

**THE ASSISTANT SECRETARY OF DEFENSE**

**1200 DEFENSE PENTAGON  
WASHINGTON, DC 20301-1200**

**HEALTH AFFAIRS**

December 17, 2020

Mark Sandy  
Deputy Associate Director  
National Security Division  
Office of Management and Budget  
725 17th Street, N.W., Room 10007  
Washington, D.C. 20503

Dear Mr. Sandy:

The enclosed announcement establishes the complete and final rates for use in connection with the recovery from tortiously-liable third persons for the cost of inpatient medical services furnished by military medical treatment facilities through the Department of Defense. These inpatient third party liability rates are the same as the Fiscal Year 2021 Adjusted Standardized Amounts (ASAs) inpatient reimbursement rates set on October 1, 2020, for billing medical insurers, but billing for tort liability requires a different approval authority. Reimbursement rates for pharmacy services are updated more frequently. These rates can be found on the Health.mil website in the Defense Health Agency (DHA) Uniform Business Office (UBO) section (<http://health.mil/Military-Health-Topics/Business-Support/Uniform-Business-Office>).

The DHA requests that this announcement be published in the *Federal Register* and that the rates be effective immediately upon publication. These rates shall remain in effect until further notice.

My point of contact for this issue is DeLisa Prater, DHA UBO Program Manager. She can be reached at (703) 275-6380, or by email at [Delisa.E.Prater.civ@mail.mil](mailto:Delisa.E.Prater.civ@mail.mil).

Sincerely,

A handwritten signature in blue ink, appearing to read "Tom McCaffery", is written over the typed name.

Tom McCaffery

Enclosure:  
As stated

**THE ASSISTANT SECRETARY OF DEFENSE**

**1200 DEFENSE PENTAGON  
WASHINGTON, DC 20301-1200**

December 17, 2020

**HEALTH AFFAIRS**

**MEMORANDUM FOR UNDER SECRETARY OF DEFENSE (COMPTROLLER)**

**SUBJECT: Fiscal Year 2021 Direct Care Inpatient Adjusted Standardized Amounts  
Billing Rates and Guidance**

The attached document contains the Department of Defense Uniform Business Office (UBO) Fiscal Year (FY) 2021 Direct Care Inpatient Billing Rates, effective October 1, 2020. The Defense Health Agency (DHA) requests this package be posted to the Comptroller's Website, (<https://comptroller.defense.gov/Financial-Management/Reports/rates2021/>) as FY 2021 Direct Care Inpatient Billing Rates.

These rates are used when billing for medical services furnished to inpatients at military medical treatment facilities. Adjusted Standardized Amounts (ASAs) are based on an indexing methodology aligned with changes in TRICARE institutional and professional services reimbursement rates. The institutional ASA average ratio for FY 2021 is 3.54 percent, which reflects the average TRICARE reimbursement increase over a 14-year indexing period (FY 2006 – FY 2020).

As of February 15, 2019, the TRICARE Diagnosis Related Groups (DRG) effective date was delayed to January 1 starting FY 2020 and beyond. See 32 CFR 199.14, (a)(1)(i)(D) DRG system updates. This change aligned DRG update releases with TRICARE's program year reporting for administrative simplicity and to further-optimize efficiency by reducing administrative burden and cost. Due to the change in calculation and release of TRICARE DRGs from FY to calendar year (CY), the ASA Billing Rates will now be published and effective on a CY basis to align with this TRICARE change. Alignment of the Inpatient ASA Billing Rates with the release of TRICARE DRG updates eliminates use of updated ASA Billing Rates without updated DRG case weights for discharges with a date of service falling between the historical annual FY Inpatient ASA Billing Rates release and annual CY TRICARE DRG updates in January. Please note: between October 1, 2020, and December 31, 2020, the 2020 TRICARE DRG case weights will be used in conjunction with the FY 2021 ASA rates and between January 1, 2021, and December 31, 2021, the 2021 TRICARE DRG case weights will be used in conjunction with the FY 2021 ASA rates.

My point of contact for this action is Ms. DeLisa Prater, DHA UBO Program Manager. She can be reached at (703) 275-6380 or [delisa.e.prater.civ@mail.mil](mailto:delisa.e.prater.civ@mail.mil).

Tom McCaffery

Attachment:  
As stated

**Department of Defense Uniform Business Office  
Fiscal Year 2021 Direct Care Inpatient Adjusted Standardized Amounts  
Billing Rates and Guidance**

**1.0 Fiscal Year 2021 Direct Care Inpatient Adjusted Standardized Amount Rates and Charges effective 1 October 2020.**

Overview

The Fiscal Year (FY) 2021 Direct Care Inpatient Adjusted Standardized Amounts (ASA) rates are computed based on the Military Health System (MHS) direct care standardized cost to provide a single Medicare Severity Relative Weighted Product (MS-RWP). The MS-RWP is a Medicare Severity Diagnosis Related Group (MS-DRG) based measure of the relative costliness of a given discharge. The average standardized cost per MS-RWP for hospitals in locations with area wage rates greater than 1.0, less than or equal to 1.0, and overseas are published annually as inpatient ASAs shown in Table 1. This approach maintains compatibility with both Medicare and TRICARE ASA policies. Starting 1 January 2022, release of the Department of Defense (DoD) Uniform Business Office (UBO) Direct Care Inpatient ASAs will align with the change in release of the TRICARE DRGs from release on a FY to a Calendar Year (CY) basis effective from January 1 to December 31 of a given CY. Between 1 October 2020 and 31 December 2020, the 2020 TRICARE DRG case weights will be used in conjunction with the FY 2021 ASA rates. Between 1 January 2021 and 31 December 2021, the 2021 TRICARE DRG case weights will be used in conjunction with the FY 2021 ASA rates. The DoD publishes this data annually for hospital reimbursement rates under TRICARE/Civilian Health and Medical Program of the Uniformed Services pursuant to 32 Code of Federal Regulations 199.14(a)(1). Due to data system limitations, for military medical treatment facilities (MTFs), direct care adjustments are made for length of stay (LOS) outliers rather than high cost outliers.

Table 1 provides the average direct care inpatient ASA rates for third party billing, interagency billing, and International Military Education and Training (IMET) billing for three core-based statistical areas (CBSA) (high area wage index, low area wage index, and overseas).

**Table 1. Average FY 2021 Direct Care Inpatient ASA Rates**

<b>Wage Index</b>	<b>Average IMET Rates</b>	<b>Average Interagency Rates (IAR)</b>	<b>Average Full/TPC Rates</b>
Area Wage Index > 1.00	\$8,768.39	\$13,313.20	\$14,046.42
Area Wage Index ≤ 1.00	\$10,022.81	\$13,739.96	\$14,545.80
Overseas*	\$8,683.17	\$19,034.02	\$19,985.32

\* Hawaii and Alaska are not considered overseas for billing purposes.

The IMET program is a key funding component of U.S. security assistance that provides training on a grant basis to students from allied and friendly nations. Authority for the IMET program is found pursuant to Chapter 5, part II, Foreign Assistance Act 1961. Funding is appropriated from the International Affairs budget of the Department of State. Not all foreign national patients participate in the IMET program. The Interagency (IAR) ASA rates are used to bill other federal agencies. The full/Third Party Collection (TPC) ASA rates are used to bill insurance carriers, pay patients, and other payers.

Each MTF providing inpatient care has its own applied ASA rates (shown in Appendix A). The MTF-specific ASA rates are the average ASA rates adjusted for indirect medical education costs, if any, for the discharging hospital. The product of the discharge specific MS-RWP and the MTF-applied ASA rate is the charge submitted on the claim and is the amount payers will use for reimbursement purposes. The individual ASAs are published on the Defense Health Agency (DHA) UBO Website (<http://health.mil/Military-Health-Topics/Business-Support/Uniform-Business-Office>). Examples of how to calculate the reimbursement charge are shown in Section 2.0.

The ASA per MS-RWP used in the direct care system is comparable to procedures used by the Centers for Medicare and Medicaid Services (CMS) and TRICARE. The expenses represented by the ASAs include all direct care expenses associated with direct inpatient care. The inpatient ASAs includes the cost of both inpatient professional and institutional services. The ASA rates apply to reimbursement from TPC, IMET and IAR payers. Pursuant to the provisions of 10 United States Code (U.S.C.) 1095, the breakdown of total inpatient charges is ninety-three (93) percent for institutional charges and seven (7) percent for professional charges. When preparing bills for inpatient services, professional fees are based on the privileged provider services. The hospital institutional fees are based on the costs for support staff, facility costs, ancillary services, pharmacy, and supplies.

MTFs without inpatient services, whose providers perform inpatient care in a civilian facility for a DoD beneficiary, may bill payers the percentage of the ASA/MS-RWP based charge that represents professional services. In the absence of a MTF-applied ASA rate for the facility, the ASA rate used will be based on the average for the type of CBSA in which the MTF is located - areas with wage rate indices greater than 1.0, less than or equal to 1.0, or overseas. The MTF UBO must receive documentation of care provided in order to produce an appropriate bill.

### **1.1 Family Member Rate (FMR)**

The FY 2021 FMR is \$20.15 per day. The FMR is established by authority of 10 U.S.C., Section 1078.

### **2.0 Examples Applying ASAs to Compute Inpatient Stay Charges**

The cost to be recovered is the product of the MTF applied ASA rate and the MS-RWPs specific to the inpatient medical services provided. This includes the costs of both inpatient institutional and professional services. Billing in the examples below is at the full/TPC rate.

For each MS-DRG, TRICARE establishes short stay and long stay thresholds. An inlier is any discharge with a LOS greater than the short stay threshold, equal to or less than the long stay threshold. An outlier is any discharge with a LOS less than or equal to the short stay threshold or greater than the long stay threshold. Example charge computations are provided below for inlier, outlier, and transfer discharges. The full list of TRICARE MS-DRGs with MS-DRG case weights, long stay thresholds, short stay thresholds and other information is provided by accessing the MHS UBO Site located on the MHS Secure Site LaunchPad available to authorized UBO Service representative users with a Government Common Access Card, or at the TRICARE Rates and Reimbursement website (<http://health.mil/Military-Health-Topics/Business-Support/Rates-and-Reimbursement/Diagnosis-Related-Group-Rates>).

Table 2 provides the information used in the billing examples for a non-teaching hospital (DMIS ID 0075 – Fort Leonard Wood Army Community Hospital, Fort Leonard Wood, Missouri) in an Area Wage Index  $\leq 1.00$  location for a discharge in MS-DRG 762 – Vaginal Delivery W Sterilization/D&C W MCC. For this example, CY20 weights are used since the CY21 are not yet available.

**Table 2. Third Party Billing Examples**

MS-DRG Number	MS-DRG Description	MS-DRG Weight	Arithmetic Mean LOS	Geometric Mean LOS	Short Stay Threshold	Long Stay Threshold
762	Vaginal Delivery W Sterilization/D &C W MCC	0.8043	3.4	2.7	1	19

Hospital	Wage Index	Area Wage Rate Index	IME Adjustment	Group ASA	MTF-Applied TPC ASA
Fort Leonard Wood Army Community Hospital	Area Wage Index $\leq 1.0$	0.7723	1.0000	\$14,545.80	\$13,332.15

	Length of Stay (LOS)	Days Above Threshold	Relative Weighted Product (RWP)			TPC Amount
			Inlier	Outlier/Transfer	Total	
#1	7 days	0	0.8043	0	0.8043	\$10,723.05
#2	21 days	2	0.8043	0.1966	1.0009	\$13,344.15

Example #1 provides the example for the inlier LOS discharge in MS-DRG 762. The MS-RWP for an inlier case is the TRICARE MS-DRG weight of 0.8043. The MS-DRG weight used is the CY 2020 Version 37 TRICARE DRG weight.

- a) The FY 2021 MTF-Applied TPC ASA rate is \$13,332.15 (0075 Fort Leonard Wood Army Community Hospital's TPC rate as shown in Appendix A).
- b) The MTF amount to be recovered is the MS-DRG weight (0.8043) multiplied by the MTF-Applied TPC ASA (\$13,332.15).
- c) The inlier cost to be recovered is \$10,723.05 as computed below. TPC Amount Billed: MTF-Applied TPC ASA rate multiplied by the MS-DRG weight.

$$= \$13,332.15 \times 0.8043 = \$10,723.05$$

Example #2 provides the example for the outlier LOS discharge in MS-DRG 762. The total MS-RWP for an outlier case is a combination of the TRICARE MS-DRG weight plus additional MS-RWP credit for each day that the LOS exceeds the Long Stay Threshold. The charge is determined by multiplying the total MS-RWPs by the ASA amount. The outlier total MS-RWP value to be recovered is shown in the computation below.

- a) For the outlier MS-RWP value calculation, 33 percent of the per diem weight is multiplied by the number of outlier days. The number of outlier days is computed as the actual LOS minus the Long Stay Threshold. Per diem weight is determined by dividing by the MS-DRG weight by the Geometric Mean LOS.
- b) LOS Outlier MS-RWP value calculation
  - = 0.33 (MS-DRG Weight/Geometric Mean LOS) x (Patient LOS - Long Stay Threshold)
  - = 0.33 x (0.8043/2.7) x (21-19)
  - = 0.33 x 0.29789 (carry out to five decimal places) x (21-19)
  - = 0.09830 (carry out to five decimal places) x 2
  - = 0.1966 (carry out to four decimal places)
- c) The total MS RWP is the MS-DRG weight (0.8043) added to the LOS outlier MS-RWP value.

$$\text{Total MS-RWP: } 0.8043 + 0.1966 = 1.0009$$

d) The MTF amount to be recovered is the MTF-Applied TPC ASA rate (\$13,332.15) multiplied by the total MS-RWP.

TPC Amount Billed: MTF-Applied TPC ASA rate x Total MS-RWP

= \$13,332.15 x 1.0009

= \$13,344.15
