CHAPTER 2

NONAPPROPRIATED FUND STANDARD GENERAL LEDGER

0201 GENERAL

This chapter prescribes the requirements of the Nonappropriated Fund Standard General Ledger (NAFSGL). The NAFSGL is a modified version of the United States Standard General Ledger and must be used for accounting and financial statement reporting to ensure the information in the financial statements is consistent for all Nonappropriated Fund Instrumentalities (NAFIs). This will provide for standardization and sufficient traceability from the financial statements through the general ledger balances to the source documentation for audit purposes. At a minimum, the NAFSGL is updated annually and is published by the Office of the Under Secretary of Defense (Comptroller) prior to 1 October of each year.

*0202 SCOPE

This chapter provides the general ledger account numbers to be used by all NAFIs. The deadline for implementation of the NAFSGL is no later than [October 1, 2016](#). As an interim solution until system changes can be implemented at the transaction level, crosswalks from the NAFIs' chart of accounts to the NAFSGL may be utilized.

0203 OVERVIEW

020301. Basic Structure

The general ledger accounts are self-balancing (the total debits equal the total credits) and provide for accounting of business events. The Nonappropriated Fund Standard General Ledger Chart of Accounts (Figure 2-1) provides the basic structure for the NAFSGL, identifies, and defines the proprietary accounts to be used in accounting and reporting. The Chart of Accounts contains basic account attributes, including account number, account level, and account title. Each military department will use the accounts required for its particular financial operations. The NAFIs and military departments may not have to use all accounts.

020302. Financial Transactions

All resources acquired and used, and valid claims to and against those resources, are to be recorded on the basis of financial transactions. Asset and liability accounts cover the collection and payment of cash, the proper classification of assets (e.g., receivables, prepayments, inventory, and fixed assets), and the recognition and proper classification of liabilities. Revenue and expense accounts measure the realization of revenues from the sale of goods and services, and the recognition of costs through the use and consumption of assets. The financial control over resources provided through accounting records provides managers with a tool that will help effectively discharge their stewardship function for those resources.

0204 NONAPPROPRIATED FUND STANDARD GENERAL LEDGER ACCOUNTS

020401. Categories

The NAFSGL uses a 4-digit account numbering system. Within the NAFIs, the SGL will be implemented to support financial statement reporting at the Program Group level and the consolidated Military Department level. All data must summarize to the 4-digit SGL accounts and be traceable to the NAFIs using sub-accounts. The definition of each category and the accounts that make up that specific general ledger category are discussed in the following paragraphs. General ledger accounts are grouped into the following major summary categories:

<u>Account Numbers</u>	<u>Category</u>
1000	Assets
2000	Liabilities
3000	Net Worth
4000	Revenue
5000	Expenses
6000	Cost of Goods Sold
7000	Extraordinary Items

020402. Assets

Asset accounts are accounted for in the 1000 series. Current asset accounts consist of various cash, investments, receivables, inventory, and prepaid expenses. Noncurrent asset accounts consist of various fixed assets (property, plant, and equipment), pension benefit assets, and other noncurrent assets. Refer to [Volume 13](#), Chapter 3 for more information on assets.

A. Cash/Investments. Cash consists of coins, paper currency, and readily negotiable instruments such as money orders, checks, and bank drafts on hand or in transit for deposit; amounts on demand deposit with banks or other financial institutions; and cash held in petty cash or change funds. Investments consist of: securities purchased for investments, certificates of deposit with a maturity date of less than 1 year, Treasury notes, bonds, and certificates of indebtedness issued by Federal Government agencies, and foreign currency investments.

B. Receivables. Receivables are amounts due from others when the right to receive funds occurs. This may result from amounts owed by employees, customers, and organizations for amounts earned on products sold and services rendered.

C. Other Current Assets. Other current assets are prepaid expenses that are payments and expenditures made in contemplation of future benefits or performance.

D. Inventory. Inventory consists of goods held for sale in the normal course of business, designated as resale inventory items, and warehouse materials not accounted for as prepaid supplies or fixed assets.

E. Fixed Assets. Fixed assets consist of all property, plant, equipment, land improvements, accumulated depreciation, construction in progress, and fixed assets in transit when ownership passes to the NAFI before receiving the asset.

F. Other Noncurrent Assets. Other noncurrent assets consist of long-term pension benefit assets, receivables and investments. Pension Benefit Asset is reported when the Pension Plan is overfunded and is classified as a noncurrent asset. Refer to [*Statement of Financial Accounting Standards \(FAS\) No. 158*](#), “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans” and [Volume 13](#), Chapter 11 for reporting requirements.

020403. Liabilities

Liabilities are accounted for in the 2000 series. Current liability accounts consist of accounts payable, post-retirement benefit obligations, and other liabilities. Long-term liability accounts consist of loans payable, post-retirement benefit obligations, and other long-term liabilities. Refer to [Volume 13](#), Chapter 3 for more information on liabilities.

A. Accounts Payable. Accounts payable consists of the amounts owed for goods and services.

B. Post-Retirement Benefit Obligation (PBO) - Current. Post-retirement benefit obligation is reported when the Pension Plan is underfunded. This means that the Plan Assets are less than the Plan Benefit Obligation. PBO is classified as a current liability as determined and provided by the Pension Provider. This includes any other post-retirement benefit plan, such as retiree health care. The benefit obligation is the accumulated post-retirement benefit obligation. Refer to FAS No. 158 for reporting requirements.

C. Other Current Liabilities. Other current liabilities consist of various payables, including loans, leases, interest, payroll, taxes, and unearned revenue.

D. Long-Term Loans Payable. Long-term loans payable consists of the amount of loans and notes that will not be paid within 12 months.

E. Post-Retirement Benefit Obligation (PBO) – Long-Term. Post-retirement benefit obligation – long-term is reported when the Pension Plan is underfunded. This means that the Plan Assets are less than the Plan Benefit Obligation and would be classified as a long-term liability as determined and provided by the Pension Provider. This includes any other post-retirement benefit plan, such as retiree health care. The benefit obligation is the accumulated post-retirement benefit obligation. Refer to FAS No. 158 for reporting requirements and [Volume 13](#), Chapter 11.

F. Other Long-Term Liabilities. Other long-term liabilities consist of the amount of leases, loans, claims, and notes that will not be paid within 12 months.

020404. Net Worth

Net Worth accounts are accounted for in the 3000 series. Net Worth consists of Retained Earnings, Contributed Capital, Minimum Pension Liability Adjustment, and other equity transactions pursuant to [DoDI 1015.15](#), paragraph 6.4.2.4. The Minimum Pension Liability Adjustment account is any adjustment made to the existing pension balances in the Balance Sheet. These adjustments will be posted as an offset to the equity account in the Balance Sheet and can be either an addition or reduction to Net Worth. These temporary adjustments are treated in the Net Worth section of the Balance Sheet in the same manner as the “unrealized gains/losses on investments” pursuant to [FAS No. 115](#), “Accounting for Certain Investments in Debt and Equity Securities.” In addition, these temporary adjustments are not calculated in the net worth calculation. Refer to [FAS No. 158](#) for reporting requirements.

020405. Revenue

Revenue accounts are accounted for in the 4000 series. Revenue consists of income earned from the sale of goods or services, contributions, interest, and dividends. Revenue is classified as operating and non-operating. Operating revenue accounts are 4010 – 4120. Non-operating revenue accounts are 4130 - 4240. Refer to [Volume 13](#), Chapter 5 for more information on revenue.

020406. Expenses

Expense accounts are accounted for in the 5000 series. Expenses consist of operating expenses, non-operating expenses, and program costs including depreciation and interest. Refer to [Volume 13](#), Chapter 5 for more information on expenses.

020407. Cost of Goods Sold

Cost of Goods Sold accounts are accounted for in the 6000 series. The total cost of inventory sold includes materials, direct labor, and overhead. Refer to [Volume 13](#), Chapter 5 for more information on the Cost of Goods Sold calculation.

020408. Extraordinary Items

Extraordinary items are accounted for in the 7000 series. Extraordinary items consist of costs or income so unusual in type or amount as to be accorded special treatment in the accounts or separate disclosure in financial statements. Extraordinary items are also unusual and unexpected events. Although the normal balance for this account is a credit, it is acceptable in certain instances for this account to have a debit balance. Refer to [Volume 13](#), Chapter 5 for more information on extraordinary items.
