

**SUMMARY OF MAJOR CHANGES TO
DoD 7000.14-R, VOLUME 5, CHAPTER 9
“CHECK ISSUE REPORTING”**

All changes are denoted in blue font

Substantive revisions are denoted by a ★ preceding the section,
paragraph, table or figure that includes the revision

Hyperlinks are denoted in *underlined, bold, italic, blue font*

PARA	EXPLANATION OF CHANGE/REVISION	PURPOSE
Multiple	Reflects the change from the Check Payment and Reconciliation System to the Treasury Check Information System (TCIS).	Update
090106	Deletes paragraph that gave instructions on reporting check issue for disbursing offices without computer capabilities. Renumbered to accommodate the deletion.	Delete
090301.B	Revises the telephone number for the Defense Check Reconciliation Module (DCRM) System Manger.	Update
090302	Revises the report ID designation and title of the Notification of Check Issue Correction – D.O. requested.	Update
090401	Revises requirements for the FMS Forms 5206 Internal Control Report.	Update
090403	Deletes the requirement for copy of the FMS Form 5206 to be sent to Standards and Compliance, Tax and Disbursing Functional Area.	Delete
0905	Deletes former section 0905, report no longer issued by the Treasury. Remaining sections renumbered to accommodate deletion.	Delete
090501	Revises the report ID designation for the Checks Issued Report (Report 72).	Update
090502	Deletes the statement that Disbursing and Debt Management Policy receives a copy of the Checks Issued Report. Changes DFAS Denver to DFAS Columbus.	Update
090504	Revises the paragraph numbers and figure titles to support deletion of former section 0905.	Update
090601	Revises the paragraph numbers and figure titles to support deletion of former section 0905. Changes DFAS Denver to DFAS Columbus.	Update
090602.B	Revises website address (URL) used to view the Comparison of Checks Issued Report for agency location code 1700. Changes DFAS Denver to DFAS Columbus.	Update
090602.C.10	Changes DFAS Denver to DFAS Columbus.	Update

 Report)

CHAPTER 9

CHECK ISSUE REPORTING0901 CHECKING ACCOUNT REPORTING

★ 090101. General. The Department of the Treasury uses the [Treasury Check Information System \(TCIS\)](#) to record all U. S. Treasury checks issued and negotiated. Check issuance is recorded when the disbursing office notifies the Department of the Treasury that a U. S. Treasury check serial number was issued on a particular date for a particular amount. Timely and accurate reporting is vital to maintaining balanced accounts. See [Chapter 14](#) of this volume for instructions on preparation and submission of limited depository checking account reports.

090102. Method of Submission. All disbursing offices (DOs) report detailed check issue transmittals in a Level 8 format to the Department of the Treasury for update to the [TCIS](#) with the check issue detail. The Level 8 format is covered in the [Volume 1 of the Treasury Financial Manual, Part 4, Chapter 6500](#). The Department of Defense (DoD) no longer sends the Level 8 check issue data by magnetic tape, but rather uses the Defense Check Reconciliation Module (DCRM), a management control and reporting system for U.S. Treasury checks issued by the DoD, for direct submission of the check issue detail to the Department of the Treasury. The DCRM system sends the check issue file via the Department of the Treasury's preferred method of transmission, Connect:Direct, which is an encrypted electronic host-to-host file transfer process. Enter the check issue detail data files into the DCRM database, which generates an electronic file to transfer the detailed check issue data to the Department of the Treasury. The files are considered ready for transfer when they are in an accepted status. The scheduled DCRM daily batch processing transmits all files in accepted status to the Department of the Treasury. The Defense Finance and Accounting Service (DFAS) Denver administers the DCRM, which tracks the status of all checks on hand and provides inquiry capabilities and reports to denote issuance discrepancies and acceptance or rejection conditions of reporting. Refer to the [DFAS 7300.1-M, DCRM Users Manual](#), for specific instructions and guidance on the system functions, capabilities, reports, and notices. DOs who do not have direct access to the DCRM submit their check issue data to their supporting DFAS site for upload into the DCRM. Contact your supporting DFAS site for specific submission requirements. Submit the Level 8 check issue data in the most secure method reasonably possible, e.g., an encrypted file. DFAS Cleveland and DFAS Indianapolis Accounting Services have established electronic mailboxes for the submission of the Level 8 check issue data and for questions, issues, or other concerns pertaining to check issue. All DOs supported by DFAS-Cleveland use email address ccl-mb-check-issue@dfas.mil to submit check issue data, and any questions or concerns. All DOs supported by DFAS-Indianapolis use email address dcrmindy@dfas.mil. All other DOs contact their supporting DFAS site for information on availability, method, and instructions for submitting their check issue data file.

090103. Requirements

- A. Report detailed check issue data in sequential groups of checks, called

transmittals, that uniquely identify the disbursing station symbol number (DSSN), accounting month and year, and check series. Submit a new transmittal each time a break in check numbers occurs, or when the issue month and year changes. DOs reporting check issues for multiple DSSNs submit a separate transmittal for each DSSN as well as for each break in check numbers or change in issue month and year within each DSSN. One submission of detailed check issue data may consist of one or more transmittals. The DCRM reports the check issue detail in blocks by DSSN, check series, and issue julian date format (YYDDD) to the Department of the Treasury.

★ B. If a check series will not be reported sequentially due to the splitting of a check series range between different locations, uses, deputy disbursing officers, agents, etc., then the DO reports the split check series range to the DCRM Manager ((303) 676-8448), so an adjustment can be made to record the split check series range in the DCRM. If check series range splits are not noted, the DCRM creates unnecessary management notices about missing and unaccounted checks on the DCRM reports. Report the check series range split in the DCRM to avoid the additional workload entailed in reviewing and validating these notices.

C. Submit all check issue transmittals to the Department of the Treasury no later than the close of business at the end of the week in which the issue dates occur, and at month end. DOs who submit their check issue transmittals through their supporting DFAS sites ensure their check issue data is received by the supporting DFAS site at least weekly and at month end.

D. Failure to report check issue data timely increases the possibility for loss caused by banking system errors, check alterations, and counterfeits. If a loss results from an altered or counterfeit check as a result of delinquent check issue reporting, then the DO may be held liable for the amount of the loss. If the check issue data is not reported into the TCIS, then the Department of the Treasury will not recognize the check as issued, and will not process any actions against the check, such as claims or limited payability cancellation credits. Also, the Department of the Treasury cannot complete a final reconciliation and clearance of a DO's account until all check issue data is received for the account. If the DO is habitually delinquent for 60 days or more, then the Department of the Treasury may suspend the processing of further print orders for blank Treasury check stock until all delinquent check issue reporting has been accepted into the TCIS.

090104. Spoiled Checks. Report spoiled checks to the Department of the Treasury as checks issued with dollar amounts. The spoiled check is then cancelled through the stop payment process and a replacement check issued as outlined in [Chapter 8](#) of this volume. Do not forward spoiled checks to the Department of the Treasury, but keep them in the disbursing office until destroyed as prescribed in Chapter 8 of this volume.

090105. Voided Checks. Report voided checks as checks issued with zero dollar amounts. Record the serial numbers in the proper sequence with those of other checks issued in the same check range. Do not forward voided checks to the Department of the Treasury, but dispose of them as prescribed in Chapter 8 of this volume. For voided checks less than one year old which were erroneously reported to the Department of the Treasury with a dollar value,

follow the procedures outlined in paragraph 090303 of this chapter. If the voided check has an issue date which is over one year old, then the DO prepares a voucher to charge an appropriation and report the check as issued with the dollar value previously reported to the Department of the Treasury. The DO then prepares a journal voucher adjustment and reports the check as issued for the appropriate prior month/year to clear the check issue discrepancy. The Department of the Treasury then automatically cancels the check under limited payability when the check issue date is one year old and issues a limited payability credit (**F3880) during the 14th month after the check issue date. Transfer the **F3880 credit to the original appropriation charged for the check issue, resulting in a zero net effect to the appropriation.

★ **090106.** Disbursing Office Responsibility for Quality of Data Submitted. The disbursing office is responsible for ensuring the check issue data submitted to the Department of the Treasury is accurate. After input into the DCRM, validate the files for accuracy. DOs, who submit their check issue data to their supporting DFAS site for upload to DCRM ensure the data forwarded are accurate. DOs notify their supporting DFAS sites immediately on finding an error. The DCRM transmits the accepted files to the Department of the Treasury each business day. Once the **TCIS** accepts an erroneous check issue transmittal, the file cannot be deleted. To request or make corrections after a **TCIS** acceptance, follow section 0903 of this chapter. Every effort shall be made to correct all errors before the file transfer process. **The DCRM transmits the check issue data files to the Department of the Treasury; but does not change the data.** If an erroneous data file has been sent to DCRM but has not been forwarded to the Department of the Treasury, then put the whole data file containing the erroneous check information in either a “replace” or “suspended” status. Contact your local DCRM administrator or supporting DFAS site immediately to change the file from the accepted status in the DCRM. For further details on how to put an erroneous check file into either a replace or suspended status, contact the DCRM manager, DFAS Denver at (303) 676-8448. The DO –

A. ensures all check issue data submitted to the supporting DFAS site for processing agree with check issue totals on the Daily Statement of Accountability (**DD Form 2657**) and the Monthly Statement of Accountability (**SF 1219**);

B. submits a corrected transmittal(s) within 10 workdays of notification of a rejected transmittal within a file transfer;

C. continues to submit subsequent transmittals when a transmittal has been rejected; and

D. recreates the check issue data for a period up to 180 calendar days following submission or replacement of rejected data, if needed.

090107. Inquiries. Direct inquiries concerning check issue reporting to the DO’s supporting DFAS site.

0902 MONTH END CHECK ISSUE SUMMARY

090201. General. Disbursing offices use the Month End Check Issue Summary

(SF 1179) to report monthly check issue transmissions. At the end of every month, prepare an SF 1179 to summarize the check issues for the month. Summarize the total dollar amount of the current month checks issues submitted by transmittals (each check series listed individually) on the SF 1179, and show current and prior months' adjustments to check issue totals as affected by the documents listed in paragraphs 090105 and 090304 of this chapter. Summarize prior month check issues on a Journal Voucher ([OF 1017-G](#)) and record them on line 2 (b) of the SF 1179. The total amount shown on the SF 1179 must agree with the amount shown in Section II, Part A, column (2), on the reverse of the SF 1219.

090202. Check Issue Reporting for Limited Depository Checking Accounts. See chapter 14 of this volume for limited depository checking account report requirements.

090203. Preparation of the SF 1179. Prepare the SF 1179 in an original and one copy, ensuring that all blocks are properly completed, including page and location, DO's signature, and the month and year for which rendered. The blocks of the SF 1179 (figure 9-1) contain the following information:

- A. DISBURSING OFFICE NAME/ MAILING ADDRESS. Enter the name and complete mailing address of the issuing disbursing office.
- B. TELEPHONE NO., COMMERCIAL OR FTS. Enter only the area code and commercial or FTS telephone numbers. Do not enter DSN numbers.
- C. D.O. NAME. Enter the name and rank or grade of the DO.
- D. D.O. SIGNATURE. The DO signs in the space provided.
- E. CHECK SYMBOL NO. Enter the four-digit DSSN.
- F. MONTH AND YEAR FOR WHICH RENDERED. Enter the month and year during which the checks being reported were issued.
- G. D.O. SYMBOL NO. Enter the four-digit DSSN for the first transmittal only. The block may be left blank for any additional transmittals listed on this summary.
- H. CHECK SYMBOL NO. Enter the four-digit DSSN for the first transmittal only. The block may be left blank for any additional transmittals listed on this summary.
- I. BEGINNING CHECK NO. Enter the beginning check serial number for each transmittal.

J. ENDING CHECK NUMBER. Enter the ending check serial number for each transmittal.

K. REPORTING METHOD. Enter the method of transmission, e.g., Connect:Direct (DCRM).

L. TOTAL DOLLAR AMOUNT OF ISSUES (FOR EACH TRANSMITTAL). Enter, adjacent to each transmittal, the total of the issue amounts of all checks reported on each transmittal.

M. SUMMARY: LINE 1. Enter the total dollar amount for all transmittals listed in the above blocks. Ensure that the total agrees with the total of current month checks issued as reported in Section II, Part A, column 2, on the reverse of the SF 1219.

N. SUMMARY: LINE 2(a). Enter the net total representing adjustments to current and prior months' issues for which the Advice of Check Issue Discrepancy (FMS Form 5206) have been received from the Department of the Treasury and processed in the DO's accounts. The amount on this line must agree in net with the amount shown in Section II, Part A, column 3, on the reverse of the SF 1219.

O. SUMMARY: LINE 2(b). Enter the net total representing adjustments to current and prior months' issues made by the disbursing office and recorded on an OF 1017-G. Attach copy 2 of the OF 1017-G to the SF 1179 to support the amount entered. The amount on this line shall must with the net total amount shown in Section II, Part A, column 4, on the reverse of the SF 1219.

P. SUMMARY: LINE 3. This line represents the net total of lines 1, 2(a), and 2(b). The net total must agree with the amount shown in Section II, Part A, column 5, on the reverse of the SF 1219 and with the amount reported on Section I, Part A, line 2.1, on the front of the SF 1219.

090204. Distribution of SF 1179. The Department of the Treasury no longer requires agencies to submit monthly SF 1179 reports or the supporting documents to its Cash Analysis Branch. The DO maintains the SF 1179 and supporting documents, which are used for check issue research and reconciliation. DOs submit the original SF 1179 and supporting documents with the original financial reports to the supporting DFAS site, and keeps the second copy and copies of supporting documents.

0903 CHECK ISSUE ADJUSTMENTS

090301. General. Ensure that checks issued are reported to the Department of the Treasury accurately. The SF 1219 check issue reporting and the check issues in the **TCIS** must match each check as it was issued, regardless of whether or not the check was accurately produced. If the check has been issued incorrectly, then the DO ensures the reporting on the SF 1219 and the **TCIS** reflects the check data as written, and then corrects the check issue error. To prevent duplicate adjustments, all DOs, who do not directly report their check issue data in

the DCRM coordinate their adjustment actions with their supporting DFAS site. See [Chapter 7](#) of this volume for procedures pertaining to check overpayments and underpayments. Check issue reconciliation is also covered more in-depth under section 0907 of this chapter. When differences do occur between what was paid and what was reported for a check, the Department of the Treasury makes an adjustment to the individual check record in the [TCIS](#) to change the reported amount to the paid amount, and issues an Advice of Check Issue Discrepancy (FMS Form 5206). Once an error has been identified, the DO does not wait to receive an FMS Form 5206. If an error is discovered before reporting the check issue detail to the Department of the Treasury, then the DO corrects the error on the data file before submitting the data to the Department of the Treasury. If the DO is unable to correct the file, then the DO requests an adjustment to the check issue detail; see paragraph 090303 of this chapter. During check issue reconciliation procedures, the DO may find that while the check issue detail was reported correctly, there is an error in reporting the SF 1219 check issue totals. See paragraph 090304 of this chapter for procedures on SF 1219 adjustments.

090302. Advice of Check issue Discrepancies (FMS Form 5206). When a check is negotiated, the [TCIS](#) is updated to reflect the paid status of the U.S. Treasury check. The [TCIS](#) verifies that the amount paid matches the amount reported for the check. If the amount printed on the check differs from the issue amount reported by a disbursing office, then the Department of the Treasury reports the discrepancy on an FMS Form 5206. For check issue discrepancies of \$1 or less, the Department of the Treasury adjusts the check issue records, but will not notify the DO nor issue an FMS Form 5206. When an FMS Form 5206 is issued, the dollar value for the check reported in the [TCIS](#) is automatically adjusted to the amount paid. The Department of the Treasury provides the DO with three computer-generated copies of the FMS Form 5206 along with a copy of the check. The FMS Form 5206 includes a description of the error. Upon receipt of the FMS Form 5206, the DO immediately researches the check issue records, vouchers, and/or supporting documentation to determine the cause of the discrepancy and which reporting requires the adjustment. If the payee was overpaid or underpaid, then the DO follows Chapter 7 of this volume. For reporting errors only, the DO takes the corrective action, as appropriate, to ensure all records reflect the check as written. The following is only a guide, as all reporting errors may not be limited to just these conditions:

A. If the check was reported correctly on the SF 1219 and paid for the proper amount, but the amount was incorrectly reported to the Department of the Treasury through the DCRM transmission of check issue detail, then no adjustment is made on the SF 1219. Since the issuance of the FMS Form 5206 adjusts the [TCIS](#), the check issue discrepancy has already been corrected when the FMS Form 5206 was issued. The DO annotates the FMS Form 5206 as "[TCIS](#) reporting error only. Check paid and reported correctly on SF 1219." Keep the original document with the monthly financial returns. Return a copy of the annotated FMS Form 5206 to the Department of the Treasury to notify them that no further action will be taken.

B. If the check issue was reported erroneously on the SF 1219 and to the Department of the Treasury through the DCRM transmission of check issue detail, but the payee received the proper amount of payment, then the DO reports the FMS Form 5206 on the SF 1179 and the SF 1219 to clear the check issue discrepancy. The DO initiates research and corrective action needed to ensure the appropriations were charged correctly for the amount of the check.

See subparagraph 090304.B of this chapter for procedures to record the adjustment to the SF 1179 and the SF 1219.

090303. DO Requested Adjustment to the Check Issue Detail

★ A. Request for Adjustment. To request an adjustment to the check issue detail in the **TCIS**, the DO sends a written request containing a description of the error to the Department of the Treasury, Check Reconciliation Branch (CRB), Room 700A, Prince George's Center II Building, 3700 East-West Highway, Hyattsville, Maryland 20782. To expedite the adjustment, the DO may fax the request to CRB at (202) 874-8536, but the CRB still requires receipt of the request by mail at a later date as it requires a request with an original signature to be on file. The CRB uses the information to correct the reporting in the **TCIS**. After the CRB makes the adjustment in the **TCIS**, a report (**TC-AC-252, Notification of Check Issue Correction-D.O. Requested**), is generated for each specific check symbol and serial number adjusted. See Figure 9-2 for an example of the **TC-AC-252**. The CRB forwards this report to the DO. The DO monitors any adjustments requested to ensure receipt of the **TC-AC-252**, and verifies proper adjustment. If no response is received within 30 days of request, then the DO contacts the CRB for status. The DO keeps the **TC-AC-252** report and the request for an adjustment with the monthly financial records.

B. Time Limitation. Adjustments to the check issue detail in the **TCIS** may only be made within 12 months from the issue month. After 12 months, the period of negotiability expires. The Department of the Treasury cancels the check and issues a limited payability credit for the amount of the check as recorded in the **TCIS**. See Chapter 8 of this volume for check cancellation and limited payability procedures. If the DO detects a check issue reporting error after 12 months from the issue month, then he/she adjusts the accountability to reflect the check issue detail as recorded in the **TCIS**. The limited payability credit offsets the check issue adjustment on the SF 1219. Example: A voided check was reported to the Department of the Treasury as \$150 vice \$0 for issue month November 2005. In May 2007, the DO became aware of the reporting error when the limited payability credits were being researched for transfer of credits to the original appropriations. The corrective action for this situation would be to adjust the SF 1219 and a one-sided Voucher and Schedule of Withdrawals and Credits (**SF 1081**) to clear the limited payability credit. The DO must prepare a OF 1017-G to record the check as issued for \$150 for November 2005, and the offsetting transaction would be a debit to the **F3880 account to clear the limited payability credit.

090304. SF 1219 Adjustments for Check Issue

A. Prior Month Checks Issued. A common reason for an SF 1219 adjustment made by the DO is a prior month checks issued adjustment. Do not report prior month issue of checks as current month checks issued, as this will cause check issue discrepancies for both issue months. An SF 1219 adjustment is necessary to realign the check issue reporting to the proper issue month of the checks. To record prior month check issues on the SF 1219, the DO prepares a Journal Voucher (OF 1017-G) summarizing the prior month checks issued to include the same information that would have appeared on the SF 1179 if the checks had been reported when issued; see Figure 9-3. Note: Do not include prior month checks issued in the amount of current

month checks issued on line 1 of the SF 1179 or Section II, Part A, column 2 (TC 210). Record the prior month adjustment on line 2 (b) of the SF 1179 and Section II, Part A, column 4 (TC 212) of the SF 1219. To clear check issue discrepancies resulting from erroneously reported prior month checks issued, the DO prepares an OF 1017-G to decrease the overstated check issues and increase the check issues for the proper month. For audit trail purposes, reference the check numbers and issue dates of the prior month checks being adjusted between months on the OF 1017-G. Keep all OF 1017-Gs prepared for check issue adjustments in the DO's financial records as supporting documentation.

B. FMS Form 5206. When a SF 1219 adjustment is needed due to the issuance of an FMS Form 5206, the procedures are very similar to those listed in subparagraph 090304.A of this chapter. Record the adjustment for FMS Form 5206 in a separate column. To report the adjustment to the SF 1219 for an FMS Form 5206 adjustment, record the FMS Form 5206 on line 2 (a) of the SF 1179 and Section II, Part A, column 3 (TC 211) of the SF 1219. Keep a copy of the FMS Form 5206 in the DO's financial records as supporting documentation.

C. If the DO's financial records reflect the correct check issued data for the proper month, then don't record adjustments on the DO's SF 1219. If the error is limited to the Department of the Treasury's record of the SF 1219 check issue total as identified in the check reconciliation process as outlined in section 0907 of this chapter, then the DO sends a request for adjustment to the Department of the Treasury's CAB. To send a request by fax, the CAB's fax number is (202) 874-8887. Examples of situations when adjustments may be needed are: the Department of the Treasury records the DO's SF 1219 totals as a different month than prepared due to late SF 1219 submission; erroneous prior adjustments; and reporting errors.

0904 FMS FORMS 5206 INTERNAL CONTROL REPORT

★ 090401. The DO prepares an internal control report listing all FMS Forms 5206 received during the month. Each FMS Form 5206 is supported with an explanation of how the error occurred and a description of the internal control measures initiated to prevent further errors. See figure 9-4 for an example of an FMS Form 5206.

090402. The DO records each FMS Form 5206, either on a manual or automated log, immediately upon receipt to ensure all FMS Forms 5206 are accounted for. Update the log during the month with the explanations for cause and the preventive internal control measures after the research has been accomplished.

★ 090403. The DO provides the internal control report to the Commanding Officer, or the respective Business Line Executive for DFAS DSSNs by the 10th workday of each month. The Commanding Officer or Business Line Executive reviews the report for management purposes. Mail a copy of the report to DFAS, [Standards and Compliance, Tax and Disbursing Functional Area \(DFAS-JJFD/IN, 8899 E. 56th Street, Indianapolis, IN 46249-8603 \(fax \(317\) 510-1270 or DSN 699-1270\)](#). The [DFAS-JJFD/IN](#) monitors the report to ensure compliance with prescribed regulations and analyze problem areas. The disbursing office keeps a copy of the report in the disbursing office files for one year.

★0905 CHECKS ISSUED REPORT (REPORT 72)

090501. General. The Checks Issued Report is also referred to as the Report 72. The term Report 72 is derived from the Report ID, **TC-AC-72A**, which is found in the upper left-hand corner of the report. See figure 9-5. The Report 72 is a monthly report that summarizes all of the transactions that affected the **TCIS** during the month. It is not cumulative. The date of the report is in the heading under the title and the effective date is the last day of the report month. This report lists all of the DO's transmittals of check issue detail and all the adjustments applied to the **TCIS** data file processed by the Department of the Treasury during the calendar month. Entry is based on when the Department of the Treasury processes transactions, not the issue month. Therefore, if the Department of the Treasury does not receive and process a DO's check issue transmittals before the end of a month, then the result would be a difference reported on the Comparison of Checks Issued Report and the transmittals will show on the next month's Report 72. This report provides a total for each check series by transaction code for each DSSN and issue month. It is comparable to a DO's SF 1179. The summary total for each DSSN and issue month in this report appears in the **TCIS** column of the Comparison of Checks Issued Report. This report is a valuable tool to improve the accuracy of check issue reporting through awareness of problem areas, tightening and monitoring internal controls, and reconciling check issue discrepancies. The DO should review it for all FMS Form 5206 adjustments (noted by a code 6 under the type column of the report) to ensure that each FMS Form 5206 issued has been received and processed. See paragraph 090501 of this chapter for further explanation of this report. Any DO not receiving this report a monthly should contact their supporting DFAS site. If for some reason a copy of the FMS Form 5206 cannot be provided by the supporting DFAS site, then contact the Department of the Treasury, Check Reconciliation Branch at (202) 874-8150. Do not report an FMS Form 5206 on the Internal Control Report until the document has been received.

★ **090502.** Distribution. The Department of the Treasury provides a copy of the monthly Report 72 to DFAS Cleveland, DFAS Indianapolis, and DFAS **Columbus** who in turn distribute the report to the DOs and settlement offices responsible for check issue reconciliation. The **DFAS-JJFD/IN** receives a copy of the report for monitoring and reference for checks issued.

★ **090503.** Explanation of Report Columns

A. AREA CODE. Code used in Treasury's computer systems to denote the Central Disbursing Office that is reporting.

61 = Air Force (DFAS **Columbus**)

62 = Army (DFAS Indianapolis)

63 = Navy (DFAS Cleveland)

B. DO SYMBOL. The disbursing station symbol number identifying the disbursing office.

C. ISSUE MONTH. The month and year that the checks were issued; the

SF 1219 accountability month.

D. CLEARANCE DATE. The date the check issue transmission and/or the adjustment transaction was entered into the [TCIS](#), in the format MMDDYY.

E. TYPE. The type of adjustment made by the Department of the Treasury against the [TCIS](#) data file, which could be one of the following:

6 = FMS Form 5206 has been issued by the Department of the Treasury due to an overpayment or underpayment based on the amount reported by the DO for the issued check. The [TCIS](#) data file was adjusted to reflect the revised amount of the check.

7 = The Department of the Treasury processed an adjustment to the [TCIS](#) data file upon request from the disbursing office.

8 = The Department of the Treasury processed an adjustment to the [TCIS](#) data file upon notification from the disbursing office that voided checks were erroneously reported with dollar values greater than zero.

F. TC (Transaction Code). This code identifies the type of entry made into the [TCIS](#) database:

32 = Disbursing office requested adjustment.

33 = FMS Form 5206 issued for check underpayment.

34 = Adjustment for voided check.

35 = FMS Form 5206 issued for check overpayment.

39 = Regular reporting of checks issued from electronic transmission of detail (Connect:Direct or Level 8).

G. AMOUNT. Represents the total dollar amount for each transmission submitted by the disbursing office, reported by check series and issue month. This must match the DO's SF 1179 report.

H. SUMMARY TOTAL. Represents the total dollar amount for all file transmittals submitted for the check issue month and the individual dollar amount of each adjustment made against the [TCIS](#) data file. If the entry is an adjustment, then the amount listed will only reflect the amount of the adjustment and not necessarily the amount of the check.

I. BLOCK NUM. Represents the first check serial number of the range for each transmittal and the individual check serial number of the check adjusted in the [TCIS](#).

090504. Use. Use Report 72 in the reconciliation process for differences reflected on the Comparison of Checks Issued Report, as prescribed in subparagraph [090602.D of this chapter](#). Also use it to verify that the Department of the Treasury has received all of the transmittal data sent by the agency in a given calendar month by dollar amount and serial number range. The DO compares the SF 1179 to the Report 72 to identify which check series, if

any, contain discrepancies, verify that all the DO's requested adjustments were accomplished and applied appropriately to the specific check serial number, and verify receipt of all FMS Forms 5206 that were issued as specified in subparagraph [090602.D.1.c of this chapter](#).

0906 CHECK ISSUE RECONCILIATION

★ **090601.** General. When an issuing DSSN reports a check to the Department of the Treasury, **TCIS** updates the check issue detail with the DSSN, check number, issue date, and amount, and reconciles each check with the check issue information reported by the DO. When the check is paid, **TCIS** matches it with available check detail. If the check issue detail differs from the detail in **TCIS**, then an FMS Form 5206 is generated and a check issue discrepancy occurs. The Department of the Treasury also reconciles **TCIS** with the SF 1219. The check issue total reported by the submission of the SF 1219 is compared to the total of the check issue detail in the **TCIS** for each issue month. If the SF 1219 total does not match the total in the **TCIS**, then a check issue discrepancy occurs. This discrepancy appears on the Comparison of Checks Issued Report. See subparagraph [090602.D of this chapter](#). The DO takes prompt corrective action to clear discrepancies noted by the Department of the Treasury. Every DO will be advised by the Department of the Treasury of any check issue discrepancy of \$1.01 or more detected during the check reconciliation process. The Department of the Treasury adjusts check issue discrepancies of \$1 or less without notifying the DO.

090602. Comparison of Checks Issued Report

A. The Department of the Treasury compares by issue month the dollar value of the checks issued as reported on the DO's SF 1219 with the dollar value of the checks issued recorded in the **TCIS**. If the check issue month does not balance, the totals for each reporting system (SF 1219 and **TCIS**) and the difference will be shown on the monthly Comparison of Checks Issued Report. See figure 9-6 for an example of this report. The DCRM also produces a two-part check issue balancing report called the SF 1219 Statement of Accountability to DCRM Check Issues Reported for use in helping to identify discrepancies.

★ B. Distribution. The Department of the Treasury produces this report monthly and sends a hardcopy to DFAS Cleveland, DFAS **Columbus**, and DFAS Indianapolis. DFAS Cleveland is responsible for providing the discrepancy information to each DSSN listed on the report for ALC 1700. The [Comparison of Checks Issued Report for ALC 1700 can be found on at <https://mzd-2.mech.disa.mil/cashwork/>](#). DFAS Indianapolis is responsible for ALC 2100, and DFAS **Columbus** is responsible for ALC 5700.

C. Explanation of Report Columns

1. DO SYMBOL
 - a. **REPORTING.** DO's central office reporting symbol (ALC).
 - b. **CHECK.** DO's disbursing station symbol number.

2. REPORT DATE. The month and year that the transactions were entered into the Department of the Treasury's computer system. The report date is used in the reconciliation process to identify when transactions occurred.

3. ISSUE DATE. The month and year that the checks were issued; the SF 1219 accountability month. The month and year are the only significant part of this date. The day is not relevant for reporting purposes.

4. CAB REF. (Cash Analysis Branch reference number). This number represents the SF 1219 journal voucher adjustment number. The purpose of this column is to distinguish SF 1219 journal voucher adjustments from the TCIS adjustments. The two adjustments are coming from different systems and impact different reports. The SF 1219 journal voucher adjustments apply to the DO's SF 1219 balances which are processed through the Department of the Treasury's Central Accounting and Reporting system (STAR). In addition to other DO requested adjustments, the Department of the Treasury also processes adjustments for small differences – \$50 or less. These small difference adjustments are processed through the STAR system and the OF 1017-G number reflects in this column.

5. TCIS REF. (TCIS reference number). This number identifies the type of adjustment affecting the TCIS issue balances and is processed through the TCIS. It can be comprised of several numbers representing different transactions, or the Department of the Treasury's journal voucher number for a journal voucher adjustment. The following is a guide to interpreting the reference number:

6 = FMS Form 5206 issued and TCIS adjustment made.

7 = Adjusted at request of disbursing office

8 = Adjusted at request of disbursing office for voided checks.

9 = Normal reporting of detailed check issue data through Direct:Connect or Level 8 electronic means.

0 = Zero-fill placeholder only.

A series of numbers containing only the numbers 0, 6, 7, 8, and/or 9 indicates multiple adjustments. Example: 6009 represents normal reporting with one or more FMS Form 5206 adjustments.

A series of numbers not limited to the numbers 0, 6, 7, 8, and/or 9 indicates the Department of the Treasury's journal voucher number used to adjust the TCIS. Example: 5622 represents a journal voucher number.

6. TRANS. CODE (Transaction Code). This code identifies the source of the transaction as follows:

210 = SF 1219 reporting for current month checks issued.

211 = SF 1219 reporting for processed FMS Form 5206 adjustments.

212 = SF 1219 reporting for DO's adjustments to prior month checks issued totals.

790 = Detailed check issued data reported and maintained in the Department of the Treasury's **TCIS** system.

7. **FMS 1219 REPORT.** The SF 1219 totals as reported in the Department of the Treasury/s STAR system, including the DO's SF 1219 original reporting and the adjustments made through the DO's and the Department of the Treasury's journal vouchers for the issue month and year.

8. **LEVEL 8 TCIS.** Net total of check issue detail in the Department of the Treasury's **TCIS** system for the issue month and year comprised of DO's reporting and adjustments made by the Department of the Treasury.

9. **DIFFERENCE.** The difference between the total of FMS 1219 Report (STAR system) and the total of Level 8 **TCIS** for each issue month and year. An asterisk beside the dollar value represents a credit, which indicates the total for the Level 8 **TCIS** system is greater than the total reported as the FMS 1219 Report. A debit indicates the FMS 1219 Report total is greater than the total of the checks issued in the Level 8 **TCIS** system.

★ 10. **AREA CODE.** Code used in the Department of the Treasury's computer systems to denote the Central Disbursing Office that is reporting.

61 = Air Force (DFAS **Columbus**)

62 = Army (DFAS Indianapolis)

63 = Navy (DFAS Cleveland)

D. **Reconciliation.** The DO researches each difference and makes necessary corrections. Clear check issue discrepancies within 60 days from the check issue dates. The documentation needed to properly research discrepancies on the Comparison of Checks Issued Report is the SF 1219, SF 1179, journal vouchers prepared for checks issued, check issue log, FMS Forms 5206, and the Report 72 for each reporting month containing the discrepancy.

1. Upon receipt of the Comparison of Checks Issued Report, the DO reviews each difference. Clear the aged discrepancies as soon as possible to prevent further aging. Compare the total for the DSSN report to the total for the **TCIS**, looking for common causes of discrepancies:

a. If the DSSN side is greater, then look for checks not reported by reviewing the Report 72. Determine if any checks issued were not reported as issued in the **TCIS**. Report missing checks using the DCRM immediately. Do not report the checks on the Statement of Accountability again. The discrepancy indicates that these checks were

reported on the Statement of Accountability at the time of issuance. If checks are in the DCRM but not reflected in the TCIS, then verify that the issue dates are correct. If correct, then check to see if the checks were entered near or after the end of the month. The discrepancy may be due to a timing issue. If the checks are properly entered and accepted in the DCRM, then the discrepancy will clear without further action by the next report. If the difference has not been resolved by the next report, then further action is required.

b. If the DSSN total is less than the TCIS total, then look for voided checks which were erroneously reported with values greater than zero, or checks dated with a prior or future month date which were reported as current month in the accountability. Refer to paragraphs 090105 and 090303 of this chapter for corrective procedures for erroneously reported voided checks.

c. Look for unprocessed FMS Form 5206 transactions. These could cause one side to be greater than the other, depending on the purpose of the FMS Form 5206. The Comparison of Checks Issued Report will show if any FMS Forms 5206 were issued by looking at the reference numbers. If the number contains one “6” and is followed by one or more zeros (“0”), a “7”, an “8”, and/or a “9”, then the TCIS total contains at least one FMS Form 5206 transaction. The Report 72, which corresponds to the date in the report date column, identifies the check number affected by the issuance of an FMS Form 5206. Check immediately to see if a copy of the FMS Form 5206 has been received, and if action has been taken to clear this discrepancy. If action has not been taken, then review the check issue records and the payment voucher to determine what the amount of the check should have been. The action needed to correct this discrepancy will depend on whether the error is limited to a reporting error or whether the check was negotiated for a different amount than it should have been. See sections 0903 and 0904, and Chapter 7 of this volume for procedures for processing, reporting, or obtaining a duplicate copy of the FMS Form 5206.

d. Look for between-month discrepancies. If there is a debit in one month and an offsetting credit for another month, then compare the check issue records to the Report 72 to determine which checks or adjustments caused the discrepancy, and which month is accurate according to the date on the voucher and the check. The type of adjustment action required depends on the results of the research and the cause for the discrepancy. Some causes for between-month differences are erroneous adjustment transactions, future dated checks included in total for current month checks issued reported on the SF 1219, wrong dates typed on

the checks, and late reporting of the SF 1219. Make corrections necessary to report the checks in the appropriate month of issuance. See section 0903 of this chapter for check issue adjustment procedures.

2. If the check issue discrepancy was not easily identified through the steps listed in the subparagraph [090602.D.1 of this chapter](#), then examine the check issue records more thoroughly. Continue researching the differences by comparing the amount for each check block series listed on the Report 72 to the amounts listed for each check series on the SF 1179 and the check issue logs. Look for differences in the total amounts between what was reported and issued for each check series. Use the DCRM inquiries and reports to identify the check series containing the discrepancy. Once the check block series has been identified, determine which particular check or checks caused the difference. When determining the corrective action, look at which record(s) needs to be adjusted in order to record the check issue accurately with respect to the issue date and amount, and if the appropriation has been charged correctly. Request an adjustment from the Department of the Treasury only if the DO's SF 1219 accurately reflects the reporting of the checks as written, and the corrective action does not substitute for the initial reporting of any checks issued. If the check was not accurately reported on the DO's SF 1219, then there may be an undercharge or overcharge to an appropriation, or the DO's cash accountability could be overstated or understated depending on the nature of the error.

3. See Table 7-3 of this volume for assistance in determining the appropriate corrective action. Also, Table 9-1 provides a quick overview containing samples of corrective action for specific situations.

Problem	Effect	Solution
1. Check reported incorrectly in the DCRM system and check issue file already transmitted to the Department of the Treasury. An FMS Form 5206 has not been issued yet.	Check issue discrepancies with TCIS totals higher or lower than SF 1219 totals.	Request a check issue adjustment from the Department of the Treasury. Ensure notification of check issue correction is received. Refer to subparagraph 090303.A for more information.
2. Check reported incorrectly in the DCRM system and check issue file has not been transmitted to the Department of the Treasury.	The DCRM system file total does not match the total of check issues for a check block series.	Request deletion/replacement of erroneous check block series file in the DCRM system. Create a new file with the corrected check issue information. Refer to paragraph 090107 for more information.
3. Check issued and dated 30th of the month but not included as a check issued on the accountability statements.	Check issue discrepancy with TCIS higher than the DO's SF 1219. SF 1219 may also be out of balance, unless the voucher was not recorded either.	Prepare and process a journal voucher for prior month check issue. If the payment voucher has not been previously reported, then record the voucher and accounting entries. Refer to subparagraph 090304.A for more information.
4. Check dated and issued in previous month, but reported as current month issues on the accountability statement.	Check issue discrepancy between months.	Prepare and process a journal voucher to move the check issue to the proper month. Refer to subparagraph 090304.A for more information.
5. The DO has the checks issued on the proper month's SF 1219, but the Department of the Treasury has the SF 1219 recorded as the wrong month.	Check issue discrepancy between months.	Request the Department of the Treasury to do an adjustment to move the checks issued (SF 1219) to the proper month. Refer to subparagraph 090304.C for more information.
6. A check is negotiated and paid but the DO has not reported the check issue data to the Department of the Treasury.	The TCIS rejects claim for payment until the check is reported as issued. No limited payability cancellation credits will be processed. Delays or precludes the detection of possible fraud, theft, or altered check, and possible bank reclamation procedures. Payee received the funds for the check when negotiated. If the DO has included this check in the accountability statement as issued, then there will be a check issue discrepancy reflected on the Comparison of Checks Issued report.	Review check issue records to ensure the check is valid. If the payment of the check is due to an act of fraud or theft, then take the appropriate action to initiate an investigation, bank reclamation procedures, and loss of funds action, as applicable. Check the status of the check in the DCRM system. Take action, as necessary, to either input or correct the DCRM check file in order to report the check issue detail to the Department of the Treasury.

Table 9-1. Samples of Corrective Actions for Check Issue Discrepancies

Problem	Effect	Solution
<p>7. The DO receives an FMS Form 5206 issued by the Department of the Treasury for a check discrepancy.</p>	<p>Check issue discrepancy reflected on the Comparison of Checks Issued Report. Possible underpayment, overpayment, error in reporting, or altered check.</p>	<p>Review the check issue records to determine if the error is a reporting error, underpayment, or overpayment. For reporting errors, adjust the record that is in error. If the TCIS entry was the only incorrect reporting, then the error was corrected when the FMS Form 5206 was issued. If the check issue total is incorrect on the SF 1219, then report the adjustment under Section II, Part A, column 4 on the SF 1219 for adjustments related to FMS Forms 5206. For overpayments, refer to subparagraph 070605.F of this volume. For underdrafts, refer to subparagraph 070606.E of this volume. Record receipt of the FMS Form 5206 on the monthly internal control report and follow procedures as prescribed to complete report requirements.</p>
<p>8. The DO has not received an FMS Form 5206, which was issued by the Department of the Treasury.</p>	<p>Check issue discrepancy. The Report 72 indicates an FMS Form 5206 has been issued, but the DO has no record of receipt.</p>	<p>Request a copy of the FMS Form 5206 from the supporting DFAS site. Review the Report 72 to identify the check with the discrepancy. Follow the procedures stated for problem 7 when the FMS Form 5206 is received.</p>
