be provided to the OUSD (C), P/B, Military Personnel Construction Directorate, Room 3C654, the Pentagon.

3.2.3. The required format for the PBA-9 is provided at Volume 2A, Chapter 3, Section 4.0.

3.2.4. The OP-5 exhibit and other supporting exhibits will be prepared for each of the following activities. Meaningful performance criteria should be displayed for each activity.

- In-House Care
- Private Sector Care
- Consolidated Health Support
- Information Management
- Management Activities
- Education and Training
- Base Operations/Communications

3.2.5. The ASD(HA) will prepare the DHP Volume 1 (Justification of Estimates), Volume 2 (Data Book), and Volume 3 (Services Medical Readiness Exhibits Activities). The Services will submit the data for Volume 3 (Service’s Medical Readiness Activities) to ASD(HA), which will consolidate, and print the required exhibit. Prepare all exhibits and volumes following the annual President’s Budget Submission Guidance instructions.

4.0 DEFENSE HEALTH PROGRAM SUBMISSION FORMATS

4.1 Purpose

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, the formats should be followed.
4.2 Unique Exhibits in Support of the Defense Health Program

VOLUME 2B, CHAPTER 13: “DEFENSE ENVIRONMENTAL RESTORATION”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue and underlined font.

The previous version dated June 2007 is archived.

CHAPTER 13

DEFENSE ENVIRONMENTAL RESTORATION

1.0 GENERAL (1301)

1.1 Purpose (130101)

1.1.1. This chapter provides instructions applicable to programming and budget formulation for the Department’s combined Program and Budget Review and congressional justification for the Defense Environmental Restoration Program appropriations (including munitions related responses at Formerly Used Defense Sites and closed sites at active installations). Volume 2B, Chapter 7, cleanup activities funded by Base Realignment and Closing (BRAC) appropriations. The Departments Environmental Restoration programs must comply with all the requirements levied by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), the Superfund Amendments and Reauthorization Act (SARA), and the Resource Conservation and Recovery Act (RCRA) legislation. This chapter provides the programming, budgeting, and performance data necessary to respond to congressional concerns and OMB guidance to link the Department’s budget for the Environmental Restoration accounts to the Department’s cleanup performance goals as follows:

1.1.1.1. Reduce relative risk at 100% of high relative risk sites by end of FY 2007 for active installations and Formerly Used Defense Sites (FUDS).

1.1.1.2. Reduce relative risk at 100% of medium relative risk sites by end of FY 2011 for active installations and FUDS.

1.1.1.3. Reduce relative risk at 100% of low relative risk sites by end of FY 2014 for active installations (FY 2020 for FUDS).

1.1.1.4. Complete preliminary assessments or equivalent for 100% of all munitions response sites by end of 2007.

1.1.1.5. Complete site inspections or equivalent for 100% of all munitions response sites by the end of 2010.

1.1.2. The appropriations that finance the Defense Environmental Restoration Program include the following subsections:

Operation and Maintenance
Procurement
Military Construction
1.2 Submission Requirements (130102)

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 13 covers specific backup material requirements for the Defense Environmental Restoration Program. The Deputy Under Secretary of Defense, Installations and Environment (DUSD(I&E)) of the USD (AT&L) is responsible for all submission requirements for this program (See Volume 2A, Chapter 1 of this regulation).

1.3 Preparation of Material (130103)

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 13 provides additional specific guidance with regard to the back-up material required for the Defense Environmental Restoration Program (See Volume 2A, Chapter 1 of this regulation).

1.4 References (130104)

Chapter 1 provides general funding policies, Chapter 3 provides specific policies related to Operation and Maintenance costs, Chapter 4 provides specific policies related to Procurement appropriations, Chapter 5 provides specific policies related to RDT&E funding, and Chapter 6 provides specific policies related to Military Construction appropriations (See Volume 2A, Chapters 1, 3 and Volume 2B, Chapters 4–6).

1.5 Definitions (130105)

1.5.1. Program Management and Support. This sub-element identifies administrative and overhead expenses associated with the Defense Environmental Restoration Program, including civilian salaries.

1.5.2. Installation Restoration Program (IRP). This sub-element is a comprehensive program to identify, investigate, and cleanup contamination from hazardous substances and wastes resulting from past DoD activities on active installations and formerly-used DoD lands. This includes requirements incident to remedial action, both on-installation and off-installation (e.g., provision of permanent alternate potable water supplies to communities affected by groundwater contamination that resulted from DoD activity). Actions under this element may include:

1.5.2.1. Investigations to identify, confirm and quantify contamination; feasibility studies; remedial action plans and designs; and remedial or removal actions.

1.5.2.2. Research, development and technology demonstrations necessary to conduct cleanups.

1.5.2.3. Expenses associated with cooperative multi-party cleanup plans and activities.
1.5.2.4. Remedial actions to protect or restore natural resources damaged by contamination from past hazardous waste disposal activities.

1.5.2.5. Cleanup of low-level radioactive waste sites which meet the criteria of the CERCLA, as amended.

1.5.2.6. Remedial action construction costs.

1.5.2.7. Remedial action operations costs.

1.5.2.8. Costs of long-term management.

1.5.2.9. Immediate actions necessary to address health and safety concerns such as providing alternate water supplies or treatment of contaminated drinking water, when the hazard results from a release from DoD property.

1.5.2.10. CERCLA assessments necessary prior to accessing real property assets.

1.5.2.11. Proportion of RCRA permit preparation associated with solid waste management units which would meet the definition of a past disposal site under CERCLA, as amended.

1.5.3. Building Demolition and Debris Removal Program (BD/DR). This sub-element applies to both active installations and formerly-used DoD lands. The purpose of this sub-element is to plan and execute a comprehensive program to demolish and remove unsafe buildings and structures. Expenses incident to complete restoration, such as restoration of natural resources are included if such expenses are clearly and directly related to the demolition and debris removal. Demolition that is required as part of a new construction project is excluded. Actions under this element may include:

1.5.3.1. The demolition of buildings or the removal of debris that constitute a safety hazard on active installations.

1.5.3.2. The demolition of buildings or the removal of debris which constitute a safety hazard on lands formerly-used by the Department of Defense, provided such lands were transferred to state or local governments or native corporations.

1.5.4. Munitions Response: This sub-element captures DoD clearance and cleanup requirements to investigate and address the explosives safety, human health, or environmental risks presented by munitions and munitions constituents at formerly used defense sites and closed sites at active installations as well as BRAC installations. All DoD Components participating in the Environmental Restoration Program, including FUDS, shall program and budget for munitions response requirements. This sub-element does not include cleanup of active and inactive ranges at active installations. Munitions response at BRAC installations are in the BRAC account and
funding will transfer to the appropriate Environmental Restoration account upon expiration of the BRAC account.

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION (1302)

2.1 Purpose (130201)

This Section provides guidance for preparation and submission of program and budget estimates for the Defense Environmental Restoration Program. The budget estimate component consists of all operation and maintenance, procurement, and Military Construction resources that support the Defense Environmental Restoration Program. The Components should consult all of the other chapters for exhibit requirements that are not specifically addressed in this chapter including Chapter 19, Other Special Analyses.

2.2 Submission Requirements (130202)

2.2.1. The Department will collect both POM and budget data through the Select & Native Programming Data Input System (SNaP) process. For Environmental Restoration appropriations, the PDR (Programming Data Requirements) will be collected in PDR exhibits ENV 30 Parts 1-3. In addition, the Military Departments and applicable Defense Agencies shall develop and submit to the Comptroller separate narrative justification material (including any program increases and decreases) for their respective programs as part of their Program and Budget Review Submission. The DUSD(I&E) is responsible for review, approval, and consolidation of the narrative justification material and ENV 30 Parts 1-3 for the Defense Agency submissions and the Army’s submission (as the DoD Executive Agent) for the Formerly-Used Defense Sites. The diskette of installation level detail required by the DUSD(I&E) should be forwarded together with the Components’ justification material to the OUSD (Comptroller) P/B Operations and Personnel Directorate, Room 3C710, Pentagon.

2.2.2. Two weeks prior to the above submissions, the Components must provide appropriate updates to the DUSD (I&E) data required by DoD Instruction 4715.7 for each site regarding status, schedule, and cost to complete. Data is required for incorporation into the DUSD(I&E) Project Management database.

2.2.3. The Components and DUSD(I&E) are also responsible for providing data to update the Comptroller Information System (CIS)) and the Future Year Defense Plan (FYDP) automated systems for the various Environmental Restoration appropriations as identified in Chapter 1 and for updating the OP-32 exhibit (Summary of Price and Program Change) identified in Chapter 3 (See Volume 2A, Chapters 1 and 3 of this regulation).

2.2.4. In addition to submitting the above items, the DUSD(I&E) is responsible for establishing policy for the Defense Environmental Restoration Program.

2.2.5. Examples of data collection exhibits, ENV 30 Parts 1-3, can be found in Section 4.0. (See section 4.0, below).
3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (1303)

3.1 Purpose (130301)

This section presents the exhibit requirement for submission to the Congress.

3.2 Submission Requirements (130302)

3.2.1. The Military Departments and applicable Defense Agencies will update the SNaP immediately upon completion of the Program Budget Decisions and budget lock by the Department. In addition, the Military Departments and applicable Defense Agencies shall provide the USD(Comptroller) with a revised narrative justification for their respective programs reflecting any changes from the program and budget review. The SNaP system will reformat the data into congressional justification exhibits, which can be printed out by the respective Components and included in their justification materials. The DUSD (I&E) is responsible for review, final approval, and consolidation of the congressional justification material and ENV 30 Budget Exhibits for the Defense Agencies submission and the Army’s submission (as the DoD Executive Agent) for FUDS.

3.2.2. The Components must provide updates reflecting any changes from the program/budget review to the Deputy Under Secretary of Defense (I&E) data required by DoD Instruction 4715.7 for each site regarding status, schedule, and cost to complete. Data is required for incorporation into the DUSD(I&E) Project Management database.

3.2.3. The diskette of installation level detail required by the DUSD(I&E) should be forwarded together with the Components’ justification material to the OUSD (Comptroller) P/B Operations and Personnel Directorate, Room 3C710, Pentagon. Copy requirements are identified in Chapter 1 (See Volume 2A, Chapter 1 of this regulation).

3.2.4. The Components and DUSD(I&E) are also responsible for providing data to update the Future Year Defense Plan (FYDP) automated systems for the various Environmental Restoration appropriations as identified in Chapter 1 and for updating the OP-32 exhibit (Summary of Price and Program Change) identified in Chapter 3 (See Volume 2A, Chapters 1 and 3 of this regulation).

3.2.5. Examples of SNaP date entry sheets and all ENV 30 program and budget exhibits produced by SNaP are displayed below in paragraph 4.2, Exhibits in Support of Defense Environmental Restoration.
4.0 DEFENSE ENVIRONMENTAL RESTORATION PROGRAM SUBMISSION AND JUSTIFICATION FORMATS (1304)

4.1 Purpose (130401)

The data entry sheets required for the SNaP system for all Environmental Restoration appropriations are included on the following pages. Additionally, examples of the ENV 30 exhibits produced by SNaP for congressional justification are provided.

4.2 Data Entry Sheets and Exhibits in Support of Defense Environmental Restoration (130402)

**Instructions**

1) The new ENV 30 replaces the former ENV 30 DERA and ENV 1A/1B BRAC exhibits. Part 1 captures Program Management and Support activity funding.
2) For all Fund Source Programs provide baseline Total Obligated Authority (TOA) for all years identified and Balance to Complete by Program Management Activity.
3) Report baseline TOA in $Thousands by year for all funding lines.
4) Legacy BRAC includes rounds I through IV BRAC.
5) BRAC 2005 includes and separately identifies Environmental Costs associated with BRAC 2005.
6) Components shall program adequate resources in each year of the FYDP to achieve the program goals for all restoration activities.
7) Components shall provide to the DUSD (I&E) (no later than two weeks before their POM and budget submissions) the updated relative risk site evaluations.
8) The Military Departments must ensure their POM and budget submission contains sufficient funding to update the annual Range Inventory requirements established in Section 311 2710(a) of the FY 2002 National Defense Authorization Act and as specified in the DUSD(I&E) DERP Management Guidance issued in September of 2001.
9) If needed, be prepared to provide a narrative in a Word document that describes for the ATSDR funding the number of health assessments and health studies planned each year; and for the DSMOA funding the number of installations and total DERA or BRAC dollars by state planned for each year.
10) Fund Source Programs of BRAC-IRP and BRAC-Munitions Response apply to all listed Program Management activities.
11) Fund Source Programs of Environmental Restoration-IRP and Environmental Restoration-Munitions Response apply to all listed Program Management activities except EPA.
12) The reporting entities (Services/Agencies) directed to submit this data requirement. Refers to Military Departments, DLA and DTRA.

**Definitions**

**Class**: System Field: Classification
- C: CONFIDENTIAL
- C/NF: CONFIDENTIAL//NOFORN
- F: FOR OFFICIAL USE ONLY
- S: SECRET
- S/NF: SECRET//NOFORN
- U: UNCLASSIFIED
Env 30 Part 1 DERA and BRAC Funds Budgeted for Environmental Clean-Up (Continued)

**Component:** For the Military Departments report by Active, Guard and Reserve. Defense Agencies choose Defense Agency.

- **Active:**

- **Guard:**
  - Reserve:

- **FUDS:** Army will use this field to identify the Formerly Used Defense Sites (FUDS) data by selecting a 'Yes' or 'No' value. All other Services/Agencies will enter 'No' as the FUDS data value.

  - **No:**
  - **Yes:**

**FundSource:**

- **BRAC-IRP:** Funded by Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Covers the Hazardous and Petroleum Waste project management. Separate entries are required for Legacy BRAC and BRAC 2005.

- **BRAC-Munitions Response:** Funded by Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Clean up activities (i.e., the identification, investigation, and removal actions, remedial actions, or a combination of removal and remedial actions) to address military munitions (i.e., UXO) or the chemical residues of munitions at BRAC installations. Separate entries are required for Legacy BRAC and BRAC 2005.

- **Environmental Restoration-IRP:** Funded by Environmental Restoration appropriations. Covers the Hazardous and Petroleum Waste project management.

- **Environmental Restoration-Munitions Response:** Funded by Environmental Restoration appropriations. Clean up activities (i.e., the identification, investigation, and removal actions, remedial actions, or a combination of removal and remedial actions) to address military munitions (i.e., UXO) or the chemical residues of munitions at FUDS properties, or on closed munitions response sites at active installations.

**ProgramManagementActivity:**

- **ATSDR:** $TOA captures funding requirements for the Agency for Toxic Substance and Disease Registry

- **DSMOA:** $TOA captures funding requirements for Defense and State Memorandum of Agreement

- **EPA Funding:** $TOA captures BRAC requirements for payments to the Environmental Protection Agency (EPA) for support per memorandum of understanding with EPA.

- **Fines:** $TOA captures known or planned fines through the budget year. Components must fully fund programs to ensure no fines are routinely planned in the outyears

- **Management:** $TOA overhead expenses (except workyears) associated with Program Management and Support as identified in the DUSD(I&E) DERP Management Guidance issued in September of 2001.

- **Work Years:** $TOA government salaries/benefits associated with Program Management and Support in accordance with the President’s Fast Track Initiative.

**BalanceToComplete:** Total Funding beyond the FYDP required to complete the activity.

**Business Rules**

1. Provide data entry rules in accordance with relationship matrices.

**Instructions**

1) The new ENV 30 replaces the former ENV 30 DERA and ENV 1A/1B BRAC exhibits. Part 2 captures Project Management activity breakouts for IRP, Munitions Response, BD/DR, BRAC Compliance, and BRAC Planning. Legacy BRAC includes BRAC rounds I-IV, and there is a separate format required for BRAC 2005.

2) For all Fund Sources, all Clean-Up Programs provide number of sites and funding by Clean-Up and Analysis in all years identified and Balance to Complete. See Relationship Matrix below. For BRAC Planning and BRAC Compliance, provide number of facilities in lieu of sites.

3) Only the Army reports FUDS.

4) For Clean-up Action—for Assessments, Analysis/Investigation, Interim Actions, Remedial Designs, and Remedial Action Construction provide the funding detail by Relative-Risk or MRSPP Level and Type.

5) If there is no analysis associated with an action, report funding only.

6) Components shall program adequate resources in each year of the FYDP to achieve the programs goals for all restoration activities.

7) Military Departments and applicable Defense Agencies shall develop and submit to the Comptroller separate narrative justification material (including any program increases and decreases) for their respective programs as part of their Program and Budget Review submission.

8) Components shall provide to the DUSD (I&E) no later than two weeks before their POM and budget submissions are due to OSD, the updated relative risk site evaluations, site status updates and cost to complete estimates for every site as required by DoD Instruction 4715.7.

9) The reporting entities directed to submit this data requirement refers to Military Departments (Active, Guard, Reserve)/Defense Agencies.

**Definitions**

**Class:** System Field: Classification

- C: CONFIDENTIAL
- C/NF: CONFIDENTIAL//NOFORN
- F: FOR OFFICIAL USE ONLY
- S: SECRET
- S/NF: SECRET//NOFORN
- U: UNCLASSIFIED

**Component:** For the Military Departments report by Active, Guard and Reserve. Defense Agencies choose Defense Agency. Army also reports for FUDS.

- **Active:**

- **Guard:**

- **Reserve:**

(Please note: The document is cut off at this point, and it is not possible to provide the full text.)
Env 30 Part 2 DERA and BRAC Funds Budgeted for Environmental Clean-Up Project Management (Continued)

**FUDS:** Army will use this field to identify the Formerly Used Defense Sites (FUDS) data by selecting a “Yes” or “No” value. All other Services/Agencies will enter “No” as the FUDS data value.

*No:*

*Yes:*

**FundSource:**

- **BRAC-Building Demolition/Debris Removal:** Funded by Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. The demolition and removal of unsafe buildings and structures in accordance with DERP Management Guidance at facilities or sites that are or were owned by, leased to, or otherwise possessed by the United States under the jurisdiction of the Secretary of Defense. Separate entries are required for Legacy BRAC and BRAC 2005.

- **BRAC-COMPLIANCE:** Funded by Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. See DoD Instruction 4715.6. Separate entries are required for Legacy BRAC and BRAC 2005.

- **BRAC-IRP:** Funded by Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Covers the Hazardous and Petroleum Waste project management. Separate entries are required for Legacy BRAC and BRAC 2005.

- **BRAC-Munitions Response:** Funded by Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. Clean up activities (i.e., the identification, investigation, and removal actions, remedial actions, or a combination of removal and remedial actions) to address military munitions (i.e., UXO) or the chemical residues of munitions at BRAC installations. Separate entries are required for Legacy BRAC and BRAC 2005.

- **BRAC-PLANNING:** Funded by Base Realignment and Closure environmental sub-accounts within the MILCON appropriation. See DoD Instruction 4715.9. Separate entries are required for Legacy BRAC and BRAC 2005.

- **Environmental Restoration-Building Demolition/Debris Removal:** Funded by Environmental Restoration appropriations. The demolition and removal of unsafe buildings and structures in accordance with DERP Management Guidance at facilities or sites that are or were owned by, leased to, or otherwise possessed by the United States under the jurisdiction of the Secretary of Defense.

- **Environmental Restoration-IRP:** Funded by Environmental Restoration appropriations. Covers the Hazardous and Petroleum Waste project management.

- **Environmental Restoration-Munitions Response:** Funded by Environmental Restoration appropriations. Clean up activities (i.e., the identification, investigation, and removal actions, remedial actions, or a combination of removal and remedial actions) to address military munitions (i.e., UXO) or the chemical residues of munitions at FUDS properties, or on closed munitions response sites at active installations.

- **Land Sale Revenue:** A one line entry for Legacy BRAC and BRAC 2005 to indicate how much land sale revenue will be applied to Environmental Requirements.
Env 30 Part 2 DERA and BRAC Funds Budgeted for Environmental Clean-Up Project Management (Continued)

**Clean-Up Action:**

*Analysis/Investigation:* Analysis used to characterize the nature, extent, and risk of releases of hazardous substances into the environment and to develop and select a cleanup remedy.

*Assessments:* A limited scope investigation designed to distinguish sites that pose little or no threat to human health and the environment from sites that require further investigation. The assessment typically is based on installation records searches, visual site inspections, and interviews with personnel.

*Interim Actions:* An interim measure that can be implemented at any time in the restoration process and that is designed to abate contamination until the final remedial action can be implemented.

*Land Sale Revenue:* Term used to identify funds recovered from the sale of real property used to offset restoration funding requirements.

*Long Term Management:* Term used for environmental monitoring, review of site conditions, and/or maintenance of a remedial action to ensure continued protection as designed once a site achieves response complete.

*N/A:* Not applicable; leave blank.

*No Further Action:* No further action planned or funded.

*Potentially Responsible Party:* (PRP)-As defined in the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) Recovery-Pursuant to 10USC Section 2703(d)(1) and (2) Components are authorized to credit their environmental restoration account with amounts recovered pursuant to CERCLA for response costs at DERP sites.

*Recovery:* Pursuant to 10USC Section 2703(d)(1) and (2) Components are authorized to credit their environmental restoration account with amounts recovered pursuant to CERCLA for response costs at DERP sites.

*Remedial Action Construction:* The restoration phases during which the final remedy is being put in place. The end date signifies that the construction is complete, all testing has been accomplished, and that the remedy will function properly.

*Remedial Action Operations:* Remedial Action Operations (RAO) - The period when a remedy is being operated but cleanup objectives have not yet been achieved.

*Remedial Designs:* Restoration phases during which construction parameters and equipment specifications for a selected cleanup technology are defined.

**RiskMSRPPLevel:** Risk Level as defined to the DoD Relative Risk Site Evaluation Primer or Munitions Response Site Prioritization Protocol (MRSPP) priority level.

*High Relative Risk:* As defined in the DoD Relative Risk Site Evaluation Primer.

*Low Relative Risk:* As defined in the DoD Relative Risk Site Evaluation Primer.

*Medium Relative Risk:* As defined in the DoD Relative Risk Site Evaluation Primer.

*MRSSPP 1:* As defined in the MRSSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

*MRSSPP 2:* As defined in the MRSSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

*MRSSPP 3:* As defined in the MRSSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

(Page 3 of 4)
Env 30 Part 2 DERA and BRAC Funds Budgeted for Environmental Clean-Up Project Management (Continued)

**MRSPP 4:** As defined in the MRSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

**MRSPP 5:** As defined in the MRSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

**MRSPP 6:** As defined in the MRSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

**MRSPP 7:** As defined in the MRSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

**MRSPP 8:** As defined in the MRSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

**MRSPP Evaluation Pending:** As defined in the MRSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

**MRSPP No Known or Suspected Hazard:** As defined in the MRSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

**MRSPP No Longer Required:** As defined in the MRSPP Final Rule, Part 179.6, Federal Register Vol. 70, No. 192

**N/A:** N/A

**Not Evaluated Relative Risk:** As defined in the DoD Relative Risk Site Evaluation Primer.

**RiskMSRPPType:**

- **N/A:** Not applicable; leave blank.
- **With Agreements:**
  - **With Reuse:** Action is necessary to support a future land use identified in an approved Reuse Plan.
- **Without Agreements:**
  - **Without Reuse:** Future land reuse either has not been identified or the action is not necessary to support a future land use identified in an approved Reuse Plan.

**SiteFundingRequirements:**

- **Analysis:** $TOA (and includes PA/SI and RI/FS activities)
- **Clean-up:** $TOA (includes IRA, RD, and RA-C activities)
- **Sites:** # of sites (projects for FUDS) at the beginning of the FY.

**BalanceToComplete:** Balance to Complete: Total Funding beyond required to complete the projected.

**Business Rules**

<th>IRP Phase</th>
<th>MR Sites Prior To 2005 Sites Prior To 2006</th>
</tr>
</thead>
</table>

**Instructions**

1. Provide total number of Legacy BRAC, BRAC 2005, and DERA IRP sites and the number of sites that will be cleaned up.
2. Provide the total number of Legacy BRAC installations and total number of Legacy BRAC installations that will be cleaned up. Separately entries are required for Legacy BRAC and BRAC 2005.
3. Provide the total number of BRAC V installations and total number of BRAC V installations that will be cleaned up.
4. Report DERA IRP sites by relative risk level--high, medium and low.
5. Provide narrative in a word document in SNaP explaining why the percent of sites cleaned up reported above misses established goal.
6. Provide the total number of DERA munitions response (MR) sites completing a preliminary assessment.
7. Provide the total number of DERA MR sites completing a site inspection.
8. Provide the total number of DERA MR sites.
9. Provide the total number of DERA MR sites cleaned up.
10. Provide the total number of Legacy BRAC MR sites cleaned up.
11. Provide the total number of Legacy BRAC MR sites.
12. Provide the total number of BRAC 2005 MR sites cleaned up.
13. Provide the total number of BRAC 2005 MR sites.
14. DERA IRP Goal: 50% of High Sites by the end of FY 2002; 100% of High Sites by the end of FY 2007; 100% of Medium Sites by the end of FY 2011; 100% of Low Sites by the end of FY 2014.
15. Legacy BRAC IRP Goal: 100% Sites RIP/RC by end of FY 2015.
17. DERA MMRP Goal: 100% Sites completed PA or equivalent by end of FY 2007; 100% Sites completed SI or equivalent by end of FY 20010; 100% Sites at RIP/RC by end of FY TBD.
Env 30 Part 3 Performance Metrics (Continued)

18) Legacy BRAC MMRP Goal: 100% Sites RIP/RC by end of FY 2009.
20) The reporting entities directed to submit this data requirement. Refers to Military Departments (Active, Guard, Reserve)/Defense Agencies

  U: UNCLASSIFIED

Component:  Identifies the duty status for military service units and defense agencies.
  Active:
  Guard:
  Reserve:

FUDS:  Army will use this field to identify the Formerly Used Defense Sites (FUDS) data by selecting a 'Yes' or 'No' value. All other Services/Agencies will enter 'No' as the FUDS data value.
  No:
  Yes:

FundSource:  
  Legacy BRAC: Funded by Base Realignment and Closure environmental sub-accounts I-IV within the MILCON appropriation.
  BRAC 2005: Funded by Base Realignment and Closure environmental sub-accounts for BRAC 2005 within the MILCON appropriation
  DERA: Funded by Environmental Restoration appropriations.
SitesInstallations:

- **Number of DERA IRP Sites Cleaned Up**: Provide the number of sites by risk level planned to be cleaned up in year specified.
- **Number of DERA MR Sites with Phase Completion**: Provide the number of sites having their associated phase completed in year specified.
- **Total Number of Legacy BRAC Installations**: Provide the total number of Legacy BRAC installations in the year specified.
- **Total Number of BRAC 2005 Installations**: Provide the total number of BRAC 2005 installations in the year specified.
- **Total Number of BRAC Installations Cleaned Up**: Provide the total number of Legacy BRAC installations in the year specified.
- **Total Number of BRAC 2005 Installations Cleaned Up**: Provide the total number of Legacy BRAC installations in the year specified.
- **Total Number of Legacy BRAC IRP Sites**: Provide the total number of Legacy BRAC IRP sites in the year specified.
- **Total Number of BRAC 2005 IRP Sites**: Provide the total number of BRAC 2005 IRP sites in the year specified.
- **Total Number of Legacy BRAC IRP Sites Cleaned Up**: Provide the number of Legacy BRAC IRP sites planned to be cleaned up in year specified.
- **Total Number of BRAC 2005 IRP Sites Cleaned Up**: Provide the number of BRAC 2005 IRP sites planned to be cleaned up in year specified.
- **Total Number of Legacy BRAC MR Sites**: Provide the total number of Legacy BRAC sites in the year specified.
- **Total Number of BRAC 2005 MR Sites**: Provide the total number of BRAC 2005 sites in the year specified.
- **Total Number of Legacy BRAC MR Sites Cleaned Up**: Provide the number of Legacy BRAC MR sites to be cleaned up in year specified.
- **Total Number of BRAC 2005 MR Sites Cleaned Up**: Provide the number of BRAC 2005 MR sites to be cleaned up in year specified.
- **Total Number of DERA IRP Sites**: Provide the total number of sites by risk level in year specified.
- **Total Number of DERA MR Sites**: Provide the total number of sites in the year specified.
- **Total Number of DERA MR Sites Cleaned Up**: Provide the number of DERA MR sites to be cleaned up in the year specified.

**RelativeRiskLevelIRPPhaseMR**: Identify relative risk associated with IRP sites/installations and identify phase completions for MR sites completing a CERCLA preliminary assessment (PA) or equivalent and/or phase completions for MR sites completing a CERCLA site inspection (SI) or equivalent.

- **High Relative Risk**: As defined in the DoD Relative Risk Site Evaluation Primer.
- **Low Relative Risk**: As defined in the DoD Relative Risk Site Evaluation Primer.
Env 30 Part 3 Performance Metrics (Continued)

Medium Relative Risk: As defined in the DoD Relative Risk Site Evaluation Primer. N/A: Not applicable; leave blank.

Preliminary Assessment: A review of existing information to determine if a release may require additional investigation or action.

Site Inspection: An on-site investigation to determine whether there is a release or potential release.

Sites Prior To 2006: Provide the cumulative total of all sites prior to 2006 by appropriate metric category (e.g., relative-risk lever, phase completion, sites cleaned up).

Business Rules

1) All input values will have a default value of 0.

2) Total Number of IRP Sites, Total Number of DERA MR Sites, Total Number of BRAC IRP Sites, and Total Number of BRAC IRP Installations will only allow input value of 0 in all years past the Current Year to denote that the Installation and Site inventory growth are not projected in SNaP.

CHAPTER 14

DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES

1.0 GENERAL (1401)

1.1 Purpose (140101)

1.1.1. This chapter provides instructions applicable to budget formulation and congressional justification for Drug Interdiction and Counter-drug Activities.

1.1.2. The following accounts are covered as subsections of the Drug Interdiction and Counter-drug Activities, Defense appropriation:

- Military Personnel
- Operation and Maintenance
- Procurement
- Research, Development, Test, and Evaluation (RDT&E)

1.2 Submission Requirements. (140102)

General guidance with regard to submission requirements is presented in Chapter 1 (See Volume 2A, Chapter 1). Chapter 14 covers specific backup material requirements for the Drug Interdiction and Counter-drug Activities program. The Office of the Deputy Assistant Secretary of Defense (Counternarcotics, Counterproliferation, and Global Threats) (ODASD(CN,CP&GT)) is responsible for all submission requirements for this program. The Components are responsible for providing all needed input to ODASD(CN,CP&GT) consistent with the submission requirements and due dates established by ODASD(CN,CP&GT).

1.3 Preparation of Material. (140103)

General guidance with regard to format and preparation of material is presented in Chapter 1 (See Volume 2A, Chapter 1). Chapter 14 provides additional specific guidance with regard to the back-up materials required for the Drug Interdiction and Counter-drug Activities program.

1.4 References. (140104)

Chapter 1 provides general funding policies. Chapter 2 provides specific policies and formats for the Military Personnel appropriations. Chapter 3 provides specific policies and formats related to Operation and Maintenance costs. Chapter 4 provides specific policies and formats related to Procurement appropriations. Chapter 5 provides specific policies and formats related to RDT&E funding. Chapter 16 provides specific instructions applicable to budget formulation, implementation, and congressional justification for intelligence program aggregations, and is applicable to the Defense Intelligence Counternarcotics Program (DICP) of
the Military Intelligence Program (MIP) aggregation. (See Volume 2A, Chapters 1-3 and Volume 2B Chapters 4-6 and 16).

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION (1402)

2.1 Purpose (140201)

This section provides guidance for preparation and submission of program and budget estimates for the Drug Interdiction and Counter-drug Activities program. The program and budget review submission consists of all Reserve/National Guard military personnel, operation and maintenance, procurement, and RDT&E resources that support the Drug Interdiction and Counter-drug Activities Program.

2.2 Submission Requirements (140202)

2.2.1. The Office of the Deputy Assistant Secretary of Defense (Counternarcotics, Counterproliferation, and Global Threats) (ODASD(CN,CP&GT)) is responsible for submitting all exhibits required to support military personnel, operation and maintenance, procurement, and RDT&E requirements as specified in this Chapter to the OUSD (Comptroller) Operations Directorate, Room 3C749 for the OSD program and budget review submission. This includes the various exhibits for the Drug Interdiction and Counter-drug Activities program found below in Section 1404 of this chapter, as well as other exhibits identified below but contained in Chapters 2 through 6 and the Program and Financing (P&F) Schedule requirements identified in Chapter 1. The ODASD(CN,CP&GT) is also responsible for providing data to update the Comptroller Information System (CIS) and the Future Years Defense Plan (FYDP) automated systems for the Drug Interdiction and Counter-drug Activities appropriation, as identified in Chapter 1. The ODASD(CN,CP&GT) should check all of the chapters of this regulation for exhibit requirements, especially Chapter 19 – Special Analyses. (See Volume 2A for Chapters 1-3 and Volume 2B for Chapters 4-6 and 19).

2.2.2. The DoD counternarcotics program will be financed in a central transfer account (CTA). However, the OSD program and budget review submission will reflect the actual or planned distribution of counternarcotics funds by appropriation. The following exhibits are required for the OSD program and budget review submission.

**Drug Interdiction and Counter-drug Activities Unique Exhibits**

PB-57 Summary of Drug Interdiction and Counter-drug Activities (Chapter 14)
PB-44 Drug Interdiction and Counter-drug Appropriation Summary (Chapter 14)
PB-45 Drug Interdiction and Counter-drug Summary by Project Listing by Fiscal Year (Chapter 14)
PB-47 Drug Interdiction and Counter-drug Detailed Project Description (Chapter 14)

**Operation and Maintenance Exhibits**

OP-8 Civilian Personnel Costs (Chapter 3) (automated submission also required)
3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (1403)

3.1 Purpose (140301)

This section presents the exhibit requirements for submission to Congress.

3.2 Submission Requirements (140302)

The Office of the Deputy Assistant Secretary of Defense (Counternarcotics, Counterproliferation, and Global Threats) is required to include the following exhibits in the justification book(s) to Congress. Copy requirements are identified in Chapter 1 (See Volume 2A, Chapter 1). Examples of budget exhibits can be found in Section 4.0 or as identified below:

PB-57 Summary of Drug Interdiction and Counter-drug Activities (Chapter 14)
PB-44 Drug Interdiction and Counter-drug Appropriation Summary (Chapter 14)
PB-45 Drug Interdiction and Counter-drug Summary by Project Listing by Fiscal Year (Chapter 14)
PB-47 Drug Interdiction and Counter-drug Detailed Project Description (Chapter 14)
OP-8 Civilian Personnel Costs (Chapter 3) (automated submission also required)
OP-32 Summary of Price and Program Changes (Chapter 3) (automated submission also required)
PB-15 Advisory and Assistance Services (Chapter 19)
P-1 Procurement Programs (Chapter 4)
R-1 RDT&E Programs (Chapter 5)
4.0 DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES SUBMISSION FORMATS (1404)

4.1 Purpose (140401)

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, adhere to these formats.

4.2 Unique Exhibits in Support of Drug Interdiction and Counter-Drug Activities (140402)

DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES, DEFENSE

I. **Description of Operations Financed:**

**Instructions:** Provide a summary of total counternarcotics activities and a paragraph for each DoD Counternarcotics Mission area. Mission areas may be changed if necessary to meet the requirements set forth by the Office of National Drug Control Policy (ONDCP). No change should be made, however, without prior approval of the Office of the USD(Comptroller).

II. **Performance Criteria and Evaluation:**

**Instructions:** Performance criteria should be established, and approval obtained from OUSD (Comptroller) prior to the program and budget review submission. If possible, performance criteria should relate measures of effectiveness established for the counter drug program.

III. **Financial Summary ($ in Thousands):**

CHAPTER 15

OVERSEAS COST REPORT

1.0 GENERAL

1.1 Purpose

1.1.1. This chapter provides instructions applicable to congressional justification material for the Overseas Cost Report which consists of the OP-53 Exhibit (Overseas Funding).

1.1.2. The following appropriations and accounts are covered in the scope of the subsections of the Overseas Cost Report:

1.1.2.1. Military Personnel appropriations (including Reserves and National Guard)

1.1.2.2. Operation and Maintenance appropriations

1.1.2.3. Family Housing Construction and Family Housing Operations appropriations

1.1.2.4. Military Construction appropriations

*1.2 Authoritative Guidance

The instructions and related requirements prescribed in this chapter are derived primarily from, and in accordance with Title 10, United States Code, section 113 (10 U.S.C. §113).

1.3 Submission Requirements

Chapter 1 provides the general guidance about submission requirements for justification material. Chapter 15 covers specific material requirements for the Overseas Cost Report (See Volume 2A, Chapter 1 of this regulation).

1.4 Preparation of Material

Chapter 1 stipulates the general guidance concerning format and preparation of material. Chapter 15 provides additional specific guidance with regard to the material required for the Overseas Cost Report (See Volume 2A, Chapter 1 of this regulation).

1.5 References

Chapter 1 provides general funding policies, Chapter 2 provides specific policies related to Military Personnel appropriations, Chapter 3 provides specific policies related to Operation and Maintenance costs, Chapter 6 provides specific policies and formats related to Military Construction and Family Housing appropriations, and Chapter 9 provides specific policies and
formats related to Revolving Funds. (See Volume 2A, Chapters 1 - 3 and Volume 2B, Chapter 6, and 9-10).

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION

2.1 General

General guidance with regard to submission requirements is presented in Chapter 1. Service components and Defense Agencies and Field Activities will submit the OP-53, Overseas Cost Report for the OSD Program/Budget Estimates Submission.

3.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION

3.1 Purpose

This Section presents the exhibit requirement for submission to Congress and formats for the Overseas Cost report. Section 8125 of the FY 1989 DoD Appropriations Act (P.L. 100-463) as codified in 10 U.S.C. §113, requires that the Department of Defense separately identify the amounts necessary for payment of all personnel, operations, maintenance, facilities, and support costs for all DoD overseas military units and the costs of supporting all dependents who accompany DoD personnel outside the United States.

3.2 Submission Requirements

3.2.1. The Overseas Cost Report consists of the OP-53 exhibit (Overseas Funding). Chapter 1 contains general guidance on congressional justification material.

3.2.2. The OP-53 addresses all funding and personnel resources related to overseas activities as defined below.

3.2.3. The OP-53 data will be entered into and collected through the Office of the Director of Cost Assessment and Program Evaluation’s (CAPE) Select & Native Programming Data Input System (SNaP). SNaP is available on unclassified network at https://snap.cape.osd.mil/ and classified https://snap.cape.osd.smil.mil/home.aspx. The electronic submission will be the official submission of this exhibit.

3.2.4. The Military Departments will report all military personnel permanently assigned overseas and associated costs to include those assigned to Defense Agencies and Field Activities. Therefore, the Defense Agencies should not report data citing military personnel appropriations or line items. All Military Departments, Defense Agencies, and Field Activities must complete the OP-53 input for each country regardless of total annual costs.

3.3 Definitions

The following definitions pertain to the costs to be included in Military Department and Defense Agency input:
3.3.1. Overseas costs will include amounts only from the following appropriations: military personnel; operation and maintenance; family housing operation and maintenance; family housing construction; and military construction.

3.3.2. Overseas amounts include the appropriated support of all DoD activities located outside the United States that are being performed on a permanent basis at U.S. military bases and other locations (U.S. Embassy, U.S. Consulates, U.S. Mission, etc). Components must ensure to report costs and number of United States Foreign and National Direct and Foreign National Indirect full-time equivalents.

3.3.3. Overseas amounts also include the cost of transporting personnel, material, and equipment to and from permanent overseas locations. The overseas amounts do not include incremental costs associated with contingency operations.

3.3.4. The United States includes all 50 states, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States (e.g., Guam, U.S. Virgin Islands, Puerto Rico, and Northern Mariana Islands).

3.3.5. Military and civilian personnel amounts will be based on the number of personnel assigned to permanent duty ashore outside the United States. Accordingly, personnel on temporary duty outside the United States are not included in the overseas amounts. Because personnel assigned to the deployed fleet are excluded from overseas troop strengths, amounts for deployed steaming days are not included.

3.3.6. Generally, funding for DoD activities in the United States in support of overseas activities is excluded. For example, overseas amounts exclude the funding of depot maintenance performed in the United States on components/aircraft used by an overseas unit. Similarly, flight/specialized training that is conducted in the United States would be excluded.

4.0 OVERSEAS COST REPORT SUBMISSION FORMATS

4.1 Purpose

The information provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

4.2 Exhibits in Support of Overseas Cost Report

OP-53 Overseas Funding
*Exhibit OP-53 Overseas Funding

Class  CountryCode  ResourceType  ManpowerType  TreasuryCode  BACode  PY  CY  BY

Description of Data Elements: The Components should provide the following data elements for each appropriation and operation/activities financed with the funding identified. Updated guidance on the OP-53 exhibit can be found on the SNaP website by clicking the “Instructions” tab, then selecting the “Data Requirements.” (https://snap.cape.osd.mil)

A. **Class:** The Class data element is the classification of the data entered in the row.

B. **CountryCode:** The Country Code is a three-digit alphabetical code used to represent a country name. The Country Code list can be found on the SNaP website within the OP-53 Overseas Report Instructions document.

C. **ResourceType:** Identify the resource type for each appropriation and operation/activity. The resource type will be either a Total Obligation Authority (TOA) or manpower. If the resource type is TOA, select manpower type N/A. If the resource type is manpower, then select the manpower type civilian, enlisted, or officer.

D. **ManpowerType:** Identify funding by appropriation and manpower type. The manpower type list includes civilian, enlisted, officer, or N/A. Select manpower type N/A only when the resource type is TOA.

E. **TreasuryCode:** Treasury Code is a defined set of four-to-six digit numeric codes from the Comptroller that identifies resource types. The list of Treasury Code values can be found on the SNaP website by clicking the "Instructions" tab, then selecting the "Documents". The document is named “Appropriations List”. (https://snap.cape.osd.mil)

F. **BA Code:** Budget Activity is a two-digit identifier for the categories within each appropriation and fund account to identify the purposes, projects, or types of activities financed by the appropriation. Utilize applicable BA codes (e.g. Military Personnel appropriations should include costs associated with BA01 (Officer Pay and Allowance), BA02 (Enlisted Pay and Allowances), BA04 (Subsistence of Enlisted Personnel – Basic Allowance for Subsistence only), and BA05 (Permanent Change of Station Travel).

G. **PY, CY, and BY:** For Past Year (PY), Current Year (CY), and Budget Year (BY) provide direct funding by Country for payment of all military personnel, operation and maintenance, military construction, and family housing. of all DoD activities located outside the United States that are being performed on a permanent basis at U.S. Military bases and other locations (U.S. Embassy, U.S. Consulates, U.S. Mission, etc.) Overseas amounts also include the cost of transporting personnel, material, and equipment to and from permanent overseas locations. The overseas amounts do not include incremental costs associated with contingency operations.

Military construction costs will be computer generated from the Program Resources Collection Process for the OP-53 display. Data on this exhibit must match the Family Housing(Construction &
Operation and Maintenance) and Military Construction data in the Construction Programs (C-1) budget exhibit submitted in support of the President’s budget.

13. Residential furnishings/Equipment (DPC only): Includes costs of residential furnishings, equipment, and appliances.

14. Education Allowance (DPC only): Includes costs for the education expenses for U.S. direct hire dependents (K-12) overseas.

15. Educational Travel (DPC only): Includes costs for one round trip annually between school attended in the U.S. and the foreign post of assignment.

16. Permanent Change of Station (PCS) Travel (employee & family moving expenses): Includes costs associated with PCS travel of employees and eligible family members, shipment of household effects and privately-owned vehicles, and placement of household effects into storage.

17. Rest and Recuperation (R&R) Travel: Includes the costs of R&R travel provided for U.S. direct hires overseas.

18. Home Leave Travel: Includes costs of travel for U.S. Direct Hires overseas to provide overseas employees the opportunity to spend significant periods of time in the United States while pursuing careers overseas.

19. Office Furnishings/Equipment/Information Management: Includes agency costs for the purchase and maintenance of office furnishings and equipment, such as computers, phones, computer networks, copiers, and communications equipment, including classified networks.

20. Office Leases: Includes the costs of all leased office space (off embassy/consulate compound) overseas.

21. Miscellaneous Office Expenses: Includes non-programmatic miscellaneous office expenses, such as utilities and supplies.

22. International Cooperative Administrative Support Services (ICASS) Charges: Includes costs of participation in ICASS.

23. Field Travel: Includes costs of all field travel conducted by U.S. direct hires overseas.

24. Representation: Includes costs for representation overseas in furthering the interests of the United States.

25. Security: Includes the costs of guards, alarms, cameras, etc. NOT covered under ICASS.

26. Other: Includes costs not captured above, such as language and other training, vehicles, agency specific benefits or allowances not included above, medical costs (physicals), etc. Please identify the items calculated as part of this category.

CHAPTER 16

INTELLIGENCE PROGRAMS/ACTIVITIES

1.0 GENERAL (1601)

1.1 Purpose (160101)

1.1.1. This chapter provides instructions applicable to budget formulation, implementation, and congressional justification for Intelligence Program Aggregation.

1.1.2. The following Program Aggregations are covered in this chapter:

1.1.2.1. National Intelligence Program (NIP) – Defense elements

1.1.2.2. Military Intelligence Program (MIP)

1.2 Definitions and Classification (160102)

General guidance with regard to classification of budget material is presented in Volume 2A, Chapter 1. Volume 2B, Chapter 16 provides additional specific guidance with regard to the material required for the Intelligence Program Aggregation.

1.2.1. National Intelligence Program (NIP)

The NIP provides integrated intelligence that covers broad aspects of national policy and national security. The portion of the NIP contained in the Department of Defense (DoD) Budget contributes substantially to meeting Defense intelligence requirements, but also contains programs/activities in support of elements of the United State Government outside the DoD.

1.2.2. NIP Classification

1.2.2.1. Classification of US Intelligence budget information is determined by the Director of National Intelligence (DNI) pursuant to Executive Order 12958, Section 1.5(c), Executive Order 12333, Section 1.5(g), and the DNI’s authorities under the National Security Act of 1947.

1.2.2.2. NIP Budget Resource Information in all DoD databases shall be classified as shown below unless other specific NIP program guidance in effect requires higher classification.

1.2.2.2.1. Information which, standing alone or in aggregate, reveals any Program Element total of the funding or manpower requirements of any program in the NIP will be classified SECRET.
1.2.2.2. Information that permits the disclosure of any Program Element total or the funding or manpower requirements of any program in the NIP, for example, through a subtractive process, will be classified SECRET.

1.2.2.3. Information which, standing alone or in aggregate, reveals overall DoD Component funding or manpower levels of the NIP or its programs will be classified SECRET.

1.2.2.4. However, as an exception to this guidance, NIP budget information for military construction and family housing for defense agencies shall be maintained and presented as unclassified.

1.2.2.5. Whenever NIP funding and manpower resource detail is combined with other unclassified programs in such a way as to effectively mask the NIP resource Program Element total, such combined resource Program Element total may be treated as unclassified.

1.2.2.6. Requests for clarification of the foregoing classification guidance should be forwarded to OUSD (I). Questions of application will be coordinated with the Office of the Director of National Intelligence and responses will be disseminated to all interested DoD components.

1.2.3. Military Intelligence Program (MIP)

The term “Military Intelligence Program” refers to programs, projects, or activities that support the Secretary of Defense’s intelligence and counterintelligence, and related responsibilities as outlined in DoD Directive 5205.12. The term excludes capabilities, programs, projects, and activities in the NIP.

1.2.4. MIP Classification

1.2.4.1. Military Intelligence Program Information

1.2.4.1.1. Total DoD funding for MIP is SECRET.

1.2.4.1.2. Individual Program Elements and line items may be classified or unclassified according to content, unless disclosure of such a total would allow derivation of classified totals.

1.2.4.1.3. Although many MIP projects are unclassified, totals for DoD MIP are classified SECRET. Since intelligence project resource data will be sorted and used in a number of different ways, it is essential that OUSD (I) has current and specific security classification guidance in order to avoid inadvertent, unauthorized disclosure of classified information. Services and Agencies reporting MIP resource data are directed to provide the security classification guidance for each project along with a citation of the source of classification. In addition, include any other security classification guidance unique to the
organization that may be pertinent. Some examples might include the classification of
information revealing the name of the organization with the resource, or classification of the
information revealing the location with the name of the organization, etc. Normally, the project
or program security classification guidance is included in a formal security classification guide
approved by an original classification authority in accordance with DoD Regulation 5200.1,
Information Security Program. (If you are uncertain about where to obtain the security
classification guidance for your project, see your servicing security office for assistance).

2.0 SUBMISSION (1602)

2.1 NIP Submission Requirements (160201)

2.1.1. NIP (Special Program Codes (SPC) 329, 330, 331, 333, 334, 335, and 336)
Congressional Budget Justification Books (CBJB) justification books will be prepared and
provided in accordance with separate guidance provided by the Office of the Director of National
Intelligence (ODNI). Any Decision Documents affecting elements of the NIP must be
coordinated with the ODNI, OUSD(C) and OUSD (I). The OUSD (C)’s Investment Directorate
will ensure that the DNI Chief Financial Officer has an opportunity to review and provide
comments on such documents.

2.1.2. The Components will follow the National Intelligence (NIP) Military Personnel
Resources Programming and Budgeting Policies and Procedures when developing NIP military
personnel cost estimates for the budget submission.

2.1.3. One hardcopy and CD disk of NIP program and budget materials prescribed by the
DNI will be delivered by the ODNI to Under Secretary of Defense (Comptroller)
(Program/Budget), Investment Directorate, Room 3C749, Pentagon, at the same time they are
delivered to the Office of Management and Budget (OMB).

2.2 MIP Submission Requirements (160202)

2.2.1. In accordance with DoD FMR Vol 2A and 2B, Chapters 3, 4 and 5 each Military
Department and Defense Agency with MIP (SPC 365) resources will prepare all DoD
justification materials (i.e., R-2, P-40, O-5, etc.) for each appropriation, to include DIA, NGA,
and NSA. OSD classified exhibits (SECRET) will be combined as a classified Defense-wide
volume. Classified justification materials (R-2, P-40, O-5, etc.) materials will contain sufficient
detail needed to fully justify the classified portion of the request, without the use of supplemental
justification materials. All other Army, Navy, Marine Corps, Air Force, National Reconnaissance
Office (NRO), and Defense-Wide classified exhibits will be reviewed by OUSD (C) prior to
releasing to OMB.

2.2.2. Submit three hardcopies of your classified R-2 or P-40 directly to OUSD(C),
Investment Directorate, Pentagon, Room 3C749, at the same time as the unclassified details.

2.2.3. Complementary MIP Congressional Justification Books (CJB) guidance will be
provided by the Office of the Under Secretary of Defense (Intelligence) (OUSD (I)). The CJB is
a functional aggregation of the MIP portion of the DoD request, containing program justification and resource highlights that must be consistent with and directly auditable to all DoD justification materials (i.e., R-2, P-40, O-5, etc.) and any other DoD justification books that address the same resources.

2.2.4. OUSD(I) will deliver three final MIP copies of all volumes and one compact disk (CD) directly to OUSD (C), Investment Directorate, Pentagon, Room 3C749.

2.3 Crosswalk Requirements (160203)

The MIP and NIP justification books will continue to incorporate an IC project to program element (Research, Development, Test, and Evaluation (RDT&E)), line item (Procurement (PROC)), or Subactivity Group (SAG) (Operation and Maintenance (O&M)) crosswalk exhibit at the R-1, P-1, and O-1 respectively. This is necessary to help satisfy continuous congressional budget reconciliation and visibility requirements.

3.0 BUDGET RECONCILIATION DATA (1603)

Congressional Oversight Committees have requested the Under Secretary of Defense (Comptroller) and Director, Cost Assessment and Program Evaluation Office (CAPE), in consultation with the Under Secretary of Defense for Intelligence, to create and maintain whole, distinct program elements [RDT&E PEs, PROC line items, O&M SAGs] within each component of the Intelligence Community (IC) to address IC resources and manpower. Services and Agencies must continue to show steady, measureable progress toward achieving these fully-captured MIP data elements for all appropriations.

3.1 NIP (160301)

The NIP lines will maintain whole [pure] NIP budget line resources identified by SPCs 329, 330, 331, 333, 334, 335, and 336.

3.2 MIP (160302)

The MIP lines will maintain whole [pure] MIP budget line resources identified by SPC 365.
4.0 APPEAL PROCESS ON CONGRESSIONAL ACTIONS (1604)

4.1 Purpose (160401)

This Section provides specific guidance for preparation of classified appeals to congressional committees on intelligence programs.

4.2 Classified Appeals (160402)

4.2.1 Oversight. The House Permanent Select Committee on Intelligence (HPSCI), the Senate Select Committee on Intelligence (SSCI), the House Appropriations Committee (HAC), and the Senate Appropriations Committee (SAC) have oversight jurisdiction over the NIP. The NIP appeals will be delivered to the HPSCI, SSCI, HAC, and the SAC. Appeals affecting the MIP will be delivered to the House Armed Services Committee (HASC), Senate Armed Services Committee (SASC), HAC, and SAC.

4.2.2 Classified appeals may supplement actions included in the overall Defense Appeal where security considerations have dictated a less than complete justification. Classified appeals will be prepared at the appropriate level of classification necessary to fully explain and justify the action.

4.2.2.1 The DNI will prepare and submit, in consultation with the OUSD(C) and OUSD(I), separate classified appeals for the NIP to the congressional committees with intelligence oversight. The appeals format and content will be determined by the DNI.

4.2.2.2 The OUSD(I), in consultation with the OUSD(C) and the DNI/Chief Financial Officer, will prepare classified appeals for the MIP to the congressional committees with intelligence oversight. Unclassified MIP appeals will follow normal procedures per additional guidance.

4.2.2.3 Classified Appeals will be completely consistent with the Secretary of Defense’s policy direction as articulated by the USD(Comptroller) and, in the case of appeals to legislative provisions, also as articulated by the Office or the General Counsel and the Deputy Secretary of Defense. All such appeals will be coordinated with the Comptroller and OMB prior to release.

CHAPTER 17

CONTINGENCY OPERATIONS (BASE BUDGET)

1.0 GENERAL (1701)

1.1 Purpose (170101)

This chapter provides instructions applicable to budget formulation and congressional justification for contingency operations funded from the base budget. The information provided for contingency operations, as reflected in this chapter, is consistent with section 8074 of division A of Public Law 115-245, the Department of Defense Appropriations Act, 2019; which, requests the Department to include the same type of budget justification material for contingency operations as is provided for other DoD activities.

1.2 Submission Requirements (170102)

1.2.1. This chapter addresses the requirement to budget for new and ongoing contingency operations costs. This information will be used to justify resource requirements for directed contingency operations – specifically the justification of the incremental costs for supporting a designated operation. These incremental costs will become the basis for any funding requests forwarded to the Congress through the normal appropriations process or through emergency supplemental appropriation requests during the year of execution, if warranted. Incremental costs are additional costs to the DoD Component appropriations that would not have been incurred had the contingency operation not been supported. A more detailed discussion of contingency operations, as well as the methodology to be used to determine related incremental costs, is provided in Volume 12, Chapter 23, Contingency Operations.

1.2.2. In order to ensure that the requested funding is defensible and realistic, and the submitted data and justification material complies with congressional requirements, each Component is required to submit the contingency operations budget exhibits included in section 3.0. These exhibits provide detailed cost estimates and must be completed for each contingency operation. Each Component must submit an OP-5 Contingency Operations (Base Budget) Exhibit, a Contingency Operations Summary Exhibit for each contingency (e.g., Bosnia, Kosovo, Operation Juniper Shield), a Contingency Operations by Appropriations Exhibit that consolidates the Component’s incremental costs for each contingency operation, and a CONOPS-1 Exhibit that displays incremental cost into cost categories. Each Component will include in its submission the incremental costs for contingency operations for all Military Intelligence Program (MIP) except for the incremental costs for National Foreign Intelligence Programs (NFIP). The Community Management Staff (CMS) will prepare and submit the required exhibits to report the incremental costs for contingency operations for all NFIP-related activities.

1.2.3. The Components will use the Select Native & Programming (SNaP) website at https://snap.cape.osd.mil to submit data and create exhibits.
1.3 References (170103)

Volume 2A, Chapter 1 contains general guidance with regarding submission requirements. Volume 2B, Chapter 17 specifies backup material required for contingency operations. Volume 12, Chapter 23 promulgates financial policy and procedures for contingency operations. The Components should also consult all of the other volumes and chapters for exhibit requirements that are not specifically addressed in this chapter, including Volume 2B, Chapter 19, Other Special Analyses.

2.0 PROGRAM AND BUDGET REVIEW SUBMISSION AND CONGRESSIONAL JUSTIFICATION AND PRESENTATION (1702)

2.1 Purpose (170201)

This Section provides guidance for preparation and submission of budget estimates for contingency operations. The budget estimates will separately identify the incremental costs for operation and maintenance, military personnel, and other applicable (e.g., procurement) resources required to support specified contingency operations. For the President’s Budget request submitted to the Congress, all approved contingency operations incremental cost requirements will be reflected in the Overseas Contingency Operations Transfer Fund (OCOTF) justification book, and the level of detail provided must address the congressional concerns for adequate visibility and justification of requirements.

2.2 Submission Requirements (170202)

2.2.1. For the Budget Estimate Submission (BES), the Components will submit exhibit details on-line using the Select & Native Programming (SNaP) data input system located at https://snap.pae.osd.mil/Home.aspx. The SNaP provided Program Data Requirements (PDR) for this exhibit will supersede the instructions identified in this chapter unless modified by the OUSD(C) budget guidance. The Components will update the force structure, budget (anticipated obligations, current and anticipated requests), and operational data.

2.2.2. For the President’s Budget (PB), the Components will update the SNaP data input system on-line with any changes to the force structure, budget data (prior year obligations, current estimate, and request), and operational data. The base-funded contingency operations OP-5 exhibit is to be developed through the SNaP database. The Components will notify the OUSD(C) Operations Directorate via email (osd.pentagon.ousd-c.list.operations-directorate@mail.mil) upon completion of the OP-5 and SNaP OCOTF submissions.

2.2.3. In all instances, these exhibits will be prepared and submitted to OUSD(C) in accordance with the schedule defined in the annual budget guidance memorandum published by the OUSD(C) for the fall program and budget estimate submission (BES) and for the President’s Budget submission. Each exhibit will be prepared separately for the BES and the congressional justification/presentation process.
3.0 CONTINGENCY OPERATIONS SUBMISSION FORMATS (1703)

3.1 Purpose (170301)

The formats provided on the following pages are in accordance with the guidance presented in sections 1.0 and 2.0. Unless modified by the OUSD(C) in a budget guidance memorandum, the formats must be followed.

3.2 Unique Exhibits in Support of Contingency Operations (170302)

Exhibit OP-5 Overseas Contingency Operations

COMPONENT NAME

OVERSEAS CONTINGENCY OPERATIONS
FY ____ Program and Budget Review Submission or FY ____ President’s Budget (as applicable)
Name of Contingency Operation:

This exhibit must be submitted as an electronic copy via SNaP.

**General Guidance:** A separate exhibit should be prepared for (1) each contingency operation, (2) a summary exhibit for each region, and (3) a total exhibit for each Component. Each Component will include in its submission the incremental costs for contingency operations for all intelligence-related activities except for the incremental costs for National Foreign Intelligence Programs (NFIP). The Community Management Staff will be responsible for preparing and submitting the required exhibits to report the incremental costs for contingency operations for all NFIP-related activities.

I. **Description of Operations Financed:** Provide a narrative explanation characterizing the mission of this particular contingency operation and address the major cost drivers such as the number of base camps, the number of troop rotations, and the related troop strength supporting the contingency.

II. **Force Structure Summary:** Identify in tabular form by operation, the average annual troop strength for active duty, Guard and Reserve Components deployed for this contingency operation for prior year (PY), current year (CY), and budget year(s) (BY).

III. **Financial Summary ($ in Thousands):** Report incremental costs only. **Note:** Include only non-NFIP intelligence costs. The CMS is responsible for reporting incremental NFIP costs.

FY _____ Program and Budget Review Submission or FY ____ President’s Budget (as applicable)
Name of Contingency Operation:

1/ Should be consistent with amounts reported in the cost report. (For BES, include anticipated amounts through the end of the fiscal year.)
2/ Include all incremental costs, regardless of appropriation. For example, if military personnel costs are appropriated directly to the military personnel accounts rather than to the OCOTF include the amount expected to be required for contingency operations.

CHAPTER 18

INFORMATION TECHNOLOGY (INCLUDING CYBERSPACE ACTIVITIES)

1.0 GENERAL (1801)

1.1 Purpose (180101)

1.1.1. This chapter provides instructions applicable to supporting budgetary material and congressional justification for Information Technology and Cyberspace Activities (IT/CA) investments, as well as discussing requirements for contributions to approved Electronic Government (E-Gov) investments. The Department of Defense (DoD) Chief Information Officer (CIO) Deputy Chief Information Officer for Resources and Analysis (DCIO(R&A)) is responsible for collecting, assembling, and reporting of the Departments IT/CA budget for the purposes of submitting complete and accurate IT/CA justification materials to the Office of Management and Budget (OMB) and the Congress. DoD CIO DCIO(R&A) will issue annual supplemental guidance to these instructions that address detailed and amplifying submission requirements, adjustments since publication of these instructions, and submission due dates.

1.1.2. These instructions apply to the Office of the Secretary of Defense (OSD), the Military Departments (including their National Guard and Reserve Components), the Joint Staff, Unified Commands, the Inspector General DoD, the Defense Agencies, the DoD Field Activities, the Joint Service Schools, the Defense Health Program, and the Court of Military Appeals, hereafter referred to as the DoD Components.

1.1.3. The budgetary materials developed in accordance with instructions in this and other applicable chapters in Volumes 11A and 11B represent the authoritative DoD IT/CA budget request.

*1.2 Authoritative Guidance (180102)

1.2.1. DoD Financial Management Regulation (FMR), Volume 2A, Chapter 1 provides general funding and appropriation policies, including expense and investment criteria (Section 010201) and Budgeting for Information Technology and Automated Information Systems guidance (Section 010212), as well as general preparation instructions and distribution requirements. The following table highlights DoD FMR references to the applicable appropriation.

</tr>
</tbody>
</table>

Volume 2B, Chapter 16 discusses requirements for NIP and MIP justification materials. Additional CA justification guidance is provided in 180104.K and via an annual guidance letter.

1.2.3. OMB Circular No. A-11, “Preparation, Submission and Execution of the Budget,” Section 51.19, "Budgeting for the acquisition of capital assets,” and Section 25.5, “What do I include in the budget request to OMB?” provide the general Federal reporting requirements for IT resources.

1.2.4. The Paperwork Reduction Act of 1995 and the Public Law 104-106 (Clinger-Cohen Act of 1996, as amended) contain supporting definitions regarding IT.

1.2.6. DoDD 8115.01, “Information Technology Portfolio Management” and DoD Instruction 8115.02, “Information Technology Portfolio Management Implementation,” provide guidance and define responsibilities for DoD Mission Areas.

1.2.7. DoDD 7045.20, “Capability Portfolio Management,” establishes policy and assigns responsibilities for the use of capability portfolio management.

1.2.8. DoDD 5205.12, “Military Intelligence Program (MIP),” Establishes policy and assigns responsibilities for the MIP in accordance with the authority in DoDD 5143.01 (Reference (a)) to provide visibility into Defense Intelligence resource data and capabilities and to create a means for effectively assessing Defense Intelligence capabilities.

1.2.10. Joint Publications 3-12, “Cyberspace Operations,” dated June 8, 2018. This publication provides joint doctrine to plan, execute, and assess cyberspace operations.

1.2.11. NIST Special Publication 800-82, “Guide to Industrial Control Systems (ICS) Security,” May 2015. This document provides guidance on how to secure ICS, including SCADA systems, Distributed Control Systems (DCS), and other control system configurations such as Programmable Logic Controllers (PLC), while addressing their unique performance, reliability, and safety requirements.

1.2.13. DoDI 8500.01, “Cybersecurity,” dated March 14, 2014. Provides instruction to establish a DoD cybersecurity program to protect and defend DoD information and IT.

1.2.14. DoDI 5000.75, “Business Systems Requirements And Acquisition,” January 24, 2020. Implements the statutory requirements of Title 10 USC Section 2222(c) and establishes policy for the use of business capability acquisition (BCAC) cycle for business systems requirements and acquisition.

1.3 Submission Requirements (180103)

1.3.1. General guidance for submission requirements is presented in Volume 2A, Chapter 1 of the DoD FMR and in the OSD Program/Budget guidance memos. This chapter covers specific submission and distribution instructions for the IT/CA Budget submission. All applicable automated database updates/formats will be submitted for both the OSD Program/Budget Estimates Submission and the Congressional Justification submission referred to in the DoD as the President’s Budget (PB) request. DoD CIO will distribute information, as appropriate, to Congressional committees, Government Accountability Office (GAO) and Inspector General activities in accordance with OMB Circular A-11, Section 22 – “Communications With The Congress And The Public And Clearance Requirements” – only after the OMB database is updated and OMB has approved the information for release.

1.3.2. All DoD Components that program, budget, or execute (obligate) resources to/which support IT/CA in any fiscal year of the Future Years Defense Program (FYDP), Prior Year (PY) and Current Year (CY) will report IT/CA data in preparation for the DoD Component’s inputs to the OMB Circular A-11 (Section 25.5 and Section 51.19), E-Gov reviews, governance documents as required by the OMB Circular A-130, “Managing Information as a Strategic Resource,” budget analyses, special data calls, and Congressional displays. The product previously called the “Exhibit 300A” is now called the “Major IT Business Case” and the “Exhibit 300B” is now called the “Major IT Business Case Detail”. All DoD appropriation accounts and funds including Defense Working Capital Fund (DWCF), Other Funding, and IT/CA portions of the Military Intelligence Program (MIP) are encompassed unless outlined in paragraph D. All MIP IT resource submissions shall be coordinated with the Office of the Under Secretary of Defense for Intelligence (OUSD(I))/Directors for Defense Intelligence (Intelligence Strategy, Programs & Resources) (DDI ISP&R/MIP Office)).

1.3.3. This chapter covers IT/CA submissions, including Defense Business Systems (DBS), National Security Systems (NSS), Command & Control (C2), Communications and related programs, Combat Identification, Joint Information Environment (JIE), National Leadership Command Capabilities, Cyberspace Operations, Cybersecurity, Artificial Intelligence (including Information Systems Security and machine learning), Cyber Mission Forces, Offensive Cyber Operations, Defensive Cyber Operations, Cyber Intelligence Surveillance and Reconnaissance, Operational Preparation of the Cyberspace Environment, Cyber Threat Detection and Analysis (including Insider Threat), meteorological systems, control systems, IT/CA associated Research, Development, Testing and Evaluations (RDT&E) and navigation systems/programs as well as budgeting for contributions to intergovernmental E-Gov investments. The IT/CA budget encompasses all DoD appropriation accounts and funds with the exception of nonappropriated funds as defined in DoD FMR Volume 13, Chapter 1.
1.3.4. This chapter’s IT budget preparation and requirements do not apply to:

1.3.4.1. U.S. Army Corps of Engineers Civil Works (USACE-CW) appropriations.

1.3.4.2. IT acquired by a Federal Contractor “incidental” to performance of a Federal Contract.

1.3.4.3. Programs, projects, and activities embedded in non-C2 and non-Communications programs or weapon systems or embedded in Service force structure and, therefore, not readily identifiable in the budget. DoD CIO will have final determination on what systems, programs, projects, and activities will be reported.

1.3.4.4. Highly sensitive and special access programs whose resources are specifically exempted from budget reporting by the DoD CIO and other OSD authorities. In general, these resources are reviewed through separate budget processes.

1.3.4.5. National Intelligence Program (NIP) resources. The Office of the Director of National Intelligence staff submits NIP via separate mechanisms.

1.3.4.6. A Family of Systems (FoS) or System of Systems (SoS) recorded as such within the Department of Defense Information Technology Portfolio Registry (DITPR), systems within a FoS or SoS are subject to this chapter’s requirements.

1.3.4.7. Resources related to systems with an inactive DITPR record (see DITPR Guidance\(^1\), Section 9.4.g, for details).

1.3.5. All DoD Components and Enterprise Portfolio Mission Areas must prepare separate executive overviews for the Congressional Justification Submission. DoD CIO will provide guidance with specific areas of interest that must be addressed within the executive overview.

1.3.6. DoD CIO will designate investments required to submit a Major (see subparagraph 2.0.58) IT Business Case and Major IT Business Case Details to meet OMB Circular A-11, Sections 25.5 and 51.19 requirements. The Major IT Business Case Detail is designed to coordinate OMB’s collection of Agency information for its reports to Congress, as required by the Federal Acquisition Streamlining Act of 1994 (FASA, Title V) and Clinger-Cohen Act of 1996. Currently, IT Business Cases are required for Part 1 (Mission Delivery – Segment 700) and Part 2 (Mission Support Systems – Segment 500) major IT Investments. OMB does not require IT Business Cases for Part 3 (IT Infrastructure, IT Security, and IT Management –Segments 600, 610, and 800). The Business Case and Business Case Detail submissions are not limited to acquisition or development and modernization programs.

1.3.7. Statement of Compliance (SoC) Requirement. The IT/CA submissions are transmitted electronically. For that reason, each Component is required to submit a coordinated

---

annual transmittal memo known as the “Statement of Compliance” memorandum with their IT/CA submissions, on the Submit/Certify due in accordance with the FY Budget Schedule. The SoC memorandum must be addressed to the DoD CIO and the DoD Chief Management Officer (CMO). Military Departments (MILDEP) must also include their MILDEP CMO as addressee on the SoC memorandum. The Component CIO and CFO, or individual(s) assigned with equivalent responsibilities, must jointly sign the SoC, which states their submissions are complete; accurately aligned with the submitting Component’s primary budget, program and acquisition materials; and are consistent with:

- Subtitle III, title 40 (formerly called the Clinger-Cohen Act), as amended, and with 10 U.S.C. §2222 (Defense business systems only);
- OMB Circular A-11 and documented exceptions to the Circular;
- 40 U.S.C. §11319(b)(1)(B)(ii), which provides that the CIO of each covered agency certifies that information technology investments are adequately implementing incremental development, as defined in capital planning guidance issued by OMB;
- Federal Information Technology Acquisition Reform Act (FITARA) Title VIII, Subtitle D of the National Defense Authorization Act (NDAA) for Fiscal Year 2015;
- OMB A-130;
- The Privacy Act;
- DoD CIO IT/CA budget guidance memoranda;
- The Paperwork Reduction Act;
- Section 508 of the Rehabilitation Act of 1973, Pub. Law 93-112, as amended (29 U.S.C. § 794d); and
- Other applicable Acts and requirements.

The statement may be based on the Program Manager’s SoC. The statement should also include explanations for investments that do not conform to DoD CIO budget guidance memorandum. DoD Components for which all IT resources are exempt from reporting based on Section 1.3.4 must still submit a SoC addressing the specific reasons for exemption.

1.3.8. If OMB requires additional governance information to accompany the IT/CA Budget, DoD CIO will determine how these requirements will be met, and provide direction to the Components. DoD CIO will also provide the Components documented guidance as well as training on any applicable changes to the Department of Defense Information Technology Information Portal (DITIP) and/or Select and Native Programming – Information Technology (SNaP-IT) systems which will be used to gather information requested by OMB (see 3.2).

1.3.9. Appointment of qualified project managers for investments listed in the IT/CA Budget is a matter of high-level interest to the OMB. Components are charged to provide complete Program Manager identification to comply with Project Manager reporting requirements for Major IT Business Case/Major IT Business Case Detail only.

1.3.10. 10 U.S.C §2432 requires that the Secretary of Defense submit, to the Congress, annual reports on all Major Defense Acquisition Programs (MDAP). This annual report, known as the Select Acquisition Report (SAR) will take the place of the OMB required Major Business Case and Major Business Case Detail exhibits for all MDAP IT programs.
1.3.10.1. All MDAP IT Programs, and Pre-MDAP IT Programs will be reported in DITIP/SNaP-IT (see paragraph 3.2) as single investments aligned to the Official MDAP Lists maintained in the Defense Acquisition Management Information Retrieval (DAMIR) Portal. Some programs may be broken out into increments with different Program Number (PNO) that may be associated with one Investment tied to the main or parent program. In such cases of one Investment to many PNO relationship, the valid one-to-one relationship for budget reporting purposes will continue to be in reference to the parent program.

1.3.10.2. For MDAP IT programs, Components must use the DAMIR program description within DITIP/SNaP-IT. The program description should be precisely worded to consider the Congressional staff audience. In addition, Components shall notify the Under Secretary of Defense for Acquisition and Sustainment (USD(A&S)) as soon as the Component anticipates that the program is within 10 percent of an Acquisition Categories (ACAT) I or IA program dollar threshold, as required by DoD Instruction (DoDI) 5000.02.

1.3.11. Components with investments deemed “Major” (see subparagraph 2.0.58) are required to provide updates to the Major IT Business Case and Major IT Business Case Detail, via SNaP-IT, that will be made available to the OMB Federal Information Technology Dashboard (ITDB). Updates include changes to Major IT Business Case Detail baselines, planned start/end dates, actual start/end dates, and planned/actual costs. Additional guidance for this process is promulgated in the DoD CIO’s annual guidance (see subparagraph 1.4.1).

1.3.12. Components must account for resources to acquire, operate and maintain each data center identified in the Data Center Inventory Management (DCIM) System database. Each Core Data Centers (CDC), Component Enterprise Data Centers (CEDC), and Installation Processing Nodes (IPN) must be reported in a single investment within DITIP/SNaP-IT (see paragraph 3.2). Components may report multiple data centers under one investment for other types of data centers, typically Special Purpose Processing Nodes (SPPN), and are not required to segregate costs. DWCF investments delivering IT Services are not required to have separate investment for each Data Centers.

1.3.13. Components must identify which investments are resourced through a DWCF, as well as whether such investment is either an IT product or an IT service (vice an investment in a non-IT product or service). The SNaP-IT DWCF IT budget module for IT Working Capital Fund (WCF) requirements located on the Nonsecure Internet Protocol (IP) Router Network (NIPRNet or “NIPR”) will forecast all planned revenue and revenue sources for the Investment to include any classified investment amounts residing in the Secret Internet Protocol Router Network (SIPRNet or “SIPR”). Refer to the annual OSD guidance for greater details.

1.3.14. Components are required to provide resourcing, within the timeframe being reported, that represents the total Life Cycle Cost Estimate (LCCE) of the investment.

1.3.15. Components must identify and break out resources applied to an investment as a result of directives associated with the annual Program Budget Review (PBR) process (e.g., DEPSECDEF Memorandum, Program Budget Decision (PBD), Program Decision Memorandum (PDM)). Refer to the annual OSD IT/CA budget guidance for greater details.
1.4 Preparation of Material (180104)

1.4.1. This section covers material reporting requirements for IT resources submission to the DoD CIO. The DoD CIO will provide augmenting guidance annually, by early August of the reporting year. The guidance will include changes to meet new or updated OMB A-11, OMB E-Gov, Congressional, and OSD submission requirements; special areas of emphasis; and a listing of the investments that require a Major IT Business Case/Major IT Business Case Detail.

1.4.2. All IT resources must be managed in accordance with appropriation guidance and applicable expense and investment criteria.

1.4.3. All IT resources will be reported within investments (see subparagraph 3.2.2). With the exception of DBS (see subparagraph 1.4.7.2), Major Automated Information Systems (MAIS) (see subparagraph 1.4.4), Approved Shared Services (see subparagraph 1.4.13), Data Centers (i.e., CDC, CEDC, IPN) (see subparagraph 1.3.13), centrally managed enterprise software license purchases (see paragraphs 1.4.9 and 2.10), Cloud projects (subparagraph 1.4.10), Artificial Intelligence projects (subparagraph 1.4.13), and Security Operations Centers (SOC) (see subparagraphs 1.4.8 and 2.0.75), investments can be systems, programs, projects, organizations, activities or grouping of systems with related functionality. Each Component will manage its classified and unclassified investments through the respective DITIP. Investments are registered with key categories of data required to meet internal and external reporting requirements. To register a new investment or amend/update existing investment data, DoD Components access DITIP’s on-line investment registration capability. A Unique Investment Identifier (UII) is associated with each investment. The current and archived lists of investments are maintained on the DITIP web site. Additional guidance for the registration process is promulgated in the DoD CIO’s annual guidance (see subparagraph 1.4.1).

DITIP provides a centralized location for IT investment portfolio data, is the authoritative data source for DoD IT Header information, and aligns IT systems information in DITPR with budget information in the SNaP-IT. DITIP provides for the entry and maintenance of common DITPR and SNaP-IT data elements, provides a mechanism to identify Data Center budget resource estimates and supports the DoD Chief Management Officer (CMO) DBS certification in accordance with the requirements of Title 10 U.S.C.§2222. DITIP is the system of record for the NDAA DBS data elements (i.e., Business Enterprise Architecture (BEA) Code, BEA Version, Business Process Re-engineering (BPR) Code, Requirements and Plan, Acquisition Strategy, and Auditability Requirement).

Components are responsible for verifying investment data entered in DITIP is consistent with that data entered into DITPR. At a minimum, each DITPR line item must be aligned against an active SNaP-IT UII or valid exception UII. Additional guidance for exception UII’s is promulgated in the DoD CIO’s annual guidance (see subparagraph 1.4.1).

1.4.4. All investments requiring a Major IT Business Case/Major IT Business Case Detail will be identified within the annual IT/CA Budget guidance (see subparagraph 1.4.1). Regardless of actual investment amount, all funding for MAIS and pre-MAIS programs (as designated in the authoritative MAIS list maintained by the Under Secretary of Defense for Acquisition and Sustainment (USD(A&S)) will be reported in the IT exhibit as major. Components that serve as
the executive or principal funding agent (a.k.a., “Owner”) for investments must report all sections of the Major IT Business Case and Major IT Business Case Detail.

1.4.5. Investments with multiple participating DoD Components are joint investments. All information submitted for a joint investment is the responsibility of the investment owner registered in DITIP/SNaP-IT. The owner shall coordinate/validate investment data with each participating DoD Component of that joint investment.

1.4.6. Group of Systems. With the exception of DBS (see subparagraphs 1.4.7 and 2.0.27), MAIS, Approved Shared Services (see subparagraph 1.4.13), data centers (see subparagraph 1.3.12), centrally managed enterprise software license purchases (see paragraphs 1.4.9 and 2.10), Cloud projects (subparagraph 1.4.10), Artificial Intelligence projects (subparagraph 1.4.13), and Security Operations Centers (SOC) (see subparagraphs 1.4.8 and 2.0.75), investments can be groupings of systems with related functionality if all the systems are within the same Mission Area/Segment, managed under the same construct, and financed under the same resource construct (program/project/organization). All systems grouped into an IT Budget Investment must report that investment’s UII in the appropriate DITPR system record.

1.4.7.1. In order to satisfy requirements of 10 U.S.C. §2222, for certification and approval of investments involving “defense business systems” as “covered defense business system programs,” as well as for budget information in the materials that the Secretary of Defense submits to the Congress under 10 U.S.C. §2222(i)(1)(A), investments in defense business systems must be reported individually within the IT/CA Budget (see paragraph 3.2).

1.4.7.2. The definition of a DBS is provided in section 2.0.27. All DBS must: (a) be included within the IT/CA Budget at the system level, not as system of systems, group of systems, or bundle of systems (i.e., Defense Business System = Investment); and (b) maintain a one-to-one relationship between DITIP/SNaP-IT and DITPR unless a specific exception is approved by the DoD CIO DCIO(R&A) office. The DoD CMO or military department CMO certifies DBSs prior to obligation of funds in the applicable fiscal year, in accordance with their policies. In cases where the CMO certifies PY or CY resources for a DBS, Components must report the amount certified plus any amount not certified that remain programmed or budgeted for the investment (i.e., Obligations + Commitments + Uncommitted balance) in the appropriate resource line(s) in the budget.

1.4.8. Security Operation Centers (SOC). Components must establish each SOC (see paragraph 2.0.75) as an individual investment and report resources accordingly (see paragraph 3.2). All SOC investments and resources will be reported within ‘Cyberspace Activities’ Segment 610-000 and ‘Cybersecurity Network Operation’ category of the DoD CA Taxonomy. SOCs may take other names such as Cybersecurity Operation Center (CSOC), Joint Operation Center, Network and Security Operation Center, Cyberspace Operations and Integration Center (ACOIC).

1.4.9. Centrally Managed Enterprise Software License. Components must develop individual investments for each Centrally Managed Enterprise Software License and report
resources in the DoD IT/CA Budget accordingly (see paragraph 3.2). An enterprise license is an organization-wide (i.e., DoD-wide, Component-wide, Subcomponent-wide) software license that provides common usage rights within a defined community of users in the organization and may be customized to the organization’s requirement (see paragraph 2.10). Typically, the defined community of users interface with the Software Publisher/Licensor under a single point of contact (i.e., centrally managed) including for acquisition, payments, inventory reporting, and other contractual actions. Examples of such Enterprise License include: Enterprise License Agreement (ELA), Joint ELA (JELA), Core Enterprise Technology Agreement (CETA), and purchasing agreements such as DoD Enterprise Software Initiative Enterprise Software Agreement (ESI ESA) (e.g. General Services Administration (GSA) IT Schedule 70 Blanket Purchase Agreement (BPA) and National Aeronautics and Atmospheric Administration Solutions for Enterprise Wide Procurement (NASA SEWP) agency catalog), Federal Category Management Leadership Council Best in Class (CMLC BIC) purchasing agreement (e.g. GSA IT Schedule 70 Software SINs and NASA SEWP), and DoD Component-level software purchasing vehicles.

* 1.4.10 Cloud Environment Investments. Components must develop individual investments for each General Purpose (GP), Fit-for-Purpose (F2P), and Internal cloud Projects and report resources in the DoD IT/CA Budget accordingly (see paragraphs 2.0.41, 2.0.45, 2.0.52). Register Cloud investments in DITIP (see paragraph 3.2.1).

* 1.4.11 Cyberspace Activities (CA).

1.4.11.1. DoD categorizes CA as a major reportable category of the DoD IT/CA budget. (see subparagraphs 2.0.22 and 2.2.23) There are three components within the CA budget: (1) Cybersecurity (also known as Information Assurance); (2) Cyberspace Operations (CO) - a. Offensive Cyberspace Operations (OCO), b. Defensive Cyberspace Operation (DCO), c. DODIN Operations; and (3) Research and Development of new applications to support the advancement of cybersecurity and cyberspace operations. Definitions are provided each budget year (BY) in OSD CA Implementation Guide.

1.4.11.2. Components with CA investments will report their resources through the SNaP-IT System (see paragraph 3.2). All CA resources will be reported within CA investments as prescribed by DoD CIO. Justification narratives to support the preparation of the DoD CA Congressional Justification Book (CJB) will be input directly into SNaP-IT (see subparagraph 4.3.2).

1.4.11.3. Components must align CA resources into specific CA budget lines identified in the DoD CIO DCIO(R&A) CA Appropriation Baseline (CAAB) database to comply with congressional direction for spending funding required for CA.\(^2\) Within the IT/CA Budget submission, all: (a) Research, Development, Test, and Evaluation (RDT&E) CA resources must be programmed, budgeted, justified, and executed from unique RDT&E Projects; (b) Procurement CA resources must be programmed, budgeted, justified, and executed from unique Procurement Line-Items; and O&M CA resources must be programmed, budgeted, justified and executed from unique Operations and Maintenance (O&M) Activity/Sub-Activity Groups (AG/SAG). In order

to be included in the Department’s CA budget, all projects, line-items, and AG/SAGs reporting CA resources must be approved by the DoD CIO and included within the CAAB. Additional CA guidance will be provided by the DoD CIO DCIO (R&A), as needed.

1.4.11.4. DoD CIO DCIO(R&A), in coordination with DCIO Cybersecurity and the offices of OSD Cost Assessment and Program Evaluation (CAPE), USD(C), OUSD(I), USD(A&S), USD(R&E), Principal Cyber Advisor (PCA), USCC, and Components as identified in subparagraph 1.1.2 will prepare a single DoD CA CJB containing materials supporting DoD’s overall CA efforts. This information is collected simultaneously with the IT Budget utilizing SNaP-IT. Components must complete the SNaP-IT CA CJB submission for all investments identified in the ‘Cyberspace Activities’ Segment 610-000.

1.4.11.5. The Cyber Mission Forces were established in March 2013 and activated in January 2014. The Cyber Mission Forces have three main aspects: (a) Cyber National Mission Teams to help defend the nation against a strategic cyber-attack on U.S. interests including our critical infrastructure and key resources (CIKR); (b) Cyber Combat Mission Teams aligned with regional and functional Combatant Commanders to support their objectives; and (c) Cyber Protection Teams to help defend DoD information environment and the military cyber terrain. These cyber mission teams are the U.S. military’s first joint forces dedicated to CA. They primarily support the Combatant Commands. In order to efficiently account for planned, programmed, and budgeted financial requirements, organizations are required to use the unique taxonomies and Program Elements (PEs) that SNaP-IT established for manning, training, and equipping of the Cyber Mission Forces. The PEs established for CMFs allow the Department to represent CMFs as a virtual Major Force Program (MFP) for reporting to Congress. OSD classified guidance and training will provide further details on managing UIIs with appropriate PEs and the OMB taxonomies.

1.4.12. Approved Shared Services. The DoD CIO Executive Board may occasionally authorize a DoD Approved Shared Service. In those cases, an Authorized Shared Service must be reported in a single SNaP-IT investment (see paragraph 3.2). The DoD CIO DCIO(R&A) will maintain a listing of Approved Shared Services and provide that listing within the DoD CIO’s annual IT/CA Budget guidance (see subparagraph 1.1.1).

1.4.13. Artificial Intelligence (AI). Components must develop individual investments for each AI Project, register, tag as ‘Artificial Intelligence’, and report resources in the DoD IT/CA Budget accordingly (see paragraph 3.2). All AI investments that are stand-alone AI programs or projects and are not the sub-component of a specific end-item’s software will be reported within the ‘Artificial Intelligence’ Segment 400-000 (see paragraph 2.2). All AI investments that are a sub-component of a specific end-item’s software that enhances the capabilities of the end-item through AI technologies (e.g., an AI application that is a part of an operational or business system) will be reported in the Segment appropriate for that end-item.

1.4.14. Industrial Control Systems (ICS)/Platform Information Technology (PIT)/Supervisory Control and Data Acquisition (SCADA). As stated in National Institute of Standards and Technology (NIST) Special Publication 800-82, “ICS are typically used in industries such as electric, water and wastewater, oil and natural gas, transportation, chemical,
pharmaceutical, pulp and paper, food and beverage, and discrete manufacturing (e.g., automotive, aerospace, and durable goods). SCADA systems are generally used to control dispersed assets using centralized data acquisition and supervisory control. These control systems are vital to the operation of the U.S. critical infrastructures that are often highly interconnected and mutually dependent systems.” These systems, while not generally considered a typical Information System, are just as vulnerable to interception, modification, interruption and fabrication that threaten typical IT Systems. Likewise, the defensive measures taken to protect ICS/PIT/SCADA systems are similar to the cybersecurity measures currently taken to protect IT systems: Firewalls, Intrusion Detection Systems, strong passwords, and encryption to name a few. Therefore, the documented planning, programming and budgeting of the costs of researching, procuring, operating and maintaining these defensive mechanisms (Converged Systems) used to protect ICS/PIT/SCADA from these vulnerability exploitations must be captured in the IT/CA budget using SNaP-IT (see paragraphs 2.14, 2.15, and 2.0.70). PIT Control Systems (CS) purchased as part of a weapons systems or some other turn-key non-IT solution (i.e., as part of an HVAC system) would not be reported in the IT/CA Budget.

In summary, if the turn-key solution is IT then the ICS/PIT/SCADA systems would be reported within the turn-key investments IT/CA budget. If the CS/PIT is being purchased on its own or upgraded to address cyber security shortfalls, it would be reported in the IT/CA budget. Lastly there is no need to register each PIT/CS as a separate IT investment -- it can be a part of a larger investment (see paragraph 3.2). However, each resource owner, at a minimum, is responsible for creating at least one single CS/PIT investment for Converged Systems. Components are required to use the unique taxonomies established for CS/PIT within the ‘Cyberspace Activities’ Segment 610-000. OSD classified guidance and training will provide further details on managing CS/PIT UIIs with appropriate taxonomies.

1.5 Reporting Structure (180105)

IT/CA investments shall be managed by enterprise portfolios divided into Mission Area portfolios which are defined as Warfighting, Business, DoD portion of Intelligence, and Enterprise Information Environment3. In addition, all IT/CA resources will be associated with a single DoD Segment and DoD Sub-Segment (where applicable) (see section 1.5 for definitions), the Federal Enterprise Architecture (FEA) Business Reference Model (BRM), and DoD Segment taxonomy. IT/CA investments are also reported by appropriation details (Appropriation, Budget Activity (BA), Program Element (PE), Budget Line Item (BLI), Investment Stage and Funding Source (Base/Overseas Contingency Operations (OCO)), and by “major” and “other” categories. CA investments must further be assigned the DoD & Federal Cyberspace Activities Taxonomy. SNaP-IT records these business rules. Investments that cross more than one functional area, including Cyberspace Activities, may need to be broken down by area and registered in the Master UII List maintained in DITIP/SNaP-IT by the DoD CIO. The reporting area will normally be based upon the preponderance of the mission/capability concept. The DoD CIO DCIO(R&A) will annually issue supplemental guidance for other data requirements directed by the DoD CIO, Congress, or OMB.

*2.0 DEFINITIONS (1802)

The definitions in this section provide relevant information for the chapter including, segment descriptions, technical capabilities and IT/CA Budget component terms.

2.0.1. **Acquisition Segment (510-000).** IT supporting the activities necessary to provide goods/services for DoD operations, including during the stages of conceptualization, initiation, design, development, test, contracting, production, deployment, modification, and disposal of weapons and other systems, supplies, or services (including construction) to satisfy DoD needs, intended for use in, or in support of, military missions. This does not include logistics support, which should be reported within the ‘Logistics and Supply Chain Management’ Segment (530-000).

2.0.2. **Artificial Intelligence (AI) Segment (400-000).** AI refers to the ability of machines to perform tasks that normally require human intelligence – recognizing patterns, learning from experience, drawing conclusions, making predictions, taking actions, and more – whether digitally or as the smart software behind autonomous physical systems. This segment includes any investments for AI programs or stand-alone AI projects. This segment also includes AI supporting activities for creating a common foundation of shared data, reusable tools, frameworks and standards, and edge services, through decentralized development and experimentation such as research, longer-term technology creation, and innovative concepts. Do not include AI resources embedded within end-item software system/application investments; report AI embedded within applications as application costs within the appropriate application Investment.

2.0.3. **Battlespace Awareness-Environment Segment (710-000).** IT supporting the ability to collect, analyze, predict and exploit meteorological, oceanographic and space environmental data.

2.0.4. **Battlespace Awareness-ISR Segment (700-000).** IT supporting the ability to conduct activities to meet the intelligence needs of national and military decision-makers.

2.0.5. **Battlespace Networks Segment (720-000).** IT that extends DoD’s “commercial like” IT Infrastructure to meet the unique connectivity and interoperability needs of deployed and mobile warfighting capabilities. Focuses on information transport, computing, enterprise services capabilities that supports the Combined Joint Task Force. NOTE: All investments aligned with the Battlespace Networks segment should be identified as NSS. If it is not an NSS system, then it probably should be aligned with the IT Infrastructure segment (600-000).

2.0.6. **Budget Identification Number (BIN).** See definition for Unique Investment Identifier (UII) (see paragraph 4.3 and subparagraph 2.0.84).

2.0.7. **Building Partnerships Segment (790-000).** This segment covers the IT supporting the capability for setting conditions for interaction with partner, competitor or adversary leaders, military forces, or relevant populations by developing and presenting information and conducting activities to affect their perceptions, will, behavior, and capabilities.
2.0.8. Business Mission Area (BMA). The BMA ensures that the right capabilities, resources, and materiel are reliably delivered to our warfighters: what they need, where they need it, when they need it, anywhere in the world. In order to cost-effectively meet these requirements, the DoD current business and financial management infrastructure - processes, systems, and data standards - are being transformed to ensure better support to the warfighter and improve accountability to the taxpayer. Integration of business transformation for the DoD business enterprise is led by the CMO of the Department.

2.0.9. Business Services Segment Group. This segment includes investments for foundational mechanisms and back-office services used to support the mission of the agency, which encompasses all the segments under the BMA. Segments included in this group are: Financial Management, Acquisition, Human Resources Management, Logistics and Supply Chain Management, Real Property Management (E&I), Planning and Budgeting, Training and Readiness, Security Cooperation, Defense Security Enterprise, and Defense Health. NOTE: there could be a few defense business services related to IT investments that do not currently fit within the Other business service segments (see subparagraph 2.08).

2.0.10. Centrally Managed Enterprise Software License Segment (620-000). An organization-wide (i.e., DoD-wide, Component-wide, Subcomponent-wide) software license that provides common usage rights within a defined community of users in the organization and may be customized to the organization’s requirement. Typically, the defined community of users interface with the Software Publisher/Licensor under a single point of contact (i.e., centrally managed) including for acquisition, payments, inventory reporting, and other contractual actions. Examples include: ELA, JELA, CETA, and purchasing agreements such as DoD ESI ESA (e.g. GSA IT Schedule 70 BPA and NASA SEWP agency catalog), Federal CMLC BIC purchasing agreement (e.g. GSA IT Schedule 70 Software SINs and NASA SEWP), and DoD Component level software purchasing vehicles.

2.0.11. Communications. Communications elements include fixed plant, sustaining base infrastructure in the U.S. and selected overseas locations; long haul transmissions via Defense-owned or leased terrestrial facilities; transmissions via satellite or other radio systems; and mobile, tactical transmission systems.

2.0.12. Command and Control (C2). Includes the facilities, systems, and manpower essential to a commander for planning, directing, coordinating and controlling operations of assigned forces. C2 capabilities cover the joint/tactical operations echelon and down to front line tactical elements.

2.0.13. Command and Control Segment (730-000). This segment provides the IT that facilitates the exercise of authority and direction over DoD-mission related activities supporting the joint warfighter.

2.0.14. Control System. A system in which deliberate guidance or manipulation is used to achieve a prescribed value for a variable. Control systems include supervisory control and data acquisition (SCADA), distributed control system (DCS), programmable logic controllers (PLCs)
and other types of industrial measurement and control systems. Examples: Utility monitoring and control systems, building control systems, microgrid control systems.

2.0.15. **Converged System.** A system of systems that includes a combination of traditional IT, control systems, and/or platform information technology.

2.0.16. **Core Financial System.** Is an information system, or system of system, that may perform all financial functions including general ledger management, funds management, payment management, receivable management, and cost management. The core financial system is the system of record that maintains all transactions resulting from financial events. It may be integrated through a common database or interfaced electronically to meet defined data and processing requirements. The core financial system is specifically used for collecting, processing, maintaining, transmitting, and reporting data regarding financial events. Other uses include supporting financial planning, budgeting activities, and preparing financial statements. Any data transfers to the core financial system must be: traceable to the transaction source; posted to the core financial system in accordance with applicable guidance from the Federal Accounting Standards Advisory Board (FASAB); and in the data format of the core financial system.

2.0.17. **Core Mission Services Segment (799-000).** Placeholder for those “few” core mission service related IT investments that do not currently fit into the existing core service segments.

2.0.18. **Core Mission Services Segment Group.** This segment group contains investments that directly support the Department’s core missions. Segments included in this group are: Battlespace Awareness – Environment, Battlespace Awareness – Intelligence, Surveillance, and Reconnaissance (ISR), Battlespace Networks, Command and Control, Force Application, Protection, Building Partnerships, Force Management, Force Training, and Health.

2.0.19. **Cost.** A monetary measure of the amount of resources applied to a cost objective. Within the DoD, "costs" are identified following the GAO accounting principles and standards as implemented in this Regulation. The fact that collections for some cost elements are deposited into Miscellaneous Receipts of the Treasury does not make those costs "extraneous." It simply means the Congress has not authorized such amounts to be retained by appropriation accounts. After costs have been identified, following the Comptroller general cost accounting rules, a DoD Component may proceed to eliminate cost elements, or process waivers, in accordance with legal authorities.

2.0.20. **Cybersecurity.** As referenced in DoDI 8500.01 “Prevention of damage to, protection of, and restoration of computers, electronic communications systems, electronic communications services, wire communication, and electronic communication, including information contained therein, to ensure its availability, integrity, authentication, confidentiality, and nonrepudiation.”

2.0.21. **Cyberspace.** A global domain within the information environment consisting of the interdependent networks of information technology infrastructures and resident data, including the Internet, telecommunications networks, computer systems, and embedded processors and
controllers.

2.0.22. **Cyberspace Activities (CA).** Employment of cyberspace capabilities for the primary purpose of achieving objectives in or through cyberspace. For the purposes of budget reporting within the SNaP-IT, there are three major components of CA: Cybersecurity, Cyberspace Operations, and Research & Development. Refer to definitions in subparagraphs 1.4.11 and 2.0.23. The DoD CIO DCIO(R&A) office will provide further guidance on CA budget reporting via classified channels.

2.0.23. **Cyberspace Activities (CA) Segment (610-000).** IT supporting the DoD’s ability to maintain an appropriate level of confidentiality, integrity, authentication, non-repudiation and availability; the information and information assets; the documentation of threats and vulnerabilities; the trustworthiness of users and interconnecting systems; the impact of impairment or destruction to the DoD information system(s) and cyberspace; and cost effectiveness (see subparagraph 1.4.11). For the purposes of budget reporting within SNaP-IT, there are three major components of CA: Cybersecurity, Cyberspace Operations, and Research & Development (see subparagraph 2.0.22).

2.0.24. **Cyber Mission Forces (CMF).** The U.S. military’s first joint tactical command with a dedicated mission focused on Cyberspace Activities and primarily support the Combatant Commands and U.S. Cyber Command (USCYBERCOM). The CMF consists of three elements: (1) the Cyber Protection Force (CPF), (2) Cyber National Mission Forces (CNMF), and (3) Cyber Combat Mission Force (CCMF). Further definition is available in Joint Staff Publication (JP 3-12). For IT/CA budget purposes, the CMF budget represents a virtual Major Force Program and consists of the resource to man, train and equip the CMF.

2.0.25. **Data Administration.** Program Area of Related Technical Activities. Activities reported in this area include: Data sharing and data standardization. Component data administration programs are defined in the Data Administration Strategic Plans.

2.0.26. **Data Center Budget.** All Data Centers reported in the DoD Data Center Optimization Initiative (DCOI)\(^4\) inventory currently maintained in the DCIM System must maintain an appropriate budget estimate in DITIP at all times. Components must develop individual investments Core Data Center (CDC), Component Enterprise Data Centers (CEDC), and Installation Processing Nodes (IPN) data centers and report resources in the DoD IT/CA Budget accordingly. Working Capital Funds (WCF) Investments delivering IT Services are not required to have a separate Investment per data center. (see subparagraph 1.3.12).

2.0.27. **Defense Business System (DBS).** The term “defense business system” as defined in 10 U.S.C §2222(i)(1)(A) means an information system operated by, for, or on behalf of the DoD, including: financial systems, financial data feeder systems, contracting systems, logistics systems, planning and budgeting systems, installations management systems, and human resource management systems. The term does not include NSS, or an information system used exclusively by and within the defense commissary system or the exchange systems or other instrumentality of

---

\(^4\) OMB M-16-19, Data Center Optimization Initiative (DCOI), Aug 1, 2016 (https://datacenters.cio.gov/policy/m-16-19/)
the DoD conducted for the morale, welfare, and recreation of members of the armed forces using nonappropriated funds (see 10 U.S.C §2222(i)(1)(B)). The term “covered defense business system” as defined at 10 USC §2222(i)(2) means any defense business system that is expected to have a total amount of budget authority in excess of $50,000,000 over the period of the current future-years defense program submitted to the Congress under 10 U.S.C §221.

2.0.28. **Defense Health Segment (760-000).** IT systems and services that enable the Department’s capabilities to maintain the health of military personnel, which includes the delivery of healthcare required during wartime. The Defense Health Program provides for worldwide medical and dental services (including delivery of TRICARE benefits) to active forces and other eligible beneficiaries, veterinary services, occupational and industrial health care, specialized services for the training of medical personnel, and medical command headquarters.

2.0.29. **Defense Security Enterprise Segment (580-000).** IT supporting the activities necessary to provide the organizations, infrastructure, and measures (to include policies, processes, procedures, and products) in place to safeguard DoD personnel, information, operations, resources, technologies, and facilities against harm, loss, or hostile acts and influences, in accordance with DoDD 5200.43. This includes any IT that supports Industrial Security Control systems and the National Security Investigation System. This does not include systems/applications that support CA, which doesn’t belong within this business function or the ‘Business Mission Area’ domain.

2.0.30. **Defensive Cyberspace Operations (DCO).** Missions to preserve the ability to utilize blue cyberspace capabilities and protect data, networks, cyberspace-enabled devices, and other designated systems by defeating on-going or imminent malicious cyberspace activity. Also called DCO.

2.0.31. **Department of Defense Information Network (DODIN).** DODIN (as defined in DoDD 8000.01 as well as the Office of the Chairman of the Joint Chiefs of Staff, “DoD Dictionary of Military and Associated Terms),” is the set of information capabilities, and associated processes for collecting, processing, storing, disseminating, and managing information on-demand to warfighters, policy makers, and support personnel, whether interconnected or stand-alone, including owned and leased communications and computing systems and services, software (including applications), data, security services, other associated services, and NSS. The DODIN includes owned and leased communications and computing systems and services, software (including applications), data, security services, other associated services, and NSS. The DODIN consists of information capabilities that enable the access to, exchange, and use of information and services throughout the Department and with non-DoD mission partners. The principal function of the DODIN is to support and enable DoD missions, functions, and operations. The overarching objective of the DODIN vision is to provide the National Command Authority (NCA), warfighters, DoD personnel, Intelligence Community, business, policy-makers, and non-DoD users with information superiority, decision superiority, and full-spectrum dominance.
2.0.32. **Department of Defense Information Technology Portfolio Registry (DITPR).** DITPR is the enterprise service composed of a centralized consolidated inventory of IT systems. DITPR provides a comprehensive inventory of mission critical and mission essential DoD information systems as required in 10 U.S.C. 2223(a)(5) and DoDD 5144.02. DITPR supports IT portfolio management (PfM) in accordance with the Office of Management and Budget (OMB) Circular A-130, “Managing Information as a Strategic Resource” and DoD enterprise architecture management under 44 U. S. C. 3601. DITPR is used to support portfolio management of the Defense Business Systems (DBS), Information Enterprise Mission Area (EIEMA), Warfighter Mission Area (WMA), and DoD Portion of the Intelligence Mission Area (DIMA).

2.0.33. **Department of Defense Information Technology Investment Portal (DITIP).** DITIP provides a centralized location for IT investment portfolio data and aligns IT systems information in the DITPR with budget information in the SNaP-IT. DITIP provides for the entry and maintenance of common DITPR and SNaP-IT data elements and supports the CMO DBS certification.

2.0.34. **Development, Modernization, and Enhancement (DME).** DME refers to projects and activities leading to new IT assets/systems, as well as projects and activities that change or modify existing IT assets to substantively improve capability or performance, implement legislative or regulatory requirements, or meet an agency leadership request. DME activity may occur at any time during a program’s life cycle. As part of DME, capital costs can include hardware, software development and acquisition costs, commercial off-the-shelf acquisition costs, government labor costs, and contracted labor costs for planning, development, acquisition, system integration, and direct project management and overhead support. Technical Refresh is not included in Dev/Mod, but rather in O&S (see subparagraph 2.0.65).

2.0.35. **DoD Portion of Intelligence Mission Area (DIMA).** The DIMA includes IT investments within the Military Intelligence Program and DoD component programs of the National Intelligence Program. The OUSD(I) has delegated responsibility for managing the DIMA portfolio to the Director, Defense Intelligence Agency, but OUSD(I) retains final signature authority. The DIMA management will require coordination of issues among portfolios that extend beyond the Department of Defense to the overall Intelligence Community.

2.0.36. **Enterprise Information Environment Mission Area (EIEMA).** The EIEMA represents the common, integrated information computing and communications environment. The Enterprise Information Environment (EIE) is composed of assets that operate as, provide transport for, and/or assure local area networks, campus area networks, tactical operational and strategic networks, metropolitan area networks, and wide area networks. The EIE includes computing infrastructure for the automatic acquisition, storage, manipulation, management, control, and display of data or information, with a primary emphasis on the DoD enterprise hardware, software operating systems, and hardware/software support. The EIE also includes a common set of enterprise services, called Core Enterprise Services, which provide awareness of, access to, and delivery of information.
2.0.37. **Enterprise Services Segment Group.** This segment group includes investments for IT services and infrastructure that support core mission and business services. Segments included in this group are; CA, IT Infrastructure, and IT Management.

2.0.38. **Financial Event.** Is any activity having financial consequences to the Federal government related to the receipt of appropriations or other financial resources; acquisition of goods or services; payments or collections; recognition of guarantees, benefits to be provided, or other potential liabilities; distribution of grants; or other reportable financial activities.

2.0.39. **Financial Management (FM) Segment (500-000).** IT supporting the facilitation and implementation of financial management solutions providing timely and accurate decision support data, stronger internal controls, establishing standards for acquiring and implementing FM systems through shared business processes, IT services, and data elements. This includes IT systems/applications that support the following core financial capabilities: fund the force, banking and disbursing, pay support, accounting support, cost management, financial operations, and management of financial internal controls. This does not include Planning and Budgeting systems/applications, which should be reported within the ‘Planning and Budgeting’ Segment (550-000).

2.0.40. **Financial Management Systems.** FM systems perform the functions necessary to process or support financial management activities. These systems collect, process, maintain, transmit, and/or report data about financial events or supporting financial planning or budgeting activities. These systems may also accumulate or report cost information, support preparation of financial transactions or financial statements or track financial events and provide information significant to the DoD Components financial management.

2.0.41. **Fit-for-Purpose (F2P) Cloud.** A cloud environment that meets highly specialized mission requirements that cannot easily be met through a General Purpose Cloud solution and is suitable for scaling to adopt new DoD customers at the enterprise level. Determination criteria include utility for mission, ease of management (including provisioning and reporting), and contract terms.

2.0.42. **Force Application Segment (740-000).** IT supporting the capability to integrate the use of maneuver and engagement in all environments, to creating the necessary effects for achieving DoD mission objectives.

2.0.43. **Force Management Segment (770-000).** IT supporting the ability to integrate new and existing human and technical assets from across the Joint Force and its mission partners to make the right capabilities available at the right time/place to support National Security.

2.0.44. **Force Training Segment (780-000).** IT supporting the ability to enhance the capacity to perform specific functions and tasks in order to improve the individual or collective performance of personnel, units, forces, and staffs.
2.0.45. General Purpose Cloud. Infrastructure and Platform as a Service (IaaS/PaaS) offerings that meet the majority of the DoD’s cloud computing needs across all Components of the enterprise organization.

2.0.46. Human Resources Management Segment (520-000). IT supporting DoD human resource management, personnel and readiness ensuring human resources are recruited, capable, motivated, and ready to support the Department. Human Resources Management is the strategic and operational management of activities related to the performance of the human resources in an organization with functions that include: employee and labor/management relations, compensation and benefits, equal opportunity employment compliance, staffing, and human resource development. This does not include training systems/applications, which should be reported within the ‘Training and Readiness’ business function.

2.0.47. Information System (IS). (Reference section 3502 of title 44 U.S.C.) An information system is a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. This includes automated information systems (AIS), enclaves, outsourced IT-based processes and platform IT interconnections. To operate information systems, Components must support related software applications, and necessary architectures and information security activities.

2.0.48. Information Technology (IT). (Reference section 11101 of title 40 U.S.C. and PL 113-291, Subtitle D –Federal Information Technology Acquisition Reform Act) The term “information technology” with respect to an executive agency is defined as:

2.0.48.1. Services or equipment, or interconnected system(s) or subsystem(s) of equipment, that are used in the automatic acquisition, storage, analysis, evaluation, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information by the agency; and

2.0.48.2. Services or equipment that are used by an agency if used by the agency directly or if used by a contractor under a contract with the agency that requires either use of the services or equipment or requires use of the services or equipment to a significant extent in the performance of a service or the furnishing of a product.

2.0.48.3. The term “information technology” includes computers, ancillary equipment (including imaging peripherals, input, output, and storage devices necessary for security and surveillance), peripheral equipment designed to be controlled by the central processing unit of a computer, software, firmware and similar procedures, services (including provisioned services such as cloud computing and support services that support any point of the lifecycle of the equipment or service), and related resources.

2.0.48.4. The term “information technology” does not include any equipment that is acquired by a contractor incidental to a contract that does not require use of the equipment.

2.0.48.4.1. With respect to an executive agency means any equipment or interconnected system or subsystem of equipment, used in the automatic acquisition, storage,
analysis, evaluation, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information by the executive agency, if the equipment is used by the executive agency directly or is used by a contractor under a contract with the executive agency that requires the use--(i) of that equipment; or (ii) of that equipment to a significant extent in the performance of a service or the furnishing of a product;

2.0.48.4.2. Includes computers, ancillary equipment (including imaging peripherals, input, output, and storage devices necessary for security and surveillance), peripheral equipment designed to be controlled by the central processing unit of a computer, software, firmware and similar procedures, services (including support services), and related resources; but

2.0.48.4.3. Does not include any equipment acquired by a federal contractor incidental to a federal contract.”

2.0.49. Information Technology/Cyberspace Activities (IT/CA) Investment. The IT/CA budget is collected and reported by IT/CA Investments. Each IT/CA Investment is assigned a Unique Investment Identifier (UII). An IT/CA investment may include a project or projects for the development, modernization, enhancement, or maintenance of a single IT asset or group of IT assets with related functionality, and the subsequent operation of those assets in a production environment. All IT/CA investments should have a defined life cycle with start and end dates, with the end date representing the end of the currently estimated useful life of the investment, consistent with the investment’s most current alternatives analysis if applicable. When the asset(s) is essentially replaced by a new system or technology, the replacement should be reported as a new, distinct investment, with its own defined life cycle information.

2.0.50. Information Technology (IT) Resources. The term “information technology resources” is defined as:

2.0.50.1. Agency budgetary resources, personnel, equipment, facilities, or services that are primarily used in the management, operation, acquisition, disposition, and transformation, or other activity related to the lifecycle of IT;

2.0.50.2. Acquisitions or interagency agreements that include IT and the services or equipment provided by such acquisitions or interagency agreements; but

2.0.50.3. Does not include grants to third parties which establish or support IT not operated directly by the Federal Government.

2.0.51. Information Technology (IT) Portfolio. The DoD IT portfolio consists of investments representing a common collection of capabilities and services. The portfolios are an integral part of the Department’s decision making process and are managed with the goal of ensuring efficient and effective delivery of capabilities while maximizing the return on Enterprise investments.

2.0.52. Internal Cloud. Specific F2P solutions for systems and applications that need to operate in a private, on-premises cloud environment due to security or operational reasons.
2.0.53. **IT Infrastructure Segment (600-000)**. DoD IT Infrastructure represents the common, integrated information computing and communications environment of the DODIN and its assets that operate as, provide transport for, and/or assure local area networks, campus area networks, tactical operational and strategic networks, metropolitan area networks, and wide area networks. DoD IT infrastructure includes four major categories: Core Network Infrastructure; DoD Enterprise Services; Security (i.e., all defensive CA as which gets reported under ‘Cyberspace Activities’ Segment 610-000); Non-Core Network Infrastructure.

2.0.54. **IT Management Segment (800-000)**. Facilitates planning, selection, implementation and assessment of IT investments and programs supporting the broader enterprise. This includes: IT strategic planning, promulgation of policy and direction governing the provisioning of services; establishing and maintaining enterprise architectures and transition strategies; cost analysis, performance measurement and assessment in order to best mitigate risks.

2.0.55. **Joint Information Environment (JIE)**. JIE is a fundamental shift in the way the DoD will consolidate and manage IT infrastructure, services, and assets in order to realign, restructure, and modernize how the Department’s IT networks and systems are constructed, operated, and defended. JIE will consolidate and standardize the design and architecture of the Department’s networks. The JIE represents the DoD migration from military service-centric IT infrastructures and capabilities, with their mixture of disparate networks and applications, to enterprise capabilities based on common infrastructure and shared services to support Joint needs. These needs include networks, security services, cyber defenses, data centers, and operation management centers. Consolidation and standardization will result in a single, reliable, resilient, and agile information enterprise for use by the joint forces and mission partners. The vision of JIE is to ensure that DoD military commanders, civilian leadership, warfighters, coalition partners, and other non-DoD mission partners have access to information and data provided in a secure, reliable, and agile DoD-wide information environment. The ultimate beneficiary of JIE is the commander in the field, allowing for innovative integration of information technologies, operations, and cybersecurity at a tempo more appropriate to today’s fast-paced operational conditions. The objective is for authorized users to access required information and resources from anywhere, at any time, using any approved device across the JIE, enabling warfighter information sharing and mission operations. Since JIE is not a Program of Record, it should be noted that the Department will utilize existing DoD Component programs, initiatives, technical refresh plans, acquisition processes, and funding to deploy and migrate the existing infrastructure to the JIE standards. OSD guidance and training will provide more details concerning the alignment of UIIs to achieving JIE goals and standards.

2.0.56. **Life-Cycle Cost (LCC)**. LCC represents the total cost to the Government for an IS, weapon system, program and/or investment over its full life. It includes all developmental costs, procurement costs, Military Construction (MILCON) costs, operations and support costs, and disposal costs. LCC encompasses direct and indirect initial costs plus any periodic or continuing sustainment costs, and all contract and in-house costs, in all cost categories and all related appropriations/funds. LCC may be broken down to describe the cost of delivering a certain capability or useful segment of an IT investment. LCC normally includes 10 years of sustainment funding following Full Operational Capability (FOC) or Full Deployment for Automated
Information Systems. For investments with no known end date and that are beyond FOC, LCC estimate should include 10 years of sustainment.

2.0.57. Logistics and Supply Chain Management Segment (530-000). IT supporting the ability to project and sustain a logistically ready joint force to meet mission objectives and activities, including technical and management activities conducted to ensure supportability, and resources to sustain the system in the field. This includes IT systems/applications that support ordering, shipping, and tracking of materiel.

2.0.58. Major. A system or investment requiring special management attention because of its importance to an agency mission; its high development, operating, or maintenance costs; or its significant role in the administration of agency programs, finances, property or other resources. Systems or investments that have been categorized as “Major” can include resources that are associated with the planning, acquisition and /or sustainment life cycle phases.

2.0.59. Military Intelligence Program (MIP). The MIP consists of programs, projects, or activities that support the Secretary of Defense’s intelligence, counterintelligence, and related intelligence responsibilities. This includes those intelligence and counterintelligence programs, projects, or activities that provide capabilities to meet warfighters’ operational and tactical requirements more effectively. The term excludes capabilities associated with a weapons system whose primary mission is not intelligence. MIP resourcing used for IT or Cyberspace Activities (CA) must be included within Components” IT/CA budget submission.

2.0.60. National Leadership Command Capabilities (NLCC). A capability encompassing the entirety of the DoD command, control, communications, computer, intelligence, surveillance, and reconnaissance systems and services that provides national leadership, regardless of location and environment, with diverse and assured access to integrated, accurate, and timely data, information, intelligence, communications, services, situational awareness, and warnings and indications from which planning and decision-making activities can be initiated, executed, and monitored. OSD guidance and training will provide more details concerning the alignment of UIIs to the NLCC.

2.0.61. National Security Systems (NSS). (Reference section 3552 of title 44 U.S.C.) NSS means any information system (including any telecommunications system) used or operated by an agency contractor of any agency or other organization on behalf of an agency: (1) the function, operation, or use of which- involves intelligence activities; involves cryptologic activities related to national security; involves command and control of military forces; involves equipment that is an integral part of a weapon or weapons system; or subject to subparagraph (B), is critical to the direct fulfillment of military or intelligence missions; or (2) is protected at all times by procedures established for information that have been specifically authorized under criteria established by an Executive order or an Act of Congress to be kept classified in the interest of national defense or foreign policy. NSS also includes equipment that is an integral part of a weapon or weapons system, or is critical to the direct fulfillment of military or intelligence missions. NSS DOES NOT include a system that is to be used for routine administrative and business applications (including payroll, finance, logistics, and personnel management applications).
2.0.62. **Obligation.** The amount representing orders placed, contracts awarded, services received, and similar transactions during an accounting period that will require payment during the same, or a future, period. Obligations include payments for which obligations previously have not been recorded and adjustments for differences between obligations previously recorded and actual payments to liquidate those obligations. The amount of obligations incurred is segregated into undelivered orders and accrued expenditures - paid or unpaid. For purposes of matching a disbursement to its proper obligation, the term obligation refers to each separate obligation amount identified by a separate line of accounting.

2.0.63. **Offensive Cyberspace Operations.** Joint Publication 3-12 defines Offensive Cyberspace Operations as “Mission intended to project power in and through Cyberspace.”.

2.0.64. **Office Automation** (also referred to as “Desktop Processing”). Facilities that support file servers or desktop computers used for administrative processing (e.g. word processing or spreadsheets) rather than application processing, should be reported as Office Automation (listed as a separate function).

2.0.65. **Operation and Sustainment (O&S) Costs.** Operation Costs refers to the expenses required to operate and maintain an IT asset that is operating in a production environment. At the Federal level, is also Sustainment, O&S is also referred to as Steady State (SS). O&S costs represents the cost of operations at the current capability and performance level of the application, infrastructure program and/or investment when the budget is submitted. That is, the cost with no changes to the baseline other than fact-of-life reductions, termination or replacement. O&S costs include: (1) personnel whose duties relate to the general management and operations of information technology, including certain overhead costs associated with Program Management (PM) offices; (2) maintenance of an existing application, infrastructure program or investment; (3) corrective software maintenance, including all efforts to diagnose and correct actual errors (e.g., processing or performance errors) in a system; (4) maintenance of existing voice and data communications capabilities; (5) replacement of broken IT equipment needed to continue operations at the current service level; (6) business operations and commercial service; (7) Technical Refresh; and (8) all other related costs not identified as Development/Modernization (Dev/Mod).

2.0.66. **Operational Preparation of the Environment (OPE).** Non-intelligence enabling activities conducted to plan and prepare for potential follow-on military operations. OPE in cyberspace includes identifying data, software, systems, networks, and facilities to determine vulnerabilities and activities to assure future access or control during anticipated hostilities.

2.0.67. **“Other” Category (also referred to as “All Other”).** For those DME or O&S costs/obligations as well as investments not designated in the major categories. “Other” category investments are aligned with the applicable IT Reporting Structure functional/mission area (see Section 1.5).

2.0.68. **Other Business Services Segment** (599-000). This segment is applicable only in very limited cases, for those “few” defense business service related IT investments that do not currently fit within the other business segments. Business systems/applications that would fail
within this segment involve or provide inherently managerial functions or provide business functions or capabilities such as case/correspondence/workflow/records management/collaboration, or other staff functions.

2.0.69. Planning and Budgeting Segment (550-000). IT supporting the facilitation of Defense planning and budgeting functions, in accordance with the DoD Planning, Programming, and Budgeting Execution (PPBE) process (DoDD 7045.14), including: (1) developing a set of actions that have been thought of as a way to do or achieve Defense strategic goals, including a comprehensive financial plan encompassing the totality of receipts and outlays (expenditures); and (2) developing a plan of operations for a fiscal period in terms of estimated costs, obligations, and expenditures; source of funds for financing, including anticipated reimbursements and other resources; and history and workload data for the projected Defense program and activities.

2.0.70. Platform Information Technology (PIT). Computer resources, both hardware and software, that are physically part of, dedicated to, or essential in real time to the mission performance of special-purpose systems. PIT does not include general purpose systems. Examples: HVAC systems or electric vehicle fueling systems.

2.0.71. Program Cost. (also referred to as investment cost and total acquisition cost). The total of all expenditures, in all appropriations and funds, directly related to the IS, program, or investment’s definition, design, development, and deployment; incurred from the beginning of the “Concept Exploration” phase through deployment at each separate site. For incremental and evolutionary program strategies, program cost includes all funded increments. Program cost is further discussed in DoD 5000 series documents.

2.0.72. Protection Segment (750-000). IT supporting the capability to prevent and/or mitigate adverse effects of attacks on personnel (combatant or non-combatant) and physical assets of the U.S, its allies and friends.

2.0.73. Real Property Management Segment (540-000). IT supporting the ability to provide and maintain installation real property assets necessary to support U.S. military forces in a cost effective, safe, sustainable, and environmentally sound manner. This includes the missions to: Improve DoD’s use of Installation and Operational Energy in order to enhance military capability, reduce risk, and mitigate cost; Protect DoD mission capabilities from incompatible development from utility-scale energy projects, and other encroachment threats; Protect human health and the environment in an uninterrupted and cost effective manner to include systems acquisition, while ensuring the success of the Defense world-wide mission; Function as an independently appropriated DoD Headquarter Activity with unique capability to assist states and local governments impacted by base closures and realignments, expansions of military installations, or DoD decisions to cancel or reduce defense acquisition programs, as well as maintain a Compatible Land Use program. This does not include installation security access, which should be reported within the ‘Defense Security Enterprise’ business function.

2.0.74. Security Cooperation Segment (570-000). IT supporting the facilitation of Security Cooperation activities, in accordance with DoDD 5132.03, undertaken by the DoD to encourage and enable international partners to work with the U.S. to achieve strategic objectives.
Security Cooperation activities include all DoD interactions with foreign defense and security establishments, including all DoD-administered security assistance programs, that: build defense and security relationships that promote specific U.S. security interests, including all international armaments cooperation activities and security assistance activities; develop allied and friendly military capabilities for self-defense and multinational operations; and provide U.S. forces with peacetime and contingency access to host nations. This also includes any IT systems/applications that support Foreign Military Sales.

2.0.75. Security Operation Center (SOC). OMB Circular A-11 defines as, “a SOC defends an organization against unauthorized activity within computer networks, including, at a minimum, detecting, monitoring, and analyzing suspicious activity as well as leading the response to malicious activity, contributing to restoration activities, and providing a structure for users to report suspected cybersecurity events. A SOC would generally be composed of security analysts organized to detect, analyze, respond to, report on, and prevent cybersecurity incidents.”

2.0.76. Segments. A portfolio management concept required by OMB Circular A-11. Segments serve as the basis for organizing IT investments for both budget management and performance management purposes. Three groups of segments have emerged to characterize the way in which their segments enable functional capabilities of the enterprise – and to differentiate the way in which investments are governed; Business Services Segment Group, Core Mission Services Segment Group, and Enterprise Services Segment Group.

2.0.77. Select & Native Programming-Information Technology (SNaP-IT). The electronic system used by the DoD CIO to collect IT/CA Budget data and generates reports mandated by the OMB and the Congress. SNaP-IT is a database application used to plan, coordinate, edit, publish, and disseminate IT budget justification books required by the Congress. SNaP-IT generates all forms, summaries, and pages used to complete the publishing of the IT Congressional Justification materials and the OMB submissions, such as the IT Investment Portfolio Summary, the IT Business Case, and monthly updates to the OMB ITDB. SNaP-IT provides users the ability to gain access to critical information needed to monitor and analyze the IT/CA Budget submitted by the DoD Components. SNaP-IT is the authoritative application used by the DoD to report and justify the IT/CA budget resources.

2.0.78. Special Interest Communications Programs. Electronic Commerce/ Electronic Data Interchange and Distance Learning Systems are special interest programs that should be reported in this area. The resource category "Other" may not be used with Special Interest Communications.

2.0.79. Steady State (SS). See definition for Operation & Sustainment (see subparagraph 2.0.65).

2.0.80. Technical Activities. This refers to activities that deal with testing, engineering, architectures and inter-operability.

2.0.81. Technology Refresh. Technology refreshment, as defined in FMR Volume 2A, Chapter 1, Section 010201.D.3.c, is the intentional, incremental insertion of newer technology to
improve reliability, improve maintainability, reduce cost, and/or add minor performance enhancement, typically in conjunction with depot or field level maintenance. The insertion of such technology into end items as part of maintenance is funded by the operation and maintenance appropriations. However, technology refreshment that significantly changes the performance envelope of the end item is considered a modification and, therefore, an investment.

2.0.82. Threat Detection and Analysis. This refers to activities that identify, characterize, examine, and track previously undefined types and sources of cyber threats against data, system, or network vulnerabilities to determine the risks to particular data, systems, networks, or operations.

2.0.83. Training and Readiness Segment (560-000). IT supporting the training and readiness of DoD employees performing routine administrative and business functions such as Acquisition, FM (PPBE, accounting and payroll), Human Resources (hire-to-retire and personnel management), Defense Health, logistics, and installation management. Training is the level of learning required to adequately perform the responsibilities designated to the function and accomplish the mission assigned to the system. Training and readiness systems and processes are those involved with teaching needed skills or keeping track of this training. This segment does not include the force mission training and combat readiness. IT supporting force mission training and readiness should be reported within Warfighting Mission Area (WMA)-Force Support.

2.0.84. Unique Investment Identifier (UII). Previously called a “Budget Identification Number (BIN)”, the UII is a database index field automatically generated with the DITIP/SNaP-IT interface when registering or creating a new investment.

2.0.85. Warfighting Mission Area (WMA). The WMA provides life cycle oversight to applicable DoD Component and Combatant Commander IT investments (programs, systems, and investments). WMA IT investments support and enhance the Chairman of the Joint Chiefs of Staff’s joint warfighting priorities while supporting actions to create a net-centric distributed force, capable of full spectrum dominance through decision and information superiority. WMA IT investments ensure Combatant Commands can meet the Chairman of the Joint Chiefs of Staff’s strategic challenges to win the war on terrorism, accelerate transformation, and strengthen joint warfighting through organizational agility, action and decision speed, collaboration, outreach, and professional development.

2.0.86. Working Capital Fund (WCF) Investment. The Defense WCF (DWCF) authority at 10 U.S.C. § 2208 allows the DoD to finance inventories of supplies and provide working capital for industrial and commercial-type activities. DWCF activities are dependent on revenue, as are commercial businesses. DWCFs provide a mechanism for the DoD Components to finance those supply and commercial and industrial activities that have been chartered under Volume 11B, Chapter 2, or this Regulation. It enables such DoD Components to absorb risk in planning investment programs for maintenance and supply. The intent was to allow chartered commercial, industrial and supply management activities to make capital investments when needed and recoup the costs through future year pricing structure.
3.0 PROGRAM AND BUDGET ESTIMATES SUBMISSION (1803)

3.1 Purpose (180301)

This section provides guidance for preparation and submission of the IT/CA Budget Estimate Submission (BES) to the DoD CIO, and for preliminary updates to OMB resource exhibits in September in preparation for the OMB “draft guidance” and IT/CA Budget hearings. Resources reported in the IT/CA submission must be consistent with other primary appropriation justification and FYDP submissions. DoD CIO DCIO(R&A) will annually issue supplemental guidance for other data requirements directed by the DoD CIO, Congress, or OMB. Timelines for updates will be provided as information becomes available and will be designated in the program and budget call memorandum. Technical requirements and templates are provided in DITIP/SNaP-IT.

3.2 Submission Requirements (180302)

The following information is required. Unless modified in a subsequent budget call, Components shall use the formats in DITIP and on the SNaP-IT web page (NIPRNet https://snap.cape.osd.mil/snapit/ or SIPRNet https://snap.cape.osd.smil.mil/snapit/) to provide an automated submission. The OSD budget estimates material will be available electronically through the SNaP-IT site. Additional reporting requirements will be identified in the DoD CIO, DCIO for Resources and Analysis call memorandum, as necessary. Additional management and supporting data may be designated by the DoD CIO to support detailed justification requirements. All supporting program documentation not submitted with the budget submission must be made available to the DoD CIO within two business days of its request.

3.2.1 Investment Registration. Add, modify, retire, and un-retire investment and associated data to accurately represent the current environment for the IT investment and the Component using the DITIP investment registration (NIPRNet https://snap.cape.osd.mil/ITPortal/ or SIPRNet https://snap.cape.osd.smil.mil/ITPortal/). This includes Titles, Descriptions, Type of IT, IT/NSS Classification, DoD Segment and FEA information, investment ownership and participation, and other investment unique information.

3.2.2 IT Investment Resources. Collection of resources by Component; Security Classification; Appropriation/Fund (Treasury Code); Investment Stage; BA/Line Item; OSD PE Code; Funding Source (Base/OCO); PY, CY, BY, BY+1, +2, +3, and +4 for submitting the IT Investment Portfolio Summary as required by the OMB A-11, Section 51.19 and 25.5. In addition, resources are reported in the Technology Business Management (TBM) framework by TBM Tower and Cost Pool.

3.2.3 IT Business Case. Capital Asset Plan and Business Case (IT) for major investments. The IT Business Case, is in accordance with the requirements outlined in OMB A-11 Section 51.19 and 25.5. DoD Components are required to complete an IT Business Case for those investments determined as Major by the DoD CIO. In addition to the IT investment resources information reported in the IT Investment Portfolio Summary (Section 3.2.2), IT Business Case investments will report associated Full Time Equivalent (FTE) personnel, and provide the Milestone Decision
Authority (MDA) approved program schedule and Life Cycle Cost Estimate (LCCE) of the investment.

3.3 Arrangement of Backup Exhibits (180303)

The SNaP-IT will provide an option to assemble information in the sequence shown in Section 3.2, as applicable. Components will be able to generate IT Investment Portfolio Summary level data outputs for internal review only.

4.0 CONGRESSIONAL JUSTIFICATION/PRESENTATION (1804)

4.1 Purpose (180401)

This section provides guidance on organizing the IT/CA resource justification materials submitted in support of the PB. The Department will submit draft and final consolidated outputs to the OMB in the January timeframe and for the Congress by the date set by the Comptroller, usually in the first week of March.

4.2 Justification Book Preparation (180402)

Justification information will be taken from the SNaP-IT system, reflecting the OMB requirements for IT Investment Portfolio Summary and IT Business Case. Special outputs will be designed for select investments and summaries based on Congressional requirements. DoD Component requirements and review of these outputs will be discussed in the final budget call memorandum. Congressional justification materials will be extracted or derived from materials developed for the OMB updates.

4.3 Submission Requirements (180403)

Submission requirements are as specified in Section 3.2, except the following:

4.3.1 IT Overview. IT Investment Portfolio Assessment Overview is an Executive summary of a DoD Component’s and the Enterprise Portfolio Mission Area’s IT Investments providing high-level justification of the portfolio selections and priorities. Information provided must be consistent with the Component’s overall budget justification materials. CA section is required and must be consistent with information reported in CA justification materials and financial reporting. Format will be provided via the SNaP-IT web page or the DoD CIO budget guidance.

4.3.2 Congressional Justification Book. Beginning with the FY 2021 President’s Budget submission, Congress directed the Department to submit the IT/CA Budget no later than 5 days after OMB releases the overall President’s Budget submission to Congress. The unclassified Congressional justification submission will consist of the following elements: a) Overview of the IT Budget, b) IT-1 Spreadsheet, c) Cloud Report, and d) Standard Investment Reports. The classified Congressional justification submission will consist of the following elements: a) Overview of the IT/CA Budget; b) IT-1 Spreadsheet; c) Cloud Report; d) CJB for Cyberspace
Activities (including O&M OP-5/OP-32 docs, RDT&E R-2A docs, and Procurement P-1 docs); and e) Standard Investment Reports. The due date for these materials is based on OUSD(C) timelines governing the development and submission of the overall Department budget. The submission of the Cyberspace Activities Congressional Justification Book’s supporting documents must be uploaded to DITIP. Due date details will be provided in the annual IT/CA Budget Schedule.

4.4 Input for Summary Information Technology Justification Books (180404)

4.4.1. All exhibit data shall be submitted in automated form and be consolidated in SNaP-IT (NIPRNet [https://snap.cape.osd.mil/snapit](https://snap.cape.osd.mil/snapit) or SIPRNet [https://snap.cape.osd.smil.mil/snapit](https://snap.cape.osd.smil.mil/snapit)). The DoD CIO is responsible for providing the DoD IT summary tables per Congressional direction. SNaP-IT will generate the OMB and Congressional PB reporting packages after the DoD Component IT Overview and IT Business Case documents have been submitted to the DoD CIO, DCIO(R&A) and/or posted to the SNaP-IT web page. SNaP-IT will generate correct identification information, a cover page, a table of contents, an overview and appendices; the IT Index, report, annex and appendix and the IT Business Case; or Congressional extract reports. These will generate a single, integrated submission in Adobe Acrobat Portable Document Format (PDF) that can be used for internal coordination. To accomplish this requirement, the DoD Components will populate the SNaP-IT to generate their submission. The DoD CIO will maintain (and make available to the DoD Components and OSD staff) the digital IT/CA Budget database. Other specific guidance for IT/CA Budget materials will be provided as required.

4.4.2. Once security and the OMB have released the justification books, summary and detail data will be transmitted to the Congress (House Defense Appropriations Subcommittee, Senate Defense Appropriations Subcommittee, House Armed Services Committee, and Senate Armed Services Committee). Any unclassified data made available to the Congress will be available on the public web page(s) in accordance with the format, table and media guidance (Justification Material Supporting the PB Request) in Volume 2A, Chapter 1.

5.0 INFORMATION TECHNOLOGY PROGRAM SUBMISSION FORMATS (1805)

5.1 Format Location (180501)

The required input formats are located on the SNaP-IT web page NIPRNet [https://snap.pae.osd.mil/snapit](https://snap.pae.osd.mil/snapit) or SIPRNet [https://snap.cape.osd.smil.mil/snapit](https://snap.cape.osd.smil.mil/snapit/).
VOLUME 2B, CHAPTER 19: “OTHER SPECIAL ANALYSES”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated July 2007 is archived.

CHAPTER 19

OTHER SPECIAL ANALYSES

1.0 GENERAL (1901)

1.1 Purpose (190101)

1.1.1. This chapter provides instructions applicable to budget formulation and congressional back-up justification for various special interest areas not covered in preceding chapters.

1.1.2. The exhibit requirements cover resources crossing DoD appropriations and are generally functional in nature.

1.1.3. Areas covered in this chapter are as follows:

Section
2.0 Combating Terrorism
3.0 Major Range and Test Facility Base
4.0 Test and Evaluation Funding
5.0 Financial Management Activities
6.0 Government Performance and Results Act (GPRA)
8.0 Federal Credit Programs
9.0 Other Special Analyses
10.0 Classifications and Definitions Special Programs Major Force Program 3

1.2 Submission Requirements (190102)

Unless indicated in individual sections of this chapter and submission distribution in Chapter 1, exhibits are required for both the program and Budget Review Submission and for the Congressional Justification/Presentation submission. General guidance with regard to submission requirements is presented in Chapter 1.

1.3 Preparation of Material (190103)

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 19 provides additional specific guidance with regard to the material required for these special exhibits.

1.4 References (190104)

Chapter 1 provides general funding policies, Chapter 3 provides specific policies related to Operation and Maintenance costs, Chapter 4 provides specific policies related to Procurement appropriations, Chapter 5 provides specific policies related to RDT&E, Chapter 6 provides specific policies related to Military Construction appropriations, and Chapter 9 provides specific policies
related to the Defense Working Capital Funds. Certain requirements are also addressed in OMB Circular No. A-11.

2.0 COMBATING TERRORISM (1902)

2.1 Purpose (190201)

2.1.1. This chapter provides instructions applicable to budget formulation for the DoD Combating Terrorism (CbT) funding requirements included in the DoD Components’ budget requests. These instructions apply to all Components and all DoD appropriations and revolving funds.

2.1.2. The data collected through this reporting process will be used to comply with congressional and OMB reporting requirements. Data will also be used by the Department to evaluate Components’ combating terrorism efforts during program and execution reviews.

2.2 Submission Requirements (190202)

2.2.1. Submission of exhibits is required for the Program and Budget Review Submission and an update (using an abbreviated exhibit format) is required for the President’s budget submission. Each Component will complete the CbT-1 Exhibit, Combating Terrorism Detail, and the CbT-2 Exhibit, Combating Terrorism Narrative, for the Program and Budget Review Submission and for the President’s budget submission. The CbT-3 Exhibit, Vulnerability Assessments, will be completed only during the Program and Budget Review Submission and is NOT required for the President’s budget submission. The President’s budget submission exhibits will be presented in a consolidated congressional justification book which will be prepared by OASD(SO/LIC). Specific instructions for completing these exhibits are included in Section 2.2.

2.2.2. The USD(I) Security Directorate will validate tactical counterintelligence resources identified by the Components and advise the OUSD (Comptroller) P/B Operations Directorate that reported resources are accurate.

2.2.3. Copy requirements are identified in Chapter 1. Components shall submit their exhibits through the Select and Native Programming (SNaP) Data Input System located on the NIPRNet at https://snap.pae.osd.mil. The most current version of this exhibit will be found at this site.

2.3 Special Instructions (190203)

2.3.1. The OASD (SO/LIC) will actively participate in the review of all budget submissions for combating terrorism activities and will offer recommendations to ensure approved CbT policies are reflected in the budget. The OASD(SO/LIC) will consolidate and provide to the Congress a single budget justification book detailing the Department’s CbT efforts and associated funding requests.

2.3.2. The OASD (SO/LIC), Joint Staff Deputy Directorate for Antiterrorism/Homeland Defense, (J-34), Antiterrorism/Force Protection Division, and USD(I) will participate with representatives of the OUSD (Comptroller), OSD PA&E, and OMB in the review of all budget
submissions for combating terrorism to ensure that DoD combating terrorism activities are funded adequately.

2.3.3. The CbT-1 and CbT-2 exhibits in Section 12.2 are used to identify the Department’s combating terrorism resources, dollars and personnel. They consist of tabular and narrative data as outlined below. These exhibits will report only those resources (including civilian and military pay) associated with DoD’s Combating Terrorism Program. Combating terrorism within DoD includes 1) antiterrorism (defensive measures taken to reduce vulnerability to terrorist acts), 2) counterterrorism (offensive measures taken to prevent, deter, and respond to terrorism), 3) terrorism consequence management (preparation for and response to the consequences of a terrorist incident/event), and 4) intelligence related support (collection and dissemination of terrorism-related information) taken to oppose terrorism throughout the entire threat spectrum, to include terrorist use of WMD and/or high explosives. The four functional categories are described below:

2.3.3.1. Antiterrorism

2.3.3.1.1. Physical Security Equipment - Any item, device, or system that is used primarily for the protection of assets, personnel, information, or facilities to include alarms, sensors, protective lighting and their control systems, military working dogs, and the assessment of the reliability, accuracy, timeliness and effectiveness of those systems, such as (but not limited to): exterior surveillance and/or intrusion detection systems; lighting systems; access controls and alarms systems; residential security equipment; improvised explosive device defeat systems; commercially procured armored vehicles (both heavy and light); equipment for executive protection, to include added doors, increased ballistic protection at offices/residences, personal body armor, individual protective equipment, and armored vehicles; and detection devices.

2.3.3.1.2. Physical Security Site Improvements - Any facility improvements (using O&M or MILCON funding) or new construction whose purpose is to protect DoD assets, personnel, or information to include walls, fencing, perimeter/area lighting, doors, windows, ceilings, barricades, or other fabricated or natural impediments to restrict, limit, delay or deny entry into a Defense installation or facility, such as (but not limited to): acquisition of land for stand-off distance, installation perimeter barriers, vehicle barriers, mylar/fragment retention film, and interior barriers; safe havens; evacuation facilities; and surveillance platforms.

2.3.3.1.3. Physical Security Management and Planning - Personnel who manage physical security programs, resources, and assets such as, but not limited to, headquarters staff.

2.3.3.1.4. Security Forces/Technicians - All personnel and operating costs associated with protective forces whose primary or supporting mission is to safeguard assets, personnel or information. Included, but not limited to, are costs for: salaries, overtime, benefits, materials, supplies, travel, support equipment, facilities, vehicles, training, communications equipment, and management, for the personnel engaged in the following activities such as (but not limited to): dedicated response forces and security forces; locksmiths; perimeter, installation or facility access control; inspection and maintenance of barriers and security system components; antiterrorism training for security forces; and antiterrorism awareness programs and training.
2.3.3.1.5. **Law Enforcement** - All personnel and operating costs associated with law enforcement to include, but are not limited to, salaries, overtime, benefits, material and supplies, equipment and facilities, vehicles, helicopters, training, communications equipment, and management, such as (but not limited to): protective service details, including advance work; response forces; and military police.

2.3.3.1.6. **Security and Investigative Matters Category** - Includes Defense criminal investigative resources, conduct of vulnerability assessments (periodic high level reviews and physical security assessments), security and intelligence activities, and any cross-discipline security functions which do not easily fit into other security categories such as (but not limited to): terrorism investigations; executive antiterrorism training; surveillance and counter surveillance teams; protective service details including advance work; route surveys; and antiterrorism awareness programs and training.

2.3.3.1.7. **RDT&E** - Includes any RDT&E resources expended in the area of antiterrorism. Activities include (but are not limited to) are Defense Threat Reduction Agency, Counterterrorism Technical Support Program (CTTS), the Physical Security Equipment Action Group (PSEAG), the Technical Support Working Group (TSWG), Defense Advanced Research Projects Agency (DARPA) and Chemical Biological Defense Program (CBDP).

2.3.3.2. **Counterterrorism**

Offensive measures taken to prevent, deter, and respond to terrorism. The sensitive and compartmental programs of counterterrorism (CT) will be reported separately in the appropriate classified program submissions.

2.3.3.2.1. **Special Operations Command Activities**

2.3.3.2.2. **Research Development Test and Evaluation** (example, CTTS or TSWG)

2.3.3.2.3. **DoD Rewards Program**

2.3.3.3. **Terrorism Consequence Management**

DoD defines Consequence Management (CM) as those measures taken to protect public health and safety, restore essential government services, and provide emergency relief to governments, businesses, and individuals affected by the consequences of a chemical, biological, radiological, nuclear, and/or high-yield explosive (CBRNE) situation. The Department has a wide variety of unique warfighting support capabilities, both technical and operational, which could be used to provide assistance to state and local authorities in the event of a terrorist attack. The Department’s role is to provide assistance emphasizing the unique resources and capabilities that are not found in other federal agencies, such as the ability to mass mobilize and to provide extensive logistical support. The Department supports the lead federal agency within existing required resources while not adversely affecting overall military preparedness. This also includes the activities of installation first responders. For clarity, descriptions of subcategories are as follows:
2.3.3.3.1. **Consequence Management Response** – Includes war fighting units and installation first responders within the Department that possess specialized equipment, knowledge, skills, and training that could be brought to bear after a WMD incident. Units would include, but are not limited to, the Defense Nuclear Advisory Team, 52nd Ordnance Group, Edgewood Chemical and Biological Forensic Analytical Center Modular On-site Laboratory, Medical Chemical Biological Advisory Team, US Army Medical Research Institute of Infectious Diseases, Radiological Control Teams, Radiological Advisory Medical Team, Response Task Force, 20th Support Command – Chemical Biological Radiological Nuclear and High Yield Explosives (CBRNE), and Chemical/Biological Incident Response Force. Also includes funding for Installation Emergency Responders such as fire departments, security forces, law enforcement, medical responders, civil engineers, medical surveillance, and explosive ordinance disposal. Funding includes training, exercises, and evaluation for base and headquarters personnel, support for formal and supplemental training courses, developing and evaluating response plans, and other associated activities. Funding in this category also includes procurement efforts for the Chemical Biological Installation Protection program and operations and maintenance for the Chemical, Biological, Radiological, and Nuclear Defense program. Funding also includes a pilot program to expand emergency responder capabilities to handle CBRNE emergencies through the procurement of specialized equipment, additional training, and exercises.

2.3.3.3.2. **Weapons of Mass Destruction Civil Support Teams** - Include the Joint Task Force Civil Support and the 55 congressionally mandated WMD Civil Support Teams (CSTs). Joint Task Force Civil Support is responsible for the planning and execution of military assistance to civilian authorities for consequence management of WMD incidents within the United States, its territories and possessions. CST funds are used for unique individual and collective unit training. Funds also support operational deployments, equipment upgrades, and communications links.

2.3.3.3.3. **Research Development Test and Evaluation** - RDT&E support to the terrorism consequence management efforts. Includes, but is not limited to, the activities of OSD, and the portion of DARPA’s Biological Warfare Defense Program that is dedicated to domestic terrorism consequence management.

2.3.3.4. **Intelligence Related Support to Combating Terrorism** - Collection, analysis, and dissemination of all-source intelligence on terrorist groups and activities intended to protect, deter, preempt, or counter the terrorist threat to US personnel, forces, critical infrastructures, and interests. THIS PORTION OF THE SNAP SUBMISSION IS NOT INCLUDED IN THE COMBATING TERRORISM JUSTIFICATION BOOK AND WILL ONLY BE COLLECTED DURING THE PROGRAM AND BUDGET REVIEW DATA COLLECTION CYCLE – IT WILL NOT BE COLLECTED DURING THE PRESIDENT’S BUDGET DATA COLLECTION CYCLE.

2.3.3.4.1. **Counterintelligence (CI)** - Includes personnel and funding associated with Military Intelligence Program (MIP). These activities include terrorism investigations, surveillance and counter surveillance teams, terrorism analysis and production, force protection source operations, threat assessments, terrorism collection, route surveys, and intelligence staff support to deployed forces. Only those counterintelligence resources directly supporting force protection/combating terrorism activities are to be reported in this resource summary. Army and Marine Corps tactical CI resources and Army Security and Intelligence Activities CI resources will be
reported by the Army and Marine Corps. The Counterintelligence Field Activity (CIFA) will report CIFA resources that directly support force protection/combating terrorism activities.

2.3.3.4.2. Research Development Test and Evaluation - For example, Counter Terrorism Technical Support Program.

2.3.4. Entries for CbT-1 Exhibit

2.3.4.1. General: DoD Components should prepare a separate summary for each applicable appropriation and revolving fund. Each summary will report resources (funding and personnel) by the combating terrorism functional categories described above.

2.3.4.2. Appropriation Summary: For each appropriation (O&M, Military Personnel and Military Construction) report budget authority by appropriation, budget activity, and applicable subactivity group level/program line item/project. Procurement, and RDT&E appropriations, report the total combating terrorism budget authority funds by budget activity and by program element. For Revolving Funds, report obligation authority at the Working Capital Fund business area.

2.3.4.3. Financial Summary Section:

2.3.4.3.1. Military Personnel. Report resources by CbT functional category and CbT activity group at the appropriation budget activity level.

2.3.4.3.2. Operation and Maintenance. Report resources by CbT functional category, CbT activity group, budget activity, and subactivity group level (O-1 line).

2.3.4.3.3. Procurement. Report resources by CbT functional category, CbT activity group, and Program Element (PE) (P1 line item).

2.3.4.3.4. RDT&E. Report resources by CbT functional category and CbT activity group, and PE (PE/R-1 line item).

2.3.4.3.5. Military Construction. Report resources by CbT functional category and CbT activity group, State/Country, and project title.

2.3.4.3.6. Revolving Funds. Report resources by CbT category and activity group by business area level.

2.3.4.4. Personnel Summary Section:

2.3.4.4.1. For each applicable appropriation, report civilian and contractor personnel full-time equivalents (FTEs) and military (active and reserve component) end strength by CbT functional category and CbT activity group.

2.3.4.4.2. The following generic Military Occupational Series (MOS) and civilian job series should be reported as full-time Combating Terrorism assets -- even if these persons
spend only a portion of their time on combating terrorism activities. Additionally, personnel not in these MOS’s and/or job series who are assigned permanently or detailed to force protection offices and who spend at least 51% of their time directly supporting combating terrorism activities should be reported on this exhibit:

2.3.4.4.2.1. Military Career Fields/Occupational Series: Military Police, Law Enforcement Specialist and Security, Master at Arms, Security Forces, Criminal Investigator, Interrogator, Interpreter/Translator, Counterintelligence Officer, and Office of Special Investigations. Appropriate subspecialities/subfunctions/skills are to be captured in these career fields/occupational series, in support of combating terrorism, with the exception of military working dogs in counterdrug missions.

2.3.4.4.2.2. The following civilian Job Series are to be reported if responsibilities relate to CbT efforts: Physical Security Manager (GS-0080), Civilian Police (GS-0083), Security Guard (GS-0085), and those personnel in the Security Clerical and Assistance (GS-0086) series, and all associated wage grade positions that are in direct support of the previously aforementioned series.

2.3.4.4.2.3. Personnel data associated with classified combating terrorism programs will be reported as follows: Army and Marine Corps tactical counterintelligence resources and all Army security and intelligence activities and CIFA’s counterintelligence resources will be reported in the CbT exhibits by the applicable components.

3.0 MAJOR RANGE AND TEST FACILITY BASE (1903)

3.1 Purpose (190301)

3.1.1. This Chapter provides instructions applicable to budget formulation for the DoD Major Range and Test Facility Base (MRTFB) funding requirements included in the DoD Components’ budget requests. The exhibit formats submitted in support of the Program and Budget Review Submission (August timeframe) will be the same as those submitted to the Director, DoD Test Resource Management Center (TRMC) in support of the President’s Budget (March timeframe) except that the President’s Budget submission will not include updates to any of the Direct (User) funding or MILCON information on any Exhibit to include Exhibit 2D, Source of Direct Funds, in whole.
3.1.2. These instructions apply to the activities included in the MRTFB as defined in DoDD 3200.11 and listed below.

**Army:**
- Aberdeen Test Center (ATC), Aberdeen Proving Ground, MD
- Dugway Proving Ground, (DPG), Dugway Proving Grounds, UT
- Electronic Proving Ground (EPG), Ft. Huachuca, AZ
- High Energy Laser Systems Test Facility (HELSTF), White Sands Missile Range, NM
- Ronald Reagan BMD Test Site (RTS), Kwajalein Atoll, Marshall Islands
- White Sands Missile Range (WSMR), White Sands Missile Range, NM
- Yuma Proving Ground (YPG), Yuma Proving Ground, AZ

**Navy:**
- Atlantic Undersea T&E Center (AUTEC), Andros Island, Bahamas
- Naval Air Warfare Center-Aircraft Division (NAWCAD), Patuxent River, MD
- Naval Air Warfare Center-Weapons Division (NAWCWD), China Lake and Point Mugu, CA
- Pacific Northwest Range Complex, (Nanouse and Dabob Ranges), Keyport, WA
- Pacific Missile Range Facility (PMRF), Barking Sands, Kauai, HI

**Air Force:**
- 30th Space Wing (30SW), Vandenberg AFB, CA
- 45th Space Wing (45SW), Patrick AFB, FL
- Arnold Engineering Development Center (AEDC), Arnold AFB, TN
- Air Armament Center (AAC), 46 Test Wing (46TW), Eglin AFB, FL and 46th Test Group, (46TG), Holloman AFB, NM
- Air Force Flight Test Center (AFFTC), Edwards AFB, CA
- Nevada Test and Training Range (NTTR), Nellis AFB, NV
- Utah Test and Training Range (UTTR), Hill AFB, UT

**Defense Information System Agency:**
- Joint Interoperability Test Command (JTIC), Ft. Huachuca, AZ, Slidell, LA, and Arlington, VA

3.1.3. The TRMC is charged with administering OSD responsibilities for the MRTFB in accordance with DoDD 3200.11. Modifications to these instructions, requests for deviations from their provisions, or requirements for their clarification or applicability should be directed to and coordinated with the TRMC and OUSD (Comptroller) Program/Budget.

3.1.4. Budget estimates will be developed in accordance with guidance contained in Chapter 1 and the various chapters for appropriations and accounts.

3.2 Submission Requirements (190302)

Copies of the following exhibits will be submitted twice annually in support of the President’s Budget (March timeframe) and the Program and Budget Review (August timeframe) for each major range and test facility. The same format and guidance are used for both submissions. However, the
Program and Budget Review submission shall include all the full budget exhibits, addressing both institutional and direct funding, whereas the President’s Budget submission shall be an abbreviated version that needs only address updates to the institutional funding elements on each exhibit. Copy requirements are identified in Chapter 1. Exhibit formats are provided in Section 12.0.

3.2.1. MRTFB-1 Exhibit, (Activity Title) Financial Summary.

3.2.2. MRTFB-2 Exhibit Set, (Activity Title) Financial Details.

3.2.3. MRTFB-3 Exhibit Set, (Activity Title) Improvement and Modernization Analysis.

3.3 Preparation of Material (190303)

Budget estimate data submitted by each DoD Component for the MRTFB will be assembled separately and identified by a cover sheet specifically entitled “Major Range and Test Facility Base (Army/Navy/Air Force/DISA) Program Budget Estimate.”

3.4 Special Instructions (190304)

Representatives of the OUSD (Comptroller), DOT&E, TRMC and OMB will participate in the review of all budget submissions for the major ranges and test facilities to ensure that:

3.4.1. Funding is adequate to maintain and sustain the DoD MRTFB test capability.

3.4.2. Excess capability is not being unnecessarily maintained in the MRTFB.

3.4.3. Unnecessary duplication does not exist within the MRTFB activities.

3.4.4. Test facility capability needed in the future is being planned and supported.

3.4.5. All new major test facilities are thoroughly coordinated prior to their approval to reflect the needs of all elements of DoD.

4.0 TEST AND EVALUATION FUNDING (1904)

4.1 Purpose (190401)

4.1.1. This Chapter provides instructions applicable to budget formulation for the Test and Evaluation Exhibit (T&E-1) needed for review and analysis of Test and Evaluation (T&E) funding requirements included in the DoD Components' requests. The instructions specify the requirements for the program and budget submission.

4.1.2. The Director, Operational Test and Evaluation (DOT&E), is charged with oversight of the DoD T&E resources and funding of T&E by each major DoD program. Modifications to these instructions, requests for deviations from their provisions, or requests for their clarification or applicability should be directed to and coordinated with DOT&E and OUSD (Comptroller) Program/Budget.
4.2 Submission Requirements (190402)

Each DoD Component will, for the Program and Budget Review only, complete an Exhibit T&E-1, Test and Evaluation for each of the Major Defense Acquisition Programs (MDAP) as listed on the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) website. This process is accomplished on-line using the Select & Native Programming Data Input System (SNaP) located at: http://snap.pae.osd.smil.mil. Note: The SNaP system operating instructions specified in the Programming and Budgeting Data Requirements on the SNaP system will supersede the instructions identified in this document if the instructions are different.

4.3 Special Instructions (190403)

The DOT&E will participate with representatives of OUSD (Comptroller), USD(AT&L), and OMB in the review of all budget submissions for T&E funding to ensure that:

4.3.1. Resources required for the test and evaluation of the MDAP and Special Interest Programs, as identified in the Test and Evaluation Master Plan (TEMP), are adequately funded.

4.3.2. Unwarranted test capability is not being maintained at private industry facilities.

4.3.3. Unwarranted duplication does not exist among DoD Component assets and private industry.

4.3.4. Test facilities and capabilities required are adequately funded and supported.

4.3.5. All new major test facilities are approved by the Defense Test and Evaluation Steering Group to ensure they are warranted and meet the needs of all DoD components.

5.0 FINANCIAL MANAGEMENT ACTIVITIES (1905)

5.1 Financial Management Activities (190501)

5.1.1. This Section provides guidance for presenting budget estimates related to Financial Management Activities. It is designed to fulfill the requirements of Section 52, Information on Financial Management, of OMB Circular A-11.

5.1.2. Information on funding levels for financial management activities is required for oversight and review of component resources devoted to these activities and to ensure that their use is in accordance with the government-wide 5-year financial management plan prepared by OMB as required by the Chief Financial Officers Act of 1990.

5.1.3. Submission of Exhibit 52—Information on Financial Management, as shown in OMB Circular A-11, is required for the Program and Budget Review and an update is required for the President’s budget submission (Congressional Justification/Presentation). The exhibit should meet the definitions/descriptions contained in Section 52. Guidance for the automation of the data submission will be provided as part of the budget call for the Program and Budget Review.
5.1.4. Copies are to be provided directly to the OUSD (Comptroller), at the following address: Director, Accounting and Finance Policy and Analysis Directorate, Room 3E987, 1100 Defense Pentagon, Washington DC, 20301 (Commercial (703) 697-8283; DSN 277-8283).

5.2 Financial Improvement Initiative (formerly Financial Improvement Initiative, FII 52 (190502)

5.2.1. This section provides guidance for presenting program and budget estimates related to the Financial Improvement Initiative (FII). It supplements the information provided on the Exhibit 52 in the preceding section and also, supplements the PB-15, “Advisory and Assistance Services” exhibit.

5.2.2. Information on funding levels including budget and program years is required for oversight and review of component resources devoted to financial improvement and to respond to congressional questions about the amounts budgeted and programmed for financial improvement. The funding levels related to financial improvement include the amounts for the Financial Improvement and Audit Readiness report submitted to Congress and the amounts to achieve all of the milestones in the Financial Improvement Plan.

5.2.3. A Schedule 52, will be submitted for the Program and Budget Review and the update for the President’s Budget submission. The schedule shows the resources that are programmed and budgeted for the Department to produce reliable, accurate, and timely information and to finance the costs of annual financial statements audits. (Click on the link for the format and guidance for Schedule 52.)

5.2.4. Copies are to be provided directly to the OUSD (Comptroller), Financial Improvement and Audit Readiness Directorate, 1550 Crystal Drive, Suite 212, Arlington, VA 22202, (703-607-0300), extension 138; DSN 327-0300, extension 122).

5.3 Preparation and Audit of Financial Statements (190503)

5.3.1. Sections 1008 (b) and (d) of the Fiscal Year 2002 Authorization Act, require the Under Secretary of Defense(Comptroller) to submit, with the annual budget justification, the following information:

5.3.1.1. An estimate of the resources that the Department of Defense is saving, or expects to save, as a result of actions taken or to be taken, with respect to the preparation and audit of financial statements (FS), and

5.3.1.2. A discussion of how resources saved in (1) above have been redirected or are redirected to improvement of systems, financial policies, procedures, and internal controls underlying financial management within the department. The Components should submit these costs for the preceding fiscal year, the current year, and the following fiscal year. Click on the link for the format and guidance for the Section 1008 report.
5.3.2. Copies are to be provided directly to the OUSD (Comptroller), Financial Improvement and Audit Readiness Directorate, 1550 Crystal Drive, Suite 212, Arlington, VA 22202 (703-607-0300), extension 138; DSN 327-0300, extension 122).

6.0 GOVERNMENT PERFORMANCE AND RESULTS ACT (GPRA) (1906)

6.1 Purpose (190601)

The purpose of this section is to establish basic guidance for aligning GPRA reporting requirements with the Department’s budget development process and OMB Circular A-11’s requirement to submit an annual performance budget.

6.2 Submission Requirements (190602)

6.2.1. The 1993 Government Performance and Results Act (GPRA) require the Department of Defense to submit a strategic plan (updated at least once every 4 years), an annual performance plan, and an annual performance report.

6.2.2. The Quadrennial Defense Review, issued every four years, serves as the Department’s strategic plan; the QDR establishes strategic outcome goals for the Department.

6.2.3. The Secretary’s Annual Defense Report (ADR) to the President and the Congress, in combination with the statutory reports of the Military Departments and budget justification materials serve as the Department’s performance plan. The Military Departments’ statutory reports describe how service-level strategies and associated performance goals support the Department’s overall performance framework. The congressional budget justification materials, which list program-level goals and performance measures that support both Component-level and Departmental performance goals, serve as a performance budget. OMB Circular A-11, Section 220, provides additional details.

6.2.4. The Performance and Accountability Report (PAR), Section II, documents actual results against the Defense-wide performance goals established in the ADR, and thus serve as the Department’s performance report.

6.2.5. The QDR, ADR, performance budget, and PAR satisfy the standards set forth by the 1993 Government Performance and Results Act. Together they serve as the Secretary’s primary public record of how well the Department is managing to results.
7.0 INFORMATION ON OVERSEAS STAFFING (POSITIONS FILLED) (1907)

7.1 Purpose (190701)

The purpose of this section is to establish basic guidance for the annual reporting of the number of overseas employees assigned to the Chief of Mission staff as required by OMB Circular A-11 and the Department of State, Capital Security Cost Sharing (CSC) Program.

7.2 Submission Requirements (190702)

7.2.1. OMB Circular A-11, Section 25 requires the Department of Defense to submit an exhibit on Information on Staffing Overseas on an annual basis. Submission is required on overseas staffing if your agency assigns employees to overseas positions under a Chief of Mission, as defined below.

7.2.2. This information is required to analyze the number of overseas employees assigned to a Chief of Mission staff and the cost of new positions being assigned. Overseas employee means an American citizen employed outside the United States and its territories. Chief of Mission means the ranking officer in an embassy, permanent mission, legation, consulate general or consulate.

7.2.3. Information reported will be compared for accuracy against the Department of State reports. Discrepancies will be validated by the Component or Defense Agency.

7.2.4. The following types of positions are to be reported:

1. U.S. Hires
2. Full-time permanent (FTP) U.S. direct-hire positions (USDH)
4. U.S. military positions
5. Locally Engaged Staff
6. Foreign Service National (FSN)
7. PSCs or Personnel Services Agreements (PSA)
8. Third Country Nationals (TCNs)
9. Locally Hired Americans, including eligible family members
10. TDY – long term/rolling TDY employees

7.2.5. Additional information and guidance can be found in OMB Circular A-11, Section 25 and the Department of State, Capital Cost Sharing Program (http:www.state.gov/obo/c11275.htm). The PB-59, DoD Overseas Staffing exhibit must be submitted in an EXCEL spreadsheet to OUSD (Comptroller) P/B, Operations Directorate, Room 3C710, the Pentagon.
8.0 FEDERAL CREDIT PROGRAMS (1908)

8.1 Purpose (190801)

This Section provides guidance for presentation of annual budget estimates for Federal credit programs. Credit programs in the Department of Defense consist of direct loans and guaranteed loans.

8.2 Submission Requirements (190802)

8.2.1. Military Departments and Defense Agencies, as appropriate, will submit to OSD in support of Federal credit programs all materials required by, and in the format specified in, OMB Circular No. A-11, Section 85. Copies of appropriate exhibits will be submitted in support of the Program and Budget Review Submission only.

8.2.2. Definitions: The following definitions apply to the credit account structure. Agencies should refer to OMB Circular A-34 and A-11 for a more detailed explanation of terminology and budget instructions.

8.2.2.1. A direct loan is a disbursement of funds by the Government to a non-Federal borrower under a contract that requires repayment of such funds with or without interest. The term includes the purchase of, or participation in, a loan made by a non-Federal lender. It also includes the sale of a Government asset on credit terms of more than 90 days duration.

8.2.2.2. A direct loan obligation is a legal or binding agreement by a Federal agency to make a direct loan when specified conditions are fulfilled by the borrower.

8.2.2.3. A loan guarantee is any guarantee, insurance, or other pledge with respect to the payment of all or part of the principal or interest on any debt obligation of a non-Federal borrower to a non-Federal lender, but does not include the insurance of deposits, shares, or other withdrawal accounts in financial institutions.

8.2.2.4. A loan guarantee commitment is a legally binding agreement by a Federal agency to make a loan guarantee when specified conditions are fulfilled by the borrower, the lender, or any other party to the guarantee agreement.

8.2.2.5. Financing Account is the non-budget account or accounts associated with each credit program account for post-1991 direct loans or loan guarantees. It holds balances, receives the subsidy cost payment from the credit program account, and includes all other cash flows to and from the Government. Separate financing accounts are required for direct loans and loan guarantees.

8.2.2.6. Modifications are any Government action that alters the estimated subsidy cost, compared to the estimate contained in the most recent budget submitted to Congress, of an outstanding direct loan (or direct loan obligation) or an outstanding loan guarantee (or loan guarantee commitment). Actions permitted within the terms of an existing contract are the only exception. Modifications to pre-1992 direct loans and loan guarantees are included in this definition, as well as modifications to post-1991 direct loans and loan guarantees. For pre-1992 direct loans and loan...
guarantees, the loan asset or guarantee liability will be transferred from the liquidating account to the appropriate financing account. A one-time adjusting payment will be made between the liquidating and financing accounts. The subsequent cash flows will be recorded in the financing account.

8.2.2.7. **Program Account** is the budget account into which an appropriation to cover the subsidy cost of a direct loan or loan guarantee program is made and from which such cost is disbursed to the financing account. Usually, a separate amount for administrative expenses is also appropriated to the program account. Each program account is associated with one or two financing accounts, depending on whether the program account makes both direct loans and loan guarantees. The program account pays subsidies to the financing account for post-1991 direct loans and loan guarantees, for modifications, and for re-estimates. These subsidy payments are counted in calculating budget outlays and the deficit.

8.2.2.8. **Subsidy** is the estimated long-term cost to the Government of a direct loan or loan guarantee, calculated on a net present value basis, excluding administrative costs. In net present value terms, it is the portion of the direct loan disbursement that the Government does not expect to recover, or the portion of expected payments for loan guarantees that will not be offset by collections. The subsidy may be for post-1991 direct loan obligations or loan guarantee commitments, for re-estimates of post-1991 loans or guarantees, or for modifications of any direct loans or loan guarantees.

8.2.2.9. **Re-estimates** are the recalculation of the subsidy cost of each risk category within the cohort of direct loans or guaranteed loans. Re-estimates must be made at the beginning of each fiscal year following the year in which the initial disbursement was made and as long as the loans are outstanding unless a different plan is approved by OMB.

8.2.2.10. **Cohort** - Direct loans obligated or loan guarantees committed by a program in the same year, even if disbursements occur in subsequent years or the loans are modified. Modified pre-1992 direct loans will constitute a single cohort; modified pre-1992 loan guarantees will constitute a single cohort. For loans subsidized by no-year or multi-year appropriations, the cohort may be defined by the year of appropriation or the year of obligation. The Program and Financial Control Directorate of OUSD (Comptroller) P/B will contact OMB for proper determination.

8.2.3. Materials required by this Section will be provided for credit programs for the DoD Family Housing Improvement program, the Army ARMS Initiative Program, the Defense Export Loan Guarantee Program, and for any additional programs involved in direct loans or guaranteed loans.

8.2.4. Copies of these materials are required as part of the program and budget review submission in the quantities identified in Chapter 1.

9.0 OTHER SPECIAL INTEREST AREAS (1909)

9.1 Purpose (190901)

This Chapter prescribes instructions for the preparation and submission of budget justification backup data for special areas in which the Congress or OMB has expressed interest. Most of these requirements affect more than a single appropriation.
9.2 Submission Requirements (190902)

9.2.1. Data in the exhibit formats provided in Section 12.0 are required for the following program areas:

- PB-14 Functional Transfers ................................................................. 66
- PB-15 Advisory and Assistance Services .............................................. 67
- PB-16 Legislative Proposals ................................................................. 71
- PB-18 Foreign Currency Exchange Data ................................................ 72
- PB-22 Major Department of Defense Headquarters Activities .................. 73
- PB-23 Acquisition and Technology Workforce Transformation Program ...... 75
- PB-24 Professional Military Education .................................................. 77

9.2.2. Definitions are to be identical to those most recently used in furnishing data to the Congress.

9.2.3. All exhibits are required for the Program and Budget Review Submission and the congressional justification/presentation submission. Copies of exhibits are required with the submissions in the quantities identified in Chapter 1.

10.0 CLASSIFICATIONS AND DEFINITIONS – COMMAND, CONTROL, COMMUNICATIONS, AND INTELLIGENCE PROGRAMS (1910)

10.1 Purpose (1910001)

The Office of the Director for Program Analysis and Evaluation maintains a listing of program elements (PEs) in the Future Years Defense Program (FYDP) making up these programs. For details,
please contact the POC for the FYDP Resource Structure Management (RSM) system. The RSM system and its Web site are described in FMR Volume 2A, Section 010702.

11.0 NOT USED (1911)

12.0 OTHER SPECIAL ANALYSES SUBMISSION FORMATS (1912)

12.1 Purpose (191201)

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

12.2 Exhibits in Support of Section 1902 – Combating Terrorism (191202)

HCbT 1 Combating Terrorism Activities Detail - SNaP Format……………………………………..23
CbT 2 Combating Terrorism Narrative – SNaP Format (PB Only)……………………………..27
CbT 2 Combating Terrorism Narrative – SNaP Format (Program/Budget Review Only)……..28
CbT 1&2: Data Matrix: CbTCategory, CbTActivityRollupName, CbBTAActivityGroup Relationship……………………………………………………………………………….29
Combating Terrorism Supporting Detail Definitions……………………………………………31
HCbT 3 Vulnerability Assessments (Program/Budget Review Only)………………………..36

12.3 Exhibits in Support of Section 1903 - Major Range and Test Facility (191203)

MRTFB-1 Installation Financial Summary…………………………………………………………….44
MRTFB-2a Source of Direct Funds…………………………………………………………………..47
MRTFB-2b MRTFB Activity Schedule of Increases & Decreases……………………………48
MRTFB-2c Workyears………………………………………………………………………………49
Instructions for Major Range and Test Facility Base (MRTFB) Budget Exhibits…………………..56

12.4 Exhibits in Support of Section 1904 - Test (191204)

T&E 1………………………………………………………………………………………………………..61

12.5 Exhibits in Support of Section 1909 - Other Special Interest Areas (191205)

Exhibit PB-14 Functional Transfers…………………………………………………………………66
Exhibit PB-15 Advisory and Assistance Services………………………………………………67
Exhibit PB-16 Legislative Proposals………………………………………………………………..71
Exhibit PB-18 Foreign Currency Exchange Data………………………………………………..72
Exhibit PB-22 Major Department of Defense Headquarters Activities………………………73
Exhibit PB-23 Acquisition, Technology and Logistics Workforce Transformation Program…75
Exhibit PB-24 Professional Military Education Schools…………………………………………77

Exhibit PB-55 International Military Headquarters.............................................. 115
Exhibit PB-59 Overseas Staffing Report............................................................ 116
HCbT 1 Combating Terrorism Activities Detail - SNaP Format

Instructions
1) For all fields listed above, please report the funded and levels of Manpower, Total Obligation Authority (TOA), and Quantity Procured for all combating terrorism activities. Reporting is required by Program Title, within CbT Activity Group, CbT Category, Component and Org. Please refer to the attached relationship table to properly identify CbT Categories and their associated CbT Activity Groups.
2) Under the field name ResourceType, select “Funding” to report appropriations not explicitly listed: e.g., MilCon, Procurement, RDT&E, and Revolving Funds.
3) Report $ in Thousands; Civilians and Contractors in FTEs; Military Personnel in Authorized End-Strength; and Quantity Procured in Units.

For Manpower:
1. For each applicable appropriation, report civilian and contractor personnel full-time equivalents (FTEs) and military (active, guard, and reserve component) end strength by CbT Category, CbTActivityGroup, and Program Title.
2. The following generic Military Occupational Series (MOS) and civilian job series should be reported as full-time Combating Terrorism assets -- even if these persons spend only a portion of their time on combating terrorism activities. Additionally, personnel not in these MOSs and/or job series who are assigned permanently or detailed to force protection offices and who spend at least 51% of their time directly supporting combating terrorism activities should be reported on this exhibit:
   A. Military Career Fields/Occupational Series: Military Police, Law Enforcement Specialist, Security, Master at Arms, Security Forces, Criminal Investigator, Interrogator, Interpreter/Translator, Counterintelligence Officer, and Office of Special Investigations. Appropriate subspecialities/subfunctions/skills are to be captured in these career fields/occupational series, in support of combating terrorism, with the exception of military working dogs in counterdrug missions.
   B. The following civilian Job Series are to be reported: Physical Security Manager (GS-0080), Civilian Police (GS-0083), Security Guard (GS-0085), and those personnel in the Security Clerical and Assistance (GS-0086) series, and all associated wage grade positions that are in direct support of the previously aforementioned series.
   C. Personnel data associated with classified combating terrorism programs will be reported as follows: Army and Marine Corps tactical counterintelligence resources and all Army Security and Intelligence Activities counterintelligence resources will be reported in the CbT exhibits by the applicable Components.

HCbT 1 Combating Terrorism Activities Detail - SNaP Format

(Please Note: This is a partial screenshot and the full document contains additional information not shown here.)
D. The services shall report all CbT military manpower ($ and End-strength) and annotate (using the OccupationService field) the Combatant Command, Defense Agency, or Field Activity that any personnel are detailed to.

E. The Combatant Command, Defense Agencies, and Field Activities shall report the military End Strength detailed to their organization and annotate (using the Occupation Service field) the service providing the manpower.

CbT 1 Definitions

**Class**: System Field: Classification. **All information for this exhibit must be submitted at the unclassified level on the unclassified network.**

* U: UNCLASSIFIED

**Component**: Identifies the duty status for military service units and defense agencies.

- **Active**:
- **DADW**: Defense Area Defense Wide. Used by non-service defense agencies.
- **Guard**:
- **Reserve**:
- **JIEDDO**: Joint IED Defeat Organization

**CBTCategory**: Antiterrorism (defensive measures), Counterterrorism (offensive measures), Terrorism Consequence Management (preparedness and response for mitigating the consequences of a WMD incident), and Intelligence Related Support.

**CBTActivityGroup**: A specified grouping of activities and functions that describe the type of CbT effort within a CbT Category. Refer to the CbTCategory & CbTActivityGroup Relationship Matrix.

**Program Title**: Descriptive name of your program: associated with the PE’s and the resources for the CbTActivityGroup. This is a required field and must be entered through the data management segment of SNaP prior to entering Program Details. Open List. Add entries to pick list.

**Funding Source**: Annotate if the original source of the funding was the Defense Emergency Response Fund (DERF ’03), Supplemental Funding for FY 2007, FY 2008, or N/A for all other funding.

- **DERF ’03**
- **Supplemental ’06**
- **Supplemental ’07**
- **Supplemental ’08**
- **N/A**

**Treasury Code**: Identifies resources by type, organization and component. Select from the defined set of four to six-digit codes provided from the Comptroller.
HCbT 1 Combating Terrorism Activities Detail - SNaP Format (Continued)

**BA Code:** The Budget Activity Code as defined by OUSD (Comptroller), in the Financial Management Regulation located in the “Publications” section of Defenselink. www.defenselink.mil/comptroller/fmr/

See Data Matrix

**Budget Line Item:** (Closed List) Provide the Activity Group (AG) and Sub-Activity Group (SAG) if the appropriation is O&M; the Project Number as used in the R2 report for RDT&E; Line Item if Procurement; Project Number if MilCon; and Activity Group (AG) N/A if Revolving funds. The list of Budget Line Item/Budget Line Item Name values is located on the PDR Info page of the SNaP website (https://SNaP.PAE.OSD.MIL).

**Resource Type:**

- **Civilian Pay - Direct Hire Civilian:** Civilian Pay part of TOA in the identified PE that provides resources for the Direct Hire Civilians within the CbT Activity Group and Program Title.
- **Civilian Pay - Foreign Direct Civilian:** Civilian Pay part of TOA in the identified PE that provides resources for the Foreign Direct Civilians within the CbT Activity Group and Program Title.
- **Civilian Pay - Foreign Indirect Civilian:** Civilian Pay part of TOA in the identified PE that provides resources for the Foreign Indirect Civilians within the CbT Activity Group and Program Title.
- **Contractor:** Number of Contractors designated as CbT in that CbT Activity Group, Program Title, and Program Element.
- **Contractor Pay:** TOA portion of the identified PE that provides resources for contractor pay with the CbT Activity Group and Program Title.
- **Direct Hire Civilian:** Number of Direct US civilians designated as CbT in that CbT Activity Group, Program Title, and Program Element.
- **Enlisted:** Report Enlisted end-strength carrying occupation codes designated as AT, CT, TCM, or INT at the individual occupational specialty code level for each CbT Activity Group, Program Title, and Program Element.
- **Foreign Direct Civilian:** Number of Foreign Direct Civilians designated as CbT in that CbT Activity Group, Program Title, and Program Element.
- **Foreign Indirect Civilian:** Number of Foreign Indirect Civilians designated as CbT in that CbT Activity Group, Program Title, and Program Element.
- **Funding:** Identify funding for MILCON, Procurement, RDT&E, DWCF, and Revolving Funds
- **MilPay - Enlisted:** Report funding for all Enlisted personnel carrying occupation codes designated as AT, CT, TCM, or INT for each CbT Activity Group, Program Title, and Program Element.
- **MilPay - Officers:** Report funding for all Officers carrying occupation codes designated as AT, CT, TCM, or INT for each CbT Activity Group, Program Title, and Program Element.
- **Officers:** Report Officer end-strength carrying occupation codes designated as AT, CT, TCM, or INT at the individual occupational specialty code level for each CbT Activity Group, Program Title, and Program Element.
- **Other O&M:** Operations and Maintenance TOA portion of the identified PE that provides resources for the described program within the AT/FP activity (excludes Civilian Pay which will be reported separately)
- **Quantity Procured:** Number in units of each piece of physical security equipment or Installation First Responder reported.
HCbT 1 Combating Terrorism Activities Detail - SNaP Format (Continued)

**Occupation Service**: Closed List. For defense agencies and field activities, identify the Service providing the manpower for Officer or Enlisted resource types. For the services, identify the service, defense agency or field activity the manpower is detailed to for Officer and Enlisted resource types. Select Civil Service for Direct Hire Civilian resource type. Select N/A for all other Resource Types.

- **Air Force**:
- **Army**:
- **Civil Service**:
- **Navy**:
- **Marine Corps**:
- **DHP**
- **DTRA**
- **NDU**
- **OSD**
- **SOCOM**
- **TRANSCOM**
- **N/A**

**Occupation Code**: Provide the occupational specialty code/civilian job series and title for all manpower (Officer, Enlisted, Direct Hire Civilian, Indirect Hire Civilian, Foreign Indirect Hire Civilian). For example: Civ 4804 Locksmith, Off 31A Military Police, or Enl 5822 Polygraph Examiner. Occupation Codes are taken from the Defense Manpower Data Center (DMDC) DoD Occupation Database (ODB). The complete list of valid codes is available on the PDR info page of the SNaP website (https://SNaP.PAE.OSD.MIL)

**CONUS_OCONUS**:
- **CONUS**: Select CONUS for CONUS assets (Equipment, funding, personnel)
- **OCONUS**: Select OCONUS for OCONUS assets.

**CONUS_OCONUS Rationale**: Explain the methodology used to assign or derive the CONUS/OCONUS breakout.

**ReasonCode**: Select the reason necessitating the change to the data: PBD, PDM, Congressional Action or Other.

- **Congressional Action**:
- **Other**:
- **PBD**:
- **PDM**:

**Reason For Change**: If ‘Other’ was selected under ReasonCode, provide text explaining the reason for the change.

**PBD_PDM_Num**: Enter the PBD or PDM number that necessitated the change if applicable, else select N/A.

**PBD_PDM_Date**: Enter the date (Month and Year) of the PBD or PDM that necessitated the change if applicable, else select N/A.
CbT 2 Combating Terrorism Narrative – SNaP Format (PB Only)

### Instructions
Provide the name, division of organization, phone number, and email address of the individual responsible for the information contained in the planned activities and reconciliation for each CbTAActivityRollupName.

### CbT 2 Definitions
**Class**: System Field: Classification. All information for this exhibit must be submitted at the unclassified level on the unclassified network.

**U**: UNCLASSIFIED

**Organization**: The POM reporting entities directed to submit this data requirement. For a complete list of organizations see by data requirement see Appendix A of the PDR.

**CbTAActivityRollupName**: The name that all data will be aggregated to for the President’s Budget Justification Book. Rollup supporting CbTAActivityGroups to the CbTAActivityRollupName as outlined in the Data Matrix below.

**Planned Activities**: Describe all activities planned for the budget year at the CbTAActivityRollupName level of detail.

**Reconciliation of Activities’ Increases and Decreases**: Explain any fiscal year to fiscal year changes in total program funding at the CbTAActivityRollupName and appropriation level of detail.

### Table

Combating Terrorism Supporting Detail Definitions

1) Antiterrorism: those defensive measures taken to reduce vulnerability to terrorist attacks.

Physical Security

**Physical Security Equipment (PSE):** Any item, device, or system that is used primarily for the protection of assets, personnel, information for facilities, to include alarms, sensors, protective lighting and their control systems and the assessment of the reliability, accuracy, timeliness and effectiveness of those systems, such as (but not limited to): Exterior surveillance and/or intrusion detection systems; lighting systems; access controls and alarms systems; residential security equipment; equipment for executive protection, to include added doors, increased ballistic protection at offices and residences, personal body armor, armored vehicles, and detection devices.

- **Blast Mitigation** Consists of (but not limited to):
  1) Fragmentation reduction film, blast walls, etc.
  2) Explosive containers

- **Communication** Consists of (but not limited to):
  1) Personnel Alerting Systems
  2) Pagers & Radios
  3) Databases and assessment tools

- **Explosive Detection** Consists of (but not limited to):
  1) Portable & non portable detectors
  2) Under Vehicle Surveillance Systems
  3) Canine systems

- **Barriers** Consists of (but not limited to):
  1) Passive (cable reinforced fences, planters, jersey barriers, shrubs, trees, berms ditches, and inflatable booms)
  2) Active (bollards, drums & sliding gate, cable beam)

- **Intrusion Detection** Consists of (but not limited to):
  1) Wide Area Security and Surveillance Systems
  2) Detection devices (thermal, spectral, mechanical, etc.)
  3) Special lighting
  4) Biometrics
  5) Sensors

- **Personal Protection** Consists of (but not limited to):
  1) Body Armor
  2) Personnel protective equipment
  3) Unarmored Vehicles/Sedans
Combating Terrorism Supporting Detail Definitions (Continued)

**Patrol Boats**
**Up-Armored HMMWV**
**Commercial Heavy Armored Vehicles**
**Commercial Light Armored Vehicles**
**Improvised Explosive Device (IED) Defeat**

**Other Special Equipment: Specify Equipment Type.** This is a required field and must be entered through the data management segment of SNaP prior to entering program details. Add equipment types to the CBTActivityGroup pick list. With format of (PSE) Other Special Equipment: <Equipment Type>.

**Physical Security Site Improvements:** Any facility improvements (or increment of improvements) (using O&M or MILCON funding) or new construction (or increment of new construction) that is for the purpose of the physical protection of assets, personnel or information. These include walls, fences, barricades or other fabricated or natural impediments to restrict, limit, delay or deny entry into a Defense installation or facility, such as (but not limited to):

1) Primary facility modification/features such as special structural improvements to walls, doors, windows, ceilings, etc.; interior barriers; or include any land acquisition for standoff distances
2) Supporting facility modification features such as site improvements in fencing, perimeter/area lighting, blast mitigation barriers, vehicle barriers, special landscaping
3) Safe havens
4) Evacuation facilities
5) Surveillance platforms

**Physical Security Management and Planning:** Personnel who manage physical security programs, resources, and assets such as but not limited to headquarters staff. CINC headquarters staff elements performing such functions should also be reported here.

**Security Forces and Technicians:** All personnel and operating costs associated with protective forces used to safeguard assets, personnel or information, to include (but not limited to) salaries overtime, benefits, materials and supplies, equipment and facilities, vehicles, helicopters, training, communications equipment, and management, such as (but not limited to):

1) Dedicated response forces and security forces
2) Locksmiths
3) Perimeter, installation or facility access control
4) Inspection and maintenance of barriers and security system components
5) Antiterrorism training for security forces
6) Antiterrorism awareness programs and training

**Law Enforcement:** All personnel and operating costs associated with law enforcement, to include but not limited to salaries, overtime, benefits, material and supplies, equipment and facilities, vehicles, helicopters, training, communications equipment, and management, such as (but not limited to):

1) Response forces
2) Military police
3) Protective service details, including advance work
Combating Terrorism Supporting Detail Definitions (Continued)

**Security and Investigative Matters:** Includes Defense criminal investigative resources, security and intelligence activities, and any cross-discipline security functions which do not easily fit into other security categories, such as (but not limited to):

1. Terrorism Investigations
2. Executive antiterrorism training
3. Surveillance and counter-surveillance teams
4. Protective service details, including advance work
5. Route surveys
6. Antiterrorism awareness programs and training

**Antiterrorism R&D:** Includes any RDT&E resources expended in the area of antiterrorism, showing the program and purpose

**Antiterrorism (AT) Technical Support R&D**

**Physical Security and Other R&D**

**AT COTS Product/Technology Integration**

2) Counterterrorism: Offensive measures taken to prevent, deter and respond to terrorism

**Individual CT programs**

Counterterrorism R&D: Includes any RDT&E resources expended in the area of counterterrorism showing the program and purpose.

**Counterterrorism (CT) Technical Support R&D**

**CT COTS Product/Technology Integration**

**Other CT R&D**

3) Terrorism Consequence Management: Preparation for and response to the consequences of a terrorist incident/event

**Chemical and Biological Installation Protection (CBIP):** Include all costs and personnel ($ and End Strength/FTE’s) associated with these activities including procurement of equipment.

**CBRN Defense:** Include all costs and personnel ($ and End Strength/FTEs) associated with these activities. Also include the quantity of equipment procured of all CBRN assets.

Assistance to State and Local Authorities: The employment of DoD assets and expertise to assess suspected nuclear, biological, chemical, or radiological event in support at the local or state authority. DoD assets to be reported include:

**Weapons of Mass Destruction Civil Support Teams**

**Decontamination Elements**

**Reconnaissance Elements**

**Medical Elements**

**Special Response Units US Army**

**US Marine Corps Chem/Bio Incident Response Force (CBIRF)**

**Special Medical Augmentation Response Team (SMART)**

**Installation First Response Preparedness:** As a new initiative for FY 2001, the Services were directed to develop requirements, train personnel, and procure equipment for first response preparedness at DoD installations and facilities. These initiatives will be reported here, above the baseline.
Combating Terrorism Supporting Detail Definitions (Continued)

Include and itemize all equipment procurement for: fire trucks, thermal imagers, sensors, detectors, and haz mat suits. Also include ALL personnel ($ and end strength/FTE’s) associated with these activities.

Consequence Management R&D: Includes any RDT&E resources expended in the area ofCbT Terrorism Consequence Management showing the program and purpose.

Consequence Management (CM) Technical Support R&D
CM COTS Product/Technology Integration
Other CM R&D

DARPA Biological Warfare Defense Program: That portion dedicated to domestic terrorism consequence management. Applied research program to develop and demonstrate technologies to thwart the use of biological warfare agents (including bacterial, viral, and bioengineered organisms and toxins) by both military and terrorist opponents (against US assets at home and abroad). That portion dedicated to domestic terrorism consequence management is reported here. DARPA’s primary strategy for accomplishing this goal is to create technologies applicable to broad classes of pathogens and toxins. Projects include:

1) real-time environmental sensing
2) external protection (including novel methods of protection, air and water purification, and decontamination)
3) consequence management tools
4) advanced medical diagnostics for the most virulent pathogens and their molecular mechanisms
5) pre- and post-exposure medical countermeasures
6) pathogen genome sequencing

Intelligence Related Support: Collection and dissemination of terrorism-related information taken to oppose terrorism throughout the entire threat spectrum to include terrorist use of WMD and/or high explosives. This category will only be reported in the combating terrorism formats during the Program/Budget Review data collection cycle – not during the President’s Budget data collection.

Counter-Intelligence: All Army and Marine Corps tactical counterintelligence resources and all Army Security and Intelligence Activities CI resources will be reported in this tab. The Counterintelligence Field Activity will report CIFA resources that directly support force protection/combating terrorism activities. Counterintelligence is considered to include (but is not limited to) activities such as:

1) Terrorism Investigations
2) Surveillance and counter-surveillance teams
3) CI Terrorism analysis and production
4) Force protection source operations
5) Threat assessments
6) CI Terrorism collection
7) Route surveys
8) Intelligence staff support to deployed task forces

Intelligence Related R&D: Includes any DoD MIP RDT&E resources expended in the area ofCbT Intelligence Related Support (counter-intelligence), showing the program and purpose.
Combating Terrorism Supporting Detail Definitions (Continued)

Intelligence Related (IR) Technical Support R&D/IR COTS Product/Technology Integration
Intelligence Related (IR) Technical Support R&D/Other IR R&D

CATEGORIES NOT TO BE REPORTED IN COMBATING TERRORISM DETAIL:
Intelligence - Not reported in this TAB: NIP or MIP funding and personnel, such as (but not limited to):
  - Terrorism collection (generally HUMINT, possibly SIGINT)
  - Terrorism analysis and production (excluding CI)
  - Terrorism watch centers
  - Terrorism indications and warning
  - Intelligence staff support to deployed task forces

The Director, National Intelligence will report related intelligence support in accordance with the PPI, Section one, Part V, “Data Formatting and Economic Instructions,” “Intelligence Programs” as part of the NIP instructions.

Information Assurance - Not reported in this Section: Includes assuring readiness, reliability, and continuity of information assets, systems, networks, and their functions, protecting information systems against penetration/exploitation, providing the means to re-establish vital information system capabilities effectively and efficiently. Examples include Computer Emergency Response Teams (CERTs), and computer network security “fire walls.”

Counterproliferation - Not reported in this format: Chem/Bio Defense Program and WMD.

Instructions
1) Report only those assessments addressing DoD standard 26, E3.1.1.26.4-.7 higher headquarters vulnerability assessments. Note that the standard requires an assessment of all installations at least once every three-(3) years.
2) Provide by country code and component the total number of installations.
3) DoDEA will report this information for all schools located off post.
4) Provide by country code and component the number of installations that contain family housing, VIP Housing, and or DoDES facilities. These will not add up to total installations.
5) Provide by country code and component the cost and number of assessments planned for future years and conducted in the prior and current years.
6) Provide total military, civilian and contractor manpower required to conduct assessments.
7) TOA is entered in dollars thousands ($000).
8) Military personnel are entered as End strength and Civilians and Contractors as FTEs.
9) See Appendix A for reporting requirements for your organization.

**AssessmentDetail**: (Closed List)
- **Assessment Capability**: Number of Installations that can be assessed with the current teams.
- **Assessments Conducted**: Number of assessments conducted by country for 200–5-2006.
- **Assessments Planned**: Number of assessments planned by country for 2007-2013.
- **Civilian FTEs**: Number of civilian personnel conducting assessments.
- **Contractor FTEs**: Number of contractor personnel conducting assessments.
- **Installations with DoDES Facilities**:
- **Installations with Family Housing**:
- **Installations with VIP Housing**:
- **Military End-Strength**: Number of military personnel conducting assessments.
- **TOA**: Total funding programmed to conduct vulnerability assessments by country code.
- **Total Installations**: Total number of installations by component by country should be obtainable from the Installation Summary.

Total Funded BRAC Projects

Exhibit 3b-MILCON & BRAC
Instructions for Major Range and Test Facility Base (MRTFB) Budget Exhibits

MRTFB-1 FINANCIAL SUMMARY

The MRTFB-1 is the basic, central exhibit for the Major Range Test Facility Base program and budget review submission. All other exhibits are related to this exhibit. The MRTFB-1 reflects total funds from all sources to be expended at each MRTFB activity. The instructions for preparation and definitions are in the following paragraphs. For each line entry, a fully comparable figure will be entered in each of the five columns.

The amounts reflected in the institutional entries are to be directly related to those amounts included in the appropriation submission of budget estimates to OSD/OMB.

Definitions and Instructions:

**Total Institutional Funding** - This line is for header purposes only and denotes the section dealing with the institutional funds that support the MRTFB activity’s mission.

- **Institutional (P.E._______)** - Denotes the funding which each Component provides directly to the activity for ongoing effort which cannot be ascribed to users of the activity. The financing program element number is to be entered in the parenthesis.

  - **In-House Effort** - The amount of the activity’s T&E Institutional funding which is devoted to supporting efforts conducted by government personnel at the activity.

  - **Contractor Effort** - The amount of Institutional funding expended by any contractor in support of the activity’s mission, either on-site or elsewhere.

  - **Military personnel** – Denotes the cost of the Military Personnel who are primarily assigned to the MRTFB activity for institutional and direct user support activities. This line does not include costs for Military Personnel assigned to non-T&E mission work.

**Total Institutional and Military Personnel Funding** – This line is the total of institutional funding, both-in-house and contractor, plus the cost of the Military Personnel which are assigned to the MRTFB activity for institutional and direct user support activities.

**Direct (User Funding)** - This line is for header purposes only, to denote the section dealing with funds received from customers for MRTFB activity mission efforts.

- **Parent Service** - Funds that come to the activity from users who are from within the same service but distinguished from the institutional funds.

- **Other DoD** - Funds from customers within DoD but not from the same service as the activity.

- **Other U.S. Government** - Funds from other U.S. Government customers outside the DoD

- **Foreign Military Sales (FMS)** - Funds received from FMS cases.
Foreign Government - Funds from foreign governments for other than FMS cases.

Commercial - Funds received from commercial customers, including DoD contractors that do not have a DoD program sponsor.

Support to Training (Non-add) – Customer funds from any source received by the activity to support any DoD training mission. These funds are reflected in the Total Customer Direct Funding line and are reflected here separately as a non-add line item only.

Other Non-T&E Support (Non-add) – Any other customer funds besides support to training that do not result in T&E work. The specific category of support should be reported if the funding level exceeds $1 million dollars in any given fiscal year. These funds are reflected in the Total Customer Direct Funding line and are reflected here separately as a non-add line item only.

Total Institutional, Military Personnel and Direct - The sum of the amounts in the Total Institutional, Military Personnel and Total Direct lines.

Other Funds-T&E Mission – This line is for header purposes only and denotes the section dealing with funding that directly supports the T&E mission but which is not included in the institutional, direct and military personnel items elsewhere on the exhibit. Additional lines may be added as required to identify all funds that directly support the T&E mission. The intent is to accurately reflect funds received from all sources to support the MRTFB’s overall T&E mission and to facilitate comparability across the Services. If additional categories are required to reflect the total “institutional” funding that is required for the activity, such as Environmental Compliance, additional lines should be added.

T&E Base Operating Support (BOS) – Funds for T&E base operating support costs. Do not include costs already identified in the MRTFB institutional funding line above. Provide the program element number for each entry.

T&E Mission SRM (Sustainment) – Funds for T&E sustainment costs. Do not include costs already identified in the MRTFB institutional funding line above. Provide the program element number for each entry.

T&E Mission SRM (Restoration and Modernization) – Funds for T&E restoration and modernization costs. Do not include costs already identified in the MRTFB institutional funding line above. Do not include restoration and modernization costs paid from the Improvement and Modernization funding lines.

Military Construction (MILCON) – Total of MRTFB MILCON projects from Exhibit 3-b.

Minor Construction – Total of minor construction projects. Minor construction is defined as projects totaling $750K or less.

Base Re-Alignment and Closure (BRAC) – Total of MRTFB BRAC projects from Exhibit 3-b.

Improvement and Modernization (I&M) – Total funding provided to the MRTFB activity for improvement and modernization efforts. Do not include costs already identified in the MRTFB institutional funding line above.

Other Funds Applicable to the T&E Mission – Any other funding received by the MRTFB for costs associated with the MRTFB T&E mission.
Other Funds – Non-T&E Mission – This line is for header purposes only and denotes the section dealing with any other funding received by the MRTFB for efforts not identified in previous categories. Report individual activities by PE, purpose, and amount.

Total MRTFB Activity – The sum of the amounts in the Total Institutional, Military Personnel and Direct line, Other Funds – T&E Mission line, and Other Funds – Non-T&E Mission line.

MRTFB-2a, ELEMENT OF EXPENSE LISTING

For the Total Institutional and Direct funds entered on MRTFB-1 Exhibit, Financial Summary, provide a breakout by element of expense. The cost of Military Personnel should reflect the Full Time Equivalent (FTE's) military personnel cost associated with the T&E mission. The sum of the institutional and direct military personnel costs should equal the total on the MRTFB-1, Military Personnel line.

MRTFB-2b, SCHEDULE OF INCREases AND DECREASES

Provide a several sentence description/justification of each increase and/or decrease, covering year-to-year changes in the total institutional funding entry on the MRTFB-1 Exhibit. Changes should address any financial increase or decrease that exceeds $500 thousand. There may be more than one increase or decrease to any or all entries on the MRTFB-1. Separately identify inflation and civilian pay increases. Identify any changes in T&E capability regardless of the amount of funding, to include elimination of any facilities, moth balling, etc.

MRTFB-2c, WORKYEARS

Submit a numerical summary of military, civilian, and contractor Full Time Equivalent (FTE) workyears. Civilian and contractor workyears should be divided into those that are institutionally funded and those that are reimbursed by direct user funding. Military workyears should also be reported in the category of work that is supported whether the workyears are reimbursed or not from direct users, i.e. military workyears used to perform T&E customer work should be shown as direct workyears.

The workyears reported in the Institutional category should reflect only those workyears funded from the institutional program element of the MRTFB. Workyears funded by “Other Funds – T&E Mission”, such as BOS and SRM, should be reported as “Other” workyears. Workyears funded by sources identified on the MRTFB-1 as "Non-T&E Support Direct" should not be reported in this exhibit.

Changes in workyears between fiscal years that exceed 10 percent in any category should be addressed in the narrative section of this exhibit.

MRTFB-2d, SOURCE OF DIRECT FUNDS

Identify by major program, the source of the Direct Funds contained in MRTFB-1, Direct User Funding.

For Direct Funding – Customer, provide the following breakout: For the parent service RDT&E and O&M funds, the Program Element, title, Budget Activity Code (BAC), and appropriation descriptors must be provided. For Parent Service procurement appropriations, provide a list of customers greater than $1M for any FY and group smaller customers at the appropriation level. For Other DoD, provide a list of customers by appropriation and Service. For Other U.S. Government, provide a list of customers by Agency. For FMS and Foreign Government, provide a list of customers by country/program and for Commercial, provide a list of customers by
company or program. This section should reflect both test and non-test customer funds.

For Direct Funding – Non-Customer, provide a one-line summary by type of funding. Include Direct funding that is not customer related such as inter-organizational miscellaneous reimbursements as well as pass-through and transfers sent off the MRTFB. This section is not reflected on MRTFB-1.

For unidentified workload, enter estimates of Unidentified Workload in the appropriation (for RDT&E include data by budget activity) that best reflect historical workload. It is acceptable to group small efforts into one multiple line item, but groupings funded by Parent Service appropriations should not exceed ten percent of any category

**MRTFB-3a, IMPROVEMENT & MODERNIZATION SUMMARY**

Provide a project level listing covering fiscal years from PY-1 through the BY+1. For projects that extend beyond the BY+1, include the cost to complete. Ensure that the exhibit includes all improvement and modernization (I&M) anticipated for the activity, whether the funding source is institutional, the parent Service T&E program element(s), customer funding or CTEIP funding.

Report all I&M projects, regardless of funding source, which exceed $200 thousand in any single fiscal year or $1 million cumulatively. List each project by appropriation and program element.

For any project exceeding $1 million in any year or cumulative funding of $5 million, including the projects not funded, provide summary data that includes potential benefits, cost savings and capability improvements in the form of a quad chart. Use an asterisk to indicate the projects meeting this threshold on the total project-level listing. Quad charts should include the following detail:

**Project Title:**
(1) Description - Concise description of what is to be acquired, where it will be located, its relationship to other upgrades at this facility or other DoD facilities. Identify whether the effort is required to provide an enhanced capability or whether it modernizes an existing capability.
(2) Requirements/Payoffs - Specify the operational requirement being addressed by the project. If it is required to provide an enhanced capability, list the programs that will benefit and provide the required operating date. If required as an improvement to an existing capability, provide a payback date and the schedule for retirement of existing equipment that will become obsolete as a result of the upgrade. Discuss what other alternatives and what cross-service opportunities were considered in the review of this requirement.
(3) Tests to be Supported - List the programs and tests to be supported by the I&M project. Indicate the acquisition category for each program that will be using the upgraded equipment or facility.
(4) Schedule - Provide the critical milestones for the project. Include the approval date of the operational requirements document, the date of TERIB and TRMC review, the contract award dates, IOC and FOC.
(5) Funding Profile - Provide total funding plan, including all funding sources, for development through FOC and the follow-on sustainment costs. Funding should be consistent with that identified in the MRTFB-3a, Summary of I&M Projects, and with that included in the other R&D program and budget review submission exhibits.

Quad charts prepared for TRMC reviews can be used for the program and budget review submission as long as all of the requested information is included. Indicate the projects not funded in the Requirements section along with a statement indicating why it was not funded.
MRTFB-3b, MILITARY CONSTRUCTION AND BASE REALIGNMENT AND CLOSURE PROJECTS

Provide summary data for all Military Construction (MILCON) and Base Realignment and Closure (BRAC) projects that are programmed to support the MRTFB mission at the activity and are funded in either PY-1, PY, CY, BY and BY+1 of the Program Budget Submission.

For funded MILCON and BRAC projects, identify by fiscal year the individual funded projects with the same title as the approved DD Form 1391.

For Planned MILCON projects, identify by fiscal year the projects that are planned for the MRTFB through the FYDP period.

The total funded projects listed on this exhibit should match the MRTFB Exhibit-1 Military Construction and BRAC funding line.

Exhibit T&E-1, Test and Evaluation  (Page 1 of 1)
Instructions for Exhibit T&E-1, Test and Evaluation

Instructions for Exhibit T&E-1, Test and Evaluation

1. Purpose.

   A. The Exhibit T&E-1 is the Test and Evaluation (T&E) funding exhibit for the Program and Budget review. It consists of tabular and narrative data describing the funding for T&E of the Major Defense Acquisition Programs (MDAP) as specified in DoD 5000.1 and Special Interest Programs identified in the Program Objective Memorandum (POM) Instructions, Table C-1. This reporting process is accomplished on-line using the Select & Native Programming Data Input System (SNaP) located at: http://snap.paee.osd.smil.mil. Note: The SNaP system operating instructions as specified in the Programming and Budgeting Data Requirements on the SNaP system will supersede the instructions identified in this document if they are different.

   B. This exhibit reflects total funds included in the above-specified systems/programs for T&E regardless of what organization performs the T&E. It does not include funds in T&E programs, such as Major Range and Test Facilities Base (MRTFB) direct funding, used to provide services on a nonreimbursable basis to weapon systems.

2. Entries.

   A. Instructions for Completing the Test & Evaluation Database

      (1) Provide Test and Evaluation Detail by Funding Type for Major Defense Acquisition Programs by Treasury Code, Budget Activity, Budget Line Item (BLI) and Program Element (PE), and Facility Type.

      (2) Provide narrative for all detail provided in a Word Document organized by the following:

         (a) Program Description: For each Program Element/Project provide a brief description of the major program and major changes from the most recent President’s budget request and the reason for the changes.

         (b) T&E Program/Project Description: For each major T&E Program/Project, exceeding $1 million in a single year or $5 million over the life of the program describe the program/project, provide major changes from the most recent budget baseline and the reasons for the changes. Divide the discussions into Development Test and Evaluation (DT&E), Operational Test and Evaluation (OT&E), and Live Fire Test and Evaluation (LFT&E). Within each T&E type, distinguish between contractor and government activities and include data on articles funding and the number of articles. For facilities provide a narrative to justify as required in the T&E Facilities entries in the Tabular Data Worksheet (above).

         (c) T&E Milestones/Schedules: Identify by date, the major milestones and scheduled T&E events (PT 3A, OT2, etc.) for each T&E program, noting deviations and reasons from what is stated in the approved Test and Evaluation Master Plan (TEMP).
Instructions for Exhibit T&E-1, Test and Evaluation (Continued)

(d) Approved TEMP Funding: Provide the difference (delta) in funding from the funding included in the most recently approved TEMP and provide a brief discussion of the reason for the difference.

(e) Funding: Briefly describe the use of the funds.

(f) Facilities Justification: Describe the reason for use of government or contractor facility. If capability is duplicated provide reasoning.

B. Definitions

(1) Organization: The POM reporting entities are directed to submit this data requirement. For a complete list of organizations required to submit a T&E-1 Exhibit, see Appendix A of the Programming and Budgeting Data Requirements (PBDR).

(2) Program Control Numbers (PNO) Code: Three-digit numeric code that identifies MDAP programs. If program is not an MDAP program leave blank. PNO codes are listed on the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) website at: http://friends.acq.osd.mil/ara/dab_oipt/schedule/mdaplist.html.

(3) T&E Type:

(a) DT&E: Developmental Test and Evaluation (DT&E) is any engineering-type test used to verify status of technical progress, verify that design risks are minimized, substantiate achievement of contract technical performance, and certify readiness for initial operational testing. Development tests generally require instrumentation and measurements and are accomplished by engineers, technicians, or soldier operator-maintainer test personnel in a controlled environment to facilitate failure analysis.

(b) OT&E: Operational Test and Evaluation is the field test, under realistic combat conditions, of any item of (or key component of) weapons, equipment, or munitions for the purpose of determining the effectiveness and suitability of the weapons, equipment, or munitions for use in combat by typical military users.

(c) LFT&E: Live Fire Test and Evaluation is full-up, system-level survivability or lethality testing of a covered system, major munitions program, missile program, or product improvement to a covered system, major munitions program, or missile program before it can proceed beyond low-rate initial production.

(4) Treasury Code: The Treasury Code is a defined set of four-digit numeric codes provided by the Comptroller that identifies resource types.

(5) BA Code: The Budget Activity Code as defined by OUSD (Comptroller), in the Financial Management Regulation
Instructions for Exhibit T&E-1, Test and Evaluation (Continued)

(6) Budget Line Item Number: Provide the Activity Group and Sub-Activity Group (SAG) if the appropriation is O&M; the Project Number as used in the R2 report for RDT&E; Line Item if Procurement; Project Number if MilCon; and Activity Group and Customer if Revolving funds.

(7) Program Element (PE): The PE applies to RDT&E, Procurement and O&M appropriations. The PE is up to ten-digits in length, a seven-digit numeric identifier followed by up to three-digits alphanumeric code for Future Years Defense Program (FYDP) organization.

(8) Funding Source:

(a) **Government:** Resources, facilities, and capabilities that are owned by the U.S. Government.

(b) **Contractor:** Resources, facilities, and capabilities that are owned by a private company or firm.

(c) **Article:** An individual system or subsystem to be subjected to the test process

(9) Funding Type:

(a) **Facilities:** Includes all funding for provision of T&E capability through investment in plant and equipment (non-instrumentation) at facilities by funding source. For Government facilities these costs include all funding included as reimbursable orders (customer funding) to the Major Range and Test Facility Base and other installations.

(b) **Instrumentation:** Includes all funding for provision of T&E instrumentation (non-portable) by funding source.

(c) **Targets and Threat Simulators:** Includes all funding identified for targets and threat simulators by funding source.

(d) **Other Costs:** Include any additional funding not captured in the other Funding Types for performing T&E at facilities by funding source

(e) **Articles Funding:** Includes the funding for test articles to support the T&E planned for the system

(f) **# Articles:** Provide the number of test articles to support the T&E planned for the system by year of delivery of the article.

C. Business Rules
Instructions for Exhibit T&E-1, Test and Evaluation (Continued)

(1) Project or Line Item Number and Title relationship—A project or line item number can only have one title. When users add new numbers they will be prompted to add the corresponding title. The new title will only be valid with the new number.

(2) O&M --Requires funding entries for fiscal years only.

(3) Funding Source = Article, report a Funding Type = Articles funding and # of Articles.

**Explanation of Funding Changes**

*Provide a narrative explanation (in program terms) for any increase/decrease that is in excess of the estimated rate of inflation. This explanation of increase/decrease is required for changes between the PY and the CY, between the CY and the BY1, and between the BY1 and the BY2.*

**Notes:**

1. All totals displayed must equal amounts reported in object class 25.1.
2. FFRDC - Federally Funded Research & Development Centers.
3. A separate PB-15 must be prepared for each appropriation/fund.
4. A summary PB-15 must be prepared when consulting services are funded from more than one appropriation/fund.
Instructions for Exhibit PB-15 Advisory and Assistance Services

ADVISORY AND ASSISTANCE SERVICES
Instructions for Exhibit PB-15

BACKGROUND: The purpose of the exhibit is to provide Congress with actual estimates on the amount spent by DoD on advisory and assistance services which are utilized to enhance, assist, or improve the ability of government employees to make decisions on governmental processes, program, and systems. Congressional concern stems from both the cost and nature of advisory and assistance services. When contractors provide advice or assistance that may affect decision-making, influence policy development, or provide support to project or program management, it is essential to ensure that the contractor's performance is free of potential conflicts of interest and does not impinge upon the performance of inherently governmental functions by government employees. As such, advisory and assistance services require an appropriate degree of enhanced management and oversight. When using contractor provided products, final decisions, or actions must reflect the independent conclusions of DoD officials. Advisory and Assistance Services (object class 25.1) include services acquired by contract from non-governmental sources that provide management and professional support services; studies, analyses, and evaluations; and engineering and technical services, as defined below.

The definitions indicated below have been substantially revised to incorporate the changes indicated in section 911 of the National Defense Authorization Act for FY 1999 (codified in section 2212(b) of title 10 U.S.C.).

ADVISORY AND ASSISTANCE SERVICES DEFINITION (Object Class 25.1): Obligations for advisory and assistance services acquired by contract from non-governmental sources (including Federally Funded Research and Development Centers (FFRDCs) and non-FFRDCs) to support or improve organization policy development, decision making, management, and administration; support program and/or project management and administration; provide management and support services for Research and Development (R&D) activities; provide engineering and technical support services; or improve the effectiveness of management processes or procedures. The products of advisory and assistance services may take the form of information, advice, opinions, alternatives, analyses, evaluations, recommendations, training, and technical support. Object class 25.1 consists of the following three categories:

Management and Professional Support Service: This category includes funding for contractual services that provide engineering or technical support, assistance, advice, or training for the efficient and effective management and operation of organizations, activities (including management and support services for R&D activities), or systems. These efforts are closely related to the basic responsibilities and mission of the using organization and contribute to improved organization of program management, logistics management, project monitoring and reporting, data collection, budgeting, accounting, performance auditing, and administrative/technical support for conferences and training programs.

Studies, Analyses, and Evaluations: This category includes funding for contractual services to provide organized, analytic assessments to understand or evaluate complex issues to improve policy development, decision making, management, or administration and that result in documents containing data or leading to conclusions or recommendations. Those services may include databases, models, methodologies, and related software created in support of a study, analysis, or evaluation.

Engineering and Technical Services: This category includes funding for contractual services that take the form of advice, assistance, training, or hands-on training necessary to maintain and operate fielded weapon systems, equipment, and components (including software when applicable) at design or required levels of effectiveness.

Instructions for Exhibit PB-15 Advisory and Assistance Services (Continued)

The following exemptions from DoD 4205.2 describe various contracted services that are not advisory and assistance services. Revisions to DoD 4205.2 may change these exemptions. Any such changes will be highlighted in supplemental guidance prior to the program and budget review submission.

- Activities that are reviewed and/or acquired in accordance with the OMB Circular A-76 program.

Architectural and engineering services for construction and construction management services procured in accordance with the Federal Acquisition Regulation (FAR), Part 36. Work not related to construction as defined by Part 36, and that meets the A&AS definition under existing architectural and engineering contracts, shall come under the purview of this Guidance.

Day-to-day operation of facilities (for example, the Arnold Engineering Development Center and related facilities) and housekeeping services and functions (for example, building and grounds maintenance, and physical security).

Routine maintenance of systems, equipment, and software; routine administrative services; printing services; and direct advertising (media) services.

Initial training services acquired as an integral part of the procurement of weapon systems, automated data processing systems, equipment or components, and training obtained for individual professional development.

Basic operation and management contracts for Government-owned, contractor-operated facilities (GOCOs); for example, the Holston Army Ammunition Plant in Kingsport, TN. Any contract action meeting the A&AS definition and procured under the GOCO basic contract shall come under the purview of this Guidance.

Clinical and medical services for direct healthcare.

The ADP and/or telecommunication functions and related services controlled in accordance with Title 41, Federal Information Resources Management Regulation (FIRMR), Code of Federal Regulations, Part 201.

The ADP and/or telecommunications functions and related services exempted from FIRMR control pursuant to Title 10, United States Code (U.S.C.), section 2315 and reported in Budget Exhibit 43a, “Report on Information Technology Systems,” of DoD 7110.1-M.

Services supporting the policy development, management, and administration of the Foreign Military Sales Program that are not paid for with funds appropriated by the U.S. Congress. (Includes A&AS funded with appropriated funds and reimbursed by the foreign customer).

Services (for example, systems engineering and technical services) acquired by or for a program office to increase the design performance capabilities of existing or new systems or where they are integral to the logistics support and maintenance of a system or major component and/or end item of equipment essential to the operation of the system before final Government acceptance of a complete hardware system. Care must be exercised to avoid exempting services acquired to advise and assist the program office and/or manager for program and/or contractor oversight and administration processes, resource management, planning and programming, milestone and schedule tracking, or other professional or administrative services necessary in performing its mission.

Research on theoretical mathematics and basic medical, biological, physical, social, psychological, or other phenomena.

Auctioneers, realty-brokers, appraisers, and surveyors.

Services procured with funds from the Defense Environmental Restoration Account.
Instructions for Exhibit PB-15 Advisory and Assistance Services (Continued)

**COVERAGE:** This reporting requirement covers all DoD appropriations and funds. Consulting services acquired from contracts managed by other Government Agencies and paid for with DoD appropriations must be reported.

**PREPARATION REQUIREMENTS FOR EXHIBIT PB-15:** Each DoD Component must submit the PB-15 exhibit even if they are not procuring advisory and assistance services; negative replies are required. A separate exhibit is required for each appropriation and fund. For annual and multiyear appropriations, planned obligations should be shown in the year of the appropriation rather than the year the obligation is planned. Prior year columns should reflect actual obligations incurred plus additional obligations planned over the remaining life of that fiscal year appropriations. Current and budget year columns should reflect all obligations planned over the life of those appropriations. The Defense Working Capital Fund (DWCF) business areas should identify budgeted obligations in the year those obligations are planned for contracts in support of DWCF activity functions but not those in support of customer workload. The identification of advisory and assistance services in support of appropriations managed by one Component but executed by another Component, fund (e.g., DWCF), or through federally funded research and development centers is the responsibility of the appropriation fund manager. In determining whether a contract is for advisory and assistance services, the contracting or executing organization is not relevant. For example, advisory and assistance services in support of one of the Environmental Restoration transfer appropriations but executed by the Military Departments must be identified in appropriation exhibits submitted for that Environmental appropriation. Each Component will provide overall summary displays for their Component appropriations/funds totals.

**SUBMISSION REQUIREMENTS:** For the OSD/OMB program and budget review submission, the PB-15 exhibit will be submitted as a separate exhibit. For the President's budget submission to the Congress, the PB 15 exhibit will be included as an exhibit in Volume II - Data Book. Each Military Department and Defense Agency will provide an exhibit for each appropriation/fund. In addition, each Military Department and Defense Agency will provide a consolidated exhibit for all appropriations/funds under their control.

**The PB-15 exhibit should reflect the same resource amounts as identified in Object Class 25.1. Any discrepancies between the PB-15 and Object Class 25.1 must be fully explained. Each PB-15 exhibit is required to contain each appropriation manager's name and telephone number.**

</thead>
</table>

- Proposal number should reflect the number assigned via the Office of Legislative Council (OLC) and Unified Legislation and Budgeting (ULB) processes (e.g., MPP-01-B41A, OLC-100).

- Amounts should reflect cost or savings (-) included in the budget submission for proposals to be approved by the Congress.

- Provide a total for each proposal, a total for each appropriation/fund, and a grand total.

- The Component’s Budget Review Submission should include all approved proposals submitted through the ULB process.

- The Component’s Congressional Justification/Presentation submission should include all proposed legislation submitted through the OLC process, which have not been disapproved.

- The proposals must be fully funded for the budget year(s) and throughout FYDP.

- If the proposal impacts manpower, provide the end strength and workyear adjustments (average strength for military and FTE for civilians) by type of employment status.

1./ U.S. dollar value of program purchased with foreign currency at prescribed exchange rate. For the FY PY actual numbers, the value of the overseas program will agree with the obligations incurred at the budget rate reflected on the DD-Comp(M) 1506 report, and the Foreign Currency Fluctuations, Defense Report (MilPers) as of 30 September (See DoDEMR Volume 6A, Chapter 7).

2./ The amounts requiring conversion for military personnel Cost of Living Allowance (COLA) will be the Component’s (by country at prescribed rates) amount of COLA payments. Prepare separate exhibits for O&M, COLA and Basic Allowance for Housing (BAH) Overseas estimates. Also include a summary exhibit for the COLA and BAH appropriations.

3./ As prescribed in OSD guidance issued by OUSD (Comptroller) P/B. Express the foreign currency exchange rates in terms of units of foreign currency that can be purchased with one (1) U.S. dollar (e.g., 125.4900 Japanese yen per one U.S. dollar).

**INSTRUCTIONS**

Category/Organization/Appropriation/Fund: This exhibit provides manpower, payroll, and non-labor cost data directly related to the Major Headquarters mission. Data will be displayed by appropriation/fund (including Military Personnel) for all organizations listed in the DoD 5100.73, “DoD Directives Major Department of Defense Headquarters Activities.” Deviations from the DoDD 5100.73 must be approved by OSD. Additionally, this exhibit will separately identify the manpower and cost data by Combatant and Non-Combatant Headquarters Activities. The Secretaries of the Military Departments shall provide personnel strength and operating costs in Major DoD Headquarters Activities under their management control. In addition, they shall provide strength and operating costs of Service-provided personnel and funding in the U.S. Combatant Command Headquarters Activities in accordance with Commander-in-Chief programmed and Joint Staff approved levels. Service personnel and funding for the U.S. Special Operations Command shall be coordinated with the Commander-in-Chief, Special Operations Command (CINCSOC). Resources for International Military Headquarters are not to be reported in this exhibit; these costs are to be reported on the PB-55, International Military Headquarters below. A narrative explanation is required for all increases and decreases. Non-labor costs that are not directly related to the Major Headquarters mission such as Pentagon Renovation should not be reported in this exhibit. Components should footnote the items that are excluded. Organizations will be displayed according to the following categorization of Major Headquarters Activities. Manpower and TOA will be identified by appropriation or fund for each major headquarters category.

I. Combatant Major Headquarters Activities
   1. Combatant Commands*
   2. Service Combatant Commands*

II. Non-Combatant Major Headquarters Activities
   Defense-Wide Activities
   a. Departmental Activities
   b. Departmental Support Activities
   c. Functional Activities (Defense Agencies, Other)

III. Military Department Activities*
   a. Departmental Activities
   b. Departmental Support Activities
   c. Functional Activities

Total Summary by Category (i.e., Combatant/non-Combatant Commands) and by appropriation.
IV. Reconciliation of Increases and Decreases
   * To include direct reporting units, as appropriate.

Under “Total Obligations” TOA should be limited to costs directly in support of major headquarters and should not include operational elements of expense for programs centrally funded or managed at the headquarters but executed elsewhere in the Department. Classified data will be reported.

Under each appropriation/fund, manpower strengths and funds will be identified as direct or reimbursable.

Totals will be provided by categories listed above, e.g., Combatant Commands, Service Combatant Commands, etc.

Revolving funds that support headquarters activities will be reflected in the same fashion as appropriated funds.

A total summary by appropriation/fund and category (Combatant/Non-Combatant) must be provided.

National Guard and Reserve officers serving on active duty and performing duties described in 10 U.S.C. 10211 will be excluded from this exhibit.

Numbers reported in this exhibit must be consistent with the numbers reported in the Components’ budgets and accompanying the FYDP, as identified by program elements designated as major headquarters activities.

THIS EXHIBIT IS REQUIRED WITH THE PROGRAM AND BUDGET REVIEW SUBMISSION AND WITH THE PRESIDENT’S BUDGET SUBMISSIONS.

HOWEVER, FOR THE PRESIDENT’S BUDGET SUBMISSION, THIS EXHIBIT MUST BE PROVIDED TO THE OPERATIONS DIRECTORATE NO LATER THAN JANUARY 22 IN ORDER TO BE INCLUDED IN THE “OPERATION AND MAINTENANCE OVERVIEW” JUSTIFICATION BOOK.

POC: Phone No.

**Explanation of Changes Between Fiscal Years:** (Provide an explanation of increases and decreases between fiscal years.)
Exhibit PB-23 Acquisition, Technology and Logistics Workforce Transformation Program (Continued)

**Acquisition, Technology and Logistics Workforce Transformation Program Exhibit Instructions**

**Background:** Section 912(b) of the National Defense Authorization Act for FY 1998 required the DoD to adopt and implement a new definition of the Defense acquisition workforce. This new definition is based on specified organizational and occupational criteria that are described in the Jefferson Solutions technical report “Identification of the DoD Key Acquisition and Technology Workforce, DASW01-98-C-0010, May 1999.” This report is available from the DoD Acquisition Education, Training, and Career Development office at (703) 681-3464.

The final report of the Defense Acquisition 2005 Task Force, entitled “Shaping the Civilian Acquisition Workforce of the Future,” set forth many recommendations aimed at improving the workforce. The report included 31 initiatives, the first of which was to develop and implement human capital strategic plans. The Components have begun to develop strategic plans. Other important initiatives related to recruiting, hiring, career development, workforce information, and retention. In March 2002, the Department reported to the Congress on the status of these recommendations and indicated that many are now being implemented.

**Display:** In order to provide the required congressional reports, the acquisition, technology and logistics workforce must be identified. Therefore, each Component is required to submit the exhibit PB-23. This exhibit must be submitted for both the Program and Budget Review Submission and the President’s Budget. This exhibit displays manpower categories (active-duty military end-strength (E/S) and civilian full-time equivalents (FTEs)) by career field for each fiscal year. In addition to meeting congressional reporting requirements, this information will provide insights about how the Components plan to transform their workforces consistent with the Department’s overall transformation program. The exhibit also displays funding for a selected group of the Task Force’s initiatives currently in implementation. This exhibit is submitted on-line using the Select & Native Programming Data Input System (SNaP) located at: http://snap.pae.osd.smil.mil.

**Note:** The SNaP system operating instructions as specified in the Programming and Budgeting Data Requirements on the SNaP system will supersede the instructions identified in this document if they are different.

Each Component must provide manpower for the designated career fields for each fiscal year, along with the TOA associated with the workforce. In addition, the Components are encouraged, but not required, to provide funding information for the specified initiatives. Recruiting initiatives focus on marketing and the Student Educational Employment Program, along with administrative requirements to support the program. Hiring initiatives will address bonus programs, payments for permanent change of station, student loan repayment, and supporting administrative costs. Career development includes training, continuous learning, assignment and rotation programs, industry exchanges and related administrative costs. Workforce information initiatives relate to tracking and reporting systems and programs to promote workforce communications. Retention initiatives include bonuses, annual awards, telecommuting programs, programs to fund licenses, and supporting administrative programs.

*Negative replies are required.*

V. TOTAL COMPENSATION

A. Foreign National Direct Hires
   1. FTEs funded solely by U.S.
   2. FTEs funded by host nation cash payments to U.S.
   3. FTEs funded by host nation assistance-in-kind

B. Foreign National Indirect Hires
   1. FTEs funded solely by U.S.
   2. FTEs funded by host nation cash payments to U.S.
   3. FTEs funded by host nation assistance-in-kind

C. U.S. Direct Hires
   1. FTEs funded solely by U.S.
   2. FTEs funded by host nation cash payments to U.S.
   3. FTEs funded by host nation assistance-in-kind

D. Total Hires
   1. FTEs funded solely by U.S.
   2. FTEs funded by host nation cash payments to U.S.
   3. FTEs funded by host nation assistance-in-kind

1. The HNS is defined as those amounts paid in cash to the U.S. or provided as assistance-in-kind by a Host Nation to defray the costs of U.S. forces permanently assigned in that country during peacetime. Assistance-in-kind (AIK) includes any support provided without charge by the Host Nation (i.e., Japanese local national labor cost sharing). This exhibit is to be completed by country. Part II of the Exhibit is to be completed by country by appropriation. Additionally, complete the exhibit summarizing data for all countries. Similarly, provide a summary of Part II by appropriation. Cost and civilian end strength estimates are to reflect host nation support contributions only for activities supported by appropriated funds.

2. Excludes non-appropriated funded activities.

3. Personnel costs are to be consistent with OP-8 budget exhibits.
DEFINITIONS

**Exchange Rate Used** – Rates should be based on approved budgeted rates.

**Inflation Rates Used** - Indicate the inflation factor used in all calculations provided in the HNS exhibit. If there is a different rate used within non-labor categories, list the items separately. Be sure all amounts shown are adjusted for inflation.

**DIRECT SUPPORT**

- **Rents** - The amount of lease/rental payments by the Host Nation Government for the use of private property by U.S. forces.

- **Labor** - The amount of payments by the Host Nation for U.S. Direct Hires, Foreign National Direct Hires, and Foreign National Indirect Hires.

- **Percent of Labor Covered Under Agreement** - Indicate the percentage of U.S. forces labor costs paid by HNS.

- **KATUSA Labor** - This category is for Korea only and is the amount of payments made by Korea for Korean Augmentees to the U.S. Army.

- **Utilities** - The amount of payments by the Host Nation for U.S. forces use of on-base and off-base electricity, heating fuels, water, and sewer. Indicate the percentage of U.S. forces utility costs paid by HNS.

- **Facilities** - The amount of Host Nation payments for the planning, design, construction (PDC) and sustainment and repair of facilities used by U.S. forces. Host nation payment for residual value of property turned over to host nations due to base closures is not to be included as HNS.

- **Maintenance and Repair** - The amount of Host Nation payments for the maintenance and repair of U.S. forces’ facilities.

- **Facilities Improvement Program** - The amount of Host Nation payments for facilities for the PDC of projects such as family and bachelor housing, community support and recreation facilities, and utilities upgrade. It also includes operational support facilities such as hangars and hardened aircraft shelters.

- **Relocation Construction** - The amount of payments by the Host Nation for facilities for the PDC of projects associated with the relocation of U.S. forces primarily for the convenience of the Host Nation.
Instructions for completing the PB-28 Exhibits

1. Purpose.

The Department will collect both program and budget data through the SNaP (Select & Native Programming Data Input System) process. The Military Departments and applicable Defense Agencies will update the SNaP immediately upon completion of the program/budget decisions and budget lock by the Department. The SNaP system will reformat the data into congressional justification exhibits, which can be printed out by the respective Components and included in their justification materials. For Environmental Quality, Environmental Technology and Operational Range Sustainment and Environmental Management the Programming and Budgeting Data Requirements (PBDR) will be collected in PBDR exhibits PB-28, PB-28A and PB-28B. Components shall submit their exhibits through the Select and Native Data (SNaP) Input System located on the NIPRNet at https://snap.pae.osd.mil and on the SIPRNet at https://snap.pae.osd.smil.mil. The most current version of this exhibit will be found at these sites.

2. Coverage.

For the PB-28, each Component will be asked to enter data for each appropriation/fund inside the United States and territories as well as for each appropriation/fund for foreign (i.e. outside the United States and Territories) for cleanup activities overseas. (That is, those activities that would be funded in the Environmental Restoration Accounts if they occurred inside the United States).

3. Submission Requirements.

The PBDR data is to be submitted for the joint program/budget review and the President’s Budget Submission. The DoD Components shall prepare and submit separate narrative justification material for their respective programs. The narrative material shall describe significant and unique items contained in the material including at a minimum the following:

- justification supporting changes between fiscal years.
- amount of funds allocated for compliance actions related to operational, test and training ranges (e.g. Clean Water Act funds allocated to respond to compliance action at a training range)

For Environmental Technology funding, the SNaP system will obtain funding information from the FYDP database by program element and project number.

The data entry sheets required for the SNaP system for Environmental Quality are included on the following pages. Following the SNaP data entry sheets are examples of the PB-28, PB-28A and PB-28B exhibits produced by SNaP for congressional justification.

**Instructions**

1) Provide domestic and foreign environmental quality costs for compliance, pollution prevention, and conservation by program element and resource type by Environmental Cost and Program categories described below.

2) Provide narrative in word document explaining program changes between fiscal years by compliance, pollution prevention, and conservation.

3) See Appendix A for reporting requirements for your organization

**Definitions**

**Class**: System Field: Classification
- C: CONFIDENTIAL
- C/NF: CONFIDENTIAL//NOFORN
- F: FOR OFFICIAL USE ONLY
- S: SECRET
- S/NF: SECRET//NOFORN
- U: UNCLASSIFIED

**Component**: Identifies the duty status for military service units and defense agencies.
- Active:
- Guard:
- Reserve:

**Location**:
- Domestic: Inside the United States, District Of Columbia and U.S. Territories.
- Foreign: All areas outside Domestic

**EnvironmentalActivityCostType**:
- Compliance Non-Recurring: Compliance is as defined in DODI 4715.6, of April 24, 1996 Environmental Compliance. Include one-time costs associated with meeting federal, state, or locally directed requirements.
- Compliance Recurring: Compliance is as defined in DODI 4715.6, of April 24, 1996 Environmental Compliance. Includes ongoing costs for items such as manpower; education and training; permits and fees; sampling analysis and monitoring; supplies; data management, and recurring reporting, etc.
- Conservation Non-Recurring: Conservation is as defined in DODI 4715.3, of May 3, 1996 Environmental Conservation Program. Include one-time costs associated with meeting federal, state, or locally directed requirements.
- Conservation Recurring: Conservation is as defined in DODI 4715.3, of May 3, 1996 Environmental Conservation Program. Include ongoing costs for manpower, education and training; permits and fees, supplies, travel, data management, recurring reporting, and recurring updates for plans.
- Pollution Prevention Non-Recurring: Pollution Prevention is as defined in DODI 4715.4, of June 18, 1996 Pollution Prevention. Include one-time costs associated with meeting federal, state, or locally directed requirements.
Pollution Prevention Recurring: Pollution Prevention is as defined in DODI 4715.4, of June 18, 1996 Pollution Prevention. Include ongoing costs for manpower; education and training; supplies, travel, data management, recurring reporting, recurring updates for plans, and operating recycling facilities, etc.

Environmental Costs:
- Clean Air Act: Costs associated with this title are to be captured in Non-Recurring Compliance or Non-Recurring Pollution Prevention, as appropriate.
- Clean Water Act: Costs associated with this title are to be captured in Non-Recurring Compliance or Non-Recurring Pollution Prevention, as appropriate.
- Conservation Recurring: Include ongoing costs for manpower education and training at the aggregate level and at the program area. Include ongoing costs for permits and fees, supplies, travel, data management, and recurring reporting.
- Education & Training: Costs associated with education and training of personnel in environmental programs (including compliance, pollution prevention and conservation).
- Environmental Management Systems (EMS): Costs required to implement and maintain an EMS in accordance with DoD requirements. Includes cost for EMS audits, conformance declaration, and registration if applicable.
- Hazardous Material Reduction: Efforts to reduce the use of pollutant-producing products and hazardous materials.
- Historical & Cultural Resources: Baseline inventories of historic buildings, structures, and historical and archeological sites/environmental analyses to assess and mitigate potential cultural resource adverse actions. Mitigation to meet existing permit conditions or written agreements. Initial archeological materials curation. Development of integrated Cultural Resources Management Plans; and consultations with Native American Groups.
- Manpower: All recurring government (civilian and Military manpower costs) and contractor costs applicable to management of the environmental quality program (including Compliance, Pollution Prevention, and Conservation).
- Other Compliance Non-Recurring: Costs for Radon/Asbestos investigations and mitigation including facility demolition (if greater than 50% of the cost is required to meet Environmental Compliance standards). Also include Spill Response Plans, (other than Cleanup requirements, e.g. initial preparation of spill response plans); action to prevent pollution from ships; Toxic Substance Control Act compliance; and Federal Insecticide, Fungicide, Rodenticide Act Compliance (upgrade of pesticide storage facilities to meet regulatory standards).
- Other Compliance Recurring: Those costs for supplies (Spill team equipment, labels, drums, updating recurring plans such as Spill Response Plans, manifests, etc.). It also includes travel, National Pollution Discharge Elimination System permit records/reporting; biannual Hazardous Waste reporting (Resource Conservation Recovery Act Subtitle C); Clean Air Act inventories (routine/recurring reporting); Federal Insecticide, Fungicide, Rodenticide Act reporting; and Environmental Self-Assessments, etc.
- Other Natural Resources Non-Recurring: Management plans; develop other biological resource management plans; biodiversity conservation requirements; ecosystem management requirements; habitat restoration; public awareness/outreach related to specific legal requirements.
- Other Pollution Prevention Non-Recurring: This includes efforts to prepare and implement an acquisition strategy for Alternative Fueled Vehicles, (excludes AFV purchases or lease); conversion of regular vehicles to alternative fuels; source protection plans for safe drinking water; and other P2 efforts that do not fit in other categories.
- Overseas Clean-Up: One-time costs associated with meeting clean-up requirements directed in the Overseas Environmental Baseline Guidance Document and/or Final Governing Standards. (These costs would be paid for with Environmental Restoration Account funds if inside the United States. Additionally, they are a non-add memo entry only and are a subset of the foreign costs reported in the Non-Recurring Compliance headings.)
- Permits & Fees: Costs of environmental permits, licenses and fees to operate the Environmental Compliance program.
- Planning: Nonrecurring costs to meet federally directed requirements in the National Environmental Policy Act.
- Pollution Prevention Recurring: Ongoing costs for supplies, travel, data management, and recurring reporting.
- RCRA C-Hazardous Waste: Costs associated with this title are to be captured in Non-Recurring Compliance or Non-recurring Pollution Prevention, as appropriate.
**RCRA D-Solid Waste:** Costs associated with this title are to be captured in Non-Recurring Compliance or Non-recurring Pollution Prevention, as appropriate.

**RCRA I-Underground Storage Tanks:** Costs associated with this title are to be captured in Non-Recurring Compliance or Non-recurring Pollution Prevention, as appropriate. Compliance may be upgrading drinking water systems to meet environmental standards, e.g., backflow preventers. Pollution Prevention efforts may be well head protection efforts to prevent pollution of drinking water sources.

**Safe Drinking Water Act:** Costs associated with this title are to be captured in Non-Recurring Compliance or Non-recurring Pollution Prevention, as appropriate. Compliance may be upgrading drinking water systems to meet environmental standards, e.g., backflow preventers. Pollution Prevention efforts may be well head protection efforts to prevent pollution of drinking water sources.

**Sampling, Analysis & Monitoring:** The recurring cost that satisfy such requirements in environmental permits.

**Threatened & Endangered Species:** Threatened and Endangered Species and habitat inventories; biological assessments, surveys, or habitat protection for a specific listed species; mitigation to meet existing biological opinions/written agreements, including INRMPs; developing Endangered Species Management Plans.

**Waste Disposal:** The disposal of Federal and State regulated hazardous waste and disposal of excess depleting substances in the DLA stockpile. Include only those costs associated with packaging for transportation, treatment/disposal of hazardous waste and other special services that are paid for through a Hazardous Waste Disposal Vehicle (either through a Defense Reutilization and Marketing Service or directly). Do not include in-house costs such as manpower, supplies, or equipment purchase/maintenance.

**Wetlands:** Inventory and delineation of wetlands; wetlands mitigation to meet permit conditions/written agreements; as well as enhancements to meet Executive Order 11990 provision for "no net loss".

**Treasury Code:** Treasury Code is a defined set of four-to-six digit numeric codes from the Comptroller that identifies resource types. The list of Treasury Code values is located on the PDR Info page of the SNaP website ([https://SNaP.PAE.OSD.MIL](https://SNaP.PAE.OSD.MIL)).

**Program Element:** The Program Element is a primary data element in the Future Years Defense Program (FYDP) and generally represents aggregations of organizational entities and related resources. The PE is up to ten-digits in length, a seven-digit numeric identifier followed by up to three-digits alphanumeric code for FYDP organizations.

**Technical Issues:** If you are having difficulty with the data collection system—SNaP, contact the SNaP administrators via the SIRS button at the SNaP web site: https://snap.pae.osd.mil or call (703) 601-4860 EXT #107 OR #108.
Exhibit PB-28A Environmental Technology

|-------|--------------|--------|-----------------------|--------|--------|--------|--------|--------|--------|--------|--------|

**Instructions**
1) Provide total costs by appropriation and Environmental Program (i.e., Cleanup, Pollution Prevention, Compliance, Conservation, and Unexploded Ordnance) associated with the Environmental Technology Program.
2) Separately identify appropriation amounts by the budget activity code (BA1, BA2, etc.) for each Environmental Program.
3) Provide explanatory narrative in word document explaining program changes between fiscal years by environmental program.
4) OSD will separately identify SERDP and ESTCP amounts and the Military Departments are not to include these amounts in their program.
5) See Appendix A for reporting requirements for your organization.

EnvironmentalProgram: Environmental Technology Programs

Clean up: Cleanup is as defined in DODI 4715.7 of April 22, 1996. Include funding for innovative environmental technologies that improve the restoration process.

Compliance: Compliance is as defined in DODI 4715.6, of April 24, 1996, Environmental Compliance. Include funding for innovative environmental technologies that improve Compliance.

Conservation: Conservation is as defined in DODI 4715.4, of May 3, 1996, Environmental Conservation Program. Include funding for innovative environmental technologies that enhance the protection of natural and cultural resources, thereby sustaining mission readiness.

Pollution Prevention: Pollution Prevention is as defined in DODI 4715.4, of June 18, 1996, Pollution Prevention. Include funding for innovative environmental technologies that reduce or eliminate pollution.

Unexploded Ordnance: Unexploded ordnance (UXO) is as defined in 10U.S.C. 101(e)(5). Include funding for innovative environmental technologies that improve the UXO screening, detection, discrimination and recovery process.

Business Rules

Subject Matter Experts: Questions regarding this data requirement should be directed to Ms. Trish Huheey, 703-604-1846 and Mr. Shah Choudhury, 703-571-9067.

Technical Issues: If you are having difficulty with the data collection system—SNaP, contact the SNaP administrators via the SIRS button at the SNaP web site: https://snap.pae.osd.mil or call (703) 601-4860 ext. #107 or #108.
Exhibit PB-28B Munitions Response at Operational Ranges

**Instructions**

1. Report Range and Resource Detail for all operational test and training ranges to include active and inactive ranges as defined in Title 10USC, Section 101(e) (as revised by FY04 NDAA, Sec 1042).
2. For the Range Program -- Range inventory, report the following range detail—Number (#) of Ranges, Number (#) of Acres (Land Ranges), Number (#) of Square Miles (Water Ranges). Number (#) of Ranges with Environmental Range Assessments and Number (#) of Acres with Environmental Range Assessments (Land ranges), and Number (#) of Square Miles with Environmental Range Assessments (Water ranges).
3. The total number of Ranges Assessed cannot exceed the total number of Ranges. The total number of Acres Assessed cannot exceed the total number of Acres.
4. Enter the cumulative number of Ranges and Acres that either have been assessed or will be assessed by the end of each fiscal year shown.
5. Military Departments by Component and appropriate Defense Agencies report ranges in Acres and funds in $Thousands
6. Provide narrative in a Microsoft Word document that describes program changes and unfunded requirements.
7. This document is non-additive to the amounts displayed in Exhibit PB-28 Funds Budgeted for Environmental Quality. It displays the environmental funds dedicated to sustaining ranges but does not remove them from reporting under PB28.
8. The intent of this exhibit is to capture and display the identifiable environmental investments in Operational ranges, as part of the Training Range Sustainment Plan called for in Section 366 of the FY 2003 National Defense Authorization Act. 7)

**Definitions**

**Class:** System Field: Classification

- **C:** CONFIDENTIAL
- **C/NF:** CONFIDENTIAL//NOFORN
- **F:** FOR OFFICIAL USE ONLY
- **S:** SECRET
- **S/NF:** SECRET//NOFORN
- **U:** UNCLASSIFIED

**Component:** Military Departments report by Active, Guard and Reserve. Defense Agencies choose Defense Agency.

- **Active:**
- **DADW:** Defense Area Defense Wide. Used by non-service defense agencies.
- **Guard:**
- **Reserve:**

**RangeLocation:**

- **Domestic:** United States, District of Columbia, and U.S. Territories.
- **Foreign:** All areas outside Domestic.

**RangePrograms:**

- **Range Assessments:** Any assessment to determine the extent of environmental effects due to operational range activities.
- **Range Inventory:** Number and size of ranges total and those surveyed.
Range Response Actions: Actions to remediate munitions constituents or other contaminants that will have a deleterious effect on human health or the environment.

Range Sustainment Actions: Environmental Sustainment actions taken to preserve ranges over their perpetual life.

Range Management Activities:

All Environmental Range Response Actions: Any and all one-time actions to address the removal of munitions constituents or other environmental contamination on ranges, or to prevent release off of an operational range, including the design and implementation of response action. (Do not include cleanup actions covered under the Environmental Restoration Accounts – report these on Exhibit ENV 30).

Environmental Range Assessments: Any environmental assessment to determine the extent of environmental effects due to training and testing range activities, including any sampling, monitoring or analysis involved in the effort.

Integrated Natural Resource Management Plans: (including Sikes Act requirements) Identify any natural resource planning costs (including Integrated Natural Resource Management Plan (INRMP) costs) required to address Sustainment of operational ranges, including projects called for in signed INRMPs.

Land Ranges:

Other Range Assessment Costs: Any other assessment costs necessary to determine and document the extent of environmental effects of operational range activities.

Other Sustainment Actions: Any other assessment costs necessary to determine and document the extent of environmental effects of operational range activities.

Water Ranges:

Range Resource Detail:

# Acres with Environmental Range Assessments: The total number of acres on ranges where environmental range assessments have occurred or will occur in the future by fiscal year.

# of Acres: The total number of acres on the operational ranges, as defined in 10USC, Section 101(e).

# of Ranges: The total number of operational ranges under the jurisdiction, custody or control of the Component. Includes all designated land and water areas set aside, managed and used for range activities.

# of Square Miles:

# Ranges with Environmental Range Assessments: The total number of operational ranges where Environmental Range Assessments have or will occur, by fiscal year.

DWCF:

MilCon:

MilPers:

O&M:

Proc:

RDT&E:

Business Rules

1) MilCon is not an accepted resource type for the Range Program--Range Management.

2) Number of Ranges and Acres are reported with an Activity of Physical Detail and Range Program of Range Inventory only.

1. Provide a summary sheet of all appropriations/funds.
2. Provide narrative justification for changes from year to year
3. For each appropriation, include applicable breakout categories. For example, for activities funded by RDT&E appropriations, separately identify the amounts for each budget activity (BA):
   - BA1 - Basic Research, BA2 – Advanced Research, BA3 - Advanced Technology Development, BA4 - Demonstration/Validation,
   - BA5 - Engineering and Manufacturing Development, BA6 - RDT&E Management Support, and BA7 - Operational Systems Development.

Distribution by Appropriation/Fund
(Identify the amounts included above by appropriation and fund.)
    Total

BACKGROUND: Public Law 99-272, “Consolidated Omnibus Budget Reconciliation Act” of 1985, Subtitle C - Federal Motor Vehicle Expenditure Control of requires that each Federal Agency establish and operate a central monitoring system for motor vehicle costs and establish a data collection system and to report such data in support of the President’s budget. Guidance as to the definition and coverage of this requirement is provided by the General Services Administration in Federal Property Regulations. The vehicles used for military training, combat or tactical purposes are specifically excluded.

PREPARATION REQUIREMENTS: Every Component of the Department is required to complete a PB-41 Motor Vehicle Operations Exhibit. Negative replies are required. These will be used by the Office of the Under Secretary of Defense (Comptroller), Operations Directorate, 3C710 Pentagon, to prepare a consolidated exhibit, which will be provided to the Office of Management and Budget as required by OMB Circular A-11 (Section 100 – Additional Information Required After Passback). In order to meet the OMB schedule and include this information in the printed President’s budget request, the PB-41 exhibit for the Congressional Justification/Presentation must be submitted by January 5th. Include in the lower right hand corner, the date of preparation, and the name and telephone number of an individual responsible for answering questions concerning the submission.

Exhibit PB-41 Administrative Motor Vehicle Operations
Exhibit PB-42 Competitive Sourcing and Alternatives

DoD Component
FY BY1/BY2 OSD Submit/President’s Budget
Competitive Sourcing and Alternatives

Instructions: Each Service and Defense Agency/Activity is to submit this exhibit in Select & Native Programming Data Input System (SNaP) located at https://snap.pae.osd.mil. The most current version of this exhibit will be available at this site. Once loaded the data will be available in the Operations & Support Data Center. Program/Budget data displays will be produced through the Data Center. Questions about the SNaP interface should be referred to the Office of the Director (Program Analysis & Evaluation) Programming and Fiscal Economics Division (703) 697-0223.

The exhibit is composed of three parts. Part I displays costs and savings associated with A-76 studies. Part II displays the same information for Approved Alternatives. Part III will be calculated automatically from SNaP, so there is no need to enter summary data. Dollars and manpower are presented by appropriation throughout.

Dollars are reported in thousands with all numbers as positive numbers (costs and savings). Manpower savings are reported as end strength (ES) for military and reserve personnel and Full Time Equivalents (FTEs) for civilian personnel.

PART I
STUDIES: Report baseline manpower and dollars for all studies started (in the one PY reflected on the budget exhibit) and scheduled (CY, BY1, etc.) for competitive sourcing. Each activity should be reported in the year that the study is scheduled to be initiated. The annual cost of positions studied (total estimated compensation) should be reported even if you plan to outsource during the fiscal year. Report positions studied and cost by appropriation (e.g., O&M, Revolving Funds).

COST TO CONDUCT STUDIES: The cost to conduct studies is the cost associated with conducting the competitive sourcing study. The costs should reflect actual costs in the PY and the amounts budgeted in the other years to conduct the studies. In the narrative description section, discuss the methodology used to develop study costs and provide justification for significant deviations from the nominal average of $5,000 per FTE. Costs should be reported by appropriation.

TRANSITION COSTS: Report costs of transition to Most Efficient Organization (MEO) or contract. Such costs include severance pay, Voluntary Separation Incentive Pay (VSIP), etc. In the narrative section, discuss the assumptions used to determine transition costs including the categories of cost included.

MANPOWER SAVINGS: For military and civilian manpower reflect net savings for that year (not cumulative).

GROSS DOLLAR SAVINGS: Gross dollar savings should reflect total compensation associated with billets saved in that fiscal year (not cumulative). Gross savings should not be offset by the cost of studies or transition costs. In the narrative description, include a discussion of the methodology used to develop both manpower and dollar savings.
Exhibit PB-42 Competitive Sourcing and Alternatives (Continued)

**NET DOLLAR SAVINGS:** Net savings are equal to gross savings, offset by the Cost to Conduct Studies and Transition Costs. [Note: Net Dollar Savings will be calculated automatically by SNaP, so there is no need to enter data for this section.]

**PART II**

Same as above for all categories except Studies should reflect the information by Alternative. Each Alternative must be approved by OSD(AT&L) Housing and Competitive Sourcing.

**PART III**

Summarizes all categories. [Note: The summary will be calculated automatically by SNaP, so there is no need to enter data for this section.]

**Explanation of Changes:** For each category, provide an explanation of the changes between current year (CY) and biennial budget year 1 (BY1) and between BY1 and biennial budget year 2 (BY2); identify price & program growth between each year.

1/ Direct costs include those costs that can be directly attributed to the activity and include civilian pay and benefits, travel, training, supplies and equipment, contracts, FCC subsidy, etc.

2/ Indirect cost includes costs that are attributed to more than one activity and include rents, utilities, communications, minor construction, repair and maintenance, contracts, and engineering support.

Exhibit PB-52A_DoD Aeronautics Budget (Continued)

Instructions
Exhibit PB-52A_DoD Aeronautics Budget

1. **Purpose.** This exhibit identifies research and development funding for Aeronautics programs. The data are used to prepare the overall DoD input into the annual President's Aeronautics and Space Report which is prepared by the Office of Management and Budget (OMB). A copy of the final report is available for information in the OUSD (Comptroller) Investment Directorate.

2. **Submission.**
   a. Exhibit PB-52A should separately identify all RDT&E program elements providing funds in support of the development of systems, subsystems and components used in rotary and fixed wing aircraft.
   b. Data are to be provided in millions of dollars, using 3 decimal points.
   c. Submission of the required exhibit will be made in hard paper copy and in a DOS/Excel format.
   d. The submission of the completed exhibits to the OUSD (Comptroller) is due no later than 15 working days after transmission of the President's budget to the Congress.

3. **Entries.**

Exhibit PB-52A (Aeronautics Programs)

   a. **Program Title.** Insert the official program title as reflected in the R-1 budget exhibit.
   b. **Program Element Number.** Insert the official 7-digit plus organization program element designator as reflected in the R-1 budget exhibit.
   c. **Budget Estimate.** The completed exhibits are to reflect the estimated cost, as funded in the Future Years Defense Program (FYDP), by fiscal year for the period FY 20PY-2 through FY 20BY2 (the three prior years, the current year and the budget years). All amounts should be in then years (TY)
Exhibit PB-52B DoD Space Budget

DoD Space Budget

(Name of DoD Component)

**Purpose.** This exhibit identifies all funding for Space programs. The data from the DoD exhibit is used to support a myriad of Space Budget Justification requirements including Congressional Space Budget Justification and the DoD input into the President's Aeronautics and Space Report which is prepared by the Office of Management and Budget (OMB). The data are also used to support congressional hearings on space programs and to fulfill other various information requests regarding space-related funding.

*The PB-52B Space Budget will be compiled by the OUSD (Comptroller), Investment Directorate using Service/Agency input into the OD, PA&E-maintained FYDP database.*

<td>e</td>
<td>f</td>
</tr>
</tbody>
</table>

**Definitions**

- **Month:** Month of the fiscal year
- **E/S Beginning:** Civilian end strength at the beginning of the month
- **Gains:** Civilian end strength hires during the month
- **Separations:** Column d-f; civilian personnel losses during the month
- **Attrition:** Civilian end strength monthly losses not covered in columns e and f
- **Retire:** Number of civilian employees who retired during the month
- **RIF:** Number of civilian employees who separated due to reductions in force during the month.
- **Total:** Sum of columns d-g; total number of civilian separations during month
- **Net Change:** Net change of gains and separations (column c less column g)
- **E/S Revised:** End strength at the end of the month (column b plus column h)
- **FTE:** Full time equivalents. Enter full time equivalent for month.

The October, E/S Beginning (column b) is the same as the September E/S Revised (column i) of the previous fiscal year.
The September E/S Revised (column i) must match the end strength reported on other budget exhibits (OP-5, OP-8).
The Total annual FTE (total of column j) must match FTE reported on other budget exhibits (OP-5, OP-8).

This exhibit must be provided for the current year (FY CY) and the budget years (FY BY1 and FY BY2) for both the OSD/OMB Program and Budget Review Submission and for the President’s budget submission.

#### INSTRUCTIONS

**Category/Organization/Appropriation:** This exhibit will provide manpower, payroll, and non-labor cost data directly related to DoD personnel serving in the International Military Headquarters mission. Data will be displayed by appropriation/fund (including Military Personnel). A narrative explanation is required for all increases and decreases.

Manpower and TOA will be identified by appropriation or fund as displayed in the following example:

**FY BY1 Estimate**

</table>

- Under “Total Obligations” TOA should be limited to costs directly in support of International Military headquarters and should **not** include operational elements of expense for programs centrally funded or managed at the headquarters but executed elsewhere in the Department.
- Under appropriation, manpower strengths and funds will be identified as direct or reimbursable.
- Revolving funds that support headquarters activities will be reflected in the same fashion as appropriated funds.
- A total summary by appropriation, as well as a grand total, will be provided.
- Classified data will be reported.
- National Guard and Reserve officers serving on active duty and performing duties described in 10 U.S.C. 10211 will be excluded from this exhibit.
- Attached an addendum to provide a listing of organizational acronyms and their meanings used in this exhibit.

1/ Identify Post (U.S. Embassy, U.S. Consulate or U.S. Mission)
2/ Controlled Access Area: Authorized office positions to work within an area authorized to handle classified information
3/ Non-Controlled Access Area: Authorized office positions that work outside the CAA area
4/ Non-Office: Authorized positions not assigned a desk, office or workstation (includes custodians, laborers, warehouse staff, drivers, etc.)
5/ Never-Collocate: Authorized positions that work in non-USG owned or leased facility or other non-mission facilities

Instructions for Completing:
1. Report personnel assigned overseas under the Chief of Mission as of January 1st for the year reporting.
2. All COCOMs, Components and Defense Agencies that have personnel assigned overseas under the Chief of Mission must complete this exhibit.
3. Defense Agencies will report military personnel assigned to their agency.
4. Components (Army, Navy, Marine Corps and Air Force) will consolidate input reported by field units.
5. Marine Corps must identify Guard and Non-Guard totals

EXHIBIT PB-59 DoD Overseas Staffing Report

19-116
Instructions for Preparation of PB-60

INSTRUCTIONS FOR PREPARATION OF PB-60

1. Services are required to submit this exhibit at the end item level for the selected pilot programs.

2. The PB-60 provides essential materiel readiness and sustainability information for justification of the OSD and President’s budget estimates. The PB-60 metrics will incorporate all appropriations (i.e. Research and Development, Procurement, Operations and Maintenance) related to the specified end item.

3. “Materiel Availability” (MA) is a measure of the percentage of the total inventory of a system operationally capable of performing an assigned mission at a given time based on materiel condition. This can be expressed mathematically as the number of operational end items divided by the total population. Determining the optimum value for Materiel Availability requires a comprehensive analysis of the system and its planned use, including the planned operating environment, operating tempo, reliability alternatives, maintenance approaches, and supply chain solutions. Materiel Availability is primarily determined by system downtime, both planned and unplanned, requiring the early examination and determination of critical factors such as the total number of end items to be fielded and the major categories and drivers of system downtime. The Materiel Availability KPP (Key Performance Parameter) must include the total population of usable end items we have that is either functional or can be brought to functionality through maintenance/repair. The total life cycle timeframe, from placement into operational service through the planned end of service life, must be included. The service will express Materiel Availability on the exhibit as a number between 0 and 100. This metric should represent the average for the year that the entire population of systems is materially capable for operational use during the specified period (current year, budget year, budget year +1).

\[
Materiel\; Availability = \frac{\text{Number of End Items Operational}}{\text{Total Population of End Items}}
\]

4. “Materiel Reliability” is a measure of the probability that the system will perform without failure over a specific interval. Reliability must be sufficient to support the warfighting capability needed. Materiel Reliability is generally expressed in terms of a mean time between failure(s) (MTBF), and once operational, can be measured by dividing actual operating hours by the number of failures experienced during a specific interval. Reliability may initially be expressed as a desired failure-free interval that can be converted to MTBF for use as a KSA (Key System Attribute) (e.g. 95% probability of completing a 12-hour mission, free from mission-degrading failure; 90% probability of completing 5 sorties without failure, etc.). NOTE: Operating hours is operational hours and failure is not ready for issue. Single-shot systems and systems for which other units of measure are appropriate must provide supporting analysis and rationale. MTBF will be expressed on the exhibit as a numeric value representing time (hours) between failure during the specified period (current year, budget year, budget year +1, etc.).

\[
Materiel\; Reliability = \frac{\text{Mean Time Between Failure}}{\text{Total Operating Hours}} = \frac{\text{Total Operating Hours}}{\text{Total Number of Failures}}
\]

5. “Ownership Cost” provides balance to the sustainment solution by ensuring that the Operations and Support (O&S) costs associated with materiel readiness are considered in making decisions. Use of the Cost Analysis Improvement Group's O&S Cost Estimating Structure will ensure consistency and proper capitalization of existing efforts in support of this KSA. Only the following cost elements are required for this assessment:

EXHIBIT PB-60 Life Cycle Sustainment

(Page1 of 3)
Instructions for Preparation of PB-60 (Continued)

INSTRUCTIONS FOR PREPARATION OF PB-60 (Continued)

2.0 Unit Operations (2.1.1 (only) Energy (fuel, petroleum, oil, lubricants, electricity)); 3.0 Maintenance (All); 4.0 Sustaining Support (All except 4.1, System Specific Training); and 5.0 Continuing System Improvements (All). Base fuel cost on the full burdened cost of fuel. Costs are to be included regardless of funding source. The KSA value should cover the planned lifecycle timeframe, consistent with the timeframe used in the Materiel Availability KPP. Sources of reference data, cost models, parametric cost estimating relationships and other estimating techniques or tools must be identified in supporting analysis. Programs must plan for maintaining the traceability of costs incurred to estimates. The planned approach to monitoring, collecting, and validating operating and support cost data to supporting the KSA must be provided. For the purpose of this exhibit, Ownership Cost needs to be divided into annual ownership cost (dollars) for the specified period (current year, budget year, budget year +1).

Ownership Cost = O&S costs*

* Using the CAIG O&S Cost Estimating Structure Selected cost elements:
  2.0 Unit Operations (2.1.1 (only) Energy (Fuel, POL, Electricity))
  3.0 Maintenance (All)
  4.0 Sustaining Support (All except 4.1, System Specific Training)
  5.0 Continuing System Improvements (All)

6. “Mean Downtime” (MDT) is the average Total Downtime required to restore an asset to its full operational capabilities. MDT includes the time from reporting an asset down to the asset being available to unit to operate. MDT includes administrative time of reporting, logistics and materials procurement, and lock-out/tag-out of equipment for repair or preventative maintenance events. Criteria for failure must be consistent with criteria used for Materiel Reliability. MDT will be expressed on the exhibit as a numeric value representing the average number of hours between failures during the specified period (current year, budget year, budget year +1).

\[
\text{Mean Down Time (MDT)} = \frac{\text{Total Down Time for All Failures}}{\text{Total Number of Failures}}
\]

7. The metric sections of the exhibit must be populated with the sustainment goal for the associated metric in each fiscal year represented, the actual/projected metric based on the current budget submission in each fiscal year represented, and the associated data from which the metric is derived for each fiscal year represented (BSO must maintain traceability data for the Ownership Costs). The “Explanation” sections will provide, as necessary, what issues preclude reaching the sustainment goal including funding shortfalls by required year(s), appropriation, and line item/PE/SAG. The “Explanation” section should also be used to explain changes to metrics between submissions caused by external events, such as increased OPTEMPO, unplanned environment, etc.

### VOLUME 3, CHAPTER 2: “APPORTIONMENT/ REAPPORTIONMENT AND FUNDS DISTRIBUTION”

#### SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue and underlined font.

The previous version dated May 2015 is archived.

CHAPTER 2

APPORTIONMENT/ REAPPORTIONMENT AND FUNDS DISTRIBUTION

1.0 GENERAL (0201)

1.1 General (020101)

This Chapter provides information on the apportionment process, and the first level of funds distribution from the Office of the Under Secretary of Defense (Comptroller), Program/Budget (OUSD(C)/PB) to the Military Services and Defense Agencies. It includes guidance for the preparation and submission of the Apportionment and Reapportionment Schedule (Standard Form (SF) 132) required by Office of Management and Budget (OMB) Circular No. A-11. Refer to OMB Circular No. A-11 (Part 4, sections 120, 123, and Appendix F).

1.2 Legal Requirement (020102)

Apportionment is part of the government-wide system for the administrative control of funds. The legal requirement for apportionment is found in Title 31 (Money and Finance) of the United States Code (U.S.C.), at sections 1512 (Apportionment and Reserves), and 1513 (Officials Controlling Apportionments). Unless expressly exempted or automatically apportioned by OMB, all DoD appropriated, collected, and recovered resources require OMB approval through the apportionment/reapportionment process before they are available for distribution and legal obligation. Apportionments may contain quarterly and programmatic limitations on the face of the apportionment document (SF 132) and may provide more account specific guidance in the accompanying footnotes. Revisions to the previous apportionment, called reapportionment, reflect changes to resources previously authorized for obligation, including collections and recoveries of prior year obligations. Apportionments, including footnotes, are legally binding on the DoD.

1.3 Apportionment Level (020103)

The OMB manages and approves apportionments at the Treasury appropriation fund symbol (TAFS) level. Each TAFS is comprised of a Treasury departmental index, a period of availability to incur new obligations, and a Treasury account symbol. For example, a TAFS for the Military Personnel, Army Appropriation would be 21-20BB/20EE-2010, where BB and EE represent the fiscal year beginning point and ending point of authority to incur new obligations specified in appropriation and authorization acts.

1.4 Funds Allocation (020104)

Following approval of apportionment/reapportionment requests by OMB, OUSD(C)/PB allocates funds to the Military Services and Defense Agencies. Funds distributed by OUSD(C)/PB may be further subdivided through sub-allocation and sub-allotment to lower levels within the organizations or across organizations for execution.
2.0 REQUIREMENTS (0202)

2.1 Accounts Requiring Apportionment (020201)

All appropriations require apportionment, except appropriations and funds that are identified in the OMB Circular A-11 as exempt, or those expressly exempted by OMB pursuant to their authority under 31 U.S.C. 1516 (Exemptions). Contact OUSD(C), Program and Financial Control (P&FC) for a full list of accounts currently exempt from apportionment. Refer to OMB Circular No. A-11 (Part 4, sections 120.4 through 120.8).

2.2 Accounts Requiring Reapportionment (020202)

All accounts which must be apportioned must also be reapportioned for any upward adjustment of budgetary resources greater than $400,000 or 2 percent (whichever is lower) before the increased resources may be obligated. The unobligated balances brought forward in unexpired accounts must also be reapportioned annually. Refer to OMB Circular No. A-11 (Part 4, sections 120.48 through 120.51). Expired accounts are not apportioned. Transfer-only accounts are generally exempt from apportionment. OMB may require a written request to exempt these accounts from apportionment. These exemptions are processed through the OUSD(C), P&FC office. All accounts being reapportioned must be compared to the most current Report on Budget Execution and Budgetary Resources (SF 133), applying at a minimum, the standards in paragraph 020204 below.

*2.3 Funds Controlled and Distributed by OUSD(C)/PB (020203)

Initial distribution to the Military Services and Defense Agencies is the responsibility of OUSD(C)/PB for all funds appropriated by Congress; funds made available through above-threshold reprogrammings and transfers from other TAFS; legally authorized proceeds from donations, contributions, and sales of assets for replacement under the authority of section 21 of the Arms Export Control Act; reimbursable authority in accounts where it is not automatically apportioned; borrowing authority, contract authority, and for direct, non-reimbursable, collections. The assigned OUSD(C)/PB analyst for each appropriation account will allocate funds to the Military Services and Defense Agencies by means of funds authorization documents (FADs). Distribution will be made after funds are realized and apportioned as necessary. Distribution below the level of initial transfer to the Military Services and Defense Agencies will be the responsibility of the Services and Agencies. Transfer-only accounts are not available for obligation or outlay, and budgetary resources in such accounts will not be distributed directly from the transfer accounts; such funds are distributed using reprogramming procedures governed by chapter 6 of this Volume (Reprogramming of DoD Appropriated Funds) to the FAD for the recipient appropriation.

2.4 Periodic Review (020204)

Analysts responsible for monitoring the appropriation accounts will review apportioned amounts a minimum of four times per year and make any necessary adjustments. The review will occur using the SF 133s from the following months:
Quarter 1: December
Quarter 2: March
Quarter 3: June
Quarter 4: July  The update will be included on the initial apportionment for the next fiscal year which includes the estimated, unobligated balance brought forward.

Necessary adjustments will be submitted to OMB to allow at least 10 business days processing time for any necessary reapportionments. Most accounts will not require quarterly updates if the required OMB footnotes are present on the apportionment. Refer to section 02030. Reference paragraph 020202 for the thresholds that apply to these quarterly review apportionments. At a minimum, the review will include the following:

2.4.1. Confirm unobligated balances forward, appropriations received, and permanent reductions to amounts reported on the SF 133. Coordinate with DFAS to resolve discrepancies.

2.4.2. Reasonable check of transfers to amounts reported on the most recent SF 133. Reconcile as necessary (possible timing differences). These timing differences could be due to lag time in reporting on the SF 133. Refer to OMB Circular No. A-11 (Appendix F) for proper reporting of expired and unexpired balances transferred.

2.4.3. Update recoveries (both paid and unpaid) and spending authority from offsetting collections to actual amounts reported on the most recent SF 133.

2.4.4. Ensure sufficient amounts are apportioned for projected obligations through the end of the respective quarter; for both direct and reimbursable funding, by quarter or category, as appropriate. Request reapportionment as necessary to avoid a deficiency.

3.0  PROCEDURES (0203)

*3.1 Preparation of Apportionment and Reapportionment Requests (020301)

All requests will be created electronically using the OMB’s web based apportionment module. Refer to OMB Circular No. A-11, Appendix A, for an example SF 132. Apportionment requests will be submitted by the Military Services to OUSD(C), P&FC, and will be validated in OMB’s MAX system prior to submission. OUSD(C), P&FC will prepare the defense-wide apportionments and provide them to the responsible OUSD(C) analysts for approval prior to submission to OMB. All apportionments must be submitted in accordance with the following:

3.1.1. Timing and minimum requirements:

3.1.1.1. For new appropriations, Components must submit requests within five calendar days after enactment of appropriations acts appropriating funds to the DoD. At the direction of the OUSD(C), the SF 132 apportionment requests may be required to execute fund transfers mandated or authorized in an appropriations act. Refer to paragraph 020504 for information about budgetary resources available to agencies pending OMB approval of an initial
apportionment following newly enacted appropriations, and paragraph 020505 for information about apportionment requirements under continuing resolutions.

3.1.1.2. For all multi-year accounts that will be available for obligation in the following year, Components must submit an estimate of unobligated balances. Estimates will be based on unobligated balances on the July SF 133. Include anticipated reimbursements in this request as applicable.

3.1.1.3. Components will submit reapportionment requests at various times throughout the year as needed to reflect changes in resources. A reapportionment request is also necessary if amounts require redistribution among apportionment categories (refer to section B below). Refer to paragraph 020204 for minimum review requirements to be performed with every reapportionment. Components must update collections and recoveries to actual amounts reflected on the SF 133 with each reapportionment.

3.1.2. Apportionment Categories:

Apportionments are identified by four categories (A, by time; B, by program, project, or activity (PPA); AB, a combination of PPA and time period and C future years (for multiyear/no year accounts) designated in OMB Circular No. A-11, Part 4, Section 120.13. The DoD uses, at a minimum, the following categories:

3.1.2.1. Category A, Quarterly apportionments as follows:

   Line 6001:  First Quarter
   Line 6002:  Second Quarter
   Line 6003:  Third Quarter
   Line 6004:  Fourth Quarter

3.1.2.2. Category B, PPA level apportionments will be reported on lines 6011 – 6110 for multiyear accounts. Accounts may be apportioned lump sum, by business area, or by PPA.

3.1.2.3. Defense Working Capital Funds (WCF) will identify apportionments for the Military Services/Defense Agencies business areas by listing them as separate Category B apportionments.

3.1.3. Footnotes are an essential mechanism for administrative control of funds used in apportionments. They provide supporting explanation and clarity. Incorporating explanatory footnotes sufficient to support the changes on the SF 132 will facilitate faster processing at OMB. Refer to OMB Circular No. A-11, (Part 4, sections 120.34 – 120.38) for additional information.

3.1.3.1. The following footnotes will be included at a minimum on all DoD apportionments:

   3.1.3.1.1. “Pursuant to Title 31 U.S.C. Subsection 1553(b), not to exceed 1 percent of the total appropriations for this account is apportioned for the purpose of paying
legitimate obligations related to canceled appropriations.” (Exception is the 3-year RDT&E royalty apportionments and no-year accounts)

3.1.3.1.2. “A classified attachment displaying the apportionment of specific classified programs within the amount displayed may be included. All documents associated with this apportionment are unclassified except for the Classified Attachment. The classified apportionment shall be allotted in full and executed without change. Such apportionment shall remain valid during the fiscal year until such time as a reapportionment of such classified apportionment is required. Allotments shall be made no later than 30 days after OMB signs the apportionment or the start of the subsequent calendar month, whichever is later.”

3.1.3.2. The following standard footnotes must be included if applicable to the apportionment:

3.1.3.2.1. “To the extent authorized by law, the amounts apportioned may be increased for actual recoveries of prior year obligations without further action from OMB.” Also include a “Y” in the Line Split column of the SF 132 for recoveries on lines 1021 and 1033, as applicable.

3.1.3.2.2. “Apportioned anticipated budgetary resources, once realized, do not need to be reapportioned unless the amount realized exceeds the conditions on the total amount apportioned (A-11 section 120.49). Also include a “Y” in the Line Split column of the SF 132 for spending authority on lines 1700, 1701 and 1740 (or 1800, 1801 and 1840), as applicable. (Please note this is a section “B” footnote.)

3.1.3.2.3. “To the extent authorized by law, the amounts apportioned may be increased or decreased up to five percent of the amount on lines 1000 for actual unobligated balances without further action from OMB.”

3.1.3.2.4. “Temporary FYXX sequestered amounts restored in FYXX.”

3.1.3.2.5. “Temporary funding sequestered at X.X% in the amount of $XXX,XXX. Funds are sequestered from X.”

3.1.3.3. For the first apportionment of the year include the following footnote in the previously approved footnote tab and as A1 in the previously approved column:

3.1.3.3.1. “Not shown on this apportionment are the funds that were automatically apportioned via OMB Circular A-11 section 120.41”

3.1.3.4. While under a continuing resolution, the following additional footnotes will be included, should a separate written apportionment be required:

3.1.3.4.1. “For any subsequent extensions of the Continuing Appropriations Act, (20XX), in addition to the amounts previously apportioned, this account will receive the amounts automatically apportioned via (insert OMB Bulletin number) using the daily

2-7
rate, provided that the total amount apportioned during the CR period does not exceed the total annualized level of the CR.”

3.1.3.4.2. “Apportioned amounts may be increased during the CR period for any additional spending authority from offsetting collections received.”

3.1.3.5. Allocation Transfers to Other Agencies (Parent/Child transfers). Allocation transfers to other agencies for execution of funds on behalf of the DoD will be reflected on all apportionment/reapportionment requests. Refer to the example at OMB Circular No. A-11, Part 4, Section 120, Exhibits 120O and 120P.

3.2 Supporting Information (020302)

Each apportionment request will be accompanied by a written explanation of the requested apportionment action (footnotes will suffice for most requests) and a pdf copy of the most recent SF 133 to validate the updated amounts on lines 1021, 1700, 1701, 1800 and 1801.

3.3 File naming conventions (020303)

Components will save MAX-validated SF 132 Apportionment Requests using a consistent file naming convention. File names will begin with the two-position fiscal year (FY), followed by the account abbreviation, the two-position Treasury Index, the 4 or 8-position period of availability (POA), the four-position account number, and a sequence number in parenthesis (filenames and sequence numbers may be changed by OUSD(C), P&FC when necessary). Examples of acceptable file names:

3.3.1. 19 OMA (21 2019 2020) (2).xlsx would represent Operation and Maintenance, Army’s second FY 19 submission.

3.3.2. 19 BRAC (97 X 0516) (2).xlsx would represent the Base Realignment and Closure account’s second FY 19 submission.

3.3.3. 19 APAF (57 2019 2021 3010) (2).xlsx would represent Aircraft Procurement, Air Force’s second FY 19 submission of the 2019/2021 POA.

4.0 COMPONENT NOTICE OF THE DOD COMPTROLLER AND OFFICE OF MANAGEMENT AND BUDGET ACTIONS (0204)

4.1 OUSD(C) Action (020401)

The OUSD(C) will notify the Component of amounts recommended by the OUSD(C) if such amounts differ significantly from those requested by the DoD Component.
4.2 OMB Action (020402)

The OMB will indicate to the OUSD(C) the action taken in regard to the initial request for apportionment within the time prescribed by law. In regard to reapportionment, OMB will generally respond within 10 business days after receipt of the request. This is accomplished via email notification.

4.3 Notice to the DoD Component of OMB Action (020403)

Upon OMB email notification, the OUSD(C), P&FC will forward the OMB approved apportionment document and any correspondence, to the OUSD(C) appropriation managers and the DoD Component points of contact. Appropriation managers will issue FADs to the Components.

5.0 SPECIAL INSTRUCTIONS (0205)

5.1 North Atlantic Treaty Organization (NATO) Security Investment Program (NSIP) (020501)

NATO infrastructure recoupments will be reported as collections. If it is anticipated that amounts will be recouped during the FY, an estimate should be apportioned as anticipated reimbursements.

5.2 Surcharge Collections, Sales of Commissary Stores - Trust Revolving Fund (020502)

Title 10 U.S.C. 2685 permits obligation of anticipated proceeds from the adjustments or surcharges authorized by Section 2685. Prior to any such obligation of funds, the amounts must be apportioned as contract authority on the SF 132.

5.3 Letter Apportionments (020503)

Letter apportionments may be requested by OUSD(C) under certain circumstances, such as periods under Continuing Resolution Authority, or for prior approval reprogramming actions or internal reprogramming actions. Subsequent requests for reapportionment will reflect the amounts approved on the letter apportionment in all columns of the SF 132.

5.4 Interim Apportionment Authority for Initial Appropriations Act (020504)

In cases where OMB is reviewing the first apportionment request for newly enacted appropriations, OMB automatically apportions up to a 30-day level of resources. Refer to OMB Circular No. A-11 (Part 4, section 120.41.) to calculate the amount automatically apportioned. Once the written apportionment is approved by OMB, the automatic apportionment ceases to remain in effect. This authority may be further limited or modified by OUSD(C) and OMB.
5.5 Apportionment Requirements under Continuing Resolution (CR) (020505)

When an appropriations act for a fiscal year has not been signed by October 1, Congress may pass a resolution appropriating funds to allow for the continuation of government operations for a specified period of time or until an appropriations act provides appropriations for the fiscal year. The CR is generally for a short term period, and there may be multiple CRs or CR extensions before an appropriations act is finally passed. Each CR must be signed into law by the President before becoming effective.

5.5.1. OUSD(C), P&FC will calculate annualized appropriations and automatic apportionment while under CR, based on the CR language and guidance in the OMB bulletin issued with the first CR. The OUSD(C), P&FC will provide appropriations and adjustments for reporting in the AR1002 and SF 133, and available funds under CR to all Components, along with guidance to be followed while under CR. All OUSD(C), P&FC calculations and fund balances/availability will be at the account level. Updates will be provided with each subsequent CR until an appropriations bill is passed. Appropriations and apportionments while under CR will be recorded in the SF 133 in accordance with OMB Circular No. A-11 (Appendix F).

5.5.2. Pursuant to written exceptions from OMB, DoD reimbursements generally are automatically apportioned during the period of a CR, to the extent that orders are received. The OMB authorizes the exception in writing when it becomes evident that agency operations under a CR are imminent. This special exception for automatic apportionment of reimbursements will be conveyed to Components with the guidance accompanying the initial CR.

5.5.3. Should Components require more funds than are automatically available to them under the CR, an exception apportionment will be required. Guidance for submission of an exception request will be included in the CR guidance.

6.0 RESCISSIONS AND DEFERRALS (0206)

6.1 Rescissions and Deferrals – General (020601)

6.1.1. Available budgetary resources may be withheld from obligation or expenditure through impoundment, either permanently (rescission) or temporarily (deferral) under conditions set forth in Title 31 U.S.C. Section 1512 and the Congressional Budget and Impoundment Control Act (Title 2 U.S.C. Sections 683 and 684). Budgetary resources may be deferred to provide for contingencies; to achieve savings made possible by or through changes in requirements or greater efficiency of operations; or as specifically provided by law, except that funds available for only one fiscal year may not be deferred through the end of that year. For additional information and definitions of rescissions and deferrals, refer to OMB Circular No. A-11 (Part 4, section 112).

6.1.2. Reapportionment will generally be required when funds are proposed for rescission or deferral. For procedures and special reporting requirements, refer to OMB Circular No. A-11 (Part 4, section 112.3).

6.1.3. As the fourth quarter approaches, Components should review all deferrals (particularly of funds expiring at the end of the year) to ensure that amounts deferred for only part
of the year will be released in time to be used prudently before the year ends. If a determination is made that such amounts should not be used, a rescission will be proposed prior to the beginning of the fourth fiscal quarter. Only in exceptional cases will rescissions be proposed during the fourth quarter. All proposed rescissions must be approved by the OMB.

6.1.4. Refer to OMB Circular No. A-11 (Part 4, sections 112-14 – 112-16) for guidance to apportionment actions to be taken when rescission proposals and deferrals are enacted, released, or disapproved.

CHAPTER 3

APPROPRIATION TRANSFER AUTHORITIES

1.0 GENERAL (0301)

In addition to the regular and supplemental appropriations that make funds available, the Congress has provided authority for transfers of funds, i.e., moving funds from one appropriation to another. This section identifies and describes the various transfer authorities that are available to the Department and prescribes action required to exercise transfer authority.

2.0 TYPES OF TRANSFER AUTHORITIES (0302)

*2.1 Authority for Transfer (030201)

Transfer authorities may be included in permanent, one-time or recurring provisions of law. Most of the transfers within the Department, however, are made pursuant to authority granted in the annual Appropriations Act. Some of the transfer authorities are provided solely for administrative convenience and some allow no discretionary action. Once authorized/approved, basic responsibility for executing Treasury transfers will be assigned to the Department of Defense (DoD) Components from which the funds are transferred; refer to paragraph 030405 below.

*2.2 Authority for Transfers Affecting Budget Availability (030202)

2.2.1. Congressionally Directed Transfers. This type of transfer is included in the applicable DoD Appropriations Acts, either in the General Provisions or in the language that enacts the individual appropriations. The Act itself then becomes the authority for DoD Components to process the transfer documents.

2.2.2. General Transfer Authority. The General Provisions sections of DoD Appropriations and Authorization Acts provide authority to transfer funds between appropriations, or between appropriation subdivisions approved in the Acts, upon determination by the Secretary of Defense that such action is necessary in the national interest; provided that such authority to transfer may not be used unless for higher priority items, based on unforeseen military requirements, than the items for which funds were originally appropriated, and in no case where the item for which funds are requested has been denied by the Congress. The Congress must be notified promptly of all transfers made under this authority. The Appropriations Act authority requires approval of the OMB; the Authorization Act authority does not include that requirement.

2.2.3. Transfers Between Working Capital Funds. Generally, the DoD Appropriations Act provides authority, during the current fiscal year, to transfer cash balances between working capital funds and the Foreign Currency Fluctuations, Defense and Operation and Maintenance appropriation accounts. Transfers may be made between such funds in such amounts as may be determined by the Secretary of Defense, with the approval of the OMB, except that transfers may not be made unless the Secretary of Defense has notified the Congress of the proposed transfer. Except in amounts equal to the amounts appropriated to working capital funds in the Act, no
obligations may be made against a working capital fund to procure war reserve material inventory, unless the Secretary of Defense has notified the Congress prior to any such obligation.

2.2.4. Transfer of Funds for Intelligence Activities. See Chapter 6, section 0606 for intelligence-related transfer authorities.

2.2.5. Transfer Accounts. Various Appropriation and Authorization Acts have included language making funds available or transfer authority available for accounts such as Environmental Restoration, Defense; Drug Interdiction and Counter-Drug Activities, Defense; Foreign Currency Fluctuations, and Defense; Foreign Currency Fluctuations, Construction, Defense. Accounts which are available only for transfer are exempted from the requirement to apportion, as per OMB Circular A-11, section 120.5.

2.2.6. Transfer of Funds and Personnel for Functional Transfers Within the Department of Defense. When a transfer of function, power, or duty is made within the Department of Defense from one Military Department or Defense Agency to another, pursuant to the authority of Title 10, United States Code, section 125, balances of appropriations and civilian employee positions, that the Secretary of Defense determines are available and needed to finance and perform that function, power, duty, or activity, may be transferred, with the approval of the President (as delegated to the OMB). Funds transferred to the department or agency to which that function, power, duty, or activity, as the case may be, is transferred, and used for any purpose for which those appropriations were originally available shall be made in accordance with Title 10, United States Code, section 126 (see Chapter 4).

2.2.7. Transfer of Funds for Functional Transfers Between Government Agencies. Title 31, United States Code section 1531 (a) provides similar authority to 10 U.S.C. 126, above, limited to appropriations. Title 31, United States Code section 1531 (b) provides that the head of the agency, with the President’s approval, determines the amounts to be transferred in the case of intra-agency transfers and that the President determines the amounts to be transferred in the case of inter-agency transfers.

2.2.8. Transfer of Funds to Other Departments and Agencies: Limitation. Title 10, United States Code section 2215 provides that funds available for military functions of the Department of Defense may not be made available to any other department or agency of the Federal Government pursuant to a provision of law enacted after November 29, 1989, unless, not less than 30 days before such funds are made available to such other department or agency, the Secretary of Defense submits to the House Armed Services and Senate Armed Services Committees and the Committees on Appropriations of the Senate and House of Representatives a certification that making those funds available to such other department or agency is in the national security interest of the United States.
3.0 STATUS REPORT ON TRANSFER ACTIONS (0303)

To ensure that all required actions relating to transfers are accomplished in a timely manner, the OUSD(C)/P&FC will maintain and publish periodically a status report on transfer actions.

4.0 ACTIONS RELATED TO EXERCISE OF TRANSFER AUTHORITY (0304)

4.1 Proposals to Exercise Transfer Authority (030401)

The DoD Components will submit proposals for transfer formally to the OUSD(C) for processing. The submission must state the statutory authority for the proposed transfer.

4.2 Secretary of Defense Determination (030402)

In most cases, the Secretary of Defense will provide the authority and amounts for transfer upon determination by the Secretary of Defense that certain conditions exist. The Secretary of Defense determination, when required, either will be obtained or signed by the OUSD(C) under delegation of authority from the Secretary of Defense as provided in DoD Directive 5118.03, section 6.m. In processing SF 1151 transfer documents to the Treasury Department, the statutory authority for the transfer must be cited, with references to documents constituting determinations and copies of the associated OMB or Presidential approvals when required.

4.3 OMB/Presidential Approval (030403)

Where the statutory authority requires a determination or OMB/Presidential approval for the transfer, the OUSD(C) will obtain the necessary approval. The OMB approval may also include the apportionment of funds.

4.4 Reprogramming Actions (030404)

Reprogramming actions (DD 1415) made pursuant to provisions of Chapter 6, will be submitted whenever necessary to provide accountability for increases or decreases between DoD appropriations. Accordingly, reprogramming actions are required to reflect transfer amounts that are not congressionally directed. The timing for submission of the DD 1415 depends upon the nature of the transfer and the amount involved.

*4.5 Processing of Treasury Non-Expenditure Transfers (NETs) (030405)

Treasury NET is the means by which funds are moved between accounts at the Treasury pursuant to an authorized/approved transfer. Treasury NETs will be requested in the Treasury’s Government-wide Accounting System (GWA), and must be requested by the entity transferring funds out.
4.5.1. Except as stated below, Treasury NETs transferring funds between DoD appropriation and fund accounts should not be processed prior to the receipt of an OUSD(C) memorandum directing that such action be taken. The following types of transfers may be made without prior approval of the OUSD(C):

4.5.1.1. Transfers of funds for functional transfers between government agencies (31 U.S.C. 1531) - when the request is initiated by a government agency other than the Department of Defense.

4.5.1.2. Transfers of obligational authority from one agency to a transfer appropriation account that is established in another agency to carry out the purposes of the parent appropriation or fund. Such transfers are not adjustments to budget authority or balances of budget authority.

4.5.2. The memorandum from the OUSD(C) directing that a Treasury NET be processed will be addressed both to the transferring office and the recipient office, and will include the following information.

4.5.2.1. Identity of the transferring office.

4.5.2.2. Account from which funds are to be transferred and the recipient account.

4.5.2.3. Amount of the transfer in dollars.

4.5.2.4. Statutory references for the transfer authority.

4.5.2.5. Reference to enclosure of a Secretary of Defense determination, if applicable.

4.5.2.6. Reference to enclosure of an OMB approval, if applicable.

4.5.2.7. Statement of whether the action is an appropriation transfer, a reappropriation, or obligated and unobligated transfer.

4.5.2.8. Statement as to the reprogramming action (DD 1415) serial number on which transfers are reflected.

4.5.2.9. Statement as to the applicable lines on the Apportionment and Reapportionment Schedule (SF 132) on which the transfer amounts must be reflected, when submitting the required schedule or subsequent reapportionments.

4.5.2.10. Statement as to the applicable lines on the Report on Budget Execution and Budgetary Resources (SF 133) on which the transfer amounts must be reflected, when the transfer is made.
4.5.2.11. Statement as to the official responsible for issuance of the applicable fund authorization documents (e.g., EOB, DD 440, approval/deferral memos).

4.5.2.12. Statement that either the OUSD(C) or other applicable designee will make formal notification to the Congress of the amount transferred, if required by law.

4.6 Notification to the Congress (030406)

4.6.1. When there is a statutory requirement that transfers be reported to the Congress, such notification is made to the President of the Senate and to the Speaker of the House of Representatives promptly by the OUSD(C) upon completion of transfer action. In accordance with informal arrangements between the Department of Defense and the cognizant Subcommittees of the Committees on Appropriations, a copy of the report is transmitted to those cognizant Subcommittees and to the House Armed Services and Senate Armed Services Committees.

4.6.2. It should be noted that, although transfers of funds pursuant to Title 10, United States Code section 126 need not be reported to the Congress, transfers of functions pursuant to 10 U.S.C. 125 must be reported when there is a substantial reduction or elimination of a major weapons system. The OSD office submitting the transfer of function documents to the Secretary of Defense for approval is responsible for preparing documents to notify the Congress.

*4.7 Apportionment and Reapportionment Schedules (030407)

4.7.1. Pursuant to provisions of OMB Circular A-11 and Chapter 2, as applicable transfers will be reflected on Apportionment and Reapportionment Schedules (SF 132). Where prior approval is required, SF132s will be prepared after the necessary approvals are obtained. For certain transfers specified in Chapter 2 (e.g., Foreign Currency Fluctuations, Defense or Environmental Restoration), the gaining and losing accounts, except accounts available only for transfer, automatically are apportioned and transfers will be reflected on subsequent schedules that are generated for other purposes during the year. Accounts available only for transfer are exempt from apportionment in accordance with OMB A-11, section 120.5.

4.7.2. Each Apportionment and Reapportionment Schedule submitted must show all transfers processed to date. The SF 132 is processed concurrently for both the gaining and losing appropriations, as applicable.

4.8 Guidance on SF 133 Treatment (030408)

Although OMB Circular A-11 does not contemplate that transfers will be included on the “Report on Budget Execution and Budgetary Resources” (SF 133) until the NET action is completed, transfers may be included on the SF 133 on an anticipated basis when all statutory requirements for the transfer have been met but prior to the processing of the NET. Decisions relating to anticipated transfers on the SF 133 will reflect the agreed-upon position of the OUSD(C) and the OMB.
4.9 Fund Authorization Documents (030409)

Changes will be made to the EOB, DD 440, etc., to reflect program adjustments resulting from the transfers, as determined by the cognizant Program/Budget appropriation director in the OUSD(C).
VOLUME 3, CHAPTER 4: “FUNCTIONAL TRANSFERS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

CHAPTER 4

FUNCTIONAL TRANSFERS

1.0 STATUTORY AUTHORITY (0401)

Under the provisions of Title 10, United States Code, section 125, the Secretary of Defense is authorized to transfer, reassign, consolidate or abolish any function, power or duty vested in the Department. Whenever a transfer of function, power or duty is accomplished under the authority of Title 10, U.S.C. 125, balances of appropriations and civilian employees, that the Secretary of Defense determines are available and needed to finance and perform that function, power, duty or activity, may be transferred, with the approval of the President as delegated to the Office of Management and Budget (OMB) in accordance with Title 10, United States Code, section 126.

2.0 TYPES OF TRANSFER AUTHORITIES (0402)

2.1 Fund Adjustments: (040201)

Necessitated by a transfer of functions during a current year should be handled to the extent possible on a reimbursable basis. Only when financing of such transfers through the reimbursement process presents serious burdens or involves significant amounts should a transfer of funds be requested.

2.2 Transfer of Funds (040202)

When transfers of funds are necessary as a result of transfer of functions under Title 10, United States Code, section 125, it will be the responsibility of the receiving DoD Component to request that the USD(C) obtain the necessary determination and approval for the transfer of funds. The request shall be prepared in accordance with Title 10, United States Code, section 126 and the provisions in Chapter 3 of this Volume contain a statement that the DoD Components concerned have agreed to the amounts proposed for transfer. A copy of the Secretary of Defense approval of the transfer of functions (under 10 U.S.C. 125) should accompany the request.

CHAPTER 5

SPECIAL MILITARY CONSTRUCTION/FAMILY HOUSING FUND
RELEASE PROCEDURES

1.0 GENERAL (0501)

This chapter provides guidance on the fund release and the project approval procedures applicable to the military construction and family housing appropriations.

2.0 OVERVIEW (0502)

2.1 Fund Approval (050201)

For the military construction and family housing construction accounts will be accomplished by the submission of a request from the cognizant Military Department in a format 460 to the Office of the Under Secretary of Defense (Comptroller) (OUSD)(C) Program Budget (P/B) Military Personnel and Construction Directorate. An example of this format, and the instructions for its completion, are included in Appendix A of this chapter.

2.2 Defense-Wide Construction and Family Housing (050202)

A format 460 does not need to be submitted for Defense-Wide military construction accounts or for Family Housing, Operation and Maintenance (O&M) annual accounts. Fund approvals providing quarterly limitations by budget activity for these accounts will continue to be accomplished by OUSD(C) Obligational Authority memoranda.

2.3 OUSD(C) Review (050203)

Upon OUSD(C) review of the Military Department submission, a fund approval will be issued to the requesting Component to provide obligational authority corresponding to the action taken on the request as reflected in the Office of Secretary of Defense (OSD) approved column of the format 460. A copy of the format 460 will be attached to the fund approval. A sample of the fund approval is provided in Appendix B and C.

2.4 Document Approval (050204)

The approval document limits the Component’s authority to incur obligations. Further, obligations cannot be incurred prior to the receipt of the fund approval document or in excess of the amounts shown therein.
3.0 SUBMISSION REQUIREMENTS (0503)

A fund release will be required to request the initial fund authorization document; to request the release of funds for projects previously placed on withhold by OUSD(C); to support an approved apportionment/reapportionment schedule (SF 132); and to support an approved formal above-threshold reprogramming action.
APPENDIX A

INSTRUCTIONS FOR FORMAT 460
“MILITARY CONSTRUCTION/FAMILY HOUSING PROGRAM
FUND APPROVAL”

1.0 Requirement. A format 460 is required for all Military Department Military and Family Housing Construction accounts. It will be executed in project detail for the major construction and new construction budget activities and executed as a lump sum for all other budget activities. The format is intended to provide a complete listing of all the disposition of the funds provided by the applicable appropriation act and includes all above-threshold reprogramming actions.

2.0 Entries. Columnar entries shall be as follows:

2.1 State/Country/Installation/Project. Display the name of the installation and the project title as reflected in the National Defense Authorization Act (NDAA). If there is more than one project at an installation or activity, the installation or activity title should not be repeated. The project listing should be in state or country sequence with the same installation and project nomenclature as appearing in the NDAA. In some circumstances, the appropriation enactment amount may exceed the authorized amount for a project, then funding can only be issued in accordance with the authorized amount for the project. The centrally managed allotment (CMA) for foreign currency fluctuation should be shown as a separate entry at the end of the project listing.

2.2 Project Number. Display the Component-assigned project number associated with the project.

2.3 Special Interest. The special interest column should contain an asterisk if the project was reduced by either chamber of the Congress during the enactment process or was indicated to be of special interest in a congressional report.

2.4 Appropriated Amount. The amount shown in this column must be consistent with the amount shown for the project in the Appropriation Act, including rescissions. The total of all amounts shown in this column must correspond to the amount provided in the applicable appropriation act covered by the apportionment/reapportionment exhibit. If the amount appropriated and authorized for a project differs, a footnote (providing the authorized amount) is required to document this difference. For the foreign currency fluctuation CMA this line is blank.

2.5 Formal Reprogramming. If the project appears in a formal reprogramming request, either as a recipient of funds or as a source of funds, enter the adjustment in this column which shall be consistent with the amount shown in the reprogramming request.

2.6 Previously Approved. This column represents the amount Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) currently approved for the project--the amount appearing on the latest format 460 formally submitted to OUSD(C). The DD 460 is to be updated to reflect the allocated foreign currency fluctuation CMA amount.
2.7 Proposed. This column represents the amount requested for allocation for the project.

2.8 Office of Secretary of Defense (OSD) Approved. OUSD(C) will indicate the amount approved in this column.

2.9 Delta from Previous Submission. This reflects the difference between the previously approved and the proposed amounts.

2.10 OSD Withhold. OUSD(C) will indicate the amount on withhold in this column.

2.11 Appropriation Title. Reflect the appropriate Military Construction or Family Housing Construction appropriation title.

2.12 Symbol. Enter the Treasury code for the account for which obligational authority is being sought. For example, 21 20/24 2050 would represent the FY 2020 Military Construction Army account.

2.13 Submission No. The first portion of the submission number should include the appropriation abbreviation, followed by the two-digit fiscal year of issuance including the period of availability or program year of the funds, and concluded with the sequential number of issuance for that period of availability. For example, MCN 21 (20/24) – 09 would represent the 9th Navy FAD issuance in FY 2021 using the FY 2020 period of availability.

2.14 Footnotes. Include footnotes related to Congressional adds and rescissions, formal reprogramming, split funding, and when the authorized amount differs from the appropriated amount to create an audit trail that ties back to legislation or specific justification documents.

CHAPTER 6

REPROGRAMMING OF DOD APPROPRIATED FUNDS

1.0 PURPOSE (0601)

1.1 Department for the Reprogramming (060101)

This chapter establishes the policies of the Department for the reprogramming of appropriated funds. Guidance in this chapter reflects recognition by the Congress of the practice of reprogramming DoD funds covered in DoD Appropriations Acts as a necessary, desirable, and timely device for achieving flexibility in the execution of DoD programs. Also, reprogramming policies and procedures for military construction and family housing appropriations covered by the Military Construction Appropriations Act can be found in Chapter 7 and the National Intelligence Program (NIP) reprogramming policies and procedures covered by the National Security Act of 1947, as amended, can be found in section 0606, Reprogramming of Intelligence Resources.

1.2 Reprogramming Procedures (060102)

Procedures are provided for establishing the base for reprogramming actions; submitting, approving, and processing reprogramming actions; and for the report of programs reflecting all supplemental appropriations, rescissions, transfers, and reprogramming actions.

1.3 Reprogramming Policy (060103)

2.0 REPROGRAMMING DOCUMENTS IN GENERAL (0602)

2.1 DD 1414, Base for Reprogramming Actions (060201)

The DD 1414 establishes the base for reprogramming actions and transfers. The report shall include a table for each appropriation enacted in the annual Department of Defense Appropriations Act, with separate columns to display the Program Base Presented to Congress, Approved Changes Prior to Congressional Action (e.g., budget amendments or other changes to the budget formally submitted an appropriations committee), Changes Reflecting Congressional Action (e.g., project level adjustments or undistributed rescissions as indicted in Conference Reports), and the Program Base Reflecting Congressional/Presidential Action. Tables for each appropriation shall delineate each budget activity and program, project, and activity established in administration budget justification materials or in the Conference Report accompanying enacted funding bills. Each budget activity and program, project, and activity shall be footnoted to identify those items known to be of special interest to one or more of the congressional committees and those items specifically denied by the Congress. The items should include, as a minimum, those items for which additional funds have been provided or items for which funding is specifically
reduced as shown in the project level table or in paragraphs using the phrases “only for” or “only to” or are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414).

2.2 DD 1415, Reprogramming Action (060202)

Reprogramming actions, upon approval of the Department, will be used to request the prior approval (DD 1415-1) of the congressional committees to realign or transfer appropriated funds or for internal reprogramming (DD 1415-3) requiring audit-trail type documentation of the realignment or transfer of appropriated funds.

2.3 DD 1416, Report of Programs (060203)

The DD 1416 report reflects the congressionally approved programs as enacted, reprogramming actions which have been approved, congressionally directed undistributed amounts and transfers, and reprogramming of funds that have been implemented by a DoD Component using below-threshold reprogramming flexibility. This report is generated in the Enterprise Funds Distribution (EFD) system quarterly and submitted 30-days after the end of each quarter, electronically to the congressional defense committees by the Under Secretary of Defense (Comptroller) (OUSD(C)), Program and Financial Control Directorate (P&FC), for Title III, Procurement, and Title IV, Research, Development, Test, and Evaluation and annually for Title I, Military Personnel, and Title II, Operation and Maintenance appropriations.

3.0 DETAILED PROCEDURES FOR BASE FOR REPROGRAMMING ACTIONS (0603)

3.1 General (060301)

The DD Form 1414, Base for Reprogramming Actions, establishes the base from which reprogramming actions may be taken. It identifies line items within each appropriation covered in the DoD Appropriations Acts.

3.2 Due Date (060302)

Within 30 days following enactment of the Department of Defense (DoD) Appropriations Act, the Components will submit their DD 1414, Base for Reprogramming Actions to OUSD(C) P&FC to ensure the Department can submit the Base for Reprogramming Actions to the congressional committees within 60 days of enactment as required by recurring general provisions in DoD Appropriations Acts (e.g., section 8007 of division C of Public Law 113-235, the Department of Defense Appropriations Act, 2015). The DoD Components will submit their DD 1414 through the Enterprise Funds Distribution (EFD) system, for review prior to submission to the congressional committees.

3.3 Transmittal (060303)

Upon determination by the OUSD(C) P&FC that the Base for Reprogramming Action is acceptable, OUSD(C) P&FC will submit to OMB, pursuant to OMB Circular A-11, section 22.3.
After clearance by OMB, the OUSD(C) P&FC will prepare for printing and transmittal to the congressional committees. Final printed copies will be distributed to the DoD Components as well as posted on the Comptroller public website.

3.4 Security Classification (060304)

In order facilitate use by the staffs of the congressional defense oversight committees, the Department will submit an unclassified report. Therefore, each Service shall submit an unclassified DD 1414 and OUSD(C) P&FC will be responsible for proper security review prior to publication. All classified programs should be consolidated into a single line item titled Classified Programs and should be displayed at the end of the Direct Program section.

3.5 Detailed Instructions for Preparation of the DD 1414 (060305)

Detailed instructions for the Base for Reprogramming Actions for the initial appropriations act are provided in the appendices to this chapter.

4.0 REPROGRAMMING ACTIONS (0604)

4.1 Reprogramming Actions Requiring Written Congressional Approval (060401)

Two types of reprogramming actions will be used to request the prior approval of the congressional defense committees. Both requests are submitted using DD 1415-1, Prior Approval. The first type is for specific requirements, which usually are combined and submitted monthly. The second type is the annual Omnibus reprogramming action submitted prior to June 30 of each year, which was established in Fiscal Year (FY) 1991 to streamline the reprogramming process for the congressional committees and the Department. With the exception of reprogrammings of National Intelligence Program resources (paragraph 060604), the USD(C) submits all reprogramming actions to the congressional defense committees. The Department is expressly prohibited from preparing or forwarding to the Congress a prior approval reprogramming action except “for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which reprogramming is requested has been denied by the Congress.” It is the Department’s policy that reprogramming actions, which require prior approval of the congressional committees (DD 1415-1), are those which involve the application of funds that:

4.1.1. Increase the procurement quantity of a major end item, such as an individual aircraft, missile, naval vessel, tracked combat vehicle, and other weapon or torpedo and related support equipment for which funds are authorized. (In such cases where specific congressional language is provided allowing for additional quantities to be procured within appropriated funds, increases to quantities for major end items shall be submitted to the USD(C) for approval as a DD 1415-3, Internal Reprogramming action.)

4.1.2. Affect an item that is known to be or has been designated as a matter of special interest to one or more of the congressional committees. In rare instances, when funds from special interest items are to be reprogrammed from an existing program, subprogram, project, or
subproject to another program, subprogram, project, or subproject within the same procurement line item or program element, letter notification to the congressional committees may be made. Letters shall be submitted to the congressional committees by the DoD Component involved only after advance coordination with the applicable OUSD(C) P/B Directorate.

4.1.3. Use general transfer authority. Any movement of funds between appropriations or legal subdivisions requires statutory transfer authority. Unless specific transfer authority is provided elsewhere, general transfer authority, which is provided in annual DoD Appropriations and Authorization Acts, must be used. Any movement of funds from supplemental appropriations also uses the general transfer authority provided in the annual DoD Appropriations Act. Section 2214 of Title 10 of the United States Code (U.S.C.) and the annual Appropriations Act provide limitations on programs for which general transfer authority may be used. Such authority may not be used except to provide funds for a higher priority item, based on unforeseen military requirements, than the items for which funds were originally appropriated, and may not be used if the Congress has denied funds for the item. Exceptions to the use of a DD 1415-1, Prior Approval Reprogramming action, may apply if reclassification of programs to the proper appropriation for execution is required (i.e., these actions do not change the purpose for which the funds were originally appropriated). (See paragraph 060402A).

4.1.4. Exceed thresholds agreed upon between the committees. Effective for FY 2015, the basic reprogramming thresholds agreed upon between the committees and the Department are: $10 million for military personnel; $15 million for operation and maintenance; $20 million for procurement; and $10 million for research, development, test, and evaluation. These thresholds are cumulative from the base for reprogramming value as modified by any congressional action, to include the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogramming actions. The BTR limitation is the net value of transfers into or out at the specified level. For example, transfers using Below Threshold Reprogramming (BTR) authority of $5.0 million out of an RDT&E PE line item and transfer of $4.0 million into the same RDT&E PE line item would result in a total amount transferred of $1.0 million, with the consequence that the $1.0 million of BTR authority was used. The thresholds agreed upon between the committees and the Department are as follows:

4.1.4.1. Military Personnel. A cumulative increase of $10 million or more in a budget activity.

4.1.4.2. Operation and Maintenance. A cumulative increase or decrease of $15 million or more to a budget activity or to a Defense Agency for Operation and Maintenance, Defense-Wide appropriation. When the congressional committees impose reprogramming thresholds on specific sub-activity group categories, these threshold amounts are separately identified on the DD 1414, Base for Reprogramming Actions, and reprogramming restrictions apply. For example for FY 2015, congressional committees imposed reprogramming thresholds on specific sub-activity group categories.

4.1.4.2.1. The committees required the Department to follow Prior Approval procedures for transfers in excess of $15.0 million out of the following budget sub-activities:
4.1.4.2.1.1. **Army**: Maneuver units; modular support brigades; land forces operations support; force readiness operations support; land forces depot maintenance; base operations support; and facilities sustainment, restoration, and modernization.

4.1.4.2.1.2. **Navy**: Aircraft depot maintenance; ship depot maintenance; and facilities sustainment, restoration, and modernization.

4.1.4.2.1.3. **Marine Corps**: Depot maintenance and facilities sustainment, restoration, and modernization.

4.1.4.2.1.4. **Air Force**: Primary combat forces; combat enhancement forces; combat communications; and facilities sustainment, restoration, and modernization.

4.1.4.2.1.5. **Air Force Reserve**: Depot maintenance.

4.1.4.2.1.6. **Air National Guard**: Depot maintenance.

4.1.4.2.2. The committees required the Department to follow Prior Approval procedures for transfers in excess of $15.0 million into the following budget sub-activity:

4.1.4.2.2.1 **Army National Guard**: Other personnel support/recruiting and advertising.

4.1.4.2.3. **Defense-Wide O&M**: transfer of funds to or from the levels specified for defense agencies in excess of $15.0 million shall be subject to a PA reprogramming action.

4.1.4.2.4. For FY 2015, the committees further require the Services, with Comptroller coordination, to provide written notification not later than 15-days prior to implementing transfers in excess of $15.0 million out of the following budget sub-activities:

4.1.4.2.4.1. **Navy**: Mission and other flight operations and mission and other ship operations

4.1.4.2.4.2. **Air Force**: Operating forces depot maintenance; mobilization depot maintenance; training and recruiting depot maintenance; and administration and service-wide depot maintenance.

4.1.4.2.5. **Defense Health Program**: For FY 2015, any transfer of funds from the In-House Care budget sub-activity to any other sub-activity shall be subject to a PA reprogramming action. In addition, any cumulative transfer of funds in excess of $10,000,000 from the Private Sector Care sub-activity requires written notification to the congressional defense committees not later than fifteen days after such a transfer occurs.
4.1.4.2.6. The above requirements were set forth in reprogramming guidelines in the explanatory statement accompanying the DoD Appropriations Act, 2015 and are subject to change in conference reports accompanying future appropriations acts.

4.1.4.3. Procurement. A procurement program is defined by the items included in the DD 1414, Base for Reprogramming Actions.

4.1.4.3.1. Increases. A cumulative increase of $20 million or more or 20 percent of the program base amount, which includes the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogrammings (i.e., cumulative over the entire obligational availability of a specific year appropriation), whichever is less.

4.1.4.3.2. Decreases. A cumulative decrease of $20 million or more, or 20 percent of the program base amount, which includes the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogramming (i.e., cumulative over the entire obligational availability of a specific year appropriation), whichever is less.

4.1.4.4. Research, Development, Test, and Evaluation (RDT&E). A research program is defined by the items included in the DD 1414, Base for Reprogramming Actions.

4.1.4.4.1. Increases. A cumulative increase of $10 million or more or 20 percent of the program base amount, which includes the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogramming (i.e., cumulative over the entire obligational availability of a specific year appropriation), whichever is less.

4.1.4.4.2. Decreases. A cumulative decrease of $10 million or more, or 20 percent of the program base amount, which includes the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogramming (i.e., cumulative over the entire obligational availability of a specific year appropriation), whichever is less.

4.1.5. Initiates a new start. A new start program for RDT&E is a new program element or project, or a major component thereof, as determined by specific supporting information provided in the R-2 and R2A (RDT&E Budget Item/Project Justification) exhibits not previously justified by the Department and funded by the Congress through the normal budget process is considered to be a new start. A new start program for Procurement is a new procurement line item or major component thereof, as determined by specific supporting information provided in the P-5 (Cost Analyst) or P40A (Budget Items Just for Aggregated Items) exhibits not previously justified. Congressional committees discourage the use of the reprogramming process to initiate programs. Except for extraordinary situations, consideration will not be given new start reprogramming requests for which the follow-on funding is not budgeted or programmed. Funding for new starts may not be obligated without prior approval or written notification (see paragraphs 060403 and 060404). A program effort in one year in the Procurement and RDT&E accounts may be extended into a subsequent fiscal year without constituting a new start. This is considered an extension of the effort initiated in the prior year program, and could include a skip year for execution purposes. When this occurs, the program should be footnoted as such on the DD 1416, Report of Programs, with sufficient justification for the extension. Due to the characteristics of Military Personnel and
Operation and Maintenance programs, new starts seldom occur in those appropriations. New starts in these appropriations would be significant new programs, efforts, or activities that have not been explicitly justified to the Congress in budget justification material. An example would be the establishment of a Pacific Distribution System. In some instances, a letter notification may be appropriate in these circumstances but only with the explicit approval of the USD(C).

The DD 1415-1 should include a brief description of the total program being initiated, and of the total cost of the program and of proposed funding and procurement quantities by fiscal year. It should provide enough background information to demonstrate that the item is ready for research or procurement include explanation as to why the program must be initiated now and, if a budget line is not already included in a budget currently under Congressional consideration, an explanation of how subsequent years’ funding will be provided. The Department will not approve new starts that do not have budgeted or programmed follow-on funding. The DD 1415-1 must also explain why the source funds are no longer needed and any impact. See paragraph 060404 for failure to provide proper notification.

4.1.6. Terminates Appropriated Programs:

4.1.6.1. Eliminates a procurement program, or a subprogram, of $20 million or more.

4.1.6.2. Eliminates a RDT&E program element, project, or subproject of $10 million or more.

See paragraph 060403D for terminations falling within below-threshold limits.

4.1.7. Use Proceeds for Replacement of Certain Items Sold from Inventory. Prior congressional approval obtained using a DD 1415-1 is required when proceeds from items sold from inventory are used to acquire an asset that is not a “like replacement” item (e.g., that is not of identical type, model, and series designation). Such requests may be included either as a separate part within the monthly reprogramming, or submitted as a separate, stand-alone DD1415-1 action. See section 0609 for additional information and guidance.

4.2 Internal Reprogramming Actions (060402)

DD 1415-3, Internal Reprogramming, actions are audit-trail type actions processed within the Department to serve various needs. One is to reclassify funds for proper execution into a different line item, program element, or appropriation than that in which the funds were appropriated. Another includes reprogramming to or from transfer accounts. A third reflects approval to increase quantities, when not otherwise requiring prior approval of the congressional committees.

4.2.1. Reclassification Actions. In certain instances, it is necessary to reclassify funds to a different line item, program element, or appropriation than that in which the funds were appropriated by the Congress. Such reclassifications do not involve any change in the substance of the program; the funds will be used for the same purposes originally contemplated and budgeted for, testified to, and described in the justifications submitted to the congressional committees, and
subsequently appropriated by the Congress. These actions may also involve realignment of congressionally added programs that are more appropriately executed in a different program line or in a different account than the line or account in which the funds were appropriated. In cases where the realignment is between DoD appropriations, then the use of general transfer authority would be involved, along with the legal requirements thereof.

4.2.2. **Transfer Appropriations.** Transfer accounts are those appropriations with funding that will be subsequently transferred to other appropriations for execution. These accounts include, but are not limited to: Environmental Restoration, Army; Environmental Restoration, Navy; Environmental Restoration, Air Force; Environmental Restoration, Defense-Wide; Environmental Restoration, Formerly Used Defense Sites, Drug Interdiction and Counter-Drug Activities, Defense; Overseas Contingency Operations Transfer Fund; Foreign Currency Fluctuations, Defense; and Foreign Currency Fluctuations, Construction, Defense. Movement of funds from these accounts to other appropriations is generally exempt from the use of general transfer authority.

4.2.3. **Procurement Quantities.** Approval for increases to procurement quantities for major end items, not otherwise requiring prior approval of the congressional committees.

4.3  Letter Notifications to Congress (060403)

Letter notification to the congressional committees is required in advance of initiating requirements for:

4.3.1. A new procurement line item not otherwise requiring prior approval action.

4.3.2. A new procurement line item or major component thereof costing less than $20 million for the entire effort.

4.3.3. Establishment of new development programs costing less than $10 million for the entire effort.

4.3.4. Initiation of safety programs or safety modifications costing less than $20 million for the entire effort; can be initiated immediately following congressional notification.

4.3.5. Termination of programs falling within the below threshold reprogramming amounts (procurement programs or subprograms costing less than $20 million; RDT&E programs, projects, or subprojects costing less than $10 million) as long as the procurement line item or RDT&E program element is not eliminated.

4.3.6. Identification of specific line items to satisfy specific transfer notification requirements established by Congress.

Congress requires a 30-day notification to the Defense Committees prior to implementation. The Component may implement the reprogramming action 30-days after congressional notification unless an objection is received from a committee.
4.4 Failure to Provide Proper Notification (060404)

Recurring general provisions in DoD Appropriations Acts (e.g., section 8077 of division C of Public Law 113-235, the Department of Defense (DoD) Appropriations Act, 2015) prohibit use of funds made available through a reprogramming that creates or initiates a new program, project, or activity unless such program, project, or activity must be undertaken immediately in the interest of national security and only after written prior notification to the congressional defense committees.

4.5 Transfer Authority (060405)

Any movement of funds between appropriations or legal subdivisions requires transfer authority. There are at least five types of transfer authorities:

4.5.1 Transfer Appropriations. Authority for Transfer Fund appropriations is contained in the annual DoD Appropriations Act.

4.5.3 General Transfer Authority (GTA). The use of GTA is required for transfers between appropriations and legal subdivisions, when other specific authority is not provided. It is included in a general provision in the annual DoD Appropriations Act and is authorized in the annual National Defense Authorization Act, most recently section 8005 of division C of Public Law 113-235, the DoD Appropriation Act, 2015, and section 1001 of the annual National Defense Authorization Act for FY 2015, Public Law 113-291. When GTA is used, the Secretary of Defense must make a determination that such action is necessary in the national interest. The OMB must also approve the use of GTAs. For prior approval reprogramming actions that use GTA, OMB must approve transmittal of the action before the Department forwards to the congressional defense committees. The OMB apportions funds that use GTA after congressional approval is received for prior approval actions or the internal reprogramming action has been approved and signed by USD(C). Beginning with the DoD Appropriations Act, 2009, recurring general provisions have incorporated into law the funding levels specified in certain tabular entries in appropriations act explanatory statements or conference reports (e.g., section 8006 of the DoD Appropriation Act, 2015). Such recurring general provisions provide that where funding levels specified in Project Level Adjustment Tables for a particular program, project, or activity exceed the amount requested, that program, project, or activity must be carried out at the prescribed level. Amounts specified in such project level adjustment tables are not subdivisions of appropriations for purposes of GTA, and may be transferred or reprogrammed after appropriate congressional notification. Any transfers among military personnel appropriations shall not be taken into account for purposes of the limitation on the amount of funds that may be transferred under GTA.
4.5.4. **Intelligence Programs.** Authority for transfers in intelligence programs is specified in paragraph 060601.

4.5.5. **Special.** Additional transfer authority for special situations is contained in various sections of Title 10 of the U.S.C. and in annual National Defense Authorization and Appropriations Acts. Section 127a of Title 10, U.S.C., provides limited transfer authority in the case of certain operations. Use of this transfer authority requires the use of prior approval reprogramming procedures.

4.6 **Detailed Instructions and Formats for Preparation of DD 1415 (060406)**

Detailed instructions for DD 1415-1 (Prior Approval) and DD 1415-3 (Internal Reprogramming) are provided in the appendices to this chapter. Templates are available by contacting the OUSD(C) P&FC reprogramming point of contact at 703-697-0022 (DSN 227-0022).

4.7 **Submittal by Components (060407)**

Military Departments must submit proposed DD 1415 actions formally by a signed memorandum addressed to the USD(C) from the Assistant Secretary (Financial Management and Controller) of the Military Department. Requests from a Defense Agency must be signed by its Comptroller (or equivalent official). Such requests must be submitted electronically, and all requests are due the 5th work day of the month for inclusion in the monthly reprogramming submission. When a prior approval reprogramming for investment programs is required to initiate a new start (paragraph 060401E) or to terminate a program (060401F), a copy should also be provided to the Office of Under Secretary of Defense for Acquisition, Technology and Logistics; Director, Acquisition Resources & Analysis. **For all reprogramming actions, the DD 1415 must be submitted to OUSD(C) P&FC, through the EFD system.** The classified details must be provided at the same time in an electronic submission to OUSD(C) via the SIPRNET. The OUSD(C) will ensure that proposed reprogramming actions affecting the NIP resources are provided to the Office of the Director for National Intelligence (ODNI). The OUSD(C) will ensure that proposed reprogramming actions affecting MIP resources are provided to the Undersecretary of Defense (Intelligence), and consistent with section 102A(d)(1)(B) of the National Security Act of 1947 (50 U.S.C.§ 3024(d)(1)(B)) shall consult with the ODNI Office of Chief Financial Officer before transferring or reprogramming funds made available by Congress specifically for the MIP. The DoD Component memorandum shall include the following:

4.7.1. Reprogramming actions outside the Omnibus reprogramming to the congressional committees, will only be made for those actions involving critical requirements or unforeseen circumstances that cannot wait for implementation of the Omnibus due to contract award dates or other time sensitive reasons. In these cases, individual reprogramming actions will be entertained, and the transmittal memorandum must clearly define the urgency of the requirement. **Ordinarily, such urgent requirements shall be combined for inclusion in a monthly reprogramming submission the congressional committees.**
4.7.2. A statement that the DD 1415–1 Prior Approval reprogramming action has been cleared by the DoD Directorate for Freedom of Information and Security Review, Washington Headquarters Services. The copy with the original “Cleared for Open Publication” stamp should accompany the transmittal memorandum.

4.7.3. Because the DD 1415 actions are now being posted on the Comptroller’s Home Page on the World Wide Web, the DD 1415 reprogramming action should not refer to or identify the intelligence resources. Therefore, the cover letter transmitting the DD 1415 to the OUSD(C) must contain a statement that the reprogramming does or does not affect MIP or NIP resources. If NIP resources are affected, the reprogramming should be cleared with the ODNI, and the cover letter should state that this has been done.

4.7.4. Identification of any new starts being requested, and whether the new starts were approved by a Secretary’s decision document during the Program/Budget review or other action.

4.8 Signed DD 1415s (060408)

The USD(C) has the authority to sign all reprogramming actions, and upon signature the reprogrammings are returned to OUSD(C) P&FC for further processing. A DoD Serial Number, in sequence, will be added to the signed DD 1415.

4.9 OMB Approval (060409)

Any reprogramming action using general transfer authority and/or special transfer authority must have a Secretary of Defense Determination documenting that the transfer is necessary in the national interest. The authority to make that determination has been delegated to the OUSD(C), Deputy Comptroller, Program/Budget. For prior approval reprogramming actions using general transfer authority and or special transfer authority, OMB must also approve the transmittal of the DD 1415-1 before forwarding the action to the congressional defense committees. The OUSD(C) shall obtain formal OMB apportionment for the specific transfer of funds after congressional responses on the action are received and final results on implementation of the action are determined.

4.10 Distribution of the DD 1415-1 (060410)

The DD 1415-1 is e-mailed to the House Appropriations Committee (HAC), House Armed Services Committee (HASC), Senate Appropriations Committee (SAC), and Senate Armed Services Committee (SASC). A copy of the DD 1415 and the transmittal date will be e-mailed to the submitting DoD Component. After being notified that the DD 1415 has been submitted to the congressional committees, the DoD Component will ensure that the congressional committees receive any classified information that is to be submitted under separate cover.

4.11 Congressional Committee Approval of DD 1415 Requests (060411)

4.11.1. Approval for a Prior Approval Reprogramming Action (DD 1415-1) is obtained by letter from the congressional committees prior to implementation of the action. Each separate
committee response is taken into account, and final implementation by OUSD(C) P&FC of the action reflects the lowest of the approvals received for proposed sources and increases. Occasionally the action is implemented for less than originally requested due to the denial of increases or sources.

4.11.2. As copies of the congressional committee approval letters are received, e-mail notification will be made to the applicable DoD Components and OUSD(C), Deputy Comptroller, Program/Budget appropriation managers. When the final committee approval has been received, an OUSD(C) P&FC implementation memorandum will be prepared. The implementing letter will attach copies of the approved DD 1415, data sheets, Secretary of Defense Determination, and committee letters, as applicable.

4.11.3. No reprogramming request will be approved if the funds requested have been obligated or committed prior to congressional committee review and approval. The obligation of funds prior to consideration by the congressional defense committees denies them a realistic option to deny the request. Such a procedure places the committee(s) in the position of having to approve the request or deny all funds for the continuation of the program in the latter part of the fiscal year. Also, funds that have already been identified for a below-threshold reprogramming should not be incorporated into the DD 1415 unless the funds have not yet been obligated on the new requirement. (If this occurs, the funds cannot be obligated until congressional approval is received).

4.11.4. Reprogramming hearings, questions, and transcripts will be handled by each Component involved, unless there is an OSD principal witness.

4.11.5. If the congressional committees have denied a reprogramming increase, DoD policy prohibits use of a series of below-threshold reprogramming actions as a means to finance the requested increase. However, below-threshold reprogramming authority may be used to finance increases on reprogramming actions that were approved by the congressional committees, but were not able to be accommodated within the implementation process, as long as the below-threshold reprogramming actions otherwise do not: exceed a threshold limitation, such as below-threshold reprogramming limitations on realignment of funds into or out of a budget line; affect an item of special congressional interest item; or have not been specifically denied by a congressional committee as a reprogramming source. This policy has evolved out of recognition of there being congressionally-approved increases within monthly and Omnibus reprogramming actions that were unable to be funded in the USD(C) implementation memorandum, due to a lack of congressionally-approved sources. However, in recent years, Components have been required to provide advance written notification to the congressional defense committees prior to the USD(C) undertaking a below-threshold reprogramming to implement approved sources.

4.12 Implementation Memorandums for Reprogramming Actions. (060412)

4.12.1. After all approvals have been obtained for a reprogramming action, a memorandum signed by the Director for Program and Financial Control will be provided to the applicable Components.
4.12.2. If the reprogramming action includes an appropriation transfer, the implementing memorandum will include instructions (data sheet) for processing the SF 1151, Nonexpenditure Transfer Authorization, and include a copy of the combined Secretary of Defense Determination and OMB Approval document approving the transfer.

4.12.3. Along with normal distribution, the implementation memorandum will be e-mailed to the applicable DoD Component and to the appropriate OUSD(C), Deputy Comptroller, Program/Budget appropriation manager(s), so that funds may be released.

4.13 Alternate Letters or Revised Actions for New Sources (060413)

4.13.1. Reprogramming actions may be submitted prior to or after the monthly or Omnibus Reprogramming Actions. When sources are denied by a congressional committee, new sources to fund the requested increase may be submitted in DD 1415 format or letter format. Except in the most unusual circumstances, alternate sources for items denied in the monthly or Omnibus Reprogramming Action will not be submitted to the congressional committees.

4.13.2. Revised actions or letters for the signature of the USD(C) should be prepared by the submitting DoD Component. Normal reprogramming procedures apply for processing the revised actions or letters to the congressional committees.

4.13.3. The committees have request that the original reprogramming request be furnished when identifying a new source of funds.

The USD(C) may appeal the decision of a committee on a reprogramming action. All proposed appeals to committees initiated by a DoD Component shall be forwarded by memorandum to the USD(C) for further processing within the Department. Any action on a reprogramming subsequent to its original submission to the committees is subject to the same procedures as the original reprogramming.

4.14 Withdrawal of Reprogramming Actions (060415)

4.14.1. When approval of a reprogramming action that was submitted to the congressional committees, but not fully approved, is no longer required, then that action should be formally withdrawn from congressional committee consideration. The need for withdrawal may result when too much time has elapsed for the proposed increase to go under contract or when proposed sources are needed to fund a higher priority reprogramming than that originally submitted.

4.14.2. Withdrawal letters for the signature of the USD(C) should be prepared by the submitting DoD Component. Normal reprogramming procedures apply for processing the letters to the congressional committees.

4.14.3. Sufficient rationale on the reason for withdrawal should be provided to the congressional committees so they will not question why the action was originally submitted for their approval. If one or more committees have already approved the action, letters should be written to those committees expressing appreciation for their approval.
5.0 DD 1416, REPORT OF PROGRAMS (0605)

5.1 General (060501)

The DD 1416, Report of Programs, reflects the congressionally approved programs as enacted, supplemental funding, rescissions, implemented reprogramming actions, congressionally directed undistributed amounts and transfers, and below-threshold reprogramming actions that are implemented by a DoD Component. The amounts on the DD 1416 for column should be identical to the amounts on the DD 1002, Appropriation Status by Fiscal Year Program and Subaccounts, column b (column d for Active Operation and Maintenance appropriations) for comparable “as of dates” and stub entries. Amounts should only deviate when reconcilable differences exist due to posting errors in the DD 1002.

5.2 Due Date (060502)

The DD 1416, Report of Programs is submitted quarterly 30-days after the end of each quarter for Title III, Procurement, and Title IV, Research, Development, Test, and Evaluation, and will include all implemented reprogramming actions through that date, together with below-threshold reprogrammings made by the DoD Components through that date. The due dates for these reports shall be approximately 30-days after the end of each quarter. The DoD Component will certify their submission through the EFD system of the quarterly DD 1416, Report of Programs, to OUSD(C), P&FC. The DD 1416 for Title I, Military Personnel, and Title II, Operation and Maintenance, appropriations will be submitted annually, 30-days after the end of the fiscal year.

5.3 Procurement Line Items “Items Less Than $5 million (060503)

“For programs that are included in an “Items Less Than $5 Million” line item, the program or cost growth will be accommodated within the below-threshold authority for the total line item value. The amount of growth to an individual program or to the aggregate line item total cannot exceed the dollar threshold of $20.0 million or 20 percent, whichever is less.

5.4 Program Base Columns Reflecting Congressional Action (060504)

Changes due to supplemental appropriations and rescissions will be shown in a separate column from the basic Appropriations Act. Additionally, general provision reductions that are to be proportionately allocated to “each program, project, and activity” within each applicable appropriation account will be reflected in this column. The combination of the “Program Base Reflecting Basic Congressional Action” and “Program Base Adjustments Reflecting Enacted Supplementals and Rescissions” columns shall be used for determining how much of the procurement and RDT&E appropriations can be decreased based on percentages when determining the amount that can be reprogrammed using below-threshold authority.
5.5 Detailed Instructions for Preparation (060505)

Reimbursable program or order amounts are not required unless reimbursable funding was used for the direct program. Detailed instructions for the DD 1416 are provided in the appendix to this chapter.

6.0 REPROGRAMMING OF INTELLIGENCE RESOURCES (0606)

6.1 Intelligence Reprogramming Guidance (060601)

6.1.1 National Intelligence Program (NIP): Section 102A of the National Security Act of 1947 (50 U.S.C. 3024) authorizes the Director of National Intelligence (DNI) to transfer or reprogram funds appropriated for a program within the National Intelligence Program (NIP) to another NIP effort. No NIP funds may be transferred or reprogrammed without the prior approval of the DNI, except in accordance with procedures prescribed by the DNI. For initiating and processing reprogrammings involving the NIP, use applicable guidance issued by the Office of the Director of National Intelligence (ODNI) Chief Financial Officer.

6.1.2 Military Intelligence Program (MIP): Reprogramming requirements set forth in section 0604 apply to reprogramming MIP intelligence resources. Further policies specific to MIP below-threshold reprogrammings are set forth in DoD Directive 5205.12, Military Intelligence Program (MIP), enclosure 2, paragraph 1.i. Additionally, as provided for in paragraph 060407, OUSD(C) will consult with the Office of the DNI Chief Financial Officer before transferring or reprogramming funds made available by Congress specifically for the MIP as required by section 102A(d)(1)(B) of the National Security Act of 1947 (50 U.S.C.§ 3024).

6.2 Oversight (060602)

The House Permanent Select Committee on Intelligence (HPSCI) and the Senate Select Committee on Intelligence (SSCI) have oversight jurisdiction over the NIP. All NIP reprogrammings require prior approval from the HPSCI, SSCI, House Appropriations Committee (HAC), and Senate Appropriations Committee (SAC). Reprogrammings affecting the MIP require prior approval from the HPSCI, House Armed Services Committee (HASC), Senate Armed Services Committee (SASC), HAC, and SAC. Notwithstanding that per agreements among the various congressional committees the SSCI has jurisdiction over the NIP only, the Department does provide the SSCI an information copy of reprogramming of non-intelligence funds into the MIP in satisfaction of section 504 of the National Security Act of 1947 (50 U.S.C.§ 3094). Additionally, the Department provides the SSCI an information copy of reprogramming actions within the MIP.

6.3 Submission Procedures (060603)

In addition, to applicable section 0604 procedures, including indication within cover letters whether MIP or NIP resources are affected, the following additional requirements apply to intelligence resource reprogrammings:
6.3.1. Because DD 1415 reprogramming actions are posted on the Internet, the DD 1415 must not refer to or identify specific intelligence programs or resources.

6.3.2. All classified reprogramming requests must be coordinated with the Directorate for Investment. Components are required to clearly identify classified actions as part of their reprogramming submission. Concurrent with their reprogramming request submission, Components are to separately provide; the classified details in electronic format to the appropriate Comptroller POCs.

6.4 Procedures (060604)

The same procedures apply to reprogramming intelligence resources as provided in paragraph 0604 with the following exception. For processing reprogrammings involving the NIP, contact the Office of the Director of National Intelligence (ODNI) for specific guidance. Because DD 1415 reprogramming actions are now being posted on the Internet, the DD 1415 must not refer to or identify specific intelligence programs or resources. Cover letters transmitting proposed DD 1415s to the OUSD(C) should contain a statement that the reprogramming does or does not affect NIP/MIP resources.

6.5 Below-Threshold Reprogrammings (060605)

For processing below-threshold reprogrammings involving the NIP, contact the Office of the Director of National Intelligence (ODNI) for specific guidance.

7.0 REPROGRAMMING OF SPECIAL ACCESS PROGRAMS (0607)

7.1 Provision in Law (060701)

The annual DoD Appropriations Act states: “Funds appropriated by this Act may not be used to initiate a special access program without prior notification 30 calendar days in session in advance to the congressional defense committees.”

7.2 General (060702)

For other than reprogrammings of new starts as stated in paragraph 060701, normal reprogramming procedures as described in this chapter apply to special access programs.

8.0 BELOW-THRESHOLD REPROGRAMMING ACTIONS (0608)

8.1 Purpose (060801)

Below-threshold reprogramming actions provide DoD Components with the discretionary flexibility to realign, within prescribed limits, and congressionally approved funding to satisfy unforeseen, higher priority requirements. As with DD 1415 reprogrammings, below-threshold actions must net to zero.
8.2 Guidelines (060802)

8.2.1. Below-threshold reprogramming actions are minor actions not otherwise requiring congressional approval that may be accomplished within the DoD Components and are measured cumulatively over the entire obligation availability of the appropriation. Reprogramming thresholds apply to increases and decreases made to line items in the Procurement and RDT&E accounts. Below-threshold amounts for the Military Personnel are measured by increases as well as Operation and Maintenance accounts are measured by increases and decreases. When the congressional committees impose reprogramming thresholds on specific sub-activity group categories, these threshold amounts are separately identified on the DD 1414, Base for Reprogramming Actions, and reprogramming restrictions apply. Any action, when combined with other below-threshold reprogramming actions for the same budget activity, line item or program element, must not exceed the established threshold in total, except when thresholds are exceeded due to the provisions of 31 U.S.C. 1551 et seq.

8.2.2. Threshold amounts agreed upon among the committees and the Department are contained in paragraph 060401D. New start programs cannot be initiated using below-threshold authority (see paragraphs 060401E and 060404).

8.2.3. Normal reprogramming thresholds will not apply based on 31 U.S.C. 1551 et seq. when currently available appropriations are used to fund obligations or adjustments to obligations, which would otherwise have been funded from a canceled account before it was canceled. Within an appropriation, reprogramming thresholds may be exceeded in currently available appropriations for increases or sources used to finance the “Canceled Account Adjustments” line item. If reprogramming thresholds are exceeded for increases or sources to finance these obligations or adjustments to obligations, then column “k,” “Below-Threshold Actions not Requiring Approval by the SECDEF or Committees” of the DD 1416 should be footnoted to indicate that the threshold amount has been exceeded due to canceled account adjustments.

8.2.4. If the congressional committees have denied a reprogramming increase, DoD policy prohibits the use of a series of below-threshold reprogramming actions to finance the requested increase. However, below-threshold reprogramming actions that preceded the congressional denial will be recognized as valid.

8.2.5. Below-threshold reprogramming authority may be used to finance increases on reprogramming actions that were approved by the congressional committees, but were not able to be accommodated within the implementation process, as long as the below-threshold reprogramming actions otherwise do not exceed below-threshold reprogramming limitations on realigning funds into or out of a program line; affect an item of special congressional interest item; or have not been specifically denied by a congressional committee as a reprogramming source. This policy has evolved out of recognition of there being congressionally-approved increases within monthly and Omnibus reprogramming actions that were unable to be funded in the USD(C) implementation memorandum, due to a lack of congressionally-approved sources. However, in recent years, Components have been required to provide advance written notification to the congressional defense committees prior to the USD(C) undertaking a below-threshold reprogramming to implement approved sources.
8.2.6. The below-threshold authority computation starts with the quantity of end items and amount of funds appropriated to a specific line item by the Congress. These baseline amounts are reflected in columns h and i on the DD Form 1414, Base for Reprogramming Actions; in the BTR column on the DD Form 1416, Report of Programs. The baseline is changed by supplemental appropriations, rescissions, directed general provisions reductions, and approved DD 1415 reprogramming actions, which are reflected in the appropriate columns of the DD 1416. The net amounts of the appropriated amounts and the supplemental appropriations, rescissions, directed general provisions reductions, and approved DD 1415 reprogramming actions are reflected in columns b, c, d, and e on all versions of the DD 1415. The first DD 1415 for a particular line item will reflect the same baseline amounts in columns b/c and d/e. Subsequent DD 1415s for a particular line item will retain the same baseline amount in columns b/c and d/e (unless a supplemental or rescission or an approved DD 1415 has been implemented in the interim. Exceptions to this occur when more than one DD 1415 is processed simultaneously, or when the previous DD 1415 was implemented at a different level than was originally approved (Monthly or Omnibus, for example).

9.0 Replacement of Items Sold from Inventory (0609)

9.1 Policy (060901)

The current budget policy requires that offsetting collections from asset sales generally cannot be used to replace end items sold from inventory if the replacement end item is not a “like replacement” item of identical type, model, and series designation) unless congressional approval is obtained. Although technically not involving the reprogramming of appropriated budgetary resources, DoD obtains the requisite approval by submitting a prior approval reprogramming action to the congressional defense committees.

9.2 Guidelines (060902)

9.2.1. The requirement for a prior approval reprogramming action for small dollar value end items where replacements vary only to a minor extent from the item sold has resulted in unnecessary paperwork and serves no substantive purpose. Replacement of items sold from inventory with a unit cost of less than $5,000 that are not of identical type, model, and series designation will be treated as a “like replacement,” if an improved model of the same end item is being procured, performs the same warfighting capability, and the inventory objective presented to the Congress is not exceeded. Items satisfying all of these criteria will be financed with the proceeds of the sale of the end items issued from inventory without processing a DD 1415-1, prior approval reprogramming request. The amount applied toward the like replacement item may not be increased beyond the proceeds of that sale.

9.2.2. The requirement for a prior approval reprogramming action exists when an item of materiel is sold which will require replacement to compensate DoD inventories for the resultant loss of capability or readiness and the replacement item will not qualify as like replacement item because it is not identical to the item sold. Replacement items submitted for congressional approval must, however, be a later series or modified version of the same basic model of the item being sold (e.g., sale of a C-130A aircraft and purchase of a C-130E), or be an acceptable substitute.
item used against the same inventory objective or authorized acquisition objective in requirements computations (e.g., sale of an M-48 tank and purchase of an M-60 tank). If congressional approval is provided, offsetting collections from the asset sale may be used to procure the item as a like replacement item. See paragraph 070302.C.2 of Chapter 7 of Volume 15 for more information concerning replacement of items following sales of Defense articles from stocks. In accordance with OMB Circular A-11, section 83.5, the buyback of the like replacement items must be classified as a direct obligation because it is financed using an offsetting collection from an asset sale to a non-Federal source.

9.2.3. For DD 1415-1 reprogramming actions seeking approval for use of proceeds to acquire items that are not “like replacement” items, Components must either submit a separate, stand-alone prior approval reprogramming request, or make the request as a separate, stand-alone part within the regular monthly reprogramming submission. Components shall not incorporate or combine such actions with other types of reprogramming requirements.

10.0 REPROGRAMMING POLICY FOR CLOSING APPROPRIATION ACCOUNTS (31 U.S.C. 1551 et seq) (0610)

10.1 Definitions of Contract Changes for Reprogramming Purposes (061001)

For purposes of this reprogramming policy guidance, adjustments to amounts initially obligated in accounts that now are expired are categorized either as within-scope or change-in-scope contract changes. Within-scope changes generally are funded from the appropriation that originally financed the contract until cancellation. Change-in-scope contract changes are financed from appropriations currently available for obligation at the time the change is made. Specific guidelines for determining scope of work changes are defined in Chapter 8, “Standards for Recording and Reviewing Commitments and Obligations”.

10.2 Use of Currently Available Appropriations to Fund Out-Of-Scope Contract Changes (061002)

10.2.1. Normal applicable reprogramming (DD 1415) procedures and thresholds will apply when currently available appropriations are used to fund out-of-scope contract changes.

10.2.2. Out-of-scope contract changes funded from currently available appropriations will be funded from, and reflected against, the current corresponding line item, program element or program applicable, or comparable, to the program for which the contract change is being made.

10.2.3. If an applicable corresponding program no longer exists in the currently available appropriation for the program for which the out-of-scope contract change is being made, a new line item for the program in question will be created to reflect the contract change adjustment. Reprogramming threshold procedures for newly created line items will be the same as for the creation of any other new line item.
10.2.4. Any line item or program can be the funding source for contract changes funded from currently available funds. However, the funding source line item or program will also be subject to normal reprogramming thresholds.

10.3 Use of Currently Available Appropriations to Fund Obligations or Adjustments to Obligations that Otherwise Would Have Been Funded from a Canceled Appropriation Account (061003)

10.3.1. Obligations and adjustments to obligations that would have been properly chargeable to a closed account, both as to purpose and amount, shall be charged to an appropriation currently available for the same purpose. Specific limitations are as follows:

10.3.1.1. The sum of all such amounts funded from currently available appropriations shall not exceed the lower of (a) one percent of the originally appropriated amount of the current appropriation being charged or (b) the current unexpended balance of the canceled appropriation account.

10.3.1.2. For the purpose described in paragraph 1, the unexpended balance is the sum of the unobligated balance plus the unliquidated obligated balance of the appropriation account at the time it was canceled, less any and all obligations incurred and payments made subsequent to the cancellation of the original appropriation account when such obligations and payments would otherwise have been properly charged to the appropriation had the appropriation not been canceled.

10.3.2. Normal reprogramming procedures (DD 1415) and thresholds will not apply when currently available appropriations are used to fund obligations or adjustments to obligations, which would otherwise have been funded from a canceled appropriation account before it was canceled.

10.3.3. Charges to currently available appropriations for obligations or adjustments to obligations that would otherwise have been charged to canceled appropriation accounts shall be reflected in a line item on the Report of Programs (DD 1416) entitled “Canceled Appropriation Account Adjustments.”

10.3.3.1. Within an appropriation, reprogramming thresholds may be exceeded in currently available appropriations for increases or sources used to finance the “Canceled Appropriation Account Adjustments” line item.

10.3.3.2. If reprogramming thresholds are exceeded for increases or sources to finance these obligations or adjustments to obligations, column k, Changes not Requiring Approval by Secretary of Defense, of the DD 1416 should be footnoted to indicate that the threshold amount has been exceeded due to canceled appropriation account adjustments.

10.3.3.3. The new line, “Canceled Appropriation Account Adjustments,” will be a separate line item or program element and added as an entry within a single budget activity. For all appropriation accounts that do not display line item detail, a memo line shall be shown under any single budget activity.
10.4 Use of Expired Appropriations to Fund Contract Changes (061004)

10.4.1. An expired appropriation remains available for recording, adjusting and liquidating obligations properly chargeable to that appropriation until the appropriation is closed under 31 U.S.C. 1552. Accordingly, an expired appropriation may be used to fund within-scope contract changes properly chargeable to that appropriation in accordance with Chapter 8. When properly chargeable obligations are posted against a line item, funding must be available in that program. If funding is not available on that program, but funding is available within the appropriation, a funding realignment between programs in that appropriation must be accomplished.

10.4.2. Expired Operation and Maintenance, Navy appropriations may be used to fund certain payments required because of changes in scope of work in connection with ship overhaul, maintenance, and repair work under 10 U.S.C. 7313.

10.4.3. For purposes of the Shipbuilding and Conversion, Navy, (SCN) appropriation, appropriation language normally provides for additional obligations to be incurred after the 5 years of obligation availability, for engineering services, tests, evaluations, and other such budgeted work that must be performed in the final stage of ship construction. The period of availability of the SCN appropriation is adjusted prior to being canceled based on the schedule of work being performed. (e.g. section 8075 of division C of Public Law 113-235, the DoD Appropriations Act, 2015).

11.0 NATIONAL GUARD AND RESERVE EQUIPMENT APPROPRIATION NOTIFICATION PROCEDURES (0611)

11.1 General (061101)

In the National Guard and Reserve Equipment Appropriation (NGREA), the Congress typically appropriates funding in lump-sum amounts to be used for aircraft and miscellaneous equipment, and requests submission of a detailed assessment of modernization priorities by each of the Reserve Component (RC) Chiefs. The Assistant Secretary of Defense (Reserve Affairs) (ASD (RA)) forwards the RC acquisition plans to the congressional committees, along with a consolidated equipment requirements list for all Reserve Components, called the Summary NGREA Acquisition Report.

11.2 Procedures for Revisions to the Summary NGREA Acquisition Report (061102)

11.2.1. Procurement of any item not included in the Summary NGREA Acquisition Report for allocation of the funds appropriated in lump-sum amounts for aircraft and miscellaneous equipment cannot be initiated by a Component until the proper notification to the congressional committees is made.

11.2.2. Letters requesting a change to the initial report must be submitted to ASD(RA) by the cognizant Military Department Assistant Secretary (Financial Management and Comptroller) for the respective Reserve Component requiring a change from the initial allocation directly to the
ASD(RA). The ASD(RA) shall obtain coordination from OUSD(C) P/B before transmitting letters to the congressional committees.

11.2.3. Consistent with other procedures in place for letter notifications pertaining to new starts (section 060403), the following procedures shall apply.

11.2.3.1. Notification of the House and Senate Appropriations Committees and the House and Senate Armed Services Committees is followed by a 30-day automatic hold.

11.2.3.2. The DoD Component may implement the reprogramming 30 calendar days after receipt by these committees unless notification to the contrary is received from a committee.

*12.0 OPERATION AND MAINTENANCE QUARTERLY EXECUTION REPORT (0612)

*12.1 Purpose (061201)

This chapter provides instructions applicable to preparation and submission of the Operation and Maintenance (O&M) Quarterly Execution Report. Congress requires the Department to provide the congressional defense committees with quarterly budget execution data for each of the active, guard, reserve, and defense-wide O&M accounts. Title 10, U.S. Code, section 228, requires quarterly reports on the allocation of funds within operation and maintenance budget sub-activities. The Operation and Maintenance Quarterly Execution Report satisfies both reporting requirements.

12.2 Submission Requirements (061202)

The Military Departments submit their reports to the Office of the Under Secretary of Defense, Comptroller (OUSD(C)), Operations Directorate 20 days after the end of each quarter. The Defense Wide Operation and Maintenance Report is prepared by OUSD(C), Operations Directorate. The template provided in an appendix B to this chapter displays the format for the Report.

12.3 Preparation of Material (061203)

The O&M Execution Report must:

12.3.1. Reflect the official DD COMP (M) 1002 Report as of the last day of the reporting quarter;

12.3.2. Explain any deviations from official budget data and accounting execution report data.

12.3.3. Control funds at the SAG/BLI level to prevent reflecting obligations in excess of program in the official DD COMP (M) 1002 Report; and
12.3.4. Avoid exceeding SAG/BLI thresholds for prior approval reprogrammings as set by Congress.

12.4 References (061204)

Volume 2A Chapter 1 provides general funding policies and Chapter 3 provides specific policies related to Operation and Maintenance costs. (See Volume 2A, Chapter 1 – 3)

12.5 Operation and Maintenance Quarterly Execution Report Exhibit (061205)

12.5.1. The O&M Report contains the following column data as displayed on the format presented in Appendix C to this chapter. Unless modified in a data call, this format should be adhered to.

12.5.1.1. Appropriation: Use this column to identify the Component’s O&M account and display as follows:

12.5.1.1.1. Army O&M (Active/Reserve/National Guard)
12.5.1.1.2. Navy O&M (Active/Reserve)
12.5.1.1.3. Marine Corps O&M (Active/Reserve)
12.5.1.1.4. Air Force O&M (Active/Reserve/National Guard)
12.5.1.1.5. Defense-Wide (D-W) O&M

12.5.1.2. Budget Activity (BA): Use this column to identify the applicable Budget Activities such as:

12.5.1.2.1. Operating Forces (BA 1)
12.5.1.2.2. Mobilization (BA 2)
12.5.1.2.3. Training and Recruiting (BA 3)
12.5.1.2.4. Administrative and Servicewide Activities (BA 4)
12.5.1.2.5. Defense Agency and Budget Activity (Defense-Wide)

12.5.1.3. Activity Group (AG)/Budget Sub-Activity (BSA): Use this column to display the activity groups.

12.5.1.4. Sub-Activity Group (SAG)/Budget Line Item (BLI): Use this column to display the sub-activity group (SAG)/Budget Line Item (BLI) title.
12.5.1.5. President’s Budget Request Column: This column must match the current fiscal year budget request, by SAG/BLI, in the Conference Report for the Department of Defense Appropriations and match the appropriate column in the Base for Reprogramming Actions (DD 1414).

12.5.1.6. Appropriation Column: This column must match the current fiscal year appropriation, by SAG/BLI, in the Conference Report for the Department of Defense Appropriations and match the appropriate column in the Base for Reprogramming Actions (DD 1414).

12.5.1.7. Distribution of Unallocated Congressional Adjustments: This column should reflect the distribution of unallocated congressional adjustments found in the Conference Report for the Department of Defense Appropriations.

12.5.1.8. Adjustments Required by Statute: The total for the Adjustments Required by Statute column should equal the Transfers (i.e., letter reprogrammings directed by statute), General Provisions, and Supplemental Appropriations.

12.5.1.9. Prior Approval Reprogramming: This column should reflect prior approval reprogrammings. This should include all prior approval reprogrammings approved by Congress by the end of the quarter that this report covers.

12.5.1.10. Below Threshold Reprogrammings (BTRs): This column should include any reprogramming actions that the component has made between SAG/BLI s that do not require OSD or congressional approval, also known as Below Threshold Reprogrammings (BTRs). The BTRs must not exceed $15.0 million into/out of each Budget Activity (BA) or Defense Agency. Additionally, the Explanatory Statement, Division C Department of Defense Appropriations Act Fiscal Year 2015 cites specific SAG/BLI s that require prior approval reprogramming and Defense Agencies and Components restricted to BTRs of the lessor of $15 million.

12.5.1.11. Other Reprogrammings: This column should include any Internal Reprogrammings (IRs) not displayed elsewhere in this report. Provide a footnote explanation for these adjustments (i.e., includes environmental restoration and foreign currency fluctuation transfers). Provide specific details for any adjustments other than adjustments from Transfer accounts. For example, letter reprogrammings authorized but not specifically directed by statute would appear in this column. The footnote would explain the transfer.

12.5.1.12. Current Program: This column must match, by SAG/BLI, Budget Activity (BA) and in total, column D (column C for the Marine Corps Reserve, Navy Reserve, Air Force Reserve, and Air National Guard) of the O&M Appropriation Status by Fiscal Year Program and Subaccounts (DD 1002) Report for the last month of the applicable quarter. If it does not, then present the appropriate total; provide a footnote explanation with specific SAG level detail noting the discrepancy and address why it does not, and what action is underway to correct any differences.
12.5.1.13. Actual Obligations: This column must match, by SAG/BLI, Budget Activity (BA) and in total, column E of the O&M Appropriation Status by Fiscal Year Program and Subaccounts Report (DD 1002) Report for the last month of the applicable quarter. If it does not, then present the appropriate total; provide a footnote explanation with specific SAG/BLI level detail noting the discrepancy and address why it does not, and what action is underway to correct any differences.

12.5.2. Footnotes:

12.5.2.1. Careful attention must be paid to report footnotes.

12.5.2.2. Use the footnote section to explain the data contained in the report and make it meaningful;

12.5.2.3. Explain any deviations from official budget data and accounting execution report data;

12.5.2.4. Be consistent with the wording of footnotes and ensure the current quarter footnotes are consistent with the previous quarter’s report footnotes; and

12.5.2.5. Standard footnotes will be provided by the Office of the Under Secretary of Defense (Comptroller) at the beginning of each fiscal year

12.5.3. Expectation for Funds Awareness

12.5.3.1. Funds should be controlled at the SAG/BLI level to prevent reflecting obligations in excess of program in the O&M DD 1002 Report; and

12.5.3.2. Funds must be controlled to avoid exceeding SAG/BLI thresholds for prior approval reprogrammings as set by Congress.
### BASE FOR REPROGRAMMING ACTIONS

(Dollars in Thousands)

<table>
<thead>
<tr>

<td>A</td>
<td>Qty b, Amount c</td>
<td>Qty d, Amount e</td>
<td>Qty f, Amount g</td>
<td>Qty h, Amount i</td>
</tr>
</tbody>
</table>

The DD Form 1414, Base for Reprogramming Actions, establishes the base from which reprogramming actions may be taken. It identifies line items for each appropriation covered in the DoD Appropriations Acts.

Line item nomenclature and accompanying amounts for programs appropriated vary by account and should be shown as follows:

- Active and reserve component military personnel appropriation accounts shall list budget activities as presented in the justification books. These line items will be followed by budget activity subdivisions or other line identifications to reflect congressional action by programmatic change. A total for each budget activity will be shown.
- Operation and maintenance (O&M) active and reserve appropriation accounts shall list budget activities as presented in the justification books. These line items will be followed by budget activity subdivisions or other line identifications to reflect congressional action by programmatic change. A total for each budget activity will be shown.
- Procurement appropriation line items will be the procurement line items shown on the P-1, Procurement Programs, and arranged in the same order with the exact same title. The line items will be grouped by budget activity and a total will be shown for each budget activity. Only congressional special interest item changes should be listed as memo entries under each P-1 line item.
- Research, Development, Test and Evaluation appropriation line items will be the program elements shown on the R-1, RDT&E Programs, and arranged in the same order with the exact same title. The program elements will be grouped by budget activity and a total will be shown for each budget activity. New program titles due to congressional adds shall be as reflected in the congressional reports or as part of an existing program element, whichever is appropriate. Only congressional special interest item changes should be listed as memo entries under each program element.

Unless otherwise directed by OUSD(C), undistributed congressional reductions and adds must be distributed on the DD 1414.

<th>Changes Reflecting Congressional Action/Intent</th>
<th>Program Base Reflecting Congressional/Presidential Action</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Qty b</td>
<td>Amount c</td>
<td>Qty d</td>
<td>Amount e</td>
</tr>
</tbody>
</table>

**Notes:**
- "Program Base Presented to Congress in Printed Justification" (columns "b" and "c"). For each line item in the Procurement and RDT&E appropriations, enter the amounts reflected in the P-1 and R-1. The Procurement line items should include applicable line item quantities (do not use sc). Military Personnel and Operation and Maintenance (O&M) appropriations will be by budget activity level and amounts will be obtained from M-1 and O-1.

- "Approved Changes Presented Prior to Final Congressional Action" (columns "d" and "e"). Enter the amount of increase (+) or decrease (-) to the line items or budget activities which were approved by the Secretary of Defense and formally presented to one or both of the Committees on Appropriations. Normally, such changes, involving a change in the budget estimate for the total appropriation, will be submitted to the Congress by the President as formal budget amendments, although in certain cases, such changes have been presented directly by the Secretary of Defense. Testimony on program changes by a DoD official other than the Secretary or Deputy Secretary of Defense shall be considered as an expression of personal opinion and not as an approved change. This column shall only be used when directed by OSD.

- "Changes Reflecting Congressional Action/Intent" (columns "f" and "g"). Enter the amount of increase (+) or decrease (-) for each line item reflecting congressional action as indicated in the Conference Report accompanying the DoD Appropriations Act or any other information as may be available to determine congressional action or intent regarding line item detail. Non-specific congressional adjustments included in appropriated amounts for an Active Service O&M account shall be allocated to the budget activity level.

- "Program Base Reflecting Congressional/Presidential Action" (columns "h" and "i"). Entries will represent the arithmetic sum of the applicable entries from columns "b" through "f" and "c" through "g." Amounts in this column will become the first column "Program Base Reflecting Congressional Action" (columns "b" and "c") of the subsequent DD 1416 reports.

Quantities (Columns "b," "d," and "f"). Quantities are only applicable for the procurement accounts. When a procurement line item contains a quantitative measurement, then the quantity shall be reflected in the appropriate quantity columns for that line item. If no quantity is meaningful as a unit measurement, then leave the column value left (i.e., do not use sc).

*Program*

Stub Entries for this Financing Section may include some or all of the following types of transactions:

- Appropriation, P.L. 113-xxx
- PL 113-xxx, Sec. 8106
- PL 113-xxx, Sec. 8060
- Total Financing, FY 20xx Program

Detail instructions for the above financing lines by column are as follows:

- Column "c" for the appropriation and reimbursable orders lines shall be the same as the amounts in the President's Budget Program and Financing Schedules.
- Column "e" is rarely used; and when appropriate, instructions for this column will be provided.
- Column "f" shall be the delta changes made by Congress or DoD for applicable appropriation or general provision changes.
- Column "g" shall be the sum of the columns across and shall be column "c," "Program Base Reflecting Basic Congressional Action," on subsequent DD 1416s.

"Transfers" shown on the DD 1414 will only apply for those transfers included as part of the President's Budget request or certain congressional action transfers. For example, these may include transfers in the budget from the National Defense Stockpile Fund or general provision transfers provided by the Congress in law that usually involve transfers to Shipbuilding and Conversion.

Footnote Items: Extreme care should be used in footnoting items. Footnote 1, should be used when one of the congressional reports specifically provided funds for this item using the phrases "only for" or "only to," or the item appears in one of the project level tables. Congressional prior approval is required before decreasing funds on this program. Footnote 2, should be used when this effort was specifically reduced by one or more of the congressional committees. Below Threshold Reprogramming (BTR) authority cannot be used to restore specific congressional reductions. Footnotes should be consolidated onto the last page of each account. This avoids repetition of the same footnote that may appear on several pages of an appropriation.
### REPROGRAMMING ACTION - PRIOR APPROVAL

This is a sample with instructions on details required for preparation of a DD 1415-1, Prior Approval, reprogramming action, which requires congressional committee approval in writing prior to implementation of the committee responses. Specific approval of the USD(Comptroller) is required on all DD 1415 reprogramming actions and OMB endorsement is required for those involving general and special transfer authority.

An introductory paragraph should include the following:

1. Explain why the action is being submitted for prior approval. (One or more of the following should apply.)
   
   A. Affects an item that is known to be or has been designated as a matter of special interest to one or more of the congressional committees.
   
   B. Initiates a new program, subprogram, modification, program element, project, or subproject.
   
   C. Exceeds thresholds agreed upon between the congressional committees and the Department.
   
   D. Involves the use of general transfer authority and shall state which Acts are involved, for example, pursuant to section 8005 of division C of Public Law 113-235, the Department of Defense Appropriations Act, 2015, and section 1001 of Public Law 113-291, the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year (FY) 2015.
   
   E. Involves the use of special transfer authority and shall state which Acts are involved, for example, pursuant to section 9002 of Title IX, Overseas Contingency Operations (OCO) of Public Law 113-235, the Department of Defense (DoD) Appropriations Act, 2015, and section 1522 of Public Law 113-291, the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year (FY) 2015.
   
   F. Increases the procurement quantity of a major end item, such as an individual aircraft, missile, naval vessel, tracked combat vehicle, and other weapon or torpedo and related support equipment for which funds are authorized. (Exceptions may apply when congressional language allows for procurement of as many missiles as funds will procure, which requires the submission of, and approval of an internal reprogramming action.)

G. Terminates any program that results in the elimination of a procurement program or an RDT&E program element, a subprogram within a procurement program or RDT&E project or subproject which is equal to the total amount of the procurement program or program element; or a subprogram within a procurement program or an RDT&E project or subproject within a program element of $10 million or more.

2. A concise sentence stating the purpose of the action.

3. A statement that the action is for a higher priority item, based on unforeseen military requirements, than that for which the funds were originally appropriated, meets all administrative and legal requirements of the Congress, and has not been denied by the Congress. This statement ensures that statutory requirements are satisfied.

4. A statement that the action is not included in the President’s Budget that is on the Hill for approval.

Reprogramming Increases:

Appropriation and year designation

Budget Activity Number and Title

<table>
<thead>
<tr>
<th>a</th>
<th>b</th>
<th>c</th>
<th>d</th>
</tr>
</thead>
</table>
| Explanation: Details for each separate increase are as follows:

a. Line item titles. The title will be identical to the title shown on the DD Form 1414, Base for Reprogramming Actions, if the line item is listed therein.

b. Entries for “Program Base Reflecting Congressional Action” (columns “b” and “c”). For each line item, enter the procurement quantity (if applicable) and amount shown on the DD 1414. The baseline is changed by any congressional action to include rescissions, supplemental, and approved DD 1414 action.

c. Entries for “Program Previously Approved by SecDef” (columns “d” and “e”). For the first 1415 processed for a particular item, entries will be the same as columns b and c entries. For subsequent 1415s, entries will be the same as columns b and c and i of the most recently approved DD 1415 reprogramming action. If a reprogramming action is already in process in OSD affecting the same item, coordinate the revised program value to be used with the OUSD(C) P&FC.
REPROGRAMMING ACTION - PRIOR APPROVAL

Subject: Appropriation titles with year designation.

Includes Transfer?
Yes or no

Component Serial Number: (Amounts in Thousands of Dollars)

<table>

<td>c</td>
<td>d</td>
<td>e</td>
</tr>
</tbody>
</table>

(continued)

d. Entries for "Reprogramming Action" (columns "f" and "g"). Enter the increase (+) or decrease (-) in quantity (if applicable) and amount of the proposed reprogramming action. The total increases and decreases must net to zero. Columns "f" and "g" are not allowed to contain classified quantities or amounts. Other material, if required, should be classified in order to allow columns "f" and "g" to remain unclassified.

e. Entries for "Revised Program" (columns "h" and "i"). Enter the adjusted quantity (if applicable) and the amount resulting from the proposed increase or decrease to the previously approved program.

f. The "Explanation" on the DD 1415 should include sufficient data to justify the proposed increase. The statements should be informative, clearly stated, and straightforward. The purpose of the written documentation should be to inform the reader; therefore, care must be taken to avoid confusing narratives. For each increase within the reprogramming, include explanations and justifications that are intended to serve the same basic purpose as "original budget justification." Accordingly, concise, accurate, and clearly stated information should be provided for reviewing officials and the congressional committees as to the nature, extent, and necessity of the requirements, the costs, and the proposed application of resources to meet such costs. All program increases should be described in such a way as to distinguish between price changes and program scope changes. Statements should be prepared and reviewed on the basis that classified data will not be included. If classified information is essential to justification of the reprogramming change, it will be submitted under separate cover.

FY 2015 REPROGRAMMING INCREASE:

Research, Development, Test and Evaluation, Air Force, 15/16
Budget Activity 04: Advanced Component Development and Prototypes
PE 0603851F ICBM - DEM/V AL 43,206 43,206 +10,000 53,206

Explanation: Funds are required to support the Rocket Systems Launch Program (RSLP) which converts surplus ICBMs into test launch vehicles for suborbital and sounding rocket launches. Funds are required to move 166 Minuteman II motors from Pueblo Depot, CO to Camp Navajo Depot, AZ because the Pueblo Depot is closing. As a result, proper storage and maintenance of environmental igloos for motor storage is no longer being maintained or guaranteed. Since the Camp Navajo Depot has been modified and is ready to accept motors, the motors must be moved to ensure proper storage and maintenance and to avoid unauthorized location of hazardous Air Force material. This is a base budget requirement.
**REPROGRAMMING ACTION - PRIOR APPROVAL**

**FY 2015 REPROGRAMMING DECREASE:**

Missile Procurement, Air Force, 15/17

| Budget Activity 03: Modification of Inservice Missiles | MM III Modifications | 29,344 | 29,344 | -10,000 | 19,344 |

**Explanation:** These funds are excess to requirements as a result of the restructure of the Minuteman III Guidance Replacement Program (GRP). As a result of the restructure, procurement of long lead parts to support low rate initial production is not required until the second quarter of 2015. The MM III GRP program is adequately and appropriately funded to support a GRP production start in FY 2015. Accordingly, FY 2015 funds provided to procure long lead parts are available to finance higher priority requirements.

**This is base budget funding.**

**Note:** All sources of financing will be clearly and explicitly identified in the DD 1415. A statement immediately following each proposed decrease in a line item shall include information as to the basis upon which it has been decided that the line item may be reduced.

Extreme care should be used in identification of sources to ensure that approved increases will be fully funded. For purposes of the Omnibus reprogramming action, except in the most unusual circumstances, the USD(C) will neither request reconsideration of denied increases, nor submit alternate sources for any denied sources.

**SAMPLE IR**

This reprogramming action is submitted for prior approval because it uses general transfer authority pursuant to section 8005 of division C of Public Law 113-235, the Department of Defense (DoD) Appropriations Act, 2015; and section 1001 of Public Law 113-291, the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year (FY) 2015. This action transfers $xxxx million from Shipbuilding and Conversion, Navy, 15/19, appropriation to the Research, Development, Test, and Evaluation, Navy, 15/16, appropriation to finance the construction of Littoral Combat Ship (LCS) 1 and LCS 2 through calendar year 2015. This action reprograms funding in support of higher priority items, based on unforeseen military requirements, than those for which originally appropriated, and is determined to be necessary in the national interest. It meets all administrative and legal requirements and none of the items has been previously denied by the Congress.

**FY 2015 REPROGRAMMING INCREASE:**

<table>

CHAPTER 7

REPROGRAMMING OF MILITARY CONSTRUCTION AND FAMILY HOUSING APPROPRIATED FUNDS

1.0 GENERAL (0701)

This chapter provides guidance for the preparation of reprogramming proposals for the appropriation of military construction and family housing funds.

2.0 SUBMISSION REQUIREMENTS (0702)

The congressional subcommittees concerned with the appropriation and authorization of military construction and family housing funds have agreed that, in executing approved programs, some flexibility is required in adjusting approved funding levels to comply with new conditions and to effectively plan programs to support assigned missions. To facilitate the use of this authority and to promote continuity with the subcommittees, the Department agrees to seek approval from the relevant congressional committees. Departmental adjustments or reprogramming measures may be required for a number of reasons including: responding to emergencies; restoring or replacing damaged or destroyed facilities; accommodating unexpected price increases; and implementing specific program provisions provided for by the congressional committees. While supporting DoD Component mission accomplishments, reprogramming measures are intended to ensure that the use of DoD appropriations complies with congressional intent.

3.0 PROCEDURES (0703)

3.1 DoD Approvals (070301)

Proposed military construction and family housing reprogramming actions shall be approved by the OUSD (C). Reprogramming actions shall be submitted to the Office of Management and Budget for clearance, as required by OMB Circular No. A-11, Section 22.3, “Clearance of Materials for Congress and the Media”. After OUSD(C) approval, they shall then be submitted to the appropriate congressional committees for approval or for notification. Certain reprogramming actions below threshold may be executed on approval of designated officials at the DoD Component level (see subparagraph 070302.C). Generally, the OUSD(C) shall not approve reprogramming actions until compliance with the criteria delineated below has been fully documented by the DoD Components. When the House and Senate Armed Services Committees are to be notified in accordance with Title 10, United States Code, the DoD Component shall provide a copy of the signed and dated notification letter to the DoD Comptroller along with the reprogramming request. Congressional notification letters in accordance with Title 10 must be sent to the four defense oversight committees prior to requesting a reprogramming action.
3.2 Determining Reprogramming Actions Requiring Prior Notification and Approval of Congressional Committees (070302)

The following definitions, procedures, and criteria shall apply.

3.2.1. Reprogramming Base. The specific dollar amount for any project or effort that has been jointly approved for appropriation by the Committees on Appropriations. In instances where a prior approval reprogramming request for a project or effort has been jointly approved by the Committees on Appropriations, the amount approved becomes the new base for any future increase or decrease via below threshold reprogramming actions or prior approval reprogramming requests.

3.2.2. When Prior Approval Reprogramming is Required. Prior approval reprogramming is required for the following:

3.2.2.1. For any increase exceeding 25 percent of the reprogramming base or $2.0 million, whichever is less, to military construction projects, family housing new construction projects, or family housing improvement projects (exceeding $2.0 million base value).

3.2.2.2. For any increase exceeding 25 percent of the reprogramming base or $2.0 million, whichever is less, to a project or effort whose base has been increased, or decreased, by a previously approved congressional reprogramming action.

3.2.2.3. For any increase, regardless of percentage or dollar value, to a project that has been previously reduced in scope by the Congress in acting on the appropriation request.

3.2.2.4. For any emergency construction project to be performed under 10 U.S.C. 2803.

3.2.2.5. For any restoration or replacement of damaged or destroyed facilities to be undertaken with military construction funds under 10 U.S.C. 2854.

3.2.2.6. For any acquisition of interests in land under 10 U.S.C. 2663(d).

3.2.2.7. For any family housing relocation project to be accomplished under 10 U.S.C. 2827.

3.2.2.8. For any project authorized to be accomplished from savings, unless specifically exempted from such requirement by the Committees on Appropriations.

3.2.2.9. To increase the amount appropriated for unspecified minor construction.

3.2.2.10. To increase the amount appropriated for architectural and engineering services and construction design.

3.2.3. When Prior Approval Reprogramming is Not Required. Prior approval reprogramming is not required for the following:
3.2.3.1. When none of the criteria listed above, apply to the project or to the cost increase required.

3.2.3.2. For projects utilizing Environmental Restoration, Defense funds authorized under 10 U.S.C. 2810.

3.2.3.3. For projects less than $2.0 million within the Family Housing Improvements Program.

3.2.3.4. For decreases to a project or effort in response to “general reductions” imposed by the Congress for savings or other reasons.

3.2.3.5. When a DoD Component takes action to reprogram funds between or among family housing operation and maintenance accounts. However, the committees shall be notified within 30 days of any transfer that exceeds 10 percent of the reprogramming base of the increased account (cumulative within a fiscal year). This action shall be documented in an approved Obligation Authority letter prior to notification of the committees of the implemented transfers.

3.2.3.6. When the cost increase necessitating a reprogramming is due solely to final settlement of a contractor’s claim (Senate Report 100-200).

3.2.3.7. For any project being completed with expired funds. Cost increases are only allowable for valid upward price adjustments, which exclude any work not in the scope of the original contract (Senate Report 100-200).

3.2.3.8. For Reserve Component projects when the revised cost does not exceed $400,000. Reprogramming action may be taken 21 days after the appropriate committees receive notification and do not object (Senate Report 100-200).

3.3 When Reprogrammings Should Not Be Submitted (070303)

Requests for reprogrammings shall not be submitted by DoD Components when any of the following conditions exist.

3.3.1. For any project or effort that has not been authorized.
3.3.2. For any project or effort that, for any reason, has been denied specifically by the Congress, as indicated by report language or by the elimination of funds, unless all pertinent report language specifically states that a subsequent reprogramming shall be required or entertained, or when the requirement qualifies as an emergency, as defined in 10 U.S.C. 2803.

3.3.3. To initiate programs of major scope or base realignment actions, when such larger efforts have not been authorized by the Congress.

3.4 Split-Year Funding Authority (070304)

As provided for by Conference Report 100-912, the committees have agreed to allow split-year funding for military construction and family housing construction projects. Split-year funding occurs when a project is financed by funds from more than one program year (appropriation). Resources made available for split-year funding shall remain in the original appropriation for fund control and accounting purposes. Projects that have been funded in phases by the Congress are not considered split-year funded.

3.5 Appeals to Congressional Committees (070305)

An unfavorable congressional committee decision on a reprogramming action may be appealed by the OUSD(C). Any appeal on a reprogramming action taken after it is submitted to the congressional committees is subject to the same review and approval procedures as the original reprogramming request.

3.6 Explanatory Statements (070306)

Each proposed reprogramming action shall be fully justified and documented using the guidance in paragraph 0704. The required format should be closely followed to prevent unnecessary delays in processing.

3.7 Administrative Processing Instructions (070307)

3.7.1. Reprogrammings normally shall be forwarded monthly to the Appropriation Committees. If exceptions to this monthly processing schedule are required, such as year-end reprogrammings, the DoD Components shall be notified separately. DoD Component reprogramming points of contact are responsible for ensuring that all required documentation has been provided to the OUSD(C), Program and Financial Control (Room 3C689) and the Military Personnel and Construction Directorate (Room 3C654), Pentagon, Washington, DC 20301-1100, by the 5th workday of the month. Any actions received after the 5th workday will be held for the next month’s processing.

3.7.2. Urgent reprogramming requests warranting action in advance of the next regular cycle shall be evaluated and processed on a case-by-case basis. However, such out-of-cycle requests are expected to be extremely rare. Reprogramming requests must be sent by OUSD(C) to the Congress at least one month prior to the bid expiration date. Components must consider the 5th workday cut-off date when determining when a request should be forwarded to OUSD(C).
Reprogramming requests will not be accepted if there is insufficient time to review and send to Congress one month prior to the bid expiration date.

3.7.3. All sources should reflect the title, location and amount in the Authorization Act and be researched to ensure the requests will not be denied.

3.7.4. Documentation: Military construction and family housing reprogramming actions should be submitted via email to OUSDC (P&FC). The email should include the following:

3.7.4.1. A “.pdf” transmittal memorandum signed by an appropriate DoD Component official and supported by the proposed reprogramming justification document (MS Word) and relevant supporting material, such as, a certification by the Component’s Comptrollers that fund sources are available and the Component’s fiscal counsel has reviewed and has no fiscal objection, 10 USC 2853 notifications, and DD Form 1391 (if applicable).

3.7.4.2. This transmittal memorandum must state specifically that the reprogramming either does or does not require a cost variation notification in accordance with 10 U.S.C. 2853. If the reprogramming requires a section 2853 notification, a signed and dated copy of the notification also should be included in the required documentation. This notification letter must be transmitted to the Congress by the DoD Component prior to submission of the reprogramming request to OUSD(C). The reprogramming shall be provided in the specified format and 12-point typeface and letter-quality format.

3.7.4.3. The top page(s) should be the reprogramming request (installation, project, authorization, et al.) (see paragraph 0704). Supplementary narrative information, if required, should be attached next. A DD Form 1391, FY 19XX “Military Construction Project Data,” is required if not previously provided to Congress. Generally, this shall be restricted to situations in which the Military Service Secretary is exercising the emergency provisions of 10 U.S.C. 2803; the DoD Component is citing section 2854 to replace a damaged or destroyed facility; a project is being funded from savings; or a project has been added by the Congress without the benefit of official records reflecting the scope of the project involved (i.e., without a DD Form 1391).

3.7.4.4. Submissions that do not adequately justify the requirement or are missing documentation will be returned. When Components fail to correct a deficiency within two business days, the action may be returned and the Component will be required to resubmit their reprogramming request.
*4.0 REPROGRAMMING REQUEST FORMAT (0704)

Bid Expiration Date:

Military Construction or Military Family Housing Construction, (Enter DoD Component)

Reprogramming Request

Installation: Enter installation or base name, and location, consistent with the National Defense Authorization Act (NDAA).

Project: Enter project or program title consistent with the NDAA, if the project or program is in the funded program. If not previously authorized, enter the new emergency project title.

Authorization: Reflect the exact title of the NDAA, which includes the fiscal year and public law. If not previously authorized, reflect the appropriate sections of the Title 10, United States Code Authority for emergency or replacement projects.

Estimated Cost ($000):

Previously Appropriated

Previously Reprogrammed

Requested Reprogramming

Total Estimated Costs

Description: Give a brief description of the project and requirement, similar to the 1391 project description. If appropriate, indicate any significant changes to scope.

Justification: Be clear, succinct, and complete in describing the need for the Reprogramming. If appropriate, summarize the chronology of events leading to the request, such as when the request for the proposal was announced and when bids were received. Include other relevant information, such as the contracting strategy and/or type of contract, and impact if funding was not to be made available, as well as what is driving the increase in cost (such as market conditions, inflation, full prices).

Source of Funds: Explain why the funds are no longer required for the purpose originally appropriated. With the exception of BRAC, funds may not be "borrowed" from a project temporarily, with the intention of later restoring a portion of the amount reprogrammed.

CHAPTER 8

STANDARDS FOR RECORDING AND REVIEWING COMMITMENTS AND OBLIGATIONS

1.0 GENERAL

1.1 Purpose

This chapter prescribes the requirements for determining the amount and accounting period in which commitments and obligations must be recorded under various circumstances. Departmental standards for recording transactions in the execution level budgetary accounts are in Chapter 15. This chapter also provides guidelines for the Dormant Account Review Quarterly (DAR-Q) of Undelivered Orders, Unpaid (UDOU); Delivered Orders, Unpaid (DOU); Undelivered Orders, Paid (UDOP); and Unfilled Customer Orders (UFCO). Priorities for researching and correcting disbursement transactions are in Chapter 11.

1.2 Authoritative Guidance

2.0 COMMITMENTS

2.1 Definition

A “commitment” is an administrative reservation of allotted funds, or of other funds, in anticipation of an obligation (see paragraph 3.1). Since an obligation equal to or less than the commitment can be incurred without further recourse to an authorizing official, commitments are required for some appropriations and are permissible for others. For additional information, see Chapter 15 paragraph 3.3. A commitment, when recorded in the accounting records, reduces the allotment’s available fund balance. A person authorized to reserve funds must sign the commitment document, i.e., the official responsible for administrative control of funds for the affected subdivision of the appropriation. This helps ensure the subsequent entry of an obligation will not exceed available funds. The amount recorded as a commitment is the estimated procurement cost set forth in the commitment document. The date the authorized official signed the commitment document determines the accounting period the commitment is recorded in the general ledger. Officials can commit funds only to acquire goods, supplies, and services that meet the time, purpose, and amount for which Congress appropriated funds, or bona fide needs of the period to replace stock used during that period. See subparagraph 3.4.1 for further bona fide need concepts.
2.2 Recording of Commitments

A commitment must cite a Standard Line of Accounting (SLOA) in accordance with Volume 1, Chapter 4, and must be recorded in the general ledger in accordance with the United States Standard General Ledger (USSGL) Standard Financial Information Structure (SFIS) Transaction Library in Volume 1, Chapter 7.

2.3 Special Provisions for Determining the Amounts of Commitments

2.3.1. Criteria for Recognition of a Contingent Liability. A contingent liability is recognized when all of the following three conditions are met in accordance with the Statement of Federal Financial Accounting Standards (SFFAS) 5, “Accounting for Liabilities of the Federal Government,” paragraph 38.

2.3.1.1. A past event or exchange transaction has occurred. For example, a federal entity has breached a contract with a nonfederal entity.

2.3.1.2. A future outflow or other sacrifice of resources is probable. For example, the nonfederal entity has filed a legal claim against a federal entity for breach of contract, and the federal entity’s management believes the claim is more likely than not to be settled in favor of the claimant; and

2.3.1.3. The future outflow of resources is measurable. For example, the federal entity’s management determines an estimated settlement amount.

2.3.2. Contingent Liabilities Remaining under Outstanding Contracts. There are contingent liabilities for price or quantity increases or other variables that cannot be recorded as valid obligations in the cases of:

2.3.2.1. Outstanding fixed price contracts containing escalation, price redetermination, or incentive clauses;

2.3.2.2. Contracts authorizing variations in quantities to be delivered; and

2.3.2.3. Contracts where allowable interest may become payable by the U.S. Government on contractor claims supported by written appeals pursuant to the “Disputes” clause contained in the contract, see subparagraph 4.2.4.

2.3.3. Recording Contingent Liabilities Remaining under Outstanding Contracts. Carry amounts to cover these contingent liabilities as outstanding commitments pending determination of actual obligations. Conservatively estimate and record amounts based on judgment, experience, and the probability an obligation will materialize. The amount need not be recorded at the maximum or ceiling price under the contract. Allowances may be made for the possibility of downward price revisions and quantity under runs. Support each contingent liability with sufficient detail as referenced in SFFAS 5, paragraphs 38 and 39.
2.3.4. **Letter Contracts and Letters of Intent.** When accepted, record a letter contract, letter of intent, or *other undefinitized contract action* as an obligation, but only in the amount of the maximum liability stated. Other regulations may limit the maximum liability amount to the costs that the contractor may incur pending execution of a definitive contract. In that case, the estimated amount of the definitive contract, over and above the obligation recorded under the letter contract or letter of intent, must be carried as an outstanding commitment, pending execution of the definitive contract. If the letter stipulates that awarding of the definitive contract is dependent upon a congressional appropriation, then no funds are available and no commitment is recorded.

2.3.5. **Open End Contracts and Option Agreements.** Record a commitment for an open end contract or option agreement (when neither the items nor quantities are specified) only when the amount estimated is reasonably firm, i.e., are the subject of subsequent orders. Competent authorized personnel must determine the required quantities and quality specification for reasonable estimated prices. The existence of a specific dollar amount in the procurement directive or request does not make the dollar amount reasonably firm. For example, experienced personnel can estimate an amount useful in planning, i.e., an initial complement of spare parts will be acquired, but this amount is not reasonably firm and may be recorded as a memorandum “initiation” (see Chapter 15, paragraph 3.3), but not as a commitment.

2.3.6. **Contract Modification or Engineering Changes.** An authorization to execute engineering change orders during the course of performance of a contract may be recorded as a commitment upon the basis of a stated cost limitation even though the scope and amount of such changes are not yet defined and require specific approval of the person authorizing the procurement (or another designee) before the execution of the change orders. In such circumstances, however, it may be necessary to revise the authorization (and the recorded commitment) in light of subsequent events, including change orders actually placed.

2.3.7. **Intragovernmental Requisitions and Orders.** Record commitments for Intragovernmental requisitions and orders using Fiscal Service (FS) Form 7600B, Department of Defense (DD) Form 448, Military Interdepartmental Purchase Request (MIPR), or other digital equivalent Federal Intragovernmental Data Standard. DoD requisitions and orders are recorded as commitments prior to entry in the Government Invoicing (G-Invoicing) system. See additional guidelines and specifics on G-Invoicing in section 8.0.

2.3.8. **Multi-year Contracts.** Do not record contingent liabilities commitments for multi-year contracts with cancellation charges, i.e., when it is necessary for the government to cancel the contract for reasons other than contractor liability, until it becomes necessary to cancel the contract and the contractor is notified.

2.3.9. **Commercial Purchase Cards.** Establish commitments in amounts no less than the periodic purchase limits authorized for commercial purchase cards. Commitments limit expenditures to funds available for the purchase card program. Establish commitments for each *distinct* line of accounting. Advance reservations of funds are used in conjunction with purchases made using purchase cards. Advance reservations of funds are established by the resource manager (or equivalent), in conjunction with the assigned Purchase Card Program agency program coordinator, and must be considered when setting office and cardholder purchase limits. The use
of advance reservations of funds will ensure positive funds control precluding expenditures from exceeding obligations. Refer to OMB Circular A-123, Appendix B and the DoD Government Charge Card-Guidebook for additional guidance.

2.3.10. Imprest Funds. Record a commitment for imprest funds before advancing funds to the imprest fund cashier.

2.4 Validating Commitments

When drafting contracts, procurement officials may modify the description of deliverable goods and services or contract line item structure used on a funded purchase request. However, if these changes are substantial, there is a risk the goods and services procured no longer align with the purpose set forth in the purchase request for which the commitment was certified. To mitigate this risk, certifying officials must conduct an automated pre-award validation with the contract issuing organizations to validate that committed funds remain available and suitable for the draft award’s intended purpose. This check must also ensure that the data in the accounting and procurement systems are sufficiently aligned to facilitate line item traceability between commitments and obligations, to facilitate payment. The structure must support posting obligations and line items with different accounting treatments that must be segregated. This transaction may be performed via the Global Exchange system using system agnostic data standards.

3.0 OBLIGATIONS

3.1 Definition

An obligation is a legally binding agreement or action that will result in outlays, immediately or in the future. When authorized agency personnel place an order, sign a contract, award a grant, purchase a service, or take other actions that require the government to make payments to the public or from one government account to another, the agency incurs an obligation. It is a violation of the Antideficiency Act, Title 31, United States Code (U.S.C.), section 1341(a) (31 U.S.C. § 1341(a)) to involve the Federal Government in a contract or obligation for payment of money before an appropriation is made, unless authorized by law. Funds that are not legally obligated before their period of availability expires are no longer available for new obligations. The period of availability applies to the obligation of funds, not the liquidation of the obligation by disbursement of payment (expenditure). Chapter 10 prescribes policy related to adjustments to obligations or expenditures chargeable to expired and canceled accounts. Provisions of Chapter 15 and Volume 14, Chapter 1 require that funds be allotted to DoD Component activities before the activities incur obligations. Additionally, obligations may not be made in excess of apportionments or formal subdivisions of funds. Chapter 11 specifies the recording of obligations related to unmatched disbursements and negative unliquidated obligations. Unless otherwise specified, DoD Components have primary responsibility for recording obligations. It is imperative only authorized personnel have the appropriate authorization for Generally Accepted Accounting Principles compliance. Such authorizations are explicitly delegated primarily through the issuance of a Delegation of Authority Memorandum or an Appointment/Termination Record-Authorized Signature DD Form 577. As a result, authority is vested to such individuals to either make legal adjustment or take corrective action to
properly align the commitments and obligations. See section 14.3 for recording obligations by the accounting office that does not have the primary responsibility for such recording.

3.2 Obligation Responsibilities

31 U.S.C. § 1501, “Documentary Evidence Requirement for Government Obligations,” directs that amounts must be recorded as obligations only when supported by documented evidence. The office that incurs an obligation must provide, within five calendar days of the date the obligation is incurred, a copy of the obligating document(s), via electronic mail, fax, or other documented means, to the office responsible for recording the obligation. The office that is responsible for recording the obligation must record the obligation in the official accounting records within five calendar days of receipt of such documentation, information, or data. Timely and accurate recording of obligations facilitates the disbursing officer’s ability to verify fund availability before authorizing a timely payment.

3.3 Recording Obligations

3.3.1 All business and financial events resulting in an obligation must cite a SLOA in accordance with Volume 1, Chapter 4, and must be recorded in the general ledger in accordance with the SFIS Transaction Library in accordance with Volume 1, Chapter 7.

3.3.2 When recording obligations under this section, utilize the following principles:

3.3.2.1 Documented Evidence. An amount must be recorded as an obligation only when supported by documentary evidence of the transaction. A verbal order or agreement must be reduced to writing before the obligation may be recorded. When the amount is not known or cannot be feasibly ascertained at the time it is recorded, the best estimate must be used. Document the best estimate to include relevant inputs, assumptions, and calculations. In accordance with Volume 1, Chapter 9, retain evidence to support the transaction.

3.3.2.2 Ten-Day Rule. Record obligations in the official accounting records at the time a legal obligation is incurred, i.e., contract is signed. In all instances, obligations must be recorded within 10 calendar days following the day that an obligation is incurred (to include obligations incurred when invoices are overpaid or duplicate payments are made). Notwithstanding the ten-day rule, record all obligations (per line of accounting) in the official accounting records in the same month in which the obligation is incurred. If an obligation is not recorded within the specified timeframe, follow section 14.0.
3.4 Recording Contract Obligations

   Offices generating contract obligations in the form of a contract, order, or modification; must provide official evidence of the obligations, and other supporting documents, to the office responsible for recording the obligation, via electronic format as defined in the Defense Federal Acquisition Regulation Supplement (DFARS) Procedures, Guidance, and Information (PGI) 204.201, and in accordance with the SFIS data elements required in Volume 1, Chapter 4, and posting logic in Volume 1, Chapter 7. Load obligations manually, within five calendar days from the signature date on the contract or contract modification, based on the official obligating documents in the Electronic Document Access System, if the transactions fail to upload electronically. If the contract contains errors, omissions or deficiencies that prevent posting, a Contract Deficiency Report must be created to document the deficiency and request corrective action in accordance with PGI 204.270-2.

3.4.1 Contracts or Orders for Goods, Supplies, or Services to Meet Bona Fide Need. DoD Components must determine that the goods, supplies, or services required under contracts, or orders placed obligating an annual or multiple year appropriation, are intended to meet a bona fide need of the period for which funds were appropriated. Additionally, a buying activity’s project order must serve a bona fide need that exists in the fiscal year in which the project order is issued; otherwise, a valid obligation is not accomplished. Bona fide need generally is a determination of the buying activity and not that of the selling/performing activity. A selling activity must refuse to accept a project order if it is obvious the project order does not serve a need existing in the fiscal year in which issued. Such determinations must consider estimated current consumption; the requirements that may be foreseen for future years based upon the procurement lead-time; authorized stock levels; and authorized mobilization reserves. It is not intended that the bona fide need of the fiscal year rule be construed to preclude procurement lead-time. If, a provision of law makes such appropriations available for payments under contracts for specified services for periods beyond the period for which the appropriation otherwise is available, the contract for such services extending into the ensuing period (fiscal year) may be charged to the appropriation current at the time that the contract is signed. Obligate funds for each option period after funds become available. Obligations must be consistent with all normal limitations on the obligation of appropriated funds, such as the bona fide needs rule, period of availability, and type of funds. See Volume 11A, Chapter 2.

3.4.1.1 Execution Requirements Under Contracts or Orders. Contracts entered into or orders placed for goods, supplies, or services must be executed only with bona fide intent that the contractor (or other performing activity) must commence work and perform the contract without unnecessary delay.

3.4.1.2 Execution of Standard Commercial Items. For standard commercial items readily available from other sources, the bona fide needs rule cannot be satisfied based on the delivery, production or manufacturing lead-time exception to the bona fide needs rule if the materials were obtainable by another source before funds expired. See Volume 11A, Chapters 2 and 18.
3.4.1.3. **Delivery Withhold.** If the contractor is directed to withhold delivery until after the lead-time, then there is not a bona fide need for the item in the current fiscal year and funds for the next fiscal year must be used.

3.4.2. **Service Contracts.** Service contracts may be either severable or non-severable. Services are generally chargeable to the appropriation current at the time the services are rendered. The contract is thereby established in a manner that defines the contractor's level of responsibility to provide a specified level of effort for a stated period. The determination to charge the appropriation current on the date the contract is let, or to charge the funds current at the time services are rendered, depends upon whether the services are “severable” or “entire.” A contract that is considered entire or non-severable is charged to the fiscal year current when it was let even though performance may extend into the next fiscal year. Service contracts that are considered severable must be charged to the fiscal year in which the services are rendered and may not cross fiscal years, absent statutory authority. There is no precise formula or rule that determines whether a contract is severable or entire. Each case must be determined by the terms and circumstances involved. Non-severable services may occur at a contract line item level as defined in [DFARS 204.7101](#).

3.4.2.1. **Severable Services.** A contract is severable when the related services are continuing and recurring in nature and the scope of the work to be performed is defined in the general terms of the contract. Service contracts can be for either a single undertaking or end item (entire) or for performance with compensation fixed in proportion to the amount of service performed. Absent statutory authority, the term of a severable service contract that is funded by annual appropriations will not extend beyond the end of the fiscal year current at the time the contract is awarded except when authorized by law. Option years are treated as new contracts; therefore, when the severable service contract has renewal options, obligate funds for the basic period and any penalty charges for failure to exercise options. Refer to [10 U.S.C. § 3133](#) for statutory authority permitting full obligation of severable service contracts that begin in one fiscal year and end in the next, provided the contract period does not exceed one year. The contract period for performance of severable services must begin during the fund’s period of availability and may not exceed the fund’s period of availability, absent statutory authority.

3.4.2.2. **Non-Severable Services.** A service contract is non-severable if performance of the service results in a single or unified outcome, product, or report that cannot be subdivided. The performance period of a fixed price non-severable services contract may cross fiscal years, but must be fully funded in the initial fiscal year unless contract funding requirements exists set forth in [DFARS 232.703-1(1)(ii)](#). Unless the period of performance is entirely within a single fiscal year or within the charged account’s period of availability if funded using a multi-year appropriation, non-severable services contracts may not be funded on an incremental basis unless Congress has authorized incremental funding. These type contracts must be funded entirely with appropriations available for new obligations at the time the contract is awarded or options exercised.
3.4.2.3. Training Contracts.

3.4.2.3.1. Single Training Courses Not Covered by Statute. Unless covered by statute, training contracts for single training courses are considered a single undertaking (entire). Record the obligation at the time the contract is executed for the full amount of the contract. In general, the training represents a single undertaking where benefit of the training is received when the employee has completed the training in full. Training contracts must be obligated in full within the fiscal year that funding is current at the time the contract is executed even though the course extends into the next fiscal year. Training courses that begin on or after October 1 may constitute a bona fide need of the prior year if the need for training is an immediate need in the prior year and if the commencement of the course in the next fiscal year is beyond the agency’s control. The time between award of the contract for the training and performance of the training should not be excessive.

3.4.2.3.2. Bona Fide Needs Rule Exception for Special Training Courses Covered by Statute. In accordance with Regional Defense Combating Terrorism and Irregular Warfare Fellowship Program (CTFP), 10 U.S.C. § 345, DoD appropriated funds may be used to pay costs associated with the education and training of foreign military officers, ministry of defense officials, or security officials at military or civilian educational institutions, regional centers, conferences, seminars, or other training programs. Appropriated funds available for training under the CTFP may be obligated for education and training programs that begin in one fiscal year but end in the next fiscal year. Provided that obligations are incurred before an annual appropriation expires, individual severable elements of a specific program may commence in the next fiscal year. Thus, for a particular program that already is underway, expiring funds may be obligated for tuition in September for a course that will not complete until the next fiscal year.

3.5 Recording Maintenance and Repair Projects Obligations

Current fiscal year appropriations may be obligated for those maintenance and repair contracts awarded near the end of the fiscal year, even though contractor performance may not begin until the following fiscal year. The contract must satisfy a bona fide need that exists in the fiscal year of the appropriation to be charged. In addition, contracts awarded near the end of the fiscal year must contain a specific requirement that work begins before January 1 of the following calendar year. Guidelines for the administrative contracting officer to use in determining the commencement of work are as follows:

3.5.1. Physical Onsite Evidence. A visual inspection of the work site discloses significant work has been accomplished, or contractor employees are actually engaged in work performance (no further verification is necessary).

3.5.2. Documentary Evidence. If physical onsite evidence of performance does not exist, and to prevent unwarranted default proceedings, the contractor may be requested to produce documentary evidence that cost has been incurred or material has been ordered to allow performance of the contract.
3.5.3. Contractor Default. In the event of contractor default and termination for default of the contract, the appropriation charged for the original contract remains available for obligation for a “replacement” contract if certain conditions exist.

3.5.3.1. The contract must satisfy the following general criteria to be considered a replacement contract, as opposed to a new contract:

3.5.3.1.1. The replacement contract must be made without undue delay after termination of the original contract.

3.5.3.1.2. Its purpose must be to fulfill a bona fide need that has continued from the original contract.

3.5.3.1.3. The replacement contract must be awarded on the same basis and be substantially similar to the original contract in its scope and size.

3.5.3.2. Re-procurement or completion costs, liquidated damages, and performance bond money recovered from the contractor as refunds must be retained and applied to the replacement contract’s specific appropriation. Amounts recovered that exceed the actual costs of the replacement contract must be deposited as miscellaneous receipts. See Chapter 10 for policy guidance concerning obligation of expired funds for replacement contracts and obligation adjustments for contract changes.

3.6 Determining Scope of Work Changes

3.6.1. Responsibilities for Making Determinations. The contracting officer is primarily responsible for determining whether a change is within the scope of a contract. In making a determination, the contracting officer must apply appropriate provisions of the FAR, the DFARS, legal principles applicable to scope changes, and the provisions of this Regulation. In cases where no clear determination can be made, the cognizant counsel must provide appropriate guidance and determinations concerning the scope of a contract.

3.6.2. Standards for Making Determinations. Statutes and DoD policies for the use of appropriations limit the period of availability to fund new obligations. However unobligated balances that have expired for the purpose of new obligations, are available to fund within scope cost growth or increases in costs from claims arising out of the original obligation. The baseline scope of a contract is all work that is contracted for prior to the expiration of funds. This includes changes incorporated by modification, provided they are within the scope of the contract.

3.6.3. Increases in Quantities. Changes in the quantity of the major items called for in a contract generally are a change in contract scope and not authorized under the “Changes” clause. Therefore, fund a contract change that increases the number of end items ordered from funds available at the time the change is made. For example, if the original contract provided for delivery of 50 items and a modification was issued to provide for the delivery of 70 items, the additional 20 items would represent a change in the scope of the contract. Thereafter, cost growth, or claims arising out of the delivery of the first 50 items, would be funded from the appropriation available at
the time of the order of those items, and those arising out of the additional 20 items would be funded from the appropriation charged for those items. The foregoing applies in general; however, changes in the quantity of subsidiary items under a contract, such as spare parts, generally are within the scope of a contract unless they are so significant that they alter the basic contractual undertaking.

3.6.4. **Increases in Required Levels of Service Performance.** Any modification of a service contract requiring additional deliverable services is a change in scope. Fund such changes with appropriations available at the time of the change. For example, a contract modification for accounting and audit services to add onsite technical assistance and training to grantees of the agency is a change in scope and is beyond the scope of the original contract. Fund this change with funds available at the time of the change. Conversely, an increase in the number of people needed to complete the original contract, or to their level of expertise, would be a within scope cost growth change that could be funded as part of the original contract. See Chapter 10 for additional policy on within scope and change of scope determinations.

3.6.4.1. A contract modification to provide research and development for a new weapons system designed to reach given levels of performance could be beyond the scope of the original contract. If, however, the “Changes” clause specifically authorizes unilateral changes within the scope of the contract (such as specifications, drawings, and designs pertaining to the contract), then, the fact there is a possible change in the performance level specifications, does not, thereby, automatically result in a change in scope. Additionally, an increase in the number of people assigned to the project, or increased travel costs is within scope cost growth that could be funded as part of the original contract.

3.6.4.2. A modification for a cost-type level of effort contract with specified number of hours and level of personnel experience and training, which calls for a change in the specified number of hours or the level of experience and training, could be a change in scope. An increase in direct or indirect rates under the contract is within scope cost growth and could be funded as part of the original contract.

3.6.5. **Claims.** Fund claims arising out of an original undertaking, or resulting from a within scope change, from the appropriation available at the time of the original undertaking. Fund claims arising out of a change in scope to the original contract from the appropriation available and charged for the change in scope.

*3.7 Due Diligence*

Fund holders, entrusted by components (buyer/receiving organizations) with administrative subdivisions of funds, ensure appropriated funds are used consistently with the intent, time, purpose, amount, and bona fide need for which the funds were provided. Fund holders must exercise due diligence in committing, obligating, de-committing, and de-obligating funds and generating inter- and intra-governmental orders through prescribed practices and oversight of documentation including contract, invoice, disbursement, and relevant supporting information. Fund holders must effectively collaborate with mission stakeholders including accountants, contracting officers, program managers, and logistics personnel. For generating
orders, see paragraph 15.2 for component/buyer fund holder and seller/servicing agency funding official responsibilities. The following is a checklist for due diligence compliance:

3.7.1. Internal control systems are adequate.

3.7.2. Information is reliable and valid.

3.7.3. Applicable laws, regulations, and policies are followed.

3.7.4. Resources are safeguarded and managed economically and efficiently.

3.7.5. Desired program results are achieved.

3.7.6. Operations are effective and efficient.

3.7.7. Commitments and obligations valid, and the fund level is sufficient to support the bona fide need. Refer to section 16.0.

3.7.8. Goods and services are received or outstanding.

4.0 RECORDING JUDGMENT FUND OBLIGATIONS

4.1 Legal Authority

The Judgment Fund is available for court judgments and Justice Department compromise settlements of actual or imminent litigation against the government. Judgment Fund awards and settlement must be funded on a non-reimbursable basis for various types of litigation identified in 31 U.S.C. § 1304, “Judgments, Awards, and Compromise Settlements.” Section 1304 and the Contract Disputes Act of 1978, 41 U.S.C. § 7108, “Payment of Claims,” provide that awards and settlements involving appropriated fund contracts are payable from the Judgment Fund, subject to reimbursement from agency appropriations. The Fund also is available for awards and settlements involving discriminatory conduct by an Agency (such as DoD) under statutes identified in the Notification and Federal Employee Antidiscrimination and Retaliation Act of 2002, commonly known as the No FEAR Act.

4.2 Reimbursement of Contract Dispute Act Judgments

In accordance with 31 U.S.C. § 1304, and 41 U.S.C. § 7108, litigation and settlements subject to the Contract Dispute Act (CDA) of 1978 are paid promptly by the U.S. Department of the Treasury (Treasury) from the permanent appropriation, “Judgment Fund.” After such payment, the DoD Component is required to reimburse the Judgment Fund.
4.2.1. The affected DoD Components first must determine what appropriation(s) originally funded the portion of the contract that led to the claim and subsequent judgment.

4.2.2. The Judgment Fund must be reimbursed with funds available for the same purpose that was current at the time of the judgment provided by 41 U.S.C. § 7108. Use expired appropriations that were current at the time of the judgment to reimburse the Judgment Fund. If insufficient unobligated balances exist in the expired appropriation or the account has closed, use authority of 31 U.S.C. § 1553 to charge the current appropriation available for the same purpose or obtain a special supplemental appropriation from Congress. If more than one appropriation is involved in the monetary judgment, then the reimbursement is prorated against those appropriations. Any proration between or among appropriations must be based on the nature of the claim and the basis of the monetary judgment in the particular case. Record obligations against current funds at the time the awards are made by the deciding official or by the court. See Chapter 10 for requirements, restrictions, and limitations related to recording amounts against expired and closed accounts.

4.2.3. Within 15 business days after paid claim confirmation, the Treasury Judgment Fund Branch sends a letter to the responsible DoD Component point of contact requesting reimbursement. Within 30 days of receipt of notice for reimbursement, the responsible DoD Component must repay Treasury’s Bureau of the Fiscal Service (BFS) or contact BFS to make payment arrangements. If the impacted DoD Component fails to respond within 60 business days of the first and second demand letters, BFS will send a letter to the Office of the Under Secretary of Defense (Comptroller)/Chief Financial Officer (OUSD(C)/CFO). The letter is sent quarterly to the OUSD(C)/CFO along with a statement summarizing the outstanding CDA amounts due to the Treasury. Component quarterly balances are posted on the Treasury Direct website under the reports section at Treasury Managed Accounts Reports.

4.2.4. Reimbursement to the Treasury is not an antecedent liability of the original contract. Therefore, reimbursements must not be charged back to the original fiscal year appropriation that funded the contract, unless the original appropriation was still current at the time of the judgment. Further, the existence of the legal requirement to reimburse the Judgment Fund does not give rise to a violation of the Antideficiency Act. See Volume 14, Chapter 2 for policy on violations of the Antideficiency Act.

4.2.5. In all official accounting and reporting systems, a separate and unique Budget Line Item (BLI) designator is assigned for the recording and reporting of such reimbursements. This BLI designator is identified as a separate line on the Appropriation Status by Fiscal Year Program and Subaccounts (DD Comp (M) 1002). This new line of accounting is to be called “Judgment Fund Reimbursement.” Funds must be reprogrammed into this new line from existing allotted funds within the appropriation. These reprogrammed funds are not subject to normal reprogramming rules with respect to the increase, but must conform to reprogramming guidance governing delegated authority for program reductions.

4.2.6. Upon identification of funds to be charged and completion of any reprogramming actions, the documented package must be forwarded to the Defense Finance and Accounting Service (DFAS) site that has accounting responsibility for the designated fund accounts to process
the payment. Ordinarily, a miscellaneous obligation document must be used to obligate the designated fund accounts. However, if programming actions have reserved funds, the DFAS may be authorized to process the payment as an obligate-expend transaction. DFAS may process the transfer of funds for the payment to Treasury’s Judgment Fund using the Intra-Governmental Payment and Collection (IPAC) system.

4.2.7. Approval authority is required from the cognizant Assistant Secretary of the Military Department (Financial Management and Comptroller) or Defense Agency Comptroller for all Judgment Fund Reimbursements to the Treasury in excess of $1 million.

4.3 Reimbursement of No FEAR Act Judgments

As provided for in 5 Code of Federal Regulation 724, Subpart A, DoD Components must reimburse the Judgment Fund for all judgments resulting from discrimination and No FEAR Act claims covered under authority of 5 U.S.C. § 2301. Reimbursements under the No FEAR Act include reimbursements for payments of judgments, awards, or settlements with respect to discrimination and whistleblower protection cases.

4.3.1. Within 15 business days after the Treasury makes a payment from the Judgment Fund, Treasury will issue a written notification (electronically or by other means) concurrently to the Under Secretary of Defense Comptroller (USD(C)), CFO and/or Deputy CFO, the responsible DoD Component’s reimbursement point of contact, and the DoD Component’s Chief Counsel, with copy of the demand notice provided to DFAS.

4.3.2. Upon receiving a Judgment Fund notice from BFS, the responsible DoD Component must reimburse the Judgment Fund within 45 business days using the appropriation, fund, or other account available for operating expenses of the DoD Component to which the No Fear Act judgment or discriminatory matter stemmed. If payment cannot be made within 45 business days, the DoD Component must contact the BFS directly to make arrangements for payment for the Judgment Fund.

4.3.3. If a DoD Component fails to reimburse the Judgment Fund within the required 45-day period or establish a payment plan with BFS, a posting will be made annually by BFS to its public website denoting the DoD Components that are delinquent.

4.4 Administrative Oversight Roles and Responsibilities for Judgment Fund

4.4.1. The OUSDC, Program and Budget must:

4.4.1.1. Coordinate and resolve any issues that arise regarding DoD Components ability to identify funding sources to reimburse Judgment Fund. This may require, but is not limited to, assisting DoD Components in identifying available appropriations and/or unobligated balances available to reimburse the Judgment Fund when necessary, advising on availability of current or expired funds for such reimbursements, or coordinating actions to facilitate initiation of reprogramming requests.
4.4.1.2. Coordinate judgment fund actions (as needed) with the DoD Office of General Counsel (Fiscal) to obtain legal advice concerning matters related to the Judgment Fund.

4.4.2. DFAS must:

4.4.2.1. Provide DoD-wide oversight and guidance on the accounting and reporting processes related to the Judgment Fund to include reporting and responding to accounts payable issues related to outstanding Judgment Fund liabilities payable, as needed.

4.4.2.2. Prepare accounts payable reports or other schedules denoting outstanding Judgment Fund balances and/or delinquencies and convey these balances to DoD Components (customers).

4.4.2.3. Reconcile, consolidate, and accurately report financial statement data on Judgment Fund liabilities in the DoD/Agency-wide financial statements and respond to general inquiries relative to Judgment Fund liabilities reported.

4.4.2.4. Write consolidated notes supporting financial statements to include documenting and/or reporting of Judgment Fund liabilities for inclusion in the DoD Agency Financial Report (DoD AFR). After DFAS provides the financial statement notes to OUSD(C), OUSD(C) has final responsibility for the presentation within the DoD AFR.

5.0 RECORDING GOVERNMENT-WIDE COMMERCIAL PURCHASE CARD OBLIGATIONS

Record obligations for Government-Wide Commercial Purchase Cards in the amounts placed for orders for goods or services. For additional information on purchase cards, see the Department of Defense Government Charge Card Guide.

6.0 RECORDING OBLIGATIONS FOR PROCUREMENT CONTRACTS AND ORDERS

6.1 Firm Fixed Price Contract

When the contract is executed, record an obligation for the total amount stated in the contract.

6.2 Fixed Price Contract with an Escalation, Price Redetermination, or an Incentive Provision

When the contract is executed, record an obligation for the target or billing price stated in the contract, even though the contract may contain a ceiling price in a larger amount. Subsequently, a target or billing price should be adjusted (upward or downward) to a “best cost estimate” whenever it is determined that, and documentary evidence supports, the actual cost of the contract will differ materially from the original target or ceiling price stated in the contract.
6.3 Cost Reimbursement and Time and Material Contracts

Cost reimbursement and Time and Material (T&M) contracts include: cost, cost sharing, cost plus fixed fee, cost plus incentive fee, cost plus award fee, time and material, and labor hour contracts. When the contract is executed, record an obligation for the total estimated contract ceiling, including the fixed fee in the case of a cost plus fixed fee contract, the target fee in the case of a cost plus incentive fee contract, or the base fee in the case of a cost plus award fee contract. Increase or decrease amounts provided by contract modification, or a unilateral revision of an award fee estimate made by the contracting office. Record any fee awarded in excess of the target fee in a cost plus incentive fee contract as an obligation at the time of determination. The amount of the obligation established for a cost plus award fee contract must be adjusted at the time the actual or final fee award amount is determined (see DFARS 216.405-2). If the contract is incrementally funded, the amount obligated must always be the funded increments.

6.4 Indefinite Delivery Type Contracts

Where the quantity required under a contract is indefinite, determine the ultimate amount of obligation by subsequent orders; however, record the amount of any required minimum order specified as an obligation upon execution of the contract. For contracts that require the contractor to perform unilaterally placed orders above the required minimum, record an obligation in the amount of the order price or ceiling at the time the order is placed. Record an obligation in the amount of the agreed price or ceiling for an order in excess of the required minimum (as negotiated or accepted under terms of the contract) upon contractor’s acceptance of the order. In the case of orders for services where a contractor cannot undertake performance without direction from an authorized government official, order amounts may be consolidated periodically (at least monthly) into a list of orders placed with the contractor identifying the estimated dollar amount of each. On definite quantity contracts, obligate the full amount of the definite quantity at the time of contract award.

6.5 Contract Authorizing Variations in Quantities to be Delivered

When executing the contract, record an obligation for the price of the quantity specified for delivery, exclusive of the permitted variation. The amount recorded may be increased or decreased to reflect the quantity actually delivered and accepted.

6.6 Multi-year Procurement Contract

Record an obligation for a multi-year procurement contract in the amount of the price of the quantities specified for delivery in the first program year, and the amount must be identified with that program year. Unless the contract is funded fully at inception, each time the contractor is notified that funds are available to cover another program year requirement; an obligation must be identified with that program year and recorded in the amount of the price of the quantities specified for delivery. If the contract is canceled, an obligation must normally be charged to the program year current at the time of cancellation to cover the government’s liability under the terms of the contract.
6.7 Letter Contract or a Letter of Intent

6.7.1. When the offer and acceptance are sufficiently definitive to show the purpose and scope of the final contract to be executed, a letter contract or a letter of intent, and any amendments accepted in writing by the contractor, is documentary evidence to support the recording of an obligation. Record the obligation in the amount stated as the maximum liability under the letter or amendment.

6.7.2. The maximum liability may be a limitation on the amount of obligations that may be incurred pending execution of a definitive contract. In this case, the estimated amount of the definitive contract, over and above the obligation recorded under the letter of intent, is carried as a commitment, pending execution of the definitive contract, unless the letter of intent provides that awarding of the definitive contract is dependent upon congressional appropriation action.

6.7.3. Commitments with funds that will expire, cannot be carried past fiscal year-end.

6.8 Interest on Contractor Claims

Contractor claims made pursuant to CDA and settled by the contracting officer in the contractor’s favor may generate interest payable to the contractor. In such cases, record an obligation for the interest payable under the appropriation that financed the contract. Such interest must be applied from the date payment was due, and is not calculated or paid pursuant to the Prompt Payment Act. Parties settling a CDA dispute may bargain away all or part of the interest in a settlement agreement.

6.9 Interest Payable under the Prompt Payment Act

Interest penalties are payable in accordance with Volume 10, Chapter 7 and are recorded as obligations against amounts available to carry out the program for which the penalty is incurred in the fiscal year or years in which the interest accrues. Penalties are charged to appropriations of the agency that funded the contract.

6.10 Purchase Orders

6.10.1. Record an obligation in the amount stated on the purchase order when issued. This occurs when the purchase order represents acceptance of a binding written offer of a vendor to sell specific goods or furnish specific services at a specific price, or the purchase order was prepared and issued in accordance with small purchase or other simplified acquisition procedures.

6.10.2. Record a purchase order requiring vendor acceptance (to form a binding contractual agreement) as an obligation in the amount specified in the order at the time of acceptance. Retain evidence of this acceptance. If written acceptance is not required or provided, then commencement of performance constitutes acceptance by the vendor, and the amount of the order must be recorded as an obligation in accordance with Volume 1, Chapters 4 and 7.
Formation of the binding contractual agreement should occur during the period of availability of the appropriation cited on the purchase order. If contract formation occurs after expiration of the period of availability, record the obligation against current funds, and modify the purchase order accordingly.

6.11 Amendment of a Contract

A change in the government’s contractual liability amount that results from a within scope change amendment is chargeable generally to the appropriation or other fund current at the time the contract was executed. Specific applications of and exceptions to this general rule include:

6.11.1. For a contract modified pursuant to a clause authorizing equitable adjustment to contract terms (including price) within the general scope of the contract, record obligation increases or decreases by the amount specified by any and all amendments or modifications when executed. For a fixed price contract, charge or credit the original source of funds on the contract.

6.11.2. Pursuant to the provisions of 50 U.S.C. §§ 1431, 1432, 1433, and 1435; adjust the amount of a recorded obligation to reflect an increase or decrease resulting from a determination made that results in the correction of a mistake or the formalization of an informal agreement. Record the adjustment against the same source of funds for the original obligation when the amendment or modification does not change the scope of the contract and, thus, does not result in a new procurement. When the scope of the contract is increased, charge to the appropriation or fund available at the time the amendment is executed.

6.11.3. For a contingent obligation, such as one existing under an indemnification clause or a clause involving an equitable adjustment, record an obligation only in the amount of the contractual liability incurred when the amendment updating the contingent obligation is executed. If no amendment is required, the obligation is recorded when the event occurs that updates the amount of the liability under the contingent obligation. Record the obligation against the same source of funds originally cited on the contract.

6.11.4. When a price increase occurs in one or more items in a fixed price contract containing an escalation clause, a price redetermination clause or an incentive provision, or in the fee in a cost plus incentive fee contract; record an obligation in the amount of the increase at the time the changed price or fee is determined in accordance with the terms of the contract. Record the obligation to the original source of funds for the contract.

6.11.5. In some instances, it is appropriate to reduce a recorded obligation for firm fixed price contracts with escalation, price redetermination, or incentive provisions. This occurs when the contracting officer determines, after consideration of all circumstances including available costs and production data or tentative offers from contractors, (and the fund holder or a designee approves) that the anticipated amount of liability under the contract could be reduced. Record the decrease in obligation by the amount determined and approved. See paragraph 16.8 for additional guidance on the de-obligation of funds.
6.11.6. Contract modifications that increase funding on cost reimbursement contracts above the original contract ceiling, and which are not based on an antecedent liability enforceable by the contractor, are at the government’s discretion and are chargeable to funds available when the increase is granted, rather than funds from the fiscal year cited on the original contract.

6.12 Termination of Contracts and Agreements

When a contract or agreement is terminated in whole or in part for the convenience of the government, by giving a “Notice of Termination” to the other party to the contract or agreement, decrease the recorded obligation to an amount sufficient to meet the settlement costs under the termination. Similarly, the commitment must also be decremented to align to the forecasted obligation amount. The obligation cannot be decreased below the amount estimated by the contracting officer, based on the best evidence then available, as the amount due as a direct result of the termination.

6.13 Foreign Currency Exchange Fluctuations

Determine and record changes in obligations and contractual liabilities caused by foreign currency exchange fluctuations when payment is made. For foreign currencies not specified in a special foreign currencies fluctuations appropriation account, make adjustments at fiscal year-end or any other time a significant change occurs to avoid over obligation of an allotment. If a contract is priced in foreign currency, the agency must ensure that adequate funds are available to cover currency fluctuations to avoid a violation of the Antideficiency Act. See Volume 6A, Chapter 7 for guidance on foreign currency fluctuations.

7.0 RENTAL AGREEMENTS AND LEASES OF REAL AND PERSONAL PROPERTY

7.1 Amount Recorded as an Obligation on Rental and Lease Agreements

Record as an obligation amount based on the agreement or lease, or on a written administrative determination of the amount due under its provisions.

7.2 Rental Agreement Terminated by the U.S. Government

Under a rental agreement that may be terminated by the U.S. Government at any time without notice, and without incurring any obligation to pay termination costs, record the obligation each month at the time of payment, in the amount of the rent for that month.

7.3 Rental Agreement Terminated Without Costs, with Notification

Under a rental agreement providing for termination without costs upon giving a specified number of days for notice of termination, record an obligation upon execution of the agreement in the amount of rent payable for the number of days of notice called for in the agreement. In addition, record an obligation each month in the amount of the rent payable for that month. When the number of days remaining under the lease term equals the number of days’ advance notice required under that lease, no additional monthly obligation is recorded.
7.4 Rental Agreements with Specified Dollar Payment

Under a rental agreement providing for a specified dollar payment in the event of termination, record an obligation upon execution of the agreement in the amount of the specified minimum dollar payment. In addition, record an obligation each month in the amount of the rent payable for that month. When the amount of rent remaining payable under the terms of the agreement is equal to the obligation recorded for the payment in the event of termination, no additional monthly obligation is recorded.

7.5 Domestic or Foreign Rental Agreement Not Exceeding 12 Months

For a domestic or foreign rental agreement not exceeding 12 months that is financed under an annual appropriation, record an obligation at the time of its execution in the total amount of rent specified in the agreement even though the period of the lease extends into the subsequent fiscal year as addressed in 10 U.S.C. § 2410a. Leases of structures and real property, other than military family housing, in foreign countries may be entered into for periods of up to 10 years under authority of 10 U.S.C. § 2675, and the rent for each yearly period is paid from funds appropriated for that year. Leases of family housing in foreign countries may be for periods of up to 10 years (15 years in Korea) and rent may be paid on an annual basis from funds appropriated for that year. If the laws, regulations, or customs of a foreign country require advance payment for rent, the advance payment may be made in accordance with 10 U.S.C. § 2396. For the legal, regulatory, or customary term of a foreign lease; an obligation may be recorded against the current appropriation in the same amount at the time the lease is consummated. Refer to Volume 4, Chapter 5 for guidance on accounting for advances and prepayments.

7.6 Domestic Lease Agreements for Periods Greater Than One Year

Domestic lease agreements entered into for periods greater than one year under authority delegated by the General Services Administration (GSA) in accordance with 40 U.S.C. §§ 581 and 121 need not include a provision that lease funding in future fiscal periods is subject to fund availability in those future fiscal periods. Annual rental payments may be made from funds appropriated for that fiscal year as authorized under 40 U.S.C. § 585. Leases must be fully funded at inception unless the lease includes a cancellation clause. Should a cancellation clause apply, the maximum liability is the amount of the lease payments over the minimum lease period plus any required cancellation payment.

7.7 Obligations for GSA Standard Level User Charges

Record obligations to the GSA for standard level user charges as specified in the GSA bill.
8.0 INTRA-GOVERNMENTAL REQUISITIONS AND ORDERS PLACED WITH DOD COMPONENTS OR OTHER U.S. GOVERNMENT AGENCIES

The Treasury’s G-Invoicing system is used to negotiate, broker, and electronically store the General Terms and Conditions (GT&C) and activity between buyers and sellers for inter- and intra-governmental reimbursable transactions. The standard Interagency Agreement form is comprised of two forms, the GT&C (FS Form 7600A) and the Order Requirements and Funding Information (Order) (FS Form 7600B). When trading partners enter orders in the G-Invoicing system, the partners leverage data in the common repository to improve accuracy in accounting and reporting.

8.1 Reimbursable Procurement

8.1.1. The term “reimbursable procurement” refers to an order for supplies, material, services or equipment placed by a buying/requiring DoD Component for:

8.1.1.1. Procurement by seller/servicing DoD Component (or a major organization unit within the component) or Federal Agency on a contract funded by the procuring DoD Component or Federal Agency.

8.1.1.2. Delivery to and reimbursement by the buying DoD Component.

8.1.2. The buying DoD Component records an obligation for a reimbursable order using the date and amount of acceptance by the seller activity.

*8.1.3. An FS Form 7600B, DD Form 448 MIPR, or other document as appropriate, may be used for processing reimbursable procurements. Obligation occurs when the seller’s responsible government official digitally or manually signs the DD Form 448-2, Acceptance of MIPR, other digital equivalent of the Federal Intragovernmental Data Standard, or other document, as appropriate; and returns to the buyer’s office responsible for posting the obligation or customer order. For FS Form 7600B, both the funding and program official must sign. Additional guidance on MIPR processing can be found in the DFARS, PGI, subpart 253.208, and see Treasury Financial Manual Part 2, Chapter 4700 for FS Form 7600B processing.

8.2 Direct Citation Procurements

The term “direct citation procurement” refers to procurement accomplished by combining the requirements of one or more DoD Components with those of the seller/servicing DoD Component. The selling DoD Component may issue one contract with separate schedules showing the quantities, prices, dollar amounts, and citation of funds of each buying DoD Component. The buying DoD Component records a direct citation order as an obligation when notified in writing that the selling DoD Component’s contract or project order has been executed, or when a copy of the contract or project order is received. MIPRs or other digital equivalent used for these orders are not complete until the MIPR Acceptance is digitally or manually signed by the seller, and received and signed by the buying office responsible for posting the obligation.
8.3 Reimbursable Orders with Other DoD Activities

Reimbursable orders with other DoD activities for specific supplies, material, equipment, work, or services, may be placed under the Project Order statute (41 U.S.C. § 6307), the Economy Act (31 U.S.C. § 1535), or other applicable authority. Reimbursable orders with Non-DoD activities may be placed under the Economy Act or other applicable statutory authority. Record the obligation for reimbursable orders against the appropriation of the buying DoD entity as follows.

8.3.1. Project Order authority is available only for intra- or inter-DoD orders. Identify all project orders on the order document itself. Fund fixed price and reimbursable project orders similar to commercial procurement contracts. When a selling activity accepts the project order in writing, the buying activity records the obligation amount as stated in the order. See Volume 11A, Chapter 2.

8.3.2. Unless more specific statutory authority is applicable, the Economy Act provides authority for DoD Components to order goods and services from other federal agencies (including other DoD Components) and from major organizational units within the same DoD Component. Economy Act orders citing an annual or multi-year appropriation must serve a bona fide need arising or existing in the fiscal year (or years) for which the appropriation is available for obligation. The work to be performed must be expected to begin within a reasonable time after acceptance. Orders placed or agreements made obligates an appropriation of the buying agency or unit. MIPRs are Economy Act orders subject to downward adjustments when the selling component has not executed its agreed-upon contract or project order actions. Both the buying and selling agency must de-obligate funds to the extent that the selling agency or unit has not incurred obligations before the end of the appropriation period of availability; or made an authorized contract with another entity (contractor) to provide the requested goods or services. As specified in paragraph 16.2, all unliquidated obligations must be reviewed and any unsubstantiated obligations or excess funds de-obligated. Refer to Volume 11A, Chapter 3 for additional policy covering de-obligations related to Economy Act Orders.

8.3.3. DoD Component Non-Economy Act reimbursable orders placed with civilian agencies for supplies, material, services or equipment include obligational standards used for Economy Act reimbursable orders.

8.3.3.1. Non-Economy Act orders obligating annual or multi-year appropriation must satisfy a bona fide need of the appropriation’s period of availability. The buying DoD activity must obligate funds when the selling activity accepts the order in writing.

8.3.3.2. The selling agency has a reasonable period of time to use transferred funds, depending on the nature of the order. Both the buying and selling agency must de-obligate funds to the extent that the selling agency has not provided the goods or services before the end of the DoD appropriation period of availability; or entered into a contract with another entity (contractor) to provide the requested goods or services in a manner consistent with the bona fide needs rule. See Volume 11A, Chapter 18.
8.3.3.3. DoD Components must establish and implement funds monitoring procedures. See paragraph 3.1.

8.4 Modifying Reimbursable Orders

Buying activities must apply the following guidelines in modifying reimbursable orders.

8.4.1. If the appropriation used to fund the initial order remains available for the new requirement, it may be used to fund modifications and amendments to the order that are a bona fide need of that appropriation.

8.4.2. If the appropriation used to fund the initial order has expired, it may be used only to liquidate or adjust prior obligations in accordance with paragraph 3.6.

8.4.3. Under no circumstances should an order result in a selling agency’s issuance of a contract for severable services crossing fiscal years that extends beyond one year from the date of contract award, as addressed in 10 U.S.C. § 2410a. Any such contract performance period must begin during the period of availability of the buying activity’s appropriation. For guidance on rental agreements with specified dollar payments, see paragraph 7.4.

9.0 ORDERS PLACED WITH (OR THROUGH) DEFENSE WORKING CAPITAL FUND ACTIVITIES

9.1 General

The DoD has authority under 10 U.S.C. § 2208 and 2210, to establish Defense Working Capital Fund (DWCF) activities to finance inventories of its supply chain management business areas and provide working capital for industrial and commercial type activities. Activities funded through DWCFs perform work for others under several different authorities. These authorities include the Project Order Act for depots, the Economy Act for reimbursable and direct citation procurements, and supply management operations (stock fund operations) that use DWCF contract authority to acquire assigned items of supply for other DoD Components. Direct citation orders placed with a DWCF must adhere to Volume 11B, Chapter 11 requirements. DWCF activities performing commercial type services charge stabilized rates rather than charges based on Economy Act actual cost methodologies. Activities performing DWCF operations can identify the transactional authority for work performed for others. Under 10 U.S.C. § 2208 and 2210, the DWCF is used for two different types of activities to include stock funds (supplies) plus goods and services. An order placed with a DWCF activity may only be for a bona fide need of the period for which the buying activity’s appropriation is available.

9.2 Recording DWCF Stock Funds

9.2.1. Recording DWCF Capital Stock Fund Purchases. Unlike Economy Act orders and Non-Economy Act orders placed with civilian agencies pursuant to policies set forth in Volume 11A, Chapter 18, purchases made by DWCF stock fund activities using contract authority to fill buyers orders are not legally required to be obligated before expiration of the buyer’s financing
appropriations. However, an order placed for an Integrated Material Management (IMM) item must be a bona fide need of the buyer activity’s appropriation. Thus, consistent with bona fide need requirements, the DWCF activity using contract authority to acquire an IMM must be able to satisfy the requirement within a reasonable period of time. Unreasonable delay in DWCF execution (or delivery in a subsequent fiscal year not based on delivery, production or manufacturing lead-time exceptions) may reflect that the order placed with the DWCF was not a bona fide need of the requiring activity. There is no hard and fast rule in this regard, but a reasonableness standard does apply.

9.2.2. Recording Obligations for Stock Number and Nonstock-Number Items. Record an obligation for an item with a stock number assigned at the time of the order. Record an obligation for a Nonstock Numbered Item—number not assigned at the time of placement of the order—when the DWCF activity accepts the order for an IMM item that the activity will fill using its cost authority. Orders without stock numbers require order and acceptance because the seller may not be able to fulfill the order. DWCF activities that utilize contract authority are issued both contract authority and anticipated buyer order amounts that tie to one another, and the accepted buyer orders are recorded against the contract authority and not separately against reimbursable authority. DWCF accepted buyer orders for managed stock items procured with contract authority are recorded as an offset to contract authority and not against reimbursable authority levels.

9.2.3. IMM Items: For purposes of this chapter, stock funded items are IMM items for which supply management and acquisition responsibility has been assigned to a single DWCF funded activity, and that activity uses contract authority to acquire the item. See DFARS subpart 208.7 for definition of IMM.

9.3 Change Notices

The following policies apply to change notices.

9.3.1. Cancellation. Adjust an obligation for an undelivered order placed with the stock fund activity when a change notice affecting price, quantity, or receipt of an unacceptable substitution of a like item. Cancel an undelivered order placed with the stock fund when the buyer receives a notice of:

9.3.1.1. Substitution that is unacceptable,

9.3.1.2. Transfer of a stock funded item to funding by a centrally managed procurement appropriation within a DoD Component, or

9.3.1.3. Advice that the stock fund is unable to perform under the terms of the order.

9.3.2. Transfers from Centrally Managed Procurement to DWCF Stock Fund. Record an obligation for a DWCF stock fund order if a buying activity receives notice that an ordered item funded by a centrally managed procurement appropriation has been transferred to funding by the stock fund.
9.3.3. **Funding Shortfall.** If a change notice results in a shortfall of buyer funds, the buyer may cancel the order or reduce the quantity on order. If the buyer does not receive a change notice or does not receive it in time to cancel or modify the quantity on order, the material may be refused or returned to the stock fund. There is no violation of administrative control for buyer funds if an apparent funding deficiency that results from a change notice is resolved with the stock fund by means of:

9.3.3.1. Cancellation or modification of the quantity on order, or

9.3.3.2. Refusal or return to the stock fund of the material.

9.4 **Economy Act and Project Orders Placed with DWCF Activities**

DoD organizations record obligations for reimbursable procurement orders, direct citation orders, and project orders placed with DWCF activities in accordance with section 8.0.

10.0 **PERSONAL SERVICES AND BENEFITS OBLIGATIONS**

10.1 **Obligations Recorded for Payments to Military and Civilian Employees**

Record obligations for the amounts payable to military services members and civilian employees in the month in which earned. These obligations must be supported by written administrative determinations of the amounts of the liabilities incurred for personal services based on payroll or personnel records. Payroll charges based on salaries and wages, (such as civilian living and quarters allowances, equalization allowances under 5 U.S.C. § 3584, and the employer’s share of contributions to the retirement fund, insurance premiums, and Federal Insurance Contributions Act taxes; are also obligations at the time that salaries and wages are earned. In the event a payroll period covers portions of two calendar months, the proportionate amount accruing within each month must be recorded as an obligation applicable to that month. Enlistment bonuses, and allowances to military members for subsistence, quarters and clothing, as well as civilian uniform allowances and incentive awards, are obligated in the month that they become payable to the member or employee.

10.2 **Obligations Recorded for Subsistence In Kind**

Record an obligation for subsistence in kind based on requisitions and orders, or on a written administrative determination of the estimated cost of subsistence furnished by others.

10.3 **Obligations Recorded for Annual and Sick Leave of DoD Employees**

Obligate annual leave for Department employees when it becomes due and payable as terminal leave or when otherwise specifically authorized by law, rather than at the time the leave is earned. Sick leave is obligated, costed, and paid when used.
10.4 Obligations Recorded for Severance Pay to U.S. Government Civilians and Foreign National Employees

Record obligations for severance pay for U.S. Government civilian employees and foreign national employees (such as those German nationals covered by the German Tariff Agreement) on a pay period by pay period basis; that is, at the time the severance pay becomes payable, regardless of the time it is disbursed.

10.5 Obligations Recorded for Severance Pay Under Specified Conditions

10.5.1 Record obligations for severance pay after an employee has been separated and specified conditions (such as those set forth in the German Tariff Agreement) have been met. The organization that terminates the employment of such individuals is responsible for recording and reporting the severance pay obligation. If the liability for any form of severance pay is significant, reasonable estimates must be made and an unfunded liability recorded and reported in accordance with the Governmentwide Treasury Account Symbol Adjusted Trial Balance System.

10.5.2 In accordance with other foreign country contracts and agreements, certain foreign national employees earn a separation allowance, also sometimes called “severance pay” in some contracts and agreements, from inception of or during their employment. In such cases, a liability accrues from such date and obligations must be recorded as follows:

10.5.2.1 In general, record obligations for separation allowances for foreign national employees against applicable current allotments in the full amount of the liability that accrues during the accounting period even though the amount may not currently be payable. However, when a foreign country is committed to fund part of the separation allowance for its nationals, obligate only for the Department’s portion of that cost. The amount chargeable to the applicable current allotment is the separation allowance liability incurred during the current accounting period and adjustments to outstanding liabilities for separation as a result of changes in pay. Adjustments for fluctuations in foreign currency exchange rates must be made at the time of the disbursement. See paragraph 13.11 for guidance on those currencies not covered by the foreign currency fluctuations appropriation.

10.5.2.2 Upon transfer of a foreign national employee from one DoD Component to another, the relinquishing DoD Component must give detailed records to the gaining DoD Component on the unpaid accrued separation allowance for that employee. The detailed records must include the name of the employee, beginning and ending dates of employment, grade or classification, or both, amounts of the accrued liability by fiscal year appropriations and accounting classifications to be charged at the time of separation, and the name (or designation) and address of the activity that will be responsible for retaining the appropriation records. The relinquishing DoD Component must retain its liability for the accrued separation allowance, including the adjustment for any final fluctuation in the rate of foreign currency exchange, until notified of the employee’s separation and payment of the allowance by the DoD Component effecting the separation. The gaining DoD Component is responsible for obligating separation allowances earned from the date of an employee’s accession. Accrued separation allowances must be paid when a foreign national employee is separated. The DoD Component effecting the separation
must coordinate its payment actions with the other DoD Components whose funds are to be charged. DoD Components should designate one of their activities to centrally maintain the detailed employee and appropriation records for all transferred employees to facilitate the closeout and liquidation of liabilities.

10.5.2.3. Appropriated funds may not be obligated for separation allowances earned by foreign national employees during any period of employment by DoD non-appropriated fund instrumentalities. The accrued separation allowance must be paid, if the employee is otherwise entitled to payment of such allowance upon such event pursuant to host nation law or agreement, when a foreign national employee transfers from an appropriated fund organization to a non-appropriated fund instrumentality.

11.0 PERMANENT CHANGE OF STATION OBLIGATIONS RECORDED

At the time Permanent Change of Station (PCS) orders are issued for civilian and military personnel, record obligations against current appropriations for all U.S. Government authorized reimbursable expenses incidental to relocation and for estimated bookings of household goods movement and storage. The only exception is the obligation of costs for non-temporary contract commercial storage of household goods, which must be obligated either in the period in which the service is rendered or to the appropriation current at the contract award. Record an adjustment to the obligation based on the costs itemized on the traveler’s settlement voucher.

12.0 TEMPORARY DUTY TRAVEL OBLIGATIONS RECORDED

Tentative obligations for temporary duty travel must be recorded from written administrative determinations, based on the travel authorizations issued, for the estimated transportation to be purchased and the estimated reimbursement to be earned by the traveler for per diem allowances, use of privately owned vehicles, and incidental travel expenses. When travel is performed under a blanket authorization (with the itinerary not definite), the amount of the tentative obligation recorded in the current month must not exceed the estimate of the travel expenses to be incurred to the end of the current month. When the period covered by the travel authorization extends beyond the end of the fiscal year, and the travel costs are being paid by means of an annual appropriation or the final year of availability of a multiple year appropriation, the amount of the recorded obligation must be the cost of transportation purchased and reimbursements earned to the end of the fiscal year.

13.0 OTHER OBLIGATIONS

13.1 Loan Agreements

As required by 2 U.S.C. § 661, new direct loan obligations may be incurred only to the extent that budget authority to cover costs is provided in advance. When a direct loan obligation is incurred, its cost (i.e., the estimated long-term cost of the loan to the government) is obligated against the “program account” established for the loan program. Actual funding of the direct loan
is made through a revolving, non-budget “financing account.” Refer to Treasury’s BFS, USSGL Credit Reform Accounting guidance for detailed guidance covering obligation and disbursement of funds for direct and guaranteed loans.

13.2 Grants and Subsidies Obligations Recorded

Record the obligation amount of a grant or subsidy when supported by documentary evidence as follows:

13.2.1. A grant requiring the grantee to undertake prescribed activities based on formation of a binding agreement. Usually, a grants officer signs a grant offer and provides to the grantee for acceptance. The obligation is incurred when the grantee accepts or approves the Component’s offer by signing the grant document and providing the acceptance to the Component.

13.2.2. A grant or subsidy not proceeded by a binding agreement at the time payable.

13.2.3. Annually, DoD Components must:

13.2.3.1. Track the amount of undisbursed grant funding remaining in expired grant or subsidy accounts,

13.2.3.2. Determine why these funds were undisbursed, and

13.2.3.3. Take action to resolve the undisbursed funding and close the expired grants and related accounts.

13.3 Bid Protests or Other Challenges

13.3.1. Pursuant to the provisions of 31 U.S.C. 1558, funds available at the time of protest or other action filed in connection with a solicitation for, proposed award of, or award of such contract, remain available for obligation for 100 calendar days after the date on which the final ruling is made on the protest or other action.

13.3.2. A protest or other action consists of a protest filed with the Government Accountability Office (GAO), or an action commenced under administrative procedures or for a judicial remedy if:

13.3.2.1. The action involves a challenge to a solicitation for a contract; a proposed award for a contract; an award of a contract; or the eligibility of an offeror or potential offeror for a contract or of the contractor awarded the contract; and

13.3.2.2. Commencement of the action delays or prevents an executive agency from making an award of a contract or proceeding with procurement.
13.3.3. A ruling is considered final on the date on which the time allowed for filing an appeal or request for reconsideration has expired, or the date which a decision is rendered on such an appeal or request, whichever is later.

13.3.3.1. A request for reconsideration of a GAO protest must be made within 10 days after the basis for reconsideration is known or should have been known, whichever is earlier.

13.3.3.2. The appeal of a protest decision of a district court or the Court of Federal Claims must be filed with the Court of Appeals for the Federal Circuit within 60 days after the judgment or order appealed from is entered.

13.3.4. Where contract award is determined to be invalid as a result of a bid protest and the contract is terminated for convenience, appropriations charged for the original contract may be obligated for a replacement contract if it is awarded without undue delay after termination of the original contract. Any award within 100 days of termination necessarily is an award without undue delay because 31 U.S.C. 1558 statutorily extends the availability of appropriations for such period following the final ruling on a bid protest.

13.4 Liquidated Damages Recorded

Recover the amount of liquidated damages deducted and withheld from the contractor. If the contractor objects to the assessment of liquidated damages, treat the amount as a contingent liability. Reestablish an obligation only when a formal contractor claim is “approved,” i.e., sustained by government admission or by a judgment.

13.5 Litigation Obligations Recorded

As a general rule, record an obligation amount for the liability expected to result from pending litigation in cases where the government definitely is liable for the payment of money from available appropriations, and the pending litigation is for the purpose of determining the amount of the government’s liability. In other cases, do not record an obligation until the litigation has been concluded or the government’s liability is finally determined. A written administrative determination of the amount of the liability will serve as documentary evidence of the obligation.

13.6 Bills of Lading

Record an obligation amount for a bill of lading when issued to a Transportation Service Provider that is based on established rates and the estimated value of the transportation to be furnished and adjust on receipt of evidence of payment of the final bill.
13.7 Public Utility Services Obligations Recorded

Record an obligation for recurring utility services (such as gas, electricity, water, and steam) and communications each month or as required based on a written administrative determination of the estimated monthly cost of the service to be furnished. Charges for utility services and communications for a time period beginning in one fiscal year and ending in another fiscal year must be charged against the appropriation current at the end of the time period covered by the service.

13.8 Claims

Record an obligation for a claim payable under law when finally approved and in the amount certified for such payment.

13.9 Legal Determinations

Record an obligation amount for a document evidencing a present legal liability of the U.S. Government, when the liability has been determined to exist by competent legal authority.

13.10 Simultaneous Disbursement and Obligation

Record an obligation amount for a disbursement that has been made (or is about to be made) when the related obligation was not previously recorded. See Chapter 11.

13.11 Foreign Currency Fluctuations

13.11.1. The Foreign Currency Fluctuations Appropriation was established to eliminate losses or gains to programs caused by fluctuation of specified foreign currency exchange rates from rates used in budget formulation. DWCF foreign currency fluctuations are absorbed by the incurring DWCF business area, not the foreign currency account. Contractual obligations or other obligations payable in the specified foreign currencies may not be adjusted until disbursements are made from the appropriation account involved. See Volume 6A, Chapter 7.

13.11.2. When foreign currencies not specified in the Foreign Currency Fluctuations Appropriation account are involved, any adjustments to cost at the time of payment must be supplemented with adjustments made at year-end and may be made at any other time a significant change occurs in order to avoid over or under obligation of an allotment.

13.12 Security Guard and Firefighting Services

13.12.1. 10 U.S.C. § 2465 prohibits the obligation or expenditure of appropriated funds for the purpose of entering into a contract for the performance of firefighting or security guard functions at any military installation or facility in the U.S., including Alaska and Hawaii. This prohibition does not apply to:
13.12.1.1. A contract that is to be performed in the commonwealths, territories, or possessions of the U.S., or other locations outside the U.S., when members of the Armed Forces otherwise would have to be used for the performance of firefighting or security guard services at the expense of unit readiness;

13.12.1.2. A contract to be carried out on a government owned, contractor operated installation;

13.12.1.3. A contract (or renewal of a contract) for the performance of a function that was under contract on September 24, 1983; or

13.12.1.4. A contract for the performance of firefighting functions if the contract is for a period of one year or less and covers only the performance of firefighting functions that, in the absence of a contract, would have to be performed by members of the Armed Forces who are not readily available to perform such functions by reason of deployment.

13.12.2. 10 U.S.C. § 2687, the Defense Base Closure and Realignment Act of 1990, as amended, authorizes special procedures for providing security guard (or firefighting) services 180 days before an installation closes under the Base Realignment and Closure initiative.

13.13 Postage Obligations Recorded

Record an obligation for postage each month based on an estimate of the billing to be received and adjusted based on the actual billing received. If advance payment for post office box is required, the obligation must be based on the advance billing. Obligate stamps purchased at the time payment is made.

14.0 UNRECORDED OBLIGATIONS

14.1 Dollar Threshold for Obligations Identified as Not Recorded

Apply the following guidance when the accounting office identifies an obligation incurred but not recorded in the official accounting records, and the accounting office is in possession of a valid obligating document (as specified in paragraph 14.2).

14.2 Document Verification

14.2.1. The accounting office must verify the document was not previously recorded under the applicable obligation reference number indicated. Validate documents exchanged between electronic systems, such as entitlement systems, to ensure the transaction was properly transmitted or recorded under the applicable obligation reference number, and no errors resulted during the transmission. Additionally, verify the amount, appropriation, project-level accounting data, and vendor name to determine if the obligation is recorded under another reference number, to include unrecorded modifications that are controlled in other obligating documents. Look for related commitments in accounting systems that contain commitments.
14.2.2. The accounting office must verify if the obligation was recorded at an amount less than the face value of the obligating document or Electronic Data Interchange (EDI) representation. If so, limit the amount of the recorded obligation increase to differences between the amounts on the obligating document or EDI representation and the amount previously recorded in the official accounting records. If one of conditions described in subparagraphs 14.2.1 or 14.2.2 is met, the accounting office must immediately adjust the obligation if the dollar amount is $2,500 or less. If the obligation amount is over $2,500, follow the procedures in subparagraph 14.3.2.

14.3 Recording

14.3.1. DFAS must immediately record an obligation if the dollar amount is $2,500 or less.

14.3.2. If the dollar amount is greater than $2,500, the accounting office must provide the appropriate DoD Component financial manager with a copy of the obligating document(s) via e-mail, fax, upload, or use other means (retaining proof of transmission and receipt of the notification), to document the official document repository. Allow 10 calendar days for the financial manager to record the obligation or demonstrate the obligation was previously recorded. The accounting office must record the obligation on behalf of the financial manager if, within 10 calendar days, the financial manager:

14.3.2.1. Has accounted for the obligation,

14.3.2.2. The obligation is accurate,

14.3.2.3. The applicable obligation was not previously recorded, or

14.3.2.4. Has not recorded the obligation in the accounting records.

14.3.3. Whenever the accounting office records an obligation for any amount, the appropriate funds holder must be notified immediately but not later than 10 calendar days of the obligation being recorded. This notification must be via e-mail, fax, electronic upload, or other documented means used for the document repository. Additionally, whenever the accounting office records an obligation, the recording must be uniquely identified, formally approved by the individual designated to provide approval authority, and cross-referenced to the obligating document. The processed obligating document must be similarly annotated. It is acceptable for an automated system to identify the source of a DFAS recorded obligation.

14.3.4. DoD Components must promptly record all obligations consistent with standards set forth in section 3.0. The over-recording and under-recording of obligated amounts is equally improper, as either makes it impossible to determine the actual status of an appropriation and may lead to violations of the Antideficiency Act. Over-recording and under-recording will also call into question the accuracy of agency financial statements and the propriety certifications on reports of obligations provided to Congress pursuant to 31 U.S.C. §§ 1108(c) and 1501(b).
14.4 Expired Funds

If the agency has incurred a valid, unrecorded obligation in the prior year, prior year funds must be used. Current appropriations are not available to fund this obligation. If insufficient funds remain in the prior years’ appropriation, the agency must seek a supplemental or deficiency appropriation and must further consider the possibility the Antideficiency Act (31 U.S.C. § 1341) has been violated. Agencies should incorporate the due diligence guidance outlined in paragraph 3.7 to mitigate circumstances requiring use of current appropriations to cover previous year requirements.

15.0 INTERNAL CONTROLS

15.1 Departmental Responsibilities

In accordance with its responsibility for implementing effective internal controls, the Assistant Secretaries and Comptrollers must establish standard procedures for Departmental/Agency level monitoring and review of all obligations and commitments. These reviews must be formally documented in Standard Operating Procedures (SOP).

15.2 Funds Holder Responsibilities

*15.2.1. For the buyer/receiving component, the funds holder must review and validate commitments and obligations as financial transactions occur. The review applies to all DoD Components, appropriations, reimbursable transactions, and funds including revolving funds and trust funds. Fund holders sign and approve the DD Form 448 and FS Form 7600B. Fund holders have certification responsibility and initiate actions that result in obligations. See paragraph 3.1 for required documentation to perform the fund holders’ responsibilities. For seller/servicing components, the funding official that confirms orders received are aligned with the seller’s mission (see Volume 5, Chapter 5), accepts/signs the 488-2 and 7600B, and manages buyer orders to include execution (see Volumes 11A and 11B).

15.2.2. Quarterly, the fund holder must reconcile all obligations incurred during the period to include amounts recorded in the general ledger to contracting system records and/or obligating documents such as contracts and modifications.

15.2.2.1. The fund holder must document and investigate all differences.

15.2.2.2. The fund holder must alert the financial managers of any variances. The financial manager must review the funds holder’s documentation and assess whether an adjustment to the general ledger is required.

15.2.3. The use of “bulk” (estimated) obligations requires periodic monitoring and reconciliation of estimated obligations to the related disbursement transactions and the recording of appropriate adjustments to the estimated obligations based on the disbursement amounts. Limit the use of bulk obligations as Antideficiency Act violations may occur in the absence of adequate procedures for monitoring and reconciling disbursements.
15.2.3.1. Bulk obligations must not be used for materiel requisitioned by Defense Logistics Management Standards or Military Standard Logistics Systems transaction processing. Establishing an obligation for the proper amount for each line item under a unique requisition document number is essential for the timely and automated processing of interfund and non-interfund bills at the detail, line item level. Failure to do so may delay processing and increase workload for both DFAS and Component personnel.

15.2.3.2. DoD Components that establish business processes for requisitioning outside their customer’s Component sponsored supply system, via internet ordering applications, must provide automated processes for their customers to record line item obligations for each requisition. DoD Components that authorize personnel to initiate orders outside of the Component sponsored supply system must incorporate source of supply automated processes for establishing line item obligations for each requisition.

15.3 Supporting Documentation

Prior to recording an obligation, the financial manager responsible for the official accounting records of the funds holder must have one of the following:

15.3.1. A copy of the obligating document(s) (i.e., contract, contract modification, letter contract, purchase order, reimbursable order, lease agreement, travel order) via e-mail, fax, electronic upload to the official document repository, or other documented means, or

15.3.2. An EDI 850 transaction set representing a contract or an EDI 860 transaction set representing a contract modification or equivalent electronic data that represents an obligating document or supports an obligation.

*15.4 Segregation of Duties

To ensure proper internal controls within the responsible financial management office, the duty of approving, certifying, and recording an obligation or order acceptance must be separate from posting a receiving report(s) and certifying acceptance and payment(s) for that obligation. In instances where Management determines that segregation of duties is not practical, additional mitigating controls must be identified and implemented in accordance with Volume 5, Chapter 1.

15.5 Antideficiency Act Violations

When the financial manager records an obligation in accordance with this policy and it results in an apparent Antideficiency Act violation, that office immediately must initiate research to include consulting with the funds holder. The following additional assessments apply:

15.5.1. If it is determined that the financial manager action resulted in a duplicate obligation that was previously recorded in the official accounting records, the financial manager action must be reversed immediately after the error is identified and no Antideficiency Act violation will be considered to have occurred.
15.5.2. If the financial manager determines that:

15.5.2.1. The financial manager action has not resulted in a duplicate obligation and

15.5.2.2. The obligation exceeded the funds holder’s authorized budget authority, then

15.5.2.3. A preliminary review of the potential violation must be initiated in accordance with Volume 14, Chapter 3.

15.5.3. If a valid obligation was incurred in excess of available funds, the actual incurrence of the obligation, rather than the recording of the obligation, would be considered to have caused the apparent violation. In such cases, see Volume 14.

16.0 QUARTERLY REVIEW OF DORMANT ACCOUNTS

16.1 DAR-Q Justification

The DAR-Q serves as a quality control mechanism of entity-level internal control activities. The DAR-Q improves the Department’s ability to execute all available appropriations before expiration and cancellation. The quarterly review is the inherent ability to track the dormancy and or validity of the DoD Components obligations and UFCO ensuring proper actions are taken to correct and or expedite the timely execution and full utilization of appropriated funds. The fund holder, financial manager, accountant, seller funding official, Budget Submitting Officer (BSO), contracting officer, and logistics representative efforts must be rigorous and synchronized. The integration of stakeholders’ information enables effective outcomes to include evidence of the reasonableness of open balances in support of auditable financial statements.

16.2 Dormant Balances

16.2.1. DAR-Q requires review of sampled dormant balances. For purposes of the DAR-Q, balances are defined as dormant if they have not been liquidated and no obligations, adjustments, disbursements, withdrawals, or contract modifications with general ledger impact have occurred within the last 90-days. PCS orders, where Components have documented personnel readiness requirements to issue orders at least 90 days in advance of the move, will be considered dormant at 180 days. Current balances are defined as having a change in the status for obligations or UFCOs during the last 90-day period which generated general ledger activity.
16.2.2. Contracts are justifiably dormant while undergoing confirmed Defense Contract Management Agency (DCMA) contract closeout review or Defense Contract Audit Agency (DCAA) audit. Fund holders must retain evidence the open balance is currently under DCMA closeout review or DCAA audit.

16.2.3. Sampled dormant balances also include reimbursable balances, i.e., from a buying to selling organization. Both buying and selling organizations are responsible for reviewing their respective side of the transaction. DoD Components should also review reimbursable orders for compliance with the Economy Act or other applicable statutory authority for the reimbursable order. Non-Economy Act orders should be reviewed to ensure that the interagency agreements (Memorandums of Agreement (MOA)/Service Level Agreements) are consistent with DoD policy.

*16.2.4. Sampled dormant balances include sub-allotted funds. The fund holder (sub-allotter) must assign dormant sub-allotment samples to the selling organization (sub-allottee) for review within seven calendar days of the review period kickoff. Because sub-allotters may not have visibility into execution data, sub-allottees support completion of the review by providing source documents, contract or payable status, and financial analysis to the sub-allottee within 50 calendar days of sub-allotter’s request. Sub-allotters and sub-allottees should develop formal memorandums of understanding to document the specific support requirements for sub-allotted funding.

16.3 DAR-Q Major Roles and Responsibilities

16.3.1. OUSD(C) Financial Improvement and Audit Remediation (FIAR) Directorate:

16.3.1.1. Issue DAR-Q sampling logic to Components completing DAR-Q manually.

16.3.1.2. Within 30 calendar days of receiving the Component level packages, perform the following:

16.3.1.2.1. Select a sample of DAR-Q records for review each quarter for assigned DoD Components.

16.3.1.2.2. For each sampled package, review evidence that all required DAR-Q requirements have been conducted.

16.3.1.2.3. Perform data analytics to evaluate validation criteria trends of dormant balances.

16.3.1.2.4. Review documentation of any fund holder and BSO that was unable to complete the required review or confirm the accuracy and validity of dormant balances, including a full explanation of, and any corrective action taken. Assess whether corrective action was taken.

16.3.1.2.5. Provide Components feedback on the results of the review.
16.3.2. OUSD(C) Enterprise Financial Transformation Directorate

16.3.2.1. Maintain the Advana DAR-Q Tool to facilitate enterprise-wide usage.

16.3.2.2. Update the Tool to align functionality with policy changes as necessary.

16.3.3. The Assistant Secretaries of the Military Departments Financial Management and Comptroller (FM&C) and Defense Agency Comptrollers:

16.3.3.1. Establish and/or update a SOP/desk guide to document entity-level DAR-Q procedures for implementation of the DAR-Q framework. For DoD Components executing within the automated Advana DAR-Q Tool, SOPs must include internal timeframes to meet submission due dates and workflow descriptions that utilize the expanded process flow functionality.

16.3.3.2. Create the standard queries and/or standard reports to ensure the completeness of the data extracted based on OUSD(C) FIAR sub-population sampling logic and requirements.

16.3.3.3. Establish entity-level implementation of the DAR-Q, through utilization of the automated Advana DAR-Q Tool to ensure accuracy and completeness.

16.3.3.4. Appoint at least one coordinator and BSO.

16.3.3.5. Review the BSO and funds holder submissions, complete the OUSD(C) FIAR DAR-Q submission and provide evidence of the review, along with supporting documentation, to the OUSD(C), FIAR Directorate by the FIAR quarterly completion dates.

16.3.3.6. Review of documentation of any funds holder that was unable to complete the required review or confirm the accuracy and validity of dormant balances, including an accurate explanation of any corrective action taken. Assess whether corrective action taken was appropriate.

16.3.3.7. Document these reviews using the BSO results to highlight both compliance and non-compliance of the BSO within a Component Level package and submit to OUSD(C) FIAR.

16.3.3.8. Identify problems noted as a result of the BSO review.
16.3.3.9. Initiate adjustments or corrections to remedy noted problems within 10 calendar days of identification and continue to track until completion.

16.3.3.10. Summarize by type actions or corrections remaining to be taken, and when such actions/corrections are expected to be completed.

16.3.3.11. Identify actions taken to preclude identified problems from recurring in the future.

16.3.3.12. Review BSO and fund holders’ documentation, and prepare and submit quarterly a certification statement to the OUSD(C) FIAR attesting to the following:

16.3.3.12.1. Validation criteria was performed on the Agency's DAR-Q sample records of open Undelivered Orders Unpaid (UDOU), DOU, UDOP and UFCO balances within those populations. DAR-Q record validations are accurate based on research completed and information known at the time of completion, and can be reconciled to readily available source documents.

16.3.3.12.2. Effective internal controls are in place to ensure accounting adjustments and corrective actions identified as a result of the DAR-Q were initiated in the appropriate accounting system. The dormant balance and reason for dormancy was verified for each record. Corrective actions were taken to initiate the adjustment of balances within the appropriate systems as necessary. Corrective actions and monthly follow-ups are documented until complete.

16.3.3.12.3. Key Supporting Documentation (KSD) for all validated UDOU, DOU, UDOP, and UFCO records are readily available and will be provided within 10 calendar days upon request by the OUSD(C) FIAR for reasonable quality control review.

16.3.3.12.4. DAR-Q sample records are selected for validation as an OUSD(C) FIAR quality control activity to improve funding execution. DAR-Q is not intended to replace component internal control activities for open balance review, validation, or adjustment. The signee acknowledges it remains the responsibility of the DoD Component to perform continuous control activities on all open balances.

16.3.3.12.5. DAR-Q submission was performed in compliance with this chapter and internal SOP implementation guidance.

16.3.4. Coordinator. Coordinator disseminates records to appropriate personnel for review, facilitates the DAR-Q process, and serves as the OUSD(C) point of contact. Coordinators are not required to be financial managers, as their role is to facilitate the DAR-Q process by providing logistics, routing, and administrative support. Consolidated all quarterly records.
16.3.5. BSO. The BSO conducts reviews of the work performed and funds holder and financial manager documentation. The BSO ensures the DAR-Q was performed over a complete population and that the funds holder performed required procedures accurately and retained supporting documentation. The BSO must complete the DAR-Q within specified time frames for all funds.

16.3.5.1. Exercise reasonable assurance the funds holder completed their review in compliance with this Regulation and the Component's SOP requirements. BSOs must ensure fund holders have the capabilities and resources.

16.3.5.2. Prepare and submit a certification statement quarterly to the respective Assistant Secretary of the Military Department FM&C and/or Defense Agency Comptroller. The statement must attest to the requirements in subparagraph 16.3.3.12. Signee must also acknowledge it remains the responsibility of the BSO to perform continuous control activities on all open balances.

16.3.5.3. Provide respective Assistant Secretary of the Military Department FM&C and/or Defense Agency Comptroller supporting documentation within 10 calendar days upon request.

16.3.5.4. Review documentation of any funds holder that was unable to complete the required review or confirm the accuracy and validity of dormant balances, including a full explanation of, and any corrective action taken.

16.3.5.5. If the funds holder is not utilizing the Advana DAR-Q Advana Tool, confirm the funds holder used the DAR-Q OUSD(C) FIAR queries to ensure the completeness of data extracted.

16.3.6. Fund holder. Fund holders are DoD officials that receive a documented administrative subdivision of funds including apportionments, allotments, sub-allotment, allocations, and sub-allocations through their funding chain of command or from other government departments, agencies, and activities holding an administrative subdivision of funds. Fund holders review dormant records to evaluate the status and commence documented corrective action as necessary within 10 calendar days, following up monthly until corrective action and general ledger posting has occurred. Once the review is complete, route records to the BSO for review. The fund holder is responsible for conducting reviews of obligations and UFCOs, regardless of whether the fund holder or the financial manager actually records the obligations in the official accounting records. Document and maintain the results of these reviews.
16.3.6.1. Supporting documentation may include correspondence from the vendor, budget office, contracting officer, Contracting Officer’s Representative (COR), seller funding official, or DFAS representatives. Additional documentation may include progress reports, contract modifications, invoices, IPAC system screen prints, or general ledger system/transactional reports that support the validity of the open balance or indicates it is no longer valid. The funds holder works through the contracting officer to obtain vendor documentation. Provide respective supporting documentation within 10 calendar days of BSO request. See Table 8-3 “Required DAR-Q Documentation” for a list of examples of supporting documentation by assessable unit. Print documentation or maintain screen prints electronically, unless the source system has reliable IT controls and data will be maintained in an archive.

16.3.6.2. Prepare and submit a quarterly certification statement to the BSO. The statement must attest to the requirements in subparagraph 16.3.3.12 as well as acknowledge it remains the responsibility of the funds holder to perform continuous control activities on all open balances.

16.3.6.3. See paragraph 16.5.4 if not utilizing the DAR-Q Advana Tool.

16.4 DAR-Q Populations

DAR-Q populations reflect the budgetary general ledgers impacting budget execution included in Table 8-1.

16.5 Advana DAR-Q Tool

16.5.1. The Advana DAR-Q Tool provides automation for effective and efficient reporting. The Tool leverages the Departments’ universe of transactions to provide automated populations, reconciliations, record sampling, and a standard reporting platform.
16.5.2. DAR-Q sampling methodology focuses on high-risk, high-value balances. High-risk comprises dormant balances in General Fund expiring and canceling appropriations and Working Capital Fund and Foreign Military Sale balances remaining after the period of performance has ended. Populations are grouped by dollar value with higher sampling applied to high-value balances.

16.5.3. Components must perform DAR-Q on all balances regardless of the system in which they are executed. When the Tool does not incorporate transactions from legacy general ledger systems, Components must request population, sampling, and submission requirements from OUSD(C) FIAR Directorate to perform DAR-Q manually.

16.5.4. Fund holders not utilizing the Tool must adhere to the OUSD(C) FIAR annual guidance to obtain a population for sampled obligations and UFCOs. For all dormant balances, determine the validity and accuracy, and if future work will be conducted, future disbursements will be required, and if there is sufficient and readily available KSD to justify the remaining balance.

16.5.5. The Tool provides standard Validation Codes for users to select based on review of open balances.

16.5.5.1. Valid. An obligation where there is a bona fide need and a reasonable likelihood that future activity will occur. Examples of activity include, but are not limited to, receipt of goods and services, payment of invoices, collecting payment for goods delivered or services rendered, or performing work on a reimbursable basis.

16.5.5.2. DAR-Q Adjustment. A valid obligation that requires all or a portion of the balance to be adjusted in either the source general ledger system or initiated with the responsible party (i.e., DFAS, contracting office, performer, source of supply). An adjustment is an action required to accurately reflect business events.

16.5.5.3. The Tool provides standard Reason Codes aligned with each Validation Code, and capability to add granular data through explanation and comment fields.

16.6 Key Supporting Documentation.

Components provide KSD for a sub-sample of DAR-Q records to support the balance, validation code, and any corrective actions initiated. For valid dormant balances, documentation must support the balance, while balances that require adjustment include documentation to support the adjustment amount. OUSD(C) FIAR Directorate may review KSD for quality control and provide feedback as necessary. KSD must be provided within 10 calendar days of the request. To be considered valid and provide the correct line item support, the KSD is required to be signed by an authorized individual responsible for that transaction. See Table 8-3, “DAR-Q Documentation Examples” and the Advana DAR-Q User Guide for KSD examples. Components may have unique KSD.

16.7 Documentation

Components maintain documentation that is sufficient to permit independent organizations such as the DoD Office of the Inspector General, or the DoD Component Audit Agency/Service, to verify reviews were accomplished in accordance with Volume 1, Chapter 9 retention standards.

16.8 De-obligation of Dormant Obligations

16.8.1. Within 10 calendar days of fund holders’ identification, initiate and substantiate all required de-commitments, de-obligations, adjustments, or corrections by evidence of ongoing corrective actions. Accurately post recorded payments with clearing document numbers. After a thorough review by the funds holder (and/or the financial manager), all un-substantiated obligations must be de-obligated. Within 10 calendar days of receipt of funds holder’s documentation, the financial manager must record the de-obligation, de-commitment, or adjustment(s) in the general ledger. Take no action to modify, cancel, or amend a contract or travel order below an amount identified as due and owing a contractor, vendor, or traveler.

16.8.2. Periodic reviews result in de-obligations such as for documented contract adjustments or corrections, cancellation of an order, when determined obligated funds are in excess of contract requirements, or determination of final contract closure.

*16.8.2.1. The contracting officer, to include Administrative Contracting Officers as appropriate, and other stakeholders, i.e., DCMA and DCAA; must apply due diligence to procedures such as reviewing contract funds status, establishing final indirect cost rates, and determining billing rates (see FAR 42.704 and 42.705). The contracting officer, stakeholders, and financial manager must collaborate regularly to manage potential excess funds, and generate documents, to include unilateral contract modifications to de-obligate funds.

16.8.2.2. For contracts canceled in full or in part, such as unilateral orders where the contractor does not accept the order or through agreement of the parties, the contracting officer should issue a unilateral contract modification identifying the amount to de-obligate.

16.8.2.3. When terminating a contract or agreement in whole or in part for government convenience by “Notice of Termination”, the contracting officer should issue a unilateral contract modification to maintain sufficient funds to meet termination settlement costs and de-obligate excess funds.

16.8.2.4. In some instances such as Firm Fixed Price contracts with escalation, price redetermination, or incentive provisions; the contracting officer may determine—after consideration of best available evidence, including available costs and production data or tentative offers from contractors—the anticipated reduction of contract liability and should issue a unilateral contract modification specifically to de-obligate funds.
16.8.2.5. The financial manager may, prior to a contract completion statement and upon notice of final payment, identify dormant funds through attained reasonable assurance of future commitments, obligations, expenses, and disbursements; and provide the contracting officer a document with the contract number, notice of final payment, remaining dormant balance, and request for the contracting officer’s written consent or issuance of a unilateral contract modification to de-obligate funds. The financial manager must maintain a copy of the consent for audit and records management purposes.

16.8.2.6. For contract closeout, the contracting officer distributes a DD Form 1594, Contract Completion Statement or electronic equivalent as described in DFARS, PGI 204.804. See Volume 10, Chapter 20 for contract reconciliation and closeout.

16.8.3. For dormant travel obligations for which travel did not occur, or the full obligated amount was not expended, the financial manager will de-obligate funds after documented efforts to contact the traveler is retained prior to the Authorizing Official (AO) or funds holder provides a written consent to de-obligate the remaining obligated balance. It is the responsibility of the AO to send notification to the financial manager, program office, and funds holder denoting no further valid transactions will be forthcoming. The AO should obtain and review the applicable travel vouchers, receipts, and correspondence between the traveler and the AO.

16.8.4. For dormant payroll obligations (i.e., salaries, wages, and benefits) for which funds were not expended, or the total obligated amount was not expended, the financial manager will de-obligate funds based on a written consent from the funds holder. It is the responsibility of the funds holder to send notification to the financial manager and program office denoting no further valid transactions will be forthcoming. The funds holder should obtain and review the applicable pay period calendar, Leave and Earnings Statements, payroll disbursements, support for journal vouchers, and correspondence between the program office, employees, and the financial manager.

16.8.5. For intragovernmental or interdepartmental obligations, including Military Standard Requisitioning and Issue Procedures requisitions through mandatory sources for which funds were not expended or the total obligated amount was not expended, the financial manager will de-obligate funds once a new FS 7600B, DD 448-2, or a key source document is obtained. Source documents must align to the business process, account for adjustments made and, in cases of an intragovernmental/intergovernmental documents, must be signed by an authorized individual.

VOLUME 3, CHAPTER 10: “ACCOUNTING REQUIREMENTS FOR EXPIRED AND CLOSED ACCOUNTS”

1.0 GENERAL

1.1 Purpose

1.2 Authoritative Guidance

2.0 DEFINITION

3.0 STANDARDS

3.1 Accounts

3.2 Expired Accounts

3.3 Closed/Cancelled Accounts

3.4 Contract Change Provisions

3.5 Shipbuilding and Conversion, Navy

3.6 Obligation Adjustment for a Contract Change Greater Than $4 Million

3.7 Obligation Adjustment for a Contract Change Equal to or Greater than $25 Million

3.8 Replacement Contracts

3.9 Obligation Adjustments or Payments from Current Appropriations for Closed/Cancelled Accounts

3.10 Current Appropriations Used for Expired Appropriations with Insufficient Obligation Authority

3.11 Collection Credits After an Account is Closed/Cancelled

3.12 Exceptions to an Account’s Period of Availability for Adjusting and Liquidating Obligations

3.13 Antideficiency Act Violations

3.14 Control, Reporting, and Certification Requirements

3.15 Other Requirements
CHAPTER 10
ACCOUNTING REQUIREMENTS FOR EXPIRED AND CLOSED ACCOUNTS

1.0 GENERAL

1.1 Purpose

This chapter prescribes the accounting requirements, restrictions, and limitations for expired accounts and closed (cancelled) accounts. It addresses the fiscal year (FY) identity, periods of availability, obligation adjustments, and exceptions applicable to these accounts.

1.2 Authoritative Guidance

The following laws and regulations within this chapter contain the current requirements for the efficient and effective use of expired and closed accounts which includes the responsibilities and authority in applying these accounting requirements for the Department of Defense (DoD):

1.2.1. Title 10, United Stated Code, section 8683 (10 U.S.C. § 8683), “Ship overhaul work: availability of appropriations for unusual cost overruns and for changes in scope of work.”

1.2.2. 31 U.S.C. § 1108, “Preparation and submission of appropriations requests to the President.”

1.2.3. 31 U.S.C. § 1514, “Administrative division of apportionments.”

1.2.4. 31 U.S.C. § 1551, “Definitions; applicability of subchapter.”

1.2.5. 31 U.S.C. § 1552, “Procedure for appropriation accounts available for definite periods.”

1.2.6. 31 U.S.C. § 1553, “Availability of appropriation accounts to pay obligations.”

1.2.7. 31 U.S.C. § 1554, “Audit, control, and reporting.”

1.2.10. 31 U.S.C. § 1557, “Authority for exemptions in appropriation laws.”

1.2.11. 41 U.S.C. Chapter 71, “Contract Disputes.”

1.2.13. Office of Management and Budget (OMB) Circular A-123, Appendix A, ”Management of Reporting and Data Integrity Risk.”

1.2.14. OMB Circular A-11, Section 20, "Terms and Concepts.”

1.2.15. OMB Circular A-11, Section 130.16, “What steps do I take when budgetary accounting errors are identified involving a closed TAFS during a canceled phase?”

1.2.17. Treasury United States Standard General Ledger (USSGL).

2.0 DEFINITION

The definition provided in this section describes terminology associated with expired and closed/cancelled accounts.

No-Year Accounts. No-year authority usually remains in the unexpired phase until fully obligated and disbursed. When the purposes for which the authority was made available have been achieved, the account may be closed and the authority cancelled.

3.0 STANDARDS

3.1 Accounts

General ledger accounts and transactions required to record cancellations, account closure, and expired transactions are defined in the DoD Standard Chart of Accounts and in the DoD USSGL Transaction Library. These documents can be accessed on the Standard Financial Information Structure (SFIS) web page.

3.2 Expired Accounts

3.2.1. Expired funds retain their FY identity for five years after the time an appropriation expires (see Chapter 13, subparagraph 3.8.2). Expired funds are not available for new obligations. Both the obligated and unobligated balances of expired appropriations must be available for recording, adjusting, and liquidating obligations properly chargeable to that account.

3.2.2. Before an account closes/cancels, the affected DoD Component must identify valid unliquidated obligations subject to closure/cancellation to determine whether appropriations are available for future adjustments or payments against such obligations. Also, the DoD Component
must confirm whether adequate resources are available to pay for obligations that will close/cancel with an account.

3.3 Closed/Cancelled Accounts

* 3.3.1. On September 30 of the fifth FY after the period of availability for obligation of a fixed appropriation account ends, the account must be closed and any remaining balance (whether obligated or unobligated) in the account must be cancelled and thereafter is not available for obligation or expenditure for any purpose, unless exempt by a provision of an appropriation law. Collections authorized or required to be credited to an appropriation account, but not received before closing of the account must be deposited in the Treasury as miscellaneous receipts in accordance with 31 U.S.C. § 1552(a). All cancelling year transactions, i.e., transactions to be paid from an appropriation that is cancelling at the end of the current fiscal year, must be submitted to the Defense Finance and Accounting Service (DFAS) no later than September 15 each year (or the business day prior when September 15 occurs on a weekend).

3.3.2. Certain appropriations are available for an indefinite period. Obligated and unobligated balances in such appropriations must be closed/cancelled when no disbursements have been made from the indefinite appropriation for two consecutive FYs and the President, the Secretary of Defense, or the Secretary’s designee determines the purposes for which the appropriation was made have been carried out in accordance with 31 U.S.C. § 1555.

3.3.3. In some instances, following closure/cancellation of an appropriation, it becomes necessary to adjust an obligation that otherwise would have been properly chargeable (both as to purpose and amount) to an appropriation before closure/cancellation. Should such an adjustment become necessary, the obligation must be charged to an appropriation currently available for the same purpose, subject to certain limitations discussed in subparagraph 3.3.4. If an adjustment to an obligation otherwise properly chargeable to a closed/cancelled appropriation pursuant to 31 U.S.C. §§ 1551 – 1557 is required, and the related program or function has migrated from one DoD activity to another, the adjustment is chargeable to the current DoD activity to which the program has transferred. The current DoD activity is responsible for providing current year funds from an appropriation account available for the same purpose to satisfy the obligation.

3.3.4. When a currently available appropriation is used to pay an obligation, which otherwise would have been properly chargeable (both as to purpose and amount) to a closed/cancelled appropriation, the total of all such payments from that current appropriation may not exceed the lesser of:

3.3.4.1. The unexpended balance of the closed/cancelled appropriation (the unexpended balance is the sum of the unobligated balance plus the unpaid obligations of an appropriation at the time of closure/cancellation, adjusted for obligations and payments which are incurred or made subsequent to closure/cancellation, and which would otherwise have been properly charged to the appropriation except for the closure/cancellation of the appropriation); or

3.3.4.2. The unexpired unobligated balance of the currently available appropriation; or
3.3.4.3. One percent of the total original amount appropriated to the current appropriation being charged.

3.3.4.3.1. For annual accounts, the one percent limitation applies to the annual appropriation for the applicable account; not total budgetary resources (e.g., reimbursable authority).

3.3.4.3.2. For multi-year accounts, the one percent limitation applies to the total amount of the appropriation. For example, if a multi-year account enacted for FY 2019 through FY 2020 was $100 million, the one percent limitation in FY 2019 would be $1 million. At the end of FY 2019, if $650,000 had been used for payment of obligations of closed/cancelled accounts, the amount available to be used for such payments in FY 2020 would be $350,000 ($1 million minus $650,000).

3.3.4.3.3. For contract changes (as specified in paragraph 3.4), charges made to currently available appropriations have no impact on the one percent limitation rule, i.e., the one percent (of the currently available appropriation) amount is not decreased by the charges made to current appropriations for contract changes.

3.3.5. In order to prevent overpayments and ensure that applicable limitations are not exceeded, DoD Components must:

3.3.5.1. Identify the unobligated balance and unpaid obligations of all expired appropriations at the time they expire.

3.3.5.2. Identify the unobligated balance and unpaid obligations of all closed/cancelled appropriations at the time they are closed/cancelled.

3.3.5.3. Identify for closed/cancelled accounts all obligations and payments that were charged to currently available appropriations that otherwise would have been properly chargeable (both as to purpose and amount) to a closed/cancelled appropriation (as specified in subparagraph 3.3.4.).

3.3.5.4. Identify and maintain the amount that it is permissible to charge current appropriations for obligations and payments which otherwise would have been properly chargeable (both as to purpose and amount) to a closed/cancelled appropriation. This amount is determined by subtracting all subsequent obligations and payments made from the unexpended balance of the appropriation at the time it was closed/cancelled as indicated in subparagraph 3.3.5.3.

3.3.6. Official accounting activities must maintain proper general ledger controls for valid unpaid obligations and receivables pertaining to closed/cancelled accounts. General ledger controls must be perpetuated until all obligations are paid and accounts receivable collected. (This will ensure that valid liabilities continue to be tracked until satisfied, even though the accounts are closed/cancelled.) In addition, official accounting activities must:
3.3.6.1. Ensure that the beginning, unpaid obligation balance of each closed/cancelled appropriation accurately reflects the official Treasury balance of the appropriation on the date of closure/cancellation.

3.3.6.2. Perform a one-time review of each closed/cancelled appropriation to ensure that the beginning accounts payable (obligations unpaid) balance of each closed/cancelled appropriation accurately reflects the balances on the Standard Form (SF) 133, “Report on Budget Execution and Budgetary Resources,” as of the date of closure/cancellation.

3.3.6.3. Ensure that an adequate audit trail is maintained for all corrections affecting closed/cancelled appropriations, including any offsetting corrections to current or expired appropriations. Records must be maintained in accordance with Volume 1, Chapter 9 that prescribes DoD policy on records retention in accordance with the National Archives and Records Administration (NARA) General Records Schedules.

3.4 Contract Change Provisions

3.4.1. A contract change is defined in 31 U.S.C. § 1553(c)(3) as a change to a contract under which a contractor is required to perform additional work. Such term does not include adjustments to pay claims or increases under an escalation clause. Paragraphs 3.6 and 3.7 contain procedures for requesting approval of obligation adjustments for contract changes in excess of $4 million, $10 million, and $25 million respectively.

3.4.2. Obligation adjustments, such as incentive or award fees and price inflation (escalation or economic price adjustments), are not considered contract changes for purposes of subparagraph 3.4.1. To the extent otherwise appropriate, such amounts may be charged to applicable accounts that otherwise have expired for incurring new obligation but have not yet been closed/cancelled. Such charges or adjustments must be supported by comprehensive written documentation containing a statement that the charges do not require, involve, or result in additional work or changes in scope. This statement must explain the circumstances, contingencies, or management practices that necessitated the adjustment.

3.4.3. For funding contract changes resulting from the contracting officer’s final decision in accordance with the Contract Disputes Act, apply obligation adjustment rules in this chapter and in Chapter 8, subparagraph 3.6.2. Contract Disputes Act litigation judgments payable from the Judgment Fund result in a new agency obligation to reimburse the Judgment Fund. See Chapter 8, subparagraph 4.2.2. For reimbursements, use funds for the same purpose that are current at the time of the judgment.

3.4.4. 10 U.S.C. § 8683 permits expired appropriations available to DoD to be used for new obligations of appropriations for certain ship overhaul, maintenance, and repair efforts. Those purposes are obligation of expired funds for unusual cost overruns incident to overhaul, maintenance, and repair of vessels under commercial contract or by industrial-fund activity. There is a statutory congressional notification requirement for funding of unusual cost overrun obligational adjustments. Requests must be submitted to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), Deputy Comptroller (Program/Budget) (P/B).
appropriations may be used in certain instances for new obligations; those appropriations are not available for new obligation beyond the end of the fifth FY following their expiration.

3.5 Shipbuilding and Conversion, Navy

3.5.1. The period of availability to incur obligations in the Shipbuilding and Conversion, Navy (SCN) appropriation for all purposes is normally five years. For limited purposes, SCN funds are available for obligation after the five-year period has ended. Appropriation language for the SCN appropriation often contains a provision to the effect that additional obligations for engineering services, tests, evaluations, and other such budgeted work that must be performed in the final stage of ship construction may be incurred after the appropriation otherwise would expire for obligation. This additional period allowed for incurring new obligations for such purposes is called “extended availability.”

3.5.2. DoD and Treasury employ special procedures to establish extended availability authority for the SCN appropriations because not all work required to induct a ship into the fleet can be completed within the first five years of availability of an SCN appropriation. The procedures are summarized as follows:

3.5.2.1. The FY of the latest obligation work limiting date (OWLD) for the last vessel financed by a particular SCN appropriation must represent the period of availability for obligation. After such date, the appropriation enters an expired status for five years and the balances are available only for obligation adjustments and payments.

3.5.2.2. An SCN appropriation is closed/cancelled on September 30 of the fifth year following the year of the last OWLD. Before the end of each FY, DoD notifies Treasury of the last OWLD for the SCN appropriation that will be expiring on September 30 of that FY. By the ninth workday of November of each year, the unobligated and obligated balances of that SCN appropriation are transferred by preparing the SF 1151, “Nonexpenditure Transfer Authorization,” to a new Treasury FY symbol. (See the TFM Volume I, Part 2, Chapter 2000.) For example:

On September 18, 1995, the Navy notified Treasury that the last OWLD for the FY 1991/1995 SCN appropriation was September 30, 2001. Before November 14, 1995, the balances of that SCN appropriation were transferred to the FY 1991/2001 SCN appropriation with a cancellation date five years later, September 30, 2006.

3.6 Obligation Adjustment for a Contract Change Greater Than $4 Million

An obligation adjustment for a contract change to an expired appropriation under which a contractor is required to perform additional work may be incurred only if that obligation adjustment has been approved by the Under Secretary of Defense (Comptroller) (USD(C)), as designee of the Secretary of Defense. The DoD Component must request approval for an obligation amount that would cause the total amount of charges in any FY for a single program, project, or activity to exceed $4 million and the account being used to fund the obligation is no
longer available for new obligation. The Secretary of the Navy may treat the limitation to be $10 million rather than $4 million for Navy Operation and Maintenance funds that are appropriated and available for ship overhaul.

3.6.1. If necessary, the applicable Component must submit requests for approval to OUSD(C), P/B.

3.6.2. The request for approval must include the following documentation:

   3.6.2.1. The amount to be obligated.
   
   3.6.2.2. The purpose for which the funds are to be obligated.
   
   3.6.2.3. An explanation of the obligation adjustment including the reason for the adjustment and the contingencies or management practices that necessitated the adjustment.

3.6.3. Components must retain supporting documentation in accordance with Volume 1, Chapter 9 that prescribes DoD policy on records retention.

3.7 Obligation Adjustment for a Contract Change Equal to or Greater than $25 Million

   Special handling is required to process any obligation adjustment to an expired appropriation for a contract change, under which a contractor is required to perform additional work, for amounts of $25 million or more in any FY. Such adjustments may be made only after the USD(C), as designee of the Secretary of Defense, submits a notice of intention to make the obligation to the Armed Services and Appropriation Committees of the Senate and the House of Representatives. The notice of intention must include the legal basis and policy reasons for the obligation.

   3.7.1. After 30 days have elapsed following submission of the notice, in writing, the proposed obligation may be made unless the congressional committee notifies the USD(C) of its disapproval.

   3.7.2. The charges or adjustments must be supported by a written comprehensive statement concerning the reason for the adjustment. This statement must explain the circumstances, contingencies, or management practices that necessitated the adjustment.

   3.7.3. When notification to Congress is necessary, the applicable DoD Component must submit the required documentation including letters to the appropriate congressional committees for the USD(C) signature to OUSD(C), P/B.

3.8 Replacement Contracts

   Expired funds also may be used to fund a replacement action (a replacement contract) under certain conditions. When a procurement action will result in a replacement contract, it may be
funded from expired funds if all of the conditions in subparagraphs 3.8.1-4 are met. If all of these conditions cannot be met, current year funds must be used to fund the requested action.

3.8.1. The DoD Component has a continuing bona fide need for the goods or services involved.

3.8.2. The original contract was made in good faith.

3.8.3. The original contract was terminated for default or for the convenience of the Government. If the original contract was terminated for the convenience of the Government, the termination must have been the result of a:

3.8.3.1. Court order;

3.8.3.2. Determination by a contracting officer that the contract award was improper due to explicit evidence that the award was erroneous and the determination is documented with appropriate findings of fact and of law; or

3.8.3.3. Determination by other competent authority (e.g., a Board of Contract Appeals) that the contract award was improper.

3.8.4. A replacement contract is used to obtain the goods or services that originally had been ordered under another contract that was terminated either for default or convenience of the Government. The replacement contract is:

3.8.4.1. The same size and scope as the original contract; and

3.8.4.2. Executed without undue delay after the original contract is terminated.

3.8.5. If a replacement action will result in an obligation that exceeds the remaining unliquidated obligation balance of the original contract by $4 million, the action must first be submitted to the USD(C) for approval.

3.8.6. If a replacement action will result in an obligation that exceeds the remaining unliquidated obligation balance of the original contract by $25 million, then a notice of intention (as discussed in paragraph 3.7) must be submitted to the appropriate congressional oversight committee at least 30 days in advance. After 30 days have elapsed following submission of the notice, the proposed obligation may be recorded unless one of the congressional oversight committees notifies the USD(C) of its disapproval.

3.9 Obligation Adjustments or Payments from Current Appropriations for Closed/Cancelled Accounts

3.9.1. When making payments from a current appropriation account for obligations of a closed/cancelled account, DoD Components must submit a written request for a “subclass” account from Treasury through DFAS, and include the purpose for the payment. Use these subclass
accounts to record applicable payments with Treasury. These payments are reported monthly on each Component’s SF 224, “Statement of Transactions” (see Volume 6A, Chapter 3).

3.9.2. Record amounts for obligations that otherwise would have been properly chargeable to a closed/cancelled account (but are required to be charged to current accounts) only in the current account when payment is imminent during the current FY. Unless payment was made, do not report amounts for such obligations. If, at year-end, such amounts for obligations are known to be payable in the coming FY, that information must be footnoted on the year-end SF 224.

3.9.3. Enter current year obligation adjustments required due to closed/cancelled balances as negative amounts against specific applicable line items in column “k” of the Department of Defense (DD) 1416, “Report of Programs.” If these adjustments cause the line item to exceed current year reprogramming thresholds, the amount in column “k” must be footnoted to indicate the amount is “applicable to closed/cancelled account adjustments.” No reprogramming action is required. In addition, enter the total of all closed/cancelled account adjustments charged to the applicable appropriation in column “k” as a separate line item titled “Reduction to Finance Closed Account Adjustments.” Show this amount as a positive number.

3.10 Current Appropriations Used for Expired Appropriations with Insufficient Obligation Authority

If the appropriation’s period of availability has expired and the account has a negative unliquidated balance (insufficient funds), an obligation or adjustment of an obligation may be charged to a current appropriation that is authorized for the same purpose. However, if a subsequent review or investigation discloses that sufficient funds were available in the expired account, any charge made against the current account must be reversed. Charges against a current appropriation are prohibited if a sufficient balance exists in the expired account.

3.10.1. Charges to current year funds when sufficient obligation authority does not exist in expired appropriations may be made if all of the following conditions are met:

3.10.1.1. The obligation is charged to an appropriation available for the same purpose as the applicable expired account and is otherwise properly chargeable (except as to amount) to the applicable expired account before closure/cancellation of the expired account.

3.10.1.2. The Assistant Secretary of a Military Department for Financial Management and Comptroller, or the Comptroller of a Defense Agency, has determined that sufficient obligation authority does not exist in the applicable expired account to fund the applicable obligation.

3.10.1.3. The obligation is not otherwise properly chargeable to any DoD current appropriation under the transitional provisions as noted in 31 U.S.C. § 1553(b)(1).

3.10.2. The amount charged to a current appropriation may not exceed an amount equal to one percent of the total appropriation for that account (see subparagraph 3.3.4 that applies to
charges that can be made to a current account when the account that should have been charged has been closed/cancelled.)

3.11 Collection Credits After an Account is Closed/Cancelled

3.11.1. It is inappropriate to write-off valid accounts receivables as a result of closure/cancellation of appropriations with negative unliquidated obligations. Maintain proprietary accounts until settled by the debtor or until the debt is closed in accordance with guidance in Volume 4, Chapter 3.

3.11.2. When collections that are authorized or required to be credited to an account are received after the closure/cancellation of an account, deposit those collections in Treasury as miscellaneous receipts (31 U.S.C. § 1552). Accounting entries are specified in the DoD USSGL Transaction Library that can be accessed on the SFIS web page. See Volume 4, Chapter 3 for receivable accounting policy.

3.12 Exceptions to an Account’s Period of Availability for Adjusting and Liquidating Obligations

3.12.1. Requirements applicable to the closure/cancellation of appropriations apply to all appropriation accounts unless specifically exempted by statute. A provision of an appropriations act may exempt an appropriation from the provisions of the new requirements for the closing/cancelling of accounts and may fix the period the appropriation remains available for expenditure (31 U.S.C. § 1557). Additionally, an appropriations act applies only to the appropriation for a specific FY. In order for an appropriation to preclude application of the limitations on expenditure specified in new provisions of Title 31, the statute must:

3.12.1.1. Identify the appropriation account for which the availability for expenditure is to be extended;

3.12.1.2. Provide that the appropriation account must be available for recording, adjusting, and liquidating obligations properly chargeable to the account; and

3.12.1.3. Extend the availability for expenditure of the obligated balances.

3.12.2. The availability for expenditure of specific accounts may be changed only through specific legislation. Request this authority only when payment of old balances from unexpired funds (based on historical outlay data) regularly would exceed the one percent limitation or would severely impact the current program.

3.12.2.1. When the nature of a DoD Component’s program requires disbursements beyond the five-year period, the Component must submit proposed changes in appropriation language to OUSD(C), P/B. OUSD(C), P/B will submit the proposed changes to OMB for approval.
3.12.2.2. Absent specific authority, DoD Components may request re-appropriations of closed/cancelled balances through OUSD(C), P/B and defer payment until the appropriation is available. Treat the receipt of a re-appropriation as adding new budget authority.

3.13 Antideficiency Act Violations

The DoD Components are required to investigate and report potential Antideficiency Act (ADA) violations when certain limitations are exceeded. An ADA violation can occur when an obligation is charged against a current account when the obligation otherwise would be properly chargeable (except as to amount) to an expired account, and insufficient resources exist to fund the obligation in the applicable expired account. ADA investigation and reporting policy is specified in Volume 14.

3.14 Control, Reporting, and Certification Requirements

31 U.S.C. §§ 1554 and 1556, as amended, contain permanent audit, control, and reporting requirements pertaining to the liquidation of obligations.

3.14.1. Control Requirements

3.14.1.1. 31 U.S.C. § 1554(a) stipulates that any audit requirement, limitation on obligations, or reporting requirement applicable to an appropriation must continue to apply to that appropriation following expiration of the period of availability for new obligation of that appropriation. If an appropriation act contains a limitation on the obligation of funds for a program, project or activity, or other purpose; that limitation continues during the five-year period after the period of availability for new obligations expires. Additionally, the limitation continues after the appropriation has been closed/cancelled.

3.14.1.2. DoD Components must establish and test internal controls to ensure that an adequate review of obligated balances is performed to support the certification in accordance with OMB Circular A-123, Appendix A. Components are also responsible for retaining documents in accordance with Volume 1, Chapter 9.

3.14.1.3. Proper general ledger controls must be maintained for closed/cancelled valid unpaid obligations and accounts receivable in closed/cancelled accounts. Balances in unexpired accounts may be used to fund closed/cancelled obligations. Closed/cancelled obligations can be posted to unexpired accounts only when a disbursement will be paid during the current year.

3.14.2. Reporting and Certification Requirements

Under the provisions of 31 U.S.C. § 1554, the Secretary of Defense, or his designee, is required to submit a report to the President and the Secretary of the Treasury concerning the unliquidated obligations, unobligated balances, closed/cancelled balances, and adjustments made to appropriation accounts during the completed FY.
3.14.2.1. **Due Date.** This report is due not later than 15 days after the President submits his budget to Congress.

3.14.2.2. **Distribution Requirements.** A copy of the report must be submitted to the Speaker of the House of Representatives, the Committee on Appropriations, the Committee on Governmental Affairs, and other appropriate oversight and authorizing committees of the Senate (such as the Armed Services Committee).

3.14.2.3. **Contents.** 31 U.S.C. § 1554(b) requires that these reports contain:

   3.14.2.3.1. An itemization of related appropriation accounts, identified by FY and the balances identified in each account. This itemization is reported through the Government-wide Treasury Account Symbol Adjusted Trial Balance System (GTAS) and the Central Accounting Reporting System year-end module.

   3.14.2.3.2. A descriptive list of each current and expired appropriation.

   3.14.2.3.3. Identification of payments made from each applicable appropriation account with respect to those amounts that otherwise would have been properly chargeable to another account, both as to purpose and amount, except that the other account has been closed/cancelled (31 U.S.C. § 1553). These payments are reported on the DoD Component’s SF 224.

   3.14.2.3.4. Separate identification of obligation adjustments made to each currently applicable appropriation account that otherwise would have been properly chargeable to another account, both as to purpose and amount, except that the other account has been closed. These balances are reported in GTAS.

   3.14.2.3.5. Identification of all balances closed/cancelled on September 30th of the fifth year following the expiration of an appropriation account’s availability for incurring new obligations (31 U.S.C. § 1552(a)). These balances are reported in GTAS.

   3.14.2.3.6. Identification of those appropriation accounts available for an indefinite period that have been closed because: No disbursements have been made from the account for a period of two consecutive years; and the President or the Secretary of Defense has determined that the purposes for which the appropriation was made have been carried out (31 U.S.C. § 1555).

   3.14.2.3.7. A certification by the DoD Components that the obligated balances in each DoD appropriation account reflect properly existing obligations; and that expenditures made from each account since the time of submission of the prior report were supported by a proper obligation of funds and otherwise were proper.
3.15 Other Requirements

The following paragraphs specify detailed information about other review, accounting, and correction requirements regarding current, expired, and closed/cancelled accounts.

3.15.1. Apportionment Procedures. The SF 132, “Apportionment and Reapportionment Schedule,” must reflect the following footnote: “Up to one percent of the original amount of the appropriation ($xxx.xx), or the unobligated balance, whichever is less, may be used for the purpose of obligation adjustments and payments, which otherwise would have been properly chargeable (both to purpose and amount) to a closed/cancelled appropriation.” To the extent that supplemental appropriations are enacted, reapportionment of the initial “one percent” amount may be requested.

3.15.2. Unliquidated Obligations. DoD Components must review remaining unliquidated balances in expired accounts and de-obligate all amounts not supported by documentary evidence prior to closure/cancellation. Financial and program managers:

3.15.2.1. At each of the various levels of contract and program management retain the responsibility to ensure that all transactions are appropriately concluded. If services and materials remain undelivered at the time of expiration, they must be subsequently delivered or, where such deliveries cannot be made, action is taken to terminate contractual obligations and revert the funds to maintain integrity of the funds until such time as all outstanding obligations are liquidated or claims are cancelled or liquidated.

3.15.2.2. At all activities must actively review uncompleted contracts, uncollected accounts receivable, and uncollected travel or pay advances held at their level to ensure validity of such items.

3.15.3. Payments After Closure/Cancellation of Appropriations. Payment is prohibited for amounts that cite closed/cancelled appropriations until the disbursing office has obtained a currently available appropriation fund cite from the funding activity.

3.15.4. Unmatched Disbursements for Closed/Cancelled Accounts. When a disbursement is made properly before the closure/cancellation of the appropriation but is not identified and matched with the proper obligation until after the closure/cancellation of the appropriation, charge that disbursement to the closed/cancelled appropriation. Make appropriate corrections to accounting records and reports as necessary; and submit those reports to Treasury. If an error is discovered in a closed/cancelled account for a disbursement made prior to the closure/cancellation of that account, see subparagraph 3.15.10 for correction of reporting errors.

3.15.5. Negative Unliquidated Obligations. Negative unliquidated obligation (NULO) balances generally occur in an account when valid disbursements are incorrectly matched with obligations and the disbursements exceed the obligations. Negative balances represent error conditions that must be researched and corrected as quickly as possible. See Chapter 11 for policy on NULOs.
3.15.6. **Line Item Detail.** The level of detail required to be maintained for expired accounts is the same as that required to be maintained for current accounts. The level of detail facilitates cost determinations and program assessment and evaluation. The detail provides visibility over expired accounts, an appropriate audit trail, and meets the objectives of the closing accounts legislation.

3.15.7. **Uncollectible Accounts Receivable.** A write-off of an uncollectible reimbursement receivable does not change total obligations within budgetary accounts. Such write-offs result in a reclassification to a direct program obligation of an obligation previously incurred. See the *DoD USSGL Transaction Library* for entries to account for uncollectible accounts receivable in closed/cancelled accounts.

3.15.8. **Closing/Cancelling an Account with a Negative Balance.** The existence of a negative balance does not preclude an account from being closed/cancelled. DoD Components must clear the negative balance and establish a receivable for the amount of the negative balance before the account can be closed.

3.15.8.1. Submit informational accounting reports (i.e., SF 133) for the applicable account until the negative balance is resolved. These informational reports must indicate that the account is closed/cancelled, show the amount of the negative balance at the time the account was closed/cancelled, and identify the current amount of the applicable receivable.

3.15.8.2. Liquidate a negative balance by receiving offsetting collections. Deposit collections of overpayments to Treasury as miscellaneous receipts. An account with a negative balance may indicate that an ADA violation has occurred. If an ADA violation is suspected, see Volume 14 for ADA investigation and reporting requirements.

3.15.9. **Accounting for Uncollectible Accounts Receivable in Closed/Cancelled Accounts.** Budgetary accounts corresponding to accounts receivable must be closed/cancelled when an account is closed/cancelled. Total obligations within budgetary accounts do not change when the budgetary accounts are closed/cancelled. The write-off of an uncollectible reimbursement receivable results in a reclassification of an obligation previously incurred under the reimbursable program to a direct program obligation.

3.15.9.1. For expected refunds, the status of obligation authority must be tracked and it is necessary to ensure that cumulative payments do not exceed the original appropriation of the closed/cancelled account even though paid from a current account.

3.15.9.2. Reclassify proprietary accounts established for accounts receivable applicable to closed/cancelled accounts. Deposit the subsequent collections of such amounts for this account to Treasury as miscellaneous receipts.

3.15.9.3. If, after compliance with established collection procedures, it is determined that an account is uncollectible, write-off the account by charging a bad debt account. The write-off of an uncollectible account applicable to the reimbursable program results in a
reclassification of obligations previously incurred under the reimbursable program to a direct program obligation.

3.15.10. Correction of Reporting Errors in Closed/Cancelled Accounts

3.15.10.1. Corrections may be requested for two categories of errors: (a) clerical errors such as misplaced decimals, transposed digits, or transcribing errors resulting in inadvertent cancellations of budget authority; and (b) errors made in classifying a payment made prior to the closing/cancellation of an account, but not discovered until after the account was closed/cancelled. Component requests must include a written standalone legal opinion from their Office of General Counsel, applying the underlying facts and relevant law when (1) the request is for redistribution of offsetting collections previously recorded in a prior fiscal year where one Treasury Appropriation Fund Symbol (TAFS) is closed (i.e., unexpended balances are cancelled) and one TAFS is expired and/or (2) the request is for redistribution of gross outlays previously recorded in a prior fiscal year where one TAFS is closed (i.e., unexpended balances are cancelled) and one TAFS is expired. The opinion must address the limitations placed on reopening closed TAFS as applied to your component’s particular factual situation. See OMB Circular A-11, section 130.16.

3.15.10.1.1. For clerical errors, the request must include the appropriation account number, the reason for the restoration, and convincing evidence of the clerical error to justify the restoration required to make the correction. At a minimum, this includes the original accounting record from which the incorrect posting was made and a record showing the incorrect amount.

3.15.10.1.2. For classification errors, Treasury accepts reporting to correctly classify payments previously reported to suspense/clearing accounts or to correct classification errors between current and closed/cancelled accounts.

3.15.10.2. The TFM Volume 1, Part 2, Chapter 2000 and the TFM Volume 1 Bulletins issued for FY-end processing identifies the address for submission and other contact information.

3.15.10.3. If a request for the correction of errors affects another DoD Component, coordinate the request with the affected Component and submit to the DFAS Deputy Director for Accounting Operations, 8899 East 56th Street, Indianapolis, IN 46249. DFAS must submit requests to Treasury after completion of its review.

3.15.10.4. See Chapter 11 for policy on the research and correction of unmatched disbursements and NULO transactions, and the resulting adjustments to Treasury.
VOLUME 3, CHAPTER 11: “UNMATCHED DISBURSEMENTS, NEGATIVE UNLIQUIDATED OBLIGATIONS, AND IN-TRANSIT DISBURSEMENTS”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

The previous version dated April 2015 is archived.

CHAPTER 11

UNMATCHED DISBURSEMENTS, NEGATIVE UNLIQUIDATED OBLIGATIONS, AND IN-TRANSIT DISBURSEMENTS

1.0 GENERAL (1101)

1.1 Purpose (110101)

This chapter prescribes the accounting standards and related management requirements necessary to establish and maintain financial control over disbursement, collection, and adjustment transactions affecting the fund balances with the U.S. Department of the Treasury (Treasury) and cash resources that are not part of the fund balance with Treasury. This chapter also prescribes the requirements for researching and correcting unmatched disbursements (UMDs), negative unliquidated obligations (NULOs), and in-transit disbursements.

1.2 Authoritative Guidance (110102)

The accounting policy and related requirements prescribed by this chapter are in accordance with (IAW) the applicable provisions of:

1.2.1. Title 36, Code of Federal Regulations, parts 1220 and 1236, (36 CFR parts 1220 and 1236)

1.2.2. Title 31, United States Code, section 1501 (31 U.S.C. § 1501)

1.2.3. 31 U.S.C. §§ 1551 - 1557

1.2.4. 44 U.S.C. §§ 3101 – 3107 and 3301 - 3303

1.2.5. Office of Management and Budget (OMB) Circular A-123

1.2.6. Treasury Financial Manual, Volume 1, Part 2, Chapter 3100 (1 TFM 2-3100)

1.2.7. 1 TFM 2-5100

1.2.8. Defense Logistics Manual (DLM) 4000.25, Defense Logistics Management Standards (DLMS), Volume 4
2.0 DEFINITIONS (1102)

The definitions provided in this section describe terminology associated with UMDs, NULOs, and in-transit disbursements and provide information specifically for purposes of this chapter.

2.1.1. **Accounting Center.** The accounting centers for the Department are the Defense Finance and Accounting Service (DFAS) Centers in Cleveland, Columbus, Indianapolis, and Rome. The accounting center is responsible for receiving and processing status of funds reports from accounting offices that support Department of Defense (DoD) Component fund holders. For cross-disbursements, an accounting center may distribute in-transit disbursements received from paying centers to accounting offices and monitor the status of disbursement recordation.

2.1.2. **Accounting Office.** An accounting office is responsible for maintaining accounting records of assigned fund holders. All accounting offices are assigned a six-digit Agency Accounting Identifier Code (fiscal station number, authorization accounting activity, or accounting and disbursing station number). All disbursement transactions eventually must be distributed to an accounting office, recorded against a valid obligation, and reported on status of funds reports and financial statements. All accounting offices within the Department report through the DFAS Centers in Cleveland, Columbus, Indianapolis, or Rome.

2.1.3. **Cross-Disbursement.** A cross-disbursement is created when a disbursing office makes a payment for an accounting office that reports to a DFAS center other than the center to which the disbursing office reports. A cross-disbursement is also created when a non-DoD federal agency (such as the Department of State) makes a payment charged to a DoD account.

2.1.4. **Currently Available Appropriation.** An appropriation or fund against which new obligations may be incurred and recorded (as contrasted with an expired or closed appropriation against which new obligations may not be incurred).

2.1.5. **Disbursing Office.** A disbursing officer (DO) is responsible for disbursing and collecting funds on behalf of one or more DoD Components as well as ensuring proper internal controls, and obtaining, maintaining, and providing sufficient supporting documentation for such transactions. In the case of centralized disbursing, documentation functions may take place at an entitlement activity rather than at a disbursing office. Disbursing offices also are responsible for reporting disbursements and collections to a paying center using a unique four-digit Disbursing Station Symbol Number (DSSN) assigned by Treasury.

2.1.6. **Disbursement Not Sent.** A disbursement transaction that has been reported to Treasury by a disbursing office, but has not yet been transmitted to the accounting office.

2.1.7. **Entitlement Activity.** An entitlement activity is responsible for certifying the validity of payments on behalf of one or more DoD Components; and consequently, is responsible for obtaining, maintaining, and providing sufficient supporting documentation for such payments. In the case of centralized disbursing, supporting documentation remains with the entitlement activity rather than the disbursing office.
2.1.8. **Paying Center.** A paying center is responsible for consolidating disbursements and collections transmitted by DOs that report to the center, and for reporting the DOs’ returns by assigned DSSNs to Treasury.

2.1.9. **Suspense Account (Budget Clearing Account).** Treasury Account F3875 temporarily credits unclassified transactions from the public or other Federal entities when there is a reasonable presumption that the amounts belong to the agency. Suspense (clearing) accounts immediately affect the budget and transactions must be reconciled within 60 days.

2.1.10. **Inter-appropriation.** Inter-appropriation transactions result from business activities conducted by entities that are not consolidated such as DoD and a state or local government.

2.1.11. **Intra-appropriation.** Intra-appropriation transactions result from business activities conducted by two different consolidation federal entities included in the Financial Report of the U.S. Government.

2.1.12. **Obligation.** For purposes of matching a disbursement to its proper obligation, the term obligation refers to each separate obligation amount identified by a separate line of accounting. While a single order may be funded by multiple lines of accounting, each line of accounting represents a separate obligation amount to which the resulting disbursement must be matched. DoD requirements for incurring and recording obligations are prescribed in Chapter 8. See the Glossary for a complete definition of obligation.

3.0 **MATCHING DISBURSEMENTS TO OBLIGATIONS (1103)**

A disbursement must be matched to its corresponding, detail-level obligation and recorded as promptly as current systems and business practices permit. The vast majority of obligations and disbursements are matched automatically via the Department’s various system interfaces. However, some obligations and disbursements are required to be manually matched, mainly due to non-automated processes or the rejection of transactions by automated systems. When a disbursement is recorded in the accounting system but not matched to an obligation, the disbursement results in a UMD. When a disbursement is recorded in the accounting system and is matched to an obligation, but the amount of the disbursement exceeds the amount on the recorded obligation, the amount of the disbursement in excess of the applicable obligation results in a NULO. After performing due diligence research IAW section 1105, obligations must be established and recorded for all UMDs and NULOs no later than September 30 of the year that the cited appropriation is scheduled to be closed regardless of the date that the disbursement was made. Fund holders must participate in the resolution of both UMDs and NULOs as both affect funds availability and have Antideficiency Act (ADA) implications. In addition to the timelines specified in this chapter, UMDs and NULOs must be included in the Dormant Account Review addressed in Chapter 8.

3.1.1. **UMD and NULO Research Requirement.** Research and correction actions must begin as soon as it is apparent that a disbursement transaction has resulted in a UMD or a NULO. The accounting office involved must immediately determine whether the disbursement is a valid charge to the fund holder, and whether a matching obligation transaction is recorded under a
different or incorrect document number. If the disbursement is not a valid charge to the fund holder, the accounting office and the fund holder must reject the disbursement IAW subparagraph 111404.C or paragraph 111405. If a matching obligation is recorded under an incorrect document number, the fund holder must immediately correct the document number, thus allowing for the proper matching of the disbursement to its corresponding, detail-level obligation. If an accounting adjustment affects a contract payment, contract reconciliation must be performed IAW Volume 10, Chapter 20. Other research requirements are specified in section 1107.

3.1.2. Record an Obligation for Unresolved UMDs and NULOs. Immediately notify the fund holder of applicable UMDs or NULOs. If research efforts fail and the condition is not corrected, advise the fund holder of the requirement to establish a matching obligation within the timeframes delineated in paragraph 110501. If the fund holder fails to record an obligation, the accounting office must elevate the issue IAW subparagraphs 110501.A.3 or 110501.B.4 as applicable.

3.1.3. Establish Obligations for UMDs and NULOs at the Transaction Level. Disbursements must be matched to their corresponding obligation at the detail transaction level. After performing due research IAW section 1105, obligations recorded for UMDs and NULOs must be recorded at the detail transaction level as follows:

3.1.3.1. An obligation in the amount of the disbursement must be recorded at the transaction level for UMDs.

3.1.3.2. An obligation adjustment in the amount of the disbursement in excess of the applicable obligation must be recorded at the transaction level for NULOs.

4.0 OVERAGED UMDs/NULOs (1104)

4.1 Current and Expired Accounts (110401)

4.1.1. Unobligated overaged NULOs and UMDs have the first claim to the unobligated balances in any of the current and expired accounts. New obligations, or new upward obligation adjustments, may be executed only when and to the extent that there is an unobligated balance remaining in an account after all overaged NULOs and UMDs have been obligated. Thus, no new obligations or obligation adjustments may be incurred in the account to the extent that unobligated balances in such accounts are zero, or overaged NULOs and UMDs (if they are obligated) when added to obligated balances, would exceed the availability in such accounts.

4.1.2. DoD Components may continue to research overaged NULOs and UMDs without the need to initiate an investigation of a potential ADA violation, except as provided for in subparagraphs 110401.C – E.

4.1.3. If an account is obligated fully (but not overobligated) and has unresolved overaged NULOs and UMDs that, if obligated, would exceed the availability in an account, payments may continue, provided the account is not in danger of exceeding the unexpended balance (resulting in an overdisbursement). If an overdisbursement occurs, payments from the account must stop...
immediately, and the DoD Component involved must accomplish actions required for a potential ADA violation IAW Volume 14.

4.1.4. Should a new obligation or obligation adjustment be incurred in an account that has been obligated fully as a result of unresolved, overaged UMDs or NULOs, such an obligation must be recorded even though it will result in recorded obligations in excess of available resources. Additionally, the DoD Component involved must accomplish actions required for a potential violation IAW Volume 14.

4.1.5. This chapter must not be construed as authorizing a delay in (1) the recording of an executed obligation that would result in an overobligation or (2) the requirement to conduct an investigation of a potential ADA violation that results from any action other than the sole requirement to obligate amounts for UMDs and NULOs.

4.2 Accounts Closed/Scheduled to Close at Fiscal Year-End (110402)

4.2.1. Obligations must be established no later than September 30 by all DoD Components for all UMDs, NULOs and in-transit transactions in appropriations scheduled to close at the end of the current fiscal year.

4.2.2. If such obligations result in obligations in an excess of available funds, the DoD Components must resolve the negative balance and report to Treasury within two months but no later than the end of the current fiscal year. See Chapter 10 for additional information.

4.2.3. If the account is not returned to a positive balance within 60 days, the DoD Component involved must accomplish actions required for initial identification and investigation of a potential ADA violation IAW Volume 14.

4.2.4. Each administrative subdivision of an appropriation carries with it the responsibility for any potential or actual ADA violation. A DoD Component has the right to modify the number or level of administrative subdivisions within an appropriation before the closure of an appropriation. However, once an appropriation closes, no further modification or change may be made in the number or level of administrative subdivisions. Further, the modification of number or level of subdivision does not override the requirements in Volume 6A, Chapter 4, section 0406 regarding the level of reporting on the Appropriation Status by Fiscal Year Program and Subaccounts (Accounting Report Monthly 1002) or control requirements in Chapter 10, subparagraph 100314.A.1.

4.2.5. A new cash disbursement, which would be chargeable (both as to purpose and amount) to an appropriation except that the appropriation is closed, must be paid from an appropriation that currently is available for the same purpose. However, a proposed payment may not exceed the:
4.2.5.1. Unexpended balance of the closed appropriation.

4.2.5.2. Unobligated balance of the currently available appropriation charged.

4.2.5.3. One percent limitation, discussed in subparagraph 110402.F.

4.2.6. The cumulative amount of payments charged to a currently available appropriation, because the original appropriation(s) that otherwise would have been charged has been closed, may not exceed one percent of the total amount appropriated to the currently available appropriation being charged. If it exceeds the one percent limit, the office funding the proposed payment (contract) must contact the Military Department Assistant Secretary for Financial Management and Comptroller (FM&C) or Defense Agency Comptroller for referral to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), Deputy Chief Financial Officer (DCFO) for appropriate disposition.

4.2.7. Corrections of payments involving closed appropriations must be processed as inter- and intra-appropriation adjustments. Such corrections generally do not require the obligation of currently available funds or deposits to the Treasury miscellaneous receipts account if the payment occurred before the closure of the applicable appropriation, or appropriations available for new obligation already have been charged properly.

4.2.8. Inter- and intra-appropriation adjustments to correct accounting records must not be accomplished by using a cash disbursement or cash collection.

4.2.9. A potential ADA violation must be reported and a preliminary investigation initiated if posting an adjustment to a current, expired or closed appropriation would result in either (1) a negative unobligated balance or (2) disbursements that are in excess of the amount appropriated, at either the appropriation level or a portion thereof that has been subdivided. See Volume 14 for ADA investigations and reporting requirements.

4.2.10. Perpetual balances of unobligated amounts and unliquidated amounts must be maintained for each closed appropriation. If the unobligated balance or unexpended balance in a closed appropriation is negative, a potential ADA violation has occurred and must be reported and investigated.

4.2.11. All disbursements and collections, or adjustments to disbursements and collections, involving current, expired, or closed appropriations, must be reported to Treasury. However, a correction in which both the debit and credit entry cite a closed appropriation is not reported to Treasury.
4.3 Expenditure Controls (110403)

The DoD Components must work with accounting and disbursing offices to implement effective controls to prevent overexpenditures in accounts that may be in an overobligated position or that have UMD or NULO balances that exceed the unobligated balance in the account. This action is necessary because normal controls for determining expenditure availability are based on the unexpended balance of the obligations.

5.0 RESPONSIBILITIES FOR FUNDING OVERAGED UMDs AND NULOs (1105)

5.1 Accounting Offices (110501)

5.1.1. The accounting office must contact the fund holder immediately for corrective action when an obligation document that corresponds to a disbursement resulted in a UMD or NULO, but the obligation document has not been recorded, or not recorded for, or adjusted to, the proper amount, the accounting office must perform the following actions within 60 days:

5.1.1.1. Immediately provide the fund holder with a copy of the obligating document or disbursing document (in the case of a duplicate or overpayment), and request the fund holder record an obligation or obligation adjustment within 10 days of notice.

5.1.1.2. If the fund holder does not record the requested obligation, or obligation adjustment, within 10 days of notice, escalate the matter with the DoD Component, within the subsequent 10 days. The accounting office must notify the fund holder of any action taken.

5.1.2. When an accounting office does not have an obligation document that corresponds to a disbursement that has resulted in a UMD or NULO, the accounting office must:

5.1.2.1. Immediately inform the fund holder of the UMD or NULO and also research the cause of the UMD or NULO. The required supporting documentation should be readily available from the fund holder.

5.1.2.2. Conduct research as required in section 1107 and provide the results of the research to the fund holder within 30 days. The Director or designee must advise the fund holder of the type, extent, and results of the research performed. Supporting documentation accumulated in the performance of the research must be retained and made available to the fund holder upon request.
5.1.2.3. If supporting documentation shows that a valid obligation was incurred but not recorded, notify the fund holder that an obligation must be recorded within 60 days. The valid obligation must be documented and include the documentation that supports the obligation. The fund holder must provide the obligating document to the accounting office within five days of the subsequent accounting period close. The fund holder must analyze the commitment and obligation files, evaluate the research documents provided by the accounting office, and/or request additional funding as required.

5.1.2.4. If the fund holder does not record the requested obligation or obligation adjustment within five days of notice, immediately escalate the matter with the fund holders’ leadership. The supporting documentation required at the time of disbursement is sufficient to support the recording of a matching obligation. See Volume 10, Chapter 8 for supporting documentation requirements, and Volume 5, Chapter 9 for payment certification requirements.

5.1.3. Obligation and obligation adjustment transactions must be recorded at the detail document/transaction level to ensure the proper matching of obligation and disbursement transactions and to properly affect unobligated balances.

5.1.4. When the fund holder records a valid obligation or obligation adjustment that was not previously recorded and that action indicates a potential ADA violation, the DoD Component must be notified immediately and the DoD Component must conduct a preliminary investigation of the potential ADA violation IAW Volume 14, Chapter 3.

5.1.5. When there is an indication of a potential duplicate payment or overpayment, the accounting office and fund holder must promptly review all applicable payment files. If there is a duplicate payment or overpayment, the fund holder must record a refund receivable and initiate a recovery of funds action. Additionally, the accounting office must record the applicable transactions that may result in a UMD or NULO, and advise the fund holder that the UMD or NULO requires corrective action within the timeframes specified in subparagraph 110501.A.

5.1.6. In accordance with Chapter 8, Section 0813, paragraph 081310, disbursement documents that support obligations that have not been recorded previously must be recorded at the obligation-paid stage of accounting with a corresponding decrease in the uncommitted/unobligated balance of the affected allotment.

5.1.7. In accounting for closed appropriations, accounting offices must:

5.1.7.1. Maintain the official accounting records for all corrections to the balances of closed appropriations and funds IAW Volume 1, Chapter 9.

5.1.7.2. Establish appropriate controls over closed appropriations by initiating the following actions (minimum requirements):
5.1.7.2.1. Submit all corrections to closed appropriations to the accounting center. All corrections to closed appropriations must be transmitted to the applicable accounting center for posting to the accounting center’s accounting records and/or approval to post to the accounting office’s accounting records. The accounting center’s accounting records must support the accounting records of the accounting office responsible for the administrative control of the closed appropriation. For more information on Correction of Reporting Errors in Closed/Cancelled Accounts, see Chapter 10.

5.1.7.2.2. Develop and implement procedures to ensure that all transactions affecting closed appropriation unobligated and unliquidated balances are provided to the appropriate accounting center responsible for maintaining the unobligated and unliquidated obligation balances.

5.1.7.3. Adjust detailed records to reflect accounting corrections when detailed records are still being maintained for contract payment or other purposes. If an accounting adjustment affects a contract payment, contract reconciliation will be performed if required by and IAW Volume 10, Chapter 20.

5.1.7.4. Record corrections for UMDs, NULOs, and in-transit disbursement transactions for which research actions have been completed and correcting accounting transactions have been identified and submitted by a DoD Component:

5.1.7.4.1. Record corrections received from DoD Components within five days of receipt (except as provided for in subparagraph 110501.I.4.b). The recording of such corrections must not be delayed pending the completion of contract reconciliation or other related actions.

5.1.7.4.2. Reject a proposed correction if the proposed correction is in error. (A proposed correction may not be rejected solely because a contract has not been reconciled fully or other actions have not been completed.)

5.1.8. In accounting for closed appropriations, accounting centers and fund holders must:

5.1.8.1. Maintain the official Treasury records for all corrections to the balances of closed appropriations and funds. Ensure that an adequate audit trail is maintained for all corrections affecting closed appropriations, including any offsetting associated corrections to current or expired appropriations. See section 1116 and Volume 1, Chapter 9 for DoD policy on record retention.

5.1.8.2. Ensure that the beginning, expended unpaid balance of each closed appropriation accurately reflects the official Treasury balance of the appropriation on the date of closure.
5.1.8.3. Perform a one-time review of each closed appropriation to ensure that the beginning accounts payable (obligations, unpaid) balance of each closed appropriation accurately reflects the balances on the Standard Form 133, “Report on Budget Execution and Budgetary Resources,” as of the date of closure.

5.2 Disbursing Offices (110502)

5.2.1. A DO must ensure supporting documentation is provided to the accounting office or fund holder upon request. Such supporting documentation must be provided no later than 30 days after the date of the request. Supporting documentation may include a copy of the contract, payment voucher, receiving report, and vendor invoice. Such supporting information also may be obtained or provided via electronic data access. All disbursements must remain classified in the accounting system to the line of accounting in which originally reported until resolved. All invalid transactions recorded in suspense accounts F3875 and F3885 must be reclassified in the accounting system to the correct line of accounting or resolved and cleared from the suspense account. See section 1116 and Volume 1, Chapter 9 for DoD policy on record retention.

5.2.1.1. Transfer positive balances to Treasury miscellaneous receipts account IAW Volume 5, Chapter 8.

5.2.1.2. For negative balances, initiate action for a discontinued research approval as specified in section 1108 or a potential ADA violation IAW Volume 14 as appropriate.

5.2.2. A DO is responsible for recouping an overpayment IAW internal recovery procedures for refunds due from the public. Since the overpayment or a duplicate payment may have caused a UMD or NULO, the DO must assist, as required, in the research of UMDs and NULOs.

5.3 Office of the Under Secretary of Defense (Comptroller) (110503)

The OUSD(C), Deputy Comptroller, Program/Budget (P/B) must ensure the following actions are taken when (a) funds in a particular Defense-wide account are allocated to a number of fund holders (sub-allocation holder identifiers) and (b) disbursements exceed obligations at the appropriation level, but not at a fund holder’s level:

5.3.1. The applicable DoD Component(s) reserves, commits, or obligates appropriate amounts against the fund holders’ accounts.

5.3.2. A report of a potential ADA violation is submitted to the OUSD(C), DCFO when applicable.

5.3.3. An investigation of a potential ADA violation is initiated, when warranted, IAW Volume 14.

5.3.4. Corrective actions are taken by the fund holder and the applicable accounting office, as appropriate. Corrections must be adequately supported and must identify the cause of the error.
5.4 Fund Holders (110504)

OUSD(C), P/B, the Military Department Assistant Secretaries (FM&C), Comptrollers of the Defense Agencies and DoD Field Activities, and other DoD fund holders must:

5.4.1. Designate an appropriation manager to receive, process, and take action on notifications from accounting offices; and to take other appropriate action(s) regarding the stoppage of payments, the obligation of disbursement transactions within the prescribed timeframes, and other actions provided for in this chapter.

5.4.2. Obligate funds within the timeframes specified in paragraph 110501 after the receipt of an initial notification from the cognizant accounting office that a disbursement is unmatched or exceeds an obligation at the allotment/fund holder level. If sufficient unobligated balances are not available, an investigation of a potential ADA violation must be initiated, when warranted, IAW Volume 14.

5.4.3. Upon notification from the cognizant accounting office that a disbursement exceeds an obligation at the obligation level and the condition has not been corrected, provide the accounting office, as appropriate, an obligation document, or a funding document together with an obligation document, to cover the amount of the UMD or NULO within the timeframes specified in paragraph 110501.

5.4.4. When sufficient availability does not exist in the appropriation (or other administrative subdivision of funds), request a realignment of funds within an account or between accounts, a reprogramming of funds, a deficiency supplemental, or other acceptable funding solution. Also, forward supplemental funding documents to the cognizant accounting office to cover any funding shortfalls.

5.4.5. Initiate a review, immediately, of the circumstances to determine whether an investigation of a potential ADA violation is warranted IAW Volume 14.

5.4.6. Develop and implement standard procedures for determining the timeframes and procedures for record retention applicable to detail accounting transaction records for closed appropriations. These procedures must ensure that required balances of each appropriation are accurately maintained while minimizing the cost associated with maintaining large databases or record files of completed transactions for records which no longer are required.

5.4.7. In addition to the responsibilities addressed in paragraph 110504, the DoD fund holders must resolve UMDs and NULOs, upon notice, within the timeframes specified in paragraph 110501. The fund holder must:

5.4.7.1. Deobligate any invalid and/or unsupported obligations. Footnote the reasons for such deobligations on the applicable journal voucher or open document listing supporting the deobligation action IAW Chapter 8, section 0804.
5.4.7.2. Assist with the reconciliation of commitment and obligation information between the pay/contract/vendor system and the accounting system.

6.0 PRIORITIES FOR RESEARCHING AND CORRECTING UMDs (1106)

The following three priority groups are established for researching and correcting all disbursement transactions that have not been properly matched to the correct obligation:

6.1 First Priority (110601)

The first priority is appropriations or funds specifically requested by OUSD(C).

6.2 Second Priority (110602)

The second priority is appropriations or funds in an overexpended or overobligated status, regardless of whether the appropriation is in a current, expired, or closed status. Also included in this category are other appropriations, funds or transactions that have caused or are anticipated to cause stop payment orders or create a negative balance condition within the next 60 days.

6.3 Third Priority (110603)

The third priority is all other appropriations and funds, whether in a current, expired, or closed status.

6.4 Secondary-Level Priorities (110604)

Within each of the three priority groups, appropriations or funds with the highest negative balance/amount of UMDs generally must be researched ahead of appropriations or funds with lower balances/amounts. Within each appropriation or fund, prioritize transactions and documents beginning with the highest dollar value and continue to work the transactions and documents within that appropriation.

6.4.1. Continue this priority until all applicable transactions in the appropriation or fund are researched and corrected and the account is restored to a positive balance, NULO balances are eliminated and/or UMDs are matched, as applicable.

6.4.2. Not all transactions in an account must be matched or resolved before beginning research efforts in another account.
7.0 RESEARCH REQUIREMENTS FOR OVERAGED NULOs/UMDs (1107)

7.1 General Requirements (110701)

This section identifies the minimum research requirements for all overaged NULO and UMD transactions. It covers contracts, reimbursable orders, Military Interdepartmental Purchase Requests (MIPRs), travel orders, and Military Standard Requisitioning and Issue Procedures (MILSTRIP).

7.2 Contracts (110702)

7.2.1. Accounting Office Actions

7.2.1.1. Select contract(s) for review based on either a large individual UMD transaction or NULO condition and/or large aggregate total UMD transactions or NULO conditions.

7.2.1.2. Obtain the accounting system transaction history maintained in the accounting office and the payment transaction history from the disbursing office, or the output of obligation and payment differences from an accounting system/payment system comparison program if there are numerous UMDs showing incompatibility with the funds or amounts on the contract.

7.2.1.3. Review the output of a comparison program of the accounting and payment systems, when available. This can substitute for transaction histories from either system, and will reveal obligation modifications recorded in one system but not the other, as well as potentially omitted modifications.

7.2.1.4. Review obligation transactions recorded in the accounting system to determine that all contract modifications have been recorded.

7.2.1.5. Follow up with the contracting office and contract administration office to verify that all modifications have been recorded, and request that any contract modification errors and omissions be corrected or recorded when a missing contract modification is suspected.

7.2.1.6. Determine the error condition of each UMD (e.g., wrong appropriation or insufficient funds) to guide further research.

7.2.1.7. For a UMD, make a system inquiry, or request the accounting system closed contract history if there is no contract on the active accounting system records. If the contract is in the closed history file, take action to reopen the contract and record the transaction.
7.2.1.8. Review unmatched transactions for indications of specific error conditions. Such conditions include omitted progress payment recoupments for a contract having progress payments, inappropriate appropriation data configurations, or duplicate submission of payment data.

7.2.1.9. Report corrections made to transactions for accounting system recording, (e.g., changes to the appropriation data configuration) to the disbursing office for correction of its records.

7.2.1.10. Reject those transactions that cannot be corrected back to the disbursing office for correction or recovery (e.g., the wrong accounting office or suspected overpayments). Perform the related required central reporting system actions.

7.2.1.11. Request selected voucher copies and supporting information when a centrally-administered contract is still open on the accounting activity’s payment records and reconciliation cannot be accomplished between the accounting system transaction history and payment system transaction history.

7.2.2. Disbursing Office Actions

7.2.2.1. When a request for information on payment transactions is made by an accounting office, search the files for payment vouchers and, if available, provide a copy to the requesting office. If the payment records and files cannot be found due to age or apparent loss, respond as promptly as possible regarding these facts.

7.2.2.2. Review contract payment files promptly and verify whether the reported reject reason is correct when a disbursement transaction is rejected back from an accounting office with evidence that it was misrouted or is a duplicate or overpayment. If the rejection is valid, initiate a correction or recovery of funds for the duplicate or overpayment and respond as to the action taken.

7.3 Reimbursable Order/Military Interdepartmental Purchase Request (110703)

For reimbursable orders and MIPRs, the accounting office must:

7.3.1. Check the UMD for error reason codes, such as insufficient funds or unmatched document number.

7.3.2. Refer the transaction to the ordering office or ordering command fund manager for review, as indicated by the obligation document number.

7.3.3. Instruct the ordering office and/or fund holder to record the transaction when the ordering office or command validates the transaction and authorizes the obligation action.
7.3.4. When the ordering office determines that additional research is needed to resolve costs billed, allow the ordering office from the date of disbursement up to the timeframes specified in paragraph [110501] to resolve and/or fund (obligate) the order/MIPR.

7.3.5. Refer the transaction to the disbursing office for additional information or correction when the ordering office cannot validate the transaction.

7.4 Travel Orders (110704)

For travel orders, the fund holder and the accounting office (unless otherwise indicated) must:

7.4.1. Determine if a travel payment that results in a UMD transaction, identifies the traveler or is traceable to a separate travel system record.

7.4.2. Determine if the original obligation has been recorded in the accounting records when travel system records indicate closure of the travel order record with proper deduction of advances.

7.4.3. Record the amount of obligation (the initiating travel office) and record any UMDs (accounting office) when evidence shows that an obligation has not been recorded in the accounting system.

7.4.4. Request a copy of the travel settlement voucher from the disbursing office to support the transaction if travel system records do not indicate how a payment was used to liquidate a travel order record.

7.5 Military Standard Requisitioning and Issue Procedures Requisitions (110705)

For MILSTRIP transactions, the accounting office must:

7.5.1. Review MILSTRIP transactions for discrepancy report and billing adjustment status. Submit billing adjustment requests, when required, IAW the [DLM 4000.25], DLMS Volume 4. Any billing adjustment request must be submitted within one year of the billing date (two years for Foreign Military Sales).

7.5.2. Submit a follow-up request if a billing adjustment request previously has been made.

7.5.3. Accept the Military Standard Billing System transaction if a billing adjustment has not been requested and the time period has expired IAW the DLM 4000.25, DLMS Volume 4, Chapters 3 and 4.
7.6 Unidentified Document Numbers (110706)

For unidentified document numbers, the accounting office must:

7.6.1. Review the unmatched transaction for a disbursing office number and other data to ascertain the source of the obligation, e.g., the voucher number and code.

7.6.2. Refer the transaction to the disbursing office for verification and the furnishing of supporting documentation if there is a valid disbursing station number.

7.6.3. Refer the transaction to the applicable office or command if there is an indication of the source of the obligation, even though the transaction has no disbursing station number or the disbursing office cannot identify the transaction.

7.6.4. Instruct the disbursing office or obligating office to record the transaction if the proper obligation document is identified.

7.6.5. Record an obligation transaction when the obligating office can identify the obligation document, but there is no current open obligation.

7.7 Other Transactions (110707)

Fund Holder and Accounting Office Actions:

7.7.1. Review transactions to determine their purpose and nature, for example, supplemental payroll payment, express or other transportation services or hearing officer examination reporting services.

7.7.2. Request the disbursing office furnish missing documentation or any other material that would indicate the source of an obligation or basis for the payment when payment voucher support is missing or is incomplete.

7.7.3. Forward transactions to the funding office that have no matching accounting records but have an indication of an obligation, such as an order number. Include an explanation of the apparent nature and purpose of the expenditure; request research of the circumstances of the unrecorded obligation; and obtain support to show that the payment was not improper.

7.7.4. If there is no indication of an obligation, review the supporting documentation for any indication that the disbursement may have been incorrectly coded or other errors may have been made.

7.7.5. Record a transaction when it can be matched to a prior unliquidated obligation. If a transaction does not match, continue research efforts, including trying to identify erroneous document numbers.
8.0 REQUEST TO DISCONTINUE UMD/NULO RESEARCH (1108)

8.1 Research Decision (110801)

UMDs and NULOs may continue to be researched (notwithstanding the obligation of funds IAW section 1105). For transactions of $2,500 or less, the decision to continue (or discontinue) research is at the discretion of the fund holder. For transactions over $2,500, the Military Department Assistant Secretaries (FM&C) or Defense Agency Comptroller, may require the fund holder to continue research action. If continued research is required of the fund holder, written approval to discontinue research must be obtained from the Military Department Assistant Secretaries (FM&C) or Defense Agency Comptroller for transactions over $2,500. However, once the required obligation or obligation adjustment has been recorded for a UMD or NULO, DFAS must discontinue reporting the UMD or NULO regardless of whether research efforts continue.

8.2 Minimum Criteria for Discontinuance (110802)

The following conditions describe the minimum criteria required to request an approval to discontinue research:

8.2.1. There is no indication that an overpayment or a duplicate payment has been made and not fully collected.

8.2.2. For contracts closed by DFAS:

8.2.2.1. A preclosing payment review has been completed.

8.2.2.2. The UMD or NULO conditions that cannot be resolved will not exceed the contract total if recorded.

8.2.3. An erroneous document number that neither the disbursing office nor the indicated obligating office can furnish information or support the disbursement.

8.2.4. A travel order where an unmatched transaction contains insufficient information for research and cannot be traced due to age.

8.2.5. Requests to discontinue further research efforts may be forwarded when the research steps listed in section 1107 cannot be completed because of missing or insufficient documentation, and steps to request or obtain the missing documentation or clarification of the insufficient documentation were taken as specified but have not produced results, and further efforts do not appear to be cost-effective.

8.2.6. The following information must be submitted with each request to discontinue research:

8.2.6.1. A separate report listing the individual transactions for each appropriation by responsible accounting office.
8.2.6.2. A summary of research efforts and other steps taken to obtain missing documents or additional support for insufficient documentation. At a minimum, the summary report must include statements advising that the following actions were taken:

8.2.6.2.1. When applicable, transaction histories of the respective accounting and payment systems were obtained, reviewed, and compared for omitted transactions and other differences.

8.2.6.2.2. For omitted documents or noted differences, a request to obtain the documents or other clarifying evidence was made to the appropriate funding or contracting office for obligation documents and payment office for payment supporting documents.

8.2.6.2.3. Information regarding the research accomplished, as reported by the office, that the request for documentation and supporting information could not be provided due to invalid document number references, lost or misfiled documents, or inadequate data for searching files.

8.2.6.2.4. Sufficient actions were taken during the research efforts to provide reasonable assurance that no duplicate payments or other overpayments remain outstanding and no fraud has occurred involving the disbursement transactions for which research efforts are requested to be discontinued.

8.3 Reporting Continued Research Efforts (110803)

After the research required by section 1107 is accomplished by the accounting office and the fund holder, and the researched UMDs and NULOs are properly resolved, and/or required obligations or obligation adjustments are recorded, further research or reporting of such UMDs or NULOs is not required. If a fund manager and/or the accounting office later identify the need for an additional adjustment or correction and provide the appropriate adjusting/correcting document, the appropriate adjustment/correction must be recorded.

9.0 CORRECTION/POSTING DISBURSEMENTS – APPROPRIATED FUNDS (1109)

9.1 General Requirements (110901)

This section provides general requirements for recording corrections of prior disbursements erroneously charged to the wrong obligation or otherwise erroneously posted. The requirements are stated in general terms in recognition of the numerous accounting systems, each of which has specific transaction identifiers and processing requirements. The requirements in this section apply to disbursement transactions that have been or should have been charged to direct appropriations.
9.2 Correction of Disbursement – Current/Expired Appropriation (110902)

This paragraph describes corrections of prior disbursements or posting errors when the correct obligation has been identified and the appropriation that should have been charged is an appropriation that is in a current or expired status.

9.2.1. To properly record a disbursement in an appropriation that should have been charged, adjust the records of the current or expired appropriation by taking one of the following two actions as appropriate:

9.2.1.1. If a disbursement exceeds a prior obligation (e.g., created a NULO), an adjustment to the prior obligation is required. Therefore, increase the amount of obligation previously recorded to eliminate the NULO.

9.2.1.2. If a disbursement was made, for which an obligation was not previously recorded or otherwise has not been identified, an obligation is required. Therefore, record an obligation and match the disbursement to the obligation.

9.2.2. To correct the improper charge to a current or expired appropriation that was charged previously in error, adjust the records of the appropriation by taking one of the following two actions:

9.2.2.1. If a recoupment applies to a disbursement that either was matched erroneously to an obligation or remains unmatched, record a recoupment reversing the prior disbursement.

9.2.2.2. If the recoupment applies to a previous UMD, NULO, or in-transit disbursement for which an obligation or obligation adjustment was established IAW paragraph 110905, record the recoupment as an offset to the obligation or obligation adjustment and reverse the obligation or obligation adjustment.

9.3 Correction of Disbursement – Closed Appropriation (Before Closure) (110903)

This paragraph describes the corrections of prior disbursements or posting errors when the correct obligation has been identified and the appropriation that should have been charged is a closed appropriation and the disbursement occurred before closure of the correct chargeable appropriation.

9.3.1. To reflect the charge properly to the closed appropriation that should have been charged initially (before it was closed), process a memorandum charge to the closed appropriation.

9.3.1.1. Adjust the records of the closed appropriation to reflect the previous disbursement by taking one of the following two actions, as appropriate:

9.3.1.1.1. If the correct detail obligation was recorded in the closed appropriation (prior to the closure of the appropriation), match the prior charge (disbursement) to
the appropriate prior obligation in the closed appropriation and reduce the unliquidated balance of
the closed appropriation. (There is no change in the unobligated balance of the closed
appropriation.)

9.3.1.2. If the correct detail obligation was not recorded in the closed
appropriation (prior to the closure of the appropriation) or otherwise has not been identified, make
a memorandum record of the disbursement and reduce the unobligated balance of the closed
appropriation. (There is no change in the unliquidated obligation balance of the closed
appropriation.)

9.3.1.2. If the adjustment (required by subparagraphs 110903.A.1.a or b) would
exceed the unexpended balance or unobligated balance of the closed appropriation, or any
administrative subdivision thereof; or if upon reducing the unobligated balance IAW subparagraph
110903A.1.b, the unobligated balance is exceeded at the ADA level of responsibility, report a
potential ADA violation and initiate a preliminary investigation IAW Volume 14.

9.3.2. To reverse the erroneous charge: If the disbursement was erroneously charged to
an appropriation that is now current or expired, perform the actions addressed in subparagraph
110903.B.1. If the disbursement was erroneously charged to an appropriation that is now closed,
perform the actions addressed in subparagraph 110903.B.2.

9.3.2.1. To correct an improper charge to a current or expired appropriation that
previously was charged in error, adjust the records of the current or expired appropriation by taking
one of the following two actions, as appropriate:

9.3.2.1.1. If a recoupment applies to a disbursement that either was
matched erroneously to an obligation or remained unmatched, record a recoupment reversing the
prior disbursement.

9.3.2.1.2. If the recoupment applies to a previous UMD, NULO, or in-
transit disbursement for which an obligation or obligation adjustment was established IAW
paragraph 110905, record the recoupment as an offset to the obligation or obligation adjustment
and reverse the obligation or obligation adjustment.

9.3.2.2. To correct an improper charge to a closed appropriation that previously
was charged in error, process a memorandum recoupment reversing the erroneous charge to the
closed appropriation. Adjust the records of the closed appropriation to reflect the recoupment by
taking one of the following two actions as appropriate:

9.3.2.2.1. If the recoupment applies to a disbursement that either was
matched erroneously to the wrong obligation or remained unmatched (prior to the closure of the
appropriation), record a memorandum recoupment to offset the disbursement and record an
upward adjustment to increase the unliquidated obligation balance of the closed appropriation.

9.3.2.2.2. If the recoupment applies to a UMD, NULO, or in-transit
disbursement for which the unobligated balance of the closed appropriation was reduced IAW
paragraph 110905, record the memorandum recoupment as an offset to the previous decrease in the unobligated balance and record an upward adjustment to increase the unobligated balance of the closed appropriation.

9.4 Correction of Disbursement – Closed Appropriation (After Closure) (110904)

This paragraph describes corrections of prior disbursements or posting errors when the correct obligation has been identified and the appropriation that should have been charged is a closed appropriation and the disbursement occurred after closure of the correct chargeable appropriation.

9.4.1 Availability of Funds at Time of Original Disbursement. Disbursements occurring after the closure of an appropriation must be funded from a current appropriation available for the same purpose as the appropriation that is closed. This current appropriation is referred to in this chapter as the funding appropriation. The funding appropriation must be, or must have been available for incurring new obligations at the time of the disbursement.

9.4.1.1 When corrections involve disbursements that occurred after the closure of the correct appropriation, ensure that a correction is made to the funding appropriation in addition to the closed appropriation.

9.4.1.2 For example: To correct a disbursement that was charged erroneously to an appropriation that was expired at the time of the disbursement and should have been charged to an appropriation that was closed at the time of the disbursement, reduce the balance of the correct closed appropriation, and charge the funding appropriation that was current at the time of the disbursement.

9.4.2 Charge the Correct Funding Account. To correct the funding appropriation that was current at the time of the original disbursement and available for the same purpose as the closed appropriation (that otherwise would have been charged except that it was closed), adjust the records of the funding appropriation by taking the following action:

9.4.2.1 Establish an obligation in the funding appropriation and record the disbursement against the obligation.

9.4.2.2 If the adjustment exceeds either the unexpended balance or the unobligated balance of the funding appropriation, or any administrative subdivision thereof, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

9.4.3 Memorandum Charge to the Closed Account. To reflect the charge properly to the closed appropriation that should have been charged initially except that it was closed, process a memorandum charge to the closed appropriation.

9.4.3.1 Adjust the records of the closed appropriation by taking one of the following two actions, as appropriate:
9.4.3.1.1. If the correct detail obligation was recorded in the closed appropriation (prior to the closure of the appropriation), match the prior charge (disbursement) to the appropriate prior obligation in the closed appropriation and reduce the unliquidated balance of the closed appropriation. (There is no change in the unobligated balance of the closed appropriation.)

9.4.3.1.2. If the correct detail obligation was not recorded in the closed appropriation (before the closure of the appropriation), or otherwise has not been identified, make a memorandum record of the disbursement and reduce the unobligated balance of the closed appropriation. (There is no change in the unliquidated obligation balance of the closed appropriation.)

9.4.3.2. If the adjustment would exceed the unexpended balance or the unobligated balance of the closed appropriation, or any administrative subdivision thereof, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

9.4.4. Reverse the Erroneous Charge. If the disbursement was erroneously charged to an appropriation that is now current or expired, take the actions addressed in subparagraph 110904.D.1 to reverse the erroneous charge. If the disbursement was erroneously charged to an appropriation that is now closed, take the actions addressed in subparagraph 110904.D.2 to reverse the erroneous charge.

9.4.4.1. To correct an improper charge to the current or expired appropriation that previously was charged in error, adjust the records of the current or expired appropriation by taking one of the following two actions:

9.4.4.1.1. If a recoupment applies to a disbursement that either was matched erroneously to an obligation or remained unmatched, record a recoupment reversing the prior disbursement.

9.4.4.1.2. If the recoupment applies to a previous UMD, NULO, or in-transit disbursement for which an obligation or obligation adjustment was established IAW paragraph 110905, record the recoupment as an offset to the obligation or obligation adjustment and reverse the obligation or obligation adjustment.

9.4.4.2. To correct the improper charge to a closed appropriation that was previously charged in error, process a recoupment reversing the erroneous charge to the closed appropriation. Adjust the records of the closed appropriation by taking one of the following two actions, as appropriate:

9.4.4.2.1. If the recoupment applies to a disbursement that either was matched erroneously to the wrong obligation or remained unmatched in the accounting records (prior to the closure of the appropriation), record a memorandum recoupment offsetting the disbursement and increase the unliquidated obligation balance of the closed appropriation.
9.4.4.2.2. If the recoupment applies to a UMD, NULO, or in-transit disbursement for which the unobligated balance of the closed appropriation was reduced IAW paragraph 110905, record the memorandum recoupment as an offset to the previous decrease in the unobligated balance and increase the unobligated balance of the closed appropriation.

9.5 Posting Requirements – Unidentified Obligation (110905)

This paragraph describes the posting requirements when the correct obligation has not been identified within the specified timeframes (paragraphs 110501, 111401.B, 111404, and 111405). As stated in section 1104, obligations are to be established/adjusted, and/or unobligated balances reduced, as appropriate, for disbursements that have not been matched to the correct obligation.

9.5.1. Transactions in Closed Accounts

9.5.1.1. Unmatched Disbursements

9.5.1.1.1. Charge the closed appropriation in which the UMD resides by reducing the unobligated balance. Unobligated balances may be reduced either at the detail (individual) transaction or summary level.

9.5.1.1.1.1. If using the summary method to charge the closed appropriation, the supporting summary memorandum for the unobligated balance adjustment must be substantiated by detail transaction listings of each UMD that comprises the summary total amount.

9.5.1.1.2. If using the detail-level to charge the closed appropriation, each UMD being cleared must record a memorandum for the unobligated balance adjustment in the accounting record.

9.5.1.1.3. If, upon reducing the unobligated balance, the unobligated balance is exceeded at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

9.5.1.2. Negative Unliquidated Obligations

9.5.1.2.1. Charge the closed appropriation in which the NULO resides by reducing the unobligated balance. Unobligated balances may be reduced either at the detail (individual) transaction or summary level.

9.5.1.2.1.1. If using the summary method to charge the closed appropriation, the supporting summary memorandum for unobligated balance adjustment must be substantiated by detail transaction listings of each NULO that comprises the summary total amount.
9.5.1.2.1.2. If using the detail-level to charge the closed appropriation, each NULO being cleared must record a memorandum for the unobligated balance adjustment in the accounting record.

9.5.1.2.2. Increase the unliquidated obligation balance of the closed appropriation by memorandum entry.

9.5.1.2.3. If, upon reducing the unobligated balance, the unobligated balance is exceeded at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

9.5.1.3. In-Transit Disbursements

9.5.1.3.1. The unobligated balance of the cited closed appropriation must be reduced for overaged in-transit disbursements. Overaged in-transit disbursements must be charged in the same manner as UMDs as provided for in subparagraph 110905A.1.

9.5.1.3.2. If a disbursement transaction identifies a specific fund holder, that fund holder must provide the supporting accounting office with a memorandum obligation document. If the funds holder did not hold funds for the fiscal year charged, or a fund holder was not identified in the transaction record, the appropriation manager must designate a specific fund holder to take those actions required in subparagraph 110905A.1.

9.5.2. Transactions in Current and Expired Accounts

9.5.2.1. Unmatched Disbursements

9.5.2.1.1. The fund holders must charge the current or expired appropriation in which the UMD(s) resides by establishing a formal obligation for the UMD(s) in the appropriation. The impact should be a reduction of the unobligated balance. Obligations may be posted either at the detail (individual) transaction or summary level.

9.5.2.1.1.1. If the summary obligation method is used, such summary obligation amounts must be substantiated by detail transaction listings of each UMD making up the summary amount.

9.5.2.1.1.2. If posted at the document level, the fund holders must, record an obligation adjustment in the accounting records. Post the UMD being cleared against the adjusted obligation.

9.5.2.1.2. Increase the unliquidated obligation balance of the current or expired appropriation.

9.5.2.1.3. If, upon the fund holders recording the obligation, the obligated balance exceeds the funds available at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.
9.5.2.2. Negative Unliquidated Obligations

9.5.2.2.1. The fund holders must charge the current or expired appropriation in which the NULO resides by establishing a formal obligation adjustment for the NULO in the appropriation. The impact should be a reduction of the unobligated balance. Obligations may be posted either at the detail (individual) transaction or summary level.

9.5.2.2.1.1. If using the summary obligation method to adjust the NULO, the summary obligation balance adjustment must be substantiated by detail transaction listings of each NULO that total summary amount.

9.5.2.2.1.2. If posted at the document detailed level, the fund holders must increase the amount of the previously recorded obligation that the NULO matches by recording an obligation adjustment in the accounting records.

9.5.2.2.2. Increase the unliquidated obligation balance of the current or expired appropriation.

9.5.2.2.3. If, upon recording the obligation adjustment, the obligated balance exceeds the funds available at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

9.5.2.3. In-Transit Disbursements

9.5.2.3.1. Obligations must be established by September 30 for all in-transit disbursement transactions in appropriations scheduled to close at the end of the current fiscal year. Obligations for unresolved in-transit disbursement transactions must be recorded in the same manner as UMDs as provided for in subparagraph 110905A.1.

9.5.2.3.2. If a disbursement transaction identifies a specific fund holder, that fund holder must provide the supporting accounting office with an obligation document. If the fund holder did not hold funds for the fiscal year charged, or if a fund holder was not identified in the transaction record, the appropriation manager must designate a specific fund holder to take those actions required in subparagraphs 110905A.1 and 2.

9.5.3. Continue Research Efforts. The requirement to establish obligations for unresolved overaged UMDs, NULOs, and in-transit disbursements may not eliminate the need to complete the research and post the disbursement to the correct obligation. If continued research is required of the fund holder, research efforts must be continued until approval to discontinue research is obtained IAW section 1108.

9.6 Posting Requirements – Discontinued Research Approved (110906)

This paragraph describes posting requirements when required research is unsuccessful and discontinuance of further research is approved. The requirements addressed in paragraphs 110906.A – B must be applied when the actions in section 1107 have been completed and a request to discontinue further research has been submitted and approved IAW section 1108.
9.6.1. Approval Before the Expiration of the Specified Timeframes. If approval to discontinue further research occurs before the expiration of the timeframes specified in paragraphs 110501, 111401.B, 111404, and 111405; and amounts have not been obligated IAW the provisions of those paragraphs; obligations must be established by the fund holder IAW the provisions of those paragraphs for valid obligations incurred during the period of availability.

9.6.2. Approval After the Expiration of the Specified Timeframes. If approval to discontinue further research occurs after the expiration of the timeframes specified in paragraphs 110501, 111401.B, 111404, and 111405; and amounts have been obligated IAW the provisions of those paragraphs, no further obligation action is required.

10.0 CORRECTION/POSTING DISBURSEMENTS – WORKING CAPITAL FUNDS (1110)

10.1 General Requirements (111001)

Corrections and postings of disbursements in the Working Capital Funds (WCF) may require adjustments to both disbursements and expenses. This section cites general procedures for recording corrections of prior disbursements erroneously charged to the wrong obligation or otherwise erroneously posted. The procedures are stated in general terms in recognition of the numerous accounting systems, each of which has specific transaction identifiers and processing requirements.

10.2 Posting Requirements – Identified Obligation (111002)

Depending on the accounting system and access controls, fund holders may have to establish and adjust obligations. This paragraph describes corrections of prior disbursements or posting errors when the correct obligation has been identified.

10.2.1. To record a disbursement properly against an activity that should have been charged, adjust the records of the applicable activity by making one of the budgetary account adjustments as well as one of the propriety account adjustments.

10.2.1.1. Budgetary Account Adjustments

10.2.1.1.1. If a disbursement exceeds a prior obligation (i.e., created a NULO), an adjustment to the prior obligation is required. Therefore, increase the obligation previously recorded. Once a NULO is created, the Component is responsible for compliance with subparagraph 111003.A.2.

10.2.1.1.2. If a disbursement was made for which an obligation was not recorded previously, or otherwise has not been identified, an obligation is required. Therefore, record an obligation and match the disbursement to the obligation.
10.2.2. To correct the improper charge that was charged previously in error, adjust the records of the applicable activity by making one of the budgetary account adjustments addressed in subparagraph 111002.B.1 and one of the proprietary account adjustments addressed in subparagraph 111002.B.2:

10.2.2.1. Budget Account Adjustments

10.2.2.1.1. If a recoupment applies to a disbursement that either was matched erroneously to an obligation or remained unmatched, record a recoupment reversing the prior disbursement.

10.2.2.1.2. If the recoupment applies to a previous UMD, NULO, or in-transit disbursement for which an obligation or obligation adjustment was established IAW paragraph 111003, record the recoupment as an offset to the obligation or obligation adjustment and reverse the obligation or obligation adjustment.

10.2.2.2. Proprietary Account Adjustments

10.2.2.2.1. If it has been demonstrated that the correct proprietary account was charged previously in the correct amount, no further proprietary account adjustment(s) is required.
10.2.2.2. If the disbursement occurred in the current fiscal year, and the correct proprietary account and adjustment amount is known, make the required proprietary account adjustment(s).

10.2.2.3. If the disbursement occurred in a prior fiscal year, and a real property or depreciable property proprietary asset account was charged in error and now must be adjusted to relieve the erroneous charge, make the required proprietary account adjustment(s).

10.2.2.4. If the provisions of subparagraphs 111002.B.2.a – c are not applicable, record an “extraordinary gain” in the proprietary account in an amount that is equal to the amount of the obligation/obligation adjustment provided for in subparagraphs 111002.B.1.a or b, as applicable. This extraordinary gain must be recorded in the fiscal year that is current at the time that the obligation/obligation adjustment is made as addressed in subparagraphs 111002.B.1.a or b, irrespective of when the disbursement occurred.

10.3 Posting Requirements – Unidentified Obligation (111003)

Depending on the accounting system and access controls, fund holders may have to establish and adjust obligations. This paragraph describes posting requirements when the correct obligation has not been identified within the timeframes specified in paragraphs 110501, 111401.B, 111404, and 111405. Obligations or adjustments to obligations, as well as expenses, are to be established for disbursements that have not been matched to the correct obligation. These obligations or obligation adjustments and expenses are to be processed and recorded consistent with the requirements provided for in subparagraphs 111003.A.1.3.

10.3.1. Budget Account Adjustment

10.3.1.1. Unmatched Disbursements

10.3.1.1.1. UMDs must be obligated and expensed against the WCF activity where the UMD resides. (If a UMD has not been identified to a specific activity, it must be so assigned.)

10.3.1.1.2. Charge the activity in which the UMD resides by establishing a formal obligation. Obligations may be posted either at the detail (individual) transaction or summary level.

10.3.1.1.2.1. If using the summary obligation method to adjust the UMD, the summary obligation balance adjustment must be substantiated by detail transaction listings of each UMD combined in total that equal the summary amount.

10.3.1.1.2.2. If posted at the document (detail) level, record an obligation adjustment in the accounting records. Post the UMD being cleared against the adjusted obligation.
10.3.1.3. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

10.3.1.4. Record an extraordinary loss in the proprietary accounts in an amount equal to the amount of the UMD. This extraordinary loss must be recorded in the fiscal year that is current at the time that the obligation is made as addressed in subparagraph 111003.A.1, irrespective of when the disbursement occurred.

10.3.1.2. Negative Unliquidated Obligations

10.3.1.2.1. NULOs must be obligated and expensed against the WCF activity where the NULOs reside.

10.3.1.2.2. Charge the activity in which the NULO resides by establishing a formal obligation adjustment. Obligations may be posted either at the detail (individual) transaction or summary level.

10.3.1.2.2.1. If using the summary obligation method to adjust the NULO, the summary obligation balance adjustment must be substantiated by detail transaction listings of each NULO that total the summary amount.

10.3.1.2.2.2. If posted at the document (detail) level, increase the amount of the previously recorded obligation that the NULO matches by recording an obligation adjustment in the accounting records.

10.3.1.2.3. If, upon recording the obligation adjustment, the obligated balance exceeds the budgetary resources available at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

10.3.1.2.4. Record an extraordinary loss in the proprietary accounts in an amount equal to the amount of the NULO. This extraordinary loss must be recorded in the fiscal year that is current at the time that the adjustment is made as addressed in subparagraph 111003.A.2.b, irrespective of when the disbursement occurred.

10.3.1.3. In-Transit Disbursements

10.3.1.3.1. In-transit disbursements must be obligated and expensed against the WCF activity in which the transaction resides. If an activity is not identified in the transaction record, the DoD Component involved must designate a specific activity.

10.3.1.3.2. In-transit disbursements must be charged in the same manner as UMDs. Charge the activity in which the in-transit disbursements reside by establishing a formal obligation.
10.3.1.3.3. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

10.3.1.3.4. Record an extraordinary loss in the proprietary accounts in an amount equal to the amount of the in-transit disbursement. This extraordinary loss must be recorded in the fiscal year that is current at the time that the obligation is made as addressed in subparagraph 111003A.3.b, irrespective of when the disbursement occurred.

10.3.2. Proprietary Account Adjustments. Record an extraordinary gain in the proprietary account in an amount that is equal to the amount of the obligation or obligation adjustment provided for in subparagraphs 111003.A.1 – 3, as applicable. This extraordinary gain must be recorded in the fiscal year that is current at the time that the obligation or obligation adjustment is made as addressed in subparagraphs 111003.A.1 – 3, irrespective of when the disbursement occurred.

10.3.3. Continue Research Efforts. The requirement to obligate and expense UMD, NULOs, and in-transit disbursements that remain unmatched at the end of the timeframes specified in paragraphs 110501, 111401.B, 111404 and 111405 may not eliminate the need to complete the research and post the disbursement to the correct obligation. If continued research is required of the fund holder, then research efforts must be continued until approval to discontinue research is obtained IAW the requirements in section 1108.

10.4 Posting Requirements – Discontinued Research Approved (111004)

Depending on the accounting system and access controls, fund holders may have to establish and adjust obligations. This paragraph describes posting requirements when required research is unsuccessful and discontinuance of further research is approved. The requirements addressed in paragraphs 111004.A and B must be applied when the actions in section 1107 have been completed and a request to discontinue further research has been submitted and approved IAW section 1108.

10.4.1. Approval Before the Expiration of the Specified Timeframes. If approval to discontinue further research occurs before the expiration of the timeframes specified in paragraphs 110501, 111401.B, 111404, and 111405 and amounts have not been obligated and expensed IAW the provisions of those paragraphs, obligations and expenses must be established IAW the provisions of those paragraphs.

10.4.2. Approval After the Expiration of the Specified Timeframes. If approval to discontinue further research occurs after the expiration of the timeframes specified in paragraphs 110501, 111401.B., 111404, and 111405, and amounts have been obligated and expensed IAW the provisions of those paragraphs, no further obligation or expense action is required.
11.0 CORRECTION/POSTING DISBURSEMENTS – FOREIGN MILITARY SALES TRUST FUND (1111)

11.1 General Requirements (111101)

Corrections and postings of disbursements in the Foreign Military Sales (FMS) Trust Fund may require adjustments both to disbursements and charges to FMS cases or FMS surcharge accounts. This section cites general procedures for recording corrections of prior disbursements erroneously charged to the wrong obligation or otherwise posted erroneously. The requirements are stated in general terms in recognition of the numerous accounting systems, each of which has specific transaction identifiers and processing requirements.

11.2 Special Notification Requirements (111102)

11.2.1. If the accounting office has not been able to resolve the transactions within the timeframes specified in paragraph 110501 after discovery of the UMD or NULO condition, the transactions must be forwarded to the fund holder for resolution. For FMS, both the Defense Security Cooperation Agency (DSCA) and the fund holder must be involved in the resolution. Notify the fund holder that he or she must fund the transaction if the transaction is not properly matched within the specified timeframes. If required, prepare a draft case modification for DSCA countersignature.

11.2.2. Due to FMS case management requirements, disbursements and disbursement adjustments involving FMS funds must be coordinated with DFAS. DFAS will establish notification and approval procedures.

11.3 Posting Requirements – Identified Obligation (111103)

This paragraph describes corrections of prior disbursements or posting errors when the correct obligation has been identified.

11.3.1. To record a disbursement properly that previously was charged erroneously, adjust the records of the FMS case or FMS surcharge account that should have been charged by taking one of the following two actions:

11.3.1.1. If a disbursement exceeds a prior obligation (i.e., resulting in a NULO), an adjustment to the prior obligation is required. Therefore, increase the obligation previously recorded and match the disbursement to the adjusted obligation. Once a NULO is created, the Component is responsible for compliance with subparagraph 111103.A.2.

11.3.1.2. If a disbursement was made for which an obligation was not recorded previously, correction action must be taken in order to record the obligation or obligation adjustment to match the disbursement.
11.3.1.3. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

11.3.2. To correct an improper charge that was previously erroneously charged, adjust the records of the applicable FMS case or FMS surcharge account charged in error by taking one of the following two actions:

11.3.2.1. If a recoupment applies to a disbursement that was matched erroneously to an obligation, record a recoupment reversing the prior disbursement.

11.3.2.2. If the recoupment applies to a previous UMD, NULO, or in-transit disbursement for which an obligation or obligation adjustment was established IAW paragraph 111104, record the recoupment as an offset to the obligation or obligation adjustment and reverse the obligation or obligation adjustment.

11.4 Posting Requirements – Unidentified Obligation (111104)

This paragraph describes posting requirements when the correct obligation has not been identified within the timeframes specified in paragraphs 110501, 111401.B, 111404, and 111405. Obligations or obligation adjustments must be established for disbursements that have not been matched to the correct obligation and processed and recorded consistent with the procedures provided for in subparagraphs 111104.A – D.

11.4.1. Unmatched Disbursements

11.4.1.1. UMDs must be obligated against the FMS case or FMS surcharge account where the UMD resides. (If a UMD has not been identified to a specific FMS case or FMS surcharge account, it must be assigned to the FMS administrative surcharge account.)

11.4.1.2. Charge the FMS case or FMS surcharge account in which the UMD resides by establishing a formal obligation. Obligations may be posted either at the detail (individual) transaction or summary level.

11.4.1.2.1. If using the summary obligation method to adjust the UMD, the summary obligation balance adjustment must be substantiated by detail transaction listings of each UMD combined in total that equal the summary amount.

11.4.1.2.2. If posted at the document (detail) level, record an obligation adjustment in the accounting records. Post the UMD being cleared against the adjusted obligation.

11.4.1.3. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.
11.4.2. Negative Unliquidated Obligations

11.4.2.1. NULOs must be obligated against the FMS case or FMS surcharge account where the NULOs reside.

11.4.2.2. Charge the FMS case or FMS surcharge account in which the NULO resides by establishing a formal obligation adjustment. Obligations may be posted either at the detail (individual) transaction or summary level.

11.4.2.2.1. If using the summary method to charge the appropriation, the supporting summary memorandum for unobligated balance adjustment must be substantiated by detail transaction listings of each NULO that comprises the summary total amount.

11.4.2.2.2. If posted at the document (detail) level, increase the amount of the previously recorded obligation that the NULO matches by recording an obligation adjustment in the accounting records.

11.4.2.3. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available, at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

11.4.3. In-Transit Disbursements

11.4.3.1. In-transit disbursements must be obligated against the FMS case or FMS surcharge account in which the transaction resides. If an FMS case or FMS surcharge account is not identified in the transaction record, it must be assigned to the FMS administrative surcharge account.

11.4.3.2. In-transit disbursements must be charged in the same manner as UMDs. Charge the FMS case or FMS surcharge account in which the in-transit disbursements reside by establishing a formal obligation.

11.4.3.3. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available, at the level of ADA violation responsibility, report a potential ADA violation and initiate a preliminary investigation IAW Volume 14.

11.4.4. Continue Research Efforts. The requirement to obligate and expense UMD, NULOs, and disbursements in-transit that remain unmatched at the end of the specified timeframes specified may not eliminate the need to complete the research and post the disbursement to the correct obligation. If continued research is required of the fund holder, research efforts must be continued until approval to discontinue research is obtained IAW the procedures in section 1108.
11.5 Posting Requirements – Discontinued Research Approved (111105)

This paragraph describes posting requirements when required research is unsuccessful and discontinuance of further research is approved. The requirements addressed in paragraphs 111105.A and B must be applied when the actions in section 1107 have been completed and a request to discontinue further research has been submitted and approved IAW section 1108.

11.5.1. Approval Before the Expiration of the Specified Timeframes. If approval to discontinue further research occurs before the expiration of the timeframes discussed in paragraph 111104 and amounts have not been obligated and expensed IAW the provisions of that paragraph, obligations must be established IAW these provisions.

11.5.2. Approval After the Expiration of the Specified Timeframes. If approval to discontinue further research occurs after the expiration of the timeframes discussed in paragraph 111104 and amounts have been obligated and expensed IAW the provisions of that paragraph, no further obligation or expense action is required.

12.0 CORRECTIONS OF DISBURSEMENTS – MULTIPLE FUND TYPES (1112)

When correcting disbursement transactions that were erroneously charged to one fund type (e.g., appropriated fund) that should have been charged to another fund type (e.g., WCF or trust fund), apply the requirements for each fund type involved. For example, for a disbursement that was charged erroneously to an appropriated fund that should have been charged to a WCF, the recoupment to the appropriated fund must be processed IAW the applicable recoupment paragraph in section 1109, while the charge to the WCF should be processed IAW the applicable paragraph in section 1110.

13.0 CORRECTIONS REQUIRING NEW DISBURSEMENTS OR COLLECTIONS (1113)

13.1 General Requirements (111301)

When the correction requires a new disbursement or collection, process the corrective action IAW sections, 1109, 1110, 1111, or 1112, as applicable. If disbursement or collection does not involve a closed appropriation, process IAW the provisions of paragraph 111302. If the disbursement or collection involves a closed appropriation, process IAW paragraph 111303.

13.2 Current/Expired Appropriation or Working Capital/Trust Fund (111302)

For disbursements or collections that are chargeable to a current or expired appropriation, WCF, or trust fund:

13.2.1. Disbursement. When a new cash disbursement involves a current or expired appropriation, WCF, or trust fund, and a closed appropriation is not involved, process and record the disbursement IAW existing requirements for new disbursements for such accounts.
13.2.2. Collection. When a new cash collection involves a current or expired appropriation, WCF, or trust fund, and a closed account is not involved, process and record the collection IAW existing requirements for collections for such accounts.

13.3 Closed Appropriation (111303)

For disbursements or collections that are properly chargeable to a closed appropriation (except that the appropriation is closed):

13.3.1. Disbursement. When a new disbursement involves an amount that otherwise is properly chargeable to a closed appropriation except that the appropriation is closed, comply with the provisions of the closing accounts legislation (summarized in subparagraphs 110402.E – F).

13.3.1.1. Record and report the charge as a new obligation and a disbursement in a currently available appropriation that is available for the same purpose as the closed appropriation. If the obligation causes the cumulative one percent limit (identified in subparagraph 110402.F) to be exceeded, no disbursement can be made. The office funding the proposed payment (contract) must contact the appropriate Military Department Assistant Secretary (FM&C) or the Defense Agency Comptroller for referral to OUSD(C), P/B for appropriate disposition.

13.3.1.2. Adjust the records of the closed appropriation to reflect the new disbursement by taking one of the following two actions, as appropriate:

13.3.1.2.1. Reduce the unliquidated balance of the closed appropriation if the correct detail obligation was recorded in the closed appropriation prior to the closure of the appropriation. (There is no change in the unobligated balance of the closed appropriation.) Match the current charge (disbursement) to the appropriate prior obligation in the closed appropriation.

13.3.1.2.2. Make a memorandum record of the disbursement and reduce the unobligated balance of the closed appropriation if the correct detail obligation was not recorded in the closed appropriation prior to the closure of the appropriation. (There should be no change in the unliquidated obligation balance of the closed appropriation.)

13.3.1.3. The disbursement must not be issued if the adjustment required by subparagraphs 111303.A.2.a or b would exceed the unexpended balance of the closed appropriation, or if reducing the unobligated balance IAW the provisions of subparagraph 111303.A.2.b would result in a negative unobligated balance at the appropriation level.

13.3.1.4. If the disbursement is made, a potential ADA violation must be reported and a preliminary investigation initiated if the adjustments required by subparagraphs 111303.A.2.a or b (a) would not exceed the unexpended balance or the unobligated balance at the appropriation level, but (b) would exceed the unexpended balance or the unobligated balance of an administrative subdivision of the appropriation that has ADA violation responsibility.
13.3.2. Collection. When a new cash refund or other collection involves an amount that otherwise would be refunded or collected to a closed appropriation except that the appropriation is closed, comply with the provisions of the closing accounts legislation.

13.3.2.1. Deposit the collection to the Treasury miscellaneous receipt account.

13.3.2.2. Increase the unobligated or unliquidated balance of the closed appropriation, as appropriate, to reflect each refund or collection deposited into the Treasury account. Adjust the records of the closed appropriation to reflect the new refund or collection by taking one of the following two actions, as appropriate:

13.3.2.2.1. If the collection applies to an accounts receivable that had been established prior to the closure of the appropriation, record a memorandum collection offsetting the receivable and increase the unobligated balance of the closed appropriation.

13.3.2.2.2. If the collection applies to a disbursement that was not established as an account receivable prior to the closure of the appropriation, comply with the provisions of subparagraph 111303.B.

14.0 PROCESSING IN-TRANSIT DISBURSEMENTS (1114)

14.1 General Requirements (111401)

This paragraph addresses all in-transit disbursement transactions including interfund transactions and disbursements originating outside the Department.

14.1.1. All disbursements must be recorded and matched to their corresponding obligation records as promptly as current systems and business practices permit. Nevertheless, at any given time, a percentage of the Department’s disbursements may be in-transit from the disbursing office or entitlement activity to the applicable accounting office. Disbursements are considered in-transit disbursements when they have been reported by the disbursing office, through a paying center to Treasury and charged against the Department’s fund balances but:

14.1.1.1. Have not yet been received by the applicable accounting office;

14.1.1.2. Have been received by the applicable accounting office but not yet entered into the accounting office’s database; or

14.1.1.3. It has been determined that there is insufficient information to process.

14.1.2. The following timeframes are applicable for processing and obligating in-transit disbursement transactions:

14.1.2.1. In-transit disbursements must be processed and resolved IAW paragraphs 111404 – 111406.
14.1.2.2. Obligations must be established and recorded for all unresolved in-transit disbursement transactions no later than September 30 of the year that the cited appropriation is scheduled to be closed, regardless of the age of the transaction.

14.1.2.3. In-transit disbursement transactions that cite closed accounts must be processed IAW paragraphs 111404 – 111406. However, obligations for all such in-transit disbursements must be established and recorded no later than September 30 each year (notwithstanding the applicability of the requirements in subparagraph 111401.B.1).

14.1.3. In-transit disbursements must be properly certified. A thorough certification process helps to reduce disbursements with invalid accounting lines and result in fewer unresolved in-transit disbursements. Additionally, certification requirements should help to prevent erroneous payments. Responsibilities for obligating and reporting erroneous payments are delineated in Volume 5, Chapter 6.

14.1.4. Reject procedures described in paragraphs 111404 and 111405 apply to all transactions except the following:

14.1.4.1. Transactions originating outside the DoD.

14.1.4.2. Suspected fraudulent transactions must be reported immediately to the Defense Criminal Investigative Service.

14.1.5. All transactions related to travel advances and settlements, pay entitlements, and FMS must be rejected IAW paragraphs 111404 and 111405.

14.2 Reasons In-Transits Occur (111402)

14.2.1. In-transit disbursements generally occur when a disbursing office or entitlement activity and the applicable accounting office do not share the same accounting record database. As a result, the disbursing office or entitlement activity must transmit disbursement transactions and supporting information to the appropriate accounting office. Supporting information may be electronic or hardcopy.

14.2.2. An unresolved in-transit disbursement occurs when a disbursement is not matched to the correct obligation because either: (1) it cannot be or has not been routed to the correct accounting office, or (2) the accounting office does not have sufficient information to process the in-transit disbursement.

14.2.3. Once the applicable accounting office has received, and has sufficient information to allow it to attempt to match the disbursement with an existing obligation in its database, the disbursement is no longer considered to be an in-transit disbursement. Rather, the disbursement is treated as a matched disbursement, a UMD (when an obligation record is not found), or a NULO (when an obligation record exists but the disbursement amount exceeds the amount of the recorded obligation). When UMDs and NULOs result, manual intervention must be taken to research, obligate, and record the disbursement IAW sections 1104 through 1107.
14.2.4. Processing an in-transit disbursement transaction may involve the interaction of an entitlement activity, a disbursement office, a paying center, an accounting center, or an accounting office. The primary responsibilities of these activities are found in paragraph 110201.

14.2.5. Accounting and disbursing activities are responsible for monitoring in-transit disbursement activity and ensuring compliance with established in-transit policies. Specifically, accounting and disbursing activities must monitor and provide oversight to ensure that in-transit disbursements are processed and obligated in a timely manner consistent with approved policies.

14.3 Required Documentation (111403)

14.3.1. The applicable disbursing office or entitlement activity must use either electronic or hard copy-based processes to provide detailed supporting documentation (supplemental information) to the applicable paying center, accounting center, or accounting office. If adequate detailed accounting data is transmitted electronically, it is not necessary to forward paper copies unless specifically requested for a particular transaction.

14.3.2. The applicable disbursing office or entitlement activity must ensure that each in-transit disbursement transaction is supported by documentation that identifies the disbursing office and/or entitlement activity, cycle number, voucher number, appropriation/fiscal year, sub-allocation holder identifier, amount, accounting office code, obligation document number, and other information that identifies the obligation, as applicable.

14.3.2.1. An in-transit disbursement must be rejected to the disbursing office (or applicable center) immediately if the documentation/information in support of the in-transit disbursement:

14.3.2.1.1. Identifies a departmental code or basic symbol of a Component not serviced by the applicable center.

14.3.2.1.2. Identifies funds (e.g., an allotment serial number) not serviced by the accounting office.

14.3.2.1.3. Reveals that an in-transit disbursement is fraudulent. (Additionally, the Defense Criminal Investigative Service must be notified immediately.)

14.3.2.2. Requests for additional documentation/information must be made when one or more of the following conditions exist:

14.3.2.2.1. Detailed data (electronic or otherwise) is illegible or garbled, out-of-balance, or lacks sufficient detail to process.

14.3.2.2.2. Hard copy or electronically transmitted detailed data contains an invalid accounting citation.
14.3.2.2.3. The transaction amount on the automated cross-disbursement register does not agree with the amount on the voucher and/or supporting documentation.

14.3.2.2.4. The amount of summary charges reported to Treasury does not equal the detail reported by the paying offices.

14.3.2.3. Generally, requests for additional supporting documentation must be made to enable the proper matching of obligations and disbursements and must be limited to the requirements delineated in subparagraph 111403.B.

14.3.2.4. Requests for supporting documentation/information must be dated and made in writing (or other documented form of communication).

14.3.2.5. Disbursing offices or entitlement activities and accounting offices must communicate with and transmit supporting documentation directly to each other to minimize in-transit disbursement resolution and processing time.

14.4 Processing Cross-Disbursed In-transit Disbursements (111404)

Generally, a cross-disbursed in-transit disbursement transaction involves: (1) a disbursing office or entitlement activity, (2) a paying center, (3) an accounting center, and (4) an accounting office. Although paying and accounting centers monitor disbursement activity transmitted by entitlement activities and recorded by applicable accounting offices, disbursing offices or entitlement activities and accounting offices must communicate with and transmit supporting documentation directly to each other to minimize in-transit disbursement resolution and processing time.

14.4.1. If an accounting office cannot establish its accountability for the disbursement, the in-transit disbursement must immediately be rejected back to the accounting center.

14.4.2. If an accounting office determines that there is sufficient information to properly record a disbursement, the accounting office must match the disbursement with its corresponding obligation and record the disbursement. However, the following conditions may occur:

14.4.2.1. If the applicable obligation is not in the accounting database, the disbursement must be recorded as a UMD. The UMD must be resolved IAW sections 1104 through 1107.

14.4.2.2. If the applicable obligation is in the accounting database, but the amount of the disbursement exceeds the amount of the recorded obligation, the disbursement must be recorded as a NULO. The NULO must be resolved IAW sections 1104 through 1107.

14.4.3. If the accounting office determines that there is not sufficient supporting documentation to allow the disbursement to be matched to an obligation, the accounting office must request supporting documentation.
14.4.3.1. Immediately upon receipt (electronic or otherwise) of sufficient documentation from the disbursing office or entitlement activity, the applicable accounting office must attempt to match the disbursement with its corresponding obligation and record the disbursement.

14.4.3.2. If supporting documentation is not received within 5 days after the request, the accounting office must reject the in-transit disbursement. Transactions must be recorded as a UMD and researched.

14.4.3.3. Contact the correct accounting center (or the responsible DO if applicable). Forward the disbursement to that office, and document the action. Upon making a determination that accountability for a disbursement transaction belongs to another accounting office or that supporting documentation will not be provided, an accounting office must reject the disbursement transaction to its accounting center.

14.5 Additional Responsibilities for Resolving In-transit Disbursements (111405)

14.5.1. Ultimately, in-transit disbursements must be matched to an obligation by an accounting office or declared an erroneous payment by a disbursing office. IAW paragraphs 111404 and 111405, an in-transit disbursement transaction with supporting documentation must be transmitted to an accounting office as efficiently as feasible for recordation.

14.5.2. The following responsibilities apply for all in-transit disbursements:

14.5.2.1. Once an accounting office has sufficient supporting documentation (hard copy or electronic) to allow it to match an in-transit disbursement with an obligation, it must process the in-transit disbursement and treat it as a matched disbursement, UMD, or NULO. All UMDs and NULOs must be researched and obligated IAW sections 1103 through 1107.

14.5.2.2. If a disbursement is matched to a specific obligation, appropriation, funds holder or DoD Component; the accounting office, paying center, accounting center, disbursing office, or entitlement activity involved must work with the applicable office, center, funds holder and/or DoD Component to transfer the charge to the appropriate funds holder, appropriation manager or DoD Component (notwithstanding the actions required by subparagraph 111405.B.1). Any resulting UMD or NULO must be researched and obligated IAW sections 1103 through 1107.

14.5.3. DFAS Headquarters must monitor and maintain reports on all unprocessed in-transit disbursements, undistributed in-transit disbursements, or any other in-transit disbursements. Such reports must identify the applicable disbursing office, paying center, accounting center and accounting office, the amount, as well as appropriate corrective actions being taken. DFAS Headquarters also must ensure that in-transit disbursements are processed, resolved, obligated, or reported as erroneous payments IAW applicable provisions and within the applicable timeframes specified in this chapter.
15.0 REPORTING REQUIREMENTS (1115)

15.1 Data Collection Requirements (111501)

DFAS is responsible for collecting and consolidating data and reporting on the amounts and the status of UMDs, NULOs, and in-transit disbursements.

15.2 Monthly Reporting Requirements (111502)

The DoD Component accounting offices must transmit a status report identifying all disbursement transactions that have not been matched to an obligation to DFAS Headquarters on a monthly basis. DFAS will specify the format and detail reporting requirements.

16.0 RECORD RETENTION (1116)

DoD Components, and supporting accounting offices, must maintain an audit trail with adequate records to substantiate all transactions, amounts and actions taken with respect to the research and clearing of UMDs, NULOs, and in-transit disbursements. This includes, but is not limited to determinations that selected transactions meet the criteria for discontinuing further research, and detail and summary records of adjustments made IAW this chapter. Components must maintain these records to ensure an adequate audit trail and to respond to inquiries from organizations internal and external to the Department. See Volume 1, Chapter 9 for DoD policy on record retention.

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue and underlined font.

CHAPTER 12

1.0 OVERVIEW (1201)

1.1 Purpose (120101)

This chapter establishes departmental policy and basic procedures to be followed with respect to the use of the authority of Section 3732, Revised Statutes (41 U.S.C. 11). That statute authorizes the Military Departments to incur obligations for specific purposes in excess of appropriations available.

1.2 General (120102)

1.2.1. Title 41, United States Code, section 11, authorizes the Military Departments to incur obligations in excess of available appropriations in procuring or furnishing clothing, subsistence, forage, fuel, quarters, transportation, or medical and hospital supplies not to exceed the necessities of the current fiscal year.

1.2.2. Title 10, United States Code, section 2204, requires the Secretary of Defense to approve scheduled rates of obligations of funds appropriated to the Department for the purpose of restricting obligations and expenditures as may be necessary to prevent overdrafts and deficiencies in any fiscal year for which appropriations are made. Section 2204 does not prohibit the Department from incurring a deficiency as separately authorized by law.

1.2.3. Volume 14 (which implements 31 U.S.C. 1517(a)) establishes the basic system of controls and other fundamental requirements for the administration of appropriations and funds. The system of administrative controls was designed to (1) restrict obligations and expenditures against appropriations and funds to the amounts available therein or to the amounts apportioned, and (2) enable officials to fix responsibility in the officers and employees of the Department who may violate any provision of the law or regulation.

2.0 POLICY AND PROCEDURES (1202)

2.1 Urgent Circumstance (120201)

The Department shall limit its use of the authority in 41 U.S.C. 11 to emergency circumstances. The exigencies of those circumstances must be such that immediate action is imperative and action cannot be delayed long enough to obtain sufficient funds to cover the procurement or furnishing of those items in paragraph 120102.A needed for the current fiscal year. In determining the urgency of the circumstances, due consideration shall be given in each specific case to the feasibility of obtaining funds by use of telephones, facsimile machines, or other electronic means. The authority of 41 U.S.C. 11 shall not be used to circumvent the provisions of 31 U.S.C. 1517(a).
2.2 Condition and Circumstance (120202)

It is not considered practicable to define specifically the conditions and circumstances which conceivably could constitute an emergency. Each instance in which the authority of 41 U.S.C. 11 is to be used must be determined on a case-by-case basis in accordance with the policy guidelines in this chapter.

2.3 Administering Funds (120203)

Funds shall be administered in accordance with the system of administrative controls established by Volume 14 of this Regulation in such a manner that officials, responsible for administering each appropriation, allocation, allotment, and other fund subdivisions, may take timely action to prevent over-obligation of any fund subdivision, notwithstanding 41 U.S.C. 11.

2.4 Over-obligation (120204)

Over-obligation of any appropriation or fund subject to apportionment, or any subdivision thereof for procurement or furnishing of those items in paragraph 120102.A. shall be deemed to be a violation of the Anti-deficiency Act. There are two exceptions: (a) If the over-obligation was made in emergency circumstances in accordance with the spirit and intent of provisions set forth above, and (b) if such procurements are not in excess of the necessities to relieve the period of emergency. However, for the second exception, the necessities for such period cannot exceed the necessities of the current fiscal year.

2.5 Valid Requirements (120205)

Proposed or anticipated use of 41 U.S.C. 11 authority to incur obligations shall be reported, in advance when feasible, through financial management channels. When it is necessary to create or authorize an over-obligation for the purposes set forth in 41 U.S.C. 11, the individual responsible shall determine, and so certify in writing, that all three of the following circumstances existed:

2.5.1. An emergency existed within the spirit and intent of this section (1202).

2.5.2. The purpose for which the over-obligation was created or authorized was to meet other necessities of the period involved.

2.5.3. It was not feasible to obtain in advance sufficient funds to cover such necessities.

2.6 Certification of Over-obligation (120206)

Such certification shall indicate the amount of the over-obligation and shall be filed with the supporting records of the appropriation, allocation, or allotment involved. The over-obligation shall be disclosed fully in the fiscal reports to the next higher level of command, indicating that the over-obligation was incurred under authority of 41 U.S.C. 11.
2.7 Authorization (120207)

Having exercised the authority of 41 U.S.C. 11 pursuant to this chapter, the individual responsible shall advise the next higher level of command immediately and take appropriate steps to obtain additional funds.

2.8 Reporting Procedures (120208)

All obligations incurred under authority of 41 U.S.C. 11 shall be reported through command channels to the applicable Military Department Comptrollers who shall provide a draft 41 U.S.C. 11(b) congressional report to the Office of USD (Comptroller).
VOLUME 3, CHAPTER 13: “RECEIPT AND DISTRIBUTION OF BUDGETARY RESOURCES – DEPARTMENTAL-LEVEL”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated November 2015 is archived.

CHAPTER 13

RECEIPT AND DISTRIBUTION OF BUDGETARY RESOURCES
DEPARTMENTAL-LEVEL

1.0 GENERAL

*1.1 Overview

Some Department of Defense (DoD) Components, such as the Military Departments, are structured into three or more levels or echelons. Direct appropriation budget authority in the General Fund is initially recorded at the Departmental level (e.g., Headquarters) and subsequently issued to intermediate level organizations (e.g., major commands), which, in turn, distributes the budget authority to execution level (field level) organizations for program execution.

1.2 Purpose

This chapter prescribes the standards for recording the receipt and subsequent distribution of budgetary resources in the departmental level (department, headquarters, or the Office of the Secretary of Defense (OSD) budgetary accounts. Departmental level accounting covers appropriation by Congress, apportionment and reapportionment by the Office of Management and Budget (OMB), and allotment to the intermediate or execution level. In addition, budgetary accounts used at the departmental level ensure that transfers between appropriation and fund accounts, and restorations and withdrawals of budgetary resources are properly recorded. Accounting at the departmental level also facilitates monitoring of lower levels and consolidating reports for higher levels. See Chapter 14 for intermediate level requirements, and Chapter 15 for execution level requirements.

*1.3 Authoritative Guidance

The financial management policy and related requirements prescribed in this chapter are in accordance with the applicable provisions of the following authoritative sources:

1.3.2. OMB Circular A-11, “Preparation, Submission, and Execution of the Budget.”

1.3.4. TFM United States Standard General Ledger (USSGL).

1.3.5. Department of Defense United States Standard General Ledger (DoD USSGL) Transaction Library.
1.3.6. DoD Standard Chart of Accounts (*SCOA*).

2.0 DEFINITIONS

2.1 Departmental Level

Involves recording receipt and distribution of budgetary resources at the department level, headquarters, or OSD level as discussed in this chapter.

2.2 Intermediate Level

Involves recording receipt and distribution of budgetary resources using the intermediate level accounts as discussed in Chapter 14. An example of the intermediate level would be a Command within a Military Department that has received the initial funding.

2.3 Execution Level

Involves recording receipt and distribution of budgetary resources using the execution level budgetary accounts discussed in Chapter 15.

3.0 STANDARDS

*3.1 Accounts

3.1.1. DoD SCOA (see Volume 1, Chapter 7), which includes the DoD Standard General Ledger accounts established for use at the department level.

3.1.2. DoD USSGL Transaction Library, which includes the budgetary and proprietary accounting entries established for use at the department level.

3.1.3. DoD Accounting Scenarios include two Internal Fund Distribution scenarios, “TI-097 General Funds” and “Military Department General Funds,” that identify the posting logic and appropriate accounts for recording the issuance and closure of budgetary resources at all three levels (Departmental, Intermediate and Execution).

3.2 Appropriations

3.2.1. Appropriations represent legal authority granted by Congress to incur obligations (see subparagraph 3.2.1.5 for an exception), and to make payments from the Treasury for specified purposes. An appropriations act is the most common form of budget authority; and the making of an appropriation must be expressly stated and may not be inferred or made by implication. Appropriations are available for obligation based on varying characteristics specific to periods of availability, phases of availability, and amounts.

3.2.1.1. Period of Availability. The period of time in which budget authority is available to incur new obligations. Congress establishes the period of availability.
3.2.1.1.1. **One-Year (Annual) Authority.** Budget authority that is available for obligation only during a specified fiscal year and expires at the end of that period. For example, most Operations and Maintenance (O&M) and Personnel appropriations.

3.2.1.1.2. **Multiple Year (Multi-Year) Authority.** Budget authority that is available for obligation for a specified period of time in excess of one fiscal year. Usually, the period covers two or more whole fiscal years, but it may cover a period that includes part of the second fiscal year. For example, Research, Development, Test, and Evaluation appropriations (2 years); Procurement appropriations (3 years); Shipbuilding and Conversion, Navy appropriation (5 years); Military construction appropriations (5 years).

3.2.1.1.3. **Budget Authority that remains available for obligation indefinitely.** See paragraph 3.9.

3.2.1.1.4. **Earmark.** An earmark occurs when Congress designates a portion of an appropriation for a particular purpose by way of legislative language within the appropriation.

3.2.1.2. **Phases of Availability.** Annual and multi-year appropriations pass through three phases of availability.

3.2.1.2.1. **Current or Unexpired Phase.** The current or unexpired phase is the time period when the budget authority is available for incurring new obligations, making new grants, signing new contracts, and making disbursements to liquidate the obligations. The current or unexpired phase continues for the set period of availability. No-year authority remains current until fully obligated and disbursed, or returned to the general fund of the Treasury.

3.2.1.2.2. **Expired Phase.** The expired phase is the period of time when the appropriations are no longer available to incur new obligations, but are still available to adjust and liquidate existing and valid obligations. The appropriation remains in the expired phase for 5 years, although the expired period can be lengthened by legislation. See Chapter 10 for accounting requirements for expired accounts.

3.2.1.2.3. **Cancelled Phase.** The cancelled phase follows the expired phase. Payments cannot be made from a cancelled appropriation. On September 30 of the fifth fiscal year after the period of availability for obligation of a fixed appropriation account ends, the account must be closed and any remaining balance (whether obligated or unobligated) in the account must be cancelled and thereafter must not be available for obligation or expenditure for any purpose. After an appropriation is cancelled, any obligation or adjustments to obligations that properly would have been chargeable to that appropriation may be paid from an unexpired appropriation that is available for the same purpose as the cancelled account if:

3.2.1.2.3.1. The obligation or obligation adjustment is not already chargeable to another unexpired account.
3.2.1.2.3.2. The payment of obligations against the cancelled appropriation from the unexpired appropriation does not exceed an amount equal to one percent of the total appropriation per 31 U.S.C. § 1553. See Chapter 10 for accounting requirements for closed/cancelled accounts.

3.2.1.3. **Determination of Amount.** Budget authority may be granted for varying amounts, based on the legislative language, which defines the budget authority purpose.

3.2.1.3.1. **Definite Authority.** Authority that is stated as a specific sum at the time it is granted. This includes authority stated as not to exceed a specified amount. Most DoD appropriations are for definite amounts of authority.

3.2.1.3.2. **Indefinite Authority.** Authority for which a specific sum is not stated, and instead specifies a variable factor that determines the amount, or a floor, for example, not less than a specified amount. An indefinite appropriation may appropriate all or part of the receipts from certain sources, the specific amount of which is determinable only at some future date, or it may appropriate such sums as may be necessary for a given purpose. See paragraph 3.9.

3.2.1.4. **Reappropriations.** Statutory authorities that extend the availability, whether for the same or different purposes, of all or part of the unobligated portion of budget authority that has expired or would otherwise expire. See paragraph 3.6.

3.2.1.5. **Exceptions.** Appropriations to liquidate contract authority are exceptions to the general rule that appropriations provide budget authority to incur additional obligations. Contract authority itself is not an appropriation. It is apportioned budget authority which can be legally obligated and may be used only for the purpose, time, and amount specified by statute relating to that contract authority. It is not funded and is apportioned and allocated without a supporting Treasury cash balance. Contract Authority must always be replaced or liquidated by subsequent or other budgetary resources and cash balances, more commonly within the Defense Working Capital Fund (DWCF), by offsetting collections credited to the DWCF. In addition, the subsequent liquidating appropriation does not grant authority to incur obligations and, therefore, is not budget authority. (See subparagraph 3.4.2 for additional information).

3.2.1.6. **Continuing Resolution (CR).** CRs are joint resolutions that provide continuing appropriations for a fiscal year. CRs are enacted when the Congress has not yet passed new appropriation bills and a program's appropriations are about to or have expired, or when the President has vetoed congressionally passed appropriations bills. CRs do not appropriate specific sums of money. A CR makes amounts available subject to the same terms and conditions specified in the enacted appropriations acts from the prior fiscal year. The CR may also establish additional terms and conditions. CRs make amounts available for obligation only until a time specified by the CR or until the enactment of regular fiscal year appropriations, whichever is sooner. See OMB Circular A-11, Section 123 for detail information on requirements, definitions, and formulas for calculating amounts available.

3.2.1.7. **Funding Lapse or Gap.** A lapse in an agency’s appropriations occurs when Congress fails to enact regular appropriations, a CR, or needed supplemental appropriations.
3.2.1.8. **Appropriation Warrants.** The evidence of Congressional action to fund programs. An appropriation warrant is the official document issued pursuant to law by the Secretary of the Treasury, upon enactment of an appropriation, that establishes the amount and period of availability of monies the agency is authorized to withdraw from the General Fund of the United States Government.

3.2.1.8.1. Warrants are processed using the Agency Transaction Module (ATM) within the Central Accounting Reporting System (CARS). The ATM provides access for Treasury to prepare and process warrant transactions. The Treasury processes warrants by submitting the FS Form 6200, “Department of the Treasury Appropriation Warrant,” through the ATM within CARS. The agency must provide additional information when the legislative language does not allocate amounts to specific accounts.

3.2.1.8.2. Under a CR, warrants are not issued until Congress enacts the regular appropriation bill, unless agencies are under a long term, or full year CR. Warrants may also be issued under a CR if the CR covers specific mandatory federal payments, or when the CR covers the entire year (see TFM Volume 1, Part 2, Chapter 2000). The Military Departments and the Washington Headquarters Services (for OSD/Defense Agencies) must request a warrant from Treasury for the annualized level of an amount appropriated by a CR. If a subsequent CR changes the annualized level, agencies must submit a new warrant request. When Congress enacts the regular appropriation bill, Treasury will make any necessary adjustments to those amounts.

3.2.2. **Classification of Appropriations.** Departmental level appropriations and all other budgetary resources must be classified by appropriation account, fiscal year program, and obligation/expenditure limitation at the level required by OSD for appropriation and fund status reporting (see Volume 6A, Chapter 4). Needed classification requirements must be obtained from the legal requirements and program/budget documents such as the DD 1414, “Base for Reprogramming Action.” Appropriations are classified in different ways for different purposes, generally based on time period limitations, spending limitations, authorized programs, activities, or objects, and the availability to incur obligations. Departmental level appropriations, and all other budgetary resources, are represented by an appropriation account symbol. Detailed information on reading and identifying account symbols is contained in the TFM, Volume 1, Part 2, Chapter 1500. Specific accounts for each agency are listed in Treasury’s “Federal Account Symbols and Titles,” issued quarterly as a supplement to the TFM.

3.2.3. **Recording an Appropriation.** Appropriations, until apportioned, are not available as a financing source or budgetary resource. They should be recognized in capital as "unexpended appropriations" (and among assets as "funds with Treasury") when made available for apportionment, even if a Treasury Warrant has not yet been received, or the amount has not been fully apportioned. Unexpended appropriations should be reduced for appropriations used and adjusted for other changes in budgetary resources, such as rescissions and transfers. The net increase or decrease in unexpended appropriations for the period should be recognized as a change in net position. See the Federal Accounting Standards Advisory Board Handbook, Statement of Federal Financial Accounting Standards 7, “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting.”
3.3 Apportionments and Reapportionments

3.3.1. An apportionment is an OMB-approved plan to use budgetary resources, in accordance with the terms defined by the statutory authority of 31 U.S.C. § 1513(b); Executive Order 11541, which limits the obligations for specified time periods, programs, activities, projects, objects, or any combination thereof. An apportionment is legally binding, and obligations and expenditures (disbursements) that exceed an apportionment are a violation of, and are subject to reporting under, the Antideficiency Act (31 U.S.C. § 1517(a)(1), (b)). Reapportionments are made to make changes to the previously approved apportionment for the current year. For example, a reapportionment should be requested when approved apportionments are no longer appropriate or applicable because the amounts available for obligation have increased or unforeseen events have occurred. The distribution of apportionments and reapportionments is part of an overall financial plan for the year that is based on a forecast of obligations to be incurred within an appropriation. The apportioned amount is in response to a departmental request made on the OMB Standard Form (SF) 132, “Apportionment and Reapportionment Schedule,” in accordance with OMB Circular A-11, Appendix F.

3.3.2. The SF 132 contains two general sections to record apportionments and reapportionments: Budgetary Resources and Application of Budgetary Resources. Under Budgetary Resources, the actual and anticipated resources, as well as actual and anticipated reductions to those resources are recorded. Under the Application of Budgetary Resources, the intent for use of those resources, whether by fiscal quarter, activity, project, object, or a combination thereof, are recorded. In some cases, letter apportionments are used. Letter apportionments are most often used during the period of a CR, or for special circumstances such as transfers that occur near the end of a fiscal year.

3.3.3. Budgetary authority received and available for allotment, and anticipated reimbursements are also recorded on the SF 132. Apportioned, anticipated amounts should not be allotted unless there is a reasonable assurance that such items will be collected and deposited to the credit of the appropriation or fund account that incurred the obligation.

3.3.4. Apportionments should not be obligated until the amounts have been allotted in accordance with the OMB-approved funds control regulations; and programs must be apportioned and executed in accordance with all applicable laws. The authorization and appropriation act language describes the purpose of the programs, and includes guidance to execute the programs. The apportionment dictates how to execute the programs, and must be obligated or expended against the fiscal year in which they were incurred so that they can be reconciled to the legal period of availability. In some cases, apportionments may set aside all or a portion of the amounts available for obligation, through the process of being deferred, or if they are withheld pending rescission.

3.3.5. If SFs 132 on hand are not yet processed with regard to the latest appropriations enacted, amounts necessary to cover valid commitments and obligations must be recorded at the end of the accounting period as apportioned and allocated. An enacted supplemental appropriation must be recorded as fully apportioned even if it is not included on the year-end SF 132.
3.3.6. In the absence of an appropriation, the Congress may pass a resolution providing authority for agencies to continue current operations. CRs are subject to OMB apportionment in the same manner as appropriations. Within periods of CR authority, the President’s budget estimates of the unobligated balances are brought forward on October 1, and the reimbursable program for each appropriation account must be recorded as apportioned and allotted to the extent that they remain within any amount specifically designated by the authority. If the estimates for each amount have been reduced from the President’s budget, apportionments and allotments must be recorded at the reduced amount. Increases are to be considered available for subsequent apportionment and must not be allotted until an approved SF 132 containing the increase is received. Normally, OMB will automatically apportion funds made available by a CR without requiring an SF 132.

3.3.7. If amounts actually becoming available are less than anticipated for indefinite budget authority, transfers, reimbursements, or recoveries; the difference will be deducted from amounts apportioned and not from amounts deferred or otherwise unapportioned unless specific provision is made for a different treatment on the approved apportionment form or reapportionment action is taken. In accordance with OMB circular No. A-11 (Section 120), downward adjustments of any amount to budgetary resources (including anticipated amounts) do not need to be reapportioned, unless specifically required by OMB or, at the agency’s discretion. A reapportionment must be requested when approved apportionments are no longer appropriate or applicable because the amounts available for obligation have increased or unforeseen events have occurred.

3.3.8. Not all appropriations are apportioned. In such cases, the non-apportioned budgetary resources are reported as either withheld pending rescission, deferred, as an unapportioned balance of a revolving fund, or exempt from apportionment.

3.4 Contract Authority – Other Budgetary Authorizations

3.4.1. Congress finances federal programs and activities by providing budgetary authority, which allows agencies to enter into financial obligations that will result in immediate or future outlays of government funds. As defined by the Congressional Budget Act, budget authority includes other authorizations aside from appropriations, which are contract authority, borrowing authority, and spending authority from offsetting collections.

3.4.2. Contract authority permits an agency to incur obligations in advance of an appropriation. Congress provides contract authority in an authorizing statute to allow agencies to incur obligations in anticipation of the collection of receipts or offsetting collections that will be used to liquidate the obligations. However, within DoD, the realization of revenue, rather than an appropriation, normally is used to liquidate unfunded contract authority. Contract authority may be current or permanent, with or without fiscal year limitation, and definite or indefinite in amount. In accordance with 41 U.S.C. § 6301, an agency may not make expenditures to liquidate obligations incurred by its contract authority until funds are specifically appropriated or otherwise become available for payment of the obligations. Contract authority has a period of availability corresponding to that of an appropriation. Unless otherwise specified, if it appears in an appropriation act in connection with a particular appropriation, its period of availability will be the
same as that for the appropriation. If it appears in an appropriation act without reference to a particular appropriation, its period of availability, unless otherwise specified, will be the fiscal year covered by the appropriation act.

3.4.2.1. **Definite.** Definite contract authority represents the amount of new authority prescribed by law and effective during the reporting fiscal year. Authority is considered definite when the language provides a ceiling, that it is not to exceed a specified amount.

3.4.2.2. **Indefinite.** Indefinite contract authority represents the amount of new obligations incurred in the reporting fiscal year covered by contract authority. Indefinite contract authority is contract authority in which a specific amount of contract authority is not predetermined but is available as needed to cover the obligations incurred. Although indefinite contract authority is normally accounted for through a no-year appropriation account, contract authority must be apportioned each fiscal year.

3.4.2.3. **Current.** Current authority requires congressional appropriations action on the request for new budget authority for the year involved.

3.4.2.4. **Permanent.** Permanent authority becomes available pursuant to standing provisions of law without further appropriations action by the Congress after transmittal of the budget for the year involved. Permanent indefinite authority is open ended as to both period of availability and amount. Examples include 31 U.S.C. § 1304, Payment of Certain Judgments Against the United States, and 31 U.S.C. § 1322(b)(2), Refunding Amounts Erroneously Collected and Deposited in the Treasury. Guidance on emergency military procurement can be found in 41 U.S.C. § 6301 and the Federal Acquisition Regulation (also see Volume 10 for contract policy). Working Capital Fund contract authority and guidance can be found in Chapter 19, and foreign military sales contract authority can be found in Volume 15.

3.5 **Transfer of Funds**

When authorized by law, budgetary authority may be withdrawn from one appropriation account and credited to another, or to a working fund. Depending on the circumstances, the transfer may be recorded as an expenditure transfer, which means a transfer that involves an outlay, or as a nonexpenditure transfer, which means a transfer that doesn't involve an outlay. Transfers may be the result of planned reorganizations, the need for funding authorizations by Congress in lieu of appropriations, a situation where the purpose of the funding has changed, or when unobligated balances are the result of legislations that changed the purpose for which the balances are available. Transfers between appropriations must be authorized by law and represent a redistribution of unobligated balances of budget authority between appropriation accounts for the benefit of the gaining appropriation account.

3.5.1. **Anticipated Transfers.** Appropriation transfers can be anticipated and recorded as such or they can occur without being previously recorded as anticipated. An anticipated appropriation transfer does not provide any obligation authority. These transfers often are anticipated during apportionment development. Approved anticipated transfers are treated as authority available for apportionment, and prior year authority and current year authority are kept...
An agreement between the transferring and receiving appropriation accounts must be maintained. Accordingly, anticipated and accomplished transfers must be recorded and reported in the transferring and receiving appropriation accounts in the same accounting period. Obligation authority is available only after the transfer is accomplished and OMB apportions the transferred funds. Once the transfer is accomplished, the appropriation making the transfer no longer has budgetary and proprietary control of the funds. Budgetary and proprietary responsibility now lies with the appropriation receiving the transfer.

3.5.2. Expenditure Transfers. Expenditure transfers are typically made when the transfer benefits the transferring account. An expenditure transfer is recorded as an obligation and an outlay in the transferring account, and as an offsetting collection or offsetting receipt in the receiving account. An example of this type of transfer is a rental payment to General Services Administration’s Federal Buildings Fund. Since expenditure transfers are treated as payments and collections, they are not applicable to departmental level accounting entities. These transactions include the following:

3.5.2.1. Withdrawals and credits between accounts not specifically defined as nonexpenditure transactions.

3.5.2.2. All transfers between Treasury budgetary and nonbudgetary accounts such as general fund accounts and deposit accounts.

3.5.2.3. Adjustments to correct errors in expenditure transactions. (Obligations must be transferred, when appropriate).

3.5.3. Nonexpenditure Transfers. A nonexpenditure transfer is recorded as a decrease in budget authority or unobligated balances in the transferring account, and as an increase either in budgetary authority or unobligated balances in the gaining account. The transferring account for a nonexpenditure transfer reports a transfer out of budget authority. The receiving account reports a transfer in. Nonexpenditure transfers are processed using the ATM within CARS. Additional guidance on the CARS ATM application can be found in the TFM, Volume 1, Part 2, Chapter 2000. The SF 1151, Nonexpenditure Transfer Authorization, is used to document transfers. See Chapter 3 for more detailed information about appropriation transfer authorities.

3.5.3.1. Estimates. A transfer of estimates is a proposal to stop funding an activity through one budget account, and begin funding it through another account. It does not involve a transfer of budgetary resources between the accounts. This type of transfer typically relates to the transfer of funding of an activity from one account to another, the consolidation of funding for related activities from two or more accounts into one single account, or the separation of funding for an activity from one account between two or more accounts. When a transfer for the budget year results in a significant increase to or decrease from the amount of budgetary authority for the past or current year, footnotes must be included to explain the transfer after the program and financing schedule.

3.5.3.2. Allocation. An allocation is a delegation, authorized by law, by one agency to another, of its authority to obligate budget authority and outlay funds. Allocation
accounts involve both an appropriation, and a recipient of budgetary resources, through an allocation nonexpenditure transfer.

3.5.4. Reprogramming. Reprogramming involves the shifting of funds within an appropriation for purposes other than those contemplated at the time of appropriation. There are two types of reprogramming actions:

3.5.4.1. Below Threshold Reprogramming Action. This action provides DoD Components with the discretionary flexibility to realign, within prescribed limits, and congressionally approved funding to satisfy unforeseen, higher priority requirements. Chapter 6 provides more information on below threshold reprogramming actions.

3.5.4.2. Prior Approval Reprogramming Action. This action requires prior notification and approval of Congressional Committees prior to implementation and may allow for the shifting of budgetary resources between two treasury accounts. Chapter 7 provides definitions, procedures, and criteria for prior approval reprogramming actions.

A transfer is distinguished from a reprogramming in that a reprogramming involves the shifting of budgetary resources within a Treasury account whereas a transfer involves the shifting of budgetary resource between two Treasury accounts. However, the shifting of budgetary resources within a single Treasury account should be considered a transfer if the action moves budgetary resources between separate statutory appropriations.

3.6 Reappropriations

3.6.1. Reappropriation Action. A reappropriation is a congressional action to continue the availability, whether for the same or different purposes, of all or part of the unobligated portion of current budget authority that has expired or would otherwise expire.

3.6.2. Recording Reappropriations. Reappropriations of expired balances that are newly available for obligation in the current or budget year are recorded as new budget authority in the year they are newly available, in the full amount of the potential extension. Likewise, reappropriations of amounts that would expire before the legislation takes affect are treated as new budget authority. If the available balance in a losing appropriation is not sufficient to cover the transfer, the reappropriation may be delayed, effected in part or, not made at all. Decisions to delay or not make a reappropriation transfer require written notification to the Under Secretary of Defense (Comptroller) (USD(C)), within five working days of the determination. The notification must set forth the circumstances requiring the delay or nonperformance of the reappropriation transfer.

3.6.3. Reappropriation Warrants. Reappropriations that provide funds to a fiscal year for which they were not previously available constitute new budget authority in the receiving account, and therefore require a Treasury Warrant. The warrant request letter must state the amount to be warranted and the statutory authority for the reappropriation. The TFM Volume 1, Part 2, Chapter 2000 identifies the address for submission and other contact information. Warrants are processed.
using the ATM within the CARS. Additional information on the ATM can be found on the Treasury, *CARS Frequently Asked Questions* site.

3.6.4. **Reappropriation Balance Transfers.** Reappropriations of unexpired balances or reappropriations of expired balances that cannot take effect until a fiscal year beyond the budget year are reported as balance transfers in the year they are newly available for obligation. Reappropriation transfers are processed using the ATM within CARS.

3.6.5. **Unobligated Balances.** Normally, unobligated balances in the losing accounts will be withdrawn from operating activities. However, formal withdrawal is not necessary when the operating activity has both the gaining and losing accounts, and the intent of the reappropriation is to extend the availability of funds for the same purposes as the losing account. In this case, local entries may be made to ensure that transactions, records, and reports cite the gaining account rather than the losing account.

3.7 **Internal Fund Distributions**

3.7.1. Apportionments are subdivided and formally distributed by allotment, suballotment, allocation, and suballocation. See Volume 14, Chapter 1 for detailed information on the subdivision levels and requirements in accordance with OMB Circular A-11, Appendix H. The departmental level accounting entity distributes funds to an operating agency or other intermediate level accounting entity.

3.7.2. Any formal subdivision of funds must contain at least the same statutory and other limitations applicable to the original apportionment.

3.7.3. The intermediate level budgetary accounts are used to record the receipt of suballotments, allocations, or suballocations from higher authority, and the subsequent issuance to execution level activities. Definitions and use for accounts 454000 through 458000 are prescribed in the DoD SCOA located on the Standard Financial Information Structure (SFIS) resources web page.

3.7.4. The formal distribution of funds must be in writing. See Volume 14, Chapter 1, paragraph 010206 for the required information; and expedited communication methods used in emergencies. The format is determined by the departmental level accounting entity issuing the funds.

3.7.5. Interagency suballotments/allocations/suballocations are distributions of one agency’s budgetary resources to another. They are separately identified in the accounts to ensure that the recipient agency is responsive to the issuing agency. Such distributions can be nonexpenditure transfers, which establish transfer appropriation accounts, or subdivisions of one DoD Component’s funds to another DoD Component to cite directly. From a consolidated standpoint, it is important that the issuing and receiving agencies record the distribution in the same accounting period. Interagency distributions normally occur between different levels of command within a major command/claimant. See Chapter 15, subparagraph 150302.D for execution level policy.
3.8 Withdrawals and Expired Balances

3.8.1. Withdrawals represent unobligated amounts that are withdrawn by administrative action (rather than by law) from obligation availability. A previously withdrawn unobligated amount that is again made available for obligation and outlay is considered a restoration. A withdrawal excludes amounts of expired accounts and amounts rescinded by the Congress. Title 31 U.S.C § 1555 authorizes the withdrawal of funds, only upon the closing of an account, and not the withdrawal of budget authority from open accounts.

3.8.2. Expired balances retain their fiscal year identity for the following five fiscal years. During this five-year period, the unobligated balance of an expired fund is available only for adjustments to obligations initially incurred during the fiscal year (or years) for which the appropriation account was available. The unobligated balance of an expired fund may not be used to create new obligations. Normally, at the end of the five-year period, any remaining unobligated balance and unliquidated obligations must be transferred to account 4350, Cancelled Authority. Cancelled amounts may not be restored.

3.8.3. The balance in account 465000, Allotments – Expired Authority, is not a fund balance (i.e., cash) account available in the Treasury. Transfers into the account (withdrawals) and transfers out (restorations) do not, in and of themselves, affect the cash position of the Treasury. Expired authority is an available budgetary resource for the specific purpose of ensuring that valid obligations of expired and lapsed appropriation accounts can be met without recourse to individual appropriation action by the Congress. Other account transactions that are related to 465000 have corresponding proprietary transactions that impact 101000, Fund Balance with Treasury.

3.9 Indefinite Appropriations

3.9.1. Indefinite appropriations are appropriations of a current or permanent nature in which a definite amount is not stated but is to be determined on the basis of stipulated subsequent events. One type of indefinite appropriation for the Department is available receipts. For example, the receipts under the Federal Account Symbol and Title 5095.001, Sale of Hunting and Fishing Permits, Military Reservations, are, by permanent appropriation, available for expenditure for the Army under appropriation account 21X5095, Wildlife Conservation, Military Reservations, Army. The amount authorized may be all or a portion of the receipts under a receipt account, but they may not be available until a warrant is issued by Treasury or the amount authorized may be specified as the amount actually obligated for a specified purpose.

3.9.2. Anticipated amounts of indefinite appropriations derived from available receipts must be reported as anticipated budgetary resources until the amounts are realized. The budget authority generated will increase the uncommitted or unobligated balance reported on the SF 133, Report on Budget Execution (OMB Circular A-11, Appendix F). However, such balances should not be recorded in the accounts as currently available for obligation until receipts are realized.
4.0 OTHER ACCOUNT ADJUSTMENTS AND CLOSING

4.1 Account Adjustments

4.1.1 At the end of the period of availability, all budget authority that remains undistributed to the execution level and all allotments received within the execution level that remain unobligated, must be returned to the departmental level for financial statement reporting. Specifically, the recipient of an allotment, suballotment, allocation or suballocation must pre-close all unobligated funds utilizing the accounting transactions, that are detailed in Chapter 15, to return the funds to the previous and original fund holder. Similarly, allotments issued at the departmental level that remain undistributed and unobligated must close the fund distribution accounts within the departmental level prior to performing post-closing accounting entries.

4.1.2 Cancel appropriation transfers anticipated to be made to or from other accounts. Anticipated appropriation transfers must be cancelled as of the end of the fiscal year in which anticipated.

4.1.3 Eliminate unrealized anticipated indefinite appropriations.

4.1.4 Cancel anticipated reimbursements in no-year, expiring annual, and multi-year accounts as of the end of the fiscal year.

4.1.5 Record the cancellation of expired authority and withdraw funds.

4.1.6 Reduce appropriations realized by the amount of budgetary resources withheld pursuant to public law.

4.1.7 Recognize at the departmental level (headquarters) an adjustment to undistributed allotments of realized transfers remaining at the intermediate level and unobligated balances of realized transfers remaining at the execution level. This transaction reverses the accounts in the original issuance of budgetary authority. The intermediate and execution levels must notify the departmental level accounting entity of undistributed and unobligated funds as described in paragraph 4.3. Definitions and use for accounts 454000 through 458000 are prescribed in the DoD SCOA located on the SFIS resources web page.

4.2 Budget Execution Report Preparation

After completion of the account adjustments identified in paragraph 4.1, budget execution reports must be prepared as specified in Volume 6A, Chapter 4.

4.3 Notification from Lower Levels

The departmental level accounting entity must be informed by the intermediate and execution levels of the following adjustments and account balances as specified in Volume 6A, Chapter 2. Undistributed allotments of direct program authority (account 456000) and direct unobligated balances remaining in expiring allotted funds (account 461000) must be reversed at
the intermediate and execution levels (Chapters 14 and 15, respectively) and reported to the departmental level for financial reporting.

4.4 Account Closing

Following the end of year reporting, Treasury requires post-closing entries to be made to certain accounts. Closing transactions are used to establish beginning balances for accounts that do not have posting activity during the fiscal year and to zero out account balances used to record current year activity. These entries are described in detail in the DoD USSGL Transaction Library, based on the overarching guidance of USSGL Supplement to the TFM. Allotments issued at the Headquarters/OSD Level that remain undistributed and unobligated must close the fund distribution accounts within the Headquarters/OSD Level prior to performing post-closing accounting entries. Additional detail on departmental level transactions can be found in the Accounting for Internal Funds Distribution; Interpretation Guidance for General Fund Appropriations.

4.4.1 Direct Funds. Record unobligated budget authority for unexpired annual or multi-year appropriations; close unobligated balances to expired authority; reduce appropriations realized by the amount of rescinded appropriations; close transfers accomplished to other appropriations or funds; and close appropriation transfers realized from other appropriations or funds.

4.4.2 Reimbursable Program. No closing entries must be made for the reimbursable program at the departmental level. The adjusting entry is specified in paragraph 4.1.

CHAPTER 14

RECEIPT AND DISTRIBUTION OF BUDGETARY RESOURCES
INTERMEDIATE-LEVEL

1.0 GENERAL

1.1 Overview

1.1.1. Some Department of Defense (DoD) Components, such as the Military Departments, are structured into three or more levels, or echelons. General Fund direct appropriation budget authority is initially recorded at the Department-level (e.g., Headquarters) and subsequently issued to intermediate-level organizations (e.g., major commands), which, in turn, distributes the authority to execution-level organizations (e.g., field level) for program execution.

1.1.2. Military Departments and DoD agencies composed of three or more levels must follow the chapter procedures to ensure internal fund distribution accounts roll up in the Defense Departmental Reporting System to the appropriate United States Standard General Ledger (USSGL) accounts, and accurately report the total and status of budgetary resources. This chapter provides an understanding of how intermediate budgetary and proprietary entries must be recorded from the time funds are issued until closed.

1.2 Purpose

1.2.1. This chapter prescribes the standards for recording the receipt and subsequent distribution of direct budgetary resources using the intermediate-level budgetary accounts. The budgetary general ledger record the receipt of fund distributions (e.g., allotments or suballotments) issued within the same Treasury Account Symbol from Department-level to intermediate-level organizations, and the subsequent issuance down to execution-level activities.

1.2.2. This chapter does not apply to a two-tiered structure such as Defense-wide appropriations issued from the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), Program/Budget, to a Defense agency. Additionally, this chapter does not apply to reimbursable budget authority addressed in Volumes 11A and 11B.

1.3 Authoritative Guidance

The financial management policy and related requirements prescribed are in accordance with the applicable provisions of the following authoritative sources:

1.3.2. The Office of Management and Budget (OMB) Circular A-11, “Preparation, Submission, and Execution of the Budget”; and

2.0 DEFINITIONS

2.1 Department-Level

Recording receipt and distribution of direct budgetary resources at the department-level, headquarters, or Office of the Secretary of Defense level as discussed in Chapter 13.

2.2 Intermediate-Level

Recording receipt and distribution of budgetary resources using the intermediate-level accounts. See examples in sections 3.0 and 4.0.

2.3 Execution-Level

Recording receipt and distribution of budgetary resources using the execution-level budgetary accounts discussed in Chapter 15.

3.0 STANDARDS

3.1 Standard General Ledger Accounts and Transaction Entries

The OUSD(C))/Office of the Chief Financial Officer maintains the Standard Financial Information Structure resources web page containing:

3.1.1. DoD Standard Chart of Accounts, which includes the DoD Standard General Ledger accounts established for use at the intermediate-level (see Volume 1, Chapter 7);

3.1.2. DoD USSGL Transaction Library section includes budgetary and proprietary accounting transaction entries, including those at the intermediate-level; and

3.1.3. DoD Accounting Scenarios include two Internal Fund Distribution scenarios, “TI-097 General Funds” and “Military Department General Funds,” that identify the posting logic and appropriate accounts for recording the issuance and closure of budgetary resources at all three levels (department, intermediate, and execution).

3.2 Internal Fund Distribution

3.2.1. OMB Circular A-11 defines the terms apportionment, allotments, suballotments, allowances, and allocations; and 31 U.S.C. § 1514(a) and Circular A-11, Section 150 and Appendix H, require a system of funds control. Volume 14, Chapter 1 prescribes the DoD requirements for the administrative control of funds.
3.2.2. Any formal subdivision of funds must contain the same statutory and other limitations applicable to the original apportionment.

3.3 Accounting Entry Examples

3.3.1. To record direct budgetary authority received from the department-level by an intermediate-level Component(s), or activity thereof, and available for allotment to execution-level Component(s), or activities thereof, or suballotment to other intermediate-level Component(s), or activities thereof:

**Budgetary Entry**
- Dr 455000 Internal Fund Distributions Received
- Cr 456000 Funds Available for Allotment

**Proprietary Entry**
- Dr 101000 Fund Balance With Treasury (FBwT)
- Cr 310100 Unexpended Appropriations – Appropriations Received

3.3.2. To record direct budgetary authority either allotted by an intermediate-level Component(s) or activity thereof to an execution-level Component(s) or activity thereof, or suballotted between two or more intermediate-level Component(s), or activities thereof:

**Budgetary Entry**
- Dr 456000 Funds Available for Allotment
- Cr 457000 Allotments Issued

**Proprietary Entry**
- Dr 310100 Unexpended Appropriations – Appropriations Received
- Cr 101000 FBwT

4.0 NOTIFICATION AND ACCOUNT CLOSING

4.1 Notification to Department-Level

The intermediate-level accounting activity must notify the department-level accounting entity of direct program authority that is not distributed to the execution-level (account 456000, *Funds Available for Allotment*).

4.2 Account Closing

After preparation of the prescribed budget execution reports, the following entries must be made, at the expiration of the period of availability (PoA) for obligation, to close expended amounts to the authorizing account for the expenditures and to withdraw any remaining program authority.
4.2.1. To close budgetary authority within the intermediate-level upon expiration of the PoA where distributions were issued to the execution-level:

Budgetary Entry
Dr 457000  Allotments Issued  
Cr 456000  Funds Available for Allotment  

Proprietary Entry
Dr 101000  FBwT  
Cr 310100  Unexpended Appropriation – Appropriations Received  

4.2.2. To close internal fund distributions received in the intermediate-level that remains undistributed (withheld) upon expiration of the PoA:

Budgetary Entry
Dr 456000  Funds Available for Allotment  
Cr 455000  Internal Fund Distributions Received  

Proprietary Entry
Dr 310100  Unexpended Appropriation – Appropriations Received  
Cr 101000  FBwT  

4.2.3. To close direct budget authority issued through allotment or suballotment upon expiration of the PoA:

Budgetary Entry
Dr 457000  Allotments Issued  
Cr 420100  Total Actual Resources – Collected  

Proprietary Entry
None  

4.2.4. To close internal fund distributions received at the intermediate-level upon expiration of the PoA:

Budgetary Entry
Dr 420100  Total Actual Resources – Collected  
Cr 455000  Internal Funds Distribution Received  

Proprietary Entry
None

CHAPTER 15

RECEIPT AND DISTRIBUTION OF BUDGETARY RESOURCES – EXECUTION LEVEL

*1.0 GENERAL

1.1 Overview

The execution level budgetary and proprietary accounts are used to record the receipt of an allotment issued from a higher authority, e.g., the Office of the Secretary of Defense or the Assistant Secretary of a Military Department (Financial Management and Comptroller), and the further distribution of funds, i.e., subdivision of the allotment (suballotment, allocation, or suballocation) between a major command and an execution level activity or between execution level activities.

1.2 Purpose

This chapter prescribes the standards for recording the receipt and subsequent distribution of budgetary resources in execution-level activities. It discusses the accounting standards for receipt and execution of allotments, commitments, obligations, reimbursements, and borrowing authority. The accounting transactions covered in this chapter frequently require a compound entry; i.e., entries that must be made in both the budgetary and proprietary accounts. See Chapter 13 for departmental-level and Chapter 14 for intermediate-level requirements.

1.3 Authoritative Guidance

1.3.2. United States Department of the Treasury (Treasury) Treasury Financial Manual (TFM), Volume 14, Chapter 1.

1.3.4. TFM United States Standard General Ledger (USSGL).

1.3.5. Department of Defense United States Standard General Ledger (DoD USSGL) Transaction Library.

1.3.6. DoD Standard Chart of Accounts (SCOA).
2.0 DEFINITIONS

2.1 Departmental Level

Involves recording receipt and distribution of budgetary resources at the department level, headquarters, or Office of the Secretary of Defense (OSD) level as discussed in Chapter 13.

*2.2 Intermediate Level

Involves recording receipt and distribution of budgetary resources using the intermediate level accounts as discussed in Chapter 14. An example of the intermediate level would be a Command within a Military Department that has received the initial funding.

2.3 Execution Level

Involves recording receipt and distribution of budgetary resources using the execution-level budgetary accounts as discussed in this chapter.

3.0 STANDARDS

*3.1 Accounts

3.1.1. DoD SCOA (see Volume 1, Chapter 7), which includes the DoD Standard General Ledger accounts established for use at the departmental level;

3.1.2. DoD USSGL Transaction Library, which includes the budgetary and proprietary accounting entries established for enterprise reporting; and

3.1.3. DoD Accounting Scenarios, which include two Internal Fund Distribution scenarios, “TI-097 General Funds” and “Military Department General Funds,” that identify the posting logic and appropriate accounts for recording the issuance and closure of budgetary resources at all three levels (Departmental, Intermediate and Execution).

3.2 Allotments Received

3.2.1. Requirements

3.2.1.1. Budgetary authority is formally distributed by allotment, suballotment, allocation, and suballocation. The OMB Circular A-11, Appendix H, defines these terms and a specific subdivision hierarchy (see Volume 14, Chapter 1). These subdivisions distribute budget authority to execution level accounting activities and authorize the incurrence of obligations within a specified amount. Only the term allotment will be used in this chapter.

3.2.1.2. Any formal subdivision of funds must contain at least the same statutory and other limitations applicable to the original apportionment.
3.2.1.3. Although an allotment document format is not prescribed, it must disclose specific classifications and limitations that must be tracked in the accounting records. For instance, an appropriation committee may state that a specific amount has been added to an appropriation for a certain purpose. To ensure that the congressional intent is accomplished, the accounting entity receiving an allotted share of such budget authority must account for the share amount, and the obligations and expenditures.

3.2.1.4. An allotment received at the execution level must retain the same availability constraints as initially automatically apportioned by OMB.

3.3 Commitments

3.3.1. A commitment is an administrative reservation of allotted funds, or of other funds, in anticipation of their obligation. Since an obligation equal to or less than the commitment may be incurred without further recourse to an authorizing official, commitments are required for some appropriations (see subparagraph 3.3.3) and are permissible for others. A commitment, when recorded in the accounting records, reduces the allotment’s available fund balance. A commitment document must be signed by a person authorized to reserve funds; i.e., the official responsible for administrative control of funds for the affected subdivision of the appropriation. This helps ensure that the subsequent entry of an obligation will not exceed available funds.

3.3.2. Chapter 8 contains the detailed requirements for estimating and recording the amounts of commitments.

3.3.3. Commitment accounting is required by agreement with OMB for the procurement; military construction; and research, development, test and evaluation appropriation accounts. However, commitments need not be recorded for small purchases if, in the aggregate, they are not significant in the management of funds. Commitment accounting is not required for the operation and maintenance appropriation accounts, revolving fund accounts, or military personnel appropriation accounts, but may be used if cost effective.

3.3.4. A commitment generally is not recordable from an action document approving a procurement program because execution of the program requires specific actions to reserve all or part of the subdivision of funds made available to the program. The program approval may be recorded as an initiation (see subparagraph 3.3.5). Also, a commitment usually is not recordable from an order to commence procurement since such orders generally are not firm reservations permitting the recording of an obligation without recourse to the person authorized to reserve funds. These orders may be recorded as initiations.

3.3.5. Initiations are entered into memorandum accounts to ensure that precommitment actions, such as approved procurement programs and procurement orders, are maintained within the available subdivision of funds. An initiation results in an administrative reservation of funds based upon procurement orders, requests, or equivalent instruments. It authorizes preliminary negotiation of procurement actions, but requires that the action must be referred to the official responsible for administrative control of funds prior to incurrence of the obligation. Since
initiations are not part of the official accounting requirements, allotment issuers or receivers who require initiation accounting must ensure that the procedures and practices are cost effective.

3.3.6. Outstanding commitments must be closed/canceled as of the end of the period that the appropriation is available for obligation. Commitments cannot exist in expired appropriation accounts.

3.4 Obligations

3.4.1. Obligations incurred are the amounts of orders placed, contracts awarded, services received, and similar transactions during an accounting period that will require payment during the same or future period. These amounts include payments for obligations that were not previously recorded, adjustments for differences between obligations previously recorded, and actual payments to liquidate those obligations.

3.4.2. The execution level budgetary account structure requires that the amount of obligations incurred be segregated into undelivered orders unpaid, prepaid or advanced, and delivered orders unpaid or paid. Delivered orders paid is the definitive final stage of obligations incurred. It must be recorded regardless of whether the preceding steps of ordering (undelivered order) and delivery (unpaid delivered orders) were recorded.

3.4.3. Undelivered orders are contracts or orders issued for goods and services for which the liability has not yet accrued. The orders may be for any goods or services that are required to meet a bona fide need of the issuing entity.

3.4.5. Reductions or cancellations of prior year obligations in no-year and unexpired multiple year (multi-year) accounts must be reported specifically in budget execution reports (see Volume 6A, Chapter 4).

3.4.6. Chapter 8 contains the detailed requirements for determining and recording the amounts of obligations.

*3.5 Reimbursements and Refunds

3.5.1. Definition

3.5.1.1. Reimbursements are collections earned for selling goods or services. Reimbursable obligations are obligations financed by offsetting collections credited to an expenditure account in payment for goods and services provided by that account. The collection must be authorized by law to credit the specific appropriation or fund account. Within DoD, the Under Secretary of Defense (Comptroller) must authorize reimbursable authority through budget formulation and statutory authorization of the budget. Except for refunds and reimbursements, collections are deposited in Treasury as miscellaneous receipts.

3.5.1.2. Refunds are repayments of excess payments and are to be credited to the appropriation or fund account charged with the original obligation in accordance with
OMB Circular A-11, section 20.9. The amounts must be directly related to previously recorded obligations incurred and expenditures made against the appropriation; and are reductions to those expenditures. Refunds to appropriations represent amounts collected from outside sources for payments made in error, overpayment, or adjustments for previous amounts disbursed. Amounts in excess of the refund, i.e., interest and penalty charges collected that are related to refunds must be deposited in Treasury as miscellaneous receipts. Any items returned to Defense Working Capital Fund (DWCF) supply activities from DWCF customers are to be considered as a recovery (and not classified as a refund). See Volume 4, Chapter 3 for accounting policy on the disposition of interest, penalties, and administrative charges. Also, see Volumes 11A, 11B, and 15 for additional policy requirements for reimbursements.

3.5.1.3. For returned cash advances, other offsetting collection, or special or trust fund receipts received in a prior fiscal year, an obligation and an outlay in the current fiscal year must be recorded in accordance with OMB Circular A-11, section 20.10.

3.5.1.4. In general, collections in the absence of an authorized reimbursable program for DoD goods and services do not create budgetary resources. Except for refunds, such collections must be deposited in Treasury as miscellaneous receipts unless the deposit to an appropriation or fund is authorized by law. Refunds attributable to the use of the Government purchase and travel cards and Government travel arranged by Government Contracted Travel Management Centers may be credited to Operation and Maintenance; and Research, Development, Test, and Evaluation accounts that are current when the refunds are received. Volume 11A, Chapter 3 and Volume 11B, Chapter 3 contain the general statement of policy regarding work performed or material provided between DoD and other Federal agencies.

3.5.2. Anticipated Reimbursements

3.5.2.1. Anticipated reimbursements are the estimate of reimbursements expected to be earned during the current fiscal year, subject to OMB apportionment, based on customer orders or services received or provided. Anticipated reimbursements may not be used as a source of obligational authority until a customer order is accepted unless such use specifically is authorized in statute. Volume 3, Chapter 15 describes reimbursable obligations in detail.

3.5.2.2. An allotted reimbursable program does not constitute authority to incur obligations. Obligations may be incurred only upon acceptance of a customer order. The reimbursable program does not have to be specifically allotted. Apportionment, allotment, and allocation of the reimbursable program may be treated as “automatic” when written OMB approval is obtained by the DoD Component responsible for the appropriation concerned. OMB approval is dependent upon meeting the criteria for automatic apportionment of reimbursements contained in Chapter 2.

3.5.2.3. At the beginning of each fiscal year an entry must be made to record an allotment of anticipated reimbursable program authority. For an automatically apportioned reimbursable program, the predominant type within DoD, an estimate of the expected reimbursable program must be entered. For a specifically apportioned reimbursable program, the exact amount specified in the allotment instrument must be entered. An estimate of automatically apportioned
reimbursable authority may be revised, upward or downward, by the performing activity at any time during a fiscal year to reflect the current estimate. The specifically apportioned reimbursable program authority may not be revised unless a revised allotment instrument is requested and received. An allotment of anticipated reimbursable program authority does not provide obligation authority. An allotment of anticipated reimbursable program authority provides only authority to accept reimbursable orders. The accepted reimbursable order provides the obligation authority. See subparagraph 3.5.3.2 for information on specific types of customer orders.

3.5.3. Customer Orders

3.5.3.1. Accepted customer orders establish obligational authority in a performing allotment. Unfilled customer orders are the amounts of orders accepted from other accounting entities within the United States (U.S.) Government for goods and services to be furnished on a reimbursable basis; or, in the case of transactions with the public, are amounts collected in advance for which the accounting entity has not yet performed as requested. On an exception basis, there may be orders from the public received and accepted without payment in advance, but only when specifically permitted by statute. Acceptance of a customer order requires that the performing accounting entity agree in writing to perform the work for the requesting (customer) accounting entity. Volume 11B, Chapter 3 discusses the written requirements that are used to document these requests and acceptances. An allotment of reimbursable program authority, whether specific or automatic, authorizes the reimbursable program. It does not establish obligational authority.

3.5.3.2. For reimbursable customer orders between Federal Government entities where both the performing and ordering agencies are using multi-year appropriation accounts, the agency accepting the order from a multi-year appropriation account must record the obligational authority resulting from the order against its multi-year appropriation account with a like period of availability. If the performing and ordering agency accounts have different periods of availability, such as when a performing agency uses its one-year Operations and Maintenance appropriation to fill an order funded by a customer’s multi-year appropriation account, such reimbursable customer orders and their related transactions must be applied in accordance with OMB Circular A-11, section 130.9. In such instances, the performing agency must obtain authorization each fiscal year in order to execute the unobligated balance in the subsequent fiscal year. For guidance on Economy Act orders, see Volume 11A, Chapter 3.

3.5.3.3. For additional guidance on project orders, i.e., between DoD entities, see Volume 11A, Chapter 2.

3.5.3.4. For general guidance on non-Economy Act orders, see Volume 11A, Chapter 18.

3.5.3.5. For additional guidance on orders placed with or through Defense Working Capital Fund activities, see Chapter 8, section 0809.

3.5.4. Unearned Revenue. Unearned revenue is the amount recognized as received by a performing organization in the form of advance payments for the future delivery of goods, services, or other assets. A compound entry is required to record reimbursable orders received and
accepted with payment in advance. Compound entries must be made to recognize advance payments in both the budgetary accounts and proprietary accounts.

3.5.5. Earned Reimbursements

3.5.5.1. An earned reimbursement is the amount recognized when a performing organization renders actual or constructive performance on a reimbursable order. Generally, it is at the point of recognition of a paid or unpaid delivered order that compound entries must be made to record the performance and earnings in both the budgetary accounts and in the proprietary accounts.

3.5.5.2. Generally, reimbursements must recover the cost elements set forth in Volume 11A, Chapter 3, and Volume 11B, Chapter 3. However, other billing prices may be established when specifically authorized by a DoD issuance (e.g., directive or instruction).

3.5.5.3. Reimbursements must be accounted for separately by the accounting entity having responsibility for collection. Appropriate billing documents indicating the specific property delivered or services rendered, quantities, dollar amounts, and reference to each customer order must be maintained.

3.5.5.4. Earned reimbursements must be recorded and billed promptly in the accounting period earned. See Volume 11A, Chapter 1 for information on reimbursement procedures and supporting documentation.

3.5.5.5. Collections from DoD accounting entities generally should be made without the use of checks through processing the billing and collecting entries simultaneously in the disbursing officers’ accounts. The requesting accounting entity must record its obligations in accordance with the standards for recognition of obligations in Chapter 8.

3.5.6. Proceeds from Assets Sold. In accordance with OMB Circular A-11, section 83.5, proceeds from assets sold for replacement provide direct resources. Therefore, when proceeds from assets sold are used to replace assets sold, the obligation must be classified as direct. For Foreign Military Sales (FMS) and non-FMS asset sales, a determination first must be made whether the item requires replacement or that it will not be replaced (free assets). Proceeds from FMS sales of free assets must be deposited in Treasury as miscellaneous receipts or in the Special Defense Acquisition Fund (SDAF). For SDAF information, see the Defense Security Cooperation Agency’s Security Assistance Management Manual, Chapter 11, (section C.11.9). Proceeds from all other assets sold for replacement must be credited to the account funding the replacement in the period of availability with the latest expiration date at the time of collection. Collections must be made before obligations can be incurred for replacement.

3.6 Borrowing Authority

3.6.1. Borrowing authority is statutory authority to incur obligations and to make payments for specified purposes out of borrowed money. It must be established as needed by the
acquisition of property subject to a mortgage, and withdrawn upon payment of the mortgage principal. When the mortgage is assumed by a buyer, the borrowing authority is disestablished.

3.6.2. The accrued expenditures for the acquisition of homes subject to mortgages payable that are assumed by the U.S. Government must include the amount of the mortgage balance payable. The accrued revenues for the sale of homes subject to mortgages payable that are assumed by the buyer must include the amount of the mortgage balance payable. Homes may be sold subject to another loan of all or part of the cash purchase price to the new buyer. In this case, the U.S. Government would have a second mortgage on the home. The revenue for the sale includes this mortgage receivable.

3.6.3. The assumption of a mortgage payable by the U.S. Government is an increase in the borrowing account. The payments on the mortgage principal are decreases in the borrowing account. The assumption of the mortgage balance payable by a buyer is a decrease in the borrowing account. The borrowing account is equal to borrowing authority.

3.6.4. The total acquisition cost of the property and the mortgage assumed must be in accordance with Volume 6A, Chapter 3.

3.7 Additional Guidance

3.7.1. For policy guidance and information on the Homeowners Assistance Program, see DoD Directive 4165.50E and Title 42, United States Code, section 3374.

3.7.2. For policy guidance and information on foreign military indebtedness, see Volume 16, Chapter 6

3.7.3. For policy guidance and information on the military housing privatization program, see Volume 2B, Chapter 6 and Volume 6A, Chapter 9.

4.0 ACCOUNT ADJUSTMENTS

4.1 Fiscal Year-End Adjustments to Appropriation Accounts

At fiscal year-end, DoD Components who receive appropriations must ensure that obligational authority and obligations are accurately stated in view of the most current information available. Actions to accomplish these fiscal year-end adjustments include the following:

4.1.1. Review and validate the Economy Act and Non-Economy Act unfilled orders (see Volume 11A, Chapters 3 and 18, respectively). Cancel those orders funded from expiring accounts or the portion thereof that will not be obligated by fiscal year-end. Notify ordering activities of order reductions that affect their obligations and fund availability.

4.1.2. Review and validate unfilled project orders funded by expiring accounts. Cancel those orders that will not be started by January 1 of the ensuing fiscal year. Notify ordering activities of order reductions that affect their obligations and fund availability.
4.1.3. Review anticipated reimbursements to eliminate anticipated reimbursements for orders not accepted.

4.1.4. Review estimated obligations for possible overstatement or understatement.

4.1.5. Review obligations for goods and services ordered. Cancel orders or contracts for goods or services that are no longer needed or that are not likely to be delivered, and deobligate the appropriate amounts. A contract modification, or similar authorized contracting officer action, is required to deobligate these amounts.

4.2 Adjustments to Expiring Accounts

4.2.1. Cancel outstanding commitments in expiring accounts. Outstanding commitments must be canceled as of the end of the period that an appropriation is available for obligation. Commitments are not allowed in expired accounts. See subparagraph 3.3.6 for recording the transaction for commitments that remain unobligated upon expiration of the period of availability.

4.2.2. Review completed customer orders to restore reimbursable program obligational authority made available that was in excess of performance cost. Earned amounts that remain uncollected must be eliminated from the expiring appropriation account and established against the miscellaneous receipt account to which the future collection is to be deposited.

4.2.3. Reduce the balance in Unfilled Customer Orders Without Advance and Unfilled Customer Orders With Advance to the amount of valid remaining incomplete customer orders only. Cash advances accepted for non-Federal customer orders that remain unused (i.e., no performance) by the end of the fiscal year must be returned.

4.2.4. Eliminate any balance remaining in Anticipated Reimbursements and Other Income.

4.3 Adjustments to Canceled Appropriation Accounts

Upon cancellation of an appropriation, and prior to normal closing entries, cancel all obligations (undelivered orders and unpaid obligations) and uncollected reimbursements.

4.4 Report Preparation and Closing

After completion of the adjustments, budget execution reports must be prepared as specified in Volume 6A, Chapter 4. After completion of the reports, close obligational and reimbursable authority.

4.5 Expired and Canceled Accounts

4.5.1. For 5 years after the time an appropriation expires for incurring new obligations, both the obligated and unobligated balances of that appropriation will be available for recording, adjusting, and liquidating obligations properly chargeable to that account.
4.5.2. For appropriations that are available for obligation for a specific period, i.e., annual and multi-year appropriations, on September 30 of the fifth fiscal year after an appropriation’s period of availability for incurring new obligations expires, both the obligated and unobligated balances of that appropriation are required to be canceled and will no longer be available for obligation or expenditure for any purpose.

4.5.3. Following cancellation of an appropriation, if it becomes necessary to record an obligation or an adjustment to an obligation, which otherwise would have been properly chargeable (both as to purpose and amount) to an appropriation before it was canceled, the obligation should be charged to an appropriation currently available for the same purpose.

4.5.4. When a currently available appropriation is used to pay an obligation, which otherwise would have been properly chargeable (both as to purpose and amount) to a canceled appropriation, the total of all such payments by that current appropriation may not exceed the lesser of:

4.5.4.1. The unexpended balance of the canceled appropriation (the unexpended balance is the sum of the unobligated balance plus the unpaid obligations of an appropriation at the time of cancellation, adjusted for obligations and payments which are incurred or made subsequent to cancellation and which would otherwise have been properly charged to the appropriation except for the cancellation of the appropriation); or

4.5.4.2. The unexpired unobligated balance of the currently available appropriation; or

4.5.4.3. One percent of the total original amount appropriated to the current appropriation being charged.

4.5.4.3.1. For annual accounts, the one percent limitation is of the annual appropriation for the applicable account, not total budgetary resources (e.g., reimbursable program authority).

4.5.4.3.2. For multi-year accounts, the one percent limitation applies to the total (multi-year) amount of the appropriation.

4.5.4.3.3. For contract changes, charges made to currently available appropriations will have no impact on the one percent limitation rule. That is, the one percent of the currently available appropriation amount will not be decreased by the charges made to current appropriations for contract changes.

4.5.5. See Chapter 10 for additional policy on expired and canceled accounts.

4.6 Expired Authority

4.6.1. **Accounting.** Expired authority is composed of (a) unobligated balances and (b) obligated but unliquidated balances remaining in appropriations that are no longer available for
incurring new obligations. The balances are no longer available because the time available for incurring such obligations has expired. Separate accounts for each expired fixed appropriation must be maintained by its fiscal year identity for 5 years following the appropriation’s period of availability for obligation.

4.6.2. Elimination of Unobligated Balances

4.6.2.1. Direct Program. Unobligated budget authority of an expired appropriation, at the time of its expiration, must be closed to account 465000, Allotments - Expired Authority.

4.6.2.2. Reimbursable Program. Closing entries eliminate reimbursable program authority that has been expended. In addition to the elimination of expended reimbursable program authority, a change is necessary to eliminate unobligated reimbursable program authority existing at the time of expiration of the receiving appropriation. Unobligated reimbursable program authority must be returned to the financing appropriation. The obligation authority necessary to finance any subsequent upward obligation adjustments must be requested from that financing appropriation. See subparagraphs 3.5.3.2 and 4.2.3 for additional information on multi-year reimbursable authority and cash advances from non-Federal sources, respectively.

4.6.3. Adjustments. During the 5 years following the appropriation’s period of availability for obligation, obligations may be adjusted upward and downward and disbursements may be made from these expired appropriations. Expired authority, prior to appropriation cancellation, provides the ability to a DoD Component to adjust obligations upward that were previously under recorded or to record obligations that should have been recorded (but were not) against an expired appropriation before its expiration.

4.7 Canceled Authority

On September 30th of the fifth fiscal year after the period of availability for obligation of a fixed appropriation account ends, the account must be closed and any remaining balance (whether obligated or unobligated) in the account must be canceled and, thereafter, must not be available for obligation or expenditure for any purpose. The obligational status of a canceled account continuously must be maintained even though no expenditures or collections may be made to that account. In addition, collections authorized, or required to be credited to an appropriation account, but not received before closing of the account, must be deposited in Treasury as miscellaneous receipts.

4.7.1. Accounting for Canceled Obligated and Unobligated Balances. Upon cancellation of an appropriation, the balance in account 465000, Allotments – Expired Authority, must be reclassified as canceled authority and recorded to account 435000, Canceled Authority. Expenditures from a current appropriation that are applicable to obligations incurred in a canceled appropriation will reduce the balance in account 435000.

4.7.2. Accounting for Collections Applicable to Closed Accounts. Any collections received after cancellation of an account must be deposited in Treasury as miscellaneous receipts.
4.7.3. Accounting for Expenditures Applicable To Canceled Appropriations. The status of direct program obligated and unobligated balances and reimbursable program obligated balances, even in an account which has been closed, must be continuously maintained. If payments (cash collections) are not received for obligations incurred in the reimbursable program, those obligations must be covered by direct program unobligated authority existing in the closed account.

4.7.3.1. To determine if sufficient direct program unobligated authority exists in the closed account, deduct all amounts charged to current appropriations that otherwise would have been chargeable to the closed account, both as to purpose and in amount, except that the account was canceled, from the unobligated balance at the time of the cancellation.

4.7.3.2. The total of payments from a current appropriation for obligations and payables of a canceled appropriation cannot exceed the lesser of (1) the unexpended balance of the canceled appropriation; (2) the unexpired unobligated balance of the currently available appropriation; or (3) one percent of the current appropriation being charged. Payables applicable to canceled appropriations must be paid from funds of subsequent appropriations that are available for the same general purpose as the one from which the payables were canceled. Liabilities may not be recorded on the books of a subsequent appropriation until (1) valid bills are received for payment; and (2) it is certain the payment will be made from that subsequent appropriation. If such payments exceed the one percent limitation, additional authority must be sought from Congress (see Chapter 10). It is important to note that the liability of a current account to pay an obligation of a canceled account is recorded only in the proprietary accounts of the current account pursuant to the criteria described in this paragraph. The obligation of a current account to pay, however, including upward obligation adjustments, must be recorded in the budgetary accounts at the time it is first known against the obligational authority of the canceled account that would have been available except for its cancellation.
SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue, and underlined font**.

The previous version dated June 2019 is archived.

CHAPTER 17

ACCOUNTING REQUIREMENTS FOR MILITARY CONSTRUCTION PROJECTS

1.0 GENERAL (1701)

1.1 Purpose (170101)

This chapter identifies accounting requirements and legal authorities applicable to the construction of real property, including:

1.1.1. Costs to be charged to appropriations available for military construction (these costs are referred to as funded costs);

1.1.2. Costs that, although financed by appropriations or funds other than those available for a specific construction project, are to be capitalized as part of the real property investment (these are referred to as unfunded costs);

1.1.3. Preparation of accounting source documents required to support entries to real property accounts;

1.1.4. Obligation and expenditure restrictions and limitations for military construction projects; and

1.1.5. Various other related functions.

1.1.6. For policy relating to the construction of real property involving arrangements with host nations see the discussion of facilities and equipment outside the zone of the Interior (United States and Possessions) in Volume 4, Chapters 24-28.

*1.2 Authoritative Guidance (170102)

1.2.1. Title 10, United States Code, section 2802 (10 U.S.C. § 2802) authorizes the Secretary of Defense and Secretaries of the Military Departments to carry out military construction projects, land acquisitions, and defense access road projects. Typically, annual national defense authorization acts include military construction authorization acts. Congress has provided the Department permanent authority to carry out certain types of military construction projects. These standing authorities primarily are located within 10 U.S.C. Chapter 169, “Military Construction and Military Family Housing.” Chapter 169 includes:

1.2.1.1. Subchapter I, Sections 2801 to 2815, “Military Construction;”

1.2.1.2. Subchapter II, Sections 2821 to 2838, “Military Family Housing;”

1.2.1.3. Subchapter III, Sections 2851 to 2869, “Administration of Military Construction and Military Family Housing;”
1.2.1.4. **Subchapter IV**, Sections 2871 to 2886, “Alternative Authority for Acquisition and Improvement of Military Housing;” and

1.2.1.5. **Subchapter V**, Sections 2890 to 2894, “Oversight of Landlords and Protections and Responsibilities of Tenants of Privatized Military Housing.”

1.2.3. Additional U.S.C. requirements prescribed in this chapter.

1.2.3.1. **10 U.S.C. § 480**, “Reports to Congress: Submission in Electronic Form;”

1.2.3.2. **10 U.S.C. Chapter 160**, “Environmental Restoration;”

1.2.3.3. **10 U.S.C. § 2577**, “Disposal of Recyclable Materials;”

1.2.3.4. **10 U.S.C. § 2667**, “Leases: Non-excess Property of Military Departments and Defense Agencies;”

1.2.3.6. **10 U.S.C. § 2703**, “Environmental Restoration Accounts;”

1.2.3.7. **10 U.S.C. § 2707**, “Environmental Restoration Projects for Environmental Responses;”

1.2.3.9. **10 U.S.C. § 8612**, “Employment of Outside Architects and Engineers;”

1.2.3.10. **10 U.S.C. § 9540**, “Architectural and Engineering Services;”

1.2.3.11. **10 U.S.C. § 18233**, “Acquisition;”

1.2.3.12. **10 U.S.C. § 18233a**, “Notice and Wait Requirements for Certain Projects;”

1.2.3.14. **42 U.S.C. Chapter 103**, “Comprehensive Environmental Response, Compensation, and Liability;” and

1.2.3.15. **50 U.S.C. Chapter 34**, “National Emergencies Act.”

1.2.4. Additionally, the accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions and are identified.

1.2.4.2. Title 23, Code of Federal Regulations (CFR), Part 660, Subpart E, “Defense Access Roads;”

1.2.4.3. DoD Directive (DoDD) 3025.18, “Defense Support of Civil Authorities;”

1.2.4.4. DoDD 4270.5, “Military Construction;”

1.2.4.5. DoD Instruction (DoDI) 4000.19, “Support Agreements;”

1.2.4.6. DoDI 4165.56, “Relocatable Buildings;” and

1.2.4.7. United Facilities Criteria (UFC) 1-300-08, “Criteria for Transfer and Acceptance of DoD Real Property.”

2.0 MILITARY CONSTRUCTION PROCESS (1702)

2.1 Definition (170201)

Military construction is any construction, development, conversion, or extension of any kind carried out with respect to a military installation, whether to satisfy temporary or permanent requirements, or any acquisition of land or construction of a defense access road. A military construction project includes all military construction work necessary to produce a complete and usable facility or a complete and usable improvement to an existing facility (or to produce such portion of a complete and usable facility or improvement as is specifically authorized by law). The authority to carry out military construction includes authority for (1) surveys and site preparation; (2) acquisition, conversion, rehabilitation, and installation of facilities; (3) acquisition and installation of equipment and appurtenances integral to the project; (4) acquisition and installation of supporting facilities (including utilities) and appurtenances incident to the project; and (5) planning, supervision, administration, and overhead incident to the project.

2.2 Authorization Requests (170202)

2.2.1. Each year an annual or biennial request for major construction projects and programs is submitted to the Congress. Requests presented are reviewed, adjusted, and approved through established command and staff channels, including the Office of the Secretary of Defense (OSD) and the Office of Management and Budget (OMB) before submission to the Congress for authorization. The Assistant Secretary of Defense for Energy, Installations and Environment (ASD(Sustainment)) in conjunction with the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) provides guidance for submitting military construction projects for authorization.
2.2.2. Requests for authorization are confined to projects reasonably expected to be executed within the fiscal year requested.

2.2.3. Authorization requests for major construction projects must be supported by data on proposed physical capacity or other physical measurements, as well as data on estimated costs. Generally, the data for such projects must be arranged by state and/or installation. These data must be accompanied with comparative data on the existing real property inventory and projects expected to be subject to future authorization requests. Related data with respect to approved missions and proposed forces should also be provided. In addition, programs should be evaluated with respect to that portion of a project subject to request for immediate authorization and that portion deferred for future authorization requests.

2.3 Authorization Guidance and Restrictions (170203)

2.3.1. Each Act of Congress that provides authorization for work performed under major construction programs generally contains a limitation on total costs for work undertaken for each installation as a whole, for emergency construction work on a Department-wide basis and, in some cases for a type or category of construction. In certain circumstances, overruns, within stated percentages, may be authorized with respect to individual cost limitations, provided the total amount authorized for any appropriation is not exceeded.

2.3.2. Specific authorization in a military construction authorization act is required for work performed under major construction programs unless the project is carried out under one of the authorities provided by: 10 U.S.C. §§ 2667-2668, 2803-2805, 2808, 2854, 18233 and other authorities to carry out a project not otherwise specifically authorized.

2.3.3. A Military Department may not carry out a minor military construction project expected to exceed the statutory limits provided in 10 U.S.C. § 2805 without specific Congressional authorization and approval. See subparagraph 170302.C.

2.3.4. 10 U.S.C. § 2802 provides authority to carry out a military construction project. See paragraph 170201.

2.4 Appropriation Requests (170204)

2.4.1. Military Construction Projects. Appropriation requests in support of all new military construction projects are submitted to the Congress annually or biennially, as required. Military construction appropriations generally are available for obligation for five fiscal years. Such appropriation requests are consistent with existing authorizations, authorization requests, or other requests for funds, as applicable, and include specific budget estimates for those projects for which legislative authorization has been, or is being, requested.

2.4.2. Military Family Housing. Individual projects must be authorized and appropriated in accordance with 10 U.S.C. Chapter 169, Subchapter II.
2.4.3. Reprogramming. Adjustments may be made as necessary to finance completion cost of:

2.4.3.1. Projects previously approved and started,

2.4.3.2. Projects expected to be started during the current fiscal year, and

2.4.3.3. Other project costs that represent valid unfinanced requirements for the budget year.

2.4.4. Reprogramming Amounts. All reprogramming amounts requested must be consistent with amounts appropriated for specified military construction projects and the reprogramming criteria provided in Chapter 7, “Reprogramming of Military Construction and Family Housing Appropriated Funds.”

2.4.4.1. The amount of reprogramming must be within total amounts appropriated in each annual appropriation act.

2.4.4.2. Amounts previously appropriated in excess of the cost of performance may be reprogrammed to support the completion of other projects.

2.4.4.3. Individual projects cited as a source of funds for reprogramming are limited to the new total cost included in the estimate given to the Congress.

*2.5 Obligation and Expenditure Restrictions (170205)

2.5.1. Appropriated funds authorized for obligation are subject to the regulations regarding administrative control of funds and Antideficiency Act provisions addressed in Volume 14. An adequate system of funds control must be established in accordance with Volume 14. These controls must be designed to ensure individual projects are being carried out consistently with authorized purposes and within authorized and available funds.

2.5.2. Absent a specific provision of law, the cost estimate for each project approved by the Congress is not a separate statutory cost limitation. Major physical or financial changes in individual projects previously approved must be reported in advance to the House and Senate Appropriations Committees and the House National Security and Senate Armed Services Committees for their approval after proper clearance within the Department and OMB.

2.5.3. Limitations will be at the project level for major construction and budget activity for minor construction and planning and design.

2.5.4. DoD Components have limited authority to realign resources between projects consistent with Volume 2B, Chapter 6.

2.5.5. Requests for apportionment of appropriated funds must be based on estimates contained in applicable approved operating budgets.
2.5.6. Within each Military Department, funding authorizations to incur obligations must be made by means of subdivisions of appropriated funds to operating agencies and operating units responsible for construction. Such funding authorizations must be less than or equal to total obligation requirements for the respective approved operating budgets.

2.5.7. There can be only one allotment of funds from the construction appropriation to any operating agency and only one suballotment of funds from any such allotment to each operating unit. These allotments and suballotments represent funds distribution only and are not made for reimbursable activity. Each allotment or suballotment should carry with it only such additional obligation limitations as may be established by OMB or the Secretary of Defense, or as otherwise required by the Congress or the President. Separate limitations imposed on total costs by congressional authorizations and by administrative action must be observed at every level in connection with budgetary and funding actions as well as in program execution.

*2.5.8. Intergovernmental Construction Work or Services

2.5.8.1. Military Departments performing construction work or services for another DoD Component or other Federal agency are required to use reimbursable agreements defined within the Economy Act when practical. Guidance in the Treasury Financial Manual, Volume I, Part 2, Chapter 4700, Appendix 6, Section 9 provides the standard Interagency Agreement containing Fiscal Service (FS) Form 7600A, “General Terms and Conditions,” and FS Form 7600B, “Order Form.” The FS Forms 7600A/B must cite a requirement for periodic billings for construction, and include supporting documentation of the costs billed. All DoD Components must use the latest published versions of FS Forms 7600A/B and must comply with the Federal Intragovernmental Data Standards when using the Treasury’s G-Invoicing system, DoD Ordering systems, Enterprise Resource Planning, or when completing the FS Forms 7600 A/B manually.

2.5.8.2. DoD Construction Agents wishing to use suballotments rather than FS Forms 7600A/B must deliver a detailed action plan to the Deputy Chief Financial Officer (DCFO). If the detailed action plan is approved by the DCFO, the Construction Agents are required to:

2.5.8.2.1. Use independently validated Federal Information System Controls Audit Manual (FISCAM) and Federal Financial Management Improvement Act (FFMIA) compliant financial management systems:

2.5.8.2.1.1. FISCAM compliant systems must meet all relevant FISCAM control objectives to the financial statements (i.e. both Information Technology General Controls and application controls related control objectives).

2.5.8.2.1.2. FFMIA compliant systems must meet: Federal financial management system requirements (e.g., OMB Circulars A-127 and A-130), applicable Federal accounting standards (e.g., Statement of Federal Financial Accounting Standards (SFFAS), OMB Bulletin (19-03), and the USSGL at the transaction level.)
2.5.8.2.2. Provide USSGL/SFIS compliant trial balances inclusive of budgetary and propriety accounts to each customer and Defense Finance and Accounting Service monthly. They must also provide reconciliations of the trial balances to:

- 2.5.8.2.2.1. Suballotment universe of transactions;
- 2.5.8.2.2.2. End-to-end feeder systems, including contract writing systems, entitlement systems, and Accountable Property Systems of Record;
- 2.5.8.2.2.3. Defense Departmental Reporting System (DDRS) unadjusted and adjusted trial balances; and
- 2.5.8.2.2.4. Program Budget Accounting System funding authorizations.

2.5.8.2.3. Provide end-to-end business process and underlying system walkthroughs, process flows, and narratives, for the execution of Military Construction projects - both major and minor. The end-to-end business process includes the receipt of funding through the transfer of asset(s) and close-out of related contracts. The process should demonstrate how all costs (direct and indirect) associated with bringing an asset into service is accumulated in a construction-in-progress account in accordance with SFFAS 6, Accounting for Property, Plant, and Equipment.

- 2.5.8.2.3.1. Within five days of receipt from customer, provide requested transaction supporting documentation. Documentation may include: contracts, invoices, receiving documents, rate settlement calculations, Department of Defense (DD) Form 1354, Transfer and Acceptance of DoD Real Property, and support for DDRS or accounting system Journal Vouchers.
- 2.5.8.2.3.2. Work with customer auditors to identify and correct any audit findings, including system findings.

2.5.8.3. Provide a reconciliation of progress billings to actual construction in progress and provide sufficient supporting documentation for the reconciliation at least monthly.

2.5.8.4. DoD Construction Agents may perform work or services for another DoD Component or other Federal agency (i.e. Federal Emergency Management Agency) when construction or services work is a response to an emergency, under suballotments.

2.5.8.5. Funding for construction work by the transfer of appropriation accounts or by advances of funds is prohibited. Direct citation of funds (i.e. direct charge by the performing unit and/or activity to the funds of the ordering unit and/or activity) is also prohibited.

2.5.9. The performance or all work or services on a reimbursable basis under a construction appropriation must conform to the policies prescribed in this subparagraph:
2.5.9.1. Reimbursements earned are an additional source of obligational authority under the appropriate budget program account. Recording reimbursements for orders received is permitted for establishing obligational authority. Cost limitations for the performance of work must be observed pursuant to the terms of the orders received. Operating budgets must include estimates of reimbursable orders received or anticipated.

2.5.9.2. Reimbursements are to be budgeted and their use controlled at the Military Department level where management and control of a program is retained. In these cases, allotments of funds must be expressed in terms of total obligational authority in operating budgets of the respective operating agencies and operating units responsible for carrying out the program.

2.5.10. Authority to procure architectural and engineering services for public works and utilities projects is provided by 10 U.S.C. § 7540, 8612 and 9540. These sections, which apply to the Departments of the Army, Navy, and Air Force, and limit the amount of obligations that can be incurred for architectural and engineering services for any public works or utilities project. Specifically, these sections limit the amount of such services provided by sources outside the respective Departments to not more than six percent of the estimated cost of the project. The six percent threshold does not include costs associated with activities such as design reviews, advertisements, preparation of invitations for bids, requests for proposals, land survey, soils and/or other investigations and model studies, determination of program or project requirements, design development criteria, environmental impact statements and supporting data, or travel and per diem.

2.6 Planning and Design (170206)

2.6.1. 10 U.S.C. § 2807 authorizes the Secretary to obtain architectural and engineering services and may carry out construction design in connection with military construction projects, family housing projects, and projects undertaken in connection with the authority provided under 10 U.S.C. § 2854 not otherwise authorized by law.

2.6.1.1. Such efforts may be accomplished without specific congressional authorization for the project, provided the activities are accomplished within amounts appropriated and the estimated design costs do not exceed the amount established in 10 U.S.C. § 2807, as amended. The established limit is $1 million.

2.6.1.2. 10 U.S.C. § 2807 prescribes an obligational notice and wait period for architectural and engineering services and construction design services for which the estimated costs exceed $1 million. Before obtaining such services, the Secretary concerned will notify the appropriate committees of the Congress before the initial obligation of funds for such services. The Office of the ASD(Sustainment), Facility Investment and Management Directorate will receive copies of the Congressional notification. The Secretary concerned can only obligate the funds after the end of a 14-day period following the electronic notification to Congressional committees pursuant to 10 U.S.C. § 480. This provision applies to both the active and reserve components of the Military Departments.
2.6.2. See subparagraph 170205.J. for limitations on the amount of costs Military Departments may incur for architectural or engineering services obtained from sources outside of the respective Department.

2.6.3. Planning and design functions include:

2.6.3.1. Architectural and engineering services and construction design required for site investigation, survey, mapping, or sketches;

2.6.3.2. Preparation of cost estimates for construction and land acquisition projects;

2.6.3.3. Preparation of plans, specifications, special studies, including value engineering, and construction contract documents;

2.6.3.4. Construction management of projects funded by foreign governments for which elements of the Armed Forces of the United States are the primary users;

2.6.3.5. Development and updating of design criteria and manuals;

2.6.3.6. Preparation of standard designs and definitive drawings used on military construction projects;

2.6.3.7. Management of military construction program design and contract administrative services for design;

2.6.3.8. Certification of project cost;

2.6.3.9. Administration of architectural and engineering service contracts for the design of construction and land acquisition projects; and

2.6.3.10. Printing and reproduction of bid documents, preparing pre-bid government estimates and liaison with prospective bidders prior to award of a construction contract.

2.7 Scope of a Military Construction Project (170207)

2.7.1. Military construction projects include all acquisitions of land, regardless of cost. All requests for purchase, withdrawal from public domain, lease, or permit from individuals or government entities, or any other type of use agreement involving more than 1,000 acres, or land whose estimated purchase price or annual lease price exceeds $1 million will be submitted to the Deputy Secretary of Defense through ASD(Sustainment).

2.7.2. A military construction project includes all construction efforts, or any contribution authorized by law, necessary to produce a complete and usable facility or a complete and usable improvement to an existing facility or improvement as specifically authorized by law.
2.7.3. Military construction project funding includes equipment installed in and made a part of real property structures or improvements. Construction project funding excludes all production and movable equipment. The source and cost of all production and movable equipment directly associated with construction projects must be disclosed as additional information in presenting construction programs and budgets.

2.7.4. Construction applicable to one real property facility:

2.7.4.1. All construction proposed for a real property facility in which the same functional purpose or related functional purposes involved will be treated as one project.

2.7.4.2. All concurrent construction proposed for contiguous areas of a multi-use facility must be treated as a single project even though the construction pertains to unrelated functional purposes. For this purpose, contiguous means “in actual contact” or “touching.”

2.7.4.3. All construction proposed for a multi-use facility that is common to the facility as a whole, or common to areas in which the same or related functional purposes are performed, must be treated as a single project.

2.7.4.4. Construction proposed for a multi-use facility may be divided into separate projects if each project can be clearly defined and the result is a complete and usable facility.

2.7.5. When construction is accomplished concurrent with repair and/or maintenance work as an integrated undertaking, the construction may be treated as a separate project. Because the construction is treated as a separate project, cost limitations, notification, and other requirements associated with applicable construction projects apply. For this purpose, engineering estimates may be used to determine costs applicable to the construction portion

2.7.6. A decision as to whether one project or several projects are to be established for related efforts must be submitted for approval to the Secretary of the appropriate Military Department.

2.8 Certifications of Costs (170208)

2.8.1. Certifications of costs incurred must be prepared in accordance with the format shown in UFC 1-300-08. These certifications must include statements of total cost incurred on the project; the total cost broken out for each building, linear structure, and structure constructed as part of the project; and the total cost broken into the categories of planning and design, construction contract supervision and administration, construction costs, and project funded real property installed equipment (RPIE) costs. In connection with the statement of total costs, the types of funds obligated or the lines of accounting for the funds must be identified as well as the organization(s) responsible for funding the acquisition.

2.8.2. The certification must be completed upon completion of the contract and furnished to the accountable Service when final costs of construction are accrued. The certification must be signed by an individual within the construction agent organization responsible for and authorized
to transfer accountability and by the individual within the acquiring entity responsible for and authorized to accept accountability of the relevant properties (in most cases, the Real Property Accountable Officer).

2.8.3. A copy of the certification must be retained in a project file at each level that maintains project files.

2.9 Project Files (170209)

Project files must be maintained for each construction project. These project files must represent a complete historical record of the project from inception to completion. Correspondence and other documentation pertinent to the project should be incorporated into project files at all appropriate levels. These files may include memorandums for record pertaining to decisions resulting from discussions, meetings, and telephone conversations. Construction agents are responsible for holding the historical project files and must provide copies of the files to the acquiring entity. Any agreements or contracts with construction agents must specify the requirement for the construction agent to provide copies of such files to the acquiring entity in accordance with this paragraph on a monthly basis.

3.0 CATEGORIES OF MILITARY CONSTRUCTION PROJECTS (1703)

3.1 Specified Military Construction Projects (170301)

3.1.1. Specified military construction projects, or “major military construction” projects, include all acquisition and/or construction, additions, expansions, extensions, conversions, alterations, or replacements of:

3.1.1.1. Facilities with costs in excess of the amount specified by law as the maximum amount for a minor construction project, or

3.1.1.2. Any project, regardless of cost, approved as a specific line item in the Military Construction budget request.

3.1.2. Elements of a major construction project should include:

3.1.2.1. Surveys, demolition and site preparation;

3.1.2.2. Acquisition, conversion, rehabilitation, and installation of facilities;

3.1.2.3. Acquisition and installation of equipment and appurtenances integral to the project;

3.1.2.4. Acquisition and installation of supporting facilities (including utilities) and appurtenances incident to the project;

3.1.2.5. Supervision, administration, and overhead incident to the project; and
3.1.2.6. Design and support of design for construction projects after project approval (includes change orders, value engineering proposals, and as-built drawings).

3.1.3. Specifically excluded from major construction are those activities identified as minor construction, planning and design, or supporting activities.

3.2 Unspecified Minor Military Construction (170302)

3.2.1. Projects involving the acquisition of new construction, addition, expansion, extension, alteration, conversion, replacement, or installation of permanent or temporary facilities (except family quarters) are minor construction projects when:

3.2.1.1. The cost of the project does not exceed such amount as may be specified by 10 U.S.C. § 2805 for the Active Components and 10 U.S.C. § 18233a for the Reserve Components, and

3.2.1.2. The project has not been included in the budget request as a specific line item.

3.2.2. For other than family housing facilities, when the cost of a project is less than the amount specified in 10 U.S.C. § 2805, the project must be financed from unspecified minor construction appropriations; operations and maintenance (O&M) appropriations; research, development, test and evaluation (RDT&E) appropriations; working capital fund resources; or other resources, as appropriate. The funding source does not influence the financial statement capitalization requirements described in subparagraph 170602.A.

3.2.3. Project guidelines include:

3.2.3.1. Notwithstanding any other provisions for approval of minor construction projects, no project may be proposed to be accomplished under minor construction authority that previously has been deleted by the Congress from proposed military construction authorization legislation or otherwise disapproved of by the Congress.

3.2.3.2. Each project accomplished under the minor construction authority must result in a complete real property facility or improvement.

3.2.3.3. Each project must, to the maximum extent possible, be consistent with the appropriate installation master plan. Requests for project approval must fully disclose the relation of the project to the master plan and must detail further planned construction to the same or closely related facilities.

3.2.3.4. The planned acquisition of, or improvement to, a real property facility through a series of minor construction projects; that is, incremental type construction is prohibited.
3.2.4. Notification requirements include:

3.2.4.1. When a minor construction project costing more than amounts established in 10 U.S.C. § 18233a is undertaken, appropriate congressional committees must be notified prior to the start of the project. The project then may be carried out only after the end of the 21-day period beginning on the day the notification is received by the committees, or if earlier, the end of the 14-day period beginning on the date on which an electronic copy of the notification is provided in an electronic medium pursuant to 10 U.S.C. § 480. Funds cannot be obligated for construction until the committee approves the minor construction

3.2.4.2. 10 U.S.C. § 2805 requires the Secretary concerned to notify, in writing, the appropriate committees of Congress of a decision to undertake an unspecified minor construction project costing more than $2 million. Notification must include the justification and estimated cost of the project. The project may be carried out only after the end of the 14-day period beginning on the date notification is received by the committees in an electronic medium pursuant to 10 U.S.C. § 480.

3.2.5. Additional minor construction provisions include:

3.2.5.1. Planning and design costs are excluded from the cost determination for purposes of determining compliance with the amounts established in 10 U.S.C § 2805 for minor construction projects.

3.2.5.2. DoD Components are precluded from using materials, supplies, or items of installed capital equipment on their own minor construction projects on a non-reimbursable basis.

3.2.5.3. Prerequisites for establishing a minor construction project include identification of the required end result of the project and its correlation with the appropriate installation master plan.

3.2.5.4. It is not feasible to prescribe absolute criteria for determining what scope of work would, under all possible circumstances, properly constitutes a separate minor construction project. However, minor construction projects undertaken under the authority of 10 U.S.C. § 2805 must be consistent with the intent of the statute as to what constitutes a separate project.

3.3 Emergency and Contingency Construction (170303)

Congress provides several separate authorities for major construction during times of war and national emergency and other special situations. These authorities are:

3.3.1. Construction Authority in the Event of a Declaration of War or National Emergency

3.3.1.1. 10 U.S.C. § 2808 contains authority authorizing the Secretary of Defense to undertake military construction projects, without regard to any other provision of law, in the
event of a declaration of war or the declaration by the President of a national emergency. This adheres to the National Emergencies Act, 50 U.S.C. Chapter 34, which requires use of the Armed Forces of the United States.

3.3.1.2. Such projects must be necessary to support use of the Armed Forces and may be undertaken only within the total amount of funds appropriated for military construction, including funds appropriated for family housing, that have not been obligated. Additional guidance is contained in DoDD 3025.18 and DoDD 4270.5.

3.3.1.3. When a Secretary of a Military Department decides, in conjunction with the supported Combatant Commander, to request use of this authority, the Secretary of the Military Department will submit a request to ASD(Sustainment). This request must include:

3.3.1.3.1. **DD 1391**, Military Construction Project Data, providing justification for the project and a current cost estimate. Justification must include alternatives considered to using this authority and reasons for their non-selection.

3.3.1.3.2. An explanation of when the requirement was identified and how it was planned or programmed for execution prior to the current request.

3.3.1.3.3. A complete description of the source of funds to be used for the project, including the specific reasons as to why the funding is available and associated notifications under 10 U.S.C. § 2853, “Authorized Cost and Scope of Work Variations,” as necessary.

3.3.1.3.4. An expected timeline and acquisition method for the project (including design, milestones, construction contract award, and completion dates) assuming project approval within 30 days of submission of the request to ASD(Sustainment).

3.3.1.3.5. Rationale as to why the project should not be deferred to a future budget request.

3.3.1.4. In conjunction with a Military Department request for 10 U.S.C. § 2808 authority, the Chairman of the Joint Chiefs of Staff must certify to the ASD(Sustainment) the request satisfies Combatant Commander priorities and is consistent with theater basing plans and/or operational requirements.

3.3.1.5. Once the Secretary of the Defense has notified the Congress, the OUSD(C) will issue funds pursuant to Chapter 5. Further, increases to the estimated costs provided in the notification require OUSD(C) coordination and reissuance of the funds.

3.3.1.6. This authority will terminate at the end of the war or national emergency.
3.3.2. Emergency Construction

3.3.2.1. The Secretaries of the Military Departments and Directors of Defense Agencies may carry out a major construction project under the authority of 10 U.S.C. § 2803, after appropriate congressional notification. Additional guidance is contained in DoDD 4270.5, “Military Construction.” Emergency construction is limited to those projects where it is determined:

3.3.2.1.1. The project is vital to national security, protection of health and safety, or quality of the environment; and

3.3.2.1.2. The requirement for the project is so urgent deferral of the project for inclusion in the next Military Construction Authorization Act would be inconsistent with national security, protection of health and safety, or quality of the environment.

3.3.2.2. When a decision is made to request approval for an emergency construction project, the DoD Component concerned must submit a notification and request for reprogramming of military construction funds in accordance with the provisions of 10 U.S.C. § 2803 and Chapter 7. Each reprogramming request must include:

3.3.2.2.1. Justification for the cost of the project,

3.3.2.2.2. The current estimate of the cost of the project,

3.3.2.2.3. Justification for carrying out the project as an emergency construction project, and

3.3.2.2.4. statement as to the source of funds to be used for the project.

3.3.2.3. Emergency construction projects must be financed within amounts appropriated for military construction not obligated for other purposes. The maximum obligated amount by each Military Department in any fiscal year is established in 10 U.S.C. § 2803.

3.3.2.4. The project may be carried out only after the end of the five-day period beginning on the date the notification is received by the Congressional committees in an electronic medium pursuant to 10 U.S.C. § 480.

3.3.2.5. Except as otherwise specifically provided for, emergency construction projects will be subject to the same restrictions and limitations as major construction projects. Additionally, the identification and treatment of costs for emergency construction projects must be consistent with major construction projects.

3.3.2.6. There is no provision for emergency construction for the Reserve Components.
3.3.3. Contingency Construction

3.3.3.1. 10 U.S.C. § 2804, “Contingency Construction” and the annual Military Construction Appropriation Acts authorize projects of an urgent nature to be funded from the Contingency Construction Account. Such efforts, to the extent accomplished within amounts appropriated for such purposes, may be accomplished without specific congressional authorization for the project involved. Additional requirements on the use of operation and maintenance funds under contingency construction authority for construction projects inside the United States Central Command Area of Responsibility (AOR) or certain countries in the United States Africa Command AOR are prescribed by OUSD(C) in a memorandum located on the DoD Financial Management Regulation (FMR) website on the Policy Memoranda page (under the “Volume 3” heading) and is updated more frequently than FMR chapters. The purpose of the policy memorandum is to extend authority for a specific period, authorizing funds for military construction.

3.3.3.2. A project financed under this authority requires a determination that deferral of the project for inclusion in the next Military Construction Authorization Act would be inconsistent with national security or national interest. Additional guidance is contained in DoDD 4270.5.

3.3.3.3. Use of this authority requires approval by the Secretary of Defense and written notification to the appropriate committees of Congress.

3.3.3.4. When a decision is made to request approval for a contingency construction project, the DoD Component concerned must submit a notification and request for reprogramming of military construction funds in accordance with the provisions of 10 U.S.C. § 2804 and Chapter 7. Each reprogramming request must include:

3.3.3.4.1. Justification for the cost of the project,

3.3.3.4.2. The current estimate of the cost of the project, and

3.3.3.4.3. Justification for carrying out the project as a contingency construction project.

3.3.3.5. Actual construction may not commence prior to the receipt of appropriate DoD and congressional approval. The project may be carried out only after the end of the seven-day period and beginning on the date the notification is received by the appropriate in an electronic medium pursuant to 10 U.S.C. § 480.

3.4 Environmental Response Actions (170304)

3.4.1. Authority for environmental response actions is provided under 10 U.S.C. subtitle A, Part IV, Chapter 160, “Environmental Restoration.” Under the provisions of 10 U.S.C § 2707, “Environmental Restoration Projects for Environmental Responses,” the Secretary of Defense or the Secretary of a Military Department may carry out an environmental restoration project if that Secretary determines the project is necessary to carry out a response under Chapter 160 or the

3.4.2. Any construction, development, conversion, or extension of a structure, and any installation of equipment, included in an environmental restoration project may not be considered military construction.

3.4.3. The United States Department of the Treasury (Treasury) Fund Symbol ***X0810, “Environmental Restoration” has been established by 10 U.S.C § 2703, “Environmental Restoration Accounts” for the conduct of environmental restoration projects. (Replace *** with appropriate DoD or Military Department identifier.) This account will be credited with:

3.4.3.1. Amounts appropriated to this account by Congressional action,

3.4.3.2. Amounts recovered under CERCLA for response actions, and

3.4.3.3. Any other amounts recovered from a contractor, insurer, surety, or other person to reimburse the DoD or a Military Department for any expenditure for environmental response activities.

3.4.4. Use of Funds

3.4.4.1. The Environmental Restoration Account described in this paragraph is the only source of funds to conduct environmental restoration projects at a site under the jurisdiction of the DoD or at a formerly used defense site, except for certain Base Realignment and Closure sites.

3.4.4.2. In the case of property disposed of pursuant to a base closure law and subject to certain CERCLA provisions, the sole source of funds for environmental restoration is the applicable DoD base closure account. See 10 U.S.C. § 2703 for additional provisions.

3.4.4.3. No funds appropriated to the Environmental Restoration Account, or to any environmental restoration account of a Military Department may be used for the payment of a fine or penalty (including any supplemental environmental project carried out as part of such penalty) imposed against the DoD or a Military Department, except as provided in 10 U.S.C. § 2703, paragraph f.

3.4.5. See Volume 4, Chapter 13 for the accounting policy for measuring, recognizing, and disclosing environmental liabilities.

3.5 Restoration or Replacement of Damaged or Destroyed Facilities (170305)

3.5.1. The Secretaries of the Military Departments and the Secretary of Defense may repair, restore or replace a facility damaged or destroyed and for which legislative authorization and appropriation has not been provided.
3.5.2. 10 U.S.C. § 2854, “Restoration or Replacement of Damaged or Destroyed Facilities,” requires Congress be notified in writing when the cost of a project is greater than the amount specified in 10 U.S.C. § 2805 for minor construction. See Chapter 7.

3.5.3. When a decision is made to request approval for restoration or replacement of damaged or destroyed facilities, the applicable DoD Component concerned must submit a request in accordance with the provisions of 10 U.S.C. § 2854 and Chapter 7. Each reprogramming request must include:

3.5.3.1. Justification for, and the current estimate of, project cost; and

3.5.3.2. A statement as to the source of funds to be used for the project.

3.5.4. Restoration or replacement projects must be financed within amounts appropriated that have not been obligated for other purposes.

3.5.5. A replacement project under this section may be carried out only after the end of the seven-day period beginning on the date on which a copy of the notification in an electronic medium pursuant to 10 U.S.C. §480.

3.6 Defense Access Roads (170306)

3.6.1. 23 CFR Part 660, Subpart E, states the defense access roads program provides a means by which the Federal government may pay its fair share of the cost of:

3.6.1.1. Highway improvements needed for adequate highway service to defense and defense related installations;

3.6.1.2. New highways to replace those, which must be closed to permit establishment or expansion of defense installations;

3.6.1.3. Repair of damage to highways caused by major military maneuvers;

3.6.1.4. Repair of damages due to the activities of contractors engaged in the construction of missile sites; and

3.6.1.5. Missile routes to ensure their continued ability to support the missile transporter-erector vehicle.

3.6.1.6. Funds appropriated for the purposes of this section must be available to pay the cost of repairing damage caused to for any infrastructure to mitigate the risks posed to, highways by recurrent flooding and sea level fluctuation, if the Secretary of Defense must determine continued access to a military installation has been impacted by past flooding and mean sea level fluctuation.
3.6.2. Authorization for the funding of the construction and maintenance of defense access roads is provided by 23 U.S.C. § 210, “Defense Access Roads.” Defense access roads, including bridges and tunnels, provide access to military reservations, to defense industries and defense industry sites, and to the sources of raw materials when such roads are certified as important to the national defense by the Secretary of Defense or such other official as the President may designate. In addition, DoD may replace existing highways and highway connections that are shut off from the general public use by necessary closures or restrictions at military reservations and defense industry sites.

3.6.3. Highways located within the boundaries of a military reservation are not eligible for financing from these funds. Such highways must be funded from major construction, emergency construction, or minor construction programs, as applicable. Additionally, projects in the regular Federal Air Primary Systems normally are not considered eligible for financing with these funds.

3.6.4. Funds available for Defense access roads can be provided to the Department of Transportation (DoT) via a Standard Form (SF) 1151, Nonexpenditure Transfer Authorization, or the effort may be carried out by DoT on a reimbursable basis.

3.7 Relocatable Buildings (170307)

3.7.1. A relocatable building is a habitable prefabricated structure designed and constructed to be readily moved, erected, disassembled, stored, and reused. Also included in the definition are tension fabric structures assembled from modular components and air-supported domes, both of which can be easily disassembled, moved, and reused. This definition excludes mobile military equipment such as communications vans, emergency management and command post trailers. Also excluded are tents, modular sheds less than 500 square feet, temporary contractor trailers, and temporary government construction administration trailers located on, or in the vicinity of, a construction site.

3.7.2. DoDI 4165.56, “Relocatable Buildings,” provides DoD guidance for the acquisition and use of relocatable buildings. This instruction provides relocatable buildings may be acquired, stored, and used within DoD when these facilities constitute the most feasible and economical means of satisfying short-term interim facility requirements pending the availability of permanent space in existing facilities or through the construction of a permanent conventional facility. An interim facility requirement is a short-term requirement (normally 5 years or less) for facilities due to transitory peak military missions, deployments, military contingency operations, or disaster relief requirements, or other urgent requirements. Relocatable buildings also may be used instead of conventional, permanent construction when the duration of the requirement is uncertain such as in a contingency operation pursuant, or instead of conventional, permanent construction when the space is known to have a recurring mobile requirement, such as the need to move a field office to different sites on a training range.

3.7.3. Buildings, which meet the definition of relocatable buildings, may be classified as personal property when purchased as an equipment item, and if so, must be acquired with funds available for O&M, RDT&E or Procurement funds, as appropriate.
3.7.4. The acquisition of buildings, to include modular facilities, which do not qualify as relocatable buildings under applicable policy, must be acquired as military construction. The rules for Specified Military Construction Projects (see paragraph 170301), Unspecified Minor Military Construction (see paragraph 170302), Emergency and Contingency Construction (see paragraph 170303) or other applicable authority must be applied. Site preparation to erect or install relocatable buildings resulting in real property improvements is classified as construction and is funded with O&M or military construction in accordance with 10 U.S.C. §§ 2801 and 2805.

3.7.5. Costs for set up, disassembly, maintenance, refurbishment, packaging, and transporting relocatable buildings classified as equipment are expenses and must be appropriately charged to appropriations available to fund such costs.

3.7.6. Relocatable buildings may be authorized and acquired as real property. Relocatable buildings acquired as real property are funded with either O&M or Military Construction funds depending on the total acquisition cost in accordance with the cost thresholds for construction pursuant to 10 U.S.C. §§ 2801 and 2805. In determining the threshold, the cost of the relocatable building will be based on the total cost of the completely assembled building and not on the separate components, and includes all site work.

4.0 EFFORTS FINANCED BY MILITARY CONSTRUCTION APPROPRIATIONS (1704)

4.1 Funded Costs (170401)

Except as prescribed in section 1705, major costs incurred during the design and construction phases are funded from applicable military construction appropriations. These costs include, but are not necessarily limited to:

4.1.1. All materials, supplies, and services applicable to the project;

4.1.2. RPIE, unless such equipment was obtained on a non-reimbursable basis from another DoD Component or federal agency;

4.1.3. Transportation costs applicable to materials, supplies, and government owned equipment;

4.1.4. Labor costs, including construction units composed of foreign nationals but excluding U.S. military labor;

4.1.5. The portion of installation overhead or support costs that can be identified as representing additional costs that would not have been incurred were it not for the project;

4.1.6. Supervision, inspection and overhead costs charged by the USACE and the NAVFEC when serving as the design and/or construction agent;

4.1.7. Travel and per diem related to applicable military or civilian labor;
4.1.8. The portion of costs applicable to the O&M of Government owned equipment, computed on an hourly rate in accordance with Volume 11A, Chapter 1, Table 1-1;

4.1.9. For specified major construction projects, planning and design costs described in paragraph 170206; and

4.1.10. Cost of remediating unknown environmental contamination within the footprint of a military construction project.

4.2 Overhead Expenses (170402)

All overhead expenses for the military construction program, including work for others, initially are financed from the performing military construction appropriation. These expenses are distributed to projects, including work for others. Military construction overhead includes:

4.2.1. Personal services (and support costs) at field and headquarters activities related to the military construction program;

4.2.2. Contract administration;

4.2.3. Military construction program and project management (including post construction evaluation);

4.2.4. Technical direction and coordination of projects;

4.2.5. Land planning studies or reports, appraisal, and title search after congressional authorization of a land acquisition or exchange; and

4.2.6. Project management and administration not otherwise identified in this paragraph.

*4.3 Reimbursable Project Costs (170403)

The appropriation or fund financing a construction project must reimburse other appropriations or funds, as applicable, for costs initially financed by another appropriation or fund. Reimbursement between appropriations must be made using FS Forms 7600A/B and include supporting documentation the of performance, receipt, and acceptance by using the G-Invoicing system. In instances where G-Invoicing is not available, DoD Components must use hardcopies of FS Forms 7600A/B and DD 1354 or DD 250, Material Inspection and Receiving Report. Additionally, the SF 1080, Voucher for Transfers Between Appropriations and/or Funds, may be necessary for fund transfers.
5.0  RELATED COSTS FINANCED BY OTHER THAN MILITARY CONSTRUCTION APPROPRIATIONS (1705)

5.1  Unfunded Costs (170501)

5.1.1.  Some military construction costs are identified as unfunded costs. However, such costs must be capitalized as part of the value of the property. Unfunded costs:

5.1.1.1.  Contribute to a military construction project,

5.1.1.2.  Are financed from appropriations other than military construction, and

5.1.1.3.  Are not reimbursed by appropriations available for military construction.

5.1.2.  Unfunded costs include:

5.1.2.1.  Costs financed from military personnel appropriations;

5.1.2.2.  Costs applicable to the depreciation of government owned equipment computed on an hourly rate in accordance with Volume 11A, Chapter 1, Table 1-1;

5.1.2.3.  Unfunded civilian fringe benefit rates for DoD civilian personnel as prescribed in Volume 11A, Chapter 6, Appendix C, “Civilian Personnel Fringe Benefit;”

5.1.2.4.  Gifts from private parties;

5.1.2.5.  In-kind considerations; and

5.1.2.6.  Materials, supplies, and items of RPIE obtained specifically for a project on a non-reimbursable basis, either as excess distributions from another DoD Component or as excess distributions from other federal agencies. (A DoD Component is precluded from using materials, supplies, or items of RPIE on its own minor construction projects on a non-reimbursable basis).

5.1.3.  Planning and design costs are excluded from the cost determination for purposes of determining compliance with the amounts established in 10 U.S.C. § 2805 for minor construction projects.

5.2  Advance Planning (170502)

5.2.1.  Advance planning activities generally are performed prior to funding and design authorization of a construction project by the military component. Advance planning and design activities include, but are not limited to:

5.2.1.1.  Developing the requirements for a military construction project (project formulation),
5.2.1.2. Developing a master plan for an installation,

5.2.1.3. Initial explorations of project alternatives and rough drawings,

5.2.1.4. Facilities related management studies,

5.2.1.5. Conceptual analyses,

5.2.1.6. Making alternative site studies,

5.2.1.7. Developing and validating military construction project documentation prior to commencing project design,

5.2.1.8. Preparing engineering analyses and studies to develop technical design parameters prior to commencing project design, and

5.2.1.9. Preparing environmental impact assessments and statements.

5.2.2. Advance planning costs are excluded from the cost determination for purposes of determining compliance with the amounts established in 10 U.S.C. § 2805 for minor construction projects. See subparagraphs 170301.B and 170302.F. Advance planning is not encompassed by, and should not be performed under, the authority for military construction project planning and design efforts, such as 10 U.S.C. § 2807 or 18233(f).

5.2.3. Advance planning costs are financed from applicable O&M appropriations, RDT&E appropriations, procurement appropriations, or working capital fund resources, as appropriate.

5.2.4. Advance planning costs are expensed in the period incurred.

5.3 Minor Construction (170503)

For other than family housing projects, when the cost of a minor construction project is less than the amount established in 10 U.S.C. § 2805, the project must be financed from unspecified minor construction appropriations, O&M appropriations, RDT&E appropriations, working capital funds resources, or other resources, as appropriate. See paragraph 170302.

5.4 Family Housing (170504)

All family housing construction projects must be funded from applicable family housing appropriations. Policy concerning funding of family housing efforts is addressed in Volume 2B, Chapter 6.
*5.5 Equipment and Relocatable Items (170505)

5.5.1. The following must be financed from O&M, RDT&E, or Procurement appropriations or working capital fund resources, as appropriate:

5.5.1.1. Items of equipment are moveable and not affixed as an integral part of a facility;

5.5.1.2. Any operational equipment for which installation mountings and connections are provided in the building design and are detachable without damage to the building or equipment; and

5.5.1.3. The costs of alterations to install movable equipment not affixed as an integral part of a facility.

5.5.2. Examples of equipment or relocatable items are:

5.5.2.1. Equipment including all types of production processing technical, training, servicing, RDT&E, and pre-wired work stations;

5.5.2.2. Prefabricated screens, partitions, false floors, platforms, and shielding for electromagnetic radiating services;

5.5.2.3. Temporary removal and reinstallation or portions of existing walls, roofs, utility systems, and appurtenances to permit installation of equipment; and

5.5.2.4. Secondary utility work necessary to connect equipment to existing utilities services within a facility between the primary entry and source of utilities into the structure and the equipment to be served.

5.6 Recycling Programs (170506)

Projects for pollution abatement, energy conservation, and occupational safety and health activities may be funded from other than the military construction appropriation when the cost of a project:

5.6.1. Is funded from the proceeds of sales of recyclable material in accordance with Volume 11A, Chapter 5 and 10 U.S.C. § 2577, “Disposal of recyclable materials,” and

5.6.2. Does not exceed 50 percent of the amount established by law as a maximum amount for minor construction projects in accordance with 10 U.S.C. § 2577.
6.0 RECOGNITION AND REPORTING REQUIREMENTS (1706)

6.1 Acceptance of Real Property (170601)

The acceptance of real property by an accountable Military Department or the Washington Headquarters Service, as well as the transfer between DoD Components, or to or from other federal agencies, must be documented. UFC 1-300-08 provides comprehensive guidance on the documentation of real property acceptance throughout the DoD by identifying the use of a draft, interim, and final version of the DD 1354. It also describes how the DD 1354 is used as part of a real property business process and defines the roles and responsibilities in the DD 1354 process. Though the DD 1354 is the basic source document, it typically does not stand-alone. UFC 1-300-08 lists examples of additional documents that should be provided with and attached to the DD-1354 such as, but not limited to, an approved work order, an authorization memorandum, information from contracts and contract modifications, and invoices. Additional information is in Volume 4, Chapter 24.

6.2 Accounting Recognition (170602)

6.2.1 Capitalization of Assets

6.2.1.1 Capitalization is the process of recognizing the total costs of an asset, including property, plant, and equipment, in the financial records. Volume 4, Chapters 24 – 28 define capitalized general property, plant, and equipment as assets that meet four criteria:

6.2.1.1.1 Have an estimated useful life of two years or more,

6.2.1.1.2 Are not intended for sale in the ordinary course of operations,

6.2.1.1.3 Are acquired or constructed with the intention of being used or being available for use by the entity, and

6.2.1.1.4 Have a recorded cost that equals or exceeds the appropriate DoD capitalization threshold. See Volume 4, Chapters 24 - 28 for DoD capitalization threshold amounts.

6.2.1.2 All significant costs related to the construction or acquisition of an asset, including unfunded costs identified in paragraph 170501, must be recognized in capitalizing the costs of a project. The source of funding has no bearing on the capitalization of assets. See Volume 4, Chapters 24 - 28 for additional information regarding recognized and capitalized costs.

6.2.1.3 All costs following the project approval and funding authorization by the DoD Component must be capitalized.

6.2.1.4 Direct costs incurred in the design and construction phases of a project must be charged to a specific project. Other costs (listed in paragraph 170402) that are financed by military construction and subject to capitalization must be identified to the appropriate indirect cost groups for subsequent allocation to supervision, inspection and overhead cost pools.
6.2.2. Amounts to be Expensed

6.2.2.1. Costs incurred in the advance planning must be expensed in the period incurred. See paragraph 170502. These costs are not capitalized as part of the asset.

6.2.2.2. When a project is abandoned, the total cost incurred must be expensed consistent with Volume 4, Chapters 24 -28 and Volume 4, Chapter 17.

6.3 Financial Reporting (170603)

6.3.1. United States Standard General Ledger

6.3.1.1. The USSGL must be used in all DoD accounting systems for all appropriations and funds for the purpose of summarizing costs and obligations in budgets, accounting for costs and reporting these costs. (See the USSGL Treasury Financial Manual and Volume 1, Chapter 7.) The USSGL accounts and transactions applicable within DoD are documented in the SFIS Transaction Library and DoD Standard Chart of Accounts. Use of these accounts is required in order to classify costs for the joint purposes planning, programming, budgeting, and accounting for construction projects.

6.3.1.2. The management of an activity performing a construction project is responsible for ensuring that all significant costs (that is, both funded and unfunded costs) are recorded for the project and that all costs subject to capitalization are included in the real property asset accounts, property records, and reports submitted to the OSD and the Congress.

6.3.1.3. Cost accounting modules for accumulating and controlling construction projects must be integrated with an activity’s overall accounting system. Cost accounting systems represent a subsidiary ledger of the general accounting system. Therefore, cost accounts, as appropriate, must be established for each project. Policy for managerial cost accounting is prescribed in Volume 4, Chapter 19.

6.3.1.4. Charges to an account must be categorized in one of the four construction phases addressed in Appendix A. The four phases addressed in Appendix A identify those costs that will be expensed and those costs that will be capitalized.

6.3.2. Specific Entries

Construction In Progress is USSGL account 172000 which can be subdivided. The Construction in Progress is used to accumulate and control costs as prescribed in Volume 4, Chapters 24 - 28. Also, see the USSGL, SFIS Transaction Library, and Volume 1, Chapter 7 for accounting entries.

6.3.3. Financial Reports

6.3.3.1. Accounting records must be designed to permit summarization of financial transactions producing accurate and timely information from one system of accounts. Data must
be in formats prescribed for budget and financial reports. Additionally, management data may be required in executing financial oversight. Records and costs must be designed and maintained to facilitate audits of project amounts.

6.3.3.2. Each military construction appropriation account must be reported monthly in the “Report of Appropriation Status by Fiscal Year Program and Subaccounts,” Accounting Report Monthly 1002. The report must be prepared as prescribed in Volume 6A, Chapter 4.
APPENDIX A: PHASES OF MILITARY CONSTRUCTION

Congressional authorization of major construction projects typically represents the culmination of planning, programming, and budgeting efforts. A project evolves from a determination that a facility deficit exists. The need is defined, given a priority ranking, and placed in competition with other projects for available resources. The project definition effort begins at the installation level and moves through the chain of command until the project ultimately is included in the budget submittal. Table 1 to this appendix, “Evolution of a Fiscal Year 2021 Military Construction Project,” depicts the life cycle of a military construction project and shows the process could take three to seven years from conception to completion. The actual design phase could take one to two and a half years, while the construction phase could take one to three years. The remaining time is for planning, programming, budgeting and procurement activities. The scope and cost of each project must be finalized before the annual budget submission to the Congress. The total construction process consists of four phases:

1.0 ADVANCED PLANNING AND PROGRAMMING

1.1 Planning. During planning, an installation’s facility requirements are derived from the installation’s mission. The need to acquire additional facilities, or to modernize or replace existing facilities, is determined by an assessment of how existing facilities meet the installation’s facility requirements.

1.2 Programming. During programming, requirements are matched with anticipated resources and included in a long-range acquisition and recapitalization plan. Installation plans are combined into a Component wide basis to ensure compatibility with the nation’s military strategy, Component priorities and guidance, and in consideration of the Department of Defense (DoD) facilities investment goal.

1.3 Investment Goal. The DoD and the Congress recognize that a minimum level of facilities investment must be reached each year to protect existing investment facilities, ensure facilities continue to satisfy designated purposes, and renew aging installations. The physical plant must be capable of supporting operational requirements and readiness, both today and in the future. The investment goal is to recapitalize facilities at an appropriate rate given their estimated service life.

1.4 Master Planning. Facility requirements are reflected in an installation master plan. This document is the installation’s long-range strategy for development. It prescribes overall facility quality standards and architectural themes and addresses such areas as land use, utility systems, roads and parking.

1.5 The cost of the efforts described in subparagraphs 1.a through 1.d are normally expensed and not capitalized.

1.6 Project Advanced Planning and Programming. After it is determined a construction project is needed, a general description of the project requirement, scope, cost estimate, and supporting documentation is submitted as part of the installation’s military construction budget request.
2.0 BUDGETING

2.1 DoD Components determine which facility projects should be included in their Military construction budgets. Some facility projects may qualify for inclusion in other budgets, such as Procurement, Research, Development, Test and Evaluation, Operations and Maintenance or for accomplishment with nonappropriated funds.

2.2 The budget requests are forwarded to Office of the Secretary of Defense (OSD), where all programs are reviewed for compliance with DoD objectives and policies and modified as necessary to ensure consistency and conformity. Once the request has been jointly reviewed and approved by OSD and OMB, it is submitted to Congress as part of the President’s Budget.

2.3 After receipt of the President’s Budget, it is reviewed by oversight subcommittees of the House and Senate Appropriations Committees, House National Security, and Senate Armed Services Committees. Often, witnesses from respective DoD Components, and sometimes from the private sector, appear before the subcommittees to furnish further information on specific programs and projects.

2.4 Upon completion of its review, each subcommittee marks up the budget request and forwards its recommendations for approval to the full committee and then to the full chamber. Differences between the projects approved by the House and Senate are resolved in joint conferences. The Congress passes separate authorization and appropriation bills that, when signed by the President, become the approved Military Construction program.

2.5 The cost of these efforts is normally expensed and not capitalized.

3.0 DESIGN

3.1 Once a Military Department has validated the requirement and priority of a military construction project and inserted it in a specific fiscal year program, a design instruction is issued to the design agent who initiates the design process.

3.2 Design may be accomplished by contracting with an architect-engineer firm, a design build firm, or an in-house professional staff. If the design is to be contracted, Title 10, United States Code, section 2855 will be followed.

3.3 Design is accomplished in predetermined phases to assure requirements are addressed properly in the design and that established standards and criteria are met. The number of phases and detail required for each phase varies with each project, depending on complexity, special interest, high visibility, time constraints, and funding level.

3.4 Normally, the critical point is the preliminary design stage (referred to as the 35 percent stage) since this stage provides sufficient detail to define scope, criteria, and cost estimates for consideration in the budgeting process. The content of the 35 percent design submittal is defined in the contract scope of work and will vary depending on the contract delivery strategy to be used to acquire the facility. The most typical strategy is a design based on a unique effort. However,
design could also be a strategy such as site adapt, a performance specification using commercially available building systems, or a design build, but each of these contracting processes determines the content of the 35 percent design submittal.

3.5 Design includes such actions as the development of design manuals, software programs, guide specifications and standards, standard drawings, extensive site investigation, analysis of alternative solutions, development of building systems layout, outline specifications, cost estimates, and special studies including value engineering.

3.6 The final design phase is initiated after thorough review by the using activities to ensure requirements and criteria were addressed properly in the preliminary design documents, the project has been revalidated, and is still in the budget. Upon completion of the work drawings, contract specifications, and bidding documents, the project is ready to be advertised for construction. Projects require both congressional authorization and appropriation before a construction contract can be awarded.

3.7 The cost of these efforts, including administrative and overhead support costs, must be capitalized.

4.0 CONSTRUCTION

4.1 Normally, military construction projects are awarded through a competitive bid process and advertised in “Contract Opportunities,” using sealed bid procedures and awarding a firm fixed price contract to the contractor submitting the lowest acceptable bid. However, as discussed previously for the design phase, alternative contracting delivery strategies may be followed in accordance with the Federal Acquisition Regulation and congressional direction. Regardless of the method used, all requirements for construction contacts over $25,000 must be advertised in “Contract Opportunities” to include details of the bidding procedures to be used.

4.2 Advertisement, award, and administration of a construction contract require both in-house and contract efforts including reproduction of bid documents, preparation and response to the advertisement, supervision, and administration and inspection throughout the life of the construction project, in addition to the total cost of the construction contract.

4.3 The cost of these efforts must be capitalized.

CHAPTER 18

PUBLIC ENTERPRISE AND TRUST FUNDS

1.0 GENERAL (1801)

This chapter identifies the policies and procedures to guide budget execution for public enterprise and trust funds.

2.0 BACKGROUND (1802)

2.1 Applicable Funds (180201)

This guidance is applicable to the following Funds:

Public Enterprise Funds
- National Defense Stockpile Transaction Fund
- Pentagon Reservation Maintenance Revolving Fund (PRMRF)
- National Defense Sealift Fund
- Buildings Maintenance Fund (BMF)

Trust Funds
- National Security Education Trust Fund
- Department of the Navy Trust Revolving Funds *
- Department of the Air Force Trust Revolving Funds *
- Surcharge Collections, Sales of Commissary Stores, Defense

*Exempt from apportionment

2.2 The Corpus (180202)

The term “corpus” commonly refers to the resources available as capital in a fund. Capital resources are provided to commence or increase the size of a fund. The initial corpus is usually provided by a direct appropriation. It forms the nucleus of resources used to acquire items needed to perform the mission of the fund. Existing resources, transferred as capitalized assets, may also serve the same purpose as an appropriation to start, increase the size, or replace significant losses of a public enterprise or trust fund.

2.3 Revenues (180203)

Department of Defense (DoD) public enterprise or trust funds generate revenues from the sale of goods or services to customers. Customer reimbursements replenish the corpus for resources obligated and expended to fulfill the customers’ orders.
2.4 Apportionment (180204)

In public enterprise or trust funds that are apportioned by the Office of Management and Budget (OMB), the ability to incur obligations is limited to the amount apportioned on the Standard Form (SF) 132, Apportionment and Reapportionment Schedule. Budgetary resources and authority available for apportionment include:

2.4.1. New budget authority (appropriations)
2.4.2. Unobligated balances available from the prior fiscal year
2.4.3. Spending authority from offsetting collections (reimbursements and other income)
2.4.4. Recoveries of prior year obligations
2.4.5. Restorations
2.4.6. Contract authority

2.5 Apportionment of Anticipated Reimbursements (180205)

The apportionment of spending authority (commonly referred to as “reimbursable authority”) reflects anticipated reimbursements; it does not authorize a public enterprise or trust fund to obligate its apportioned reimbursable program in excess of the funded orders received from within the Federal Government and advances received for orders outside the Federal Government.

2.6 Assets (180206)

Physical assets such as inventories or buildings and equipment are not budgetary resources because they do not provide a direct monetary source for outlays that liquidate budgetary transactions (obligations). Such assets, therefore, do not increase the amount of obligation authority available when calculating unobligated balances.

2.7 Contract Authority (180207)

Contract authority provides legal authority to enter into contracts and incur obligations before budgetary resources are available. Obligations incurred using contract authority may not be liquidated until funded by offsetting collections or other budgetary resources. The apportionment limits the amount of contract authority available for obligation.

2.8 Anti-Deficiency Act (180208)

Incurring or authorizing obligations in excess of apportioned budgetary resources is a potential violation of the Anti-Deficiency Act that must be reported in accordance with DoD Directive 7200.1. This reporting requirement applies whether or not a public enterprise or trust fund has unapportioned budgetary resources or other assets greater than the amount of the deficiency.
3.0 EXECUTION REQUIREMENTS (1803)

3.1 Apportionment and Reapportionment (180301)

The appropriate OUSD(C) (P/B) Directorate (e.g., Revolving Funds, Investment, etc.) submits requests for public enterprise and trust fund apportionments and reapportionments to the OUSD(C) (P/B) Directorate for Program and Financial Control (P&FC), in accordance with Chapter 2.

3.2 Annual Operating Budget (180302)

The appropriate OUSD(C) (P/B) Directorate issues an initial Funds Authorization Document (FAD) in accordance with Chapter 2 or an initial Annual Operating Budget (AOB) in accordance with Chapter 19 for each public enterprise or trust fund prior to the beginning of the fiscal year. To avoid potential violations of the Anti-Deficiency Act, each Component using a fund to finance activities is responsible for taking actions to maintain a positive cash balance and restrict obligations to the amount authorized in the AOB or FAD.

3.3 Adjusting Component Resources (180303)

Components periodically request that OUSD(C) (P/B) adjust their obligation limits based on execution. The appropriate OUSD(C) (P/B) Directorate will evaluate the Component’s request based on the merit of the justification provided, unless Congress has provided a specific limitation or other direction that would preclude making the adjustment. If approved, the OUSD(C) (P/B) will request reapportionment from OMB and, upon reapportionment, provide a revised FAD or AOB to the Component.

3.4 Execution Review (180304)

The appropriate OUSD(C) (P/B) Directorate reviews the monthly SF 133, Report on Budget Execution, for each account to compare actual results with plans provided by the Components. Reviewed elements include obligations, disbursements, collections, revenue, expense, net operating results, civilian full-time equivalents (FTEs), and military strength, if applicable. When execution deviates significantly from plan, the OUSD(C) (P/B) analyst and the Component will mutually determine the management actions that may be required to bring execution back into line with the plan, or revise the plan to be more consistent with current realistic expectations.
**VOLUME 3, CHAPTER 19: “DEFENSE WORKING CAPITAL FUND”**

**SUMMARY OF MAJOR CHANGES**

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an * symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by **bold, italic, blue and underlined font**.

The previous version dated October 2008 is archived.

CHAPTER 19

DEFENSE WORKING CAPITAL FUND

1.0 GENERAL PROVISIONS (1901)

This chapter provides the policies and procedures to guide budget execution for the Defense Working Capital Fund and other revolving funds where applicable.

2.0 BACKGROUND (1902)

*2.1 Policy (190201)

This guidance is applicable to the Defense Working Capital Fund (DWCF), which includes the five DoD Component Working Capital Funds (WCF) (DWCF sub-account) and all individual DWCF activities within these accounts. In addition, this chapter provides guidance for the Commissary Trust Fund, National Defense Stockpile Fund, Pentagon Renovation Maintenance Revolving Fund, and Building Maintenance Fund where applicable.

*2.2 Defense Working Capital Fund (190202)

2.2.1. Organization. The DWCF is established under the authority of Title 10, United States Code (U.S.C.), Section 2208. The Treasury Account Symbol for the DWCF is 97X4930. The Military Departments and Defense Agencies sub-numbered account identifiers are shown in the below table.

2.2.2. DWCF Activities. The DWCF consists of individual DWCF Activities that are managed by DoD Components for providing goods and services to other DoD activities and to non-DoD activities when authorized. As of the publication date, the DWCF activities in each sub-account are:

- Army: Supply; Industrial Operations.
- Navy: Navy Supply; United States Marine Corp (USMC) Supply; Fleet Readiness Centers (Aviation Depots); USMC Depot Maintenance; Base Operations; Transportation; Research and Development.
- DeCA: Resale Stocks; Operations.
2.2.3. **Authorized Customers.** Customers of the DWCF activity may be:

2.2.3.1. Any DoD command, organization, office, or other element.

2.2.3.2. Non-DoD federal government agencies.

2.2.3.3. Private parties and concerns when authorized by law, including foreign governments, and state and local governments.

2.2.3.4. Those United States manufacturers, assemblers, or developers authorized by Title 10, U.S.C., Section 2208(h) and in accordance with Title 10, U.S.C., Section 2563 and Section 4543.

2.2.4. **Direct Appropriations.** Direct appropriations (e.g. Procurement, Operation & Maintenance) may be used to start or fund readiness costs not related to the specific DWCF activity operating mission. Direct appropriations may also be used to increase the size of or replace significant losses in a DWCF activity. Existing resources in other accounts may be transferred to a working capital fund as capitalized assets to serve these same purposes in lieu of an appropriation.

2.2.4.1. Resources used to establish or increase the size of a working capital fund are commonly referred to as “the corpus (total investment) of DWCF.” (This is not the same as the “cash corpus” financial metric. See Volume 2B, Chapter 9, Section 090103 for DWCF cash policy.) The corpus (or total investment) is the sum of all resources used to acquire the items needed to perform the working capital fund’s mission. Financial resources to replenish the initial working capital and permit continuing operations are generated by the acceptance of customer orders.

2.2.4.2. Direct appropriations may be provided to DWCF activities for specific purposes such as war reserve materiel, overseas contingency operations, and expanded inventory requirements, or other purposes as approved by the Director, Revolving Funds. The receipt of the appropriation provides an immediate infusion of cash to the Fund Balance with Treasury (FBWT) and the appropriation amount used must be accounted for and reflected on accounting records (AR) 1307 and budgetary reports (SF-133). The amount of the appropriation does not impact the cumulative results of operations. However, it does increase budgetary resources and the sub-account FBWT and is factored into unobligated budgetary resources brought forward from previous fiscal years. In other words, direct appropriations may be available for obligation in subsequent fiscal years.

*2.3 Revenues (190203)*

The DWCF generates revenues predominantly from appropriations used by federal agencies to purchase goods or services. The DWCF uses the revenue collected from these “customers” to pay for the resources required to produce the specific goods or service documented on the customer order. That is, the DWCF uses resources from funded customer orders to replenish its corpus for resources expended to fulfill those customer orders.
*2.4 Customer Orders (190204)

Customer orders (funded requests for goods or services) provide budgetary resources necessary to finance operations for non-supply management activities, and to liquidate contract authority. Budgetary resources are recognized from customer orders that obligate budgetary resources of another federal government activity, and from cash advances from non-federal customers, to include orders from non-appropriated fund instrumentalities.

2.4.1. Customers must comply with statutory limitations and restrictions imposed on the appropriated funds charged when placing an order with the DWCF. A DWCF customer cannot use appropriated funds to do indirectly (i.e., through placement of an order with a DWCF activity) that which it is not permitted to do directly. Thus, the availability of an appropriation funding an order cannot be expanded or changed by placement with an activity financed by the DWCF.

2.4.2. Appropriated funds cited on reimbursable orders are available only for the purposes permissible under the source appropriation and remain subject to the same restrictions. The ordering activity retains primary responsibility for determining the applicability of the appropriated funds cited on the order. However, if instances arise when it is apparent that the ordering appropriation is not appropriate for the purpose provided, then the DWCF activity should return the order with a request for an applicable appropriation cite.

2.4.3. The Office of Management and Budget (OMB) circular A-11 does not restrict collections from federal sources in advance of the performance of customer orders. However, Title 10, U.S.C. Section 2208 restricts cash advances to the DWCF from federal government activities to $1 billion and only when operating resources significantly fall below outlay requirements. See Volume 2B, Chapter 9, paragraph 090103.

*2.5 Obligation authority (190205)

Obligation authority is the authority to incur costs, on behalf of the federal government, that will result in a disbursement from the FBWT.

2.5.1. The OMB apportions authority to obligate to the OUSD(C) on an SF-132 “Apportionment and Reapportionment Schedule.” The authority to incur obligations is limited to the amount of authority approved for obligation during the budget review as amended by events during the year of execution. The OUSD(C) Revolving Funds Directorate prepares and submits the SF-132 to the OMB for approval of annual obligation authority required for operating a revolving fund. The approved apportionment restricts the authority to occur obligations and is the source document for the Annual Operating Budget (AOB) issued by OUSD(C) Revolving Funds. Budgetary resources available for apportionment include:

2.5.1.1. New budget authority (direct appropriations).

2.5.1.2. Unobligated balances brought forward (i.e., unfilled customer orders).

2.5.1.3. Spending authority from offsetting collections (i.e., Reimbursements for
goods and services provided and/or other income).

2.5.1.4. Recoveries of prior year obligations.

2.5.1.5. Restorations.

2.5.1.6. Contract authority.

2.5.2. When an activity receives budgetary resources from more than one source (spending authority from offsetting collections, direct appropriation, contract authority), the receiving activity must maintain records that will enable it to control and report separately the transactions relating to each type of source (per OMB Circular A-11). Budgetary resources may be received at any level of an organization from the individual activity up to the Departmental level.

2.5.3. Federal customer orders and cash advances generate spending authority from offsetting collections (Reimbursable Authority). These budgetary resources are apportioned from the OMB to DWCF non-supply management activities for operating costs. The acceptance of a customer order requires that the performing entity agree in writing to perform the work for the customer entity.

2.5.3.1. The apportionment of reimbursable authority applies to DWCF (97X4930) non-supply activities and all other DoD Revolving Funds.

2.5.3.2. The apportionment of reimbursable authority is considered “anticipated” and a DWCF non-supply management activity may not obligate more than the total amount of orders received from Federal entities plus advances received for orders from authorized entities external to the Federal government (i.e. state, local, and foreign governments). Specific authorization to obligate above orders received and cash advances may be approved by a signed annual operating budget (AOB) if other resources are available at the DWCF sub-account level. A DWCF activity should not obligate above all resources available to that specific entity without prior approval of the Director, Revolving Funds, to ensure that budgetary resources are available at the sub-account level.

2.5.3.3. The anticipated reimbursable program authority does not provide obligation authority; therefore, a non-supply activity should not obligate more than what has been accepted in customer orders and other financing resources available. Recording anticipated reimbursable program authority only documents that reimbursable orders will be accepted. The accepted reimbursable order provides obligation authority. The total amount of anticipated reimbursable authority is recorded on the AOB for reconciling purposes.

2.5.3.4. The AOB does not restrict the amount of reimbursable orders that can be accepted. Reimbursable orders may exceed the anticipated amount without recording a negative anticipated order on the SF-133. Activities should request a new AOB when customer orders in the year of execution are expected to exceed the anticipated amount or obligations are expected to exceed the current authorization.
2.5.4. Contract authority is the legal authority to enter into contracts and incur obligations before budgetary resources are available. With respect to DWCF budget execution, contract authority is only used in supply management operations and capital investment programs. Contract authority must be apportioned. For supply management operations, if reimbursements from offsetting collections exceed apportioned contract authority, the difference cannot be obligated unless additional contract authority is issued by OMB because such operations are not provided automatically apportioned reimbursable authority. This may be characterized as either an unapportioned balance of a revolving fund or a restrictive withholding. The unapportioned balance preserves a portion of the fund’s capital so it may continue to revolve or represents those resources not scheduled for obligation within a fiscal year. Prior year de-obligations of contract authority are automatically re-apportioned to the DWCF in the current year. Prior year de-obligation of contract authority used for a capital investment program (CIP) may only be used to cover additional costs in programs for that specific fiscal year and may not be used to cover additional current year costs unless approved in writing by the Director, Revolving Funds.

*2.6 Antideficiency Act (190206)

The incurring of obligations (or authorizing the incurrence of obligations) in excess of apportioned budgetary resources and other financing resources must be reported as a potential violation of the Antideficiency Act, as required by Volume 14. This requirement applies whether or not a revolving fund activity has unapportioned budgetary resources or nonbudgetary assets (e.g. inventory) greater than the amount of the deficiency.

2.6.1. Commitments for goods or services to be obligated in the following year may be incurred in excess of apportioned budgetary resources only if obligations are not incurred in excess of apportioned budgetary resources. There is no restriction on commitment amounts for DoD revolving fund activities.

2.6.2. The AOB also includes administrative restrictions on the use of obligation authority specific to that activity’s operation.

*2.7 Assets (190207)

Physical assets such as inventories or buildings and equipment are not considered budgetary resources because they do not provide a direct monetary source for outlays that liquidate budgetary transactions (obligations). Such assets, therefore, do not increase the amount of obligation authority available when calculating unobligated balances.

2.7.1. Changes in inventory valuation and unexpected gains in inventory (such as items being found on an installation) do not generate budgetary resources but are currently accounted for in the Net Operating Result (NOR) on the (AR) 1307 report. The NOR for budget purposes must reconcile budgetary resources and claims against those resources (obligations).

2.7.2. Unobligated balances are the net of total budgetary resources (Customer Orders and apportioned Contract Authority) less claims against budgetary resources (Accounts Payable and Undelivered Orders). This is not the same as the “Net Position” or “Equity” calculation in financial
accounting (total assets less total liabilities). In other words, the available budgetary resources for obligation are equal to the difference between budgetary resources and any claims against these budgetary resources, plus any financing resources (such as unencumbered cash balances). Obligations for the procurement of inventories and the CIP must be recognized, recorded, and reported even if they may be expensed in a subsequent fiscal year.

3.0 EXECUTION REQUIREMENTS (1903)

*3.1 SF-132 Apportionment (190301)

The SF-132 provides the legal authority to incur obligations against the receipt of customer orders or contract authority in anticipation of receipt of customer orders. The OUSD(C) Revolving Funds is responsible for five apportionment documents: DWCF (97X4930), the National Defense Stockpile Transaction Fund (97X4555), the Pentagon Renovation Maintenance Revolving Fund (97X4950), the Building Maintenance Fund (97X4931) and the Surcharge Collections, Sales of Commissary Stores, Defense Trust Fund (97X8164). Details and explanations on preparing the SF-132 can be found in OMB Circular A-11 Preparation, Submission and Execution of the Budget, Section 121.

3.1.1. The DWCF is apportioned new budget authority in the form of direct appropriations, unobligated balances brought forward, spending authority from offsetting collections and contract authority. The FBWT is not apportioned because the financing resources have already been encumbered by obligations and the unencumbered balance is factored into unobligated balances brought forward.

3.1.2. The other four revolving funds (listed in section 190101 of this chapter) are apportioned spending authority from offsetting collections and unobligated balances brought forward.

*3.2 Contract Authority (190302)

The initial apportionment of contract authority for a fiscal year is typically the operating budget for supply management activities, and for both supply and non-supply management activities is the CIP reflected in the budget year column of last year’s President’s budget. In other words, the October 1 AOB will reflect the BY column submitted the previous February.

3.2.1. Supply management activities receive contract authority for a variability target, which represents an amount of contract authority to be held in reserve by the OUSD(C) to ensure continuity of operations for fluctuations in materiel costs and/or increased customer orders. The OUSD(C) provides requested adjustments from the September initial apportionment to OMB in February/March, reflecting revised estimates displayed in the current year column of the President’s budget submission most recently provided to Congress. The OUSD(C) may also request other adjustments that reflect significant changes experienced in budget execution.

3.2.2. Contract authority is available for obligation within the fiscal year for which it is provided. By definition, contract authority is unfunded and, therefore, obligations incurred
through use of contract authority may not be liquidated (i.e., paid) until funded by offsetting collections or other resources credited to the DWCF. Contract authority does not authorize outlays; it is reported on the SF-133 to ensure obligations do not exceed apportioned amounts from OMB. Budgetary resources should be sufficient at the DWCF activity level to ensure disbursements are funded.

*3.3 Annual Operating Budget (190303)

The Revolving Funds Directorate issues initial AOBs for each Component’s DWCF activities prior to the beginning of the fiscal year. A sample is shown later in this chapter. The AOB identifies an operating budget, operating results, unit cost(s) targets and capital investment limitations (subject to 31 U.S.C. 1517) for each DWCF activity.

3.3.1. Cash is centrally managed by the Army, Navy, Air Force, Defense Commissary Agency, and the Defense Logistics Agency. Each is responsible for taking actions to remain solvent and allow operations (disbursements) continue. It is a potential violation of the Antideficiency Act (31 U.S.C. 1517) if the FBWT is below zero at the sub-account level.

3.3.2. Non-supply management activities shall maintain a positive budgetary resource balance (i.e. obligations shall not exceed budgetary resources). Obligations exceeding total budgetary resources available to non-supply management activities, and obligations exceeding issued contract authority on the AOB, are potential violations of the Antideficiency Act (31 U.S.C. 1517).

3.3.3. Cash balances may be used when negative operating results are authorized on the AOB or by action of the OUSD (C) Revolving Funds Directorate. However, the AOB of a DWCF activity does not authorize it to use cash balances associated with another DWCF activity financed within the same DWCF sub-account. It is the responsibility of the DoD Component to ensure that adequate financing or budgetary resources have been allocated to a specific DWCF activity, and to obtain timely authorization for negative operating results for non-supply management activities.

3.3.4. Administrative Restrictions and Limitations. In addition to statutory restrictions, budget authority may be apportioned or otherwise further restricted through administrative action.

3.3.4.1. An administrative limitation cannot be used to change or eliminate a statutory restriction. An administrative action can only further restrict the purpose, amount, or time for which budgetary resources may be used. DoD Components must adhere to an administrative division of budgetary resources and/or a subdivision of budgetary resources provided to a DWCF activity.

3.3.4.2. If an administrative limitation is imposed, obligations incurred must remain below the limitation even though the limitation may be lower than the total budgetary resources that otherwise would be available. Administrative limitations may be provided in various formats but must be clearly stated in writing and signed.
3.3.5. In the event that budgetary resources available to a DoD Component for financing a specific DWCF activity are not sufficient, a DWCF manager shall not assume that sufficient budgetary resources exist elsewhere within the DWCF sub-account to fund obligations in excess of resources available. Rather, the manager for the DWCF activity shall request, in writing, from the Director, Revolving Funds an increase in authority to incur obligations and shall defer additional obligations until resources are sufficient to fund them.

3.3.6. Segregation of Budgetary Resources. When an activity receives budgetary resources from more than one source, the receiving activity must maintain records which will enable it to control separately the transactions relating to each source. For example, the SF-133 should break out total obligations between Operating and CIP for depot maintenance activities. All obligations should not be reported under a single line as “reimbursable.”

3.3.7. Claims Against Budgetary Resources. A DWCF entity should have two primary types of financial accounting records—proprietary and budgetary. The balance of budgetary resources available for obligation can be determined only from budgetary accounts. Proprietary accounting records, by themselves, are not sufficient to determine budgetary resources.

3.3.7.1. Non-budgetary assets, such as inventories of stock for sale, are not a budgetary resource. Additionally, a positive FBWT does not necessarily denote availability because the balance may be entirely encumbered by obligations.

3.3.7.1.1. A fund balance, although present, may have claims against it (accounts payable for example) and is, therefore, not available for additional obligation.

3.3.7.1.2. Additionally, claims against budgetary resources, such as undelivered orders and unpaid accrued expenditures must factor into the determination of unobligated balances and, therefore, budgetary resources available for obligation.

3.3.7.1.3. Similarly, budgetary accounts may not represent a budgetary resource available for obligation. For example, anticipated customer orders are not budgetary resources available for obligation.

3.3.7.2. Administrative restrictions or other withheld amounts limit the balance of budgetary resources available for obligation. Budgetary resources available for obligation can be determined from data required to be reported on the SF-133.
*3.4  Budgetary Resources (190304)

The reconciliation of budgetary resources is reported to DWCF activities monthly on the SF-133 Report on Budget Execution and Budgetary Resources. Details on the preparation and explanation of the SF-133 can be found in Appendix F of OMB Circular A-11 Preparation, Submission and Execution of the Budget.

3.4.1. Earned Reimbursements. Earned reimbursements are the amount of customer orders that have been filled. In the case of orders from the public, including state and local governments, the amount is limited to the amount of the cash advance received. Earned reimbursements should not exceed the amount of individual customer orders as well as letters of intent, commanders’ orders, congressionally mandated actions, and other emergency situations.

3.4.2. Obligations should not be authorized or incurred in a DWCF activity unless available resources (apportioned contract authority, direct appropriations, or accepted customer orders) exceed the proposed obligation. Obligations that exceed apportioned or accepted amounts may result in a violation of the Antideficiency Act. Such violations are reportable to the President and the Congress, and can involve criminal prosecution for the responsible person or people.

3.4.3. A non-expenditure transfer moves budgetary resources from one budget account, appropriation, or fund to another. Non-expenditure transfers of funds may be received from another appropriation or fund or may be made to another appropriation or fund when appropriate and authorized. A non-expenditure transfer of funds received from another appropriation or fund increases the amount of available budgetary resources. A non-expenditure transfer of funds made to another appropriation or fund decreases the amount of available budgetary resources.

*3.5  SF-133 Report of Budgetary Execution and Budgetary Resources (190305)

3.5.1. Mandatory and Discretionary Spending. The DWCF uses both mandatory and discretionary spending accounts. Mandatory spending is associated with apportioned contract authority and discretionary spending is associated with reimbursable authority. The format for the SF-133, outlined in OMB Circular A-11, breaks out these types of funding into the respective categories. Although obligated contract authority is considered mandatory, collections that liquidate contract authority are considered discretionary. Likewise, since the source of the FBWT is from discretionary funding, the fund balance itself is also considered discretionary.

3.5.1.1. Line 1000. Unobligated balance brought forward - For non-supply activities, this line represent the amount of work still required to be performed against outstanding customer orders and unencumbered cash balances. Unobligated contract authority will be cancelled at the end of the fiscal year. Contract authority brought forward is always zero for both Supply operations and the CIP. Unobligated balances are apportioned for non-supply DWCF activities and unobligated direct appropriations. Obligated contract authority remains in USSGL 4139 until a collection is posted against the balance, which allows for the disbursement.

3.5.1.2. Line 1021. Recoveries of prior year obligations actual - The actual amounts of prior year obligations should be reported on this line and not included in Line 2104,
Obligations Incurred. If current year recoveries cannot be separated from prior year recoveries, the total amount of recoveries should be reported on Line 1021 and not included in Line 2104.

3.5.1.2.1. Recoveries of prior year obligations are automatically reapportioned for DWCF activities.

3.5.1.2.2. Prior year contract authority that is deobligated and not reobligated by September 30 automatically expires.

3.5.1.3. Line 1750. Spending Authority from Offsetting Collections- Reimbursable authority is the sum of planned customer new orders plus the change in uncollected customer orders for industrial and service activities.

3.5.1.4. Line 1910. Total Budgetary Resources- Defined as the sum of spending authority (1750), contract authority (1640), direct appropriations (1160), PY deobligations (1021), and PY unobligated balance (1000), less collections to liquidate contract authority (depreciation) (1826) received by that activity. For supply activities, it represents the sum of contract authority apportioned (1640), the amount of PY deobligations earned (1021), and any direct appropriations received (1160).

3.5.1.5. Line 1640. Contract Authority- Displays apportioned contract authority. This includes contract authority for prior year capital programs that is separately displayed on the AOB. These amounts are segregated on the AOB for administrative purposes.

3.5.2. Availability Restrictions. As noted in the preceding paragraphs, budget authority is available for obligation only in accordance with purpose, amount, and time restrictions imposed by statute, by apportionments imposed by the OMB, and by administrative limitations imposed by authorized officials within the OUSD(C) and the DWCF Components. Other events reported on the SF-133, “Report on Budget Execution and Budgetary Resources,” further restrict the availability of budgetary resources. The OMB Circular A-11, “Instruction on Budget Execution,” includes an explanation of those events and identification of the SF-133 lines on which they are reported.

3.5.3. Definitions of Budgetary Indicators

3.5.3.1. Line 3200. Obligated balance, net, end of period- Represents an unrealized budgetary position of a specific DWCF activity based on pending transactions and unexecuted orders.

3.5.3.1.1. This line normally will have a negative balance for industrial and service type activities. A negative balance indicates there are sufficient resources available to cover future pending transactions. For industrial and service type activities, Line 3200 indicates the amount of work needed to be performed to complete accepted customer orders.

3.5.3.1.1. Supply activities should typically have a positive Line 3200 balance because contract authority allows for the obligation of resources in advance of available
funding. For supply activities, Line 3200 indicates the amount of future customer orders and/or appropriated funding required for liquidating future potential transactions.

3.5.3.2. Line 3090. Uncollected Federal Order- Represents accounts receivable and unfilled customer orders (Carryover/Backorders). These represent uncollected customer payments from Federal Sources and are future collections to a DWCF activity.

3.5.3.3. Line 3050. Unpaid Obligations- Represents budgetary claims in the form of accounts payable and undelivered orders because they represent future disbursements.

3.5.4. Appendix F of OMB Circular A-11 displays a detailed example of the SF-133 format. In addition, appendix F covers the format for the SF-132.

*3.6 DFAS Reporting (190306)

The DFAS Accounting Report (AR) 1307 is the official internal document for financial accounting and is the source document for the annual financial statements. The following are clarifications on how the (AR) 1307 relates to the reconciliation of budgetary authority.

3.6.1. Statement of Financial Position and Statement of Cash Flows. All amounts shown on these statements should reconcile to their corollaries on the SF-133. The accompanying footnotes must explain any amounts that do not reconcile.

3.6.2. Statement of Operations. Clarifications on proprietary accounting terminology and budget formulation terminology are provided here.

3.6.2.1. Expense. Expenses are the cost of goods and services used in the process of earning revenue. This is not synonymous with the budgetary term “obligation.” Obligations occur before an expense and require a budgetary resource at the time of obligation. Thus, obligations typically exceed expenses. Capital purchases are “expensed” via depreciation and inventory is expensed when it is sold.

3.6.2.2. Cost. The term “cost” may refer to either an obligation or expense depending on the circumstances. To clarify, an “obligation” is an unrealized cost that requires a budgetary resource before an outlay of cash occurs, whereas an “expense” is a realized cost (an actual bill has been received or inventory sold). The reconciliation of budgetary resources relies upon recognizing obligations as “costs” to ensure that budgetary resources are in place to cover any purchases that will not be expensed until subsequent fiscal years. The (AR) 1307 does not display budgetary resources or obligations. Conversely, the SF-133 does not display expenses. The reconciliation of these reports is key to ensure efficient and effective management across the DWCF.

3.6.3. Cost of Goods Sold (COGS). The (AR) 1307 COGS represents the historical cost of goods to produce revenue. Further, historical cost does not include inflation. Therefore, the amount of budgetary resources required to purchase inventory and produce goods and services may have a separate and distinctly higher value than the accounting COGS.
3.6.4. **Depreciation.** The accounting purpose for depreciation is to **realize** costs incurred as an asset is consumed over its useful life. It is based upon the purchase price of the asset and the length of the item’s useful life as described in Volume 4 Chapter 6 of the DoD FMR.

3.6.4.1. Depreciation is the recognition of an expense in the current period for portion of a capital outlay (that required a budgetary resource) that occurred in a previous period. Thus, depreciation for budgetary purposes (through inclusion in stabilized rates) results in the recoupment of cash that was used to acquire assets to replace those wearing out. Recovery of depreciation is a financing source for the DWCF Capital Investment Program (See also Volume 2B, Chapter 9, Section 090104).

3.6.4.2. Depreciation recovery may not, by itself, be sufficient to finance the CIP. In those instances, an additional element identified as a “Capital Surcharge” may be added to the stabilized rates/prices to finance the incremental difference. The capital surcharge is not an expense and is not displayed on the Statement of Operations. A capital surcharge is one of many elements that may be used in computation of the stabilized billing rate/price. The stabilized billing rate/price, when billed, is recorded as revenue. Since there is no counteracting expense for a capital surcharge, it may result in a positive Net Operating Result (NOR) on the (AR) 1307. However, for budgetary purposes, an adjustment will be made below the NOR calculation in order to ensure budgetary resources are available for the cash outlays required.

3.6.4.3. For budgetary purposes, depreciable assets are purchased with contract authority in advance of appropriated funding. Depreciation, for budgetary purposes, is used to describe collection of budgetary resources to offset the contract authority used to purchase the item. This recovery period may be shorter than the useful life of the item depending on the budgetary resources required by an activity.

3.6.5. **Net Operating Result (NOR)/Accumulated Operating Results (AOR).** The NOR/AOR for budgetary purposes may be different than the (AR) 1307 NOR/AOR. The fund manager must develop a methodology that is representative of the budgetary NOR/AOR. This methodology is typically reviewed during quarterly execution reviews with OUSD(C) Revolving Funds and the Integrated Program/Budget Review.

3.6.6. **Part VII Inventory Management Report.** For supply activities, the Part VII of the (AR) 1307 provides budgetary, accounting and inventory data that can be used for the development of internal benchmarks and metrics that indicate the operational effectiveness and efficiency of the activity. Fund managers should coordinate with OUSD(C) Revolving Funds for clarification on what should be displayed on quarterly execution briefings. All amounts depicted on the Part VII that are also displayed elsewhere on the (AR) 1307 or SF-133 should reconcile.
3.7 Execution Review (190307)

The Revolving Funds Directorate receives a quarterly execution briefing and a Fund-28 Execution Performance Quarterly Analysis (see Volume 2B, Chapter 9, Section 0903) from each DWCF activity. Each activity’s results of operations (through the latest available quarter) are formally reviewed by OUSD(C) leadership to determine the actual results of operation in comparison with plans for disbursements, collections, revenue, expense, net operating results, and unit costs. These briefings typically occur in February, May, and August. The purpose of the review is to determine if financial operations are proceeding according to plan and if there are significant deviations from the plan to actual execution. Management actions may be required to either bring execution back into line with the plan or to revise the plan to be consistent with current and more realistic financial expectations.

3.8 Adjusting Component Resources (190308)

Based on budget execution, Components periodically request the Revolving Funds Directorate to adjust their targets and/or capital budget limitation. Unless the Congress has provided a capital purchase limitation or other direction that would preclude making a requested adjustment, a Component’s request will be evaluated and approved (reflected in a revised AOB) or disapproved based on the merit of the justification provided.

19-16
1.0 LIMITATIONS AND GUIDANCE

1.1 TOTAL OPERATING REIMBURSABLE AUTHORITY: The estimate of reimbursements expected to be earned during the current fiscal year, subject to Office of Management and Budget apportionment, other authorized reimbursements, and/or other income for which current fiscal year obligatory authority is automatically established based on customer orders received. Negative anticipated reimbursements will not be recorded on the SF-133. Advances are required from non-federal orders. Specific prior approval of this office is required for additional budgetary resources beyond the amount authorized. Direct Reimbursable Outputs are limited to the actual cost incurred up to the limit of obligation authority received on funded customer orders.

1.2 The amount listed for Capital Obligation Authority is the limitation subject to the provision of Section 1517 of 31 U.S.C., the Anti-Deficiency Act. Obligations will not be incurred beyond the total approved amount shown for each year for the Capital Budget (as modified by reprogramming per authority provided in DoD 7000.14R, DoD Financial Management Regulation, Volume 2B, Chapter 9) without the specific prior approval of this office.

1.3 TOTAL BUDGETARY RESOURCES (SF-133 Line 1910): The amount authorized to be reported on line 1910 of the SF-133 is the sum of Reimbursable Authority, Contract Authority, and Recoveries of prior year unpaid obligations (SF-133 line 1021).

1.4 AOR & NOR: The Accumulated Operating Result (AOR) represents the cumulative impact of gains and losses on total operations of the activity group since the inception of the fund. The stated financial goal of the Working Capital Fund is to achieve a zero AOR over time. The AOR, along with the Net Operating Result (NOR), provide primary financial management targets and will be used in conjunction with other performance metrics to assess the overall operational effectiveness of the activity group. For each Activity Group, the Component is responsible for preparing a monthly Revenue and Cost Plan. Formal First Quarter and Mid-Year Joint Execution Reviews of this plan will be conducted by this office in February and May 2013.

1.5 CASH MANAGEMENT: Cash management remains the responsibility of the Navy. This cash management responsibility entails taking action to maintain a positive cash balance for Navy Activity Groups, in total, at all times. Failure to maintain a positive balance will result in a statutory violation of Section 1517, of 31 U.S.C., the Anti-Deficiency Act, by the Navy. The Component may require DFAS to vary its billing cycle or advance bill, when it is deemed necessary to do so, in order to maintain cash solvency. The magnitude, duration, and reason for advance billing by business area must be reported by the initiating Component to the Director, Revolving Funds within 15 calendar days of the end of the month in which the advance billing took place. In exercising the authority to advance bill orders, the Department of the Navy must ensure that, in total, for all Activity Groups, advance billing for services provided or work performed by the Department of Navy's Working Capital Fund does not exceed $200 million. Advance billing in excess of $200 million, cumulative, is prohibited during the fiscal year. The Component remains responsible for compliance with monthly execution of collections and disbursements in accordance with the monthly approved plan.
1.6 UNIT COST: The total cost for those outputs identified by a unit cost is predicated on a projected level of workload. Components may request increases in Operating Obligation Authority based on an increase in the number or value of orders accepted. Conversely, if actual workload declines below levels anticipated, appropriate reductions will be made to the total costs shown in this document.

1.7 PERFORMANCE GOALS: Performance effectiveness measures identified in the FY 2014 President’s Budget Submission, FY 2013 column include:

</tr>
</tbody>
</table>

1.8 OTHER:

1.8.1. Base Realignment and Closure Program expenses may be incurred prior to receiving an allocation of BRAC funding. However, all costs properly charged against the BRAC account must be reimbursed with BRAC funds. DWCF funds may not be expended prior to complying with the notification requirements imposed by law with respect to the obligation of BRAC funds. All costs incurred by DWCF activities to carry out BRAC must be reimbursed from the BRAC account prior to the end of the fiscal year in which costs were incurred.

1.8.2. This document requires that collections for **$41.852 million** in budgeted depreciation are applied to unliquidated contract authority (account 4139) and are not used as additional operating authority.

1.8.3. Costs of civilian separation incentives, not related to BRAC, are to be financed by the Navy Working Capital Fund.

1.9 CONTRACT AUTHORITY FOR CAPITAL INVESTMENTS: This document provides **$54.512 million** in contract authority to the Fleet Readiness Centers (NADEPS) activity during this fiscal year for Capital Investment Program (CIP) requirements. Of this amount, there is **$10.975 million** reapportioned for CIP requirements from prior fiscal years. In addition, recoveries of prior year capital obligations increase FY 2013 authority in the amount of recoveries. However, the Director for Revolving Funds must approve use of any recovered capital authority. Instructions for reporting contract authority withdrawn on the SF 133 Report on Budget Execution are provided below:
1.9.1. The capital program collections are anticipated to be \textbf{1.96 percent} of customer orders during the year, up to a fiscal year maximum of $41.852 million. The collection percentage is based on budgeted depreciation costs and capital cash surcharges included in prices/rates. The maximum amount financed above will recover the total capital cash requirements projected for the fiscal year.

1.9.2. The collected amount for the capital program will be moved from operating collections into capital collections and will liquidate previously realized (obligated) capital contract authority. Unused (unobligated) contract authority is removed at the end of the fiscal year; and is only available for within scope adjustments as provided below. Realized/obligated contract authority will remain accounted for and carried forward until it is liquidated by capital collections or de-obligated. Thus, cumulative unliquidated capital contract authority outstanding for the capital program equals the total cumulative capital obligations for all years less the cumulative capital collections for all the years since the inception of the capital program.

1.9.3. At fiscal year end, the amount collected will be compared to the amount obligated. If the amount collected requires to be adjusted upward to a maximum of 100 percent of obligations to maintain cash corpus requirements, an adjustment will be made in the rate development. If cumulative collections exceed cumulative outlays and cumulative obligations because of deobligations, a negative capital surcharge may be used to return the excess collections so long as cash corpus requirements are maintained.

1.10 CONGRESSIONAL DIRECTION: Funding released in this and subsequent documents is to be executed only in accordance with all applicable provisions of any Continuing Resolution(s), the National Defense Authorization Act for Fiscal Year 2013 (P.L. 112-239), the Consolidated and Further Continuing Appropriations Act, 2013 (P.L. 113-006), and any supplemental appropriations, when enacted.

1.11 DEFENSE BUSINESS SYSTEM MODERNIZATION: In accordance with the Ronald W. Reagan National Defense Authorization Act for FY 2005, and Department of Defense policy, modernization and enhancement to a system that costs more than $1 million, across the FYDP, must be approved by the Investment Review Board and Defense Systems Business Management Committee prior to obligating funds. This does \underline{not} include obligations to maintain current services.
2.0 CAPITAL BUDGET PROGRAM

The capital budget is to be executed based on the approved annual programs contained in the President’s Budget as modified by approved budget decisions. Proposed deviations from the President’s Budget, that are consistent with reprogramming criteria, must be identified to the Director for Revolving Funds during the schedules execution reviews.

The capital budget will be executed in accordance with the Financial Management Regulation. Effective April 4, 2007, the Defense Working Capital Funds Capital Investment Program (CIP) Budget expense/investment threshold (FMR Volume 2B Chapter 9) increased from $100,000 to $250,000 for all categories except Minor Construction. The National Defense Authorization Act for Fiscal Year 2011 (P.L. 111-383), dated January 7, 2011, Section 1403 increased the CIP Minor Construction threshold from $100,000 to $250,000. The capital budget authority shown in Section 9 of this document reflects this change. Minor Construction projects between $100,000 and $250,000 that were obligated prior to January 7, 2011 will be executed under the previous threshold. All new Minor Construction obligations must comply with the $250,000 CIP threshold. Note that, although the capitalization threshold increased, assets between $100,000 and $250,000 will still be recorded in Department’s financial reports as fixed assets and depreciated in accordance with the FMR Volume 11B.

3.0 CAPITAL PROJECT WITHIN SCOPE OBLIGATION ADJUSTMENTS

Capital obligation adjustments must be charged to the program year cited for the original project. Capital obligation authority can be provided for any program year for within scope increases if the following conditions are met: (1) the original program year must have sufficient un-obligated budget authority (original program plus program adjustments less actual obligations) to accommodate the adjustment, and (2) the total obligations, including both new obligations and all adjustments, cannot exceed the total obligation authority for all program years issued on the AOB. If these conditions are met, this AOB automatically provides the authority to obligate prior year program funds for within scope capital adjustments of less than $100,000. Since the adjustments must cite the original program year, the obligation authority for a currently issued program year must be reduced to offset the adjustments if sufficient funding for the original program year is not available on the AOB. The offset must be sufficient to limit total capital obligations during the fiscal year to the total obligation authority issued on the AOB. Subsequent AOBs may restore this authority by issuing the prior year program funds if appropriate. In addition, this document provides for a revised reprogramming threshold. Components may, without prior approval of this office, reprogram funds up to $3 million between approved capital budget projects for minor construction and non-ADP equipment and reprogram up to $1 million between ADP and software projects in a fiscal year program. Deviations from the President’s Budget that are consistent with the reprogramming criteria noted above, must be identified to the Director for Revolving Funds within 30 days of occurrence or during the scheduled execution reviews, whichever occurs first. The approved project list for capital budget obligations follows:

CHAPTER 1

FINANCIAL CONTROL OF ASSETS

1.0 GENERAL (0101)

*1.1 Overview (010101)

Assets are items owned by the federal government which have probable (more likely than not) economic benefits that can be obtained or controlled by a Federal Government entity. A Department of Defense (DoD) asset is any item of economic value owned by a DoD Component or held in a fiduciary capacity under the control of a DoD Component. However, fiduciary assets matching the definition outlined in the Statement of Federal Financial Accounting Standard (SFFAS) 31, “Accounting for Fiduciary Activities” must not be recognized on the Balance Sheet of the Federal entity. These assets are defined as “the collection or receipt, and the subsequent management, protection, accounting, investment and disposition of cash or other assets in which non-Federal individuals or entities (“non-Federal parties”) have an ownership interest that the Federal Government must uphold. The fiduciary relationship must be based on statutory or other legal authority and the fiduciary activity must be in furtherance of that relationship.”

1.2 Purpose (010102)

This chapter sets forth overall standards for the DoD Components to follow in accounting for assets. One of the objectives of DoD accounting is establishing financial control, from time of acquisition to time of disposal, over all assets provided to, or acquired by, the DoD. Such control ensures proper and authorized use as well as adequate care and preservation, since no asset can be acquired, put into use, transferred, written down, written off, or disposed of, without the proper authorization necessary to document and record the transaction. Account for all tangible assets provided to the DoD including assets in transit and assets in the hands of contractors, private parties, and other government agencies.

*1.3 Authoritative Guidance (010103)

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.1. Financial Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Concepts (SFFAC) 6, “Distinguishing Basic Information, Required Supplementary Information, and Other Accompanying Information;”

1.3.2. FASAB SFFAS 1, “Accounting for Selected Assets and Liabilities;”

1.3.3. FASAB SFFAS 3, “Accounting for Inventory and Related Property;”

1.3.4. FASAB SFFAS 6, “Accounting for Property, Plant, and Equipment;”

1.3.5. FASAB SFFAS 8, “Supplementary Stewardship Reporting;”
1.3.6. FASAB SFFAS 31, “Accounting for Fiduciary Activities;”

1.3.8. The United States Department of the Treasury (Treasury) Bureau of the Fiscal Service Treasury Financial Manual (TFM), Volume 1, Part 2, Chapter 3200, “Foreign Currency Accounting and Reporting;”

1.3.9. TFM Volume 1, Part 2, Chapter 3400, “Accounting for and Reporting on Cash and Investments Held Outside of the United States (U.S.) Treasury;”

1.3.10. TFM Volume 1, Part 2, Chapter 5100, “Reconciling Fund Balance with Treasury Accounts;” and

1.3.11. Department of Defense Instruction (DoDI) 5000.64, “Accountability and Management of DoD Equipment and Other Accountable Property.”

*2.0 ACCOUNTING REQUIREMENTS (0102)

2.1 Accounting Requirements Overview (010201)

Sections 0103 through 0108 provide policy on specific accounting requirements for various categories of assets. The general requirements prescribed in this section apply to all assets.

*2.2 Definition of Asset (010202)

An asset is a resource that embodies economic benefits or services that DoD controls. An asset has two essential characteristics:

2.2.1. It embodies economic benefits or services that can be used in the future; and

2.2.2. The DoD controls access to the economic benefits or services and, therefore, can obtain them or deny or regulate the access of other entities.

2.3 Noncash Assets (010203)

Noncash assets will be valued promptly, once acquired by or taken into possession by the DoD, and subjected to financial accounting control. For purposes of this paragraph, promptly means no later than the entity’s fiscal year-end.
2.4 Entity Versus Nonentity Assets (010204)

DoD Components report entity assets separately from nonentity assets in Note 2 of the entity’s financial statements. The entity’s Balance Sheet combines entity assets and nonentity assets.

2.4.1. Entity assets are assets that the reporting DoD Component has authority to use in its operations, that is to say, the DoD Component has the authority to decide how the asset is used, or is legally obligated to use the asset to meet statutory obligations.

2.4.2. Nonentity assets are assets held by a DoD Component but are not available for the Component to use in its operations. In some circumstances, a DoD Component may maintain cash or other nonentity assets in a fiduciary capacity for the Treasury, other government agencies or non-federal entities. DoD Components must report both entity assets and nonentity assets under an entity’s custody or management in the entity’s financial statements. However, DoD Components must not recognize on the Balance Sheet nonentity assets meeting the definition of fiduciary assets, but should disclose them in accordance with the provisions of FASAB SFFAS 31. Disclose in Note 2 of the entity’s financial statements nonentity assets reported on an entity’s Balance Sheet in accordance with OMB Circular A-136, Section II 4.3.3 Assets; see also Volume 6B, Chapter 10. Recognize an amount equal to nonentity assets as a liability (due to Treasury or other entities) on the Balance Sheet.

2.5 Intragovernmental Versus Public Transactions (010205)

2.5.1. Intragovernmental assets arise from transactions among Federal Agencies and represent claims of a Military Department or Defense Agency against other DoD Components and other Federal Agencies.

2.5.2. Public assets arise from transactions between DoD Components and non-federal entities, which include domestic and foreign persons and organizations outside the U.S. Government. The term “public” can also be used to represent non-federal entities.

2.6 Accounting Events (010206)

The accounting events discussed in Chapters 2 through 7 frequently will require compound accounting entries; that is, accounting entries must be made simultaneously in both the proprietary accounts and the budgetary accounts. Additional information on budgetary accounts, not covered in this chapter, is included in Volume 3.

3.0 FUND BALANCE WITH TREASURY AND CASH (0103)

3.1 Fund Balance with Treasury (FBWT) Policy (010301)

FBWT is an asset account that reflects the available funds in the entity’s accounts with Treasury that authorizes the entity to make expenditures and pay liabilities. Collections and disbursements by the Department increase or decrease the balance of the account. Treasury requires all federal agencies to reconcile their FBWT accounts on a regular and recurring basis to assure the
integrity and accuracy of their internal and Government wide financial data. Any differences identified during the reconciliation process must be researched and resolved. Reconciliation documentation (including support for any adjustments required) must be prepared and retained. Evidence of review and approval for the reconciliation and any adjustments must be contained in the documentation. Unresolved differences compromise the reliability of FBWT balances and Treasury’s published financial statements. This, in turn, compromises the overall integrity and status of the Department’s and Government wide financial position. Chapter 2 provides more detailed information on accounting for cash and FBWT.

3.2 Cash Held Outside of Treasury (010302)

In limited circumstances, in addition to “FBWT,” DoD reporting entities may be authorized to hold cash outside of Treasury to provide check-cashing services in accordance with Volume 5. Cash includes all monetary resources on hand or on deposit with banks and other financial institutions, including coins, currency, and readily negotiable instruments (such as checks and money orders).

3.3 Restricted Cash (010303)

Restrictions are usually imposed on cash deposits by law, regulation, or agreement. Nonentity cash is always restricted cash. Entity cash may be restricted for specific purposes. Such cash may be in escrow or other special accounts. Financial reports should disclose the reasons and nature of restrictions.

*3.4 Accounting Requirements for FBWT and Cash (010304)

The requirements prescribed by this paragraph apply to accounting for FBWT and cash.

3.4.1 FBWT and Cash accounting will:

3.4.1.1. Be complete, accurate and timely.

3.4.1.2. Cover cash receipts, cash disbursements, and cash balances.

3.4.1.3. Comply with applicable laws and regulations.

3.4.1.4. Disclose errors, losses, and gains. DoD Components must identify, resolve and correct errors on a timely basis as detailed in Chapter 2.

3.4.2. Record cash receipts immediately upon collection, kept under control, and deposited intact as soon as practicable. Disbursing Officers (DOs) and their cash agents may hold cash collections for operating requirements within their cash-holding authority.

3.4.3. Make cash disbursements only after receiving an approved voucher package containing evidence of performance (i.e., receipt of goods and/or services via DD Form 250, Material Inspection and Receiving Report), a valid purchase order, and a valid invoice. Cash
Disbursements can also be made after receiving an authorized advance payment request. Cash disbursements and collections will be recorded promptly in the applicable DoD accounting system and reported in the Statement of Transactions.

3.4.4. Cash receipts and disbursements are to be reconciled with appropriate documents and accounting records, as applicable within each accounting period. The reconciliation should document and serve to verify that all amounts reflected in the supporting documentation agrees with the postings to the U.S. Standard General Ledger account 101000, Fund Balance with Treasury and 109000, Fund Balance with Treasury Under a Continuing Resolution. Any differences identified during the reconciliation process must be researched and resolved. Reconciliation documentation (including support for any adjustments required) must be prepared and retained. Evidence of review and approval for the reconciliation and any adjustments must be contained in the documentation.

3.4.5. Account for foreign currencies in subsidiary accounts separate from U.S. currency. Report foreign currencies at the U.S. dollar equivalent using the exchange rates prescribed by the Secretary of the Treasury. Disclose the fact that a foreign currency is not freely exchangeable in the notes to the financial statements. Accounting entities may prepare financial statements for their own use, which may or may not be in U.S. dollars. These entity level statements will be translated into U.S. dollars when used to prepare departmental financial statements. See Volume 6A, Chapter 7 for additional information related to foreign currencies.

3.4.6. Guidance relating to cash management procedures prescribed by the Treasury is in Chapter 2.

4.0 RECEIVABLES (0104)

4.1 Receivables Overview (010401)

Amounts due the DoD will be recorded accurately in the appropriate receivable account in the accounting period during which the transaction or event giving rise to the receivable occurs. Receivables arise from claims to cash or other assets and include accounts receivable, interest receivable, and loans receivable. Guidance relating to receivables is contained in Chapter 3.

4.2 Recognition of Receivable (010402)

FASAB SFFAS 1 requires that a receivable be recognized when a federal entity establishes a claim to cash or other assets against other entities, either based on legal provisions, such as a payment due date (e.g., payment not received by the due date on the invoice), or goods or services provided. If the exact amount is unknown, then a reasonable estimate should be made.
5.0 INVENTORY AND RELATED PROPERTY (0105)

5.1 Definition of Inventory and Related Property (010501)

Inventory is tangible personal property that is (1) held for sale, (2) in the process of production for sale, or (3) to be consumed in the production of goods for sale or in the provision of services for a fee. Inventory includes items for sale or transfer to entities outside the Federal Government or to other Federal Entities.

5.1.1. Inventory will be recognized as an asset when title passes to the purchasing entity or when the goods are delivered to the purchasing entity. Delivery or constructive delivery will be based on the terms of the contract regarding shipping and/or delivery.

5.1.2. Inventory will be valued at historical cost, using the moving average cost assumption unless an exception is specifically authorized.

5.1.3. Guidance relating to inventories is contained in Chapter 4.

5.2 Operating Materials and Supplies and Stockpile Materials (010502)

Related property for purposes of this volume includes operating materials and supplies and stockpile materials.

6.0 ADVANCES AND PREPAYMENTS (0106)

*6.1 Advances (010601)

Advances are cash outlays made by a federal entity to its employees, contractors, grantees, or others to cover a part or all of the recipients’ anticipated expenses or as advance payments for the cost of goods and services the entity acquires. Common examples include, travel advances disbursed to employees prior to business trips, and cash or other assets disbursed under a contract, grant, or cooperative agreement before services or goods are provided by the contractor or grantee. Advances are reduced when related goods or services are received, contract terms are met, or progress is made under a contract, or anticipated expenses are realized. Advances are assets of the paying entity. Guidance relating to advances is contained in Chapter 5.

*6.2 Prepayments (010602)

Prepayments are payments made by a Federal Entity to cover certain periodic expenses before those expenses are incurred. Typical prepaid expenses are rents paid to a lessor at the beginning of a rental period. Reduce prepayments when goods or services are received by the DoD Component or prepaid expenses expire. Prepayments are assets of the paying entity. Guidance relating to prepayments is contained in Chapter 5.
6.3 Reporting Intragrammencal Transactions (010603)

Advances and prepayments made from one Federal Entity to another Federal Entity are intragrammencal transactions and should be accounted for and reported separately from those made to non-federal entities.

7.0 PROPERTY, PLANT, AND EQUIPMENT (PP&E) (0107)

*7.1 Definition of PP&E (010701)

PP&E is composed of General PP&E, Heritage Assets, and Stewardship Land. FASAB SFFAS 6 defines PP&E as tangible assets, including land, that have estimated useful lives of two years or more, are not intended for sale in the ordinary course of operations, and have been acquired or constructed with the intention of being used or being available for use by the entity. PP&E also includes assets acquired through capital leases, including leasehold improvements, property owned by the reporting entity in the hands of others (e.g. state and local governments, colleges and universities, or Federal contractors), and land rights. Heritage Assets are PP&E of historical, natural, cultural, educational, or artistic significance (e.g., aesthetic); or with significant architectural characteristics. Stewardship Land is land and land rights other than that acquired for or in connection with General PP&E, land acquired via the public domain, or land acquired at no cost. Accounting for PP&E in which the government has an ownership interest is important because public funds are invested. Account and control property in the accountable property systems of record. The DoD has an obligation to safeguard its property from theft, abuse, waste, and unauthorized use and otherwise manage the property efficiently and effectively. Consistent with the DoDI 5000.64, DoD is accountable for all property acquired, leased, or otherwise obtained throughout an asset's lifecycle: from initial acquisition and receipt; through accountability and custody; until formally relieved of accountability by authorized means, including disposition; or through a completed evaluation and investigation for lost, damaged, destroyed, or stolen property. See additional guidance relating to PP&E in Chapter 6 and Volume 12, Chapter 14.

7.2 Recording General PP&E Assets (010702)

Record all General PP&E assets in accounting records at cost. Such costs will include all costs incurred to bring the PP&E to a form and location suitable for its intended use in operations. The cost of Stewardship PP&E (except for Multi-Use Heritage Assets) will be expensed in the accounting period in which incurred.

8.0 OTHER ASSETS (0108)

8.1 Other Assets Classified (010801)

Other assets include investments, and other miscellaneous assets not otherwise classified, that cannot be classified in a specific category identified in sections 0102 through 0107.
8.2 Financial Control (010802)

Guidance relating to these other assets is included in Chapter 7. The basic purpose is to ensure financial control over these assets and the recording of expenses or dispositions in the appropriate accounting periods.
### VOLUME 4, CHAPTER 2: “ACCOUNTING FOR CASH AND FUND BALANCES WITH TREASURY”

#### SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

CHAPTER 2

ACCOUNTING FOR CASH AND FUND BALANCES WITH TREASURY

1.0 GENERAL (0201)

1.1 Purpose (020101)

This chapter prescribes Department of Defense (DoD) accounting policy and related management requirements necessary to establish financial control over fund balances with the U.S. Department of the Treasury (Treasury) and cash resources that are not part of the Fund Balance with Treasury (FBWT). Unless otherwise stated, this chapter is applicable to the Military Departments and Defense Agencies, hereinafter referred to as DoD Components including the Defense Working Capital Fund (DWCF) activities.

1.2 Authoritative Guidance (020102)

2.0 DEFINITIONS (0202)

2.1 Cash (020201)

Cash, including imprest funds, must be recognized as an asset in accordance with SFFAS 1, Paragraph 27: “Cash consists of: (a) coins, paper currency and readily negotiable instruments, such as money orders, checks, and bank drafts on hand or in-transit for deposit; (b) amounts on demand deposit with banks or other financial institutions; and (c) foreign currencies, which, for accounting purposes, must be translated into U.S. dollars at the exchange rate on the financial statement date.”

2.2 Cash Held Outside of Treasury (020202)

ITFM 2-3400, Section 3420 defines “Cash Held Outside of Treasury” as funds under the custodial responsibility of Federal Government agencies and/or their employees, officers, or agents that are deposited in non-Treasury general accounts or held in an imprest fund. “Cash Held Outside of Treasury” includes “Disbursing Officer’s (DO’s) Cash” which are Treasury funds (cash) held by the DO in local accounts, but which are not directly associated with any DoD appropriation and are not part of DoD FBWT. See also section 0204 and Chapter 1.
2.3 Entity Cash (020203)

SFFAS 1, Paragraph 28 defines entity cash as the amount of cash that the reporting entity holds and is authorized by law to spend. Imprest Funds are cash advances against a specific Line of Accounting (LOA) from the DO to an appointed cashier. As advances, these funds are a form of “Cash Held Outside of Treasury” but because an entity LOA is cited as the basis of the Imprest Fund, the advance is considered “entity cash.” The advance encumbers FBWT for the LOA but it is separate from the DO's physical cash in U.S. Standard General Ledger (USSGL) account 113500 “Funds Held Outside of Treasury.” In this instance, the physical cash (account 113500) is still under the DO's pecuniary liability and is non-entity cash, while the "accounting cash" is entity cash.

2.4 Non-entity Cash (020204)

Non-entity cash is cash that a federal entity collects and holds on behalf of the U.S. Government or other entities. This is a liability account. In some circumstances, the entity deposits cash in its accounts in a custodial capacity for the Treasury or other federal entities, or in a fiduciary capacity for non-federal parties. In accordance with SFFAS 1, Paragraph 29, Components must recognize non-entity cash that does not meet the definition of a fiduciary asset on the Balance Sheet, reported separately from entity cash. Fiduciary cash that meets the definition of a fiduciary asset must be disclosed in accordance with the provisions of SFFAS 31, “Accounting for Fiduciary Activities.” DO’s cash is non-entity cash, which is a subset of Treasury cash. The DO’s Cash is reported in dollars as described in Volume 5, Chapters 13 and 15.

2.5 Restricted Cash (020205)

Restrictions imposed on cash deposits are usually from laws, regulations, or agreements. Non-entity cash is always restricted cash. Entity cash may be restricted for specific purposes. Such cash may be in escrow or other special accounts. For instance, restricted cash may be non-entity seized cash from foreign governments, deposit funds for humanitarian relief and reconstruction, or currency held by DOs to carry out their paying, collecting, and foreign currency accommodation exchange missions. In accordance with SFFAS 1, Paragraph 30, Components must disclose the reasons and nature of restrictions in the notes to the financial statements.

2.6 FBWT (020206)

SFFAS 1 provides the following definition for FBWT:

2.6.1. A federal entity’s FBWT is the aggregate amount of funds in the entity’s accounts with Treasury for which the entity is authorized to make expenditures and pay liabilities.

2.6.2. According to SFFAS 1, paragraph 32, a federal entity's FBWT includes budget clearing account balances (also known as suspense accounts) and the dollar equivalent of foreign currency account balances (e.g., foreign burden sharing payments). Components must translate foreign currency account balances into U.S. dollars at exchange rates determined by the Treasury and effective at the financial reporting date in accordance with the
Treasury Reporting Rates of Exchange, unless the exceptions stated in I TFM 2-3200 apply. A federal entity's FBWT also includes balances for direct loan and loan guarantee activities held in the credit reform program and financing accounts.

2.6.3. I TFM 2-5100 describes FBWT as an asset account that represents the future economic benefits of monies that agencies can spend for future authorized transactions. Transactions such as appropriation warrants, non-expenditure transfers, collections, disbursements, and related adjustments reported to Treasury’s Bureau of the Fiscal Service (BFS); and classified to a Treasury Account Symbol (TAS) increase or decrease to the FBWT account balance. See Table 2-1 for examples of financial events that impact a Component’s FBWT on the Balance Sheet and on the Statement of Budgetary Resources (SBR).

2.7 FBWT Reconciliation (020207)

2.7.1. Reconciliation is a process that compares two sets of records (usually the balances of two accounts), identifies, and explains the differences between the records or account balances. The timing of transactions, an invalid LOA, or insufficient detail may cause differences, or reconciling items. Reconciliation is not complete until all differences are identified, aged, accountability is assigned, and differences are explained. Once reconciliations are complete, appropriate actions must be documented and any necessary adjustments must be recorded. The corrective action must address the root cause of the difference in order to prevent recurrence.

2.7.2. A FBWT reconciliation is a specific reconciliation of the actual accounting transactions (including funding, disbursements, collections, and transfers) back to the detailed amounts posted to both entity general ledgers and entity Treasury accounts, USSGL accounts 101000 (FBWT) and 109000 (FBWT While Awaiting a Warrant). Reconciliation involves identifying and comparing accounting events or transactions to determine whether transactions are recorded properly and can be cleared, have not yet been recorded (in-transit), or were recorded improperly and require correction either in the general ledger or at Treasury.

2.7.3. Reconciling FBWT is a reconciliation of available funds as recorded on the Central Accounting Reporting System (CARS) Account Statement. FBWT reconciliation includes DO’s cash reconciliation (cash and monetary assets and the Statement of Accountability), the focus of which is reconciling the account activity to the cash activity (checks issued, deposits, electronic funds transfer). Refer to Volume 5 for information and requirements of the DO’s cash reconciliation.

2.8 FBWT Universe of Transactions (020208)

The FBWT universe of transactions includes all valid funding, disbursements, collections, or transfers of funds (including warrants) to or from an entity over a given time period. These transactions affect the amounts and balances in appropriation accounts reported to or by Treasury, recorded in an entity’s general ledger, or presented in an entity’s financial reports. When these transactions are reconciled from the entity disbursing systems, general ledgers, and financial statements to Treasury’s records, voucher level detail must support all identified differences. Note that there are two universes of transactions for FBWT: Treasury detail and accounting detail.
purposes of FBWT reconciliations, transaction-level detail begins with the LOA and must have the following data elements (at a minimum): TAS, Sub-Allocation Holder Identifier (SAHI) (formerly limit) for Treasury Index (TI)-097, reimbursable flag indicator, accounting station identifier code, agency disbursing identifier code, and the voucher number and amount.

2.9 Undistributed Amounts (020209)

2.9.1. Undistributed amounts are amounts that have been reported to Treasury but have not been posted to the appropriate obligation in a Component’s general ledger in the source accounting system or vice versa. Undistributed amounts can be a result of timing, invalid LOA, or invalid TAS information, among other reasons. Unsupported undistributed amounts are amounts that are not yet researched/reconciled to supporting documentation.

2.9.2. A “forced balance entry” represents any amount posted, usually at a summary-level in a suspense account, to eliminate differences between the Component’s general ledger balance (USSGL accounts 101000 and 109000) and the Treasury’s control total. Typically, these adjustments appear as “undistributed” amounts when in fact, they are differences. Although Treasury requires the Components to match the Treasury’s balance, a forced balance entry is not an adequate reconciliation of the USSGL accounts 101000 and 109000. When reconciling FBWT USSGL accounts 101000 or 109000, Components must research the causes of the differences at the detail voucher level, identify undistributed amounts, and clear the aged undistributed amounts in accordance with I TFM 2-5100, Section 5130. All differences must be cleared within 60 business days from the date of the transaction (see Table 2-4 and the TFM Volume 1, Bulletin 2020-05).

2.9.3. In accordance with the Government Accountability Office (GAO) and the Council of the Inspectors General on Integrity and Efficiency (CIGIE), Financial Audit Manual, Volume 2, (GAO-08-625G), section 921, Paragraph 12, entities must avoid arbitrarily adjusting accounts to the amounts reported by Treasury and/or recorded differences in suspense accounts without adequately researching the causes of the differences

1 Unreconciled differences recorded in suspense accounts may represent transactions that have not been properly recorded by the entity to the appropriate accounts. For more detailed instructions on the various reconciliation tools, refer to I TFM 2-5100.

*3.0 STANDARD GENERAL LEDGER ACCOUNTS (0203)

Components must use the appropriate accounts to record transactions for FBWT or foreign currency transactions. The general ledger accounts and accounting entries for these accounts are specified in the USSGL TFM Supplement and the DoD USSGL Transaction Library.

---

1 Office of Management Budget (OMB) Circular A-136 states: “An entity’s FBWT must tie to the sum of the balances reflected on the CARS Account Statement for the entity’s TAS. An adjustment will need to be made for available receipts appropriated/credited to the related expenditure accounts, since the balances will appear in both the receipt ledger and the account statements for the expenditure account.”
4.0 ACCOUNTING FOR CASH HELD OUTSIDE OF TREASURY (0204)

4.1 Cash and Investments Held Outside of Treasury (020401)

ITFM 2-3400 provides guidance on Cash and Investments Held Outside of Treasury and the requirements for accountable officers who have responsibilities for funds received, certified, disbursed, and held in their custody (e.g., DOs).

4.2 Recording Cash Held Outside of Treasury (020402)

The amount of “Cash Held Outside of Treasury” must be recorded using one of these USSGL accounts: 112000 (Imprest Funds), 113000 (Funds Held Outside of Treasury-Budgetary), 113500 (Funds Held Outside of Treasury-Non-Budgetary), and 120000 (Foreign Currency) for cash held by DOs at personal risk. There are no budgetary accounts impacted from recording this type of non-entity cash. The SF 1219, Statement of Accountability, is used to determine the accountability of DOs for funds held outside of Treasury (cash on hand). The balance in this account is not an asset of a DoD Component for external statement purposes because it represents Treasury cash held by DOs under various authorities, including:

4.2.1. Title 10, United States Code, section 2206 (10 U.S.C. § 2206) (Disbursement of funds of a Military Department to cover an obligation of another DoD agency);

4.2.2. 31 U.S.C. § 3324 (Advances); and

4.2.3. Title 31, Code of Federal Regulations, § 240.12(a) (drawing disbursing cash). DO’s cash is non-entity, restricted cash. A liability account for the total amount advanced by the Treasury (USSGL account 298500) must be maintained in accordance with ITFM 2-3400, Section 3435.10 “Financial Accounting and Reporting Requirements.”

4.3 Reconciling Cash Held Outside of Treasury (020403)

The information reported on the SF 1219 must be posted consistent with Volume 6B, Chapter 4 and the quarterly guidance found on the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) web page, OUSD(C) Policies and Guidance (DoD Common Access Card required). Components must reconcile all transactions involving cash on a periodic basis, but no less frequently than monthly for DO’s cash and quarterly for imprest funds, to ensure cash reported on the Statement of Accountability reconciles with the CARS Account Statement for the DO’s Cash TAS, the agency’s accounting records and related financial statements in accordance with ITM 2-3400, Section 3440. Treasury’s BFS reports to the Office of the Fiscal Assistant Secretary of Treasury all discrepancies disclosed from periodic review and analysis of agencies’ reported cash and investment outside of Treasury.
5.0 CASH AUDITS AND REVIEWS (0205)

5.1 Responsibility for Accounting and Internal Controls (020501)

Managers who supervise personnel holding cash are responsible for maintaining appropriate accounting and internal controls. This responsibility includes ensuring the legality, propriety, and correctness of disbursements and collections of public funds. See Volume 5, Chapter 3; and Volume 5, Appendix A for more information on requirements for securing cash and other assets.

5.2 Announced and Unannounced Audits (020502)

Audits, both announced and unannounced of each fund, must determine whether:

5.2.1. All funds are properly accounted for and reported;

5.2.2. The amount of funds not in excess of requirements; and

5.2.3. Procedures are established and followed to protect the funds from loss or misuse. In accordance with DoD Instruction 5010.40, “Managers’ Internal Control Program Procedures,” management must determine the frequency of audits based on vulnerability assessments.

5.3 Requirements for Investigation (020503)

Any unauthorized use, irregularity, or improper accounting for a cash fund must be investigated and reported to the approving authority and to the DO involved. A report must state whether prescribed procedures were followed and recommend any actions considered necessary or desirable to prevent recurrence.

6.0 DEFENSE WORKING CAPITAL FUND (0206)

6.1 DWCF Accounts (020601)

The DWCF FBWT, account symbol 097X4930, is subdivided at the Treasury into five sub-accounts. Each reporting entity of the five sub-accounts reports a FBWT amount on its Balance Sheet. A DWCF activity below the Treasury sub-account reports a FBWT amount on the agency’s Accounting Report (Monthly) (AR (M)) 1307, Statement of Operations, as well. However, this amount represents a clearing account for recording collection and disbursement activity that reflects a net of collections and disbursements. Volume 6A, Chapter 15 describes how to prepare the AR (M) 1307, as well as other FBWT reporting requirements. Each individual activity must also report the balance of FBWT transactions on the Balance Sheet.
6.2 DWCF Sub-Account (020602)

DoD Components DWCF sub-account identifiers assigned by the Treasury are shown in Table 2-2 and in the Treasury Federal Account Symbols and Titles (FAST) Book, 1 TFM 2, Supplement 1. One of the sub-accounts is the Defense-wide Treasury account (097X4930.005). Other DWCF accounts include, but may not be limited to 097X4931, Building Maintenance Fund, and 097X4932, Defense Counterintelligence and Security Agency. The Defense-wide account includes a number of Defense Agencies operating under the DWCF. The Defense Agencies within the Defense-wide account provide and use funds from the centralized FBWT account under the Defense-wide Treasury account. An entity provides or uses funds depending on whether it needs to provide a collection or make a disbursement. If an entity’s collections exceed its disbursements, it is providing funds to the centralized pool for other entities’ use. If an entity’s disbursements exceed collections, the entity is using funds from the centralized pool to make disbursements. See Volume 2B, Chapter 9 for additional information about cash management policy.

6.3 DWCF Transfers (020603)

Program managers for each Treasury sub-account have the authority to realign (delegate) balances to the activity or installation-level at their discretion. If the program managers realign balances between Treasury Appropriation Fund Symbols (TAFS), they must document all such approved transfers on an SF 1151, Nonexpenditure Transfer Authorization. TAFS are a combination of a TAS and availability code (for example, annual, multi-year, or no-year). TAFS refer only to the appropriation and fund accounts and exclude the receipt accounts. Distributions between SAHIs, within the same TAFS, are not accounted for as transfers. In this instance, the preparation of the SF 1151 is not required. See the Office of Management and Budget (OMB) Circular A-11, subsection 20.4(j) for additional information on transfers. Program managers must ensure that they do not make a transfer that is in excess of the balance available at the DWCF SAHI making the transfer. See Volume 11B, Chapter 3 for additional information on nonexpenditure fund transfers.

*6.4 Recordation/Reconciliation of FBWT Transactions (020604)

6.4.1. Components must record all FBWT transactions in the individual activity accounts and must reconcile them to total monthly FBWT transactions reported by the Defense Finance and Accounting Service (DFAS). Components must adhere to the 2-month (60 calendar days) reconciliation requirement in accordance with the TFM and move toward a 1-month (30 calendar days) reconciliation requirement following the end of the month being reconciled effective fiscal year 2021. As mentioned in subparagraph 020207.A, reconciliation is not complete until all differences are identified and aged, accountability is assigned, and differences are explained. The timing of transactions, an invalid LOA, or insufficient detail may cause differences, or unmatched items. If Components identify any policy or procedural problems during reconciliation that require adjudication between a Component(s) or between the Department and Treasury, they must bring it to the attention of DFAS, as their service provider, and if necessary, the Office of the Deputy Chief Financial Officer.
6.4.2. The Component must reconcile the Department’s FBWT general ledger account at the DWCF sub-account level to Treasury in accordance with 10 U.S.C. § 2208 (n) and (q)(1). For the Defense-wide sub-account (097X4930.005), DFAS will reconcile the general ledger accounts to Treasury at the Component level.

6.5 DWCF Treasury Cash Balance (020605)

6.6 Current Balance of Funds with Treasury (020606)

The current balance of funds with Treasury is equal to the amount as of the beginning of the fiscal year plus the cumulative fiscal-year-to-date amounts of collections, appropriations, and transfers-in of FBWT received minus the cumulative fiscal-year-to-date amounts of withdrawals, transfers-out, and disbursements.

6.7 Undistributed Collections and Undistributed Disbursements (020607)

Refer to Volume 3, Chapter 11 for additional information relating to financial control over disbursements, collections and adjustment transactions affecting the FBWT. Components must record and report undistributed collections and undistributed disbursements at the lowest organizational level.

6.7.1. DFAS must identify undistributed FBWT transactions at the sub-account Treasury account-level, SAHI level (i.e., formerly limit), and Component-level.

6.7.1.1. Sub-account TAFS Level Adjustments. Treasury Sub-accounts are shown in Table 2-2. The DWCF undistributed collections and undistributed disbursements that are identifiable to a DWCF sub-account but do not contain sufficient information to identify them to a lower organizational (business area/Component) level are recorded in 097X4930.005. Any transactions posted at this level must be researched and cleared, if necessary, within 60 business days from the date of the transaction to ensure proper reporting by DoD Components. At year end, there must not be any remaining unidentified/un-researched balances in the sub-account.

6.7.1.2. Business Area Adjustments. These are DWCF business area undistributed collections and undistributed disbursements that are identifiable to the TAFS level but do not contain sufficient information to identify them to a business area. Examples of business areas include Supply Maintenance, Depot Maintenance, and Research and Development. Undistributed collections and undistributed disbursements are the differences between the Treasury reporting systems and the collections and disbursements reported through the general ledgers.
6.7.1.3. Component-Level Adjustments. These adjustments are DWCF Component-level undistributed (unmatched) collections and undistributed (unmatched) disbursements that are identifiable through the Treasury reporting systems to the Component-level but have not yet been matched at the Component-level to a specific obligation or receivable subsidiary ledgers. In addition, these adjustments must be supported by detailed transactions from the disbursing officers’ records to include at a minimum the voucher number or other unique identifiers of the transactions. Limit Component-level adjustments at year-end and complete the required reconciliations (necessary research must be conducted and transactions must be posted to the proper LOA).

6.7.2. DFAS must identify collections or disbursements at the lowest identifiable level described in subparagraph 020607.A. That level must record the undistributed collection or undistributed disbursement and provide documentation necessary to research the account for proper disposition.

6.7.3. Undistributed collections and undistributed disbursements are necessary to reflect proper FBWT as contained in finance network reports. Components must research such collections and disbursements recorded in account 101000 for proper disposition by the lowest organizational level to which they can be identified. DFAS must correct erroneous collections by making a payment to a vendor and erroneous disbursements by establishing a receivable pending a receipt of the refund. In addition, supporting documentation must include detailed transactions from the disbursing officers’ records to include at a minimum the voucher number or other unique identifier of the transactions.

7.0 FBWT TRANSACTIONS (0207)

7.1 Collection or Disbursement (020701)

Record a collection or disbursement only when documentary evidence, such as a Treasury Financial Management Service (FMS) 6652, Statement of Differences (SOD) or a voucher, supports an increase or decrease to the Treasury account. For the DWCF activities, Components must segregate cash collections and cash disbursements between those for the DWCF operating program (i.e., noncapital outlays) and the DWCF capital program (i.e., acquisition of capital assets) to comply with 10 U.S.C. § 2208(m). See Volume 2B, Chapter 9 for a description of Capital Investment Program. Additionally, Components must record and report undistributed cash collections and undistributed cash disbursements at the lowest organizational level.

7.2 Advances Received (020702)

Components must record a customer advance or prepayment received as a liability in accordance with SFFAS 1, Paragraph 60. OMB Circular A-11, section 20.11 provides guidance on the treatment of advances received and deposit requirements, which vary depending on whether the advance is with or without orders.
7.3 Refunds and Prepayments (020703)

OMB Circular A-11, section 20.9 states, “Refunds are the repayments of excess payments.” Refund amounts directly relate to previous obligations incurred and outlays made. Refunds received are deposited to the credit of the appropriation or fund account charged with the original obligations in accordance with OMB Circular A-11, section 20.9. Any items returned to DWCF supply activities from DWCF customers are to be considered as a recovery (and not classified as a refund). Offsetting collections credited to expenditure accounts automatically offset outlays and budget authority at the expenditure account-level. See Volume 3, Chapter 15 for more information about refunds, and Volume 4, Chapter 5 for more information about prepayments. Refer to the DoD USSGL Transaction Library for posting entry guidance.

8.0 FBWT RECONCILIATIONS (0208)

8.1 FBWT Reconciliation Overview (020801)

8.1.1. Reconciling FBWT is a key internal control in maintaining the accuracy and reliability of the entity FBWT records. Therefore, Components must perform timely reconciliations (see Table 2-4) and implement effective and efficient reconciliation processes. Effective reconciliations serve as a detection control for identifying unauthorized and unrecorded transactions at the entities and at Treasury. Effective reconciliations are also important in preventing entity disbursements from exceeding appropriated amounts and providing an accurate measurement of the status of available resources.

8.1.2. Reconciliation also allows Components to resolve differences in a timely manner. When resolving differences, Components must maintain detailed reconciliation documentation (reviewed and approved by appropriate official) that is readily available for review by management, auditors and Treasury if requested. Components must reconcile any differences caused by time lag and correct differences caused by error. Components must explain any discrepancies between FBWT in the general ledger accounts and the balance in the Treasury’s accounts and disclose them in the notes to the financial statements. Agencies must also provide information on unused funds in expired appropriations that are returned to Treasury at the end of a fiscal year in accordance with SFFAS 1, Paragraph 39.

8.1.3. Components must ensure that all adjustments are researched and traceable to supporting documents as instructed in I TFM 2-5100, Section 5120. Supporting documentation, including reconciliations, transaction-level detail, journal vouchers and adjustments, Standard Operating Procedures (SOPs), and Customer Service Provider agreements (i.e., Memorandums of Agreement (MOA)/Memorandums of Understanding (MOU)/Service Level Agreements (SLAs)), are necessary to provide an audit trail. Components must ensure the supporting documentation is readily accessible to management for oversight and auditors to support auditability.

8.1.4. An effective FBWT reconciliation in which all reconciling differences are resolved ensures that the FBWT universe of transactions (see definition at paragraph 020208) is complete and transactions included in the FBWT accounts are valid. Effective FBWT reconciliation also supports reporting accurate, valid, and timely FBWT account balances. Unrecorded or improperly
recorded transactions, usually referred to as “reconciling items,” are expected and are the result of timing differences or errors. 1 TFM 2-5100, Section 5130 states that agencies must reconcile the FBWT USSGL account 101000 balances for each fund symbol with BFS’ records (i.e., CARS Account Statement; Expenditure Transaction Report; SODs, and Available, Unavailable, and Unappropriated Receipt Account Reports) on a monthly basis.

*8.2 Reconciliation Roles and Responsibilities (020802)

DFAS, in their role as a service provider, and their Component customers are jointly responsible for performing FBWT reconciliations.

8.2.1. DFAS is responsible for:

8.2.1.1. Reporting transactions affecting FBWT accounts to Treasury (e.g., disbursements and collections) that are disbursed under DFAS Disbursing Station Symbol Numbers (DSSNs) and non-DFAS DSSNs (e.g., Army DSSNs).

8.2.1.2. Ensuring that information submitted to Treasury on the SF 224, Statement of Transactions, or SF 1219, for those Agency Location Codes (ALCs) where DFAS is the Designated Agent, matches the information reported to Treasury.

8.2.1.3. Researching and resolving differences identified on the Treasury’s FMS 6652, i.e., SOD for DFAS DSSNs (DFAS is responsible for reporting and assisting with the resolution of differences for non-DFAS DSSNs). BFS provides FMS 6652 to federal agencies for both disbursements and deposits. An FMS 6652 is generated for each ALC by accounting month (month the report is generated) and accomplished month (month the difference occurred) if there is a discrepancy. Differences resulting from deposits indicate there is a discrepancy between the monthly totals submitted through the banking system via the SF 215, Credit Voucher, or the SF 5515, Debit Voucher, and the totals provided by the agency on the SF 224 or SF 1219. The SOD for disbursement transactions reveal discrepancies between monthly totals reported in the agencies’ accounting systems and the transactions reported to Treasury by the Regional Finance Centers and/or through the Intra-Governmental Payments and Collections (IPAC) system on the SF 224 or SF 1219. FBWT reconciliation variances, to include unmatched, suspense, and SOD balances, must be cleared within 60 business days from the date of the transaction (see Table 2-4).

8.2.1.4. Reconciling FBWT appropriation accounts at the TI, main appropriation account-level, and at the ALC level, including ensuring the FBWT universe of transactions for each TAS recorded to USSGL accounts 101000 and 1090000 for all DoD funds is complete and fully reconciled to all of the individual appropriation account balances recorded at Treasury.

8.2.1.5. Reconciling the Components’ FBWT USSGL accounts 101000 and 109000 at the SAHI level. SAHI is a unique account identifier code specific to DoD that represents the structural level below the sub-account level. These codes are typically four digits, and used to identify, manage, and report the financial activity of Defense Agencies, Component, and other operational units reported by the Treasury as the combined activities of TI-097.
8.2.1.6. Aging, assigning, and tracking the status of reconciled differences.

8.2.1.7. Researching and resolving differences originating from operations under the control of DFAS, and clearing these transactions in the FBWT source system(s). Key supporting documentation must be maintained and provided upon request. This documentation includes evidence of reconciliation performed and confirmation that all differences were successfully reconciled.

8.2.2. DoD Components are responsible for:

8.2.2.1. Reporting transactions affecting FBWT accounts to Treasury (e.g., disbursements and collections) that utilize Treasury Disbursing.

8.2.2.2. Ensuring that information submitted to Treasury on the SF 224 or SF 1219, for those ALCs where the Component is the Designated Agent, matches what is reported to Treasury. Ensuring a valid and proper LOA is on the original obligating documents that will be used throughout the procure-to-pay process.

8.2.2.3. Researching, resolving, and reporting status of reconciled differences originating from operations under their control.

8.2.2.4. Monitoring and approving the reconciliations performed by DFAS on their behalf. Ensuring all reconciling differences are supported by detail-voucher level transactions. Key supporting documents must be kept and provided as requested; include evidence of reconciliation performed and confirmation that all differences were successfully reconciled.

8.2.3. Coordination between DFAS and their Component customers is necessary to properly identify, assign, age, track, research and resolve reconciled differences in a timely manner. DFAS’ roles and responsibilities in Disbursing and Treasury Reporting Operations are described throughout Volume 5 and in Volume 6A\(^2\), Chapter 3.

8.2.4. DFAS and their Component customers must formally establish and document their understanding and agreement of roles and responsibilities in accordance with DoD Instruction 4000.19, “Support Agreements.” DFAS and their Component customers must have written MOAs, MOUs, or SLAs in place that define the roles and responsibilities between the Service Provider and the Customer(s).

*8.3 Treasury Reconciliation Requirements (020803)

Treasury requires reconciling FBWT accounts to the Treasury reported amounts by Department, Period of Availability, and Main Account (i.e., TI, fiscal year, and fund symbol) monthly\(^3\). During reconciliation, DFAS and their Component customers must:

\(^2\) Volume 6A, Chapter 3 discusses SF 1220, “Statement of Transactions.”

\(^3\) Treasury sets forth the requirements for reconciling FBWT in I TFM 2-5100 and the I TFM 2-5100 Supplement. Audit issue guidance is provided in the FAM Substantive Procedures Section 921-Auditing Fund Balance with Treasury, jointly published by the GAO and the CIGIE.
8.3.1. Research and resolve the underlying causes of differences reported by the Treasury on the SOD (FMS 6652) each month and make corrections to monthly Treasury reports and agency accounting records.

8.3.2. Reconcile general ledger balances by Department, period of availability, and main account with the balances reported by Treasury.

8.3.3. Ensure that all adjustments are researched and traceable to supporting documents in accordance with I TFM 2-5100.

8.3.4. Document detailed reconciliations and make available to auditors and Treasury if requested, as instructed in I TFM 2-5100.

8.3.5. Ensure differences recorded in Treasury budget clearing accounts (suspense accounts) are reconciled monthly as instructed in I TFM 2-5100, and moved to the appropriate LOA within 60 business days from the date of transaction. In accordance with TFM Volume I, Bulletin 2020-05, the agency Chief Financial Officer (CFO) must annually certify that the ages of the balances in the suspense accounts are no more than 60 business days old with clear explanations of exceptions. See paragraph 020805.

8.4 Other Defense Organizations Reconciliation Requirement (020804)

Every DoD Component with FBWT accounts must perform detailed reconciliations of their FBWT accounts (USSGL accounts 101000 and 109000). DFAS and their Component customers must perform the reconciliations monthly to ensure the accuracy and reliability of the Component’s FBWT records and the integrity of their financial statements.

8.4.1. In addition to the Treasury Main Account requirement, DoD Components must ensure that FBWT accounts are reconciled to their sub-allocations as provided by OUSD C.

8.4.2. For Treasury reporting purposes, DoD must add the balances in the TI-097 accounts together and reconcile to the Treasury’s control total at the TAS level in CARS.

8.4.3. To support effective FBWT reconciliation, Components must ensure that reconciliations include and address amounts reported in:

8.4.3.1. Treasury’s CARS Account Statement;

8.4.3.2. Trial balances (for both budgetary (outlays/collections) and proprietary (101000/109000 USSGL accounts) from the accounting system (including budgetary FBWT to proprietary FBWT Governmentwide Treasury Account Symbol Adjusted Trial Balance System edits and validations);

8.4.3.3. Financial statements (outlays and collections on the SBR; FBWT on the Balance Sheet);
8.4.3.4. FMS 6652 (for deposits and disbursement/IPAC transactions);

8.4.3.5. Check issue data processed in the Treasury Check Information System.

8.4.4. Additionally, Components must ensure that they perform monthly reconciliations at the individual voucher level detail and include:

8.4.4.1. All budget fiscal years,

8.4.4.2. All appropriations/Treasury accounts (including general funds, working funds, revolving funds, special funds, deposit funds, and trust funds),

8.4.4.3. All SAHIs of the TI-097, and

8.4.4.4. All activity, including suspense accounts\(^4\) (also see “Treasury Budget Clearing Accounts” in paragraph 020807),

8.4.5. DFAS and DoD Components must also demonstrate they have controls in place to ensure that amounts reported daily or monthly to Treasury reconcile to collections and disbursements processed through the disbursing systems and recorded accurately and timely in the accounting systems. Monthly Treasury reporting includes SF 224 or SF 1219 and SF 1220 by DFAS or other federal agencies (e.g., Department of State and General Services Administration). Components who are the ALC Designated Agents and submit information to Treasury on the SF 224, SF 1219, or SF 1220 must ensure that the information matches what is submitted to DFAS. Any differences between what was submitted to Treasury and what was submitted to DFAS must be corrected by the ALC Designated Agent (either DFAS or the Components) in 15 business days after identification by DFAS. See Volume 5, Chapter 15 for information on the requirements for the SF 1219.

8.5 Reconciliation of FBWT for Comparison of Transactions (020805)

8.5.1. Reconciling FBWT includes a comparison of transactions at a level of detail sufficient for specific identification of differences to establish that the entity’s FBWT general ledger accounts and the Treasury control totals are accurately stated. Detail sufficient for specific identification of differences are voucher numbers for cash disbursements and collections, summary bill numbers for interfund transactions, and authorizing document numbers for nonexpenditure transfers and funding events.

8.5.2. Components must comply with certain operational requirements and deadlines when performing reconciliations to compare transactions. Components must:

8.5.2.1. Perform reconciliations and identify differences at the voucher level (or equivalent). Components must adhere to the 2-month (60 calendar days) reconciliation requirement in accordance with the TFM and move toward a 1-month (30 calendar days) requirement.

\(^4\) Sensitive activity may undergo an equivalent reconciliation process in a separate environment, if the balances can be matched with the summary reconciliation.
reconciliation requirement following the end of the month being reconciled effective fiscal year 2021. See Table 2-3 for a list of data files used to perform reconciliations and data file monthly availability dates.

8.5.2.2. Ensure processes are in place to assign, track, age, research, and resolve differences between Treasury, disbursing system records and accounting system records, as prescribed by Treasury, at the voucher level detail on a monthly basis. (Note: Since Treasury reports information at the summary-level, Components must roll up voucher level detail disbursing system and accounting system records and compare to the summary-level Treasury reports.) These balances must be analyzed and reconciled monthly in the SF 224 to ensure all collected amounts are properly credited to the proper appropriation and applicable accounts receivable accounts. For any suspense account, items or transactions more than 60 business days old, investigate and document the reason why the transaction cannot be reclassified to the correct appropriation. All differences must be cleared within 60 business days from the date of the transaction. See Table 2-4 for a summary of the required deadlines.

8.5.2.3. Record journal vouchers in the system of record at the account-level and/or SAHI-level to resolve suspense account and SODs, if necessary, until the proper LOA can be identified. DFAS and their Component customers must maintain all journal vouchers and supporting documentation, including list of journal vouchers that comprise the differences.

8.5.2.4. Complete both Service Provider supervisory and Component reviews and approvals within 10 business days following the completion of researching and resolving all identified differences from the monthly reconciliation. Refer to Volume 6A, Chapter 2 for guidance on journal voucher adjustments and approvals.

8.5.3. Components must ensure they have addressed all of the critical areas and key control points in the FBWT end-to-end reconciliation, as shown in Figure 1. These key control points are:

8.5.3.1. When on daily reporting, reconciling the Component’s general ledger system(s) to the Disbursing Systems daily;

8.5.3.2. Reconciling the Cash Management Report (CMR) to the Component’s general ledger system(s) monthly (note: this key control point only applies to the TI-097 Components);

8.5.3.3. Researching and resolving unsupported differences identified on the CMR, as identified by the SAHI “9999,” monthly (note: this key control point only applies to the TI-097 Components);

8.5.3.4. Reconciling the Treasury CARS Account Statement to either the CMR (for TI-097 Components) or the Component’s general ledger system(s) (for the Military Departments’ General Funds) monthly. Refer to 020807 for additional information on the CARS reconciliations;
8.5.3.5. Researching and resolving activity identified in the budget clearing accounts (suspense accounts) on the CARS Account Statement monthly. Refer to paragraph 020807 for additional information on the budget clearing accounts; and

8.5.3.6. Researching and resolving all differences identified on the FMS 6652 for all DoD ALCs reported to Treasury by each of the DFAS Centers monthly.

8.5.4. Components must work to achieve a complete match rate of 99 percent each month over the transactions for each key control point.

*8.6 FBWT – CARS Account Statement Reconciliation (020806)

8.6.1. The CARS Account Statement Module is an online, query driven component that provides a daily refreshed view of a Federal Program Agency’s (FPA’s) FBWT. This Governmentwide Accounting (GWA) Module replaced the reports formerly available through the Government-wide On-line Accounting Link System II. The primary goal of the Account Statement is to provide an up-to-date source of balance and transaction information to assist FPAs with their reconciliation process. All agencies must transition to daily submission of FBWT disbursement and collections to the Treasury’s CARS by the end of fiscal year 2020. More information about the Account Statement is available at the Treasury’s website.

8.6.2. Each DoD Component must reconcile its transactions to the beginning balance, net activity, and ending balance on the CARS Account Statements. The Account Statement consists of three sections: (1) Account Summary, (2) Expenditure Activity, and (3) the Transactions reports. Agency users can generate the Account Statement reports at either a TAS or ALC level. FMS 6652 arise from ALC-based SF 1219 and SF 1220 reporting submitted by each of the three DFAS centers. The Support Listings provide links to other FMS Accounting Systems that support the monthly SOD reconciliations.

8.6.3. Users can access CARS Account Statement information at the Department Level and can view both a daily Accounting View (Dynamic) and a monthly Published View (Static) of their account balances and supporting transactions. The SOD application receives a daily transmission from CARS. This daily transmission allows BFS to provide more up-to-date information to FPAs. Deposit data and agency statements of transactions are updated daily in CARS; for these items, the FPAs are receiving daily reconciliation information from the GWA Module. This enables the FPAs to identify and correct differences earlier, sometimes before closing the monthly processing. More information about the SOD and detail support listings is available at the Treasury’s website.

8.6.4. Agencies report changes in the FBWT accounts to Treasury’s BFS. All agencies must transition to daily submission of FBWT disbursement and collections to Treasury’s CARS by the end of fiscal year 2020. “CARS Daily Reporters” submit the TAS/Business Event Type

---

5 Currently, this requirement does not apply to Defense Agencies and Field Activities that are part of shared Treasury Account Symbols. These organizations, comprising TI-097, must reconcile their FBWT balances individually to internal TI-97 CMR with support from DFAS as their service provider. DFAS is responsible for reconciling the totals of all TI-97 to Treasury.
Codes and/or Classification-keys into the Classification Transactions and Accountability module within CARS on a daily basis for each payment via the Payment Information Repository or the Secure Payment System, and a collection via the Collection Information Repository.

8.6.5. Until agencies are in compliance with being “CARS Daily Reporters,” they must continue to report disbursements and collections to an appropriation through monthly reporting on the Standard Form (SF) 224, Statements of Transactions; or in one of the following: SF 1219, Statement of Accountability; SF 1220, Statement of Transactions According to Appropriations, Funds, and Receipt Accounts, in accordance with [ITFM 4A-4000](#), Section 4030. See Volume 6A, Chapter 3 for information on the requirements for the SF 1219 and SF 1220.

8.7 Treasury Budget Clearing (Suspense) Accounts (020807)

8.7.1. According to ITFM 2-1500, Section 1520.25, BFS established clearing accounts to temporarily hold unidentifiable general, special, or trust fund collections that belong to the Federal Government until they are classified to the proper receipt or expenditure accounts by the Federal Entity.

8.7.2. Effective FBWT reconciliations include clearing transactions recorded in Treasury budget clearing accounts (suspense accounts) in a timely manner (see paragraph 020806). On behalf of the Components, DFAS must be able to provide:

8.7.2.1. A list of individual vouchers and dollar amounts that comprise/equal the difference between Treasury, disbursering system activity and accounting system trial balance amounts for monthly reconciliations;

8.7.2.2. Vouchers, records, reports, disposition and supporting documentation for all transactions posted to the suspense accounts for auditor-selected sample items for monthly reconciliations. Components with key supporting documents must provide it as requested.

8.7.2.3. A monthly list of journal vouchers and dollar amounts (by Component) that comprise/equal suspense account amounts at year-end; and

8.7.2.4. Journal vouchers and supporting voucher documentation that demonstrates the voucher was recorded to the appropriate Component. DoD Components must maintain records for transactions input into their general ledger.

8.8 Requirement for Written Procedures (020808)

Components must ensure that they have current written SOPs and other forms of process documentation (e.g., narratives and process maps), in accordance with the Managers’ Internal Control Program, to direct and document the proper reconciliation processes. SOPs must also include evidence of dated supervisory review and approval certifying that it is current and accurate. In the written procedures, Components must require the practice of segregating the journal entry for unsupported undistributed amounts from the journal entry for the undistributed amounts that can be supported. This practice is essential for efficient cash reconciliation management and for
audit support and measurement. For example, if the total undistributed amount is 95 percent supported and 5 percent not supported, then record two journal voucher entries to segregate the amounts. See Volume 6A, Chapter 2 for information on proper preparation and documentation of a journal voucher.

8.9 Expenditure and Receipt Accounts Annual Review (020809)

DFAS must review and validate all expenditure and receipt accounts reported by Treasury annually to determine if the TAS are valid. DFAS must work with Treasury to remove invalid and unused TAS from Treasury reports/systems on an annual, or as needed basis.

8.10 FBWT Reconciliation Quarterly Scorecard (020810)

8.10.1. Treasury’s BFS provides a Quarterly Scorecard to all CFOs of federal agencies (see I-TFM Bulletin 2020-05).

8.10.2. This scorecard focuses on FBWT reconciliation metrics from the disbursing operations perspective. This Quarterly Scorecard reflects agencies’ performance by ALCs in compliance with the BFS Cash Accounting Branch financial reporting standards. Accuracy of Reporting, SOD Reconciliation, Suspense/Default Account Reconciliation (F3502, F3875 and F3885), and Timeliness of Reporting are the reporting standards. The Treasury uses a traffic light grading system. For example, agencies score “green” if they successfully met all standards, “yellow” if they met some, but not all standards, and “red” if they have not met any of the standards based on the criteria outlined in the scorecard.

8.10.3. OUSD(C) requires each ALCs to explain the cause of each discrepancy no later than 30 calendar days after the Scorecard is issued, along with corrective action taken to address the discrepancy, when the discrepancy will be corrected, and what processes are in place to prevent similar discrepancies in the future.

*ANNEX 1

SUPPORTING FUND BALANCE WITH TREASURY BALANCES BROUGHT FORWARD

1.0 GENERAL (A01)

After complying with the Fund Balance with Treasury (FBWT) reconciliation requirements described in Chapter 2, including fully reconciling accounting systems to the Treasury monthly and implementing a process to identify, track, and resolve differences on a monthly basis, Components must follow this annex to reconcile and support FBWT balances brought forward (i.e., beginning balances). The approach described in this annex and the resulting permanent adjustment may be used only once. This annex identifies the Components as having the responsibility to follow the approach. However, the Defense Finance and Accounting Service (DFAS), as the Component’s accounting Service Provider, will perform the steps described on behalf of the Components (DFAS’ customers), unless the customer elects to perform the analysis.

2.0 APPROACH TO SUPPORT FBWT BALANCES BROUGHT FORWARD (A02)

All Components must follow Steps 1 through 4 described in this section. Those Components that can reconcile FBWT at the voucher-level and maintain related supporting documentation to support 99 percent of its Treasury’s Government-wide Accounting (GWA) system account statement balances brought forward do not proceed past Step 4. Those Components who are unable to fully reconcile and/or support its FBWT transaction level detail to obtain 99 percent coverage must complete Steps 5 through 8.

2.1 Step 1 (A0201)

Perform aging analysis.

2.1.1. Per the Financial Improvement and Audit Readiness (FIAR) Directorate FIAR Guidance, Components must perform an aging analysis over the total value of its open appropriations (i.e., unexpired and expired appropriations) as of September 30, 2014, and each fiscal year end thereafter until they can demonstrate that they comply with FBWT reconciliation requirements described in Chapter 2 (see paragraph 010202). This will enable the Component to identify the number of prior fiscal years (FYs) it will need to perform monthly FBWT reconciliations at the voucher-level and provide supporting documentation for to support 99 percent of its FBWT balances brought forward.

2.1.2. Components must obtain the net detailed activity (authority, transfers, gross disbursements, and offsetting collections) of all open appropriations with balances in the FBWT account for the fiscal years of initial appropriation from the GWA system account statements and summarize the information into the following table. Note that no-year (or “X-year”) appropriations must be identified separately from the single- and multi-year appropriations for each FY.
Table 1. FBWT Aging Analysis Template

<table>
<thead>
<tr>

<tr>
<td>No-Year</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>100.0%</strong></td>
<td></td>
</tr>
</tbody>
</table>

2.1.3. Components executing Treasury Index (TI) 097 funds will not be able to obtain the detailed activity information at the Organization Unique Identifier Code (OUID, that is, limit) level from the GWA system account statements, since they are at the Treasury Account Symbol (TAS or appropriation) level. Instead, those Components, with support from DFAS, must obtain that detailed activity information from the Defense Departmental Reporting System-Budgetary to perform the aging analysis. DFAS will perform a DoD-wide consolidated aging analysis at the TAS level using the GWA system account statement for TI 097 funds.

2.1.4. Once Components have performed the aging analysis and summarized their open appropriations, they need to determine how many years of performing monthly FBWT reconciliations and providing supporting documentation are necessary to support at least 99 percent of their FBWT balances brought forward.

2.1.5. If no-year appropriations need to be included to reach the 99 percent coverage of the Component’s total open appropriations, then Components need to assume a requirement to provide five years of historical supporting documentation for that portion.

2.1.6. As a notional example, a completed aging analysis and summary of open appropriations is found in the following table.
### Table 2. Notional Example of Completed Aging Analysis

</tr>
</tbody>
</table>

#### 2.1.7. To obtain coverage over at least 99 percent of its FBWT balances brought forward, the Component would need to perform monthly FBWT reconciliations and provide supporting documentation going back to FY 2010 for all activity, regardless of the initial appropriation year. The Component would also need to provide five years of historical supporting documentation for the no-year appropriations since that is necessary to obtain 99 percent coverage.

#### 2.2 Step 2 (A0202)

Adhere to FBWT reconciliation requirements in Chapter 2.

2.2.1. Components and DFAS must comply with the FBWT reconciliation requirements defined in Chapter 2 before proceeding with the additional steps in this annex. This includes performing monthly FBWT reconciliations at the voucher-level; identifying, aging, and resolving any reconciling differences; and supporting the voucher-level detail with documentation.

2.2.2. Components and DFAS must ensure they have a process in place to address each of these critical areas to address FBWT risks, as shown in Figure 1.

#### 2.3 Step 3 (A0203)

Identify initial audit period, and perform monthly FBWT reconciliations and test supporting documentation for prior fiscal years.

2.3.1. Components must identify the year they first plan to undergo a financial statement audit, and count back from that date using the number of years identified in the aging analysis in Step 1. This allows Components to determine their period start date to establish auditable beginning balances for FBWT.
2.3.2. Components and DFAS must perform monthly FBWT reconciliations at the voucher-level beginning with the date they have reached full compliance with Chapter 2, and work back progressively through each fiscal year needed to obtain 99 percent coverage of its FBWT balances brought forward.

2.3.3. See Chapter 2 for details on what must be included in the monthly reconciliations.

2.3.4. After completing monthly FBWT reconciliations at the transaction level, Components and DFAS must then perform discovery testing of appropriations, transfers, disbursements, collections and adjustments (including journal vouchers) to the FBWT accounts, working back progressively through each fiscal year needed to support the FBWT brought forward balance to verify their ability to provide supporting documentation.

2.3.5. Supporting documentation must include, at a high level, third party documentation, system reports, Treasury documentation, and reconciliations. Specific examples of supporting documentation that may be available to support FBWT balances brought forward are presented in the Fund Balance with Treasury and Balances Brought Forward sub-sections of Section 5 of the FIAR Guidance.

2.3.6. Supporting documentation must exist in support of all open FBWT account balances back to the year of initial appropriation. For audit readiness purposes, Components are only required to demonstrate 99 percent coverage of beginning balances.

2.3.7. For the notional example presented in Step 1, the Component and DFAS would be expected to perform monthly FBWT reconciliations at the transaction level and testing of transaction level detail for FYs 2014 through 2010.

2.4 Step 4 (A0204)

Assess ability to perform monthly FBWT reconciliations and provide supporting documentation to obtain 99 percent coverage of FBWT balances brought forward.

2.4.1. After Components and DFAS are able to perform monthly FBWT reconciliations at the transaction level and provide supporting documentation for all prior fiscal years to obtain 99 percent coverage of its FBWT balances brought forward, then they must continue to adhere to the FBWT requirements described in Chapter 2.

2.4.2. If Components and DFAS determine they have reached the point where they are unable to perform monthly FBWT reconciliations at the transaction level or provide supporting documentation, or it is not cost effective to do so, for all years and accounts required to obtain 99 percent coverage, they will need to proceed with the next steps in the approach.
2.5 Step 5 (A0205)

Perform gap analysis.

Components and DFAS must perform a gap analysis to identify the portions of FBWT balances brought forward, by appropriation year, which they are unable to support. An example of how Components and DFAS may report on their gap analyses is depicted in the following table.

Table 3. Notional Example of Completed Gap Analysis

</tbody>
</table>

2.6 Step 6 (A0206)

Prepare package to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) FIAR to seek approval and justify need for posting a permanent adjustment to balance to Treasury.

2.6.1. Once Components and DFAS have determined the total amount of their unsupportable FBWT balances brought forward, they will need to prepare a package to submit to OUSD(C) FIAR to seek approval and justify the need for posting a permanent adjustment in the Component’s accounting system(s) to correct the FBWT balances brought forward amount and balance to Treasury.

2.6.2. The package must include the following to demonstrate that Components and DFAS have followed the approach described in Steps 1 through 5, and have exhausted measures to support their FBWT balances brought forward:

2.6.2.1. Aging analysis of open appropriation balances by appropriation fiscal years from Step 1.
2.6.2.2. Determination of the appropriation fiscal years that Components intend to seek support for in order to gain coverage over 99% of their FBWT balances brought forward.

2.6.2.3. Results of monthly transaction level FBWT reconciliations performed in Step 3.

2.6.2.4. Results of transaction level detail testing performed in Step 3.

2.6.2.5. Balances identified as unsupportable and proposed adjusting journal vouchers from Step 5.

2.6.2.6. Description of process and controls in place that demonstrate compliance with Chapter 2.

2.7 Step 7 (A0207)

Post permanent adjustment in accounting system.

2.7.1. After obtaining OUSD(C) FIAR’s approval, the Components and DFAS must post a permanent adjustment in the Components’ accounting system(s) to adjust for unreconciled differences with the Treasury. This permanent adjustment must bring the unsupported balance to zero.

2.7.2. The Components and DFAS must ensure all negative unliquidated obligations and unmatched disbursements are resolved and in-transits are accounted for before posting the adjustment. See Volume 3, Chapter 11 for additional details.

2.7.3. The journal entry for this adjustment follows U.S. Government Standard General Ledger (USSGL) – A Treasury Financial Manual Supplement accounts transactions B102 (Budgetary only), D304, and D306 (Proprietary only). The example assumes that the balance in the accounting system is greater than what Treasury has reported. If the accounting system balance is less than what Treasury has reported, reverse the journal entry.

**Budgetary Entry**

DR 465000 Allotments – Expired Authority (or use 461000 if Unexpired Authority)
CR 490200 Delivered Orders – Obligations, Paid

**Proprietary Entry**

DR 310500 Unexpended Appropriations – Prior Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year
DR 740500 Prior Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year
CR 101000 Fund Balance with Treasury
CR 570500 Expended Appropriations - Prior Period Adjustments Due to Corrections of Errors - Years Preceding the Prior Year
2.7.4. No guidance in this chapter must be construed as authorizing a delay in (1) the
recording of an executed obligation or (2) the requirement to conduct an investigation of a
potential violation of the Antideficiency Act that results from any action other than the sole
requirement to post this adjustment.

2.8 Step 8 (A0208)

Adhere to FBWT reconciliation requirements in Chapter 2.

2.8.1. The Components and DFAS must continue to adhere to the FBWT requirements
described in Chapter 2.

2.8.2. If reconciling items are identified during the monthly FBWT reconciliations
(subsequent to recording the adjustment in step 7) that relate to appropriations and fiscal years
included in the adjustment made in Step 7, then the Components and DFAS must notify OUSD(C)
FIAR and post a journal entry to offset the adjustment made in Step 7.

**Budgetary Entry**

| DR  | 490200 | Delivered Orders – Obligations, Paid |
| CR  | 465000 | Allotments – Expired Authority (or use 461000 if Unexpired Authority) |

**Proprietary Entry**

| DR  | 101000 | Fund Balance with Treasury |
| DR  | 570500 | Expended Appropriations - Prior Period Adjustments Due to Corrections of Errors -Years Preceding the Prior Year |
| CR  | 310500 | Unexpended Appropriations – Prior Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year |
| CR  | 740500 | Prior Period Adjustments Due to Corrections of Errors – Years Preceding the Prior Year |

2.8.3. Components and DFAS must ensure they have a process in plan to address each of
these critical areas to address FBWT risks, as shown in Figure 1.

CHAPTER 3

RECEIVABLES

1.0 GENERAL

1.1 Purpose

This chapter prescribes policy for the recognition, recording, and reporting of public and federal (hereafter referred to as intragovernmental) accounts receivable.

1.2 Authoritative Guidance

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.1. Title 10, United States Code, sections 1095, 2201, and 3863 (10 U.S.C. §§ 1095, 2201, and 3863).

1.2.2. 22 U.S.C. § 2767.

1.2.3. 31 U.S.C. §§ 1552(a), 1555, 3321, 3351-3558, 3711, and 3717.

1.2.4. 41 U.S.C. § 7104(a).

1.2.5. 42 U.S.C. § 2651.

1.2.6. Debt Collection Improvement Act of 1995 (DCIA).

1.2.7. Digital Accountability and Transparency Act of 2014 (DATA Act).

1.2.9. 31 CFR 901.9, “Interest, penalties, and administrative costs”

1.2.10. Office of Management and Budget (OMB) Circular A-11, “Preparation, Submission, and Execution of the Budget.”

1.2.11. OMB Circular A-129, “Policies for Federal Credit Programs and Non-Tax Receivables.”

1.2.17. Treasury Report on Receivables (TROR).

1.2.18. Federal Acquisition Regulation (FAR) subpart 32.6, “Contract Debts.”

1.2.20. DoDI 5010.40, “Managers’ Internal Control Program Procedures.”

*2.0 Definitions

2.1 Accounts Receivable

Receivables arise from claims to cash or other assets against another entity. At the time revenue is recognized and payment has not been received in advance, a receivable must be established. Receivables include, but are not limited to, monies due for the sale of goods and services and monies due for indebtedness. Examples of indebtedness to DoD include overdue travel advances, Federal Employee Health Benefits paid while an employee is in a leave without pay status, dishonored checks, fines, penalties, interest, overpayments, fees, rent, claims, damages, and any other event resulting in a determination that a debt is owed to DoD. See Volume 16, for comprehensive debt management policy and requirements to include administrative actions associated with the collection and disposition of debts owed to DoD. An accounts receivable is categorized as either an entity or non-entity accounts receivable in accordance with SFFAS 1:

2.1.1 Entity Accounts Receivable. Entity accounts receivable are amounts that a federal entity claims for payment from other federal or non-federal entities and that the federal entity is authorized by law to include in its obligation authority or to offset its expenditures and liabilities upon collection.
2.1.2. Non-Entity Accounts Receivables. Non-entity accounts receivable are amounts due to be collected by DoD on behalf of the U.S. Government or other entities, and DoD is not authorized to use. Non-entity accounts receivables are reported separately from receivables available to DoD (entity accounts receivables). Non-entity accounts receivable include governmental receipts and collections arising from the sovereign and regulatory powers unique to the Federal Government, (e.g., interest, penalties, income tax receipts, customs duties, court fines, and certain license fees). DoD accounts receivable in canceled accounts are also non-entity receivables because collections received after an appropriation cancels are deposited in the Treasury Account 3200, “Collections of Receivables from Canceled Accounts.” Non-entity receivables are recorded as a receivable and a custodial liability. In addition, federal entities should not recognize fiduciary assets, liabilities, and future cash flows in their financial statements, but only disclose them in a note disclosure.

2.2 Accounts Receivable Office

The Accounts Receivable Office (ARO) is the office responsible for the recording and reporting of receivables and may also be the office responsible for debt collection. In most but not all cases, the ARO is located at Defense Finance and Accounting Service (DFAS) centers.

2.3 Allowance for Loss on Accounts Receivable

DoD must recognize an allowance for loss on accounts receivable when it is more likely than not that DoD is not able to totally collect the receivables. The phrase “more likely than not” means more than a 50 percent chance of loss occurrence. The allowance for loss on accounts receivable is recorded as allowance for uncollectible accounts in the DoD consolidated and components financial statements and notes.

2.4 Current (Non-Delinquent) Receivables

Non-delinquent receivables, i.e., debts, are categorized as current and non-current assets. The portion of a non-delinquent debt that is scheduled to be collected in the next 12 months is recorded as current; the portion of a non-delinquent debt scheduled for collection after 12 months is recorded as non-current. The importance of these categories is to inform DoD and Treasury of the expected cash flow/liquidity of the asset (i.e., current versus non-current assets).

2.5 Close-Out (Applies to Public Debt Only)

Close-out is one of two accounting classifications for writing off debt that indicate whether or not an agency will continue debt collection efforts after write-off. The ARO, in conjunction with the DoD Component Fund Holder, closes out a debt when it is determined that further debt collection actions are prohibited (e.g., a debtor is released from liability in bankruptcy) or there are no plans to take any future active or passive actions to try to collect the debt. Close-out may occur concurrently with the write-off of an account receivable or at a later date, depending on the collection strategy and the ultimate determination that the debt has been discharged. At close-out, DoD may be required to report to the Internal Revenue Service (IRS) the amount of the debt as potential income to the debtor on IRS Form 1099C, Cancellation of Debt.
2.6 Currently Not Collectible

Currently Not Collectible (CNC) is one of two accounting classifications for writing off debt that indicate whether or not an agency will continue debt collection efforts after write-off. CNC is a category of debt that has been written off on the DoD Component’s financial statements, but cost effective debt collection efforts will continue to be taken by the cognizant Debt Collection Management Office (DCMO), Debt Collection Office (DCO), or Debt Management Office (DMO).

2.7 Debt

Debt is defined in 31 U.S.C. § 3701(b)(1) as any amount of funds or property that has been determined by an appropriate official of DoD to be due to DoD by a person, organization, or entity other than another Federal agency. See Volume 16 for additional information on debt management.

2.8 Debt Collection Office

The DCO is responsible for initial debt collection actions and serving due process. The DCO refers to a general category of offices and includes, but is not limited to, the ARO, military and civilian payroll offices, and other organizational elements within the DoD Components that perform debt management/collection actions (e.g., personnel offices).

2.9 Delinquent Receivables

2.9.1 A receivable is delinquent if it has not been paid by the date specified in the DoD’s initial written demand for payment or applicable agreement or instrument unless, other satisfactory payment arrangements have been made. If the contract or agreement provides for a “grace” period, DoD Components do not report the debt as delinquent until the grace period expires without payment. In such cases, however, the original due date is used for delinquency date.

2.9.1.1 Delinquent debts are aged from the date of delinquency.

2.9.1.2 If a debtor is making payments according to the terms of a repayment plan approved by the agency, the debt is not considered to be delinquent.

2.9.1.3 On the TROR:

2.9.1.3.1 Report each debt owed by a single debtor with multiple debts as a separate debt.

2.9.1.3.2 Report each delinquent debt once, even if DFAS or DoD Component tracks delinquent payments on that debt separately. For example, if the debtor has missed two payments, and the agency keeps track of those delinquencies separately, report them together as one debt. If any installment is delinquent more than 180 days, report the debt on the TROR as delinquent more than 180 days.
2.9.2. DoD Components must report the entire amount of each single debt as delinquent, if any part of it has been delinquent more than 180 days and the debt has been accelerated.

2.10 Direct Cost

A direct cost includes any cost that can be identified specifically with handling cases or accounts during the debt collection process. These costs normally include the cost of personnel, computer equipment, supplies, postage, contract services, and administrative fees charged by the Treasury.

2.11 Due Process

Due process is the notice of indebtedness and the opportunity provided the debtor to dispute the indebtedness. The Fifth Amendment of the U.S. Constitution provides that no person “shall be deprived of life, liberty, or property without due process of law....” The minimum due process required is generally established by the statutes that authorize the use of a specified debt collection tool or by implementing regulations. In the context of federal debt collection, see Volume 16, Chapter 2.

2.12 Indirect Cost

Indirect cost includes costs associated with the debt collection process that benefits at least one other activity. These costs must be accumulated only when they are expected to exceed 20 percent of the direct costs.

2.13 Intragovernmental Receivables

Intragovernmental receivables are claims of a federal entity against other federal entities. Intragovernmental receivables are either within DoD (e.g., a Military Service) or outside DoD (e.g., General Services Administration).

2.14 Non-Current Non-Delinquent Receivables

Non-current non-delinquent receivables are non-delinquent accounts receivables that the due date is not within 12 months after DoD claims the receivable.

2.15 Non-Delinquent Receivables

Non-delinquent receivables are accounts receivable that have not been billed or are not due under the contract or billing document pertaining to the receivable. This also includes rescheduled receivables and receivables under an installment agreement.

2.16 Public/Non-Federal Receivables

Public/non-federal receivables are claims of DoD against non-federal entities. The term “public/non-federal entities” encompasses domestic and foreign persons and organizations outside
the U.S. Government, including Nonappropriated Fund Instrumentalities (NAFIs) for purposes of processing receivables. Examples are: salary/travel overpayments; overpayments to contractors/vendors due to duplicate and erroneous billings; incorrectly computed invoices; non-Foreign Military Sales (FMS) foreign government fuel purchases; contract default; amounts due for items rejected or returned; and amounts due on payments for contractual services such as rent, insurance, and transportation purchased, where such contracts are canceled and adjustments are made for the unused portion.

2.17 Rescheduled Receivables

Rescheduled receivables are receivables that have been subject to rescheduling, forbearance, re-amortization, or any other form of extending the future of the original payment(s) or payment due dates.

2.18 DFAS Enterprise Solutions and Standards Vendor Pay Tax Office

The DFAS Enterprise Solutions and Standards (ESS) Vendor Pay Tax Office is the office that prepares the IRS Form 1099C for reporting to the IRS on closed-out, uncollected, public vendor, contractor, and individual debt.

2.19 Trading Partners

Trading Partners collectively refers to the requesting agency (buyer) and the providing agency (seller) involved in intragovernmental transactions.

2.20 Treasury Report on Receivables

The TROR is a quarterly report of public receivables prepared in compliance with the Treasury guidance. It provides a means for collecting data on the status and condition of the total receivable portfolio from public sources. See section 6.0 for additional information.

2.21 Terminate Collection Action

Terminate Collection Action is a decision to cease active collection action on a debt, in accordance with criteria set out in the Federal Claims Collection Standards, because such collection action is not economically worthwhile or is otherwise inappropriate. “Termination” of debt collection is a legal procedure, which is separate and distinct from the accounting procedure of “write-off”. See 31 U.S.C. § 3711 on additional guidance on termination collection action for additional guidance.

2.22 Write-off of Receivables

The write-off of a receivable is an accounting action that results in removing a public/non-federal receivable from the DoD Component’s financial accounting records/financial statements.
3.0 RECEIVABLES POLICY

*3.1 Recording

3.1.1. According to SFFAS 1, a receivable must be recognized when a federal entity establishes a claim to cash or other assets against other entities, either based on legal provisions, such as a payment due date, or goods or services provided. In the case that an exact amount is unknown, a reasonable estimate must be made by the collecting entities. Disputes or litigation do not affect the timing of receivable recognition. For additional information regarding receivable recognition, refer to SFFAS 1.

3.1.2. A receivable must be established when payment is not received in advance or at the time revenue is recognized. Receivables must be recorded when earned from the sale of goods and services or when an event results in the determination that a debt is owed to DoD, i.e., in the applicable accounting system during the month the receivable occurs. Accounting records for receivables must be maintained so that all transactions affecting the receivables are included in the reporting period of occurrence. There must be immediate recording of events not previously recorded due to error or oversight. The requirements for recording and reporting errors on the financial statements are detailed in Chapter 15.

3.1.3. DoD Components must recognize accounts receivable and unfilled orders without an advance as valid budgetary resources when such receivables or unfilled orders are from federal entities. Absent statutory authority, components must not recognize accounts receivable and unfilled orders without an advance as valid budgetary resources when such receivables or unfilled orders are from public/non-federal entities.

3.1.4. DCOs must ensure that the appropriate ARO is advised that a receivable is to be established in the applicable accounting system. DCOs will provide the ARO with signed copies of indebtedness notices and other appropriate documentation to support entries in the accounting system and will provide the status of the debt which includes: beginning debt balance, collections, adjustments, current ending balance and notice of discontinuance of collection efforts. DoD Components must maintain the supporting documentation in the applicable accounting system. See Volume 1, Chapter 9 for records retention.

3.2 Advance Payments

3.2.1. In general, an advance payment is required for orders from the public, including state and local governments, except for fuel, as the sale of petroleum products to the public is covered by fuel purchasing agreements. The order must be accompanied by an advance equivalent to the actual or estimated cost of goods and services. If amounts are sufficient, Military Departments may use their own appropriated fund budgetary resources to perform a reimbursable order for a NAFI without an advance. However, they must not recognize budgetary resources for the order until the account receivable is paid. An advance payment from foreign governments for FMS is held and recorded in the FMS Trust Fund or investment accounts that can be drawn on to meet the foreign government’s FMS obligations.
3.2.2. The Department has statutory authority to record a budgetary resource for non-federal orders without an advance for work performed under the provisions of 22 U.S.C. § 2767. Components must request approval from the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) in advance of accepting the order(s) and recording the budgetary resource. The OUSD(C) will coordinate with OMB to ensure the resulting budgetary entries will be accepted within federal-wide accounting and reporting systems.

3.2.3. Additional information regarding budgetary resources may be found in Volume 3, Chapters 13, 14 and 15. See Volume 11B, Chapter 11 and Volume 4, Chapter 5 for Defense Working Capital Funds’ policy on receipt of advances on orders from public/non-federal entities.

3.3. Collection of Receivables

3.3.1. The collection of receivables must be aggressively pursued for amounts due from DoD Components, federal agencies, and the public. The due date for a receivable normally is 30 days from the date of invoice, demand letter, or notice of payment due; unless a specific due date is established by statute, contract provision, or notice of indebtedness. Collection actions must be initiated when payment becomes due. See Volume 16, Chapter 2 for additional information on due process.

3.3.2. Funds must be collected in the appropriation that earned the funds, or in the case of a refund, into the appropriation from which the excess payment was made, unless otherwise specified by law. Examples of applicable legal provisions include, but are not limited to:

3.3.2.1. In accordance with 42 U.S.C. § 2651, amounts recovered from a liable third-party or insurer due to a service member’s injury or disease must be credited to current operating funds as follows:

3.3.2.1.1. Amounts recovered for hospital, medical, surgical, or dental care and treatment will be credited to the current operating funds of the facility or activity that provided the care and treatment.

3.3.2.1.2. Amounts recovered for loss of the service member’s duty will be credited to current operating funds of the command, activity, or unit to which the service member was assigned at the time of the injury or illness.

3.3.2.2. In accordance with 10 U.S.C. § 1095, collection from third parties for medical services provided must be recorded against the year in which the collection is received regardless of the year in which service was provided.

3.3.3. Any collections including refunds received after an appropriation cancels must be deposited in Treasury Account 3200, “Collections of Receivables from Canceled Accounts.” See paragraph 3.11 for additional guidance on accounts receivable and canceled appropriations.
3.4 Allowance Account and Aging

3.4.1. An allowance for uncollectible accounts receivable due from the public and intragovernmental customers must be estimated and recorded.

3.4.2. No allowance for uncollectible accounts will be recorded for non-loan interest, penalties, and administrative charges.

3.4.3. The AROs (on behalf of the DoD Components) must age delinquent accounts receivable within the accounting system.

3.4.4. Aging of receivables (delinquency) starts one day after the due date for both public and intragovernmental (within and outside DoD) receivables. See Figure 3-1.

3.5 Interest Penalties, and Administrative Receivable

Interest, Penalties, and Administrative (IPA) receivables are DoD assessments added to delinquent debts. The full amount of a delinquent debt is the sum of the principal, accrued program interest, and any other penalties and/or administrative charges that are due and owed to the DoD. See Volume 16, Chapter 7 for detailed IPA information.

3.5.1. Interest accrues from the first day of delinquency and is added to the outstanding principal receivable balance within the accounting system when an amount due is not received by the due date or other agreed upon date. Interest also must be recognized on outstanding accounts receivable against persons and entities in accordance with provisions in 31 U.S.C. § 3717. Until the interest payment requirement is officially waived by the DoD or the related debt is closed-out, interest will accrue. Note that debts owed by any federal agency are exempt from interest, penalty, and administrative charges. Interest receivables are considered non-entity receivables.

3.5.2. An interest receivable must be recorded when the interest income is earned not when the income is received. An interest receivable must be recorded as it is earned on investments in interest-bearing securities.

3.6 Payment Application

When a debt is paid in partial or installment payments, amounts received will be applied first to contingency fees, second to outstanding penalties, third to administrative charges, and fourth to interest, and lastly to principal per Federal Claims Collection Standards, 31 CFR 901.9(f).

3.7 General Ledger Accounting

Information on receivables must be developed, maintained, and reported using the United States Standard General Ledger (USSGL) accounts depicted in Volume 1, Chapter 7. The first six digits of the accounts receivable general ledger account must conform to the USSGL chart of accounts. DoD requires the use of the DoD Standard Chart of Accounts (SCOA). The DoD SCOA
and accounting transactions for collections and receivables are outlined in the DoD USSGL Transaction Library, available on the Standard Financial Information Structure (SFIS) web page.

3.8 Internal Controls

The basic standards for internal controls prescribed in DoDI 5010.40, must be adhered to in establishing and collecting receivables.

3.8.1. Major categories of receivables must be maintained to facilitate clear and full disclosure of accounts receivable, e.g., disclose the debtor, the amount, the age, and the type of debt. Subsidiary records must be reconciled to the control accounts on at least a monthly basis.

3.8.2. Proper internal controls require the accurate and timely recording of transactions, appropriate documentation and retention appropriate authorization, (i.e., executed only by persons acting within the scope of their authority) and appropriate management.

3.8.3. Responsibilities for authorizing transactions, processing and recording them, reviewing the transactions, and handling any related assets must be separated so that no one individual controls all key aspects of a transaction or event (e.g., a technician responsible for creating cash or check due transactions cannot also be responsible for collecting cash or checks), must be maintained.

3.8.4. Each DoD Component must develop and implement internal operating procedures and/or guidance to implement this overarching policy in a manner that ensures accurate, timely, and relevant reporting of financial data. Internal operating procedures must include a dormant account review quarterly (DAR-Q) for accounts receivable as described in Volume 3, Chapter 8. Relevant records supporting financial statements must be maintained and made available during financial statement audits.

3.9 Erroneous, Invalid, and Unsubstantiated Accounts Receivables

During the DAR-Q process, the reviewer must examine the receivables for completeness, accuracy, and supportability. Abnormal or erroneous accounts receivable must be promptly researched and resolved. If at any time it is determined that a debt was never owed and should not have been classified as an accounts receivable, the accounting records must be adjusted. Return all funds collected to the debtor for an unsubstantiated account receivable.

3.9.1. For errors detected in the year the receivable was recorded, reverse the entry. For errors detected in subsequent fiscal years, record an entry in accordance with the requirements for recording and reporting errors in the financial statements as detailed in Chapter 15.

3.9.2. A billing DoD Component that cannot produce the evidence necessary to establish an accounts receivable and has not been able to obtain the voluntary repayment of the debt, the entries that established the accounts receivable must be reversed.
3.9.2.1. Evidence necessary to establish an account receivable includes, but is not limited to, a duplicate payment voucher, contract reconciliation document, Department of Justice litigation report, an unpaid U.S. payment voucher, or demand letter.

3.9.2.2. All erroneous, invalid, and unsubstantiated accounts receivable must be removed from the general ledger by reversing the existing entry if recorded in current year. See Chapter 15 if the receivable was recorded in prior years. The reversing journal entry must be supported with all known evidence.

3.9.3. The evidence obtained from research may identify internal control failures and/or process weakness with the recognition of accounts receivable. Any internal control failures and/or process weaknesses must be addressed and corrected.

3.10 Canceled Appropriations

AROs must retain all outstanding receivables in the residual records even though an appropriation cancels. When the appropriation cancels, the collection of a receivable is recorded in Treasury miscellaneous receipt account 3200, “Collections of Receivables From Canceled Accounts.” Appropriation cancellation does not relieve DoD of the responsibility to pursue collection or recovery.

3.11 Nonappropriated Fund Instrumentalities Receivables

Receivables from NAFIs must be recorded as transactions from the public. They must be included in the quarterly TROR. With the exception of individual debt, NAFI delinquent debt will not be referred to the DMO or to Treasury for collection assistance. Refer to Volume 13, Chapter 3 for guidance on NAFI debts.

3.12 Foreign Military Sales Receivables

Receivables from the FMS Trust Fund (appropriation 97 11X8242) must be recorded as federal transactions. Other Security Assistance receivables, e.g., the Foreign Military Financing Program, Funds Appropriated to the President (appropriation 11(FY) 1082), must be recorded and reported as intragovernmental receivables. The FMS delinquent accounts receivable will not be referred to the DMO or to Treasury for collection assistance. See Volume 16, Chapter 6 for guidance on FMS receivables.

3.13 Non-FMS Foreign Government Receivables

The ARO will initiate initial billings for non-FMS foreign government accounts receivable. See Volume 16, Chapter 6 for additional information on non-FMS foreign government receivables.
3.14 Retention of Documentation

AROs and DCOs will maintain documentation to support actions taken on each accounts receivable. This includes but is not limited to documents supporting:

3.14.2. Due process requirements.
3.14.3. Research and resolution of abnormal or erroneous balances.
3.14.4. Reversal of entries establishing the receivable.

3.15 Undistributed Collection Balances

Undistributed collection balances placed in Treasury budget clearing (suspense) accounts F3875 and F3885 must be analyzed and reconciled monthly on the Financial Management System Form 224, “Statement of Transactions,” to ensure all collected amounts are properly credited to the proper appropriation and applicable accounts receivable accounts. For any suspense account, items, or transactions more than 60 days old, investigate and document the reason why the transaction cannot be reclassified to the correct appropriation. All differences must be cleared within 60 days, with the exception of those suspense accounts that have been identified by Treasury as exempt from the 60-day requirement. Refer to Chapter 2 for the required investigatory procedures related to budget clearing account balances.

4.0 PUBLIC RECEIVABLES

4.1 General

Receivables due from the public are DoD claims (or another entity within the Federal Government) against non-federal entities, to include public entities, domestic and foreign persons and organizations outside the U.S. Government. Public receivables are also created from the sales of goods or services when an advance payment is not first received or from refunds due to the DoD. See paragraph 3.2 for more on an advance payment.
4.2 Debt Collection Policies

The DoD policies for credit management and debt collection delineated in other volumes are:

4.2.1. Policies and procedures for collection of debt from individuals are in Volume 16, Chapter 3.

4.2.2. Policies and procedures for physical loss of funds are in Volume 5, Chapter 6. Accounts receivable that are the result of improper payments may require loss of funds investigations in accordance with Volume 5, Chapter 6 for improper payments.

4.2.3. Policies and procedures for salary offset to collect debts owed to the DoD by military members or civilian employees are in Volume 7B, Chapter 28; and Volume 8, Chapter 8. Volumes 7A, 7B, and 8 also address collection of child support, alimony, or commercial debts from the pay of military members or civilian employees through garnishment or involuntary offset.

4.2.4. Policies and procedures for collection of commercial or contractor debt are in Volume 16, Chapter 5. Additionally, the FAR Subpart 32.6, prescribes policies and procedures for ascertaining and collecting contract debts, charging interest on the debts, deferring collections, and compromising and terminating certain debts.

4.2.5. Policies for collection of debts from foreign entities are available in Volume 16, Chapter 6.

4.3 Receivables from the Sale of Goods and Services to the Public

4.3.1. Upon receipt of a collection voucher, the ARO must record the collection in the accounting system and include it in the monthly reports (Standard Forms 1218, 1219, and 1220, and FMS Form 224) to Treasury. If an abnormal balance results from recording the collection, the ARO must research and resolve the abnormal balance.

4.3.2. The ARO must refer delinquent accounts receivable for further collection action as required by debt collection policy in Volume 16, Chapter 3.

*4.4 Refunds Receivable

Refunds to appropriations represent amounts collected from outside sources for payments made in error, overpayments, or adjustments for previous amounts disbursed. They must be directly related to previously recorded expenditures and are reductions to those expenditures. There is not a separate account for refunds receivable in the USSGL. Refunds receivable are treated as accounts receivable and DoD Components must recognize and report them in their financial statements.
4.4.1. Examples of refunds receivable include, but are not limited to the following:

4.4.1.1. Salary overpayments.

4.4.1.2. Overpayments to commercial concerns due to erroneous billings, incorrectly computed invoices, or contract default.

4.4.1.3. Amounts due for items rejected or returned.

4.4.1.4. Amounts of recovery due on payments for contractual services, such as rent, insurance, and transportation purchased, where such contracts are canceled and adjustments made for the unused portion.

4.4.1.5. Amounts for advance payment of travel when the travel was canceled.

4.4.1.6. Amounts payable for “due U.S.” travel vouchers.

4.4.1.7. Amounts due from advance payments for contractual purposes.

4.4.1.8. Amounts due from employees on leave without pay for employee share of benefits (i.e., health insurance).

4.4.2. Non-DCO activities (e.g., contracting offices, Fund Holders) must notify the DCO that a debt exists. For contracting offices, the FAR, Part 32, Contract Financing provides the guidance. DCOs must ensure the appropriate ARO is advised to establish a receivable in the applicable accounting system. Such notification must be made in the same accounting cycle that the debt is recognized.

4.4.3. Upon receipt of a collection voucher, the ARO must ensure that the collection is recorded in the accounting system and reported to Treasury. See sections 6.0 and 7.0 for additional guidance on reporting requirements. If an abnormal balance results from recording the collection, then the ARO must research and resolve the abnormal balance.

4.4.4. The ARO or DCO must refer delinquent accounts receivable for further collection action as required in subparagraphs 4.6.

4.4.5. OMB Circular A-11 addresses the proper budgetary accounting for refunds in section 20.10. Since refunds are the repayments of excess payments, the amounts are directly related to previous obligations incurred and outlays made against the appropriation. Refunds received are deposited to the credit of the appropriation or fund account charged with the original obligations.
4.5 Collection Actions

Accounts receivable must be aged to allow for the management of collection actions.

4.5.1. The due date for a receivable is normally 30 days from the date of invoice, demand letter, or notice of payment due unless a specific due date is established by statute, contract provision, or notice of indebtedness. The initial demand for payment, invoice, or demand letter must include a complete explanation of the debtor’s rights and responsibilities, the basis of the indebtedness, the agency’s intention to use various collection tools to collect the debt, additional charges (i.e., interest, penalties, and administrative charges) that may be levied, and the name, work phone number, and address of an individual to contact within the agency to resolve the delinquency. See Volume 16, Chapter 2 for additional information on debt notification requirements.

4.5.2. AROs or DCOs will refer valid and legally enforceable delinquent individual out-of-service debt to the DCMO for further collection action. See Volume 16, Chapter 3 for additional information.

4.5.3. AROs or DCOs will refer valid and legally enforceable delinquent vendor debt of $25 ($100 if vendor does not have a Taxpayer Identification Number) or more, comprised of principal, interest, administrative charges, and penalty, to the DMO for further collection action no later than 60 days after the payment due date. Multiple debts to the same vendor totaling $25 or $100 or more must be consolidated and referred to the DMO as one debt package.

4.5.4. Uncollected public vendor debt of less than $25 and individual out-of-service debt of less than $25 must be collected or written off and closed-out within 1 year of delinquency in accordance with Volume 16, Chapter 3. These debts are not referred to DMO or DCMO for further collection action unless mandated by public law.

4.5.5. The DCMO or DMO must refer valid and legally enforceable delinquent public receivables over 120 days old to Treasury for further collection action in accordance with the DCIA and the DATA Act.

4.5.5.1. Exceptions to the requirement to refer debt to Treasury include debts or claims that: (a) are in litigation or foreclosure; (b) will be disposed of under an asset sales program within one year after becoming eligible for sale, or later than one year if consistent with an asset sales program (See OMB Circular A-129, section IV); (c) have been referred to a private collection contractor for collection for a period of time approved by the Secretary of the Treasury; (d) will be collected under internal offset, if such offset is sufficient to collect the claim within three years after the date the debt or claim is first delinquent; (e) are foreign government debts; or (g) are NAFI debts.

4.5.5.2. The Treasury, after due process, returns uncollected public receivables to the sender (length of time varies based upon collection actions taken by Treasury).

4.5.5.3. Debts less than $100,000 that are referred to Treasury and later returned due to failure to collect may be terminated for further collection action by DCMO or DMO upon
coordination with the appropriate Fund Holder. Debts of $100,000 to $500,000 that are referred to Treasury and later returned due to failure to collect may be terminated with Treasury’s approval. Debts of $500,000 or more must be referred to the Department of Justice for approval to terminate collection action. See Volume 16, Chapter 2 for additional guidance regarding termination of collection action.

4.5.5.4. DCMO or the DMO will advise the ARO when the Treasury has returned a debt as uncollectible. The ARO will take appropriate actions to terminate collection action, write-off the receivable, and close-out the receivable, as applicable.

*4.6 Establishment of Allowance for Loss on Accounts Receivable

4.6.1. The ARO must recognize and record its projected debt losses by setting up allowance for uncollectible accounts on public and intragovernmental accounts receivable in the general ledger. By accurately estimating the potential losses and putting that amount in its allowance accounts, a reporting entity is recognizing the accounts receivable at their net realizable value.

4.6.2. SFFAS 1 requires an allowance for estimated uncollectible receivable amounts be recognized when it is more likely than not that the receivables will not be totally collected; the phrase “more likely than not” means more than a 50 percent chance of loss. TB 2020-1 clarifies that the absence of explicit guidance distinguishing between intra-governmental and nonfederal/public entities receivables, both must be recognized in accordance with SFFAS 1 requirements. The allowance for loss on accounts receivable must be re-estimated annually and when information indicates that the latest estimate is no longer accurate.

4.6.3. Losses due to uncollectible receivables should be measured through a systematic methodology. The systematic methodology should be based on analysis of groups of receivables as a whole with the option to isolate individual receivables for a separate allowance calculation. The allowance amount calculated for individual receivables and groups of receivables will be added together and will be the total amount for allowance for loss on accounts receivable. A provision to increase or decrease the allowance will result in an adjustment of nonexchange revenue, rather than a bad debt expense.

4.6.3.1. Group of Receivables. To determine the loss allowance for receivables less than $100,000, separate the receivables into groups having similar risk characteristics. Receivables may be grouped by each delinquent age category greater than 60 days old, by category of debtor, by reason that gave rise to the receivable, or by geographic regions. The methodology used to determine the percentages will be based on the history of bad debt expense from the last three years. The determined percentages will be applied to the total amount in each category. The OUSD(C) must approve exceptions when abnormal circumstance skews the three-year average.

4.6.3.2. Individual Receivables. Each receivable equal to or greater than $100,000 must be analyzed to determine the loss allowance. Loss estimation for each receivable will be based on: (a) the debtor’s ability to pay, (b) the debtor’s payment record and willingness to pay, and (c) the probable recovery of amounts from secondary sources, including liens, garnishments,
cross collections, and other applicable collection tools. DoD Components with a low number of receivables or a large number of small dollar receivables may lower the threshold. However, consistent methodology must be used from year to year.

4.6.4. DoD must not recognize intragovernmental allowance for uncollectible accounts up to and including two years in delinquent age for intragovernmental receivables. After two years and older delinquent age, DoD must recognize 100 percent allowance for uncollectible accounts. The public allowance for uncollectible accounts is calculated:

4.6.4.1. No (0 percentage) allowance is calculated for aging categories less than 90 days.

4.6.4.2. 100 percentage allowance is calculated for public debt for aging categories greater than two years.

4.6.4.3. Allowance for public debt for aging categories greater than 90 days and less than 2 years are calculated by agency-specific Monthly Receivable Data (MRD) write-off amounts divided by total Account Receivable amounts to determine the write-off percentage. The most recent 36 months of write-off percentages are averaged to determine the allowance percentage for 91 days to 2 years aging categories.

4.6.5. In those instances, when one DoD Component sub-allots funds to another DoD Component, the office executing the funds will be responsible for establishing the allowance for loss on accounts receivable. The write-off of receivables must be processed through the allowance for uncollectible accounts.

*4.7 Write-off and Close-Out of Public Accounts Receivable

OMB Circular A-129 provide general provisions for write-off and close-out of public accounts receivable. Write-off is mandatory for public delinquent debt that has not been collected within two years of delinquency unless documented and justified to OMB in consultation with Treasury. All write-offs of non-federal receivables must be made by debiting the allowance for uncollectible account and crediting the receivable account. A direct write-off to public receivable without recording an allowance for uncollectible is prohibited. Intergovernmental receivable write-off is prohibited. In accordance with OMB Circular A-129, when a receivable is written-off, it must be classified as currently not collectible (CNC) or closed-out. Receivables that are classified as CNC must be maintained in an inactive administrative file and reported on the TROR until the receivable is closed-out.

4.7.1. Write-off. The DCO must provide the ARO with documentation to support write-off of the receivable (regardless of amount) and also must provide the history of all research and debt collection efforts. When received, the ARO must immediately provide the documentation to the Fund Holder for concurrence for write-off and notify the DCO that the request for concurrence was sent. If the Fund Holder concurs, the ARO will write-off the debt. If the Fund Holder non-concurs or does not respond, then the following applies:
4.7.1.1. The Fund Holder must respond within 30 days of request for a write-off. If a response is not received within 30 days, the ARO will write-off the debt.

4.7.1.2. If non-concurring, the Fund Holder must provide the ARO with additional written evidence to enable the collection of the debt. The ARO will only make one additional attempt to collect (i.e., issue one additional demand letter).

4.7.1.3. If payment is not received after making one additional attempt to collect, the ARO will write-off the debt. The ARO will notify the Fund Holder and the DCO that the debt was written off.

4.7.2. Currently Not Collectible. Once the debt is written off, it must either be classified as CNC or closed-out. Debts in CNC status are reported on the TROR and are still eligible for the Treasury's cross-servicing and offset programs.

4.7.2.1. Public debt will be classified as CNC only if the following criteria are met:

4.7.2.1.1. The vendor debt or the individual out-of-service debt is $25 or more.

4.7.2.1.2. All debt collection actions referenced in this chapter have been pursued.

4.7.2.1.3. It is cost effective to continue collection efforts.

4.7.2.2. CNC debt must be continuously reviewed and, as required, reclassified and closed-out.

4.7.2.3. When Treasury is able to collect on a receivable categorized as CNC and remits funds to DoD, the ARO will reverse the write-off, reestablish the receivable, and record the collection against the receivable.

4.7.3. Close-Out of Indebtedness. Debt write-off and close-out may occur at the same time, or close-out may follow write-off by a substantial period of time. When it has been determined that the debt is not collectible (e.g., returned from Treasury uncollected or further collection action would not be economically feasible), the DCO must notify the ARO. The ARO must notify the Fund Holder and request concurrence to close-out the debt. If the Fund Holder non-concurs or does not reply, the following applies.

4.7.3.1. The Fund Holder must respond within 30 days of request for close-out. If a response is not received within 30 days, then the debt must be closed-out.

4.7.3.2. If non-concurring, the Fund Holder must provide the ARO with additional written evidence to enable the collection of the debt. The ARO will only make one additional attempt to collect (i.e., issue one additional demand letter).
4.7.3.3. If payment is not received after procedures in subparagraphs 4.7, then the ARO must close-out the debt and notify the Fund Holder.

4.7.3.4. Once a debt has been closed-out, it cannot be reactivated, and the Federal Government cannot take any further administrative or legal action to collect the debt. The Federal Government, however, can accept voluntary repayment of the debt at any time. Once the Fund Holder has decided to close-out the debt, the ARO has primary responsibility for close-out actions. Volume 16, Chapter 6 provide guidance regarding the FMS arrearages write-off and close-out.

4.7.4. Tax Reporting: In most cases, when an agency closes out a debt or compromises a debt for less than the full amount owed, the debt is considered a canceled debt. DoD has a responsibility to issue tax forms and execute IRS reporting for canceled debts that meet the IRS’s reporting criteria. The DFAS ESS Vendor Pay Tax Office is responsible for the tax form issuance and IRS reporting for vendor and contractor canceled debts managed in the DFAS Defense Contractor Debt System (DCDS).

5.0 INTRAGOVERNMENTAL RECEIVABLES

5.1 Receivables Due From Federal Entities

Receivables due from DoD Components or other federal entities are intragovernmental receivables and must be reported separately from receivables due from public entities in the financial statements.

*5.2 Sales of Goods and Services

5.2.1. Intragovernmental materials sold or services furnished must be authorized and documented in a support agreement between the provider (seller) and ordering entity (buyer). A providing entity (seller) must initiate the agreed upon activity by providing the cost of materials or performing the services to the ordering entity (buyer). The activity receiving the materials or services (buyer) pays the providing activity. Uncollected amounts earned from reimbursable sales are recorded as accounts receivable.

5.2.2. In contrast with orders from the public/non-federal entities without an advance, under the Economy Act DoD organizations with reimbursable authority may recognize a budgetary resource upon acceptance of funded reimbursable orders from DoD and other federal agencies, because customer agencies obligate their own budgetary resources (e.g., appropriations) at the time of order placement and acceptance. DoD organizations may incur obligations to fill such orders without requiring the customer to provide an advance payment and without burdening their own budgetary resources.

*5.3 DoD Performing Entity Responsibilities

The performing entity (seller) must ensure that the costs incurred for completed performance are promptly recorded as revenue and receivable and must ensure the earned revenue amount is promptly charged and collected from the ordering entity. Refer to Chapter 9 for a
5.3.1. Receive a customer’s order, which will be verified against the agreement serving as the basis for the order, such as a DD Form 448, “Military Interdepartmental Purchase Request” (MIPR). The amount of the order must be recorded as an unfilled customer order.

5.3.2. Reverse the unfilled customer order and record a filled customer order (i.e., earnings) uncollected upon receiving documentation showing that goods or services were provided. Record the receivable and charge the customer. If an abnormal balance results from reversing the unfilled customer order, research the abnormal balance and promptly resolve the issue.

5.3.3. Reverse the filled customer order uncollected (i.e., earnings) and record a filled customer order collected upon receipt of a collection voucher. If an abnormal balance results from reversing the filled customer order uncollected, research the abnormal balance and promptly resolve the issue.

5.3.4. Ensure that collection vouchers are recorded in the accounting system and reported to the Treasury in the accounting month the collection was received.

5.3.5. Review unearned and earned orders and determine that recorded orders are supported with an order or contract.

5.3.6. Research any abnormal unfilled customer order balances; such balances indicate that an order may not be recorded. Research any abnormal filled customer order uncollected balances; such balances indicate that collections may have been incorrectly recorded. Promptly resolve these abnormal balances.

5.3.7. For orders not filled from inventory (e.g., supply issues from materiel systems); obtain the accounts payable transaction history. Review obligations and accrued expenditures recorded and determine whether the accruals are supported with a reimbursable agreement or a document evidencing that a payment is due. Unsupported obligations and accrued expenditures must be thoroughly researched, and the necessary corrective actions taken. Copies of all reimbursable orders must be available to ensure that all obligations and accrued expenditures are recorded correctly. Reconcile the receivables and collections relating to the reimbursable program of the performing activity with the accrued expenditures paid and unpaid of the same performing activity.

5.3.8. Obtain the billing transaction history from the ARO. Billing transaction histories must be provided within 30 days. Ensure that billings are against the correct order and, consequently, billed against the correct obligation. Request copies of documents supporting that a payment is due; reconcile these documents with the related accounts receivable. Any discrepancies must be resolved by adjusting the accounts receivable to the appropriate amounts.
5.3.9. Upon receiving a request for supporting documentation, provide a copy of an agreement, contract, and/or proof of performance or delivery within 30 days of request.

5.3.10. If a charge is disputed or rejected, review supporting files promptly. The intragovernmental dispute process is outlined in paragraph 5.5.

5.3.11. Research unmatched disbursements and negative unliquidated obligations as required by Volume 3, Chapter 11.

5.3.12. Unless authorized by law to perform non-reimbursable work, DoD performing activities will not perform reimbursable work for another federal agency that is 90 days or more in arrears in payment of previous reimbursable billings. This restriction can be waived by the OUSD(C) if in the national interest to do so.

5.3.13. Refer to TFM Volume 1: Federal Agencies, Supplements, USSGL for reimbursable USSGL transaction entries.

5.4 DoD Ordering Agency Responsibilities

5.4.1. The ordering agency must review all charges from the performing activity to ensure that amounts due are in agreement with the reimbursable orders and are supported with a copy of the order or contract and evidence of performance.

5.4.2. Transportation charges that cannot be matched to an accounts payable transaction, or that cannot be charged back, must be researched and charged to the proper line of accounting (LOA) upon completion of research.

5.4.3. If the bill is supported, but the order or obligation is not recorded in accounting systems, then record the order or obligation immediately. Determine why the order or obligation was not recorded. The evidence obtained from research may identify internal control failures and/or process weaknesses. Any internal control failures and/or process weaknesses must be addressed and corrected. Evidence from the research should be documented and maintained by the organization.

5.5 Management of Collection Actions

Aging Accounts Receivable qualify for the collection actions. Aging (delinquency date) starts one day after the initial due date.

5.5.1. Charges arising from transactions within the DoD and with other federal departments and agencies must be recorded as accounts receivable in the accounting month earned.

5.5.2. Bills arising from transactions which contain a National Stock Number within the DoD will be collected through the Military Standard Billing System interfund billing procedures when supported by the supply and accounting systems. The provider will not accept a MIPR if interfund can be used. Manual billing (i.e., the XP fund code) will not be used unless approved.
by the Deputy Chief Financial Officer. For intragovernmental interfund disputes, follow the dispute process outlined in DLM 4000.25.

5.5.3. For non-interfund intragovernmental (within DoD) receivables, reimbursement will be via Defense Cash Accountability System or Intra-Government Payment and Collection (IPAC). The buyer cannot chargeback or reject the charge (other than IPAC) unless authorized by the dispute process as outlined in paragraph 5.6. The buyer must perform an IPAC reject within 30 days. The only valid reasons for reject/adjustment are:

5.5.3.1. Billing for more than the agreed amount.

5.5.3.2. Duplicate/erroneous billing.

5.5.3.3. Lack of supporting documentation.

5.5.3.4. MIPR has expired and/or appropriation has expired.

5.5.4. For intragovernmental (outside DoD) receivables, IPAC is the preferred method of billing/collection.

5.5.4.1. Include the use of IPAC as the preferred method of billing/collection on the MIPR acceptance.

5.5.4.2. Follow the intragovernmental (outside DoD) dispute process as outlined in the paragraph 5.6 if the IPAC transaction is rejected.

5.5.5. Rejected charges must require the reestablishment of a receivable and adjustments to an appropriation’s Fund Balance with Treasury.

5.5.6. USSGL accounting transactions for reimbursable billings and collections, and accounts receivable corrections and adjustments are detailed in the SFIS library.

5.6 Non-Interfund Dispute Process

5.6.1. Intragovernmental Debt Within the DoD. The performer’s ARO is responsible for managing intragovernmental debt. OUSD(C) oversees DoD dispute resolution processes to resolve balance discrepancies between DoD reporting entities. See Volume 6B, Chapter 13, paragraph 5.4, paragraph 5.6 for additional information on eliminations.

5.6.1.1. Intragovernmental debt cannot be referred to a debt collection activity.

5.6.1.2. The full settlement of intragovernmental accounts receivable disputed charges must take no longer than 180 days from the date of the charge.
5.6.1.3. For receivables of $2,500 or less, the buyer may accept the charge without dispute. However, these charges may be disputed as long as the process can be justified as cost effective.

5.6.1.4. For disputed receivables greater than $2,500:

5.6.1.4.1. The buyer will work with the seller during the first 60 days from the date of the charge to resolve the dispute. The buyer or seller may request assistance from DFAS. If the dispute cannot be resolved, the buyer, along with assistance from DFAS, will assemble a dispute package and send it to the seller. At a minimum, the dispute package must include copies of: MIPR or equivalent, MIPR acceptance or equivalent, voucher payment, bill, correspondence, shipment or delivery evidence, and a narrative explaining the basis of the dispute.

5.6.1.4.2. During 61-90 days from the date of the charge, the seller will review the buyer’s dispute package and will provide a written response of concurrence or non-concurrence.

5.6.1.4.2.1. If the seller concurs, the seller will reverse the charge.

5.6.1.4.2.2. If no response is received from the seller, the buyer may chargeback without recourse.

5.6.1.4.2.3. If the seller non-concurs, the buyer will elevate the dispute package to their Resource Manager/Comptroller.

5.6.1.4.3. During 91-120 days from the date of the charge, the buyer’s Resource Manager/Comptroller will contact the seller’s Resource Manager/Comptroller to resolve the dispute. If the dispute cannot be resolved, the buyer’s Resource Manager/Comptroller will elevate the dispute package to their Service Secretary, Combatant Command Commander, or Defense Agency Director.

5.6.1.4.4. During 121-150 days from the date of the charge, the buyer’s Service Secretary, Combatant Command Commander, or Defense Agency Director, will contact the seller’s Service Secretary, Combatant Command Commander, or Defense Agency Director, to resolve the dispute. The dispute must be resolved within 180 days.

5.6.1.5. If the resolution to the dispute is that the buyer does not have to pay the bill, then the seller must adjust their revenue to liquidate the debt if the revision reflects current fiscal year activity. The seller will decrease revenue and increase direct obligations and expenses. For material receivables established in a prior year, revenue must not be decreased, rather a prior period adjustment must be used to properly account the adjustment. See Volume 6B, Chapter 6. For immaterial receivables established in the prior year, reduce current year revenues.

5.6.2. Intragovernmental Debt Outside DoD. Disputes between government agencies (e.g., between the DoD and the General Services Administration) will be resolved in accordance with 1-TFM-2-4700.
5.6.2.1. Dispute resolution will involve the program offices, the accounting offices, the contracting officer, and the agency’s Chief Financial Officer (CFO), as appropriate. Disputes will be documented in writing with clear reasons for the dispute. A memorandum of agreement will be signed by the CFOs of each department and agency to acknowledge that department’s or agency’s active participation in the dispute resolution process.

5.6.2.2. Trading Partners will not chargeback or reject transactions that comply with 1-TFM-2-4700. Further, new transactions will not be created to circumvent the guidance contained therein.

5.6.2.3. Disputes are of two types:

5.6.2.3.1. Accounting treatment (e.g., advances and non-expenditure transfers).

5.6.2.3.2. Contractual (e.g., payment, collection, and interagency agreement).

5.6.2.4. If intragovernmental differences result from differing accounting treatment, then the trading partners have 60 calendar days from the date that the difference is identified in Treasury Government wide Treasury Account Symbol Adjusted Trial Balance System (GTAS) or the date that a charge is disputed, whichever comes first, to agree on the treatment of an accounting entry. If agreement cannot be reached within 60 calendar days, then both trading partners’ CFOs must request that a decision be rendered by the Treasury Bureau of Fiscal Service (BFS). After BFS has rendered a decision, the ARO must adjust their financial records as needed within five calendar days or the end of the quarter, whichever comes first.

5.6.2.5. If intragovernmental differences result from contractual disputes, then the trading partners have 60 calendar days from the date that the difference is identified or the date that a charge is disputed, whichever comes first, to agree on the contractual terms. If agreement cannot be reached, then both trading partners’ CFOs must request that a binding decision be rendered by the CFOs Council’s Committee established for this purpose. The Committee must render a decision within 90 calendar days of request. The trading partners will then coordinate to ensure any necessary IPAC transaction is needed.

5.6.2.5.1. Missing indicative data on an intragovernmental transaction is cause for a contractual dispute. Examples of indicative data include:

5.6.2.5.1.1. Order number.

5.6.2.5.1.2. Treasury Account Symbol (TAS) for both trading partners. If multiple TAS are included on one order, specify amounts for each TAS, as appropriate.

5.6.2.5.1.3. Business Event Type Code for both trading partners.

5.6.2.5.1.4. Amount to accrue, advance, or disburse.
5.6.2.5.1.5. Business Partner Network number for both trading partners.

5.6.2.5.2. The buyer may establish a monetary threshold before asking for contractual decisions; the threshold must not exceed $100,000 per order. If an amount is under the buyer’s threshold, and the buyer elects not to pursue a dispute, then the buyer must pay the amount.

5.6.3. NAFI Billing, Collection and Dispute Processes. DoDI 1015.15, “Establishment, Management, and Control of Nonappropriated Fund Instrumentalities and Financial Management of Supporting Resources,” requires certain categories of NAFIs to reimburse appropriated funds (APF) for the provision of goods and services to the NAFI.

5.6.3.1. Reimbursement Agreements. The applicable APF office will prepare a reimbursement agreement with the NAFI. This could be in the form of a Memorandum of Understanding or Inter-Service Support Agreement. The agreement must be signed by the authorized representatives from APF and NAFI. At a minimum, this agreement must have:

5.6.3.1.1. Fixed price for goods and services or methodology for determining price, e.g., utilities, or both. The agreement can be for a specific sale or for a specified period of time.

5.6.3.1.2. Bill due date will be 30 days from date of the bill.

5.6.3.2. Due Process. If bill is not paid by due date, a demand letter will be sent to the NAFI. The NAFI has 30 days from the date of the demand letter to provide payment or provide reasons for non-payment. The validity of the dispute will be determined by the APF representative. If dispute is valid, the APF representative will immediately resolve. If dispute is determined not to be valid, or there is no response, the APF representative will elevate demand for payment as follows:

5.6.3.2.1. Within 31-60 days after the due date, the Installation Comptroller will send the demand for payment with supporting documentation to the NAFI Headquarters Comptroller (NHC).

5.6.3.2.2. Within 61-90 days after the due date, the NHC will make payment or dispute the bill. The validity of the dispute will be determined by the Installation APF Comptroller. If dispute is determined not to be valid, or there is no response, the Installation APF Comptroller will elevate the demand for payment with supporting documentation to the Installation Major Command.

5.6.3.2.3. Within 91-120 days after the due date, the Installation Major Command will instruct that payment be made or dispute the bill. If the Installation Major Command cannot resolve the dispute, or there is no response, the Installation APF Comptroller will elevate the demand for payment with supporting documentation to the Service Comptroller.
5.6.3.2.4. Within 121-150 days after the due date, the Service Comptroller will instruct payment or resolve the dispute.

5.6.3.3. Budgetary Resources. Military Departments may use their own appropriated fund budgetary resources to perform a reimbursable order for a NAFI without an advance. However, they may not recognize budgetary resources for the order until the account receivable is paid.

6.0 REPORTING RECEIVABLES DUE FROM THE PUBLIC

The DoD Components are required to submit the TROR on a quarterly basis. The ARO, in conjunction with the DoD Component, must report public receivables in accordance with TROR located on the Treasury website.

7.0 REPORTING RECEIVABLES IN DOD FINANCIAL STATEMENTS

7.1 Reported Accounts Receivable Quarterly

Accounts receivable are reported on the quarterly financial statements. Instructions for the reporting of receivables in the quarterly financial statements are contained in Volume 6B, Chapters 4 and 10. Receivable amounts are depicted in the Balance Sheet and are disclosed in the Notes to the Financial Statements. Public accounts receivable balances reported on the financial statements must be reconciled with the GTAS accounts receivable from the public balances (attribute non-Federal).

7.2 Gross Accounts Receivable Balances

Gross accounts receivable balances due from the public reported on the quarterly financial statements also will be reconciled with receivables reported on TROR.

7.3 Eliminating Intragovernmental Consolidated Quarterly Financial Statements

The consolidated quarterly financial statements eliminate intragovernmental accounts receivable balances in accordance with Volume 6B, Chapter 13.

8.0 CREDITING AND ACCOUNTING FOR DISPUTED COLLECTIONS UNDER THE CONTRACT DISPUTES ACT OF 1978

8.1 Crediting Collections

8.1.1. When an amount, including interest and administrative fees, is collected from a contractor and the contractor disputes the debt or indicates that they will dispute the debt, the collected amount will not be accounted for as settlement of the debt. Interest, penalties, and fees will cease to accrue and the disputed amounts will be credited to Treasury deposit account pending disposition of the contractor's dispute.
8.1.2. Collections normally are received by the disbursing or payment certifying office making or authorizing payments for the contract in dispute, but may be received by others, including ARO, supporting accounting offices, DMO, contracting officers, contract administration officers, and legal offices. Upon making a collection in a disputed situation, the collection will be documented as a disputed contract collection.

8.1.2.1. If DFAS-Columbus paid the contract or submitted the contract to the DMO for debt collection assistant, deposit the collection to Disbursing Station Symbol Number (DSSN) 6551. Offices, other than the DMO, making the collection and deposit of a disputed collection to DSSN 6551 must forward to the DMO all documentation related to the collection. If the office receiving the collection does not make deposits, then the office receiving the collection will promptly forward the contractor’s check and related documentation to DSSN 6551. The collection voucher prepared for a disputed collection will serve as the basis for crediting the amount to Treasury deposit account X6501, Small Escrow Amounts, in a special subhead or limit with departmental prefix 097. If the disputed collection is related to a contractual obligation in an appropriation that has closed in accordance with 31 U.S.C. § 1552(a) or 31 U.S.C. § 1555, then annotate the collection as a “closed appropriation collection” and credit the collection to deposit fund account X6501 in a different subhead or limit. DSSN 6551 must maintain control of collections credited to this account and will prepare all vouchers for disbursement or transfer from the deposit account.

8.1.2.2. If a disputed collection is received on a contract that was not paid by DSSN 6551 and the debt was not submitted to the DMO for debt collection assistance, then deposit the collected amount to the DSSN which made the payment on the contract. The collection must be credited to deposit account X6501 with departmental prefix 017, 021, 057, 096, or 097, as appropriate.

8.1.2.3. The DMO and the responsible disbursing officer will notify the contracting officer, the contract administration officer, if applicable, and the Service or agency contract finance officer, and/or other authority for contract debt matters of any actions affecting the disputed collections. Conversely, these officers or offices must inform the responsible disbursing officer and the DMO of any actions taken that affect the disputed collection.

8.2 Accounting for Collections in Dispute

8.2.1. In accordance with 10 U.S.C. § 3863 and paragraph 8.1, disputed collections received and credited must be separately accounted for and remain available, regardless of the closing of an appropriation or fund account, for payment of:

8.2.1.1. Any settlement of the claim by the parties.

8.2.1.2. Any judgment rendered in the contractor’s favor on an appeal of the decision on the claim to the Armed Services Board of Contract Appeals (ASBCA).

8.2.1.3. Any judgment rendered in the contractor’s favor in an action on that claim in a court of the U.S.
8.2.2. Availability of the disputed collection expires 90 days after the expiration of the period for bringing an action on that claim in the U.S. Court of Federal Claims under section 41 U.S.C. § 7104(a), if within that 90-day period, no appeal on the claim is commenced at the ASBCA and no action on the claim is commenced in a court of the U.S.

8.2.3. If not expiring under subparagraph 8.2.2, then availability of the disputed collected amounts expires:

8.2.3.1. In the case of a settlement of a claim, 90 days after the date of the settlement.

8.2.3.2. In the case of a judgment rendered on the claim in an appeal to the ASBCA or an action in a court of the U.S, 90 days after the date on which the judgment becomes final and rendered not appealable.

8.2.4. While an amount is being separately accounted for and available in accordance with subparagraph 8.1.1, the amount may be obligated or expended in whole or in part only for the purpose.

8.2.5. When all or part of a disputed collection is determined to be repayable to the contractor, whether by settlement agreement or judgment, including payment or adjustment of interest or fees, that amount must be promptly disbursed to the contractor. Timely reimbursement must also be made to the Treasury Judgment Fund, if applicable. The foregoing disbursed amounts must be charged to the deposit account X6501. Any interest accruing since the collection and ordered to be paid in accordance with the settlement or judgment must be charged to the applicable, currently available, appropriation account.

8.2.6. Upon expiration of the period of availability of all or part of an amount credited to the deposit account in accordance with paragraph 8.1, amounts not obligated and expended, must be withdrawn and credited as follows:

8.2.6.1. If an amount was credited to the deposit account for an appropriation or fund account that closed for reasons other than those described under 31 U.S.C. § 1552(a) or 31 U.S.C. § 1555, then the principal amount collected must be properly credited to that appropriation or fund account and an adjustment made of the amounts of the contract(s) for which the disputed collection arose. Any amounts for interest and fees must be credited to the appropriate Treasury Miscellaneous Receipts accounts.

8.2.6.2. Amounts credited to the deposit account for an appropriation or fund account that was canceled, or subsequently canceled after the collection in accordance with 31 U.S.C. § 1552(a) or 31 U.S.C. § 1555, must be withdrawn and credited to the appropriate Treasury Miscellaneous Receipts accounts. The principal amount must be credited to “Collection of Receivables from Canceled Accounts”, Treasury General Fund Receipt Account 3200 (and the memorandum account adjusted, as appropriate). Interest and fees must be credited to the “Miscellaneous Receipts-Defense” account. In the records maintained for the closed appropriation account and unclosed contracts associated with the collection, the unobligated and obligated
balances must be adjusted to reflect the results of settlement or judgment, including any amount retained and adjusted for the amounts of the contract or contracts for which the disputed collection arose.

CHAPTER 4 INVENTORY AND RELATED PROPERTY

1.0 GENERAL (0401)

*1.1 Purpose (040101)

1.1.1. This chapter prescribes the accounting policy and related requirements necessary to establish financial control over Department of Defense (DoD) inventory, operating materials and supplies (OM&S) and stockpile materials. The DoD Standard Chart of Accounts, which is located on the Deputy Chief Management Officer Standard Financial Information Structure (SFIS) website, provides detailed account descriptions of each of the general ledger accounts referenced in this chapter. The DoD Standard Chart of Accounts was developed from the United States Standard General Ledger (USSGL) published by the Department of Treasury. Posting guidance outlined in the DoD USSGL Transaction Library is also located on the SFIS website. For detailed requirements on financial statement disclosure for Inventory and Related Property (I&RP), refer to Volume 6B, Chapter 10.

1.1.2. With the exception of provisions related to the National Stockpile Fund (NSF), all of the provisions in this chapter apply to the Working Capital Fund (WCF). Some provisions in this chapter apply to the General Fund (GF) as illustrated in Table 4-1 or as otherwise separately referenced within the chapter.

1.2 Authoritative Guidance (040102)

The references to GF, WCF or NSF applicability in the list of authoritative guidance is specific to this chapter only. The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.2.2. FASAB Statement of Federal Financial Accounting Standards (SFFAS) 3, “Accounting for Inventory and Related Property,” – Applicable for GF, WCF, and NSF.

1.2.3. FASAB SFFAS 7, “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting,” – Applicable for GF, WCF, and NSF.

1.2.4. FASAB SFFAS 21, “Reporting Correction of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources,” – Applicable for GF, WCF, and NSF.

1.2.5. FASAB SFFAS 48, “Opening Balances for Inventory, Operating Materials and Supplies, and Stockpile Materials,” – Applicable for GF, WCF, and NSF.

1.2.6. FASAB Interpretation of Federal Financial Accounting Standards (Interpretation) 7, “Items Held for Remanufacture,” – Applicable for WCF only.

1.2.7. Title 10, United States Code (U.S.C), section 127, “Emergency and extraordinary expenses,” – Applicable for both GF and WCF.

1.2.11. 10 U.S.C. § 2553, “Equipment and services: Presidential inaugural ceremonies,” – Applicable for WCF only.

1.2.13. 10 U.S.C. § 2556, “Shelter for homeless; incidental services,” – Applicable for WCF only.

1.2.18. **40 U.S.C. § 503**, “Exchange or sale of similar items,” – Applicable for WCF only.

1.2.20. Federal Account Symbols and Titles *(FAST) Book* – Applicable for GF, WCF, and NSF.

1.2.21. Federal Acquisition Regulation *(FAR) Part 45* “Government Property” – Applicable for GF, WCF, and NSF.

1.2.24. *(DoDM) 4140.01, Volume 6*, “DoD Supply Chain Materiel Management Procedures: Materiel Returns, Retention, and Disposition,” – Applicable for both GF and WCF.

1.2.25. *(DoDM) 4140.26, Volume 4*, “DoD Integrated Material Management for Consumable Items: Supply Support Requests (SSRs),” – Applicable for both GF and WCF.

1.2.27. *(DoDD) 5100.46*, “Foreign Disaster Relief (FDR),” – Applicable for WCF only.

1.2.28. *(DoDD) 5105.65*, “Defense Security Cooperation Agency (DSCA),” – Applicable for both GF and WCF.

1.2.29. DoD Instruction *(DoDI) 1338.18*, “Armed Forces Clothing Monetary Allowance Procedures,” – Applicable for WCF only.

1.2.30. *(DoDI) 3025.21*, “Defense Support of Civilian Law Enforcement Agencies,” – Applicable for WCF only.

1.2.32. **DoDI 4140.63**, “Management of DoD Clothing and Textiles (Class II),” – Applicable for WCF only.

1.2.33. Defense Logistics Manual (DLM) 4000.25-2, “Military Standard Transaction Reporting and Accountability Procedures (MILSTRAP).” – Applicable for both GF and WCF.

*2.0 DEFINITIONS - (Applicable to GF, WCF and NSF) (0402)*

2.1 Abnormal Costs (040201)

Abnormal costs include any costs that are in excess of the cost to purchase and place in service a new item with similar features and useful life (e.g. excessive handling, expedited delivery and rework costs). Abnormal costs should be charged to operations in the period incurred. Abnormal costs, as mentioned in this chapter, should not be confused with expenses with an abnormal balance (that is, a credit value).

2.2 Acquisition Cost (040202)

Acquisition cost is the amount, net of both trade and cash discounts, paid for the property, plus transportation costs and other ancillary costs to bring the items to their current condition and location.

2.3 Approved Acquisition Objective (040203)

A logistics term, the Approved Acquisition Objective (AAO) level is the quantity of an item authorized for peacetime and wartime requirements to equip and sustain U.S. and allied forces according to current DoD policies and plans.

2.4 Construction in Progress (040204)

Construction in Progress is the amount of direct labor, direct material, and overhead incurred in the construction of General Property, Plant, and Equipment (PP&E) for which the acquiring DoD agency will be accountable for financial reporting purposes. Upon completion, these costs will be transferred to the proper capital asset account as the acquisition cost of the item. Construction in Progress is not to be used for information technology software. The Internal Use Software in Development account is used for information technology software.

2.5 Consumable Items (040205)

A logistics term, a consumable item is an item of supply or an individual item that is normally expended or used up beyond recovery in the use for which it is designed or intended.
2.6 Consumption Method of Accounting (040206)

The consumption method of accounting requires that OM&S be recognized and reported as assets when they are produced or purchased. The cost of goods must be removed from the applicable OM&S asset account and reported as an operating expense in the period in which the items are issued to an end user for consumption in normal operations.

2.7 Contingency Retention Stock (040207)

A logistics term, Contingency Retention Stock is stock above the AAO and Economic Retention Stock (ERS) levels that is held to support specific contingencies. The materiel manager must be able to provide documented rationale to warrant contingency retention.

2.8 ERS (040208)

A logistics term, ERS is the level of stock above the AAO level that it is more economical to retain than to dispose and then potentially repurchase if subsequently needed.

2.9 End User (040209)

An end user is any component of a reporting entity that obtains goods for direct use in that component’s normal operations. Any component of a reporting entity, including contractors, that maintain or stock OM&S for future issuance should not be considered an end user with respect to that OM&S.

2.10 Excess Inventory (040210)

Excess inventory (serviceable and unserviceable) is the amount of inventory above the sum of the AAO and inventory retained for economic and/or contingency purposes. See DoDM 4140.01, Volume 6, which calls this potential reutilization stock.

2.11 FASAB (040211)

FASAB is the Board that promulgates the accounting standards for use in the Federal Government. The Office of Management and Budget (OMB), the Department of the Treasury, and the Government Accountability Office (GAO) sponsor FASAB.

2.12 Government Furnished Material (040212)

A sub-category of Government Furnished Material (GFM) consists of inventory or OM&S that is physically transferred to the possession or custody of a contractor as Government property. GFM may be consumed or expended during the performance of a contract.
2.13 Historical Cost (040213)

Historical cost includes all appropriate purchase, transportation, and production costs incurred to bring items to their current condition and location. Historical cost excludes abnormal costs, which should be expensed in the period incurred rather than capitalized as inventory. See the definition of Abnormal Costs.

2.14 Inventory (040214)

Inventory is defined as tangible personal property that is held for sale, in the process of production for sale, or to be consumed in the production of goods for sale or in the provisions of services for a fee.

2.15 Inventory in Transit (040215)

Inventory in Transit is material in transit from commercial and Government suppliers to the financial reporting entity; material that has not been received and accepted at the final designated destination but for which title has passed; or material in transit between storage locations. (Note: Inventory in transit does not include material temporarily in use or on loan with contractors or schools.)

2.16 Latest Acquisition Cost (040216)

Latest Acquisition Cost (LAC) is the last invoice price paid. Valuing inventory at LAC requires multiplying the last invoice price paid by the quantity of all like units held, including those units acquired through donation or nonmonetary exchange. When LAC valuation is used, the inventory is revalued periodically and an allowance account is established for the unrealized holding gains and losses associated with ending inventory. (Note: for the remanufactured items, the LAC value of an item will be the cost of a fully functional item with an allowance account equal to the estimated costs necessary to repair the item.) For financial accounting purposes, this method is only approved for use by the Defense Commissary Agency (DeCA) in valuing its inventory of grocery and household products.

2.17 Moving Average Cost (040217)

The Moving Average Cost (MAC) is a cost flow assumption methodology used to value inventory. Under MAC, the inventory value is recalculated each time costs are incurred for a purchase, or a reparable item is repaired/remanufactured and placed back in inventory. The MAC calculation requires dividing the cost of total units available at the time (inventory plus current purchases placed into inventory or remanufacturing costs incurred for items in inventory by the quantity of units available in inventory at that time. As illustrated in Table 4-2, increases in quantity typically CHANGE the MAC value while decreases in quantity typically USE the MAC value. MAC is the standard cost flow assumption used for DoD inventory and OM&S, with the exception of DeCA grocery and household products inventories (which are valued using LAC) and serially-managed items (which may be costed using the specific identification method).
Table 4-2. Calculating MAC

<table>
<thead>
<tr>
<th>Event</th>
<th>Quantity</th>
<th>Transaction Value</th>
<th>Quantity</th>
<th>Ending Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning Balance</td>
<td>10</td>
<td>$10,000</td>
<td>10</td>
<td>$10,000</td>
</tr>
<tr>
<td>MAC=$10,000/10=$1,000</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Sale of 2 units @ MAC = $1,000 per unit</td>
<td>(2)</td>
<td>($2,000)</td>
<td>8</td>
<td>$8,000</td>
</tr>
<tr>
<td>Purchase of 4 units at $1,600 MAC=$14,400/12=$1,200 per unit</td>
<td>4</td>
<td>$6,400</td>
<td>12</td>
<td>$14,400</td>
</tr>
<tr>
<td>Sale of 1 unit MAC=$1,200 per unit</td>
<td>(1)</td>
<td>($1,200)</td>
<td>11</td>
<td>$13,200</td>
</tr>
<tr>
<td>Repair of 4 units at $1,675</td>
<td>4</td>
<td>$6,000*</td>
<td>15</td>
<td>$19,200</td>
</tr>
</tbody>
</table>

*The repaired units would be brought into the MAC calculation at the lesser of their repaired value or the current purchase price for a new unit of inventory. If the repaired value is in excess of the current purchase price, the difference would be expensed. For example, assume that the current purchase price for the inventory item is $1,500 and the repaired value is $1,675. Since the current purchase price is less than the repaired value the difference of $175 per unit must be expensed and the $1,500 current purchase price will be used to value the repaired inventory items. The total to be expensed in this example is 4 * $175 = $700 and the amount to be brought into the MAC calculation would be 4 * $1,500 = $6,000.

Sale of 1 unit at MAC $1,280 ($19,200/15 units = $1,280 per unit) | (1) | ($1,280) | 14 | $17,920 |

2.18 NRV (040218)

The FASAB defines NRV as the estimated amount that can be recovered from selling or disposing of an item less the estimated costs of completion, holding and disposal.

2.19 Normal Operations (040219)

Normal operations are operations of a major program or activity without significant changes that would inhibit meeting objectives.

2.20 Obsolete Inventory and OM&S (040220)

Obsolete Inventory and OM&S is material that is no longer needed due to changes in technology, laws, customs, or operations.

2.21 OM&S (040221)

OM&S consist of tangible personal property to be consumed in normal operations. Items excluded are: (a) goods that have been acquired for use in constructing real property or in assembling equipment to be used by the entity, (b) stockpile materials, and (c) inventory. (Note: the DoD does
not possess/retain goods held under price stabilization programs, foreclosed property, or seized and forfeited property, which are listed as additional exclusions in SFFAS 3.) Additionally, items meeting the definition of PP&E should be excluded from OM&S. The following items should be classified and recognized as equipment and not OM&S:

2.21.1. Not intended for sale;
2.21.2. Not held in anticipation of physical consumption;
2.21.3. Durable and have a useful life of two years or more;
2.21.4. Expected to be returned or transferred after use with the intent of reuse for their useful life; and
2.21.5. Functionally complete and ready to use for their intended purpose.

2.22 OM&S in Development (040222)

OM&S in Development are costs incurred in developing the OM&S or the value of tangible personal property that will be consumed in normal operations upon completion of development.

2.23 OM&S in Transit (040223)

OM&S in transit includes material in transit from commercial and Government suppliers; material that has not been accepted in the receiving process at the final designated destination but for which title has passed; material being moved between storage locations; or material temporarily in use or on loan with contractors or schools.

2.24 Purchases Method of Accounting (040224)

The purchases method of accounting is an accounting method whereby OM&S are expensed when purchased. The purchases method may be applied to OM&S if:

2.24.1. OM&S are not significant amounts,
2.24.2. They are in the hands of the end user for normal operations, or
2.24.3. It is not cost beneficial to apply the consumption method of accounting.

2.25 Reparables (040225)

A logistics term, reparables are inventory items that can be repaired economically and for which repair of the item (at either field or depot level) is considered in meeting computed inventory requirements. The Department authorizes supply management activities to finance reparable items, including their transportation, acquisition, overhaul, progressive maintenance, renovation, rework, repair, manufacture, reclamation, alteration, and/or software support. Reparables in an
unserviceable condition, such as items returned from operating units or furnished to the contractor for repair, modification, or overhaul, are often referred to as “carcasses.”

2.26 Significant Amount (040226)

Significant amounts are those that do not rise to the level of being material but are important enough to merit attention by those responsible for oversight of the Component’s financial reporting. Materiality is defined in the GAO Financial Audit Manual (FAM) as “the magnitude of an item’s omission or misstatement in a financial statement that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the inclusion or correction of the item.”

2.27 Standard Price (040227)

The standard price is the price customers are charged which reflect DoD’s stabilized price policy requiring item pricing that remains constant throughout a fiscal year for Inventory Control Point managed items. Exceptions to the requirement to maintain standard pricing throughout the fiscal year are outlined in Volume 11B, Chapter 15. The standard price is calculated based on factors that include the replenishment cost of the item plus surcharges to recover costs for transportation; inventory loss, obsolescence and maintenance; depreciation; and supply operations. See Volume 2B, Chapter 9 for additional guidance on pricing.

2.28 Stockpile Materials (040228)

Stockpile materials are strategic and critical materials held due to statutory requirements for use in national defense, conservation or national emergencies. They are not held for sale in the ordinary course of business. Items specifically excluded from stockpile materials are items that are:

2.28.1. Held by an agency for sale or use in normal operations, and

2.28.2. Held for use in the event of an agency’s operating emergency or contingency.

2.29 Supply Condition Code (040229)

A supply condition code is an alphabetic code designation used to classify material in terms of readiness for issue and use, or to identify action underway to change the status of material.

2.30 Unserviceable Inventory (040230)

Unserviceable inventory is damaged inventory that is more economical to dispose of than to repair.
2.31 WRM (040231)

WRM items are those materials that, in addition to peacetime assets normally available on any given date, are necessary to equip and support the increase in military requirements forecasts contingent on an outbreak of war. War reserves sustain operations until resupply can be affected.

2.32 Work-In-Process (040232)

Work-in-process is the term used to describe products that are being manufactured or fabricated but are not yet complete. The book value of work-in-process consists of the costs of direct materials, direct labor, direct purchased services, and indirect costs, including general and administrative (G&A) costs, used in producing or repairing an end item (customized equipment or personal property), whether fabricated by the DoD or by a non-DoD organization under contract. G&A costs pertain to the costs of operations such as rent, utilities, and managerial salaries, in contrast to costs that are directly related to the production of goods and services. Work-in-process accounts segregate these costs from current accounting period expenses, thus supporting accurate financial reporting in compliance with generally accepted accounting principles.

3.0 OM&S - (Applicable to GF and WCF) (0403)

3.1 Recognition of OM&S (040301)

3.1.1. The consumption method of accounting for the recognition of expenses must be applied for OM&S unless the conditions set forth in subparagraph 040301.B apply. Under the consumption method, OM&S must be recognized and reported as assets when produced or purchased. When they are issued to an end user for consumption in normal operations, the cost of the goods must be removed from the applicable OM&S asset account and reported as an operating expense (see subparagraph 040302.C for further explanation of an end user). “Purchased” is defined as when title passes to the purchasing entity. If the contract between the buyer and the seller is silent regarding passage of title, title is assumed to pass upon delivery of the goods. Delivery or constructive delivery must be based on the terms of the contract regarding shipping and/or delivery.)

3.1.2. Under the purchases method of accounting, OM&S will be expensed (and not recorded as an asset) when purchased. The purchases method may be applied to OM&S if:

3.1.2.1. OM&S are not significant amounts,

3.1.2.2. The OM&S is in the hands of the end user for use in normal operations, or

3.1.2.3. It is not cost-beneficial to apply the consumption method of accounting.

3.2 Determining Eligibility for Purchases Method Recognition (040302)

3.2.1. Purchases Method Evaluation. This paragraph provides guidance for evaluating the three criteria as identified in subparagraphs 040302.B through 040302.D that allow for the use of
the purchases method of accounting or for determining the point in the supply chain at which OM&S should be removed from the applicable OM&S asset account and reported as an operating expense. While each criteria will be explained individually, the general rules applicable to all three criteria are:

3.2.1.1. This guidance does not replace or omit logistics, supply chain, or asset management requirements that already exist.

3.2.1.2. The OM&S under consideration must be viewed in aggregate for each DoD Component’s stand-alone financial statements. Although the value of an individual local or National Item Identification Number may not be significant when assessed individually, the aggregate value could be significant.

3.2.1.3. Analyses and conclusions performed by DoD Components to support a particular accounting position must be documented, and that documentation should be retained in such a manner as to be easily available to an auditor. Such analyses must be updated and kept current from one fiscal year to the next.

3.2.2. Criteria 1: Determination of Significant Amount. Significant amounts are those that do not rise to the level of being material but are important enough to merit attention by those responsible for oversight of the entity’s financial reporting. Materiality is defined in the GAO FAM as “the magnitude of an item’s omission or misstatement in a financial statement that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the inclusion or correction of the item.” Each DoD reporting entity that is considering the use of the purchases method because the amounts are not significant must perform the provided test steps 1 to 5 at their entity’s consolidated statement level (e.g., the U.S. Department of the Navy would perform the test steps based on the Navy Financial Statements rather than on an individual Navy Command level). Note that the DoD Component must perform these steps in the sequence in which they are listed. For purposes of calculating the amounts in the test, the DoD Component must use the most recent fiscal year annual amounts from their general ledger and corresponding annual financial statements. If the DoD Component does not have access to the financial information necessary to perform the tests, it has no basis to support that the OM&S amounts are not significant, and thus cannot use the purchases method to record OM&S amounts.

3.2.2.1. Test Step 1. Determine the aggregate value of the OM&S categories for which the purchases method is being considered. A combination of general ledger balances, acquisition data, and expense data may be used to determine the aggregate value of the OM&S under consideration.

3.2.2.2. Test Step 2. Compare the aggregate value of the OM&S under consideration to 1 percent of the Component’s Gross Cost.

3.2.2.2.1. Multiply the “Gross Cost” amount from the Component’s Statement of Net Cost by 1 percent.
3.2.2.2. If the aggregate value of the OM&S being considered is greater than or equal to 1 percent of Gross Cost, the amount is significant and the significant amount exception cannot be used to justify the use of the purchases method for the OM&S under consideration.

3.2.2.2.3. If the aggregate value of the OM&S is less than 1 percent of Gross Cost, proceed to Test Step 3.

3.2.2.3. Test Step 3. Compare the aggregate value of the OM&S under consideration to 1 percent of Total Assets.

3.2.2.3.1. Multiply the “Total Assets” amount from the Component’s Balance Sheet by 1 percent.

3.2.2.3.2. If the aggregate value of the OM&S being considered is greater than or equal to 1 percent of Total Assets, the amount is significant; the significant amount exception cannot be used to justify the use of the purchases method for the set of OM&S being considered.

3.2.2.3.3. If the aggregate value of the OM&S is less than 1 percent of Total Assets proceed to Test Step 4.

3.2.2.4. Test Step 4. Compare the aggregate value of the OM&S under consideration to 3 percent of the lesser of the financial statement line I&RP (Balance Sheet) or Operations, Readiness, and Support (OR&S) (Statement of Net Cost).

3.2.2.4.1. Select a base for performing Test Step 4. The base is the lesser of the I&RP amount from the Balance Sheet or the OR&S amount from the Statement of Net Cost.

3.2.2.4.2. Multiply the selected base by 3 percent.

3.2.2.4.3. If the aggregate value of the OM&S under consideration is greater than or equal to 3 percent of the selected base, the amount is significant and the significant amount exception cannot be used to justify the use of the purchases method for the OM&S being considered.

3.2.2.4.4. If the aggregate value of the OM&S is less than 3 percent of the selected base, the amount is not significant and the significant amount exception can be used to justify the usage of the purchases method of expense recognition for the OM&S under consideration.

3.2.2.5. Re-Performance. Components using the purchases method for a subset of OM&S under the significant amount exception (i.e., item classes that have cumulatively passed each of the provided tests) must re-perform and document the significant amount tests at least annually.

3.2.3.1. Under the purchases method of accounting, OM&S will be expensed (and not recorded as an asset) when purchased, if the OM&S are purchased and delivered directly to the end user for use in normal operations. SFFAS 3, paragraph 41, defines an end user as “any component of a reporting entity that obtains goods for direct use in the component’s normal operations. Any component of a reporting entity, including contractors, that maintains or stocks OM&S for future issuance shall not be considered an end user.” For the purposes of identifying end users, DoD Components should map their supply point structures to those described in DoDM 4140.01, Volume 2, which are:

3.2.3.1.1. Wholesale. These supply points are the highest level of organized DoD supply and conduct typical wholesale operations such as bulk receipt, repairs, and storage of OM&S. Wholesale locations maintain stocks to resupply retail supply points and to issue to the field. Depots, contractor-controlled depots, warehouses, and storage facilities are examples of wholesale sites. Wholesale locations are not considered end users, except for OM&S that is held and managed for consumption within the wholesale activity itself.

3.2.3.1.2. Retail. These supply points stock inventory below the wholesale level, either at the consumer level (directly supporting customers) or at the intermediate level (supporting a geographical area). Retail locations are not considered end users, except for OM&S that is held and managed for consumption within the retail activity itself.

3.2.3.1.3. Field. These locations are receiving organizations that are authorized to use supply items and only requisition quantities sufficient to satisfy their own immediate requirements. Receiving organizations do not reissue OM&S to other organizations; they use or consume OM&S within their normal operations. Examples of field supply points include but are not limited to ships (e.g. shipboard storage), submarines, aircraft wings, field units, and missile wings. OM&S at a field supply point can be considered to be in the hands of the end user. (Note: this does not include prepositioned stock, which can be stored in remote and field locations but is held for future issue).

3.2.3.2. In general, material furnished to contractors is not considered in the hands of an end user. If the material is stored in anticipation of being incorporated into an end item, it no longer meets the definition of OM&S and should be accounted for as construction-in-progress, work-in-process, or OM&S in development. If the material is held for further issuance, the contractor location is equivalent to a wholesale or retail location and cannot be considered an end user. Government furnished material as described in this subparagraph is different from Government furnished equipment which is a category of general equipment.

3.2.3.3. Title 41, section 101-8.705 of the Code of Federal Regulations defines a normal operation as the “operation of a program or activity without significant changes that would inhibit meeting objectives.” OM&S used in normal operations are goods necessary for DoD Components to meet their objectives. Examples of evidence that OM&S is used in normal operations can be, but are not limited to, recurring requirements, high inventory turnover rates, or significant purchases activity.
3.2.3.4. Other indications that OM&S is in the hands of the end user for use in normal operations include:

3.2.3.4.1. The user only requisitions quantities sufficient to satisfy its own immediate requirements (includes regular supply levels plus emergency/safety stock);

3.2.3.4.2. The user does not requisition large quantities of OM&S to issue to other organizations outside of its own;

3.2.3.4.3. The user is not a forwarding agent – the OM&S is requisitioned for the intent of use, not to resupply other supply points;

3.2.3.4.4. The user has the right to consume the OM&S; or

3.2.3.4.5. The user is permitted to carry only certain levels of OM&S.

3.2.4. Criteria 3: Not Cost Beneficial to Apply the Consumption Method of Accounting. Under the purchases method of accounting, OM&S is expensed (and not recorded as an asset) when purchased, if it is not cost-beneficial to apply the consumption method of accounting. This is referred to as the cost benefit exception. Each DoD Component considering using the cost benefit exception should conduct an analysis comparing estimated costs and benefits for applying the consumption method. If the cost exceeds benefits, the purchases method may be used. The cost benefit analysis should be unbiased, fully documented (i.e. supporting documents for cost estimates), reviewed, and approved by the Component’s management. See Annex 1 for an example of how a cost benefit analysis may be structured. If the cost benefit analysis is used to support the purchases method of accounting, it must be updated and documented at least annually.

3.3 Valuation of OM&S (040303)

3.3.1. OM&S accounted for under the consumption method of accounting must be valued at historical cost using the MAC flow assumption or the specific identification cost flow method (which may only be used for serially managed items). Historical cost must include all appropriate purchase and production costs incurred to bring the items to their current condition and location. Any abnormal costs, such as excessive handling or rework costs must be charged to operations of the period. Donated OM&S must be valued at their fair value at the time of donation.

3.3.2. OM&S that are maintained because they are not readily available in the market or because it is likely they will be needed in the future should be classified as OM&S Held in Reserve for Future Use. OM&S held in reserve for future use must be valued using the same basis as OM&S held for use in normal operations. The value of OM&S held for future use should be separately disclosed in the notes to the financial statements.

3.3.3. EOU OM&S must be valued at their estimated NRV. DoD Components are responsible for identifying inventory (including inventory held as OM&S) that is EOU. Upon identification of inventory as EOU, the DoD Component must adjust the value of the EOU inventory to its NRV as described in paragraph 040403.B.
3.3.4. SFFAS 3 does not address OM&S held for repair. Disclosures in Interpretation 7 “Items Held for Remanufacture” state that valuation methods prescribed for inventory held for repair may be reasonably applied to OM&S.

3.3.4.1. The Department's policy for accounting and reporting for Inventory Held for Repair is to use the allowance method as described in SFFAS 3 Paragraph 32. For purposes of inventory accountability and the type of inventory repairs generally made at the DoD, the Department has determined that use of the allowance method is the appropriate accounting treatment to be used among the alternatives presented in paragraphs 20 through 22, and paragraphs 32 and 33, in SFFAS 3 (and as further addressed in Paragraph 10 of FASAB Interpretation 7).

3.3.4.2. Under the allowance method, OM&S held for repair must be valued at the same value as a useable item, (i.e., at historical cost using the MAC flow assumption or specific identification). An allowance for repairs contra asset account (i.e. repair allowance) must be established. The annual (or other period) credit(s) required to bring the repair allowance to the current estimated cost of repairs must be recognized as current period operating expenses. As the repairs are made, the cost of repairs must be charged (debited) to the allowance for repairs account. Supporting documentation must be retained for the estimated repair costs used in establishing the allowance. In addition, the Component should reconcile the allowance account to the physical quantities of items held for repair on at least an annual basis.

3.4 Accounting for OM&S (040304)

* 3.4.1. General Ledger Accounts. The general ledger accounts discussed in this chapter must be reported in the financial statements required by the Treasury and for other reporting requirements mandated by Congress and OMB. Transactions/entries recorded to general ledger accounts must have adequate supporting source documentation. Source documents include contracts, invoices, receiving reports, payment vouchers, material return documents, transfer documents, inventory documents, issue and shipping documents, sales records, and documented gains and losses. Detailed posting transactions are outlined in the DoD USSGL Transaction Library. Examples of the USSGL accounts for OM&S are provided in this paragraph. Detailed account descriptions are found in the DoD Standard Chart of Accounts.

3.4.1.1. OM&S Held for Use (Account 151100). This account is used to record the value of materials and supplies held for use in normal operations. This account is also used to record the initial acceptance of materials and supplies in transit when title has passed but the items have not been received and accepted. Items in transit between DoD accounting entities must be kept under financial accounting control at all times. Activities may want to create subaccounts within the general ledger systems to record and track items in transit; however, the internal subaccounts must aggregate to one USSGL account in the DoD Standard Chart of Accounts. This account is intended to be used by any DoD Component that maintains OM&S.

3.4.1.2. OM&S Held in Reserve for Future Use (Account 151200). This account is used to record the value of stocks of materials and supplies maintained because they are not readily available in the market and there is more than a remote chance that they will eventually be needed, although not necessarily in the normal course of operations.
3.4.1.3. OM&S – Excess, Obsolete and Unserviceable (Account 151300). This account is used by DLA Disposition Services and other DoD Components to record the value of OM&S (serviceable or unserviceable) that exceed the amount expected to be used in normal operations and do not meet management’s criteria to be held in reserve for future use. Obsolete OM&S include stocks that are no longer needed due to changes in technology, laws, customs or operations. Unserviceable OM&S are items that are physically damaged and cannot be consumed in operations. DoD Components are responsible for identifying inventory (including inventory held as OM&S) that is EOU. Upon identification of inventory as EOU, the DoD Component must write down the value of EOU inventory to its NRV as described in subparagraph 040403.B.

3.4.1.4. OM&S Held for Repair (Account 151400). This account is used to record the value of materials and supplies that are not in usable condition, but can be economically repaired. The objective is to rebuild items as an alternative and rotating source of supply. Once rebuilt, the items will be returned to OM&S Held for Use. Components with immaterial amounts of OM&S held for repair may report these amounts in USSGL account 151100, “OM&S Held for Use.”

3.4.1.5. O&MS in Development (Account 151600). This account is used to record costs incurred or the value of tangible personal property, such as operating materials and supplies in development that will be consumed in normal operations upon completion of development. Upon completion, these costs will be transferred to USSGL account 151100, "Operating Materials and Supplies Held for Use," or USSGL account 151200, "Operating Materials and Supplies Held in Reserve for Future Use."

3.4.1.6. OM&S – Allowance (Account 151900). This account is used to record the amount of estimated repairs needed for damaged OM&S and the estimated gain or loss on the value of OM&S due to unrealized holding gains and losses.

3.4.1.7. Other Actual Business Type Collections From Nonfederal Sources (Account 426600). This account is used to report the amount collected during the fiscal year from nonfederal sources for which a specific USSGL account does not exist. These collections result from business type transactions such as the disposition of demilitarized or scrap EOU sold through a commercial venture resulting in a gain.

3.4.1.8. Financing Sources Transferred In Without Reimbursement (Account 572000). This account is used to record the amount of the increase of financing sources of a reporting federal entity that occurs as a result of an asset being transferred in.

3.4.1.9. Financing Sources Transferred Out Without Reimbursement (Account 573000). This account is used to record the amount of the decrease of financing sources of a reporting federal entity that occurs as a result of an asset being transferred out. The amount of the asset is recorded at book value as of the transfer date.

3.4.1.10. Other Expenses Not Requiring Budgetary Resources (Account 679000). This account is used to record other costs that do not require budgetary resources (such as accounting for the issue of operating materials and supplies when the consumption method is used).
3.4.1.11. **Gains on Disposition of Assets - Other (Account 711000).** This account is used to record the gain on the disposition (such as sale, exchange, disposal, or retirement) of assets not associated with investments or borrowings/loans.

3.4.1.12. **Other Gains (Account 719000).** This account is used to record the gain on assets resulting from events other than disposition.

3.4.1.13. **Losses on Disposition of Assets - Other (Account 721000).** This account is used to record the loss on the disposition (such as sale, exchange, disposal, or retirement) of assets not associated with investments or borrowings/loans.

3.4.1.14. **Other Losses (Account 729000).** This account is used to record the loss on assets resulting from events other than disposition.

3.4.2. **Relationship of General Ledger OM&S Accounts to Logistic Supply Condition Codes.** OM&S recorded in the financial records should be identifiable to OM&S recorded in logistic records and vice versa.

3.4.2.1. **Supply Condition Codes.** Supply condition codes classify material in terms of readiness for issue and use or identify action underway to change the status of the material. Supply condition codes currently in use within the DoD are defined in DLM 4000.25-2, “Military Standard Transaction Reporting and Accountability Procedures.”

3.4.2.2. **Relationship of Logistic Categories to Accounting Classifications for OM&S.** Table 4-3 shows the relationship of logistics supply categories to general ledger OM&S accounts.

3.5 Classification of Minor Items Not Meeting the Definition of OM&S (040305)

3.5.1. Components have expressed difficulty in classifying stocked tangible personal property such as infantry helmets or hand tools that do not meet the definition of OM&S established in SFFAS 3. SFFAS 6 defines PP&E as tangible assets that:

3.5.1.1. Have an estimated useful life of two or more years;

3.5.1.2. Are not intended for sale in the ordinary course of operations; and

3.5.1.3. Are intended to be used or available for use by the reporting entity.

3.5.2. Tangible personal property such as infantry helmets and hand tools meet all of the criteria listed in 040305.A, and therefore will be classified as equipment. Equipment will be expensed in the period purchased unless its historical cost exceeds the Component’s capitalization threshold, in which case the equipment will be capitalized and depreciated over its useful life.

3.5.3. Components must analyze items in their stores to identify items that meet the criteria in 040305.A, and are encouraged to leverage system data and functions where appropriate to perform the analysis in a cost and time-efficient manner. The analysis must be documented and retained in accordance with Component audit needs and relevant document retention policies.

3.5.4. This guidance does not replace or omit existing logistics, supply chain, or asset management requirements regardless of the assets’ accounting classification.

3.6 Accounting Treatment for Long Range Ballistic Missiles (040306)

3.6.1. The DoD defines the mission of the nuclear arsenal solely as one of deterrence. Under this mission, the useful life of nuclear assets is expected to exceed two years. Therefore, nuclear long range ballistic missiles (including, but not necessarily limited to, Intercontinental Ballistic Missiles and Submarine Launched Ballistic Missiles) which are fully configured and armed in support of this mission should be classified/recorded as general equipment.

3.6.2. Long range ballistic missiles which are not a part of a fully configured nuclear armed long range ballistic missile should be classified/recorded as OM&S.

4.0 INVENTORY - (Applicable to WCF Only) (0404)

4.1 General (040401)

This section sets forth the policies for recognition, valuation, and procedures for accounting for inventory and is applicable for WCF only.
4.2 Recognition (040402)

Inventory must be recognized when title passes to the purchasing entity. Title passes to the purchasing entity based on the terms of the contract. For free on board (shipping point), title passes when the inventory is shipped. If the terms of sale are free on board (destination), title passes when the goods are delivered to the purchasing entity.

*4.3 Valuation of Inventory (040403)

The Department’s policy is that inventory must be valued at historical cost using the MAC flow assumption. However, the Department has also approved the specific identification method for use with serially managed items, and the LAC flow assumption for the valuation of DeCA grocery and household product inventories. (Note: When LAC valuation is used, the inventory is revalued periodically and an allowance account is established for the unrealized holding gains and losses so that the LAC method approximates historical cost.) SFFAS 3 defines each of the methods as a means for arriving at historical cost. In addition, FASAB Interpretation 7, addresses the valuation of items held for repair that, once repaired/remanufactured/upgraded, are returned to Inventory Held for Sale. For inventory valuation of items held for repair where credit is given to the customer, the credit defines the value of the item to the WCF. Therefore, the inventory valuation is calculated as the cost to buy a new item minus the cost to repair, which would approximate the value of the credit given. When credit is not given, another valuation methodology must be employed. See Volume 2B, Chapter 9 for additional guidance. Supply management activities are not required to issue credit on any given transaction. The MAC cost flow assumption will be used as the remanufacture takes place to record appropriate production costs (normal costs to bring the item to a serviceable or upgraded condition).

4.3.1. Entities must use the MAC flow assumption to value inventory held for repair/remanufacture at historical cost. Components should value the receipt of a carcass at MAC and record a repair allowance in the allowance account. The repair allowance is calculated as the ratio of the latest representative repair cost adjusted for inflation to the latest representative acquisition cost. For example, if the latest representative repair cost adjusted for inflation is $100 and the latest representative acquisition cost is $500 and the MAC value is $490, the amount of the allowance would be $98 \([\frac{100}{500} \times 490]\). If there is no repair history, entities will develop and document an engineering estimate of the cost to repair. The documentation should be retained for audit purposes. Upon completion of the repair, the item will be moved to Inventory Held for Sale at MAC. If the total of the carcass value plus the costs incurred to repair it exceeds MAC, the difference must be charged to the current period as an expense. The capitalized item is treated as if it was a purchase for calculating the historical cost of inventory using the MAC flow assumption as illustrated in Table 4-2. In addition, the entities should reconcile the allowance account to the physical quantities of items held for repair on at least an annual basis.

4.3.2. EOU inventory must be valued at its expected NRV. DoD Components are responsible for identifying inventory and OM&S that is excess, obsolete and unserviceable. Upon identification of inventory as EOU, the DoD Component must determine the NRV of its EOU and adjust the recorded value of the EOU to its estimated NRV by recording a gain or loss (as applicable) and a corresponding inventory allowance (for a WCF) or operating materials and
supplies allowance (for a General Fund or WCF). EOU that will be transferred to DLA Disposition Services for disposition generally will not result in the DoD Component receiving any proceeds from the disposal, other than EOU that will be disposed of through a Qualified Recycling Program (QRP), and therefore, the NRV would be zero. For EOU to be disposed of through a QRP or by means other than a transfer to DLA Disposition Services, the DoD Component should estimate the NRV of the EOU based on prior disposal proceeds for comparable EOU, buyer quotes or other reasonable means. In all instances, documentation supporting the NRV calculation of the EOU must be prepared and retained by the DoD Component.

4.3.3. Supply Management activities must calculate and report the costs of all inventory sold, i.e., cost of goods sold at historical cost using the MAC flow assumption. Cost of goods sold is the balance of USSGL 650000, Cost of Goods Sold. USSGL 650000 may be verified by using this formula. Note that the inventory historical cost and increases in goods for sale include direct (e.g. labor or materials) costs and indirect costs (e.g. overhead).

\[
\begin{align*}
\text{Beginning Inventory at historical cost} & \\
+ & \text{Increases in Goods for Sale (Purchases, Remanufacturing Costs, Capitalized Inventory, Other Gains)} \\
- & \text{Disposals or Other Decreases in Goods for Sale (Including Other Losses) at historical cost} \\
\text{Equals: Cost of Goods Available for Sale at historical cost} & \\
- & \text{Ending Inventory at historical cost} \\
\text{Equals: Cost of Goods Sold at historical cost}\*
\end{align*}
\]

* If variances between actual indirect expenses and applied indirect expenses are accounted for as cost of goods sold in accordance with paragraph 040702.A.2, this would need to be factored into the calculation.

4.4. Accounting for Inventory (040404)

4.4.1. General Ledger Accounts. Detailed posting transactions are outlined in the DoD USSGL Transaction Library. Inventory accounts are authorized for use by activities that hold items for resale, use items in the process of production for sale, and consume items in the production of goods for sale or in the provision of services for a fee. Entities that hold supplies and materials for issue without reimbursement or for use without earning a fee own OM&S rather than inventory and should refer to section 0403. Refer to section 0407 for inventory accounts for work-in-process. This paragraph provides examples of the applicable inventory accounts. Additional USSGL accounts which may be relevant to inventory can be located in the DoD Standard Chart of Accounts and the USSGL.

* 4.4.1.1. Inventory Purchased for Resale (Account 152100). This account is used to record the value of inventory purchased for resale that is in a usable condition and is available for immediate resale. The DoD USSGL Transaction Library includes entries to record receipt of material purchases, sale of inventory items at cost, issue without reimbursement, reclassification of inventory, and gains or losses when inventory is revalued. Activities may want to create subaccounts within their inventory or general ledger systems to record and track inventory in
transit; however, the internal subaccounts must aggregate to one USSGL account in the DoD
Standard Chart of Accounts. See paragraph 19 of SFFAS 3.

4.4.1.2. **Inventory Held in Reserve for Future Sale (Account 152200).** This
account is used to record the value of inventory held in reserve for future sale and includes items
that have been suspended in the logistical system and are currently not available for sale. Typical
entries for use of this account include entries to reclassify inventory items, record the delivery of
goods and services, and record transfers in or out without reimbursement.

4.4.1.3. **Inventory Held for Repair (Remanufacturing) (Account 152300).** This
account is used to record the inventory items currently not in a usable condition but which can be
economically remanufactured. Remanufacturing is a process by which carcasses are overhauled,
rebuilt, refurbished, repaired, or restored to a usable condition for sale to a customer. Under
remanufacturing, repair expenses are capitalized to the cost of inventory and expensed as Cost of
Goods Sold.

4.4.1.4. **Excess, Obsolete, and Unserviceable Inventory (Account 152400).** This
account is used to record the value of inventory (serviceable and unserviceable) that exceeds the
amount expected to be used in normal operations and does not meet management’s criteria to be
held in reserve for future use, i.e., characterized as potential reutilization stock in DoDM 4140.01-V6. Obsolete inventory includes stocks that are no longer needed due to changes
in technology, laws, customs or operations or items for which the shelf life cannot be extended.
Unserviceable inventory are items that are physically damaged and cannot be consumed in
operation. DoD Components are responsible for identifying inventory that is EOU. Upon
identification of inventory as EOU, the DoD Component must adjust the value of its EOU
inventory to its NRV as described in paragraph 040403.B.

4.4.1.5. **Inventory – Raw Materials (Account 152500).** This account is used to
record the cost or value of raw materials purchased or donated for use as a component part of
inventory.

4.4.1.6. **Inventory – Work-In-Process (Account 152600).** This account is used to
record the accumulated cost or value of inventory used in the production process. Work-
in-process inventory includes the cost of raw materials, direct labor, and overhead.

4.4.1.7. **Inventory – Finished Goods (Account 152700).** This account is used to
record the accumulated cost or value of completed products.

4.4.1.8. **Inventory – Allowance (Account 152900).** This account is used to record:

4.4.1.8.1. The estimated cost to repair damaged inventory;

4.4.1.8.2. The estimated gain or loss on the value of inventory because of
unrealized holding gains or losses; and
4.4.1.8.3. The difference when restating the inventory from historical to standard cost (see Volume 11B, Chapter 15).

The account is either a contra asset account or an adjunct asset account depending on whether repair costs are increasing or decreasing for the subsequent fiscal year. This account is used to reflect the purchase cost variance for inventory transactions.

4.4.1.9. Cost of Goods Sold (Account 650000). This account is used to record the total cost of inventory sold including raw materials, direct labor, and overhead.

4.4.2. Relationship of General Ledger Inventory Accounts to Logistic Supply Condition Codes. Inventory recorded in financial records should be identifiable to inventory recorded in logistic records and vice versa. Table 4-4 displays the relationship of logistic supply categories to general ledger financial inventory accounts.

4.4.2.1. Supply Condition Codes. Supply condition codes classify material in terms of readiness for issue and use or to identify action underway to change the status of material. Supply condition codes currently in use within the DoD are defined in DLM 4000.25-2, “Military Standard Transaction Reporting and Accountability Procedures.”

4.4.2.2. Relationship of Logistic Categories to Accounting Classifications for Inventory. Table 4-4 shows the relationship of supply condition codes to general ledger inventory accounts.

4.5 Reconciliations (040405)

Activities must reconcile the inventory line item(s) in their general ledger with their detailed inventory accountability records at least quarterly. Activities may require reconciliations more frequently in order to improve accuracy of the general ledger line item(s) and to help reduce the risk of material misstatement. This reconciliation must include the multiple modules within Enterprise Resource Management systems, when they are being used (e.g. Warehouse Management module to Inventory Management module to Financial Management module). This reconciliation must be designed to identify errors between the quantities reported in the warehouse management system with the quantities reported in the financial management system. When errors are identified, they must be researched and resolved timely.

4.6 Adjustments for Physical Counts of Inventory (040406)

Activities must take physical counts of inventories at least annually (generally as of the fiscal year end), in accordance with the procedures prescribed in DLM 4000.25-2, “Military Standard Transaction Reporting and Accountability Procedures.” (Note: In accordance with the
Financial Statement Audit Completion Checklist contained in Section 1003 of the U.S. GAO 
*FAM Volume 2,* auditors are likely to attend and observe physical counts of inventories that have been deemed as material.) Activities must adjust the general ledger for differences between the general ledger balances and the physical count. Adjustments must be supported by appropriate documentation.

4.7 Inventory Gains and Losses (040407)

4.7.1. Disposal. Disposal of an inventory item must result in

4.7.1.1. A reduction in the associated inventory account equal to the valuation of the item; and

4.7.1.2. A loss amount equal to the historical cost of the item.

4.7.2. Incoming Shipment Gains and Losses. Invoices occasionally list fewer items than (inventory loss) or more items than (inventory gain) the actual count of inventory items received. If it is not economical to resolve the difference, record the difference as a gain/loss. In such instances, debit the incoming shipment losses to USSGL 729000; credit incoming shipment gains to USSGL 719000.

5.0 SUPPLY MANAGEMENT OPERATIONS - (Applicable to WCF Only) (0405)

5.1 Description (040501)

This section prescribes the policy and accounting requirements relating to inventory applicable to the supply management activities (i.e. Department of the Army, Department of the Navy, Department of the Air Force and the DLA) and to the DeCA for commissary resale. The policy for inventory valuation and classification is also applicable to the DLA Disposition Services, which holds items for redistribution or disposal including sales of excess materiel to the public and other federal customers. It is also applicable to the Depot Maintenance or Industrial Operations activities that hold and consume items in the production of goods for sale or in the provision of services for a fee, i.e. direct material expense.

5.2 Items to be Included in Supply Management Activities (040502)

5.2.1. General. The supply management activities manage inventory held for sale to other DoD Components or activities within a Component and, when authorized by legislation, items procured for sale to members of the Armed Forces and other individuals or organizations. The Under Secretary of Defense (Comptroller) (USD(C)) and the Under Secretary of Defense (Acquisition, Technology and Logistics) (USD(AT&L)) may designate an item to be procured by the supply management activity and may reassign the management responsibility of any item from one DoD Component to another DoD Component.
5.2.2. **Subsistence Items**. The supply management activities and the DeCA must plan for, procure, manage, distribute, and insure wholesomeness of subsistence products throughout the supply chain. Subsistence items must be procured to provide healthy, wholesome, nutritious food items to members of the Armed Forces and other authorized persons. Subclasses of subsistence items include inflight rations, combat rations, refrigerated subsistence and non-refrigerated subsistence.

5.2.3. **Military Exchange Items**. DoDI 1338.18, “Armed Forces Clothing Monetary Allowance Procedures,” assigns management responsibility to the supply management activities for items procured primarily for sale to members of the Armed Forces and other individuals or organizations authorized by legislation. These items include clothing sold by a military clothing resale activity and items sold in a ship's store. They also include personal items for health, comfort, and recreation.

5.2.4. **Military Clothing Items and Individual Equipment**. The Department authorizes military exchange systems to act as agents of the supply management activity to sell military clothing items to members of the Armed Forces. The DLA must procure military clothing requirements for the DoD and bill customers at standard prices. This supply class also includes combat equipment, tentage, tool sets and kits, hand tools, and cleaning equipment and supplies. When a Military Service directs the implementation of a new or modified model of these items that makes the previous model obsolete, the Military Service must reprogram resources to DLA based on DLA’s estimate of the requirement to fund procurement of the item including required safety stock levels, before DLA incurs any obligations for the item. Further, the Military Service must purchase DLA’s remaining stock of the obsolete model. Alternatively, the Military Service may direct DLA to dispose of the obsolete stock and pay DLA for disposal costs. See DoDM 4140.01 and DoDI 4140.63 for related materiel management guidance.

5.2.5. **Fuel**. DoD Components must buy their fuel through DLA. The DLA must bill DoD customers at standard prices and other federal and nonfederal government customers at cost plus the approved DLA surcharge. In isolated locations, where DLA has authorized a DoD customer to procure fuel on the local market, payment may be made by DLA or the customer depending on local circumstances. If payment is made by the DoD customer, then DLA will reimburse the customer for the actual cost of the fuel and bill for the fuel based on standard prices. Other items in this supply class are preservatives, liquid and compressed gases, chemical products, coolants, deicing, and antifreeze components.

5.2.6. **Construction Materials**. The supply management activities must manage construction materials including installed equipment, fortification materials, and barrier materials. This includes such items as wood, wire, cement, barrier materials, and sandbags.

5.2.7. **Medical**. The supply management activities must manage medical materials supported in the medical supply chain. This materiel includes pharmaceutical, medical-surgical, dental, medical laboratory, radiological, and optometric supplies. It also includes preventive medicine items and medical equipment.
5.2.8. **Initial Spares.** Initial spares are consumable or reparable spare and repair parts that support newly fielded weapons systems during the initial period of operation until the supply system can support the demand generated by the systems. Replenishment spares are spare and repair parts resupplying initial stocks.

5.2.8.1. The Component activity that owns the weapon system is responsible for funding the initial spares. Therefore, acquisition of the initial spares and stock level increases required to support a weapon system are the responsibility of the program office. The program office must acquire initial and inventory augmentation spares based on the materiel support date. Program managers must use their appropriated funds and may use supply management activities’ contracting capabilities to acquire initial spares. Therefore, acquisition of initial spares required to support a weapon system are the responsibility of the program office, i.e. the office within the Component Activity that performs this acquisition function.

5.2.8.2. The Component activity may purchase the initial spares and transfer them to the supply management activity via a title transfer without reimbursement using DoD (DD) Form 1150, Request For Issue/Transfer/Turn in. The Component activity must record the associated entries (budgetary and proprietary) for the purchase of the initial spares as OM&S prior to their transfer to the supply management activity. The Component activity will initiate a title transfer without reimbursement to legally transfer ownership and will remove the initial spares from its accounting records. The supply management activity will add the initial spares to its WCF accounting records. The transfer of initial spares must be fully documented and the documentation must be retained.

5.2.9. **Nonmilitary Programs.** The supply management activities must manage material used to support nonmilitary or civic action programs and sell these materials at standard prices. These programs are intended for agricultural and economic development.

5.3 **Authorized Customers (040503)**

A supply management activity is authorized to sell items to:

5.3.1. A federal government funded activity or an activity empowered to perform a federal government legislated function;

5.3.2. A DoD sponsored nonappropriated fund instrumentality;

5.3.3. A State Department sponsored employee commissary located outside the United States;

5.3.4. A foreign government when an authorized contractual relationship has been established;

5.3.5. A federal government contractor, when the contract specifically provides for the purchase of items by the contractor from the Government or when using the Replenishment Parts Purchase or Borrow Program;
5.3.6. Members of the Armed Forces and other individuals authorized by law to purchase commissary and clothing items;

5.3.7. The private sector, state or local governments when purchasing non-excess personal exchange/sale property as authorized by the Federal Property and Administrative Services Act of 1949 as amended in 40 U.S.C. Chapter 5, Section 503; and

5.3.8. Other entities, when authorized by duly appointed officials.

5.4 Issues Without Reimbursement (040504)

A supply management activity item may not be issued or transferred without a funded customer order except as specifically authorized in this paragraph. Events for which an issue is authorized without receipt of a funded customer order must be accounted for in the same manner as a normal sale with the exception that an allowance for loss on accounts receivable may be established when necessary. See Chapter 3 for additional guidance on establishing allowances for loss on accounts receivable.

5.4.1. Domestic Civil Emergency. A supply management activity item may be issued without immediate reimbursement when action is being taken to provide civil emergency relief assistance in accordance with the policies and procedures provided in DoDD 3025.18. However, an accounts receivable must be established for such amounts. Subsequently, funding should be made available to cover the costs of the relief effort, and the supply management activity be reimbursed for any outstanding accounts receivable.

5.4.2. Civil Disturbances. A supply management activity item may be issued without immediate reimbursement when action is being taken to control a civil disturbance in accordance with the policies and procedures provided in DoDD 3025.18. A receivable account must be established for such amounts. Subsequently, the supply management activities must be reimbursed for any outstanding accounts receivable based upon the procedures provided in Volume 11B, Chapter 11. Volume 16 also provides guidance on the write-off of uncollectible receivables from the public.

5.4.3. Foreign Disaster. The State Department is responsible for initiating and financing foreign disaster relief efforts pursuant to the Foreign Assistance Act of 1961. Procedures for issues of supply management activities material to assist in the event of a foreign disaster and reimbursements must be in accordance with DoDD 5100.46.

5.4.4. North Atlantic Treaty Organization (NATO) Country. A supply management activity item may be issued to a NATO country without reimbursement under a replacement-in-kind arrangement. Nonreimbursable issues under this authority must be changed to a reimbursable issue within 12 months if not replaced by the NATO country.
5.4.5. **Military Emergency.** A supply management activity item may be issued without immediate reimbursement when a federal official or military officer has certified that an emergency exists under emergency provisions in the current DoD Appropriations Act or 10 U.S.C. § 127. A receivable account must be established for such amounts. When funding is made available to cover the costs of the emergency, the supply management activity must be reimbursed for any outstanding accounts receivable.

5.4.6. **Presidential Directed Drawdown.** A supply management activity item may be issued to a foreign country without reimbursement when the President has directed a drawdown of defense articles from stocks under authority of 22 U.S.C. § 2318. The standard price of such issues must be reported to the Director, Defense Security Cooperation Agency for inclusion in subsequent foreign assistance budget requests and to the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), Operations Directorate, in order to determine the cash impact of such issues. The cash impact must be added to the economic adjustment cost recovery element.

5.4.7. **War Reserve Assets (WRA).** A supply management activity item may be issued without reimbursement when an item is designated as a WRA and the issue has been approved to satisfy requirements of a mobilization of U.S. Armed Forces.

5.4.8. **Deficiencies in War Reserve Requirements.** A supply management activity item may be issued without reimbursement when an item is issued to satisfy deficiencies in war reserve requirements or between activities within the supply management activity. Items issued at any level, wholesale or retail, to satisfy customer requisitions must be reimbursable from war reserve reinvestment appropriations.

5.4.9. **Disposal of Excess Inventory or OM&S.** Disposals will be made in accordance with DoDM 4160.21, Volume 2 which includes disposals of excess inventory through the DLA for which no reimbursement will be received.

5.4.10. **Items Nearing End of Shelf Life.** A supply management activity item may be issued at any price or without reimbursement when the item is not a WRA, it has six months or less of remaining shelf life, and the item manager grants approval for the item to be issued on a less than cost basis.

5.4.11. **Logistical Management Transfers.** Logistical management transfers (also known as logistical reassignments) result from changes in the funding appropriation for an item. If the OUSD(C) and the Office of the Under Secretary of Defense (Acquisitions, Technology and Logistics (OUSD(AT&L)) designate a logistical management transfer of an item from a GF appropriation entity to the supply management activity group, an increase to inventory for a nonreimbursable transfer must be recorded at the value of the item being transferred. Normally, an item transferred as a result of a logistical management transfer is transferred without reimbursement. However, with prior approval from the OUSD(C), transfers-in of inventory may be with reimbursement to the transferring account under these conditions:

5.4.11.1. The inventory was on order but undelivered to the transferring account at the time of the transfer;
5.4.11.2. The transferring account is not financed by the WCF; and

5.4.11.3. The inventory was ordered by the transferring account as a result of a reimbursable order from a customer of that account.

5.4.12. Logistical Management Transfers between Supply Management Activities. Procedures for transferring item management responsibility between WCF activities are outlined in Volume 11B, Chapter 2. The transfer of supply inventory is handled as:

5.4.12.1. On hand inventory. Stock on hand is transferred between supply management activities without reimbursement. Reimbursement is authorized, based on DoD credit policies, between wholesale and retail supply activities when on-hand retail inventory is transferred back to the wholesale item manager’s inventory control points.

5.4.12.2. On order inventory. The gaining and losing wholesale item managers must validate the on order inventory requirements to ensure the supply pipeline is adequately filled. As the gaining activity receives pipeline deliveries, the gaining item manager is responsible for payment either directly to the vendors (delivery order modification), or to the losing activity that funded the delivery order, thus ensuring cash neutrality across the WCF.

5.5 Loans and Leases (040505)

5.5.1. Authorized Activities. Supply management activities may only lend or lease items to activities specified in this paragraph for the stated purpose. The recipient must sign a receipt for the item. This receipt must include a statement of the intended purpose of the loan or lease. The accountable office, or the comptroller (or equivalent), of the accountable activity for the item must approve each loan or lease of an item. Accountability for inventory on loan remains with the activity lending the material. Inventory on loan must be valued in the same manner as is inventory on hand. Property may be lent to:

5.5.1.1. DoD Funded Customers. Supply management activities may lend an item to a DoD funded customer for a maximum of 120 days to support an approved training exercise, a military emergency, or a natural disaster.

5.5.1.2. U.S. Secret Service. Supply management activities may lend an item to the U.S. Secret Service for a maximum of 120 days for purposes prescribed under the policies and procedures in DoDD 3025.13.

5.5.1.3. Civilian Law Enforcement Officials. Supply management activities may lend an item to a civilian law enforcement activity for a maximum of 120 days for purposes prescribed under the policies and procedures in DoDI 3025.21.

5.5.1.4. State and Local Governments. Supply management activities may lend an item to a state or local government for a maximum of 120 days for a specific purpose, under the policies and procedures prescribed in DoDI 3025.21.
5.5.1.5. **National Veterans’ Organizations.** Under the authority of 10 U.S.C. § 2551, supply management activities may lend an item (e.g., cots, blankets, pillows, mattresses, bed sacks, and other supplies) to a recognized national veterans’ organization for a maximum of 120 days to support a national or state convention or a regional youth athletic or recreational tournament sponsored by the veterans’ organization. A bond equal to the current standard price of the item must be obtained before the item is loaned.

5.5.1.6. **American National Red Cross.** Under the authority of 10 U.S.C. § 2552, supply management activities may lend an item to an organization formed by the American National Red Cross for a maximum of 120 days for the purpose of instruction and practice needed to aid the Army, Navy, or Air Force in time of war. A bond equal to twice the value of the property is required for the care and safekeeping of the loaned property before the item is lent.

5.5.1.7. **Inaugural Committee.** Under the authority of 10 U.S.C. § 2553, supply management activities may lend an item to an Inaugural Committee to support an inauguration of the President of the United States for a period not to exceed nine days beyond the inauguration ceremony. A bond equal to the current standard price of the item must be obtained before the item is lent.

5.5.1.8. **Boy Scout Jamborees.** Under the authority of 10 U.S.C. § 2554, supply management activities may lend cots, blankets, commissary equipment, flags, refrigerators, and other equipment to the Boy Scouts of America for the use of Scouts, and officials who attend any national or world Boy Scout Jamboree. In addition, services and expendable medical supplies, as may be necessary or useful to the extent that items are in stock and items or services are available may be furnished without reimbursement. Items may be lent for a maximum of 120 days. A bond equal to the value of the loaned items must be obtained before the items are loaned.

5.5.1.9. **Shelter for the Homeless, Incidental Services.** Under the authority of 10 U.S.C. § 2556, the Secretary of a Military Department may provide without reimbursement bedding for support of shelters for the homeless that are operated by entities other than the DoD, but only to the extent that the Secretary determines that the provisions of such bedding will not interfere with military requirements. In addition, incidental services and other items (such as medical supplies) may be provided without reimbursement to the extent that the provision of incidental services or other items does not interfere with military preparedness or ongoing military functions. To satisfy these requirements, a supply management activity may issue to a shelter for the homeless only items that have been declared excess to the needs of the DoD.

5.5.1.10. **Humanitarian Relief.** Under the authority of 10 U.S.C. § 2557, supply management activities may make nonlethal excess supplies available for transfer to the Department of State for its distribution for humanitarian relief. The term “nonlethal excess supplies” means property, other than real property, of the DoD that is excess property as defined in regulations of the DoD; and that is not a weapon, ammunition, or other equipment or material that is designed to inflict serious bodily harm or death.
5.5.1.11. **Foreign Countries or International Organizations.** Supply management activities may lease or loan an item to an eligible foreign country or international organization under the authority of the Arms Export Control Act. Policy and procedures for the lease of material to foreign countries and international organizations is contained in DoDD 5105.65 and in Volume 15, Chapter 7. Refer to these references for approval channels and expense requirements.

5.5.1.12. **Other Leases.** Under the authority of 10 U.S.C. § 2667, supply management activities may lease or loan a nonexcess supply management activity item to an organization when the Secretary of Defense or the Secretary of a Military Department has determined that the item is not needed for DoD use during the proposed lease period and the lease will promote the national defense or otherwise be in the public interest.

5.5.2. **Approvals.** Each loan or lease of an item must be approved by the comptroller, or equivalent, of the activity responsible for accountability over the item. The approval must include a description of the item including the price, condition, anticipated return date; and a certification that the loan of the item will not jeopardize the capability to support national defense requirements.

5.5.3. **Expenses.** The recipient must pay for all transportation, packing, crating, and handling costs associated with the loan or lease of the item. At the time of return of the item, the recipient must be required to pay all costs necessary to restore the item to its original condition or to pay for any item the recipient does not return within the approved period of the loan or lease.

5.6 **GFM (040506)**

GFM may be provided to a contractor or other government agency for consumption or repair.

5.6.1. **Business Rules.** When GFM is provided for consumption, the business rules prescribed by this subparagraph must be followed.

5.6.1.1. Record as an expense the value of items issued by the item manager to a contractor or to another DoD or other federal government activity for consumption or incorporation in the repair, alteration, or modification of another supply management activity item for the benefit of the supply management activity.

5.6.1.2. Record as work-in-process the value of items issued by the item manager to a contractor or to another DoD or other federal government activity for fabrication, assembly, or disassembly of another supply management activity item for the benefit of the supply management activity. The use of the work-in-process account is described at section 0407.

5.6.1.3. The return of GFM items by a contractor must be accounted for in the same manner as a customer return of material without credit (see subparagraph 040403.A).

5.6.1.4. The cost of forgings and castings used as GFM should be included as a part of the acquisition cost of the item that includes the forging and casting in its production.
5.6.2. Items Issued for Repair and Return. Issuing supply activities must account for reparables or other items of inventory issued by the direction of an item manager to either a DoD activity or a contractor for repair, alteration, or modification as USSGL 152300, “Inventory Held for Repair.” Such items will continue to be valued as inventory held for repair in accordance with the valuation criteria applicable to inventory held for repair that is held by the stockage point. Upon receipt of the repaired item, it must be accounted for in USSGL 152100, “Inventory Held for Sale.”

5.7 Capitalized Inventory (040507)

5.7.1. Logistics Management Reassignment Transfers In Without Reimbursement. A supply management activity may capitalize, when it undertakes management responsibility for items, supply inventories that were financed by other appropriations and funds, as permitted by 10 U.S.C. § 2208 and consistent with guidance in the DoD M 4140.26. The activity that ordered the item must pay bills for inventories on order at the time of the transfer. As provided in 10 U.S.C. § 2208, a supply management activity may not make credits to an appropriation funded activity for capitalized inventories. However, stock withdrawal authorizations may be approved as provided in subparagraph 040507.C. Note, for transfers from other WCFs, the gaining supply management activity will reimburse the losing activity for any inventories on order as the deliveries are made.

5.7.2. Transfers of Reimbursable Procurements. The supply management activity may record a liability for an item transferred from a non-WCF account only if (1) the item is undelivered at the time of the transfer, and (2) the transferring organization’s obligation for the item resulted from a reimbursable order from a customer. The liability must be liquidated by a payment to the transferring appropriation or fund based upon a payment to the supply management activity by the customer.

5.7.3. Stock Withdrawal Authorizations. After transferring an item from an appropriation funded activity to a supply management activity, the transferring activity may not have sufficient funds to purchase the item when needed. The transferring activity may request, as part of the formal budget submission to the Congress, that the USD(C) approve an authorization for issues without reimbursement. The supply management activity must issue items, upon receipt of an approved stock withdrawal authorization, to the specified customer without reimbursement up to the authorized limit for a fiscal year. The authorized limit is calculated as the lesser of one quarter of the quantity transferred to the supply management activity or one year’s quantity based on the average amount consumed for the previous three years. When the fiscal year has passed, the supply management activity must issue items on a reimbursable basis. The supply management activity must not record a stock withdrawal authorization as a liability.

5.7.4. Logistical Management Transfers. Logistical management transfers result from changes in the funding appropriation for an item. When an approved logistical management transfer of item(s) is implemented, an increase or a decrease to inventory for a nonreimbursable transfer must be recorded at the value of the item being transferred.
5.8 Depot Level Reparables (040508)

5.8.1. General. For material management purposes, “reparables” are items of supply subject to economical repair and for which the repaired items are considered in satisfying computed requirements at any inventory level. For financial management and accounting purposes, the Department’s depot level repair program for inventory replenishment and resale is considered to be a remanufacturing process. See Volume 11B for more information on Depot Level Reparables.

* 5.8.2. Financial Reporting of Depot Level Reparables (DLR). Serviceable DLR will be reported on DoD financial statements at historical cost using the MAC flow assumption. DoD will use the allowance method when accounting for DLR. Under the allowance method, the reparable must be valued at the same value as a serviceable item. However, an allowance for repairs contra asset account must be established. The annual (or other period) credit(s) required to bring the repair allowance to the current estimated cost of repairs must be recognized as current period operating expense. As the repairs are made, the cost of repairs must be charged (debited) to the allowance for repairs accounting. Supporting documentation must be retained for audit purposes. In addition, the Component should reconcile the allowance account to the physical quantities of items held for repair on at least an annual basis.

5.8.3. Exchange Transaction. Many items held for remanufacturing are obtained as the result of an exchange transaction. An exchange transaction is the sale of a serviceable item at standard price in exchange for (1) cash and (2) an item that needs rebuilding or repair (carcass). The supply management activity may record two separate transactions to represent the complete event or may bill the customer at the exchange price, that is, the standard price less credit allowed if the requisitioning activity states a reparable will be returned. If the impaired item (carcass) has not been received at the time of the exchange, it must be recorded in USSGL 152300 “Inventory Held for Repair (Remanufacture Due In).”

5.8.4. Business Rules. Remanufacturing costs must be capitalized according to the business rules prescribed by this subparagraph:

5.8.4.1. Remanufacture of items currently available from new procurement. Capitalize all costs except costs that exceed the current replacement cost and abnormal costs such as excessive rework or costs of an unusual nature that occur infrequently. Abnormal costs should be expensed as period costs without regard to current replacement cost.

5.8.4.2. Remanufacture of items not available from new procurement. Capitalize all costs except abnormal costs such as excessive rework or costs of an unusual nature that occur infrequently. Abnormal costs should be expensed as period costs without regard to current replacement cost.

5.8.5. Time Limit for Receipt of Exchange Item. If a reparable is not received from a continental United States (CONUS) customer within 90 days of the exchange sale or 120 days for a customer outside the continental United States (OCONUS), the supply management activity must reverse the credit previously allowed and bill the customer for that amount. Additionally, at the
discretion of the seller, the customer may be billed for costs that would not have been otherwise incurred except for non-receipt of the item.

5.8.5.1. Carcass Received Before an Exchange Sale. Occasionally, a carcass may be received before an exchange sale when a like issue item is not available at the time the requisition is received. When this occurs, the supply management activity must record the carcass into inventory and establish a liability. When a serviceable item becomes available for issue, the liability must be reversed and the exchange sale will proceed normally.

5.8.5.2. Carcass Sent to Contractor or to Repair Facility for Repair/Remanufacture. Supply management activities may place orders and obligate funds for repair/remanufacture work placed with contractor or at a government repair facility. While being repaired/remanufactured, the carcass will remain in the inventory of Supply Management activity. Activities may continue to account for carcasses as “Inventory Held for Repair (Remanufacturing).”

5.9 Return of Items to the Supply Management Activity (040509)

5.9.1. Customers Who May Return Items. A customer within the federal government, including DoD contractors, may return an item to a supply management activity. Additionally, the Arms Export Control Act allows the return of defense articles from a foreign country or international organization under specified conditions. See 22 U.S.C. § 2761(m) for these conditions. In addition, 10 U.S.C. § 2208(g) states that the appraised value of supplies returned to working capital funds by a department, activity, or agency may be charged to that fund. The proceeds thereof shall be credited to current applicable appropriations and are available for expenditure for the same purposes that those appropriations are so available. Credits may not be made to appropriations under this subsection as a result of capitalization of inventories.

5.9.2. Customers Who May Not Return Items. A customer outside of the federal government that does not meet the conditions specified in subparagraph 040509.A may not return an item to a DoD supply management activity.

5.9.3. Credit Options. An item manager may grant credit for a returned item after receipt, inspection, and classification of the item. A return that stratifies to a war reserve requirement does not qualify for credit.

5.9.3.1. Return of a Fully Serviceable Consumable or Reparable Item When Not Part of an Exchange Transaction. If approved by an item manager, a credit may be granted to federal government customers and to nonfederal government customers who meet the requirements specified in subparagraph 040509.A. The amount of the credit for the return of an item that is within the AAO must not exceed the current standard price of the returned item less the current fiscal year’s approved cost recovery elements.

5.9.3.2. Return of a Carcass When Not Part of an Exchange Transaction. An item manager may approve credit for the return of a carcass from a federal government funded customer or a nonfederal government customer who meets the requirements specified in subparagraph 040509.A without an exchange when the returned item is within the AAO. The credit may be in
the amount of the value of the reparable to the supply management activity but not more than the current exchange price.

5.9.3.3. Billing. The supply management activity must bill the customer for the credit previously allowed if it granted credit before taking ownership or receipt of the returned item and the item is not received within 90 days from a CONUS customer or 120 days for an OCONUS customer. The customer also may be billed, at the discretion of the stockage point, for costs incurred due to non-receipt of the item.

5.9.3.4. Return of Defective Items. The supply management activity may grant a credit to a customer at standard price for defective items issued by a supply management activity, including specification defects, when a customer's quality deficiency report has been validated.

5.9.3.5. Credits Applied Toward Future Requirements. Credits granted may be applied against future customer demands in the current fiscal year for items or directly credited to the current year available funds of the customer.

5.9.3.6. Shipping Costs. Shipping costs include packing, crating, handling, transportation, port loading, and unloading. The supply management activity must fund transportation and other shipping costs only for items approved by an item manager for return from customers. Shipping and transportation cost for items that have not been approved by an item manager for return from customers must not be paid by the supply management activity.

*5.10 Excess Items Disposition (040510)

5.10.1. Identification and Transfer of EOU. Once the DoD Components have identified inventory as EOU and adjusted the EOU to its NRV, if they are using DLA Disposition Services to execute the disposition of the EOU, they should expeditiously transfer the EOU inventory to DLA Disposition Services using a DD Form 1348-1A (or its successor form as applicable). As described in subparagraph 040403.B, with the exception of EOU disposals by DLA Disposition Services that fall under the QRP, Components will generally have adjusted the value of this EOU to zero. The transfer to DLA Disposition Services may be a physical transfer or a “transfer receipt in place” if the EOU inventory is too large or bulky to physically transfer. When a "transfer receipt in place" occurs, the Component should physically segregate and mark the item as having been transferred in place and the inventory records should also be adjusted accordingly.

5.10.2. DLA Receipt of EOU. In accordance with DLM 4000.25, Volume 2, Chapter 16, paragraph C16.7.1.1, the DLA Disposition Services Field Office will send a Turn in Receipt Acknowledgement to the Component. This action provides confirmation to the Component that DLA Disposition Services processed the receipt transaction to record DLA Disposition Services materiel accountability and ownership for the material turned in.

5.10.3. DLA Recording of EOU. After DLA Disposition Services receives the DD Form 1348-1A, they will record an estimated NRV in their accounting system for each item of EOU inventory transferred. On a periodic basis (at least annually for the fiscal year end), DLA
Disposition Services will recalculate the NRV factor and will adjust its EOU inventory by the new recalculated factor for accounting and financial statement reporting purposes.

5.10.4. Processing EOU Classified as Explosives. DLA Disposition Services does not hold, process or dispose of EOU that are explosives, which includes ammunitions, classified items, and hazardous waste. Components possessing EOU that are explosives must arrange for their disposal through the Joint Munitions Command (JMC) of the Department of the Army unless the disposal is part of a QRP. In the case of a QRP, the Component may elect to use a third party for the disposal. In the same manner as for non-explosives EOU, the Components and JMC must adjust the EOU explosives to their NRV based on prior disposal proceeds for comparable EOU, buyer quotes or other reasonable means.

5.10.5. Issues of Excess Items to Reutilization and Marketing. An Integrated Materiel Manager (IMM) may authorize transfer without reimbursement of excess supply management activity items to DLA Disposition Services. The DLA Disposition Services must issue an item without reimbursement to a supply management activity when the item is required to satisfy a supply management activity requirement.

5.10.6. Transfer of Inventory Item. Losses for inventory items are taken at the time an item is determined to be EOU beyond repair. Both the inventory item and its related allowance are removed from the accounting records of the supply management activity.

5.10.7. Issues of Excess Items to Other DoD Activities. When the IMM directs and controls the lateral redistribution of an item excess to the immediate needs of a retail activity, supply management activities will record the event without direct reimbursement to the issuing (sending) activity from the receiving activity. Further, the IMM must bill the receiving activity for the standard price of the material and reimburse the issuing activity for the standard price of the item and its standard packing, crating, handling, and transportation costs.

5.10.8. Transfers of Excess Property from DLA Disposition Services. When an IMM or Primary Inventory Control Activity (PICA) determines that needed material is available within the disposal system, the DLA Disposition Services must provide the material to the requiring IMM/PICA without reimbursement. The supply management activity must reimburse the DLA Disposition Services, however, for costs incurred for packing, crating, handling (PCH), and transportation, if applicable or when conditions warrant. Reimbursement for PCH will be at the rate of 3.5 percent of the acquisition price of consumable material and 1 percent of the acquisition price of repairable material. Reimbursement to the DLA Disposition Services for transportation of consumable or repairable items will be at the cost recovery rate in effect for transportation by the shipping the DLA Disposition Services location. Activities must account for transfers of material from the DLA Disposition Services. Refer to the DoD Standard Chart of Accounts and DoD USSGL Transaction Library for detailed account descriptions and posting guidance for each of the general ledger accounts referenced.

5.10.9. Accounting for Customer Returns. Customer returns may have a significant impact on current period revenue and inventory for the supply management activities. Customers may or may not receive credit for returned items. Return of an item, whether issuable or not
issuable, reverses the sale’s effect on the Cost of Goods Sold because the sale with return brings
the supply management activity back to the original level of inventory. Regardless of whether the
customer does or does not receive credit, activities will record receipt of a returned item.

6.0 WRM - (Applicable to WCF Only) (0406)

6.1 Description (040601)

WRM is mission essential secondary items, principal end items, and munitions sufficient
to attain and sustain operational objectives in scenarios authorized in the Secretary of Defense
guidance and Joint Staff scenarios for committed forces. The WRM inventories must include
peacetime operating stocks, training stocks, stocks available through industrial base partnerships,
and WRM. (See DoDI 3110.06.) Stockpile materials are strategic and critical materials held due
to statutory requirements for use in national defense, conservation or national emergencies.
National Defense Stockpile materials, discussed in Section 0408, are accounted for within the

6.2 Funding for WRM (040602)

The WRM must be funded from appropriations made directly to the WCF. Such
appropriated amounts must be reflected as a separate goal within the applicable supply
management or Commissary Resale activity’s annual operating budget letter. Items such as
ammunition and/or principal and major end items procured for war reserve must not be funded
through a WCF, but must be funded through amounts available to Component/Defense Agency
procurement appropriations.

6.3 Accounting for WRM (040603)

Purchases of WCF war reserve items must be accounted for at the same level of detail as
items procured for peacetime requirements. The value of war reserve items must be recorded in
the standard inventory accounts.

6.4 Acquisition of WRM (040604)

The WRM is indistinguishable from corresponding inventory items. The WRM and
inventory are, or can be, purchased at the same time, purchased from the same vendor, received at
the same time and in the same shipping container, and stored together in the same warehouse/bin.
As a result, the accounting for the acquisition of WRM and inventory, at the time of acquisition,
is the same.

6.5 Disposition of WRM (040605)

The WRM is held in reserve to be available for transfer without reimbursement when the
issuance of a WRA has been approved to satisfy requirements of a mobilization of U.S. Armed
Forces. However, if authorized, war reserve and other stockpile materials may be sold.
7.0 WORK-IN-PROCESS - (Applicable to WCF Only) (0407)

*7.1 General (040701)

The WCF manufacturing activities, primarily those involved in depot maintenance or other industrial-type operations, who routinely perform tasks that take more than a month, must record operating costs within a work-in-process account. When the WCF manufacturing activity issues a progress invoice to the DoD purchasing component it will relieve its work-in-process for the amount invoiced. A work-in-process account must also be used by the DoD purchasing component to record any incremental amount billed to it by the DoD manufacturing activity for manufactured inventory. Additional information relating to revenue recognition, progress billings to customers, and disputed bills may be found at Chapter 16.

7.2 Accounting for Work-In-Process (040702)

7.2.1. This section describes the applicable USSGL accounts for recording transactions that map to the Inventory – Work-in-process account. Detailed posting transactions are outlined in the DoD USSGL Transaction Library. The USSGL accounts for work-in-process are described in this subparagraph.

7.2.1.1. Inventory – Raw Materials (Account 152500). All supplies and material purchased by a WCF activity for the purpose of providing goods or services to a customer must be accounted for in this account. Supplies and materials issued to a specific job must be recorded as a direct cost. Supplies and materials issued for the general use of a cost center (production indirect) or for G&A of an activity must be recorded as an indirect cost.

7.2.1.2. Inventory – Work-In-Process (Account 152600). This account is used to capture all costs relating to products that are in the process of being manufactured, remanufactured, repaired, or fabricated but are not yet complete. Periodically, but not less than monthly, adjust the allocated indirect expense amount to the actual indirect expense amount to record the assignment (allocation) of indirect expenses to work-in-process. The application of indirect expenses to inventory – work-in-process may be based on a formula that, over time, provides a reasonably close approximation of actual indirect expenses. Periodically, but not less than annually, adjust the allocated indirect expense amount to the actual indirect expense amount and adjust the applied overhead account. Adjustments of over and under applied overhead must be accomplished prior to the final billing on a completed customer order. Variances between actual indirect expenses and applied indirect expenses are accounted for as cost of goods sold.

7.2.1.3. Inventory – Finished Goods (Account 152700). This account is used to record the liquidation of inventory work-in-process when related work is completed and will be accepted for delivery to a customer in response to its order.

7.2.1.4. Applied Overhead (Account 660000). This account is used to record the amount of overhead cost distributed to work-in-process, construction in process or OM&S in development.
7.2.1.5. Cost Capitalization Offset (Account 661000). This account is used to record the amount of any costs originally recorded into another expense account that are directly linked to a specific job or product. These costs are transferred to an “in progress” asset account such as inventory work-in-progress, O&MS in Development, internal use software in development, and/or a completed asset account.

7.2.2. Work-in-process general ledger accounts may be used by any DoD Component or activity within those Components.

7.2.2.1. When a WCF activity incurs costs to produce a customer order, the related costs, regardless of the source of funding, should be accumulated by the use of a job order. Related costs attributed to an order may include:

7.2.2.1.1. Costs of additions, alterations, improvements, rehabilitations, and replacements of DoD fixed assets exclusive of construction in progress. Accounting guidance on construction in progress can be found in Chapter 6;

7.2.2.1.2. Costs of maintaining DoD equipment and inventory;

7.2.2.1.3. Costs of manufacturing or fabricating an end item or product; and

7.2.2.1.4. Costs of producing an output.

7.2.2.2. Actual cost of direct labor, direct materials, indirect labor, indirect materials and G&A expenses used in the production and completion of a job order/customer order must be recorded in inventory work-in-process.

7.2.3. Relief of Work-in-Process

7.2.3.1. Cost Transfer. Direct costs, indirect costs and G&A expenses recorded in inventory work-in-process accounts must be transferred upon completion or termination of the customer order to:

7.2.3.1.1. An Inventory-Finished Goods account and will then be expensed as cost of goods sold upon delivery to the customer. Costs incurred in excess of funding provided by the customer order must be recognized as a loss in proportion to the total estimated cost as costs are incurred to fulfill the order, such that the loss is recognized in proportion to total cost over the life of the order;
7.2.3.1.2. An applicable asset account, if the completed work is to be retained by the producing activity;

7.2.3.1.3. An expense account, if the completed work retained for use by the producing activity does not meet the DoD capitalization criteria; or,

7.2.3.1.4. Operating expenses/program costs upon termination of a customer order prior to completion.

* 7.2.3.2. Order Completion. Completion of a customer order occurs when all work requested on a customer order has been completed. Upon completion of a customer order, no costs associated with that customer order must remain in the work-in-process account.

* 7.2.3.3. Recognizing Losses. The costs incurred on a customer order may be more or less than the revenue earned depending upon whether costs incurred exceed or are less than the funded amount on the customer order. Therefore, a gain or loss may occur on the work performed on a customer order. Probable (more likely than not) losses should be recognized in proportion to estimated total cost when goods and services are acquired to fulfill the contract. Thus, the loss should be recognized in proportion to total cost over the life of the contract/customer order.

7.2.3.4. Disposition of Completed Products. Completed products in response to a customer order may not be retained as assets (i.e., finished goods) of WCF activities. Upon completion, goods and services resulting from customer orders must be billed promptly to customers. Billing must not be delayed or deferred pending customer acceptance of finished work. Parts and supplies manufactured for internal WCF use must be transferred, upon completion, to the OM&S account.

* 7.2.3.5. Progress Billed Manufacture. Costs that have been accumulated in inventory work-in-process because of progress or incremental billing to a supply management activity must be transferred to Inventory Held for Sale upon completion and receipt of the manufactured end items.

7.2.4. Review of Work-In-Process. Periodically, but at least annually, WCF activities must review work-in-process account balances so that appropriate actions may be taken, if necessary, to reduce significant balances in the work-in-process account. The review should focus on completed customer orders where costs incurred exceed the funding provided on the existing customer order and these costs have not been recognized as a loss. In these cases, the activity should transfer the amount of costs incurred that exceeds the funding provided on the customer order from the work-in-process account to a loss account in the period in which the costs were incurred. In addition, the review should evaluate the compliance with the accounts receivable policy and percentage of completion method for revenue recognition policy in Chapter 3 and Chapter 16.
7.3 Inventory Work-In-Process Accounts (040703)

Due to reporting requirements, many WCF activities are required to capture costs at a more detailed level than the USSGL or DoD Standard Chart of Accounts. The inventory work-in-process should identify the performing activity and the portion of government property furnished to contractors and subcontractors for the performance of DoD contracts for other than real property. Activities may want to create subaccounts within their inventory or general ledger systems to track work-in-process at the detail level; however, the internal subaccounts must aggregate to one USSGL/DoD account. The inventory work-in-process subaccounts suggested for use by the WCF are described in this paragraph:

7.3.1. Inventory Work-In-Process (In-House). Inventory work-in-process (in-house) is used to record the cost of work-in-process performed by DoD personnel. A subsidiary account must be maintained to accumulate the costs of each job/customer order and facilitate the transfer of costs to the applicable asset or expense account. Sources of entries to this account include billings under contracts for material, supplies, and equipment; documented assignments of costs accumulated in cost pools; issue and transfer documents; receiving and shipping reports; invoices; payment vouchers; payroll records; reports of completed work-in-process; and documented losses.

7.3.2. Inventory Work-In-Process (Contractor). Inventory work-in-process (contractor) is used to record the cost of work performed by a contractor. If the work is accepted and will be incorporated into in-house work, it should be recorded to work-in-process. It should be recorded to inventory available for sale upon acceptance if it will not be incorporated into in-house work.

7.3.3. Inventory Work-In-Process (Other Government Activities). Inventory work-in-process (other government activities) is used to record the cost of work-in-process performed by other federal government agencies. A subsidiary account must be maintained for each contract to track the value of work performed as represented by progress payments. Sources for entries to this account include interagency agreements, invoices, payment vouchers, and property acceptance documents.

7.3.4. Inventory Work-In-Process (GFM)

7.3.4.1. Inventory work-in-process (GFM) is used to record the value of that portion of government property furnished to contractors and subcontractors (including other federal agencies) for the performance of DoD contracts.

7.3.4.2. Details of government furnished material must be maintained for each contract where the contractor is provided material by DoD. This can be accomplished either using separate Accountable Property System of Record entries or using USSGL subsidiary accounts. For example, a subsidiary account could be maintained for each contractor that is furnished government material for use in performance of a contract(s) and that is to be returned upon completion of the contract. The subsidiary accounts should be subdivided by contract. In addition, any increases to this account must be supported by documentation evidencing issuances of government material to contractors, whether from inventory or from another contractor in accordance with DoDIs. Decreases to this account only occur when the end item is accepted by
the DoD and received into inventory, or the material is returned to inventory or otherwise disposed of at DoD's direction.

7.3.4.3. Periodically, but at least annually, this account must be reconciled with the property accountability records maintained by the contractor. This reconciliation involves coordination with the assigned property administrator for the contract. Property administrators must be provided financial data on the value of GFM for use in completing contract close out or termination. On contract completion or termination, the account must be adjusted to reflect the disposition of unused GFM provided to the contractor.

7.3.4.4. Sources for entries to this account include shipping and issue documents, property acceptance documents and property administrator reports, material-return documents, collection and deposit documents, settlement agreements, and documented losses.

8.0 STOCKPILE MATERIALS - (Applicable to Revolving Fund Only) (0408)

8.1 Description (040801)

The National Defense Stockpile operates under the authority of the Strategic and Critical Stock Piling Act (50 U.S.C. Subchapter III). The Stockpiling Act provides that strategic and critical materials are stockpiled in the interest of national defense to preclude a dangerous and costly dependence upon foreign sources of supply in times of a national emergency. The National Defense Authorization Acts provide authority to buy and sell specific materials, set quantity and revenue levels for selling material, and mandate programs to receive the revenue from the sales and collections. There is currently no authorization to buy (acquire) any material if over 99 percent of the inventory is authorized for sale. Only accounting requirements and procedures for stockpile material transactions particular to the National Defense Stockpile Transaction Fund (NDSTF) are included in this section.

8.1.1. Operations. The Defense National Stockpile Center (DNSC) administers the acquisition, storage, management, and disposal of inventory currently maintained in the National Defense Stockpile. The NDSTF is a continuing fund that finances the operations of the National Defense Stockpile and DNSC. The NDSTF receives resources from diverse sources including direct appropriations, transfers from other appropriations, transfers of physical assets, and disposal proceeds, and thus is not strictly a revolving fund. The NDSTF’s Department of the Treasury Federal account symbol is 97X4555.

8.1.2. Responsibilities. The DNSC will initiate all transactions obligating funds and accounting for inventory of the NDSTF. The Defense Finance and Accounting Service (DFAS) will establish accounting requirements and procedures, perform financial and general ledger accounting, and prepare external accounting reports for the NDSTF. The DFAS will also provide accounting reports and additional supporting supplemental financial information to the DNSC for preparation of the DoD, “Strategic and Critical Materials Report to the President and Congress.”
8.2 Recognition of Stockpile Materials (040802)

The consumption method of accounting must be applied for stockpile materials. The materials must be recognized as assets and reported when produced or purchased. The cost of stockpile materials must be removed from stockpile materials and reported as an operating expense when issued for use or sale.

8.3 Valuation of Stockpile Materials (040803)

Stockpile materials must be valued based on historical cost. Historical cost must include all appropriate purchase, transportation, and production costs incurred to bring the items to their current condition and location. Abnormal costs must be charged to operations of the period. The DoD standard of using the MAC flow assumption must be applied in arriving at the historical cost of stockpile materials. The financial inventory balance of the National Defense Stockpile is maintained on a historical cost basis as supported by “laid-in cost.” In accounting terms, laid-in cost is used by wholesalers or suppliers and includes additional costs incurred to place the goods in inventory (e.g., a manufacturer's invoice price and freight).

8.4 Accounting for Stockpile Materials (040804)

Because of some unique transactions used in accounting for National Defense Stockpile material (e.g., acquisitions and sales), additional breakout of information is required below the USSGL account level. When information is required for separate identification and inclusion in financial statements, combining with other accounts in the several financial statements, or preparation of notes to the financial statements, financial systems should allow for the information to be segregated in a form that would permit user analysis. The unique use of select general ledger accounts of the NDSTF is included in the discussion of each particular accounting area. Detailed posting transactions are outlined in the DoD USSGL Transaction Library. Also, see Chapter 16.

8.4.1. Stockpile Materials Held In Reserve (Account 157100). Stockpile Materials Held In Reserve are strategic and critical materials held due to statutory requirements for use in national defense, conservation or national emergencies. They are not held with the intent of selling in the ordinary course of business.

8.4.2. Stockpile Materials Held For Sale (Account 157200). This account is the account used to maintain the stockpile materials that have been authorized for sale. The materials authorized for sale must be valued using the same basis used before they were authorized for sale. Any gain (or loss) upon sale must be recognized as a gain (or loss) at that time.

8.4.3. The two USSGL inventory accounts described in subparagraphs 040804.A and 040804.B are classified in several lower level subdivisions of this account, which are used for the National Defense Stockpile inventory as shown at Table 4-6.

8.5 Reconciling Inventory Records (040805)

The inventory accounting system maintained by the DNSC supports the value of inventory as shown in these accounts. The DNSC and DFAS are jointly responsible for reconciling the inventory records.

8.5.1. Material Acquisition. All acquisitions of material for the National Defense Stockpile are proposed in the Annual Materials Plan, which is subject to approval by Congress and the subsequent authorization of funding. Funding authorization may be in the form of new appropriations, an authorization to spend from the available balance of the Transaction Fund, or from sales proceeds from authorized disposals. Material purchase contracts are recorded as obligations against the current year acquisition program on the date of the contract. When material is received, it is recorded in the inventory accounting system and the general ledger inventory account, accounts payable, and a decrease in undelivered orders. Any other cost, such as initial testing, increases the cost of the material for inventory valuation. The inventory accounting system must be reconciled to the general ledger inventory account each month. In addition, a physical inventory should be conducted at least annually.

8.5.2. Material Upgrade. Also included in the Annual Material Plan is the program for upgrading existing National Defense Stockpile material. This work is accomplished by contracts for the value of the upgrading services. These amounts are obligated against the current year program. When material is delivered to the contractor for upgrading it is transferred on the records from the stockpile inventory to material in the hands of a contractor. When upgraded material is returned, a new unit cost is determined by adding the upgrading costs to the original inventory value. The amount of the upgrading cost and original cost of the material are transferred to the on hand stockpile inventory account from the material in the hands of a contractor account.

8.5.3. Exchange Transactions. Materials can be disposed of by offering like material as payment in kind or other material in exchange as settlement of amounts due for material upgraded or acquired. These are accounted for as exchange disposals and the original cost of the material is...
removed from inventory and recorded as cost of exchange disposals. Exchange settlements liquidate an obligation for material upgrade and acquisition, as would payment in cash, and is accounted for through the budgetary accounts to effect the liquidation of the original contractual obligation in the accounting records.

8.5.4. Material Disposals. Various materials in the National Defense Stockpile may become obsolete or excess to current defense stockpiling needs. The National Defense Stockpile Act authorizes the disposal of such material. These materials can be disposed of when included in the Annual Material Plan and authorized in the budget program for the NDSTF. Disposal sales of marketable commodities are offered on a bid auction or negotiated sales basis. Material disposals are accounted for as sales and the original cost of the material is removed from inventory and recorded as cost of sales.

8.5.5. Billing and Collection. All sales and disposals are billed shortly after the sales agreement is made or as of the scheduled time for delivery or pickup of the material. Bid deposits received are held as advances until returned or recorded to sales proceeds upon delivery of material to successful buyers. The purchaser of the material is allowed a specified number of days in which to pick up the material, after which time storage charges are assessed. Any such storage charges are additional billings to the purchaser. When material is disposed of by exchange settlements, credits earned for material received and accepted by DNSC are used as payment for material shipped. Additional billings for delayed pickup of material are also applicable to the exchange settlement disposals. Collections are received by the DNSC via electronic fund transfer or paper check (deposited to a local banking facility). Upon receipt of the funds, a DD Form 1131, Cash Collection Voucher and confirmed deposit are sent to the DFAS Accounting and Finance Office for recording in the accounting records and financial reporting.

8.5.6. Inventory Adjustments. Inventory adjustments are made whenever there is evidence that an adjustment is required. Such instances include periodic count or measurement of material, movement of material, and complete disposal of material from a storage location. All adjustments are documented and approved before recording in the inventory accounting system and general ledger inventory account. Depending on the nature and size of the adjustment, approval is granted by the Administrator of the DNSC, delegated inventory officials, or board of survey.

8.6 Research Grants (040806)

The NDSTF receives appropriations for the award of grants to universities, colleges, and research institutions. The designated recipient of the grant is included in the appropriation act or requisite legislation. The Administrator, DNSC, is the grant administering official. See Volume 12, Chapter 5 for additional guidance on accounting for grant funds.

This annex is applicable for inventory, operating materials and supplies (OM&S), and stockpile materials of both the General Fund, Working Capital Fund, and Revolving Fund.

1.0 Alternative Valuation Methodologies for Opening Balances (A20101)

This policy guidance sets out how Components should establish opening balances for inventory, OM&S, and stockpile materials using the methodology described in the Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standard (SFFAS) 48 “Opening Balances for Inventory, Operating Material & Supplies, and Stockpile Materials.” and Technical Release 18 "Implementation Guidance for Establishing Opening Balances". All Components must establish their opening balances for inventory, OM&S, and stockpile materials in alignment with established Financial Improvement and Audit Readiness milestones. The valuation methodologies outlined in this policy must be used only to establish and document opening balances. After establishing opening balances, the Components must account for and comply with the recognition, measurement, presentation, and disclosure requirements identified in this chapter and FASAB pronouncements, including SFFAS 3, “Accounting for Inventory and Related Property.”

2.0 Valuation of Opening Balances (A20102)

2.1 When a Component cannot apply the initial amount measurement approach (historical cost) outlined in SFFAS 3, it is acceptable to use deemed cost as a substitute for initial amounts (historical cost) to establish the opening balances for inventory, OM&S, and stockpile materials. Deemed cost may be based on any one or a combination of the following allowable valuation methods:

   2.1.1. Standard (Selling) Price or Fair Value
   2.1.2. Latest Acquisition Cost
   2.1.3. Replacement Cost
   2.1.4. Estimated Historical Cost (initial amounts)
   2.1.5. Actual Historical Cost (initial amounts)

2.2 All methods used by a Component must be identified and reported in its financial statement notes. In addition, Components must retain documentation to support deemed cost values (e.g., invoices or contracts to demonstrate latest acquisition cost; catalog price to determine fair value; basis of estimates). Further, Components should select the most cost effective method(s) to apply in arriving at a supportable balance based on deemed cost.

2.3 Any gains or losses in inventory, OM&S, and stockpile materials allowance accounts must be adjusted to zero when establishing an opening balance using deemed cost. Once established,
opening balances are to be considered consistent with SFFAS 3 requirements. Opening balances should be included in ongoing inventory balances and valuation calculations (e.g., the opening balance would be one component of a Moving Average Cost (MAC) calculation, along with any newly purchased inventory). No distinction of amounts arising from the opening balances is required.

2.4 Deemed cost can only be used once by a Component to establish a beginning balance. The alternative valuation methods permitted in this guidance may not be applied to transactions or events that increase the value or quantity of inventory, OM&S, and stockpile materials after opening balances are established. Components must be prepared to comply with the recognition, measurement, presentation, and disclosure requirements of SFFAS 3 and this chapter (e.g., MAC, Specific Identification) going forward.

2.5 Where deemed cost is used to value the opening balance for inventory, OM&S, or stockpile materials, the existing values in the DoD Component accounting systems will need to be adjusted by eliminating the gross inventory, OM&S, or stockpile materials value and any related allowance account value and recording the deemed cost value. The difference between the gross value, any related allowance account value and deemed cost will be recorded to prior period adjustments due to changes in accounting principles in accordance with the reporting requirements under paragraph 13 of FASAB SFFAS 21, “Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources.” Any adjustments must be properly documented and supported to assist ongoing audit efforts.

2.6 DoD Components who apply the deemed cost methodology to adjust their opening balances for inventory, OM&S, or stockpile materials, must disclose in their financial statements that a deemed cost methodology was applied in establishing their opening balances and describe the method used in the first reporting period in which the reporting entity makes an unreserved assertion that its financial statements, or one or more line items, are presented fairly in accordance with GAAP. An unreserved assertion is an unconditional statement. No disclosure of the distinction or breakout of the amount of deemed cost of inventory, OM&S, or stockpile materials included in the opening balances is required.

3.0 Relevant Guidance (A20103)

3.1 SFFAS 3, “Accounting for Inventory and Related Property”;

3.2 SFFAS 21, "Reporting Corrections of Errors and Changes in Accounting Principles, Amendment of SFFAS 7, Accounting for Revenue and Other Financing Sources";

3.3 SFFAS 48, “Opening Balances for Inventory, Operating Materials and Supplies, and Stockpile Materials”;

3.5 Technical Release 18 "Implementation Guidance for Establishing Opening Balances".
4.0 Definitions (A20104)

4.1 **Deemed Cost.** Deemed cost is an amount used as a substitute for initial amounts that otherwise would be required by SFFAS 3 to establish opening balances.

4.2 **Fair Value.** Fair value is the amount at which an asset or liability could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

4.3 **Opening Balances.** Opening balances are account balances that exist at the beginning of the reporting period. Opening balances are based upon the closing balances of the prior period and reflect the effects of transactions and events of prior periods and accounting policies applied in the prior period. Opening balances also include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments.

4.4 **Replacement Cost.** A replacement cost is an amount required for an entity to replace the remaining service potential of an existing asset in a current transaction at the reporting date, including the amount that the entity would receive from disposing of the asset at the end of its useful life.

4.5 **Specific Identification.** Specific identification is an inventory costing methodology that directly links specifically identifiable items (e.g., serially managed items) with their associated costs.

4.6 **Standard (Selling) Price.** Standard price is the latest known representative acquisition cost plus authorized cost recovery rate for each item of inventory and related property. This price is established annually and is often referred to as selling price. Selling price and fair value may or may not be identical due to the intragovernmental nature of some sales.

4.7 **Additional Definitions.** See section 0402 for additional definitions.

1.0 GENERAL (0501)

*1.1 Overview (050101)

1.1.1. Advances and prepayments are predominantly reported in the DoD financial statements as assets and liabilities such as accounts receivable and accounts payable. The Office of Management and Budget (OMB) Circular A-11, “Preparation, Submission, and Execution of the Budget” categorizes Federal agency assets as claims of a Federal agency against other Federal agencies which, when collected, can be used in the agency’s operations. It goes on to define non-Federal assets as transactions of the Federal Government with non-Federal entities. Chapter 8 defines a liability as an amount owed to a Federal or non-Federal entity for items or services received and expenses incurred (including personnel related costs).

1.1.2. OMB Circular A-11 defines advances as cash outlays made by a Federal agency to cover a part or all of the recipients’ anticipated expenses or for the costs of goods and services the agency is to receive. It further defines prepayments as payments made by a Federal agency to cover certain period expenses before those expenses are incurred. Account and report separately those advances and prepayments made to Federal agencies as they are intragovernmental transactions.

1.1.3. Amounts recorded as advances and prepayments must be supported by documentation that clearly shows the basis for the amounts recorded and the terms upon which an advance or prepayment is made. The supporting audit trail must include sufficient information to show the period the advances were made, the budget authority for the advances, the period the advances were liquidated and the related approving authorities. This audit trail documentation must be readily available for review by auditors and management. Refer to Volume 6A, Chapter 2 for audit trail guidance.

1.1.4. Advance payments are prohibited by Title 31, United States Code, section 3324 (31 U.S.C. § 3324) “Advances.” Exceptions to the advance payment prohibition are located in specific appropriation acts or other laws, or when granted by the President as provided in 31 U.S.C. § 3324.

1.2 Purpose (050102)

This chapter provides the requirements by which DoD Components must account for advances and prepayments made to employees, other Federal agencies, non-Federal entities and foreign governments.

*1.3 Authoritative Guidance (050103)

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:
1.3.1. 10 U.S.C. § 2307 “Contract financing.”

1.3.2. 10 U.S.C. § 2396 “Advances for payments for compliance with foreign laws, rent in foreign countries, tuition, public utility services, and pay and supplies of armed forces of friendly foreign countries.”

1.3.3. 31 U.S.C. § 6101 “Definitions” (Program Information).

1.3.4. 31 U.S.C. § 6302 “Definitions” (Using Procurement Contracts and Grant and Cooperative Agreements).

1.3.5. 31 U.S.C. § 6303 “Using Procurement Contracts.”

1.3.6. 31 U.S.C. § 6304 “Using Grant Agreements.”

1.3.7. 31 U.S.C. § 6305 “Using Cooperative Agreements.”

1.3.8. DoD U.S. Standard General Ledger (USSGL) Transaction Library and Standard Reporting Chart of Accounts are available on the Standard Financial Information Structure (SFIS) web page. SFIS provides the current USSGL accounts to be used, defines these accounts and illustrates the required proprietary and/or related budgetary accounting entries.

1.3.10. Grants.gov. The Grants.gov program management office was established in 2002 as a part of the President’s Management Agenda. Managed by the Department of Health and Human Services, Grants.gov is an E-Government initiative operating under OMB.

1.3.11. Federal Accounting Standards Advisory Board (FASAB), Statement of Federal Financial Accounting Standards (SFFAS) No. 1, “Accounting for Selected Assets and Liabilities.” This statement defines and illustrates the distinction between Entity Assets and Non-entity Assets, as well as Intragovernmental and Governmental Assets and Liabilities. Advances and prepayments are reported and accounted for in accordance with this standard.

*2.0 DEFINITIONS (0502)

2.1 Advances (050201)

According to SFFAS 1, advances are cash outlays made by a Federal entity to its employees, contractors, grantees, or others to cover a part or all of the recipients’ anticipated expenses or as advance payments for the cost of goods and services the entity acquires. Examples include travel advances disbursed to employees prior to business trips, and cash or other assets disbursed under a contract, grant, or cooperative agreement before services or goods are provided by the contractor or grantee. Progress payments made to a contractor based on a percentage of
completion of the contract are not advances. Advances are made only to payees to whom a Component has a mutually binding legal relationship and not in excess of the amount obligated. The “Glossary” chapter defines these as disbursements of funds before performance have been certified by an authorized DoD receiving official.

2.2 Commercial Item (050202)

*FAR Subchapter A, subpart 2.1* defines this as any item, other than real property, that is customarily used by the general public or by non-governmental entities for purposes other than governmental purposes, and (i) has been sold, leased, or licensed to the general public; or (ii) has been offered for sale, lease, or license to the general public.

2.3 Contract (050203)

The “Glossary” Chapter defines this as a mutually binding legal relationship obligating the seller to furnish the supplies or services (including construction) and the buyer to pay for them.

2.4 Cooperative Agreement (050204)

According to Grants.gov, a cooperative agreement is a legal instrument of financial assistance between a Federal awarding agency or pass-through entity and a non-Federal entity. In accordance with 31 U.S.C. §§ 6302, 6303, 6304, and 6305 it is used to transfer anything of value from the Federal awarding agency or pass-through entity to the non-Federal entity to carry out a public purpose authorized by a law of the United States (see 31 U.S.C. § 6101(3)); and not to acquire property or services for the Federal Government or pass-through entity's direct benefit or use. It is distinguished from a grant in that it provides for substantial involvement between the Federal awarding agency or pass-through entity and the non-Federal entity in carrying out the activity defined in the Federal award.

2.5 Federal Financial Assistance (050205)

Grants.gov categorizes Federal financial assistance as a broad term to refer to the various ways the U.S. government redistributes resources to eligible recipients. Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants; cooperative agreements; non-cash contributions or donations of property (including donated surplus property); direct appropriations; food commodities; and other financial assistance.

2.6 Governmental Assets (050206)

SFFAS 1 states that governmental assets reportable by a Federal entity include cash, accounts and interest receivable from non-Federal entities, and advances and prepayments made to non-Federal entities.
2.7 Governmental Liabilities (050207)

SFFAS 1 stipulates that governmental liabilities include accounts and interest payable to non-Federal entities, other liabilities due to non-Federal entities, and advances and prepayments received from non-Federal entities.

2.8 Grant Agreement (050208)

The FASAB Handbook, Appendix E provides this definition as taken from 31 U.S.C. § 6304. An executive agency must use a grant agreement as the legal instrument reflecting a relationship between the U.S. Government and a State, a local government, or other recipient when the principal purpose of the relationship is to transfer a thing of value to the State or local government or other recipient to carry out a public purpose of support or stimulation authorized by a law of the U.S. instead of acquiring (by purchase, lease, or barter) property or services for the direct benefit or use of the U.S. Government. The “Glossary” chapter defines Grants as assistance awards for which no substantial involvement is anticipated between DoD and the recipient during performance of the contemplated activity.

2.9 Imprest Fund (050209)

According to FAR Part 13.001 “Definitions,” imprest fund means a cash fund of a fixed amount established by an advance of funds, without charge to an appropriation, from an agency finance or disbursing officer to a duly appointed cashier, for disbursement as needed from time to time in making payment in cash for relatively small amounts. In addition, the Defense Federal Acquisition Regulation Supplement, (DFARS) subpart 213.305 “Imprest funds and third party drafts,” provides for use of imprest funds on a very limited basis by installation commanders and commanders of other activities with contracting authority.

2.10 Intragovernmental Assets (050210)

SFFAS 1 categorizes intragovernmental assets as inclusive of an entity’s fund balance with Treasury, investments in Treasury securities, accounts and interest receivable from Federal entities, and advances and prepayments to Federal entities.

2.11 Intragovernmental Liabilities (050211)

SFFAS 1 stipulates that intragovernmental liabilities include accounts and interest payable to Federal entities and other current liabilities due to Federal entities, such as receipt of Federal advances and prepayments.

2.12 Letters of Credit (050212)

FAR subpart 32.406 requires that an agency must use a letter of credit to provide advance payments to contractors unless the agency has obtained a waiver from the Treasury Department. The requirement is that the agency expects to have a continuing relationship with each contractor
for a year or more, with advances of at least $120,000 a year and if not then, the advance must be by direct Treasury check.

2.13 Prepayments (050213)

SFFAS 1 categorizes prepayments as payments made by a Federal entity to cover certain periodic expenses before those expenses are incurred. Progress payments made to a contractor based on a percentage of completion of the contract are not prepayments. Prepayments apply when it is a generally accepted industry practice to pay for items such as rents, subscriptions, and maintenance agreements in advance of the service being provided and the prepayment is authorized by law. When expenses are prepaid, DoD Components must record the prepayment when it is made. At the end of each quarter and at fiscal year-end, prepayments must be reviewed and the expired portion expensed. Prepayments differ from advances in that prepayments relate to transactions that are recurrent in nature and do not provide financing as a precondition of performance.

2.14 Simplified Acquisition Threshold (050214)

41 U.S.C. § 134 “Simplified acquisition threshold” stipulates that this means $250,000. FAR Subchapter A, subpart 2.1 increases the threshold to $300,000, $750,000 and $1.5 million for the acquisition of supplies or services to support: a contingency operation; an emergency or major disaster response; a humanitarian or peacekeeping operation; an operation to facilitate defense against or recovery from a cyber, nuclear, biological, chemical, or radiological attack; or a request from the Secretary of State or the Administrator of the U.S. Agency for International Development to provide international disaster assistance. Refer to FAR Subchapter A, subpart 2.1 for details.

3.0 ACCOUNTING FOR ADVANCES AND PREPAYMENTS (0503)

*3.1 Accounting Policy (050301)

3.1.1. Refer to the DoD USSGL Chart of Accounts and Transaction Library for the most current general ledger account numbers, definitions and required journal entries.

3.1.2. Advances and prepayments must comply with requirements authorized by applicable law or regulations. Organizations or individuals (other than DoD employees requesting travel advances) requesting advances must demonstrate that all external financing sources have been exhausted before an advance is authorized. When the conditions under which an advance was made are satisfied, the unused portions of the advance must be collected immediately and returned to the appropriation from which originally made.

3.1.3. Accounting activities must verify all contract line items are properly accounted for and segregated into separate line items between capitalized assets and expenses. The Certifying Officer must consult the Requiring Activity (buyer or program office) when the related purchase request does not include sufficient information to ensure proper segregation between capital and expense items. Refer to the Under Secretary of Defense (Comptroller), Deputy Chief Financial Officer memorandum, “Ensuring Proper Line Item Structure to Support Asset Valuation” dated
March 24, 2020. Advances and prepayments paid out are recorded as assets. Advances and prepayments received are recorded as liabilities. In the financial statements, advances and prepayments paid out should not be recorded as elimination entries for advances and prepayments received. Advances and prepayments are liquidated and either an expense or capitalized asset is recorded when goods or services are received, contract terms are met, or prepaid expenses expire.

3.1.4. Receivables arise from claims to cash or other assets against another entity. At the time revenue is recognized and payment has not been received in advance, a receivable must be established. Receivables include, but are not limited to, monies due for the sale of goods and services and monies due for indebtedness. Examples of indebtedness to the DoD include overdue travel advances, overpayments, and any other event resulting in a determination that a debt is owed to the DoD. Refer to Chapter 3 for further guidance.

3.1.5. SFFAS 1 categorizes advances and prepayments made to Federal entities as intragovernmental actions. Account for and report these separately from those made to non-Federal entities.

3.1.6. SFFAS 1 provides for Federal entities to receive advances and prepayments from other entities for goods to be delivered or services to be performed. Before revenues are earned, the current portion of the advances and prepayments should be recorded as other current liabilities. After the revenue is earned (goods or services are delivered, or performance progress is made), the entity should record the appropriate amount as a revenue or financing source and should reduce the liability accordingly. Other current liabilities due to Federal entities are intragovernmental liabilities that should be reported separately from those due to employees and the public.

3.1.7. A quarterly review of dormant accounts (DAR-Q) is required by Volume 3, Chapter 8. This requirement replaces the former Triannual Review and is effective for all DoD Components beginning Quarter 1, Fiscal Year 2020. This quarterly review is an important part of exercising sound internal controls in order to increase each Component’s ability to use available appropriations before they expire and ensure remaining open obligations are valid and liquidated before the cancellation of the appropriation. This will enable increased mission readiness for the Department.

*3.2   Recoveries and Adjustments (050302)

DoD Components must ensure that sound internal controls exist to monitor the use of advances and prepayments made. Unneeded and unused balances must be recovered as soon as information indicates they are excess to the purposes for which originally made. Recoveries of unused advances and prepayments received the same year as the original obligation are recorded as recoupments. Recoveries of unused advances and prepayments related to prior-year obligations are designated as collections rather than a reduction of disbursements. Use the SFIS web page given at 050103.I for a decomposition of DoD USSGL accounting transactions for recoveries and adjustments.
*3.3 Contract Financing Payments (050303)

3.3.1. According to FAR 32.001, contract financing payments are authorized Government disbursements of monies to a contractor prior to the acceptance of supplies or services by the Government. It stipulates that contract financing payments include advance payments, performance-based payments, commercial advance and interim payments, progress payments based on cost, progress payments based on a percentage or stage of completion; and interim payments under a cost reimbursement contract. It underscores that contract financing payments do not include invoice payments, payments for partial deliveries, or lease and rental payments. Contract financing payments are more fully discussed in Volume 10.

3.3.2. Contract financing payments authorized in FAR 32 includes advance payments for both commercial item purchase financing and non-commercial item purchase financing based on the statutory authority provided in 10 U.S.C. § 2307.

3.3.2.1. Commercial advance payments may be made providing:

3.3.2.1.1. the contract item financed is a commercial supply or service;

3.3.2.1.2. the contract price exceeds the simplified acquisition threshold (see 050214);

3.3.2.1.3. the contracting officer determines that it is appropriate or customary in the commercial marketplace to make financing payments for the item;

3.3.2.1.4. authorizing this form of contract financing is in the best interest of the Government;

3.3.2.1.5. adequate security is obtained (the value of the security must be at least equal to the maximum unliquidated amount of contract financing payments to be made to the contractor);

3.3.2.1.6. prior to any performance of work under the contract, the aggregate of commercial advance payments must not exceed 15 percent of the contract price;

3.3.2.1.7. the contract is awarded on the basis of competitive procedures or, if only one offer is solicited, adequate consideration is obtained (based on the time value of the additional financing to be provided) if the financing is expected to be substantially more advantageous to the offeror than the offeror’s normal method of customer financing; and

3.3.2.1.8. the contracting officer obtains concurrence from the payment office concerning liquidation provisions when required.

3.3.2.2. Make non-Commercial advance payments only when the advance payments will not exceed the contractor’s interim cash needs. This determination must be based on three initial criteria. An analysis of the cash flow required for contract performance,
consideration of the reimbursement or other payment cycle, and to the extent possible, use of the contractor’s own working capital. Other considerations require that the advance payments are necessary to supplement other funds or credit available to a contractor, the recipient is considered a responsible contractor and, the Department will benefit from performance prospects, or there are other practical advantages.

3.2.3. An advance payment pool agreement is a means of financing the performance of more than one contract held by a single contractor. Refer to Volume 5, Chapter 9 for further guidance.

3.4 Grant Awards and Cooperative Agreements (050304)

Advance payments to award recipients (including amounts drawn against letters of credit) must be accounted for as advances of the assisting DoD Component until the recipient has performed under the grant or agreement. Once the recipient has performed under the grant or agreement, the assisting agency must record an expense in an amount equal to the cost of the services performed or costs incurred and reduce the advance account by a like amount. Periodically, the advances must be reconciled with the supporting transaction documentation as part of the quarterly review process as outlined in 0503. In addition, each advance must be reviewed periodically to determine whether amounts are in excess of the grantee’s current needs. Amounts determined to be in excess must be collected from the recipient. The timing of the review should be coordinated with DoD grantors so that the review occurs as each grant milestone or reporting requirement is reached. Sources for entries include grant agreements, disbursement vouchers, collection vouchers and reports on grant performance. Payment provisions for grants and other instruments of assistance are more fully discussed in Volume 10, Chapter 19 and Volume 12, Chapter 5.

*3.5 Advances to Foreign Countries (050305)

Advances to foreign countries are authorized by 10 U.S.C. § 2396, which authorizes the use of DoD appropriations - to comply with the laws and ministerial regulations of a foreign country; to pay rent for periods of time determined by local custom, tuition, and public service utilities; and to a friendly foreign country’s disbursing official or its armed force members, for their pay and allowances, and for necessary supplies and services. These advances must be assigned to the appropriate SFIS element (country code) found on the SFIS web page under the SFIS Values Library Service sub category and recorded in the related DoD Component subsidiary ledger account.

*3.6 Advances for Military Pay (050306)

Details concerning advances to military members for pay are included in Volume 7A. This includes basic allowance for subsistence and housing; overseas station allowances; family separation allowance; and clothing and uniform allowances. Pay advances to military members must only be to ease hardships imposed by the lack of regular payments - when a member is mobilized; ordered to duty at a distant station; or deployed aboard ship for more than 30 days.
*3.7 Advances for Civilian Pay (050307)

Details concerning advances to civilian personnel for pay are included in Volume 8. This includes foreign post assignment advances, advance payments to evacuees, advances in pay for newly hired employees and advances in pay for employees relocating within the U.S. or its territories.

*3.8 Advances as Imprest Funds (050308)

SFFAS 1, paragraph 28, defines entity cash as the amount of cash that the reporting entity holds and is authorized by law to spend. Imprest Funds are cash advances against a specific Line of Accounting (LOA) from the Disbursing Officer to an appointed cashier. As advances, these funds are a form of “Cash Held Outside of Treasury” but because an entity LOA is cited as the basis of the Imprest Fund, the advance is considered “entity cash.” Refer to Chapter 2 for further guidance.

*3.9 Travel Advances (050309)

A Commander or Supervisor approved travel order must be issued before travel is performed unless an urgent or unusual situation prevents prior issuance. Cash travel advances must not be authorized unless an exception is granted. Record the maximum advance amount authorized on the travel order.

3.9.1. The standard practice is for the traveler to use an assigned Government Travel Charge Card (GTCC) to obtain cash from an automated teller machine (ATM). The traveler must only use ATM cash for expenses that cannot be charged to the GTCC, and must not exceed the limit specified in the travel order. Personnel who are not eligible for a GTCC may obtain travel advances only via electronic funds transfer. The Commander or Supervisor, in coordination with the Disbursing Officer, may authorize cash advances in limited situations where no other process is available to accomplish the mission.

3.9.2. A traveler must submit a travel claim voucher within five working days of return. The responsible settlement office that accounts for funds against which the advance is charged is responsible for settlement or collection action in accordance with the applicable Component’s accounting or disbursing regulation. Refer to Volume 9, Chapter 5 for further guidance.

3.9.3. Travel advances are also permitted when criteria are met for the following:

3.9.3.1. Transportation documents or funds are lost or stolen.

3.9.3.2. Temporary lodging expense in connection with a Permanent Change of Station to a Permanent Duty Station.

3.9.3.3. House hunting trip expenses if offered and chosen under the Lodging Plus method.
3.9.3.4. Temporary quarters subsistence expense up to 30 days.

3.9.3.5. Mobile home transportation allowances.

3.9.3.6. Evacuation travel and transportation allowances under an evacuation authority.

3.9.3.7. Dislocation Allowance paid to a Service member’s designated dependent in moving a household.

3.9.4. Refer to the Joint Travel Regulations (JTR) sections 050402, 050602, 054007, 054207, 054407 and 060105 for details.

3.10 Defense Working Capital Fund (DWCF) (050310)

DWCF entities are required to record advances and prepayments in accordance with the guidance in this chapter. Refer to Volume 3, Chapter 19 for further guidance.

3.11 Inventory Bid Deposits (050311)

Record bid deposits received on inventory available for sale as advances. The advance account is relieved in two instances. Sales proceeds are recorded when the inventory has been delivered to successful buyers. The bid deposit is refunded and the sale canceled. Refer to Chapter 4, paragraph 040805 for further guidance.

6.0 OTHER ASSETS ...................................................................................................... 17
1.0 GENERAL

1.1 Purpose

This chapter prescribes the accounting requirements for recording transactions for investments in Treasury securities. These requirements are consistent with the accounting and reporting for federal and nonfederal securities, and are consistent with the implementation of general accounting policy for assets that is prescribed in Volume 4, Chapter 1. Other assets are those assets not used directly in performing the Department of Defense (DoD) mission. These assets consist of securities held in various trust funds, assets acquired through means other than appropriations, and assets awaiting disposal.

1.2 Authoritative Guidance

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provision of:

1.2.2. FASAB Statement of Federal Financial Accounting Standards (SFFAS) 1, “Accounting for Selected Assets and Liabilities.”

1.2.3. FASAB SFFAS 3, “Accounting for Inventory and Related Property.”

1.2.4. FASAB SFFAS 7, “Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting.”

1.2.5. FASAB SFFAS 27, “Identifying and Reporting Funds from Dedicated Collections.”

1.2.6. FASAB SFFAS 49, “Public-Private Partnerships: Disclosure Requirements.”

1.2.7. FASAB SFFAS 47, “Reporting Entity.”

1.2.8. Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 323 “Investments Equity Method and Joint Ventures.”

1.2.12. *10 U.S.C § 2875*, “Investments.”

1.2.13. *TFM Part 2 Chapter 4300*, “Reporting Instructions For Accounts Invested in Department of Treasury Securities.”

2.0 ACCOUNTING POLICY FOR INVESTMENTS AND OTHER ASSETS

2.1 Account References

DoD investments and other assets must be recognized and recorded as prescribed in SFFAS 1. Accounting events recognized under SFFAS 1 must be reported according to the requirements in TFM Chapter 4300, and OMB Circular A-136 using the accounting entries specified in the DoD Standard Chart of Accounts and Standard Financial Information Structure *(SFIS)* Transaction Library, unless otherwise stated. Financial record retention requirements are in Volume 1, Chapter 9, and in accordance with the National Archives and Records Administration.

3.0 INVESTMENTS IN FEDERAL SECURITIES

3.1 Investments

DoD is authorized to invest in Federal securities, which include non-marketable par value Treasury securities, market-based Treasury securities, marketable Treasury securities, and securities issued by other Federal entities.

3.2 Nonmarketable Par Value Treasury Securities

Nonmarketable par value Treasury securities are special issue debt securities that the U.S. Treasury issues to federal entities at face value (par value). The securities are redeemed at face value on demand; thus, investing entities recover the full amounts invested. When authorized, the DoD may invest in MERHCF and MRF may invest par value “special issue” Treasury securities.
3.3 Market-Based Treasury Securities Expected to Be Held to Maturity

Market-based Treasury securities expected to be held to maturity are debt securities that the U.S. Treasury issues to federal entities without statutorily determined interest rates. Although the securities are not marketable, their terms (prices and interest rates) mirror the terms of marketable Treasury securities.

*3.4 Market-Based Treasury Securities

Marketable Treasury securities including Treasury bills, notes, and bonds, are initially offered by Treasury to the marketplace and can then be bought and sold on securities exchange markets. Their bid and ask prices are publicly quoted by the marketplace.

3.5 Recognition of Investments in Federal Securities

DoD Components holding investments in Federal securities must report those investments separately from investments in non-Federal securities. Federal securities should be recorded at their acquisition cost.

3.5.1. When an acquisition is made in exchange for nonmonetary assets, the acquired securities should be recognized at the fair market value (FMV) of either the securities acquired, or the assets given up, whichever is more definitively determinable.

3.5.2. When an acquisition cost differs from the face (par) value, the security should be recorded at the acquisition cost, which equals the security’s face value plus or minus the premium or discount on the investment. A discount is the excess of the security’s face amount over its purchase price. A premium is the excess of the purchase price over the security’s face value. The balance in the valuation account is treated as a contra account to the debt security.

3.5.3. Treasury securities subsequent to their acquisition should be carried at their acquisition cost, adjusted for amortization if appropriate, as explained in SFFAS 1.

3.5.4. Investments must be carried on the Balance Sheet at acquisition cost adjusted for amortization of the premium or discount, except in two cases. If either exception is reflected, then market value should be used (except for pension and retirement plans).

3.5.4.1. When there is intent to sell securities prior to maturity or,

3.5.4.2. When there is a reduction in value that is more than temporary.

3.5.5. DoD Components holding such securities must maintain an investment subsidiary ledger that provides the name, type, amount, acquisition date, acquisition cost, yield or interest rate, discount or premium, maturity date, and other applicable information for each investment.
3.6 Disposition of Treasury Securities

3.6.1. DoD Components must maintain a subsidiary account for each trust fund that invests in U.S. Treasury securities.

3.6.2. The disposition of a U.S. Treasury security may result in a gain or loss. A comparison of principal proceeds, the book value of a U.S. Treasury security, and any remaining unamortized premium or discount will determine whether there is a gain or loss.

3.6.3. Quarterly, the “Investments in U.S. Treasury Securities Issued by the Bureau of the Fiscal Service-Non-Marketable Market-Based” account balance must be reconciled with the trust fund portfolios. Such reconciliations must also occur whenever there is a change in trust fund managers or other employees having access to the securities, or when there is a substantial addition, disposition, or replacement in the composition of the portfolio.

3.6.4. Unless otherwise provided for by law, securities held by DoD trust funds are U.S. Treasury securities. The Treasury issues no certificates. Instead, Treasury notifies trust fund managers of portfolio increases or decreases using the “Transaction Confirmation.”

3.6.5. Source documents for entries to the account include U.S. Treasury securities, the “Transaction Confirmation,” collection and disbursement vouchers, amortization schedules, and journal vouchers.

4.0 INTEREST AND AMORTIZATION

4.1. Interest and Amortization Recognition

4.1.2. The disposition of a U.S. Treasury security may result in a premium or discount. If an amount of premium or discount exists, the carrying amount, or original purchase cost, of the investments must be adjusted in each reporting period to reflect the amortization of the premium or the discount.

4.1.3. Premiums and discounts must be amortized over the life of the Treasury security using the interest method. Under the interest method, the effective interest rate (the actual interest yield on amounts invested) multiplied by the carrying amount of the Treasury security at the start of the accounting period equals the interest income recognized during the period (the carrying amount changes each period by the amount of the amortized discount or premium).
4.1.4. The amount of amortization of discount or premium is the difference between the effective interest recognized for the period and the nominal interest for the period as stipulated in the Treasury security.

4.1.5. Use Accounts 161100.0400 and 161200.0400 to record the unamortized discount or premium on U.S. Treasury securities issued by the Bureau of the Fiscal Service. Use Accounts 161300.0500 and 161300.0600 to record the amortization of discount or premium on U.S. Treasury securities issued by the Bureau of the Fiscal Service. Use separate accounts to record the accounting events related to U.S. Treasury securities. For example, discounts on U.S. Treasury securities should be recorded separately from premiums on U.S. Treasury securities. The amortization of the related securities must be accounted for in distinct accounts.

4.1.6. A subsidiary account for unamortized premiums or discounts must be maintained for each trust fund for determining the gain or loss on the disposition of securities held by each trust fund. This information also is needed for reporting on the financial status of each trust fund.

4.1.7. The income derived from U.S. Treasury securities other than Treasury bills must be the interest stated on the face of the securities adjusted for the amortized premium or discount. For Treasury bills, the difference between the purchase price and the price received at the time of sale or maturity is income.

4.1.8. Under the interest method of amortization, an amount of interest equal to the carrying amount of the investment times the effective interest rate, is calculated for each accounting period.

4.1.8.1. The calculated interest is the effective interest of the investment (referred to as effective yield in some literature). The amount of effective interest is compared with the stated interest of the investment. The stated interest is the interest that is payable to the investor according to the stated interest rate.

4.1.8.2. The difference between the effective interest and the stated interest is the amount by which the discount or the premium should be amortized (i.e., reduced) for the accounting period.

4.1.8.3. The discounted bonds example in Table 7-1 displays the amortization of a discount. Treasury bonds with the face amount of $100,000, purchased by a federal entity on the bonds’ issuance date, January 1, 2020. The bonds’ stated interest rate is 7 percent, and interest is payable at the end of each year. The bonds will mature in 5 years, on December 31, 2024. The cost of the investment is $96,007, with a discount of $3,993, which reflects an effective interest rate of 8 percent. In Table 7-1, the annual discount amortization is in column 4, which equals column 3 minus column 2.

4.1.9. The premium bonds example in Table 7-2 displays the amortization of premium Treasury bonds with the face amount of $100,000, purchased by a federal entity on the bonds’ issuance date January 1, 2020. The bonds’ stated interest rate is 7 percent, and interest is payable at the end of each year. The bonds will mature in 5 years, on December 31, 2024. The cost of the investment is $104,212, with a premium of $4,212, which reflects an effective interest rate of 6 percent. In Table 7-2, the annual premium amortization equals the “Stated Interest 7%” less the “Effective Interest 6%.”

4.1.10. Source documents for entries to this account must include amortization schedules and journal vouchers.

5.0 OTHER INVESTMENTS

*5.1 Use of Other Investments

5.1.1. When authorized, an investment under the provisions of 10 U.S.C § 2875, may take the form of an acquisition of a limited partnership interest, a purchase of stock or other equity instruments, a purchase of bonds or other debt instruments, or any combination of such forms of investment.
5.1.2. Other investments by the DoD currently authorized include joint ventures with private developers constructing or improving military housing on behalf of the Department under the authority of the Military Housing Privatization Initiative (MHPI), authorized by DoD’s “Alternative Authority for Acquisition and Improvement of Military Housing,” in Subchapter IV, Chapter 169, of Title 10, United States Code, at (10 U.S.C § 2875). These joint ventures are designed as Public-Private Partnerships (P3s), also referred to as Alternative Financing Arrangements, or Privatization Initiatives, which are defined as "risk-sharing arrangements,” or transactions lasting more than five years between public and private sector entities.

5.2 Reporting Other Investments

5.2.1. P3s may involve the use of appropriated funds, non-appropriated funds, third party financing, or significant amounts of private capital or investment. All business events related to the financing of MHPI must be reported in the DoD financial statements, including relevant disclosures to help the user understand the financial condition of the projects.

5.2.2. Use Account 169000.0900 (Other Investments) to record the value of non-marketable market-based investments owned by DoD. Use Account 169000.0700 (Other Investments-MHPI-Limited Partnership) to record DoD investments with Limited Partnerships (LPs), and Limited Liability Companies (LLCs) under the MHPI, authorized by 10 U.S.C. § 2875.

5.3 Recognition and Measurement of Other Investments

5.3.1. In recognition of the complex and diverse nature and characteristics of the MHPI agreements and P3s, and to determine the appropriate accounting treatment for MHPIs, a comprehensive evaluation of each operating agreement and a full assessment of the relationship with each organization should be reviewed and analyzed in consultation with the Military Department’s independent public accountant (IPA).

5.3.2. SFFAS 47 provides guidance for determining the considerations to properly report these complex organizational relationships as consolidation entities, or disclosure entities, and what information should be presented. When the federal government (directly or through its components) holds a majority ownership interest in an organization, it should be included as either a consolidation entity or a disclosure entity in the government-wide financial statements.

5.3.2.1. Majority ownership interest exists with over 50 percent of the voting rights or net residual assets of an organization. If an entity is expected to assume more than 50 percent of another entity’s expected losses or gains, it should either consolidate or disclose that entity- as provided in SFFAS 47.

5.3.2.2. An entity could effectively control another entity by making all of the investment decisions and obtaining a considerable portion of the economic benefits, but would not have been required to consolidate that investee if it was exposed to less than 50 percent of the investee’s expected losses or gains. These such entities would generally be considered for disclosure rather than consolidation.
5.3.3. It is the Military Department’s responsibility to monitor and properly report the financial condition and disclose significant risks of each of its equity investments in MHPI entities. Documentation should be furnished to the Defense Finance and Accounting Service (DFAS) based on DFAS’ annual financial schedule and quarterly financial guidance for additional information including cut-off periods. Note that financial statement reporting should be based on the latest financial information for each Limited Liability Corporation (LLC) or Limited Partner (LP), which may not be consistent with the reporting periods for DoD’s financial statement reporting.

5.3.3.1. Consolidation considerations and requirements are as follows:

5.3.3.1.1. Per SFFAS 47, an organization is considered a consolidation entity if, based on an assessment of the following characteristics as a whole, the entity is: (1) financed by taxes or other non-exchange revenue, (2) governed by the Congress and/or the President, (3) imposing or may impose risks and rewards to the federal government and (4) providing goods and services on a non-market basis. Goods and services are provided on a non-market basis when they are provided free of charge or at charges that bear little relationship to the cost of providing such goods or services.

5.3.3.1.2. Note, however, not all characteristics are required to be met or to be met to the same degree; classification is based on the assessment as a whole. Each entity should be assessed individually and objectively, to properly examine all of the potential differences among the entities.

5.3.3.1.3. Consolidation entities are considered federal reporting entities, and as such, should apply Generally Accepted Accounting Principles (GAAP) as defined in SFFAS 34, “The Hierarchy of Generally Accepted Accounting Principles, Including the Application of Standards Issued by the Financial Accounting Standards Board.”

5.3.3.2.Disclosure considerations and requirements are as follows:

5.3.3.2.1. Once SFFAS 47 guidelines have been considered, disclosures for MHPI projects should be evaluated under the established principles of SFFAS 49, “Public-Private Partnerships: Disclosure Requirements,” and should be provided for the initial period and all annual periods thereafter where an entity is party to a P3 arrangement/transaction. Disclosure requirements are comprised of quantitative and qualitative information to assist users in understanding the nature of P3s and direct loans and loan guarantees, to include related risks, even those deemed remote. The OMB Circular A-11, Section 185, Federal Credit, and OMB Circular A-136, Section II.3.8.8 (Note 8, Loans Receivable, Net and Loan Guarantee Liabilities), specify disclosure requirements for government direct loans and loan guarantees. OMB Circular A-136, Section II.3.8.33 (Note 3, Public-Private Partnerships) specifies disclosure requirements for P3s. DoD’s investments in LLCs for MHPIs meet the Circular’s P3 disclosure requirements.
5.3.3.2.2. The disclosures should reveal the nature of the relationship to the reporting entity, relevant activity during the reporting period, and the reporting entity’s future exposures to risks and rewards resulting from the relationship. Disclosure entities may provide the same or similar goods and services that consolidation entities do, but are more likely to provide them on a market basis. Goods and services are provided on a market basis when prices are based on the prices charged in a competitive marketplace between willing buyers and sellers.

5.3.3.2.3. While the hierarchy of GAAP established for federal reporting entities may not necessarily apply to disclosure entities; information about such organizations is still needed for accountability purposes and to meet federal financial reporting objectives. The information should be disclosed as specified in SFFAS 49, paragraph 24:

5.3.3.2.4. The DoD, and the Military Departments must continue to disclose their respective relationships with the P3 private entities, disclose the risks inherent in the P3 arrangements, and the DoD will recognize any gains or losses associated with TI-97 contributions to the private entity.

5.3.3.3. The Military Departments and DFAS must use established accounting transaction codes in the DoD Transaction Library to record the primary accounting entries to recognize P3 contributions and any collections received upon dissolution of an arrangement that are not available for use without further Congressional action. See Tables 7-3 through 7-8. Additionally, the Military Department must obtain the agreements and supporting documentation for its equity investments in LPs/LLCs managing MHPI to support the following business events:

5.3.3.3.1. LP/LLC Operating Agreement: governing document that contains the agreements set forth by the parties including the contributed cash and/or property balances, and percent government ownership in the LP/LLC.

5.3.3.3.2. Lockbox Agreement: addresses the flow of funds and order of priority for the project. The agreement is unique to each MHPI project.

5.3.3.3.3. Revenue Agreement: containing the priority for the flow of funds from the Revenue Account, and supporting documentation for understanding the flow of funds from the Revenue Account to the Construction Escrow Account prior to the completion of the Initial Development Period (IDP) and the percentage distribution to the Reinvestment Account and Owner after completion of the IDP.

5.3.3.3.4. Dissolution of the investment at a gain or loss, property conveys back to DoD. The dissolution agreement and supporting information is to allow DFAS to account for the government’s gain or loss upon termination of the LP/LLC agreement. The conveyed property must be valued at its FMV, or other GAAP compliant valuation methodology, at that point of dissolution.

5.3.3.3.5. Sale of government share of the LP/LLC, and
5.3.3.3.6. Any other accounting transactions related to financial activities to DoD equity investments of this nature. The Military Departments must provide DFAS any other transaction with a financial impact that is not listed in Tables 7-3 through 7-8, and footnote disclosures required, such as the equity method income or loss and description of events of termination or default, and the associated documentation supporting the Military Department’s determination for the disclosure.

5.3.3.4. In addition to the transfer of property and cash, a ground lease may be provided to permit access to, and use of the transferred property and/or cash, to develop property consistent with the goals of the LP/LLC. Amounts received in exchange for the ground leases are revenue and the guidance for recording the revenue can be found in Chapter 16: Revenue, Other Financing Sources, Gains, and Losses. No other accounting entries are appropriate.

5.3.3.4.1. Ground leases executed in conjunction with creation of an LP/LLC do not constitute separately identifiable arrangements despite being executed through a separate agreement. Such separate agreements generally acknowledge that, in addition to a nominal rent (such as $1 for the duration of the ground lease), the LP/LLC’s commitment to construct and lease military housing is a material inducement to the Military Department to enter into the ground lease. Further, success of the overall investment is dependent upon the ground lease, meaning the ground lease and the transfer of property to the LP/LLC are highly interdependent. Because the ground lease and the transferred property are highly interdependent and not distinct goods and services, the ground lease should be considered part of the initial investment made when property is transferred. FASB ASC 606-10-25-19 through 22, “Revenue from Contracts with Customers,” provides guidance for identifying distinct goods and services. The transfer of property and the ground lease are not distinct, separately identifiable arrangements.

5.3.3.4.2. Estimation of the FMV of the property should take into consideration relevant characteristics of the property including the related ground lease granting access to and use of the property. Therefore, no separate entries are required to recognize the ground lease. Instead, the FMV of the ground lease is integral to the FMV of the property.

5.3.3.5. See Volume 12, Chapter 4, “Direct Loans and Loan Guarantees,” for additional guidance on the recognition and measurement of direct loans, the liability associated with loan guarantees, and the cost of direct loans and loan guarantees.

CHAPTER 8

FINANCIAL CONTROL OF LIABILITIES

1.0 GENERAL

1.1 Overview

A liability is defined as a probable future outflow or other sacrifice of resources as a result of past transactions or events. For instance, a liability is an amount the Department of Defense (DoD) owes to another federal or nonfederal entity for items or services that DoD received and expenses incurred (including personnel related costs). Liabilities can also result from assets to which title has been acquired (whether delivered or in transit), ongoing shipbuilding based on incurred costs, and cash received but not yet earned. Liabilities can also result from amounts owed under grants, military and civilian pensions, certain retirement and post-employment benefits, awards, and other indebtedness. Criteria for recognizing these liabilities (e.g., transaction based events or other than transaction based events) are outlined in paragraph 2.1 and depicted in Figure 8-1.

1.2 Purpose

This chapter promulgates the general accounting policy and definitions to be followed in accounting for DoD liabilities covered in Volume 4. This guidance does not apply to liabilities accounted for by Nonappropriated Fund activities, which is located in Volume 13, Chapter 3.

1.3 Authoritative Guidance

The financial management policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.2. FASAB SFFAS 5, “Accounting for Liabilities of the Federal Government”;

1.3.3. Office of Management and Budget (OMB) Circular A-136, “Financial Reporting Requirements.”; and

*1.3.4. The required DoD U.S. Standard General Ledger (USSGL) proprietary and budgetary accounting entries and transaction illustrations are provided in the Transaction Library and Standard Reporting Chart of Accounts which is available on the Office of the Deputy Chief Financial Officer Standard Financial Information Structure (SFIS) web page.
2.0 ACCOUNTING POLICY FOR LIABILITIES

2.1 Recognition Criteria

Pursuant to SFFAS 5, criteria for recognizing a liability, depicted in Figure 8-1, starts by identifying if the event creating the liability is transaction based or other than transaction based.

2.1.1. Transaction Based Events. Transaction based events comprise both exchange and nonexchange transactions. Transaction based events are recognized in accordance with the following criteria:

2.1.1.1. A liability for an exchange transaction is recognized (recorded and reported) when the DoD receives goods and services in exchange for a promise to provide money or other resources in the future. Probable and measurable amounts that remain unpaid as of the financial statement report date should be recognized as liabilities.

2.1.1.2. A liability for a nonexchange transaction is recognized for any probable and measurable unpaid amounts as of the financial statement report date.

2.1.1.3. The entity must estimate the liability for the financial statement reporting date if the actual amount is unknown.

2.1.2. Other Than Transaction Based Events. Other than transaction based events comprise both government-related events and government-acknowledged events. These events are recognized in accordance with the following criteria:

2.1.2.1. A liability for a government-related event is recognized at the time of occurrence, if the expected resource outflow is both probable and measurable, or soon thereafter as it becomes probable and measurable.

2.1.2.2. A liability for government-acknowledged events is recognized only when Congress appropriates or authorizes the funds for the event and an exchange or nonexchange transaction related to the event is entering into. The liability is then recognized by following the criteria in subparagraph 2.1.1 for exchange and nonexchange transactions.

2.1.3. Other Considerations

2.1.3.1. With the exception of government-acknowledged events, the recognition of a liability is not dependent on the availability of funds. Liabilities must be recognized when they are incurred regardless of whether they are covered by available budgetary resources, including liabilities related to canceled appropriations. However, the status of funding does dictate the category of the recognized liabilities used for disclosure and reconciliation purposes as outlined in paragraph 2.2.

2.1.3.2. Accounting and reporting provisions need not be applied to immaterial liabilities. However, all assertions of immateriality must be supportable, and the materiality
determination must be fully documented. Both qualitative and quantitative factors need to be considered in determining materiality.

2.1.3.3. Contingent liabilities are recorded and reported as a liability or disclosed as a contingency in a footnote to the financial statements, depending on the probability of occurrence and the ability to estimate the expected outflow of resources. Contingent liabilities should be recorded in DoD financial systems and reported in financial statements in accordance with Chapter 12.

2.2 Reporting and Disclosures

2.2.1. Pursuant to SFFAS 1, Intragovernmental liabilities must be reported separately from nonfederal entities, which include Government sponsored enterprises and the Federal Reserve. See Volume 6B, Chapter 4 for further discussion on reporting.

2.2.2. In accordance with OMB Circular A-136, liabilities are classified as liabilities covered by budgetary resources, liabilities not covered by budgetary resources, and liabilities not requiring budgetary resources. Disclosures must be made for liabilities that are not covered by budgetary resources. See Volume 6B, Chapter 10 for further discussion on disclosures.

3.0 DEFINITIONS

3.1 Contingency

Pursuant to SFFAS 5, a contingency is an existing condition, situation, or set of circumstances involving uncertainty as to possible gain or loss to an entity that will ultimately be resolved when one or more future events occur or fail to occur.

3.2 Liabilities Covered by Budgetary Resources

Liabilities covered by budgetary resources are liabilities incurred which are covered by realized budgetary resources as of the balance sheet date. Liabilities are covered by budgetary resources if they are to be funded by permanent indefinite appropriations, provided that the resources may be apportioned by OMB with further action by Congress, and without a contingency having to be met first.

3.3 Current Liability

A current liability is an amount owed by an entity for which the financial statements are prepared, and for which the entity expects to outlay the resources within one year of the reporting date.
3.4 Exchange Transactions

An exchange transaction arises when each party involved in the transaction sacrifices value and receives value in return. In an exchange transaction, a liability is recognized when one party receives goods or services in return for a promise to provide money or other resources in the future.

3.5 Funded Liabilities

Funded liabilities are comprised of all liabilities for which budget authority has been received and obligated.

*3.6 Government-Acknowledged Events

A government-acknowledged event is a type of an other than transaction based event that is of financial consequence to the Federal Government because the Federal Government has chosen formally to accept the associated financial responsibility. An example would be the assumption of responsibility for damage caused by a natural disaster (such as tornado damage for which Congress appropriates funds).

3.7 Governmental Liability

A governmental liability is an amount owed by a federal entity to a nonfederal entity. These liabilities are also called nonfederal or public liabilities.

3.8 Government-Related Events

A government-related event is a type of an other than transaction based event that involves interaction between the Federal Government and its environment. An example is an expense to be paid as the result of current government operations, such as the estimated cost of repairing accidental damages to private property. Government-related events resulting in a liability should be recognized in the period the event occurs if the future outflow or other sacrifice of resources is probable and the liability can be measured, or as soon thereafter as it becomes probable and measurable.

3.9 Intragovernmental Liability

An intragovernmental liability is an amount owed by a federal entity to another federal entity. Intragovernmental liabilities include accounts and interest payable to federal entities and other current liabilities due to federal entities, such as receipt of federal advances and prepayments.

*3.10 Liabilities Not Covered By Budgetary Resources

Liabilities not covered by budgetary resources are those liabilities for which budget authority has not been received, i.e., funds necessary to satisfy the liabilities have not been made available through congressional action.
3.11 Liability

A liability for federal accounting purposes is a probable future outflow or other sacrifice of resources as a result of past transactions or events. Liabilities must be recognized when they are incurred regardless of whether they are covered by available budgetary resources, including liabilities related to canceled appropriations.

3.12 Materiality

Materiality is the magnitude of an item's omission or misstatement in a financial statement that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the inclusion or correction of the item.

3.13 Measurable

A liability is measurable if it has a relevant attribute that can be quantified in monetary units with sufficient reliability to be reasonably estimable.

3.14 Noncurrent Liability

A noncurrent liability is an amount owed by an entity for which the financial statements are prepared, and for which the entity expects to outlay the resources beyond one year of the reporting date.

3.15 Nonexchange Transactions

A nonexchange transaction is one in which the DoD promises to provide money or other resources in the future without a promise of receiving direct value in return. An example would be grant payments to state and local governments to carry out a public purpose, when authorized by a law of the United States.

3.16 Probable

Probable refers to that which can reasonably be expected or is believed to be more likely than not to occur on the basis of available evidence or logic. In the context of assessing the outcome of matters of pending or threatened litigation and unasserted claims, and recognizing an associated liability, "probable" refers to that which is likely.

3.17 Transaction and Event

A transaction is an event involving the transfer of something of value. An event is a happening that has financial consequences to an entity. An event may be an internal event that occurs within an entity, such as placing an item in service, or an external event that involves interaction between an entity and its environment, such as an act of nature, a theft, vandalism, an injury caused by negligence, or an accident.
3.18 Transaction Recording

The accounting events discussed must be recorded in accordance with the DoD USSGL Transaction Library and reported in accordance with the regulations promulgated by the Department of the Treasury and the Office of Management and Budget.

CHAPTER 9

ACCOUNTS PAYABLE

*1.0 GENERAL (0901)

1.1 Overview (090101)

A liability, for Federal accounting purposes, is a probable future outflow or other sacrifice of resources as a result of past transactions or events. Accounts Payable is one of several liabilities covered by Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standards (SFFAS) 1, SFFAS 5, and Volume 11B, Chapter 9.

1.2 Purpose (090102)

1.2.1. This chapter provides the financial management policy for recording accruals for both intragovernmental and non-federal accounts payable.

1.2.2. The accounts payable policy in this chapter does not address liabilities related to ongoing continuous expenses such as contract holdbacks to be paid after one year of the balance sheet date or employees’ salaries and benefits, both of which are reported as other current liabilities and covered in Volume 4, Chapter 12.

1.3 Authoritative Guidance (090103)

The accounting policy and related requirements prescribed by this chapter are in accordance with the applicable provisions of:

1.3.2. 41 U.S.C. § 7103, “Decision by contracting officer”;

1.3.3. Title 5, Code of Federal Regulations, Section 1315.9 (5 CFR § 1315.9), “Required documentation”;

1.3.4. 48 C.F.R. § 46.501, “General”;

1.3.5. 48 C.F.R. §§ 52.247.29 - 52.247.49, “Solicitation Provisions and Contract Clauses”;

1.3.6. Office of Management and Budget (OMB) Circular A-123, Appendix C, “Requirements for Payment Integrity Improvements”;

1.3.7. OMB Circular A-136, “Financial Reporting Requirements”;

1.3.8. FASAB SFFAS 1, “Accounting for Selected Assets and Liabilities”;

9-3
1.3.9. FASAB SFFAS 5, “Accounting for Liabilities of the Federal Government”;

1.3.11. TFM United States Standard General Ledger (USSGL); and

*2.0 ACCOUNTING POLICY (0902)

2.1 Accounts Payable (090201)

Accounts payable are liabilities owed by the DoD for goods and services received from, progress in contract performance made by, and rents due to other entities.

2.2 Accounts Payable Recognition – General (090202)

2.2.1. When DoD Components accept title to goods, whether the goods are delivered or in-transit, the Component must recognize a liability for the unpaid amount of the goods. If invoices for those goods are not available when financial statements are prepared, the amounts owed must be estimated.

2.2.2. When a contractor provides a DoD Component with goods that are also suitable for sale to others, the accounts payable generally arises when the contractor physically delivers the goods and the Component receives them and takes formal title.

2.2.3. When a contractor builds or manufactures facilities or equipment to a DoD Component’s specifications, formal acceptance of the products by that Component is not the determining factor for accounting recognition. For facilities or equipment constructed or manufactured by contractors or grantees according to agreements or contract specifications, amounts recorded as payable should be based on an estimate of work completed under the contract or the agreement. The estimate of such amounts must be based primarily on the Component’s engineering and management evaluation of actual performance progress and incurred costs.

2.2.4. Amounts recorded as accounts payable must be supportable with appropriate documentation. Documentation includes:

2.2.4.1. Documentation that relates to an obligation,

2.2.4.2. Agreement or transaction with another entity (e.g., a contract, DD Form 448, Military Interdepartmental Purchase Request [MIPR], project order, Reimbursable Work Order [RWO], or, Intra-agency Agreement Form (IAA) General Terms and Condition (GT&C) Section Form 7600A and the Order Requirements and Funding Information (Order) Section Form 7600B), and
2.2.4.3. Documentation that relates to establishment of the amount recognized as payable (e.g., acceptance certificate on an inspection or receiving report form or commercial shipping document/packing list).

2.2.5. DoD Components must accurately record all accounts payable liabilities.

2.2.6. Responsibility for obtaining and maintaining documentation evidencing amounts payable resides with the DoD Component that is the buyer of goods or services, rather than the seller.

2.2.7. Audit evidence of “receipt” must document the item(s) or service(s) and related applicable quantities received, the date the item(s) or the service(s) were received, and contain the authorizing official’s name and authorizing signature or electronic equivalent. DoD Components must ensure the audit evidence includes the calculations used to determine the amount accrued, or the basis used to estimate the amount. The documentation may, for example, include monetary amounts shown on or calculated from a purchase order or contract, historical data, or documented using a contracting officer or technical representative provided value. If audit evidence includes Personally Identifiable Information or sensitive commercial or proprietary information (such as internal labor rates provided to support certain incurred cost vouchers), such information may be redacted or described in aggregate.

2.2.8. DoD Components must develop, implement, and validate internal controls are in place and effectively operating for all intragovernmental and interfund transactions, and for transactions with the public. Components must ensure receipt and acceptance is properly accomplished and documented by authorized personnel. Documentation must be made available within the timeframe prescribed by the auditor when requested during audits.

2.2.9. The timing of the recording of an accounts payable liability for goods is determined by 48 CFR §§ 52.247.29 - 52.247.49. When amounts are not available at the end of an accounting quarter, DoD Components must estimate the accounts payable as identified in paragraph 090203.

2.2.10. If a DoD Component is offered a discount by a vendor, whether stipulated in the contract or offered on an invoice, the Component may take the discount if economically justified at the time of recognizing the accounts payable. Refer to Volume 10, Chapter 2 for further discussion on discount offers and calculations.

2.3 Accounts Payable Recognition – Estimating the Accrual (090203)

2.3.1. When definitive amounts or invoices are not available, but the requirements for recording an accounts payable liability as stated in paragraph 090202 exist, DoD Components must estimate and record an accrual when any of the following conditions identified in subparagraphs 090203.A.1–3 exist. This estimate must be later reversed, and a more definitive amount recorded, when more complete data becomes available (e.g., upon receipt of an invoice or billing) in the normal course of business.
2.3.1.1. Services are performed but the corresponding invoices are not received at period end (e.g., professional service contract).

2.3.1.2. Equipment and facilities are being manufactured or built based on the Government's specifications but the corresponding invoices are not received at period end (e.g., aircraft, or building).

2.3.1.3. Goods received and accepted by the Government but the corresponding invoices are not received at period end (e.g. computers delivered and accepted by the Government but invoices are not yet received).

2.3.2. DoD Components must have effective controls in place to ensure that a payable is not recorded again (i.e., duplicated) when an invoice is subsequently received involving the same procured goods or services in the normal course of operations.

2.3.3. The supporting documents (or mechanized program(s) used for the accrual estimates) must clearly show the calculations and data used to compute the amounts. This documentation must also identify who prepared the estimate, the date prepared, and who received and reviewed/approved the estimate. DoD Components must ensure the documentation is of sufficient quality to allow an independent third party, such as an external auditor, to understand and verify the basis, value, and rationale for the recorded amount.

2.3.4. Methods for calculating the accrual estimate must be periodically validated for reasonableness by comparing the estimate to actual data once available. At a minimum, the estimating methodology must be reviewed at fiscal year-end. The estimating methodology will also need to be reviewed if there is a material change to the business process that causes material differences between the method’s estimate and actual amounts or if the initial assumptions used in making the estimate materially change and the initial accrual estimate is materially affected. Performance of these reviews, as well as approval of the review, must be documented by the DoD Component. This documentation must be maintained for auditors to validate that the review was performed and that it was approved by management.

2.4 Accounts Payable Recognition – Quarterly Accruals (090204)

2.4.1. To assist in developing more accurate financial statements, at least quarterly, DoD Components must ensure an accrual is recorded for all procurements in which DoD has received a measurable benefit from, or ownership title to, but have not been documented due to the lack of a receiving report or invoice. Components may need to make inquiries to cognizant contracting officers or the contracting officer’s technical representatives to identify material dollar value of undelivered orders not yet invoiced or captured in receiving reports to assist with establishing these quarterly accruals. In the event that the Component cannot obtain all necessary information from the contracting representatives within the 21 days allowed for the preparation of quarterly financial statements, the best available information should be used to estimate the accrual. Adjusting entries must be made in subsequent periods, as information becomes available from contracting representatives.
2.4.2. **DoD** Components must also accrue temporary duty (TDY) travel taken, not yet disbursed or otherwise accounted for as a liability, as an accounts payable liability at least quarterly. Additionally, Components will need to record an accounts payable liability for TDY travel that crosses two or more accounting quarters on an estimated/proportional basis, if significant. The accrued liability must be recorded in the applicable accounting period and supported with appropriate documentation (or mechanized programs) that clearly shows the calculations and data used to compute the amount of the liability. This supporting documentation must also evidence who prepared and who received the estimate and the dates these activities were completed. If accruals are posted by mechanized programs, documentation of information such as who prepared the estimate, date prepared, who received the estimate, or who reviewed the estimate may not be available. In this case, all available information captured by the mechanized program should be captured in the accrual.

2.4.3. **DoD** Components must also accrue Permanent Change of Station (PCS) travel taken, not yet disbursed or otherwise accounted for as a liability, as an accounts payable liability at least quarterly. Additionally, Components will need to record an accounts payable liability for PCS travel that crosses two or more accounting quarters on an estimated/proportional basis, if significant. The accrued liability must be recorded in the applicable accounting period and supported with appropriate documentation (or mechanized programs) that clearly shows the calculations and data used to compute the amount of the liability. This supporting documentation must also provide evidence of who prepared and who received the estimate and the dates these activities were completed, in accordance with 090902.G. If accruals are posted by mechanized programs, documentation of information such as who prepared the estimate, date prepared, who received the estimate, or who reviewed the estimate may not be available. In this case, all available information captured by the mechanized program should be captured in the accrual.

2.4.4. When estimating these accruals, **DoD** Components must follow the policy stated in paragraph 090203.

2.4.5. Fixed-priced construction contracts containing payment provisions allowing for contractors to receive progress payments based upon the percentage or stage of completion require special consideration when recording the accounts payable liability. **When accounts payable liability is expected to be paid within the year:**

2.4.5.1. Components must record the payable in an amount that reflects the unpaid portion of the contractor’s progress payment request for which the estimate of actual progress has been concurred to or approved by the contracting officer. The accounts payable amount recorded must include any amounts being withheld from the contractor pending acceptance and completion, or for other contract administration reasons, as per the terms of the contract. The supporting documentation should include engineering estimates and management evaluation of actual performance progress to validate the percentage of completion used. The contracting officer or their designee must maintain the supporting documentation, and be prepared to provide it to the Defense Finance and Accounting Service or other auditors to support the accounts payable amount.

2.4.5.2. The accounts payable for this type of contract is recognized because formal acceptance of the final product by the **DoD** Component is not the determining factor for accounting
recognition. The DoD Component acquires an asset during each accounting period based on constructive or de facto receipt, and thus must recognize/record an accounts payable during each accounting period to reflect the accumulation of that asset.

2.5 Accounts Payable Recognition – Availability of Funds (090205)

DoD Components must not delay the recognition of an accounts payable liability pending the availability of funds. The accounts payable not covered by budgetary resources must be disclosed in the notes to the financial statements (refer to Volume 6B, Chapters 4 and 10). A potential violation of the Antideficiency Act (ADA) may exist if the amount of a payable exceeds the total availability of funds. Refer to Volume 14 for the financial management policy regarding an ADA violation.

2.6 Intragovernmental Purchases (090206)

2.6.1. Procuring a good or service from another DoD Component or Federal entity is considered an intragovernmental purchase under the TFM Chapter 4700. Payables due to DoD Components or other Federal entities are intragovernmental payables and must be reported separately from payables due to public entities. Note that OMB Circular A-11 uses the term “intergovernmental” for transactions between or among accounts of Federal entities, and that transactions with non-appropriated fund instrumentalities are reported as transactions with the public. The United States Department of the Treasury (Treasury) considers both interdepartmental and intradepartmental transactions to be subsets of intragovernmental transactions. The separation of intragovernmental and public transactions needs to be identified at the transaction level in accordance with Treasury regulations to allow for the proper summarization at the various reporting levels within the DoD, and ultimately the Federal Government as a whole. Identification at the transaction level will also support auditability down to the transaction level where the supporting documentation would normally exist. It also provides the capability to perform intragovernmental elimination entries at various organizational reporting levels, assuming the correct trading partner codes were utilized.

2.6.2. DoD Components must record accounts payable liability for intragovernmental purchases in the appropriate accounting period to recognize the receipt of goods or services ordered regardless of the document used in placing the order (e.g., MIPR, project order, or RWO). Components must ensure the liability is recorded during the accounting period that the benefit was received and not delayed pending receipt of a corresponding interagency billing or subsequent payment thereof. Documentation supporting the amount recorded must clearly show the basis (description of the good, quantity and amount; for services, description of the service, labor hours and amount) for the amount recorded as a payable (e.g., MIPR, project order, RWO, reciprocal agreement) and proof of receipt. The documentation must also be of sufficient quality to allow an independent third party, such as an external auditor, to understand and verify the basis, value, and rationale for recorded amounts.

2.6.2.1. In accordance with the TFM Chapter 4700 section 9.1.3, as the seller performs the work necessary to deliver the agreed-upon goods/services, the seller should report
detailed supported balances to the buyer according to Volume 6B, Chapter 13, at a minimum, on a quarterly basis.

2.6.2.2. It is incumbent upon the DoD Component (buyer) to identify and record all accounts payable accruals. The Component (buyer) is ultimately responsible for their own financial statements, and thus must engage with the seller to identify the appropriate amount to accrue.

2.6.3. DoD Components must ensure an accounts payable liability is also recorded when the goods are received or the buying DoD Component has gained title to an asset. Component buyers need to work with the intragovernmental seller to ensure this business event is identified and the corresponding accounts payable liability is recorded.

2.7 Late Payment Interest (090207)

DoD Components must record in accounts payable an amount for prompt payment interest and other penalties incurred on late payments as required under terms of the non-federal contract. Refer to Volume 10, Chapter 7 for the policy on late payment interest and penalties. Components must also consider and record a quarterly accrual estimate for late payment interest and/or penalties to reflect any expected large dollar value late payments that will result in a significant interest and/or penalty liability in the reporting period. Defining what amounts are “significant” for these purposes is left to the discretion of the Component.

2.8 Refunds Due (090208)

DoD Components must record an accounts payable liability to reflect the amount of refunds due but not paid at the end of the reporting period, when applicable. The amount to record should either be for the exact amount of the refund when known and positively established and clearly documented, or estimated under the provisions in paragraph 090203. See Chapter 5 for additional guidance on refunds due.

2.9 Monetary Credits (090209)

2.9.1. DoD entities may be authorized by specific statutory authority to issue monetary credits as compensation for property or services received from non-federal entities. If the DoD entity exercises this authority, it must also record an accounts payable liability during the period the benefit from the property or services is received. These monetary credits give the seller credits in dollar amounts reflecting the agreed-upon value of the acquired property or received service. The holder of the credits may apply them later to reduce an amount later owed to the government (by the holder) in other, sometimes unrelated, transactions with the government. When monetary credits are used for exchange transactions, the DoD entity must record an accounts payable liability equal to the value of the monetary credit.

2.9.2. DoD Components must ensure the documentation supporting the accounts payable entry specifically identifies the property or services received, the date received, the name and signature of the DoD receiving official and include the bilateral agreement between the non-federal
entity and designated DoD representative establishing the agreed-upon value. Components must also ensure the documentation is of sufficient quality to allow an independent third party, such as an external auditor, to understand and verify the basis, value, and rationale for the recorded amount.

2.10 Closed Appropriations (090210)

When an appropriation account is closed, any remaining balance in the account is required to be cancelled and unavailable for obligation or expenditure for any purpose. However, legitimately incurred obligations that have not been paid at the time an appropriation is canceled must be reinstated to canceled payables and paid out of a current unexpired appropriation that is available for obligation for the same purpose as the closed account. Refer to Volume 3, Chapter 10 for more specific requirements for expired and closed accounts and Volume 3, Chapter 13 for more specific policy addressing payables involving closed appropriations.

2.11 Liquidating Accounts Payable (090211)

Accounts payable recorded in relation to receipt of a particular good or service must be liquidated when the liability created by the payable is settled. Generally, this occurs after a three-way match of a contract, receiving report, and proper invoice is performed, and a disbursement is made to satisfy the billed amount. In other than the three-way match scenario, the accounts payable liability will be liquidated when all required prepayment approvals have occurred, and other payment controls satisfied that result in generating a payment or recognizing an exchange-in-kind transaction business event.

2.12 Reviewing Accounts Payable Balances (090212)

2.12.1. The accounting office must review and reconcile all accounts payable balances to the transaction detail level in supporting accounting systems each quarter. As part of the accounts payable quarterly reviews, the budgetary accounts associated with the accounts payable balances (e.g., delivered order unpaid, obligations unpaid) must be reconciled to proprietary accounts payable balances. The accounting office must research any differences, fully document the rationale for necessary adjustments, and obtain approval from the DoD Component’s Comptroller or their designated representative before making the adjustments. All adjustments made and associated documentation must be retained by the accounting office to support future financial statement related audits.

2.12.2. The accounts payable recorded to reflect the liability for acceptable final performance on a contract or order must remain on the account until liquidated through proper payment, or until receipt of contractual or legal documents that remove the remaining liability. DoD Components must assign financial management personnel to work through the cognizant contracting officer to request an invoice from the contractor for any accounts payable amount remaining unliquidated due to non-receipt of an invoice or billing within 180 days from the date of acceptable final contract performance. Component personnel must continue to pursue receipt of overdue invoices through the contract administration and funds holders as necessary to avoid canceled appropriations and to improve accounts payable reporting. Refer to Volume 3, Chapter 8 for policy
associated with dormant commitments and unliquidated obligations eligible for closeout on physically complete contracts.

2.12.2.1. Continued non-receipt of an invoice on firm fixed-price contracts may extinguish the contractor’s right to payment and relieve DoD’s obligation to pay for the un invoiced goods or services.

2.12.2.2. When a contractor has failed to invoice for the received and accepted goods or services after more than six years since the date of acceptance by DoD, the relevant accounts payable may be considered for write-off after coordination with the contracting activity and/or legal counsel, and if applicable, the Defense Contract Audit Agency and the Defense Contract Management Agency. Documentation in support of this write-off must clearly represent that the over-aged accounts payable no longer continues to represent a legal liability of DoD after giving due consideration to whether or not the Government has acted to toll or suspend the Contract Disputes Act’s six-year limitation period on assertion of claims codified at 41 U.S.C. § 7103. The documentation must also include the contracting officer’s determination that the legal liability to pay on the contract no longer exists. DoD Components must ensure the accounts payable amounts written-off contain sufficient documentation to allow an independent third party, such as an external auditor, to verify the basis, value, and rationale for the write-off.

2.12.3. The accounting office must investigate accounts payable debit balances over $100. These debit (abnormal) balances may result from any number of circumstances (e.g., duplicate payments and unrecorded accounts payable), and must be corrected after a thorough research of the underlying documentation associated with the business events and transactions impacting the particular accounts payable account.

2.12.3.1. DoD Components must ensure subsequent adjustments to correct the abnormal balance are fully documented. This documentation must include a description of the circumstances that caused the initial abnormal balance and support the valuation of the revised amount. It also must include the names and signatures (or electronic equivalent) of the management official(s) approving the adjustment and should also identify the correcting steps being taken to prevent reoccurrence. All of this documentation must be available for review by the independent auditors if necessary. The accounting office should also identify and report to management any recommendations for changes to internal controls or business processes to preclude incurring abnormal accounts payable balances in the future.

2.12.3.2. If the investigation of a debit balance discloses an overpayment or under-recouped funds related to a contract or vendor payment, the accounting office must coordinate with the responsible entitlement and disbursing offices to pursue collection or recoupment in accordance with the policies in Chapter 14 and Volume 10, Chapter 22.

2.12.4. The inability to match a performance report or invoice with a corresponding obligation may indicate a breakdown of fund control processes and a material weakness in internal controls. When posting a transaction to accounts payable does not disclose a corresponding obligation, this may be evidence that either a contract has not been awarded or a posting error has occurred. The accounting office must request the necessary documentation to support the required
accounting entry and notify appropriate officials that receiving reports or invoices are being received without a corresponding recorded obligation. Refer to Volume 3, Chapter 11 for policy on recording an obligation for an unresolved negative unliquidated obligation.

2.12.5. There also may be instances in which disbursements have been reported by a disbursing office, through a paying center, to the Treasury and charged against the Department’s fund balances, but have not yet been received or processed by the applicable accounting office for recordation against the applicable corresponding obligation. These transactions are defined as disbursements in-transit, and based on the USSGL Crosswalk, map to the accounts payable line of the balance sheet. Refer to Volume 3, Chapter 11 for disbursements in-transit policy.

2.13 Accounts Payable Document Retention (090213)

All documentation in support of accounts payable entries and adjustments must be readily available for review by auditors, management, and other DoD Component financial management personnel. Documentation retention policy is contained in Volume 1, Chapter 9.
VOLUME 4, CHAPTER 10: “ACCRUALS FOR PERSONNEL RELATED LIABILITIES”

SUMMARY OF MAJOR CHANGES

Changes are identified in this table and also denoted by blue font.

Substantive revisions are denoted by an asterisk (*) symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by bold, italic, blue, and underlined font.

The previous version dated November 2013 is archived.

CHAPTER 10

ACCRUALS FOR PERSONNEL RELATED LIABILITIES

1.0 GENERAL (1001)

1.1 Purpose (100101)

This chapter provides accounting policy and related requirements for recording Department of Defense (DoD) liabilities for accrued payroll and benefits, actuarial liabilities, and civilian severance pay.

*1.2 Authoritative Guidance (100102)

This chapter prescribes the accounting policy and authoritative guidance necessary to establish financial control over the DoD accruals for personnel related liabilities. This chapter implements applicable provisions of Statement of Federal Financial Accounting Standards 1, “Accounting for Selected Assets and Liabilities.” The accounting events discussed in this chapter must be recorded in accordance with the United States Standard General Ledger Standard Financial Information Structure Transaction Library and reported in accordance with the regulations promulgated by the Department of the Treasury and the Office of Management and Budget.

2.0 AUDIT READINESS/INTERNAL PROCEDURES (1002)

Each DoD Component must develop and implement internal operating procedures and/or guidance to execute this overarching policy in a manner that ensures complete, consistent, timely, accurate, valid, and relevant financial data.

3.0 ACCOUNTING POLICY FOR ACCRUALS (1003)

3.1 Standards (100301)

The accounting principles and policy applicable to the Financial Control of Liabilities are cited in Chapter 8. In addition to this guidance, and to ensure clarity, the standards, as listed in the following subparagraphs must be adhered to in accounting for accruals associated with personnel related liabilities.

3.1.1. The accounts must be updated based on appropriate source documents and reflect the latest pay adjustments, leave balances, levels of benefits, and changes in benefit rules.

3.1.2. Reasonable estimates (accruals) of the costs of services performed by DoD military and civilian employees, including overtime, must be made when a pay period does not coincide with the end of an accounting period. Such accruals must be recorded in the applicable accounting period based on journal vouchers with supporting documentation (or mechanized programs) that clearly shows the calculations and data used to compute the amount of the liability. The journal vouchers
must be signed by the appropriate authorized accounting official. These accruals must be removed from the accounts only when the related pay is disbursed.

3.1.3. Amounts due for annuities, adjudicated claims, and benefit payments as of the end of the period must be recorded in the applicable accounting period based on available information, provided that the payment is probable and the amount estimable. Such amounts must be recorded based on journal vouchers and supporting documentation clearly showing the basis for the amounts recorded. The journal vouchers must be signed by the appropriate authorized accounting official. Except for the DoD Component's share of fringe benefits computed as a part of the pay computation process, applicable accruals must be reversed at the start of the next accounting period and actual costs accumulated.

* 3.1.4. Accrue merit bonuses and awards, if material in amount, in the accounting period earned. Components are responsible for assessing a material threshold.

3.1.5. A compensated absence is an employee absence (ordinarily for vacation or illness) for which the employee will be paid. When DoD employees accrue rights to take leave with pay, DoD Components incur an expense and liability measured by the salary cost at the time that the leave may be taken.

3.1.6. Accrue the cost of unused annual leave, including restored leave, compensatory time, and credit hours earned as well as the fringe benefit costs associated with the leave. Obtain accrued leave amounts from the Defense Civilian Payroll System.

3.1.7. The expense and related liability for annual leave must be recorded at the regular hourly rate at which the leave is earned. Use of a fringe benefit rate is also acceptable for calculating accrued annual leave.

* 3.1.8. The balance of the liabilities for annual leave and other leave (compensatory time and credit hours), including fringe benefit costs associated with the leave, must be assessed and, as needed, adjusted to reflect all pay increases and unused leave balances at least quarterly for financial statement purposes. For General funds, unused annual leave is typically unfunded until the leave is used. However, the accrual of unused annual leave in working capital fund should be funded.

* 3.1.9. Sick leave is expensed as taken as absences due to illness or other contingencies. In addition, home leave and compensatory time for travel are not accrued, as balances not used are not reimbursed by DoD. However, sick leave is used in the calculation of federal employee's retirement for both the Civil Service Retirement System (CSRS) and the Federal Employees Retirement System (FERS).

3.1.10. Accrue benefits, including benefits to Social Security, retirement funds, the Thrift Savings Plan, and group health and life insurance programs in the same manner as gross compensation (see Volume 8, Chapter 3). Accrue other benefits, such as relocation-related real estate costs and personnel allowances, in the period earned.
3.1.11. Accrue payments to the Office of Personnel Management (OPM) for reemployed
annuitants and severance pay for former employees in the same manner as gross compensation.

3.1.12. Accrue recruitment and relocation bonuses and retention allowances in the period
earned.

3.1.13. The accrued amounts to be reflected in the general ledger accounts must not be
limited to the amounts covered by available budgetary resources.

3.2 Supporting Records (100302)

To the extent such liabilities are unfunded, DoD Components must maintain appropriate
supporting records of the unfunded portions to provide appropriate footnote disclosure in the
financial statements when necessary. Disclosures must be made for unfunded liabilities in
accordance with Volume 6B, Chapter 10.

*3.3 Liability for Pensions, Other Retirement Benefits, and Other Postemployment Benefits
(100303)

The liability for Pensions, Other Retirement Benefits (ORB), and
Other Postemployment Benefits (OPEB) should be recognized at the time the employee’s services
are rendered and must be reported in the Components’ financial statements. If existing legislation
requires that amounts paid to participants be recovered from others (e.g., employing agencies),
then the estimated amount to be recovered must be reported as a receivable with the sources of
expected repayments clearly indicated.

3.3.1. Pension benefits include all retirement, disability, and survivor benefits financed
through a pension plan, including unfunded pension plans. DoD civilian and military employees
are covered primarily under the following three defined benefit retirement plans: CSRS, FERS,
and Military Retirement System (MRS).

3.3.2. ORB are provided outside the pension plan by an employer to a former employee
or the employee’s beneficiary upon retirement. ORB include all retirement benefits other than
pension plan benefits, such as retirement health care benefits.

3.3.3. OPEB are provided to former or inactive employees, their beneficiaries, and covered
dependents outside pension or ORB plans. Inactive employees are those who are not currently
rendering services to the employer but who have not been terminated, including those temporarily
laid off or disabled. Postemployment benefits can include salary continuation, severance benefits,
counseling and training, continuation of health care or other benefits, and unemployment, workers’
compensation, and veterans’ disability compensation benefits paid by the employer entity.

3.3.4. Defined contribution plans (e.g., the Thrift Savings Plan) do not result in pension
liabilities.
3.4.1. For DoD Civilian pension plans (CSRS & FERS), the Components should recognize a pension expense that equals the service cost for its employees for the applicable accounting period, less the amount contributed by the employees, if any. The cost factor to be applied by the Components must be provided by the administrative entity, Office of Personnel Management.

3.4.2. For MRS, actuarial estimates should be used to calculate the pension expense and liability.

3.4.2.1. The “aggregate entry age normal” actuarial cost method should be used to calculate the pension expense and liability for the MRS financial statements. The liability is the actuarial present value of all future benefits, based on projected salaries and total projected service, less the actuarial present value of future normal cost contributions that would be made for and by the employees under the plan.

3.4.2.2. Individual Component expense is based on the actuarial cost. The difference between Component expense and amount paid by the Component to OPM or MRS should be recognized as an intragovernmental liability. Refer to Volume 12 for more information.

3.4.3. Official communication between OPM and the Office of the Actuary must be maintained by the Components to support pension expense and any related liability.

3.5 Other Retirement Benefits (100305)

Components should account for and report the ORB expense, such as medical costs for retirees, in its financial report in a manner similar to that used for pensions. ORB expense should be recognized in an amount equal to the total service cost (as determined by the Office of the Actuary). Components must record and report their portion of the ORB liability.

3.6 Other Postemployment Benefits (100306)

Components should recognize an expense and a liability for OPEB when a future outflow or other sacrifice of resources is probable and measurable on the basis of events occurring on or before the reporting date. An example ‘OPEB’ is Federal Employees’ Compensation Act (FECA).

3.6.1. FECA provides federal employees injured in the performance of duty with workers' compensation benefits, which include wage-loss benefits for total or partial disability, monetary benefits for permanent loss of use of a schedule member (e.g., body part), medical benefits, and vocational rehabilitation. The FECA program is financed by direct reimbursements from agencies.

3.6.2. The FECA fund pays benefits on behalf of Federal entities as costs are incurred and bills the entity annually before August 15 for the costs incurred during the previous 12-month period ended June 30 (July 1 – June 30). Federal entities fund the FECA payments through appropriations reimbursed to the FECA fund. For those agencies that have funding through appropriation, each entity must include in its annual budget estimates for the fiscal year beginning
in the next calendar year a request for an appropriation for the amount equal to the costs (approximately 15 months). Once the appropriation is received, the payments are due to the Department of Labor (DOL) within 30 days

3.6.3. The DOL sends each agency the actuarial liability estimates for future worker’s compensation benefits amounts for both the current and prior years. The current figure represents the new balance in the Actuarial FECA Liability. The change in actuarial liability is determined by taking a difference of prior year actuarial liability sent from DOL with the current year actuarial liability sent from DOL.

3.6.4. The following support must be included with the Actuarial FECA Liability entry:

3.6.4.1. The DOL Memorandum for Chief Financial Officers of Executive Departments and Agencies, which contains the actuarial balances,

3.6.4.2. Agency-Wide Financial Statements Directorate allocation spreadsheet reflecting the percentage allocation to the entity level, and

3.6.4.3. A copy of the last three annual chargeback bills for the Department Level.
