1301  GENERAL

130101  Purpose

A.  This chapter provides instructions applicable to budget formulation and congressional justification for the Defense Environmental Restoration Program. The National program to manage hazardous wastes and cleanup old hazardous wastes extends to the Department of Defense. The Congress is interested in assuring that the DoD Program is complying with all the requirements levied by the Resource Conservation and Recovery Act (RCRA), the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and the Superfund Amendments and Reauthorization Act (SARA) legislation. This Chapter provides the funding data necessary to respond to congressional concerns.

B.  The appropriations that finance the Defense Environmental Restoration Program include the following subsections:

- Operation and Maintenance
- Procurement
- Research, Development, Test, and Evaluation (RDT&E)
- Military Construction

130102  Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 13 covers specific backup material requirements for the Defense Environmental Restoration Program. The Deputy Under Secretary of Defense, Environmental Security (DUSD(ES)) of the USD(A&T) is responsible for all submission requirements for this program.

130103  Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 13 provides additional specific guidance with regard to the back-up material required for the Defense Environmental Restoration Program.

130104  References

Chapter 1 provides general funding policies, Chapter 3 provides specific policies related to Operation and Maintenance costs, Chapter 4 provides specific policies related to Procurement appropriations, Chapter 5 provides specific policies related to RDT&E funding, and Chapter 6 provides specific policies related to Military Construction appropriations.

130105  Definitions

A.  Installation Restoration Program (IRP). This subelement is a comprehensive program to identify, investigate, and cleanup contamination from hazardous substances and wastes resulting from past DoD activities on active installations and formerly-used DoD lands. This includes requirements incident to remedial action, both on-installation and off-installation (e.g., provision of permanent alternate potable water supplies to communities affected by groundwater contamination that resulted from DoD activity). Actions under this element may include:
1. Investigations to identify, confirm and quantify contamination; feasibility studies; remedial action plans and designs; and remedial or removal actions.

2. Research, development and technology demonstrations necessary to conduct cleanups.

3. Expenses associated with cooperative multi-party cleanup plans and activities.

4. Remedial actions to protect or restore natural resources damaged by contamination from past hazardous waste disposal activities.

5. Cleanup of low-level radioactive waste sites which meet the criteria of the CERCLA, as amended.

6. Remedial action construction costs.

7. Remedial action operations costs.

9. Immediate actions necessary to address health and safety concerns such as providing alternate water supplies or treatment of contaminated drinking water, when the hazard results from a release from DoD property.

10. CERCLA assessments necessary prior to excessing real property assets.

11. Proportion of RCRA permit preparation associated with solid waste management units which would meet the definition of a past disposal site under CERCLA, as amended.

12. Management expenses associated with IRP, including civilian salaries.

B. Building Demolition and Debris Removal Program (BD/DR). This subelement applies to both active installations and formerly-used DoD lands. The purpose of this subelement is to plan and execute a comprehensive program to demolish and remove unsafe buildings and structures. Expenses incident to complete restoration, such as restoration of natural resources are included if such expenses are clearly and directly related to the demolition and debris removal. Demolition that is required as part of a new construction project is excluded. Actions under this element may include:

1. The demolition of buildings or the removal of debris that constitute a safety hazard on active installations.

2. The demolition of buildings or the removal of debris which constitute a safety hazard on lands formerly-used by the Department of Defense, provided such lands were transferred to state or local governments or native corporations.

C. Other Hazardous Waste (OHW). This subelement captures DoD clearance and cleanup requirements for Unexploded Ordnance (UXO) at closed, transferring, and transferred (CTT) ranges. All DoD Components participating in the Environmental Restoration Program, including FUDS, shall program and budget for Unexploded Ordnance (UXO) cleanup at CTT ranges in the United States and its territories using the OHW subelement. OHW does not include cleanup of active and inactive ranges at active installations. Transferred range requirements (typically FUDS) are already in the ER, FUDS account. Transferring range requirements (typically base realignment and closure (BRAC) ranges) are in the BRAC account and funding will transfer to the appropriate Environmental Restoration account upon expiration of the BRAC account. Clearance and cleanup requirements at closed ranges are new requirements that should be budgeted in the appropriate Environmental Restoration account.

13-2
1302 BUDGET ESTIMATES SUBMISSION

130201 Purpose

This Section provides guidance for preparation and submission of budget estimates for the Defense Environmental Restoration Program. The budget estimates consist of all operation and maintenance, procurement, RDT&E, and Military Construction resources that support the Defense Environmental Restoration Program. The Components should consult all of the other Chapters for exhibit requirements that are not specifically addressed in this Chapter including Chapter 19, Other Special Analyses.

130202 Submission Requirements

A. Based on the Department’s decision to devolve the centralized Environmental Restoration, Defense (ER,D) appropriation, the Military Departments and applicable Defense Agencies shall incorporate separate narrative justification material for their respective programs and the Environmental Restoration Exhibits (ENV 30a-30e) in their Budget Estimates Submission. The DUSD (Environmental Security) is responsible for consolidating the Defense Agency budget submissions and for preparing the ENV 30a-30e exhibits for the Formerly-Used Defense Sites (FUDS). The diskette of installation level detail required by the DUSD(ES) should be forwarded together with the Components’ justification material to the OUSD (C) P/B Operations and Personnel Directorate, Room 3D868, Pentagon.

B. The Components and DUSD(ES) are also responsible for providing data to update the Budget Review System (BRS) and the Future Year Defense Plan (FYDP) automated systems for the various Environmental Restoration appropriations as identified in Chapter 1 and for updating the OP-32 exhibit (Summary of Price and Program Change) identified in Chapter 3.

C. In addition to submitting the above items, the DUSD(ES) is responsible for establishing policy for the Defense Environmental Restoration Program.
1303 CONGRESSIONAL JUSTIFICATION/PRESENTATION

130301 Purpose

This Section presents the exhibit requirement for submission to the Congress.

130302 Submission Requirements

A. Based on the Department’s decision to devolve the centralized Environmental Restoration, Defense (ER,D) appropriation, the Military Departments and applicable Defense Agencies shall incorporate separate narrative justification material for their respective programs and Environmental Restoration Exhibits (ENV 30a-30c) in their O&M justification books, Volume II. Environmental Restoration Exhibits (ENV 30d-e) should be submitted separately to the DUSD (Environmental Security). The DUSD (Environmental Security) is responsible for consolidating the congressional justification material for the Defense Agencies and for preparing the ENV 30a-30e exhibits for the Formerly-Used Defense Sites (FUDS).

B. The diskette of installation level detail required by the DUSD(ES) should be forwarded together with the Components’ justification material to the OUSD (Comptroller) P/B Operations and Personnel Directorate, Room 3D868, Pentagon. Copy requirements are identified in Chapter 1.

C. The Components and DUSD(ES) are also responsible for providing data to update the Future Year Defense Plan (FYDP) automated systems for the various Environmental Restoration appropriations as identified in Chapter 1 and for updating the OP-32 exhibit (Summary of Price and Program Change) identified in Chapter 3.

D. Examples of budget exhibits can be found in Section 1304.
1304 DEFENSE ENVIRONMENTAL RESTORATION PROGRAM SUBMISSION FORMATS

130401 Purpose

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to. Formats should be titled as “Budget Estimates” for the fall budget estimate submission and as “President’s Budget” for the final budget submission due to OSD the following January.
