

## VOLUME 3, CHAPTER 6: “REPROGRAMMING OF DOD APPROPRIATED FUNDS”

### SUMMARY OF MAJOR CHANGES

All changes are denoted by [blue font](#).

Substantive revisions are denoted by an \* symbol preceding the section, paragraph, table, or figure that includes the revision.

Unless otherwise noted, chapters referenced are contained in this volume.

Hyperlinks are denoted by [\*\*\*bold, italic, blue and underlined font\*\*\*](#).

The previous version dated March 2011 is archived.

PARAGRAPH	EXPLANATION OF CHANGE/REVISION	PURPOSE
060302	Added requirement that Components use the Enterprise Funds Distribution (EFD) system for transmitting DD Form 1414, Base for Reprogramming Actions submissions	Update
060401.E	Updates to sub-activity reprogramming requirements	Update
060407	Added requirement that Components use the Enterprise Funds Distribution (EFD) system to submit reprogramming actions	Update
060502	Added requirement that Components use the Enterprise Funds Distribution (EFD) system to update DD Form 1416, Report of Programs	Update
0612	FY 2014 National Defense Authorization Act eliminated the requirement for the Readiness Transfer Report	Deleted
Appendix B	FY 2014 National Defense Authorization Act eliminated the requirement for the Readiness Transfer Report	Deleted

## CHAPTER 6

**REPROGRAMMING OF DOD APPROPRIATED FUNDS**

## 0601 PURPOSE

## 060101. Department for the Reprogramming

This chapter establishes the policies of the Department for the reprogramming of appropriated funds. Guidance in this chapter reflects recognition by the Congress of the practice of reprogramming DoD funds covered in DoD Appropriations Acts as a necessary, desirable, and timely device for achieving flexibility in the execution of DoD programs. Also, reprogramming policies and procedures for military construction and family housing appropriations covered by the Military Construction Appropriations Act can be found in Chapter 7 and the National Intelligence Program (NIP) reprogramming policies and procedures covered by the National Security Act of 1947, as amended, can be found in section 0606, Reprogramming of Intelligence Resources.

## 060102. Reprogramming Procedures

Procedures are provided for establishing the base for reprogramming actions; submitting, approving, and processing reprogramming actions; and for the report of programs reflecting all supplemental appropriations, rescissions, transfers, and reprogramming actions.

## 060103. Reprogramming Policy

The policy herein replaces reprogramming guidance contained in the [March 2011](#), DOD 7000.14-R, "Financial Management Regulation," Volume 3.

## 0602 REPROGRAMMING DOCUMENTS IN GENERAL

## 060201. DD 1414, Base for Reprogramming Actions

The DD 1414 establishes the base for reprogramming actions and transfers. [The report shall include a table for each appropriation enacted in the annual Department of Defense Appropriations Act, with separate columns to display the Program Base Presented to Congress, Approved Changes Prior to Congressional Action \(e.g., budget amendments or other changes to the budget formally submitted an appropriations committee\), Changes Reflecting Congressional Action \(e.g., project level adjustments or undistributed rescissions as indicted in Conference Reports\), and the Program Base Reflecting Congressional/Presidential Action. Tables for each appropriation shall delineate each budget activity and program, project, and activity established in administration budget justification materials or in the Conference Report accompanying enacted funding bills. Each budget activity and program, project, and activity shall be footnoted to identify those items known to be of special interest to one or more of the congressional committees and those items specifically denied by the Congress. The items should include, as a minimum, those items for which additional funds have been provided or items for which funding](#)

is specifically reduced as shown in the project level table or in paragraphs using the phrases “only for” or “only to” or are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414).

060202. DD 1415, Reprogramming Action

Reprogramming actions, upon approval of the Department, will be used to request the prior approval (DD 1415-1) [of the congressional committees to realign or transfer appropriated funds](#) or for internal reprogramming (DD 1415-3) requiring audit-trail type documentation of the [realignment or transfer of appropriated funds](#).

060203. DD 1416, Report of Programs

The DD 1416 report reflects the congressionally approved programs as enacted, reprogramming actions which have been approved, congressionally directed undistributed amounts and transfers, and reprogramming of funds that have been implemented by a DoD Component using below-threshold reprogramming flexibility. This report is generated in the [Enterprise Funds Distribution \(EFD\) system](#), quarterly and submitted 30-days after the end of each quarter, electronically to the congressional defense committees by the Under Secretary of Defense (Comptroller) (OUSD(C)), Program and Financial Control Directorate (P&FC), for Title III, Procurement, and Title IV, Research, Development, Test, and Evaluation and annually [for Title I, Military Personnel, and Title II, Operation and Maintenance appropriations](#).

0603 DETAILED PROCEDURES FOR BASE FOR REPROGRAMMING ACTIONS

060301. General

The DD Form 1414, Base for Reprogramming Actions, establishes the base from which reprogramming actions may be taken. It identifies line items within each appropriation covered in the DoD Appropriations Acts.

060302. Due Date

Within 30 days following enactment of the Department of Defense (DoD) Appropriations Act, the Components will submit their DD 1414, Base for Reprogramming Actions to OUSD(C) P&FC to ensure the Department can submit the Base for Reprogramming Actions to the congressional committees within 60 days of enactment as required by recurring general provisions in DoD Appropriations Acts (e.g., section 8007 of division C of Public Law 113-235, the Department of Defense Appropriations Act, 2015). The DoD Components will submit their DD 1414 through the [Enterprise Funds Distribution \(EFD\) system](#), for review prior to submission to the congressional committees.

060303. Transmittal

Upon determination by the OUSD(C) P&FC that the Base for Reprogramming Action is acceptable, OUSD(C) P&FC will submit to OMB, pursuant to OMB Circular A-11, section 22.3.

After clearance by OMB, the OUSD(C) P&FC will prepare for printing and transmittal to the congressional committees. Final printed copies will be distributed to the DoD Components as well as posted on the Comptroller public website.

060304. Security Classification

In order facilitate use by the staffs of the congressional defense oversight committees, the Department will submit an unclassified report. Therefore, each Service shall submit an unclassified DD 1414 and OUSD(C) P&FC will be responsible for proper security review prior to publication. All classified programs should be consolidated into a single line item titled Classified Programs and should be displayed at the end of the Direct Program section.

060305. Detailed Instructions for Preparation of the DD 1414

Detailed instructions for the Base for Reprogramming Actions for the initial appropriations act are provided in the appendices to this chapter.

0604 REPROGRAMMING ACTIONS

060401. Reprogramming Actions Requiring Written Congressional Approval

Two types of reprogramming actions will be used to request the prior approval of the congressional defense committees. Both requests are submitted using DD 1415-1, Prior Approval. The first type is for specific requirements, [which usually are combined and submitted monthly. The second type is the annual Omnibus reprogramming action submitted prior to June 30 of each year](#), which was established in Fiscal Year (FY) 1991 to streamline the reprogramming process for the congressional committees and the Department. With the exception of [reprogrammings of National Intelligence Program resources \(paragraph 060604\)](#), the USD(C) submits all reprogramming actions to the congressional defense committees. The Department is expressly prohibited from preparing or forwarding to the Congress a prior approval reprogramming action except “for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which reprogramming is requested has been denied by the Congress.” It is the Department’s policy that reprogramming actions, which require prior approval of the congressional committees (DD 1415-1), are those which involve the application of funds that:

A. Increase the procurement quantity of a major end item, such as an individual aircraft, missile, naval vessel, tracked combat vehicle, and other weapon or torpedo and related support equipment for which funds are authorized. (In such cases where specific congressional language is provided allowing for additional quantities to be procured within appropriated funds, increases to quantities for major end items shall be submitted to the USD(C) for approval as a DD 1415-3, Internal Reprogramming action.)

B. Affect an item that is known to be or has been designated as a matter of special interest to one or more of the congressional committees. In rare instances, when funds from special interest items are to be reprogrammed from an existing program, subprogram,

project, or subproject to another program, subprogram, project, or subproject within the same procurement line item or program element, letter notification to the congressional committees may be made. Letters shall be submitted to the congressional committees by the DoD Component involved only after advance coordination with the applicable OUSD(C) P/B Directorate.

C. Use general transfer authority. Any movement of funds between appropriations or legal subdivisions requires statutory transfer authority. Unless specific transfer authority is provided elsewhere, general transfer authority, which is provided in annual DoD Appropriations and Authorization Acts, must be used. Any movement of funds from supplemental appropriations also uses the general transfer authority provided in the annual DoD Appropriations Act. Section 2214 of Title 10 of the United States Code (U.S.C.) and the annual Appropriations Act provide limitations on programs for which general transfer authority may be used. Such authority may not be used except to provide funds for a higher priority item, based on unforeseen military requirements, than the items for which funds were originally appropriated, and may not be used if the Congress has denied funds for the item. Exceptions to the use of a DD 1415-1, Prior Approval Reprogramming action, may apply if reclassification of programs to the proper appropriation for execution is required (i.e., these actions do not change the purpose for which the funds were originally appropriated). (See paragraph 060402A).

D. Exceed thresholds agreed upon between the committees. Effective for FY 2015, the basic reprogramming thresholds agreed upon between the committees and the Department are: \$10 million for military personnel; \$15 million for operation and maintenance; \$20 million for procurement; and \$10 million for research, development, test, and evaluation. These thresholds are cumulative from the base for reprogramming value as modified by any congressional action, to include the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogramming actions. The BTR limitation is the net value of transfers into or out at the specified level. For example, transfers using Below Threshold Reprogramming (BTR) authority of \$5.0 million out of an RDT&E PE line item and transfer of \$4.0 million into the same RDT&E PE line item would result in a total amount transferred of \$1.0 million, with the consequence that the \$1.0 million of BTR authority was used. The thresholds agreed upon between the committees and the Department are as follows:

1. Military Personnel. A cumulative increase of \$10 million or more in a budget activity.
2. Operation and Maintenance. A cumulative increase or decrease of \$15 million or more to a budget activity or to a Defense Agency for Operation and Maintenance, Defense-Wide appropriation. When the congressional committees impose reprogramming thresholds on specific sub-activity group categories, these threshold amounts are separately identified on the DD 1414, Base for Reprogramming Actions, and reprogramming restrictions apply. For example for FY 2015, congressional committees imposed reprogramming thresholds on specific sub-activity group categories.

a. The committees required the Department to follow Prior Approval procedures for transfers in excess of \$15.0 million **out** of the following budget sub-activities:

(1) **Army:** Maneuver units; modular support brigades; land forces operations support; force readiness operations support; land forces depot maintenance; base operations support; and facilities sustainment, restoration, and modernization.

(2) **Navy:** Aircraft depot maintenance; ship depot maintenance; and facilities sustainment, restoration, and modernization.

(3) **Marine Corps:** Depot maintenance and facilities sustainment, restoration, and modernization

(4) **Air Force:** Primary combat forces; combat enhancement forces; combat communications; and facilities sustainment, restoration, and modernization.

(5) **Air Force Reserve:** Depot maintenance.

(6) **Air National Guard:** Depot maintenance.

b. The committees required the Department to follow Prior Approval procedures for transfers in excess of \$15.0 million **into** the following budget sub-activity:

(1) **Army National Guard:** Other personnel support/recruiting and advertising.

c. **Defense-Wide O&M:** transfer of funds to or from the levels specified for defense agencies in excess of \$15.0 million shall be subject to a PA reprogramming action.

d. For FY 2015, the committees further require the Services, with Comptroller coordination, to provide written notification not later than 15-days prior to implementing transfers in excess of \$15.0 million **out** of the following budget sub-activities:

(1) **Navy:** Mission and other flight operations and mission and other ship operations

(2) **Air Force:** Operating forces depot maintenance; mobilization depot maintenance; training and recruiting depot maintenance; and administration and service-wide depot maintenance.

e. Defense Health Program: For FY 2015, any transfer of funds from the In-House Care budget sub-activity to any other sub-activity shall be

subject to a PA reprogramming action. In addition, any cumulative transfer of funds in excess of \$10,000,000 from the Private Sector Care sub-activity requires written notification to the congressional defense committees not later than fifteen days after such a transfer occurs.

f. The above requirements were set forth in reprogramming guidelines in the explanatory statement accompanying the DoD Appropriations Act, 2015 and are subject to change in conference reports accompanying future appropriations acts.

3. Procurement. A procurement program is defined by the items included in the DD 1414, Base for Reprogramming Actions.

a. Increases. A cumulative increase of \$20 million or more or 20 percent of the program base amount, which includes the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogrammings (i.e., cumulative over the entire obligational availability of a specific year appropriation), whichever is less.

b. Decreases. A cumulative decreases of \$20 million or more, or 20 percent of the program base amount, which includes the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogramming (i.e., cumulative over the entire obligational availability of a specific year appropriation), whichever is less.

4. Research, Development, Test, and Evaluation (RDT&E). A research program is defined by the items included in the DD 1414, Base for Reprogramming Actions.

a. Increases. A cumulative increases of \$10 million or more or 20 percent of the program base amount, which includes the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogramming (i.e., cumulative over the entire obligational availability of a specific year appropriation), whichever is less.

b. Decreases. A cumulative decreases of \$10 million or more, or 20 percent of the program base amount, which includes the initial appropriation, rescissions, supplemental appropriations, and approved DD 1415 reprogramming (i.e., cumulative over the entire obligational availability of a specific year appropriation), whichever is less.

E. Initiates a new start. A new start program for RDT&E is a new program element or project, or a major component thereof, as determined by specific supporting information provided in the R-2 and R2A (RDT&E Budget Item/Project Justification) exhibits not previously justified by the Department and funded by the Congress through the normal budget process is considered to be a new start. A new start program for Procurement is a new procurement line item or major component thereof, as determined by specific supporting information provided in the P-5 (Cost Analyst) or P40A (Budget Items Just for Aggregated Items) exhibits not previously justified. Congressional committees discourage the use of the reprogramming process to initiate programs. Except for extraordinary situations, consideration

will not be given new start reprogramming requests for which the follow-on funding is not budgeted or programmed. Funding for new starts may not be obligated without prior approval or written notification (see paragraphs 060403 and 060404). A program effort in one year in the Procurement and RDT&E accounts may be extended into a subsequent fiscal year without constituting a new start. This is considered an extension of the effort initiated in the prior year program, and could include a skip year for execution purposes. When this occurs, the program should be footnoted as such on the DD 1416, Report of Programs, with sufficient justification for the extension. Due to the characteristics of Military Personnel and Operation and Maintenance programs, new starts seldom occur in those appropriations. New starts in these appropriations would be significant new programs, efforts, or activities that have not been explicitly justified to the Congress in budget justification material. An example would be the establishment of a Pacific Distribution System. In some instances, a letter notification may be appropriate in these circumstances but only with the explicit approval of the USD(C).

The DD 1415-1 should include a brief description of the total program being initiated, and of the total cost of the program and of proposed funding and procurement quantities by fiscal year. It should provide enough background information to demonstrate that the item is ready for research or procurement include explanation as to why the program must be initiated now and, if a budget line is not already included in a budget currently under Congressional consideration, an explanation of how subsequent years' funding will be provided. The Department will not approve new starts that do not have budgeted or programmed follow-on funding. The DD 1415-1 must also explain why the source funds are no longer needed and any impact. See paragraph 060404 for failure to provide proper notification.

F. Terminates Appropriated Programs:

1. Eliminates a procurement program, or a subprogram, of \$20 million or more.
2. Eliminates a RDT&E program element, project, or subproject of \$10 million or more.

See paragraph 060403D for terminations falling within below-threshold limits.

G. Use Proceeds for Replacement of Certain Items Sold from Inventory. Prior congressional approval obtained using a DD 1415-1 is required when proceeds from items sold from inventory are used to acquire an asset that is not a "like replacement" item (e.g., that is not of identical type, model, and series designation). Such requests may be included either as a separate part within the monthly reprogramming, or submitted as a separate, stand-alone DD 1415-1 action. See section 0609 for additional information and guidance.

060402. Internal Reprogramming Actions

DD 1415-3, Internal Reprogramming, actions are audit-trail type actions processed within the Department to serve various needs. One is to reclassify funds for proper execution into a different line item, program element, or appropriation than that in which the funds were appropriated. Another includes reprogramming to or from transfer accounts. A third reflects

approval to increase quantities, when not otherwise requiring prior approval of the congressional committees.

A. Reclassification Actions. In certain instances, it is necessary to reclassify funds to a different line item, program element, or appropriation than that in which the funds were appropriated by the Congress. Such reclassifications do not involve any change in the substance of the program; the funds will be used for the same purposes originally contemplated and budgeted for, testified to, and described in the justifications submitted to the congressional committees, and subsequently appropriated by the Congress. These actions may also involve realignment of congressionally added programs that are more appropriately executed in a different program line or in a different account than the line or account in which the funds were appropriated. In cases where the realignment is between DoD appropriations, then the use of general transfer authority would be involved, along with the legal requirements thereof.

B. Transfer Appropriations. Transfer accounts are those appropriations with funding that will be subsequently transferred to other appropriations for execution. These accounts include, but are not limited to: Environmental Restoration, Army; Environmental Restoration, Navy; Environmental Restoration, Air Force; Environmental Restoration, Defense-Wide; Environmental Restoration, Formerly Used Defense Sites, Drug Interdiction and Counter-Drug Activities, Defense; Overseas Contingency Operations Transfer Fund; Foreign Currency Fluctuations, Defense; and Foreign Currency Fluctuations, Construction, Defense. Movement of funds from these accounts to other appropriations is generally exempt from the use of general transfer authority.

C. Procurement Quantities. Approval for increases to procurement quantities for major end items, not otherwise requiring prior approval of the congressional committees.

060403. Letter Notifications [to Congress](#)

Letter notification to the congressional committees is required in advance of initiating requirements for:

A. A new procurement line item not otherwise requiring prior approval action.

B. A new procurement line item or major component thereof costing less than \$20 million for the entire effort.

C. Establishment of new development programs costing less than \$10 million for the entire effort.

D. Initiation of safety programs or safety modifications costing less than \$20 million for the entire effort; can be initiated immediately following congressional notification.

E. Termination of programs falling within the below threshold reprogramming amounts (procurement programs or subprograms costing less than \$20 million;

RDT&E programs, projects, or subprojects costing less than \$10 million) as long as the procurement line item or RDT&E program element is not eliminated.

F. Identification of specific line items to satisfy specific transfer notification requirements established by Congress.

Congress requires a 30-day notification to the Defense Committees prior to implementation. The Component may implement the reprogramming action 30-days after congressional notification unless an objection is received from a committee.

060404. Failure to Provide Proper Notification

Recurring general provisions in DoD Appropriations Acts (e.g., [section 8077 of division C of Public Law 113-235, the Department of Defense \(DoD\) Appropriations Act, 2015](#)) prohibit use of funds made available through a reprogramming that creates or initiates a new program, project, or activity unless such program, project, or activity must be undertaken immediately in the interest of national security and only after written prior notification to the congressional defense committees.

060405. Transfer Authority

Any movement of funds between appropriations or legal subdivisions requires transfer authority. There are at least five types of transfer authority:

A. Transfer Appropriations. Authority for Transfer Fund appropriations is contained in the annual DoD Appropriations Act.

B. Foreign Currency Fluctuations. Authority for the Foreign Currency Fluctuations, Defense, appropriation is contained in Public Law 95-457 (92 Stat. 1236) and section 2779 of Title 10 of the U.S.C. Authority for the Foreign Currency Fluctuations, Construction, Defense, appropriation is contained in section 121 of Public Law 99-591, section 2779 of Title 10, U.S.C., and the annual Military Construction Appropriations Act.

C. General Transfer Authority (GTA). The use of GTA is required for transfers between appropriations and legal subdivisions, when other specific authority is not provided. It is included in a general provision in the annual DoD Appropriations Act and is authorized in the annual National Defense Authorization Act, most recently [section 8005 of division C of Public Law 113-235, the DoD Appropriation Act, 2015, and section 1001 of the annual National Defense Authorization Act for FY 2015, Public Law 113-291](#). When GTA is used, the Secretary of Defense must make a determination that such action is necessary in the national interest. The OMB must also approve the use of GTAs. For prior approval reprogramming actions that use GTA, OMB must approve transmittal of the action before the Department forwards to the congressional defense committees. The OMB apportions funds that use GTA after congressional approval is received for prior approval actions or the internal reprogramming action [has been approved and signed by USD\(C\)](#). Beginning with the DoD Appropriations Act, 2009, recurring general provisions have incorporated into law the funding levels specified in certain tabular entries in [appropriations act explanatory statements](#) or

conference reports (e.g., section 8006 of the DoD Appropriation Act, 2015). Such recurring general provisions provide that where funding levels specified in Project Level Adjustment Tables for a particular program, project, or activity exceed the amount requested, that program, project, or activity must be carried out at the prescribed level. Amounts specified in such project level adjustment tables **are not** subdivisions of appropriations for purposes of GTA, and may be transferred or reprogrammed after appropriate congressional notification. Any transfers among military personnel appropriations shall not be taken into account for purposes of the limitation on the amount of funds that may be transferred under GTA.

D. Intelligence Programs. Authority for transfers in intelligence programs is specified in paragraph 060601.

E. Special. Additional transfer authority for special situations is contained in various sections of Title 10 of the U.S.C. and in annual National Defense Authorization and Appropriations Acts. Section 127a of Title 10, U.S.C., provides limited transfer authority in the case of certain operations. Use of this transfer authority requires the use of prior approval reprogramming procedures.

060406. Detailed Instructions and Formats for Preparation of DD 1415

Detailed instructions for DD 1415-1 (Prior Approval) and DD 1415-3 (Internal Reprogramming) are provided in the appendices to this chapter. Templates are available by contacting the OUSD(C) P&FC reprogramming point of contact at 703-697-0022 (DSN 227-0022).

060407. Submittal by Components

Military Departments must submit proposed DD 1415 actions formally by a signed memorandum addressed to the USD(C) from the Assistant Secretary (Financial Management and Comptroller) of the Military Department. Requests from a Defense Agency must be signed by its Comptroller (or equivalent official). Such requests must be submitted electronically, and all requests are due the 5<sup>th</sup> work day of the month for inclusion in the monthly reprogramming submission. When a prior approval reprogramming for investment programs is required to initiate a new start (paragraph 060401E) or to terminate a program (060401F), a copy should also be provided to the Office of Under Secretary of Defense for Acquisition, Technology and Logistics; Director, Acquisition Resources & Analysis. For all reprogramming actions, the DD 1415 must be submitted to OUSD(C) P&FC, through the EFD system. The classified details must be provided at the same time in an electronic submission to OUSD(C) via the SIPRNET. The OUSD(C) will ensure that proposed reprogramming actions affecting the NIP resources are provided to the Office of the Director for National Intelligence (ODNI). The OUSD(C) will ensure will ensure that proposed reprogramming actions affecting MIP resources are provided to the Undersecretary of Defense (Intelligence), and consistent with section 102A(d)(1)(B) of the National Security Act of 1947 (50 U.S.C. § 3024(d)(1)(B)) shall consult with the ODNI Office of Chief Financial Officer before transferring or reprogramming funds made available by Congress specifically for the MIP. The DoD Component memorandum shall include the following:

A. Reprogramming actions outside the Omnibus reprogramming to the congressional committees, will only be made for those actions involving critical requirements or unforeseen circumstances that cannot wait for implementation of the Omnibus due to contract award dates or other time sensitive reasons. In these cases, individual reprogramming actions will be entertained, and the transmittal memorandum must clearly define the urgency of the requirement. [Ordinarily, such urgent requirements shall be combined for inclusion in a monthly reprogramming submission the congressional committees.](#)

B. A statement that the DD 1415–1 Prior Approval reprogramming action has been cleared by the DoD Directorate for Freedom of Information and Security Review, Washington Headquarters Services. The copy with the original “Cleared for Open Publication” stamp should accompany the transmittal memorandum.

C. Because the DD 1415 actions are now being posted on the Comptroller’s Home Page on the World Wide Web, the DD 1415 reprogramming action should not refer to or identify the intelligence resources. Therefore, the cover letter transmitting the DD 1415 to the OUSD(C) must contain a statement that the reprogramming does or does not affect MIP or NIP resources. If NIP resources are affected, the reprogramming should be cleared with the ODNI, and the cover letter should state that this has been done.

D. Identification of any new starts being requested, and whether the new starts were approved by a Secretary’s decision document during the Program/Budget review or other action.

060408. Signed DD 1415s

The USD(C) has the authority to sign all reprogramming actions, and upon signature the reprogrammings are returned to OUSD(C) P&FC for further processing. A DoD Serial Number, in sequence, will be added to the signed DD 1415.

060409. OMB Approval

Any reprogramming action using general transfer authority and/or special transfer authority must have a Secretary of Defense Determination documenting that the transfer is necessary in the national interest. The authority to make that determination has been delegated to the OUSD(C), Deputy Comptroller, Program/Budget. For prior approval reprogramming actions using general transfer authority and or special transfer authority, OMB must also approve the transmittal of the DD 1415-1 before forwarding the action to the congressional defense committees. The OUSD(C) shall obtain formal OMB apportionment for the specific transfer of funds after congressional responses on the action are received and final results on implementation of the action are determined.

060410. Distribution of the DD 1415-1

The DD 1415-1 is e-mailed to the House Appropriations Committee (HAC), House Armed Services Committee (HASC), Senate Appropriations Committee (SAC), and Senate

Armed Services Committee (SASC). A copy of the DD 1415 and the transmittal date will be e-mailed to the submitting DoD Component. After being notified that the DD 1415 has been submitted to the congressional committees, the DoD Component will ensure that the congressional committees receive any classified information that is to be submitted under separate cover.

060411. Congressional Committee Approval of DD 1415 Requests

A. Approval for a Prior Approval Reprogramming Action (DD 1415-1) is obtained by letter from the congressional committees prior to implementation of the action. Each separate committee response is taken into account, and final implementation by OUSD(C) P&FC of the action reflects the lowest of the approvals received for proposed sources and increases. Occasionally the action is implemented for less than originally requested due to the denial of increases or sources.

B. As copies of the congressional committee approval letters are received, e-mail notification will be made to the applicable DoD Components and OUSD(C), Deputy Comptroller, Program/Budget appropriation managers. When the final committee approval has been received, an OUSD(C) P&FC implementation memorandum will be prepared. The implementing letter will attach copies of the approved DD 1415, data sheets, Secretary of Defense Determination, and committee letters, as applicable.

C. No reprogramming request will be approved if the funds requested have been obligated or committed prior to congressional committee review and approval. The obligation of funds prior to consideration by the congressional defense committees denies them a realistic option to deny the request. Such a procedure places the committee(s) in the position of having to approve the request or deny all funds for the continuation of the program in the latter part of the fiscal year. Also, funds that have already been identified for a below-threshold reprogramming should not be incorporated into the DD 1415 unless the funds have not yet been obligated on the new requirement. (If this occurs, the funds cannot be obligated until congressional approval is received).

D. Reprogramming hearings, questions, and transcripts will be handled by each Component involved, unless there is an OSD principal witness.

E. If the congressional committees have denied a reprogramming increase, DoD policy prohibits use of a series of below-threshold reprogramming actions as a means to finance the requested increase. However, below-threshold reprogramming authority may be used to finance increases on reprogramming actions that were approved by the congressional committees, but were not able to be accommodated within the implementation process, as long as the below-threshold reprogramming actions otherwise do not: exceed a threshold limitation, such as below-threshold reprogramming limitations on realignment of funds into or out of a budget line; affect an item of special congressional interest item; or have not been specifically denied by a congressional committee as a reprogramming source. This policy has evolved out of recognition of there being congressionally-approved increases within monthly and Omnibus reprogramming actions that were unable to be funded in the USD(C) implementation

memorandum, due to a lack of congressionally-approved sources. However, in recent years, Components have been required to provide advance written notification to the congressional defense committees prior to the USD(C) undertaking a below-threshold reprogramming to implement approved sources.

060412. Implementation Memorandums for Reprogramming Actions.

A. After all approvals have been obtained for a reprogramming action, a memorandum signed by the Director for Program and Financial Control will be provided to the applicable Components.

B. If the reprogramming action includes an appropriation transfer, the implementing memorandum will include instructions (data sheet) for processing the SF 1151, Nonexpenditure Transfer Authorization, and include a copy of the combined Secretary of Defense Determination and OMB Approval document approving the transfer.

C. Along with normal distribution, the implementation memorandum will be e-mailed to the applicable DoD Component and to the appropriate OUSD(C), Deputy Comptroller, Program/Budget appropriation manager(s), so that funds may be released.

060413. Alternate Letters or Revised Actions for New Sources

A. Reprogramming actions may be submitted prior to or after the monthly or Omnibus Reprogramming Actions. When sources are denied by a congressional committee, new sources to fund the requested increase may be submitted in DD 1415 format or letter format. Except in the most unusual circumstances, alternate sources for items denied in the monthly or Omnibus Reprogramming Action will not be submitted to the congressional committees.

B. Revised actions or letters for the signature of the USD(C) should be prepared by the submitting DoD Component. Normal reprogramming procedures apply for processing the revised actions or letters to the congressional committees.

C. The committees have request that the original reprogramming request be furnished when identifying a new source of funds.

The USD(C) may appeal the decision of a committee on a reprogramming action. All proposed appeals to committees initiated by a DoD Component shall be forwarded by memorandum to the USD(C) for further processing within the Department. Any action on a reprogramming subsequent to its original submission to the committees is subject to the same procedures as the original reprogramming.

060415. Withdrawal of Reprogramming Actions

A. When approval of a reprogramming action that was submitted to the congressional committees, but not fully approved, is no longer required, then that action should be formally withdrawn from congressional committee consideration. The need for withdrawal

may result when too much time has elapsed for the proposed increase to go under contract or when proposed sources are needed to fund a higher priority reprogramming than that originally submitted.

B. Withdrawal letters for the signature of the USD(C) should be prepared by the submitting DoD Component. Normal reprogramming procedures apply for processing the letters to the congressional committees.

C. Sufficient rationale on the reason for withdrawal should be provided to the congressional committees so they will not question why the action was originally submitted for their approval. If one or more committees have already approved the action, letters should be written to those committees expressing appreciation for their approval.

#### 0605 DD 1416, REPORT OF PROGRAMS

##### 060501. General

The DD 1416, Report of Programs, reflects the congressionally approved programs as enacted, supplemental funding, rescissions, implemented reprogramming actions, congressionally directed undistributed amounts and transfers, and below-threshold reprogramming actions that are implemented by a DoD Component. The amounts on the DD 1416 for column should be identical to the amounts on the DD 1002, Appropriation Status by Fiscal Year Program and Subaccounts, column b (column d for Active Operation and Maintenance appropriations) for comparable “as of dates” and stub entries. Amounts should only deviate when reconcilable differences exist due to posting errors in the DD 1002.

##### 060502. Due Date

The DD 1416, Report of Programs is submitted quarterly 30-days after the end of each quarter for Title III, Procurement, and Title IV, Research, Development, Test, and Evaluation, and will include all implemented reprogramming actions through that date, together with below-threshold reprogrammings made by the DoD Components through that date. The due dates for these reports shall be approximately 30-days after the end of each quarter. [The DoD Component will certify their submission through the EFD system of the quarterly DD 1416, Report of Programs, to OUSD\(C\), P&FC.](#) The DD 1416 for Title I, Military Personnel, and Title II, Operation and Maintenance, appropriations will be submitted annually, 30-days after the end of the fiscal year.

##### 060503. Procurement Line Items “Items Less Than \$5 million

“For programs that are included in an “Items Less Than \$5 Million” line item, the program or cost growth will be accommodated within the below-threshold authority for the total line item value. The amount of growth to an individual program or to the aggregate line item total cannot exceed the dollar threshold [of \\$20.0 million or 20 percent, whichever is less.](#)

## 060504. Program Base Columns Reflecting Congressional Action

Changes due to supplemental appropriations and rescissions will be shown in a separate column from the basic Appropriations Act. Additionally, general provision reductions that are to be proportionately allocated to “each program, project, and activity” within each applicable appropriation account will be reflected in this column. The combination of the “Program Base Reflecting Basic Congressional Action” and “Program Base Adjustments Reflecting Enacted Supplementals and Rescissions” columns shall be used for determining how much of the procurement and RDT&E appropriations can be decreased based on percentages when determining the amount that can be reprogrammed using below-threshold authority.

## 060505. Detailed Instructions for Preparation

Reimbursable program or order amounts are not required unless reimbursable funding was used for the direct program. Detailed instructions for the DD 1416 are provided in the appendix to this chapter.

## 0606 REPROGRAMMING OF INTELLIGENCE RESOURCES

## 060601. Intelligence Reprogramming Guidance

A. National Intelligence Program (NIP): Section 102A of the National Security Act of 1947 (50 U.S.C. 3024) authorizes the Director of National Intelligence (DNI) to transfer or reprogram funds appropriated for a program within the National Intelligence Program (NIP) to another NIP effort. No NIP funds may be transferred or reprogrammed without the prior approval of the DNI, except in accordance with procedures prescribed by the DNI. For initiating and processing reprogrammings involving the NIP, use applicable guidance issued by the Office of the Director of National Intelligence (ODNI) Chief Financial Officer.

B. Military Intelligence Program (MIP): Reprogramming requirements set forth in section 0604 apply to reprogramming MIP intelligence resources. Further policies specific to MIP below-threshold reprogrammings are set forth in DoD Directive 5205.12, Military Intelligence Program (MIP), enclosure 2, paragraph 1.i. Additionally, as provided for in paragraph 060407, OUSD(C) will consult with the Office of the DNI Chief Financial Officer before transferring or reprogramming funds made available by Congress specifically for the MIP as required by section 102A(d)(1)(B) of the National Security Act of 1947 (50 U.S.C. § 3024).

## 060602. Oversight

The House Permanent Select Committee on Intelligence (HPSCI) and the Senate Select Committee on Intelligence (SSCI) have oversight jurisdiction over the NIP. All NIP reprogrammings require prior approval from the HPSCI, SSCI, House Appropriations Committee (HAC), and Senate Appropriations Committee (SAC). Reprogrammings affecting the MIP require prior approval from the HPSCI, House Armed Services Committee (HASC), Senate Armed Services Committee (SASC), HAC, and SAC. Notwithstanding that per agreements among the various congressional committees the SSCI has jurisdiction over the NIP

only, the Department does provide the SSCI an information copy of reprogramming of non-intelligence funds into the MIP in satisfaction of section 504 of the National Security Act of 1947 (50 U.S.C. § 3094). Additionally, the Department provides the SSCI an information copy of reprogramming actions within the MIP.

060603. Submission Procedures

In addition, to applicable section 0604 procedures, including indication within cover letters whether MIP or NIP resources are affected, the following additional requirements apply to intelligence resource reprogrammings:

A. Because DD 1415 reprogramming actions are posted on the Internet, the DD 1415 must not refer to or identify specific intelligence programs or resources.

B. All classified reprogramming requests must be coordinated with the Directorate for Investment. Components are required to clearly identify classified actions as part of their reprogramming submission. Concurrent with their reprogramming request submission, Components are to separately provide; the classified details in electronic format to the appropriate Comptroller POCs.

060604. Procedures

The same procedures apply to reprogramming intelligence resources as provided in paragraph 0604 with the following exception. For processing reprogrammings involving the NIP, contact the Office of the Director of National Intelligence (ODNI) for specific guidance. Because DD 1415 reprogramming actions are now being posted on the Internet, the DD 1415 must not refer to or identify specific intelligence programs or resources. Cover letters transmitting proposed DD 1415s to the OUSD(C) should contain a statement that the reprogramming does or does not affect NIP/MIP resources.

060605. Below-Threshold Reprogrammings

For processing below-threshold reprogrammings involving the NIP, contact the Office of the Director of National Intelligence (ODNI) for specific guidance.

0607 REPROGRAMMING OF SPECIAL ACCESS PROGRAMS

060701. Provision in Law

The annual DoD Appropriations Act states: “Funds appropriated by this Act may not be used to initiate a special access program without prior notification 30 calendar days in session in advance to the congressional defense committees.”

## 060702. General

For other than reprogrammings of new starts as stated in paragraph 060701, normal reprogramming procedures as described in this chapter apply to special access programs.

## 0608 BELOW-THRESHOLD REPROGRAMMING ACTIONS

## 060801. Purpose

Below-threshold reprogramming actions provide DoD Components with the discretionary flexibility to realign, within prescribed limits, and congressionally approved funding to satisfy unforeseen, higher priority requirements. As with DD 1415 reprogrammings, below-threshold actions must net to zero.

## 060802. Guidelines

A. Below-threshold reprogramming actions are minor actions not otherwise requiring congressional approval that may be accomplished within the DoD Components and are measured cumulatively over the entire obligation availability of the appropriation. Reprogramming thresholds apply to increases and decreases made to line items in the Procurement and RDT&E accounts. Below-threshold amounts for the Military Personnel are measured by increases as well as Operation and Maintenance accounts are measured by increases and decreases. When the congressional committees impose reprogramming thresholds on specific sub-activity group categories, these threshold amounts are separately identified on the DD 1414, Base for Reprogramming Actions, and reprogramming restrictions apply. Any action, when combined with other below-threshold reprogramming actions for the same budget activity, line item or program element, must not exceed the established threshold in total, except when thresholds are exceeded due to the provisions of 31 U.S.C. 1551 et seq.

B. Threshold amounts agreed upon among the committees and the Department are contained in paragraph 060401D. New start programs cannot be initiated using below-threshold authority (see paragraphs 060401E and 060404).

C. Normal reprogramming thresholds will not apply based on 31 U.S.C. 1551 et seq. when currently available appropriations are used to fund obligations or adjustments to obligations, which would otherwise have been funded from a canceled account before it was canceled. Within an appropriation, reprogramming thresholds may be exceeded in currently available appropriations for increases or sources used to finance the "Canceled Account Adjustments" line item. If reprogramming thresholds are exceeded for increases or sources to finance these obligations or adjustments to obligations, then column "k," "Below-Threshold Actions not Requiring Approval by the SECDEF or Committees" of the DD 1416 should be footnoted to indicate that the threshold amount has been exceeded due to canceled account adjustments.

D. If the congressional committees have denied a reprogramming increase, DoD policy prohibits the use of a series of below-threshold reprogramming actions to finance the

requested increase. However, below-threshold reprogramming actions that preceded the congressional denial will be recognized as valid.

E. Below-threshold reprogramming authority may be used to finance increases on reprogramming actions that were approved by the congressional committees, but were not able to be accommodated within the implementation process, as long as the below-threshold reprogramming actions otherwise do not exceed below-threshold reprogramming limitations [on realigning funds into or out of a program line](#); affect an item of special congressional interest item; or have not been specifically denied by a congressional committee as a reprogramming source. This policy has evolved out of recognition of there being congressionally-approved increases within [monthly](#) and Omnibus reprogramming actions that were unable to be funded in the USD(C) implementation memorandum, due to a lack of congressionally-approved sources. [However, in recent years, Components have been required to provide advance written notification to the congressional defense committees prior to the USD\(C\) undertaking a below-threshold reprogramming to implement approved sources.](#)

F. The below-threshold authority computation starts with the quantity of end items and amount of funds appropriated to a specific line item by the Congress. These baseline amounts are reflected in columns h and i on the DD Form 1414, Base for Reprogramming Actions; in the BTR column on the DD Form 1416, Report of Programs. The baseline is changed by supplemental appropriations, rescissions, directed general provisions reductions, and approved DD 1415 reprogramming actions, which are reflected in the appropriate columns of the DD 1416. The net amounts of the appropriated amounts and the supplemental appropriations, rescissions, directed general provisions reductions, and approved DD 1415 reprogramming actions are reflected in columns b, c, d, and e on all versions of the DD 1415. The first DD 1415 for a particular line item will reflect the same baseline amounts in columns b/c and d/e. Subsequent DD 1415s for a particular line item will retain the same baseline amount in columns b/c and d/e (unless a supplemental or rescission or an approved DD 1415 has been implemented in the interim. Exceptions to this occur when more than one DD 1415 is processed simultaneously, or when the previous DD 1415 was implemented at a different level than was originally approved (Monthly or Omnibus, for example).

## 0609 REPLACEMENT OF ITEMS SOLD FROM INVENTORY

### 060901. Policy

The current budget policy requires that [offsetting collections from asset sales](#) generally cannot be used to replace end items sold from inventory if the replacement end item is not a “like replacement” item of identical type, model, and series designation) unless congressional approval is obtained. [Although technically not involving the reprogramming of appropriated budgetary resources, DoD obtains the requisite approval by submitting a prior approval reprogramming action to the congressional defense committees.](#)

## 060902. Guidelines

A. The requirement for a [prior approval](#) reprogramming action for small dollar value end items where replacements vary only to a minor extent from the item sold has resulted in unnecessary paperwork and serves no substantive purpose. Replacement of items sold from inventory with a unit cost of less than \$5,000 that are not of identical type, model, and series designation will be treated as a “[like replacement](#),” if an improved model of the same end item is being procured, performs the same warfighting capability, and the inventory objective presented to the Congress is not exceeded. Items satisfying all of these criteria will be financed with the proceeds of the sale of the end items issued from inventory without processing a DD 1415-1, [prior approval](#) reprogramming request. The amount applied toward the [like replacement](#) item may not be increased beyond the proceeds of that sale.

B. The requirement for a [prior approval reprogramming](#) action exists when an item of materiel is sold which will require replacement to compensate DoD inventories for the resultant loss of capability or readiness and the replacement item will not qualify as like replacement item because it is not identical to the item sold. Replacement items submitted for congressional approval must, however, be a later series or modified version of the same basic model of the item being sold (e.g., sale of a C-130A aircraft and purchase of a C-130E), or be an acceptable substitute item used against the same inventory objective or authorized acquisition objective in requirements computations (e.g., sale of an M-48 tank and purchase of an M-60 tank). If congressional approval is provided, [offsetting collections from the asset sale may be used to procure the item as a like replacement item](#). See paragraph 070302.C.2 of Chapter 7 of Volume 15 for more information concerning replacement of items following sales of Defense articles from stocks. [In accordance with OMB Circular A-11, section 83.5](#), the buyback of the like replacement items must be classified as a direct [obligation because it is financed using an offsetting collection from an asset sale to a non-Federal source](#).

C. For DD 1415-1 reprogramming actions seeking approval for use of proceeds to acquire items that are not “like replacement” items, Components must either submit a separate, stand-alone prior approval reprogramming request, or make the request as a separate, stand-alone part within the regular monthly reprogramming submission. Components shall not incorporate or combine such actions with other types of reprogramming requirements.

## 0610 REPROGRAMMING POLICY FOR CLOSING APPROPRIATION ACCOUNTS (31 U.S.C. 1551 et seq)

### 061001. Definitions of Contract Changes for Reprogramming Purposes

For purposes of this reprogramming policy guidance, adjustments to amounts initially obligated in accounts that now are expired are categorized either as within-scope or change-in-scope contract changes. Within-scope changes generally are funded from the appropriation that originally financed the contract until cancellation. Change-in-scope contract changes are financed from appropriations currently available for obligation at the time the change is made. Specific guidelines for determining scope of work changes are defined in Chapter 8, “[Standards for Recording and Reviewing Commitments and Obligations](#)”.

061002. Use of Currently Available Appropriations to Fund Out-Of-Scope Contract Changes

A. Normal applicable reprogramming (DD 1415) procedures and thresholds will apply when currently available appropriations are used to fund out-of-scope contract changes.

B. Out-of-scope contract changes funded from currently available appropriations will be funded from, and reflected against, the current corresponding line item, program element or program applicable, or comparable, to the program for which the contract change is being made.

C. If an applicable corresponding program no longer exists in the currently available appropriation for the program for which the out-of-scope contract change is being made, a new line item for the program in question will be created to reflect the contract change adjustment. Reprogramming threshold procedures for newly created line items will be the same as for the creation of any other new line item.

D. Any line item or program can be the funding source for contract changes funded from currently available funds. However, the funding source line item or program will also be subject to normal reprogramming thresholds.

061003. Use of Currently Available Appropriations to Fund Obligations or Adjustments to Obligations that Otherwise Would Have Been Funded from a Canceled Appropriation Account

A. Obligations and adjustments to obligations that would have been properly chargeable to a closed account, both as to purpose and amount, shall be charged to an appropriation currently available for the same purpose. Specific limitations are as follows:

1. The sum of all such amounts funded from currently available appropriations shall not exceed the lower of (a) one percent of the originally appropriated amount of the current appropriation being charged or (b) the current unexpended balance of the canceled appropriation account.

2. For the purpose described in paragraph 1, the unexpended balance is the sum of the unobligated balance plus the unliquidated obligated balance of the appropriation account at the time it was canceled, less any and all obligations incurred and payments made subsequent to the cancellation of the original appropriation account when such obligations and payments would otherwise have been properly charged to the appropriation had the appropriation not been canceled.

B. Normal reprogramming procedures (DD 1415) and thresholds will not apply when currently available appropriations are used to fund obligations or adjustments to obligations, which would otherwise have been funded from a canceled appropriation account before it was canceled.

C. Charges to currently available appropriations for obligations or adjustments to obligations that would otherwise have been charged to canceled appropriation accounts shall be reflected in a line item on the Report of Programs (DD 1416) entitled “Canceled Appropriation Account Adjustments.”

1. Within an appropriation, reprogramming thresholds may be exceeded in currently available appropriations for increases or sources used to finance the “Canceled Appropriation Account Adjustments” line item.

2. If reprogramming thresholds are exceeded for increases or sources to finance these obligations or adjustments to obligations, column k, Changes not Requiring Approval by Secretary of Defense, of the DD 1416 should be footnoted to indicate that the threshold amount has been exceeded due to canceled appropriation account adjustments.

3. The new line, “Canceled Appropriation Account Adjustments,” will be a separate line item or program element and added as an entry within a single budget activity. For all appropriation accounts that do not display line item detail, a memo line shall be shown under any single budget activity.

061004. Use of Expired Appropriations to Fund Contract Changes

A. An expired appropriation remains available for recording, adjusting and liquidating obligations properly chargeable to that appropriation until the appropriation is closed under 31 U.S.C. 1552. Accordingly, an expired appropriation may be used to fund within-scope contract changes properly chargeable to that appropriation in accordance with Chapter 8. When properly chargeable obligations are posted against a line item, funding must be available in that program. If funding is not available on that program, but funding is available within the appropriation, a funding realignment between programs in that appropriation must be accomplished.

B. Expired Operation and Maintenance, Navy appropriations may be used to fund certain payments required because of changes in scope of work in connection with ship overhaul, maintenance, and repair work under 10 U.S.C. 7313.

C. For purposes of the Shipbuilding and Conversion, Navy, (SCN) appropriation, appropriation language normally provides for additional obligations to be incurred after the 5 years of obligation availability, for engineering services, tests, evaluations, and other such budgeted work that must be performed in the final stage of ship construction. The period of availability of the SCN appropriation is adjusted prior to being canceled based on the schedule of work being performed. (e.g. [section 8075 of division C of Public Law 113-235, the DoD Appropriations Act, 2015](#)).

0611 NATIONAL GUARD AND RESERVE EQUIPMENT APPROPRIATION  
NOTIFICATION PROCEDURES

## 061101. General

In the National Guard and Reserve Equipment Appropriation (NGREA), the Congress typically appropriates funding in lump-sum amounts to be used for aircraft and miscellaneous equipment, and requests submission of a detailed assessment of modernization priorities by each of the Reserve Component (RC) Chiefs. The Assistant Secretary of Defense (Reserve Affairs) (ASD (RA)) forwards the RC acquisition plans to the congressional committees, along with a consolidated equipment requirements list for all Reserve Components, called the Summary NGREA Acquisition Report.

## 061102. Procedures for Revisions to the Summary NGREA Acquisition Report

A. Procurement of any item not included in the Summary NGREA Acquisition Report for allocation of the funds appropriated in lump-sum amounts for aircraft and miscellaneous equipment cannot be initiated by a Component until the proper notification to the congressional committees is made.

B. Letters requesting a change to the initial report [must be submitted to ASD\(RA\) by the cognizant Military Department Assistant Secretary \(Financial Management and Comptroller\) for the respective Reserve Component requiring a change from the initial allocation directly to the ASD\(RA\)](#). The ASD(RA) shall obtain coordination from OUSD(C) P/B before transmitting letters to the congressional committees.

C. Consistent with other procedures in place for letter notifications pertaining to new starts (section 060403), the following procedures shall apply.

1. Notification of the House and Senate Appropriations Committees and the House and Senate Armed Services Committees is followed by a 30-day automatic hold.

2. The DoD Component may implement the reprogramming 30 calendar days after receipt by these committees unless notification to the contrary is received from a committee.

[\\*0612 OPERATION AND MAINTENANCE QUARTERLY EXECUTION REPORT](#)[\\*061201. Purpose](#)

This chapter provides instructions applicable to preparation and submission of the Operation and Maintenance (O&M) Quarterly Execution Report. Congress requires the Department to provide the congressional defense committees with quarterly budget execution data for each of the active, guard, reserve, and defense-wide O&M accounts. Title 10, U.S. Code, section 228, requires quarterly reports on the allocation of funds within operation and maintenance budget sub-activities. The Operation and Maintenance Quarterly Execution Report satisfies both reporting requirements.

## 061202. Submission Requirements

The Military Departments submit their reports to the Office of the Under Secretary of Defense, Comptroller (OUSD(C)), Operations Directorate 20 days after the end of each quarter. The Defense Wide Operation and Maintenance Report is prepared by OUSD(C), Operations Directorate. The template provided in an appendix B to this chapter displays the format for the Report.

## 061203. Preparation of Material

The O&M Execution Report must:

- A. Reflect the official DD COMP (M) 1002 Report as of the last day of the reporting quarter;
- B. Explain any deviations from official budget data and accounting execution report data.
- C. Control funds at the SAG/BLI level to prevent reflecting obligations in excess of program in the official DD COMP (M) 1002 Report; and
- D. Avoid exceeding SAG/BLI thresholds for prior approval reprogrammings as set by Congress.

## 061204. References

Volume 2A Chapter 1 provides general funding policies and Chapter 3 provides specific policies related to Operation and Maintenance costs. (See Volume 2A, Chapter 1 – 3)

## 061205. Operation and Maintenance Quarterly Execution Report Exhibit

A. The O&M Report contains the following column data as displayed on the format presented in Appendix C to this chapter. Unless modified in a data call, this format should be adhered to.

1. Appropriation: Use this column to identify the Component's O&M account and display as follows:

- a. Army O&M (Active/Reserve/National Guard)
- b. Navy O&M (Active/Reserve)
- c. Marine Corps O&M (Active/Reserve)
- d. Air Force O&M (Active/Reserve/National Guard)
- e. Defense-Wide (D-W) O&M

2. Budget Activity (BA): Use this column to identify the applicable Budget Activities such as:

- a. Operating Forces (BA 1)
- b. Mobilization (BA 2)
- c. Training and Recruiting (BA 3)
- d. Administrative and Servicewide Activities (BA 4)
- e. Defense Agency and Budget Activity (Defense-Wide)

3. Activity Group (AG)/Budget Sub-Activity (BSA): Use this column to display the activity groups.

4. Sub-Activity Group (SAG)/Budget Line Item (BLI): Use this column to display the sub-activity group (SAG)/Budget Line Item (BLI) title.

5. President's Budget Request Column: This column must match the current fiscal year budget request, by SAG/BLI, in the Conference Report for the Department of Defense Appropriations and match the appropriate column in the Base for Reprogramming Actions (DD 1414).

6. Appropriation Column: This column must match the current fiscal year appropriation, by SAG/BLI, in the Conference Report for the Department of Defense Appropriations and match the appropriate column in the Base for Reprogramming Actions (DD 1414).

7. Distribution of Unallocated Congressional Adjustments: This column should reflect the distribution of unallocated congressional adjustments found in the Conference Report for the Department of Defense Appropriations.

8. Adjustments Required by Statute: The total for the Adjustments Required by Statute column should equal the Transfers (i.e., letter reprogrammings directed by statute), General Provisions, and Supplemental Appropriations.

9. Prior Approval Reprogramming: This column should reflect prior approval reprogrammings. This should include all prior approval reprogrammings approved by Congress by the end of the quarter that this report covers.

10. Below Threshold Reprogrammings (BTRs): This column should include any reprogramming actions that the component has made between SAG/BLI s that do not require OSD or congressional approval, also known as Below Threshold Reprogrammings (BTRs). The BTRs must not exceed \$15.0 million into/out of each Budget Activity (BA) or Defense Agency. Additionally, the Explanatory Statement, Division C Department of Defense

Appropriations Act Fiscal Year 2015 cites specific SAG/BLI s that require prior approval reprogramming and Defense Agencies and Components restricted to BTRs of the lessor of \$15 million.

11. Other Reprogrammings: This column should include any Internal Reprogrammings (IRs) not displayed elsewhere in this report. Provide a footnote explanation for these adjustments (i.e., includes environmental restoration and foreign currency fluctuation transfers). Provide specific details for any adjustments other than adjustments from Transfer accounts. For example, letter reprogrammings authorized but not specifically directed by statute would appear in this column. The footnote would explain the transfer.

12. Current Program: This column must match, by SAG/BLI, Budget Activity (BA) and in total, column D (column C for the Marine Corps Reserve, Navy Reserve, Air Force Reserve, and Air National Guard) of the O&M Appropriation Status by Fiscal Year Program and Subaccounts (DD 1002) Report for the last month of the applicable quarter. If it does not, then present the appropriate total; provide a footnote explanation with specific SAG level detail noting the discrepancy and address why it does not, and what action is underway to correct any differences.

13. Actual Obligations: This column must match, by SAG/BLI, Budget Activity (BA) and in total, column E of the O&M Appropriation Status by Fiscal Year Program and Subaccounts Report (DD 1002) Report for the last month of the applicable quarter. If it does not, then present the appropriate total; provide a footnote explanation with specific SAG/BLI level detail noting the discrepancy and address why it does not, and what action is underway to correct any differences.

B. Footnotes:

1. Careful attention must be paid to report footnotes.
2. Use the footnote section to explain the data contained in the report and make it meaningful;
3. Explain any deviations from official budget data and accounting execution report data;
4. Be consistent with the wording of footnotes and ensure the current quarter footnotes are consistent with the previous quarter's report footnotes; and
5. Standard footnotes will be provided by the Office of the Under Secretary of Defense (Comptroller) at the beginning of each fiscal year

C. Expectation for Funds Awareness

1. Funds should be controlled at the SAG/BLI level to prevent reflecting obligations in excess of program in the O&M DD 1002 Report; and

2. Funds must be controlled to avoid exceeding SAG/BLI thresholds for prior approval reprogrammings as set by Congress.

BASE FOR REPROGRAMMING ACTIONS (Dollars in Thousands)								
Appropriation Account Title: <i>Enter the appropriation account title and program year.</i>						Fiscal Year Program: <i>Enter the fiscal year.</i>		
Line Item	Program Base Presented to Congress in Printed Justification		Approved Changes Prior to Final Congressional Action		Changes Reflecting Congressional Action/Intent		Program Base Reflecting Congressional/ Presidential Action	
a	Qty b	Amount c	Qty d	Amount e	Qty f	Amount g	Qty h	Amount i
The DD Form 1414, Base for Reprogramming Actions, establishes the base from which reprogramming actions may be taken. It identifies line items for each appropriation covered in the DoD Appropriations Acts.								
<p>Line item nomenclature and accompanying amounts for programs appropriated vary by account and should be shown as follows:</p> <p>Active and reserve component military personnel appropriation accounts shall list budget activities as presented in the justification books. These line items will be followed by budget activity subdivisions or other line identifications to reflect congressional action by programmatic change. A total for each budget activity will be shown.</p> <p>Operation and maintenance (O&amp;M) active and reserve appropriation accounts shall list budget activities as presented in the justification books. These line items will be followed by budget activity subdivisions or other line identifications to reflect congressional action by programmatic change. A total for each budget activity will be shown.</p> <p>Procurement appropriation line items will be the procurement line items shown on the P-1, Procurement Programs, and arranged in the same order with the exact same title. The line items will be grouped by budget activity and a total will be shown for each budget activity. Only congressional special interest item changes should be listed as memo entries under each P-1 line item.</p> <p>Research, Development, Test and Evaluation appropriation line items will be the program elements shown on the R-1, RDT&amp;E Programs, and arranged in the same order with the exact same title. The program elements will be grouped by budget activity and a total will be shown for each budget activity. New program titles due to congressional adds shall be as reflected in the congressional reports or as part of an existing program element, whichever is appropriate. Only congressional special interest item changes should be listed as memo entries under each program element.</p>								
Unless otherwise directed by OUSD(C), undistributed congressional reductions and adds must be distributed on the DD 1414.

BASE FOR REPROGRAMMING ACTIONS (Dollars in Thousands)								
Appropriation Account Title: <i>Enter the appropriation account title and program year.</i>						Fiscal Year Program: <i>Enter the fiscal year.</i>		
Line Item	Program Base Presented to Congress in Printed Justification		Approved Changes Prior to Final Congressional Action		Changes Reflecting Congressional Action/Intent		Program Base Reflecting Congressional/Presidential Action	
a	Qty b	Amount c	Qty d	Amount e	Qty f	Amount g	Qty h	Amount i
<u>PROGRAM</u>								
<p>"Program Base Presented to Congress in Printed Justification" (columns "b" and "c"). For each line item in the Procurement and RDT&amp;E appropriations, enter the amounts reflected in the P-1 and R-1. The Procurement line items should include applicable line item quantities (do not use xx). Military Personnel and Operation and Maintenance (O&amp;M) appropriations will be by budget activity level and amounts will be obtained from M-1 and O-1.</p>								
<p>"Approved Changes Presented Prior to Final Congressional Action" (columns "d" and "e"). Enter the amount of increase (+) or decrease (-) to the line items or budget activities which were approved by the Secretary of Defense and formally presented to one or both of the Committees on Appropriations. Normally, such changes, involving a change in the budget estimate for the total appropriation, will be submitted to the Congress by the President as formal budget amendments, although in certain cases, such changes have been presented directly by the Secretary of Defense. Testimony on program changes by a DoD official other than the Secretary or Deputy Secretary of Defense shall be considered as an expression of personal opinion and not as an approved change. This column shall only be used when directed by OSD.</p>								
<p>"Changes Reflecting Congressional Action/Intent" (columns "f" and "g"). Enter the amount of increase (+) or decrease (-) for each line item reflecting congressional action as indicated in the Conference Report accompanying the DoD Appropriations Act or any other information as may be available to determine congressional action or intent regarding line item detail. Nonspecific congressional adjustments included in appropriated amounts for an Active Service O&amp;M account shall be allocated to the budget activity level.</p>								
<p>"Program Base Reflecting Congressional/Presidential Action" (columns "h" and "i"). Entries will represent the arithmetic sum of the applicable entries from columns "b" through "f" and "c" through "g." Amounts in this column will become the first column "Program Base Reflecting Congressional Action" (columns "b" and "c") of the subsequent DD 1416 reports.</p> <p>Quantities (Columns "b," "d" and "f"). Quantities are only applicable for the procurement accounts. When a procurement line item contains a quantitative measurement, then the quantity shall be reflected in the appropriate quantity columns for that line item. If no quantity is meaningful as a unit measurement, then leave the column value left (i.e., do not use xx).</p>

BASE FOR REPROGRAMMING ACTIONS (Dollars in Thousands)								
Appropriation Account Title: <i>Enter the appropriation account title and program year.</i>						Fiscal Year Program: <i>Enter the fiscal year.</i>		
Line Item	Program Base Presented to Congress in Printed Justification		Approved Changes Prior to Final Congressional Action		Changes Reflecting Congressional Action/Intent		Program Base Reflecting Congressional/ Presidential Action	
a	Qty b	Amount c	Qty d	Amount e	Qty f	Amount g	Qty h	Amount i
<u>PROGRAM</u>								
<p>Stub Entries for this Financing Section may include some or all of the following types of transactions:</p> <p>Budget Authority:</p> <p>Appropriation, P.L. 113-xxx</p> <p>PL 113-xxx, Sec. 8106</p> <p>PL 113-xxx, Sec. 8060</p> <p>Total Financing, FY 20xx Program</p>								
<p>Detail instructions for the above financing lines by column are as follows:</p> <p>Column "c" for the appropriation and reimbursable orders lines shall be the same as the amounts in the President's Budget Program and Financing Schedules.</p> <p>Column "e" is rarely used; and when appropriate, instructions for this column will be provided.</p> <p>Column "g" shall be the delta changes made by Congress or DoD for applicable appropriation or general provision changes.</p> <p>Column "i" shall be the sum of the columns across and shall be column "c," "Program Base Reflecting Basic Congressional Action," on subsequent DD 1416s.</p> <p>"Transfers" shown on the DD 1414 will only apply for those transfers included as part of the President's Budget request or certain congressional action transfers. For example, these may include transfers in the budget from the National Defense Stockpile Fund or general provision transfers provided by the Congress in law that usually involve transfers to Shipbuilding and Conversion.</p>								
<p><b>Footnoted Items.</b> Extreme care should be used in footnoting items. Footnote 1, should be used when one of the congressional reports specifically provided funds for this item using the phrases "only for" or "only to", or the item appears in one of the project level tables. Congressional prior approval is required before decreasing funds on this program. Footnote 2, should be used when this effort was specifically reduced by one or more of the congressional committees. Below Threshold Reprogramming (BTR) authority cannot be used to restore specific congressional reductions. Footnotes should be consolidated onto the last page of each account. This avoids repetition of the same footnote that may appear on several pages of an appropriation.</p>

<b>a</b>		<b>b</b>	<b>c</b>	<b>d</b>	<b>e</b>	<b>f</b>	<b>g</b>	<b>h</b>	<b>i</b>
<p>This is a sample with instructions on details required for preparation of a DD 1415-1, Prior Approval, reprogramming action, which requires congressional committee approval in writing prior to implementation of the committee responses. Specific approval of the USD(Comptroller) is required on all DD 1415 reprogramming actions and OMB endorsement is required for those involving general and special transfer authority.</p> <p>An introductory paragraph should include the following:</p> <p>1. Explain why the action is being submitted for prior approval. (One or more of the following should apply.)</p> <p>A. Affects an item that is known to be or has been designated as a matter of special interest to one or more of the congressional committees.</p> <p>B. Initiates a new program, subprogram, modification, program element, project, or subproject.</p> <p>C. Exceeds thresholds agreed upon between the congressional committees and the Department.</p> <p>D. Involves the use of general transfer authority and shall state which Acts are involved, for example, pursuant to section 8005 of division C of Public Law 113-235, the Department of Defense (DoD) Appropriations Act, 2015, and section 1001 of Public Law 113-291, the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year (FY) 2015.</p> <p>E. Involves the use of special transfer authority and shall state which Acts are involved, for example, pursuant to section 9002 of Title IX Overseas Contingency Operations (OCO) of Public Law 113-235, the Department of Defense (DoD) Appropriations Act, 2015, and section 1522 of Public Law 113-291, the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year (FY) 2015.</p> <p>F. Increases the procurement quantity of a major end item, such as an individual aircraft, missile, naval vessel, tracked combat vehicle, and other weapon or torpedo and related support equipment for which funds are authorized. (Exceptions may apply when congressional language allows for procurement of as many missiles as funds will procure, which requires the submission of, and approval of an internal reprogramming action.)</p>

<b>Subject:</b>						<b>DoD Serial Number:</b> FY XX-XX PA			
<b>Appropriation Title:</b> Appropriation titles with year designation.						<b>Includes Transfer?</b> Yes or no			
<b>Component Serial Number:</b>		<i>(Amounts in Thousands of Dollars)</i>							
		Program Base Reflecting Congressional Action		Program Previously Approved by Sec Def		Reprogramming Action		Revised Program	
<b>Line Item</b>		<b>Quantity</b>	<b>Amount</b>	<b>Quantity</b>	<b>Amount</b>	<b>Quantity</b>	<b>Amount</b>	<b>Quantity</b>	<b>Amount</b>
<b>a</b>		<b>b</b>	<b>c</b>	<b>d</b>	<b>e</b>	<b>f</b>	<b>g</b>	<b>h</b>	<b>i</b>
<p><b>d.</b> Entries for "Reprogramming Action" (columns "f" and "g"). Enter the increase (+) or decrease (-) in quantity (if applicable) and amount of the proposed reprogramming action. The total increases and decreases must net to zero. Columns "f" and "g" are not allowed to contain classified quantities or amounts. Other material, if required, should be classified in order to allow columns "f" and "g" to remain unclassified.</p> <p><b>e.</b> Entries for "Revised Program" (columns "h" and "i"). Enter the adjusted quantity (if applicable) and the amount resulting from the proposed increase or decrease to the previously approved program.</p> <p><b>f.</b> The "Explanation" on the DD 1415 should include sufficient data to justify the proposed increase. The statements should be informative, clearly stated, and straightforward. The purpose of the written documentation should be to inform the reader; therefore, care must be taken to avoid confusing narratives. For each increase within the reprogramming, include explanations and justifications that are intended to serve the same basic purpose as "original budget justification." Accordingly, concise, accurate, and clearly stated information should be provided for reviewing officials and the congressional committees as to the nature, extent, and necessity of the requirements, the costs, and the proposed application of resources to meet such costs. All program increases should be described in such a way as to distinguish between price changes and program scope changes. Statements should be prepared and reviewed on the basis that classified data will not be included. If classified information is essential to justification of the reprogramming change, it will be submitted under separate cover.</p>									
<b>FY 2015 REPROGRAMMING INCREASE:</b>						<b>+10,000</b>			
<b><u>Research, Development, Test, and Evaluation, Air Force, 15/16</u></b>									
<b><u>Budget Activity 04: Advanced Component Development and Prototypes</u></b>									
PE 0603851F ICBM - DEM/VAL		43,206		43,206		+10,000		53,206	
<p><b><u>Explanation:</u></b> Funds are required to support the Rocket Systems Launch Program (RSLP) which converts surplus ICBMs into test launch vehicles for suborbital and sounding rocket launches. Funds are required to move 166 Minuteman II motors from Pueblo Depot, CO to Camp Navajo Depot, AZ because the Pueblo Depot is closing. As a result, proper storage and maintenance of environmental igloos for motor storage is no longer being maintained or guaranteed. Since the Camp Navajo Depot has been modified and is ready to accept motors, the motors must be moved to ensure proper storage and maintenance and to avoid unauthorized location of hazardous Air Force material. <b><u>This is a base budget requirement.</u></b></p>

## REPROGRAMMING ACTION - PRIOR APPROVAL

**Unclassified**

Page 4 of 4

<b>Subject:</b>						<b>DoD Serial Number:</b> FY XX-XX PA			
<b>Appropriation Title:</b> Appropriation titles with year designation.						<b>Includes Transfer?</b> Yes or no			
<b>Component Serial Number:</b>		<i>(Amounts in Thousands of Dollars)</i>							
		Program Base Reflecting Congressional Action		Program Previously Approved by Sec Def		Reprogramming Action		Revised Program	
Line Item		Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount
a		b	c	d	e	f	g	h	i
<b>FY 2015 REPROGRAMMING DECREASE:</b>						<b>-10,000</b>			
<b><u>Missile Procurement, Air Force, 15/17</u></b>									
<b><u>Budget Activity 03: Modification of Inservice Missiles</u></b>									
MM III Modifications		29,344		29,344		-10,000		19,344	
<p><b><u>Explanation:</u></b> These funds are excess to requirements as a result of the restructure of the Minuteman III Guidance Replacement Program (GRP). As a result of the restructure, procurement of long lead parts to support low rate initial production is not required until the second quarter of 2015. The MM III GRP program is adequately and appropriately funded to support a GRP production start in FY 2015. Accordingly, FY 2015 funds provided to procure long lead parts are available to finance higher priority requirements. <a href="#">This is base budget funding.</a></p> <p>Note: All sources of financing will be clearly and explicitly identified in the DD 1415. A statement immediately following each proposed decrease in a line item shall include information as to the basis upon which it has been decided that the line item may be reduced.</p> <p>Extreme care should be used in identification of sources to ensure that approved increases will be fully funded. For purposes of the Omnibus reprogramming action, except in the most unusual circumstances, the USD(C) will neither request reconsideration of denied increases, nor submit alternate sources for any denied sources.</p>

*SAMPLE IR*

This reprogramming action is submitted for prior approval because it uses general transfer authority pursuant to section 8005 of division C of Public Law 113-235, the Department of Defense (DoD) Appropriations Act, 2015; and section 1001 of Public Law 113-291, the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year (FY) 2015. This action transfers \$xxxx million from Shipbuilding and Conversion, Navy, 15/19, appropriation to the Research, Development, Test, and Evaluation, Navy, 15/16, appropriation to finance the construction of Littoral Combat Ship (LCS) 1 and LCS 2 through calendar year 2015. This action reprograms funding in support of higher priority items, based on unforeseen military requirements, than those for which originally appropriated; and is determined to be necessary in the national interest. It meets all administrative and legal requirements and none of the items has been previously denied by the Congress.
